MOTIF

DARGAH OF SYED SALAR MASUD GHAZI

Situated at a distance of 3 km from the main city Bahraich, there is a Mosuleam (Dargah) of Sufi and saint Syed Salar Masud Ghazi which was built by Firoj Sah Tughlaq in 1034 AD. Historical legends witness that war happened between the local king Raja Suhel Deo and Syed Salar Masud Ghazi. In the said battle Syad Salar Masud Ghazi was killed by the king and he was buried on the spot and later on King Firoj Sah Tuglaq built a magnificent Dargah. Every year month long fairs are held in Jyshetha (May/June) and devotees of all religions assemble there for fulfillment of their desires and to pay their homage. The fair is a symbol of cultural harmony of the people of various faiths.

Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991Census 675
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 676
Annexure VI Marital status of population as per 1991 Census 678
Annexure VII Age, Sex and Education in the district, 1991 Census 682
Annexure VIII Distribution of different mother tongues returned in 1991 Census 685

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth

with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The District census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. The Census Organization on behalf of each State Government/Union Territory has traditionally brought out this publication. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

Brief History of the District

The history of the district 'Bahraich' dates back to ancient time. The orthodox legend connects the present name of the district with 'Brahma', the creator, who is said to have chosen Bahraich as his own special domain and called together a number of Rishis to establish his worship here in Ghandarva Van of the epics. The place was thus called Brahmaich, the assembly of Brahma. The present name Bahraich appears to be the abberation of Brahmaich. Another and perhaps more probable origion of the name lies in the fact that the whole tract, in former days, was held by the Bhars and it was known as Bahraich, from which it has derived its present name.

The present district of Bahraich once formed a part of the ancient kingdom of 'Kosala'. The ancient history of Bahraich is therefore closely linked with the history of that kingdom. Besides the numerous legends connected with this region, valuable evidences such as sculptures, images, coins, large bricks etc. have been found and the remains of temples, stupas, monasteries with many brick-strewn mounds are spread all over the district. These indicate that the tract enjoyed advanced and settled social life since very early times. The district seems to be ruled by the local chiefs for a very long time.

Prince Nasiruddin Mahmud, the eldest son of Sultan Iltutamish, who was appointed as governor of Avadh in 1226AD, waged several wars against these chiefs and overthrew a chief named Bastu or Prithu, who is said to have killed one hundred and twenty thousand Turks in different engagements. Prince Nasiruddin was responsible for colonizing and settling the 'Muslims' in the south of the district for the first time.

Bahraich seems to have remained without imperial control on account of the dynastic trouble which followed the death of Sultan Balban in 1287. During the reign of Firoze Tughlaq (1351-1388), many janwar strongholds were established in the district by the Sultan Basiar Sah. The prominent janwar chieftain, is said to have accompanied and assisted the latter during his expedition to Bengal. Sultan Firoze shah Tughlaq came to Bahriach in 1376AD to visit the tomb of Saiyed Salar. He is said to have built the compound wall and other buildings at the Dargah Sharif. During the reign of Akbar, the district was made headquarters of an administrative division known as Sirkar Bahraich within the subah of Avadh.

The political history of the district during 19th century is closely related to the rise and fall of the great talukdari houses, which practically come to occupy the whole district. On

February 7, 1856 the kingdom of Avadh was annexed and vested exclusively in the East India Company and Bahraich was made the head- quarters of a division with Wing,field as commissioner.

(iii) Administrative Setup

For administrative purpose the district is divided in to four tahsil. Nanpara. Bahraich. Kaiserganj and Mahasi. The district is further divided into 12 community development blocks. There are 776 Gram Sabhas and 1,226 revenue villages in which 1,204 are inhabited and 22 are uninhabited. There are four towns namely Jarwal T.A.,Risia.T.A., Bahraich N.P.P.and Nanpara N.P.P.

Jurisdictional Changes (1991-2000)

In May 1997 a new district Shrawasti has been carved out from the district Bahraich. The entire Bhinga tahsil (including 1 town and 2 development blocks), one development block of tahsil Nanpara, (Jamunaha) and four CD blocks and one town of tahsil Bahraich. Ekauna, T.A four C.D Blocks – (Ekauna, - Gilaula, Payagpur and Vishaswarganj) have been subtrated from Bahraich district. Jurisdictional changes during decade 1991-2000 are given in the following table.

Sl. No.	Name of District / Tahsil	Notification No. & Date	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
39	BAHRAICH	1434/1-5/97-107/97-R-5 dated 25.5.1997		Entire Bhinga tahsil and one town transferred to Shrawasti district
1.	Bahraich Tahsil	(i) 4619/1-5-94-176/90-R-5 dated 30.12.1994 (ii) 2350(1)/1-5/97-154/97-R-5 dated 13.08.1997 (iii) 2350(1)/1-5-97-154/97-R-5 dated 13.08.1997		(i) 6 village transferred to newly created Mahasi tahsil. (ii) 184 villages transferred to Ikauna tahsil of Shravasti district (iii) 166 villages transferred to newly created Payagpur tahsil of Shrawasti district.

2.	Kaiserganj Tahsil	4619/1-5-94-176/90-R-5 dated 30.12.1994		213 villages transferred to newly created Mahasi Tahsil
3.	Mahasi Tahsil	4619/1-5-94-176/90-R-5 dated 30.12.1994	(i) 6 villages transferred from Bahraich tahsil (ii) 213 villages transferred from Kaiserganj tahsil (iii) 16 villages transferred from Nanpara Tahsil	
4.	Nanpara Tahsil	(i) 4619/1-5-94-176/90-R-5 dated 30.12.1994 (ii) 1434/1-5/97-107/97-R-5 dated 25.5.1997		(i) 16 villages transferred to newly created Mahasi tahsil (ii) 114 villages transferred to Bhinga tahsil of Shrawasti district (Entire Jamunaha C.D. Block)

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos's circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental offices at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a departmental district level officer. The development point of view the district is divided into community development block. Block Development Officers (BDO) looks after development works at community developments blocks level. Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) in their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspectors and Sub-Inspectors are in-charges of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for Local self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

(1) Location and Size

The district is located in sub-Himalayan belt along with the border of Nepal in the North. It lies between the $27^0 2'$ and $28^0 14'$ north latitude and meridian $81^0 15'$ to $81^0 28'$ east longitude. It is bounded by district Shrawasti in the east, district Gonda in the south-east, district Barabanki in the south-west, district Sitapur in the west and district Kheri in north-west. Due to carving out of a new district Shrawasti in May, 1997 the area of Bahraich has diminished to certain extent. The area of the newly organised district is 4420 sq.km.

(2) Physiography

The district is naturally divided into Ghaghara basin in north-east, central upland and Tarai in the north. The Ghaghara basin covers tahsil Nanpara and tahsil Kaiserganj. On the basis of geology, soils, topography, climate and natural vegetation the district is defined as under :

Bahraich Plain The region is situated between the Ghaghara and the Rapti rivers in the central part of the district in a triangular shape. The slope is tilted towards south east direction. The streams draining in the region are mostly bifurcated from one place and join with the same stream after flowing to some distance. Risiya, Soti, Sarju etc are the main streams. Besides there are numerous perennial depressions or tals of different size and shapes. Majority of them are of Ox-bow patterns which is the symbol of shifting courses of streams. Baghel Tal is the largest among all. There is a well marked natural leavel which stretches from near Jarwal village to accross Nanpara in the north. This leavel divides drainage basins of Rapti and Ghaghara.

Ghaghara Khadar It is an elongated belt parallel to Ghaghara river. The region extends from north to south in a strip form. The physical characteristics are more as Tarai than

Khadar. The Ghaghara is the main river which flows from north to south. The Sarju is another river which joins the Ghaghara near Salankho Purwa Village. Besides, there are numerous rivulets which are the offshoots of Ghaghara. The flood is common feature in this region.To check the havoc of flood a dam has been constructed on the river Ghaghara.

(3) Drainage :

The Ghaghara river forms the Western boundary of the district. The other prominent rivers of the district are Kauriyala, Gidwa, Sarju, Terhi and Soti. The Ghaghara river is navigable and causes heavy flood during rainy season.

(4) Climate :

The area receives heavy rainfalls averaging upto 1125 mm annually and the north and north-east parts get flooded. The summer is not very warm. In the year 1997-98 the maximum and minimum temperature were 44.8 & 4.9 respectively. Due to Tarai the climate is damp.

(5) Natural and Economic Resources

Forestry :

According to the records of Board of Revenue in the year 94-95 the 95040 hectares area (76099 hectares in statistical magazine 1999-2000) was covered by the forest in the district. Due to heavy rainfall the area is covered with abundant vegetations. The average rainfall is 1125mm. About 87% of annual rainfall in the district is received during the south west monsoon i.e. from June to September. The abundant vegetation are conducive for various types of flora and fauna.

Tree in the forest areas, Sal is the predominating species. It is never found alone, but is everywhere accompanied by many other trees. The most noticeable of these are Tun, Mahua, Dheo Asna, Bargad Tendu, Bel , Asidh.

Owing to the large areas under forest the fauna of the district are numerous and varied.The list includes tiger, leoperd, wolve, hyana, jackal, foxe, wild pigs, sambhar, chital, gond, parha, kakar, nilgai and antilope. Of late the number of tiger has fallen off considerably, owing to the great extension of cultivation in the district. The leopards too, which were earlier more number have become scare for the same reason. The chief birds of the district are peacock, patridge, jungle fowl. Snakes are fairly common throughout the district, especially in the rural areas, the chief being the cobra, karait and rat snake. Indian crocodile (Naka) and the Ghariyal are found in Ghaghara river.

Minerals and Mining :

The minerals are not accountable in the district.

Soil :

The soil of area is mainly of three types i.e. Bhur comprising of sand and loom, Domat comprising of sand and clay and Matiyar (clay).

