AREA GAINED FROM DISTRICT BANDA

MOTIF

KAMADGIRI

Prominent '*Giriraj Chitrakoot*' is also known as '*Kamadgiri*'. The name itself symbolises the mountain which fulfils the ambitions or desires of the people. This magnificent ancient mountain of unknown ages is immovable and utmost pious, which bestows boons to the devotees and fulfill their desires. There are numerous heavenly beautiful and pleasant places and temples etc of great attraction, which are prosperous and flourished with dense forest ranges, mountains, waterfalls, caves, spontaneous fountains and huge forestry richness. This place is, and had been a centre of attraction for devotees, tourists and others since eras on account of its natural beauty and legendry acts and time to time appearances of the Godly souls, such as, *Maharishi Atri*, *Mahasati Anusuiya*, *Maharishi Valmiki*, the great *Sant Kavi Tulsidas* and overall the *Purrushottam Lord Rama*. Besides all these, the place is also renowned in respect of religions, spiritual wisdom, '*tappa*' and meditations by sages, saints and other spiritual spirits. The river, *Mandakini Ganga* flows here by the '*Kamadgiri*' having a number of '*ghats*' where the pilgrims, devotees, tourists and other religious visitors from all over the country and abroad take holly dips in it and walks around the '*Kamadgiri*' to take "*Prikrama*" with the motive of getting their ambitions and desires be fulfilled with the grace of the pious '*Kamadgiri*'. Importance of this place may be assumed by the '*chaupai*';

"Chitrakoot ke ghat per | bhaee santan ki bheer ||

Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 393
Annexure VI Marital status of population as per 1991 Census 394
Annexure VII Age, Sex and Education in the district, 1991 Census 398
Annexure VIII Distribution of different mother tongues returned in 1991 Census 401

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage

enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri

New Delhi
Dated: 17.10.2006.

Registrar General &
Census Commissioner, India

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. Chitrakoot district ranks 69th in terms of population in the Uttar Pradesh state.
2. The percentage share of urban population in the district is 10.8 as against 20.8 of the population in the urban areas of the state.
3. Chitrakoot district has population density of 242 persons per sq.km. which is more than the state average (690 persons per sq.km.)
4. Chitrakoot district ranks 39th in terms of sex ratio (873) which is lower than the state average (898 females per one thousand males).
5. Chitrakoot district ranks 11th in literacy (65.0 per cent) which is higher than the state average (56.3 per cent).
6. There are only 85 un-inhabited villages out of total 630 villages in the district.
7. Decadal growth rate of the district (28.6 per cent) is slightly lower to the state growth average 25.8 per cent.
8. Karwi tahsil has highest 372 inhabited villages.
9. The district has 3 towns. No town has been added or declassified after 1991 census.
10. There are 121,827 households in the district, accounting for 0.5 per cent of the total households of the state. The average size of household in the district is 6.3 persons .

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District :

Chitrakoot is an ancient place and mentioned in ancient Indian literature. Chitrakoot finds special mention in the **Ramayan** where Ram spent a part of exile. On his way back to Ayodhya after completing exile of 14 years, Ram met Bharat here which is mentioned elaborately as 'Bharat Milap' in Ramayan. Kalidas describes it in **Raghuvansham.** In Meghdootam, Kalidas described in following words

"As you approach the noble mountain Chitrakoot, he will greet you, O travel-weary Rain- Giver, and bear you on his head held high..."

Saint poet Tulsidas writes in **Ramcharitmanas** that-

"bhava bhujang Tulsi nakul dasat gyan har let;

Chitrakoot ek aushadhi chitwat karat sachet".

"When one is poisoned with the worldly affairs Chitrakoot acts as a medicine restoring alertness".

While Hindi poet Rahim describes as follows:

"Chitrakoot mein rami rahein Rahiman AvadhNaresh

japer vipida parat hain so aawat yahi desh"

"O Rahim, king of Avadh is residing at Chitrakoot;

Truly, whoever is in peril comes to this country".

The name Chitrakoot from *Chitra*, of various colours and *koot,* a hill is given to the place from the number of different coloured stones found round the base of the Chitrakoot hill. Most of the sacred places lie inside the limits of Madhya Pradesh state. Legends tell that Chitrakoot was the meeting place of Nala and Damyanti. The epic **Mahabharat** describes Chitrakoot as sacred place. The Prakrit literatures as well as some Jain texts mention this place. The Gazetteer of district Banda acknowledges the place as " *one of the most ancient places in India",* (pg 282, Government press, Allahabad, 1981.) The word Chitrakoot indicates Kamta Nath hill or Kamadgiri hill, the parikrama and the locality. Thus it is a broad term. A fair is regularly held on every Amavasya and on large scale on Ram Navami.

Place associated with lord Rama in Chitrakoot are legendary and includes Ramaghat on the banks of river Mandakini (Pashuni), Tulsidas Ashram near Ramghat, Mantagayand Shiva temple at Ramghat, Bara Math, Raghav Prayag Ghat, Paran Kuti where lord Rama spent eleven and half years of his exile, Bijawar Temple, Kamadgiri where lord Rama met brother Bharat, Lakshaman Pahari, Pramod Ban, Janki Kund where! Sita took bath. The place finds mention in "Meghdootam" as Ramgiri written by Kalidas, Sirsa Ban, or Shringar Ban, Sphatika Shila which is described as " ——a square sandstone mass half merged in water which bears the impression of a gigantic footmark reputed to be that of Rama..." (Pg 10, /b/d, government press Allahabad, 1981), Sati Ansuya Ashram, Dandak Ban, Gupta Godavari, Ban Devi Sthan, Devganga, Kot Thirth, Banke Siddha, Bharat Koop and Ram Saiya. It is no wonder that during recent years Ramayan melas have been regular feature here.

Apart from above mythological reference in Indian literature early history of the district is mainly obscure. The region was inhabited by the neolithic man, as tools of that time have been found near Manikpur. In the middle ages the region was passing through the reigns of Pratiharas followed by the Rashtrakutas. In 940 the region was under

Krishna third. Under the Pratihara Empire the region was ruled by the Chandella king Yashovarman . The ruins of a temple of Chandella period is located in Mau tahsil. Tulsidas a contemporary of Akbar was born near Rajapur in the above Tahsil. A damaged copy of his work Ramcharitmanasa is still kept at Tulsi Smarak in Rajapur.

A part of the Chitrakoot Dham town is Tarauhan, while others are Chitrakoot, Karwi, and Sitapur. The name Tarauhan is believed to have come from word tare, meaning the lower land. It is said that this place was head quarters of Bhatghora *Sirkar* during the reign of Akbar (1556-1605). The present Karwi area was part of Sirkar of Bhatghora. There were 39 *mahals* in this Sirkar. About this time it is said that the Brahmans established Karwi. The name is possibly after Kamadgiri, the proper name of Chitrakoot hill. The old fort at Tarauhan was built by a Surki Rajput in 1625. At this time the area was under Baghel kings of Rewa, which is now in M.P. Muhammad Khan Bangash, the governor of Allahabad led two attacks upon this area around 1728. This area by this time was dominion of the Bundelas. A few of Bundela remains could be seen at Bhaunri in Karwi tahsil. The terrace round the base of Kamadgiri hill is said to have been erected about 1725 by the queen of Chhatrasal. A ruin of Bundela fort belonging to this time lies near the village Kalyanpur in Karwi tahsil. After death of Chhatrasal in 1731AD this area fell into regime of Panna kingdom. Panna is present in M.P. state. It was capital of Chhatrasal in about 1691AD. The famous Ram Bagh akhara at Tarauhan was set up in 1732 AD.

Sitapur area of Chitrakoot was originally abode of *Kols* and was known as Jaisinghpur. King of Panna gave this area to a Mahant, who changed the name to Sitapur in honour of Sita, wife of Lord Ram Jagir of Tarauhan was given to one Rahim Khan by a Panna king and Rahim Khan took abode at Tarauhan in 1763 AD. Most of the other parts of the undivided Banda district were under the power of the Marathas around the middle of the 18^{th} century. After 1764, when Avadh was defeated in Buxar the rivalry between Panna and Banda kingdoms started and this ultimately led to the destruction of Bundela power. However up to 1770 AD as well as afterwards the Karwi area was firmly in the hold of Panna kingdom. In a battle in 1770 AD Panna kingdom won over Banda. In Mau and Karwi Tahsils there are ruins of forts belonging to middle of 18^{th} century.

Chitrakoot is a center of pilgrimage. It was frequented by the devotees from ancient time. In 1774 yet other akhara was set up at Tarauhan. The situation was such that at about the turn of century Karwi was held in *muafi* by the akhara belonging to the temple of Jagannath. The area went under the East India Company by the treaty of Bassein (Poona) in 1803.The present day districts of Chitrakoot, Banda, Hampirpur, Mahoba and part of Jalaun lied into one district Bundelkhand with headquarters at Banda, and having nine tahsils. After 1808, this area was conferred as jagir on Amrita Rao, a relative of Baji Rao Peshwa. Bundelkhand district was divided into two parts in 1819 and the southern part became known as Banda district.

After 1824 the son of Amrita Rao built the fort known as the Bara and other buildings apart from the Ganesh Bagh in 1830.By 1853 AD the Jagir was retaken by British and Karwi was given to a *zamindar*. A revolt at Mau happened in June 1857.In November 1857 two Maratha leaders declared themselves as Peshwas at Karwi. During April-June 1857 General Whitlock reached Karwi to quell the uprising. By as late as 1867 the British opened Manikpur- Jabalpur railway line and by 1889 the Manikpur-Banda line passing through the district Chitrakoot. Karwi Tahsil was in existence well before 1870, but until 1881 Tarauhan was a better known name than Karwi. Tahsil Mau was known as Chhibun while Karwi as Tarauhan in around 1880.There was also a

pargana named after Tarauhan. Karwi was notified town in 1860. The town area committee of Sitapur came into existence in 1865. In year 1895 Karwi and Tarauhan were clubbed to constitute a notified area in 1907. After abolition of Kamasin tahsil in 1925 its 120 villages were added into Karwi tahsil as well. Thereafter 13 villages were added after abolition of Badausa tahsil. Mahatma Gandhi visited Karwi in 1929.

In 1950 the largest tahsil was Karwi in Banda district while the smallest was Mau. Later on the towns of Karwi and Sitapur were also united to form a municipality on April, 1958 known as Chitrakoot Dham by including a corridor with the connecting road. The district of Chitrakoot was carved out from Banda district on 6 May 1997.Earlier Karwi was sub district under Banda. Karwi was 70 km away from headquarters at Banda. There are some villages in Mau tahsil situated at a distance of about 150 km from then district headquarters at Banda. The public was finding it inconvenient to visit the district headquarters at Banda. There was general perception among the public that Karwi and Mau tahsils of the then Banda district were not getting proper attention. It was also felt that due to distance of the district headquarters there was mushrooming of dacoits. It is not surprising that the gun culture in Uttar Pradesh is at its ugliest peak in present Chitrakoot and Banda districts. For the above reasons the creation of Chitrakoot district out of the Banda district was necessitated. The district has two tahsils karwi and Mau as well as five community development blocks namely Pahari, Chitrakoot, Ramnagar, Mau and Manikpur. The state government of Uttar Pradesh through its notification issued on 2 May 2000 added a total of 24 villages to the Karwi Tahsil from Atarra Tahsil of Banda district. At present the four districts of Chitrakoot, Banda, Hamirpur and Mahoba forms Chitrakoot Dham revenue division with headquarters at Banda.

(iii) Administrative Setup:

The sacred district of Chitrakoot associated with the story of Ram, is situated on the eastern fringes of Bundelkhand region of Uttar Pradesh state. It was part of Banda district before its creation on 6 May 1997.Karwi and Mau are the two tahsils. The state government by its notification number 1168/1-5/2000-161/97-ra-5 issued on 2nd May 2000 transferred 24 revenue villages from Atarra tahsil of Banda to Karwi tahsil. There are five community development block, 317 Gram Sabhas and 624 revenue villages out of which 541 inhabited and 81 uninhabited villages. There are three towns in which one is NPP and two of NP staus.

