'KALINJER FORT'

The historic fort of Kalinjer is located in the ancient land of Jejakbhukti, an integral part of Bundelkhand. This fort and town are of strategic importance during medieval lines. It is situated at an height of 700 feet on Vindhyanchal ranges. This fort is accessable through seven gateways – the Alamgir Darwaja, Ganesh Dwar, Chauburji Darwaja, Buddh Bhadra Darwaja, Hanuman Dwar, Lal Darwaja and Bara Darwaja. The fort was a Chandela stronghold from 9th to 15th century and remained invincible up to thetime of Mughals. Akbar finally conquered it in 1569 and gifted it to Birbal, one of the "nine jewels" of his court. Within the fort ,thereare two palaces – the Raja Mahal and the Rani Mahal as well as several other places of interest like Sita Sej, Patal Ganga, Pandu Kund and Budha – Budhi Taal whose waters are believed to posses healing qualities.

Annexures - I To VIII

Annexure I	Number of villages under each Gram Panchayat	441
Annexure II	Fertility and Mortality, 1991 Census	441
Annexure III	Various measures of fertility and mean age at marriage, 1991 Census	442
Annexure IV	Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census	443
Annexure V	Brief account of main religions in the district/tahsil as per 1991 Census	444
Annexure VI	Marital status of population as per 1991 Census	446
Annexure VII	Age, Sex and Education in the district, 1991 Census	449
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	451

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and their team of dedicated workers deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The district is named after the headquarters town, Banda, which is said to have derived its name from Bamdeo, a sage mentioned in Hindu mythology as a contemporary of Rama. Bamdeo is said to have had his hermitage at the foot of a hill later called Khutla Bonda, the name by which a locality of the town is still known

The first glimpse of the early history of the district is obtained from stone arrowheads and other implements discovered in 1882 AD at various places in the district. Specimens of neolithic tools, rough sketches of birds, beasts and human beings have been found in this region. Pebble tools and low hand axes have also been discovered in this district. In prehistoric times this region seems to have been inhabited by primitive people like the Bhils and Kols.

The earliest known Aryan people associated with this region were the Chedis whose king, Kasu Chaidya who is said to have made a gift of ten kings as slaves to his priest, was praised for his liberality in a "Dana Stuti" found at the end of a hymn in the Rigveda. The sacred hill of Kalinjar is mentioned in the Vedas as one of the "Tapasya-Sthals" or "Spots" adopted to practices of austere devotions. The earliest known traditional ruler of the region was Yayati (great grand son of Pururavas Aila), who is said to have been a great conqueror and reduced to submission the whole of Madhyadesha and even regions outside. He had five sons and after him his eldest son inherited the territories watered by rivers Charmanvati (Chambal), Vetravati (Betwa) and Shuktimati (Ken). After

some time the main Yadava line was eclipsed by the rise of the collateral branch, of Haihayas. But a few generation later, taking advantage of the annihilation of Haihaya power at the hands of King Sagara of Ayodhya, the Yadavas of Viderbha extended their authority northward and Kanishka, the second of Yadava Kind Vidarbha found the Chedi line and became king of the region which came to be known as Chedi (or Chedi desha) which comprised the land lying between the Yamuna and the Vindhyas. It was due to activities of these Chedis, who are said to have had one of the most ancient lineage among the Aryan people of India, that this region was brought under the Aryan way of life.

About the middle of the fourth century B.C., this region was annexed to the Nanda empire of Magadha. After the Nandas, the district came under the dominion of Mauryas, but it was otherwise as obscure place, that played no part in their history. The district was part of the Mauryan empire till Ashokas death about 236 B.C. After the death of Ashoka, the Mauryan empire crumbled into pieces and this region was probably over run by Pushya Mitra the founder of the Sunga dynasty, whose son Agni Mitra fought a battle with the Yadavas on the bank of the Sindh river. The rule of Sungas over this region lasted about one hundred years from 187 to 75 BC. After sungas, the Kanva dynasty wielded power from 75 to 30 B.C.

In 1905 and 1936 a large number of copper coins belonging to Kushanas were found in this district which testifies to the erstwhile Kushana influence over this region. The end of Kushana rule synchronized with the emergence of Nagas who succeeded in capturing Padmavati, Mathura, Vidisa, Kantipuri and its surrounding regions. The most important Naga rulers who ruled over this region were Bhavanaga, Ganapatinaga and Nagasena but were conquered and ousted by the Gupta emperor, Samudragupta about the middle of the fourth century A.D. As a result this region passed into the hands of the Gupta monarchs and continued to be a part of their empire till the beginning of the sixth century. When king Harsha Vardhan (606-47 A.D.) established his supremacy in north India, this region was included in his dominion and it was during this period that we get first historical notice of Bundelkhand. After the death of Harsha, Kalchuris of Tripuri seem to have been ruling over this region some time before Pratiharas. No detailed history of Kalchuris is traceable but this region formed part of the empire of Kannauj under the leadership of its king Yashovarman who ruled over this region during the first half of the eighth century. Yashovarman was succeeded by his son Dhonga, some time before 954 A.D. The most important event of Dhonga's reign was the final severence of all connections with the Pratiharas. About 1017 AD. Sultan Mahmud attacked the Pratihara Kingdom of Kannauj and compelled its ruler Rajyapala to enter into a humiliating treaty, including recognition of Muslim supremacy.

Throughout Aurangzeb's reign the area covered by the present district formed part of the suba of Allahabad but in 18th century the Bundelas took Kalinger and Chhatra Sah, there leader, was recognised by the Mughal Emperor Bahadur Shah (1707-1712 A.D.) as ruler of Bundelkhand.

The present district of Banda was ceded to the British by the treaty of Basscin in 1803. British administration began with the arrival of Captain Baillie, agent for political affairs in Bundelkhand. The district remained quiet under the company's rule. Banda remained in the district of Bundelkhand till March 1819, when it was separated and formed into the district of southern Bundelkhand, with the headquarters at Banda, which gave its name to the new district.

The first disturbance that broke out in the settled government of over fifty years took place at the eastern end of the district. The growing discontent of masses was two measures namely, the land revenue settlements and the annexation of Awadh. On June 8, 1857, a large number of prisoners who had escaped the central jail at Allahabad crossed over to Mau in the east of the district and excited the people to action. Government property was destroyed, buildings gutted, a treasure containing rupees was plundered and even the records of the court were destroyed. By February 1858, the revolutionary flame was in full blaze and the popular character of the freedom struggle was manifested. But the fire of revolution was extinguished completely by British on 6th June 1858,

After 1858 a new feature began to appear in Banda. Trade and commerce began to grow owing to the constructions of the rail and road. During the close of the 19th century the activities of Arya

Samaj led to great social upheaval among the backward local populace. In 1908 Lajpat Rai opened Dayanand Vedic Anathalaya at Banda.

After the Rowlatt Bills and subsequent Jallianwalla incident in Amritsar, the Swaraj slogan stirred up a new spirit of nationalism in the country. The non-cooperation movement started in August 1920, spread in the district. A compaign was launched in the district for using indigenous goods, especially Khadi or homespun cloth. Gandhiji, Sarojini Naidu and Acharya J.B. Kripalani were on a hurricane tour of whole of the Northern India in order to gather support for the newly launched Civil Disobedience Movement after the failure of Simon Commission. They came to Banda in November 1929. In 1930 Civil Disobedience Movement was started in Banda, along with the rest of the country. The first phase of the movement comprised violation of the salt Act. Congress volunteers and other people of the district responded by manufacturing contraband salt at Dus Maidan near Karwi.

During the Second World War the people of the district started a massive compaign against the war fund. In 1941, thousands of congress members as well as other people of the district launched Individual Satyagraha against the war fund compaign and courted arrest. On August 8,1942 the congress passed a resolution calling upon the British to relinquish power and to Quit India. On August 15,1947 the country was liberated from alien rule and became independent. This day has since been declared as one of the three National Days of the Country with the enactment and adoption of the constitution of India on January 26, 1950, India became a Sovereign Democratic Republic.

(iii) Administrative Setup

District Banda comes under a new division Chitrakoot Dham which was constituted in the year 1997. Previously it was under Jhansi division. In the year 1997 district Banda was divided into two parts and a new district Chitrakoot was created by carving out two tahsils Karwi and Mau from it. The district has four tahsils namely Banda, Naraini, Baberu and Atarra. The district is further divided into 8 community development blocks, 2 Nagar Palika Prishad, 6 Nagar Panchayat town areas, 450 gram sabhas and 718 villages out of which 36 villages are uninhabited.

Jurisdictional Changes (1991-2000) :

The district Banda has been divided into two districts namely Banda and Chitrakoot. The district Chitrakoot was carved out from the district in May 1997 vide Govt. notification given below :

S.No.	Name of Tahsil	Notification No.	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
30	Banda District	No. 1285/1-5/97-185/74-R-5 dated 13.5.1997		Entire 2 tahsils viz. Mau with one town and Karwi with two towns transferred to newly created Chitrakoot district.
1.	Atarra Tahsil	No. 1168/1-5/2000-161/97-R-5 dated 2.5.2000		24 villages transferred to Karwi Tahsil of Chitrakoot district

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each having a departmental district level officer, from the development point of view. The district is divided into community development block. Block Development Officer (BDO) looks after development works at community development block level and Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big district and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) are incharge of their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

Location and size :

District Banda is headquarter of Chitrakoot Dham division. It is situated in the south of Uttar Pradesh and located between $24^0 53'$ and $25^0 55'$ North latitude and $80^0 87'$ and $81^0 34'$ East longitude. The area of the district is 4460.00 sq.kms. River Yamuna flows in the east of the district separating it from district Allahabad and Fatehpur. In the south is district Chhatarpur and Panna of Madhya Pradesh, district Chitrakoot in the east, and district Mahoba and Hamirpur in the west.

Physiography :

The district largely consists of irregular uplands with outcrops of rock intermingling with marshy lowland, frequently under water in the rainy season. On the basis of geology, soils, topography, climate and natural vegetation the district is divided into following sub-micro regions :

Ken Ravines Tract :- The region extends along Ken river in a strip form covering parts of Banda and Naraini tahsils. It is formed of Alluvium and Dun gravels of recent age. In its upper part the Yamuna river limits its northern boundary. Ken is the main river which flows from south to north conforming with the general slope that follows the same direction. The tributries of Ken are rivulets and streams that cut deep ravines. These ravines are more extensive in the upper part of Ken river.Gawain, Chandrawal and Turi are the other perennial streams.