Land and Land Use Pattern :

Land use pattern as recorded in statistical magazine 1999-2000 indicates that out of the total reported area 452,354 of hectares of the district, the net sown area was 292,707 hectares which was 64.71%. The higher sown area was in tahsil Nanpara and the minimum area was in tahsil much more Bahraich. Large area of cultiviable waste land is in the Kachhar of rivers in the Mahasi and Kaiserganj C.D. Blocks of the district. In the magazine indicates that the forest was in 76,099 hectares, cultiviable banjar land 5,426 hectares, present fallow (parti) land 12,826 hectares, other fallow (parti) land 7,077 hectares, usar cultiviable land 5,078 hectares, land used for other than cultivation 45,430 hectares, and The net irrigated area was 74,481 hectares, The total sown area 431,448 hectares in which Rabi crops area was 184,384 hectares, Kharif crops area was 242,638 hectares and Zaid covered 4,385 hectares.

Agriculture and Crop Pattern :

The three harvest of the district are known by their usual names, Rabi, Kharif and Zaid. The Kharif or rainfed crops are sown in June and July and harvested in September and October. While Rabi or irrigated crops are sown in October and November and harvested in February – March. According to statistical magazine 1999-2000 the main Kharif crops of the district are Paddy (rice) and Jwar and those of main Rabi crops are Wheat, Barley and Gram. In the year 96-97 the cash crops like Ground nut, Lahi/Mustered, Sugarcane and Potato were sown in 6.4% area of the total sown area, which shows that the area of the cash crops in the district is very less. Other crops of the district are Bajra, Maize, Arhar and Peas. In the rural areas of the district, the vegetables are better cultivated.

Irrigation :

The irrigation facilities available in the district consist of long canal network, government tube-wells and private tube-wells. According to statistical magazine 1999-2000, the net irrigated area was 874,859 hectares in the year1996-97 out of which 73.7% land was irrigated by govt. and private tube wells, and 11.1% by canals (irrigated area 9,738 hectares) During the year1996-97 there were 325 govt.tubewell in the district, and 2,305 private tube wells / Boring pump, sets were working per lakhs population in the district.

Animal Husbandry :

As agriculture and animal husbandry are two inseperable units of agriculture development, the animal husbandry department looks after the veterinary and animal husbandry work in the district and is concerned with the development of cattle, poultry breeding, sheep breeding and allied schemes and the prevention and treatment of various animal diseases. As per statistical magazine1999-2000 as per live stock Census 1993, the district had 1056338 live stock, in which 339320 were bovines, 238553 buffaloes, 16625 sheeps, 323154 goats, 1872 horses ponneys, 48424 pigs, and 88390 other animals. Sheep and goats are generally reared with the object of obtaining their hide and flesh. Sheeps provide coarse wool which is utilised by the villagers. According to Statistical Magazine1999-2000, the poultry and other birds were 188209 in the district.

There are 27 veterinary hospitals, 21 animal husbandry service centres, 10 artificial insemination centres and 14 sub centres in the year 1997-98, in the district. There sheep and seven pig development centres were working in the disrict in 1995-96.

Fishery :

For the development of fishery in the district, there are working five govt. ponds in the 306.03 hectares. There were 140.00 quintals production of fishes in the year 97-98 and 52.25 lacs fingerlings were distributed. There are 40 Fishery Co-operative Societies, which purchase and distribute fingerlings.

Industry:

The district is industrially backward. There are three sugar mills at Jarwal, Nanpara and Chilvaria. It has one distillary at Nanpara. Total of 32 industrial units were registered under Industrial Act 1948. There were 1198 small-scale industrial units functioning in the district. In the year 97-98, The number of Khadi industry units were 801 Total village and small scale industrial units in the district were 12938.

Trade and commerce:

Bahraich has been a place of unique importance from early times and travelers, traders and tourist have been visiting this district frequently from far and near. It was connected by principal trade routes.

local self government. The transport on the main road of the district are run by the State Road Transport while on other roads transport are carried out by the private buses. Transport facilities access to anywhere in the district is available at the private bus stand. Meter gauge railway line is 140 km long and 12 km of broad guage railway line connects district with other parts. Truck, taxi, tractor, bullock -cart etc are other mode of road transport.

Electricity and Power:

Electricity plays an important role in the economic development. Total consumption of electricity during 1996-97 was 84,600 thousand kwh. Domestic light sector consumed 26739 thousand kwh, and commercial sector consumed 4144 thousand kwh., Industrial sector consumed 13609 thousand kwh., Public light 2747 thousand kwh, and agriculture 36881 thousand kwh, In public water supply and severage 480 thousand kwh. was consumed. The electricity consumption per person in 45.96 kwh.

According to statistical magazine 1999-2000, total 900 villages are electrified against 1195 inhabited villages during 1997-98. There are 626 villages electrified by lying L.T. Mains during1996-97 and 2491 pump sets/private tube wells are electrified and 635 Harizan localities are also electrified during the year.

Other non-conventional energy sources, which are being promoted in the district, are biogas plant and solar energy. There are 3783 biogas plants established in the district. Solar energy equipments are also established in the district.

Gram Panchayat, its composition, jurisdiction and role in village development

A Gram Panchayat acts as the executive of the Gram Sabha. It is vital for village development.

Composition: The members of the Gram Sabha elect the members of the village or Gram Panchayat. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 776 Gram Sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

Its Term : The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the sarpanch.

Qualifications : In order to be elected to a village panchayat, a candidate should posses the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions : A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It look the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100.

Census Concepts

Building:

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of

them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate

census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it

to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent

Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Dhangar
28 Dhannuk
29 Dharkar
30 Dhobi
31 Dom
32 Domar
33 Dusadh
34 Gharami
35 Ghasiya
36 Gond
37 Gual
38 Habura
39 Hari
40 Hela
41 Kalabaz
42 Kanjar
43 Kapariya
44 Karwal
45 Khairaha
46 Kharwar (excluding Banbasi)
47 Khatik
48 Khorot
49 Kol
50 Kori
51 Korwa
52 Lalbegi
53 Majhwar
54 Mazhabi
55 Musahar
56 Nat
57 Pankha
58 Parahiya
59 Pasi ,Tarmali
60 Patari
61 Rawat
62 Sahariya
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in

census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane,

tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns

which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{} 1000$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{} 1000$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The emigrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 2,381,072 in which 2,143,074 live in rural and rest 237,998 in urban parts. There are four .tahsils in district namely Nanpara, Mahasi, Bahraich, and Kaiserganj. The most populous tahsil is Nanpara followed by Kaiserganj and Mahasi while Bahraich is least populated tahsil. The urban population in the district is 10.0 percent. The urban population is maximum at 51.0 percent in Bahraich tahsil. There are 1,226 villages in the district in which 22 are un-inhabited. The total rural population of 2,143,074 is spread over 12 CD blocks and seven inhabited forest villages. The most populous CD Block is Mihinpurwa with a population of 275,195 but the maximum number of inhabited villages (132) are in Chitaura C.D Block. The population density in the rural area is 489. The highest proportion (54.3) percent of villages are with a population density range of 501 and above, per sq.Km. Such villages contain as much as 63.4 percent of total rural population.

Size-class and status of towns:

In the total urban population of maximum number of 168,323 person, live in Bahraich NPP. The next big town is Nanpara NPP with a population of 42,773. The above two are class I and II town having the civic status of Nagar Palika Parishad (NPP), rest 2 towns are Nagar Panchayat (N.P) which are class IV towns Bahraich tahsil contains 2 towns and Nanpara has one town and Kaiserganj tahsils have also one town each.

Population growth:

At the present territorial jurisdication, the population of the district was 1,840,373 at 1991 Census and grown by 29.4 percent in decade 1991-2001 it is 2,381,072 at 2001 Census. The decadal growth rate 29.4 percent in the district is higher than the state average growth rate 25.8 percent.

Population Density:

The district has an area of 4,420 sq. Km. the population density in the district is 539. In the rural and urban areas of the district the density are 489 and 6,784 respectively.

Sex-Ratio:

The sex-ratio in the district at 867 is behind the state average of 898. Indeed the sex-ratio at the district has been all lower in the district as against to the state since 1901 except 1911 to 1941. As against to urban areas of the district the sex-ratio is higher in rural areas from 1901 to 1961 and lower from 1971 to 2001. At tahsils, level highest sex-ratio is in Kaiserganj and lowest in Mahasi. Among CD Blocks the sex-ratio is highest in Mihinpurwa at 889, and lowest in Shivpur at 841. Out of 1,204 inhabited villages in the district there are 36.5, percent villages (with 43.7 percent of rural population) which are having a sex-ratio between 850-899. In the urban parts of the district the sex-ratio is 885 and highest of 920 is in Risia Bazar NP and lowest of 879 in Bahraich NPP. The sex-ratio of population in the age-group 0-6 is 970 which is higher than the state being only at 916. As against the sex-ratio of 972 in the age-group 0-6 of rural population it is highest at 1004 in Mihinpurwa C D. Block and lowest at 946. in Chitaura. C.D. Block. It may be noted that out of 1,204 inhabited villages in 23.9 percent of villages with 26.9 percent of rural population, the sex-ratio in the age-group 0-6 is between 1,000-1,099. As against the 0-6 age-group the sex-ratio of 942 in the rural area of the district it is only 940 in urban. Among towns this sex-ratio is highest at 958 in Risia Bazar NP, and lowest at 919 in Jarwal NP.

Work Participation Rate:

In the total population of the district as much as 35.5. percent are workers and rest of 64.5 percent are non-worker. Among worker 26.6. percent are main workers and rest of 8.9 percent are marginal workers of total population. In absolute terms females outnumber males as main worker. The extent of main workers is highest at 29.2. percent in Mahasi tahsil and lowest at 24.3 percent in Bahraich tahsil. In case of marginal workers the population is highest in Nanpara tahsil as 10.4 percent in comprasion to only 6.2 percent in Bahraich and 7.8 percent Mahasi tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. In the district among workers 52.7 percent are cultivators and 14.5 percent other workers. Total 42.0 percent of female workers are engaged as cultivators.

