MAP OF SANT KABIR NAGAR

MOTIF

Maghar

Maghar is a place of pilgrimage for both Hindus and Muslims. It is prominent because of location of cenotaph and shrine of poet Sant Kabir. This town is situated on the main road from Gorakhpur to Faizabad. It is said that while visiting to the different places in the country Sant Kabir breathed his last at Maghar. His disciples belonging to different religions fought over the possession of his dead body as they were desiring to perform his last rites according to precepts of their creeds. It was found that he was alive and living at Vrindaban near Mathura. It is also said that he sent words to open his grave and when the grave was opened, nothing but only flowers with sweet and pleasant fragrance were found. Again it was re-built by Nawab Fidai Khan who reorganised Maghar around 1567 AD. Pilgrims visit mostly in the month of December and January to offer their homage at this place.

Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991Census 888
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 890
Annexure VI Marital status of population as per 1991 Census 891
Annexure VII Age, Sex and Education in the district, 1991 Census 896
Annexure VIII Distribution of different mother tongues returned in 1991 Census 899

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is

given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Sant Kabir Nagar ranks 57th in terms of population in the state.
2. The percentage share of urban population in the district is 7.1 as against 20.8 of the population in urban areas of the state.
3. Sant Kabir Nagar district has population density of 863 persons per sq.km.which is less than the state average 690 persons per sq. km
4. Sant Kabir Nagar district ranks 9th in terms of sex ratio (974) which is higher than the state average (898) females per thousand males.
5. Sant Kabir Nagar district ranks 50th in literacy 50.9 which is below than the state average 56.3 percent.
6. There are only 151 uninhabited villages out of total 1727 villages in the district.
7. Decadal growth rate of the district 23.3 is lower to the state average of 25.8.
8. Khalilabad tahsil has the highest number of inhabited villages (588) while Mehdawal tahsil has the lowest number (456).
9. The district has 5 towns out of them one is census town but no town has been declassified.
10. There are 209,122 households in the district accounting for 0.81 per cent of the total households in the state. The average size of households in the district is 6.8 persons.

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the C.D. Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on C.D.-ROM; hence the word "Handbook" seems now to be a misnomer.

(ii) **Brief History of the District:**

Sant Kabir Nagar is a newly formed district in the eastern part of Utter Pradesh created on 5th September 1997. This district was field of activities of Sant Kabir Das and, therefore, it is named "Sant Kabir Nagar". Formation of district Sant Kabir Nagar consists of complete Tahsil- Khalilabad of erstwhile District Basti, 131 villages of Tahsil Basti and all 161 villages of development block Sotha of Tahsil Bansi of the District Siddharth Nagar.

In ancient times the country around present Sant Kabir Nagar district was known as Kosala. According to traditional history , the earliest and better known kings of Kosala were the Ikshvakus (or Suryavanshis). Ikshvaku, the eldest son of Vaivasta Manu, obtained from his father the kingdom of Ayodhya and became its first ruler . The earth is said to have derived its name 'Prithvi' from Prithu, who ruled the plains. His grandson Sravasta is credited with the foundation of the old city of Sravasti which in later times became the

capital of Uttar Kosala. A few generation later came the great Mandhata who exercised imperial sway over dominions on which, it is said the sun never set.

Purukutsa, the son of Mandhata, defeated the Ghandharvas and married a Naga princess. Harishchandra, well known as the lover of truth, was a mighty ruler who performed the Rajasuya Yajna. The great king Sagara vanquished the Haihayas and Talajanghas; and the non Aryan tribes living on the frontiers of the country were also hard pressed by his prowess. He performed the Ashwamedha Yajna when his numerous sons dug a large pit called 'Sagara' (sea). Sagara's great grandson, Bhagiratha , is said to have brought the Ganga to earth by virtue of his penances. Bhagiratha's great grandson, Ambarisha, in whose reign Kosala again rose to prominence, was a great donor and a reputed devotee of Vishnu. Dilip was also a famous king in the Suryavansh. His son was the great Raghu after whom the family came to be called Raghuvansha. He is credited with conquering the whole earth and performing the Visvajit Yajn. His son, Aja, was married to the Vidharbha princessss, Indumati, the mother of Dasaratha who was powerful enough to lead his campaigns far and wide and to perform the Ashwamedh Yajna.

During the reign of Ramchandra , the eldest son of Dasaratha, glory of the Kosala royal dynasty reached its culmination. He is credited with the establishment of an ideally lawful state, the proverbial Rama-Rajya. Kosala emerges into great prominence in this period , its princes carrying Aryan civilization as far as Lanka (now Sri Lanka). After Rama the extensive Kosala empire was divided among his and the sons of his three brothers. In Kosala itself Rama's elder son Kusa ascended the throne of Ayodhya and the younger son Lava became the ruler of the northern part of the kingdom with its capital at Sravasti. Perhaps the present district of Sant Kabir Nagar fell in this region . Kusa soon transferred his capital to Kusasthali which he himself had founded at the foot of the Vindhya range.

The kingdom of Kosala, was a feudal state which included within its suzerainty a few ganas or sanghas, as they were called. The chief of these was the Sakya state of Kapilvastu. It naturally derives its great importance from the fact that Gautam Buddha was Sakya by birth. The district in all probability formed part of the holy land of Buddhism. Coins of the Kushanas, Sungas of Ahichhatra, and Guptas were found in the district.

Chandragupta I, Samundragupta, Chandragupta II, Kumargupta and Skandgupta had expanded the Gupta dynasty. With the decline of the Guptas in the 6th century A.D. Sant Kabir Nagar also began gradually to become desolate. At this time a new dynasty, that of the Maukharies, with it's capital at Kannauj, assumed an important position on the political map of northern India and perhaps this kingdom included the present district also. The rule of Harshvardhan followed, into whose hands the dominions of the Maukharies had passed. Soon after Harsha's death his empire disintegrated. After sometime the great Yashoverman had conquered many area of the India including Magadh. Thus, the Sant Kabir Nagar which had once formed the part of Magadha empire was included in the empire of Kannauj.

In the beginning of 9th century Gurjara Pratihara had captured the Kannauj, and in the reign of the famous Mihir Bhoja, the whole of Avadh was under his rule. After some time power of Kannuj began to decline. Avadh was divided into a number of small chieftainship. After some time Gahadavala came into power at Kannauj, and he held the Uttar Koshal, being the old name of country around the Sant Kabir Nagar. Jaychandra, the last king of the dynasty was killed in the battle of Chandrawar (near Etawah), fighting against

the invading army of Shihabud-din Ghori. Soon after his death, Kannauj was occupied by Turks.

According to legends, for centuries Sant Kabir Nagar was in wilderness and that the greater part of Avadh was occupied by the Bhars. Later on, the district formed a part of the large province of Avadh under a Muslim governor. In 1225, Nasir-ud-din Mahmud, governor of Avadh had completely crushed Bhars including all Rajputs of the district.

At no time under the sultans of Delhi, the kings of Jaunpur or under the early mughal kings, the district could boast of and independent political status. It continued to be under the sway of one Muslim ruler or other by whom, however no serious efforts were ever made to dislodge the local chiefs and zamindars except for forcing submission and payment of tribute. Hence by and large, local chiefs and zamindars continued to administer the country. In 1394, the Sultan Nasir-ud-din Mahmud Tuglaq appointed his vazir, Malik Sarvar Khwaja Jahan as a governor of this area as a separate zone with headquarters at Jaunpur. Sant Kabir Nagar and adjoining area had remained under the effective control of the successors of Khwaja Jahan as independent rulers till 1479 when the kingdom of Jaunpur was united with Delhi by Sultan Bahlol Lodi and he handed over the charge of this region to Kala Pahar Farmuli with headquarters at Bahraich and which included the district and adjoining parts. About this time, Mahatma Kabir, the well known poet and philosopher, lived at Maghar in this district. It is said that the orthodox Hindus and Muslims were not reconciled with Kabir's teachings who believed in the unity of God and preached a universal religion. As a result of this they branded Kabir as a heretic. Some of the Mullahs and Pundits went to the extent of lodging a protest against him with Sultan Sikandar Lodi, when the latter was completing the subjugation of the region in about 1494. The Sultan summoned Kabir in his court, but could not find any ground to punish him. In order to avoid any misunderstanding about him, the sultan is said to have sent him from Varanasi to Maghar.
Kabir probably died in 1510 A.D.. To commemorate his memory, his followers built a cenotaph at Maghar as a mark of respect. The building was later replaced or restored by nawab Fidai Khan, who governed Maghar at Akbar's time (1567), though according to another account Bijli Khan, the adopted son of Pahar Khan of Ghazipur and Patna, was the rebuilder of the edifice. The custody of the Shrine, however, remained with a Julaha (weaver's) family and its maintenance in British days by the grant provided to the village.

The town of Khalilabad, now H.Qr. of the district was named after Khalil-ur-Rahman who was the chakledar (holder of the tract), a collector of revenue, sent by the emperor Aurangzeb in 1680,whose tomb was erected at Maghar. In 1690 , Himmat Khan was appointed subedar of Avadh and fauzdar of Gorakhpur who held the charge of the district and adjoining districts for a long time. In 1707, emperor Bahadur Shah appointed chin Qulich Khan as administrator for collecting revenue and administration but he resigned after sometime ,due to this cause, local chiefs became the real rulers of the region. A great and far reaching change came over the scene when Sadat Khan was appointed governor of the Subah of Avadh including the faujdari. He became independent within a short time. After Sadat Khan, Safdar- Jung had succeeded. After sometime Shuja-ud-daulah had succeeded his father Safdar Jung in the charge of province but they could not control the local rajas and collecting the revenue from him. The misrule came to a gradual end after November 1801, when Sadat Ali Khan ,successor of Nawab Shuja-ud-daulah was unable to pay the amount for

the use of English troops and the Nawab surrendered Gorakhpur, which then was inclusive of the present district and other territory to the East India Company. Banjaras, Gurkhas and Jackal–killers had created problems to the British administration , by lawlessness, looting their police stations and treasuries.

The part played by the district in the freedom struggle of 1857 is generally not ascribable exclusively. The state of disorder caused by the freedom fighters reached a stage that actually there were no means to enforce the authority of the alien government. All along the time, after non cooperation movements the district remained sensitive in catching vibrations of political activities pervading throughout the country. Its association with neighbouring town of Gorakphur, which had come in prominence as a centre of political activities, particularly due to the Chauri-Chaura incident, was not of less significance. During the Quit- India Movement the people of the district took part vigorously. On 15th August 1947, at midnight , the India had been declared as independent. With the enactment and adoption of the constitution of India on 26th January 1950, India became a Sovereign Democratic Republic. On the both occasions, Independence day and Republic day, the people of the district celebrate the days by illumination of government and private buildings, taking out processions, holding meetings etc.

Administrative Setup:

Total geographical area to newly formed district Sant Kabir Nagar is 1646.00 square Kms. With the aim to have proper administration and to have development work in all villages and towns, the district has been divided in three tahsils namely Mehdawal, Khalilabad and Ghanghata . The tahsils are further divided into community blocks, the Sotha (161 villages) and Mehdawal (227 villages) in Mehadawal tahsil, the Semariyawan (356 villages) and Khalilabad (219 villages) in Khalilabad tahsil , the Nathnagar (254 villages) and Haisar Bazar (295 villages) in Ghanghata tahsil, Baghouli block divided in two tahsils 30 villages in Mehadawal tahsil and 54 villages in Khalilabad tahsil, Rudhauli block of 101 villages partly included in Mehdawal tahsil and Kudraha 30 villages partly included in Ghanghata tahsil. There are 648Gram Sabhas. Total revenue villages in the district are 1727, out of which 151 villages are uninhabited and reamaining 1576 villages are inhabited. There are four statutory towns namely Khalilabad NPP and three NPs Hariharpur, Maghar and Mehdawal and one census town Ladua Mahua.