Western Banda Plain :- The region covers the major part of the Banda and Baberu tahsils and small portions of Naraini and Atarra tahsils. It is also formed of Alluvium and Dun gravels of recent age. The watershed line of Baghain and Ken rivers separates the region from other parts. It is a flat plain sloping towards north. Usra, Garara, Rewai are other tributaries which drain the area. These rivers meet Yamuna at different places. Inter and Intra linkages are well developed.

Eastern Banda Plain :- The region is bounded by the Yamuna river in the north and east and 132 meters contour from the south. It covers major part of Mau, Karvi and Baberu tahsils. It is formed of Alluvium and Dun gravels of Recent age. Western limit is marked by watershed line of Baghain. General slope is from south to north. As compared to Western Banda plain it has higher altitude and rugged surface. There are numerous tributries originating from Vindhyan range that flow through this region and join with Yamuna. Most of the tributries run parallel to one another. Among them Paisuni, Gadwa, Ganta, Kharsana are worth mentioning. Small patches of ravines can be marked along these rivers.

Naraini – Karvi Pene Plain : The region is situated in the southern part of the district covering parts of Naraini, Atarra and Karvi tahsils. Unlike region Eastern Banda Plain it is formed of Archaean, Upper Pre-Cambrian and Lower Palaeozaic ages. It also differs from other regions in physiography, though it soils are of the same sub order associations as in Eastern Banda Plain. There are hilly ranges located at its south-eastern part. These hilly tracts are covered with reserved forests. There are numerous tributaries that originate from this belt. Baghain is the main river. Other rivers are Bangaha, Khareli, Barar, Madrar etc. Most of the rivers are perennial. The topography is rugged because of river erosion.

Drainage :

The general slope of the district is from north – west to east. The trans Ken portion of Banda tahsil is higher than this portion. Yamuna river forms the northern boundary of the district and seperates it from Fathpur district. Ken

is the other important river which flows from south to north, in the western part of the district and to some extent forms district boundary and joins the Yamuna. Baghain, Paisuni, Garara are the other important tributaries of Yamuna which drain the area of the district.

Climate :

The climate of the district is different from that of the Doab. The hot weather is distinguished by two peculiarities, firstly the dust storms are rare and there is purity and transparency in the atmosphere. The heat is intense in May with maximum temperate of 45^0C. The days are marked for excess heat but nights are not unpleasant. The winter is less intense and frosts are rare. The south – west monsoon brings about 90 percent of rainfall. August is the rainiest month. Actual rainfall in the year 1999 was recorded 843 mm. In the year 1998-99 the maximum and minimum temperature was 47.0^0C and 2.6^0C respectively.

Natural Economic Resources

Forestry :

Most of the forest in the district are managed by the forest department. The total area of the forests in the district is 71.07 sq.kms. Common trees found in the district are babul, baraunda, karil, tendu, khair, mahua, sahjana, bamboo and shisham. Of these shisham, khair and bamboo are industrially more important. Besides, scrub, reed, kans and other grasses are also profusely found. They provide useful grazing to cattle. Most of the requirement of village people like grazing and fodder for cattle, building materials for the houses, wood for agricultural implements, fuel, grass for thatching and rope making are met from these forests. Besides tendu leaves for bidi industry, khair for catechu (katha) – making, numerous medicinal herbs and shrubs are also obtained from local forests.

Minerals and Mining :

Development of minerals could not take place in the district due to lack of scientific and technical implements. However, there are 23 industrial units in tahsil Naraini and Atarra which are making pebbles from graphite rocks available in the district. These rocks are exported to other states for being used in construction of building and roads. Sand found in Ken, Yamuna and Baghain river of the district is also exported for construction work.

Soil :

Soil found in the district is of two kind Mar and Kabor. Mar is rich dark coloured friable soil easily recognisable from the large number of minute kankar nodules in texture. It contains a high proportion of organic substance, which enables it to be cropped continuously without manure. It is extraordinarily retentive of moisture. While it is suitable for growing good crops with moderate rains, in seasons of heavy rainfall it becomes waterlogged and difficult to work. Kabor is still tenacious soil, with a large percentage of clay, and marked with deficiency of sand. It presents extremely hard surface to plough, drying very quickly and caking into hard blocks, and in periods of heavy rainfall becomes too tenacious and miry to be worked at all. Other soils found in the district are parana, rakar, kachwara and goind.

Land and Land use Pattern :

The agriculture work is being done only in the 78% land approximately out of the total land of the district in which only 20.8% area is being utilized for two crops taken area. Due to the lack of irrigation sources, hilly and forest area, the land use is not profitable from economic point of view. The bunjar and uncultivable land is becoming less every year due to land use under agriculture.

According to statistical magazine 2000-01 in the year 1998-99 total reported area was 459700 hectares. 350629 hectares area of the reported area is net sown area, forest was 7332 hectares, cultivable waste land 14893 hectares, present fallow 21744 hectares, old fallow 19913 hectares, usar and uncultivable land 13361 hectares, land use other than agriculture 29800 hectares, pastures 420 hectares, and net irrigated area was 119014 hectares.

Agriculture and Crop Pattern :

The agricultural development of the district, like that of the rest of Bundelkhand, is not upto the standard of the doab in the north of the state. There are two principal crops in the district namely Rabi and Kharif. Among the various kharif crops the most important is rice. Most of the rice grown in the district is of late variety (jarhan or aghani) and are more aptly called transplanted variety. Juwar occupied an important place among the kharif crops in the district along with Bajra. Main crops of Rabi are wheat, chana, masur and arhar. The district occupies a leading position in the whole division in the cultivation of gram. Wheat occupied the second place among the Rabi cereals in the district. Among pulses arhar and masur occupy a sizeable area in the district. Oil seeds, like linseed, til, mustard and castor are grown. Sun-hemp, tobacco and vegetables are the main non food crops of the district. According to 1990-91 agriculture census the average holding is 1.55 hectares of the district in comparison of 2.33 hectare of division's holding. The total holdings of the district are 3.51 lacs in number in which 2.1 lacs are below one hectare, 0.75 lacs holdings are between 1-2 hectare. It is clear by this data that the number of small & marginal holders, agriculturist, are near about 280798, which shows increasing trend in comparison of 80-81 & 85-86. The number of bigger holdings are less in numbers but these are more than all in respect of area.

Irrigation :

Irrigation is an important investment for improved agricultural production. Tube-wells and canals are the major sources of irrigation in the district. In the year 1997-98 the total area irrigated by canals was 79900 hectare (71.4 percent), 21645 hectare (19.3 percent) through tubewells and rest 13.7 percent by ponds, wells and streams. To meet out the irrigation demand check dams are being made in nullahs which are flowing with the water throughout the year. Apart from these, some schemes like Masani Pump Canal, Alomra Pump Canal, Kathar Pump Canal, Lohta Pump Canal and Lamiyari Pump Canal are also under construction to adequate the irrigational capabilities in the district.

Animal Husbandry :

Animal husbandry is an integral part of the rural economy. Considerable progress has been made in recent years in improving the live stock through breeding, culling undesirable animal and upgrading indigenous cattle with improved bulls of well known tried India Breeds and distribution of seeds of improved varieties of fodder and fed at moderate prices.

According to statistical magazine the district had a total of 955163 animals in the year 1997. Out of this 477409 were cows, 245077 buffaloes, 21111 sheeps, 182259 goats, 1502 horses and ponies, 26613 pigs and 1192 other animals in the district. To look after these animals there are 19 veterinary hospitals, 24 animal husbandry centres, 16 artificial insemination centres, 5 live stock fertility centres, and one sheep development centre. Besides, there is one pig development centre, 341 piggery units and 286 poultry units in the district.

Fishery :

The fish of the district are of no great importance being confined to the large streams and tanks in which the usual varieties common to the plains are found. In the upper reaches of the larger rivers like the Ken, the Baghain and the Paisuni, however, there is excellent fishing for Mahseer.

The government has taken up a number of schemes for the development of pisciculture in the district. Under the 'Small Water Scheme' fingerlings of Rohu, Nain, Catla, Karaunch etc. are supplied to private piscicultarists, gram panchayats and other institutions at a concessional rate.

Industry :

'Poverty amidst plenty' will describe the economic condition which has prevailed in the Banda district in the past; for with a good agricultural base and despite a reasonable good infrastructure, the industrial base has remained quite weak resulting in a low income of the district. The lack of enterpreneureship and technical know how among the people and the paucity of skilled labour have been the major constraints hitherto for industrial growth in respect of the district which has been one of the most backward ones in the state.

Of the old time industries cotton cloth (gazi) was made at Banda and was printed to form floor cloth. Cooking utensils of copper, bell metal known as phul and various articles of gold and silver for use as ornaments were also manufactured here. Coarse blankets, tat, as well as rope and twine of inferior quality were manufactured at several places of the district. Pailani of Banda was famous for Sarautas (betel nut cutters). They were manufactured with an alloy of copper, brass and iron and some design were engraved on them. Of the forests products, the main were timber, bamboo and tendu leaves (used for making Bidi) which were exported to the neighbouring districts. Other important export items of the district are hides, bones and stones.

Trade and commerce :

Prosperity of an area depends largely on the volume of trade at that place. Banda market was a large centre for the cotton, With drastic curtailment in growing cotton, this mandi has turned into an assembling market for rice, wheat, lin seed, rape seed and gram. The town has also a flourishing market for the sale of non agricultural goods like cloth and general merchandise. Atarra, is perhaps the largest whole sale market in the district where rice is collected and sold in large quantities. Wheat gram and linseed are also sold in this market. The requirement of the people residing in the rural areas of the district are generally met by small local bazaars, known as hats. The markets are scattered all over the district and in these markets the dealers of the neighbouring villages exhibit their wares. These hats are held twice a week and form centres of trade in the local produce. In some of the markets handloom products and pottery are also sold.

