MOTIF

WILD LIFE IN JUNGLE

Sohagibarva wild life sanctuary established in 1987 is spread over an area of 428 sq km in the district of Mahrajganj, Uttar Pradesh. It's northern boundary is adjoining to Nepal while to the east is Bihar state. The wide rivers Gandak, Chhotti Gandak, Pyas and Rohin squirt through the wild life sanctuary. The jungle has Sal, Sagaun, Sheesham, Khair and Arjun trees as well as Bamboo and Semul etc. The area of jungle is full of wide-spread grass and bushes and at different places a number of ponds and tanks are also available. The wild animals found here are Lion, Leopard, Banbilao, Cheetal, Kakar, Padha, Antelope, Wild Pig, Sehi etc., while the poisonous reptiles like Cobra and others besides python and crocodile are also found there. Flocks of birds belonging to various families can also be spotted here. The best period to visit here is from middle of October to middle of June.

Annexure II	Fertility and Mortality, 1991 Census	656
Annexure III	Various measures of fertility and mean age at marriage, 1991 Census	657
Annexure IV	Percentage distribution of Migrants by place of birth/place of last residence, 1991Census	658
Annexure V	Brief account of main religions in the district/tahsil as per 1991 Census	660
Annexure VI	Marital status of population as per 1991 Census	661
Annexure VII	Age, Sex and Education in the district, 1991 Census	665
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	669

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranbir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Mahrajganj ranks 36th in terms of population in the state.
2. The percentage share of urban population in the district is 5.1 as against 20.8 of the population in urban areas of the state.
3. Mahrajganj district has population density of 736 persons per sq.km.which is more than the state average of 690 persons per sq. km.
4. Mahrajganj district ranks 17th in terms of sex ratio (934) which is higher than the state average of 898 females per one thousand males.
5. Mahrajganj district ranks 62nd in literacy which is 46.6 per cent and is below than the state average of 56.3 per cent.
6. There are only 55 uninhabited villages out of total 1,258 villages in the district.
7. Decadal growth rate of the district (29.7) is higher than the state average of 25.8.
8. Maharajganj tahsil has the highest number of inhabited villages 436 while Pharenda tahsil has the lowest number(225).
9. The district has six towns. Niether any new town has been added after 1991 Census nor any town has been declassified.
10. There are 334,687 households in the district accounting for 1.3 per cent of the total households in the state. The average size of households in the district is 6.5 persons.

IMPORTANT STATISTICS

			State	District
			Uttar Pradesh	Mahrajganj

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 Census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 Census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 Census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District:

The district Mahrajganj is famous for its charming forests, vegetables and green plants of paddy in the fields. Ancient history of the district is almost unknown.. Mahrajganj was a tahsil of Gorakhpur. It became a district in October,1989 and as such its history can be associated with that of Gorakhpur. In the epic period, this region was known as 'Karapath' which was the part and parcel of the 'Kosala kingdom'. It seems that an ancient emperor 'Ekshvaku' of Ayodhya, founder of the Suryavans was the ruler of this area. The emperor of this dynasty , Ram in his lifetime handed over the dominion of this area to his son 'Kusha'. After the Mahabharat era, the revolutionary changes took place in this whole area. There were various small 'Ganatantra' (Republic) under the control of the Kosala's emperor in which the Ganatantra of Sakya's and Kolio's were stretched on the boundaries of the present Mahrajgnj district. According to a pilgrim of China named Hiuen-Tsang, Lumbini was twenty two miles far from Ramgram. The both pilgrims Fa-Huicn and Hiuen-Tsang have given vivid description about the stup erected on the bones of Buddha and the push Karani stationed in the back side of the stup. Kolio's were also related with the Dev Daha Nagar. Mahamaya, the mother of Lord Gautam Buddha and mother's sister Maha Prajapti Gautami were daughters of Sakya Chief Angan of Dev Daha who belonged to Nichlaul now a tahsil of Mahrajganj.

The period between the rise of the Guptas and downfall of Magadh supremacy is like a dark-ages in the history of the district. It appears that the Kushanas got success to establish his authority in this areas. After the Gupta's period this area remained in suzerainty of Maukharis and Harshverdhanas. During the Harsha regime a pilgrim of China named Hiuen-Tsang (630 to 644A.D.) made a journey of Ramgram. After the Harsha, the Bhali had gained complete ascendancy of some part of the district. In the

beginning of 4th century the most area of the district was included in the reign of Chandra Gupta I. The emperor Chandra Gupta I (319-335 A.D.)married princess (Kumardevi) of Lichchhavi and enlarged his strength and boundaries of dominion. In the 9th century,southern part of the district was comprised of Shrawasti-Bhukti (Province) of the Gurjara-Pratiharas kings where feudal lord Kala Churis established their sovereignty. After the decline of Gurjara Pratihars, Lakshmi Karna, the ruler of Kalachuri dynasty brought under his control the most landed property of this district. Afterwards Kalachuris, Gahadvalas, monarch of Kannauj gained complete ascendancy of the region. The reign of Govind Chand Gahadvala was spread upto Bihar wherein the most part of the district was comprised.

During the period of Firojashah Tuglaq this region remained in ascendancy of the local Rajput Kings. Neither Babar nor his son and successor Humauyn could bring this area under their control.The emperor Akbar paid attention towards this area in 1556 A.D. and after defeating the revolts of Khan-I-Zaman (Ali kuli-khan) gained complete ascendancy on this region. After the death of Khan-i-Zaman, Akbar handed over the Jagir of Jaunpur to Munim Khan.. During the period of Munim Khan law and order was maintained in this area. For the purpose of reorganization of his empire Akbar merged the whole tract of the district in the Sarkar of Gorakhpur under the suba of Avadh in 1596 A.D. At that time this region was under the control of Suryavansi Rajputs. In view of safety of the boundary of the headquarters, palaces and forts were constructed with bricks. The description of the Fort situated in Tilpur (In present Nichalaul) was given in Ain- e-Akbari written by Abul Fazal .After the death of Akbar, Jahangir consigned the Jagir of this area to Afzal Khan in 1610 A.D. Afterwards this tract had remained in the sovereignty of Mughals.

This region continued to be part of Gorakhpur Sarkar of the Avadh Suba upto 18th century. Sadat Khan was appointed as Nawab of Avadh and Faujdar of Gorakhpur on 1st September 1722 A.D. After passing away of Sadat Khan, Safadarjung was nominated as Nawab of Avadh in 1739 A.D. and after twenty years long struggle,he was compelled to surrender before the king of Butwal. The fate of Safdarjung was sealed in 1754 A.D. and his son and successor Shuja-ud-Daula became Nawab of Avadh. After the death of Shuja-ud-Daula his son Asaf-ud-Daula became the ruler of Avadh on 26th January 1775 A.D. Due to various treaties, the expenditure on East India company's army ,became very high for Nawab of Avadh. As a result of it, the Nawab Asaf–ud-daula handed over this region along with other regions toEast India company on 10th November 1801 A.D. The administration of this whole region was assigned to the Magistrate Routledge.. The first fight of freedom of 1857 fulfilled the feeling of consciousness and awakening of public spirit in the heart and mind of Indians.. The feudatories of this region declared war against British rule. The mass movement was being carried on against British Empire under the able leadership of Randula Son, the King of Nichlaul participated in first fight of freedom against the British. In consequence of which his title of Raja and allowance granted in 1845 A.D were forefeated. After declaration from queen Victoria, this region was brought under the control of British rule.

The non-co-operation movement led by Mahatma Gandhi was vindicated by the people of the district with might. Mahatma Gandhi visited Gorakhpur on 9th February 1921 A.D. The birthday of Mahatma Gandhi was celebrated with great Zeal. Pandit Jawahar Lal Nehru visited this region in 1923. Mahatma Gandhi accompanied by Kasturba, J.B. Kriplani and Shri Jai Prakash again visited Ghughuli Railway Station on 4th October 1929. Mahatma Gandhi addressed a large gathering in Mahrajganj on 5th October 1929. To oppose the salt law, hartal, satyagrah, meeting and processions were taken out in almost every village and town of the district in a peaceful and non-violent way. Given a call by Mahatma Gandhi in 1930, Shiblan Lal Saxena, professor of Saint Andrews College, gave up his professorship and laid foundation of sugar cane federation which worked for the welfare of struggling sugar cane producers and labourers. In 1937 Pandit Govind Ballabh Pant came here and addressed a large meeting. Pandit Jawahar Lal Nehru visited again this place and laid the foundation stone of local Ganesh Shanker Vidyarthi memorial School in 1940. India got independence on 15th Aggust 1947 and since then this region is making progress by leaps and bounds in every walk of life.

(iii) Administrative Setup

The district consists of Four Tahsils namely Nautanwa, Nichlaul, Pharenda and Mahrajganj. There are six towns and twelve community development blocks in the district. The two tahsils have one

town each namely Nautanwa Nagar Palika Parishad, Anand Nagar Panchyat and two tahsils have two towns each namely Nichlaul Nagar Palika Panchyat Siswa Bazar Nagar Panchayat and one tahsil Ghughuli Nagar Panchyat, Mahrajganj Nagar Palika Parishad. The rural areas of the district for administrative and development purposes are devided into twelve development blocks. There are 777 Gram Sabhas, 1,203 inhabited villages 55 un-inhabited villages with total 1,258 revenue villages. There 10 forest villages in the district.