Jurisdictional Changes (1991-2000) :

The district had been created on 5th September, 1997 by carving out entire tahsil Khalilabad of Basti district and 131 villages of tahsil Basti of district Basti (101villages of Rudhauli block partly and 30 villages of Kudaraha block partly) and 161 villages of entire Sotha block of Bansi tahsil of district Siddharthnagar. In the newly created district, the Mehdawal tahsil had been created by carving out 257 villages of Khalilabad tahsil & one town (227 villages from Mehdawal block and 30 from Baghauli block partly) and added 101 villages of Rudhauli block partly from Basti tahsil of district Basti and adding 161 villages of entire Sotha block of Bansi tahsil of district Siddharthnagar.

The Ghanghata tahsil of newly created district had been created by carving out of 549 villages and one town transferred from Khalilabad tahsil (in which 254 villages are of entire Nathnagar block and 295 are of entire Haisar Bazar block) and by adding 30 villages of Kudaraha block partly from Basti tahsil of Basti district.

The remaining 629 villages, 2 towns land one C.T. had remained in Khalilabad tahsil (in which 356 villages belong to Semiriyanwan block, 219 villages of Khalilabad block and 54 villages of Baghauli block partly.

All these jurisdictional changes are given below in tabular form with notification Nos:-

S. No	Name of District/Tahsil	Notification No.& Date	Jurisdictional changes Added	Substracted
1	2	3	4	5
1	Mehdawal Tahsil	2779/1-5-97-287/97-R-5 Dated 12.09.1997	(I) 161 village transferred from Bansi tahsil of Siddharthnagar district (II) 257village and one town transferred from Khalilabad tahsil (III) 101village transferred from Basti tahsil of Basti district	
2	Khalilabad Tashil	2779/1-5-97-287/97-R-5 Date 12.09.1997	629 village, 2 towns and one CT remained in his tahsil	(I)257village and one town transferred to Mehdawal tahsil (II) 549 village and one town transferred to Ghanghata tahsil
3	Ghanghata Tashil	2779/1-5-97-287/97-R-5 Date 12.09.1997	(I) 549village and one town transferred from Khalilabab tahsil (II) 30 village transferred from Basti tahsil of district Basti	

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos's circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a departmental district level office. The development point of view the district is divided into community development block. Block Development Officers (BDO) looks after development works at community development blocks level. Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) in their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge In addition there are several additional District Judge. Civil judge, Chief Judicial Magistrate and Munsif Magistrate and others judiciary officer are also posted for look into the legal matters.

The nucleus of the district body for Local Self Government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

Physical Features :

Location and size

North part of the district is bound with district Siddharth Nagar. Rapti river is on north-east boundary. In lakes Bakhira lake is prominent which is situated in this area. Eastern boundary of the district to some extent is determined by river Aami, Kuanon and Ghaghra river are in south part of the district. Southern boundary of the district is determined by river Ghaghra.

Physiography

Whole land of the district is formed by the soil brought out by Ghaghra and its tributaries which is generally plain and fertile like plain areas of Ganga, Yamuna located in north of Ghaghra Generally, water flow is from north-west to south-east, the district is complete with large rivers like Ghaghra and Rapti and several small tributaries and gorges. On the basis of soil & geology the district may be divided into following natural division..

Rapti Flood Plan-

The region is bounded by Rapti river in the north eastern side of the district in Mehdawal tahsil, which has a number of small ‘ Jhils’ or ‘Tals’ of which ‘Bakhira’ Tal is important. The region has the alluvium, Dun gravels (Recent) geology and udalfs sub order association of soil as per the geology of the region.

Khalilabad Plain:

It covers the central and major part of the district. The plain is locally known as ‘ Uparhar’. It is an upland zone which has higher surface area in the western side and slopes towards south-east direction. There are numerous streams which originate from the western side and drains this tract. These are Ami and Garia etc. which are the parts of the Ghaghara drainage system, known for their flood havoc. Many embankments alongwith streams have been constructed to provide protection from flood water. In the region, there are numerous water bodies which are basically the abandoned courses of the rivers. The plain is very rich in agriculture .

Ghanghata Khadar:

The region is situated parallel to Ghaghara river in north west- south east direction. It’s northern extent is delimited by water shed line of the Kuanon river. The area in immediate neighbourhood of the river is low land tract. Flood causes change in the course of river. The tract in between deep stream and higher bank is known as ‘ Manjha’ which are invariably flooded but in north of this it is called as Tarhar or Khadar, the tarhar zone dent in Khalilabad plain in different proportion. To protect from the flood, embankments have been constructed at different places.

Drainage:

The district is complete with large rivers like Ghaghra and Rapti and several small tributaries and gorges. River Ghaghra flow from south of district Sant Kabir Nagar and determines boundaries of district Sant Kabir Nagar and Ambedkar Nagar. Rapti river flows from north of Mehdawal tahsil of this district and meets, river Ghaghra in Deoria district, Kuanon river passes from middle of tahsil Ghanghata and meets Ghaghra in district Gorakhpur, River Aami from north of Khalilabad tahsil passes from west to east and moving ahead determines boundary of district Gorakhpur, Kathinaia river also flows from east in tahsil Khalilabad and Ghanghata.

There is only Vakhira lake in the district which is located at the north corner of Khalilabad tahsil. This lake is on the east of the district and determines the boundary of Gorakhpur. Sufficient water remains in this lake during summer season.

Climate:

The climate of this district is not so hot. Normal temperature during winter remain generally 4.5°C and during summer 44°C. Normal rain in the district is about 1166 m.m. but on an average, there remain vast difference in north and south parts. In northern and middle part it rains from 1200 to 1800 mm. and in southern part 1100 to 1300 mm. The climate of the district is generally healthy. Winter season remains from November to February and summer season from March to June and rainy season from July to October. The speed of wind in the district is 2.00 to 7.00 km. per hour. Wind normally blows from east to west. Maximum rainfall in the district (approximately 90 percent) occurs from the last week of June and first week of October. There is scanty rainfall in the remaining eight months of the year.

Natural and Economic Resources:

Forestry:

In the year 98-99 , the forest covered the area of 4,363 hectares . Thus, the forest area in the district is very less. Main trees are of Mango, Mahua, Babul, Jamun and Eucalyptus, which are planted mainly on road- side or in the gardens. The woods are used for house construction or as a fuel for preparation of food. At present the available area of the forest is much less than the requirement of the district. The land of the middle area and climate of the district is suitable for the purpose of plantation of forest . Forest plantation can be done in this area.

The wild animals which are still found include the nilgai , antelope, pig, wolf, jackal, fox, hare, monkey, wild cat and percupine, but even these have been reduced in number.

The birds of the district include the usual varities found through-out the plain. Among them mention may be made of the peafowl, the black patridge and the grey patridge. The common snipes are found in abundance in winter season. District is famous for the number and variety of water fowls which visit it during the winter months. The goose, red crested pochard duck , white eyed pochard and widgeon, visit the district only in winter and inhabit the fringes of rivers, lakes and swamps.

Snakes are common in the district especially in the rural areas, the chief being the cobra, krait and rat snake . Indian crocodile or naka and ghariyal are also found in the rivers Ghaghra and Rapti.

Fish of almost all the varities that occur elsewhere in the state are found in the rivers lakes and ponds of the district , the common species being rohu, bhakur, nain, parhin, karanch, tengan, patra, belgagra, khasua, chilwa. The other species found in the district are mahseer, tengra , bam and semra.

Minerals and Mining:

No underground survey has been conducted in the district till now. Therefore, it is not known, the extent to which minerals resources are available. Traditionally, the minerals available in the district are Balu, Kankar (Pebbles), clay and Sand (Ret). These are used for construction purposes.

Soil:

Whole land of the district is formed by the soil brought out by Ghaghra and its tributaries which generally is plain and fertile like plain area of Ganga-Yamuna located in north of Ghaghra. Generally, waterflow is from north-west to south-east.

After creation of the district, no land survey by the requisite authorities has been conducted in the district, but according to traditional experience it was found that some soil situated in the northern part of the district is slightly Matiyar and Domat. The soil of the eastern part of the district which is closed to the district Gorakphur, is slightly calcareous. Generally, this district is situated in north plain of Ganga-Yamuna, and in the north of Saryu river. Therefore, the whole land and its soil of this district is very fertile and fit for agriculture.

Land and Land Use Pattern:

After the creation of the district in 1997, no agriculture census has been done , so the data regarding operational land holdings is not available separately. According to the agriculture census of the year 1995-96 , when District Sant Kabir Nagar was a part of District Basti, the total number of the operational land holdings were 516,701 having the area 335,550 hectares. There were 419,496 number of holdings, under 1.00 hectare size having 145,300 hectares thus it is clear that up to 1.00 hectare size holdings was near about 81% and 43% area was under it.

According to land use statistics given in the statistical magazine 2000-01, in the year 1998-99, the total reported area was 176,273 hectares, in which forest covers 4,363 hectares, usar and land unfit for cultivation was 3,239 hectares, charagah 264 hectares, present fallow was 6,482 and other fallow was 2,318 hectares, bushes , garden and trees etc 2,155 hectares, land used other than agriculture 20,856 hectares , other land fit for agriculture 1,677 hectares, net sown area is 134,919 hectares. Area under sown more than once was 55,644 hectares, total sown area under the different crops was 190,563 hectares in which Kharif crop area was 94,240 hectares followed by Rabi crops area 90,689 hectares and Zaid crop area 4,351 hectares. Net irrigated area was 90,254 hectares.

Agriculture and Crop Pattern :

There are two crop season , Rabi and Kharif in the district. Another crop season i.e. Zaid is of no much importance and nominal area is sown under it. According to the statistical magazine 2000-01, in the year 1998-99, 181,791 metric ton food grains had been produced under the Rabi crops in which wheat had been produced 169,349 metric ton, which was 93.2% of the total Rabi crop production and its productivity was 2,154 quintals per hectare. Other crops of Rabi were Peas 4,542 m. ton, with a productivity of 10.03 quintals per

hectare, Barley 1,392 m.ton (23.31 productivity) Arhar 2,824 m.ton , 7.24 Lahi/Sarson 1,687 m.ton (8.39) and Gram 1,457 metric ton with 23.31 productivity.

The paddy was the most important crop of Kharif which had been produced during 1998-99, accounted for 110,377 metric ton but of total Kharif production 1,11571 metric ton with a productivity of 1,351 quintals per hectare, the other Kharif crop were maize 712 metric tons with 1,351 quintals per hectare productivity, and Jowar 437 metric ton with 1,926 quintals per hectare productivity.

In the year 1998-99, the total sown area was 190,563 hectares ,out of which 81,753 hectares was under paddy followed by wheat 78,031 hectares, peas 4,529 hectares, Arhar 3,898 hectares, Oil seeds 3,122 hectares and other crops were in 17,298 hectares. The average production of crops in the year 1998-99 was Paddy 1,351 quintals per hectare, wheat 21.52,Barley 23.31, Jowar 8.63, millet 19.26, Maize 439, pulses 8.45, and oil seeds 7.50 quintals per hectare Sugarcane 521.52 and Potato 147.13 quintals per hectare.

The total production of Cereal was 281,032.00 metric ton in the year 1998-99, and pulses 9,391.00 metric tons, thus total food grains had been produced 290,423.00 m.ton., Oil seeds were 2,342.00 metric tons and among other crops, the Sugar cane was 242,820.00 metric tons and potato 33,251.00 metric tons.

The fertilizer distribution, during 1998-99 was 18,645 metric tons, in which nitrogen 16,819 metric tons , phosphorus 1,407 metric tons, and Potash was 419 metric tons. There were 8 seed and fertilizer depots with a capacity of 700 metric tons and insectiside depots were 7 with a capacity of 155 metric tons. There were 3 cold storages in the district in 1999. Cold storages had a capacity of 2,650 metric tons , agriculture service centre–Agro 2 and other in 11 number, Agriculture production Mandi Samiti numbering two and established Bio gas plants numbering 1239. There is no food grain depot in the district. There was no place for Mandi in the district for distribution, sale & purchase of agriculture products till now. There is only one Sugar mill at Khalilabad which is closed at present, so the Gur and Khandsari is being made locally. In the main cash crop, in the district, the Sarson, Rai and Sugarcane are the main crops. The main produce of the district is wheat and sugarcane. The farmers are selling the agriculture product in the nearby market and local markets (hats) in the rural and urban areas.

