REMAINS OF LORD BUDDHA

Shrawasti, intimately associated with the life of Lord Buddha, is located near Rapti village in north-western part of Uttar Pradesh. The city is said to have been founded by king Shrawasta . Shrawasti was the capital of the Kosala kingdom. It is said that Lord Buddha spent nearly twenty years in Shravasti. Chinese pilgrim Huein Tsang has described in his travelogue about Buddha's association with this place. In his historical writings, he referred to Shrawasti as a great Buddhist religious site. The ruins of Shrawasti were discovered in 1863 by General Cunningham near the village Sahet-Mahet. Ruins of age old stupas, majestic monasteries and several temples, near the two villages highlight the Buddha's association with Shrawasti. Jatvana monastry the chief residential place of Buddha , has meditation hall, monks ' chambers, bathing places and hospital. The parts in which the monastry was situated was known as Jatvana grove. A temple containing statue of Buddha is also situated near Jatvana. Rajakama and Purvarama were the other Buddhist monastaries. Anadhodhi tree planted by Buddha's disciple Anand, was also situated here. Mahet has also been identified as a place associated with Buddha. Ruins of the Pucci kuti and kuchchi kuti are the Buddhist sites located in Mahet.

Sharawastri, is sacred to Buddhists because, here the Lord Buddha performed the greatest of his miracles to confound the *Tirthika* heretics. These miracles include that of Buddha creating multiple images of himself and have been among the sermon themes of Buddhist Art. Buddha himself spent many summers here and delivered important sermons. It was here that *Anathapindaka* built in the garden of prince *Jeta* which was a large monastery for reception of Buddha. Later on several shrines and other monasteries were built at this sacred spot.

Annexure VI	Marital status of population as per 1991 Census	423
Annexure VII	Age, Sex and Education in the district, 1991 Census	427
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	430

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991

censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

Pradeep Kumar
Deputy Director of Census Operations,
Uttar Pradesh, Lucknow

District Highlights - 2001 Census

1. District Shrawasti ranks 65th in teams of population in the state.
2. The percentage share of urban population in the district is 2.8 as against 20.8 of the population in urban areas of the state.
3. Shrawasti district has population density of 479 persons. which is less than the state average of 690 persons per sq.km.
4. Shrawasti district ranks 49th in terms of sex ratio (862) which is lower than the state average (898) females per thousand males.
5. Shrawasti district ranks 70th in literacy 33.8 which is below than the state average of 56.3 percent
6. There are only 25 uninhabited villages out of total 704 villages in the district.
7. Decadal growth rate of the district 27.4 is higher to the state average of 25.8 percent
8. Bhinga tahsil has the highest number of inhabited villages (286) while Payagpur tahsil has the lowest number (166)
9. The district has only two towns and no new town has been added or declassified after 1991 Census.
10. There are 189,968 households in the district accounting for 0.7 percent of the total households in the state. The average size of households in the district is 6.2 persons.

IMPORTANT STATISTICS

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM also.

(ii) Brief History of the District:

The district Shrawasti is one of the new districts of Uttar Pradesh carved out from the district Bahraich. It came into existence in May 1997. It consists of parts of Tahsil Bahraich covering Payagpur and Visheshwarganj C.D. block Tahsil Nanpara covering Jamunaha Vikas Khand and Tahsil Bhinga as a whole. Bhinga is district headquarters of Shrawasti. It also consists of Ikauna and Gilaula Vikas Khand of Bhinga and Bahraich Tahsils. The C.D.blocks Hariharpur Rani and Sirsiya. are in BhingaTahsil. The area of this district is 2,458 sq.km.

The founder of the city was king Shrawast the Suryavanshi king of Ayodhya, sixth descendant from Kakustha, and son of Yuvanasva. He is most likely to be identified with sage Shrawast. who according to some Buddhist sources gave his name to the city, Shrawasti. It was the custom of the Suryavanshi race Kshatriya kings of Ayodhya that they used to retire to the forest in their old age to perform penance, after handing over the charge of the kingdom to their successors. It seems that King Shrawast of Ayodhya became a sage in his old age. It is said in the Vayu Purana and the Ramayana that Srawasti the capital of the kingdom ruled by Lava, the son of Rama. It is referred to as Shravasti by Kalidas. The phonetic similarity between Shrawasti and Sharvasti points to the fact of their being one and the same place.

The ancient city pertains to Buddhist period as the legend connects many remains of buildings, mounds and wells to that period. The ancient city of Shrawasti venerated by Buddhists and Jainas alike, is at present a collection of ruins called Sahet Mahet. The twin name of Sahet Mahet, by which the entire area of ruins is known, is applied to two district groups of remains,i.e.Sahet and Mahet. Sahet, near to main road is the site of the famous Buddist monastery anciently known as Jetavana-

Vihara, which lay outside the limits of the ancient city. Mahet, situated about half a kilometre away, denotes tothe Shrawasti is much bigger site situated south of river Rapti.

(iii) Administrative Set-up:

For administrative purpose, the district is divided into three tahsils namely Ikauna, Payagpur and Bhinga. The district is further divided into 7 community development blocks, 461-gram sabhas and 704 revenue villages, 2 forest villages and two towns.

Administrative Units

Jurisdictional Changes (1991-2000)

The newly created district Shravasti has been carved out from the Bahraich district ,in the year 1997.The entire Bhinga tahsil and one town and partly Nanpara and Bahraich tahsils of the district Bahraich have been included in the newly created district The relating notifications regarding jurisdictional changes of tahasils and villages are given below in tabular form.

S.No.	Name of Tahsil	Notification No.	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
1	Ikauna Tahsil	2350(1)/1-5-97-154-97/R-5 dated 13.08.1997, 1434/1-5/97-107/97R-5dated 25.05.1997	(i) 184 villages transferred from Bahraich tahsil of Bahraich district. (ii) 47 villages transferred from Bhinga tahsil	-
2.	Bhinga Tahsil	1434/1-5/97-107/97-R-5 dated 25.05.1997	(i) 191 villages and 1 town remained in this tahsil (ii) 114 villages transferred from Nampara tahsil of Bahraich district (entire Jamunaha C.D. Block)	47 villages transferred to Ikauna tahsil
3.	Payagpur Tahsil	2350(i)/1-5/97-154/97-R-5 dated 13.08.1997	166 villages transferred from Bahraich tahsil of Bahraich district	

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos's circles respectively. For each revenue village, Lekhpal is in-charge. Chief

Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. which have a departmental office at district level. From the development point of view the district is divided into community development blocks. Block Development Officers (BDO) looks after development works at community developments block level and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in small districts are incharge. Deputy Superintendent of Police (DSP) looks after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for Local self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

(1) Location and Size:

The district Shrawasti is newly created district of Devi Patan division. The north east area of the district Bahraich has been separated from it to create a new district for development of this area. This district lies between $27^0$04' and 28^0 24' north east latitude and $81^0$6' and $82^0$1' east longitude and is situated in the Bhavar area of Tarai in middle Himalaya. It is surrounded by Nepal in north, District Bahraich and Gonda lies in the south, district Bahraich in west and Balrampur district in the east. Total area of the district is 2,458.0 sq.km.

(2) Physiography:

In point of view of physiography,the district is divided into two parts, Tarai area in the north and Basin of Rapti river, which is also called 'Uparhar'. The Tarai area of north is covered by the forests, in which costly and useful woods are plenty .'Tharu' Scheduled Tribes resides in this area. The Rapti river has divided southern part of the district into two parts. This area is useful for agriculture point of view. On the basis of geology, soils, topography, climate and natural vegetation, the district is subdivided into the following regions :

1. Shrawasti Tarai : It is tarai belt situated parallel to the international boundary along Nepalspead in east to west extent. The region is well known for its drainage and forest coverage. There are numerous rivulets which originate either from the region itself or from the Himalayan range of Nepal. These streams are short lived and have dwindling course. There are traces of the old course of such streams. Khurpiur is the abondoned course of 'Rapti river. The original banks still appear through natural levee. These levees are very prominent in case of the Sarju and the Rapti rivers. During rains the rivulets in the region swell enormously and make it difficult to cross. Actually the water during rainy season drains in the form of sheets that form gully which causes the change in the course of the streams.

2. Rapti Flood Plain : It is situated on both sides of the Rapti river. It has mostly tarai characteristics, as evident from the name of region itself. The Rapti is the only stream flowing in the region. The main

physical features are the dead arms of the river; oxbow lakes, natural depressions etc. The abandoned course of the Rapti river is situated in the southern part. It is approximately 12 Km. in length and has zigzag shape.

3.Drainage:

The Rapti is the main river of the district other water system comprises of Tehri river, Kuwana river.The other water bodies are Jheels and ponds which are in sufficient numbers.

4. Climate :

The climate of the district is hot and damp. In the district, normally the maximum and minimum temperature varies between 44.8^0C to 4.9^0C. The average and real rainfall in the year 1997 were 1125 mm. and 1051 mm respectively.