Jurisdictional Changes (1991-2001)

No jurisdictional changes have taken place during the decade 1991-2000.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Zila Adhikari. He is assisted by Tahsildars in each tahsil for revenue collection, and each tahsildar is further entrusted to Naib Tahsildars and Kanoongos (circles). For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, education information etc. each have a department at district level. For development point of view the district is divided into community development block. Block Development Officer (BDO) looks after developmental works at community development block level and Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big district and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) are employed for their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

District and Session Judge head the judicial administration of the District. In addition there are several additional District Judge. Civil judge, Chief Judicial Magistrate and Munsif Magistrate and others judiciary officer are also posted for look into the legal matters.

The nucleus of the district body for local self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

Location and size :

District Mahrajganj is situated on the north-eastern corner of the state of Uttar Pradesh.The district lies between 26° 53' to 27° 26' North latitudes and 83 ° 6' to 83° 56' East longitudes It is bounded by Champaran district on the north east, on the east by Kushinagar (Padrauna), on the south by Gorakhpur district, on the south-west by Basti, on the west by Siddharth Nagar, on the North-west by Bhairahvan district of Nepal and on the North by Nawal parasi district of Nepal. Total area of the district is 2,952 sq. km.

Physiography :

Some years ago the present district Mahrajganj was a part of Gorakhpur district. So the features of this district alike Gorakhpur. But as for as natural features are concerned, it is certainly different from those found in Western districts of Uttar Pradesh. This difference is only found on account of vicinity of the Himalayas. It was split up from Gorakhpur on October 1989, since then it has a separate entity as a district. This district is devised by alluvium brought down by the Rohin, Rapti, little Gandak and great Gandak rivers of middle Ganga plains. Due to the situation of the district in the northern part of the

middle Ganga's plains, the thickness of the alluvium is 8.000 metres. The alluvium deposit is the most important feature of this district. In some areas of the district sand and Kankar is found. The whole district is almost a part of plains. The average height of it is 20 metres and general slope is towards north-west to south-east. The average height of northern and southern part is 95.5 metres and 85 metres respectively. The Thuthibari, situated on the north west bounds of the district is 101.8 metres above from the level of Sea and Sinduriya near by to Mahrajganj 97 metres above the Sea level. The height of the district from the Sea level is between 107 metres in north-west to 97 metres in south-east. In consequence to the changes in course of Rapti and its tributaries created many oxbow,lakes, Ponds and small under ground Pools.. This district can be devided into four physical divisions (I)Northern low land (Tarai) (II) Intermediate upland (III) South-western quarries region (IV) South eastern Khadar.

In the foothill there is a tract which is without moisture. The magnitude of moistness which is contributed by the rain and small hill streams is swallowed by the soil to appear again by symphonic influence in the moist and unhealthy tract known as Tarai. The subsequent area contains a girdle of ten miles in breadth running in company with the northern borders of the Mahrajganj and Pharenda tahsils. South of Tarai in the same tahsils, a dispersion of forest land starts for the most part. Government reserve forest and other forest is enlarged south-wards.. As a result of its presence, rain falls here in plenty quantity. The combination of the numerous rivers and extra –ordinary high water level keeps the soil cold and climate slightly wet. The exuberant vegetable growth and the general greenness of the landscape fascinates the attention of the people.

Drainage :

In this district the drift of surface is according to slope from north-west to south and rivers and channels flows in the direction of south-east The great Gandak is the biggest river of the district but its drift area is only 15 km. on north-eastern edge of the district and this river influences nearly 10 per cent area of the district. Flowing from the north-eastern edge of the Mahrajganj tahsil it enters in the Deoria district. The little Gandak is an ancient current of the great Gandak. This river rising from snowy hills of Badhavan locality of Nepal, enters in the district passing through Shitalapur village and flowing nearly 1.5 km. towards the south where it is divided into two branches. This river deciding the boundary of Mahrajganj district and Hata tahsil of Kushinagar (Padrauna) district, flowing towards the south of the Deoria district falls in Ghaghra river. Rohin is an ancillary river of the Rapti which rises in the Nepal and enters in the Vinayakpur village of Pharenda tahsil of the district and passing through Pargana Haveli of Mahrajganj tahsil. It decides the western bounds of Mahrajganj tahsil and eastern bounds of Pharenda tahsil. River Ghonghi determines the western boundary of the Maharajgnj district.. It is tributory of Rapti river. It frequently changes its course and in the year of heavy rainfall south western part of the district is submerged.

Soil

On the basis of soil particles, structure, its, mutual abrasion and acquired chemical elements, the soil of this district can be classified into three parts: (I) Tarai Soil (New alluvium Soil) (II) lime mixed soil (III) lime and alkaline less soil. The soil of this district is new alluvium which is formed by erosion, abrasion and deposition of sedimentary rocks. The average quantity of clayey shingles is 22.9 per cent. But in northern, in the middle of south eastern and South-western part of the district , the quantity of clayey soil is more than 30 per cent. In the middle and in the western part of the district, the quantity of clayey is 20 per cent and in the remaining part of the district is in the range of 20 per cent to 30 per cent. This soil is the fit for the production of Paddy and Sugarcane. The average quantity of silt particles is 19.6 per cent. In the northern part, south-eastern and sourth-western part, the quantity of silt is less than 18 percent. In the remaining part of the district the quantity of the silt is found in the range of 18 per cent to 22 per cent. The average quantity of sand particles is 58.2 percent. Highest quantity of the sand particles (more than 65 per cent) is found in the right side of the chhoti Gandak, and both side of Rohin of the district. In the northern and the middle part, the quantity of sand particles is between 55 per cent to 65 per cent and in remaining part of the district is less than 55 per cent. In the soil of the Mahrajganj district the average quantum of carbon is found 0.361 per cent, Potassium 205.16 kilogram/Hectare and phosphorus 24.33 Kilogram /Hectare.

Climate :

The district Mahrajganj is situated in sub-tropical zone yet due to its proximity to the Himalayas, the effect on climate of Himalayas is more than of its latitudinal situation. In this district, the westerly winds blow from November to May. On account of blowing from the western land these breezes become dry. The south-western winds are blowing from June to October in this district. Because of blowing from sea side, these are full of vapour and causes rainfalls just after summer season. These are also called by the name of summer season monsoon. The climate of this district is sub-tropical. In this district the average temperature of May and June is 30.4C and 29.6C. respectively. The highest temperature of May month remains 40.3 c. Th highest temperature of January month remains 21.8 c. and 13.8 c. respectively. Sometimes because of Western disturbance in the month of March and April, disparity is found in temperature. The air pressure is controlled by temperature. After the study and analysis of various elements of climate, the year is devided into three seasons (I) the rainy season (II) winter season (III) Summer Season. Almost 90 per cent rain falls in four months (June, July, August and September) of the year. The average number of rainfall days is 85 of which 70 per cent rain falls only in the month of June, July and August. The average rainfall is 1318 millimetres. In the Thoothibari, located on the north-western boundary,rain fall about 1800 millimeters. The district has rain-gauge station at tahsil Pharenda and meteorological observatory at tahsil Nautanwa. In winter season some rainfall occur due to western cyclones. In summer season it rains in small quantity.

Natural and Economic Resources

Forestry :

The forests are generally found in northern part of the district. The forests in this district are of great economic value even if they are far less comprehensive than before. These are situated in Mahrajganj, and Pharenda tahsils. It is obvious from the map of 1,835 that up to the boundary of Nepal, not only the northern districts of Uttar Pradesh were bounded by unbreakable chain of trees but also north western part of the Gorakhpur, on either side of Rapti and Rohin were spread to a great distance. In previous time this forest was under the control of District Magistrate in general administration, but in 1830 these forests were distributed amongst farmers by Jungle Grant Committee. After some times this, rule was overruled and forest tract was handed over forever on lease. As a result of this the most part of the forests were cut off on a large scale and in later, remaining part of the forests were declared "Reserve forest" by the Government. The total area of the forest covered by timber, other trees and shrubs is 47,983 square hectare. Among the trees found in the forest are timber trees like Shisham, Sagaun, Sal, Panan, Khair, Haldu, Neem, Asna, Bahera, Phaldu, Asidh, Tendu, Domsel, Bhakmal, Semal, Tun, and Amaltash. Besides these other fruit bearing giver trees are Mango, Mahua, Jack fruit ,Guava, Jamun, Aonla Lemon and Tamarind. In the dense forests of the district the variety of wild animals are visible.

Minerals and Mining :

The district is not rich in economically viable mineral deposits. However building materials like sand and gravel, brickearth and reh are very common. There are about 120 brick klin in the district.

Soil :

While the greater part of the district falls in the eastern section of Indo Gangetic Plain which have two types of alluvial sector older alluvium (bangar) and new alluvium (Khadar) The Tarai belt runs parallel to the bhabhar along the foothills of the Himalayas. The rain fed areas have clay soil varying from loam to sandy loam, dislinguished by their lime content. They are generally mildly alkaline to slightly acidic in reaction. A third type of soil is called 'dhuh' which occurs near river banks which are liable to inundation.