Irrigation:

According to statistical data mentioned in statistical magazine 2000-01, in the year 1998-99, the total net irrigated area was 90,254 hectares in which an area of 2,384 hectares were irrigated by canals , which were 2.6% of total area, 9,694 hectares by govt. tubewells with 10.7% of total area, 73,554 hectares by private tubewells which is 81.5% of total area, 1,165 hectares by wells which is only 1.3%, by ponds, lakes and tanks 1,926 hectares, which was 2.1% and by other means 1,531 hectares which was only 1.7% total area, thus, it is clear that mostly the area i.e. 73,554 hectares is irrigated by private tubewells and in second position is the govt. tubewells by which 9,494 hectares area was irrigated. Among all the means of irrigation, the length of canals are 72 kms, the number of govt. tubewells are 363 while private tubewells and pumpsets are in 15,804 in numbers. There are 7,290 pucca wells, 283 pump sets on earthern level sources and 18 are Rahats etc.

Animal Husbandry:

Animal husbandry is integral part of agriculture.Due to its importance, the animal husbandry census is conducted regularly in every five years. According to animal census 1997, there were 333,346 livestock in the district, in which cows and bulls were 155,350 in numbers and buffaloes 78,776 and other animals were 99,220 in numbers. Other animals are as follows, sheep 6,891,goats 80,936, horses 117, ponies 245, donkey 1,091, and pigs were 9,914 in number. The number of animals per kilometre in the district is 203. The poultry farming work in the district is being done with full enthusiasm. 1997 livestock census shows that the total number of pet birds or poultry are 97,980 in which 93,092 are hens and 4,688 are ducks.

There are no poultry farming in the organised sector, but there are poultry farming in small farms and houses. To see the demand of chicken meat, the broiler cock farm is being opened in small towns and in rural areas. The egg production is less than the demand, so the supply is supplemented from outside the district. The animal husbandry department is giving the information regarding poultry development programme to the willing persons, in which distribution, establishment of new farms, technical consultation to established units and vaccination are included. Due to being newly created district, the animal breeders are not getting the price properly of their product. However, the hides and skins of the dead animals is exported to Kanpur in large quantities. Meat of goat and sheeps are consumed by the people. Nowadays the chicken meat trade is also very popular. This work is the main source of livelihood of many people. From point of view of milk production, the district is very backward, even if the sufficient population is engaged in milk production, distribution and sale work . There is no dairy farm, but the milk collected is sent to Basti filling plant.

In the district , to look after the animals 17 veterinary hospitals and 20 livestock service centres are working in the district. The breeding development of animals is being done by the 8 artificial insemination centres and 9 sub centres. One pig development centre and 10 poultry units are working in the district. These data is related to the year 1999-2000.

Fishery:

There is so many small and big tanks in the district but only Vakhira lake is very big which is located in the Bagholi development block of Khalilabad tahsil in the district. It's length is 8 km and width 3 km. Besides irrigation from these tanks & lakes, large quantity of fishes are also netted.

In addition to tanks, fishes are also caught from Kuanon. Ghaghra, Aami & Kathniya rivers in the district. In the district many people are directly or indirectly involved in the business of fishing. Variety of fishes like Patin, Bhakur, Rohu, Tenger, Naini, Giryee, Sighree and Chelhava are founding the rivers and ponds.

2,511 tanks and ponds having 1,370.052 hectares are presently in the district with a size of 0.2 to 2.00 hectares. There is one govt. fish area at Tama, where fingerlings are produced and distributed and supplied among fishermen. There is also a private hatchery established in village Badgo, Khalilabad by govt. aids. The 103.02 lacs fish fingerlings were distributed against the largest of 103 .00 lac in the year 2000-01, In the year 2001-2002, the 105.25 lacs fingerlings have been produced. In the year 2000-01, 42 ponds having an area of 42.47 hectares of gram panchyats have been given on lease , and a loan of Rs. 155.76 thousand rupees have been given to develop the 67 ponds having 50-51 hectares area.

A fishery development agency has been established in the year 1999-2000. There are 13 fishery co-operative societies. Data is based on state magazine 2000-01.

Industry:

As shown in the statistical magazine 2000-01, Sant Kabir Nagar district is primarily agriculture oriented. Around 98% population it is directly or indirectly depends on agriculture. There are total 12 large and medium industries here, out of which only two are functioning at present. In these working units one paper mill and one vegetable oil unit is working. There is total of 47.64 crore investment in these units and at present total 216 people have got the employment.

In the historical town of Maghar of the district, Sant Kabir spinning mill was established in 1978 at a total cost of Rs. 4.25 crores but this too for some reason is closed totally since 1998-99. Oswal food project unit which is in private sector where Arpan Ghee was being manufactured was also closed. But production restarted. In addition to 100 units of large and medium scale industris there are 1100 small scale industries and 618 village cottage industries are functioning in the district, where 5,539 and 1,206 employees are working respectively.

Till 2001 there had been total 1,150 small scale industries established in the newly formed district, Sant Kabir Nagar. From the above description, it is clear that the district is dominated by agriculture and forest based industries. In addition, Engineering and allied, material (commodities) and chemical based and various miscellaneous industries are also established in the district. In agriculture based industry, the prominent ones are Rice mill, Oil mill, Bakery, Choora mill and confectionery etc. Similarly, wood furniture industry, Ready-made garments industry, Handloom, Agarbatti manufacturing, Cement Jali, Steel Drum and Almirah, Channel gate, Grill shutter, agriculture implements, and various other industries are established and functioning in the district.

On Mukhlispuri Road in Khalilabad, district H.Qr., a government industrial Estate is established and functioning which has an area measuring 15-48 acres. In this industrial estate there are total 18 sheds and 79 plots. There are established 42 units out of which 28 units are functioning and remaining are closed. In addition to above, in Mehdawal and Haisar Bazar development blocks of the district, mini industrial estate in are established.

The district is much ahead in the field of Handicraft. Here, in development blocks of Bagholi, Mehdawal and Sotha, the weavers are in good number whose traditional business is weaving of cloth. By Handloom & electrical loom (power loom), cotton and Terri cot cloths such as Janta Dhoti, Lungi, coarse cloth, Gamchha, Towel etc. are mainly manufactured in the district.

Trade and Commerce:

At present , there is no Mandi Sthal in the district to give distribution facilities to the farmers for their agriculture product. The farmers are selling their agriculture products in the rural and urban markets and hats.The main produce of this district are wheat and sugarcane. Those farmers come to hats or bazaars for selling their agriculture products.

At the district H. qr khalilabad the market for handloom cloth is held on every monday of the week, where traders, merchants come for sale and purchase of cloth from dofferent parts, towns and districts of uttar pradesh and even outside the state like Punjab, Haryana, Bihar, etc.The agriculture

product, forest produce, handloom and power loom clothes, carpets, agriculture and forest based industrial items and other local product relating to handicrafts itmes are trading items in the market. Hides and skins of dead animals are exported to Kanpur. There are 1,561 hats and wholesale markets in the district in different blocks.

Transport:

Like electricity, transport facility also plays important role for development. Road and transport are main source for public mobilisation and carrying the goods. For economic development of this district, the public works department of state government is entrusted with the responsibility for construction of roads and its maintenance. In addition to this some roads are under district board . Length of roads, are given in the following Table-

Length of roads in kms.

Sl. No.	Description of Roads		As on 31.3.2001
1.	**Public works Department**		
	(a)	National highway	34.40
	(b)	State highway	111.20
	(c)	Main district roads	61.00
	(d)	Other district and common roads	219.39
	(e)	Village roads	264.45
2.	**District Board road**		-
	Total		**690.44**

From point of view of most convenient transportation, Railway's, contribution is most important. Broad gauge line is available in the district. Broad gauge line is from Maghar to Churev which cover total 3 stations, whose total length is 22 Kms.

There is no U.P. Roadways depot in the district. Roadways facilities are made available by Basti Depot and other depots of the state on different roads of the district. In addition, private agencies also provide transport facilities by the buses, taxis and tempos etc in the district. There are 83 bus station / stop in the district. Means of transport available in the district are truck/mini trucks, bus/ mini bus, jeep private, jeep taxi , maxi cab, tractor, motor cycle, scooter , moped, car, and tempo.

Electricity and Power:

Development and progress of any particular place depends on the availability of facilities of infrastructure. In these facilities electricity, transport, roadways and communications services and also institutional finance related facilities have important place.

Electricity distribution system is not only necessary requirement of industries but also for development of agriculture. Now, while agriculture is getting mechanised, the importance of electricity cannot be ignored. Till 31.3.2001, 5 towns of this district were electrified. In the year 1999-2000, for the purpose of irrigation and industrial work, under C.A. definition, 851 villages have been electrified. In which 559 villages get electricity from L.T. mainsz. 542 schedule caste settlements have also been electrified. Even now there are 577 villages in the district where electricity facilities are not available. Thus 57 percent villages of the total number of villages have come under electrification, but by L.T. Mains only 36.5 percent villages of the district are only covered by electrification. There were 2,577 private tube wells/pump sets energised. Keeping the importance of consumption of electricity in public life the huge possibilities of the extension of electricity facilities is present.

According to statistical magazine 2000-01, in the year 2000-01, the total electricity consumption in the district was 74,166 thousand K.W.H. in which 28,484 thousand K.W.H. was consumed in domestic purpose, 2,795 thousand K.W.H. in commercial sector, 8,737 K.W.H. in industrial, 124 thousands K.W.H. in public light system, 33,546 thousands K.W.H. in agriculture sector, and 480 thousand K.W.H. in public water supply and sainitation. Consumption of electricity was 64.37 K.W.H. per person in the district.

For the purpose of generation of electricity in the district, there is no power house available. Electricity requirement of the district is met out from Tanda Thermal power station, which is not adequate. Inadequate power supply adversely affected normal life and industries.

Gram Panchayat, its Composition, Jurisdiction and role in village Development:

The Gram Panchayat acts as the executive of the Gram Sabha and its composition plays a vital role in village development.

Composition:

The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village Panchayat. There are 1,046 gram Sabhas in the district. It is necessary that the village Panchayat should have member belonging to the scheduled caste and also a women member. If they are not elected, then the government itself appoints two such members. The village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

It's Term:

The new Panchayat Raj Act of 1993 has fixed a uniform five-year for every Panchayat.It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualifications:

In order to be elected to a village Panchayat, a candidate should possess the following qualifications:

(1) He should be resident of the village concerned and his name should be in the voter's list of the village.
(2) He should be twenty-five year old.
(3) He should be mentally and physically sound.
(4) He should not be a proclaimed offender.

Functions

A Gram Panchayat is entrusted with various social, economic and judicial function.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.

3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Center opened in the village. The Panchayat has also provide land and building for such a center.
5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, insectaries, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine unto Rs.100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for

sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses.