Rice and forest products are the main items of export which are sent to Kanpur, Allahabad, Jhansi, Jabalpur, Bombay and Calcutta. Food grains particularly wheat and pulses, sugar, cloth, general merchandise, coal, kerosene oil and petrol are the main items of imports. Majority of these commodities are imported from Kanpur, Varanasi and Allahabad.

Transport :

The district is well connected by rail and road transport. The district has two-railway lines, one is Jhansi – Manikpur and other is Banda-Kanpur. The length of broad gauge passing through the district was 79 kms having 8 railway stations. Total length of roads in the district was 1544.10 kms according to the statistics available for the year 2000-01. The length of national highways passing through the district was 67.30 kms and state highways 234.28 kms. Main district roads are 102.35

kms. long, whereas district and rural roads are 282.48 and 600.13 km long respectively Roads under Zila Parishad are 25 km. long and under Nagar Palika Parishad and Nagar Panchayat are 38 km. Means of road transport available in the district are State Road Transport Corporation buses and private buses, taxi, jeeps, trucks etc.

Electricity and Power :

Electricity plays an important role in the economic development of the district. Total consumption of electricity during 1999-2000 was 196410 thousand kwh. Largest consumer of electricity was agriculture sector which consumed 125530 thousand kwh followed by domestic light 34900 thousand kwh, industrial sector 24740 thousand kwh and commercial sector 5590 thousand kwh. Public light consumed 380 thousand kwh of electricity whereas Govt. tube-wells etc 5270 thousand kwh. Number of total villages electrified till 1999-2000 was 532 and scheduled caste hamlets electrified were 464. All 8 towns are electrified and 2350 private pump sets have been installed. Government is providing subsidies for establishment of bio gas plants, solar energy and wind power. 1795 Bio gas plants have been established in the district.

Gram Panchayat, its composition, jurisdiction and role in village development:

A Gram Panchayat acts as the executive of the Gram Sabha. It is vital for village development.

Composition : The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 450 gram sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

Its Terms : The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

Qualifications : In order to be elected to a village panchayat, a candidate should posses the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions : A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It look the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.

6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area of the uplift of agriculture.

7. It manages and maintains the common property of the village.

In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100

(v) Census Concepts

Building:

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room :

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.- In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as

sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder.

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households

occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number

Only cases where a structure with roof and pillars has come up was treated as a building.

Village-

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages. which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by

itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.-

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

-For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:--

i) a city or town with one or more contiguous outgrowths;-

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:--

Scheduled Castes :

1	Agariya	29	Dharkar
2	Badhik	30	Dhobi
3	Badi	31	Dom
4	Baheliya	32	Domar
5	Baiga	33	Dusadh
6	Baiswar	34	Gharami
7	Bajaniya	35	Ghasiya
8	Bajgi	36	Gond
9	Balahar	37	Gual
10	Balai	38	Habura
11	Balmiki	39	Hari
12	Bangali	40	Hela
13	Banmanus	41	Kalabaz
14	Bansphor	42	Kanjar
15	Barwar	43	Kapariya
16	Basor	44	Karwal
17	Bawariya	45	Khairaha
18	Beldar	46	Kharwar
19	Beriya		(excluding Banbasi)
20	Bhantu	47	Khatik
21	Bhuiya	48	Khorot
22	Bhuyiar	49	Kol
23	Boria	50	Kori
24	Chamar, Dhusia,	51	Korwa
	Jhusia, Jatawa	52	Lalbegi
25	Chero	53	Majhwar
26	Dabgar	54	Mazhabi
27	Dhangar	55	Musahar
28	Dhanuk	56	Nat

57	Pankha	65	Shilpkar
58	Parahiya	66	Turaiha
59	Pasi, Tarmali		**Scheduled Tribes**
60	Patari	1	Bhotia
61	Rawat	2	Buksa
62	Saharya	3	Jaunsari
63	Sanaurhiya	4	Raji
64	Sansiya	5	Tharu

Language and Mother tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.-

Literate :

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate:

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work- :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker:

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker:

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.-

Non worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.-

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.--

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer-

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.-

Household industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometer of the area.-

Age :

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states. --

System of Sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate-

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)-

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} (ASFR)}{1000}$$

Total marital fertility rate (TMFR)-

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.-

$$TMFR = \frac{5 \times \sum_{15\text{-}19\text{-}}^{45\text{-}49\text{-}} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q_1 Probability of dying between birth and age 1 This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q_2 Probability of dying between birth and age 2

q_5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR) --

Infant mortality rate (IMR)--

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as.

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{-Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births -during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)-

$$= \frac{\text{Number of deaths of 29 days to less than- One year during the year}}{\text{Number of live births -during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000-$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age-group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.--

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

(vii) 2001 Census findings

Population Distribution

The total population of the district is 15,37,334 divided into the 12,93,316 in rural and 2,44,018 in urban areas. The most populous tahsil is Banda. with 5,57,861 population followed by Baberu tahsil a population of 3,92,598.The least populous tehsil is Naraini. with a population of 2,50,895 The maximum urban population is Banda tahsil 1,57,257 followed by Atarra with 59,150..urban population whereas the least urban population is in Naraini tahsil which is 13,112 At the 2001 Census the district has about 15.9. per cent of its population living in towns. As compared to this in the State the same is about 20.8 per cent. The percentage of urban population is highest at about 28.2 per cent in Banda tahsil followed by about 17.6 per cent in Atarra. tahsil and least of about 3.7 per cent in Baberu tehsil.

Size, Class and Status of Towns

There are 8 statutory Towns in the district. Banda NPP with 1,34,839.population is Class I town. Atarra NPP.with 42,384.population is Class III There are three Class IV towns in the district Banda NP, Bisanda buzurg NP, and Naraini NP. Also in the district there are three Class V towns namely Mataundh NP, Tindwari NP and Oran NP. The two Nagar Palika parishad in the district are Banda and Atarra apart from Nagar Panchayats, namely Mataundh, Tindwari, Baberu, Oran, Bisanda buzurg and Naraini.

Population Growth

The population of the district in 1991 adjusted to jurisdiction of 2001 was 12,66,143. in the district. The population of the district at 2001 Census is 15,37,334 There has been decadal variation

wherein population since 1991 increasing to 2,71,191. in absolute term (21.4. per cent). The males who were 1,15,352.at 1991 Census increased to 19.6 percent, and females increased 1,35,839 to 23.6 percent. As against to 21.4.per cnet decadal growth in the district, the growth rate has increased 25.8. per cent in the state of Uttar Pradesh.

Population Density

The area of the district is 4460square kilometre. The density of population in the district is 345, as compared to 690. in the state. In the rural areas of the district the population density is, 294.

Sex ratio

The sex ratio in the district is 860 while it is 898. in the state of .Uttar Pradesh. In the rural areas of the district the sex ratio is high at 861.while it is only .855 in urban areas. The rural sex ratio of the district is lower to the state. The sex ratio among 4 tahsils varies between 852..in Atarra.to 869 in Baberu. Among C.D. blocks the sex ratio varies from 843 in Badokhar Khurd to 891 in Jaspura. The sex ratio in rural population in the district comes to 861. Among towns of the district the least sex ratio is found in Bisanda buzurg (830) and highest in Mataund (887). The sex ratio of population in the age-group 0-6 is 917 in the district which is quite above to 860 from the general population. The sex ratio of population of the age-group 0-6 in the rural areas is 919 as against to902 in urban areas. The sex ratio of population in the age-group 0-6 among 8 C.D. blocks varies from as low as 890.in Mahuva. as high as 941in bisanda. The sex ratio of rural population in the age-group 0-6 by ranges is highest for about 25.8. per cent population in the range 900-949 The sex ratio of population in the age-group 0-6 among towns varies from 837 in Oran NP to 945 in Naraini NP.

Work Participation Rate

In the district about 40.3 per cent (619361persons) pertains to the category of working population. Average male working population is about 48.9. per cent against about 30.3. per cent females. Main workers constitute 26.8. per cent of population. Female workers predominate male among marginal workers. Non-workers contribute about 59.7. per cent of total population. Out of these about 72.6 per cent are from the urban population. In rural areas about 65.6 per cent females are Non-workers. Of the total worker population in the district 47.4 per cent are cultivators, 31.3 per cent engaged as agricultural labourers, 3.1..per cent in household industry and 18.1..per cent as other workers. Among male workers about 48.5. per cent are cultivators as compared to about 45.4. per cent among females. Similarly as against 23.8 per cent male other workers, the proportion of female is only 7.5 percent. In rural areas of the district as much as about 51.9 per cent of working population is cultivators as against only 9.9.per cent in urban areas. In case of other workers, the composition of rural and urban proportion is 11.0 and .76.9. per cent of working population. It may be mentioned that the working population in the district is about 40.3. per cent as compared to about 32.5. per cent in the state.

Literacy

In the district about 54.4 per cent of the population is literate as against about 56.3 per cent in the state of Uttar Pradesh. In the district 69.3. per cent of the male population is literate as compared to 68.8. per cent in the state. However, among females the literacy in the district in about 36.8. per cent as compared to about 42.2per cent at the state level. In the district literacy rate is about 72.6. per cent in urban areas as against about 50.8 per cent in rural areas. The gap in male/female literacy rate is 34.8 per cent in rural areas as compared to 21.1 per cent in urban areas. The literacy rate among C.D. blocks varies between 44.2.per cent in Bisanda to 56.8 per cent in Tindwari Similarly, the literacy rate among towns varies from about 55.6 per cent in Mataundh NP to .76.5 per cent in Banda (NPP+OG).

(viii) Brief analysis of PCA data

The district throws up an vivid picture of its population at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted through the following inset tables.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Banda	-	-	-	557861	400604	157257	-	-	-	-	28.2
2	Baberu	-	-	-	392598	378099	14499	-	-	-	-	3.7
3	Atarra	-	-	-	335980	276830	59150	-	-	-	-	17.6
4	Naraini	-	-	-	250895	237783	13112	-	-	-	-	5.2
District Total:		***1,266,143***	***1,085,304***	***180,839***	***1537334***	***1293316***	***244018***	***21.4***	***19.2***	***34.9***	**14.3**	**15.9**

The growth rates in the Lalitpur district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 21.4 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 19.2 and 34.9 per cent respectively. Out of the total population of the district 84.1 per cent lives in rural areas while 15.9 per cent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 14.3 per cent in 1991 to 15.9 per cent in 2001 in the district.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 682 inhabited villages, 49 (7.2 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 78 villages having 11.4 per cent villages of the district while in the size class of 500-999 population claims 123 villages with 18.0 per cent of the total villages in the district. 206 villages (30.2 per cent) are in the size class of 1,000-1,999 and 184 villages (27.0 per cent) are in the size class of 2,000-4,999. 36 villages (5.3 percent) in the district fall in the ranges of 5,000 -9999 population. 6 villages (0.9 percent) are in size class of 10,000 and above. The biggest village in the district having population of 13534 persons is located in Baberu C.D. block of district.