5. Natural and Economic Resources

Forestry:

Due to annual heavy rainfall the district is covered by vast vegetation. The common trees found in the district are Shisham, Khair, Sal, Haldu, Semal, Cane and Bamboo. The medicinal plants are also found in the area. Dense forest occurs adjacent to border of Nepal. The Jamun (Eugeina jambolana) grows along the banks of streams and on moist ground, while on the inferior soil Dhak (Butea frondosa) and Kusum (Schkichera trijuga) are found. Owing to the abundance of forest ;the fauna of the district are numerous and varied. The list includes Tigers (Panthara tigris), leopard (Panthecia pardua), wolves (Canis lupus), hyaenas (Hyaena hyaena), Jackals (canis aureaus), foxes (Vulpes bengalensis), wild pig (Sus scrofa Cristatus), Sambhar (Cervus unicolor), gond (Cervus duvauceli), pawha (Axis porcinus), Kakar (Muntiacus muntjak), Nilgai (Bosela-phus trago Camelus) and antilopes (Tetracenus quadricotms), Of late the number of tigers has fallen off considerably owing to great extension of cultivation in the district. The leopards too, which were numerousearlier have become scarce for the same reason. The area covered by the forest is 25,044 hectares. The main forest produce are gum, honey , flowers,fruits,bamboos,medicines,firewood, thatching.grass etc.

Minerals and Mining :

Mineral is not available in the district .

Soil:

Generally the soil is fertile in the district. Domat, Matiyar and Baluhi are the soil in the district. Besides these soils, the Kachar soil is found on the bank of rivers. Usar is not found here.

Land and Land use Pattern :

Land use pattern as recorded in statistical magazine 1999-2000 indicates that total reported area as 235,897 hectares of the district in the year 1996-97 in which 174,381 hectare were net sown area, which was 73%. There are much more Banjar (barren) land in the Kachar area of rivers in Jamunaha and Hariharpur Rani C.D. Blocks. Forests covered 25,044 hectare. According to 1991 agriculture census the total nuber of land holdings were 185,149 consisting an area of 169,385 hectares. The small holdings are 75% in the district.

Agriculture and Crop pattern :

The harvests of the district are Kharif, Rabi and Zaid. The Kharif is more important harvest owing chiefly to the large area under Paddy and Juwar. The Rabi crop mainly comprised of Wheat Barely and Gram. The small area under Zaid or hot weather harvest produces miscellaneous crops is of little importance. The total sown area for Rabi, Kharif and Zaid crops in the year 96-97 were

210,917, 147,896 and 3,387 hectares respectively. The economy of the district is predominantly agricultural. Paddy occupies the predominant place followed by Wheat and Maize.

Irrigation :

The means of irrigation are canals, reservoirs, wells and tube-wells. The total area under canal network is 1,639 hectare (3.0%) under tube-well it is 61,349 hectare (94.0%).The area irrigated by wells, ponds, and other sources are 238; 1,116 and 911 hectares respectively. In the year 1996-97, and area of 65,253 hectares was the net irrigated area. In same year the number. of govt. tube-wells were 186, private tube-wells were 82 and 29,538 pump sets on boring. The largest area was irrigated by the private tube wells and by the pump sets on boring. Saryu Canal Plan is under construction in the district, on completion of this plan, there will be no problem of irrigation in the district.

Animal Husbandry :

As per statistical magazine 1999-2000, livestock census of 1993 shows that the district had 240,894 (45.0%) cows, 111,319 (20.72%) buffalos, 9,634 (1.9%) sheeps, 101,448 (20.15%) goats, 1,702(0.32%) horses and poneys. 28,972 (5.37%) pigs, and 35,287 (6.30%) other livestock) thus the total 529,256 livestock were in the district. According to above publication there were 20 veternity hospitals, 6 animal husbandry development centres, 5 artificial insemination centre and 10 sub centre was running for prevention and treatment of various animal diseases and development of livestock. Besides these there were working one sheep centre and seven pig development centres.

Fishery :

The fishery department is giving facilities to the breeders and is engaged in exploitation of reservoirs for pisiculture. There are seven fishery co-operative societies in the district by which distribution of fingerlings to breeders and sale and purchase of fishes are being undertaken. According to statistical magazine there are no data available on fish production. The marketing of fishes is done directly by some contractors, so the data of total fish production and sale could not be registered.

Industry :

The district has not made much headway in the field of industialisation.Small scale industial units such as rice, oil from oil Seed (mustard and groundnut) , wheat flour and other wheat products such as dalia, maida, besan and pulses of arhar, moong, urd and masoor are established in Payagpur and Bhinga. Plywood panels, chests, furniture, catechu are produced in Payagpur and Bhinga. Footwear units and brick kilns are also situated in Bhinga. It can be said in nutshell that, the district is industrially backward.

Trade and Commerce :

The forest produces, food grains and agriculture products are marketed in the local markets and mandies of the district. Forest produces are also marketed outside the district.

Transport :

The means of transport is mainly roads. The railwayline enters the district in the south of Ikauna and from there to Bahraich through the station of Payagpur. U.P. State Roadways transport corporation run its buses in the district .State buses run to and from Kanpur, Gonda, Balrampur, Faizabad, Sitapur etc. All the tahsils of the district are connected by roads. The communication infrastructure still needs to be improved.

The metre gauge Railway line in the district is only 25 km.,which is utilised by the people of Payagpur and Visheshwarganj development blocks. Till the year 96-97, the total length of metalled

road were 465 km in which 424 km. was under the public works department. There are no direct routes to go to developments blocks from district headquarters.

Electricity and Power :

The district has no electricity producing unit. The electricity is supplied from the other adjacent district. Electricity plays an important role in the economic development. According to central definition 504 inhabited villages out of total 679inhabited villages have been electrified, which is 73.7%. 356 villages have been electrified by the L.T. Mains. Hundred percent villages of Payagpur and Visheshwarganj Blocks have been electrified, while 41, 44 and 57 villages of the blocks Sirsiya, Hariharpur Rani and Jamnuha development blocks respectively only have been electrified. Thesevillages are situated to the boundary of Nepal.

The total consumption of electricity during 96-97 was 73,742 thousand kwh. In which 41,137 thousand kwh was consumed in domestic and low electric power, 5,920 thousand kwh in commercial sector, 17,011 thousand kwh in industrial sector, 3,434 thousand kwh in Public light sector, 5,640 thousand kwh in agriculture sector and 600 thousand kwh in public water supply and sewerage system. 1,456 private tubewells and pump sets have been electrified and 326 Harijan localities have been electrified.In the field of non conventional energy, 2000 Biogas plants have been established in the year 1997-98 in the district, along with it in the farthest rural area of Katkuiyan and Dhaniyapur have been establish solar energy plants and peoples are invited to establish solar energy.

Gram Panchayat, its composition, jurisdiction and role in village development

A Gram Panchayat acts as the executive of the Gram Sabha and plays a vital role in village development.

Composition : The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 461 Gram Sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its term : The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the sarpanch.

Qualifications : In order to be elected to a village panchayat, a candidate should posses the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions : A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.

2. It gets a primary school opened in the village and supervise its work.

3. It look the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.

4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.

5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.

6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area of the uplift of agriculture.

7. It manages and maintains the common property of the village.

8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed

and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of

these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the

Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	37	Gual
2	Badhik	38	Habura
3	Badi	39	Hari
4	Baheliya	40	Hela
5	Baiga	41	Kalabaz
6	Baiswar	42	Kanjar
7	Bajaniya	43	Kapariya
8	Bajgi	44	Karwal
9	Balahar	45	Khairaha
10	Balai	46	Kharwar (excluding Banbasi)
11	Balmiki	47	Khatik
12	Bangali	48	Khorot
13	Banmanus	49	Kol
14	Bansphor	50	Kori
15	Barwar	51	Korwa
16	Basor	52	Lalbegi
17	Bawariya	53	Majhwar
18	Beldar	54	Mazhabi
19	Beriya	55	Musahar
20	Bhantu	56	Nat
21	Bhuiya	57	Pankha
22	Bhuyiar	58	Parahiya
23	Boria	59	Pasi, Tarmali
24	Chamar, Dhusia, Jhusia, Jatawa	60	Patari
25	Chero	61	Rawat
26	Dabgar	62	Saharya
27	Dhangar	63	Sanaurhiya
28	Dhanuk	64	Sansiya
29	Dharkar	65	Shilpkar
30	Dhobi	66	Turaiha
31	Dom	**Scheduled Tribes**	
32	Domar	1	Bhotia
33	Dusadh	2	Buksa
34	Gharami	3	Jaunsari
35	Ghasiya	4	Raji
36	Gond	5	Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in

the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{} \times 1000$$

Mid-year female population in
the age-group (15-49) years

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = 5 \times \sum_{15-19}^{45-49} ASFR \quad 1000$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = 5 \times \sum_{15-19}^{45-49} ASMFR \quad 1000$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent pheno-menon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 1,176,391 in which 1,143,035 live in rural and rest 33,356 in urban parts. There are three .tahsils in the district namely Bhinga, Ikauna and Payagpur. The most populous tahsil is Bhinga followed by Ikauna tahsil. The urban population in the district is 2.8 per cent. The urban population is maximum at 3.9 percent in Bhinga tahsil. There are 679 inhabited and 25 are un-inhabitedvillages. The total rural population of Shrawasti district is spread over in7 CD blocks and two forest villages. The most populated CD Block is Jamunaha with a population of 179,414, but the maximum number of inhabited villages (123) are in Gilaula CD Block. Although the population density in the district is 479 persons per sq.km..

Size-class and status of towns:

In the total urban population of the district20,415 live in Bhinga N.P and the next big town is Ikauna N.P. with a population of 12,941 The above two are class III and IV towns having the civic status of Nagar Panchayat (N.P).

Population growth:

At the present territorial jurisdication the population of the district was 923,377 at 1991 Census and growing by 27.4 percent during the decade 1991-2001and it becomes 1,176,391 at 2001 Census. The decadal growth in the district has been observed higher than that of state.

Population Density:

The district has an area of 2,458 sq km. The population density in the district is 479while in the rural areas of the district the density is 466.

