AREA LOST TO NEWLY CREATED DISTRICT BALRAMPUR

MOTIF

RAJA DEVI BUX SINGH

With the annexation of Oudh by East India Company in February 1856 Gonda became a separate district. The wave of indignation was spreading all over the country and the annexation of Oudh was undoubtedly the most important auxiliary cause of the outbreak of the freedom struggle of 1857. This outbreak in the district was followed by a war of the land holders who were discontented because of the summary settlement of land revenue. A state of anarchy prevailed in the district with the result the taluquedars concentrated on strengthening their own position. Raja Devi Bux Singh of Gonda took a leading part in the freedom struggle followed by Raja Krishna Dutt Ram who had succeeded him and joined the Begum's forces with one thousand soldiers.

Raja Devi Bux Singh while leaving for Lucknow, had left behind him his nearest Kinsman, Prithvipal Singh of Mahnon, in-charge of the south in the district. He was again sent back from Lucknow with plenory powers over the whole country held by his ancestors, the famous Datt Singh. He fixed his capital Lamati, a fort on the Chamdai on the borders of Mankapur and Mahadeva. At this place it is said that he was joind by a huge army accounting to twenty thousand men. Lastly, he alongwith other prominent leaders of Oudh, had to leave for their home districts and confined themselves to a narrow reason on the border of Nepal.

Annexure VII Age, Sex and Education in the district, 1991 Census 995
Annexure VIII Distribution of different mother tongues returned in 1991 Census 997

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranbir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General. India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook :

The District Census Handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District :

Tradition relates that present town of Gonda was originally a jungle and during the rule of the Kalhan Rajas of Khurasa, there was a Cattle Station in which the Ahirs of the Raja kept their herds. From this fact this place was called Gontha, which afterwards, corrupted into Gonda. The town itself was founded by Raja Man Singh who built a palace here and erected fortifications in the shape of a deep moat. Traces of the moat are still visible. In course of time the tract covered by the district came to be known after the name of the town.

Lying in the proximity of Ayodhya, famous for the birth place of Lord Rama, the district Gonda has been a place of worship for Rishi Munis like Parashar, Jamdagni and Ashtavakra. In old days the district was part of Kaushal Rajya with its kingdom as Ayodhya. According to historians, after the death of Lord Rama, Kaushal Rajya was divided into two portions- north Kosala and south Kosala naturally bifurcated by the river Ghaghra. Later during the period of Lord Buddha the district became a part of Shravasti Kingdom. The Vayu Purana and Uttarkand of the Ramayana speak of the two Kosala and mention Shravasti as the Capital of north Kosala and Kusavati as that of south Kosala. The two Kosalas are said to have been once under the suzerainty of epic hero Rama, who has installed his son Kusa in south Kosala, with its capital at Kusavati at the foot of the Vindhyas and son Lava in the north Kosala with Shravsti as the capital.

The kingdom of Shravasti figured prominently among the four powerful monarchies of northern India and its prosperity reached its zenith in Buddha's time. In Buddhist time the district was included in the ancient capital of Kosala. It was one of the eight places connected with the life of the Buddha.

Gonda was ruled by Doms, Tharus, Bhars and Pasis. Jain dynasty of Sahet-Mahet gave some areas to the Doms where the notable Raja Ugrasen laid stone of Domariadih town. Now it is a mere mound of earth and bricks on Gonda-Faizabad route. Later on Raja Jagat Singh the Subedar of Avadh overthrew the Doms. There is another legend in which the Subedar in question was Malik Ain-ud-din of Karra Manikpur.

After the downfall of Dom and other communities the district was dominated by Rajputs. The first clan whose mention is made were Bandhalgotts, Kalhans and Bais. Various other Rajputs came into existence under the protection such as the Bisens of Kila Rampur in Diger and Harraha Bishens of Mahdewa. Last ruler of Khurasa was Achal Singh or Achal Narain Singh whose downfall came in 1544.

. Utraula Taluqa was established by Ali Khan, a Kakar Pathan. Ali Khan died in 1571 during the fight against Akbar. Later on his son Sher Khan signed an agreement with Akbar and was allowed to hold Utraula estate.

The district is historically and geographically linked with Bahraich from time immemorial. In the second half of the 13th century, Gonda was included in the government of Bahraich. Nevertheless, the district of Gonda provided a free passage to Sultans of Delhi who usually marched through these districts on way to eastern parts of their empire. The road from Bahraich to Ayodhaya lay through Gonda and Khurasa and was frequently traversed by the Sultans and their army. Gonda and Khurasa did not find mention in historical record till the reign of Ghiyas-ud-din Tughlaq. In 1394, the district appears to have come under the sway of Khurja Jahan Malik Sarwar, the founder of the Sharaqi dynasty of Jaunpur who held the charge of eastern parts including Bahraich and most probably Gonda.

From earliest days of Muslim domination down to the advent of Akbar, the history of the district is primarily the history of local clans, while some of them migrated into the district during this period. During the early phase of this period the whole of Gonda was ruled by low caste aborigines like Doms, Tharus, Bhars and Pasis.

In 1773 the Gonda estate was made over to the Bahu Begum in jagir and till 1799 it was managed by her Eunuch Darab Ali Khan. From 1806 to 1816 the estate was in the hands of five different persons. In 1816 the Gonda estate was incorporated in the nizamat. Gonda was held by fourteen nazims in next twenty years. The nazims under Avadh government has played an important role. They were very powerful and left a strong impression on the history of the district. With the annexation of the province of Avadh by the East India company in February 1856, Gonda become a separate district in the Gonda-Bahraich Commissionership.

The wave of independance was spreading all over the country and the annexation was undoubtedly the most important auxiliary cause of the outbreak of the freedom struggle of 1857. This outbreak in the district was followed by a war of the landlords who were discontented because of the summary settlement of the land revenue. The district lapsed into a state of anarchy and the taluqdars from the first devoted their attention to strengthening their own position. Raja Debi Baksh Singh of Gonda took a leading part in the struggle for freedom.

The various groups which combined to trigger off the 1857 out-break had only been able to initiate the idea of ultimate objective of overthrowing the authority of the foreigners. There after, among many factors, the establishment of the Indian National Congress in 1885, to promote the cause of India's freedom was an important one.

The people of the district received impetus by the visit of Lala Lajpat Rai in 1908. The stage for national activities was already set in the district. The rural and urban populace of the district shared its due in the various activities of the Non-cooperation movement. On October 9, 1929 Mahatma Gandhi visited the district along with Jawaharlal Nehru. The people of the district took part in every movement launched by national level leaders during the struggle for independence. On the eve of independence thousands of persons both from the town and surrounding countryside assembled at the district headquarters to witness the flag hoisting of the National Flag.

On the occasion of celebration of Silver Jubilee of independence in 1973 about 200 persons of the district who had taken part in country's freedom struggle or their dependents were favored with Tamra-partras (Copper Plates).

(iii) Administrative Setup :

The district is situated in the north-east of the state and on the south-east of Devipatan division. To provide efficient administration and to implement developmental programmes, the district administrative hierarchy is divided in 4 tahsils namely Gonda, Colonelganj, Tarabganj, Mankapur and 16 community development blocks. There are 6 statutory towns in the district. Three towns are administered by Nagar Palika Parishad and three towns are under Nagar Panchayat.

Jurisdictional Changes (1991-2000):

The district was bifurcated vide notification no. 1428/1-5/97-172/85-R-5 dated 25.51997 and a new district Balrampur was created. Entire tahsils of Balrampur, Tulsipur and Utraula with towns are transferred to district Balrampur. An area 2926.54 sq kms was subtracted. The truncated district of Gonda has an area of 4003 sq kms. Details are given below

Sl. No.	Name of District/ Tahsil	Notification No. and Date	Jurisdictional Changes	
			Added	Subtrated
1	2	3	4	5
	Gonda	1428/1-5/97-172/85-R-5 Dated 25/05/1997		Entire 3 tahsils viz Balrampur, Tulsipur and Utraula along with towns transferred to Balrampur district

District Administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional magistrate is in-charge, who is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer have departmental office at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc. each have departmental district level office. The development point of view, the district is divided into community development block. Block Development Officer (BDO) looks after development works at community development blocks level.Assistant Development Officers and Village Development Officers at Village level.

Under the police set-up Senior Superintendent Of Police in big districts and Superintendent of Police in smaller districts are in-charge. Additional Supdt. Of Police (ASP) and Commanding Officers are in-charge of their respective area. Deputy Superintendent of Police (DSP) looks–after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charge of their police stations depending upon the population and area.

The Judicial administration of the District is headed by District and Session Judge. In addition there are several additional District Judge, Civil Judges Chief judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam; Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

(1) Location and size:

The district Gonda is bounded in the east by Balrampur and Basti districts. It is surrounded in the north by district Shravasti, north-west by district Bahraich,west by district Barabanki and south by district Faizabad. River Ghagra demarcates the district boundary with district of Barabanki and Faizabad.

Total area of the district is 4003 sq. kms which is 1.7 percent of the area of the state.

(2) Physiography:

On the basis of geology climate, topography, soils and natural vegetation the district is subdivided in the following two regions.

The geology of the district does not expose anything except generally Gangetic alluvium with the exception of the boulders brought down by hill in the north. The slope of the district is slight and lies from north-west to south-east. It is situated at 390 feet above the sea level in the north. The Tarhar is the lowest part of the district with high ranging from 355 feet at Colonelganj to about 310 feet opposite Ayodhaya.

Gonda Plain

The region is situated in the northern part of the district. It is a flat plain locally known as Uparhar. The north and south limits of the region is marked by the high old bank of the Rapti and the Ghaghra rivers. The master slope is from north-west to south-east direction. The whole tract is raised plateau which is broken by various rivers. It is devoid of flood havoc Geologically this region is endowed with Alluvium and Dun gravels (Recent).

Ghaghra Tarhar

It is a flood plain, locally known as Tarhar. The level of this regions is low and fifteen feet below that of upland and liable to flood during heavy rains. Geology of this regions is marked by Alluvium and Dun gravels (Recent).