Table 3 : New Towns, Denotified, Declassified and Merged Towns in 2001 Census

Name of town
1

(a) New

(i) Statutory town

NIL

(ii) Census town

NIL

(b) Denotified

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns.

NIL

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria.

NIL

(iii) Census towns of 1991 census are notified as statutory town in 2001 census.

NIL

(c) Declassified

NIL

(d) Wholly merged with other town(s)

NIL

**Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.*

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	24	3.5	22,200	1.7
11-20	1	0.1	34	0.0
21-50	12	1.8	1,486	0.1
51-100	27	4.0	12,554	1.0
101-200	91	13.3	106,166	8.2
201-300	155	22.7	321,603	24.9
301-500	182	26.7	386,818	29.9
501 +	190	27.9	442,455	34.2
Not known	0	0.0	0	0.0
District Total:	**682**	**100.0**	**1,293,316**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 190 accounting for 27.9 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 34.2 per cent population. The lowest density ranges of 0-10 & 11-20 persons per sq. km. cover 25 villages (3.6 per cent). 190 villages (27.9 per cent) have highest density range with more than 501+ above persons per sq. km. while the corresponding proportion in the lower range of 201 to 500 is 49.4 per cent of the total inhabited villages having 54.8 per cent population of the district. In the medium densities ranges of 21 to 50 and 51-100 persons account for 1.8 and 4.0 per cent of inhabited villages respectively. Both these ranges claim 1.1 per cent rural population.

TABLE 5: SEX RATIO OF STATE AND DISTRICT 1901-2001

Year	UTTAR PRADESH			BANDA		
	Total	Rural	Urban	Total	Rural	Urban
1901	938	941	916	985	982	1039
1911	916	922	866	977	975	998
1921	908	918	834	950	950	940
1931	903	916	813	934	941	845
1941	907	922	824	934	938	885
1951	908	922	827	930	936	869
1961	907	921	817	910	913	861
1971	876	884	826	870	874	822
1981	882	889	850	858	863	828
1991	876	879	864	832	833	827
2001	898	904	876	860	861	855

NOTE- Sex Ratio has been defined here as the number of females per 1000 males

As per 2001 Census sex-ratio of 860 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 1961. But subsequent decades show declining trend from 1971 to 2001 and value remained below the state average. The lowest sex ratio of 832 females per 1000 males was recorded in the district during 1991 against the state average of 876. It is also observed that the proportion of females in rural areas is higher than that of urban areas in district except 1901 and 1911 census.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Banda	858	859	857
2	Baberu	869	869	863
3	Atarra	852	854	844
4	Naraini	860	860	862
District Total:		**860**	**861**	**855**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 860 females for every thousand males in Banda district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas except Naraini tahsil. The sex-ratio among rural and urban population is 861 and 855 females respectively. The rural sex-ratio in the tehsils varies between 854 in Atarra tahsil and 869 females per 1,000 males in Baberu tahsil. The sex-ratio in Baberu (T) is higher than district rural average (861). In urban areas the highest sex-ratio is recorded in Baberu urban (863) and the lowest is in Atarra urban (844).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Jaspura	891
2	Tindwari	856
3	Badokhar Khurd	843
4	Baberu	863
5	Kamasin	867
6	Bisanda	869
7	Mahuva	850
8	Naraini	863
District (Rural) Total:		**861**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 861 females per 1,000 males as a whole. Among the C.D. blocks the highest sex-ratio of 891 females is found in Jaspura C.D. block and is followed by Bisanda (869) while the lowest of 843 is recorded in Badokhar Khurd C.D. block. The sex-ratios of Jaspura, Baberu, Kamasin, Bisanda and Naraini C.D. block are higher than the district rural average of 861 females and in remaining blocks, this is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	15	2.2	3,599	0.3
700-749	13	1.9	6,978	0.5
750-799	54	7.9	62,596	4.8
800-849	203	29.8	457,743	35.4
850-899	215	31.5	516,956	40.0
900-949	115	16.9	180,857	14.0
950-999	38	5.6	52,407	4.1
1000-1099	17	2.5	8,413	0.7
1100+	12	1.8	3,767	0.3
District Total:	**682**	**100.0**	**1,293,316**	**100.0**
Sex ratio (Rural) for District:			**861**	

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 215 accounting for 31.5 per cent of the total villages having largest population of 40.0 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which claims 203 villages (29.8 per cent) and 35.4 per cent population. The highest range of 1,100 and above claims 12 villages (1.8 per cent). This range shares 0.3 per cent rural population of the district while in the sex-ratio range of 900-949, there are 115 villages (16.9 per cent). In remaining sex-ratio ranges of 1,000-1,099, 950-999, 750-799, 700-749 and less than 700, the number of villages are 17 (2.5 per cent), 38 (5.6 per cent), 54 (7.9 per cent), 13 (1.9 per cent) and 15 (2.2. per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 215 having maximum population (40.0 per cent) fall in the sex-ratio rang of 850-899 females.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Atarra	NPP	850
2	Baberu	NP	863
3	Banda	NPP+OG	855
4	(i) Banda	NPP	856
5	Banda	UA	855
6	Bisanda Buzurg	NP	830
7	Mataundh	NP	887
8	Naraini	NP	862
9	Oran	NP	831
10	Tindwari	NP	871
Sex ratio (Urban) for the district:	**855**		

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 855 females per 1,000 males as a whole. Among the 8 towns of the district the sex-ratio varies between 830 to 887. Mataundh NP has the highest sex-ratio (887) while Bisanda Buzurg has the lowest sex-ratio of 830 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

		Urban	**40,108**	**21,089**	**19,019**	**902**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 303479 persons comprising 158344 males and 145135 females. The total sex-ratio in this age-group works

out 917 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 919 and 902 females respectively in this age-group. The rural sex-ratio in tahsil varies between 910 in Atarra tahsil and 928 in Baberu tahsil respectively. The sex-ratio of Baberu tehsil is higher than district rural average (919). Atarra tehsil has lowest sex-ratio of 908 females among the total population. In urban areas, the higher sex-ratio is recorded in Naraini urban (945) and the lowest is found in Atarra urban (895).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

District (Rural) Total:		**263,371**	**137,255**	**126,116**	**919**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 919 for the district (rural). The sex-ratio of C.D. block varies between 899 to 941. It is highest in Bisanda C.D. block i.e. 941 followed by 931 in Badokhar Khurd C.D. block and lowest 899 females is found in Mahuva C.D. block. The sex-ratio of Jaspura, Badokhar Khurd, Baberu and Bisanda C.D. block are higher than the district rural (919) while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	38	5.6	3,707	1.4
700-749	26	3.8	5,956	2.3
750-799	40	5.9	9,707	3.7
800-849	88	12.9	30,330	11.5
850-899	96	14.1	43,406	16.5
900-949	138	20.2	68,031	25.8
950-999	105	15.4	63,073	23.9
1000-1099	83	12.2	29,690	11.3
1100+	68	10	9,471	3.6
District (Rural) 1	**682**	**100**	**263,371**	**100**
Sex ratio (Rural) for District:		**919**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 138 (20.2 per cent) having largest population (25.8 per cent) in the district (rural) fall in the sex-ratio range of 900-949 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 950-999 which claims 105 villages (15.4 per cent) and 23.9 per cent population. Next to it, 96 villages (11.1 per cent) are in the range of 850-899 with 16.5 per cent population. 88 villages (12.9 per cent) having 11.5 per cent population fall in sex-ratio range of 800-849. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 1,000-1,099 and 11, above claim less number of villages and these are distributed as 38 (5.6 per cent), 26 (3.8 per cent), 40 (5.9 per cent), 83 (12.2 per cent and 68 (10.0 per cent) respectively. In these ranges, the percentage of population is also comparatively low. It becomes clear from the table that more than fifty percent of villages i.e. 394 having population (64.6 per cent) fall in the higher sex-ratio ranges of 900 to 949 and above.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town+*	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

District(Urban) Total			**40,108**	**21,089**	**19,019**	**902**

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns 2001. In urban area of the district Banda total population in age group of 0-6 is 40108 in which 21089 are males and 19019 females. The sex ratio of the urban areas of the district is 902. Among towns sex ratio in age group 0-6 varies from 837 in Oran NP town to 945 in Naraini NP. In Mataundh NP, Tindwari NP, Baberu NP, Atarra NPP and Naraini NP, sex ratio is more than the district average. Among 8 towns Banda NPP has highest population.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

		Urban	**244,018**	**39,238**	**24**	**16.1**	**0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1537334 total population of the district, 20.8 per cent of the total population belong to the Scheduled Castes and negligible per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 21.7 per cent of rural population and 16.1 per cent urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Atarra tahsil (25.8) while the lowest is found in Banda tahsil (16.9). The proportion of Scheduled Tribes population is negligible in both rural and urban areas.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

District (Rural) Total:		**1,293,316**	**280,988**	**280,988**	**21.7**	**0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 21.7 per cent of rural population of the district belongs to Scheduled Castes and zero percent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 12.6 per cent in Jaspura and 27.1 per cent in Mahuva C.D. block. The other C.D. block containing the high percentage of Scheduled Castes are Bisanda (26.4), Badokhar Khurd (21.6) and Kamasin (21.3).

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage

District Total	**682**	**100.0**	**280,988**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 62 villages accounting for 9.1 per cent of total 682 inhabited villages in the district do not have any Scheduled

castes population. The proportion of Scheduled Castes population is less than 5 per cent in 32 villages (4.7 per cent). In 85 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 190 villages constituting 27.9 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 175 and 81 villages respectively. Both these ranges together account for 37.6 per cent villages of the district. 50 villages fall in the range of 41-50 and 51-75 percent. 7 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 0.4 per cent Scheduled Castes population of the district. The maximum of the 40.3 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. Negligible percent of rural population of the district belong to Scheduled Tribes population. There are 680 (99.7 per cent) villages where none of Scheduled Tribes have been recorded in the district. 2 (0.3 per cent) villages have proportion of Scheduled Tribes population up to less than 5 per cent.