In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number. Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit

for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled

Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	37	Gual
2	Badhik	38	Habura
3	Badi	39	Hari
4	Baheliya	40	Hela
5	Baiga	41	Kalabaz
6	Baiswar	42	Kanjar
7	Bajaniya	43	Kapariya
8	Bajgi	44	Karwal
9	Balahar	45	Khairaha
10	Balai	46	Kharwar (excluding Banbasi)
11	Balmiki	47	Khatik
12	Bangali	48	Khorot
13	Banmanus	49	Kol
14	Bansphor	50	Kori
15	Barwar	51	Korwa
16	Basor	52	Lalbegi
17	Bawariya	53	Majhwar
18	Beldar	54	Mazhabi
19	Beriya	55	Musahar
20	Bhantu	56	Nat
21	Bhuiya	57	Pankha
22	Bhuyiar	58	Parahiya
23	Boria	59	Pasi, Tarmali
24	Chamar,Dhusia, Jhusia, Jatawa	60	Patari
25	Chero	61	Rawat
26	Dabgar	62	Saharya
27	Dhangar	63	Sanaurhiya
28	Dhanuk	64	Sansiya
29	Dharkar	65	Shilpkar
30	Dhobi	66	Turaiha
31	Dom	**Scheduled Tribes**	
32	Domar	1	Bhotia
33	Dusadh	2	Buksa
34	Gharami	3	Jaunsari
35	Ghasiya	4	Raji
36	Gond	5	Tharu

Language and Mother tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother

tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (C.D.R)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$C.D.R = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 1,420,226 divided into the 1,319,675 in rural and rest 100,551 in urban parts. There are 3 tahsils in district namely Mehdawal, Khalilabad, Ghanghata. The most populous tahsil is Khalilabad and Mehdawal is least populated tahsil. The urban population in the district is 7. 1.percent. The urban population is maximum at 11.0 percent in Khalilabad tahsil. There are 1,727 revenue villages in which 151 are un-inhabited. The total rural population of 1,319,675 is spread over in 9 C.D blocks with 1,576.inhabited villages. The most populous C.D Block is Semariyawan with a population of 326,580 and the maximum number of inhabited villages (328) are in this C.D. block. About half of populated villages is found in population size of 500-999 and 1000-1999 and such villages form as high as 53.1 percent of total populated villages. Although, the population density in the rural 811 but the highest proportion (1,064) of villages are with a population density range of 501+ per sq. km. Such villages contain as much as 79.2 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 100,551, highest population live in Khalilabad NPP (39,559), the next big town is Mehdawal NP with a population of 24,662. Rest of 3 towns are Nagar Panchayat (N.P.) and C.T. and out of which two towns are class IV, and one is class V town. Mehdawal tahsil contains 1 town, Khalilabad tahsil has 3 towns, while Ghanghata tahsil has only 1 town.

Population growth:

At the present territorial jurisdication the population of the district was 1,152,116 at 1991 Census and growing by 23.3 per cent during the decade 1991-2001. The decadal growth at 23.3 per cent in the district has been lower level than in the state at 25.8 per cent.

Population Density:

The district has an area of 1,646 sq. km. The population density in the district is 863. In the rural areas of the district the density is 811.

Sex-Ratio:

The sex-ratio in the district at 974 is way ahead to 898 at the state level. As against to urban areas of the district the sex-ratio is higher in rural areas. Among tahsils, highest sex-ratio is 984 in Ghanghata and lowest in Khalilabad (966). Among C.D. blocks the sex-ratio is highest in Baghauli (1,012) and lowest in Khalilabad (954). In the urban parts of the district the sex-ratio is 907 and the highest is in Hariharpur (952) and lowest of 895 in Khalilabad. The sex-ratio in the age-group 0-6 of rural population of the district, is 944 it is highest at 967 in Kudaraha block and lowest at 927 in Mehdawal C.D. block. It may be noted that out of 1,576 inhabited villages in the district, in over 39.6 per cent of villages with 35.3 per cent of rural population the sex-ratio in the age-group 0-6 is 1000 and above, as against the 0-6 age-group. The sex-ratio of 967 in the rural area of the district and 898 is only in urban also. Among towns this sex - ratio is highest at 923 in Mehdawal NP and lowest at 864 in Maghar NP.

Work Participation Rate:

In the total population of the district as much as 34.4 per cent are workers and rest of 65.6 per cent are non-workers. Among workers 20.8 per cent are main workers and rest of 13.7 per cent are marginal workers of total population. In absolute terms male outnumber females main worker female out number males marginal workers. The extent of main workers is highest at 22.1 per cent in Mehdawal tahsil and lowest at 19.9 per cent in Ghanghata tahsil. In case of marginal workers it is highest in Ghanghata tahsil as 15.0 per cent in comparison to 12.4 per cent in Khalilabad tahsil being lowest. The extent of workers in rural and non-workers in urban parts is higher. In the district among workers 44.2 per cent are cultivators and 14.3 per cent other workers. 35.2 per cent of female workers are engaged as cultivators.

Literacy:

In the district 50.9 percent population is literate. The literacy is 66.4 per cent in urban areas and 49.7 per cent in rural areas. The male literacy is 66.6 per cent as against 34.9 per cent females literacy, and therefore, the gap in male/female literacy rate is 31.7 percentage points. In rural areas, among a 9 C.D. blocks, the highest literacy is at 53.8 per cent in Nath nagar and lowest at 40.5 percent in Kudaraha. The literacy among males in rural areas is 65.7 percent in comparison to 33.4 percent among females. The lowest female literacy of 24.7 percent is in Rudauli C.D. block. The gap in male/female literacy rate is highest in Khalilabad C.D. block which is 35.3 percentage points. In 55.9 percent of villages covering 61.9 percent of rural population are in the literacy range of 41-50 and

51-60 percent. Among urbanites in the district, as much as 76.9 percent males are literates as against 54.9 percent females. The highest urban literacy is in Khalilabad NPP (76.5) percent and lowest in Ledua Mahua at 55.4 percent. The maximum male literacy is also found in Khalilabad NPP at 85.3 percent and lowest at 66.5 percent in Ledua Mahua. However, the highest female literacy is in Khalilabad NPP at 66.6 percent and lowest at 43.0 percent Ledwa Mahua and Hariharpur NP. Still, the maximum gap in male-female literacy rate at 29.8 percentage points is found in Hariharpur NP. The literacy among Scheduled Castes is 32.2 percent, in the countryside it is 40.8 percent and 45.8 percent in towns. There is no percentage of literacy in Scheduled Tribes at district level. Only 81 persons out of 307 Scheduled Tribe population are found literate, living in the rural areas of the district.

(viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36 :

Primary Census Abstract gives data up to C.D. block / UA / City / Town level for the country and state. It contains information relating to area (in sq km), number of soccupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural labourers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Mehdawal	NA	NA	NA	389,348	364,686	24,662	NA	NA	NA	NA	6.3
2	Khalilabad	NA	NA	NA	605,777	539,137	66,640	NA	NA	NA	NA	11.0
3	Ghanghata	NA	NA	NA	425,101	415,852	9,249	NA	NA	NA	NA	2.2
District Total:		**1,152,116**	**1,070,398**	**81,718**	**1,420,226**	**1,319,675**	**100,551**	**23.3**	**23.3**	**23.1**	**7.1**	**7.1**

The growth rates of each tahsil in the Sant Kabir Nagar district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 23.3 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 23.3 and 23.1 per cent respectively. Out of the total population of the district 92.9 per cent lives in rural areas while 7.1 per cent lives in urban areas of the district. The proportion of urban population has remained constant during the decade at 7.1 per cent. The highest proportion of urban population is recorded in Khalilabad (11.0) per cent tahsil and lowest is registered in Ghanghata (2.2) tahsil. Urban population is concentrated in Khalilabad and Mehdawal tahsils while Ghanghata tahsils has lower proportion of urban population.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Rudhauli	99	81,645	41,607	40,038	13 (13.1)	730	609

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1576 inhabited villages, 227 (14.4 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 399 villages having 25.3 per cent villages of the district while in the size class of 500-999 population claims 518 villages with 32.9 per cent of the total villages in the district. 318 villages (20.2 per cent) are in the size class of 1,000-1,999 and 106 villages (6.7 per cent) are in the size class of 2,000-4,999. Eight villages with 0.5 per cent of total villages in the district fall in the range of population 5000-9999. None of villages in the district fall in the ranges of 10,000 and above population. The biggest village in the district having population of 8338 persons is located in Nath nagar C.D. block of district.

Table 3: New Towns, Denotified, Declassified and Merged Towns in 2001 Census

Name of town
1
(a) New
(i) Statutory town
1.
2. Nil
3.
(ii) Census town
1.
2. Nil
3.
(b) Denotified
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIi
1.
2. Nil
3.
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria – Nil
1.
2. Nil
3.
(iii) Census towns of 1991 census are notified as statutory town in 2001 census - Nil
1.
2. Nil
3.
(c) Declassified
1.
2. Nil
3.
(d) Wholly merged with other town(s)
. Nil
3.
Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	235	14.9	172,547	13.1
11-20	9	0.6	178	0.0
21-50	12	0.8	254	0.0
51-100	17	1.1	2,814	0.2
101-200	48	3.0	16,492	1.3
201-300	58	3.7	16,392	1.2
301-500	133	8.4	66,023	5.0
501 +	1,064	67.5	1,044,975	79.2
Not known	0	0.0	0	0.0
District Total:	**1,576**	**100.0**	**1,319,675**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e.1064 accounting for 67.5 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 79.2 per cent population. The lowest ranges of 0 to 10 persons per sq. km. cover 235 villages (14.9 per cent). 1064 villages (67.5 per cent) have very high density with more than 501 persons per sq. km. while the corresponding proportion in the lower range of 301 to 500 is 8.4 per cent of the total inhabited villages having 5.0 per cent population of the district. In the medium density ranges of 21 to 50 and 51-100 persons account for 0.8 and 1.1 per cent of inhabited villages respectively. Both these ranges claim 0.2 per cent rural population.

TABLE –5 SEX RATIO OF STATE AND DISTRICT 1901- 2001						
Year	UTTAR PRADESH			SANT KABIR NAGAR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	973	974	964
1911	916	922	866	976	977	920
1921	908	918	834	955	956	909
1931	903	916	813	947	948	900
1941	907	922	824	942	942	937
1951	908	922	827	964	964	943
1961	907	921	817	967	967	-
1971	876	884	826	918	922	735
1981	882	889	850	951	957	865
1991	876	879	864	928	933	861
2001	898	904	876	974	979	907
NOTE- Sex Ratio has been defined here as the number of females per 1000 males						

As per 2001 Census, sex-ratio of 974 has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 2001 and remained above the state average figures during this period. The lowest sex ratio of 918 was recorded in the district during 1971 against the state average of 876. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and state.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Mehdawal	976	980	911
2	Khalilabad	966	974	900
3	Ghanghata	984	985	952
	District Total:	**974**	**979**	**907**

The table-6 gives sex-ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 974 females for every thousand males in Sant Kabir Nagar district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas. The sex-ratio among rural and urban population is 979 and 907 respectively. The rural sex-ratio in tahsils varies between 974 in Khalilabad tahsil and 985 in Ghanghata tahsil. In urban areas the highest sex-ratio is recorded in Ghanghata (952) and the lowest is in Khalilabad urban (900).

TABLE 7 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Rudhauli	962
2	Kudaraha	961
3	Sotha	987
4	Mehdawal	980
5	Baghauli	1,012
6	Semariyawan	981
7	Khalilabad	954
8	Nath Nagar	970
9	Haisar Bazar	998
	District (Rural) Total:	**799**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 979 as a whole. Among the C.D. blocks the highest sex-ratio of 1012 is found in Baghauli C.D. block and is followed by Haisar Bazar (998) while the lowest of 954 is recorded in Khalilabad C.D. block. The sex-ratios of Sotha, Mehdawal,Baghauli, Semariyawan and Haisar Bazar. C.D. blocks are higher than the district rural average of 979 and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	43	2.7	1,786	0.1
700-749	19	1.2	4,727	0.4
750-799	48	3.1	13,580	1.0
800-849	81	5.1	42,299	3.2
850-899	218	13.8	177,142	13.4
900-949	254	16.1	224,930	17.0
950-999	296	18.8	331,052	25.1
1000-1099	397	25.2	395,633	30.0
1100+	220	14.0	128,526	9.8
District Total:	**1,576**	**100.0**	**1,319,675**	**100.0**
Sex ratio (Rural) for District		**979**		

Table 8 presents the distribution of villages by rural sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 397 accounting for 25.2 per cent of the total villages having largest population of 30.0 per cent in the district fall in the sex-ratio range of 1,000-1,099. It is followed by the sex-ratio range of 950-999 which claims 296 villages (18.8 per cent) and 25.1 per cent population. The highest range of 1,100 & above claims 220 villages (14.0 per cent). This range shares 9.8 per cent rural population of the district while in the sex-ratio range of 900-949, there are 254 villages (16.1 per cent). In remaining sex-ratio ranges of 850-899,800-849, 750-799, 700-749 and less than 700, the number of villages are 218 (13.8 per cent), 81 (5.1 per cent), 48 (3.1 per cent), 19 (1.2 per cent) and 43 (2.7 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e. 397 having maximum population (30.0 per cent) fall in the higher sex-ratio ranges of 1000-1099 showing that in majority of villages the sex-ratio is significantly high.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Hariharpur	(NP)	952
2	Khalilabad	(NPP)	895
3	Ledwa Mahua	(CT)	899
4	Maghar	(NP)	914
5	Mehdawal	(NP)	911
Sex ratio (Urban) for the district			**907**

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 907 as a whole. Among the five towns of the district the sex-ratio varies between 895 to 952. Hariharpur (N.P.) has the highest sex-ratio of 952 while Khalilabad (NPP) has the lowest sex-ratio of 895.