Land and Land use Pattern :

The district has an area of 291,787 hectare of land, out of this 47,983 hectare was under forest, 1,768 hectares cultivable barren land, current follow is 3,400 hectares, other follow 2,978 hectares, usar and unfit land for agriculture 1,975 hectare, land put to other use 27,924 hectare, pasture 140 hectares, orchards and bushes 1,192 hectares net area sown 204,427 hectares, area sown more than once 153,918 hectares, and gross areas sown was 358,345 hectares as per 1998-99 district statistics bulletin.

Agriculture and Crop Patterns :

There are the usual Kharif and Rabi harvests in the district, the Zaid being very insignificant. The Kharif or rainfed crops are sown in June and July and harvested in September – October, while Rabi or irrigation crops sown in October, November and harvested in February – March. There are numerous small rivers and Nalas in this part As a result this part is usually most affected by floods and water logging in any season which causes heavy loss of crops.

During the year 1998-99 out the total area of 358,345 hectare as much as 165,985 hectare were under Rabi crops and 186,169 hectares.under kharif. The principle kharif crops are rice, maize, arhar, jowar, urad and maize.Main Rabi crops are wheat, barley, gram, peas, masoor and oilseeds. Among commercial crops tobacco and sugarcane are produced. The area under different crops was 164,010 hectares under rice, 135,996 hectares under wheat. 213 hectares under barley, 115 hectares under bajra, 378 hectares under maize, 152 hectares under urad, 191 hectares under moong, 17,087 hectares under masoor, 363 hectares under gram, 1,710 hectares under peas, 1,611 hectares under arhar, 7,152 hectares under oil seeds, 1,806 hectares under sugarcane and 2,968 hectares under potato. The traditional method in agriculture are being replaced by yielding variety of seed and chemical and fertilizer for increasing fertility.

Irrigation :

There are extensive irrigation facilities in the district. Little irrigation is needed in the Kachhar in abnormal seasons. Natural moisture soil is ordinarily sufficient for the need of Rabi crops. District has great rice tract of the north, where irrigation is not needed except for the late paddy crop, which is watered by means of channels from the Tarai streams. 51,416 hectares area or 32.9 per cent was irrigated by canals containing 40,998 hectares area of tahsil Mahrajganj, 7,360 hectares area of tahsil Nichlaul and 3,058 hectares area of tahsil Nautanwa. Tahsil Pharenda was not irrigated by canal. 97,623 hectares on 61.8 per cent of tahsil area was irrigated by govt. tubewells and pump sets. In Pharenda tahsil, 31,450 hectares and 29,127 hectares area irrigated by govt tube wells and pump sets respectively. 5.7 per cent area of the district was irrigated by other sources like wells, ponds and other means of irrigation.

Animal Husbandry :

In the five year plans, development of animal husbandry was given due place. The animal husbandry department which looks after development of animal husbandry is divided into two sections viz. Veterinary section and Animal husbandry section. The veterinary section deals with treatment of sick animals and control of cattle diseases. The animal husbandry section is concerned with the development of cattle, Poultry breeding, sheep breeding and allied schemes. According to the live stock census of the district, there were 295,000 animal of which 103,000 were cows, 53,000 buffaloes, 97,000 goats, 24,000 pigs, 18,000 other animals. There were 33 veterinary centers, 1,185 animal development centres, 106 poultry unit and 8 artificial insemination centres in the district.

Fishery :

The district has a number of tanks and lakes suitable for pisciculture. There are many departmental ponds. About 23 quintals of fish were produced in departmental ponds which have an area of 60 hectares. 14,322 thousand fingerlings were supplied to the farmers during 1997-98. For development of fisheries in the district Fishery Department is providing training, renovating ponds and arranging for loans from commercial banks.

Industry :

The district lies in the bottom side of the state in the field of industry. There were 2599 units of small scale industry, in which 7,786 workers were engaged in production during the year 1990-91 according to Sankhikya Patrika. In small scale industry sector oils, wheat flour, dal, rice, biscuit, tobacco, engineering goods, chemicals, furniture, soap, bricks, bidis, tanned leather, metalware, sports goods etc are produced. Among agro based industries oil mill and dal mills are operating. There are 38 units which are located at Pharenda, Nautanwa and Mahrajganj, The units are either operated by electricity or diesel oil.

Trade and commerce :

The district is connected by state highways other important road and railways. Trade and commerce in the district is comprised of imports and exports. The main commodity of exports are food grains, sugarcane, timber, rice, oil seeds, fish etc. Apart from this, bones and skins are exported to Kanpur. Oil seeds are exported to Varanasi and nearby districts. The district is also an important routing centre for exports and import of goods from Nepal. The goods that are generally routed consists of new cloths, general merchandise , salt, oil ,diesel, petrol, medicines, coal. The main markets of the district are located at Nautanwa, Mahrajganj, Pharenda and Nichlaul. These are regular markets of the district.

Transport :

Railways, buses jeep/car, cycle, rickshaw, bullock cart are the principal means of land transport in the district. There are 15 railway stations and length of railway line are 45 km. There are 59 bus stop / bus station in the district. 912 km. pucca roads are in the district,. in which 894 km. roads are managed by Public Work Department and 48 km. road are managed by local bodies.

Electricity and Power:

Electricity is an essential infrastructure for the development of the district. Electricity is required for railways, agriculture, industry, irrigation, supply of drinking water etc. The district has made considerable progress in electrification in last few decades. The following statement gives the consumption pattern of electricity in the district in 1999-2000.

Category	**No. of units consumed (thousand Kwh.)**
Domestic	6,293
Commercial Lighting	5,293
Industry	9,874
Public Lighting	144
Agriculture	62,668
Water Supply	175
Total	**8,4447**

965 villages of the district were electrified ,260 public tube wells and pump sets were also electrified in the district.

Gram Panchayat, its composition, jurisdiction and role in villages development –

A Gram Panchayat acts as the executive of the Gram Sabha. Gram Pradhan is elected from almost all villages for a period of five years.

Composition : The members of the Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 512 gram sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villages.

Terms : The new Panchayat Raj Act of 1993 has fixed a uniform five year term for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

Qualifications : In order to be elected to a village panchayat, a candidate should posses the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions : A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area from the upliftment of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine upto Rs. 100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is

shared by more than one household, has not been counted for any of them. If two houscholds have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different Person. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different Person own the flats. In case of such multi-storeyed structures, having a number of flats owned by different Person, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different Person then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different Person. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 Person per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of Person who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Person in a household may be related or unrelated or a mix of both. However, if a group of unrelated Person live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated Person who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated Person live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1. Agariya
2. Badhik
3. Badi
4. Baheliya
5. Baiga
6. Baiswar
7. Bajaniya
8. Bajgi
9. Balahar
10. Balai
11. Balmiki
12. Bangali
13. Banmanus
14. Bansphor
15. Barwar
16. Basor
17. Bawariya
18. Beldar
19. Beriya
20. Bhantu
21. Bhuiya
22. Bhuyiar
23. Boria
24. Chamar, Dhusia, Jhusia, Jatawa
25. Chero
26. Dabgar
27. Dhangar
28. Dhanuk
29. Dharkar
30. Dhobi
31. Dom
32. Domar
33. Dusadh
34. Gharami
35. Ghasiya
36. Gond
37. Gual
38. Habura
39. Hari
40. Hela
41. Kalabaz
42. Kanjar
43. Kapariya
44. Karwal
45. Khairaha
46. Kharwar (excluding Banbasi)
47. Khatik
48. Khorot
49. Kol
50. Kori
51. Korwa
52. Lalbegi
53. Majhwar
54. Mazhabi
55. Musahar
56. Nat
57. Pankha
58. Parahiya
59. Pasi, Tarmali
60. Patari
61. Rawat
62. Saharya
63. Sanaurhiya
64. Sansiya
65. Shilpkar
66. Turaiha

Scheduled Tribes

1. Bhotia
2. Buksa
3. Jaunsari
4. Raji
5. Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All Person engaged in 'work' as defined above are workers. Person who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as '*Main worker*'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private Person or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or Person or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of

land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of Person inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{} \times 1000$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{} \times 1000$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 Person of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of Person in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such Person are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent pheno-menon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 2,173,878 in which 2,063,278.. live in rural and rest 110,600 in urban parts. There are four tahsils in district namely Nautanwa, Nichlaul, Pharenda,and Mahrajganj. The most populous tahsil is Mahrajganj followed by Nichlaul tahsil. The urban population in the district is 5.1 per cent. The urban population is maximum at 7.8 per cent in Nichlaul tahsil. There are 1203 inhabited and 55 un-inhabited villages. The total rural population of Mahrajganj district is spread over 13 CD blocks. The most populated CD Block is Nichlaul with a population of 206,266, and the maximum number of inhabited villages (162) are also in Nichlaul CD Block. The population density in the district is about 736.

Size-class and status of towns:

In the total urban population of 110,600 in the district, 29,302 live in Nautanwa NPP the next big town is Mahrajganj with a population of 26,348. The above two are class III towns having the civic status of Nagar Palika Parishad (NPP). Rest of 4..towns are Nagar Panchayat (N.P). These towns are class IV towns.Mahrajganj and Nichlaul tahsils contain 2 towns each , while Nautanwa and Pharenda tahsils have only one town each.

