MOTIF

MAHOBA FORT (QILA)

Charkhari of the district Mahoba, 'the nagari of sage Mandav', known as the 'Kashmir' of Bundelkhand is an unique town of splendid architecture on tombs and have 21 ponds (sarovars) surrounded by hills and forests. Moreover, construction of the old 'Havelis' and markets is based on distinct architectural pattern. Being impressed of the beauty and flourishing state of the town, Maharaja Jagatraj, the second son of Maharaja Chhattrasal founded here a huge fort in 1720 AD, named as 'Mangalgarh ka Qila'. Later on the succeeding kings further constructed here beautiful courtiers hall and estate office in the basement of the fort with a giant main entrance gate as well. The kings of Charkhari of the Mahoba, being worshippers of Lord Shri Krishna, were keen to convert the getup of the place similar to Vrindaban and hence, made efforts to make their dream come true. Besides the attraction and beauty of the fort, the regional culture, art, folk dances and songs,of the region,a distinct culture of bundelkhand, attracts tourists.

Urban Primary Census Abstract 335

Annexures I to VII

Annexure I Number of villages under each Gram Panchayat 348
Annexure II Fertility and Mortality, 1991 Census 348
Annexure III Various measures of fertility and mean age at marriage, 1991 Census 349
Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991Census 350
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 351
Annexure VI Marital status of population as per 1991 Census 354
Annexure VII Age, Sex and Education in the district, 1991 Census 359
Annexure VIII Distribution of different mother tongues returned in 1991 Census 362

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage

enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5 The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

District Highlights - 2001 Census

1. District Mahoba ranks 70th in terms of population in the state.
2. The percentage share of urban population in the district is 21.9 as against 20.8 of the population in urban areas of the state.
3. Mahoba district has population density of 246 persons per sq.km.which is very low in camparison to the state to average of 690 persons per sq. km.
4. Mahoba district ranks 46th in terms of sex ratio (866) which is lower than the state average (898 females per one thousand males).
5. Mahoba district ranks 47th in literacy (53.3 percent) which is below than the state average of 56.3 percent.
6. There are only 79 uninhabited villages out of total 500 villages in the district.
7. Decadal growth rate of the district 21.7 is lower than the state average of 25.8.
8. Kulpahar tahsil has the highest number of inhabited villages 225 while Charkhari tahsil has the lowest number of inhabited villages (92).
9. The district has five towns. No new towns have been added after 1991 census, and no town has been declassified.
10. There are 118,970 households in the district accounting for 0.5 per cent of the total households in the state. The average size of households in the district is 6.0 persons.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The Mahoba district has been created on 9th Feb. 95 by carving out the southern part of the district Hamirpur with entire three tahsils namely Mahoba, Charkhari and Kulpahar transferring to the newly created district. The district is named after its headquarters town of Mahoba. Mahoba is believed to have existed from time in memorial, had different names at different times. During the Treta Yuga it is believed to have been known as Kekpur, and in the Dwapar Yuga as Patanpur. It's present name, Mahoba is said to be derived from the great celebration or mahotsava, performed by its reputed founder, the Chandel Raja Chandravarman, about 800 A.D. In Chand Bardai's account, entitled the Mahoba Khand, the town is called Mahatsanagar. From such evidence as is available it would appear that the civil capital of Chandels was removed from Khajuraho and established here about 900 A.D. For the earliest Chandel sovereign rulers locally commemorated as Rahila, the fifth of the dynasty, made Rahila Sagar, with a fine granite temple dedicated to Sun God on its bank, which lies about 3 km to the south west of Mahoba. Kirtivarman and Madanvarman, the two most illustrious members of the Chandel dynasty, are remembered for two fine lakes, Kirat Sagar and Madan Sagar, which bear their names.

Parmala was the last prominent ruler of the Chandel dynasty. About 1182 A.D. Prithviraja attacked Mahoba and a fierce battle was fought with

Alha and Udal, the Banaphar generals of Parmala, In this campaign both sides suffered serious losses, Udal was killed and Alha wounded. Prithviraja, who was ultimately sucecessful , celebrated his victory by sacking king of Mahoba, After the downfall of the Chandels, the place lost its glory and ceased to be of much importance, though it was the headquarters of a Mahal in Mughal times. The extent of the place in the days of its glory undoubtedly was greater than is covered by the present town which still has a number of histarical, archealogical, religious and scenic spots of interest. The most noticeable feature of the town is the lakes or tanks (Sagar) which are formed by massive embankments thrown across shallow valleys, Mahoba district is known as Alha-Udal Nagari. It is also famous for its Pan (betel leaves)

According to the Puranic tradition, the earliest known Aryan people who settled in this region, lying between the Yamuna and Vindhyas, were known as Chedis. They were said to be an offshoot of the Yadus(Yadavas) named after Yadu, a descendent of Pururavas Aila, the progenitor to the lunar race. They do not however, appear to be important clan in the Rigvedic times as they are not mentioned as participants in the famous Dasharajna Yudha (battle of ten kings). However, their powerful king, Kasi, finds a mention in a Danastuti found at the end of a hymn in the Rigveda (viii 537-38).

Later Sagara, the king of Ayodhya, subjugated the whole of northern India. After his death the second son of Vidarbha, a Yadava king, Kasika extended his power and became the King of Chedi, the land of Chedis then comprising the tract between the Chambal and the Ken, which now corresponds to modern Bundelkhand, including Mahoba district. It was due to the Chedis that the region was brought under the Aryan way of life. It also appears that considerable admixture took place between Chedis and the local non-Aryans.

A few generations later, the Chedi kingdom was conquered by Vasu, the eighth descendant from Kuru of Hastinapur, whence he obtained the epittel Chaidyoparichara (overcomer of Chaidyas). He founded a dynasty and was the foremost monarch of the day with the title of Chakravartin.

After the great Mahabharata war, the dynasty of chedis probably had come to an end. Their place being taken over either by the Haihayas or the Vitihotras. But the Chedi Kingdom is mentioned among the sixteen premier states (Mahajanpadas) of northern India, which fourished about 600 B.C. It roughly corresponded to modern Bundelkhand and adjacent tracts, including this district, and was ruled probably by Vitihotras, whose power declined about the middle of the sixth centuary B. C.

Very little history is known of the subsequent period about this region till the fourth centuary B.C. when Mahapadma Nanda who is described as the exterminator of the Khsatriya race uprooted the Vitihotra dynasty and extended his own rule over this region including this district. After the Nandas were overthrown, the district became part of the Mauryan empire. The Sungas suceeded the Mauryas but their rule was confined only to the central portion of the old Maurya empire including Bundelkhand.

The history of the district is enveloped in darkness for about half a centuary after Harsha's death.During this period of political instability, a branch of the Gahirwara, descendants of Raja Nala, might have come to settle at Mahoba and its immediate neighbourhood. The massive embakkment of the Vijai Sagar (Lake) and the construction of the lake itself in addition to lakes at Biki and Pawa in Mahoba pargana are assigned to the Gahirawaras. In addition to these few other lakes and tanks in the district are also ascribed to Gahirwara rulers. The other parts of the district were occupied by the Gonds, Kols, Bhols etc. A part of the district was held by the Bhars.

During the first half of the eighth centuary Yasho verman, the ruler of Kannauj, who is credited with great expeditions and conquest, brought the district under his sway. After the death of Yashovarman mist again gathers over the history of this district in the eight century. The Pratihara ruler Vatsaraja established his superemacy over a large part of the northern India. Bundelkhand including this district seems to have come under his sway. The other important ruler of this dynasty was Nagbhatta II who extended his kingdom far and wide.

In the eleventh century a Kalchuri Rajput Hamira Deo founded the town Hamirpur, who arrived there from Alwar and took shelter with one Bunda, an Ahir. The remains of the fort built by Hamira Deo are still found in Hamirpur. The Kirtivarman (1060-1100 A.D.), the king of Chandel, dyansty, defeated the Kalchuri king Karna Dev. Parmardidva (1165-1202 A.D) popularly known as Parmala, was the last great king of Chandel dynasty. He was a

succesful king. The most important event of this king's reign was his conflict with Prithviraja III, the famous Chandan king of Delhi. In this battle Malkhan a samant of Parmal met a heroic death due to Mahil who was also a samant of Parmal but conspired with Prithviraj and was also responsible for Alha and Udal, the two Banaphar chiefs and the best warriors of the day, to have left Mahoba earlier to seek refuge in the court of Jaichand, rular of Kannauj. Parmal and his queen called the two Banaphar chiefs to return back, to Mahoba but they did not come back. The Jaichand, king of Kannauj who was bitter enemy of Prithviraj, sent a force along with Alha, Udal to Mahoba to help king Parmal in safety to Mahoba. The Chandels were greatly encouraged on the arrival of the Banaphar chiefs as the head of Kannauj army at Mahoba and preparations were made for the final encounter. In this fierce battle, the king Parmal became nervous and he left the battle field, Alha and Udal continued the fight. In this fight Brahamjil, Udal, the sons of Jaichand and all brave chandel Ganerals were killed. Alha was wounded and Chandels were defeated. Thus the Mahoba, capital of Chandel kingdom was occupied by Prithviraj in 1182 A.D. Its evidence is present in Siva temples situated in Madanpura village.

Prithviraj, however did not keep Chandels' territory under his control for longtime. Parmal established his hold over Mahoba within a short time. The other parts of his territories were also recovered by him while Prithviraj was engaged in fighting with Shihab-ud-din Ghuri in 1191-92 and the death of Prithviraj in battlefield gave Parmal an opportunity of further revcovery of his position. But due to shock of defeat in the hands of Chauhans he left Mahoba and shifted to Kalinjar, as seat of government. Here in 1202,Parmal had to face a greater enemy Qautub-ud-din Aibak. He was defeated in battle and died. Thus, Chandel dynasty ended in 1203 A.D.

With the capture of Kalinjar by the Turks, in 1203, the history of Chandel dynasty as one of the major powers of northern India virtually came to an end. But the power of the Chandels was not totally suppressed and within a compel of years they had already regained the possission of Kalinjar under Trailokyavarman the son and successor of Parmal and took the region of Mahoba under his control till 1231 and inspite of repeated attack this celebrated fort of Kalinjar continued to remain in the hands of Chandels till the 16th century.

After which Mahoba came under Shihabuddin Ghuri, sometime under Gonds, Ganarwar of Banaras, and by Raja Bhar of Ujjain and later came under sultan Ala-ud-din Khilji (1294-1316), Sultan Ghiyas-ud-din Tughlaq, and Sultan Firoz-Shah Tughlaq (1351-1388). Timur's invasion in 1398-99, at Delhi, administration of the provinces of the sultanate was affected. The governer of the provinces assumed an independent status. Thus Mahoba came into hands of Mahmud khan, son of Malukzada the governer of Kalpi. From this time onwards Mahoba appears to have become a mere dependency of Kalpi and ceased to be the political centre of Bundelkhand.

The history of the district remained almost blank till the end of the fifteenth century. The only exception is providedby Sikandar Lodi, who had possesed the region in 1488 and distroyed the Chandel temples. By the beginning of 16th century the power of Chandels was declining, the Bundelas were quitely increasing their power. In 1507, Rudra Pratap had occupied this region and Mahoba fell under Bundela rule. The fight between Mughal forces and Bundela on west sides of Betwa and Dhasan river, resulted in the surrender of fortress of Kalinjar by the Raja Ram Chand Baghel in 1560, and therefore Mahoba became an integral part of the imperial dominions.

During Akbar's reign (1556-1605), some administrative changes had been done in the Mahoba region. Champat Rai and his son Chhatrasal became the hero among the Bindelas in Shahjahan and Aurangjeb's period. They had Mahoba in their possesion. In his time the Bundela race became a power in India. The Bindelas had become masters of the whole country to the west of Chambal and the Yamuna.

The town of Mahoba, with the surrounding area, remained in the state of Jalaun, untill , the death of last representative of the ruling house (Pandits) in 1840, After that at was passed to the British. The pargana known as Jaitpur was ruled by the descendents of Chhatrasal until 1849. The later history of the district upto 1857 is chiefly concerned with the defficulities of fiscal administration.

During 1857 the freedom struggle was precceded by wide spread civil disorder. The main aim was to get rid of British rule. The chiefs of Mahoba were fighting for their kingdoms. The masses were for freedom and the Muslims in particular for the restoration of their former sway. The 20th century

began with the growth of nationalism in the whole of India and Mahoba was no exception. It took part in all movements for freedom under the leadership of national leaders and freedom fighters. On August 15,1947 the country, and with it the Mahoba district was liberated finally from alien rule and declared independence. The news of Mahatma Gandhi's assasination (on January 30,1948), plunged the whole district into deep mourning.