(3) Drainage :

All the rivers of the district flow from north-east and belong to two system that of Rapti in the north and the Ghaghra in the south. Each is fed by numerous tributaries, but the majority of the latter are of little importance as they only serve off the surface water during the rainy season of the year.

The Rapti rises in the mountains of Nepal and enters the district Gonda on the Utraula boundary. The bank of the river are usually high but the river is continually changing its coarse. The other rivers and streams of the district belong to the Ghaghara systems and flow through the Uparhar and Tarhar. The Kuwana is a sluggish stream and rarely changes its coarse. Below the southern edge of Uparhar flows the Terhi. a stream which enters the district on the extreme west of pargana Gonda. The Terhi, as the name implies has a very winding and irregular coarse and ultimately flows towards the southern borders. The distance between its entry and exit is about 88 kms. Between the Terhi and the Ghaghra there are small streams, the chief of these is the Saryu. Other streams are insignificant drainage channels and are of little use or importance. Other streams are Bisuhi. Manwar and Chandai.

The district contains several lakes many of which are of considerable size and form a valuable source of water supply. The character of these jheels varies according to the locality. In the Tarhar they are generally formed by the action of rivers in changing their beds. In the Uparhar and elsewhere they generally consist of shallow depressions in the surface, in which the drainage water collects. In the principal series of jheels, the chief of them are Parbati and Argha Tals.

(4) Climate:

The year may be divided into four seasons. The cold season prevails between the middle of November to February which is followed by the summer season from March to middle of June. The south-west monsoon season is from the middle of June to September-October and first half of November constitute the post monsoon on transition season.

January is the coldest month. In the winter season cold waves effect the district in the wake of passing western disturbances. After the second week of February there is steady increasing in temperature. May is generally the hottest month. The summer is intensely hot. Afternoon thunder showers sometimes in summer bring some relief, though only temporarily. With the advent of monsoon around the middle of June there is appreciable drop in day temperature. After October there is a rapid fall in both day and night temperatures. The highest temperature recorded during 1998-99 was 44.80c and minimum temperature was 4.90c.

Normal rainfall recorded in the year 1998 was 1152 mm. The variation in the annual rainfall from year to year is large. During the months of November winds are generally calm. The intensity of wind speed increases from December and takes maximum strength during May and decreases later upto October.

(5) Natural and Economic Resource:

Forestry:

The district has about 70776 hectares of forest land during 1997-98. The trees of Sal, Sheesham, Jamun, Mahua and Teak abound in the forests of the district. The main forest produce are gum, honey, wax, flowers, fruits, bamboo, herbs, firewood, tendu leaves, thatching grass and hide and horns of wild animals. There is great scope for development of forest in the district. Different N.G.O's and government agencies are taking up a forestations work under social forestry scheme.

The trees found in the district are Mahua, Semal, Jamun, Aonla, Dhak, Siris, Babool, Bel, Amaltas and Kachnar.

Wild animals like tigers, leopards and bears are rarely found. Wolves are also found but have drastically decreased in number due to various reasons. The Sambhar spotted deer and Neelgai are also found in the forests.

Minerals and Mining :

The mineral of the district are very insignificant and practically confined to Kankar, Reh and brick earth. Kankar is used for making lime and metalling the roads. Reh is used by local washermen for washing clothes. Brick earth is used for manufacturing bricks.

Soil:

The soil of the district is characterised by the presence of a dark coloured organic matter. The calcareous soil of the district is similar to alluvial soil. As regards the fertility, the district falls in the medium category.

In the Uparhar tract, soil is the best in the eastern part while to the west the quality declines. In the Tarhar the soil is light and porous loam, degenerating into almost pure sand. There is practically no clay in the Tarhar and the sandy soil, though light and weak have not the worse defects of bhur, found in other parts of Avadh.

Land and Land use pattern:

According to the land use statistics available for the year 1997-98 through Sankhyakiya Patrika-1999. Out of thetotal recorded areas of 439,520 hectares during 1997-98, forest covered area was of 70,776 hectares while cultivable waste land was 8,853 hectares, current fallow 11,507 hectares, other fallow 9,635 heetares, barren and uncultivable land 4,804, land used other than agriculture 42,056 and groves etc were 10,652 hectares. Net area sown was 279,809 hectares. The land holdings are generally small in size. Out of the total land holdings of 409,775 during 1990-91,total number of land holdings in the size of less than one hectare was 330,402 or 80%. Small land holdings are detrimental for the growths of agriculture in the district.

Agriculture and Crop Pattern :

Agriculture conditions are somewhat varying in the three different soil tracts of the district. The northern part of the district is suited for the cultivation of paddy. The Uparhar is the upland predominated by dumat soil. It is thickly populated and pressure on land is very high. A wide range of crops such as wheat, gram, barley, peas, potato and mustard in the Rabi and paddy, sugarcane, juwar and bajra in the Kharif are grown in the district. The Tarhar area of the district is frequently affected by the floods. Water level is near the surface but the soil is sandy. Jowar, melons, water-melons, sweet potato etc. are tropical agricultural products of this area Cultivation of sugarcane, wheat gram, arhar and paddy is gaining.

The economy of the district pivoted around agriculture Nearly 88 percent of the workers are engaged

in agriculture related work. This clearly shows that majority of the population are dependent on agriculture.

There are three harvests called by the usual names. Rabi, Kharif and Zaid. The Zaid or intermediate harvest is of little importance in this district. There has been appreciable extension of the multiple cropped area. Thus, the district is marked by intensive use of land resources for the purpose of cultivation. Statistics available for the year 1997-98 reveals that wheat dominated the cultivated area with 15,219 hectares, closely followed by paddy with total cultivated areas of 115,216 hectares. Among other crops maize with sown area of 74,101 hectares and gram 20,822 hectares are important crops. Among pulses masoor, gram, peas, hectares. Output of crops per hectare sown area, wheat with 29.23 quintals and paddy 21.65 quintals have good production. Output of other crops are not very significant.

For improvement of quality and quantity of agricultural produce the district had the services of 176 seed store/fertilizer depots, 159 rural godowns, 20 insecticide depots, 5 seed farms, 8 cold storages and 18 agriculture service centres. For storage of crops cultivators could avail the facility of one ware-house of F.C.I., 9 owned by state government and 5 owned by Co-operative departments.

State agriculture department is extending their services to improve agriculture in the district. Besides making arrangements for the supply of improved seeds, scientific implements, fertilizers, manures and extending improved agricultural practices, the agriculture department also gives technical advice and guidance to the cultivators on agricultural problems.

Irrigation:

The district is well provided with means of irrigation, but the proportion of irrigated to cultivated land is somewhat low, although the irrigation potential of the district has kept on mounting. The district is deprived of Canal network. Among other sources of irrigation, government tube wells were 439 and private tube wells were 2,832 in number. Majority of farmers were dependent on pumping sets which were 124,181 in number during 1998-99. Cultivators also irrigate from wells and rivers. They also use Persian wheels.

Animal Husbandry :

Animal husbandry has special place in the national economy. It is an integral part of the rural economy. Keeping in view of the growing importance of the animal husbandry, live-stock Census is undertaken every five years. According to the cattle census of 1993, the district had 727,648 bovine population, 260,598 buffaloes, 28,261 sheeps, 190,225 goats and 39,874 pigs. To improve the health and progeny of animals, the district had the services of 35 Veterinary dispensaries, 39 animal development centres, 32 artificial insemination centres and 6 pig development centres during 1998-1999.

After the establishment of milk Co-operatives emphasis is being given on increasing of milk production in the district. There were 64 milk Co-operative societies during 1997-98.

Fishery :

The rivers and lakes of the district abound with fish of many varieties. The common species are rohu, bhakur, nain, parhin, tengan and mahaseer. Fish find a ready sale in the local markets and are used as a food by a good number of people. The Tharus are expert fishermen, while other castes mainly engaged in fishing are Kahars, Pasis, Mallahs and Kewats.

The main activities of the fisheries department are development and exploitation of reservoirs for pisiculture and supply fingerlings to private breeders. After the division of the district, during 1998-99 there was only one departmental pond. Fisheries department in the same year had distributed 9,565 thousand fingerlings.

Industry :

Industrially the district has not developed appreciably due to lack of infra-structural facilities. Only such industries are in vogue as to provide the modest need to the rural population. Among heavy industries a telephone industry at Mankapur (I.T.I.) and few sugar mills are worth mentioning. According to the annual industrial survey of 1992-93 there were only 22 factories working in the district employing 8,006 workers. Production value of these factories were worth Rs.4,953,082. During 1998-99, total number of village and small scale industries were 2,197.

Trade and Commerce:

The trade of the district mainly comprised of agricultural produce. The export pattern of the district is still dominated by agricultural commodities such as wheat, paddy, arhar, gram, peas, mustard seed, maize etc. The imports of the district is mainly of general merchandise, raw materials for various industries, machinery, cloth, metal goods, leather goods, medicines, and fertilizers.

Transport :

Communication is an important aspect of developing economy. Transport facility can broadly be classified into two categories-rail transport and road transport. During 1998-99 broad gauge railway track ran to the length of 99 kms and 82 kms of meter gauge. There were 24 railway stations including halts. By road transport the services of buses of state road transport corporation and private operators trucks and taxis are main mode conveyance. There were 61 regular bus stoppages in the district. Total length of roads during 1997-98 was 1,503 kms including 7 km.of national highway and 178 kms of State highway. There was 144 kms of main district and rural roads.

Electricity and Power :

Electricity is primary infra-structural facility required for the development of economy. It is essential for every walk of life including transport and industry. Total consumption of electricity was 201,183 thousand Kwh during 1997-98 Lion share of 80,867 thousand Kwh was consumed for domestic light followed by 58,117 thousand Kwh for agriculture and 33,274 thousand Kwh for industry. 25,305 thousand Kwh for commercial lighting. All the towns of the district had electricity. 977 villages had been electrified.