TABLE 10 : SEX RATIO OF POPULATION IN THEAGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Mehdawal	Total	82,697	42,618	40,079	940
		Rural	78,110	40,233	37,877	941
		Urban	4,587	2,385	2,202	923
2	Khalilabad	Total	124,941	64,428	60,513	939
		Rural	112,709	57,960	54,749	945
		Urban	12,232	6,468	5,764	891
3	Ghanghata	Total	85,764	44,127	41,637	944
		Rural	83,920	43,146	40,774	945
		Urban	1,844	981	863	880
	District Total:	**Total**	**293,402**	**151,173**	**142,229**	**941**
		Rural	**274,739**	**141,339**	**133,400**	**944**
		Urban	**18,663**	**9,834**	**8,829**	**898**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 293,402 persons comprising 151,173 males and 142,229 females. The total sex-ratio in this age-group works out to 941 in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 944 and 898 in this age-group respectively. The rural sex-ratio in tahsil/sub-tahsil varies between 941 in Mehdawal tahsil and 945 in Khalilabad and Ghanghata tahsils. The sex-ratio of Ghanghata tahsil is higher than district average (941), Khalilabad tahsil has lowest sex-ratio of 939. In urban areas, the higher sex-ratio is recorded in Mehdawal urban (923) and the lowest is found in Ghanghata urban (880).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Rudhauli	17,285	8,865	8,420	950
2	Kudaraha	5,072	2,579	2,493	967
3	Sotha	27,185	13,969	13,216	946
4	Mehdawal	30,732	15,945	14,787	927
5	Baghauli	11,891	6,103	5,788	948

7	Khalilabad	33,513	17,223	16,290	946
8	Nath Nagar	32,580	16,805	15,775	939
9	Haisar Bazar	46,268	23,762	22,506	947
	District (Rural) Total:	**274,739**	**141,339**	**133,400**	**944**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 944 for the district (rural). The sex-ratio of C.D. block varies between 927 to 967. It is highest in Kudaraha C.D. block i.e. 967 followed by 950 in Rudhauli C.D. block and

lowest 927 is found in Mehdawal C.D. block. The sex-ratio of Rudhauli, Kudaraha, Sotha, Baghauli, Semareyawan, Khalilabad and Haisar Bazar C.D. blocks are higher than the district rural (944) while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	168	10.7	9,909	3.6
700-749	63	4.0	6,782	2.5
750-799	100	6.3	16,499	6.0
800-849	146	9.2	25,449	9.3
850-899	165	10.5	39,298	14.3
900-949	186	11.8	43,649	15.9
950-999	124	7.9	36,088	13.1
1000-1099	292	18.5	59,969	21.8
1100+	332	21.1	37,096	13.5
District (Rural) Total	**1576**	**100.0**	**274,739**	**100.0**
Sex ratio (Rural) for District:		**944**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 332 (21.1 per cent) having population (13.5 per cent) in the district (rural) fall in the sex-ratio range of 1100 and above in age of 0-6 years. The sex-ratio range of 1000 – 1099 which claims 292 villages (18.5 per cent) and 21.8 per cent population. Next to it, 186 villages (11.8 per cent) are in the range of 900-949 with 15.9 per cent population. 165 villages (10.5 per cent) having 14.3 per cent population fall in sex-ratio range of 850-899. In remaining sex-ratio ranges of 700-749, 750-799, 800-849 and 950-999 claim number of villages and these are distributed as 63 (4.0 per cent), 100 (6.3 per cent), 146 (9.2 per cent) and 124 (7.9 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 59.3 having population (64.3 per cent) fall in the higher sex-ratio ranges of 900-949 and above.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Hariharpur	(NP)	1,844	981	863	880
2	Khalilabad	(NPP)	6,578	3,464	3,114	899
3	Ledwa Mahua	(CT)	2,562	1,345	1,217	905
4	Maghar	(NP)	3,092	1,659	1,433	864
5	Mehdawal	(NP)	4,587	2,385	2,202	923
District(Urban) Total			**18,663**	**9,834**	**8,829**	**898**

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns 2001. In urban area of the district the total population in age group of 0-6 is 18,663 in which 9,834 are males and 8,829 females and sex ratio of the urban areas of the district is 898. Among five towns sex ratio

in age group 0-6 varies from 864 in Maghar (N.P.) to 923 in Mehdawal (N.P.) In three towns sex ratio is more than the district average. Among five towns Khalilabad (NPP) has highest population.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTE AND SCHEDULED TRIBE POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total population
1	2	3	4	5	6	7	8
1	Mehdawal	Total	389,348	65,238	108	16.8	0
		Rural	364,686	62,561	108	17.2	0

		Rural	539,137	116,016	192	21.5	0
		Urban	66,640	7,561	0	11.3	0
3	Ghanghata	Total	425,101	112,087	7	26.4	0
		Rural	415,852	110,154	7	26.5	0
		Urban	9,249	1,933	0	20.9	0
	District Total:	**Total**	**1,420,226**	**300,902**	**307**	**21.2**	**0**
		Rural	**1,319,675**	**288,731**	**307**	**21.9**	**0**
		Urban	**100,551**	**12,171**	**0**	**12.1**	**0**

Table 14 depicts the distribution of Scheduled Caste and Scheduled Tribe population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,420,226 total population of the district, 21.2 per cent of the total population belong to the Scheduled Caste and negligible to Scheduled Tribe. The percentage of Scheduled Caste population constitutes 21.9 per cent in rural population and 12.1 per cent in urban population of the district. The highest percentage of total Scheduled Caste population is recorded in Ghanghata tahsil (26.4) while the lowest is found in Mehdawal tahsil (16.8). The proportion of Scheduled Tribe population is negligible in rural and nil population in urban areas. Scheduled Tribe population in the district is concentrated in tahsil of Khalilabad and Mehdawal. The lowest population of Scheduled Tribe is recorded in Ghanghata tahsil.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTE AND SCHEDULED TRIBE POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Rudhauli	81,645	16,651	0	20.4	0.0
2	Kudaraha	24,781	6,285	0	25.4	0.0
3	Sotha	123,821	19,701	0	15.9	0.0
4	Mehdawal	145,118	23,187	108	16.0	0.1
5	Baghauli	56,196	12,222	0	21.7	0.0
6	Semariyawan	326,580	61,534	29	18.8	0.0
7	Khalilabad	170,463	45,282	163	26.6	0.1
8	Nath Nagar	165,806	42,784	0	25.8	0.0

	District (Rural) Total:	**1,319,675**	**288,731**	**307**	**21.9**	**0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 21.9 per cent of rural population of the district belongs to Scheduled Castes

and negligible to Scheduled Tribe. At C.D. block level, Scheduled Caste population varies between 15.9 per cent in Sotha and 27.1 per cent in Haisar Bazar C.D. block.. The other C.D. block containing the percentage of Scheduled Castes are Rudhauli (20.4), Kudaraha (25.4), Mehdawal (16.0 per cent),Baghauli (21.7 per cent), Semariyawan (18.8 per cent), Khalilabad (26.6 per cent)and Nath Nagar (25.8 per cent). The S.T. population reside only in Mehdawal, Samariyawan, Khalilabad and Haisar Bazar C.D. Blocks of the district.

TABLE 16 : PROPORTION OF SCHEDULED CASTE POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	227	14.4	0	0.0
Less than 5	87	5.5	2,410	0.8
5-10	174	11.0	16,503	5.7
11-20	371	23.5	68,138	23.6
21-30	301	19.1	74,571	25.8
31-40	189	12.0	51,330	17.8
41-50	95	6.0	33,165	11.5
51-75	90	5.7	34,505	12.0
76 and above	42	2.7	8,109	2.8
District (Rural) Total	**1,576**	**100.0**	**288,731**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Caste population to their total population in different ranges of percentage at district level. 227 villages accounting for 14.4 per cent of total 1,576 inhabited villages in the district do not have any Scheduled caste population. The proportion of Scheduled Caste population is less than 5 per cent in 87villages (5.5 per cent). In 174 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 371 villages constituting 23.5 per cent of the total villages. The range 21-30 and 31-40 per cent contains 301 and 189 villages respectively. Both these ranges together account for 31.1 per cent villages of the district. 42 villages fall in the range of 76 and above per cent. The percentage range of Scheduled caste population to total population of 41 – 76 and above constitute a total of 227 villages with a population of 26.3 per cent. The maximum of the 25.8 per cent of the Scheduled Caste population is covered by range of 21-30 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,566	99.4	0	0.0
Less than 5	8	0.5	123	40.1
5-10	0	0.0	0	0.0
11-20	2	0.1	184	59.9
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District (Rural) Total	**1,576**	**100.0**	**307**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribe population to total population in the villages. Percentage of rural population of the district belong to Scheduled Tribe is negligible. There are 1,566 (99.4 per cent) villages where none of Scheduled Tribes have been recorded in the district. 8 (0.5 per cent) villages have proportion of Scheduled Tribes population of 40.1 per cent and remaining 2 (0.1 per cent) villages have 59.9 percent Scheduled Tribes population of the district. Thus total 307 S.T. population is distributed in 10 villages in which 8 villages have less than 5 per cent S.T. population. Two villages contain 184 S.T. population which is in range of 11-20 per cent S.T. population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTE AND SCHEDULED TRIBE4 POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

4	Maghar (NP)	15,850	1,686	0	10.6	0
5	Mehdawal (NP)	24,662	2,677	0	10.9	0
District(Urban) Total		**100,551**	**12,171**	**0**	**12.1**	**0**

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded during 2001 census in district. In five towns of the district, Hariharpur (N.P.) has the highest (20.9 per cent) proportion of scheduled caste population and Ledwa Mahua (C.T.)has the lowest 1.5 per cent S.C. population in the district. Scheduled tribe population does not reside in urban area of the district.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Rudhauli	955	0
2	Kudaraha	924	0
3	Sotha	986	0
4	Mehdawal	986	1,400
5	Baghauli	1,017	0
6	Semariyawan	973	706
7	Khalilabad	959	716
8	Nath Nagar	970	0
9	Haisar Bazar	997	750
	District (Rural) Total	**977**	**907**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Caste sex-ratio is 977 for district (rural). Among the C.D.blocks, the highest sex ratio of 1017 is found in Baghauli C.D. block and lowest of 924 females is recorded in Kudaraha C.D. block. This table also shows sex ratio of ST population in rural areas of the district is 907. So far as Scheduled Castes are covered the sex ratio in Sotha, Mehdawal Baghauli and Haisar Bazar C.D. block is above the parity line while in remaining eight C.D. blocks it is below the line of parity while in case of STS, the sex ratio is above parity line in Mehdawal C.D. block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Hariharpur (NP)	921	0
2	Khalilabad (NPP)	882	0
3	Ledwa Mahua (CT)	809	0
4	Maghar (NP)	878	0
5	Mehdawal (NP)	845	0
Sex ratio (Urban) for the district:		**878**	**0**