Jurisdictional Changes (1991-2000)

Newly created district Chitrakoot was carved out from Banda district on 13-05-1997 by transferring entire two tahsils namely mau with one town and Karwi with two towns along with 24 villages of Atarra tahsil of Banda district.

Sl. No.	Name of District /Tahsil	Notification No & Date	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
31	CHITRAKOOT	1285/1-5/97-185/74-R-5 dated 13-05-1997	Entire 2 tahsil viz.Mau with one town and karwi with two towns transferred trom Banda district	
1	Karwi Tahsil	1168/1-5/2000-161/97-R-5 dated 02-05-2000	24 villages transferred from Atarra tahsil of Banda district	

District Administration:

District administration comprises of Revenue, Development, Police(Law and Order), Judiciary and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional magistrate is in-charge, who is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental offices at district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc. each have departmental district level officer. The development front of view, the district is divided into community development blocks. Block Development Officer (BDO) looks after development works at community development blocks level. Assistant Development Officers and Village Development Officers at village level.

Under the police set-up Senior Superintendent Of Police in big districts and Superintendent of Police in smaller districts are in-charge. Additional Supdt. Of Police (ASP) in their respective area. Deputy Superintendent of Police (DSP) look –after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The Judicial administration of the District is headed by the District and Session Judge. In addition its there are several additional District Judge, Civil judge, Chief judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for local self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features:

(1) Location and Size:

The district lies between the latitude 24° 53' and 25° 23' north and 80° 44' and 81° 34' east longitudes . The northern boundary of the district is formed by the river Yamuna, across which lie districts of Fatehpur and Kaushambi. In the east the district borders with Allahabad and the state of Madhya Pradesh and on its westside lies the mother district Banda. The southern boundary of the district consists of Vindhyan plateau across which lie districts Satna and Rewa of Madhya Pradesh state. Most of the sacred places of Chitrakoot religious complex are in fact in the state of Madhya Pradesh. The total area of the district is 3164 sq. km. The rank of district in terms of area in the state is 37.The extent of the district from north to south is about 73 km. and from west to east about 90 km.

(2) Physiography

Northern part of the district is a flat expanse and southern part is mainly the Vindhyan plateau, which is full of hills and forest cover. On the plains of the district Karwi lies at 121.92m. Rajapur at 103.63m. and Mau at 100.58m. above the level of sea. As usual in rest of U.P., the lowland in the district is made of alluvium deposited by many streams coming down from southern hills and flowing into Yamuna. Paisuni is the chief stream among these. The lowland formed is uneven in nature and riversides full of ravines. The district gazetteer of Banda describes plateau region in following words.

"——*Largely consists of irregular uplands with outcrops of rock-the more picturesque groups of hills found to be south-west, but the scattered metamorphic outcrops abound throughout* – (Ibid, p3, Govt. press, Alld).

In this part of the district outside the forest cover lies large areas under grass. Water is scanty. No hill is above 450m. above the sea level. The most sacred and famous of these hills is Chitrakoot. It is divided in the following regions.

Chitrakoot Plain

The region is bounded by the Yamuna river in the north and east as well. It covers major part of Mau, and Karwi tahsils. It is formed of alluvium and Dun gravels of recent age. Western limit is marked by watershed line of Baghain. General slope is from south to north. As compared to western Chitrakoot plain it has higher altitude and rugged surface. There are numerous tributaries originating from Vindhyan ranges that flow through this region and join with Yamuna. Most of the tributaries run parallel to one another. Among them Paisuni, Gadwa, Ganta, Kharsana are worth mentioning. Small patches of ravines can be marked along these rivers. The region is connected with road links from other parts of the district but intralinkages are not developed. There are many canals, which serve irrigational need of this area. Rajapur is the only important place in the region.

Naraini- Karwi Pene Plain

The region is situated in the southern most part of the district covering parts of Naraini and Karwi tahsils. Unlike region Chitrakoot plain it is formed of Archaean, Upper Pre-Cambrian and lower Palaeozoic ages. It also differs from other regions in Physiography, though its soils are of the same sub-order associations as in Chitrakoot plain region. The average height of the region ranges from 138 to 228 metre. There are hilly ranges located in its south - eastern part. These hilly tracts are covered with reserved forests. There are numerous tributaries that originate from this belt. Baghain is the main river. Other rivers are Banganga, Khareli, Barar, Madrar etc. Most of the river are perennial. The topography is rugged because of river erosion. Ken canal is the only source of irrigation. There are some natural tanks also. Transport links are not developed. Chitrakoot Dham is an important urban centre in the region. This is a famous pilgrimage centre administrative seat of tahsil. Other urban centre is Naraini.

Manikpur Uplands:

The region is situated in the southern part of the district covering parts of Mau and Karwi tahsils. It is formed of Kaimur Series rocks of Upper Pre –Cambrian and lower Palaeozoic ages. The slope is very steep and the surface is highly dissected. There are numerous tributaries that originate from this range and cut deep valleys. These rivers flow from south to north, a few streams run west to east side also. Due to rugged topography, the area is largely inaccessible. There are large coverage of reserved forests Manikpur is the only important place situated in this region.

(3) Drainage:

Yamuna is the chief river in the northern plains. The river has been cutting into the riverside villages. The district gazetteer mentions that: *"-at Pardawan in tahsil Mau, it is said to disclose from time to time the ruins of an ancient city.'* The Yamuna in the district is full of ravines. Baghain is the perennial stream in tahsil Karwi, where it meets Yamuna. The Banganga is the tributary of the Baghain, which originates in tahsil Karwi. The Paisuni(Mandakini) is a tributary of Yamuna. It originates in M.P. state and enters in the district near Chitrakoot and later joins Yamuna. The stream Chan flows through Karwi tahsil and later joins with the Paisuni. It is a perennial stream and its chief tributary is the Girwar. In the highlands of the district Bardaha and Paisuni are the only rivers. In Tahsil Mau there are the Ganta (with the tributary Jiwanti), the Satetha, the Khursaha (with the tributary Aunjha), the Bargawa and the Bareri (with the tributary Hagni). A tank of considerable size occurs at Manikpur in tahsil Karwi.

(4) Climate:

" The climate of the district is characterized by hot summer, pleasant monsoon and cold season." The district gazetteer describes details about temperature in the undivided Banda district as following way: -

" *After February there is rapid increase in temperature. May is the hottest month with the daily mean maximum temperature at 43.0 C. and the daily mean minimum at 28.0 C. In the summer season the maximum temperatures sometimes go above 45.0 C. With the advance of the monsoon into the district by about the middle of June there is appreciable drop in Temperature and weather becomes more bearable. During breaks in the monsoon in September, day temperature increase slightly. By October, while the day temperature remains as in September the night temperature decrease. After October both day and night temperatures decrease rapidly till January which is generally the coldest month. The mean daily maximum temperature in January is 23.7 C., and the daily mean minimum temperature is 9.6 C. In the cold season in association with passing western disturbances cold waves affect the district and minimum temperature sometimes drops down to about freezing point.* During 1997-98 the maximum and minimum temperatures recorded in the district Chitrakoot were 47.8 C. and 5.6 C. respectively.

The following observations about winds in the undivided Banda district are also worth quoting: -

" Winds are generally light with some increase in force during summer and the south-west monsoon season in the afternoon. In the period November to May, winds are mostly from the west. With the advent of April strong and scorching winds locally called loo, continue to blow till replaced by the rain bearing winds in the south-west monsoon season. The evening winds in May are predominantly from directions between south-west and north-west. In the south-west monsoon season winds are variable. Winds from directions between south-west and north-west are predominant in June. In July, August, and September the wind is much more variable with west being a little favoured direction. The period October to January is characterized by calm winds."

About rainfall conditions in the undivided Banda district the said gazetteer tells like this:

"__ *The rainfall in the district in general increases from the north-west towards the southeast,_____ About 90 percent of the annual rainfall in the district is received during the south-west monsoon season, August being the rainiest month. The variation in the annual rainfall from year to year is appreciable.___*"

"O*n an average there are 44 rainy days (i.e. days with rainfall of 2.5 mm. or more in a year in the district.* ____

" *The heaviest rainfall in 24 hours recorded at any station in the district was 821.6 mm. at Karwi on July 30,1875.*"

In general the district bears the brute forces of nature during short durations when hot winds namely " loo " blow, or during heavy raining when all the streams and rivulets cause floods, or during special weather phenomenon such as storms, depressions, (during the early part of the south-west monsoon), western disturbances (during cold season) causing occasional thunderstorms, while occasional dust storms during the hot season are also not rare.

(5) Natural and Economic Resources

Forestry:

About 14.6 percent, which is amounting to 47,439 hectares of total reported area in the district is under cover of forests. In fact there are three forest villages in Karwi tahsil. In the district forests are mostly found alongside the hills.

The chief trees are Babool (Acacia arabica), Karaunda (Carissa opaca), Kareel (Capparis decidua), Rian, Chamrail, Mahua (Madhuca indica),Hingota, Sahjan and dhak(Butea monoserma) in the ravine tract and Mahuwa (Madhufa Indica) Dhama, Saj, Tendu, Khair (Acacia catechu), Achar (Chironji), (Buchanania lanzan), Haldu (Karam) (Adina cordifolia), Tinsa (Sandan) (Ougenia delbergioides), Bamboo, and Sal

(Sakhoo) (Shorea rousta) in the Patha Upland tract. Apart from valuable wood for building industry the forests are also sources of grasses useful for grazing cattle. The Tendu leaves are used for bidi making and khair for catechu (Katha) making. Many medicinal herbs and shrubs are also obtained from the forests.

Minerals and Mining :

The district is situated on the part of area formed by the confluence of the Gangetic Alluvium with northern tip of the Peninsular India. The oldest rocks of the sub-continent are found in this district. The glass sand deposits reputed to be one of the finest in whole of India are found near Baragarh and other localities in tahsil Mau.

" The requirement of most of the glass industries in northern India are drawn from this area." The district gazetteer mentions about deposits of Dolomite (Suitable for use in blast furnaces) near Karwi. Clay and Ochre as well as Bauxite are other minerals found in the district.

Soil:

In the lowland portions of the district, —*"There is a succession of narrow doabs formed by numerous deep channeled streams that carry off the drainage of the hills to the Yamuna— The whole tract is essentially an uneven one, from which the surface soil, except where it is held by embankments, is being constantly washed off."* This over-drainage has led to tremendous soil erosion in the district. The soil conservation units at Karwi and Mau are working since 1966-67. About land utilization and reclamation in the undivided Banda district the gazetteer notes as below :-

"Practically the whole district is precarious, and its precariousness is bound up with capriciousness of its climate and peculiar topographical feature." and a further comment included in the gazetteer is also noticeable:-

"—The unkindliness of the soils and the uncertainty of the outturn except under a rare combination of climatic conditions are some of the factors that have constituted to the agricultural backwardness of the district." The soils of the lowland in the district are partly alluvial and partly detritus of Decan trap, namely mar, kabar, parua and rakar. The alluvial soil is also of two *types-kachhar* and *tari.* The growth of Kans (Saccharum spontaneous) grass has been great detriment to the quality of soil and harvesting of crops in the district. The grass grows rapidly in the peculiar soil of the district. The upland is mostly covered with jungle and characterized by the scarcity of water. Still there are areas in the upland covered with grass. *"Thus it is generally more pastoral than agricultural."*

Land and Land Use Pattern:

According to the Sankhyakiya Patrika 1998-99 prepared by the office of the District Economics and Statistics, Chitrakoot the total reported area of the district is 324594 hects. Out of the above total reported area 49.85 percent is net sown area, 14.4 percent under cover of forest, 7.3 percent area as cultivable waste, 7.2 percent identified as barren and uncultivable land, 3.4 percent current fallow, 4.7 percent other fallows, 6.2 percent area under other uses, 6.8 percent area under groves/orchards while only miniscule area is as grazing land.