Sex-Ratio:

The sex-ratio in the district at 862 is lower than 898 at state level. Indeed the sex-ratio at the district has been higher in the district as against to the state since 1911-1961. As against to urban areas of the district the sex-ratio is lower in rural areas. Among tahsils, highest sex-ratio is in Payagpur and lowest in Bhinga. Among CD Block the sex-ratio is highest in Jamunaha and Payagpur at 876and lowest in Hariharpur Rani at 826. In the urban parts of the district the sex-ratio is 904 in the both towns . The sex-ratio of population on the age-group 0-6 is 941 in the district As against a sex-ratio of 940 in the age-group 0-6 of rural population of the district, it is highest at 1000 in Jamunaha Block and lowest at 904 in Hariharpur Rani C.D. Block. It may be noted that out of 679 inhabited villages in the district in over 63.1 percent of villages with 67.5 percent of rural population the sex-ratio in the age-group 0-6 is 900-949 and above.As against the 0-6 age-group sex-ratio of 940 in the rural area of the district is 971 in urban. Among towns this sex-ratio is highest at 983 in Bhinga N.P.and lowest at 951 in Ikauna N.P.

Work Participation Rate:

In the total population of the district , 41.4 percent are workers and rest of 58.6 percent are non-worker. Among workers 28.8 percent are main workers and rest of 12.5 percent are marginal workers of total population. The extent of main workers is highest at 30.0 percent in Bhinga tahsil and lowest at 26.7 percent in Payagpur tahsil. In case of marginal workers the proportion is highest in Bhinga tahsil as 14.2 percent in comparison to only 12.8 percent in Ikauna and 9.6 percent in Payagpur tahsil. The extent of workers in rural aparts and non-workers in urban parts is higher. In the district among workers 60.9 percent are cultivators and 8.7 percent other workers. Over 46.0 percent of female workers are engaged as cultivators.

Literacy:

In the district 33.8 percent population is literate. The literacy is 57.7 percent in urban areas and 33.1 percent in rural areas. The males literacy is as highest 46.7 percent as against 18.6 percent females literacy, and therefore the gap in male/female literacy rate is 28.1 percent. In rural areas among 7 CD Blocks, the highest literacy is at 43.5 percent in Payagpur and lowest at 25.5 percent in Hariharpur Rani. The literacy among males in rural areas is 46.1 percent in comparison to 17.7 percent among females. The lowest female literacy of 12.0 percent is in Jamunaha CD Block. The gap in male/female literacy rate is highest in Visheshwarganj CD Block which is 34.7 percent. In 28.4 percent of villages covering also 31.1 percent of rural population the literacy range is 21 to 30. Among urbanites in the district, as much as 66.7 percent males are literates as against 47.5 percent females. The highest urban literacy is in Ikauna NP. 61.2 percent and lowest in Bhinga NP at 55.4 percent. The maximum males literacy is also found in Ikauna NP at 71.2. percent and lowest at 63.9 percent in Bhinga NP.However, the highest females literacy is in Ikauna NP at 50.1 percent and lowest at 45.9 percent in Bhinga NP. Still, the maximum gap in male-female literacy rate at 21.0 percent is found in Ikauna NP.The literacy among Scheduled Castes is 25.6 per cent in the countryside and 44.9 per cent in urban . Only 648. persons of Scheduled Tribes are found literate at district level, among them 17.8 percent in rural and 85.7 percent in urban areas are literates.

(viii) Brief analysis of PCA data:

The district throws up vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population are being highlighted here on the basis of the following inset tables 1 to 36.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Bhinga	NA	NA	NA	518,886	498,471	20,415	NA	NA	NA	NA	3.9
2	Ikauna	NA	NA	NA	337,099	324,158	12,941	NA	NA	NA	NA	3.8
3	Payagpur	NA	NA	NA	320,406	320,406	0	NA	NA	NA	NA	0.0
District Total		**923,377**	**896,835**	**26,542**	**1,176,391**	**1,143,035**	**33,356**	**27.4**	**27.5**	**25.7**	**2.8**	**2.8**

The growth rates of each tahsil in the district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 27.4 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 27.5 and 25.7 per cent respectively. Out of the total population of the district 97.2 per cent lives in rural areas while 2.8 per cent lives in urban areas of the district. The proportion of urban population has remains same 2.8 per cent during the decade from 1991 to 2001 census at district level. The highest growth of urban population is recorded in Bhinga tahsil (3.9 percent) and lowest is registered in Payagpur tahsil (0 percent.) The urban population is concentrated in Bhinga and Ikauna tahsils while Payagpur tahsil is entirely rural.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10
1	Jamunaha	101	179,414	95,638	83,776	6 (5.9)	205	198	9 (8.9)
2	Hariharpur Rani*	79	150,203	82,270	67,933	3 (3.8)	128	88	10 (12.7)
3	Sirsiya*	106	168,854	91,301	77,553	3 (2.8)	71	49	5 (4.7)
4	Gilaula	123	158,714	85,763	72,951	3 (2.4)	285	266	17 (13.8)
5	Ikauna	104	165,444	88,506	76,938	3 (2.9)	193	169	9 (8.7)
6	Payagpur	87	158,213	84,339	73,874	1 (1.1)	99	97	4 (4.6)
7	Visheshwarganj	79	162,193	86,579	75,614	0 (0.0)	0	0	0 (0.0)

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range in the district. Out of the 679 inhabited villages, 19 (2.8 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 54 villages having 8.0 per cent villages of the district while in the size class of 500-999 population claims 135 villages with 19.9 per cent of the total villages in the district. 281villages (41.4 per cent) are in the size class of 1,000-1,999 and 176 villages (25.9 per cent) are in the size class of 2,000-4,999. 14 villages (2.1 percent) are in the size class of 5,000-9,999. None of village in the district fall in the range of 10,000 and above population. The biggest village in the district having population of 9267 persons is located in Jamunaha C.D. block of the district.

TABLE 3: NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWN IN 2001 CENSUS

Nil

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	93	13.7	147,667	12.9
11-20	1	0.1	169	0.0
21-50	4	0.6	640	0.1
51-100	6	0.9	1,879	0.2

201-300	45	6.6	38,320	3.4
301-500	170	25.0	230,303	20.1
501 +	338	49.8	712,366	62.3
Not known	0	0.0	0	0.0
District Total	**679**	**100.0**	**1,143,035**	**100.0**

This table shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 338 accounting for 49.8 per cent of the total inhabited villages of the district fall in the density range of 501 and above persons having 62.3 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 93 villages (13.7 percent)and one village (0.1 per cent) have density with 12.9 percent population per sq. km. while the corresponding proportion in the lower range of 21-50 and 51-100 is 1.5 per cent of the total inhabited villages having 0.3 per cent population of the district. In the medium densities ranges of 101 -200 and 201-300 persons account for 3.2 and 6.6 per cent of inhabited villages respectively. Both these ranges claim 4.4 per cent rural population.

Table 5
SexRatio of State and District1901-2001

Census Year	UTTAR PRADESH			SHRAWASTI		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	931	932	898
1911	916	922	866	924	924	914
1921	908	918	834	921	921	932
1931	903	916	813	917	918	883
1941	907	922	824	910	908	1006
1951	908	922	827	918	920	875
1961	907	921	817	908	908	873
1971	876	884	826	837	837	815
1981	882	889	850	842	842	858
1991	876	879	864	833	831	890
2001	898	904	876	862	860	904

NOTE- Sexratio has been defined here as the numberof females per 1000 males

As per 2001 Census sex ratio of 862 females per 1,000 males has been recorded in the district against the state average of 898. The sex ratio of the district was significantly high as compared to the state average figures from 1911 to 1961. The subsequent decades show declining trend from 1971 to 2001 and value remained below the state average. The lowest sex ratio of 833 females per 1000 males were recorded in the district during 1991 against the state average of 876 females.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Bhinga	854	852	904
2	Ikauna	862	860	904
3	Payagpur	875	875	-
	District Total	**862**	**860**	**904**

The table-6 gives sex-ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 862 females for every thousand males in the district. It becomes clear from the table that sex-ratio in urban areas is higher than that of rural areas. The sex-ratio among rural and urban population is 860 and 904 females respectively. The rural sex-ratio in the tahsils varies between 852 in Bhinga tahsil and 875 females per 1,000 males in Payagpur tahsil. The sex-ratio in Payagpur tahsil 875 is higher than district rural average (862). In urban areas the highest sex-ratio is recorded in Bhinga and Ikauna (904 each) and in Payagpur tahasil the urban population is nil.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Jamunaha	876
2	Hariharpur Rani*	826
3	Sirsiya*	849
4	Gilaula	851
5	Ekauna	869
6	Payagpur	876
7	Visheshwarganj	873
*One forest village each is included in CD. block		
District (Rural) Total		**860**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 860 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 876 females is found in Jamunaha and Payagpur C.D. blocks and it is fallowed by Visheshwarganj (873) while the lowest of 826 is recorded in Hariharpur Rani C.D. block. The sex-ratio in Jamunaha, Payagpur, Visheshwarganj and Ikauna C.D. blocks are higher than the district rural average of 860 females and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	10	1.5	2,168	0.2
700-749	10	1.5	7,961	0.7
750-799	74	10.9	96,755	8.5
800-849	207	30.5	360,255	31.5
850-899	234	34.5	451,354	39.5
900-949	95	14.0	159,634	14.0
950-999	32	4.7	50,799	4.4
1000-1099	13	1.9	13,825	1.2
1100+	4	0.6	284	0.0
District Total	**679**	**100.0**	**1,143,035**	**100.0**
Sex ratio (Rural) for District		**860**		

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 234 accounting for 34.5 per cent of the total villages having highest population of 39.5 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 800-849 which claims 207 villages (30.5 per cent) and 31.5 per cent population. The highest range of 1,100 and above claims 4 villages (0.6 per cent). This range shares negligible percentage in rural population of the district while in the sex-ratio range of 900-949 there are 95 villages (14.0 per cent). In remaining sex-ratio ranges of 1000-1099, 950-999, 750-799, 700-749 and less than 700, the number of villages are 13 (1.9 per cent), 32 (4.7 per cent), 74 (10.9 per cent), 10 (1.5 per cent) and 10 (1.5 per cent) respectively. In these ranges, the percentage of

population is comparatively low. The above table shows that in majority of villages the sex-ratio is significantly higher.