Table 20 shows sex-ratio among scheduled castes and scheduled tribes in urban agglomerations/towns 2001. Among five towns sex ratio of scheduled castes is highest in Hariharpur (N.P.) and it is lowest in Ledwa Mahua (C.T.) Which has sex ratio of 809. In five towns of the district S.T. population does not reside. In urban area of the district Sant Kabir Nagar sex ratio of SC is 878.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 50.9 per cent in the district. This proportion in rural area is 49.7 per cent against 66.4 per cent in urban areas. In the district the literacy rates of males (66.6 per cent) is much higher than that of females (34.9 per cent). Among the tahsils, Khalilabad tahsil tops with 54.4 per cent literates followed by Ghanghata tahsil (50.9 per cent). Mehdawal tahsil with 45.4 per cent literates stands at the bottom in the district. Out of three tahsils, the literacy rates of Khalilabad tahsil is higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to31.7 per cent in the district, as a whole. The situation at tahsil level is not much different. However, this gap in urban literacy is low which comes to 22.0 percentage points against the rural areas, where the gap between male and female literacy is 32.3 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

	District (Rural) Total	**519,021**	**345,359**	**173,662**	**800,654**	**321,388**	**479,266**	**49.7**	**65.7**	**33.4**	**32.3**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 49.7 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 65.7 and 33.4 per cent respectively which shows very wide gap of 32.3 per cent in male and female literacy. At C.D. block level, Nath Nagar C.D. block has the highest rural literacy rate of 53.8 per cent while 70.0 per cent males and 37.3 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Kudaraha C.D. block (40.5 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 35.3 per cent is found in Khalilabad C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	7	0.4	54	0.0
1-10	5	0.3	1,225	0.1
11-20	35	2.2	14,717	1.1
21-30	108	6.9	68,337	5.2
31-40	238	15.1	196,238	14.9
41-50	407	25.8	371,508	28.1

71-80	44	2.8	18,917	1.4
81-90	14	0.9	2,520	0.2
91-99	2	0.1	93	0.0
100	11	0.7	172	0.0
District Total	**1,576**	**100.0**	**1,319,675**	**100.0**
Literacy rate for District		**50.9**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 7 villages (0.4 per cent) of the district and population of these villages is only 54 persons. 11 villages (0.7 per cent) have all the literate population. 474 villages accounting for 30.1 per cent of the total villages are in the literacy range of 51-60 per cent and 231 villages (14.7 per cent) fall in the

literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 percent observed in 793 villages (50.3 percent) of the district. The higher literacy ranges of 71 to 100 per cent covers 71 villages (4.5 per cent). The range of 51-70 have the maximum number of 705 villages forming 44.8 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Hariharpur (NP)	4,307	2,737	1,570	4,942	2,002	2,940	58.2	72.8	43.0	29.8
2	Khalilabad (NPP)	25,232	14,861	10,371	14,327	6,017	8,310	76.5	85.3	66.6	18.7
3	Ledwa Mahua (CT)	4,799	3,038	1,761	6,432	2,876	3,556	55.4	66.5	43.0	23.5
4	Maghar (NP)	8,593	5,116	3,477	7,257	3,165	4,092	67.4	77.3	56.7	20.6
5	Mehdawal (NP)	11,432	7,209	4,223	13,230	5,697	7,533	56.9	68.5	44.2	24.3
District(Urban) Total		**54,363**	**32,961**	**21,402**	**46,188**	**19,757**	**26,431**	**66.4**	**76.9**	**54.9**	**22.0**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Khalilabad (NPP) town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (66.4 percent). In urban areas of the district highest literacy rate (76.5 per cent) is observed in Khalilabad (NPP) and lowest literacy rate (55.4 per cent) in Ledwa Mahua (C.T.). In five towns of the district, Khalilabad (NPP) and Maghar (N.P.) have literacy rates above the district average. While others have lower literacy rates. The highest gap of male and female literacy rate is 29.8 in Hariharpur (N.P.) and this gap in Khalilabnad (NPP) is lowest 18.7.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTE LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates

	District (Rural) Total	**92,323**	**65,910**	**26,413**	**196,408**	**80,125**	**116,283**	**40.8**	**57.8**	**23.6**	**34.2**

Table 25 shows number and percentage of scheduled caste literates and illiterates by sex in C.D. blocks 2001. In rural areas of the district proportion of literates is 40.8 per cent in which 57.8 are males and 23.6 females. Thus, the gap in male and female literacy rate is 34.2. Among nine C.D. blocks, Khalilabad C.D. block has the highest literacy rate and Kudaraha C.D. block has the lowest

literacy rates. The gap in male/female literacy rates in Khalilabad and Baghauli C.D. block is highest and this gap is lowest in Kudaraha C.D. block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTE POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Caste Population	Percentage distribution of population

District Total:	**1,349**	**100.0**	**288,731**	**100.0**
Literacy rate for District (Rural):		**40.8**		

The table 26 presents the distribution of villages by literacy rate range for scheduled castes population at the 2001 census. In majority of inhabited villages 1,173 (86.9 per cent) the literacy range is 21 to 60 percentage where 93.8 per cent scheduled castes population of the district resides. In the district there are 691 villages (51.2 per cent) with high literacy range of 41-70.

TABLE 27 :NUMBER AND PERCENTAGE OF SCHEDULED CASTE LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Male	Female	Persons	Male	Female	Persons	Male	Female	
1	2	3	4	5	6	7	8	9	10	11	12
1	Hariharpur (NP)	591	423	168	1,342	583	759	38.3	53.5	22.3	31.2
2	Khalilabad (NPP)	2,244	1,556	688	3,461	1,476	1,985	48.6	63.3	31.9	31.4
3	Ledwa Mahua (CT)	66	45	21	104	49	55	52.8	67.2	36.2	31.0
4	Maghar (NP)	709	470	239	977	428	549	52.3	66.8	36.7	30.1
5	Mehdawal (NP)	884	655	229	1,793	796	997	40.8	55.7	23.1	32.6
	District (Urban) Total	**4,494**	**3,149**	**1,345**	**7,677**	**3,332**	**4,345**	**45.8**	**60.6**	**29.2**	**31.4**

The table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is more than literates in the district (urban) and towns. The percentage of literates is least in Hariharpur (N.P.) among towns but the gap in male/female literacy rate is highest in Mehdawal (N.P.). The males in all the five towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in Maghar (N.P.) and also the female literacy rate is highest in this town.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Mehdawal	11	10	1	97	35	62	13.4	26.3	2.3	24.0
2	Semariyawan	4	3	1	25	14	11	16.7	20.0	11.1	8.9
3	Khalilabad	65	47	18	98	48	50	48.9	60.3	32.7	27.6
4	Haisar Bazar	1	1	0	6	3	3	16.7	25.0	0.0	25.0
	District (Rural) Total	**81**	**61**	**20**	**226**	**100**	**126**	**33.1**	**45.2**	**18.2**	**27.0**

The table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in C.D. Blocks at the 2001 census. The number of illiterates is more than literates in the district and C.D. Blocks. The literacy rate of the scheduled tribes population at 33.1 per cent is lower than the scheduled castes which stands at 40.8 per cent. The gap in male and female literacy rates is 27.0 per cent is also lower than what it is in case of the scheduled castes (34.2 per cent). The literacy rate is highest in Khalilabad C.D. Block and lowest in Mehdawal C.D. Block. The gap in male/female literacy rate in Semariyawan is lowest.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBE POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	3	30.0	15	4.9
1-10	1	10.0	48	15.6
11-20	3	30.0	88	28.7
21-30	1	10.0	23	7.5

71-80	0	0.0	0	0.0
81-90	0	0.0	0	0.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District (Rural) Total	**10**	**100.0**	**307**	**100.0**
Literacy rate for District (Rural)		**33.1**		

The table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 census. In the district the scheduled tribes population is found in 10 villages out of which in no village covers the 100 per cent literates. However, the maximum (40.7 per cent) of the scheduled tribes population (125) is found in only in one village with literacy range from 51 to 60 percentage. Out of 10 villages of the district which have Scheduled Tribes population, three villages have no S.T. literates, which have 4.9 per cent S.T. population of the district. The highest literacy rate of S.T. is found in range 61-70 per cent in a single village of the district, which has 2.6 per cent S.T. population of the district.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
District (Urban)		**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**

The table 30 gives number and percentage of scheduled tribe literates and illiterates by sex in urban agglomerations/town population at the 2001 census. There is no scheduled tribe population in the towns of the district.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN TAHSILS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out to 34.4 per cent of the total population in the district. The total workers comprise of 20.8 per cent of main workers and 13.7 per cent of marginal workers and the remaining 65.6 per cent are non-workers.

Among the main workers, male participation rate in the district is 34.1 per cent and 7.1 per cent of females. Male and female marginal workers account for 10.8 and 16.6 per cent respectively. The percentage of female marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 33.0 per cent in Khalilabad tahsil to 36.2 per cent in Mehdawal tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of 1,319,675 total rural population of the district, 20.7 per cent has been categorized as main workers and the marginal workers constitute 14.3 per cent and the remaining 64.9 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 33.9 per cent males and 7.2 per cent females are in the category of main workers. Male and female marginal workers account for 11.2 and 17.5 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level**.**

The percentage of total rural workers of the district comes to 35.1. At the C.D. block level, Kudraha has highest proportion of total workers forming 38.2 per cent of the total population. It is closely followed by Sotha (37.0 per cent), Baghauli (37.0 per cent), Rudauli and Mehdawal C.D. blocks (36.6 per cent). The lowest percentage of 33.0 per cent is recorded in Khalilabad C.D. block.

Table 33 shows number and percentage of main workers, marginal workers and non-workers by sex in urban agglomerations/towns, in 2001 census. In urban areas of the district total population is 100,551 in which 21.5 per cent population is main worker and 4.8 per cent population is marginal workers. The proportion of non workers in urban areas of the district is 73.8 per cent. In urban areas of the district the proportion of male and female main workers are 36.9 per cent and 4.5 per cent respectively. Similarly, the proportion of male and female non-workers are 57.7 and 91.5 per cent respectively.

Among five towns of the district, the lowest proportion of main workers (18.5 per cent) is observed in Maghar (N.P.) and its highest proportion (27.0 per cent)in Ledwa Mahua (C.T.).Similarly, proportions of non-workers varies from 69.1 per cent in Ladwa Mahua (C.T.) to 76.2 per cent in Maghar (N.P.).

Note: Percent of Workers to total workers are given in brackets

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 44.2 per cent of the total workers (main + marginal) and remaining 37.9 per cent of total workers are engaged as agricultural labourers, Household industry workers (3.5 per cent) and other workers (14.3 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 42.1 per cent in Khalilabad tahsil and 47.3 per cent in Mehdawal tahsil. These variations within the district may be due to different cropping and land holding patterns. The percentage of female cultivators is 35.2 per cent which is low as compared to 48.9 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The workers in other activities occupy the third position next to agriculture in the district as well as in each tahsil. The highest proportion of 18.8 per cent of other workers is recorded in Khalilabad tahsil while the lowest proportion of 10.7 per cent is found in Ghanghata tahsil.

Note: Percent of Workers to total workers are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) 35.1 per cent of total population. Among these workers, cultivators constitute 46.4 per cent, 39.4 per cent agricultural labourers, 3.2 per cent household industry workers and 11.0 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 3.2 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of females (35.9 per cent) is lower than males (52.0 per cent) in the rural areas of the district. The females play key role in rural economy of the district. The proportion of cultivators varies between 39.6 per cent in Kudaraha C.D. block to 52.5 per cent in Rudhauli C.D. block. Similarly, for other workers, the lowest proportion is 5.4 per cent in Kudaraha C.D. block while 15.7 per cent is the highest in Khalilabad C.D. block. The percentage of household industry workers is quite low i.e. only 3.2 per cent in the district. The percentage of agricultural labourers is highest in Kudaraha (53.0 per cent) block and lowest in Khalilabad (35.6 per cent).

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Sant Kabir Nagar. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (72.4 per cent), followed by Agricultural labourers (12.3 per cent, 9.0 per cent male and 30.4 per cent females). If we observe each town, the table reveals that highest percentage of cultivators (22.6 per cent) is recorded in Hariharpur. In the agricultural labourers category Ladwa Mahua (C.T.) recorded very low percentage (2.7) in Agricultural labourer categories the highest percentage of 32.3 in Harihar pur N.P. Household industry workers vary 3.5 per cent in Hariharpur (N.P.) and 13.4 per cent in Ledwa Mahua (C.T.).