Gram Panchayat, its Composition, Jurisdiction and role in village Development:

A Gram Panchayat acts as the executive of the Gram Sabha and its composition plays a vital role in village development.

Composition:

The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village Panchayat. There are 1,046 gram Sabha's in the district. It is necessary that the village Panchayat should have member belonging to the scheduled caste and also a women member. If they are not elected, then the government itself appoints two such members. The village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

It's Term:

The new Panchayat Raj act of 1993 has fixed a uniform five-year for every Panchayat It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month If need be, an emergency meeting can also be called by the Sarpanch.

Qualifications:

In order to be elected to a village Panchayat, a candidate should possess the following qualifications:
(1) He should be resident of the village concerned and his name should be in the voter's list of the village.
(2) He should be twenty-five year old.
(3) He should be mentally and physically sound.
(4) He should not be a proclaimed offender.

Functions

A Gram Panchayat is entrusted with various social, economic and judicial function.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Center opened in the village. The Panchayat has also provide land and building for such a centre.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, insectaries, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine upto Rs.100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.-

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.- In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house, but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows.

(a)All places with a municipality, corporation, cantonment board or notified town area committee, etc.

(b) A place satisfying the following three criteria simultaneously:

(i) a minimum population of 5,000;

(ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

(iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns

In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:--

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:-

(i)a city or town with one or more contiguous outgrowths,

(ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	21	Bhuiya
2	Badhik	22	Bhuyiar
3	Badi	23	Boria
4	Baheliya	24	Chamar, Dhusia,
5	Baiga		Jhusia, Jatawa
6	Baiswar	25	Chero
7	Bajaniya	26	Dabgar
8	Bajgi	27	Dhangar
9	Balahar	28	Dhanuk
10	Balai	29	Dharkar
11	Balmiki	30	Dhobi
12	Bangali	31	Dom
13	Banmanus	32	Domar
14	Bansphor	33	Dusadh
15	Barwar	34	Gharami
16	Basor	35	Ghasiya
17	Bawariya	36	Gond
18	Beldar	37	Gual
19	Beriya	38	Habura
20	Bhantu	39	Hari

40	Hela	56	Nat
41	Kalabaz	57	Pankha
42	Kanjar	58	Parahiya
43	Kapariya	59	Pasi, Tamali
44	Kharwal (excluding Banbasi)	60	Patari
		61	Rawat
45	Khairaha	62	Saharya
46	Kharwar	63	Sanaurhiya
47	Khatik	64	Sansiya
48	Khorot	65	Shilpkar
49	Kol	66	Turaiha
50	Kori	**Scheduled Tribes**	
51	Korwa	1	Bhotia
52	Lalbegi	2	Buksa
53	Majhwar	3	Jaunsari
54	Mazhabi	4	Raji
55	Musahar	5	Tharu

Literacy

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker.'

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops–tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or

social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing) Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate -

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)-

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.--

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)-

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)-

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \text{S ASFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Total marital fertility rate (TMFR)-

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \text{å ASMFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Age-specific mortality rate (ASMR)-

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2-

Probability of dying between birth and age 2.

q5-

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant death during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz. Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)-

$$\frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)-

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still-births during the year}} \times 1000$$

Maternal mortality rate -(MMR)-

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age-group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)-

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)-

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration:

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration:

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/ his birth or last residence were recorded.

Rural-Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units:

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/ Municipal Council, Municipality etc.

Size class of UA / town-

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area:

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 2,765,586 in which 2,571,267 live in rural and rest 194,319 in urban parts. There are 4 tahsils in district namely Gonda, Colonelganj, Tarabganj, and Mankapur which are sans urban population. The most populous tahsil is gonda followed by Colonelganj, Tatabganj and Mankapur is least populated tahsil. The urban population in the district is 7.0 percent. The urban population is maximum at 66.5 percent of the total urban population of the district in Gonda tahsil. There are 1,821 revenue villages in which 6 are un-inhabited. The total rural population of 2,571,267 is spread over in 16 CD blocks and 3 inhabited forest villages. The most populous CD Block is Paraspur with a population of 203,937, but the maximum number of inhabited villages (173) are in Chhapia CD Block. About half of populated villages have a population in the size of 500-99 and 1000-1999 and such villages form as high as 58.5 percent of total populated villages. Although 68.9 percent population living in (63.9 per cent) villages are in a population density range of 501+ per square kilometer and the number of such villages are 1,159.

Size-class and status of towns:

In the total urban population of 120,301 live in Gonda NPP the next big town is Colonelganj with a population of 24,142. The Gonda NPP is class I town and Colonelganj NPP class III towns with civic status of Nagar Palika Parishad (NPP). Rest of 5 towns are NPP (1), N.P. (3) and one is C.T., out of which one town is class IV town and rest four are class V towns. Gonda tahsil contains 2 towns, Colonelganj tahsil has 2 towns, while Tarabganj tahsil has only one town and Mankapur tahsil has 2 towns.

Population growth:

At the present territorial jurisdication the population of the district was 2,204,445 at 1991 Census and growing by 25.5 percent during the decade 1991-2001, it is 2,765,586 at 2001 Census. The decadal growth at 25.5 percent in the district has been at near equal level than in the state at 25.8 percents.

Population Density:

The district has an area of 4,003 square kilometre. The population density in the district is 691. In the rural areas of the district the density is 648.

Sex-Ratio:

The sex-ratio in the district at 906 is way ahead to 898 at the state level. Indeed the sex-ratio at the district has been all along higher in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is higher in rural areas. Among tahsils, highest sex-ratio is in Mankapur and lowest in Gonda. Among CD Block the sex-ratio is highest in Wazirganj at 937 and lowest in Forest villages at 860 . Out of 1,815 inhabited villages in the district there are 27.5 percent villages (with 33.0 percent of rural population) which are having a sex-ratio within 850-899. In the urban parts of the district the sex-ratio is 849 and highest of 961 in Katra NP and lowest of 817 in Gonda NPP. The sex-ratio of population in the age-group 0-6 is 952 in the district. As against a sex-ratio of 954 in the age-group 0-6 of rural population of the district, it is highest at 976 in Itia Thok Block and lowest at 937 in Jhanjhari C.D. Block. It may be noted that out of 1,815 inhabited villages in the district in 20.8 percent of villages with 24.7 percent of rural population the sex-ratio in the age-group 0-6 is between 1000-1099. As against the 0-6 age-group, sex-ratio of 954 in the rural area of the district is only 908 in urban. Among towns this sex-ratio is highest at 1,065 in Khargupur NP and lowest at 884 in Mankapur NP.

Work Participation Rate:

In the total population of the district as much as 34.0 percent are workers and rest of 66.0 percent are non-worker. Among worker 25.4 percent are main workers and rest of 9.3 percent are marginal workers of total population. In absolute terms females are less number against males as main worker and more in marginal workers. The extent of main workers is highest at 26.6 percent in Mankapur tahsil and lowest at 23.9 percent in Tarabganj tahsil. In case of marginal workers the population is highest in Mankapur tahsil as 14.2 percent in compersion to only 7.9 percent in Tarabganj, Colonelganj and 6.8 percent in Gonda tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. In the district among workers 59.7 percent are cultivators and 13.7 percent other workers. At district level 47.5 percent of female workers are engaged as cultivators.

Literacy:

In the district 42.6 percent population is literate. The literacy is 72 8 percent in urban areas and 40.2 percent in rural areas. The male literacy is as highest 56 4 percent as against 27.2 percent females literacy, and therefore, the gap in male/female literacy rate is 29.2 percentage points. In rural areas among 16 CD Blocks, the highest literacy is at 43.7 percent in Chhapia and lowest at 30.7 percent in Katar Bazar. The literacy among males in rural areas is 54.5 percent in comparison to 24.2 percent among females. The lowest female literacy 14.7 percent is in Katra Bazar CD Block. The gap in male/female literacy rate is highest in Wazirganj CD Block which is 33.2 percentage points. In 30.2 percent of villages covering also 29.1 percent of rural population the literacy range is 41 to 50. Among urbanites in the district, as much as 98.7 percent males are literates as against 65.6 percent females. The highest urban literacy is in I.T.I. Mankapur C. T. 95.0 percent and lowest in Katra NP at 50.2 percent The maximum males literacy is also found in Mankapur at 98.7 percent and lowest at 60.9 percent in Katra NP. However, the highest females literacy is in I.T.I. Mankapur C.T. 91.1 also percent and lowest at 38.8 percent in Katra NP. Still, the maximum gap in male-female literacy rate at 22.1 percentage points is found in Katra NP. The literacy among Scheduled Castes is 15.7 percent, in the countryside it is 28.6 percent and 54.6 percent in towns. There is no percentage of literacy in Scheduled Tribes at district level. Only 60 persons out of 182 Scheduled Tribe population are found literate in the district.

(viii) Brief Analysis of Primary Census Abstract Data based on inset Tables 1 to 36:

Primary Census Abstract gives data up to C.D. Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	District Total	**2,204,445**	**2,054,858**	**149,587**	**2,765,586**	**257,1267**	**194,319**	**25.5**	**25.1**	**29.9**	**6.8**	**7.0**

* 1991 census figures not recasted.

The growth rates of each tahsil for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 25.5 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 25.1 and 29.9 per cent respectively. Out of the total population of the district 93.0 per cent live in rural areas while 7.0 per cent live in urban areas of the district

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1815 inhabited villages, 81 (4.5 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 293 villages having 16.1 per cent villages of the district while in the size class of 500-999 population claims 50 villages with 27.5 per cent of the total villages in the district. 563 villages (31.0 per cent) are in the size class of 1,000-1,999 and 378 villages (20.8 per cent) are in the size class of 2,000 and above population. The biggest village in the district having population of 12,712 persons is located in Babhanjot C.D. block of district.