With the adoption of the contitution of India on January 26,1950 India became a Sovereign Democratic Republic.

(iii) Administrative Set-up:

District Mahoba was created by bifurcating district Hamirpur on 9th Feb. 1995. Before its creation it was under Jhansi division but now it is one of the districts of Chitrakoot division. For administrative purposes, the district is divided into three tahsils namely Mahoba, Charkhri and Kulpahar. The district is further divided into four Community Development Blocks which are Kabrai, Charkhari, Jaitpur and Panwari. The district has 226 Gram Sabhas, 500 revenue villages in which 421 inhabited and 79 unhabited villages and 5 towns in which two are NPP ie. Mahoba and Charkhari and 3 town Panchayats ie Kabrai , Kharela and Kulpahar.

Jurisdictional Changes (1991-2000) :

District Mahoba was created on 9th Feb, 1995 by carving out three tahsils namely Kulpahar, Charkhari and Mahoba from district Hamirpur. It is now one of the districts of the Chitrakoot Division. Details are given below:-

S. No.	Name of District/ Tahsil	Notification No. and Date	Juridicitonal Changes	
			Added	Substracted
1	2	3	4	5
29	MAHOBA	5-4(1)/88-(359)-R-5 dated 9.02.1995	Entire 3 tahsils, viz. Mahoba, with two towns, Kulpahar with one town and Charkhari with two towns transferred from Hamirpur district.	

District Administration:

District administration comprises of Revenue, Development Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate, (Finance and Revenue) i.e., ADM (F & R). At the tahsil level Sub Divisional Magistrate is in-charge, who.is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. for Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a departmental at district level office, departments point of view the district is divided into community development block. At Community Development Block levels are Block Development Officers (BDO) looks after development works at community development block level. Assistant Development Officer and village Development Officers at village level.

Under the police set-up Senior Superitendent of Police in big district and Superintendent of Police in small district are incharge. Additional Superintendent of Police (ASP) and their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas alloted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The Judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, they are assisted by Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features:

(1) Location and Size:

The district lies on the Sourthern boundary of Uttar Pradesh between the parallel of 25° 5' N and 25°37'north latitude and 79°17' E and 80°10' east

longitude.

It is bounded in north by district Hamirpur, in the south by Madhya Pradesh state, in the east by district Banda and in west by district Jhansi. The area of the district is 2,884 square kms.

(2) Physiography:-

On the basis of geology, soil, topography, climate and natural vegetation, the district is sub-divided in the following regions.

1. Birma Basin.
2. Mahoba Plateau.

(1) Birma Basin:- This region spread over Charkhari, Kulpahar and Mahoba Tahsils (partly). It is situated in the northern part of the district. Its geology is of Recent age. It has been carved out considering the drainage from the basin of river Birma and its tributaries, the Birma is the artery of this region which originates from Mahoba uplands and joins with the Betwa within the district. This river flows from south to north direction whereas its tributaries meet with the main channel from east and west sides. The region is infested with ravines occurring along these tributaries. Due to topographical limitations there are constraint in irrigation and transport. The area is connected with roads from other parts of the district but intra-linked facilities are scanty. Kulpahar is the only urban centre which happens to be the tahsil headquarters also.

(2) Mahoba Plateau:- The region spreads over part of Kulpahar, Charkhari and Mahoba tahsils and is situated in the southern part of the district. It is formed of Bundelkhand granite gneisses of Archaean age. The region is originating place of the rivers such as Birma, Keolari, Arjun flowing in the district. Topographically the area is rugged and lacks irrigational facilities. There are number of forest belts located here. Due to topographical limitations not only the transportation facilities are scanty but the village are also distantly located.

(3) Drainage:-

Main rivers of the district are Dhasan, Urmel, Birma, Chandrawal and Arjun. Besides these there are many minor streams. Dhasan, originating from the Vindhyachal flows through the Charkhari tahsil forming the western boundry of the district. The Urmil also coming from Vindhyachal separates tahsils charkhari and Mahoba and flows west to the east. The Birma a perennial stream nearby divides the district into two equals portions between east and west. It rises in the hilly tracts, west of Jaitpur in tahsil Kulpahar. It receives the Gunchi at Itaura in Kulpahar and eventually gathers volume and becomes broader. These rivers and streams constitute the natural drainage lines of the district apart from the facts that because of the position of hills and the course of streams draining between two rocky outcrops. These take advantage to form artificial lakes and tanks for which this district is known. There are more than forty such lakes in the district, in which largest is Belatal, Among other large lakes are Bijai sagar, Madan sagar and Kirat sagar and Majhgwan. There are four Bandh for irrigation purposes such as Chandrawal and Kabrai dam on Chandrawal river Arjundam on Arjun river and wimel dam aon wimel river.

(4) Climate:-

Th climate of the district is characterized by an intensely hot summer, and intensely cold season.The year may be divided in four seasons. The summer season from March to middle of June is followed by the south-west-monsoon season from mid June to the end of September. October and the first half of November constitute the post monsoon or transition period. The cold season is from about the middle of November to February.

According to statistical Magazine of the year 1999-2000, the highest temperature of the district recorded was 46.6 °C and the minimum 2.6 °C. The normal rainfall in the district recorded was 864 mm and the actual rainfall being 709 mm.

During the monsoon season the relative humidity is high being over 80 percent. Thereafter humidity decreases progressively and by summer, which is the driest part of the year, relative humidity in the afternoons go down to 25 percent or less.

(5) Natural Economic Resources

Forestry:-

Most of the forests in the district are managed by the forest department. There are also certain jungle areas called civil forests which are under management of the Gaon Sabhas. The total forest area in the district in the year 1997-1998 was 14,826 hectares.

In tahsils Charkhari, Kulpahar and Mahoba, there are hills as well as considerable area is covered with forests. The trees that grows in the great profusion in these forests is tendu. Other common species besides the mahua are the semal, dudhi, dhawa, gurja,

dhak, Khair and kardhai.

Khair is industrially more important. Besides scrub, reeds, kans and other grass are profusely found. They provide useful grazing area to cattle. Most of the requirements of the village people for building materials, agricultural implements, fuel, grass for thatching and rope making are met from forests. Tendu leaves for bidi industry, khair for catechu making and numerous medicinal herbs and shrubs are also obtained from the forests.

The wild life of the district has decreased considerably. Among large animals, the tiger has become virtually non-existent in the district owing to indiscriminate shooting in the past. The leopard is occasionally found in the rocky hills and forests of tahsil Mahoba, Kulpahar and Charkhari. It is dangerous for cattles and men. The bear can be seen occasionally. Wolf and hyaena are found in the hills and ravines. Jackal and fox occur everywhere while pig abound every and play havock with the crops throughout the district. The nilgai haunt the forest tract, and large herds of samber frequent the wide plains. The Gazella is found everywhere in the ravines and in the hill tract. The hare is common but the monkey is uncommon, however in Mahoba and some other places, troops of langur are exceedingly troublsome.

Peafowl, grey partridge, button quail are commonly found in the district. The painted partridge is common in the hilly tracts and, blue-rock and green pigeon are found in most places of the district Among migratory binds water fowls, various species of geese, duck and teal visit the district in the cold season in the large lakes. In the same localities and in tanks the snipe is also common at the same season; while numerous varities of cranes, storks and waders congregate wherever water is found. The avifauna of the district include all the usual species of doves, rollers, parrots and other passerine and nonpasserine birds.

Snakes and scorpions are numerous, and every year a number of death are reported from snake bite. The majority of snake species found in the district is nonpoisionous. Among the venomous snakes found in the district, the chief are the Cobra, the krait and the Russell's viper. The crocodile of both varities; gharial and magar are found in all the large and sometime even the smaller streams. The chameleon and house lizards are common everywhere, the monitor lizard being found in the hilly tracts.

The rivers and the tanks of the district abound in fish of the usual varities common to the plains. The chief species found are the Mahaseer, rohu, tengra, parhin, saul, kalabans and nain. Other species sach as moi, bhankur, and baam or eel are also caught.

Minerals and Mining:-

The district is made up of hills and plateau portion. A few kms. further south, the hills become more frequent and the all three tahsils of Mahoba and Kulpahar, Charkhari may be described as hilly tracts. At Gaurhari in Charkhari block in Kulpahar lies the Gora hills of white and light grey stones which are used in the manufacture of toys, paper, buttons, ceramics and pots. The rocks available near Jaitpur are also used in ceramics. Gypsum is available in Surite Puraini and Pardhi. In Kabrai town, which is now called stone town, the Gitti (stone chips) making from granite stones is being done in a very large scale through numerous crushers.

Soil:-

The soil of the district consist of well known Bundelkhandi varicties, mar, kabar, parua and rakar, former two commouly known as black and the latter as light soils. Mar is often called 'Black Cotton Soil'. It varies greatly in colour, consistency and fertility and is highly argillaceous, calcareous and adhesive. It contains small lumps of Kankar. It is friable, retentive of moistare and highly fertile. It is found in Kabrai C.D. block, Kabar range form slretches of a rich dark black and light brown. Its chief characteristics is the extreme adhesiveness, due to which it quickly dries and cake is formed into hard blocks. Generally it appears in its superior forms of a fine clay tinged with organic matter and in this shape is as valueable as mar. It founds in Charkhari and Kabrai Blocks.

Parua is a light coloured sandy soil found in many forms. Occasionally parua is found in a extremely sandy form, generally in the neighbourhood of rivers where, it is commonly called bhat. It is found in Kabrai and Charkhari C.D blocks. Rakar is refuse soil which occurs on sloping ground where the action of water has tended to denude the earth off all its better qualities. It is extremely porous and needs plentiful and regular rain. It is found in Kabrai and Panwari blocks.

Other conventional soils consist of the highly manured and irrigated plots that surround the village sites in which vegetable crops are raised, particularly

by the Kachhies, known as kachhwara or Kachhiana, and the soils of the land that lies just beyond the kachhiana. They are known as goind, gauhan, khero or khirwa, the last two terms expressing feature common to many Bundelkhand villages which lie on elevated sites called kheras. Soils subject to fluvial action are divided into Kachhar and turi, the latter found along the edge of the rivers or in the beds of nullahs, which is covered with water in the rains and fertilized regularly by silt while kachhar lies higher up in the shelving bank, and though less liable to benefit from regular silt, is also less liable to destruction from the streams.

Land and Land use Pattern:-

Land use pattern as recorded in statistical magazine of the year 1999-2000 indicates that in the year 1997-1998 the total area reported was 299,89 hectare, out of which the forest covered 14,826 hectare, cultiviable barren (Banjar) land 13,092 hectare, present fallow (Parti) 9,244 hectares, other fallow 7,340 hectare, usar and uncultivable land 10,304 hectare, and land used other than agriculture 25,176 hectare, Total area sown reported was 249,754 hectare, area sown more than once was 32,168 hectare. Net sown area was 218,486 hectare. Total irrigated area was 72,808 hectares, and percentage of irrigated area from total sown area was 29.2%.

Livelihood of the rural area of Mahoba district is mainly depended on agriculture but the boring for under ground water is unsucessful due to rockey area. Irrigation work is depended only on the canals or on the pumpsets thus the production per hectare becomes less.

According to agriculture census 1990-91, the operatinol land holdings were 117,542 in numbers having 217,657 hectare in the district. In which below 0.5 hectare size holdings were 26,883 in numbers having an area of 7,878 hect. , 0.5 to 1.0 hect. sized were 27,387 numbers having 19,730 hectare area, 1.0 to 2.0 hect. sized holdings were 30,737 in numbers with area of 46,890 hect., 2.0 to 4.0 hect. sized was 19,884 having 57,638 hect. area, 4.0 to 10.0 hect. sized were 11,153 in numbers having area of 63,225 hect. Thus for the size of upto 2.00 hect holdings, the numbers of holdings were more than area in comprasion to above 2 hect. sized holdings.

Agriculture and Crop Pattern:-

The main three harvests of the district are Kharif , Rabi and Zaid. The Kharif crop are sown in June-July and reaped in Oct-Dec. The preparations for the Rabi sowing commence after the cessation of the rains. The Rabi crops are harvested from the month of March and the operations last sometimes up to May. The Zaid is insignificant in the area.