Literacy:

In the district 35.2 percent population is literate. The literacy is 65.2 percent in urban areas and 31.7 percent in rural areas. The males literacy is as high as 45.6 percent as against about 22.8 percent in females, and therefore, the gap in male/female literacy rate is 22.8 percentage points. In rural areas, among 12 CD Blocks, the highest literacy is at 37.3

percent in Kaiserganj and lowest at 26.3 percent in Balaha. The literacy among males in rural areas is 42.7 percent in comparison to18.4 percent among females. The lowest female literacy of 14.2 percent is in Balaha CD Block. Thc gap in male/female literacy rate is highest in Kaiserganj CD Block which is 26.2 percentage points. In 31.6 percent of villages covering 34.3 percent of rural population, the literacy range is 21-30 percent. Among urbanites in the district, as much as 70.5 percent males are literates as against 59.4 percent females. The highest urban literacy is recorded is in Bahraich NPP ie 69.3 percent and lowest in Jarwal NP at 42.9 percent. The maximum males literacy is also found in Bahraich NPP at 74.0 percent and lowest at 52.1 percent in Jarwal NP. However, the highest females literacy is in Bahraich NPP at 63.9 percent and lowest at 32.6 percent in Jarwal NPP. Still, the maximum gap in male-female literacy rate at 19.5 percentage points is found in Jarwal NP. The literacy among Scheduled Castes, in the countryside is 26.6 percent and 50.7 percent in towns. There is 23.3 percent literacy in Scheduled Tribes in rural area and 78.6 percent in urban area. Only 1,530 persons (1,519 in rural and 11 in urban) out of 8,558 Scheduled Tribe populations are found literate in the district.

(viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36 :

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

Figure for 1991 Census at Tahsil level have not been recasted

The growth rates of the district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 29.4 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 29.9and 25.0 per cent respectively. Out of the total population of the district 90.0. per cent lives in rural areas while 10.0 per cent lives in urban areas. The proportion of urban population has slightly declined during the decade from 10.3 per cent in 1991 to 10.0 percent in 2001 Census.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population, size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1,204 inhabited villages, 48 (4.0 per cent) are small sized village with population below 200 persons. In the size of 200 to 499 persons there are 128 villages having 10.6 per cent villages of the district while in the size class of 500-999 population claims 237 villages with 19.7 per cent of the total villages in the district. 413 villages (34.3 per cent) are in the size class of 1,000-1,999 and 337 villages (28.0 per cent) are in the size class of 2,000-4,999. Total 37 villages (3.1 per cent) fall in the range of 5,000-9,999. In the size Class of 10,000 and above population there are four villages (0.3 per cent) in the district. The biggest village in the district having population of 19,352 persons is located in Kaiserganj C.D. block.

Table 3: New Towns, Denitrified, Declassified and Merged Towns in 2001 Census

Name of town
1
(a) New
(i) Statutory town
1.
2. Nil
3.
(ii) Census town
1.
2. Nil
3.
(b) Denotified
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - Nli
1.
2. Nil
3.
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria – Nil
1.
2. Nil
3.
(iii) Census towns of 1991 census are notified as statutory town in 2001 census - Nil
1.
2. Nil
3.
(c) Declassified
1.
2. Nil
3.
(d) Wholly merged with other town(s)
1. Nil 2. Nil 3. Nil

Declassified means the census towns of 1991 Census which failed to satisfy the demographic and economic criteria.

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	236	19.6	412.686	19.3
11-20	4	0.3	175	0.0
21-50	12	1.0	5,873	0.3
51-100	12	1.0	5,295	0.2
101-200	34	2.8	23,831	1.1
201-300	48	4.0	49,966	2.3
301-500	204	16.9	285,475	13.3
501 +	654	54.3	1,359,773	63.4
Not known	0	0.0	0	0.0
District Total	**1,204**	**100.0**	**2,143,074**	**100.0**

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 654 accounting for 54.3 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 63.4 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 240.villages (19.9 per cent) inhabited villages having 19.3 per cent population of the district. In the medium densities ranges of 21-50 and 51-100 persons account for 1.0 percent each of inhabited villages. Both these ranges claim 0.5 per cent rural population.

Table 5 : SexRatio ofState and District1901-2001

	UTTAR PRADESH			BAHRAICH		
Census Year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	931	932	926
1911	916	922	866	924	924	912
1921	908	918	834	921	924	874
1931	903	916	813	917	922	843
1941	907	922	824	910	913	869
1951	908	922	827	900	903	856
1961	907	921	817	892	895	848
1971	876	884	826	844	843	857
1981	882	889	850	861	859	882
1991	876	879	864	845	842	872
2001	898	904	876	867	865	885

NOTE- SexRatio has been defined here as the numberof females per 1,000 males

As per 2001 census, sex-ratio of 867 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the pdistrict was significantly low as compared to the state average figures from 1951

to 2001. The lowest sex ratio of 844 was recorded in the district in 1971 against the state average of 876 females. It is also observed that the proportion of females in rural areas up to the year 1961 is higher than that of urban areas in both district and state. It is also higher in rural areas in state up to 2001 census. It is notable that in rural areas of the state, the sex ratio is always higher than that of urban areas up to the last census, but in case of district, it become reverse after 1971 census.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Nanpara	868	867	895
2	Mahasi	854	854	-
3	Bahraich	870	859	881
4	Kaiserganj	871	871	895
	District Total	**867**	**865**	**885**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 867 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is lower than that of urban areas. The sex-ratio among rural and urban population is 865 and 885 females respectively. The rural sex-ratio in tahsils varies between 854 in Mahasi tahsil and 871 females in Kaiserganj tahsil. The sex-ratio in Nanpara and Kaiserganj tahsils are higher than district rural average (865). In urban areas of tahsil the highest sex-ratio is recorded in Nanpara and Kaiserganj (895) and the lowest is in Bahraich tahsil's urban (881).

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3

11	Kaisarganj	865
12	Jarwal	876
13	Forest Villages	760
	District (Rural) Total	**865**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas comes 865 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 889 females is found in Mihinpurwa C.D. block and is followed by Risia (877) while the lowest of 841. is recorded in Shiv pur. The sex-ratios of

Mihinpurwa, Nawabganj, Risia, Phakharpur Huzoorpur and Jarwal C.D. blocks are higher than the district rural average of 865 females and in remaining blocks, this value is below the district average and in Kaiserganj CD block it is equal with district.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	19	1.6	5,877	0.3
700-749	23	1.9	16,236	0.8
750-799	103	8.6	142,544	6.7
800-849	307	25.5	576,651	26.9
850-899	440	36.5	935,701	43.7
900-949	214	17.8	352,589	16.5
950-999	65	5.4	93,038	4.3
1000-1099	25	2.1	19,354	0.9
1100+	8	0.7	1,084	0.1
District Total	**1,204**	**100.0**	**2,143,074**	**100.0**
Sex ratio (Rural) for District		**865**		

Table 8 presents the distr... of villages by sex-ratio ranges based on 2001 census. The maximum number of villages i.e. 440 accounting for 36.5 per cent of the total villages having highest population of 43.7 per cent in the district, fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849, which claims 307 villages (25.5 per cent) with 26.9 per cent population. The highest range of 1,100 and above claims 8 villages (0.7 per cent). This range shares only 0.1 per cent rural population of the district while in the sex-ratio range of 900-949, there are 214 villages (17.8 per cent). In remaining sex-ratio ranges of 750-799, 700-749, less than 700, 950-999 and 1000-1099 the number of villages are 103 (8.6 per cent), 23(1.9 per cent), 19 (1.6 per cent), 65 (5.4 per cent) and 25(2.1 per cent) respectively. In these ranges, the percentage of population is comparatively, low.

TABLE 9: SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Bahraich	(NPP)	879
2	Jarwal	(NP)	895
3	Nanpara	(NPP)	895
4	Risia Bazar	(NP)	920
Sex ratio (Urban) for the district			**885**

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 885 females per 1,000 males as a whole. Among the four towns of the district the sex-ratio varies between 879 in Bahraich to 920 in Risia Bazar NP. Risia Bazar NP has the highest sex-ratio 920, while Bahraich has the lowest sex-ratio of 879.females.

TABLE 10: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial Number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Nanpara	Total	201,118	101,421	99,697	983
		Rural	193,082	97,295	95,787	985

2	Mahasi	Total	86,458	44,123	42,335	959
		Rural	86,458	44,123	42,335	959
		Urban	0	0	0	0
3	Bahraich	Total	65,788	33,842	31,946	944
		Rural	36,982	19,003	17,979	946
		Urban	28,806	14,839	13,967	941
4	Kaiserganj	Total	133,754	67,922	65,832	969
		Rural	130,222	66,081	64,141	971
		Urban	3,532	1,841	1,691	919
	District Total	**Total**	**487,118**	**247,308**	**239,810**	**970**
		Rural	**446,744**	**226,502**	**220,242**	**972**
		Urban	**40,374**	**20,806**	**19,568**	**940**

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 487,118 persons comprising 247,308 males and 239,810 females. The total sex ratio in this age-group works out females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 972 and 940 females in this age-group respectively. The rural sex-ratio in tahsils varies between 985 in Nanpara tahsil and 946. in Bahraich tahsil. The sex-ratio of Nanpara tahsil (985) is higher than district rural average (972).Bahraich tahsil has lowest sex-ratio of 946 females, in rural areas. In urban areas, the highest sex-ratio is recorded in Nanpara urban (948) and the lowest is found in Kaiserganj urban (919). In Mahasi tahsil urban population is nil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Mihinpurwa	58,357	29,115	29,242	1,004
2	Nawabganj	30,904	15,626	15,278	978
3	Balaha	36,108	18,310	17,798	972
4	Shivpur	37,010	18,868	18,142	962