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded during 2001 census in district Banda (urban). The table depicts that scheduled caste population in Oran NP, Bisanda Buzurg NP and Atarra NPP were above 22 percent but below (12.5 per cent) in the Banda NPP. Scheduled tribe population is negligible in the urban areas of the district. There are no scheduled tribe population in 7 towns out of 8 towns. Negligible percentage of scheduled tribe population was recorded in Banda NPP.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4

6	Bisanda	859	0
7	Mahuva	853	0
8	Naraini	865	1308
District (Rural) Total		**856**	**1308**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 856 for district (rural). Among the C.D. blocks, the highest sex ratio of 865 females is found in Naraini C.D. block and lowest of 843 females is recorded in Badokhar Khurd C.D. block. This table also shows that sex ratio of ST population in rural areas of the district is 1308 point above parity reflecting excess of females over males at district level. The sex ratio of Naraini CD block is above the parity line while in remaining seven CD block is zero.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.ATown	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 54.4 per cent in the district. This proportion in rural area is 50.8 per cent against 72.6 per cent in urban areas. In the district the literacy rates of males (69.3 per cent) is much higher than that of females (36.8 per cent). Among the tahsils, Banda tops with 60.5 per cent literates followed by Atarra tahsil (53.4 per cent). Baberu tahsil with 49.3 per cent literates stands at the bottam in the district. Out of 4 tahsils, the literacy rates of one tahsil is higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to32.5 percent in the district, as a whole. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 21.1 points against the rural areas, where the gap between male and female literacy is 34.8 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

District (Rural) Total:		**522924**	**522,924**	**372,052**	**150,872**	**770,392**	**322,937**	**447,455**	**66.7**	**32**	**34.8**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 50.8 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 66.7 and 32 per cent respectively which shows very wide gap of 34.8 per cent in male and female literacy. At C.D. block level, Tindwari C.D. block has the highest rural literacy rate of 56.8 per cent while 71.7 per cent males and 39.1 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Bisanda C.D. block (44.2 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 37.8 points is found in Kamasin C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5

District Total:	**682**	**100.0**	**1,293,316**	**100.0**
Literacy rate for District:			**54.4**	

Table 23 gives the distribution of villages by literacy rate range in the district. There is no literate in one village (0.1 per cent) of the district and population of this village is only one person. 2 villages (0.3 per cent) have all the literate population. 256 villages accounting for 37.5 per cent of the total villages are in the literacy range of 51-60 per cent and 94 villages (13.8 per cent) fall in the

literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent is observed in 307 villages (45.0 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 24 villages (3.5 per cent). The range of 51-70 have the maximum number of 350 villages forming 51.3 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Banda NPP is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (72.6 percent). The literacy rate is quite high (above 84 per cent in two towns) among males. Female literacy rate is not a behind in two towns (above 59 per cent). However, literacy rate among females is very low (39.3 per cent) in Oran NP, thus the gap in male female literacy rate is very high (33.6 percent).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Table 25 shows number and percentage of scheduled castes literates and illiterates by sex in CD blocks 2001. In rural areas of the district proportion of literates is 41.7 per cent in which 56.6

are males and 24.1 females. Thus, the gap in male and female literacy rates is 32.5. Among 8 CD Blocks, Tindwari CD block has the highest literacy rate and Bisanda CD block has the lowest literacy rates. The gap in male/female literacy rate in Bisanda CD block is highest and this gap is lowest in Naraini CD block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

The table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of literates is less than illiterates in the district (urban). The percentage of literates is least in Bisanda Buzurg among 8 towns but the gap in male/female literate rate is highest in case of Baberu NP. The males in all the 8 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Mataundh NP and female literacy rate is highest in Banda NPP (48.3 percent).

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate

District (Rural) Total:		**11**	**8**	**3**	**19**	**5**	**14**	**50**	**100**	**21.4**	**78.6**

The table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is highest than literates in the district (rural). The literacy rate of the scheduled tribes population al about 50.0 per cent is higher than the corresponding rate ofonly about 41.7 per cent in case of scheduled castes community. The gap in male and female literacy rates at about 78.6 per cent is higher than that of the scheduled castes community (32.5 per cent).

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population

District Total:	**2**	**100.0**	**30**	**100.0**
Literacy rate for District (Rural): 50				

The table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 census. In the district the scheduled tribes population is found in 2 villages out of which in 1 village the literacy range is 51-60 per cent. However, the maximum (66.7 per cent) of the scheduled tribes population (20) is found in only one village with literacy range from 51 to 60 percentages.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers 40.3 per cent of the total population in the district. The total workers are comprised of 26.8 per cent of main workers and 13.5 per cent of marginal workers and the remaining 59.7 per cent are non-workers.

Among the main workers, males participation rate in the district is 40.2 per cent and 11.3 per cent of females. Male and female marginal workers account for 8.7 and 19.0 per cent respectively. The percentage of female marginal workers is higher than males. Total workers (main

and marginal workers) among tahsils vary from 34.8 per cent in Banda tahsil to 45.3 per cent in Naraini tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers in rural population of the district. Of the 1293316 total rural population of the district, 27.6 per cent has been categorised as main workers and the marginal workers constitute 15.2 per cent and the remaining 57.3 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 40.6 per cent males and 12.4 per cent females are in the category of main workers. Male and female marginal workers account for 9.3 and 22.0 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 42.7 per cent. At the C.D. block level, Kamasin CD block has highest proportion of total workers forming 46.5 per cent of the total population. It is closely followed by Naraini (46.0 per cent), Bisanda (45.7 per cent). Mahuva (45.6 per cent), Baberu (40.9 per cent) and Badokhar Khurd (39.0 per cent). The lowest percentage of 36.7 per cent is recorded in Jaspura C.D. block.

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 47.4 per cent of the total workers (main + marginal) and remaining workers are engaged as agricultural labourers (31.3 per cent), Household industry workers (3.1 per cent) and other workers (18.1 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 35.4 per cent in Banda tahsil and 54.6 per cent in Naraini tehsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 45.4 per cent which is lesser as compared to 48.5 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The proportion of agricultural labourer varies between 28.8 percent in Banda and 34.5 percent in Baberu tahsil. The workers in other activities occupy the third position next to agriculture laborers in the district as well as in each tahsil. The highest proportion of 32.5 per cent of other workers is recorded in Banda tahsil while the lowest proportion of 9.1 per cent is found in Baberu tahsil.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Note: Percent of Worker to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) are 42.7 per cent of total population. Among these workers, cultivators constitute 51.9 per cent, 34.2per cent agricultural labourers, 2.9 per cent household industry workers and 11.0 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercialy viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.9 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (47.0 per cent) is less than males (54.8 per cent) in the rural areas of the district. The females play main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 42.4 per cent in Tindwari C.D. block to 59.4 per cent in Naraini C.D. block. Similarly for other workers, the lowest proportion is 5.2 per cent in Bisanda C.D. block while 18.8 per cent is the highest in Badokhar Khurd C.D. block. The percentage of household industry workers is quite low i.e. only 2.9 per cent in the district. The percentage of agricultural labourers is highest in Bisanda (38.8 percent) block and is followed by Jaspura (36.5 percent) and lowest in Naraini (28.8 percent) C.D. block. Similarly, household industry workers varies in C.D. blocks between 2.6 per cent in Jaspura and Naraini and 3.3 per cent in Badokhar Khurd.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Banda. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (76.9 percent) followed by cultivators with 9.9 per cent (10.0 per cent male and 9.0 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (33.6) is recorded in Mataundh NP. In the agriculture labourers category Banda NPP recorded very low percentage (1.6 percent). Household industry workers are also very low (1.8 per cent in Mataundh NP 4.3 per cent in Banda NPP and 5.4 per cent in Baberu NP. As the usual trend recorded in the urban areas, other workers are in high percentage (90.7 per cent in Banda NPP, 74.8 per cent in Naraini NP and 74.7 per cent in Atarra NPP).

(ix) Brief analysis of the Village Directory and Town Directory data :

One of the major part of the District Census Handbook is Village and Town Directories.These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 682 inhabited villages in the district 593 villages or 87.0 per cent have been provided with the education facilities of one type or the other. Similarly 191 villages in the district constituting 28.0 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 664 or 97.4 per cent villages. As regards post office facility which includes facilities like telegraph office and post and telegraph, 177 villages constituting 26.0 per cent of villages have been provided with post office facility within the village. 122 or 17.9 per cent villages have been provided with the telephone facility, 138 or 20.2 per cent with transport facility, 41 or 6.0 per cent villages with bank facility and 33 or 4.8 per cent with agricultural credit societies. Similarly there are 374 or 54.8 per cent villages which have been linked with the pucca road. Total 438 or 64.2 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation Jaspura C.D. block has the highest 97.8 per cent villages where educational facility is available and lowest 76.2 per cent is found in Naraini C.D. block Medical facility is highest in Bisanda (38.6 percent) and lowest (18.7 per cent) in Kamasin C.D. block. Improved drinking water is available to cent-percent villages in Jaspura, Kamasin and Bisanda blocks while in other blocks, it is above 92 per cent. Telephone facility is highest in Tindwari

block (38.3 per cent) while a single village of Jaspura C.D. block enjoy this facility. Transport and communications is less developed in Kamasin C.D. block where only 10.7 per cent villages are covered by this facility whereas 32.9 per cent villages of Badokhar C.D. block are availing this facility. In the field of power supply highest 86.4 percent in Tindwari C.D. block and lowest 46.7 percent in Kamasin C.D. block enjoy this facility.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1293316 persons in the district, 1246141 or 96.4 per cent have educational facility of one or the other type. Similarly 609785 or 47.1 per cent population has medical facilities while 1287630 or 99.6 per cent have got improved drinking water facility. Post office facilities are available to 660681or 51.1 per cent population. Telephone facility is available to 336938 or26.1 percent population. Transport communications facility is available to 435252 or 33.7 per cent. Bank facility is available to 195533 or 15.1 per cent. 149663 or 11.6 per cent have been provided with the facility of agricultural credit societies. 916922 or 70.9 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1007896 or 77.9 per cent rural population in the district. Similar pattern of availability of facilities is visible in the rural population at C.D. block level. However, in Tindwari and Badokhar C.D. blocks facilities of education, medical and improved drinking water are available to larger proportion of population

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	78	12	1	91

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 91 villages do not have primary school in their villages and out of these villages, children of 78 villages have to travel less than 5 kms. for schooling Out of 682 inhabited villages as many as 432 are deprived of middle school and 678 of degree college. Of these 263 villages avail the facility of middle school at a distance of less than 5 kms., 147 at a distance at 5-10 kms. and the remaining 22 at a distance of 10+ kms. In respect of degree college 32 avail this facility at a distance of less than 5 kms., 105 between 5 to 10 kms. and rest 541 villages at a distance of 10+ kms.