The principal kharif crop in the district is the big millet or jowar which alone or in combination with arhar, occupies a major kharif area. Next is Paddy followed by Bajra which are the other important crops of Kharif. Gram leads all other cereals in Rabi crop. It is grown in almost all soils, from the finest variety of mar to the better fields of rakar. Wheat takes second place among the Rabi cereals and is sown in combination with gram, barley, pea or mustard. Barley has never been a fovourite crop in these parts. Of the pulses, Arhar and Masur occupy a sizeable area in the district which has an important place in the state as a profile grower of these pulses.

Non food crops:- Pan (betel leaf) has been cultivated at Mahoba for centuries. One mahal is called the dariba or pan shop. Rath is another place famous for its cultivation which is entirely in the hands of Tambolis or Barais. The renowned Mahoba Pan is famous throughout northern India. Oil seeds like linseed, til, mustard and castor, sugarcane, sunhemp, tobacco, vegetables are the chief non-food crops of the district. The district occupies leading position for the cultivation of oilseeds.

In the year 97-98 area under main crops were as follows, total pulses 128,892 hectare with 52% crop area, wheat 69,343 hect. with 27.9%crop area, total oilseeds in 3149.hectare with 12.9%crop area. Out of total area of 247,867 hectare Jowar was sown in 12,750 hectare (5.2%) and other main crops were 53,84 hect. (2.2%).

Total production of wheat in the district in the year 1997-1998 was 118,336 metric tonne, Jowar 8,614 mt., pea 53,137 mt, gram 34,383 mt. sugarcane 39,485 mt., paddy 1,733 mt., Urd 6,176 m.t., moong 1,354 m.t. masur 9,731 m.t., arhar 4,268 m.t., Lahi/ Sarson 1,423 m.t. , Alsi 4,258 m.t., til 609 m.t., ground nut 7,623 m.t., potatto 983 m.t., tabacco 332 m.t. haldi 186 m.t., Thus the total cereals production was 132,595 m.t .with pulses 109,099 m.t., total food grains 350,793 m.t. total oilseeds 14,703 m.t. On observation of these data,it seems that wheat production leads in the food grains crops and sugercane is foremost commercial crop.

In above mentioned years, average produce of crops in quintals per hectares was as follows, wheat

17 1 qutl/ hect., paddy 11.3, maize 15.2, pea 12.2, gram 7.4, etc, sugarcane 364.45, potatto 146.7, oilseeds 4.7, pulses 8.45, and food grains 11.3 quintal per hect.

In the year1998-99, the main facilities in the agriculture sector was as follows, 25 Seed godown/ Fertilzer Depot 25 with capacity of 5,104 m.t., 39 rural godowns with a capacity of 3,180,m.t. on insecticide depot 4 in numbers and with capacity of 269m.t., on One seed growing farm One cold storage with capacity of 560m.t.on, 14 agriculture service centre, 2 Krihsi Utpadan Mandi Samiti and 788 Biogasplants.

Warehousing godowens in the district during 1998-99 were as follows, F.C.I managed godowns were in 8 numbers with capacity of 11,250 m.t., One central warehousing, godown with capacity of 5,000 m t. One godown of State warehousing carporation with capacity of 1,260 m.t.,29 Cooperative godowns with capacity of 7,800 m.t.and others managed five godowns having capacity of 750 m.t..

Irrigation:-

Concentration of irrigation is 31.2 percent in the district. Main cause of scanty irrigation facility is lack of irrigation sources. The large irrigation projects are not feasible in the district. Under the medium irrigation projects, the Urmil dam project, Chandrawal dam project and Lahchera dam project are working in the district through which agriculture land is irrigated Urmil dam project on the Urmil river, is having the irrigation capacity of 4.8 thousand hectares. Besides these, only one more canal project is working , which is situated in Jaitpur. Rs 22.2 lakh has been spent on this canal irrigation network which is irrigating on area of 2,243 hect. In the district irrigation facility is available through Virat Sagar dam, New Pahadi Riwai dam and Arjun dam also. The district is provided with canals taken out from the rivers, like Dhasan, Chandrawal, Arjun and Urmil or those fed by the large number of natural lakes and tanks and artificial reservoirs. Wells are also an important source of water for the crops and constitute a major source of irrigation. Construction of wells fitted with electric or diesel pumps and rahats are important features of the minor irrigation programme.

Irrigation details in the district is as follows. In the year 1997-98, net sown area were 218,486 hectares in which net irrgated area was 71,123 hect. which was 32.6% of the cropped area. Out of the total irrigated area of 72,808 hectares canals irrigated an area of 30,351 hect, which is 41% of the total irrigated area followed by wells 28,004 hect. (38.5%), by others sources 11,290 hectares with 15.5%, by ponds 2,343 hect. (3.0) and by tube wells 820 hect, (1.1).

Irrigation facilities provided by different sources in the year 1998-99 are canals with 455 kms length, 3 Govt tube wells 429 pucca wells 1295 pumpsets, 99 Pumpsets fitted on boring, 19 private tubewells and 4595 baghi.

The irrigation capacity in the district may be increased by implementing soil conservation programme effectively by water storage in the cultivated field and making the Checkdam on the nullahas.

Animal Husbandry:-

According to the livestock census 1993, the livestock population of the district includes 222,013 cows, 59,710 buffaloes, 23,200 sheep, 122,362 goats 381 horses and poneys, 17,117 pigs and 24,490 other animals. Total livestocks were 469,273. According to the statistics available from the statistical Magazine there were 9 vertinery hospitals, 10 Animal husbandry development centres, 3 artificial insemination centres, 7 subcenters, one sheep development centre and three pig development centres were working in the district for the development and quality control of livestock under the state/central govt.

By which livestock fertilization improving, prevention and treatment of livestock, rich fodder development programmee are conducting. Since 30.7.99, in the district through the 17 committee, the dairy milk production work is doing. The total poultry in the district was 42442 in Neos.

Fishery:-

The district has 16 departmental ponds (reservoirs) having an area of 3893.34 hectares. In the year 1999-2000, 22 hectares area ponds have been given on lease. Fish of the usual varieties common to the plains are found in a abundance in the rivers and jhils(lakes) and ponds of the district. In the 99-00, 84.49 lakhs of fingerlings were distributed and 23.25 lakhs fish seeds were producted alongwith 1204 quintals of fish was produced.

Industry:-

Large scale industries are totally absent in the district, 851 small scale industries had been registered in the district till the year 2000, At least 50 units of

stone crusher are working near kabrai and other parts of the district. Apart from this the dal mill, oil mill, aluminium utensils, agriculture implements, steel fabrication casting wooden furniture, Ice candy, Brass idols and Gaura stone ware articles factories are also working in the district.

For the rapid development of small scale industry District Industries Centre was established in the year 78-79 by the Government of India. This department,s main aim is to develop the small industries on the basis of facilities given by the government in this regard. For unemployed youths to give self employment scheme conducted by the Govt of India, by launching the Pradhan Mantri Rojgar Yojana, since 2nd oct 1993, under this scheme for industry and service profession an amt. Of maximum upto Rs 2 lakhs and for occupation purpose and amount of Rs one lakh maximum, taken as a loan from nationalised bank is provided.

Mahoba district is zero in the industrial sector, there is no large or medium scale industries established. Therefore for development of Bundelkhand and rapid industrilization, it is necessary for establishment the new units.

In the year 1998-99, there were 3 Asthan (industrial estate) in the district, 8 Sheds were allotted in which 4 was working, number of plots allotted was 10 in which 3 were working and average numbers of employee were 100, by which 1550 thousand ruppes worth production were made.

Trade and Commerce:-

Prosperity of an area depends largely on the volume of trade at that place. The articles of trade exported from the district are mainly agricultural commoditities like gram, pulses, ghee, raw cotton, pan (betel leaves), Jowar and oil seeds (til linseed and mahua). The chief imports were refined as well as un-refined sugar, rice, wheat, salt, kerosene oil and cotton piece-goods. The bulk of imports come from Kanpur and rest from Jhansi and Madhya Pradesh.

The important wholesale markets (Mandis) of the district are located at Charkhari, Panwari and Kabrai. The common requirements of the villager and those residing in the urban areas of the district are generally met by traders and pedlars operating in the local bazars. In rural areas the bazars are held on fixed days in a week and are known as hats.

Transport:-

The district is well connected by rail and road transport. There are 7 railway stations (including halt) in the district. The length of broad gauge railway line passing through the district is 75 kms. According to statistical Magazine of the year 1999-2000 in the year 97-98 no national highway passes through the district. However, state highway passing through the district is 136 kms. Main district roads are 79 kms long where as district and rural roads are 353 km. long. Roads under District Board are 11 km long while 37 km long roads are under local self government (local bodies). Thus the total metalled road length is 616 kms. Means of road transport in the district are buses, and private buses, taxi, jeeps, trucks etc. 415 inhabited villages are in Mahoba district, in which 56 villages of below 1000 population , 32 villages between the population having 1000 to 1499, and 57 villages of more than 1500 population have been linked by the metalled roads or pucca roads, thus 135 villages were connected to the metalled roads in the district till the year 1997-98.

Electricity and Power:-

Electricity plays an important role in the economic development. Total consumption of electricity during the year 1998-99 was 31,575 thousand kwh. Largest consumer of electricity was in domestic sector which consumed 11,235 thousand kwh followed by commercial sector 7,463 thousand kwh, industrial sector 5,849 thousand kwh, agriculture sector 3,124 thousand kwh, public light 2,018 thousand kwh and public water suply and sainitation 1,706 thousand kwh., According to central power authority's difination, The 230 villages have been electrified out of 415 inhabited villages, simaltaniously 218 Harijan (scheduled castes) localties also have been electrified till the year 1998-99. 218 villages have been electrified by the L.T. mains till 1998-99 and 553 private tubewells and pumping sets have been energinised by the electricity.

Gram Panchayat, its composition Jurisdicton and role in village development :-

A Gram Panchayat acts as the executive of the Gram Sabha. It is vital for village development.

Composition:- The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 226 Gram Sabhas in the district. It is necessary that the village panchayat should have a member belonging to the scheduled caste ans also a woman member. If they not elected, then the government itself appoints two such members. The village panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the vilagers.

Its Terms:- The new Panchayat Raj act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissovlved earlier by the state government, if it fails to perform its dunty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be abtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualifications:- In order to be elected to a village panchayat, a candidate should possess the following qualifications:

(1) He should be a resident of the village concerned and his name should be in the vober's list of the village.

(2) He should be twenty five year old.

(3) He should be mentally and physically sound.

(4) He should not be a proclaimed offender.

Functions:- A gram panchayat is entrusted with various social economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets mettalled roads build form the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, in sectisidies, Chemical manures, improved implements and other such facilities with the help of the Block Development officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states the gram Panchyat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposed fine upto Rs 100/-.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc. have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house

number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously;

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits and

iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia,
25 Chero
26 Dabgar
27 Dhangar
28 Dhanuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
38 Habura
39 Hari
40 Hela
41 Jhusia, Jatawa
42 Kalabaz
43 Kanjar
44 Kapariya
45 Karwal
46 Khairaha
47 Kharwar
(excluding Banbasi)
48 Khatik
49 Khorot
50 Kol
51 Kori
52 Korwa
53 Lalbegi
54 Majhwar
55 Mazhabi
56 Musahar
57 Nat
58 Pankha
59 Parahiya
60 Pasi, Tarmali
61 Patari
62 Rawat
63 Saharya
64 Sanaurhiya
65 Sansiya
66 Shilpkar
67 Turaiha

Scheduled Tribes

33	Dusadh	1	Bhotia
34	Gharami	2	Buksa
35	Ghasiya	3	Jaunsari
36	Gond	4	Raji
37	Gual	5	Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as

wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5 This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

Number of infant deaths of

$$= \frac{\text{7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

The total population of the district is 708,447 in which 553,552 live in rural and rest 154,895 in urban parts. There are three tahsils in the district namely Kulpahar, Mahoba and Charkhari. The most populous tahsil is Kulpahar followed by Mahoba. Charkhari is least populated tahsil. The urban population in the district is 21. 9.percent. The urban population is maximum at about 36.3 percent in Mahoba tahsil. There are 500 revenue villages in the district out of which 421 are inhabited at the 2001 Census and remaining 79 are un-inhabited. The total rural population of 553,552 is spread over 4 CD Blocks. The most populous CD Block is Kabrai (Mahoba) with a population of 175,708, but the maximum number of inhabited villages (121) are in Panwari CD Block. 10.2 per cent inhabited villages have a population of less than 200. Higest number of 117 villages (27.8 per cent) were in the population density rang of 101-200 in the rural area of the district, 95 villages were with a population density range of 201-

300 per square kilometre, Such villages contain as much as about 24.8 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 154,895 as much as 78,782 live in Mahoba (NPP) the next big town is Charkhari (NPP) with a population of 23,940. The above two are class II and III towns having the civic status of Nagar Palika parishad (NPP). Rest of Three.towns are Nagar Panchayat (N.P.) out of which Kabrai is Class III town and Kharela and Kulpahar are Class IV towns Kulpahar tahsil contain Kulpahar town, Charkhari tahsil has Kharela and Charkhari town, while Mahoba tahsil has Kabrai and Mahoba towns.