12	Jarwal	35,443	17,928	17,515	977
13	Forest Villages	1,355	675	680	1,007
	District (Rural) Total	**446,744**	**226,502**	**220,242**	**972**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 972 for the district (rural). The sex ratio of C.D. blocks varies between 946 to 1,007. It is highest in Forest villages i.e. 1,007 followed by 1004 in Mihinpurwa C.D. block and lowest 946 females is found in Chitaura C.D. block. The sex-ratio of Forest villages, Mihinpurwa, Risia, Nawabganj, and Jarwal and Phakarpur C.D. blocks are higher than the district rural (972) Balaha,and Tajwapur are equals to the district average while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	46	3.8	3,498	0.8
700-749	31	2.6	4,840	1.1
750-799	41	3.4	10,480	2.3
800-849	93	7.7	28,119	6.3
850-899	123	10.2	48,232	10.8
900-949	194	16.1	88,182	19.7
950-999	186	15.4	92,907	20.8
1000-1099	288	23.9	119,959	26.9
1100+	202	16.8	50,527	11.3
District (Rural) Total	**1,204**	**100.0**	**446,744**	**100.0**
Sex ratio (Rural) for District		**972**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 288 (23.9 per cent) having maximum population (26.9 per cent) in the district (rural) fall in the sex-ratio range of 1000-1099 females per 1,000 males. It is followed by the sex-ratio range of 1100+ which claims 202 villages (16.8 per cent) with 11.3 per cent population. Next to it, 194 villages (16.1 per cent) are in the range of 900-949 with 19.7 per cent population. 186 villages (15.4 per cent) having 20.8 per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of less than 700,700-749, 750-799, 800-849, and 850-899 and claim less number of villages and these are distributed as 46 (3.8 per cent), 31 (2.6 per cent), 41 (3.4 per cent), 93(7.7 per cent)and 123 (10.2 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 870 having 78.7 per cent population, fall in the higher sex-ratio ranges of 900-949 and above.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bahraich	NPP	26,615	13,720	12,895	940
2	Jarwal	NP	3,532	1,841	1,691	919
3	Nanpara	NPP	8,036	4,126	3,910	948
4	Risia Bazar	NP	2,191	1,119	1,072	958
District(Urban) Total			**40,374**	**20,806**	**19,568**	**940**

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns at 2001 census. In urban area of the district total population in age group of 0-6 is 40,374 in which 208,06 are males and 19,568 females and sex ratio of the urban areas of the district is 940. Among four towns sex ratio varies from 919 in Jarwal NP to 958 in Risia Bazar N.P. In Risia bazar NP and Nanpara towns sex ratio is more than the district average. Among four towns. Risia Bazar NP has the highest sex-ratio.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

		Rural	***2,143,074***	**330,941**	**8,540**	**15.4**	**0.4**
		Urban	**237,998**	**11,806**	**18**	**5.0**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 2,381,072 total population, 14.4 per cent belongs to the Scheduled Castes and 0.4 per cent to Scheduled Tribes. The percentage of Scheduled Castes

population constitutes 15.4 per cent in rural population and 5.0 per cent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Nanpara tahsil (16.9) percentage while the lowest is found in Kaisarganj tahsil (10.6). The proportion of Schduled Tribes population is 0.4 percent in rural and Nil percentage in urban areas. Scheduled Tribes population in the district is mainly concentrated in tahsil Nanpara(0.9 per cent).

TABLE 15: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Mihinpurwa	275,195	53,125	8,328	19.3	3.0

12	Jarwal	169,303	17,132	0	10.1	0
13	Forest Villages	7,372	745	70	10.1	0.9
	District (Rural) Total	**2,143,074**	**330,941**	**8,540**	**15.4**	**0.4**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 15.4 per cent of rural population of the district belongs to Scheduled Castes and 0.4 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 10.1 per cent in Jarwal and Forest villages to 22.3 per cent in Chitaura C.D. block.. The other C.D. block containing the highest percentage of Scheduled Castes are Nawabganj (21.8), and Mihinpurwa (19.3). The highest proportion of 3.0 percent Scheduled Tribes population is counted in Mihinpurwa C.D. block and is followed by Forest villages (0.9) percent.. The lowest percentage of Scheduled Tribes is recorded in Tajwapur (0.1). The Scheduled Tribes population in the district is mainly concentrated in Mihinpurwa and Forest villages, and in CD blocks, Risia,Chitaura, Mahasi, Phakherpur, Huzoorpur and Jarwal is nil.

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	76	6.3	0	0.0
Less than 5	147	12.2	7,799	2.4
5-10	279	23.2	47,251	14.3
11-20	366	30.4	119,504	36.1
21-30	172	14.3	75,846	22.9
31-40	84	7.0	40,088	12.1
41-50	42	3.5	22,488	6.8
51-75	30	2.5	14,062	4.2
76 and above	8	0.7	3,903	1.2
District Total	**1,204**	**100.0**	**330,941**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. Total 76 villages accounting for 6.3 per cent of total 1204 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5 per cent in 147 villages (12.2 per cent). In 279 villages, it varies between 5-10 percent while the next range of 11-20 per cent accounts for 366 villages constituting 30.4 per cent of the total villages. The range 21-30 and 31-40.per cent contains 172 and 84 villages respectively. Both these ranges together account for 21.3 percent villages of the district. 80 villages fall in the range of 41-50 and above percent. 8 villages are such where the proportion of Scheduled Castes is more than 76 per cent and these villages contain 1.2 percent Scheduled Castes population of the district. The maximum of the 36.1 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE 17: PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,169	97.1	0	0.0
Less than 5	23	1.9	441	5.2
5-10	5	0.4	859	10.1
11-20	1	0.1	512	6.0
21-30	0	0.0	0	0.0
31-40	1	0.1	49	0.6
41-50	1	0.1	1,112	13.0
51-75	2	0.2	2,477	29.0
76 and above	2	0.2	3,090	36.2
District Total	**1,204**	**100.0**	**8,540**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. 0.4 per cent of rural population of the district belongs to Scheduled Tribes population. There are 1169 (97.1per cent) villages where none of Scheduled Tribes has been recorded in the district. 23 (1.9 percent) villages have proportion of Scheduled Tribes population up to less than 5 per cent and remaining 12 (1.1per cent) villages have above 5 percent Scheduled Tribes population. 2 villages are such where proportion of Scheduled Tribes population is above 76 per cent accounting for 36.2 per cent of the total Scheduled Tribes population of the district. In 2 villages the proportion of Scheduled Tribes population ranges between 51-75 per cent accounts for 29.0 per cent of the total population of the district.

TABLE 18: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bahraich (NPP)	168,323	8,244	12	4.9	0.0
2	Jarwal (NP)	15,780	493	0	3.1	0.0
3	Nanpara (NPP)	42,773	1,782	6	4.2	0.0
4	Risia Bazar (NP)	11,122	1,287	0	11.6	0.0
District(Urban) Total		**237,998**	**11,806**	**18**	**5.0**	**0.0**

Table 18 shows nuumber and percentage of Scheduled Caste and Scheduled Tribes population recorded during 2001 census in the district above. The table depicts that Scheduled Caste population in Risia Bazar NP is highest at 11.6 percent, but very low, in Nanpara NPP (4.2percent), Bahraich NPP (4.9percent) and lowest is 3.1 per cent in Jarwal NP. Scheduled Tribe population is negligible in the urban areas of the district. There is none Scheduled Tribe population in Risia Bazar NP and Jarwal NP town.

TABLE 19: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Mihinpurwa	891	1,038
2	Nawabganj	859	300
3	Balaha	833	0
4	Shivpur	822	1,000
5	Risia	863	0
6	Chitaura	847	0
7	Mahasi	853	0
8	Tajwapur	835	761
9	Phakharpur	854	0
10	Huzoorpur	858	0
11	Kaisarganj	846	0
12	Jarwal	869	0
13	Forest Villages	753	667
	District (Rural) Total	**855**	**1,028**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 855 for district (rural). Among the C.D.blocks, the highest sex ratio of 891 females is found in Mihinpurwa C.D. block and lowest of 753 females is recorded in Forest villages. This table also shows the sex ratio of Scheduled Tribes population in rural areas of the district. Sex-radtio of 1.028 is above parity reflecting excess of females over males at district level. The sex- ratio in Mihinpurwa CD block is above the parity line while in remaining Nawabganj, Tajwapur and Forest villages are below the line of equality. The lower value of sex ratio of 300 females is recorded in Nawabganj CD blocks.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bahraich (NPP)	863	1,000
2	Jarwal (NP)	853	0
3	Nanpara (NPP)	892	2,000
4	Risia Bazar (NP)	895	0
Sex ratio (Urban) for the district		**871**	**1,250**

Table 20 shows sex-ratio among Scheduled Castes and Scheduled Tribes in urban agglomerations/towns 2001. Among four towns sex ratio of Scheduled Castes is highest in Risia Bazar NP town and it is lowest in.. Jarwal NP town. In case of Scheduled Tribes the sex-ratio in Nanpara NPP is 2000 and in Bahraich NPP is 1000 females, Being nil population in Risia Bazar and Jarwal NP the sex-ratio in zero.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population comes to 35.2 per cent in the district. This proportion in rural area is 31.7 per cent against 65.2 per cent in urban areas. In the district the literacy rates of males (45.6 per cent) is much higher than that of females (22.8 per cent). Among the tahsils, Bahraich tahsil tops with 52.4 per cent literates followed by Kaiserganj tahsil(33.8 per cent). Nanpara tahsil with 30.7 per cent literates stands at the bottam in the district. Out of 4 tahsils, the literacy rates of one tehsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 22.8 per centage points in the district, as a whole. The trend at tahsil level is not much different. However this gap in urban literacy is low which comes to 11.0 percentage points against the rural areas, where the gap between male and female literacy is 24.3 percentage points.