TABLE 9: SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Bhinga	(NP)	904
2	Ikauna	(NP)	904
Sex ratio (Urban) for the District			**904**

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 904 females per 1,000 males as a whole. Among the two towns of the district the sex-ratio has same as 904.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

		Urban	**6,261**	**3,177**	**3,084**	**971**

Table 10 presents the population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 235,122 persons comprising 121,122 males and 114,000 females. The total sex-ratio in this age-group works out to941 females for every thousand males in the district. The proportion of females in urban areas is higher than that of rural areas. The sex-ratio in rural and urban areas comes to940 and 971 females respectively in this age-group . The rural sex-ratio in tahsil varies between 932 in Payagpur tahsil and 946 in Ikauna tahsil. The sex-ratio of Ikauna tahsil 946 and Bhinga tahsil 943 ,are higher than district rural average (941).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

**** One forest village each is included in CD.block***

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 940 for the district (rural). The sex-ratio of C.D. blocks varies between 904 to 1,000. It is highest in Jamunaha C.D. block i.e. 1,000 followed by 963 in Ikauna C.D. block and lowest 904 females is found in Hariharpur Rani C.D. block. The sex-ratio of Jamunaha, Ikauna and Payagpur C.D. blocks are higher than the district rural (940) while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	30	4.4	4,117	1.8

1100+	87	12.8	20,026	8.8
District (Rural) Total	**679**	**100.0**	**228,861**	**100.0**

Sex ratio (Rural) for District **940**

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 130 (19.1 per cent) having largest population (20.5 per cent) in the district (rural) fall in the sex-ratio range of 1000-1099 females per 1,000 males in the age group of 0-6 years. It is followed by the sex-ratio range of 900-949 which claims 118 villages (17.4 per cent) and 20.0 per cent population. Next to it, 94 villages (13.8 per cent) are in the range of 950-999 with 18.2 per cent population. 87 villages (12.8 per cent) having 8.8 per cent population fall in sex-ratio range of 1100 and above. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 800-849, and 850-899 claim less number of villages and these are distributed as 30 (4.4 per cent), 24 (3.5 per cent), 41 (6.0 per cent), 72 (10.6 per cent) and 83 (12.2 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty percent of villages i.e. 429(63.1 per cent) having population(67.5 per cent) fall in the higher sex-ratio ranges of 900-949 and above ranges.

TABLE 13: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

		Urban	**33,356**	**1,605**	**8**	**4.8**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,176,391 total population of the district, 18.4 percent of the total population belongs to the Scheduled Castes and 0.4 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 18.8 per cent in rural population and 4.8 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Ikauna tahsil (21.8) while the lowest is found in Bhinga tahsil (15.6). The proportion of Scheduled Tribes population is 0.4 and negligible percent in rural and urban areas respectively. In District,only in of Bhinga tahsil (0.9 per cent) Scheduled Tribes population is concentrated.

TABLE 15: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

	District (Rural) Total	**1,143,035**	**214,747**	**4,748**	**18.8**	**0.4**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 18.8 per cent of rural population of the district belongs to Scheduled Castes and 0.4 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 13.2 per cent in Hariharpur Rani and 26.2 per cent in Gilaula C.D. block.. The other C.D. blocks containing the higher percentage of Scheduled Castes are Payagpur (20.8), and Ikakuna (18.8 percent). The proportion of 2.8 per cent Scheduled Tribes population is counted in Sirsiya C.D. block. The Scheduled Tribes population in the district (rural) is concentrated in Sirsiya C.D. block only.

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	24	3.5	0	0.0
Less than 5	42	6.2	2,204	1.0

76 and above	4	0.6	804	0.4
District Total	**679**	**100.0**	**214,747**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 24 villages accounting for 3.5 per cent of total 679 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 42 (6.2 per cent). Villages in 97 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 248 villages constituting 36.5 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 161 and 61 villages respectively. Both these ranges together account for 32.7

per cent villages of the district. 46 villages fall in the range of 41-50 and above per cent. 4 villages are such where the proportion of Scheduled Castes is more than 76 per cent. These villages contain 0.4 per cent Scheduled Castes population of the district. The maximum of the 33.0 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE 17: PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage

District Total	**679**	**100.0**	**4,748**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages . Only 0.4 per cent of rural population of the district belongs to Scheduled Tribes population. There are 672 (99.0 per cent) villages where none of Scheduled Tribes have been recorded in the district. Three (0.4 per cent) villages have proportion of Scheduled Tribes population of 0.3 per cent and remaining 4 (0.5 per cent) villages have 99.7 percent Scheduled Tribes population. Three villages are such where proportion of Scheduled Tribes population is above 76 per cent accounting for 83.2 per cent of the total Scheduled Tribes population of the district. In one village the proportion of Scheduled Tribes population ranges between 51-75 per cent accounting for 16.5 per cent of the total Scheduled Tribes population.

TABLE 18: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bhinga (NP)	20,415	832	8	4.1	0.0
2	Ikauna (NP)	12,941	773	0	6.0	0.0
District(Urban) Total		**33,356**	**1,605**	**8**	**4.8**	**0.0**

Table 18 shows number and percentage of Scheduled Caste and Scheduled Tribes population recorded during 2001 census in the district. The table depicts that Scheduled Csates population in Bhinga N.P. and Ikauna N.P. are 4.1 and 6.0 percent respectively. Scheduled Tribe population is negligible in the urban areas of the district.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Jamunaha	849	0
2	Hariharpur Rani*	809	0
3	Sirsiya*	822	964
4	Gilaula	832	0
5	Ikauna	857	0
6	Payagpur	863	0
7	Visheshwarganj	866	0
	* One forest village each is included in CD block.		
	District (Rural) Total	**844**	**964**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 844 for district (rural). Among the C.D.blocks, the highest sex ratio of 866 females is found in Visheshwarganj C.D. block and lowest of 809 females is recorded in Hariharpur Rani C.D. block. This table also shows that sex ratio of Scheduled Tribes population in rural areas of the district is 964.

TABLE 20: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bhinga (NP)	878	600
2	Ikauna (NP)	899	0
Sex ratio (Urban) for the District		**888**	**600**

Table 20 shows sex ratio among Scheduled Castes and Scheduled Tribes in urban agglomerations/towns in 2001. Among two towns sex ratio of Scheduled Castes is highest in Ikauna N.P. town and it is followed by Bhinga N.P. town. Ikauna N.P. town has zero sex ratio in Scheduled Tribes population. It means Scheduled Tribes female population is zero. In urban area of the district sex ratio of , Scheduled Castes and Scheduled Tribes are 888 and 600 respectively.

TABLE 21: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population (excluding 0-6 years) comes to 33.8 per cent in the district. This proportion in rural area is 33.1 per cent against 57.7 per cent in urban areas. In the district the literacy rates of males (46.7 per cent) is much higher than that of females (18.6 per cent). Among the tahsils, Payagpur tahsil tops with 43.3 per cent literates followed by Ikauna tahsil (35.0 per cent). Bhinga tahsil with 27.1 per cent literates stands at the bottom in the district. Out of three tahsils, the literacy rate of two tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rate in higher than the rural areas.

The gap between male and female literacy is very high which comes to 28.1 percentage points in the district, as a whole. The trend at tahsil level is not much different. However, this gap in urban literacy is low which comes to 19.1 percentage points against the rural areas, where the gap between male and female literacy is 28.4 percentage points.

TABLE 22: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

***One forest village each is included in CD.block*.**

Table 22 reveals number of literates, illiterates and the literacy rate in rural areas at C.D. block level in the district. 33.1 per cent of the total rural population excluding the age-group of 0-6 years are

literates in the district. The corresponding proportion of male and female literates comes to 46.1 and 17.7 per cent respectively which shows very wide gap of 28.4 percentage points in male and female literacy. At C.D. block level, Payagpur C.D. block has the highest rural literacy rate of 43.5 per cent while 58.6 per cent males and 26.0 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Hariharpur Rani C.D. block (25.5 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 34.7 points is found in Visheshwarganj C.D. block.

TABLE 23: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.3	10	0.0
1-10	24	3.5	15,598	1.4
11-20	95	14.0	160,035	14.0
21-30	193	28.4	354,981	31.1
31-40	182	26.8	295,940	25.9

91-99	2	0.3	121	0.0
100	0	0.0	0	0.0
District Total	**679**	**100.0**	**1,143,035**	**100.0**

Literacy rate for District: 33.8

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 2 villages (0.3 per cent) of the district and population of these villages is only 10 persons. None village (0.0 per cent) has all the literate population. 51 villages accounting for 7.5 per cent of the total villages are in the literacy range of 51-60 per cent and 10 villages (1.5 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 614 villages (90.4 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers only 2 villages (0.3 per cent). The range of 21-30 have the maximum number of 193 villages forming 28.4 per cent of the total inhabited villages.