Population growth:

At the present territorial jurisdication the population of the district was 581,979 at 1991 Census and growing by 21.7 percent during the decade 1991-2001 it is 708,447 at 2001 Census. The decadal growth of population at 21.7 percent in the district has been at lower level than in the state at 25.8 percents.

Population Density:

The district has area of 2,884 square kilometre. The population density in the district is 246 In the rural areas of the district the density is196.

Sex-Ratio:

The sex-ratio in the district at 866 which is lower than the state level (898). Indeed the sex- ratio at the district has all along been high in the district as against to the state since 1901except between 1981-2001. As against to urban areas of the district the sex-ratio is lower in rural areas with exception in the years 1931,1941,1961and 1971. Among tahsils, highest sex-ratio is in Kulpahar and lowest in Charkhari. Among CD Block the sex-ratio is highest in Jaitpur at 875 and lowest in Charkhari and Kabrai (Mahoba) at 857. Out of 421 inhabited villages in the district there are 36.1 per cent villages (with 51.3 per cent of rural population) which are having a sex-ratio in the range of 850-899. In the urban parts of the district the sex-ratio is 878 and highest of 914 in Kulpahar (NP) and lowest of 850 in Kabrai (NP) The sex-ratio of population in the age-group 0-6 is 901 in the district which is lower than the state at 916. As against a sex-ratio of 904 in the age-group 0-6 of rural population of the district, it is highest at 918 in Panwari CD Block and lowest at 882 in Jaitpur CD Block. It may be noted that out of 421 inhabited villages in the district in 16.4 per cent of villages with 22.5 per cent of rural population the sex-ratio in the age-group 0-6 is in the range of 900-949. As against the 0-6 age group sex-ratio of 904 in the rural area of the district it is only 892 in urban areas. Among towns this sex-ratio is highest at 901 in Mahoba (NPP) and lowest at 866 in Kharela (NP)

Work Participation Rate:

In the total population of the district of 708,447 as much as 42.3 percent are workers and rest of 57.7 percent are non-workers. Among workers 28.8 percent are main workers and rest of 13.5 percent are marginal workers. In absolute terms females outnumber males as marginal workers. The extent of main workers is highest at 30.6 per cent in Kulpahar tahsil and lowest at 26.9 percent in Charkhari tahsil. In case of marginal workers the proportion is highest in Charkhari tahsil as 14.9 per cent in comparison to 14.8 per cent in Kulpahar and 11.4 per cent in Mahoba tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. In the district among workers 46.2 per cent are cultivators and 19.6 per cent other workers. Among workers 40.1 per cent of female workers are engaged as cultivators.

Literacy:

In the district 53.3 percent population is literate. The literacy is 66.9 percent in urban areas and 49.4 percent in rural areas. The male literacy is as high as 67.7 percent as against 36.4 percent female literacy, and therefore, the gap in male/female literacy rate is 31.3 percent. In rural areas among 4 CD Blocks, the highest literacy is at 53.5 percent in Panwari and lowest at 47.1 percent in Jaitpur and Kabrai (Mahoba). The literacy among males in rural areas is 64.8 percent in comparison to 31.2 percent among females. The lowest female literacy of 28.9 percent is in Jaitpur CD Block. The gap in male/female literacy rate is highest in Panwari.CD Block which is 34.6 percent. In 36.6 percent of villages covering also 41.0 percent of rural population the literacy range is 41to 50 Among urbanites in the district, as much as 78.0 percent males are literates as against 54.2. percent females. The highest urban literacy is in Mahoba (NPP) at 69.6 percent and lowest in Kabrai (NP) at 58.4 percent. The maximum males literacy is found in Charkhari (NPP) at 80.2 percent and lowest at 71 8 percent in Kabrai (NP). However, the highest female literacy is in Mahoba (NPP) at 58.7 percent and lowest at 42.4 percent in

Kabrai (NP). Still, the maximum gap in male-female literacy rate at 29.4 percent is found in Kabrai (NP) The literacy rate among Scheduled Castes in urban areas is 54.6 per cent and 41.5 per cent in rural area The literacy rate for scheduled tribes is 18.2 per cent in rural and 9.1 per cent in urban areas of the district

(viii) Brief analysis of PCA data based on insettables 1 to 36 :

The district throws up a vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36:

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kulpahar	NA	NA	NA	292,963	275,521	17,442	NA	NA	NA	NA	6 0
2	Charkhari	NA	NA	NA	139,734	102,323	37,411	NA	NA	NA	NA	26.8
3	Mahoba	NA	NA	NA	275,750	175,708	100,042	NA	NA	NA	NA	36 3
	District Tota	**581,979**	**464,291**	**117,688**	**708,447**	**553,552**	**154,895**	**21.7**	**19.2**	**31.6**	**20.2**	**21.9**

The growth rates in the Mahoba district for total, rural and urban areas and percentage of urban population to total population is given in the table. The decadal growth rate of the district is 21.7 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 19.2 and 31.6 per cent respectively . Out of the total population of the district 78.1 per cent lives in rural areas while 21.9 per cent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 20.2 per cent in 1991 to 21.9 per cent in 2001 in the district. Urban population is concentrated in Mahoba and Charkhari tahsil while Kulpahar tahsil is largely rural.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages
			Persons	Males	Females		Males	Females		Males	Females

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 421 inhabited villages, 43 (10.2 per cent) are small size villages with population below 200 persons. In the size of 200 to 499 persons there are 72 villages having (17.1 percent) villages of the district while in the size class of 500-999 population claims 107 villages with 25.4 per cent of the total villages in the district. 119.villages (28.3 per cent) are in the size class of 1,000-1,999 72 villages (17.1 per cent) are in the size class of 2,000-4,999 and 5 (1.2 per cent) villages in the district fall in the ranges of 5000-9999 population. There are only 3 (0.7 per cent) village which fall in the population range of 10,000 and above. The maximum number of inhabited villages in the district is in Panwari CD Block (121) whereas minimum is in Charkhari C.D. block (92). The biggest village in the district having population of 15,971 persons is located in Jaitpur C.D. block of district.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New

(i) Statutory town – NIL

(ii) Census town - NIL

(b) Denotified - NIL

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL

(iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	39	9 3	22,661	4 1
11-20	4	1 0	1,679	0 3
21-50	17	4.0	3,960	0 7
51-100	36	8 6	16,411	3 0
101-200	117	27 8	149,593	27 0
201-300	95	22 6	137,210	24 8
301-500	63	15 0	128,690	23 2
501 +	50	11 9	93,348	16 9
Not known	0	0 0	0	0 0
District Total	*421*	*100.0*	*553,552*	*100.0*

Population Density (Rural) of the

This table shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e.117 accounting for 27.8.per cent of the total inhabited villages of the district fall in the density range of 101-200 persons having 27.8 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 39 villages (9.3 per cent) and 4 villages (1.0 per cent) respectively Corresponding proportion in the range of 201 to 500 is 37.6 per cent of the total inhabited villages having 48.0 per cent population of the district. In the medium density ranges of 21 to 50 and 51-100, proportion account for 4.0 and 8.6 per cent of inhabited villages respectively. Both these ranges claim 3.7 per cent rural population. 50 villages (11.9 per cent) of the total inhabited villages of the district fall in the very high density range of more than 501and abave persons per sq. Km. having 16.9 per cent population

TABLE-5: SEX RATIO OF STATE AND DISTRICT 1991-2001

Census Year	UTTAR PRADESH			MAHOBA		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	992	987	992	987	1,037
1911	916	982	978	982	978	1,022
1921	908	963	960	963	960	998
1931	903	957	959	957	959	921
1941	907	958	959	958	959	950
1951	908	957	956	957	956	967
1961	907	925	930	925	930	894
1971	876	877	878	877	878	872
1981	882	861	857	861	857	877
1991	876	845	839	845	839	870
2001	898	866	862	866	862	878

NOTE- Sex ratio has been defined here as the numberof females per 1000 males

As per 2001 Census sex-ratio of 866 females per 1,000 males has been recorded in the district against the state average of 898 The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 1971.The subsequent decades show declining trend from 1981 to 2001 and value remained below the state average. The lowest sex ratio of 845 females per 1000 males were recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas during 1931,1941,1961,and 1971.

TABLE - 6 : SEX RATIO BY TAHSILS, 2001

Serial No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kulpahar	871	868	914
2	Charkhari	862	857	875
3	Mahoba	863	857	873
	District Total:	**866**	**862**	**878**

The table-6 gives sex ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 866 females for every thousand males in Mahoba district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas in respect of all the tahsils. The sex-ratio among rural and urban population is 862 and 878 females respectively. The rural sex-ratio in the tahsils varies between 857 in Charkhari and Mahoba tahsils and 868 females per 1,000 males in Kulpahar tahsil. The sex-ratio in Kulpahar tahsil is higher than district rural average (862). In urban areas the highest sex-ratio is recorded in Kulpahar (914) and the lowest is in Mahoba urban (873).

TABLE - 7 : SEX RATIO BY CD BLOCKS, 2001

Serial No.	Name of CD block	Sex ratio
1	2	3
1	Panwari	861
2	Jaitpur	875
3	Charkhari	857
4	Kabrai (Mahoba)	857
	District (Rural) Total:	**862**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 862 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 875 females is found in Jaitpur C.D. block and is followed by Panwari (861) while the lowest of 857 is recorded in Charkhari and Kabrai (Mahoba) C.D. blocks. The sex-ratio of Jaitpur C.D. block is higher than the district rural average of 862 and in remaining blocks, this value is below than the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	18	4.3	1,401	0.3
700-749	13	3.1	5,868	1.1
750-799	33	7.8	27,427	5.0
800-849	113	26.8	149,669	27.0
850-899	152	36.1	283,894	51.3
900-949	64	15.2	71,125	12.8
950-999	18	4.3	11,939	2.2
1000-1099	10	2.4	2,229	0.4
1100+	0	0	0	0
District Total	*421*	*100.0*	*553,552*	*100.0*
Sex ratio (Rural) for District		862		

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e.152 accounting for 36.1 per cent of the total villages having largest population of 51.3 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which claims 113 villages (26.8 per cent) and 27.0 per cent population. The highest range of 1,100 and above claims no village of the district while in the sex-ratio range of 900-949, there are 64 villages (15.2 per cent) and 12.8 per cent population In remaining sex-ratio ranges of 1000-1099, 950-999, 750-799, 700-749 and less than 700, the number of villages are 10 (2.4 per cent), 18 (4.3 per cent), 33 (7.8 per cent), 13 (3.1 per cent) and 18 (4.3 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 329 (78.1 per cent) having maximum population (91.1per cent) fall in the sex-ratio ranges of 800-949.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Kulpahar	NP	914
2	Kharela	NP	873
3	Charkhari	NPP	876
4	Mahoba	NPP	879
5	Kabrai	NP	850
Sex ratio (Urban) for the district:			**878**