TABLE 3
NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL (ii) Census town - : NIL
(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	226	12.5	320,603	12.5
20-Nov	1	0.1	12	0.0
21-50	6	0.3	1,114	0.0
51-100	10	0.6	2,620	0.1
101-200	50	2.8	48,151	1.9
201-300	84	4.6	100,883	3.9
301-500	279	15.4	327,246	12.7
501 +	1,159	63.9	1,770,638	68.9
Not known	0	0.0	0	0.0
District Total	**1,815**	**100.0**	**2,571,267**	**100.0**

Population Density (Rural) of the district: 648

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 1,159 accounting for 63.9 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 68.9 per cent population. The lowest ranges of 0-10 persons per sq. km. cover 226 villages (12.5 per cent), while the corresponding proportion in the lower range of 51 to 100 is 0.6 per cent of the total inhabited villages having 0.1 per cent population of the district. In the medium density ranges of 101-200 and 201-300 persons account for 2.8 and 4.6 per cent of inhabited villages respectively. Both these ranges claim 5.8 per cent rural population. The district has 648 rural density population.

Table-5: SEX RATIO OF STATE AND DISTRICT 1901-2001

Census Year	UTTAR PRADESH			GONDA		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	965	964	974
1911	916	922	866	966	971	833
1921	908	918	834	957	962	806
1931	903	916	813	954	963	773
1941	907	922	824	945	952	797
1951	908	922	827	931	936	829
1961	907	921	817	942	948	830
1971	876	884	826	881	884	823
1981	882	889	850	900	904	841
1991	876	879	864	877	878	854
2001	898	904	876	906	910	849

As per 2001 Census sex-ratio of 906 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was high as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 877 females per 1000 males were recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both the district and state in each census year.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Gonda	889	901	821
2	Colonelganj	905	905	908
3	Tarabganj	919	920	914
4	Mankapur	921	922	895
	District Total	**906**	**910**	**849**

Table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 906 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas. The sex-ratios among rural and urban population is 910 and 849 females respectively. The sex-ratio in the tahsils varies between 889 in Gonda tahsil and 921 females per 1,000 males in Mankapur tahsil. The sex-ratio in Tarabganj and Mankapur tahsils are higher than district rural average (910). In urban areas the highest sex-ratio is recorded in Tarabganj (914) and the lowest is in Gonda (817).

TABLE 7 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Rupaidih	890

11	Tarabganj	913
12	Wazirganj	937
13	Nawabganj	909
14	Mankapur	906
15	Babhanjot	933
16	Chhapia	930
17	Forest Villages	860
	District (Rural) Total	**910**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 910 females per 1,000 males. Among the C.D. blocks the highest sex-ratio of 937 females is found in Wazirganj C.D. block and is followed by Babhanjot (933) while the lowest of 881 is recorded in Kamailganj. C.D. block. The sex-ratios of Mujhana, Haltharmau, Paraspur, Balsar, Tarabganj, Wazirganj, Babhanjot and Chhapia C.D. block are higher than the district rural average of 910 females and

in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	13	0.7	2,939	0.1

District Total	**1,815**	**100.0**	**2,571,267**	**100.0**

Sex ratio (Rural) for District: 910

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 499 accounting for 27.5 per cent of the total villages having largest population of 33.0 per cent in the district fall in the sex-ratio range of 850-899 females per 1,000 males. It is followed by the sex-ratio range of 900-949 which claims 474 villages (26.1 per cent) and 31.1 per cent population. The highest range of 1,100 and above claims 42 villages (2.3 per cent) and this range shares only 0.8 per cent rural population of the district. In remaining sex-ratio ranges of 800-849, 750-799, 700-749 and less than 700, the number of villages are 230 (12.7 per cent), 85 (4.7 per cent), 24 (1.3 per cent) and 13 (0.7 per cent) respectively. The maximum number of villages i.e 964 having maximum population (54.7 per cent) fall in the higher sex-ratio ranges of 900-949 females and above showing that in majority of villages the sex-ratio is significantly higher.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Name of U.A./ Town	Urban status of	Sex ratio
2	3	4
Colonelganj	NPP	895
Gonda	NPP	817
Industry Mankapur (Spl.	CT	932
Katra	NP	961
Khargupur	NP	884
Mankapur	NP	857
Nawabganj	NPP	914
Sex ratio (Urban) for the district: 849		

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 849 females per 1,000 males as a whole. Among the 6 statutory towns and one census town of the district, the sex-ratio varies between 817 to 961. Katra NP has the highest sex-ratio of 961, while Gonda NPP has the lowest sex-ratio of 817 females.

TABLE 10: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group

		Urban	**28,831**	**15,109**	**13,722**	**908**

Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 536,566 persons comprising 274,891 males and 261,675 females. The sex-ratio in this age-group works out to 952 females for every thousand males in the district. The sex-ratio in rural areas is higher than that of urban areas, whereas in rural and urban areas comes to 954 and 908 females in this age-group respectively. The rural sex-ratio in tahsils varies between 945 in Gonda tahsil and 962 in Mankapur tahsil The sex-ratio of Tarabganj and Mankapur tahsils are higher than district rural average (954).In urban areas of the tahsil, the highest sex-ratio is recorded in Colonelganj urban (966) and the lowest found in Mankapur urban (852).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

District (Rural) Total		**507,735**	**259,782**	**247,953**	**954**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 954 for the district (rural). The sex-ratio of C.D. blocks varies between 937 to 976. It is highest in Itia Thok C.D. block i.e. 976 followed by 975 in Nawabganj C.D. block and lowest 937 females is found in Jhanjhari C.D. block. The sex-ratio of Mankapur, Itia Thok, Karnailganj, Tarabganj, Nawabganj, Babhanjot and Chhapia C.D. blocks are higher than the district rural (954) and Katra Bazar C.D. block equals to the district average while in remaining blocks, it is below the district average sex-ratio.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population

950-999	232	12 8	80,900	15.9
1000-1099	378	20.8	125,530	24 7
1100+	305	16.8	54,087	10.7
District (Rural) Total	**1815**	**100·0**	**507,735**	**100·0**
Sex ratio (Rural) for District		**954**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e.378 (20.8 per cent) having maximum population (24.7 per cent) in the district (rural) fall in the sex-ratio range of 1000-1099 females per 1,000 males in age- group of 0-6 years. It is followed by the sex-ratio range of 1100+ which claims 305 villages (16.8 per cent) and 10.7 per cent population. Next to it, 279 villages (15.4 per cent) are in the range of 900-949 with 20.3 per cent population. Total 232 villages (12.8 per cent) having 15.9 per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of less than 700, 700-749, 750-799, 800-849, 850-899 and 950-999 claim less number of villages and these are distributed as 102 (5.6 per cent), 61 (3.4 per cent), 95 (5.2 per cent), 156 (8.6 per cent) 207 (11.4 per cent) and 232 (12.8 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 1,194 having population (65.8 per cent) fall in the higher sex-ratio ranges of 900-949 and above.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

Table 13 shows sex-ratio of population in the age-group 0-6 of urban agglomerations/towns 2001. In urban area of the district total population in this age-group is 28,831 in which 15,109 are males and 13,722 females and sex-ratio of the urban area of the district is 908. Among 7 towns sex ratio in age group 0-6 varies from 844 in Mankapur town to 1,065 in Khargupur (N.P.). In 4 towns sex ratio is more than the district average. Among 7 towns Gonda town has highest population.

TABLE 14: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the.2,765,586. Total population of the district, 15.7 per cent of the total population belong to the Scheduled Castes and 0.0 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 16.3 per cent in rural population and 6.7 per cent

in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Tarabganj tahsil (17.9) while the lowest is found in Colonelganj tahsil (13.7). The proportion of Scheduled Tribes population is 0.0 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in tahsil Gonda i.e 15 persons only.

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 16.3 per cent of rural population of the district belongs to Scheduled Castes whereas negligible percentage to Schedule Tribes. At C.D. block level, Scheduled Castes population varies between 11.7 per cent in Babhanjot and 22.2 per cent in Pandri Krapal C.D. block. The other C.D. block containing the highest percentage of Scheduled Castes are Belsar, Nawabganj,Mankapur and Chhapia. The Scheduled Tribes population in the district is mainly concentrated in Rupaidih, Jhanjhari, Mujhana, Paraspur and Tarabganj C.D. block.

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District Total	**1,815**	**100.0**	**420,390**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 97 villages accounting for 5.3 per cent of total 1815 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 140 villages (7.7 per cent). In 372 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 630 villages constituting 34.7 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 357 and 131 villages respectively. The ranges (11-40) together account for 61.6 per cent villages of the district, 88 villages fall in the range of 40 and above percent. The maximum of the 40.2 percent of the Scheduled Castes popultion is covered by range of 11 to 20 per cent.

TABLE 17: PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District Total	**1,815**	**100.0**	**136**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. A negligible percentage of rural population of the district belong to Scheduled Tribes population. There are 1,806 (99.5 per cent) villages where none of Scheduled Tribes have been recorded in the district. Only 9 (0.5 per cent) villages have 100.00 per cent population and in these villages the proportion of Scheduled Tribes population ranges between 1-10 persons .

District (Rural) Total		**905**	**766**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 905 for district (rural). Among the C.D.blocks, the highest sex ratio of 936 females is found in NawabganjC.D. block and lowest of 867 females is recorded in Pandri Krapal C.D. block.

This table also shows sex-ratio of Scheduled Tribes population in rural areas of the district is 766 which is below than the sex ratio (906) at the district level. The sex-ratio of Mujhaha and Tarabganj C.D. blocks are above the parity line(766) while in remaining C.D.blocks (Rupaidih, Jhanjhari and Paraspur) the sex ratio is lower than the parity line.The lowst sex-ratio of 565 females is recorded in Rupaidih C.D. block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Colonelganj (NPP)	958	0

District and tahsil-wise literacy rate besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rate are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population (excluding 0-6 years) comes to 42.6 per cent in the district. This proportion in rural area is 40.2 per cent against 72.8 per cent in urban areas. In the district the literacy rates of males (56.4 per cent) is much higher than that of females (27.2 per cent). Among the tahsils, Gonda tahsil tops with 44.5 per cent literates followed by Mankapur tahsil (44.4 per cent). Colonelganj tahsil with 38.5 per cent literates stands at the bottam in the

district. Out of 4 tahsils, the literacy rate of 2 tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rate is higher than the rural areas.