TABLE 22: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Rural) Total		536,914.00	394,344.00	142,570.00	1,606,160.00	754,736.00	851,424.00	31.7	42.7	18.4	24.3

Table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 31.7 per cent of the total rural population excluding the age-group of 0-6 ycars is literates in the district. The corresponding proportion of male and female literates comes to 42.7 and 18.4.per cent respectively which shows very wide gap of 24.3 per centage points in male and female literacy. At C.D. block level, Kaiserganj has the

highest rural literacy rate of 37.3 per cent while as 49.3 per cent male and 23.1 per cent female are literates.. The lowest literacy rate in rural areas is noted in Balaha. C.D. block (26.3 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 26.2 percentage points is found in Kaiserganj C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.2	228	0.0
1-10	33	2.7	31,304	1.5
11-20	164	13.6	299,291	14.0
21-30	380	31.6	734,574	34.3
31-40	352	29.2	655,755	30.6
41-50	183	15.2	308,366	14.4
51-60	61	5.1	80,999	3.8
61-70	23	1.9	30,606	1.4
71-80	3	0.2	239	0.0
81-90	2	0.2	1,705	0.1
91-99	0	0.0	0	0.0
100	1	0.1	7	0.0
District Total	**1,204**	**100.0**	**2,143,074**	**100.0**
Literacy rate for District		**35.2**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in two villages (0.2 per cent) of the district and population of these village is only 228 persons. One villages (0.1 per cent) has all the literate population. 61 villages accounting for 5.1 per cent of the total villages are in the literacy range of 51-60 per cent and 23 villages (1.9 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 1112 villages (92.3 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 6 villages (0.5 per cent). The range of 21-30 have the maximum number of 380,villages forming 31.6 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bahraich (NPP)	98,198	56,107	42,091	70,125	33,474	36,651	69.3	74.6	63.9	10.8
2	Jarwal (NP)	5,259	3,381	1,878	10,521	4,948	5,573	42.9	52.1	32.6	19.5
3	Nanpara (NPP)	20,308	11,594	8,714	22,465	10,973	11,492	58.5	62.9	53.5	9.4
4	Risia Bazar (NP)	5,147	3,110	2,037	5,975	2,684	3,291	57.6	66.5	47.9	18.7
District (Urban) Total		**128,912**	**74,192**	**54,720**	**109,086**	**52,079**	**57,007**	**65.2**	**70.3**	**59.4**	**11.0**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 census in the urban areas of the district. Regarding absolute figures of literates Bahraich NPP town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (65.2). The literacy rate is quite high (above 66 per cent in two towns) among males. Female literacy rate is not for behind in two towns (above 53 per cent). However, literacy rate among female is very low (32.6 per cent) in Jarwal NP town, thus the gap in male female literacy rate is very high (19.5 percentage points.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

12	Jarwal	3,980	3,077	903	13,152	6,089	7,063	29.0	41.1	14.5	26.6
13	Forest Villages	205	144	61	540	281	259	34.4	41.1	24.8	16.3
District (Rural) Total		**69,885**	**53,675**	**16,210**	**261,056**	**124,731**	**136,325**	**26.6**	**37.4**	**13.7**	**23.7**

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in CD blocks.. In rural areas of the district proportion of literates is 26.6 per cent in which 37.4 percent is males and 13.7 female. Thus, the gap in male and female literacy rates is 23.7-percentage point. Among 12 CD blocks, Chitaura CD block has the highest literacy rate and Shivpur CD block has the lowest literacy rate. The gap in male/female literacy rates in Risia CD block is highest (27.5) and this gap is lowest in Pakarpur CD block (18.5).

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

District Total	**1,128**	**100.0**	**330,941**	**100.0**
Literacy rate for District (Rural)		**26.6**		

Table 26 presents the distribution of villages by literacy rate range for Scheduled Castes population at the 2001 census. In maximum number of inhabited villages (326). which has 36.4 per cent of total rural Scheduled Castes population, the literacy range is in 21-30 percent range. In the district there are two villages where literacy rate is hundred percent. In majority of villages the range of literacy rates is below 51-60 percent.

TABLE 27: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bahraich (NPP)	3,650	2,319	1,331	4,594	2,105	2,489	53.3	62.8	42.1	20.6
2	Jarwal (NP)	186	134	52	307	132	175	47.0	64.1	27.8	36.3
3	Nanpara (NPP)	598	392	206	1184	550	634	42.4	52.1	31.2	20.9
4	Risia Bazar (NP)	461	300	161	826	379	447	46.3	57.6	33.9	23.7
	District (Urban)	**4,895**	**3,145**	**1,750**	**6,911**	**3,166**	**3,745**	**50.7**	**60.8**	**39.1**	**21.7**

Table 27 brings out thc number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The percentage of literates is slightly higher than illiterates in the district (urban). The percentage of literates is least in Nanpara NPP among 4 towns but the gap in male/female literacy rate is highest in case of Jarwal NP town. The male in all the 4 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is lcast in case of Bahraich NPP and also the female literacy rate is highest.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial Number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number r of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Mihinpurwa	1,459	982	477	6,869	3,105	3,764	23.0	31.4	14.8	16.5
2	Nawabganj	8	7	1	5	3	2	72.7	77.8	50.0	27.8
3	Shivpur	2	1	1	8	4	4	22.2	20.0	25.0	-5.0

5	Kaisarganj	0	0	0	1	1	0	0.0	0.0	0.0	0.0
6	Forest Villages	24	19	5	46	23	23	40.0	50.0	22.7	27.3
	District (Rural) Total	**1,519**	**1,029**	**490**	**7,021**	**3,183**	**3,838**	**23.3**	**31.8**	**14.9**	**16.9**

Table 28 brings out the number and percentage of Scheduled Ttribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is higher than literates in the district and CD Blocks, with exception to Nawabganj CD block. The literacy rate of the Scheduled Tribes population at 23.3 per cent is much lower than the corresponding rate of 50.7per cent in Case of Scheduled Castes community. The gap in male and female literacy rate at 16.9 per cent is also lesser than what it is in case of the Scheduled

Castes community (21.7 per cent). The literacy rate is highest in Nawabganj CD Block and lowest in Kaiserganj CD Block. The gap in male/female literacy rate in Shivpur CD block is in favour of the females, which is an exception. The highest gap of male female literacy rate of 27.8 percentage point is found in Nawabganj CD block.

TABLE 29: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

100	7	20.0	21	0.2
District Total	**35**	**100.0**	**8,540**	**100.0**
Literacy rate for District (Rural)		**23.3**		

Table 29 gives the distribution of villages by literacy rate range for the Scheduled Tribes population at the 2001 census. In the district the Scheduled Tribes population is found in 35 villages out of which in 7 villages the literacy is 100 per cent. However, the maximum (36.8 per cent) of the Scheduled Tribes population (3145) is found in only 5 villages with literacy range from 21- 31 percentages.

TABLE 30 : NUNPPER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial nuNPPer	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bahraich (NPP)	7	4	3	5	2	3	77.8	100.0	60.0	40.0
3	Nanpara (NPP)	4	1	3	2	1	1	80.0	100.0	75.0	25.0
	District (Urban)	**11**	**5**	**6**	7	**3**	**4**	**78.6**	**100.0**	**66.7**	**33.3**

Table 30 gives NPP and percentage of Scheduled Tribes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. There is small number of Scheduled Tribes population in the towns of the district. In Risia Bazar NP and Jarwal NP

there is none Scheduled Tribe population.In between Nanpara NPP and Bahraich NPP towns which have Scheduled Tribe population, the percentage of literates is 100 per cent male and 66.7 per cent female. The gap in male/female literacy in Nanpara NPP and Bahraich NPP town is 33.3 percentage points.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 census. The proportion of the total workers works out to 35.5 per cent of the total population in the district. The total workers are comprised of 26.6 per cent of main workers and 8.9 per cent of marginal workers and the remaining 64.5 per cent are non-workers.

Among the main workers, males participation rate in the district is 44.7 per cent and 5.7 per cent of females. Male and female marginal workers account for 7.5 and 10.4 per cent respectively. The percentage of female marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 30.5 per cent in Bahraich tahsil to 37.0 per cent in Mahasi tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 2143,074 total rural

population of the district, 27.1 per cent has been categorised as main workers and the marginal workers constitute 9.5 per cent and the remaining 63.4 per cent fall in the category of non-workers. The sex-wise break up at district level shows that 45.4 per cent males and 6.0 per cent females are in the category of main workers. Male and female marginal workers account for 7.8 and 11.4 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 36.6 per cent. Forest villages have highest proportion of total workers forming 46.4 per cent of the total population. It is closely followed by Mihinpurwa (39.8 per cent), Phakarpur (39.5 per cent), Nawabganj (38 per cent), Tajwapur and Kaisarganj (36.9 per cent) and Balaha 35.8 per cent. The lowest percentage of 33.1 per cent is recorded in Huzoorpur C.D. block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Note: Percentage of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 52.7 per cent of the total workers (main + marginal) and remaining 37.2 per cent of total workers are engaged as agricultural labourers (30.5 per cent), household industry workers (2.2 per cent) and other workers (14.5 per cent) in this district.

The distribution of workers by four categories of economic activity shows very high dependency on agriculture sector, absorbing large number of workers. The proportion of cultivators varies between 27.8 per cent in Bahraich tahsil and 61.4 per cent in Mahasi tahsil.

These variations within the district may be due to cropping and land holding pattern. The percentage of female cultivators is 42.0 per cent which is also low as compared to 55.6 per cent of male cultivators in the district. The percentage of other workers and household industry workers is very low in the district. The agricultural labourers occupy the second position next to cultivators in the district as well as in each tahsil. The highest proportion of 47.1 per cent of other workers is recorded in Bahraich tahsil while the lowest proportion of 6.7 per cent is found in Mahasi tahsil.