Table 9 gives the sex ratio of towns. The sex-ratio in urban areas of the district comes to 878 females per 1,000 males as a whole. Among all the towns of the district the sex ratio varies between 850 to 914. Kulpahar (NP) has the highest sex ratio (914) while Kabrai (NP) has the lowest sex ratio of 850 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Kulpahar	Total	56,622	29,818	26,804	899
		Rural	53,313	28,071	25,242	899
		Urban	3,309	1,747	1,562	894
2	Charkhari	Total	25,804	13,640	12,164	892
		Rural	19,497	10,265	9,232	899
		Urban	6,307	3,375	2,932	869
3	Mahoba	Total	52,299	27,407	24,892	908
		Rural	35,218	18,416	16,802	912
		Urban	17,081	8,991	8,090	900
	District Total:	**Total**	**134,725**	**70,865**	**63,860**	**901**
		Rural	**108,028**	**56,752**	**51,276**	**904**
		Urban	**26,697**	**14,113**	**12,584**	**892**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 134,725 persons comprising 70,865 males and 63,860 females. The total sex-ratio in this age-group works out to 901 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 904 and 892 in this age-group respectively. The rural sex-ratio in tahsil varies between 892 in Charkhari tahsil and 908 in Mahoba tahsil. The sex-ratio of Mahoba tahsil is higher than the district rural average (904).whereas it is lower in Kulpahar and Charkhari tahsils. The sex ratio of total rural population is 862 as against 904 in the age group 0-6 of the rural population. In this age group urban sex ratio of (892) is higher as compared to the sex ratio observed for total urban (878) population in the district.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial Number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Panwari	25,874	13,490	12,384	918
2	Jaitpur	27,439	14,581	12,858	882
3	Charkhari	19,497	10,265	9,232	899
4	Kabrai (Mahoba)	35,218	18,416	16,802	912
	District (Rural) Total:	**108,028**	**56,752**	**51,276**	**904**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 904 for the district (rural). The sex ratio of C.D. blocks varies between 882 to 918. It is highest in Panwari C.D. block i.e., 918 followed by 912 in Kabrai (Mahoba) C.D. block and lowest 882 is found in JaitpurC.D. block. The sex-ratio of Panwari and Kabrai (Mahoba)C.D. blocks are higher than the district rural (904) while in remaining two blocks, they are below than the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	49	11.6	3,127	2.9
700-749	20	4.8	3,750	3.5
750-799	34	8.1	7,400	6.9
800-849	38	9.0	12,982	12.0
850-899	62	14.7	23,195	21.5
900-949	69	16.4	24,313	22.5
950-999	46	10.9	14,545	13.5
1000-1099	63	15.0	12,261	11.3
1100+	40	9.5	6,455	6.0
District (Rural) Total	**421**	**100.0**	**108,028**	**100.0**
Sex ratio (Rural) for District			**904**	

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 69 (16.4 per cent) having largest population (22.5 per cent) in the district (rural) fall in the sex-ratio range of 900-949 females per 1,000 males in age group of 0-6 years. It is followed by the sex-ratio range of 1000-1099 which claims 63 villages (15.0 per cent) and 11.3 per cent population. Next to it,62 villages (14.7 per cent) are in the range of 850-899 with 21.5 per cent population. 49 villages (11.6 per cent) having 2.9 per cent population fall in sex-ratio range of less than 700. In remaining sex-ratio ranges of 700-749, 750-799, 800-849, 950-999 and 1100+claim less number of villages and these are distributed as 20 (4.8 per cent), 34 (8.1per cent), 38 (9.0 per cent). 46 (10.9) per cent and 40 (9.5 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 240 having population (68.8 per cent) fall in the higher sex-ratio ranges of 850-1099.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Kulpahar	NP	3,309	1,747	1,562	894
2	Kharela	NP	2,342	1,255	1,087	866
3	Charkhari	NPP	3,965	2,120	1,845	870
4	Mahoba	NPP	12,993	6,834	6,159	901
5	Kabrai	NP	4,088	2,157	1,931	895
District(Urban) Total			**26,697**	**14,113**	**12,584**	**892**

The table 13 gives sex ratio of the population in the age group 0-6 in respect of towns of the district. The sex ratio in all the towns is above 800 but in Mahoba (NPP), the sex ratio is 901. The sex ratio of the district (urban) is 892.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial No.	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Kulpahar	Total	292,963	83,946	31	28.7	0.0
		Rural	275,521	79,046	31	28.7	0.0
		Urban	17,442	4,900	0	28.1	0.0
2	Charkhari	Total	139,734	32,155	6	23.0	0.0
		Rural	102,323	24,903	6	24.3	0.0
		Urban	37,411	7,252	0	19.4	0.0
3	Mahoba	Total	275,750	66,513	28	24.1	0.0
		Rural	175,708	47,837	0	27.2	0.0
		Urban	100,042	18,676	28	18.7	0.0
	District Total:	**Total**	**708,447**	**182,614**	**65**	**25.8**	**0.0**
		Rural	**553,552**	**151,786**	**37**	**27.4**	**0.0**
		Urban	**154,895**	**30,828**	**28**	**19.9**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 708,447 total population of the district, 25.8 per cent of the total population belong to the Scheduled Castes and there is no percentage of Scheduled Tribes in the district because of negligible population. The percentage of Scheduled Castes population constitutes 27.4 per cent in rural population and 19.9 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Kulpahar tahsil (28.7) while the lowest is found in Charkhari tahsil (23.0). The Scheduled Tribes population is 37 and 28 in rural and urban areas respectively. Scheduled Tribes population in the

district is distributed as 31 persons in Kulpahar tahsil, 6 persons in Charkhari tahsil and 28 persons in Mahoba tahsil.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Panwari	140,066	42,444	12	30.3	0.0
2	Jaitpur	135,455	36,602	19	27.0	0.0
3	Charkhari	102,323	24,903	6	24.3	0.0
4	Kabrai (Mahoba)	175,708	47,837	0	27.2	0.0
	District (Rural) Total:	**553,552**	**151,786**	**37**	**27.4**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 27.4 per cent of rural population of the district belongs to Scheduled Castes and negligible percentage to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 24.3 per cent in Charkhari and 30.3 per cent in Panwari C.D. block.. The other C.D. block containing the percentage of Scheduled Castes are 27.2 percent in Kabrai (Mahoba) and 27.0 per cent in Jaitpur . The highest Scheduled Tribes population is counted in Jaitpur C.D. block (19) and is fallowed by Panwari (12). The lowest Scheduled Tribes population is recorded in Charkhari CD Block. (6).

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	33	7.8	0	0.0
Less than 5	8	1.9	45	0.0
5-10	11	2.6	489	0 3
11-20	96	22.8	22,453	14.8
21-30	116	27.6	63,190	41.6
31-40	100	23.8	46,826	30.9
41-50	31	7.4	11,442	7 5

76 and above	8	1.9	1.286	0.8
District Total	**421**	**100.0**	**151,786**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level.33 villages accounting for 7.8 per cent of total 421 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 8 villages (1.9 per cent) In 11

villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 96 villages constituting 22.8 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 116 and 100 villages respectively. Both these ranges together account for 51.4 per cent villages of the district. 31 villages fall in the range of 41-50. Eight villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 0.8 per cent Scheduled Castes population of the district. The maximum of the 41.6 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	418	99.3	0.0	0.0
Less than 5	3	0.7	37.0	100.0

76 and above	0	0.0	0.0	0.0
District Total :	421	100.0	37.0	100.0

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. Only 37 persons live in rural area of the district belongs to Scheduled Tribes population. There are 418 (99.3 per cent) villages where none of Scheduled Tribes have been recorded in the district. Only three (0.7 per cent) villages have proportion of Scheduled Tribes population up to 5 per cent in the district.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Kulpahar (NP)	17,442	4,900	0	28.1	0.0
2	Kharela (NP)	13,471	3,299	0	24 5	0.0
3	Charkhari (NPP)	23,940	3,953	0	16 5	0.0
4	Mahoba (NPP)	78,782	15,321	28	19.4	0.0
5	Kabrai (NP)	21,260	3,355	0	15 8	0.0
District(Urban) Total		**154,895**	**30,828**	**28**	**19.9**	**0.0**

The table 18 indicates number and percentage of Scheduled Castes and Scheduled Tribes population recorded in towns during 2001 census. Of the 154,895 total urban population of the district, only 19.9 per cent belongs to Scheduled Castes. The highest percentage of scheduled castes population is recorded in Kulpahar (NP) while the lowest percentagr was found in Kabrai (NP). The scheduled tribes population is negligible in the urban areas of the district. Only 28 persons is found in Mahoba (NPP) and in remaining urban units, there is no Scheduled Tribes population.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Panwari	861	1000
2	Jaitpur	881	1111
3	Charkhari	867	2000
4	Kabrai (Mahoba)	868	0
	District (Rural) Total	**869**	**1176**

Table 19 indicates sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 869 for district (rural). Among the C.D.blocks, the highest sex ratio of 881 is found in Jaitpur CD block and lowest of 861 is recorded in Panwari CD block. The sex ratio for Sheduled Tribes is 1176 for district (Rural). The sex-ratio in Charkhari C.D. block is highest (2000) and the lowest sex-ratio of 1000 is recorded in Panwari C.D. block. There is no Scheduled Tribes population is Kabrai (Mahoba) C.D. block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Kulpahar (NP)	875	0
2	Kharela (NP)	871	0
3	Charkhari (NPP)	868	0
4	Mahoba (NPP)	873	867
5	Kabrai (NP)	886	0
Sex ratio (Urban) for the district:		**874**	**867**

The table 20 presents sex ratio among scheduled castes and scheduled tribes in towns during 2001 census. A sex ratio of 874 females per 1000 males has been recorded for urban areas in the district for scheduled castes and 867 for scheduled tribes. Among the CD blocks, the highest sex ratio of 886 is found in Kabrai (NP) and lowest of 868 females is recorded in Charkhari (NPP). There is no scheduled tribes population in towns except Mahoba (NPP).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 53.3 per cent in the district. This proportion in rural area is 49.4 per cent against 66.9 per cent in urban areas. In the district the literacy rates of males (67.7 per cent) is much higher than females (36.4 per cent) Among the tahsils,Charkhari tahsil tops with 54.9 per cent literates followed by Mahoba tahsil (54.6 per cent). Kulpahar tahsil with 51.3 per cent literates stands at the bottom in the district. Out of 3 tahsils, the literacy rates of Charkhari and Mahoba.tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 31.3 per cent in the district, as a whole. The situation at tahsil level is not much different. However, this gap in urban literacy is low which comes to 23.8 points against the rural areas, where the gap between male and female literacy is 33.6 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female iteracy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Panwari	61,081	42,848	18,233	78,985	32,399	46,586	53.5	69.4	34.8	34.6

District (Rural) Total:		**219,917**	**155,866**	**64,051**	**333,635**	**141,347**	**192,288**	**49.4**	**64.8**	**31.2**	**33.6**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district.49.4 per cent of the total rural population excluding the age-group of 0-6 years one literates in the district. The corresponding proportion of male and female literates comes to 64.8 and 31.2.per cent respectively which shows very wide gap of 33.6 per cent in male and female literacy. At C.D. block level, Panwari C.D. block has the highest rural literacy rate of 53.5 per cent while 69.4 per cent males and 34.8 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Jaitpur and Kabrai (Mahoba) C.D. blocks (47.1 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 34.8 points is found in Kabrai (Mahoba) C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	5	1.2	31	0.0
1-10	1	0.2	14	0.0
11-20	2	0.5	474	0.1
21-30	7	1.7	6,086	1.1

District Total	**421**	**100.0**	**553,552**	**100.0**
Literacy rate for District		**53.3**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 5 villages (1.2 per cent) of the district and population of these villages is only 31 persons. In 4 villages (1.0 per cent) total population is literate. 145 villages accounting for 34.4 per cent of the total villages are in the literacy range of 51-60 per cent and 23 villages (5.5 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent was observed in 234 villages (55.6 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 14 villages (3.4. per cent). The range of 41-60 have the maximum number of 299 villages forming 71.0 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name and status of UA/ Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Mahoba NPP is way ahead of other towns. The table reveals that literacy rate is high in the urban areas of the district (66.9). The literacy rate is quite high (above 75.0 per cent in all towns) except Kabrai (NP) among males. Female literacy rate is far behind in all towns. However, literacy rate among females is lowest at 42.4 per cent in Kabrai (NPP). The gap in male female literacy rate is very high (23.8).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial Number	Name of C.D. Block	Number of literates and illiterates						Percentage of literates			Gap in Male/ Female literacy. rate
		Number of literates			Number of illiterates						
		Persons	Males	Female	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Panwari	14,683	10,845	3,838	27,761	11,962	15,799	43.1	58.8	24.6	34.2

The table 25 gives number and percentage of scheduled castes literates and illiterates by sex in C.D. Blocks at the 2001 census. The number of literates is less than illiterates in all the C.D. Blocks of the district. Less than half (41.5 per cent) of the population is literate and there is a big gap of 33.3 per cent point in male and female literacy rate. The highest (43.1 per cent) literates are in Panwari C.D. Block as against lowest (40.0 per cent) in Jaitpur C.D. Block. The gap in male and female literacy rate is highest (34.4 per cent) in Jaitpur C.D. Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5