The gap between male and female literacy is very high which comes to 29.2 per centage points in the district.The trend at tahsil level is not much different. However, this gap in urban literacy is low, which comes to 13.2 against the rural areas, where the gap between male and female literacy rate is 30.3 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Table 22 reveals the number of literates, illiterates and the literacy rate in rural areas at C.D. block level in the district. 40.2 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 54.5 and 24.2 per cent respectively which shows very wide gap of 30.3 percentage points in male and female literacy. At C.D. block level, Chhapia C.D. block has the highest rural literacy rate of 47.3 per cent while 62.2 per cent males and 31.1 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Katra Bazar C.D. block (30.7 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 33.2 percentage points is found in Wazirganj C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

100	1	0 1	8	0 0
District Total	1,815	100.0	2,571,267	100.0

Literacy rate for District: 42.6

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 2 villages (0.1per cent) of the district and population of these villages is only 13 persons. One village (0.1per cent) has all the literate population. 278 villages accounting for 15.3 per cent of the total villages are in the literacy range of 51-60 per cent and 77 villages (4.2 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 1,448 villages (79.8 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 10 villages (0.6 per cent). The range of 21-60 have the maximum number of 1,629 villages covering 89.7 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX URBAN AGGLOMERATIONS / TOWNS, 2001

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates in Gonda town is way ahead of other towns. Above table reveals that literacy rate is pretty high in the urban areas of the district. The literacy rate is quite high (above 85.0 per cent in two towns) among males. Female literacy rate is not a behind in I.T.I Mankapur C.T (above 90.0 per cent). However, literacy rate among females is very low (38.8 per cent) in Katra town. thus the gap in male female literacy rate is very high (22.1 percentage points).

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in C.D blocks 2001. In rural areas of the district proportion of literates is 28.6 per cent in which 41.9 per cent are males and 13.7 females. Thus, the gap in male and female literacy rate is 28.2. Among 17 C.D.-blocks, 4 C.D. blocks have the highest literacy rate and 13 C.D. blocks have the lowest literacy rate. The gap in male/female literacy rate in Wazirganj C.D. block is highest and this gap is lowest in Katra Bazar C.D. block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

Table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. The number of illiterates is more than literates in the district (urban) except I.T.I Mankapur CT. The percentage of literacy is least in Khargupur (NP) among 7 towns but the gap in male/female literacy rate is highest in case of Mankapur NP. The males in all the 7 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Colonelganj NPP and highest in Mankapur NP.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

Table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in C.D. blocks at the 2001 Census. The number of illiterates is more than literate in the district rural, with exception to Babhanjot C.D. block. The literacy rate of the Scheduled Tribes population at 24.3 per cent is lower than the corresponding rate of 28.6 per cent in case of Scheduled Castes community. The gap in male and female literacy rate at 17.3 percentage points is also less than what it is in case of the Scheduled Castes community (23.9 per cent). The literacy rate is highest in Jhanjhari C.D. block and lowest in Tarabganj C.D. block. Mankapur C.D. block has no scheduled tribe population. The gap in male/female literacy rate in Rupaidih and Tarabganj C.D. blocks are in favour of females.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population

	District (Urban) Total	**34**	**25**	**9**	**12**	**2**	**10**	**85.0**	**100.0**	**60.0**	**40.0**

Table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. there is small Scheduled Tribes population in the towns of the district. In 5 towns there is no Scheduled Tribe population. In Gonda NPP and I.T.I. Mankapur CT towns which have Scheduled Tribe population, the percentage of literates is 82.9 and 100.0 per cent out of which males are 100.00 while females are 57.1 and 100.00 per cent literates respectively. The gap in male/female literacy in Gonda and I.T.I Mankapur towns are 42.9 and 0 per cent respectively.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out to 31.3 per cent of the total population in the district. The total workers are comprised of 24.5 per cent of main workers and 6.8 per cent of marginal workers and the remaining 68.7 per cent are non-workers.

Among the main workers, males participation rate in the district is 42.9 per cent and 5.7 per cent of females. Male and female marginal workers account for 7.5 and 10.1 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 31.3 per cent in Gonda tahsil to 40.8 per cent in Mankapur tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 2,571,267 total rural population of the district, 25.4 per cent has been categorized as main workers and the marginal workers constitute 9.3 per cent and the remaining 65.4 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 43.2 per cent males and 5.8 per cent females are in the category of main workers. Male and female marginal workers account for 7.9 and 10.7 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level except Jhanjhari and Colonelganj C.D. block.

The percentage of total rural workers of the district comes to 34.6 per cent. At the C.D. block level, Babhanjot has highest proportion of total workers forming 47.3 per cent of the total population. It is closely followed by Mankapur (39.6 per cent), Haldharmau (35.5 per cent), Katra Bazar (34.9 per cent), Mujhana (34.5 per cent) and Paraspur 34.3 per cent. The lowest percentage of 28.7 per cent is recorded in Jhanjhari C.D. block.

Table 33 indicates that as against 22.9 per cent of main workers in the urban areas of the district, such workers are as high as 27.5 per cent in Khargupur town. Among total population 24.9 percent are workers (Main + marginal) in which 22.9 are main workers and 2.0 per cent are marginal workers. Remaining 75.1 per cent are non-workers in total urban areas of the district. Except non-worker the participation of males is higher than females.

Note: Percent of Worker to total worker are given in brackets.

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 59.7 per cent of the total workers (main + marginal) and remaining 23.9 per cent of total workers are engaged as agricultural labourers, 2 7 per cent, as household industry workers and 13.7 per cent as other workers in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 53.6 per cent in Gonda tahsil and 64.2 per cent in Colonelganj tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of males cultivators is 63.1 per cent which is high as compared to 47.5 per cent of female cultivators in the district. The percentage of household industry workers is very low in the district as stated above The workers in other activities occupy the second position next to agriculture labourers in the district as well as in each tahsil. The highest proportion of 21.0 per cent of other workers is recorded in Gonda tahsil while the lowest proportion of 9.9 per cent is found in Colonelganj tahsil.

Note. Percent of Worker to total worker are given in brackets.

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main-marginal) are 34.6 per cent of total population. Among these workers, cultivators constitute 62.7 per cent, 24.9 per cent agricultural labourers, 2.5 per cent household industry workers and 9.9 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.5 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of males (66.9 per cent) is higher than males (48.4 per cent) in the rural areas of the district. The males play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 75.2 per cent in Katra Bazar C.D. block to 47.2 per cent in Jhanjhari C.D. block. Similarly for other workers the lowest proportion is 4.0 per cent in Katra Bazar C.D. block while 26.1 per cent is the highest in Jhanjhari C.D. block. The percentage of household industry workers together is quite low i.e. only 2.5 per cent in the district. The percentage of agricultural labourers is highest in Nawabganj (36.5 per cent) block and is followed by Babhanjot.Similarly, household industry workers varies in C.D. blocks between 3.9 per cent in Jhanjhari and 30.7 per cent in Katra Bazar

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban area has recorded highest percentage of other workers (84.5 per cent), followed by house hold industry workers 6.7 per cent (6.3 per cent male and 10.2 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (23.8 per cent) is recorded in Katra NP. In the agriculture labourers category Mankapur NP recorded very low percentage (0.2). The percentage of household industry workers varies from 13.6 per cent in Khargupur NP to 0.4 per cent in I.T.I. Mankapur. As the usual trend recorded in the urban areas, other workers are in high percentage (98.8 per cent in I.T.I. Mankapur, 91.6 per cent in Mankapur and 88.1 per cent in Gonda (NP).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset table 37-47:

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1,815 inhabited villages in the district 1,345 villages or 74.1 per cent have been provided with the educational facilities of one type or the other. Similarly 474 villages in the district constituting 26.1 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1803 or 99.3 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 330 villages constituting 18.2 per cent of villages have been provided with post office facility within the village. 687 or 37.9 per cent villages have been provided with the telephone facility, 72 or 4.0 per cent with transport facility, 84 or 4.6 per cent villages with bank facility and 114 or 6.3 per cent with agricultural credit societies. Similarly there are 842 or 46.4 per cent villages which have been linked with pucca road. Total 1,065 or 58.7 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block have been found with slight variation. Tarabganj C.D. block has the high-

est 91.9 per cent villages where educational facility is available and lowest 58.4 per cent is found in Chhapia. Medical facility is highest in Jhanjhari (70.0 per cent) and lowest (8.2 per cent) in Wazirganj C.D. block. Improved drinking water is available to cent-percent villages in Rupaidih, Itia Thok, Mujhana, Katra Bazar, Karnailganj, Tarabganj, Wazirganj, and Babhanjot blocks while in other block, it is above 96.0 per cent. Telephone facility is highest in Jhanjhari (62.9 per cent) and lowest in Rupaidih C.D. block (14.8 per cent). Transport and communications is not developed in Wazirganj where only 4.0 per cent villages are covered by this facility whereas 9.4 per cent villages of Paraspur C.D. block are availing this facility. Only 1,065 villages (58.7 per cent) have been covered with power supply in the district.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C.D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

Note . - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different type of amenities. Out of total rural population of 2,571,267 persons in the district, 2,289,494 or 89.0 per cent have educational facility of one or the other type. Similarly 912,831 or 35.5 per cent population has medical facilities while 2,557,927or 99.5 per cent have got improved drinking water facility. Post office facilities are available to 916,652 or 35.6 per cent population. Telephone facility is available to 1,305,136 or 50.8 per cent. Transport communications facility is available to 199,409 or 7.8 per cent. Bank facility is available to 259,940 or 10.1 per cent.311,433 or 12.1per cent have been provided with the facility of agricultural credit societies. 1,481,741 or 57.6 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,826,834 or 71.0 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level except Wazirganj C.D. block which is difficult area of the district. However, in Jhanjhari C.D. block facilities of educational, medical and improved drinking water are available to larger proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of		Distance range of place from the villages where the amenity is available			
		Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)

7.	Agricultural Credit Societies	1,134	417	150	1,701

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 498 villages do not have primary school in their villages and out of these villages, children of 424 villages have to travel less than 5 kms. for schooling .Out of 1,815 inhabited villages as many as 1,548 are deprived of middle school and 1,802 of degree college. Of these 943 avail the facility of middle school at a distance of less than 5 kms., 528 at a distance 5-10 kms. and the remaining 77 at a distance of 10+ kms. In respect of degree college 254 avail this facility at a distance of less than 5 kms,398 between 5 to 10 kms. and rest 1,150 villages at a distance of 10+ kms.