Agriculture and Crop Pattern:

During the year 98-99 a total of 49.9 percent was net sown area in the district. The principal Rabi crop' were wheat, gram, arhar and kharif crops were barley and masoor. The main pulses sown in the district are arhar and masoor. The following statement gives the principal crops grown in the district during 1998-99.

Crops	Total Sown Arca In Hectaare	Irrigated Sown Arca In Hectaare	Total Production	Average Yield per Hectare (Quintals)
Wheat	50,445	39,158	95,489	18.93
Gram	48,681	475	38,942	8.00
Arhar (Kharif)	11,941	NIL	23,852	19.97
Barley	6,076	227	9,097	14.97
Masur	4,832	6	3,878	8.03

(Source: Sankhyakiya Patrika, 2000)

The main *Kharif* cereals grown in the district during 1998-99 were *Jwar, Rice* and *Bajra* forming a proportion of 7.36 percent, 16.21 percent and 8.24 percent respectively of the total sown area of the district. The following statement provides details about main *Kharif* cereals grown in the district during 1998-99.

Crops	Total Sown Acer In Hectare	Irrigated Sown Acer In Hectare	Total Production	Average Yield per Hectare (Quintals)
Jwar	27,910	Nil	20,554	7.36
Rice	15,134	2,938	24,526	16.21
Bajra	7,844	2	6,465	8.24
Kodon	992	Nil	645	6.50
Sawan	1,079	Nil	670	6.21
Urd	957	Nil	301	3.15
Moong	690	Nil	178	2.25

The area devoted to the cultivation of cereals is 60 percent of the gross sown area in the district during 1998-99. The above crops in general are sown mixed such as wheat with gram and barley or wheat with pea or mustard; *Arhar* with *Jowar* or *Bajra; Jwar* with *Moong* or with rice or with *Kodon; Jowar* serves as staple fodder crop also. Out of the sown area of over 177,161 hectares, 38 percent is accounted for sowing of pulses, 28.5 percent under wheat, 7.9 percent under *Jwar*, and 8.5 percent under rice during the year 1998-99. Other noticeable cereal is *Bajra* accounting for 4.15 percent of the sown area. Production of oilseeds is declining by the year and only 3.2 percent of the sown area was carmarked for oilseeds. The following statement gives details about cultivation of major non-food crops during 1998-99 :-

Crops	Total Area Sown In Hectare	Irrigated Area Sown In Hectare	Total Production	Average Yield per Hectare (Quintals)
Oil- seeds	5,373	158	2,678	4.98
Potato	276	269	6,298	228.17
Sanai/Hemp	311	-	113	3.64
Sugarcane	301	297	13,419	445.82

1998-99 a total of 4,137 mt. tons of fertilizer was distributed in district through the state controlled depots out of which 2,781 m. tons was nitrogenous fertilizers and 1,329 mt. tons phosphoric fertilizers. The rest was potassic fertilizer. Part of the demand of fertilizers is met by private agencies and stockiest. In 1997 the district had 73,347 ploughs (including iron ones), 1,107 harrows and cultivators, 4,480 threshing machines,

884 sprayers, 65,521 sowing machines and 1,604 tractors. The district had 36 biogas plants during 1997-98. A total sum of Rs. 3.20 crores of loans was distributed by the 31st of March of 1997-98, out of which Rs.70.76 lakes was provided by Sahkari Krishi Evam Gramya Vikas Bank and Rs.2.49 crores by Agricultural Credit Societies, numbering 40 and covering 317 villages. These cooperative institutions provided above assistance to the farmers for minor irrigation purposes and other agricultural needs. The practice of leaving a fallow field is still in vogue as 26,427 hectares of land was fallow during 1998-99 amounting to 8.25 percent of total reported area in the district. Other methods adopted by farmers to increase cultivation yields are rotation of crops and mixed cultivation. These are measures aimed at intensive cultivation and increased yields. The most common rotation in irrigated areas is harvesting of Wheat and Gram after paddy.

Irrigation :

The gross irrigated area was 25.2 percent of gross sown area during 1998-99. Clearly agriculture in the district is largely rain-fed. Most important sources of irrigation in the district are canals, which are 611 kms in length and irrigate 18,510 hectares (45.4 percent) out of total irrigated area of 40,735 hectares in year 1998-99. Wells constituted second important source of irrigation in the district accounting for 24.8 percent of total irrigated area. The tube wells are the third important source of irrigation sharing 21.2 percent of total irrigated area. However, only 10.7 percent net area sown in the district is irrigated.

Animal Husbandry:

The district Chitrakoot had 14 veterinary hospitals, 15 live stock centre, 10 artificial insemination centre. One artificial insemination sub-centre, and 4 sheep development centres during 1998-99.

Fishery:

The rivers and lakes of the district abound with fish of many varieties. The common species are Rohu, Bhakur, Main, Parhin, Tengan and Mahaseer. Fish find a ready sale in the local markets and are used as a food by a good number of people. The Tharus are expert fishermen, while other castes chiefly engaged in fishing are Kahars, Pasis, Mallahs and Kewats.

The main activities of the fisheries department are development and exploitation of reservoirs for piseiculture and supply fingerlings to private breeders. After the division of the district, during 1998-99 there was only one departmental pond. Fisheries department in the same year had distributed 585 thousand fingerlings.

Industry:

Industry plays an important role in the economy of the district. A solid base to the economy can be provided through it. But due to lack of facilities with regards to infrastructure, big Industrialists have shown no interest in establishing any Industry. In the Shivrampur village of the district there are some small units of stone crusher and also some small units for making toys and sculptures. These are being encouraged to improve the economy of the district. During 1998-99 there were 58 small scale units being run by private hands employing 100 persons only.

Trade and Commerce:

The district gazetteer of undivided Banda district elaborates the items of exports and imports by mentioning that rice and forest products were the chief items of exports

while food-grains, sugar, cloth, general merchandise, coal, kerosene oil, and petrol were imported.

Transport :

The PWD laid paved roads were 559km in the district during 1998-99 consisting of state highways, district roads and other inter-district roads. In 1997-98 there were 35 bus-stations / stops in the district. The paved roads were laid up to 360.1 km for every thousand square kilometer of area in the district during 1998-99. The extent of paved roods was 503.5 km per lakhs of population during the same year. The Central Railways tracks pass through the district. Since 1867 the district is connected with Allahabad in the north and Jabalpur in south. As well since 1889 the district is connected with Kanpur through rail tracks.

Electricity and Power :

During 1998-99 only 3.0 percent of villages were electrified in the district. As much as 67.3 percent of electricity consumption in the district was for agricultural purposes during the same year. Total power consumption in the district was 103.70 Kwh.

Gram Panchayat, its composition, jurisdiction and role in village development :

A Gram Panchyat acts as the executive of the Gram Sabha. It is vital for village development.

Composition: The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 317 Gram Sabha in the district.

It is necessary that the village Panchayat should have member belonging to the scheduled caste and also a women member. If they are not elected, then the government itself appoints two such members. The village Panchayaat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its Term: The new panchayat Raj act of 1993 has fixed a uniform five-year for every Panchayat.It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualifications: In order to be elected to a village panchayat, a candidate should possess the following qualifications:

) He should be resident of the village concerned and his name should be in the voter's list of the village.

) He should be twenty-five year old.

) He should be mentally and physically sound.

) He should not be a proclaimed offender.

Functions: A Gram panchayat is entrusted with various social, economic and judicial functions.

It provides civic amenities to the people of the village.

2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also provide land and building for such a center.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, insecticides, chemical manures , improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine unto Rs.100.

(v) Census Concepts

Building:

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in

common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own

the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	37	Gual
2	Badhik	38	Habura

3	Badi	39	Hari
4	Baheliya	40	Hela
5	Baiga	41	Kalabaz
6	Baiswar	42	Kanjar
7	Bajaniya	43	Kapariya
8	Bajgi	44	Karwal
9	Balahar	45	Khairaha
10	Balai	46	Kharwar (excluding Banbasi)
11	Balmiki	47	Khatik
12	Bangali	48	Khorot
13	Banmanus	49	Kol
14	Bansphor	50	Kori
15	Barwar	51	Korwa
16	Basor	52	Lalbegi
17	Bawariya	53	Majhwar
18	Beldar	54	Mazhabi
19	Beriya	55	Musahar
20	Bhantu	56	Nat
21	Bhuiya	57	Pankha
22	Bhuyiar	58	Parahiya
23	Boria	59	Pasi, Tarmali
24	Chamar,Dhusia,Jhusia, Jatawa	60	Patari
25	Chero	61	Rawat
26	Dabgar	62	Saharya
27	Dhangar	63	Sanaurhiya
28	Dhanuk	64	Sansiya
29	Dharkar	65	Shilpkar
30	Dhobi	66	Turaiha
31	Dom	**Scheduled Tribes**	
32	Domar	1	Bhotia
33	Dusadh	2	Buksa
34	Gharami	3	Jaunsari
35	Ghasiya	4	Raji
36	Gond	5	Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on

another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and shouldbe engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

Number of deaths of 29 days to less

$$= \frac{\text{than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people have been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants has been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2

(200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 766,225 in which 689,665 live in rural and rest 76,560 in urban parts. There are two tahsils in district namely Karwi and Mau which are sans urban population. The most populous tahsil is Karwi followed by Mau tahsil. The urban population in the district is 10.0 percent. The urban population is maximum at 11.8 percent in Karwi tahsil. There are 630 revenue villages in which 85 are un-inhabited with district. The total rural population of 689,665 is spread over in 5 CD blocks and 2 inhabited forest villages. The most populous CD Block is Pahari with a population of 168,594 with the maximum number of inhabited villages (150) karwi (Chitrakoot Dham) CD Blocks. With 140 inhabited village. About half of populated villages have a population in the size of 1000-1999 and 2000-4999 and such villages form as high as 45.7 percent of total populated villages. Although the population density in the rural district is 219 highest proportion (29.7 percent) of villages are with a population density range of 301-500 per sq. km. Such villages contain as much as 34.1 percent of total rural population.

Size-class and status of towns:

In the total urban population of 76,560 about two third of it is live in Chitrakoot Dham (Karwi) NPP and the next big town is Manikpur Sarhat with a population of 14,916. The above two are class III and IV towns having the civic status of Nagar Palika Parishad (NPP) and Nagar Panchyat (NP). Rest of one town is Rajapur Nagar Panchayat (N.P.) which is class IV town.

Population growth:

At the present territorial jurisdiction the population of the district was 595,996 at 1991 Census and growing by 28.6 percent during the decade 1991-2001 it is 766,225 at 2001 Census. The decadal growth at 28.6 percent in the district has been of higher order than in the state at 25.8 percents.

Population Density:

The district has an area of 3,164 sq. km. The population density in the district is 242. In rural areas the density is 219 and 6,494 in urban areas of the district.

Sex-Ratio:

The sex-ratio in the district at 873 is behind to 898 at the state level. Indeed the sex-ratio at the district has been all along higher in the district as against to the state since 1901 to 1951 and lower since 1961 to 2001. As against to urban areas of the district the sex-ratio is lower in rural areas. Among tahsils, highest sex-ratio is in Mau and lowest in Karwi. Among CD Block the sex-ratio is highest in Mau at 899 and lowest in Karwi (Chitrakoot Dham) at 860. Out of 545 inhabited villages in the district there are about 85.8 percent villages with 92.6 percent of rural population which are having a sex-ratio below 950. In the urban parts of the district the sex-ratio is 873 and highest of 898 in Rajapur NP and lowest of 867 in Chitrakoot Dham (Karwi) NPP. The sex-ratio of population on the age-group 0-6 is 928 in the district which is lower than the state average. As against a sex-ratio of 927 in the age-group 0-6 of rural population of the district, it is highest at 938 in Parihari Block and lowest at 915 in Karwi (Chitrakooat Dham) and 903 in forest villages. It may be noted that out of 545 inhabited villages in the district in 16.0 percent villages with 26.8 percent of rural population, the sex-ratio in the age-group 0-6 is between900-949. As against the (0-6 age-group) sex-ratio of 927 in the rural area of the district 940 is in urban area. Among towns this sex-ratio is highest at 967 in Manikpur Sarhat NP and lowest at 932 in Chitrakoot Dham (Karwi) NPP.