TABLE 35: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Note: Percent of Worker to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) is 36.6 per cent of total population. Among these workers, cultivators constitute 56.4 per cent, 32.4 per cent agricultural labourers, 2.0 per cent household industry workers and 9.1 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.0 per cent workers of the total working force. There,fore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (43.2 per cent) is not higher than males (60.2 per cent) in the rural areas of the district. The females play an in a pertant role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 67.5 per cent in Huzoorpur C.D. block to 17.0 per cent in forest villages. Similarly for other workers, the lowest proportion is 4.9 per cent in Shivpur C.D. block while 56.1 per cent is the highest in forest villages. The percentage of other workers and household industry workers together is quite low i.e. only 11.1 per cent in the district. The percentage of agricultural labourers is highest in Mihinpurwa black (37.1) block and is followed by Phakarpur (34.6). In other C.D. blocks, this proportion is below. Similarly, household industry workers varies in C.D. blocks between 1.5 per cent in Mihinpurwa ,Mahasi and Tajwapur and 2.6 per cent in Chitaura CD block.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At district level, urban areas recorded highest percentage of other workers (84.4), followed by agricultural labourers with 5.9 per cent (4.9 per cent male and 15.5 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (14.6) is recorded in Risia Bazar. In the agriculture labourers category Jarwal NP recorded very high percentage (37.5). Household industry workers are very low 3.0 i e per cent in Jarwal NP, 4.0per cent in Nanpara NPP and 4.9 per cent in Risia Bazar NP. As the usual trend recorded in the urban areas, other workers are in high percentage (90.1per cent in Nanpara NPP, 88.3 per cent in Bahraich NPP and 73.7 per cent in Risia Bazar NP).

(ix) Brief analysis of the Village Directory and Town Directory data : (37 to 47)

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37: DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1204 inhabited villages in the district 956 villages or 79.4 per cent have been provided with the educational facilities of one type or the other. Similarly 352 villages in the district constituting 29.2 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1182 or 98.2 per cent villages. As regards, post office facility which includes facilities like telegraph office and post telegraph, 216 villages constituting 17.9 per cent of villages have been provided with

this facility within the village. 284 or 23.6 per cent villages have been provided with the telephone facility, 144 or 12.0 per cent with transport facility, 63 or 5.2 per cent villages with bank facility and 78 or 6.5 per cent with agricultural credit societies. Similarly there are 544 or 45.2 per cent villages which have been linked with the pucca road. Total 587 or 48.8 per cent of villages have been provided with the electricity supply. Almost similar trend of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variations. Shivpur C.D. block has the highest 88.9 per cent villages where educational facility is available and lowest 65.0 per cent is found in Jarwal ,CD block. Medical facility is highest in Tajwapur (44.8 per cent) and lowest (18.0 per cent) in Jarwal C.D. block. Improved drinking water is available to cent-percent villages in Forest villages, Mihinpurwa, Balaha and Phakarpur blocks while in other blocks, it is above 94.5 per cent. Telephone facility is highest in Kaiserganj (44.0 per cent) while 15 villages of (15.08 per cent) Mahasi C.D. block enjoy this facility. Transport and communications is less developed in Kaiserganj where only 5.5 per cent villages are covered by this facility whereas 23.2 per cent villages of Nawab ganj C.D. block are availing this facility. In the field of power supply 587 villages (48.8 per cent) have been covered in the district.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different type of amenities. Out of total rural population of 2,143,074 persons in the district, 1,909,319 or 89.1 per cent have educational facility of one or the other type. Similarly 845,585 or 39.5 per cent population has medical facilities while 2,121,653 or 99.0 per cent have got improved drinking water facility. Post office facilities are available to 693,879 or 32.4 per cent population. Telephone facility is available to 644,737 or 30.1 percent. Transport communications facility is available to 370,580 or 17.3 per cent. Bank facility is available to 225,246 or 10.5 per cent. 220,661 or 10.3 per cent have been provided with the facility of agricultural credit societies. 1,135,283 or 53.0 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,196,642 or 55.8 per cent rural population in the district. Similar trend of availability of facilities is visible to the rural population at C.D. block level except forest villages which arenot easily approachable. However, in Mihinpurwa C.D. block facilities of educational, medical and improved drinking water are available to larger proportion of population .

TABLE -39 ; AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 261 villages do not have primary school in it self and out of these villages, children of 228 villages have to travel less than 5 kms. for schooling. Out of 1204 inhabited villages as many as 1009 are deprived of middle schools and 1197 of degree colleges. Of these 537avail the facility of middle school at a distance of less than 5 kms., 416 at a distance 5-10 kms. and the remaining 56 at a distance of 10+ kms. In respect of degree college 117avail this facility at a distance of less than 5 kms., 248.between 5 to 10 kms. and rest 832 villages at a distance of 10+ kms.

Similarly there are 1176 villages in the district which have been devoid of Hospital facility and 1176 also of PHC facilities. Of these 309villages have the facility of Hospital available within 5 kms. while in respect of 361 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 506 villages have this facility at a distance of 10+ kms. As regards PHC 254 avail this facility at a distance of less than 5 kms., 532 at a distance of 5-10 kms. and the remaining 390 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 988 villages do not have this facility in the village itself. Of these majority i.e. 708. have this facility at a distance of less than 5 kms., another 233 villages avail it at a distance of 5-10 kms. In the remaining 47 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 920 villages in the district which are without telephone facilitiy. Of these 494 avail this facility at a distance of less than 5 kms., 230 at a distance of 5-10 kms. and remaining 196 have to traverse a distance of 10+ kms.

For Bus service out of 1104 villages which do not have facility, 410 villages avail this facility at a distance of less than 5 kms., 476 at a distance between 5-10 kms. and 218 at a distance of 10+ kms.

In the entire district 1150 villages are deprived of Commercial Bank and 1185 of Co-operative Bank. Of these 1150. villages which are deprived of Commercial Banks 572 villages avail this facility at a distance of less than 5 kms., 378 between 5-10 kms. and the remaining 200 at a distance of 10+ kms. Regarding Co-operative Banks out of 1185 villages 256 villages avail this facility at a distance of less than 5 kms., 568 at a distance of 5-10 kms. and remaining 361 at a distance of 10+ kms. 1126 villages do not have agricultural credit societies. This facility to 702 villages is available at a distance of less than 5 kms., 310 at a distance of 5-10 kms. and the remaining 114 at a distance of 10+ kms.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1204 inhabited villages in the district, there are 253 villages which have nearest towns upto a distance of 5 kms. Of these only 200 villages forming 79.1 per cent of total villages, are having the educational facilities of one type or the other and 62 villages constituting 24.5 per cent have the medical facilities within the village, 38 villages forming 15.0 per cent have the facility of post office within the village and 83 or 32.8. per cent have the facility of telephone. 23 villages constituting 9.1 per cent have been linked by transport service. 9 villages comprising 3.6 per cent have been provided bank facilities, while 13 villages constituting only 5.1 per cent have been provided by agricultural credit societies. 125 villages comprising 49.4 per cent have been provided with pucca road.

There are 678 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 546 villages constituting 80.5 per cent have been provided with the educational facilities. 213 villages comprising 31.4 per cent have been provided with medical facilities. 118 villages constituting 17.4 per cent enjoy the post office facility. 154.villages comprising 22.7 per cent have been provided the telephone facility. 83villages constituting 12.2 per cent have been linked with transport communications. 39 villages comprising 5.8 per cent have bank facility. 47 villages constituting 6.9 per cent are having agricultural credit societies, while 306 villages or 45.1 per cent are approachable by pucca

road. 240 villages fall in the distance range of 16-50 kms. Of these, 77.9 per cent villages have educational facility, 27.5 per cent with medical, 20.0 per cent with post office, 16.3 per cent with telephone and transport & communications available to 14.2 per cent villages. Banks and agricultural credit societies facilities are available to 5.4. and 5.0 per cent of villages.

There are 17villages in the district which are situated beyond 50 kms.from the nearest town and out of these 10 or 58.8per cent enjoy the educational facility in the village itself whereas 3 villages comprising 17.6. per cent have been provided with medical facility of one type or the other total 6 villages comprising 35.3 per cent have the post office facility. 2 villages comprising 11.8 per cent have been provided with telephone facility, bus service agricultural credit societies, while 12villages comprising 70.6 per cent have been linked by pucca roads. There are 16 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 13 or 81.3 per cent villages have the educational facility of one or other type. Eight village constituting 50.0 per cent have the medical,6 villages (37.5 per cent) have post office and telephone, 2 villages (12.5 per cent) have transport and banks and 4 villages (25 per cent) have agricultural credit society facilities. Nine villages 8 (56.3 per cent) have also been connected by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district out of a total 1204 inhabited villages, overwhelming 176. have a population of less than 500 persons. Of these, 66. villages (37.5 per cent) have educational facility, 22 (12.5 per cent) have medical facility, 168 (95.5 per cent) have improved drinking water facility. None village has post office facility. 22 (12.5. per cent) have telephone facility. 17 (9.7 per cent) have been linked by bus service. One (0.6 per cent) have Bank facility. None village has been provided with the agricultural credit societies. 57 villages (32.4 per cent) have been linked with pucca road and 54. villages (30.7 per cent) have been provided with electricity.

Out of 237 villages, which fall in the population range of 500-999 persons, 172villages (72.6 per cent) have been provided with the educationl facility, 37 (15.6 per cent) with medical facility, 232villages (97.9 per cent) have improved drinking water facility. 20 villages (8.4 per cent) have been provided with post office facilities, 44 villages (18.6 per cent) with telephone facility, 9 villages (3.8 per cent) with transport facilities, 3villages (1.3 per cent) with bank facility, 15 villages (6.3 per cent) with agricultural credit societies and 81 villages (34.2 per cent) have approach by pucca road. 102 and villages (43.0 per cent) in this range have electricity.

413 villages fall in population range of 1,000-1,999 persons. Out of these villages 365 (88.4 per cent) have educational 209 (50.6 per cent) power supply and 406 (98.3 per cent) have improved drinking water facilities. Whercas 127 villages (30.8 per cent) enjoy the medical facility, 52 villages (12.6 per cent) have post office facility, 99 villages (24.0 per cent) have telephone facility, 52 villages (12.6 per cent) have transport and communications facilities, 13 villages (3.1 per cent) have bank facilities, 17 villages (4.1per cent) have agricultural credit societies and 187 villages (45.3 per cent) have approach by pucca road.