Similarly there are 1,177 villages in the district which have been devoid of Hospital facility and 1,790 villages which are deprived of PHC facilities. Of these 365 villages have the facility of Hospital available within 5 kms. while in respect of 595 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 817 villages have this facility at a distance of 10+ kms. As regards PHC 334 avail this facility at a distance of less than 5 kms., 741 at a distance of 5-10 kms. and the remaining 715 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,485 villages do not have this facility in the village itself. Of these majority i.e. 1,106 have this facility at a distance of less than 5 kms., another 354 villages avail it at a distance of 5-10 kms. In the remaining 25 villages inhabitants have to travel a distance of 10+

kms.

As regards Telephone, there are 1,128 villages in the district which are without Telephone facilitiy. Of these 661 avail this facility at a distance of less than 5 kms., 293 at a distance of 5-10 kms. and remaining 174 have to traverse a distance of 10+ kms.

For Bus service out of 1,770 villages which do not have facility, 832 villages avail this facility at a distance of less than 5 kms., 661 at a distance between 5-10 kms. and 577 at a distance of 10+ kms.

In the entire district 1,734 villages are deprived of Commercial Bank and 1,799 of Co-operative Bank. Of these 1,734 villages which are deprived of Commercial Banks 905 villages avail this facility at a distance of less than 5 kms., 659. between 5-10 kms. and the remaining 170 at a distance of 10+ kms. Regarding Co-operative Banks out of 1,799 villages 354 villages avail this facility at a distance of less than 5 kms., 783 at a distance of 5-10 kms. and remaining 662 at a distance of 10+ kms. 1,701 villages do not have agricultural credit societies. This facility to 1,134 villages is available at a distance of less than 5 kms., 417 at a distance of 5-10 kms and the remaining 150 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1,815 inhabited villages in the district, there are 139 villages which are nearest to the towns with a distance of less than 5 kms. Of these only 111 villages forming 79.9 per cent of these total villages, are having the educational facilities of one type or the other and 47 villages constituting 33.8 per cent, have the medical facilities, 22 villages forming 15.8 per cent have the facility of post office and 67 or 48.2 per cent have the facility of telephone. 12 villages constituting 8.6 per cent have been linked by transport service.10 villages comprising 7.2 per cent have been provided bank facilities, while 8 villages constituting only 5.8 per cent have been provided by agricultural credit societies. 95 villages comprising 68.3 per cent have been provided with pucca road with a distance of less than 5 kms.

There are 889 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 663 villages constituting 74.6. per cent have been provided with the educational facilities. 252 villages comprising 28.3 per cent have been provided with medical facilities. 166 villages constituting 18.7 per cent enjoy the post office facility. 366 villages comprising 41.2 per cent have been provided the telephone facility. 29 villages constituting 3.3 per cent have been linked with transport communications. 40 villages comprising 4.5 per cent have bank facility. 50 villages constituting 5.6 per cent are having agricultural credit societies, while 440 villages or 49.5 per cent are approachable by pucca road. Out of total 666 villages fall in the distance range of 16-50 kms. Of these, 71.0 per cent villages have educational facility, 20.0 per cent with medical, 18.5 per cent with post office, 32.1 per cent with telephone and transport and communications available to 3.6 per cent villages. Banks and agricultural credit societies facilities are available to 4.2 and 6.9 per cent of villages.

There are 2 villages in the district which are situated beyond 50 kms.from the nearest town and out of these one or 50.0 per cent enjoy the educational, at post office facility and linked by pucca roads. Not a single village have a facility of medical, telephone, transport, bank and agricultural credit socities. There are 119 villages whose distance

ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 97 or 81.5 per cent villages have the educational facility of one or other type. 42 villages comprising 35.3 per cent have been provided with medical facilities, 18 villages constituting 15.1 per cent enjoy the post offict facility, 40 villages comprising 33.6 per cent have been provided the telephone facility. 7 villages constituting 5.9 per cent have been linked with transport communication, 6 villages comprising 5.0 per cent have bank facility, 10 villages constituting 8.4 per cent are having agricultural credit societies while 57 villages or 47.9 per cent are approachable by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

$ Transport communication includes bus service, rail facility and navigable waterways

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district out of a total 1,815 inhabited villages, overwhelming 374 villages have a population of less than 500 persons. Of these, 117 villages (31.3 per cent) have educational facility, 52 (13.9 per cent) have medical facility, 371 (99.2 per cent) have improved drinking water facility. 59 (15.8 per cent) have telephone facility. 8 (2.1 per cent) have been linked by bus service. 7 (1.9 per cent) have Bank facility. 109 villages (29.1 per cent) have been linked with pucca road. 132 villages (35.3 per cent) have been provided with electricity. Not a single village have a post office and agricultural credit societies facility.

Out of 500 villages, which fall in the population range of 500-999 persons, 345villages (69.0 per cent) have been provided with the educational facility, 94 (18.8 per cent) with medical facility, 496 villages (99.2 per cent) have improved drinking water facility. 50 villages (10.0 per cent) have been provided with post office facilities, 139 villages (27.8 per cent) with telephone facility, 10 villages (2.0 per cent) with transport facilities, 11villages (2.2 per cent) with bank facility, 16 villages (3.2 per cent) with agricultural credit societies and 199 villages (39.8 per cent) have approach by pucca road. and 244 villages (48.8 per cent) have been provided with electricity.

563 villages fall in population range of 1,000-1,999 persons. of these, 516 villages (91.7 per cent) have educational facility. Whereas 70 villages (30.2 per cent) enjoy the medical facility, 560 villages (99.5 per cent) have improved drinking water facility 91 villages (16.2 per cent) have post office facility, 264 villages (46.9 per cent) have telephone facility, 15 villages (2.7per cent) have transport communications facilities, 21 villages (3.7per cent) have bank facilities, 41 villages (7.3 per cent) have agricultural credit societies 284 villages (50.4 per cent) have approach by pucca road and 386 villages (68.6 per cent) have been provided with power supply.

There are 340 villages in the district which are covered under 2,000-4,999 population range. Of these, 333 villages (97.9 per cent) have educational facility. 134 villages (37.4 per cent) have medical facility, 338 villages (99.4 per cent) have drinking water facility, 155 villages (45.6 per cent) have post office facility. 197 villages (57.9 per cent) have telephone facility. 30 villages (18.8 per cent) have transport facility. 32 villages (9.4 per cent) have bank facility, 44 villages (12.9 per cent) have agricultural credit societies facility. 219 villages (64.4 per cent) have links by pucca road and 271 villages (79.7 per cent) have been provided with electricity. There are 38 villages in the district having a population of 5,000 persons or above.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Rupaidih	155	18563.1	39.8	93.6

17	Forest Villages	3	N.A	N.A	N.A
	District Total	**1,815**	**372796.2**	**77.5**	**77.4**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,815 inhabited villages in the district having a total area of 372,796.2 hectares. Of this, 77.5 per cent is cultivable and 77.4.per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that 16 blocks with 1815.villages have a total area of 372,796.2 hectares, of this 77.5 per cent of land is cultivable and of the aforesaid area 77.4 per cent is irrigated. In Rupaidih. block, all the 155.villages have a total land area of 18,563.1 hectares, of this 39.8 per cent of land is cultivable and of the aforesaid area 93.6 per cent is irrigated. In Itia Thok block, all the 131 villages have a total area of 23,875.7 hectares, of this cultivable area is 91.0 per cent and 93.9.per cent is irrigated. In Pandri Krapal block, all the 83 villages have a total area of 13,022.9 hectares. Of this, cultivable area is 90.9 per cent. Of cultivable area 79.6 per cent is irrigated. Jhanjhari block with 140 villages have a total land area of 26,359.0 hectares, of this 64.6 per cent is cultivable area and out of this cultivable area 78.3per cent is irrigated. Mujhana block with 83 villages has a total land area of 1,4672.0 hectares. Of this 72.1 per cent is cultivated area, out of which 96.7 per cent is irrigated. Katra Bazar block with a total 98 villages have an area of 25,740.2 hectares. Of this 85.5 per cent is cultivable area. Out of which 38.9 per cent is irrigated. In Haldhermau block with a total of 40 villages have a total land of this 84.9 per cent is cultivated area and out of which 79.8 per cent is irrigated. In Colonelganj block with a total of 108 villages have a total land area of 24,617.24 hectares of this 79 per cent is cultivated area out of which 59.7 per cent is irrigated. In Paraspur block with a total of 91 villages have a total land area of 587,25.1 hectare. Of this 39.7 per cent is cultivated area while 66.6 is irrigated. In Belsar block with a total of 81 villages have a total land area of 22,812.3 hectares. Of this 77.1 per cent is cultivated area while 50.4 per cent is irrigated. In Tarabganj with a total of 74 villages have a total land area of 32,196 hec. Of this 93.4 per cent is cultivated out of which 79.5 per cent is irrigated. Similarly in Wazirganj, Nawabganj, Mankapur, Babhanjot and Chhapia blocks with a total of 97,105, 161, 142, 173 villages have a total land area of 4,938.4 hectares, 23,492.5 hectares, 25,286.9 hectares, 22,280.4 hectares, and 20,591.03 hactares respectively. In Wazirganj, Nawabganj, Mankapur, Babhanjot and Chhapia blocks the cultivated areas are 59.9 per cent, 62.4 per cent, 55.4 per cent, 80.5 per cent and 86.6 per cent while out of which 83.0 per cent, 75.6 per cent, 88.3 per cent, 82.5 per cent and 92.6 per cent are irrigated area.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		District Total	Through taxes	From all other sources	District Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)