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37-47:

One of the major parts of the District Census Handbook are Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in towns and villages. From this non-census data, inset tables have been generated and reproduced below showing major trends in the availability of above amenities:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, banks, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1576 inhabited villages in the district 765 villages or 48.5 per cent have been provided with the education facilities of one type or the other. Similarly 262 villages in the district constituting 16.6 per cent have medical facilities of one type or the other. Improved drinking water facility is available in1550 or 98.4 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 163 villages constituting 10.3 per cent of villages have been provided with post office facility within the village. 115 or 7.3 per cent villages have been provided with the telephone facility, 76 or 4.8 per cent with transport facility, 63 or 4.0 per cent villages with bank facility and 66 or 4.2 per cent with agricultural credit societies. Similarly there are 832 or 52.8 per cent villages which have been linked with the pucca road. Total 1045 (66.3) per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Kudarha C.D. block has the highest 64.3 per cent villages where educational facility is available and lowest 39.2 per cent is found in Baghauli. Medical facility is highest in Khalilabad

(30.1 per cent) and lowest (8.8 per cent) in Nath Nagar C.D. block. Improved drinking water is available to cent-percent villages in Kudaraha and Baghauli blocks while in other blocks, it is above 96 per cent. Telephone facility is highest in Khalilabad (14.4 per cent). Transport and communications is less developed in Baghauli where no village is covered by this facility. In the field of power supply Rudhauli, Kudaraha, Sotha C.D. blocks have less than 50 per cent villages where electric supply is available while post office facility is highest in Rudhauli block (13.1 per cent and lowest in Kudaraha C.D. block (3.6 per cent).

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available					Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1,319,675 persons in the district, 890,375 or 67.5 per cent have educational facility of one or the other type. Similarly 406,682 or 30.8 per cent population has medical facilities while 1,312,455 or 99.5 per cent have got improved drinking water facility. Post office facilities are available to 321,469 or 24.4 per cent population. Telephone facility is available to 165,241 or 12.5 per cent. Transport communication facility is available to 115,191or 8.7 per cent. Bank facility is available to 127,907 or 9.7 per cent. 135,306 or 10.3 per cent have been provided with the facility of agricultural credit societies. 859,430 or 65.1 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,029,379 or 78.0 per cent rural

population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level except Baghauli C.D. block which is difficult area of the district. However, in Kudaraha,Khalilabad and Nath Nagar C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	843	22	3	868
(b) Middle School	994	399	17	1,410
(c) Degree College	218	344	1,008	1,570
2. Medical:-				
(a) Hospital	473	506	580	1,559
(b) PHC	369	733	460	1,562
3. Post Office	1,253	133	27	1,413
4. Telephone	762	336	363	1,461
5. Bus Service	557	595	372	1,524
6. Banks				
(a) Commercial Bank	915	479	123	1,517
(b) Cooperative Bank	357	716	492	1,565
7. Agricultural Credit Societies	1,062	348	100	1,510

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 868 villages do not have primary school in their villages and out of these villages, children of 843 villages have to travel less than 5 kms. for schooling. Out of 1,576 inhabited villages as many as 1,410 are deprived of middle school and 1,570 of degree college. Of these 994 avail the facility of middle school at a distance of less than 5 kms., 399 at a distance 5-10 kms. and the remaining 17 at a distance of 10+ kms. In respect of degree college 218 avail this facility at a distance of less than 5 kms., 344 between 5 to 10 kms. and rest 1008 villages at a distance of 10+ kms.

Similarly, there are 1,559 villages in the district which have been devoid of Hospital facility and 1,562 villages which are deprived of PHC facilities. Of these, 473 villages have the facility of Hospital available within 5 kms. while in respect of 506 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly, overwhelming number i.e. 580 villages have this facility at a distance of 10+ kms. As regards PHC 369 avail this facility at a distance of less than 5 kms., 733 at a distance of 5-10 kms. and the remaining 460 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1413 villages do not have this facility in the village itself. Of these majority i.e. 1,253 have this facility at a distance of less than 5 kms., another 133 villages avail it at a distance of 5-10 kms. In the remaining 27 villages inhabitants have to travel a distance of 10+ kms.

As regards Telephone, there are 1,461 villages in the district which are without telephone facility. Of these 762 avail this facility at a distance of less than 5 kms., 336 at a distance of 5-10 kms. and remaining 363 have to traverse a distance of 10+ kms.

For Bus service out of 1,524 villages which do not have facility, 557 villages avail this facility at a distance of less than 5 kms., 595 at a distance between 5-10 kms. and 372 at a distance of 10+ kms.

In the entire district 1,517 villages are deprived of Commercial Bank & 1,565 of Co-operative Bank. Of these 1,517 villages which are deprived of Commercial Banks, 915 villages avail this facility at a distance of less than 5 kms., 479 between 5-10 kms. & the remaining 123 at a distance of 10+ kms. Regarding Co-operative Banks, out of 1,565 villages, 357 villages avail this facility at a distance of less than 5 kms., 716 at a distance of 5-10 kms. and remaining 492 at a distance of 10+ kms. 1,510 villages do not have agricultural credit societies. This facility to 1062 villages is available at a distance of less than 5 kms., 348 at a distance of 5-10 kms. and the remaining 100 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres) Number of inhabited villages in each range	Type of amenity available						Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1576 inhabited villages in the district, there are 357 villages which have nearest towns upto a distance of 5 kms. Of these only 174 villages forming 48.7 per cent of these total villages, are having the educational facilities of one type or the other and 48 villages constituting 13.4 per cent, have the medical facilities within the village, 35 villages forming 9.8 per cent have the facility of post office within the village and 12 or 3.4 per cent have the facility of telephone. 14 villages constituting 3.9 per cent have been linked by transport service. 11 villages comprising 3.1 per cent have been provided bank facilities, while 13 villages constituting only 3.6 per cent have been provided by agricultural credit societies. 174 villages comprising 48.7 per cent have been provided with pucca road.

There are 757 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 359 villages constituting 47.4 per cent have been provided with the educational facilities. 129 villages comprising 17.0 per cent have been provided with medical facilities. 73 villages constituting 9.6 per cent enjoy the post office facility. 57 villages comprising 7.5 per cent have been

provided with the telephone facility. 38 villages constituting 5.0 per cent have been linked with transport communication. 36 villages comprising 4.8 per cent have bank facility. 35 villages constituting 4.6 per cent are having agricultural credit societies, while 427 villages or 56.4 per cent are approachable by pucca road. 404 villages fall in the distance range of 16-50 kms. Of these, 51.2 per cent villages have educational facility, 15.3 per cent with medical, 11.9 per cent with post office, 10.1 per cent with telephone and transport & communications available to 5.0 per cent villages. Banks and agricultural credit societies facilities are available to 3.0 and 3.7 per cent of villages.

There are 2 villages in the district which are situated beyond 50 kms.from the nearest town and out of these 2 or 100 per cent enjoy the education facility in the village itself whereas 1 village comprising 50 per cent has been provided with medical facility of one type or the other. 1 such village comprising 50 per cent have the post office facility. No village comprising 0 per cent have been provided with telephone facility. no village constituting 0 per cent have been linked by bus service whereas no village comprising 0 per cent have been provided with the bank facilities. Only no village comprising 0 per cent having agricultural credit societies while 1 village comprising 50 per cent have been linked by pucca roads. There are 56 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 41.1 per cent villages have the educational facility of one or other type. 22 villages constituting 39.3 per cent have the medical facility. 34 villages have also been connected by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Sant Kabir Nagar district, out of a total 1576 inhabited villages, overwhelming 626 have a population of less than 500 persons. Of these, 150 villages (24 per cent) have education facility, 32 (5.1 per cent) have medical facility, 604 (96.5 per cent) have improved drinking water facility. no village (0 per cent) has post office facility. 17 (2.7 per cent) have telephone facility. 23 (3.7 per cent) have been linked by bus service. 14 (2.2 per cent) have Bank facility. No village (0 per cent) has been provided with the agricultural credit societies, 258 villages (41.2 per cent) have been linked with pucca road. 317 villages (50.6 per cent) have been provided with electricity.

Out of 518 villages, which fall in the population range of 500-999 persons, 278 villages (53.7 per cent) have been provided with the education facility, 85 (16.4 per cent) with medical facility, 99.6 per cent villages have improved drinking water facility. 49 villages (9.5 per cent) have been provided with post office facilities, 36 villages (6.9 per cent) with telephone facility, 17 villages (3.3 per cent) with transport facilities, 7 villages (1.4 per cent) with bank facility, 21 villages (4.1 per cent) with agricultural credit societies, 270 villages (52.1 per cent) have approach by pucca road and 372 (71.8 per cent) villages in this range have electricity.

318 villages fall in population range of 1,000-1,999 persons. 238 (74.8 per cent) villages have education 317 (99.7 per cent) villages have improved drinking water facility and 257 (80.8 per cent) villages have electricity supply facility. . Whereas 83 villages (26.1 per cent) enjoy the medical facility, 58 villages (18.2 per cent) have post office facility, 38 villages (11.9 per cent) have telephone facility, 19 villages (6.0 per cent) have transport communication facilities, 21 villages (6.6 per cent) have bank facilities, 22 villages (6.9 per cent) have agricultural credit societies and 206 villages (64.8 per cent) have approach by pucca.

There are 106 villages in the district which are covered under 2,000-4,999 population range. In this range, 91 (85.8 per cent) villages enjoy the facility of education, 99.1 per cent improved drinking water, telephone, 11.3 per cent transport communications, 84.9 per cent approach by pucca road and 85.8 per cent power supply. There are 8 villages in range 5000-9999 in which 8 villages (100 per cent) have medical ,education, improved drinking water, approach to pucca road, and electric supply facility. 7 villages (87.5 per cent) have post office facility, 6 villages (75 per cent) have bank facility, 4 villages (50 per cent) having agricultural credit societies. There is no village in the district having a population of 10,000 persons or above.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Rudhauli	99	37,762.7	26.9	88.9
2	Kudaraha	28	2,915.7	73.9	62.6
3	Sotha	141	9,490.9	NA	NA
4	Mehdawal	188	16,155.4	80.8	68.4
5	Baghauli	79	5,264.6	82.2	84.6
6	Semariyawan	328	29,045.5	NA	NA
7	Khalilabad	209	16,559.5	93.1	84.6
8	Nath Nagar	227	34,527.9	48.0	84.8
9	Haisar Bazar	277	23,524.6	NA	NA
	District Total:	**1,576**	**175,246.7**	**73.2**	**79.8**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,576 inhabited villages in the district having a total area of 175,246.7 hectares. Of this, 73.2 per cent is cultivable and 79.8 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Rudhauli block with 99 villages have a total area of 37,762.7 hectares, of this 26.9 per cent of land is cultivable and of the aforesaid area 88.9 per cent is irrigated. In Kudaraha block, all the 28 villages have a total land area of 2,915.7 hectares, of this 73.9 per cent of land is cultivable and of the aforesaid area 62.6 per cent is irrigated. In Mehdawal block, all the 188 villages have a total area of 16,155.4 hectares, of this cultivable area is 80.8 per cent and 68.4 per cent is irrigated. In Baghauli block, all the 79 villages have a total area of 5,264.6 hectares. Of this, cultivable area is 82.2 per cent. Of cultivable area 84.6 per cent is irrigated. Khalilabad block with 209 villages have a total land area of 16,559.5 hectares, of this 93.1 per cent is cultivable area and out of this cultivable area 84.6 per cent is irrigated. Nath Nagar block with 227 villages has a total land area of 34,527.8 hectares. Of this 48.0 per cent is cultivated area, out of which 84.8 per cent is irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		District Total	Through taxes	From all other sources	District Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)