The table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban population at the 2001 census. The absolute number of illiterates is more than literates in the district (urban) and towns. The percentage of literate is least in Kabrai (NP) among towns but the gap in male/female literacy rate is highest in case of Kulpahar (NP). The males in all the towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in Mahoba (NPP) i.e. 30.5 per cent.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

The Table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is more than literates in the district and CD blocks. The literacy rate of the scheduled tribes population at 18.2 per cent, is lower than the corresponding rate of 41.5 per cent in case of Scheduled Castes community. The gap in male and female literacy rates is 13.2 per cent in the district. The percentage of literacy in CD Blocks varies between 8.3 per cent in Panwari and 40.0 per cent in Charkhari CD Block

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

100	0	0	0	0
District Total	3	100	37	100
Literacy rate for District (Rural)		**18.2**		

The table 29 gives the distribution of villages by literacy rate ranges for the Scheduled Tribes population at the 2001 census. In the district the Scheduled Tribes population is found only in 3 villages. However, the maximum (51.4 per cent) of the Scheduled Tribes population is found in only one village with literacy range of 11-20 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial No	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Mahoba (NPP)	2	2	0	26	13	13	9.1	18.2	0.0	18.2
	District (Urban)	**2**	**2**	**0**	**26**	**13**	**13**	**9.1**	**18.2**	**0.0**	**18.2**

The table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in urban population at the 2001 census. There is small Scheduled Tribes population in the towns of the district. There is only one town that has registerd Scheduled Tribes population. Out of the total Scheduled Tribes population in the district 9.1 per cent are literate comprising 18.2 male and the female literacy is zero.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN TAHSILS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out to 42.3 per cent of the total population in the district. The total workers are comprised of 28 8 per cent of main workers and 13.5 per cent of marginal workers and the remaining 57.7 per cent are non-workers.

Among the main workers, male participation rate in the district is 43.4 per cent and 12.0 per cent of female. Male and female marginal workers account for 7.3 and 20.7 per cent respectively. The percentage of female marginal workers is higher than male. Total workers (main and marginal workers) among tahsils varies from 39.3 per cent in Mahoba tahsil to 45.4 per cent in Kulpahar tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 553,552 total rural population of the district, 30.2 per cent has been categorised as main workers and the marginal workers constitute 15.6 per cent and the remaining 54.2 per cent fall in the category of non-workers. The sex-wise breakup at the district level shows that 44.4 per cent males and 13.8 per cent females are in the category of main workers. Male and female marginal workers account for 7.5 and 25.0 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level also.

The percentage of total rural workers of the district comes to 45.8 per cent. At the C.D. block level, Panwari has highest proportion of total workers forming 46.9 per cent of the total population. It is closely followed by Charkhari. (46.1per cent), Jaitpur (45.7 per cent), and Kabrai (Mahoba) (44.9 per cent). The lowest percentage of 44.9 per cent is recorded in Kabrai (Mahoba) C.D. block.

				32.7	**40.1**	**49.3**	**2.4**	**8.3**

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 46.2 per cent of the total workers and remaining 31.2 per cent of total workers are engaged as agricultural labourers, Household industry workers (3.0 per cent) and other workers (19.6 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 38.0 per cent in Mahoba tahsil and 52.1 per cent in Kulpahar tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 40.1 per cent which is low as compared to 49.6 per cent of male cultivators in the district. The percentage of other workers and household industry workers is very low in the district as stated above. The agricultural labourers occupy the second position in the district. The highest proportion of 30.5 per cent of other workers is recorded in Mahoba tahsil while the lowest proportion of 12.6 per cent is found in Kulpahar tahsil.

				38.8	42.5	51.0	1.7	4.8

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers are (main+marginal) 45.8 per cent of total population. Among these workers, cultivators constitute 52 2 per cent, 34.6.per cent agricultural labourers, 2.5 per cent

household industry workers and 10.7 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially by viable. Household industries also could not make much progress in rural areas as reflected in the data and the employ only 2.5 per cent workers of the total working force. Therefore, surplus working force has to depend on primary economic activity. Among cultivators, the percentage of females (42.5 per cent) is lower than males (58.5 per cent) in the rural areas of the district. The females play main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 49.2 per cent in Kabrai (Mahoba) C.D. block to 57.2 per cent in Jaitpur C.D. block. Similarly for other workers, the lowest proportion is 8.2 per cent in Charkhari C.D. block while 12.5 per cent is the highest in Kabrai (Mahoba) C.D. block. The percentage of agricultural labourers is highest in Panwari. block (38.0.) and is followed by Kabrai Mahoba (35.9). Similarly, household industry workers is quite low i.e. 2.5 per cent in the district and varies between 2.3 per cent in Panwari and 2.9 per cent in Charkhari CD Block.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Mahoba. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (69.0 per cent) followed by cultivators with 12.8 per cent (13.3 per cent male and 10.5 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (35.5) is recorded in Kharela (NP) in the category of agriculture labourers it varies between 6.3 per cent in Mahoba NPP and 37.9 per cent in Kharela NP Household industry workers are also very low (6.3 per cent) in Kabrai (NP), 4.0 per cent in Charkhari (NPP) and 4.3 per cent in Kharela (NP). As the usual trend recorded in the urban areas, other workers are in high percentage (79.3 per cent) in Mahoba (NPP), 76.7 per cent in Kabrai and 62.8 per cent in Charkhari (NPP) but very low (22.4 percent) in Kharela (NP).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37-47:

One of the major parts of the District Census Handbook is Village and Town Directory. Non-census data showing educational, medical, drinking water, banking, communication facilities and other such developmental indicators are incorporated in the town and village directory. From non-census data, inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 421 inhabited villages in the district 361 villages or 85.7 per cent have been provided with the education facilities of one type or the other. Similarly 131 villages in the district constituting 31.1 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 391 or 92.9 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 79 villages constituting 18.8 per cent of villages have been provided with post office facility within the village. 81or 19.2 per cent villages have been provided with the telephone facility, 76 or 18.1 per cent with transport facility, 19 or 4.5 per cent villages with bank facility and 26 or 6.2 per cent with agricultural credit societies. Similarly there are 197 or 46.8 per cent villages which have been linked with the pucca road. Total 172 or 40.9 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Kabrai Mahoba C.D. block has the highest 95.2 per cent villages where educational facility is available and lowest 76.1 per cent is found in Charkhari Medical facility is highest in Kabrai Mahoba (44.2 per cent) and lowest (25.0 per cent) in Jaitpur C.D block. Improved drinking water is available in most of the villages in all CD blocks. In fact it is above 89.0 per cent. Telephone facility is highest in Panwari. (29.8 per cent). Transport and communications is less developed in Charkhari where only 12.0 per cent villages are covered by this facility whereas 26.0 per cent villages of Kabrai (Mahoba) C.D. block are availing this facility.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 553,552 persons in the district, 540.647 or 97.7 per cent have educational

facility of one or the other type. Similarly 304,505 or 55.0 per cent population has medical facilities while 541,921 or 97.9 per cent have got improved drinking water facility. Post office facilities are available to 252,456 or 45.6 per cent population. Telephone facility is available to 158,764 or 28.7 per cent. Transport communications facility is available to 177,711 or 32.1 per cent. Bank facility is available to 93,270 or 16.8 per cent. 92,534 or 16.7per cent have been provided with the facility of agricultural credit societies. 364,510or 65.8 per cent have been provided with the facility of approach by pucca road. Power supply is available to 33,2017 or 60.0 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However, in Kabrai (Mahoba) C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1 Education :-				
(a) Primary School	56	5	1	62
(b) Middle School	148	148	25	321

3. Post Office	168	142	32	342
4. Telephone	112	103	125	340
5. Bus Service	111	175	81	367
6. Banks				
(a) Commercial Bank	117	182	105	404
(b) Cooperative Bank	43	214	157	414
7. Agricultural Credit Societies	140	173	82	395

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table.62. villages do not have primary school in their villages and out of these villages, children of 56 villages have to travel less than 5 kms. for schooling Out of 421 inhabited villages as many as 321 are deprived of middle school and 421 of degree college. Of these 148 avail the facility of middle school at a distance of less than 5 kms., 148 at a distance 5-10 kms. and the remaining 25 at a distance of 10+ kms. In respect of degree college, 20 avail this facility at a distance of less than 5 kms., 97, between 5 to 10 kms. and rest 304 villages at a distance of 10+ kms.

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table.62. villages do not have primary school in their villages and out of these villages, children of 56 villages have to travel less than 5 kms. for schooling Out of 421 inhabited villages as many as 321 are deprived of middle school and 421 of degree college. Of these 148 avail the facility of middle school at a distance of less than 5 kms., 148 at a distance 5-10 kms. and

the remaining 25 at a distance of 10+ kms. In respect of degree college, 20 avail this facility at a distance of less than 5 kms., 97, between 5 to 10 kms. and rest 304 villages at a distance of 10+ kms.

Similarly there are 411 villages in the district which have been devoid of Hospital facility and 413 villages which are deprived of PHC facilities. Of these 46 villages have the facility of Hospital available within 5 kms. while in respect of 174 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 191 villages have this facility at a distance of 10+ kms. As regards PHC 29 avail this facility at a distance of less than 5 kms., 155 at a distance of 5-10 kms. and the remaining 229. have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 342 villages do not have this facility in the village itself. Of these majority i.e. 168 have this facility at a distance of less than 5 kms., another 142 villages avail it at a distance of 5-10 kms. In the remaining 32 villages in inhabitants have to travel a distance of 10+ kms.

As regards Telephone, there are 340 villages in the district which are without telephone facilitiy. Of these 112 avail this facility at a distance of less than 5 kms., 103. at a distance of 5-10 kms. and remaining 125 have to traverse a distance of 10+ kms.

For Bus service out of 367 villages which do not have facility, 111 villages avail this facility at a distance of less than 5 kms., 175 at a distance between 5-10 kms. and 81, at a distance of 10+ kms.

In the entire district 404 villages are deprived of Commercial Bank and 414 of Co-operative Bank. Of these 404 villages which are deprived of Commercial Banks, 117 villages avail this facility at a distance of less than 5 kms., 182 between 5-10 kms. & the remaining 105 at a distance of 10+ kms. Regarding Co-operative Banks out of 414 villages 43 villages avail this facility at a distance of less than 5 kms., 214 at a distance of 5-10 kms. and remaining 157 at a distance of 10+ kms. 395 villages do not have agricultural credit societies. This facility to 140 villages is available at a distance of less than 5 kms., 173 at a distance of 5-10 kms. and the remaining 82 at a distance of 10+ kms.

Similarly there are 411 villages in the district which have been devoid of Hospital facility and 413 villages which are deprived of PHC facilities. Of these 46 villages have the facility of Hospital available within 5 kms. while in respect of 174 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 191 villages have this facility at a distance of 10+ kms. As regards PHC 29 avail this facility at a distance of less than 5 kms., 155 at a distance of 5-10 kms. and the remaining 229. have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 342 villages do not have this facility in the village itself. Of these majority i.e. 168 have this facility at a distance of less than 5 kms., another 142 villages avail it at a distance of 5-10 kms. In the remaining 32 villages in inhabitants have to travel a distance of 10+ kms.

As regards Telephone, there are 340 villages in the district which are without telephone facilitiy. Of these 112 avail this facility at a distance of less than 5 kms., 103. at a distance of 5-10 kms. and remaining 125 have to traverse a distance of 10+ kms.

For Bus service out of 367 villages which do not have facility, 111 villages avail this facility at a distance of less than 5 kms., 175 at a distance between 5-10 kms. and 81, at a distance of 10+ kms.