	District Total	**122**	**13**	**110**	**109**	**32**	**21**	**43**	**0**	**12**

Table 43 gives per capita receipt and expenditure (in thousand rupees) for each town in the district. The average per capita receipt for towns of the district works out to Rs 122 of which Rs 13 are derived through local taxes and the remaining Rs 110 received from all other sources. The average of total expenditure incurred per head is Rs 109. Out of this Rs 32 are spent on general administration, Rs 21 on public health and conveniences, Rs 43 on public works, Rs12 is spent other items. Among all the six towns the receipt and expenditure recorded per head are the highest in Colonelganj NPP and the receipt of Mankapur NP is not available.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Colonelganj, NPP	3.7	1.7	0.8	0.4	0.0

3	Katra, NP	6.2	1.6	1.6	1.6	0.0
4	Khargupur, NP	2.2	2.2	2.2	1.1	0.0
5	Mankapur, NP	4.5	4.5	3.4	3.4	0.0
6	Nawabganj, NPP	8.7	2.5	2.5	1.9	0.6
	District Total	**3.8**	**1.6**	**1.1**	**1.1**	**0.1**

Table 44 shows the average number of educational institutions in urban areas of the district. According to the table the average number of primary school per 10,000 population comes to 3.8 schools, 1.6 Junior secondary/middle,1.1 secondary/matriculation, 1.1 senior secondary schools. The ratio of college per 10,000 population is 0.1 college. Among the town the ratio of primary and junior secondary/matriculation is highest in Nawabganj NPP while Mankapur NP has highest ratio of secondary/matriculation schools.In case of senior secondary school this position is also claimed by Mankapur NP. College education is available in Gonda NPP and Nawabganj NPP only.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Colonelganj, NPP	18
2	Gonda, NPP	44

	IndianTelephone Industry	E To B Exchange, Csn Exchange, Max-L	Csn Line Card, Csn Control Card, E To B
3	Mankapur, CT	Exchange	Card
4	Katra, NP	--, --, --	Maize, Pulses, Oil Seed
5	Khargupur, NP	Bell Metal, Carpet, Rice	Bell Metal, Carpets, Rice
6	Mankapur, NP	Rope, Wooden Furniture, Earthen Pots	Gur, Wood, Wheat
7	Nawabganj, NPP	English Wine, Tobacco, --	Tobacco, Sugarcane, English wine

Table 47 indicates most important articles manufactured and exported out of towns in the district. The district is well known for Indian Telephone Industry Mankapur.The chief export items of the district is Tobacco. The main items which are manufactured in Nawabganj town, those are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001 table inset tables 48-52 :

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared. In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

	District total	436,303	410,183	26,120	86,283	84,421	2,262	4,753	4,476	277

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Asse

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 436,303 consisting of 410,183 rural and 26,120 urban households. 86,683 households belong to Scheduled Castes and 4,753 to Scheduled Tribes. 422,420 households are living in their owned houses constituting 96.82 per cent of total households. Of these households, the largest number of households (135,075) have occupied double room accommodation and is followed by single roomed accommodation numbering to 110,215 households. Next position is claimed by households (84,860) occupying three plus room accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 77,356 households while 14,914 households are without any exclusive room.

9,339. households living in rented accommodation account for 2.14 per cent of total number of households in the district. The largest number of 4,515 households are living in double room accommodation followed by 2,189 households in single room accommodation. Households with three rooms and three plus are 1585 and 770 respectively. Other households numbering to 4,544 forming only 1.04 per cent of total households are distributed in single room accommodation numbering 1447 double room 1,470 and 850 in three room accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Gonda	61.6	21.1	17.2	57.6	23.3	19.1	93.7	4.0	2.3
2	Colonelganj	43.2	19.4	37.3	41.9	19.8	38.4	77.9	10.9	11.2
3	Tarabganj	46.5	17.9	35.6	45.7	18.0	36.4	78.5	14.2	7.3
4	Mankapur	64.6	21.5	13.9	63.2	22.4	14.4	97.7	1.3	1.0
District Total		**54.3**	**20.1**	**25.7**	**52.0**	**21.0**	**27.1**	**90.4**	**5.6**	**4.0**

Note.- Permanent - 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e where, burnt briks G.I Sheets, or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets, bricks, lime and stone and RBC/RCC concreate are used for roof

Semi permanent - 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary - 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 54.0 per cent of the households in the district had permanent houses. The trend is different in rural (52.0 per cent) and urban area (90.4 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Mankapur (64.6 per cent) followed by Gonda (61.6 per cent), Tarabganj (46.5 per cent) and lowest in Colonelganj (43.2 per cent) In respect of semi-permanent houses, the returns were 20.1 per cent of district level where as among tahsil in Mankapur it was 21.5 per cent and lowest was 17.9 per cent in tahsil Tarabganj Rural areas represented a similar ratio at district and tahsil level but semi permanent house in the urban areas were in the proportion range of 1.3 to 14.2 per cent. Temporary houses in the district lie between the range of 13.9 to 37.3 per cent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note: Percentage is given in brackets after the number of households. Bathroom means bathroom within the house. Toilet means toilet within the house. Drainage means closed and open drainage

The above table shows that out of total households of the district 90.9 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 90.5 and 98.1 per cent. Tahsil Tarabganj had higher order of proportion of households where percentage for rural area was 91.8 and 96.3 per cent in urban areas. Electricity was available for 19.5 per cent of households at district level households of the district had better access of electricity. Bathrooms and toilet facilities were available in 23.5 and 14.6 per cent of households. Tahsil Colonelganj poorly served in respect of these amenities. At district level drainage facility was available for 57.1 per cent of households. Whereas the proportion of rural and urban areas households accounted to 54.9 and 91.3 per cent.

Percentage in brackets

Data source: Census of India 2001, H-series, Tables on Houses, Households amenities and Assets.

It is observed from the above table that 65.3 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is 67.7 and in urban area it comes to 27.2 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 3.9 per cent of the households. The composition of rural and urban comes to 1.4 and 43.6 per cent respectively. Kerosene is used for cooking in as many as 2.4 per cent of the households (to 1.1 per cent rural and to 23.5 per cent urban households). The other methods like crop residue, cowdung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between to 0.1 per cent to 15.2 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, LPG (cooking gas) and kerosene are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total number of house-holds	Total number of households availing banking services	Availability of household assets				Availability of household assets		None of the specified assets

Data source Census of India 2001, H-series Table on Houses, Household amenities and Assets

Above table reveals that out of the total households (436303) of the district, in all 55.4 per cent could avail banking services at district level while only 45.2, 10.5, 3.6, 78.0, 6.9 and 2.1 per cent enjoyed the availability of household assets as radio./transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively whereas only 15.7 per cent had none of the specified assets. It also reveals that at tahsil levels a highest proportion of 69.6 per cent of households were availing banking in Mankapur. It reveals that at tahsil level a highest proportion of 69.6, 49.5 and 81.5 per cent of households were availing banking services, radio/transistor and bicycle respectively in Mankapur. Similarly at tahsil level a highest proportion of 14.2, 4.9, 8.8 and 2.7 per cent of households were availing television, telephone, scooter/motorcycle and car/jeep/van respectively in the district. The highest proportion of none of the specified assets is found in Colonelganj tahsil. At tahsil level a lowest proportion of 39.9, 5.8, 2.0, 74.8, 4.1 and 1.2 per cent of households were availing banking service, television, telephone, bicycle, scooter/motorcycle, car/jeep respectively in Colonelganj. Similarly at tahsil level a lowest proportion of 40.2 per cent of households were availing radio/transistor in Tarabganj tahsil.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant activities during the decade :

No significant social, cultural or natural events have taken place in the district during the last decade. However, a major jurisdictional change has taken with the bifurcation of the district into two district. A new district of Balrampur was carved out in the year 1997 by adding three Tahsils (Tulsipur, Balrampur and Utraula) of the district Gonda.

(xii) Brief description of Places of religious, Historical or Archaeological importance in villages and places of tourist interest in the towns of the district :

Gonda :

Gonda, the district headquarters is one of the important centers for trade and commerce in the district. It is situated at a distance of about 44 Kms north-west of Faizabad and with in 88 Kms of the lower ranges of hills which are visible throughout the rains and in clear weather or other seasons of the year. Raja Seo Prasad Singh excavated a large tank known as Sagar Talab and built on the island in the middle of the lake, a temple which still exists.

Colonelganj :

The old name of the place was Sakraura. The town is an important railway station, because of its big wholesale market where maize, jute and patuwa (fibre used for making ropes) are traded.

Chhapia :

The chief interest of the place is the shrine of Swami Narain and the religious brotherhood attached to it. The temple is build of stone and marble from Mirzapur and Jaipur. A large number of pilgrims visit this place at all times of the year, but especially in the month of Kartik and on Ram Navami.

(xiii) Major Characteristics and Contribution of the District :

District Gonda like many surrounding district is inhabited by peace loving persons. However patriotism and valour was seen during the long freedom movement. Many brave men sacrificed their lives for the cause of independence from the British rulers. The district has produced many eminent leaders during the era of freedom movement Raja Devi Baksh Singh was great leader of this district. The contribution of this district in the freedom movement can be gauged by the fact that many national leaders like Lala Lajpat Rai, Motilal Nehru, Jawaharlal Nehru, Madan Mohan Malviya and Subhash Chandra Bose have inspired the people for freedom movement.

In the literary field, the district can boast of having produced a number of worthies who attained some measure of literary fame. Beni Madho Das of this district was a disciple and companion of Tulsi Das. He wrote Goshain Charitra, Madan Gopal was a noted poet. Ghagh pandit was born at Gonda in 1530. His practical knowledge in the field of astrology rendered his great popularity, particularly amongst peasantry of the state. Ganga Prasad Srivastava, a popular name in the field of Hindi literature also belonged to Gonda . Asgar Husain 'Asgar', a notable Urdu poet made Gonda his home Sikandar Ali 'Jigar' was another distinguished Urdu poet who made Gonda his home. He is popularly known as Jigar Moradabadi.