There are 337 villages in the district which are covered under 2,000-4,999 population range. In this range, 316 villages (93.8 per cent) enjoy the facility of education, 335 (99.4 per cent) improved drinking water, 100 (29.7 per cent) telephone, 51 (15.1 per cent) transport and communications, 189 (56.1 per cent) approach by pucca road and 192 (57.0 per cent) with power supply. 145 villages (43.0 per cent) have medical facility. 112 villages (33.2 per cent) have post office facility, 33villages (9.8 per cent) have bank facility, 37 village (11.0 per cent) is having agricultural credit societies. There are 41 villages in the district having a population of more than 5,000 persons and in those villages maximum facility of amenities are available.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Mihinpurwa	105	39,933.5	68.9	60.1
2	Nawabganj	87	27,006.3	65.4	63.4
3	Balaha	70	26,425.6	58.3	51.0
4	Shivpur	72	23,931.8	96.5	63.7
5	Risia	88	2,603.7	46.2	85.4
6	Chitaura	132	30,749.1	84.0	62.4
7	Mahasi	95	23,978.3	78.0	40.2
8	Tajwapur	87	27,419.2	NA	37.5
9	Phakharpur	122	27,332.2	59.4	45.5
10	Huzoorpur	110	18,337.1	NA	14.7
11	Kaisarganj	109	18,815.1	77.1	60.9
12	Jarwal	120	12,883.2	36.8	82.5
13	Forest Villages	7	NA	NA	NA
	District Total	**1,204**	**279,415.2**	**NA.**	**44.7**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,204 inhabited villages in the district having a total area of 279,415.2 hectares. Total Cultivable area is not avilable while 44.7 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that in Mihinpurwa block, all the 105 villages have a total land area of 39,933.5.hectares, of this 68.9 per cent of land is cultivable and of the aforesaid area 60.1 per cent is irrigated. In Nawabganj block, all the 87.villages have a total area of 27,006.3 hectares, of this cultivable area is 65.4 per cent and 63.4.per cent is irrigated. In Balaha block, all the 70 villages have a total area of 26,425.6 hectares. Of this, cultivable area is 58.3 per cent. Of cultivable area 51.0 per cent is irrigated. Shivpur block with 72 villages have a total land area of 23,931.8 hectares, of this 96.5. per cent is cultivable area and out of this cultivable area 63.7per cent is irrigated. Risia block with 88.villages have a total land area of 2,603.7 hectares. Of this 46.2 per cent is cultivated area, out of which 85.4.per cent is irrigated. Chitaura block with a total 132 villages have an area of 30,749.1 hectares. Of this 84 per cent is cultivable area. Out of which 62.4 per cent is irrigated. Mahasi block with 95 villages have an area of 23,978.3 hectares. Of this 78 per cent is cultivable area and out of which 40.2 per cent is irrigated. Tajwapur block with 87 villages have an area of 27,419.2 hectares and of cultivated are only

37.5 per cent is irrigated. Phakharpur block have 122 villages with an area of 27,332.2 hectares in which 59.4 per cent land is cultivable and of this 45.5 per cent is irrigated. Huzoorpur block with 110 villages have an area of 18,337.1 hectares and of cultivated area only 14.7 per cent is irrigated. Kaisarganj block with 109 villages have an area of 18,815.1 hectares and of this land, 77.1 per cent is cultivable and of this 60.9 per cent is irrigated. Jarwal block have 120 villages with an area of 12,883.2 hectares. Out of this 36.8 per cent is cultivable land and of this 82.5 per cent is irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other (s)

District		**187**	**14**	**173**	**174**	**101**	**4**	**25**	**0**	**44**

Table 43 gives the per capita receipt and expenditure (in rupees) for each town in the district. The average per capita receipt for towns of the district works out to Rs 187 of which Rs 14 are derived through local taxes and the remaining Rs 173 received from all other sources. The average of total expenditure incurred per head is Rs 174. Out of this Rs 101 are spent on general administration, Rs 4 on public health and conveniences, Rs 25 on public works and Rs 44. is spent other items. Among all the four towns the receipt and expenditure recorded per head are the highest in Jarwal NP and Bahraich NPP respectively.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bahraich, NPP	1.7	1.1	0.4	0.4	0.1
2	Jarwal, NP	1.3	1.3	0.6	0.0	0.0
3	Nanpara, NPP	2.3	1.4	0.9	0.7	0.2
4	Risia Bazar, NP	12.6	0.9	0.9	1.8	0.0
District		**2.3**	**1.1**	**0.5**	**0.5**	**0.1**

Table 44 shows in urban areas of the district, the average number of primary schools per 10,000 population which comes to 2.3 primary schools, 1.1 junior secondary/middle, 0.5 secondary/matriculation, 0.5 senior secondary schools and the ratio of colleges is only 0.1

college per. Among the towns, the ratio of primary, secondary/ and senior secondary is highest in Risia Bazar and Nanpara NPP has highest ratio of Junior secondary/ middle schools, college education is available only in Bahraich NPP and Nanpara NPP.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001		
Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bahraich, NPP	27
2	Jarwal, NP	3
3	Nanpara, NPP	6
4	Risia Bazar, NP	27
District		**22**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of the district. On an average there are 22 beds per 10,000 population in urban areas as a whole. Whereas it is the highest 27 in both Bahraich NPP and Risia Bazar NP while lowest number of 3,.beds is recorded in Jarwal NP and is closely preceded by 6 beds in Nanpara NPP.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001				
Sl.No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5

TABLE 47 ; MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001			
Sl.No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bahraich, NPP	Mustard Oil, Tobacco, Iron Goods	Mat, Iron Goods, Pulses
2	Jarwal, NP	Tobacco, Biscuit, Furniture	Furniture, Vegetable, Khoke
3	Nanpara, NPP	Furniture, Biscuit, Edible Oil	Leather, Food grains, Wooden Goods
4	Risia Bazar, NP	Tobacco, Edible Oil, Maida	Tobacoo, Edible Oil, Rice

Table 47 indicates most important articles manufactured and exported from the each town in the district. The district is well known for manufacture of furniture and other woodden goods. These are also main exports of the district. The chief export items of the district are furniture, vegitable, leather, food, grains and wood.den goods. These are the main items which are manufactured in Jarwal and Nanpara NPP town.

(x) Brief analysis of the data on houses and household amenities collected during, House listing Operations, Census of India 2001: (48 to 52)

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared. In 1991 census, the house list was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48: HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 386,477 consisting of 353,737 rural and 32,740 urban households. 69,977 households belong to Scheduled Castes and 4387 to Scheduled Tribes. 376,316 households

are living in their owned houses constituting 97.4 per cent of total households. Of these households, the maximum number of households (140,786) have occupied single roomed accommodation and is followed by double roomed accommodation numbering to 128,779 households. Next position is claimed by households (55,150) occupying three roomed accommodation. Number of households in owned accommodation occupying three plus rooms rank at fourth place with 40,047 households while 11,554 households are without any exclusive room.

6,260 households living in rented accommodation account for 1.6 per cent of total number of households in the district. The maximum number of 2,605 households are living in single roomed accommodation followed by 2,272 households in double roomed accommodation. Households with three rooms (773) and three plus (432) are small in numbers. Other households numbering to 3,901 forming only 1.0 per cent of total households, are distributed in single roomed accommodation numbering 2,039 where as 1,176 in double roomed and 353 in three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Nanpara	28.0	30.2	41.8	26.3	30.4	43.3	75.8	22.7	1.5
2	Mahasi	22.9	22.0	55.0	22.9	22.0	55.0	0.0	0.0	0.0
3	Bahraich	57.2	27.9	14.9	35.8	38.4	25.9	81.6	16.0	2.4
4	Kaiserganj	31.8	18.4	49.8	31.2	18.4	50.4	61.1	16.5	22.4
	District Total	**32.1**	**25.2**	**42.7**	**27.8**	**25.9**	**46.3**	**79.3**	**17.2**	**3.6**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, baNPPoo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, baNPPoo hatch, mud, unburnt bricks, wood etc .are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 32. percent of the households in the district had permanent houses. The trend is different in rural (27.8.per cent) and urban area (79.3.per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Bahraich (57.2 per cent) followed

by Kaiserganj (31.8.per cent), Nanpara (28.0.per cent) and lowest in Mahasi (22.9.per cent). In respect of semi-permanent houses, the returns were 25.2.per cent of district level whereas among tahsils, in Nanpara it was 30.2.per cent and lowest was 18.4 per cent in tahsil Kaiserganj Rural areas represented a similar ratio at district and tahsil level except in Bahraich tahsil but semi permanent houses in the urban areas were in the proportion range of 0.0.to 22.7. per cent. Temporary houses in the district lie between 3.6 percent in urban to 46.3 percent in rural areas.

Electricity was available for 14.0 per cent of households at district level, in urban areas had better access of electricity. Bathrooms and toilet facilities were available in 14.4 and 19.3 per cent of households. Tahsil Mahasi was .poorly served in respect of these amenities. Similarly drainage facility was also poor in Nanpara and Mahasi tahsils, At

district level drainage facility was available for 41.5,per cent of households, whereas the proportion of rural and urban areas households accounted to 37.3 and 86.5,per cent

Percentage in brackets Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 63.6 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is 64.8 and in urban area it comes to 50.6 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in to 2.9 per cent of the households. The composition of rural and urban comes to 0.8 and to 25.1 per cent respectively. Kerosene is used for cooking in as many as 2.1per cent of the households (0.6 per cent rural and 18.2 per cent urban households). The other methods like crop residence, cowdung cake, coal, lignite, charcoal,

electricity and biogas etc. ranges between to 0.0 per cent to 27.0 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, crop residue and cowdung cake are the predominant fuel for cooking the food.