TABLE 24: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban Status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bhinga (NP)	9,138	5,585	3,553	11,277	5,138	6,139	55.4	63.9	45.9	18.0

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Bhinga N.P. town is way ahead of other Ikauna N.P. town. Above table reveals that literacy rate (57.7 per-cent)is pretty high in the urban

areas of the district. The literacy rate is quite high (71.2 percent in Ikauna town) among males. Females literacy rate is not for behind in Ikauna town (50.1 percent). However, literacy rate among females is low (45.9 percent) in Bhinga N.P. town. The gap in male female literacy rate is (19.2 percentage points).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

**** One forest village each is included in CD. block.***

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in C.D. blocks at 2001. In rural areas of the district proportion of literates is 25.6 per cent in which 37.4 percent males and 11.2 per cent are females. Thus, the gap in male and female literacy rates is 26.3 percentage points. Among seven C.D. blocks, Visheshwarganj C.D. block has the highest literacy rate and Sirsiya C.D. block has the lowest literacy rate. The gap in male/female literacy rate in Visheshwarganj C.D. block is highest and this gap is lowest in Sirsiya C.D. block.

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

Table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is higher than literates in the district (urban). The percentage of literates is less in Ikauna N.P. among two towns but the gap in male/female literacy rate is highest in case of Bhinga N.P.town. The males in all the two towns enjoy higher literacy rate than females. The gap in male/female literacy rate (26.3) is less in case of Ikauna N.P. as against Bhinga NP (33.4).

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial Number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in Male/female Literacy rate

Table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in CD blocks at the 2001 census. The number of illiterates is higher than literates in the district and C.D. block.The literacy rate of Scheduled Tribes population at 17.8 percent is lower than the corresponding rate of 25.6 per cent in Scheduled Castes community. The gap in male and female literacy rate at 24.2 percentage points is also lesser than what it is in case of the Scheduled Castes community (26.3 per cent). The literacy rate of 17.8is found in Sirsiya CD block only.

TABLE 29: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

District Total	**7**	**100.0**	**4,748**	**100.0**
Literacy rate for District (Rural)	***17.8***			

Table 29 gives the distribution of villages by literacy rate ranges for Scheduled Tribes population at the 2001 census. In the district the Scheduled Tribes population is found in 7 villages out of which in none village the literacy range is above 70 per cent. However, the maximum (56.7 percent) of Scheduled Tribes population (2691) is found in only one village with literacy range of 1 to 10 percent.

TABLE 30: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban Status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female Literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bhinga (NP)	6	4	2	2	1	1	85.7	100.0	66.7	33.3
	District * (Urban)	**6**	**4**	**2**	**2**	**1**	**1**	**85.7**	**100.0**	**66.7**	**33.3**

Table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in urban agglomerations/town population at the 2001 census. There is a small number of Scheduled Tribes population in the towns of the district. In Ikauna N.P. there is no Scheduled Ttribes population. In Bhinga N.P. which have Scheduled Tribes population, the percentage of literates is 85.7 in which 100.0 per cent of males and 66.7 per cent of female are literates. The gap in male/female literacy in Bhinga town is 33.3 percentage points.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN TAHSILS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out to 41.4 per cent of the total population in the district. The total workers are comprised of 28.8 per cent of main workers and 12.5 per cent of marginal workers and the remaining 58.6 per cent are non-workers. Among the main workers, males participation rate in the district is 46.5 per cent and 8.3 per cent of females. Male and female marginal workers account for 8.1 and 17.7 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 36.3 per cent in Payagpur tahsil to 44.2 per cent in Bhinga tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1,143,035 total rural population of the district, 28.9 per cent has been categorised as main workers and the marginal workers constitute 12.8 per cent and the remaining 58.3 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 46.6 per cent males and 8.5 per cent females are in the category of main workers. Male and female marginal workers account for 8.2 and 18.1 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level. The percentage of total rural workers of the district comes to 41.7 per cent. At the C.D. block level, Sirsiya has highest proportion of total workers forming 47.7 per cent of the total population. It is closely followed by Gilaula (46.4 per cent), Hariharpur Rani (45.4 per cent), Jamunaha (41.7 per cent),Payagpur (38.7 per cent),and Ikauna 38.4 per cent. The lowest percentage of 33.9 per cent is recorded in Visheshwarganj C.D. block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 60.9 per cent of the total workers (main + marginal) and in remaining 39.1 per cent of total workers are engaged as agricultural labourers (27.8 per cent), household industry workers (2.6 per cent) and other workers (8.7 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 59.9 per cent in Bhinga tahsil and 62.9 per cent in Payagpur tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 46.0 per cent which is very low as compared to 67.1 per cent of male cultivators in the district. The percentage of household industry workers (2.6) is very low in the district as stated above. The agricultural labourers occupy the second position and next to it, the workers in other activities occupy third position in the district as well as in each tahsil. The highest proportion of 8.9 per cent of other workers is recorded in Payagpur tahsil while the lowest proportion of 8.4 per cent is found in Ikauna tahsil.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 41.7 per cent of total population. Among these workers, cultivators constitute 62.0 per cent, 28.2 per cent agricultural labourers, 2.5 per cent household industry workers and 7.4 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.5 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of females (46.3 per cent) is lower than males (68.6 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 59.8 per cent in Hariharpur Rani C.D. block to 67.4 per cent in Visheshwarganj C.D. block. Similarly for other workers, the lowest proportion is 5.5 per cent in Jamunaha C.D. block while 9.8 per cent is the highest in Payagpur C.D. block. The percentage of other workers and household industry workers together is quite low i.e. only 9.9 per cent in the

district. The percentage of agricultural labourers is highest in Jamunaha (31.5) and is followed by Gilaula CD block (30.5). In other C.D. blocks, this proportion is quite insignificant. Similarly, household industry workers varies in C.D. blocks between 2.0 per cent in Jamunaha, Ikauna and 2.9 per cent in Hariharpur Rani,and Sirsiya CD.blocks.

TABLE 36: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (75.2), followed by agricultural labourers with 9.4 percent (7.9 percent male and 23.9 percent female). If we observe each town, the table reveals that highest percentage of cultivators (11.1) is recorded in Ikauna N.P. In the agriculture laboures category Bhinga N.P. recorded very low percentage (4.4). Household industry workers are also very low (6.1 percent in Bhinga N.P., and 9.3 percent in Ikauna N.P.). As the usual trend recorded

in the urban areas, other workers are in high percentage (83.5 per cent in Bhinga N.P. and 62.6 per cent in Ikauna N.P.)

(ix) Brief analysis of the Village Directory and Town Directory data based on in set table 37 to 47.

One of the major parts of the District Census Handbook is Village and Town Directory. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 679 inhabited villages in the district 582 villages or 85.7 per cent have been provided with the educational facilities of one type or the other. Similarly 328 villages in the district constituting 48.3 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 667 or 98.2 per cent villages. As regards, post office facility which includes

facilities like telegraph office and post & telegraph, 119 villages constituting 17.5 per cent of villages have been provided with post office facility within the village. only 79 or 11.6 per cent villages have been provided with the telephone facility, 72 or 10.6 per cent with transport facility, 60 or 8.8 per cent villages with bank facility and 56 or 8.2 per cent with agricultural credit societies. Similarly there are 305 or 44.9 per cent villages which have been linked with the pucca road. Total 352 or 51.8 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. blocks have been found with slight variations Visheshwarganj C.D. block has the highest 96.2 per cent villages where educational facility is available and lowest 73.3 per cent is found in Jamunaha C.D. block. Medical facility is highest in Hariharpur Rani (64.1 per cent) and lowest (37.6 per cent) in Jamunaha C.D. block. Improved drinking water is available to cent-percent villages in Payagpur block while in other blocks, it is above 97.0 per cent. Telephone facility is highest in Payagpur (31.0 per cent) and lowest in Ikauna C.D block is 4.8 percent enjoy this facility. Transport and communications is less developed in Payagpur where only 6.9 per cent villages are covered by this facility whereas 17.1 per cent villages of Gilaula C.D. block are availing this facility. In the field of power supply 78.5 per cent villages enjoy this facility in Visheshwargaj CD block and lowest only 20.0 per cent in Sirsiya.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,143,035 persons in the district, 1,069,810 or 93.6 per cent have educational facility of one or the other type. Similarly 634,459 or 55.5 per cent population has medical facilities while 1,137,998 or 99.6 per cent have got improved drinking water facility. Post office facilities are available to 315,416 or 27.6 per cent population. Telephone facility is available to 185,508 or 16.2 per cent. Transport communications facility is available to 173,552 or 15.2 per cent. Bank facility is available to 162,098 or 14.2 per cent. 150,839 or 13.2 per cent have been provided with the facility of agricultural credit societies. 618,005 or 54.1 per cent have been provided with the facility of approach by pucca road. Power supply is available to 724,350 or 63.4 percent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However, in Ikauna and Payagpur C.D. blocks facilities of educational, medical and improved drinking water are available to larger proportion of population.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	96	5	1	102
(b) Middle School	340	237	33	610
(c) Degree College	46	105	524	675
2. Medical:-				
(a) Hospital	158	243	264	665
(b) PHC	116	272	280	668
3. Post Office	424	119	17	560
4. Telephone	231	163	206	600
5. Bus Service	199	286	149	634
6. Banks				
(a) Commercial Bank	295	239	89	623
(b) Cooperative Bank	120	295	241	656
7. Agricultural Credit Societies	350	207	66	623

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 102 villages do not have primary school in their villages and out of these villages, children of 96 villages have to travel less than 5 kms, five at a distance 5-10 kms.and remaining at a distance of 10+ kms. for schooling Out of 679 inhabited villages as many as 610 are deprived of middle school and 675 of degree college. Of these 340 avail the facility of middle school at a distance of less than 5 kms., 237 at a distance 5-10 kms. and the remaining 33 at a distance of 10+ kms. In respect of degree college 46 avail this facility at a distance of less than 5 kms., 105 between 5 to 10 kms. and rest 524 villages at a distance of 10+ kms.