Similarly there are 647 villages in the district which have been devoid of Hospital facility and 668 villages which are deprived of PHC facilities. Of these 165 villages have the facility of Hospital available within 5 kms. while in respect of 232 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 250 villages have this facility at a distance of 10+ kms. As regards PHC 90 villages avail this facility at a distance of less than 5 kms., 251 at a distance of 5-10 kms. and the remaining 327 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 505 villages do not have this facility in the village itself. Of these majority i.e. 333 villages have this facility at a distance of less than 5 kms., another 135 villages avail it at a distance of 5-10 kms. In the remaining 37 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 560 villages in the district which are without telephone facility. Of these 226 avail this facility at a distance of less than 5 kms., 141 at a distance of 5-10 kms. and remaining 193 have to traverse a distance of 10+ kms.

For Bus service out of 570 villages which do not have facility, 185 villages avail this facility at a distance of less than 5 kms., 263 at a distance between 5-10 kms. and 122 at a distance of 10+ kms.

In the entire district 641 villages are deprived of Commercial Bank & 675 of Co-operative Bank. Of these 641 villages which are deprived of Commercial Banks 207 villages avail this facility at a distance of less than 5 kms., 257 between 5-10 kms. & the remaining 177 at a distance of 10+ kms. Regarding Co-operative Banks out of 675 villages 90 villages avail this facility at a distance of less than 5 kms., 254 at a distance of 5-10 kms. and remaining 331 at a distance of 10+ kms. 649 villages do not have agricultural credit societies. This facility to 189 villages is available at a distance of less than 5, kms 287villages at a distance of 5-10 kms. and to the remaining 173 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 682 inhabited villages in the district, there are 58 villages which have nearest towns upto a distance of 5 kms. Of these only 51 villages forming 87.9 per cent of these total villages, are having the educational facilities of one type or the other and 17 villages constituting 29.3 per cent, have the medical facilities within the village, 13 villages forming 22.4 per cent have the facility of post office within the village and 16 or 27.6 per cent have the facility of telephone. 19 villages constituting 32.8 per cent have been linked by transport service. 4 villages comprising 6.9 per cent have been provided bank facilities, while 3 villages constituting only 5.2 per cent have been provided by agricultural credit societies. 47 villages comprising 81.0 per cent have been provided with pucca road.

There are 383 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 342 villages constituting 89.3 per cent have been provided with the educational facilities. 113 villages comprising 29.5 per cent have been provided with medical facilities. 105 villages constituting 27.4 per cent enjoy the post office facility. 70 villages comprising 18.3 per cent have

been provided the telephone facility. 71 villages constituting 18.5 per cent have been linked with transport communications. 21 villages comprising 5.5 per cent have bank facility. 17 villages constituting 4.4 per cent are having agricultural credit societies, while 199 villages or 52.0 per cent are approachable by pucca road. 215 villages fall in the distance range of 16-50 kms. Of these, 82.3 per cent villages have educational facility, 22.3 per cent with medical, 23.3 per cent with post office, 11.6 per cent with telephone and transport & communications is available to 19.1 per cent villages. Banks and agricultural credit societies facilities are available to 6.0 and 4.7 per cent of villages. 51.2 percent villages are approachable by pucca road.

There are 3 villages in the district which are situated beyond 50 kms. from the nearest town and out of these 3 or cent per cent enjoy the education facility in the village itself whereas 2 villages comprising 66.7 per cent have been provided with medical facility of one type or the other. 2 such villages comprising 66.7 per cent have the post office facility. None village have been provided with telephone facility. One village constituting 33.3 per cent have been linked by bus service whereas None village have been provided with the bank facilities. and agricultural credit societies while 2 villages comprising 66.7 per cent have been linked by pucca road. There are 23 villages whose distance range from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 20 or 87.0 per cent villages have the educational facility of one or other type. 11 villages constituting 47.8 per cent have the medical facility,30.4 percent with post office, 47.8 percent villages with telephone, 26.1 percent villages have transport and communication facility, 13.0 percent of villages have banks and agricultural credit society and 69.6 percent villages have been connected with pucca roads.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available							Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Banda district out of total 682 inhabited villages, overwhelming 127 have a population of less than 500 persons. Of these, 56 villages (44.1 per cent) have education facility, 4 villages

(3.1 per cent) have medical facility, 113 villages (89.0 per cent) have improved drinking water facility. None of the villages (Zero per cent) have post office facility. 3 villages (2.4 per cent) have telephone facility. 8 villages (6.3 per cent) have been linked by bus service. None of the villages have Bank and agricultural credit societies, 43 villages (33.9 per cent) have been linked with pucca road. 47 villages (37.0 per cent) have been provided with electricity.

Out of 123 villages, which fall in the population range of 500-999 persons, 115 villages (93.5 per cent) have been provided with the education facility, 21 villages (17.1 per cent) with medical facility, 121 villages (98.4 percent) have improved drinking water facility. 5 villages (4.1 per cent) have been provided with post office facilities, 18 villages (14.6 per cent) with telephone facility. 14 villages (11.4 per cent) with transport facilities, One village (0.8 per cent) with bank facility, one village (0.8 per cent) with agricultural credit societies & 54 villages (43.9 per cent) have approach by pucca road. 62 villages (50.4 percent) in this range have electricity.

206 villages fall in population range of 1,000-1,999 persons. Of these 202 villages (98.1 percent) have education facility, whereas 40 villages (19.4 per cent) enjoy the medical facility, 204 villages (99.0 percent) have improved drinking water facility, 31 villages (15.0 per cent) have post office facility, 42 villages (20.4 per cent) have telephone facility, 34 villages (16.5 per cent) have transport communications facilities, 2 villages (1.0 per cent) have bank facilities, 1 village (0.5 per cent) have agricultural credit societies and 104 villages (50.5 per cent) have approach by pucca road and 141 villages (68.4 percent) have been provided with electricity.

There are 184 villages in the district which are covered under 2,000-4.999 population range. In this range, all the villages enjoy improved drinking water facility, 179 villages (97.3 percent have education facility, 94 villages (51.1 percent) have medical facility. 104 villages (56.4 per cent) have post office facility, 43 villages (23.4 percent) with telephone facility, 58 villages (31.5 per cent) have transport and communications facility, 20 villages (10.9 percent) have bank facility, 19 village (10.3 per cent) is having agricultural credit societies. 135 villages (73.4 percent) have been linked with pucca road and 149 villages (81.0 percent) have been provided with electricity.

Out of 36 villages, which fall in the population range of 5,000-9,999. All of these villages have improved drinking water facility,. where as 35 villages (97.2 percent) have education facility, 28 villages (77.8 percent) have medical facility, 32 villages (88.9 percent) have post office facility, 13 villages (36.1 percent) with telephone facility, 19 villages (52.8 percent) with transport facility, 16 villages (44.4 percent) have bank facility, 11 villages with agricultural credit societies, 32 villages (88.9 percent) have been linked with pucca roads and 33 villages (91.7 percent) have been provided electricity.

6 villages fall in population range of 10000 + above. All these villages have education, improved drinking water approach by pucca roads and electricity facilities. 4 villages (66.7 percent) have medical facility, 5 villages (83.3 percent) with post office facility, 3 villages (50.0 percent) with telephone facility, 5 villages (83.3 percent) have bank facility and 1 village (16.7 percent) have been provided with agricultural credit societies.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Jaspura	45	31574.8	77.5	8.0
2	Tindwari	81	56930.0	72.6	40.2
3	Badokhar Khurd	73	61963.3	83.3	27.2
4	Baberu	79	9250.7	78.5	32.6
5	Kamasin	75	41201.2	NA	51.6

6	Bisanda	57	42209.3	84.8	66.3
7	Mahuva	121	48248.0	83.7	67.5
8	Naraini	151	81332.9	65.4	41.0
District Total:		**682**	**372710.2**	**80.2**	**43.8**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D block wise distribution of villages according to land use. It also gives details of total area and percentage of cultivable area available in inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 682 inhabited villages in the district having a total area of 372710.2 hectares. Of this, 80.2 per cent is cultivable and 43.8 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Jaspura block with 45 villages have a total area of 31574.8 hectares, of this 77.5 per cent of land is cultivable and of the aforesaid area 8 per cent is irrigated. In Tindwari block, all the 81 villages have a total land area of 56930.0 hectares, of this 72.6 per cent of land is cultivable and of the aforesaid area 40.2 per cent is irrigated. In Badokhar Khurd block, all the 73 villages have a total area of 61963.3 hectares, of this cultivable area is 83.3 per cent and 27.2 per cent is irrigated. In Baberu block, all the 79 villages have a total area of 9250.7 hectares. Of this, cultivable area is 78.5 per cent. Of cultivable area 32.6 per cent is irrigated. Kamasin block with 75 villages have a total land area of 41201.2 hectares, out of this cultivable area 51.6 per cent is irrigated. Bisanda block with 57 villages has a total land area of 42209.3 hectares. Of this 84.8 per cent is cultivated area, out of which 66.3 per cent is irrigated. Mahuva block with a total 121 villages have an area of 48248.0 hectares. Of this 83.7 per cent is cultivable area, of cultivable area 67.5 percent is irrigated. Naraini block with 151 villages have a total area of 81332.9 hectares, of this cultivable area is 65.4 percent. Of cultivable area 41.0 percent is irrigated.