Work Participation Rate:

In the total population of the district as much as 42.3 percent are workers and rest of 57.7 percent are non-worker. Among worker 29.3 percent are main workers and rest of 13.0 percent are marginal workers of total population. In absolute terms females outnumber males as and marginal workers. The extent of main workers is highest at 32.5 percent in Mau tahsil and lowest at 28.0 percent in Karwi tahsil. In case of marginal workers the population is highest in Karwi tahsil as 14.0 percent in compression to 10.5 percent in Mau tahsil. The extent of workers in rural parts and non-workers in urban parts are higher. In the district among workers 54.6 percent are cultivators and 15.7 percent all other workers. Total 53.8 percent of female workers are engaged as cultivators

Literacy:

In the district 65.0 percent population is literate. The literacy is 77.4 percent in urban areas and 63.6 percent in rural areas. The males literacy is as high 77.7 percent as against 50.3 percent of females literacy, and therefore the gap in male/female literacy rate is 27.4 percentage. In rural areas among 5 CD Blocks, the highest literacy is at 71.9 percent in Ramnagar and lowest at 58.1 percent in Manikpur. The literacy among males in rural areas is 76.6 percent in comparison to 48.4 percent among females. The lowest female literacy of 42.0 percent is in Manikpur CD Block The gap in male/female literacy rate is highest in Forest-village which is 34.0 percent. In 24.0 percent villages covering 31.0 percent of rural population the literacy range is 61 to70. Among urbanites in the district, as much as 86.8 percent males are literates as against 66.5 percent females. The highest urban literacy is in Chitrakoot Dham (Karwi) NPP 78.7 percent and lowest in Manikpur Sarhat NP at 73.4 percent. The maximum males literacy is also found in Chitrakoot Dham (Karwi) NPP at 87.7 percent and lowest at 84.6 percent in Manikpur Sarhat NP. However, the highest females literacy is in Chirakoot Dham (Karwi) NPP at 68.1 percent and lowest at 60.3 percent in Manikpur Sarhat NP. Still, the maximum gap in male-female literacy rate at 24.3 percent is found in Manikpur Sarhat NP. The literacy among Scheduled Castes in the countryside is 55 4 percent and 55.3 percent in towns. There is no percentage of literacy is Scheduled Tribes at district level. Only one literate person of Scheduled Tribe population is found in Chitrakoot Dham (karwi) NPP.

(viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36 :

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and

scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial Number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Karwi	NA	NA	NA	540,553	476,745	63,808	NA	NA	NA	NA	11.8
2	Mau	NA	NA	NA	225,672	212,920	12,752	NA	NA	NA	NA	5.7
District Total:		**595,996**	**537,414**	**58,582**	**766,225**	**689,665**	**76,560**	**28.6**	**28.3**	**30.7**	**9.8**	**10.0**

The growth rates in the district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 28.6 per cent and for rural and urban areas of the district are 28.3 and 30.7 per cent respectively during 1991-2001. Out of the total population of the district 90.0 per cent lives in rural areas while 10.0 per cent lives in urban areas. The proportion of urban population has slightly increased during the decade from 9.8 per cent in 1991 to 10.0 per cent in 2001 in the district.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

Table 2 gives C. D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 545 inhabited villages, 61 (11.2 per cent) are small sized villages with population, below 200 persons. In the size of 200 to 499 persons there are 89 villages having 16.3 per cent villages of the district while in the size class of 500-999 population claims 135 villages with 24.8 per cent of the total villages in the district. 171 villages (31.4 per cent) are in the size class of 1,000-1,999 and 78 villages (14.3 per cent) are in the size class of 2,000-4,999. 10 villages (1.8 per cent) in the district fall in the ranges of 5,000-9999 population. There is only one village (0.2 per cent) of total villages in the district fall in the ranges of 10,000 and above population. The biggest village in the district having population of 12,538 persons is located in Mau C. D. block of the district.

Table 3: New Towns, Denotified, Declassified and Merged Towns in 2001 Census

Name of town
1
(a) New
(I) Statutory town
NIL
(II) Census town
NIL
(b) Denotified

(I) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census town.

NIL

(II) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria

NIL

(III) Census towns of 1991 census are notified as statutory town in 2001 census.

NIL

(C) Declassified

NIL

(D) Wholly merged with other town(s)

NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	14	2.6	3,377	0.5
11-20	8	1.5	584	0.1
21-50	16	2 9	10,510	1.5
51-100	43	7.9	29,725	4.3
101-200	90	16.5	111,223	16.1
201-300	123	22.6	159,508	23.1
301-500	162	29.7	235,342	34.1
501 +	89	16.3	139,396	20.2
Not known	0	0.0	0	0 0
District Total:	**545**	**100.0**	**689,665**	**100.0**

This table shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 162 accounting for 29.7 per cent of the total inhabited villages fall in the density range of 301-500 persons having 34.1 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 22 villages (4.1 per cent). 89 villages (16.3 per cent) have very high density with more than 501 and above persons per sq. km. while the corresponding proportion in the lower range of 101 to 300 is 39.1 per cent of the total inhabited villages having 39.2 per cent population of the district. In the medium densities ranges of 21 - 50 and 51-100 persons account for 2.9 and 7.9 per cent of inhabited villages respectively. Both these ranges claim 5.8 per cent rural population.

Table 5 : Sex Ratio of State and District 1901-2001

Census Year	UTTAR PRADESH			CHITRAKOOT		
	Total	Rural	Urban	Total	Rural	Urban
1901	938	941	916	985	989	945
1911	916	922	866	977	979	941
1921	908	918	834	950	952	915
1931	903	916	813	934	939	867
1941	907	922	824	934	935	923
1951	908	922	827	910	914	861
1961	907	921	817	896	901	839
1971	876	884	826	873	877	828
1981	882	889	850	878	884	824
1991	876	879	864	862	864	843
2001	898	904	876	873	873	873

NOTE- Sex Ratio has been defined as the number of females per 1000 males

As per 2001 census sex-ratio of 873 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 1951 and remained above the state average figures. The subsequent decades show declining trend from 1961 to 2001 and value remained below the state average. The lowest sex-ratio of 862 females per 1000 males were recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in the state and remains equal (873) in the district.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Karwi	865	864	868
2	Mau	892	891	898
	District Total:	**873**	**873**	**873**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 873 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is similar that of urban areas. The rural sex-ratio in the tahsils varies between 864 in Karwi tahsil and 891 females per 1,000 males in Mau tahsil. The sex - ratio in Mau tahsil is higher than district average for both the rural and urban and it is lower in Karwi tahsil.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Pahari	861
2	Karwi (Chitrakoot Dham)	860
3	Manikpur	872
4	Ramnagar	880
5	Mau	899
6	Forest Villages	893
	District (Rural) Total	873

Table-7 presents C.D. block-wise sex – ratio for rural population in the district. The sex ratio in rural areas comes 873 females per 1,000 males. Among the C. D. blocks the highest sex ratio of 899 females is found in Mau C.D. block and is followed by Ram Nagar (880) while the lowest of 860 is recorded in Karwi C.D. block. The sex – ratios of Ram Nagar and Mau C. D. block are higher than the district rural average and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	19	3.5	1,941	0.3
700-749	8	1.5	1,534	0.2
750-799	38	7.0	29,823	4.3
800-849	122	22.4	179,920	26.1
850-899	164	30.1	289,004	41.9
900-949	116	21.3	136,307	19.8
950-999	40	7.3	36,389	5.3
1000-1099	27	5.0	13,304	1.9
1100+	11	2.0	1,443	0.2
District Total:	**545**	**100.0**	**689,665**	**100.0**

Sex ratio (Rural) for District: **873**

Table-8 presents the distribution of villages by 9 sex ratio ranges based on 2001 census. The maximum number of villages i.e. 164 accounting for 30.1 per cent of the total villages having highest population of 41.9 per cent in the district fall in the sex ratio range of 850-899 females per 1,000 males. It is followed by the sex ratio range of 800-849 which claims 122 villages (22.4 per cent) with 26.1 per cent population. The highest range of 1,100 and above claims 11 villages (2.0

per cent). This range shares 0.2 per cent rural population of the district while in the sex ratio range of 900-949, there are 116 villages (21.3 per cent). In remaining sex ratio ranges of 950-999, 1000-1099, 750-799, 700-749 and less than 700, the number of villages are 40 (7.3 per cent), 27 (5.0 per cent), 38 (7.0 per cent), 8 (1 5 per cent) and 19 (3.5 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e. 402 (73.8 per cent) having maximum population (87.8 per cent) fall in the higher sex ratio ranges of 800-849 to 900-949.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Manikpur Sarhat	(NP)	869
2	Chitrakoot Dham (Karwi)	(NPP)	867
3	Rajapur	(NP)	898
Sex ratio (Urban) for the district:			**873**

Table-9 gives the sex ratio of towns. The sex ratio in urban areas of the district comes to 873 females per 1,000 males. Among all the towns of the district the sex – ratio varies between 867 to 898. Rajapur (NP) has the highest sex ratio of 898 while Karwi (MB) has the lowest sex ratio of 867 females.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Karwi	Total	111,495	57,773	53,722	930

		Urban	**13,490**	**6,952**	**6,538**	**940**

Table-10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 161,968 persons comprising 83,990 males and 77,978 females. The total sex-ratio in this age -group works out 928

females for every thousand males. The proportion of females in rural areas is lower than that of urban areas. The sex ratio in rural and urban areas comes 927 and 940 females in this age group respectively. The rural sex ratio in tahsil is 925 in Mau and 930 in Karwi tahsil. The sex ratio of Karwi tahsil is higher than district rural average (927). Mau tahsil has lower sex ratio of 925 females. In urban areas, the higher sex ratio is recorded in Karwi urban (941) and the lower is found in Mau urban (939).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Pahari	34,889	18,004	16,885	938
2	Karwi (Chitrakoot Dham)	33,957	17,733	16,224	915
3	Manikpur	31,647	16,366	15,281	934
4	Ramnagar	19,077	9,943	9,134	919
5	Mau	28,771	14,920	13,851	928
6	Forest Villages	137	72	65	903
	District (Rural) Total:	**148,478**	**77,038**	**71,440**	**927**

Table-11 gives C. D. block-wise sex ratio of rural child population in the age – group 0-6 years in the district. The sex ratio is 927 for the district (rural). The sex ratio of C. D. block varies between 915 to 938. It is highest in Pahari C. D block i.e. 938 followed by 934 in Manikpur C. D. block and lowest 915 females is found in Karwi C. D. block. The sex – ratio of Pahari, Mau and Manikpur C. D. block is higher than the district rural (927), while in remaining blocks, it is below the average of the district. The sex ratio of 903 for the forest villages is also lower than the district rural average.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	43	7.9	2,468	1.7
700-749	20	3.7	2,754	1.9
750-799	36	6.6	8,505	5.7
800-849	58	10.6	17,294	11.6
850-899	69	12.7	21,094	14.2
900-949	87	16.0	39,797	26.8
950-999	64	11.7	21,858	14.7
1000-1099	101	18.5	26,045	17.5
1100+	67	12.3	8,663	5.8

District (Rural) Total	545	100.0	148,478	100.0
Sex ratio (Rural) for District:		927		

Table-12 shows the distribution of villages in 9 sex ratio ranges of the age group 0-6 years as well as percentage of villages, total population and percentage of population of this age – group falling in each sex ratio rang in the district.