Similarly there are 665 villages in the district which have been devoid of Hospital facility and 668 villages which are deprived of PHC facilities. Of these 158 villages have the facility of hospital available within 5 kms. while in respect of 243 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 264 villages have this facility at a distance of 10+ kms. As regards PHC 116 avail this facility at a distance of less than 5

kms., 272 at a distance of 5-10 kms. and the remaining 280 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 560 villages do not have this facility in the village itself. Of these majority i.e. 424 have this facility at a distance of less than 5 kms., another 119 villages avail it at a distance of 5-10 kms. In the remaining 17 villages in habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 600 villages in the district which are without telephone facilitiy. Of these 231 avail this facility at a distance of less than 5 kms., 163 at a distance of 5-10 kms. and remaining 206 have to traverse a distance of 10+ kms.

For Bus service out of 634 villages which do not have facility, 199 villages avail this facility at a distance of less than 5 kms., 286 at a distance between 5-10 kms. and 149 at a distance of 10+ kms.

In the entire district 623 villages are deprived of Commercial Bank & 656 of Co-operative Bank. Of these 623 villages which are deprived of Commercial Banks 295 villages avail this facility at a distance of less than 5 kms., 239 between 5-10 kms. & the remaining 89 at a distance of 10+ kms. Regarding Co-operative Banks out of 656 villages 120 villages avail this facility at a distance of less than 5 kms., 295 at a distance of 5-10 kms. and remaining 241 at a distance of 10+ kms. 623 villages do not have agricultural credit societies. This facility to 350 villages is available at a distance of less than 5 kms., 207 at a distance of 5-10 kms. and the remaining 66 at a distance of 10+ kms.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available			
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

	(100.0)	**(85.7)**	**(48.3)**	**(17.5)**	**(11.6)**	**(10.6)**	**(8.8)**	**(8.2)**	**(44.9)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities. Out of total 679 inhabited villages in the district, there are 135 villages which have nearest towns upto a distance of 5 kms. Of these only 115 villages forming 85.2 per cent of these total villages, are having the educational facilities of one type or the other and 69 villages constituting 51.1 per cent, have the medical facilities within the village, 13 villages forming 9.6 per cent have the facility of post office within the village and 23 or 17.0 per cent

have the facility of telephone. 9 villages constituting 6.7 per cent have been linked by transport service. 11 villages comprising 8.1 per cent have been provided bank facilities, while 11 villages constituting only 8.1 per cent have been provided by agricultural credit societies. 79 villages comprising 58.5 per cent have been provided with pucca road.

There are 339 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 297 villages constituting 87.6 per cent have been provided with the educational facilities. 163 villages comprising 48.1 per cent have been provided with medical facilities. 62 villages constituting 18.3 per cent enjoy the post office facility. 40 villages comprising 11.8 per cent have been provided the telephone facility. 41 villages constituting 12.1 per cent have been linked with transport communications. 28 villages comprising 8.3 per cent have bank facility. 23 villages constituting 6.8 per cent are having agricultural credit societies, while 143 villages or 42.2 per cent are approachable by pucca road. 148 villages fall in the distance range of 16-50 kms. Of these, 83.1 per cent villages have educational facility, 43.2 per cent with medical, 19.6 per cent with post office, 6.8 per cent with telephone and transport & communications available to 7.4 per cent villages. Banks and agricultural credit societies facilities are available to 8.1 and 10.1 per cent of villages. 55 villages or 37.2 per cent are approchable by pucca road.

There are 2 villages in the district which are situated beyond 50 kms.from the nearest town and both villages (100.0 per cent) enjoy the educational facility in the village itself but do not have Medical, Post office, Telephone, Transport, Communications, Bank, Agricultural, Credit Societies and Pucca Road amenities. There are 55 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 45 or 81.8 per cent villages have the educational facility of one or other type. 32 villages constituting 58.2 per cent have the medical, 15 (27.3 per cent) post office, 6 (10.9 per cent) telephone, 9 (16.4 per cent) banks and 7 (12.7 per cent) agricultural credit society facilities in the villages.11 (20.0 percent) Transport Communications. 28 villages or 50.9 per cent have also been connected by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available					Type of amenity available				
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district out of a total 679 inhabited villages, overwhelming 73 have a population of less than 500 persons. Of these, 23 villages (31.5 per cent) have educational facility, 15 (20.5 per cent) have medical facility, 66 (90.4 per cent) have improved drinking water facility. No village has post office facility. 2 (2.7 per cent) have telephone facility. 2 (2.7 per cent) has been linked by bus service. Only one (1.4 per cent) has Bank facility. No village has been provided with the agricultural credit societies, 16 villages (21.9 per cent) have been linked with pucca road and 16 villages (21.9 per cent) have been provided with electricity.

Out of 135 villages, which fall in the population range of 500-999 persons, 116 villages (85.9 per cent) have been provided with the educational facility, 59 (43.7 per cent) with medical facility, 131 (97.0 per cent) villages have improved drinking water facility. 13 villages (9.6 per cent) have been provided with post office facilities, 8 villages (5.9 per cent) with telephone facility, 9 villages (6.7 per cent) with transport facilities, 7 villages (5.2 per cent) with bank facility, 9 villages (6.7 per cent) with agricultural credit societies and 53 villages (39.3 per cent) have approach by pucca road. 55 villages (40.7 per cent) in this range have electricity.

281 villages fall in population range of 1,000-1,999 persons. Out of these villages 259 (92.2 per cent) have educational, 143 (50.9 per cent) power supply and 280 (99.6 per cent) improved drinking water facilities. Whereas 145 villages (51.6 per cent) enjoy the medical facility, 36 villages (12.8 per cent) have post office facility, 31 villages (11.0 per cent) have telephone facility, 28 villages (10.0 per cent) have transport communications facilities, 20 villages (7.1 per cent) have bank facilities, 15 villages (5.3 per cent) have agricultural credit societies and 119 villages (42.3 per cent) have approach by pucca road.

There are 176 villages in the district which are covered under 2,000-4,999 population range. In this range, 170 (96.6 per cent) villages enjoy the facility of educational, all 176 villages (100.0 per cent) improved drinking water, 32 (18.2 per cent) telephone, 27 (15.3 per cent) transport communications, 106 (60.2 per cent) approach by pucca road and 124 (70.5 per cent) power supply. 98 villages (55.7 per cent) have medical facility. 61 villages (34.7 per cent) have post office facility, 27 villages (15.3 per cent) have bank facility, 27 villages (15.3 per cent) are having agricultural credit societies. There are 14 villages in the district having a population of 5,000 persons or above. All 14 villages (100.0 percent) enjoy the facility of educational, improved drinking water and power supply ,11 villages (78.6 percent) have bank facility and approach by pucca road, 9 (64.3percent) have post office, facility, 6 (42.9 percent) have telephone facility and transport communications,5 (35.0 per cent) have bank and agricultural credit societies.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Forest Villages	2	0	0	0
2	Jamunaha	101	31,639.5	59.8	76.6
3	Hariharpur Rani	78	25,744.3	49.1	74.1
4	Sirsiya	105	38,339.7	68.6	10.4
5	Gilaula	123	30,416.4	36.5	80.4
6	Ikauna	104	29,344.5	75.0	78.7
7	Payagpur	87	6,301.8	17.0	48.3
8	Visheshwarganj	79	9,332.5	3.1	48.9
	District Total	**679**	**171,118.8**	**53.9**	**58.0**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D block wise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as un irrigated area. It further elaborates that what is the extent of cultivable

area under irrigation. There are total 679 inhabited villages in the district having a total area of 171,118.8 hectares. Of this, 53.9 per cent is cultivable and 58.0 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Jamunaha block with 101 villages have a total area of 31,639.5 hectares, of this 59.8 per cent of land is cultivable and of the aforesaid area 76.6 per cent is irrigated. In Hariharpur Rani block, all the 78 villages have a total land area of 25,744.3 hectares, of this 49.1 per cent of land is cultivable and of the aforesaid area 74.1 per cent is irrigated. In Sirsiya block, all the 105 villages have a total area of 38,339.7 hectares, of this cultivable area is 68.6 per cent and 10.4 per cent is irrigated. In Gilaula block, all the 123 villages have a total area of 30,416.4 hectares. Of this, cultivable area is 36.5 per cent. Of cultivable area 80.4 per cent is irrigated. Ikauna block with 104 villages have a total land area of 29,344.5 hectares, of this 75.0 per cent is cultivable area and out of this cultivable area 78.7 per cent is irrigated. Payagpur block with 87 villages has a total land area of 6,301.8 hectares. Of this 17.0 per cent is cultivated area, out of which 48.3 per cent is irrigated. Visheshwarganj block with a total 79 villages have an area of 9,332.5 hectares. Of this 3.1 per cent is cultivable area. Out of which 48.9 per cent is irrigated. There is no irrigation facility in the forest villages block hence area shown under irrigation is zero.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III, Bhinga, NP	161	4	156	129	41	23	12	0	12
2	IV, Ikauna, NP	167	5	162	159	65	34	0	0	0
District Total		**163**	**4**	**159**	**141**	**50**	**28**	**7**	**0**	**56**