Population growth:

At the present territorial jurisdication the population of the district was 1,676,378 at 1991 Census and increased by 29.7 per cent during the decade 1991-2001. There were 2,173,878 person at 2001 Census. The decadal growth in the district has been observed higher than the state.

Population Density:

The district has an area of 2,952 square kilometre. The population density in the district is 736 where as in the rural areas the density is 712.

Sex-Ratio:

The sex-ratio in the district at 934. is way ahead to 898 at the state level. The sex-ratio at the district has all along been higher in the district as against to the state since 1901. As against to rural areas of the district the sex-ratio is lower in urban areas. Among tahsils, highest sex-ratio is in Mahrajganj and lowest in Nautanwa. Among CD Block the sex-ratio is highest in Ghughuli at 960 and lowest in Dhani as 908. Out of 1,203 inhabited villages in the district there are 8.3 per cent villages (with 3.3 percent of rural population) which are having a sex-ratio below 849. In the urban parts of the district the sex-ratio is 912 and highest of 954 in Ghughuli. and lowest of 872 in Nichlaul. The sex-ratio of population on the age-group 0-6 is 958 in the district. As against the sex-ratio of 959 in the age-group 0-6 of rural population of the district, it is lower as 935 in urban areas. It may be noted that out of 1,203 inhabited villages in the district in over23.7 per cent of villages with 25.4 per cent of rural population the sex-ratio in the age-group 0-6 is between 1000-1099. Among towns the sex-ratio is highest at 1,014 in Ghughuli. and lowest at 909 in Nichlaul.

Work Participation Rate:

In the total population of the district Mahrajganj 39.1 per cent population are workers and rest of 60.9 per cent are non-workers. Among workers 22.1 per cent are main workers and rest of 17.1 per cent are marginal workers. The extent of main workers is highest at 24.2 per cent in Nautanwa tahsil and lowest at 20.7 per cent in Mahrajganj tahsil. In case of marginal workers the proportion is highest in Nautanwa tahsil as 17.7 per cent in comparison 15.3 per cent in Nichlaul tahsil. The extent of workers in rural parts and non-workers in urban parts are higher. In the district among workers 40.4 per cent are cultivators and 12.9 per cent other workers. Over 33 per cent of female workers are engaged as cultivators.

Literacy:

In the district 46.6 per cent population is literate. The literacy is 71.6 per cent in urban areas and 45.2 per cent in rural areas. The male literacy is as high as 63.9 per cent as against 27.9 per cent female literacy, and, therefore, the gap in male/female literacy rate is 36.0 per cent. In rural areas among 13 CD Blocks, the highest literacy is 48.9 per cent in Pharenda . and lowest 39.2 per cent in Nichlaul. The literacy among males in rural areas is 62.8 percent in comparison to 26.2 per cent among females. The lowest female literacy of 21.5 per cent in Nautanwa and Nichlaul CD Blocks. The gap in male/female literacy rate is highest in Campierganj CD Block which is 40.2. per cent. In 39.5 per cent of villages covering also 45.4 per cent of rural population, the literacy range is 41 to 50. Among urban in the district, as much as 83.2 per cent males are literates as against 58.8 per cent females. The highest urban literacy is in Anandnagar (NP) with 83.2 per cent and lowest in Ghughuli NP as 64.3 per cent. The maximum male literacy is also found in Anandnagar NP at 90.2 per cent and lowest at 79.1 per cent in Ghughuli NP. However, the highest female literacy is in Anandnagar NP at 75.3. per cent and lowest at 48.7 per cent in Ghughuli NP. Still, the maximum gap in male-female literacy rate 30.4 per cent is found in Ghughuli NP. The literacy among scheduled castes in the countryside is 39.0 per cent and 48.2 per cent in towns. 60.4 per cent in rural areas and 72.6 per cent in urban areas among scheduled tribe population are found literate in the district.

(viii) Brief analysis of PCA data based on inset tables 1 to 36

The district throw up vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Nautanwa	N.A	N.A	N.A	397,201	367,899	29,302	N.A	N.A	N.A	N.A	7.4
2	Nichlaul	N.A	N.A	N.A	443,806	409,388	34,418	N.A	N.A	N.A	N.A	7.8
3	Pharenda	N A	N.A	N.A	395,159	384,945	10,214	N.A	N.A	N.A	N.A	2 6
4	Mahrajganj	N A	N.A	N.A	937,712	901,046	36,666	N.A	N.A	N.A	N.A	3.9
	District Total	***1,676,378***	***1,593,461***	***82,917***	***2,173,878***	***2,063,278***	***110,600***	***29.7***	***29.5***	***33.4***	***5.0***	***5.1***

The growth rate of the district for total, rural and urban areas and percentage of urban population to total population is given in the table. The decadal growth rate of the district is 29.7 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 29.5 and 33.4 per cent respectively. Out of the total population of the district 94.9 per cent lives in rural areas while 5.1 per cent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 5.0 per cent in 1991 to 5.1 percent in 2001 in the district.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Person	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Nautanwa	122	192,264	100,003	92,261	1 (0.8)	4	1
2	Lakshmipur	135	172,618	90,009	82,609	7 (5.2)	274	254

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1203 inhabited villages, 57 (4.7 per cent) are small size villages with population below 200 Person. In the size of 200 to 499 Person there are 106 villages having 8.8 per cent villages of the district while the size class of 500-999 population claims 232 villages with 19.3 per cent of the total villages in the district. 437 villages (36.3 per cent) are in the size class of 1,000-1,999 and 334 villages (27.8. per cent) are in the size class of 2,000-4,999. Thirty five villages in the district fall in the ranges of 5,000-9999 population. Only 2 villages (0.2 per cent) are in the population size of 10,000 and above.

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWN IN 2001 CENSUS

Name of town
1

(a) New

(i) Statutory town

NIL

(ii) Census town

Nil

(b) Denotified

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL

(iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified

Tajpur C.T.

(d) Wholly merged with other town(s)

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

During the decade 1991-2001, no new town has been added or declassified or merged. with other town in the district.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	246	20.4	431,461	20.9
11-20	4	0.3	1,515	0.1
21-50	2	0.2	28	0.0

District Total	**1,203**	**100.0**	**2,063,278**	**100.0**

This table shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 782 accounting for 65.0 per cent of the total inhabited villages of the district fall in the very high density range of 500+ Person having 72.7 per cent population. The lowest ranges of 0-10 and 11-20 person per sq. km. together cover 250 villages (20.7 per cent). Corresponding proportion in the range of 201 to 500 is 11.0 per cent of the total inhabited villages having 5.7 per cent population of the district. In the medium density ranges of 21 to 50 and 51-100 Person account for 0.2 and 0.7 per cent of inhabited villages respectively. Both these ranges negligible percentage of rural population (939 person).

TABLE 5 : SEXRATIO OF STATE AND DISTRICT1901-2001

	UTTAR PRADESH			MAHRAJGANJ

2001	898	904	876	934	935	912
NOTE-1-Sex -Ratio has been defined here as the numberof females per 1000 males						
2-Urban Population were nil during 1961 and 1971 Census.						

As per 2001 Census sex-ratio of 934 females per 1,000 males has been recorded in the district against the state average of 898 The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 2001 and remained above the state average figures during this period. The lowest sex ratio of 909 females per 1000 males was recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and state.

TABLE 6: SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Nautanwa	920	920	922
2	Nichlaul	929	931	904
3	Pharenda	921	922	898
4	Mahrajganj	947	948	917
District Total		**934**	**935**	**912**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 Census. There are 934 females for every thousand males in Mahrajganj district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas. The sex-ratio among rural and urban population is 935 and 912 females respectively. The rural sex-ratio in the tahsils varies between 920 in Nautanwa tahsil and 948 in Mahrajgang tahsil. The sex-ratio in Mahrajgang tahsil is higher than district rural average (935). In urban areas the highest sex-ratio is recorded in Nautanwa (922) and the lowest is in Pharenda (898).

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

13	Partawal	955
14	Forest Villages	895
District (Rural) Total		**935**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 935 females per 1,000 males. Among the C.D. blocks the highest sex-ratio of 960 females is found in Ghughuli C.D. block and is followed by Partawal (955) while the lowest of 908 is recorded in Dhani C.D. block. The sex-ratio of Mithaura, Siswa, Mahrajganj, Ghughuli and Partawal C.D. blocks are higher than the district rural average of 935 females and in remaining blocks, this value is lower than the district average.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population

950-999	297	24.7	567,979	27.5
1000-1099	146	12.1	201,094	9.7
1100+	16	1.3	8,226	0.4
District Total	**1,203**	**100.0**	**2,063,278**	**100.0**
Sex ratio (Rural) for District:		**935**		

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 418 accounting for 34.7 per cent of the total villages having largest population of 41.4 per cent in the district fall in the sex-ratio range of 900-949 females per 1,000 males. It is followed by the sex-ratio range of 950-999 which claims 297 villages (24.7 per cent) and 27.5 per cent population. The highest range of 1,100 and above claims 16 villages (1.3 per cent). This range shares 0.4 per cent rural population of the district while in the sex-ratio range of 1000-1099, there are 146 villages (12.1 per cent). In remaining sex-ratio ranges of 850-899,800-849, 750-799, 700-749 and less than 700, the number of villages are 226 (18.8 per cent), 61 (5.1 per cent), 19 (1.6 per cent), 4 (0.3 per cent) and 16 (1.3 per cent) respectively. In these ranges, the percentage of population is comparatively low except the range of 850-899. The maximum number of villages i.e 715 having maximum population (59.4 per cent) fall in the sex-ratio ranges of 900-999.