The maximum number of villages i.e. 101 (18.5 per cent) having population (17.5 per cent) in the district (rural) fall in the sex – ratio range of 1000-1099 females per 1,000 males in age of 0-6 years. It is followed by the sex – ratio range of 900 -949 which claims 87 villages (16.0 per cent) and 26.8 per cent population. Next to it, 69 villages (12.7 per cent) are in the range of 850 – 899 with 14.2 per cent population. 67 villages (12.3 per cent) having 5.8 per cent population fall in sex – ratio range of 1100 and above. In remaining sex – ratio ranges of 700 – 749, 750 – 799, 800 – 849, less than 700 and 950 – 999 claim less number of village and these are distributed as 20 (3.7 per cent), 36 (6.6 per cent), 58 (10.6 per cent), 43 (7.9 per cent) and 64 (11.7 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 321 (58.9 per cent) having population of 73.2 per cent fall in the higher sex – ratio ranges of 850 – 1099.

TABLE13: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Chitrakoot Dham (Karwi)	(NPP)	8,168	4,227	3,941	932
2	Manikpur Sahrat	(NP)	2,697	1,371	1,326	967
3	Rajapur	(NP)	2,625	1,354	1,271	939
District (Urban) Total			13,490	6,952	6,538	940

Table-13 shows sex ratio of population in the age group 0-6 year of urban agglomerations/towns 2001. In urban area of the district total population is 13,490 in which 6,952 are males and 6,538 females and sex – ratio of urban areas of the district is 940. Among all the towns sex – ratio varies from 932 in Karwi town to 967 in Manikpur Sarhat (NP). In Manikpur Sarhat (NP) sex ratio is more than the district average. Among three towns Karwi has highest population.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Karwi	Total	540,553	142,247	1	26.3	0
		Rural	476,745	131,539	0	27.6	0
		Urban	63,808	10,708	1	16.8	0
2	Mau	Total	225,672	59,592	0	26.4	0
		Rural	212,920	56,263	0	26.4	0
		Urban	12,752	3,329	0	26.1	0
	District Total:	**Total**	**766,225**	**201,839**	**1**	**26.3**	**0**
		Rural	**689,665**	**187,802**	**0**	**27.2**	**0**
		Urban	76,560	14,037	1	18.3	0

Table14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 766,225 total population of the district, 26.3 per cent of the total population belong to the Scheduled Castes population. The percentage of Scheduled Castes population constitutes 27.2 per cent in rural population and 18.3 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Mau tahsil (26.4) while the lowest is found in Karwi tahsil (26.3). Scheduled Tribes population is only one person in urban area of the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Pahari	168,594	42,564	0	25.2	0
2	Karwi (Chitrakoot Dham)	163,139	36,258	0	22.2	0
3	Manikpur	144,395	52,486	0	36.3	0
4	Ramnagar	84,985	22,268	0	26.2	0
5	Mau	127,935	33,995	0	26.6	0
6	Forest Villages	617	231	0	37.4	0

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 27.2 per cent of rural population of the district belongs to Scheduled Castes. At C.D. block level, Scheduled Castes population varies between 22.2 per cent in Karwi and

36.3 per cent in Manikpur C.D. block. The other C.D. blocks containing of Scheduled Castes are Mau (26.6), Ram nagar (26.2) and Pahari (25.2). There is no Scheduled Tribes population in the rural areas of district.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	47	8.6	0	0.0
Less than 5	24	4.4	475	0.3
5-10	38	7.0	3,470	1.8
11-20	111	20.4	26,986	14 4
21-30	134	24.6	61,465	32.7
31-40	87	16.0	43,647	23.2
41-50	32	5.9	18,340	9.8
51-75	37	6.8	22,076	11.8
76 and above	35	6.4	11,343	6 0
District Total	**545**	**100.0**	**187,802**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 47 villages accounting for 8.6 per cent of total 545 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 24 villages (4.4 per cent). In 38 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 111 villages constituting 20.4 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 134 and 87 villages respectively. Both these ranges together account for 40.6 per cent villages of the district. Total 104 villages fall in the ranges of 41-50 and above percentage ranges. 35 villages are such where the proportion of Scheduled Castes is more than 7.6 per cent. These villages contain 6.0 per cent Scheduled Castes population of the district. The maximum of 32.7 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	545	100.0	0	0.0
Less than 5	0	0.0	0	0.0
5-10	0	0.0	0	0.0
11-20	0	0.0	0	0.0
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	545	100.0	0	100.0

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. There are none Scheduled Tribes population in the rural areas of the district.

TABLE -18: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Chitrakoot Dham (Karwi) (NPP)	48,892	6,200	1	12.7	0
2	Manikpur Sarhat (NP)	14,916	4,508	0	30.2	0
3	Rajapur (NP)	12,752	3,329	0	26.1	0
District (Urban) Total		76,560	14,037	1	18.3	0

Table 18 shows number and percentage of Scheduled Caste and Scheduled Tribes population recorded during 2001 census in the district. The table depicts that Scheduled Caste population is highest (30.2 percent) in Manikpur Sarhat NP but very low (12.7per cent) in Karwi town. Scheduled Tribe population is negligible in the urban areas of the district. There is only one person of Scheduled Tribe population residing in Karwi town.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Pahari	873	0
2	Karwi (Chitrakoot Dham)	883	0
3	Manikpur	889	0
4	Ramnagar	888	0
5	Mau	911	0
6	Forest Villages	878	0
	District (Rural) Total	**888**	0

Table 19 shows sex ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex ratio is 888 for district (rural). Among the C.D. blocks, the highest sex ratio of 911 females is found in Mau C.D. block and lowest of 873 females is recorded in Pahari C.D. block. There is none Scheduled Tribes population in the rural area of the district.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Chitrakoot Dham (Karwi) (NPP)	912	0
2	Manikpur Sarhat (NP)	903	0
3	Rajapur (NP)	917	0
Sex ratio (Urban) for the district		**910**	0

Table 20 shows sex ratio among Scheduled Castes and Scheduled Tribes in urban agglomerations/towns 2001. Among three towns sex ratio of Scheduled Castes is highest (917) in Rajapur town and it is lowest (903) in Manikpur Sarhat town. Only one person of Schedule Tribe is found in all towns so that the sex ratio is zero in urban area of the district.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
			Number of literates			Number of illiterates						
			Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

		Urban	**48,830**	**29,457**	**19,373**	**27,730**	**11,421**	**16,309**	**77.4**	**86.8**	**66.5**	**20.4**

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population comes to 65.0 per cent in the district. This proportion in rural area is 63.6 per cent against 77.4 per cent in urban areas. In the district the literacy rates of males (77.7 per cent) is much higher than that of females (50.3 per cent). Between the tahsils, Mau tahsil is higher with 65.8 per cent literates followed by Karwi tahsil (64.8 per cent). Out of two tahsils, the literacy rates of Mau tahsil is also higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is high which comes to 27.4 percentage points in the district, as a whole. The trend at tahsil level is not much different. However, this gap in urban literacy is low which comes to 20.3 percentage points against the rural areas, where the gap between male and female literacy is 28.2 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Pahari	83,149	55,085	28,064	85,445	35,485	49,960	62.2	75.9	45.9	30.0
2	Karvi (Chitrakoot Dham)	87,787	56,410	31,377	75,352	31,290	44,062	68.0	80.6	53.0	27.6
3	Manikpur	65,508	43,655	21,853	78,887	33,482	45,405	58.1	71.8	42.0	29.8
4	Ramnagar	47,358	28,746	18,612	37,627	16,448	21,179	71.9	81.5	60.7	20.8
5	Mau	60,030	39,062	20,968	67,905	28,311	39,594	60.5	74.5	44.9	29.6
6	Forest Villages	335	218	117	282	108	174	69.8	85.8	51.8	34.1
	District (Rural) Total	344,167	223,176	120,991	345,498	145,124	200,374	63.6	76.6	48.4	28.2

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 63.6 per cent of the total rural population (excluding the age - group of 0-6 years) are literates in the district. The corresponding proportion of male and female literates comes to 76.6 and 48.4 per cent respectively, which shows wide gap of 28.2 percentage point in male and female literacy. At C.D. block level, Ramnagar C.D. block has the highest literacy rate of 71.9 per cent while 81.5 per cent males and 60.7 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Manikpur C.D. block (58.1 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 30.0 percentage points is found in Pahari C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.2	9	0.0
1-10	0	0.0	0	0.0
11-20	3	0.6	459	0.1
21-30	8	1.5	3,168	0.5
31-40	27	5 0	15,985	2.3
41-50	67	12.3	82,426	12.0
51-60	118	21.7	182,465	26.5
61-70	131	24.0	214,045	31.0
71-80	102	18.7	128,575	18.6
81-90	65	11.9	52,297	7.6
91-99	20	3.7	10,052	1.5
100	3	0.6	184	0.0
District Total	**545**	**100.0**	**689,665**	**100.0**
Literacy rate for District		**65.0**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in only one village (0.2 per cent) of the district and population of this village is only 9 persons. 3 villages (0.6 per cent) have all the literate population. 118 villages accounting for 21.7 per cent of the total villages are in the literacy range of 51-60 per cent and131 villages (24.0 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in105 villages (19.4 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 190 villages (34.9 per cent). The range of 51-80 have the maximum number of 351 villages forming 64.4 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Chitrakoot Dham (Karwi) (MB)	32,048	19,257	12,791	16,844	6,924	9,920	78.7	87.7	68.1	19.6
2	Manikpur Sarhat (NP)	8,970	5,589	3,381	5,946	2,391	3,555	73.4	84.6	60.3	24.3
3	Rajapur (NP)	7,812	4,611	3,201	4,940	2,106	2,834	77.1	86	67.2	18.8
District (Urban) Total		**48,830**	**29,457**	**19,373**	**27,730**	**11,421**	**16,309**	**77.4**	**86.8**	**66.5**	**20.3**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Karwi (NPP) is way ahead of other towns. The table reveals that literacy rate is high in the urban areas of the district (77.4 percent). The literacy rate is quite high (above 84 per cent) in all towns among males. Female literacy rate is not far behind in Karwi and Rajapur towns (above 67 per cent). Thus the gap in male-female literacy rate is as high as 20.3 percentage points at district level.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

	District (Rural) Total	**79,645**	**51,694**	**27,951**	**108,157**	**47,768**	**60,389**	**55.4**	**67.3**	**41.8**	**25.5**

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in CD blocks 2001. In rural areas of the district proportion of literates is 55.4 per cent in which 67.3 percent are males and 41.8 percent females. Thus, the gap in male and female literacy rates is 25.5 percent points. Among 5 CD blocks, Ramnagar CD block has the highest literacy rate and Manikpur

CD block has the lowest literacy rate. The gap in male/female literacy rates in Pahari CD block is highest (27.9 percentage points) and this gap is lowest in Ram nagar CD block (19.0 percentage points).

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

Literacy rate for District (Rural) **55.4**

Table 26 presents the distribution of villages by literacy rate range for Scheduled Castes population at the 2001 census. The largest number of inhabited villages (95) which form 26.2 per cent of total rural Scheduled Castes population, the literacy range is 41 to 50 per cent. In the district there are 498 inhabited villages with Scheduled Castes population having 55.4 per cent of literacy rate.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Chitrakoot Dham (Karwi) (NPP)	2,839	1,875	964	3,361	1,368	1,993	58.6	72.9	42.4	30.5

3	Rajapur (NP)	1,414	887	527	1,915	850	1,065	58	69.8	45.2	24.6
	District (Urban) Total	**5,959**	**3,945**	**2,014**	**8,078**	**3,404**	**4,674**	**55.3**	**69.2**	**39.7**	**29.5**

Table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban population at 2001 census. The percentage of illiterates is lower than literates in the district (urban). The percentage of literates is least in Manikpur Sarhat (NP) among towns and the gap in male/female literate rate is also highest in this town. The males in all the towns enjoy higher literacy rate than females. The gap in male/female literacy rate is minimum in Rajapur NP (24.6 per cent).

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non – workers by sex at tahsils level in the district as per 2001 Census. The proportion of total workers to 42.3 per cent of the total population in the district, those total workers are comprised of 29.3 per cent of main workers, 13.0 per cent of marginal workers and the remaining 57.7 per cent are non-workers.