In the entire district 404 villages are deprived of Commercial Bank and 414 of Co-operative Bank. Of these 404 villages which are deprived of Commercial Banks, 117 villages avail this facility at a distance of less than 5 kms., 182 between 5-10 kms. & the remaining 105 at a distance of 10+ kms. Regarding Co-operative Banks out of 414 villages 43 villages avail this facility at a distance of less than 5 kms., 214 at a distance of 5-10 kms. and remaining 157 at a distance of 10+ kms. 395 villages do not have agricultural credit societies. This facility to 140 villages is available at a distance of less than 5 kms., 173 at a distance of 5-10 kms. and the remaining 82 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and Telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 421 inhabited villages in the district, there are 45 villages which have nearest town upto a distance of 5 kms. Of these only 38 villages forming 84.4 per cent of these total villages, are having the educational facilities of one type or the other and 11 villages constituting 24.4. per cent, have the medical facilities within the village, 4 villages forming 8.9 per cent have the facility of post office within the village and 10 or 22.2 per cent have the facility of telephone. Nine villages constituting 20.0 per cent have been linked by transport service while 2 villages constituting only 4.4 per cent have been provided by agricultural credit societies. 25 villages comprising 55 6 per cent have been provided with pucca road. There is no village in this range which has bank facility.

There are 274 inhabited villages in the district which fall in the distance range of 5-15 kms from the nearest town. Of these 238 villages constituting 86.9 per cent have been provided with the educational facilities. 95 villages comprising 34.7 per cent have been provided with medical facilities. 57 villages constituting 20.8 per cent enjoy the post office facility. 57.villages comprising 20.8 per cent have been provided the telephone facility. 47 villages constituting 17.2 per cent have been linked with transport communications. 15 villages comprising 5.5 per cent have bank facility. 19 villages constituting 6.9 per cent are having agricultural credit societies while 134 villages or 48.9 per cent are approachable by pucca road. 86 villages fall in the distance range of 16-50 kms. Of these, 83.7 per cent villages have educational facility, 24.4 per cent with medical, 17.4 per cent with post office, 14.0 per cent with telephone and transport and communications available to 19.8 per cent villages. Banks and agricultural credit societies facilities are available to 3.5 and 4.7 per cent of

villages, while 34.9 per cent villages are approachable by pucca road.

There is no 16 village in the district which is situated beyond 50 kms. from the nearest town. There are 16 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 13 or 81.3 per cent villages have the educational facility of one or other type. 4 villages constituting 25.0 per cent have the medical,18.8 per cent with post office, 12.5 per cent with telephone and transport and communication available to 18.8 per cent villages. there is only one village which have bank and agricultural credit societies. 8 villages (50 per cent) have been provided with pucca road.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. There are 421 inhabited villages in the district There are 115 villages which have a population of less than 500 persons. Of these, 60 villages (52.2 per cent) have education facility, 3 (2.6 per cent) have medical facility, 93 (80.9 per cent) have improved drinking water facility 5 (4.3 per cent) have telephone facility. 13 (11 3 per cent) have been linked by bus service. 31 villages (27.0 per cent) have been linked with pucca road. 27 villages (23.5 per cent) have been provided with electricity. There are no villages fall in this population range which have post office. bank and agricultural credit societies facilities

Out of 107 villages, which fall in the population range of 500-999 persons, 104 villages (97.2 per cent) have been provided with the education facility, 26 (24.3. per cent) with medical facility, 104 villages (97.2 per cent) have improved drinking water facility. Four villages (3.7 per cent) have been provided with post office facilities, 20 villages (18.7 per cent) with telephone facility, 10 villages (9.3 per cent) with transport facilities, one village (0.9 per cent) with bank facility,3 villages (2 8 per cent) with agricultural credit societies 40 villages (37.4 per cent) have approach by pucca road and 38 villages (35.5 per cent) have been provided with power supply facility.

119 villages fall in population range of 1,000-1,999 persons. Out of these 117 villages (98.3 per cent have education facilities, 42 villages (35.3 per cent) enjoy the medical facility, 115 villages (96.6 per cent) improved drinking water facility,18 villages (15.1 per cent) have post office facility, 32 villages (26.9 per cent) have telephone facility, 21villages (17.6 per cent) have transport communications facilities, 3 villages (2.5 per cent) have bank facilities, 3 villages (2.5 per cent) have agricultural credit societies,60 villages (50.4 per cent) have approach by pucca road and 49 villages (41.2 percent) have been provided with electricity.

There are 72 villages in the district which are covered under 2.000-4.999 population range. In this range, all the villages enjoy the facility of education, 52 villages (72.2 per cent) have medical facility, 71 villages (98.6 per cent) have improved water facility, 20 villages (27.8 per cent) have telephone facility. 49 villages (68.1 per cent) have post office facility, 9.villages (12.5 per cent) have bank facility, 16 village (22.2. per cent) is having agricultural credit societies. 58 villages (80.6 per cent) have been linked with pucca road and 50 villages (69.4 per cent) have electricity facility. Out of 5 villages which are in the population range of 5000-9999 persons, all the villages have education, medical, improved drinking water, post office approach by pucca road and power supply facilities. There are only 3 villages in the population range of 10,000 and above persons All the 3 villages have all type amenities except telephone and agriculture credit society facilities

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No	Name of C. D. block	Number of inhabited villages	Total area in hectare	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Panwari	121	44,382.7	81.6	55 0
2	Jaitpur	104	54,404.8	65.5	62.3
3	Charkhari	92	47,881.0	33.8	35 4
4	Kabrai (Mahoba)	104	97964.5	62.7	34.4
	District Total:	**421**	**244633.0**	**61.1**	**46.1**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available in the inhabited villages of the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 421 inhabited villages in the district having a total area of 244,633.0 hectares. Of this, 61.1 per cent is cultivable and 46.1 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Panwari block with 121.villages have a total area of 44,382.7 hectare, of this 81.6 per cent of land is cultivable and of the aforesaid area 55.0 per cent is irrigated. In Jaitpur block, 104 villages have a total land area of 54,404.8.hectares of this 65.5 per cent of land is cultivable and of the aforesaid area 62.3 per cent is irrigated. In Charkhari block, all the 92 villages have a total area of 47,881.0 hectare, of this cultivable area is 33.8 per cent and 35.4.per cent is irrigated. In Kabrai (Mahoba) block, all the 104 villages have a total area of 97,964.5 hectare. Of this, cultivable area is 62.7 per cent. Of cultivable area 34.4 per cent is irrigated.

TABLE43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial No	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Charkhari (NPP)	228	4	224	116	21	2	36	0	57
2	III Kabrai (NP)	130	7	123	102	34	19	30	0	19
3	IV Kharelap (NP)	166	9	157	145	0	11	99	0	35
4	IV Kul Pahar (NP)	144	0	144	152	20	48	75	0	9
5	II Mahoba (NPP)	153	4	149	154	2	9	45	0	98
District Total		**162**	**5**	**157**	**140**	**11**	**14**	**50**	**0**	**65**

The table 43 presents per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Mahoba works out to Rs 162 of which Rs 5 are derived through local taxes and the remaining Rs 157 received from all other sources. The average of total expenditure incurred per head is Rs 140. Out of this Rs 11 are spent on general administration, Rs 14 on public health and conveniences, Rs 50 on public works, no expenditure on public institutions and Rs 65 is spent on other items. Among all the five towns the receipt and expenditure recorded per head are the highest in Charkhari and Mahoba NPP respectively.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial No	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Charkhari, NPP	9 6	2 5	0 8	0 8	0.4
2	Iltifatganj Bazar, NP	1.8	0 9	0 9	0 0	0 0
3	Kabrai, NP	2 4	0 5	0 5	0 5	0.0
4	Kharela, NP	3 7	2.2	0 7	0 7	0.0
5	Kulpahar, NP	3.4	2 3	1 1	1 7	0 0
6	Mahoba, NPP	6 5	2 0	0 4	0 8	0 3
	District	**5.8**	**1.9**	**0.6**	**0.8**	**0.1**

Table 44 shows in urban areas of Mahoba district the average number of primary school per 10,000 population comes to 5.8 primary, 1.9 junior secondary/ middle 0.6 secondary matriculation, 0.8 senior secondary schools and the ratio of colleges is only 0.1college per 10,000 population. Among the towns, the ratio of primary and junior secondary/matriculation schools is highest in Charkhari (NPP) while in case of senior secondary school this position is claimed by Kulpahar (1.7 percent) college education is available only in Charkhari and Mahoba (NPP).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial Number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Charkhari (NPP)	23
2	Kabrai (NP)	2
3	Kharela (NP)	0
4	Kul Pahar (NP)	0
5	Mahoba (NPP)	3
	District Total	**5**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of the district. On an average there are 5 beds per 10,000 populations in urban areas of the district. It is the highest (23) in Charkhari NPP. while lowest value of 2.beds is recorded in Kabrai (NP) and is preceded by Mahoba NPP. (3 beds).There are no bed in Kharela (NP) and Kulpahar NPP.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5

Not applicable as there are no slums in the towns of the district.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial No	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Charkhari (NPP)	Shoe	Leather
		Cloth	Cloth
			Pea
2	Kabrai (NP)	Stone Chips	Stone
			Pulse
			Oilseed
3	Kharela (NP)		Khadi Cloth
			Pea
			Alsi (oilseed)
4	Kul Pahar (NP)		
5	Mahoba (NPP)	Aluminium Pots	Pan
		Ice	Ground Nut
		Plastic Shoes	Pea

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for Gitti stone (stone chips). Plastic shoes and ice. The chief export items of the district are mostly the same. that are manufactured in the towns.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on inset tables 48-52 :

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households*								
		Total			Scheduled Castes			Scheduled Tribes

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* House list households.

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 124,400 consisting of 98,738 rural and 25,662 urban households.36,037 households belong to Scheduled Castes and 679. Scheduled Tribes. 119,933 households are living in their owned houses constituting 96.4 per cent of total households. Of these households, the largest number of households (37,171) have occupied double room accommodation and is followed by more than three room accommodation numbering 34,118.households. Next position is claimed by households (30,874) occupying three room accommodation. Number of households in owned accommodation occupying single room, rank at fourth place with 17,152. households while 618, households are without any exclusive room.

3,376 households living in rented accommodation account for 2.7 per cent of total number of households in the district. The largest number of 1,316 households are living in single room accommodation followed by 1,265 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering 1,091 forming only 0.9 per cent of total households are distributed in single room accommodation numbering 377, double room with 318 households and 222 households in three room accommodation. In rural areas majority of households have bigger size house and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial No.	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

3	Mahoba	49.7	49.9	0.4	41.7	57.8	0.4	65.3	34.3	0.4
	District Total:	**48.7**	**50.9**	**0.4**	**46.1**	**53.4**	**0.4**	**58.6**	**41.1**	**0.3**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e., burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc oro t h e r metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate a re-used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that 48.7 per cent of the households in the district had permanent houses. The trend is different in rural area (46.1 per cent) and urban area (58.6 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Kulpahar (53.4 per cent) followed by Mahoba (49.7 per cent) and lowest in Charkhari (37.7 per cent). In respect of semi-permanent houses, the returns were 50.9 per cent of district level where as among tahsils, in Charkhari it was 61.7 per cent and lowest was 46.3 per cent in tahsil Kulpahar. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 34.3 to 54.5 per cent. Temporary houses in the district lie between the range of 0.4 to 0.5 per cent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

* House list Households.

**Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises, it is considered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage means closed and open drainage.

The above table shows that out of total households of the district 32.6 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 26.5 and 55.9 per cent. Tahsil Mahoba had higher order of proportion (39.9 percent) of households where percentage for rural area was 27.3 and 64.4 per cent in urban areas. Electricity was available for 15.8 per cent of households at district level, the break up for rural and urban areas were 7.2 per cent and 48.9 per cent. Bathrooms and toilet facilities were available in the district to 22.1 and 21.8 per cent of households respectively. Tahsil Kulpahar was poorly served in respect of these amenities. Drainage facility was reported to be 43.1 per cent of the households in the district whereas the proportion of rural and urban areas huouseholds accounted to 35.8 and 71.4 per cent.

* House list households.

Data source: Census of India 2001, H-series: Tables on Houses, Households amenities and Assets.

It is observed from the above table that 48.9 and 40.6 per cent of households in the district use firewood and cow dung Cake for cooking, the proportion in the rural area is 46.8 and 47.1 per cent and in urban area it comes to 57.2 and 15.4 per cent of households respectively. LPG (cooking gas) has been reported as one of the fuel for cooking of food is 4.3 per cent of the households. the composition of rural and urban comes to 0.9 and 17.4 per cent respectively. Kerosene is used for cooking in as many as 1.0 per cent of the households (0.2 per cent rural and 4.1 per cent urban households). The other methods like crop residue, electricity and bio-gas etc. ranges between 0.1 per cent to 4.7 per cent of the households of the district. the pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood and Cow dung Cake are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE

Data source: Census of India 2001, H-series: Table on Houses, Households amenities and Assets
* Houselist Households.