TABLE 9: SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Anandnagar	NP	898

	District Total:	**Total**	**457,699**	**233,787**	**223,912**	**958**
		Rural	**438,177**	**223,697**	**214,480**	**959**
		Urban	**19,522**	**10,090**	**9,432**	**935**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 457,699 Person comprising 233,787 males and 223,912 females. The total sex-ratio in this age-group works out to 958 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 959 and 935 females respectively. The rural sex-ratio in tahsil varies between 946 in Pharenda tahsil and 963 in Nautanwa tahsil. The sex-ratio of Nautanwa, Nichlaul and Mahrajganj are higher than district rural average (959) Pharenda tahsil has lowest sex-ratio of 947 among the total population. In urban areas, the highest sex-ratio is recorded in Pharenda tahsil (976) and the lowest is found in Nichlaul tahsil (915).

TABLE 11: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Person	Males	Females	
1	2	3	4	5	6

	District (Rural) Total	**438,177**	**223,697**	**214,480**	**959**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 959 for the district (rural). The sex-ratio of C.D. blocks varies between 927 to 972. It is highest in Mahrajganj C.D. block i.e. 972 followed by 966 in Nichlaul C.D. block and lowest 927 is found in Campiergang C.D. block. The sex-ratio of five C.D. blocks are higher than the district rural (959) and Siswa equals to the district average while in remaining blocks, it is below than the average of the district.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	37	3.1	2,894	0.7
700-749	30	2.5	4,566	1.0
750-799	55	4.6	12,006	2.7

850-899	157	13.1	64,365	14.7
900-949	176	14.6	73,222	16.7
950-999	206	17.1	104,195	23.8
1000-1099	285	23.7	111,500	25.4
1100+	163	13.5	36,585	8.3
District (Rural) Total	**1,203**	**100.0**	**438,177**	**100.0**
Sex ratio (Rural) for District:		**959**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 285 (23.7 per cent) having largest population (25.4 per cent) in the district (rural) fall in the sex-ratio range of 1000 to 1099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 950 to 999, which claims 206 villages (17.1 per cent) and 23.8 per cent population. Next to it, 176 villages (14.6 per cent) are in the range of 900-949 with 16.7

per cent population. 157 villages (13.1 per cent) having 14.7 per cent population fall in sex-ratio range of 850-899. In remaining sex-ratio ranges of 700-749, 750-799, 800-849, 1000 and above and less than 700 claim less number of villages and these are distributed as 30 (2.5 per cent), 55 (4.6 per cent), 94 (7.8 per cent), 163 (13.5 per cent and 37 (3.1 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty percent of villages i.e. 830 having 74.2 per cent population fall in the higher sex-ratio ranges of 900 and above.

TABLE 13: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

District(Urban) Total			**19,522**	**10,090**	**9,432**	-

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns 2001. In urban area of the district total population in age group of 0-6 is 19,522 in whlich 10,090 are males and 9,432 females and sex ratio of the urban areas of the district is 935. Among six towns, sex ratio in age group 0-6 varies from 909 in Nichlaul (N.P.) town to 1014 in Ghughuli (N.P.). In Anandnagar N.P. and Ghughauli towns sex ratio is more than the district average. Among 6 towns Nautanwa town has highest population(in age 0-6)

TABLE 14: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level for rural and urban areas of the district. Of the

2,173,878 total population of the district, 19.5 per cent of the total population belong to the Scheduled Castes and 0.1 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 19.8 per cent in rural population and 14.1 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Mahrajganj tahsil (20.6) while the lowest is found in Nautanwa tahsil (17.5). The proportion of Scheduled Tribes population is 0.1 per cent. Among them 0.1 per cent is in both the rural and urban areas. Scheduled Tribes population in the district is mainly concentrated in tahsil Nautanwa (0.6 per cent). Other tahsils have negligible population.

TABLE 15: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

	District (Rural) Total:	**2,063,278**	**408,584**	**2,461**	**19.8**	**0.1**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 19.8 per cent of rural population of the district belongs to Scheduled Castes and 0.1 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 14.0 per cent in Dhani and 23.2 per cent in Pharenda C.D. block.. The other C.D. block containing the high percentage of Scheduled Castes are Mahrajganj (22.5), Paniara (22.1) and Mithaura (21.7). The highest proportion of 1.1 per cent Scheduled Tribes population is counted in Nautanwa C.D. block and is followed by Lakshmanpur and Nichlaul each (0.17) C.D. blocks. The Scheduled Tribes population in the district is mainly concentrated in Nautanwa C.D. block (1.1 per cent).

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	45	3.7	0	0.0

31-40	140	11.6	74,165	18.2
41-50	48	4.0	23,828	5.8
51-75	31	2.6	16,021	3.9
76 and above	4	0.3	1,170	0.3
District Total	**1,203**	**100.0**	**408,584**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. Fourty five villages accounting for 3.7 per cent of total 1203 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5 per cent in 66 villages (5.5 per cent). In 169 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 441 villages constituting 36.7 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 259 and 140 villages respectively. Both these ranges together account for 33.1 per cent villages of the district. 83 villages fall in the range of 41 and above percent. Four villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 0.3 per cent Scheduled Castes population of the district. The maximum of the 36.8 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE 17: PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. 0.1 per cent of rural population of the district belong to Scheduled Tribes population. There are 1159 (96.3 per cent) villages where none of Scheduled Tribes have been recorded in the district. Fourty four (3.6 per cent) villages have proportion of Scheduled Tribes population up to 20.0 per cent. In 34 villages the proportion of Scheduled Tribes population range is less than 5 per cent accounting for 50.8 per cent of the total population of the district.

TABLE 18: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded during 2001 Census in district Mahrajganj. The table depicts that highest scheduled castes population in Mahrajganj(NPP) was 20.4 per cent and lowest (6.1 per cent) in the Anandnagar town. Scheduled tribe population is negligible in the urban areas of the district. There are no scheduled tribes population in Siswa Bazar, Anandnagar and Ghughuli towns. Highest population (92) of scheduled tribe was recorded in Nautanswa (NPP).

TABLE 19: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Nautanwa	931	925
2	Lakshmipur	938	825
3	Nichlaul	932	855

12	Paniara	941	167
13	Partawal	953	0
14	Forest Villages	900	0
	District (Rural) Total	**948**	**909**

Table 19 indicates sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 948 for district (rural). Among the C.D.blocks, the highest sex ratio of 975 females is found in Ghughuli C.D. block and lowest of 901 females is recorded in Dhani C.D. block. This table also shows sex ratio of ST population in rural areas of the district which is 909. It is highest in Nautanwa C.D. block and lowest in Painiara C.D. block (167).The Scheduled Castes sex ratio is higher in Mithaura, Pharenda, Campierganj, Mahrajganj and Ghughuli C.D. blocks than the district ratio of 948. Similarly the scheduled tribes sex ratio is higher in only Nautanwa C.D. block than the sex ratio observed at district level.

TABLE 20: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Anandnagar (NP)	956	0
2	Ghughuli (NP)	975	0
3	Mahrajganj (NPP)	918	1,333
4	Nautanwa (NPP)	907	917
5	Nichlaul (NP)	899	1,000
6	Siswa Bazar (NP)	930	0
Sex ratio (Urban) for the district:		**923**	**943**

Table 20 shows sex ratio among scheduled castes and scheduled tribes in urban agglomerations/towns 2001. Among six towns sex ratio of scheduled castes is highest in Ghughuli town and it is lowest in Nichlaul town Siswa Bazar, Anandnagar and Ghughuli towns have zero sex ratio among Scheduled Ttribes population. It means ST females poulation is zero. In urban area of the district sex ratio of SC and ST are 923 and 943 respectively.

TABLE 21: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 46.6 per cent in the district. This proportion in rural area is 45.2 per cent against 71.6 per cent in urban areas. In the district the literacy rates of males (63.9 per cent) is much higher than that of females (27.9 per cent). Among the tahsils, Mahrajganj tahsil tops with 48.2 per cent literates followed by Pharenda tahsil (47.7 per cent). Nichlaul tahsil with 43.5 per cent literates stands at the bottam in the district. Out of 4 tahsils, the literacy rates of Mahrajganj and Pharenda tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 36.0 per cent in the district, as a whole. The situatation at tahsil level is not much different . However, this gap in urban literacy is low which comes to 24.4 points against the rural areas, where the gap between male and female literacy is 36.6 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

14	Forest Villages	2,289	2,000	289	13,636	6,403	7,233	18.3	29.9	4.9	25
District (Rural) Total		**734,704**	**529,525**	**205,179**	**1,328,574**	**536,932**	**791,642**	**45.2**	**62.8**	**26.2**	**36.6**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 45.2 per cent of the total rural population excluding the age-group of 0-6 years were literates in the district. The corresponding proportion of male and female literates comes to 62.8 and 26.2 per cent respectively which shows very wide gap of 36.6 per cent in male and female literacy. At C.D. block level, Pharenda C.D. block has the highest rural literacy rate of 48.9 per cent while 67.7 per cent males and 28.5 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Nichlaul C.D. block (39.2 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 40.2 points is found in Campierganj C.D. block.