Table 43 gives the per capita receipt and expenditure (in rupees) for each town in the district. The average per capita receipt for towns of the district works out to Rs 163 of which Rs 4 are derived through local taxes and the remaining Rs 159 received from all other sources. The average of total expenditure incurred per head is Rs 141 Out of this Rs 50 are spent on general administration, Rs 28 on public health and conveniences, Rs 07 on public works, and Rs 56 is spent on other items. Among all the two towns the receipt and expenditure recorded per head are the highest in Ikauna N.P.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bhinga, NP	4.9	1.5	0.5	0.5	1.0
2	Ikauna, NP	3.9	1.5	0.8	1.5	0.0
	District	**4.5**	**1.5**	**0.6**	**0.9**	**0.1**

Table 44 shows in urban areas, the average number of primary schools per 10,000 population comes to 4.5 schools, 1.5 junior secondary/middle, 0.6 secondary/matriculation, 0.9 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among the towns, the ratio of primary, secondary/ matriculation and college is highest in Bhinga N.P. and Ikauna N.P. has highest ratio of junior secondary/ middle schools and senior secondary school. College education is available only in Bhinga N.P.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bhinga (NP)	15
2	Ikauna (NP)	14
	Distrct	**14**

Table 45 depicts the number of beds available in medical institutions per 10,000 populations in each town of the district. On an average there are 14 beds per 10,000 population in urban areas of the district. Whereas it is the highest 15 in Bhinga. N.P.while lowest number of 14 beds is recorded in Ikauna N.P.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town+	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	N.A.			

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town		Most important commodity	
			Manufactured	Exported
1	2		3	4
1	Bhinga	(NP)	Katha, Furniture	Vegitable Wood Ayur Medicines
2	Ikauna	(NP)	-	Vegitable Pukses Wheat

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for growing and export of vegitables. Bhinga and Ikauna towns are main export centres. The chief export items of the district are vegitables, wood, Ayur medicine, dalhan and wheat. Among manufactured items nothing significant has been noticed.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001: based on inset Table 38 to 52.

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

TABLE 48: HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11

	Two rooms	67,809	66,477	1,332	15,456	15,333	123	941	935	6
	Three rooms	34,522	33,608	914	6,259	6,215	44	421	413	8
	3+ rooms	28,462	27,486	976	3,985	3,949	36	319	313	6
	Median number of rooms	2	2	2	2	2	1	2	2	3
Rented	No exclusive room	32	28	4	7	6	1	0	0	0
	One room	381	311	70	69	57	12	4	4	0
	Two rooms	670	565	105	102	96	6	18	18	0
	Three rooms	171	129	42	12	12	0	2	2	0
	3+ rooms	96	85	11	20	18	2	0	0	0
	Median number of rooms	2	2	2	2	2	1	2	2	0
Others	No exclusive room	31	30	1	8	8	0	1	1	0
	One room	391	356	35	100	95	5	3	3	0
	Two rooms	332	253	79	74	60	14	5	5	0
	Three rooms	136	122	14	29	29	0	5	5	0
	3+ rooms	81	80	1	13	13	0	0	0	0
	Median number of rooms	2	2	2	2	2	2	2	2	0

The data presented in the table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 190,010 consisting of 185,252 rural and 4,758 urban households. 41,584 households belong to Scheduled Castes and 2,628 to Scheduled Tribes. 187,689 households are living in their owned houses constituting 98.8 per cent of total households. Of these households, the largest number of households (67,809) have occupied double roomed accommodation and is followed by single roomed accommodation numbering to 53,073 households. Next position is claimed by households (34,522) occupying three-roomed accommodation. Number of households in owned accommodation occupying three plus rooms rank at fourth place with 28,462 households while 3,823 households are without any exclusive room.

1,350 households living in rented accommodation account for 0.7 per cent of total number of households in the district. The largest number of 670 households are living in two roomed accommodation followed by 381 households in one roomed accommodation. Households with three rooms and three plus are 171 and 96 respectively and 32 households are without any exclusive room. Other households numbering to 971 forming only 0.5 per cent of total households which are distributed in single roomed accommodation numbering 391 and 332 double roomed and 136 in three roomed accommodation. In rural and urban areas majority of households have bigger size and majority of them have their own houses.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Bhinga	41.9	22.1	35.9	40.8	22.4	36.9	76.2	14.4	9.5
2	Ikauna	38.8	27.0	34.2	37.2	27.8	35.0	84.4	5.2	10.3
3	Payagpur	36.3	36.4	27.3	36.3	36.4	27.3	0.0	0.0	0.0
	District Total	**39.5**	**27.4**	**33.1**	**38.5**	**27.8**	**33.7**	**79.5**	**10.7**	**9.8**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.
Note:-
Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.
Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 39.5 per cent of the households in the district had permanent house. The trend is different in rural (38.5 per cent) and urban area (79.5 per cent). Among tahsils highest proportion of permanent house were accounted in tahsil Bhinga (41.9 per cent) followed by Ikauna (38.8 per cent) and Payagpur (36.3 per cent) which is lowest in the district. In respect of semi-permanent houses, the returns were 27.4 per cent of district level whereas among tahsils in Payagpur it was 36.4 per cent and lowest was 22.1 per cent in tahsil Bhinga. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 0.0 to 14.4 per cent. Temporary houses in the tahsils lie between the range of 27.3 to 35.9 per cent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Serial number	Tahsil	Total / Rural / Urban	Number of households	Number and percentage of households having				
				Improved drinking water*	Electricity	Bathroom	Toilet	Drainage

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.Drainage menas closed and open drainage.

The above table shows that out of total households of the district 77.9 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 77.6 and 88.3 per cent. Tahsil Payagpur had higher order of proportion of households where percentage for rural area was 87.1 and 0.0 per cent in urban areas. Electricity was available for 8.7 per cent of households at district level. Households of the district had better access of electricity. Bathrooms and toilet facilities were available in 15.1 and 14.3 per cent of households. Tahsil Payagpur poorly served in respect of these amenities. Simililarly drainage facility was also poor in Bhinga tahsil and Ikauna tahsil. At district level drainage facility was available for 39.9 per cent of households, whereas the proportion of rural and urban areas households accounted to 39.0 and 75.6 per cent.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 63.4 per cent of households in the district use firewood as fuel, for cooking, the proporion in the rural area is to 63.0 percent and in urban area it comes to 77.6 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in to 0.5 per cent of the households. The composition of rural and urban comes to 0.4 and 4.5 per cent respectively. Kerosene is used for cooking in as many as 0.7 per cent of the households (0.4 per cent rural and 10.4 per cent urban households). The other fuels like crop residue, cowdung cake, coal, lignite, charcoal, electricity and biogas etc ranges between zero per cent to 22.2 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils too, where predominant fuel is firewood. In the distrct fire wood. .crop residue and cowdung cake are the predominant fuel for cooking.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

This table reveals that out of the total households (190,010) of the district, in all 72,206 or 38.0 per cent could avail banking services at district level while 76,605 and 9,254 households avail radio and television, 3,154 and 130,974 telephone and bicycle, 6,370 scooter/motercycle and 1,713 households have car/jeep respectively. Only 46,946 or 24.7 percent had none of the specified assets.

It also reveals that at tahsil level highest proportion of 26,068 households were availing banking services in Ikauna tahsil and expect Banking services availability of all type of assets were in higher order as well as a name of the specified assests is also highest in Bhinga tahsil of the disrtict. The lowest of 22,603 houseboulds were availing banking services, 22,762 households avail radio/transistor in Payagpur tahsil. The rest of the household assets at the lowest foot were also being availed in Payagpur tahsil. In the category "none of the specified assets" the lowest of 10,681 households were also in Payagpur tahsil.

The major administrative change that took place during the last decade was the creation of Shravasti district itself. The other administrative change was the creation of two tahsils namly Ikauna and Payagpur.

(xi) Major Social and Cultural Events, Natural and Administrative Developments and Significant activities during the decade:-

No other mentionable social, cultural or natural events took place during the decade. The district is now progressing in the every sphere of life.

(xii) Brief description of Places of Religious, Historical or Archeological importance in villages and places of Tourist interest in the towns of the district :

1. Bhinga : This town is the headquarters of the district, Shravasti. It is located near the left bank of the Rapti River in latitude $27^0$42' north and longitude $81^0$56' east. The town is said to have

been founded some 400 years ago by one Bhayya Dar Singh, a cadet of the house of Ikauna, in the name of whose head manager Bhagga Singh, the name Bhinga has its origin.

A daily market is held here at which things of daily utility are traded. On the occasion of Kartiki Purnima the place witnesses a fair which is attended by thousands of persons

2. Ikauna Khas : Ikauna town lies in latitude $27^0$32' north and longitude $82^0$58' east on the road from Bahraich to Balrampur. in its former days, it was known as Khanpur – Mahadeo name after one Khanu, a Bhar , who founded it about 650 years ago. It is popularly said to derive its name from the fort, built by Ram Sah, a descendent of Bariar Sah.

There are ruins of fort, standing to the west of the town, close to police station. After freedom struggle in 1857 the estate of Ikauna was confiscated by Britishers and conferred partly on Raja of Kapurthala and partly on the Raja of Balrampur. The Kapurthala estate built here a masonry Serai and established a depot for the manufacture and sale of wooden articles. The place is of some religious importance and contains several temples and mosques.