This table presents data for total rural and urban areas at district/tahsil level about households availing services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 124,400 in the district and among them, 33,758 households have been availing banking services, 47,267 households have Radio/ Transistor, television is possesse by 13,633 households. Telephone is available in 3,487 households. Bicycle is available in 65,897 households. Scooter, Motorcycle, Moped and Car, Jeep, Van are use by 7,375 and 1,581 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is almost similar as analysis above for the district as a whole.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

There is no significant historical, cultural or natural events took place during the last decade. Important Administrative change that has taken place, is the creation of new district of Mahoba in Feb. 1995 by carving out entire areas of three tahsils, Kulpahar, Charkhari and Mahoba from district Hamirpur.

(xii) Brief description of places of religions historical or archaeological importamce in villages and places of tourist interest in the towns of the district.

There are many forts, palaces, lakes ponds sagars monuments, buildings etc made by the Chandel Gahirwar Rajas. Some of them are described here:-

(1) Charkhai:- According to a local tradition the name of Charkhari has been derived from Charkhari (hyena) which were found here in large number in nearby hills. It is connected by metalled road with Mahoba. The old palace of the maharaja, particularly its gate, is famous for its grandeur and architecture. There are several hills of different height, the most important being the Ranjeeta hill, perched atop which is the fort of the Mangal Garh. Temples of Sri Gobardhan Nathji and Sri Gumanbihari are famous. An old religious fair of Sri Gobardhan Nathji starts on next day of Deepawali and lasts for a month.

The former rulers of Charkhari state also followed the tradition of constructing tanks, and temples to beautify their capital like the former of Chandel dynasty. There are seven tanks around the town and most of these tanks are inter-connected,

covered with lotus flowers and surrounded by hills.

(2)Kabrai:- It is 21km away from Mahoba. There are some interesting relics in kabrai. The chief of these is the Brahm Tal. It is said to have been built by the Chandel raja, Balvarman. There are several sati monuments at Kabrai. Near the Chakariya Dai temple is an ancient stone carving representing a woman with a child in her arms. Tradition says that she was an Ahir by caste who was turned into stone on swearing falsely that she had not comitted some theft. There is another temple situated on the top of a rock which is approached by a tunnel-led passage cut through the rock itself.

From Kabrai town panchayat in the south ward on Kabrai-Kunheta route a Panch Pahrai Ka Devi mandir is situated where on the occasion of Nav Durga, the devotees comes here for their devotion, nearby it on onother hill a temple of lord Shankar as on Niranjan Baba is situated where a gathering of people takes place on Basant Panchami and a three days fair celebrated and one day Dangal Karyakram takes place, where pahalwan (wrestlers) comes from far most areas and exibite their performance in wrestling (Kushti) The town panchayat is developing this area as Dangal area. On the Kanpur Sagar road in the east on a hilly tract a place of Kalshaha baba is situated and on another Ramkunda hilly tract, a holy place of Siddha Baba is situated and at this place a one day fair is celeberated on Dipawali's Dwitiya. In the north side of Kabrai town panchayat a pond was built by Raja Parmal in 11th centuary , which is famous as Verma Talab of which two sides are pucca made. In the tourist point of view, if can be developed by the government.

(3)Kulpahar:- It is situated at a distance of 96 kms. from Hamirpur. There are large tanks constructed by the Bundela Rajas. The chief of this lies to the south of the town and is known as the Garha Tal, the banks of which are ornamented with numerous temples and houses. There are several modern temples, idgahs and masjids and ruins of a palace on a hill. Among the places worth seeing are the palace of Senapati, temple of Vadyarajan, temple of Mahraj Kishoreji, the fort and the kund where the queens used to bath. It is also said that there are two underground tunnels connecting this fort with Sungra and Charkhari.

(4) Jaitpur:- Jaitpur is 11 km away from Kulpahar, where on a short distance to the east is a larze tank known as Bela Tal, which said to have been built by Balvarman the Chandel ruler. It has a circumfirance of nine miles and is of considerdable depth. It is used or irrigation purposes by means of canals.

Mahoba:- Mahoba is believed to have existed from times immemorial, and to have borne different names at different times. During the Treata Yuga it is believed to have been known as Kekpur and it in the Dwaper Yuga as Patanpur. Its present name, Mahoba is said to be derived from the great celebration; or mahotsava performed by its deputed founder, the Chandel Raja Chandravarman, about 800 A.D. In Chand Bardai's bardis account, untitled the Mahoba khand, the town is called Mahotsa or Mahatsawaragrt. From such evidence as is available it would appear that the civil capital of Chandels was removed from Khajarao about 900 A.D. Easily the oldest and historically the most important town in the district.

It is situated at a distance of 85kms from Hamirpur. The most noticeable feature of the town is the lakes or tanks (sagar) all of which are formed by means of massive embankments thrown across shallow valleys. The Disrapur Sagar, a tank of consederable extent though partly silted is first of the series that surround the town. It is in situated to the north east of Mahoba. The Rahila sagar is situated in the south-west portion of Mahoba and was built by the Chandel ruler Rahila. The Vijai sagar (lake) was built by chandel ruler, Vijaypala or Vijaivarman. It is a magnificient lake of considerable scenic beauty, perhaps one of the finest picturesque lakes in the state.

The Kirat sagar a medium size tank-with ghats and flight of granite steps in beautiful surroundings is situated in the west of Mahoba. During summer its clean blue water with lotus blooms present a pleasing sight. In Mahoba there are somany religious places which are tourist interst also Choti Chandrika, Shivtandav, Hanuman temple, and Balkandeshwar. In view of historical places Surya temple, in the middle of Madan sagar the Kharkhara Math, Madan sayar, BizaSagar, Kalyan Sagar etc. are seenable as historical tourist places. In the Mahoba tahsil about a distance of 15 km, in the village Srinagar, a Hanuman Mandir having religious historical importance is situated

(xiii) Major Characteristics and Contribution of the District:

Jagnik, the renowned bard, flourished at the court of Parmal of Mahoba in 1180 A.D. He was the

reputed author of the Alhakhand. He recited it throughout India. In this book he has immortalised the exploits of two Banafar brothers Alha and Udal, who were the sons of one Jasraj of Mahoba and had distingnished themselves by displaying exceptional valour in the desperate war against Prithviraj, the Chauhan ruler of Delhi, which was fought by them on behalf of their own sovereign Parmal, the overlord of Mahoba who had earlier expelled them.

Kabrai is famous for Gaura stone work. The pan(betel leaves) of Mahoba is famous all over northern India. In Mahoba district there are somany historical religious tourist interest and archiological fame places. There are somany lakes tanks sagars, temples of accient fame, palaces forts and monuments, hills having natural beauties. Mahoba district is known as a Alha-Udhal Nagari.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of newspaper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY (SECTION I & II)

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

APPENDIX VIII

Number of villages under each Gram Panchyat (C.D. block wise)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers						Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code	Number of households	Total population	Total SC population	Total ST population	Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttar Pradesh due to certain reasons.

APPENDIX IX

Statement showing number of girls schools in the villages

Name of District	Name of C.D. Block	Location Code	Name of Village Number	No. of Girls School
1	2	3	4	5
Information not available for this district				

Section II - Town Directory

Section II - Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A

(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which is in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP	Hamirpur
q1	Persons	99	105
	Males	98	100
	Females	104	111
q2	Persons	117	124
	Males	117	116
	Females	118	133
q5	Persons	134	148
	Males	135	132
	Females	132	172

The probability of dying between birth and at age 1,2 and 5 years are shown in the above table.

The Child mortality by ages 1,2 and 5 years is higher in the district as against the state, thus child mortality indicators in the district for both males and female show higher order as compared to the state.

Annexure – III
Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male Female	Uttar Pradesh	Hamirpur
1	2	3	4	5
1	CBR		37.21	33.08
2	TFR		5.60	4.87
3	TMFR		6.30	5.32
4	GFR		172	156
5	GMFR		200	172
6	Mean age at marriage (1981-91)		17.27,	16.57
7	Number of children ever born per ever married woman aged 45-49 years		4.59	4.81
8	Child woman ratio 0-4		631	630
	5-9		752	721

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 33.08 per thousand in the district. It is below the state of Uttar Pradesh i.e. of 37.21 per thousand. In respect of total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.27 years for the state where as 16.57 years has been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever married women in the age group 45-49. The state and the district figures are placed as 4.59 and 4.81 per thousand respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 630 and 721 for the district while in case of the state the corresponding figures are.631 and 752. The various measures of fertility presents that fertility levels as such are below to the state average.

	100.0	100.0	100.0	60.6	82.9	55.7	39.4	17.1	44.3	0.0	0.0	0.0

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 63.3 in 1991, while in 2001 it was 57.8 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 36.1 percent and 42.1 percent respectively. This shows in-migration from other states to this district was increased in 2001 in comparison to 1991. At district level in-migration from other countries was 0.6 percent in 1991 and 0.1 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 68.4 percent and 60.6 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 31.4 percent and 39.4 percent respectively. The movement of population from other countries in the district was 0.3 percent in 1991 and 0.0 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

	100.0	0.0	0.1	90.7	0.1	9.0	0.1	0.0	0.0

From the above annexure it is observed that Hindu religion predominate with 81.7 per cent of population this follows Muslim with 17.3 per cent in the state. In respect of the district however, the trend is the same but the proportion for the district Hamirpur does not follow the state figures. AT district level proportion of Hindu religion is 92.6 per cent, whereas 7.3 per cent Muslims in the district. At the state level proportion of Budh is 0.16 per cent while at the district level it is 0.0 Christians constitute 0.1 per cent in the state and 0.1 per cent in the district. Similar proportion prevails to Jain with 0.1 per cent in the state and 0.01 per cent in the district. Sikh 0.0 per cent and out numbered for the state figure 0.5 per cent followers of other religions account 0.01 per cent in the state and nearing zero per cent in the district.

On perusal of the above annexure it is evident that percentage of never married is higher for the district both for males and females (52.8 per cent male and 42.22 per cent female) than the state (54.4 per cent male and 45.9 per cent female). Consequently percentage of married in the district (43.8 per cent males and 53.0 per cent females) is also higher than the state (42.4 per cent male and 49.41 per cent female). Like wise percentage of widowed persons in the district (2.94 per cent male and 4.00 per cent female) is lower that the state (3.00 per cent male and 4.56 per cent female). Percentage of divorced or separated is also lower than the state. Among the age groups the

proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal, the peak for male is in the age group 25-29 female excluding age group 0-9 the highest proportion of never married is in the age groups 10-14 and 15-19. Highest proportion of widowed is in the age group 70-both for male and female.

Annexure - VII

From annexure VII, it can be observed that percentage of illiterates is lower in the district (51.74 per cent male and 72.15 per cent female) than the state (55.28 per cent male and 79.98 per cent female). Consequently percentage of literates is higher in the district than the state both for males and females. Although percentage of literates without educational level is lower than the state, percentages are higher in the subsequent educational levels. Comparative study between state and district will elaborate the facts. While percentage of literates with primary education in the state is 10.71 for male and 6.04 for female, in the district they are 11.55 and 8.18 per cent respectively. Middle level education in the state is 9.74 and 3.71 per cent for male and female, while the district has 11.42 and 5.51 respectively. For the matriculation and above level the state has reported the figures of 13.49 percent and 4.42 per cent for male and female, whereas the district depicts the figures of 16.30 and 8.14 percent for males and female. A highest literate with primary education is in the age group 7-14. The age group that has highest population of middle level education is 15-19 for male and 7-14 for female. The population of matriculation and above level is highest in the age group 30-34 for both males & females.

Note . For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02% The remaining tongues have been merged in the column of "Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001) This trend is visible for the district as well. The district reported Hindi as mother tongue for 96 1 percent person in 1991 and 97.3 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 2.6 percent and 1.1 percent at district level in 1991 and 2001 Census respectively. At state level, speaker of Bhojpuri, Garhwali and Kumauni as mother tongue were 4.9 percent, 1.3 percent and 1.2 percent respectively and at district level Bundelkhandi as mother tongue were at third place with 1.3 percent speakers in 1991 census Against this, in 2001 census, speakers of Bhojpuri as mother tongue were 6.6 percent and Awadhi at 1.5 percent at state level while at district level Bundelkhandi as mother tongue with 1 5 percent speakers were at second place instead of Urdu as mother tongue whose speakers were 1.1 percent only Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