TABLE 23: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	4	0.3	63	0.0
1-10	6	0.5	2,661	0.1
11-20	36	3.0	24,339	1.2
21-30	89	7.4	108,586	5.3
31-40	257	21.4	418,255	20.3
41-50	475	39.5	937,410	45 4
51-60	283	23.5	506,606	24.6
61-70	43	3.6	59,251	2.9
71-80	5	0.4	4,840	0.2
81-90	2	0.2	1,254	0.1
91-99	0	0.0	0	0.0
100	3	0.2	13	0.0
District Total:	**1,203**	**100.0**	**2,063,278**	**100.0**
Literacy rate for District:		**46.6**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 4 villages (0.3 per cent) of the district and population of these villages is only 63 person. Three villages (0.2 per cent) have all the literate population. 283 villages accounting for 23.5 per cent of the total villages are in the literacy range of 51-60 per cent and 43 villages (3.6 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 863 villages (71.8 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 10 villages (0.8 per cent). The combined ranges of 31-60 have the maximum number of 1015 villages forming 84.4 per cent of the total inhabited villages.

TABLE 24: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban Status of UA^/Town +*	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District(Urban) Total		**65,186**	**39,718**	**25,468**	**45,414**	**18,115**	**27,299**	**71.6**	**83.2**	**58.8**	**24.4**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding high percentage of literates, Anand naagar (N.P.) is way ahead of other towns. The table reveals that literacy rate is high in the urban areas of the district (71.6 per cent). The literacy rate is quite high (above 85.0 percent) in Nautanwa (NPP), Siswa Bazar (N.P.) and Anandnagar (N.P.) among males. Female literacy rate is not far behind in Anandnagar (above 75.0 percent). However, literacy rate among females is very low (48.7 percent) in Ghughuli (N.P.), The gap in male female literacy rate is high (24.4)in urban areas of the district.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

District (Rural) Total:		**124,358**	**91792**	**32,566**	**284,226**	**117,966**	**166,260**	**39.0**	**55.9**	**21.0**	**34.9**

Table 25 shows number and percentage of scheduled castes literates and illiterates by sex in CD blocks during 2001. In rural areas of the district, proportion of literates is 39.0 per cent in which 55.9 per cent Males and 21.0 per cent Females. Thus, the gap in male and female literacy rates is 34.9. Among 13 CD blocks, Campierganj CD block has the highest literacy rate and Nichlaul CD block has the lowest literacy rates. The gap in male/female literacy rate in Campierganj CD block is highest and this gap is lowest in Nichlaul CD block.

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

District Total	**1,158**	**100.0**	**408,584**	**100.0**
Literacy rate for District (Rural):		**39.0**		

The table 26 presents the distribution of villages by literacy rate range for scheduled castes population at the 2001 Census. In majority of inhabited villages, which form 71.8 per cent of total rural scheduled castes population,cover in literacy range 31-50 percentages. In the district there are 1,158 inhabited villages with scheduled castes population with about 39.0 percent of literacy rate.

TABLE 27: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status Of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female Literacy rate

The table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is more than literates in the district (urban). The percentage of literates is least in Ghughuli (N.P.) among six towns. Gap in male/female literate rate is also highest in Ghughuli (N.P.) town. The males in all the six. town enjoy higher literacy rate than females. The gap in male/female literacy rate is least in Nichlaul (N.P.).

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

100	2	4.5	6	0.2
District Total:	**44**	**100.0**	**2,461**	**100.0**
Literacy rate for District (Rural):		**60.4**		

The table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 Census. In the district the scheduled tribes population is found in 44 villages out of which in 2 villages the literacy range is 100 per cent. However, the maximum (31.0 per cent) of the scheduled tribes population is found in only 6 villages with literacy range from 61 to 70 percentages. In 2 villages (1.2 percent) scheduled tribes population literacy rate is zero percent.

TABLE 30: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban Status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female Literacy rate
		Number of literates			Number of illiterates						
		Person	Males	Females	Person	Males	Females	Person	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Mahrajganj (NPP)	6	3	3	1	0	1	85.7	100	75.0	25.0
2	Nautanwa (NPP)	60	40	20	32	8	24	71.4	90.9	50.0	40.9
3	Nichlaul (NP)	3	2	1	1	0	1	75.0	100	50.0	50.0
	Mahrajganj (Urban)	**69**	**45**	**24**	**34**	**8**	**26**	**72.6**	**91.8**	**52.2**	**39.6**

The table 30 gives number and percentage of scheduled tribes literates and illiterates by sex in urban agglomerations/town population at the 2001 census. Scheduled tribes population is negligible in the towns of the district. In 3 towns there is no scheduled tribe population. Out of the total scheduled tribe population is negligible in the district the percentage of literates is 72.6 (91.8 per cent of males and 52.2 per cent of female).Nautanwa Nagar Palika Parishad enjoys maximum number of literates (32) among the towns. The gap in male/female literacy is 39.6 per cent point.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out to 39.1 per cent of the total population in the district. The total workers are comprised of 22.1 per cent of main workers and 17.1 per cent of marginal workers and the remaining 60.9 per cent are non-workers.

Among the main workers, male participation rate in the district is 34.4 per cent and 8.9 per cent of females. Male and female marginal workers account for 13.4 and 21.1 per cent respectively. The percentage of female marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 38.0 per cent in Nichlaul tahsil to 41.9 per cent in Nautanwa tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district.Of the 2,063,278 total rural population of the district, 22.0 per cent has been categorised as main workers and the marginal workers constitute 17.8 per cent and the remaining 60.2 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 34.1 per cent males and 9.1 per cent females are in the category of main workers. Male and female marginal workers account for 13.8 and 22.0 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 39.8 per cent. At the C.D. block level, Campierganj has highest proportion of total workers forming 46.6 per cent of the total population. It is closely followed by Lakshmipur (44.6 per cent), Paniara (41.5 per cent), Nautanwa (41.5 per cent), Brijmanganj (40.2 per cent) and Nichlaul (39.9 per cent). The lowest percentage of 35.5 per cent is recorded in Ghughuli C.D. block.

The table 33 indicates that as against 22.5 percent of main workers in the urban areas of the district, such workers are higher at 25.9 percent in Nautanwa town. Similarly the extent of marginal warkers is higher in Ghughuli town. (6.9 per cent). The percentage of non- workers is highest (76.8 per cent) in Anandnagar (NP).

				(29.9)	(33.2)	(60.2)	(2.1)	(4.6)

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34 that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 40.4 per cent of the total workers (main + marginal) and 43.9 per cent of total workers are engaged as agricultural labourers, Household industry workers (2.8 per cent) and other workers (12.9 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 34.6 per cent in Nichlaul tahsil and 44.9 per cent in Pharenda tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 33.2 per cent which is low as compared to 44.6 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The workers in other activities occupy the third position in the district as well as in each tahsil. The highest proportion of 14.4 per cent of other workers is recorded in Nichlaul tahsil while the lowest proportion of 11.8 per cent is found in Mahrajganj tahsil.

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) are 39.8 per cent of total population. Among these workers, cultivators constitute 41.5 per cent, 45.1 per cent agricultural labourers, 2.8 per cent household industry workers and 10.6 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.8 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of females (33.4 per cent) is lower than males (46.4 per cent) in the rural areas of the district. The male play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 32.7 per cent in Nichlaul C.D. block to 52.1 per cent in Dhani C.D. block. Similarly for other workers, the lowest proportion is 6.6 per cent in Campiergang C.D. block while 15.9 per cent is the

highest in Pharenda C.D. block. The percentage of household industry workers is quite low i.e. only 2.8 per cent in the district. The percentage of agricultural labourers is highest in Nichlaul (53.2) block and is followed by Siswa (50.4). Similarly, household industry workers varies in C.D. blocks between 1.9 per cent in Nautanwa and 3.3 per cent in Ghughuli.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (77.6), followed by agricultural labourers with 10.3 percent (7.5 percent male and 29.8 percent female). If we observe each town, the table reveals that highest percentage of cultivators (14.9) is recorded in Ghughuli (N.P.). The percentage of cultivators is very low (0.6 percent) in Anand Nagar (NP). The percentage of cultivators in urban areas is very low in the district (8.6 per cent). Household industry workers are also very low (3.4 percent at the district level). Among other workers, the percentage of male (81.8 per cent) is higher than female (48.6 per cent) Males play a major role in the urban economy of the district.