(xiv) Scope of Village Directory & Town Directory

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of newspaper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/ names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART - A-VILLAGE AND TOWN DIRECTORY
(SECTION I AND II)

SECTION I - VILLAGE DIRECTORY

Section - I : Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , their amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares is given. Wherever the area figure was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets.

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village,

whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village

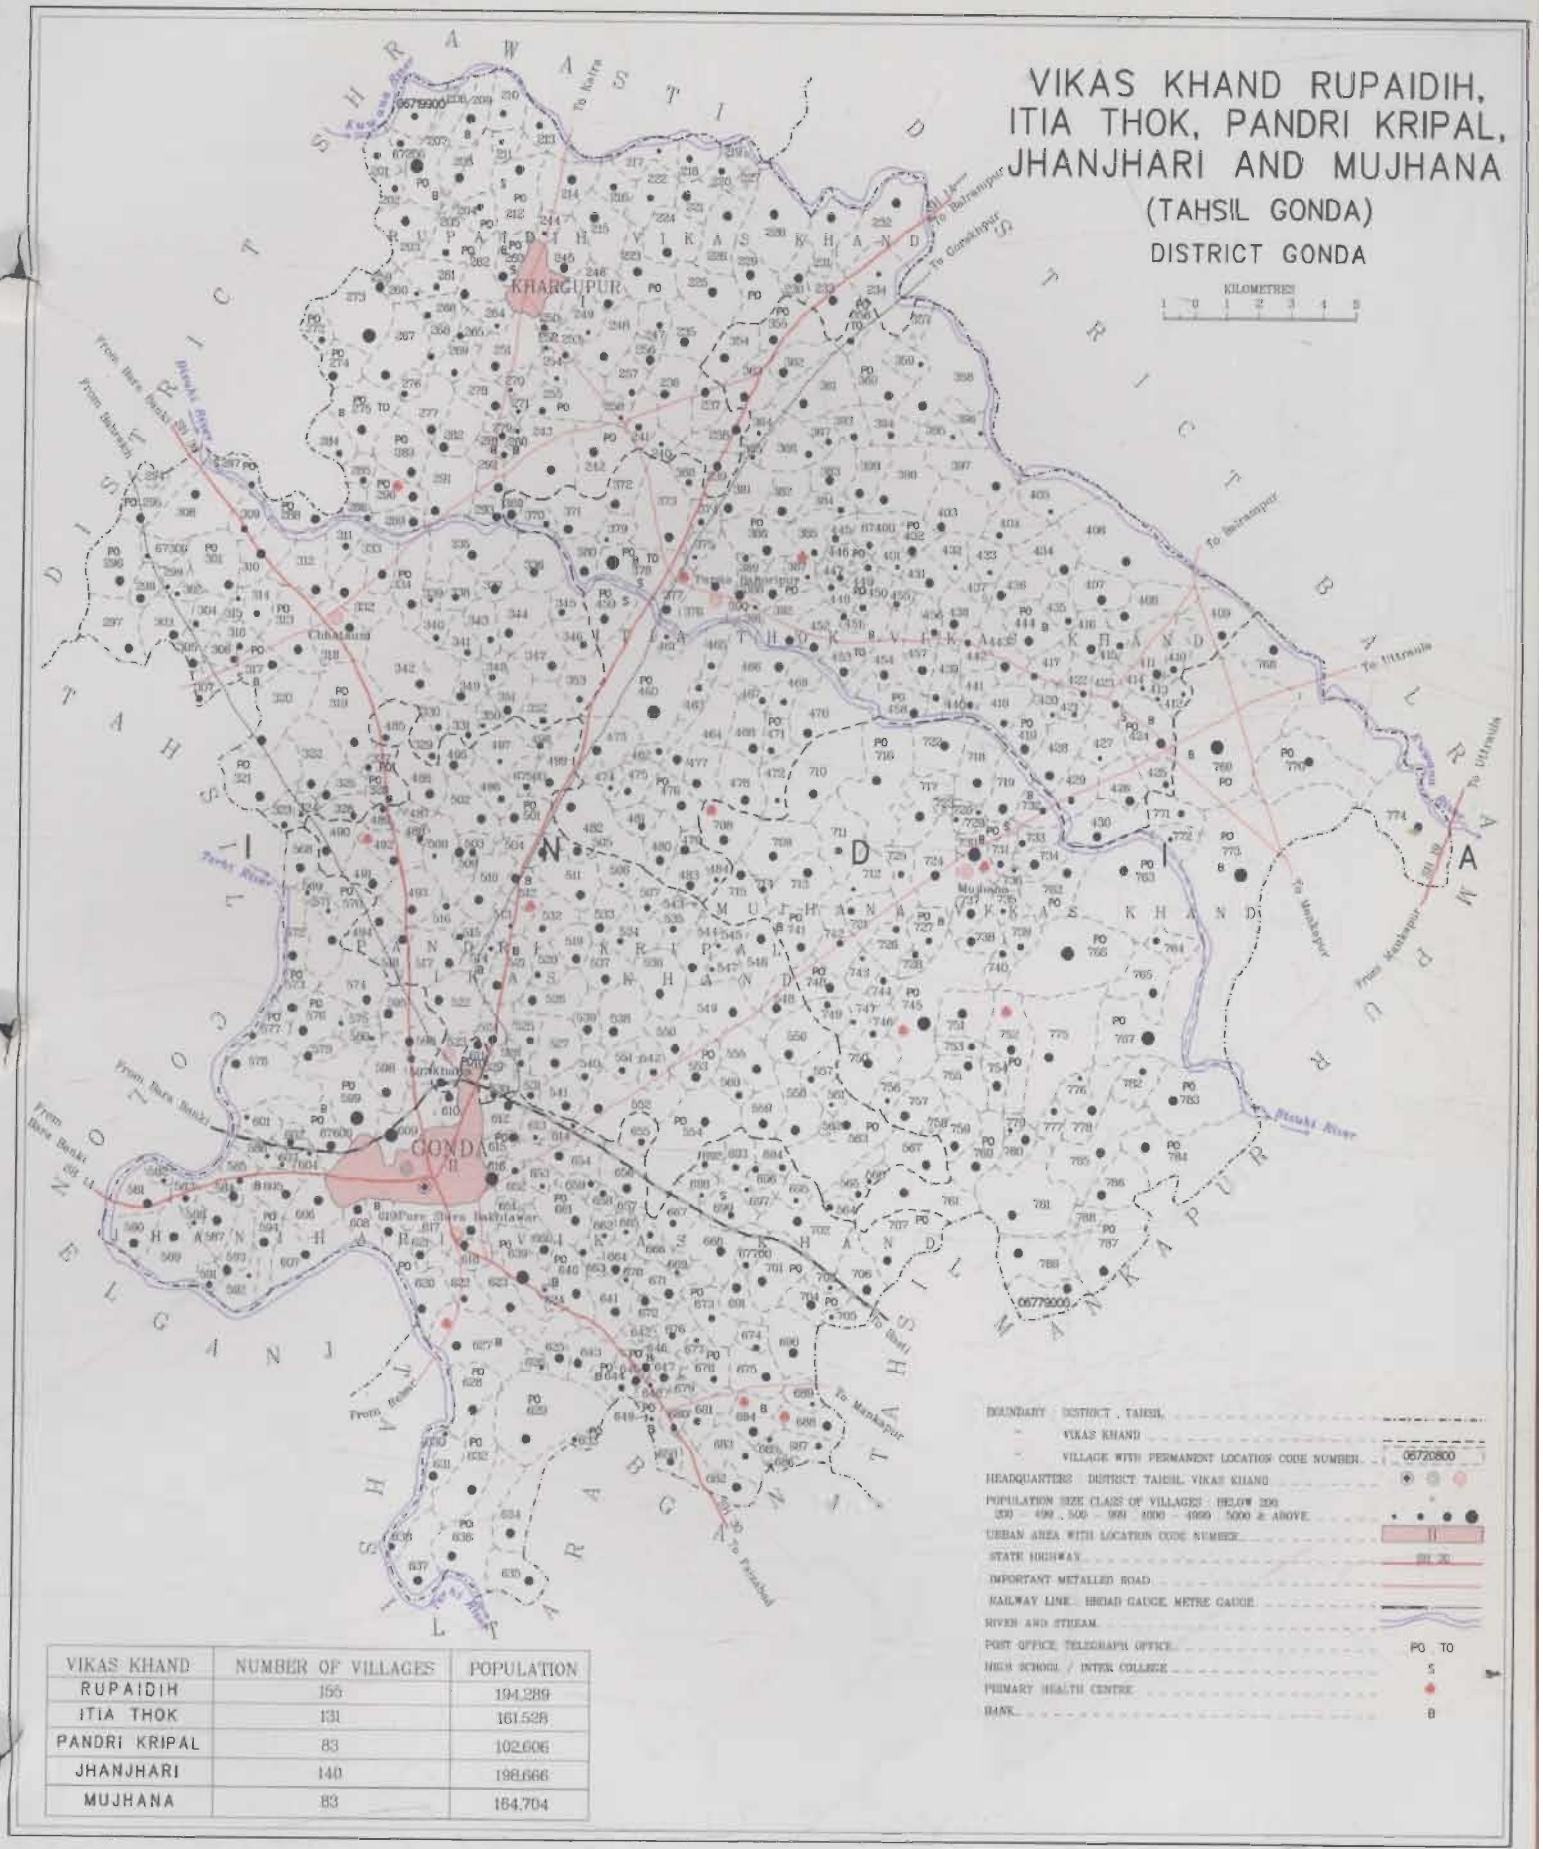

(B) STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUT-GROWTH AT 2001 CENSUS

Serial Number	Name of Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there are no merged villages and outgrowths in the district.