3. Payagpur : Payagpur is a town on the main road from Gonda to Bahraich in latitude $27^0$24' north and longitude $81^0$48' east. Close to railway station there is a large Masonary ganj, which was built by the Raja after the construction of the railway. The Chief building in the town is the palace of Raja, an extensive edifice to which large additions appear to have been made in subsequent years. Part of the building has some antiquity and great gateway bears traces of the unsettled times of the Auadh Government in the shape of a large hole made by a Cannon-ball, the mark of siege on the regin of Nazim Raghubir Dayal.

On the occasion of Shivaratri and Kartiki Purnima, fairs are held herewith attract thousand of people.

4. Sahet – Mahet (Sravasti) : Sahet Mahet is modern equivalent of the site of Sravasti of ancient fame. It was the capital of Uttara Kosala, at a distances of about 16 kms. from Balrampur and 83 kms. north of Ayodhya. The town was founded by Sravasta, a king of Solar race. It is series of mound in latitude $27^0$31' north and longitude $82^0$3' east and covers an extensive area. The area represents the site of large fortified city, full of Buddhist and Jains remains and is of great antiquity. The remains consist of Mahet, a large rescent shaped forters, with the cevi caue side facing the rind, and Sahet, a smaller mound to the south-west, three small mounds to the west, north of the latter, sever similar leaps east of Sahat and opposite the southern face of Mahet.

The prosperity of Srawasti was the prosperity of the Kingdom of Kosala. The kingdom figured prominently among the four powerful monarchies of Northern India and Sravarti reached its zenith to Buddhas lime.

Sravasthi is tourist place, where many religious and historical's importance places are situated, in which Sita Dohar and Hathiya Kund are the main, which are given below :-

1. Sita Dohar : It is located at the Bahraich – Balrampur route on the 32 km. It is stated that the Sitaji was relieved by Sri Laxman on this place and a Ashram related to Maharishi Balmiki at this place. Here is a big Jheel, where a ancient temple of Sitaji is establish. A fair on this bank of Jheel is celebrated in Kartik Purnima and in chaitra Ram Navami every year.

2. Hathiya Kund : This kund is situated in the forest about 13 km from Bhinga town. The religious books states that the kund was a part of Raja Karan. It is very beautiful surrounded place.

(xiii) Major Characteristics and Contribution of the District:

Srawasti is a historical Puranic and full of natural resources place. It is sacred place of Hindu, Budha and Jain pilgrims. It was a capital place of King Lave son of Lord Rama.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii)The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv)Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A

VILLAGE AND TOWN DIRECTORY (SECTION I & II)

Section I – Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC

(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)Agricultural Credit Society	ACS
(ii)Non-Agricultural Credit Society	NCS
(iii)Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

There is no village merged in town(s) and any outgrowths in the district at 2001 Census.

Shravasti				

Information not available for this district

SECTION II
TOWN DIRECTORY

Town Directory

Note explaining the abbreviations used in Town Directory :

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public

and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type

(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Town Directory Statements (I to VII)

PART - B
PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were

made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP	Bahraich
q1	Persons	99	98.0
	Males	98	72.0
	Females	104	102.0
q2	Persons	117	105.0
	Males	117	84.0
	Females	118	110.0
q5	Persons	134	117.0
	Males	135	101.0
	Females	132	121.0

The probability of dying between birth and at age 1,2 and 5 years are shown in the above table. Child mortality by ages 1,2 and 5 years is lower in the district as against the state, thus child mortality indicators in the district for both male and female shown lower order as compared to the state.

***Note**:-Sharawasti district was carved out from Bahraich after 1991 Census. The data is not available separately for Sharawasti. Hence, for comparison purpose of Annexure IV to VIII , the data of undivided Bahraich district have been used, assuming that the trends and pattern of districts are same.*

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male Female	Uttar Pradesh	Bahraich
1	2	3	4	5
1	CBR		37.21	35.80
2	TFR		5.60	5.59
3	TMFR		6.30	6.03
4	GFR		172	168
5	GMFR		200	185
6	Mean age at marriage (1981-91)		17.27	16.84
7	Number of children ever born per ever married woman aged 45-49 years		4.59	4.54
8	Child woman ratio 0-4 (year)		631	611
	5-9 (year)		752	745

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 35.80 per cent in the district. It is below to the state of Uttar Pradesh i.e. of 37.21 per cent. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 had been 17.27 years for the state where as 16.84 year has been observed for the district. It may be observed despite that lower age at marriage low rate of fertility prevails in the state and district as well. Similar trend is observed in the number of children born per ever married women in the age group 45-49. The state and the district figures are placed as 4.59 and 4.54 percent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 611 and 745 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such are below to the state average. Another important factors i.e. the probability of dying between birth and at age 1,2. and 5 has been of higher order in the district in case of persons, males and females in the district.

The annexure presented above shows percentage distribution of migrants as per 1991 census. Amongst the percentage distribution of migrants, particularly in migrants by place of birth (in which a person is enumerated during the census at a place other than the place of birth) the proportion of total migrants in the district from the total population was 4.14 per cent as against the state figure of 8.32 per cent. In migrants from other districts of the state comprised 81.32 per cent (73.52 per cent male and 83.32 per cent females). The corresponding proportion in the district was worked but to be 83.28 per cent (83.03 per cent male and 83.36 per cent females). The proportion of in migrants from other states was of almost same order in state i.e. 16.15 per cent (20.88 per cent male and 14.94 per cent females), than to the district figures for persons counted to 8.13 per cent (12.30 per cent male and 6.94 per cent females). In migrants from other countries is 8.58 per cent (4.66 per cent males and 9.71 per cent females) as against state figure of 2.53 per cent (5.60 per cent male and 1.74 per cent females).

In respect of in migrants by place of last residence (a person is enumerated during the census at other his place of last residence) it is evident from the total population of 1991 census that the volume of total migrants in the state had been to the extent of 2.78 per cent (1.45 per cent male and 4.28 per cent females), the corresponding proportion at the district level was 1.18 per cent (0.59 per cent male and 1.89 per cent females). In migrants from other districts of the states constituted more than 79.00 per cent in the state and district as well while the volume of migrants from other states worked out to be 18.86 per cent at the state level as against 7.64 per cent in the district. The movement of population from other countries in the district was 7.49 per cent (2.70 per cent male and 9.28 per cent female) in the district as against state figure of 1.53 per cent (2.50 per cent male and 1.15 per cent females).

From the above annexure it is observed that Hindu religion predominate with 81.74 per cent of persons. This follows Muslim with 17.33 per cent. In respect of the district however, the trend is the same but the proportion for the district Bahraich does not follow the state figures. The district comprises 19.67 percent Hindi and 29.92 per cent Muslim. At the state level proportion of Budh is 0.16 per cent while at the district level it is 0.32, Christian constitute 0.14 per cent in the state and 0.08 per cent in the district. Similar proportion prevails to Jain 0.13 per cent in the state and 0.02 per cent in the district. Sikh 0.14 per cent out number the state figure 0.49 per cent. Followers of other religion account 0.01 per cent in the state and nearing zero percent in the district.

Source:- Social & Cultural Table Pt IV A (Table # C-2)

*Age not stated.

On perusal of the above annexure it is evident that percentage of never married is lower for the district both for male and female (51.15 per cent male and 41.81 per cent female) than the state (54.40 per cent male and 45.92 per cent female). Consequently percentage of married in the district (45.33 per cent male and 53.17 per cent female) is higher than the state (42.41 per cent male and 49.41 per cent female). Like wise percentage of widowed persons in the district (3.35 per cent male and 4.90 per cent female) is higher than the state (3.00 per cent male and 4.56 per cent female). Percentage of divorced or separated is also higher than the state. Among the age groups the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal, the peak for male is in the age group 35-39 female excluding age group 0-9 the higher proportion of never married is in the age groups 10-14 and 15-19. Highest proportion of widowed is in the age group 70 + both for male and female.

From Annexure VII, it can be observed that percentage of illiterates is higher in the district (71.15 per cent male and 91.15 per cent female) than the state (55.28 per cent male and 79.98 per cent female). Consequently percentage of literates is lower in the district than the state both for males and females. Although percentage of literates without educational level is lower than the state, and in the subsequent educational levels. Comparative study between state and district will elaborate the facts. While percentage of literates with primary education in the state is 10.72 for male and 6.05 for female, in the district they are 8.66 and 3.67 per cent respectively. Middle level education in the state is 9.75 and 3.72 per cent for male and female, while the district has 5.38 and 1.30 respectively. For the matriculation and above level the state has reported the figures of 13.49 percent and 4.42 per cent for male and female, whereas the district depicts the figures of 6.12 and 1.46 percent for males and female. Highest literates with primary education is in the age group 15-19. The age group that has highest population of middle level education is 15-19 for both male and female. The population of matriculation and above level is highest in the age group 20-24 for males and 15-19 for females.

Note:-For the state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of " Total of Other Mother Tongues."

The above annexure presents distribution of different mother tongue with percentage for the state and the district. There is identical trend for the highest percentage of the people reporting Hindi as the mother tongue both for the state (82.12 per cent) and the district (85.68 per cent). Percentage of people reporting Urdu as mother tongue is higher for the district (11.21 per cent) than the state (8.98 per cent). Awadhi as a mother tongue has also higher percentage in the district(1.97 per cent) than the state (0.34 per cent). Other mother tongues such as Bengali, Sindhi, Nepali, Marathi, Punjabi, Banjari, Arbi, Sanskrit, Marwari, English, Oriya and Other mother Tongues are below one per cent each.