Among the main workers, males participation rate in the district is 40.7 per cent and 16.2 per cent of females. Male and female marginal workers account for 7.0 and 19.9 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 42.0 per cent in Karwi tahsil to 42.9 per cent in Mau tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C. D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 689,665 total rural population of district, 30.1 per cent has been categorized as main workers, the marginal workers constitute 13.9 per cent and the remaining 56.0 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 41.1 per cent males and 17.5 per cent females are in the category of main workers. Male and female marginal workers account for 7.1 and 21.6 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 44.0 percent. At the C. D. block level Ramnagar has highest proportion of total workers forming 48.3 per cent of the total

population. It is closely followed by Manikpur (46.3 per cent), and Pahari (43.8 per cent). The lowest percentage of 40.8 per cent is recorded in Mau C. D. block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table 33 gives number and percentage of main worker, marginal workers and non-workers by sex in urban area of the district at the 2001 census. The proportion of total workers work out to 27.0 per cent of the total population of the district. The total workers are comprised of 21.9 percent of main workers and 5.1 percent of marginal workers and the remaining 73.0 percent are non-workers.

Among the main workers, male participation rate in the district is 37.4 percent whereas female participation rate is only 4.1 percent male and female marginal workers accounts for 6.1 and 4.0 percent respectively. Total workers (main and marginal workers) among towns varies from 26.5 percent in Karwi (NPP) to 28.5 percent in Rajapur (NP).

				(36.1)	**(53.8)**	**(36.2)**	**(2.9)**	(7.1)

Note: Percentage of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 54.6 per cent of the total workers (main+ marginal) and remaining 26.7 per cent of total workers are engaged as agricultural laborers. Household industry workers and other workers are 3.0 percent and 15.7 percent respectively of the total workers on the district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 53.8 per cent in Karwi tahsil and 56.4 per cent in Mau tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 53.8 per cent which is low as compared to 55.2 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as

stated above. The workers in other activities occupy the third position next to agricultural labourer in the district as well as in each tehsil. The higher proportion of 16.1 per cent of other workers is recorded in Karwi tahsil while the lower proportion of 14.8 per cent is found in Mau tahsil.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Note: Percent of Worker to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) constitute 44.0 per cent of total population. Among these workers, cultivators constitute 58.0 per cent, 28.2 per cent agricultural labourers, 2.8 per cent household industry workers and 11.1 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.8 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of females (54.9 per cent) is lower than males (60.1 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 55.2 per cent in Pahari C.D. block to 63.3 per cent in Ramnagar C.D. block. Similarly for other workers, the lowest proportion is 6.5 per cent in Pahari C.D. block while 15.6 per cent is the highest in Mau C.D. block. The percentage of household industry workers is quite low i.e. only 2.8 per cent in the district. The percentage of agricultural labourers is highest in Pahari block (35.5) and is followed by Karwi 27.2 and Mau (26.3 percent). Similarly, household industry workers varies in C.D. blocks between 1.8 per cent in Manikpur and 3.5 per cent in Mau.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Serial number	Name and urban status of UA / Town	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

				(8.1)	**(4.8)**	**(15.7)**	**(10.8)**	**(68.7)**

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal

workers. At the district level, urban areas recorded highest percentage of other workers (82.9), followed by household industry workers with 6.5 percent (5.9 per cent male and 10.8 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (8.8) is recorded in Manikpur Sarhat (NP). In the agriculture labourers category Manikpur Sarhat (NP) recorded very low percentage (3.0). Household industry workers are very low i.e.(5.1 per cent in Karwi, 5.4 per cent in Manikpur Sarhat (NP) and 13.1 per cent in Rajapur NP. As the usual trend recorded in the urban areas, other workers are in high percentage of 84.8 per cent in Karwi (NPP), 82.8 per cent in Manikpur Sarhat (NP) and 76.2 per cent in Rajapur (NP).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TBLE 37: DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C D. block	Number of inhabited villages	Type of amenity available				Type of amenity available					
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 545 inhabited villages in the district 432 villages or 79.3 per cent have been provided with the educational facilities of one type or the other. Similarly 138 villages in the district constituting 25.3 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 515 or 94.5 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 72 villages constituting 13.2 per cent of villages have been provided with post office facility, as well as telephone facility with in the village. 77 or 14.1 per cent with transport facility, 25 or 4.6 per cent villages with bank facility and 29 or 5.3 per cent with agricultural credit societies. Similarly there are 211 or 38.7 per cent villages which have been linked with the pucca road. Total 270 or 49.5 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Ramnagar C.D. block has the highest 84.7 per cent villages where educational facility is available and lowest 73.3 per cent is found in Mau. Medical facility is lowest in Ramnagar (9.7 per cent) and highest (31.7 per cent) in Mau C.D. block. Improved drinking water is available in most of the villages in all the C. D. blocks. In fact it is above 92.0 per cent. Telephone facility is highest in Karwi (18.7 per cent) while only 3 villages of Ramnagar C.D. block enjoy this facility. Transport and communications is less developed in Karwi where only 5.8 per cent villages are covered by this facility whereas 26.9 per cent villages of Manikpur C.D. block are availing this facility.

TABLE 38: NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different type of amenities. Out of total rural population of 689,665 persons in the district, 657,203 or 95.3 per cent have educational facility of one or the other type. Similarly 293,877 or 42.6 per cent population has medical facilities while 683,211 or 99.1 per cent have got improved drinking water facility. Post office facilities are available to 226,668 or 32.9 per cent population. Telephone facility is available to 152,625 or 22.1 per cent. Transport communications facility is available to 143,875 or 20.9 per cent. Bank facility is available to 85,551 or 12.4 per cent. 94,997 or 13.8 per cent have been provided with the facility of agricultural credit societies. 379,162 or 55.0 per cent have been

provided with the facility of agricultural credit societies. 379,162 or 55.0 per cent have been provided with the facility of approach by pucca road. Power supply is available to 443,424 or 64.3 per cent rural population in the district. Similar trend of availability of facilities is visible to the rural population at C.D. block level. However, in Mau C.D. block facilities of educational, medical and improved drinking water are available to major proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 km.	5-10 km.	10+ km.	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	99	13	2	114
(b) Middle School	239	141	24	404
(c) Degree College	65	122	350	537
2. Medical:-				
(a) Hospital	134	140	249	523
(b) PHC	85	203	240	528
3. Post Office	283	134	56	473
4. Telephone	175	114	184	473
5. Bus Service	162	206	120	488
6. Banks				
(a) Commercial Bank	214	150	161	525
(b) Cooperative Bank	82	224	231	537
7. Agricultural Credit Societies	244	146	126	516

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 114 villages do not have primary school in their villages and out of these villages, children of 99 villages have to travel less than 5 kms. 13 at a distance of 5-10 kms. and 2 at a distance of 10+ kms. Out of 545 inhabited villages as many as 404 are deprived of middle school and 537 of degree colleges. Of these 239 avail the facility of middle school at a distance of less than 5 kms., 141 at a distance 5-10 kms and the remaining 24 at a

distance of 10+ kms. In respect of degree college 65 avail this facility at a distance of less than 5 kms., 122 between 5 to 10 kms. and rest 350 villages at a distance of 10+ kms.

Similarly there are 523 villages in the district which have been devoid of Hospital facility and 528 villages which are deprived of PHC facilities. Of these 134 villages have the facility of Hospital available within 5 kms. while in respect of 140 villages the inhabitants have to cover a distance of 5-10 kms. to avail this facility. Similarly overwhelming number i.e. 249 villages have this facility at a distance of 10+ kms. As regards PHC 85 avail this facility at a distance of less than 5 kms., 203 at a distance of 5-10 kms. and the remaining 240 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 473 villages do not have this facility in the village itself. Of these majority i.e. 283 have this facility at a distance of less than 5 kms., another 134 villages avail it at a distance of 5-10 kms. In the remaining 56 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 473 villages in the district which are without telephone facilitiy. Of these 175 avail this facility at a distance of less than 5 kms., 114 at a distance of 5-10 kms. and remaining 184 have to traverse a distance of 10+ kms.

For Bus service out of 488 villages which do not have facility, 162 villages avail this facility at a distance of less than 5 kms., 206 at a distance between 5-10 kms. and 120 at a distance of 10+ kms.

In the entire district 525 villages are deprived of Commercial Bank and 537 of Co-operative Bank. Of these 525 villages which are deprived of Commercial Banks 214 villages avail this facility at a distance of less than 5 kms., 150 between 5-10 kms. and the remaining 161 at a distance of 10+ kms. Regarding Co-operative Banks out of 537 villages 82 villages avail this facility at a distance of less than 5 kms., 224 at a distance of 5-10 kms. and remaining 231 at a distance of 10+ kms. 516 villages do not have agricultural credit societies. This facility to 244 villages is available at a distance of less than 5 kms., 146 at a distance of 5-10 kms. and the remaining 126 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available			
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approac h by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 545 inhabited villages in the district, there are 67 villages which have nearest towns upto a distance of 5 kms. Of these only 54 villages forming 80.6 per cent of these total villages, are having the educational facilities of one type or the other and 15 villages constituting 22.4 per cent, have the medical facilities within the village, 5 villages forming 7.5 per cent have the facility of post office within the village and 12 or 17.9 per cent have the facility of telephone. 10 villages constituting 14.9 per cent have been linked by transport service. Two villages comprising 3.0 per cent have been provided bank facilities, while 4 villages constituting only 6.0 per cent have been provided by agricultural credit societies. 40 villages comprising 59.7 per cent have been provided with pucca road.

There are 313 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 247 villages constituting 78.9 per cent have been provided with the educational facilities. 86 villages comprising 27.5 per cent have been provided with medical facilities. 44 villages constituting 14.1 per cent enjoy the post office facility. 42 villages comprising 13.4 per cent have been provided the telephone facility. 49 villages constituting 15.7 per cent have been linked with

transport and communications. 15 villages comprising 4.8 per cent have bank facility. 14 villages constituting 4.5 per cent are having agricultural credit societies, while 117 villages or 37.4 per cent are approachable by pucca road. 118 villages fall in the distance range of 16-50 kms. Of these, 76.3 per cent villages have educational facility, 16.9 per cent with medical, 13.6 per cent with post office, 6.8 per cent with telephone and transport & communications available to 11.0 per cent villages. Banks and agricultural credit societies facilities are available to 3.4 and 5.1 per cent of villages, while power supply is available to 32.2 per cent villages.

There are 17 villages in the district which are situated beyond 50 kms.from the nearest town and out of these 13 or 76.5 per cent enjoy the educational facility in the village itself whereas 8 villages comprising 47.1 per cent have been provided with medical facility of one type or the other. Only two villages comprising 11.8 per cent have the post office facility. 5 villages comprising 29.4 per cent have been provided with telephone facility. Two villages constituting 11.8 per cent have been linked by bus service as well as having bank facilities and agricultural credit societies. While 9 villages comprising 52.9 per cent have been linked by pucca roads. There are 30 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 28 or 93.3 per cent villages have the educational facility of one or other type. 30.0 percent with medical, 16.7 per cent with post office, 16.7 per cent with telephone and transport and communication available to 10.0 per cent villages. Banks, agricultural credit societies and approach by pucca road facilities are available to 6.7, 10.0 and 23.3 per cent of villages.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district out of a total 545 inhabited villages, there are 150 villages have a population of less than 500 persons. Of these, 55 villages (36.7 per cent) have educational facility, 10 (6.7 per cent) have medical facility, 123 (82.0 per cent) have improved drinking water facility. 6 (4.0 per cent) have telephone facility. 16 (10.7 per cent) have been linked by bus service. 2 (1.3 per cent) have Bank facility. 34 villages (22.7 per cent) have been linked with pucca road. 32 villages (21.3 per cent) have been provided with electricity. No village has been provided with post office and agricultural credit societies facility.

Out of 135 villages, which fall in the population range of 500-999 persons, 121villages (89.6 per cent) have been provided with the educational facility, 27 (20.0 per cent) with medical facility, all the villages (except two villages) have improved drinking water facility. 4 villages (3.0 per cent) have been provided with post office facilities, 11 villages (8.1 per cent) with telephone facility, 15 villages (11.1 per cent) with transport facilities, 3 villages (2.2 per cent) with bank facility, 4 villages (3.0 per cent) with agricultural credit societies. 42 villages (31.1 per cent) have approach by pucca road and 67 villages (49.6 per cent) have electricity facility.