TABLE 52: NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total number of house-holds	Total number of households availing banking services	Availability of household assets		Availability of household assets				
					Radio/Transistor	Television	Telephone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

Above table reveals that out of the total households (386,477) of the district, in all 109,547 could avail banking services at district level while only 133,312 avail radio / transistor, 35,703 television, 12,317 telephone, 243,968 bycycle, 16,261 scooter/ motorcycle, 4,383 car /jeep and 112,072 house holds do not avail the facility of such type of the specified assets..

It also reveals that at tahsil level highest number i.e 40,970 households were availing banking services as well as all other households' assets in Bahraich tahsil. The highest of none of specified assets 48,276 were in the tahsil Nanpara, against it, the lowest of 13,200 households were recorded in Bahraich tahsil . Highest number of 56,569 households were availing radio /trainsistor and lowest 19,143 in Bahraich tahsil. In case of television and telephone the highest number of households were in Baharich also. A total of 97,697 households had bycycles and maximum number of 5,903 households were availing schooter / motorcycle , moped etc in tahsils Nanpara and Baharich respectively.

(XI) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the Decade:

During the decade a new district Shravasti has been carved out from this district and a new tahsil Mahasi was carved out from tahsil Nanpara and Kaisarganj within the district Bahraich.

(XII) Brief discription of Places of Religious or Historical or Archaeological inportance in villages and places of and Tourist Interest in the towns of the district.

Dargah Sharif : The main place of interest in Bahraich is the Dargah (Mausoleum) of Saiyed Salar Masud who was the nephew of Mahmud of Ghazni. It was here that he breathed his last in 424 Hijri (1033 A.D.) after defeat at the hands of raja Suhel deo and his forces. It is said that dargah was built by Zohra Bibi, the blind dauther of Saiyed Jamal-ud-din of Rudauli in Bara Banki district, after she regained her eyesight on pilgrimage to the dargah. She also built a toNPP for herself here, and then died at the age of 18, she was buried here. Her mother and other relatives made a pilgrimage to her grave yearly, performing a ceremony like that of a marriage saying that they were marrying the virgin Zohra Bibi to the unmarried martyr Masud. The pilgrimage gradually increased its importance and the to NPP became a sacred place.

Charda (Tahsil Nanpara) There are ruins of an old fort to west of village charda, which reseNPPle, same in size, those of Sahet – Mahet. Probably of Buddhist origin, the ruins appear to be remains of one of the chain of forts that guarded the plains against the inroads of the hill tribes. According to local tradition this was the fourteenth of the chain of forts and this fact accounts for the name of the place. Like all the other remains of the district, it is assigned to Raja Suhel Deo, the opponent of Saiyyed Salar, but it is evidently of earlier origin, and its construction may be assigned to the Buddhist.

A daily market is held here where a considerable business is carried on. A fair is also held on each Saturday, the attendance being about 300 persons.

Dogaon (Tahsil Nanpara) It is an ancient and historical place. The existence of a few local tradition and discovery of numerous copper coins indicate the name of Dogaon or Doganeo as unit. These coins consist of dams and fraction of dams of the reigns of Akbar and Shahjahan. The coins were found all over the state in large numbers and especially in Nanpara and Bahraich – a fact which led to the discovery of the site of Dogaon. There are numerous traces of brick work and several masonry wells, which undoubtedly belong to the period at which Dogaon flourished. On the ruins still stands a hamlet still known as Dogaon.

In the Dastur-ul-Amal, of the time of Aurangzeb, it is described as a village that once possessed a mint.

Jarwal (Tahsil Kaiserganj) Jarwal is an old town. Its original name was Jarauli, which was held by Bhars. In the days of Ghias-ud-din Tughlaq, one saiyed Jamaluddin received from the emperor a grant of 15,000 bighas here and his son, Zikria over threw the Bhar raja Chhatrasal and founded the family of saiyeds who took up residue here.

The place, though primarily an agricultural centre, is famous for trade and industry. Jarwal sugar factory is operating here since 1945, Markets are held on all Mondays and Fridays, the chief trade being in skin and hides.

The following are also places of religious, historical, archeological and tourist interests:

1. Jangali Nathan Mahadeo
2. Pragya Jagran Sansthan
3. Kali Kunda
4. Siddhnath
5. Gayatri Shakti Pith
6. Gullavir
7. Mata Bhagwati Kunj
8. Shri Rampur Ashram
9. Chittaura Jheel
10. Anarkali Jheel
11. Talab (near Payagpur Railway Station)
12. Girija Puri Bairaz

(XIII) Major Characteristics and Contribution of the District:

The people of the district played an important role in the struggle of freedom. This district is famous in literature and there are several places of religious, historical and there are many important places of tourist interest.

(xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation And Coverage of Data

Village Directory:

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1. Population and households	Cols.4 & 5
2. Amenities.	Cols.6 to 13
3. Other infrastructural facilities etc.	Cols.14 to 16
4. Availability of news paper/ magazine	Cols.17
5. Commodities manufactured	Column 18
6. Total area of village and land use pattern	Column 3 & 19-23

Town Directory:

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII). The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented

separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities namely Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/Magazine etc.. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundary and separate land records. Thus in Census the basic unit of rural areas is taken as a revenue village which has definite surveyed boundaries. A revenue village may comprise of several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what have been mentioned above since there is no surveyed village in the State. Therefore an inhabited area

with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also be included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included:

1. Appendix I Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II Villages with 5,000 and above population, which do not have one or more amenities.
3. Appendix III Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility is available.
5. Appendix V Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII List of villages according to the proportion of the Scheduled Caste and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII Number of villages under each Gram Panchayat (C.D. Block wise)
9. Appendix IX Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detail and explanatory notes on each of these abbreviations has also been incorporated for easy clarification of the subject concerned.

SECTION – I
VILLAGE DIRECTORY

SECTION – I
VILLAGE DIRECTORY

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital, Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary, Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO

(iv) Telephone Connection PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i) Commercial Bank CM

(ii) Co-operative Bank CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i) Agricultural Credit Society ACS

(ii) Non-Agricultural Credit Society NCS

(iii) Other Credit Society OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i) Cinema / Video Hall CV

(ii) Sports Club SP

(iii) Stadium / Auditorium ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i) Bus BS

(ii) Railway Station RS

(iii) Navigable Waterway NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road PR

(ii) Mud road MR

(iii) Foot path FP

(iv) Navigable River NR

(v) Navigable CanalNavigable

(vi) waterways other than River,Canal NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	The appendix shows the list of villages according to proportion of the
Appendix-VII B	Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES FULLY MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4
Not applicable as there are no villages merged in towns & any outgrowths at 2001 census.

Information not available for this district

SECTION II
TOWN DIRECTORY

Town Directory

Note explaining the abbreviations used in Town Directory :

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night

soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/

Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were

made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES - I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Bahraich
q1	Persons	99	98
	Males	98	72
	Females	104	102
q2	Persons	117	105
	Males	117	84
	Females	118	110
q5	Persons	134	117
	Males	135	101
	Females	132	121

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State, thus child mortality indicators in the district for both male and females shows lower order as compared to the State.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male Female	Uttar Pradesh	Bahraich
1	2	3	4	5
1	CBR		37.2	35.80
2	TFR		5.6	5.6
3	TMFR		6.3	6.0
4	GFR		172	168
5	GMFR		200	185
6	Mean age at marriage (1981-91)		17.3	16.8
7	Number of children ever born per ever married woman aged 15-49 years		4.6	4.5
8	Child woman ratio 0-4		631	611
	5-9		752	745

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR). Which is the ratio of the number of live births in a year to the mid year population, is 35.8 per thousand district. It is below to the state of Uttar Pradesh i.e. of 37.21 percent. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3years forthe state whereas 16.8 years has been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever married women in the age group 15-49. The state and district figures are placed as 4.6and 4.5 per thousand respectively;. Number of children in the age group 0-4 and 5-9 years in the age group 15-49 has been calculated to 611 and 745 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such are below to the state average.

100.0	100.0	100.0	78.6	80.1	78.0	15.0	18.0	14.1	6.4	1.9	7.9

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 83.3 in 1991, while in 2001 it was 80.3 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 8.1 percent and 13.8 percent respectively. This shows in-migration from other states to this district was quite high in 2001 in comparison to 1991. At district level in-migration from other countries was 8.6 percent in 1991 and 5.9 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 84.9 percent and 78.6 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 7.6 percent and 15.0 percent respectively. The movement of population from other countries in the district was 7.5 percent in 1991 and 6.4 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 69.7 percent in 1991 and 64.7 percent in 2001, while Muslim were 29.9 percent in 1991 and 34.8 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 51.2 percent male and 41.8 percent female to 56.0 percent male and 47.4 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.7 percent male and 4.9 percent female while it was 3.4 percent male and 4.9 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state level during 1991 and 2001. But it was 0.2 in both the Censuses except female during 1991 Census (0.1 percent). None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 71.2 percent male and 91.5 percent female in 1991 which declined to 63.3 percent male and 82.2 percent female in 2001. Primary level education was 8.7 percent male and 2.7 percent female in 1991, which was 12.5 percent male and 6.0 percent female in 2001. Middle level education was 5.4 percent male and 1.3 percent female in 1991 and 7.2 percent male and 2.9 percent female in 2001. Matriculation and above level of education was achieved by 6.1 percent male and 1.5 percent female in 1991 which was 8.9 percent male and 3.8 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001, while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note:-For the state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of " Total of Other Mother Tongues."

The above annexure presents distribution of different mother tongue with percentage for the state and the district. There is identical trend for the highest percentage of the people reporting Hindi as their mother tongue, both for the state (82.1 percent) and the district (85.7percent). Percentage of people reporting Urdu as mother tongue is higher for the district (11.21 percent) than the state (9.0 percent). Punjabi as a mother tongue has lower percentage in the district (0.1 percent) than the state (0.5 percent). Other mother tongues such as Bengali, Bhojpuri, Sindhi, Nepali, Malayalam, Marathi, Awadhi, Arabi, Banjari, Sanskrit, Marwari, English, Oriya and other Mother Tongues are very small in number in the district..