The table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Banda works out to Rs.174 of which Rs.10 are derived through local taxes and the remaining Rs.164 received from all other sources. The average of total expenditure incurred per head is Rs.178. Out of this Rs. 77 are spent on general administration, Rs.22 on public health and conveniences, Rs.34 on public works, Rs.1 on

public institutions and Rs.44 is spent on other items. Among all the eight towns the receipt and expenditure recorded per head are the highest in Atarra NPP.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Atarra, NPP	7.1	3.5	1.4	0.9	0.5
2	Baberu, NP	6.2	6.2	2.1	2.1	1.4
3	Banda, NPP	4.5	2.0	0.5	0.6	0.2
4	Bisanda Buzurg, NP	2.8	0.9	0.9	1.9	0.0
5	Mataundh, NP	2.4	1.2	1.2	1.2	0.0
6	Naraini, NP	7.6	3.8	1.5	1.5	0.8
7	Oran, NP	3.2	6.4	1.6	1.6	0.0
8	Tindwari, NP	3.1	5.2	1.0	1.0	1.0
	District Total	**5.0**	**2.8**	**0.9**	**0.9**	**0.1**

Table 44 shows that in urban areas of Banda district the average number of primary schools per 10,000 population comes to 5 schools, 2.8 junior secondary/middle, 0.9 secondary/matriculation, 0.9 senior secondary schools and the ratio of colleges is only 0.1 college. Among the towns, the ratio of primary school is highest in Naraini NP. Oran NP has highest ratio of junior secondary/ middle and secondary/ matriculation schools while in case of senior secondary school this position is claimed by Baberu NP (2.1). College education is also highest in Baberu NP. College is available in only 4 towns i.e. Banda NPP, Bareru NP, Naraini NP, Tindwari NP,Attara NPP and Naraini NP.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Atarra, NPP	42
2	Baberu, NP	21
3	Banda, NPP	25
4	Bisanda Buzurg, NP	5
5	Mataundh, NP	2
6	Naraini, NP	15
7	Oran, NP	0
8	Tindwari, NP	10
	District Total	24

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Banda district. On an average there are 24 beds per 10,000 population in urban areas of the district. Whereas it is the highest 42 bed in Atarra MB while lowest value of 2 beds is recorded in Mataundh NP and is closely fallowed by Bisanda Buzurg 5 beds. Oran NP and Iltifatganj Bazar, NP have no bed per 10,000 population.

		Slum Data is not available		

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl.No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Atarra, NPP	Rice, Lahi, Gram	Rice, Lai, Gram
2	Baberu, NP	Rice, Pulses, Gram	Wheat, Gram, Pulses
3	Banda, NPP	Rice, Pulses, Gram	Rice, Pulses, Gram
4	Bisanda Buzurg, NP	--, --, --	Rice, Gram, Pulses
5	Mataundh, NP	Shoes, Stone, Cotton	Pulses, Oil Seed, Stone
6	Naraini, NP	Stone, Tobacco, --	Rice, Arhar, Oil Seed
7	Oran, NP	--, --, --	Paddy, Wheat, Gram
8	Tindwari, NP	--, --, --	--, --, --

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for Rice and Pulses The chief export items of the district are Rice, Pulses which are produced in Banda NPP and Baberu NP and are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio /transistor, television, telephone, cycle, scooter /motorcycle / moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

District total		257901	219795	38106	62230	55081	7149	1218	898	320

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 257901 consisting of 219795 rural and 38106 urban households. 62230 households belong to Scheduled Castes and 1218 to Scheduled Tribes. 249786 households are living in their owned houses constituting 96.8 per cent of total households. Of these households, the largest number of households (77580) have occupied double room accommodation and is followed by three plus room accommodation numbering 70869 households. Next position is claimed by households (63861) occupying three room accommodation. Number of households in owned accommodation occupying one room rank at fourth place with 36319 households while 1157 households are without any exclusive room.

6106 households living in rented accommodation account for 2.4 per cent of total number of households in the district. The largest number of 2724 households are living in single room accommodation followed by 2204 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 2009 forming only 0.8 per cent of total households are distributed in single roomaccommodation numbering 685, 695 double room and 344 in three room accommodation. In rural areas majority of households have bigger size and have their own houses while urban areas shows reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Perma-nent	Semi-permanent	Temporary	Perma nent	Semi-permanent	Tempo rary	Permanent	Semi-permanent	Tempor ary
1	2	3	4	5	6	7	8	9	10	11

2	Tehsil - Baberu 0002	14.3	85.0	0.7	13.1	86.2	0.7	50.1	49.1	0.8
3	Tehsil - Atarra 0003	18.7	80.3	1.0	12.4	86.5	1.1	52.0	47.7	0.3
4	Tehsil - Naraini 0004	15.0	84.0	1.0	12.8	86.2	1.0	61.1	38.7	0.2
	District Total:	**22.1**	**77.1**	**0.8**	**15.2**	**84.0**	**0.8**	**62.0**	**37.4**	**0.6**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:- Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that 22.1 per cent of the households in the district had permanent houses. The trend is different in rural (15.2 per cent) and urban area (62.0 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Banda (32.9 per cent) followed by Atarra (18.7 per cent), Naraini (15.0 per cent) and lowest in Baberu (14.3 per cent). In respect of semi-permanent houses, the returns were 77.1 per cent at district level whereas among tahsils, in Baberu Tehsil it was highest 85.0 per cent and lowest was 66.4 per cent in tahsil Banda represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 32.6 to 49.1 per cent. Temporary houses in the district lie between the range of 0.7 to 1.0 per cent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.
*Based on the improved drinding water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.
Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

The above table shows that out of total households of the district 64.3 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 61.5 and 80.5 per cent respectively. Tahsil Banda had higher order of proportion of households where percentage for rural area was 61.2 percent and 79 9 percent in urban areas. Electricity was available to 15.2 per cent of households at district level. Bathroom and toilet facilities were available in 17.9 percent and 20.2 per cent of households. Tahsil Baberu poorly served in respect of these amenities. Similarly drainage facility was also poor in Baberu and Naraini Tehsil. At district level drainage facility was available to 41.1 per cent of households, whereas the proportion of rural and urban areas households accounted to 34.2 percent and 81.1 per cent

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The percentage distribution of households by type of fuel used for cooking purposes is given in table 51. There are nine types of fuel used for which data have been presented in the table. It is observed that wood is used as the most predominant fuel used for cooking by 55.3 percent households in the district. In the tahsil this proportion varies between 50.1 percent in Atarra tahsil and 69.7 percent in Naraini tahsil. The next cooking fuel is cow dung cake which is used by 33.1 percent households in the district. This proportion in rural and urban areas is 37.1 and 10.6 percent respectively. Crop residue is used as cooking fuel by 6.1 percent of households in the district. This proportion in rural and urban areas is 6.4 and 4.3 percent respectively. LPG gas is used by 3.8 percent of households in the district. The proportion in urban and rural areas is 0.4 and 23.3 percent respectively. In rural areas use of gas is very low as compared to urban areas. The percentage of households using other types of fuel such as electricity, coal/lignite (charcoal), bio-gas and kerosene etc. is insignificant.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

This table presents data for total, rural and urban areas at district/tahsil level about households availing banking services and possession of assets such as radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 257901 households in the district of which, 47955 households have been availing banking services. 79915 households have Radio/Transistor. Television is possessed by 27335 households. Telephone is available in 8227 households. Bicycle is main means of transportation and is available in130565 households. Scooter/Motor cycle/Moped and Car/Jeep/Van are used by 11560 and 2434 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is almost similar as analysed above for the district as a whole.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade :

During the decade, the most significant development was creation of a new division Chitrakootdham and of a new district Chitrakoot in the year 1997. Prior to it the district Banda was under Jhansi division. The Banda district was divided in two parts and a new district Chitrakootdham was created by carving out two tahsils Karvi and Mau from it. The district has now only four tahsils namely Banda, Naraini, Baberu and Atarra.

(xii) Brief description of places of religious historical or archaeological importance in villages and places of tourist interest in the towns of the district

Kalinjar Fort : The celebrated hill fort of Kalinjar is situated in the village of Tarahti on the old road to Nagod about 56 km. south of Banda in tahsil Naraini. In India the 22[nd] Shivling was founded here.

Bhuragarh Fort : It is situated at the bank of Ken river and is very important from the religions point of view. A large fair of Natbaba is held on Makar Sankranti day.

Bambeshwar : It lies at the western end of the town and huge temple of Shiva is found here on the hill. It has been a place of penance for rishis and sadhus. Pandavas had spent banvas here. Near by is a temple of Hanuman ji, which is very beautiful, and peace giving.

Nawab Tank : The magnificient tank is situated at the southern end of the town having a Shiv temple in the middle of it that looks very beautiful.

Rangarh Fort : It is situated in the middle of Ken river 40 kms. away from Banda and was built by Bundeli rulers. It is used as a summer rest house.

Marfa Fort : It is situated at 20 to 25 kms. away from Badausa near Atehganj village. It is famous for sculptures of Jain temples.

(xiii) Major Characteristics and Contribution of the District

District Banda is one of the famous centres that contributes on religious and historical fronts. The existence of Kalinjar fort envisages the contribution of the district in Purans. The seasonal folk songs that are commonly sung in the village, lok-natya vidya (Nautanki) are the other contributions of the district. Alha which is sung in the praise of the Alha and Udal, the most popular heroes of this region, are also popular in the district. The open air performances of nautankis and dramas based on mythology are often staged and attract large gatherings.

The remains of numerous Shiv, Vaishnav and Jain temples contribute to architecture.

Banda has produced some of the most eminent literary figures who have found a permanent place in the sphere of Vedic learning and Sanskrit. The district is said to be a birth place of ancient Balmiki who has written the immortal epic Ramayan in Sanskrit language. Tulsidas is one of the greatest writer saints who was born in 1532 at Rajapur. Mohan Bhatt born in the district belongs to seventeenth century. He was a great poet and has written many poems. His son Padmakar Bhatt was also a distinguished poet. His poetry is full of figures of speech. Hemant Bahadur, Badana, Haridas

and Kripa Ram Vohra were other poets of the district. Gayasin Kayastha in the district was known for his work Chitragupta Uritanta. Lastly the district is proud of producing the great poetess Subhadra Kumari Chauhan.