(ix) Brief analysis of the Village Directory and Town Directory data based on inseet tables 37 to 47

One of the major parts of the District Census Handbook is Village and Town Directory. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data inset tables 37 to 47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE 37: DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D block	Number of inhabited villages	Type of amenity available					Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1203 inhabited villages in the district 902 villages or 75.0 per cent have been provided with the education facilities of one type or the other. Similarly 312 villages in the district constituting 25.9 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1191 or 99.0 percent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 200 villages constituting 16.6 per cent of villages have been provided with post office facility within the village. 308 or 25.6 per cent villages have been provided with the telephone facility, 154 or 12.8 per cent with transport facility, 89 or 7.4 per cent villages with bank facility and 113 or 9.4 per cent with agricultural credit societies. Similarly there are 730 or 60.7 per cent villages which have been linked with the pucca road and 862 or 71.7 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Mahrajganj C.D. block has the highest 91.5 per cent villages where educational facility is available and lowest 58.6 per cent is found in Nichlaul. Medical facility is highest in Paniswara (43.3 per cent) and lowest (16.5 per cent) in Partawal C.D. block. Improved drinking water is available in most of the villages in all C.D. blocks, In fact availability of drinking water in the district is above 99.0 per cent. Telephone facility is highest in Partawal (35.2 per cent) while a single village of Campierganj C.D. block enjoy this facility. Transport and communications is less developed in Mithaura where only 4.9 per cent villages are covered by this facility Mahrajganj C.D. block has the highest 96.3 per cent villages where electricity facility is available and lowest (54.1 per cent) is found in Nautanwa C.D. block.

TABLE 38: NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 2,063,278 Person in the district, 1,796,312 or 87.1 per cent have educational facility of one or the other type. Similarly 747,404 or 36.2 per cent population has medical facilities while 2,058,066 or 99.7 per cent have got improved drinking water facility. Post office facilities are available to 619,039 or 30.0 per cent population. Telephone facility is available to 698,939 or 33.9 per cent. Transport communications facility is available to 379,577 or 18.4 per cent. Bank facility is available to 251959 or 12.2 per cent. 309,484 or 15.0 per cent have been provided with the facility of agricultural credit societies. 1,446,270 or 70.1 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,623,463 or 78.7 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block. However, in Paniara C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population .

TABLE 39: DISTRIBUTION OF VILLAGES NOT IIAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROMTHE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5

7. Agricultural Credit Societies	793	243	54	1,090

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 335 villages do not have primary school in their villages and out of these villages, children of 316 villages have to travel less than 5 kms.for schooling. Out of 1,203 inhabited villages as many as 1009 are deprived of middle school and 1,193 of degree college. Of these 561 avail the facility of middle school at a distance of less than 5 kms., 416 at a distance 5-10 kms. and the remaining 32 at a distance of 10+ kms. In respect of degree college, 159 avail this facility at a distance of less than 5 kms., 262 between 5 to 10 kms. and rest 772 villages at a distance of 10+ kms.

Similarly there are 1,171 villages in the district which have been devoid of Hospital facility and 1,178 villages which are deprived of PHC facilities. Of these 342 villages have the facility of Hospital available within 5 kms. While in respect of 368 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 461 villages have this facility at a distance of 10+ kms. As regards PHC 259 avail this facility at a distance of less than 5 kms., 641 at a distance of 5-10 kms. and the remaining 278 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1003 villages do not have this facility in the village itself. Of these majority i.e. 864 have this facility at a distance of less than 5 kms., another 113 villages avail it at a distance of 5-10 kms. In the remaining 26 villages inhabitants have to travel a distance of 10+ kms.

As regards Telephone, there are 895 villages in the district, which are without telephone facilitiy. Of these 625 avail this facility at a distance of less than 5 kms., 169 at a distance of 5-10 kms. and remaining 101 have to traverse a distance of 10+ kms.

For Bus service out of 1111 villages which do not have this facility, 450 villages avail this facility at a distance of less than 5 kms., 524 at a distance between 5-10 kms. and 137 at a distance of 10+ kms.

In the entire district 1125 villages are deprived of Commercial Bank and 1164 of Co-operative Bank. Of these 1125 villages which are deprived of Commercial Banks, 726 villages avail this facility at a distance of less than 5 kms., 280 between 5-10 kms. and the remaining 119 at a distance of 10+ kms. Regarding Co-operative Banks out of 1164 villages ,291 villages avail this facility at a distance of less than 5 kms., 624 at a distance of 5-10 kms. and remaining 249 at a distance of 10+ kms. 1090 villages do not have agricultural credit societies. This facility is available to 793 villages at a distance of less than 5 kms., 243 at a distance of 5-10 kms. and the remaining 54 at a distance of 10+ kms.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1203 inhabited villages in the district, there are 305 villages which have nearest town upto a distance of 5 kms. Of these 234 villages forming 76.7 per cent of total villages, are having the educational facilities of one type or the other and 71 villages constituting 23.3 per cent, have the medical facilities within the village, 42 villages forming 13.8 per cent have the facility of post office within the village and 76 or 24.9 per cent have the facility of telephone. 33 villages constituting 10.8 per cent have been linked by transport service. 16 villages comprising 5.2 per cent have been provided bank facilities, while 29 villages constituting only 9.5 per cent have been provided by agricultural credit societies. 213 villages comprising 69.8 per cent have been provided with pucca road.

There are 689 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 530 villages constituting 76.9 per cent have been provided with the educational facilities. 191 villages comprising 27.7 per cent have been provided with medical facilities. 119 villages constituting

17.3 per cent enjoy the post office facility. 182 villages comprising 26.4 per cent have been provided with the telephone facility. 94 villages constituting 13.6 per cent have been linked with transport and communications. 52 villages comprising 7.5 per cent have bank facility. 65 villages constituting 9.4 per cent are having agricultural credit societies, while 413 villages or 59.9 per cent are approachable by pucca road. 183 villages fall in the distance range of 16-50 kms. Of these, 64.5 per cent villages have educational facility, 21.3 per cent with medical, 18.0 per cent with post office, 23.5 per cent with telephone. Transport & communications are available to 10.4 per cent villages. Banks and agricultural credit societies facilities are available to 8.2 and 7.1 per cent of villages respectively.

There are 9 villages in the district which are situated beyond 50 kms.from the nearest town and out of these 8 or 88.9 per cent enjoy the education facility whereas 5 villages comprising 55.6 per cent have been provided with medical facility of one type or the other. one village comprising 11.1 per cent have the post office facility. one village comprising 11.1 per cent have been provided with telephone facility. 2 villages constituting 22.2 per cent have been linked by bus service. There is no village in this distance range which have bank and agricultural credit societies facility while 8 villages comprising 88.9 per cent have been linked by pucca roads. There are 17 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 70.6 or cent percent villages have the educational facility of one or other type. 6 villages constituting 35.6 per cent have the medical facility, 5 villages comprising 29.4 per cent have the post office facility, 35.3 percent with telephone and transport and communication. Bank and agricultural credit societies facilities are available to 35.3 percent villages,. 10 villages comprising 58.8 percent have been provided with pucca road.

Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Mahrajganj district out of a total of 1,203 inhabited villages,there are 163 villages with a population of less than 500 Person. Of these, 58 villages (35.6 per cent) have education facility, 13 (8.0 per cent) have medical facility, 154 (94.5 per cent) have improved drinking water facility. There is no village which has post office facility. 16 (9.8 per cent) have telephone facility,. 10 (6.1 per cent) have been linked by bus service,. 4 (2.5 per cent) have bank facility. 61 villages (37.4 per cent) have been linked with pucca road and 81 villages (49.7 per cent) have been provided with electricity.

Out of 232 villages, which fall in the population range of 500-999 Person, of these 136 villages (58.6 per cent) have been provided with the education facility, 39 (16.8 per cent) with medical facility, all the villages have improved drinking water facility. 11 villages (4.7 per cent) have been provided with post office facilities, 27 villages (11.6 per cent) with telephone facility, 19 villages (8.2 per cent) with transport facilities, 10 villages (4.3 per cent) with bank facility, 14 villages (6.0 per cent) with agricultural credit societies, 116 villages (50.0 per cent) have approach by pucca road and 146 villages (62.9 per cent) have facility of electricity.

437 villages fall in population range of 1,000-1,999 Person. 0f these 362 villages (82.8 percent) have education facility. Almost all the villages have improved drinking water facilities expect 3 villages. 115 villages (26.3 per cent) enjoy the medical facility, 434 villages (99.3 per cent) have improved drinking water facility, 58 villages (13.3 per cent) have post office facility, 113 villages (25.9 per cent) have telephone facility, 52 villages (11.9 per cent) have transport communications facilities, 31 villages. (7.1 per cent) have bank facilities, 43 villages (9.8 per cent) have agricultural credit societies 276 villages (63.2 per cent) have approach by pucca road and 328 villages (75.1 per cent) have electricity.