171 villages fall in population range of 1,000-1,999 persons. All of these villages have improved drinking water facilities. Whereas 167 villages (97.7 per cent) have educational facility, 53 villages (31.0 per cent) enjoy the medical facility, 19 villages (11.1 per cent) have post office facility, 30 villages (17.5 per cent) have telephone facility, 23 villages (13.5 per cent) have transport and communications facilities, 5 villages (2.9 per cent) have bank facilities, 9 villages (5.3 per cent) have agricultural credit societies, 73 villages (42.7 per cent) have approach by pucca road and 103 villages (60.2 per cent) have power supply facility.

There are 78 villages in the district which are covered under 2,000-4,999 population range. In this range, all the 78 villages enjoy the facility of educational and 77 village improved drinking water, 38 villages (48.7 per cent) have medical facility. 41villages (52.6 per cent) have post office facility, 22 villages (28.2 per cent) have telephone facility, 11 villages (14.1 per cent) have bank facility, 13 village (16.7 per cent) is having agricultural credit societies, 19 villages (24.4 per cent) have transport and communications facility, 52 villages (66.7 per cent) have approach by pucca road and 60 villages (76.9 per cent) have been provided with electricity. 10 villages fall in population range of 5000-9999 persons. All these villages have education and improved drinking water facilities and 9 villages (90.0 per cent) enjoy the medical and approach by pucca road facility. 7 villages (70.0 per cent) have post office and power supply facility, 2 villages (20.0 per cent) have telephone facility, 3 villages (30.0 per cent) have transport and communications facilities, and bank facility, 2 villages (20.0 per cent) have agricultural credit societies. There is only one village in the district having a population of 10,000 and above persons. This village enjoy the facility of educational, medical, improved drinking water, post office, telephone, transport, bank, agricultural credit societies, approach by pucca road and power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area (hectare)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Pahari	127	57,939.8	54.0	38.2
2	Karwi (Chitrakoot Dham)	139	63,987.8	63.9	50.3
3	Manikpur	104	99,934.2	27.2	37.1
4	Ramnagar	72	31,458.0	63.9	15.8
5	Mau	101	45,823.4	44.6	38.5
6	Forest Villages	2	412.0	0	0
	District Total	**545**	**299,555.2**	**46.7**	**38.4**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 545 inhabited villages in the district having a total area of 299,555.2 hectares. Of this, 46.7 per cent is cultivable and 38.4 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use trend at C.D. block level shows that Pahari block with 127 villages have a total area of 57,939.8 hectares, of this 54.0 per cent of land is cultivable and of the aforesaid area 38.2 per cent is irrigated. In Karwi block, all the 139 villages have a total land area of 63,987.8 hectares, of this 63.9 per cent of land is cultivable and of the aforesaid area 50.3 per cent is irrigated. In Manikpur block, all the 104 villages have a total area of 99,934.2 hectares, of this cultivable area is 27.2 per cent and 37.1 per cent is irrigated. In Ramnagar block, all the 72 villages have a total area of 31,458.0 hectares. Of this, cultivable area is 63.9 per cent. Of cultivable area 15.8 per cent is irrigated. Mau block with 101 villages have a total land area of 45,823.4 hectares, of this 44.6 per cent is cultivable area and out of this cultivable area 38.5 per cent is irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III,Chitrakoot Dham (Karwi),NPP	286	33	253	284	129	0	20	1	134
2	IV,Manikpur Sarhat,NP	133	40	93	82	31	0	28	0	23
3	IV,Rajapur,NP	196	77	119	106	54	0	0	0	52
	District Total	**189**	**17**	**172**	**187**	**82**	**17**	**30**	**1**	**57**

Table 43 gives the per capita receipt and expenditure (in rupees) for each town in the district. The average per capita receipt for towns of the district works out to Rs.189 of which Rs.17 are derived through local taxes and the remaining Rs.172 received from all other sources. The average of total expenditure incurred per head is Rs.187. Out of this Rs.82 are spent on general administration, Rs.17 on public health and conveniences, Rs.30 on public works, Rs.one on public institutions and Rs.57 is spent on other items. Among all the three towns the receipt and expenditure recorded per head is the highest in Karwi (NPP).

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Chitrakoot Dham (Karwi) (NPP)	4.1	2	0.6	0.8	0.2
2	Manikpur Sarhat (NP)	4.7	2.7	0.7	0.7	0
3	Rajapur (NP)	2.4	0.8	1.6	1.6	0
District Total		**3.9**	**2**	**0.8**	**0.9**	**0.1**

Table 44 shows the average number of educational institutions per 10,000 population in urban areas of the district. Average number of primary school comes 3.9 schools, 2.0 junior secondary/middle, 0.8 secondary/matriculation, 0.9 senior secondary schools and the ratio of colleges is only 0.1 college. Among the towns, the ratio of primary and junior secondary/ middle is highest in Manikpur Sarhat (N.P.) and Rajapur (NP) has highest ratio of secondary/ matriculation schools while in case of senior secondary school this position is claimed also by Rajapur N.P. (1.6). College education is available only in Chitrakoot Dham (Karwi) (NPP.).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Chitrakoot Dham (Karwi) (NPP)	16
2	Manikpur Sarhat (NP)	34
3	Rajapur (NP)	0
	Distrct Total	**17**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of the district. On an average there are 17 beds in urban areas of the district. Whereas it is the highest 34 in Manikpur Sarhat Nagar Panchayat.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl.No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
Not Available				

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Chitrakoot Dham (Karwi), NPP	Clay Toys, Carpet, Wooden Toys	Vegetable, Grain, Stone
2	Manikpur Sarhat, NP	Milk Product, Batasa (sweet), Incense stick	Tendu Leaf, Mahua, Aonla
3	Rajapur, NP	--, --, --	--, --, --

Table 47 indicates most important articles manufactured and exported out in each town of the district. The district is well known for earthen toys, Galicha, Khoya and Batasa manufacturing. The chief export items of the district are mostly the same that are manufactured in the towns.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001based on inset tables 48 to 52:

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared. In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 123,542 consisting of 111,534 rural and 12,008 urban households. 37,310 households belong to Scheduled Castes and 655 to Scheduled Tribes. 119,305 households are living in their owned houses constituting 96.6 per cent of total households. Of these households, the largest number of households (37,597) have occupied double roomed accommodation and is followed by three plus roomed accommodation numbering to 32,702 households. Next position is claimed by households (26,511) occupying three rooms accommodation. Number of households in owned accommodation occupying

(26,511) occupying three rooms accommodation. Number of households in owned accommodation occupying single roomed rank at fourth place with 20,964 households while 1,531 households are without any exclusive room.

2,927 households living in rented accommodation account for 2.3 per cent of total number of households in the district. The maximum number of 1,289 households are living in double roomed accommodation followed by 1,013 households in single roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 1,310 forming only 1.1 per cent of total households are distributed in single roomed accommodation numbering 460, double roomed 413 and 216 in three roomed accommodation. In rural areas majority of households have bigger size and also majority of them have their own houses while in urban areas it shows reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Karwi	27.4	71.2	1.4	21.8	76.8	1.4	69.8	29.2	0.9
2	Mau	21.2	78.0	0.8	19.9	79.4	0.7	46.5	51.0	2.5
	District Total	**25.6**	**73.2**	**1.2**	**21.2**	**77.6**	**1.2**	**66.5**	**32.4**	**1.2**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that 25.6 per cent of the households in the district had permanent houses. The trend is almost similar in rural (21.2 per cent) and different in urban area (66.5 per cent). Among tahsils higher proportion of permanent houses were accounted in tahsil Karwi (27.4 per cent) and lower in Mau (21.2 per cent). In respect of semi-permanent houses, the returns were 73.2 per cent at district level whereas among tahsils, in Mau it was 78.0 per cent and lowest was 71.2 per cent in tahsil Karwi. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 29.2 to 51.0 per cent. Temporary houses in the district lie between the range of 0.8 to 1.4 per cent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households. Bathroom means bathroom within the house Toilet means toilet within the house. Drainage means closed and open drainage.

The above table shows that out of total households of the district 54.0 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 51.4 and 78.4 per cent. Tahsil Mau had higher order of proportion of households where percentage for rural area was 53.3 and 79.8 per cent in urban areas. Electricity was available for 16.9 per cent of households at district level, and had better access of electricity. Bathrooms and toilet facilities were available in 12.2 and 12.5 per cent of households. Tahsil Mau poorly served in respect of these amenities. Similarly drainage facility was also poor in Mau tahsil. At district level drainage facility was available for 36.2 per cent of households, whereas the proportion of rural and urban areas households accounted to 32.0 and 75.7 per cent.

TABLE 51: NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

				(67.7)	(3.0)	(0.8)	(0.2)	(0.1)	(21.4)	(0.3)	(5.9)	(0.1)	(0.4)

Percentage in brackets Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 79.9 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is 81.2 and in urban area it comes to 67.7 per cent of households. Crop residue has been reported as one of the fuel for cooking of food is 8.4 per cent of the households. The composition of rural and urban comes to 8.9 and 3.0 per cent respectively. Cow - dung cake is used for cooking in as many as 7.8 per cent of the households (8.5 per cent rural and 0.8 per cent urban households). The other methods like LPG (cooking gas), kerosene, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 per cent to 2.7 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, Crop residue and cow - dung cake are the predominant fuel for cooking in the district. Coal/lignite and other fuels are negligible at district level.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Availability of household assets			Availability of household assets			
					Radio/Transistor	Television	Telephone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets

		Urban	12,008	5,659	4,998	5,052	1,139	6,731	1,710	291	3,232

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets

This table presents data for total, rural and urban area at district /tahsil level about households availing banking services and availability of assets such as radio/transistor, telephone, bicycle, scooter and car etc. There are 123,542 households in the district and among them 25,783 households have been availing

banking services, 43,679 households have Radio/Transistor and Television is used by 12,486 households. Telephone is available in 2,592 households. Bicycle is a main means of transportation and is available in 71,378 households, scooter, Motor cycle, Moped and Car, Jeep and Van are used by 5,980 and 1,284 households respectively. The picture in used of banking services and availability of assets by households at tahsil level is almost similar as analyzed above for the district as a whole.

(xi) Major Social and Cultural Event, Natural and Administrative Development and Significant Activities during the decade :

The notable event during the decade 1991-2001 has been the creation of Chitrakoot district out of Banda district on 6 May 1997. Chitrakoot is inseparably linked with Ram legend. Annual Ramayana melas in the month of February are now regular feature. During the year 2000 twenty-four villages were transferred into the district from Banda district.

(xii) Brief Description of Places of Religious, Historical or Archeological importance in villages and places of forest interest in the towns of the district :

The district gazetteer of Banda (Govt. Press, Allahabad, 1981) lists places of interest (Chapter XIX, pg. 278) in which are described various places of interest in the undivided Band district.

Bagrehi (Tashil Karwi)

Traditionally the village is associated with the residence of Valmiki. It has the Lalpur hill, said as his residence. The gazetteer notes, " *The hill is sacred and picturesquely wooded.*" (Ibid, pg. 279).

Banari (Tashil Karwi)

The village has ruins of garden and temples built by the Maratha Binaik Rao about 1830 A.D.

Bargarh (Tashil Mau)

It is a large village and has ruins of an old fort, said to have been built by a Panna king about middle of the eighteenth century A.D.

Barha Kotra (Tashil Mau)

Close to this village which stands on the right bank of Yamuna, is village Katra that has ruins of Bar Dewal temple. Traditionally, the temple is reputed to have been built by a Chandel king.

Bhaunri (Tashil Karwi)

On the one side of this village are ruins of fortifications and a house linked with Surkis, or perhaps Bundelas.

Chitrakoot Dham (Tashil Karwi)

The details about this may be seen under history part of the note.