(xiv) Scope of Village Directory & Town Directory

(xv) Village Directory

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(SECTION I & II)

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	*Adult literacy* class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW

(xv) Others O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area

not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

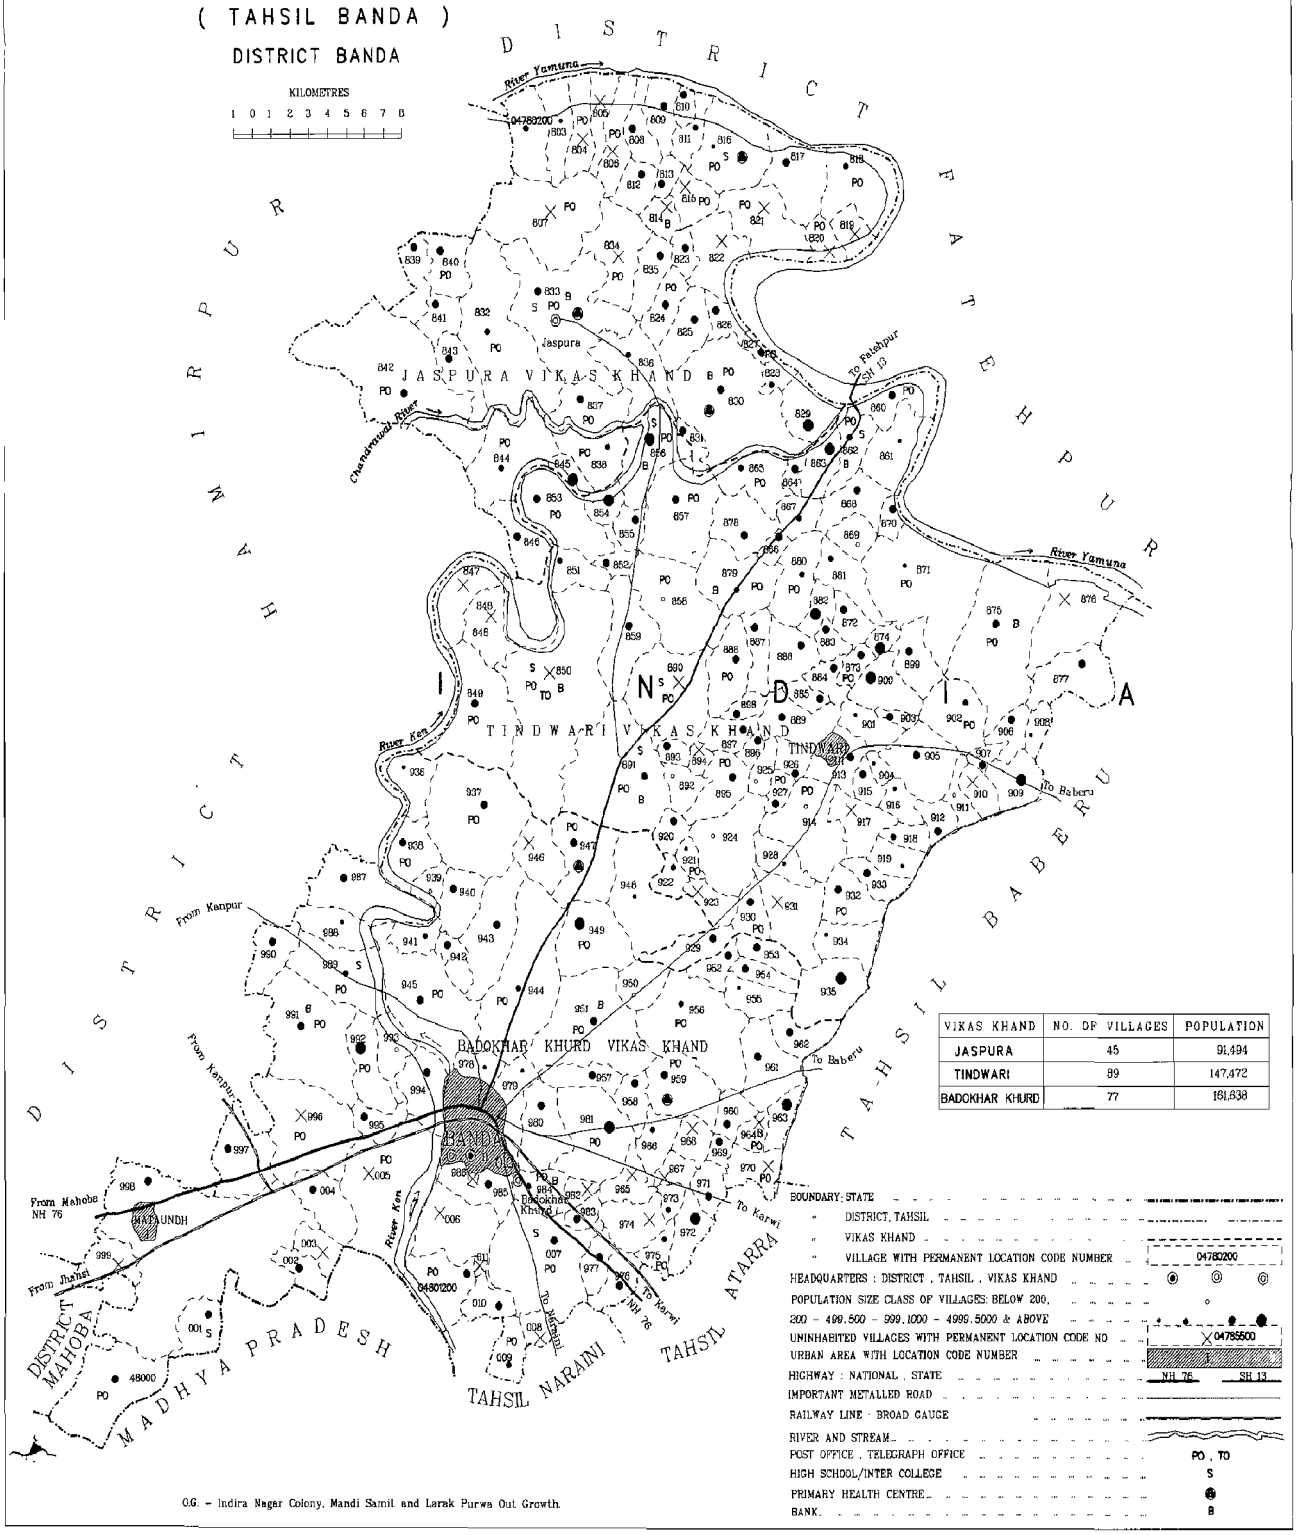

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4
In 2001 Census, no village (s) merged in towns and outgrowths in the district.

Name of District	Name of C.D. Block	Location Code	Name of Village Number	No. of Girls School
1	2	3	4	5
Information not available for this district				

SECTION II
TOWN DIRECTORY

Section II - Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 - 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A

(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after

the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

(b) Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also.

In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

(c) An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census.Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, which is the highest rate to any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Person/Male/Female	UP*	Banda
q1	Person	99	107
	Male	98	113
	Female	104	102
q2	Person	117	115
	Male	117	118
	Female	118	112
q5	Person	134	141
	Male	135	135
	Female	132	158

(*Undivided Uttar Pradesh at 1991 Census)

The child mortality by ages 1, 2 and 5 years was slightly higher in the ages 1 and 5 but lower in the age of 2 in the district as against the State, The child mortality indicators in the district for females were in the improved condition as compared to the State by ages 5 but female child mortality is higher for the districts as compared to state.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male Female	Uttar Pradesh	Banda
1	2	3	4	5
1	CBR	-	37.21	38.57
2	TFR	-	5.60	5.80
3	TMFR	-	6.30	6.23
4	GFR	-	172	183
5	GMFR	-	200	201
6	Mean age at marriage (1981-91)	-	17.27	17.20
7	Number of children ever born per ever married woman aged 45-49 years	-	4.59	5.14
8	Child woman ratio 0-4	-	631	646
	5-9	-	752	791

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to mid year population, is 38.57 per thousand in the district. It is higher to the state of Uttar Pradesh i.e. of 37.21 per thousand. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along closer proportion from the state figures. The conclusion that may be drawn is approximately equal fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.27 years for the state where as 17.20 years has been observed for the district. Similar trend is observed in the number of children born per ever married women in the age group 45-49. The state and the district figures are placed as 4.59 and 5.14 per thousand respectively. Number of children in the age group 0-4 and 5-9 years per thousand women in the age group 15-49. has been calculated to 646 and 791 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels are higher than the state average.

Annexure – IV

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants

the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 59.8 in 1991, while in 2001 it was 65.5 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 39.8 percent and 34.3 percent respectively. This shows in-migration from other states to this district was decreased in 2001 in comparison to 1991. At district level in-migration from other countries was 0.5 percent in 1991 and 0.2 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 62.5 percent and 67.7 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 37.3 percent and 32.8 percent respectively. The movement of population from other countries in the district was 0.2 percent in 1991 and 0.1 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 93.5 percent in 1991 and 91.6 percent in 2001, while Muslim were 6.4 percent in 1991 and 8.2 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 54.0 percent male and 43.6 percent female to 57.2 percent male and 46.8 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 42.4 percent

and female was 49.4 percent in 1991 and in 2001 it was 40.6 percent male and 48.1 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.7 percent male and 5.1 percent female while it was 3.0 percent male and 4.4 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 58.6 percent male and 87.1 percent female in 1991 which declined to 44.0 percent male and 70.7 percent female in 2001. Primary level education was 10.7 percent male and 4.3 percent female in 1991, which was 17.3 percent male and 11.0 percent female in 2001. Middle level education was 9.0 percent male and 2.2 percent female in 1991 and 14.4 percent male and 5.8 percent female in 2001. Matriculation and above level of education was achieved by 10.8 percent male and 2.1 percent female in 1991 which was 17.5 percent male and 5.1 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001; while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

1,537,334	1,490,747	34,610	5,711	4,859	557	850

Note: For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0.02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue".

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 97.8 percent person in 1991 and 96.9 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 2.1 percent and 2.3 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