3	Maghar, NP	1.9	1.3	0.6	0.6	0.0
4	Hariharpur, NP	14.1	3.2	1.1	1.1	0.0
	District	**4.8**	**1.3**	**0.9**	**1.1**	**0.1**

Table 44 shows in urban areas of Sant Kabir Nagar district the average number of primary school per 10,000 population comes 4.8 schools,1.3 junior secondary/middle,0.9 secondary/matriculation, 1.1 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among the towns, the ratio of primary and junior secondary/ matriculation is highest in Hariharpur (N.P.) while in case of senior secondary school this position is claimed by Khalilabad (NPP), (1.5), college education is also highest in Khalilabad (NPP).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001		
Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Hariharpur, NP	0
2	Khalilabad, NPP	10
3	Ledwa Mahua, CT	0
4	Maghar, NP	3
5	Mehdawal, NP	12
	District	**7**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Sant Kabir Nagar district. On an average there are 7 beds per 10,000 population in urban areas of the district. Whereas it is the highest 12 in Mehadawal (N.P.) while lowest value of 3 beds is recorded in Maghar (N.P.) while Ledwa Mahua (C.T.) and Hariharpur NP shows no bed.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001				
Sl.No.	Name of the Town	District Total population	Slum population	Percentage of slum population to District Total population
1	2	3	4	5
Not Available				

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001			
Sl.No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Hariharpur, NP	Iron Utensils, Mustard Oil,Thrasher	Food grains, Vegetable, Wood
2	Khalilabad, NPP	Handloom Cloth, Gur, Rope	Handloom Cloth, Food grains, rope
3	Ledwa Mahua, CT	Handloom Cloth,	Power Loom Cloth,
4	Maghar, NP	Towel, Lungi, Cotton Clothes	Woollen Clothes, Soap, Cotton Cloth

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for handloom cloth.The chief export items of the district are handloom products which are the main items which are manufactured in Maghar (N.P.) town and these are mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities collected during, House listing Operations, Census of India 2001 based on inset tables 48 to 52:

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the house list, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared. In 1991 census, the house list was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. have been added in the schedule for the first time . The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied:

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 215,274 consisting of 201,774 rural and 13,500 urban households. 54,092 households belong to Scheduled Castes and 1,224 to Scheduled Tribes. 212,079 households are living in their owned houses constituting 98.5 per cent of total households. Of these households, the largest number of households (67,990) have occupied double roomed accommodation and is followed by single roomed accommodation numbering to 60,043 households. Next position is claimed by households (42,522) occupying three plus roomed accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with (35,792) households while 5,732 households are without any exclusive room.

2,249 households living in rented accommodation account for 1.0 per cent of total number of households in the district. The largest number of 907 households are living in two roomed accommodation followed by 812 households in single roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 946 forming only 0.4 per cent of total households are distributed in single roomed accommodation 355, double roomed 283, three roomed accommadation by 117 household and 127 in 3+ rooms accommodations.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban

	District Total	**66.6**	**20.7**	**12.7**	**65.7**	**21.0**	**13.3**	**79.3**	**15.9**	**4.8**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:- Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 66.6 per cent of the households in the district had permanent houses. The trend is different in rural (65.7per cent) and urban area (79.3 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Mehdawal (70.3 per cent) followed by Khalilabad (69.9 per cent), and lowest in Ghanghata (58.8 per cent). In respect of semi-permanent houses, the returns were 20.7 per cent at district level where as among tahsils, in Ghanghata it was 22.3 per cent highest and lowest was 18.8 per cent in tahsil Mehadawal. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 15.9 and 21.0 per cent in rural areas. Temporary houses in the district lie between the range of 4.8 per cent in urban area to 13.3 in rural area.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Serial number	Tahsil	Total / Rural / Urban	Number of households	Number and percentage of households having				
				Improved drinking water	Electricity	Bathroom	Toilet	Drainage

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house. Toilet means toilet within the house. Drainage menas closed and open drainage.

The above table shows that out of total households of the district, 92.0 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 91.8 and 93.9 per cent respectively. Tahsil Ghanghata had higher order of proportion of households having improved drinking water whose percentage for rural area was 93.5 and 90.8 per cent in urban areas. Electricity was available to 25.3 per cent of households at district level. Bathrooms and toilet facilities were available in 16.6 and 14.8 per cent of households respectively. Tahsil Mehadawal was poorly served in respect of these amenities. Similarly drainage facility was poor in Mehadawal and Ghanghata tahsils. At district level drainage facility was available to 55.7 per cent of households, whereas the proportion of rural was 54.0 while in urban it was 81.5 per cent.

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total households	Fire wood	Crop residue	Cowdung cake	Electricity	Coal / Lignite (charcoal)	Cooking gas (L.P.G.)	Bio-gas	Kerosene	Others	No cooking

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 50. 9 per cent of households in the district use firewood as fuel for cooking, the proportion in the rural is 50. 5 per cent and in urban area it comes to 56. 8 per cent of households. L P G (cooking gas) has been reported as one of the fuel for cooking food to 2.0 of the households. The composition of rural and urban comes to 1.0 and 18.3 per cent respectively. Kerosene is used for cooking in 1.1 per cent of the households (0.5 per cent rural and 9.3 per cent urban households).The other methods like crop residue, cow ding cake, cool, lignite charcoal, electricity and biogas etc. ranges between 0.1 per cent is 33.9 per cent of the households of the

district. The pattern of fuel used for cooking follows that same trend in tahsils (rural areas), where predominant fuel in firewood. That table shows that firewood, L P G (cooking gas) and kerosene are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Availability of household assets		Availability of household assets

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

The table reveals that out of the total households (215,274) of the district, in all 90,884 could avail banking services at district level while only 78238,25354,4765,164070,12878, 3993 enjoyed the availability of household assets radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively whereas only 39,432 had none of the specified assets.

It also reveals that at tahsil level high number of households were availing banking services as well as all other households assets. The highest of none of specified assets 16,088 is in the tahsil Khalilabad.

(XI) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade:

This newly created district come into existence in the year 1997, during the last decade. It was carved out from district Basti. To give importance of Sant Kabir Das, the district was named after him. The district was created for the area. No significant social and cultural event has occurred during the last decade.

(XII) Brief description Places of Religious, Historical or Archeological importance in villages and Place of Tourist Interest in the town of the district:

From tourist point of view the district of Sant Kabir Nagar does not have any important place. However, some may find mention.

Maghar:

Maghar town is a historical and religious place in this district. It is situated about 15 kms from district headquarters on the bank of river Ami in the east. A temple built by Shri Harwart is located here. The town of Khalilabad was founded by Khalil-ur-rehman whose tomb may be seen at Maghar. A famous holy tomb is located here of Sant Kabir Das built by Acharya Guru Prasad Sahib. Thousand of persons visit this place to see the tomb.

(xiii) Major Characteristics and Contribution of the District:

It is the birth place of Sant Kabir Das, whose tomb is located in Maghar. It has a prominent place in the field of handicrafts, such as Brass & bronze utensils. Woolen Kalins (carpets) artistic wooden products, handloom and power loom cloths are famous. A weekly market is held at district headquarters. Khalilabad for marketing handloom and power loom clothes.

(xiv) Scope of Village Directory and Town Directory Column heading wise Explanation and Coverage of Data

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufactured	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities namely Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/Magazine etc.. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes

number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundary and separate land records. Thus in Census the basic unit of rural areas is taken as a revenue village which has definite surveyed boundaries. A revenue village may comprise of several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what have been mentioned above since there is no surveyed village in the State. Therefore an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also be included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included :

1. Appendix I — Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II — Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III — Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV — C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility is available.
5. Appendix V — Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI — Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII — List of villages according to the proportion of the Scheduled Caste and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII — Number of villages under each Gram Panchayat (C.D. Block wise)
9. Appendix IX — Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detail and explanatory notes on each of these abbreviations has also been incorporated for easy clarification of the subject concerned.

Village and Town Directory
(Section I and II)

Section -I
Village Directory

Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom	
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic	Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW	
(iv)	Maternity Home	MH	
(v)	Child Welfare Centre	CWC	
(vi)	Health Centre	HC	
(vii)	Primary Health Centre	PHC	
(viii)	Primary Health Sub-Centre	PHS	
(ix)	Family Welfare Centre	FWC	
(x)	T.B. Clinic	TB	
(xi)	Nursing Home	NH	
(xii)	Registered Private Medical Practitioner	RMP	
(xiii)	Subsidised Medical Practitioner	SMP	
(xiv)	Community Health Worker	CHW	
(xv)	Others	O	

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)(vi)	Navigable Canal Navigable waterways other than River, Canal	NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R

(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	The appendix shows the list of villages according to proportion of the
Appendix-VII B	Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT
LIST OF VILLAGES FULLY MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	**2**	**3**	**4**
Not applicable as there are no villages merged in towns & any outgrowths at 2001 census.

Annexure VIII Distribution of different mother tongues returned in 1991 Census 899

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage

enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri

New Delhi
Dated: 17.10.2006.

Registrar General &
Census Commissioner, India

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

SECTION II
TOWN DIRECTORY

Town Directory

Note explaining the abbreviations used in Town Directory :

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/

Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B - PRIMARY CENSUS ABSTRACT

(a) Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexures I to VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

Fertility and Mortality 1991 Census

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Basti
Q1	Persons	99	135
	Males	98	131
	Females	104	141
Q2	Persons	117	172
	Males	117	169
	Females	118	174
Q5	Persons	134	205
	Males	135	207
	Females	132	202

(*Undivided Uttar Pradesh at 1991 Census)

The child mortality by ages 1, 2 and 5 years was much higher in the district as against the State, The child mortality indicators in the district for females were in the improved condition as compared to the state by ages 1, 2 and 5 years

***Note**:-Sant Kabir Nagar district was carved out from Basti after 1991 Census. The data is not available separately for Sant Kabir Nagar. Hence, for comparison purpose of Annexure IV to VIII , the data of undivided Basti district have been used, assuming that the trends and pattern of districts are same.*

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male Female	Uttar Pradesh	Basti
1	2	3	4	5
1	CBR		37.21	35.5
2	TFR		5.60	5. 5
3	TMFR		6.30	5. 9
4	GFR		172	164.0
5	GMFR		200	175.0
6	Mean age at marriage (1981-91)		17.27	16.4
7	Number of children ever born per ever married woman aged 45-49 years		4.59	4.1
8	Child woman ratio 0-4		631	638.0
	Child woman ratio 5-9		752	770.0

Measures of fertility as an important component to describe fertility and mortality rate of any area. The table reveals that Crude Birth Rate(CBR),which is the ratio of the number of live births in a year to the mid year population, is 35.5 per thousand in the district. It is below to the state of Uttar Pradesh i.e. of 37.2 per thousand. In respect of Total Fertility Rate (TFR),Total Marital Fertility Rate (TMFR), General fertility Rate (GFR) and General Marital Fertility Rate (GMFR),the district presents all along a lower proportion from the state figures, The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state where as 16.4 years has been observed for the district. It may be observed that lower age at marriage leads to low rate of fertility in the state and district. It may be observed that lower age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever-married women in the age group 45-49. The state and the district figures are placed as 4.6 and 4.1 per thousand respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 638 and 770 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such are below to the state average. Another important factors i.e. the probability of dying between birth and at age 1, 2 &5 has been of higher order in the district in case of persons, males and females in the state.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 92.2 in 1991, while in 2001 it was 94.5 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 7.2 percent and 5.1 percent respectively. This shows in-migration from other states to this district was decreased in 2001 in comparison to 1991. At district level in-migration from other countries was 0.6 percent in 1991 and 0.4 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 87.3 percent and 90.1 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 11.8 percent and 9.4 percent respectively. The movement of population from other countries in the district was 0.9 percent in 1991 and 0.5 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 83.1 percent in 1991 and 75.6 percent in 2001, while Muslim were 16.5 percent in 1991 and 24.0 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 50.0 percent male and 42.5 percent female to 56.9 percent male and 48.5 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 3.1 percent male and 4.4 percent female while it was 4.0 percent male and 4.6 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Source:- Social & Cultural Table Pt IV A (Table # C-2)

*Age not stated.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Annexure-VII (a)

Note:-For the state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of " Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 83.8 percent person in 1991 and 78.7 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 7.6 percent and 15.4 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses, except Bhojpuri mother tongue which percentage was 5.9 at district level in 1991 and 5.8 percent in 2001 Census.