Kalyanpur (Tashil Karwi)

Its old name is Kalyangarh. Here a ruined Bundela fort lise near a temple. The place was battleground at times between the Bundelas and the Bangash Nawab of Farrukhabad.

Kolhua Muafi (Tashil Karwi)

A tank near the village is said to be created by Rama. There are ruins of a temple built by Chandelas. Near here rises the Banganga a tributary of Baghain.

(xiii) Major characteristics and contribution of the district:

Chitrakut is mostly a hill district made of Vindhyan plateau. Small part of district is Gangetic plains. The Chitrakut hill in the district is associated with the legend of Ram and his brother king Bharat. The district is traditionally associated with Valmiki, Tulsi, Rahim and Tansen. It is well known Hindu pilgrimage point. This fact is attested in the following couplet :

"Chitrakut ke ghat par bhai santan ki bheer,

Tulsidas chandan ghisat tilak det Raghubir."

There is crowd of sages at Chitrakut, where Tulsidas is busy applying *tilak* on lord Ram.

(xiv) Scope of Village Directory and Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1. Population and households Cols.4 & 5
2. Amenities. Cols.6 to 13
3. Other infrastructural facilities etc. Cols.14 to 16
4. Availability of news paper/ magazine Column 17
5. Commodities manufacture Column 18
6. Total area of village and land use pattern Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv)Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(SECTION I & II)

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP

(iii) Stadium / Auditorium ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i) Bus BS
(ii) Railway Station RS
(iii) Navigable Waterway NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road PR
(ii) Mud road MR
(iii) Foot path FP
(iv) Navigable River NR
(v) Navigable Canal NC
(vi) Navigable waterways other than River, Canal NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16: Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use ED
(ii) Electricity for agricultural use EAG
(iii) Electricity for other purposes EO
(iv) Electricity for all purposes EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i) Newspaper N
(ii) Magazine M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i) Government Canal GC
(ii) Private Canal PC
(iii) Well (without electricity) W
(iv) Well (with electricity) WWE
(v) Tubewell (with electricity) TW
(vi) Tubewell(without electricity) TWE
(vii) Tank TK
(viii) River R
(ix) Lake L
(x) Waterfall WF
(xi) Others O
(xii) Total T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

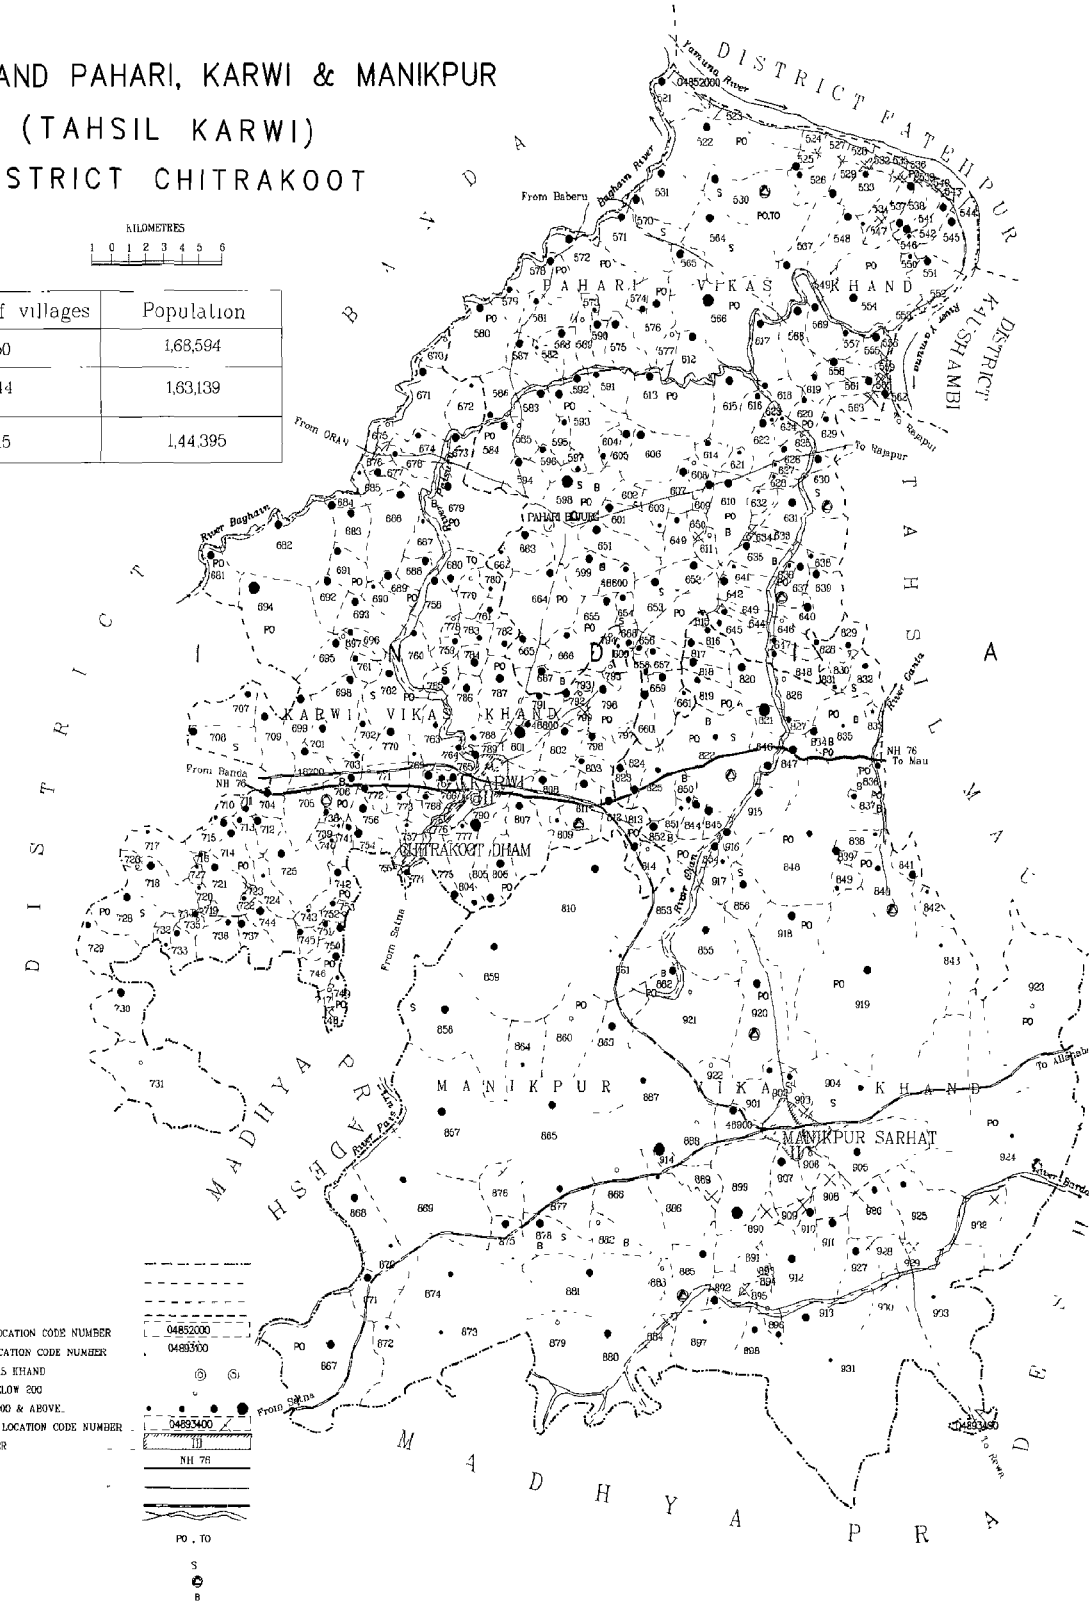

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

SECTION II - TOWN DIRECTORY

Section II - Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wisc amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A

(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

PART-B

ANNEXURES (I-VIII)

Chitrakoot district was carved out from Banda after 1991 Census. The data is not available separately for Chitrakoot. Hence, for comparison purpose of Annexures IV to VIII, the data of undivided Banda district have been used, assuming that the trends and pattern of districts are same.

ANNEXURE – I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which is in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP	Chitrakoot
q1	Persons	99	107
	Males	98	113
	Females	104	102
q2	Persons	117	115
	Males	117	118
	Females	118	112
q5	Persons	134	141
	Males	135	135
	Females	132	158

The probability of dying between birth and at age 1,2 and 5 years are shown in the above table. Child mortality by ages 1,2 and 5 years is lower in the district as against the state, thus child mortality indicators in the district for both male and female shown lower order as compared to the state.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures		Uttar Pradesh	Chitrakoot
1	2		4	5
1	CBR		37.21	38.57
2	TFR		5.60	5.80
3	TMFR		6.30	6.23
4	GFR		172	183
5	GMFR		200	201
6	Mean age at marriage (1981-91)		17.27	17.20
7	Number of children ever born per ever married woman aged 45-49 years		4.59	5.14
8	Child woman ratio	0-4	631	646
		5-9	752	791

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

A measure of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to mid year population, is 38.57 per cent in the district. It is higher to the state of Uttar Pradesh i.e. of 37.21 percent. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along closer proportion from the state figures. The conclusion that may be drawn is approximately equal fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.27 years for the state where as 17.70 years has been observed for the district. Similar trend is observed in the number of children born per ever married women in the age group 45-49. The state and the district figures are placed as 4.59 and 5.11 per cent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 646 and 654 for the district while in case of the state the corresponding figures are 631 and 791. The various measures of fertility presents that fertility levels as such are close to the state average. Another important factors i.e. the probability of dying is varying between birth and at age 1, 2 and 5 are not identical in the district and state.

Chitrakoot	16,932	3,173	13,759	11,384	2,523	8,861	5,545	650	4,895	3	0	3
	100 0	100.0	100.0	67.3	79.5	64.4	32.7	20.5	35.6	0 0	0.0	0 0

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 59.8 in 1991, while in 2001 it was 67.2 percent respectively. The proportion of in-migrants from other states was 16.2

percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 39.8 percent and 32.8 percent respectively. This shows in-migration from other states to this district was decreased in 2001 in comparison to 1991. At district level in-migration from other countries was 0.5 percent in 1991 and negligible percentage in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 62.5 percent and 67.3 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 37.3 percent and 32.7 percent respectively. The movement of population from other countries in the district was 0.2 percent in 1991 and negligible percentage in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

	100.0	0.0	0.2	96.3	0.1	3.3	0.1	0.0	0.0

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 93.5 percent in 1991 and 96.2 percent in 2001, while Muslim were 6.4 percent in 1991 and 3.6 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure – VI

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 54.0 percent male and 43.6 percent female to 56.8 percent male and 48.3 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female at state level but in the district the percentage of married male and female were 42.9 and 52.0 percent in 1991 census where as in 2001 census, with a declined trend, it was 40.5 percent and 47.2 percent respectively. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.6 percent male and 4.4 percent female while it was 3.0 percent male and 4.4 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Annexure - VII

Age, Sex and Education in the state/district 1991 census.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001.

Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 58.6 percent male and 87.1 percent female in 1991 which declined to 38.3 percent male and 60.7 percent female in 2001. Primary level education was 10.7 percent male and 4.3 percent female in 1991, which was 17.6 percent male and 11.1 percent female in 2001. Middle level education was 9.0 percent male and 2.3 percent female in 1991 and 12.6 percent male and 5.0 percent female in 2001. Matriculation and above level of education was achieved by 10.8 percent male and 2.1 percent female in 1991 which was 17.1 percent male and 4.1 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001, while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note: For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0 02 percent The remaining tongues have been merged in the column of "Total of other mother tongue".

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 97.8 percent person in 1991 and 99.1 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent in 2001 at the state level whereas 2.1 percent and 0.4 percent at district level in 1991 and 2001 Census respectively. Contrary to this Nepali language (0.5 percent) was the second largest mother tongue in 2001 census pushing Urdu (0.4 percent) to the third place at district level. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