There are 334 villages in the district, which are covered under 2,000-4,999-population range. 119 villages (35.6 per cent) have medical facility. 102 villages (30.5 per cent) have post office facility, 33 villages (9.9 per cent) have bank facility, 40 village (12.0 per cent) is having agricultural credit societies. Large number of villages are having maximum facilities except bank, transport and agricultural credit societies. 309 Villages (92.5 percent) have been provided with the education facility. All villages have drinking water facility, 131 villages (39.2 percent) with telephone facility,. 60 villages (18.0 percent) with transport facility. 244 villages (73.1 percent) have approach by pucca road and 276 villages (82.6 percent) have been provided with electricity. There are 37 villages in the district having a population of 5,000 Person or above all of these villages have educational and drinking water facility . Proportion of amenities are higher in the larger villages.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Nautanwa	122	17,412.3	N.A.	67.0
2	Lakshmipur	135	33,378.7	57.6	88.1
3	Nichlaul	162	27,630.0	72.6	63.1
4	Mithaura	102	22,320.6	81.4	77 8
5	Siswa	104	15,077.5	N.A.	80.1
6	Brijmanganj	92	13,352.9	N.A	83.0
7	Dhani	33	3,621.7	61.5	34.1
8	Pharenda	90	14,848.4	80.7	89.4
9	Campierganj	7	1,357 9	76.8	67.3
10	Mahrajganj	82	19,206.9	96.0	84 7
11	Ghughuli	83	13,994.4	93.7	87.0
12	Paniara	90	13,418.1	63.2	85.8
13	Partawal	91	8,174.5	85.2	83.8
14	Forest Villages	10	534.8	75.7	96.2
	District Total	**1,203**	**204,327.7**	**83.9**	**79.0**

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available in the inhabited villages of the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1203 inhabited villages in the district having a total area of 204,327.688 hectares. Of this, 83.9 per cent is cultivable and 79.0 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government. The land use pattern at CD block level shows that the percentage of cultivable area to total area is highest (96.0 per cent) in Mahrajganj C.D block and is lowest (57.6 per cent) in Lakshmi pur C.D. block. Similarly the percentage of irrigated area to total cultivable area is highest (89.4 percent) in Pheranda C.D. block and is lowest (34.1 percent) in Dhani C.D. block.

TABLE 43: PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name and urban status of the Town	Per capita receipt				Per capita expenditure				
		Total	Through taxes	From all other sources	Total	General Administ r-ation	Public health and convenie nces	Public works	Public institutio ns	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Anandnagar (NP)	346	0	346	239	136	0	31	0	72
2	IV Ghughuli(NP)	199	50	149	149	104	0	27	0	18
3	III Mahrajganj (NPP)	255	45	210	176	0	45	51	0	80
4	III Nautanwa (NPP)	96	5	91	127	112	1	0	0	14
5	IV Nichlaul (NP)	181	55	126	114	35	18	55	0	6

District Total		**185**	**27**	**157**	**152**	**77**	**13**	**29**	**0**	**33**

The Table 43 gives the per capita receipt and expenditure (in rupees) for each town in the district. The average per capita receipt for towns of the district Mahrajganj works out to Rs 185 of which Rs 27 are derived through local taxes and the remaining Rs157 received from all other sources. The average of total expenditure incurred per head is Rs 152. Out of this Rs 77 are spent on general administration, Rs 13 on public health and conveniences, Rs 29 on public works, and Rs 33 is spent other items while expenditure on public institution is nil. Among all the six towns the receipt and expenditure recorded per head are the highest in Anandnager NP and lowest in Nautanwa NPP.

TABLE 44: SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Anandnagar (NP)	12.7	1.0	3. 9	3.9	1.0
2	Ghughuli (NP)	1. 9	1 9	1. 9	1.9	0 0
3	Mahrajganj (NPP)	4 6	2. 3	1. 1	0.8	0. 8
4	Nautanwa (NPP)	2. 0	1. 7	1. 0	0.7	1.0
5	Nichlaul (NP)	1 9	1.3	0.6	0.6	0 0
6	Siswa Bazar (NP)	4. 2	1.1	0.5	1.1	0.5
District Total		**4.0**	**1.6**	**1.3**	**1.2**	**0.1**

In urban areas of Mahrajganj, district the average number of primary schools per 10,000 population comes to 4.0 schools, 1.6 junior secondary/middle, 1.3 secondary/matriculation, 1.2 senior secondary schools and the ratio of colleges is only 0.1 college. Among the towns, the ratio of primary and junior secondary/ middle is highest in Anandnagar and Mahrajganj (N.P.) respectively. Anandnagar (N.P.) also has highest ratio of secondary/ matriculation schools(3.9) and senior secondary school (3.9), College education is also available only in Anandnagar (N.P.).

TABLE 45: NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Anandnagar (NP)	0
2	Ghughuli (NP)	10
3	Mahrajganj (NPP)	19
4	Nautanwa (NPP)	3
5	Nichlaul (NP)	3
6	Siswa Bazar (NP)	16
	Distrct Total	**9**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of the district. On an average there are 9 beds per 10,000 population in urban areas of the district. Whereas it is the highest 19 in Mahrajganj (NPP.) while lowest number of 3 beds is recorded in Nautanwa and Nichlaul and is fallowed by Ghughuli (N.P.). The availability of bed in Anandnagar (NP) is nil.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl. No.	Name of the Town+	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
-	-	-	Not Available	-

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Anandnagar (NP)	Sugar Incense stick Iron Goods	Rice Vegetable Oil Wood
2	Ghughuli (NP)	Sugar Musterd Oil Biscuit	Cloth Ciment Iron Rods
3	Mahrajganj (NPP)	Incense stick Wax	Rice,Wheat, Vegetable Oil
4	Nautanwa (NPP)	Vegitable oil	Vegitable oil
5	Nichlaul (NP)	-	-
6	Siswa Bazar (NP)	Sugar Mustard Oil Biscuit	Cloth Cement Iron Rods

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for Sugar, Mustard oil and Agarbatti(Incense stick). The chief export items of the district are mostly the same that are manufactured in the towns.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001based on inset tables 48 to 52

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 Census, the houselist was considerably expanded with 22 items of information. Again in 2001 Census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

District total		334,736	317,928	16,808	76,705	73,954	2,751	3,051	2,950	101

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the Table 48 depicts number of houscholds by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 334,736 consisting of 317,928 rural and 16,808 urban households. 76,705 households belong to Scheduled Castes and 3051 to Scheduled Tribes. 326,449 households are living in their owned houses constituting 97.5 per cent of total households. Of these houscholds, the largest number of households (109,257) have occupied double room accommodation and is followed by single room accommodation numbering to 103,889 households. Next position is claimed by households (58,120) occupying three plus room accommodation.Number of households in owned accommodation occupying three rooms rank at fourth place with 48,536 households while 6,647 households are without any exclusive room.

5,191 households living in rented accommodation account for 1.6 per cent of total number of households in the district. The largest number of 2,087 households are living in single room accommodation followed by 2008 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering 3,096 forming only 0.9 per cent of total households are distributed in single roomed accommodation numbering 1,609, double room are 746 and 362 in three room accommodation. In rural areas majority of households have smaller size and majority of them have their own houses.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temp-orary	Perma-nent	Semi-permanent	Temp-orary
1	2	3	4	5	6	7	8	9	10	11
1	Nautanwa	63.7	18.8	17.5	62.3	19.5	18.2	81.6	10.2	8.2
2	Nichlaul	57.5	11.5	31.0	55.6	11.8	32.6	81.6	7.1	11.3
3	Pharenda	73.7	12.9	13.4	73.2	13.1	13.7	93.1	3.2	3.7
4	Mahrajganj	74.1	12.6	13.3	73.7	12.9	13.5	84.2	7.0	8.9
	District Total	**68.6**	**13.6**	**17.8**	**67.9**	**13.9**	**18.3**	**83.6**	**7.5**	**9.0**

The percentage distribution of households as shown in the above table reveals that more than 68.6 per cent of the households in the district had permanent houses. The trend is almost similar in rural (67.9 per cent) and urban area (83.6 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Mahrajganj (74.1 per cent) followed by Pharenda (73.7 per cent), Nautanwa (63.7 per ent) and lowest in Nichlaul (57.5 per cent). In respect of semi permanent houses, the percentage were 13.6 per cent at district level whereas among tahsils highest was 18.8 per cent in Nautanwa and lowest was 11.5. per cent in tahsil Nichlaul. Rural areas represented a similar trend at district and tahsil level but permanent houses in the urban areas were in the proportion range of 81.6 to 93.1 per cent. Temporary houses in urban areas of the district lie between the range of 3.7 to 11.3 per cent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been claas 'Improved' or

otherwise. If the household has acccss to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackcts after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage menas closed and open drainage.

The above table shows that out of total households of the district 92.9 per cent of the hlouseholds had improved drinking water facility. The proportion of rural and urban areas was 92.7 and 95.6 per cent. Tahsil Mahrajganj had higher order of proportion of households where percentage for rural area was also 94.1 and 95.1 per cent in urban areas. Electricity was available for 18.3 per cent of households at district level. The district had poor access to electricity. Bathroom and toilet facilities were available in 14.8 and 12.7 per cent of households. Tahsil Pharenda was poorly served in respect of these amenities. Similarly drainage facility was also poor in Pharenda was tahsil. At district level drainage facility was available for 40.9 per cent of hlouseholds, whereas the proportion of rural and urban area households accounted to 39.3 and 71.1 per cent.

Percentage in brackets

Data source Census of India 2001, H-series. Tables on Houses, Household amenities and Assets.

It observed from the above table that 67.2 per cent of households in the district use firewood as fuel for cooking, the proportion in the rural area is 67.17 per cent and in urban area it comes to 58.0 per cent of households. The crop residue has been reported, as fuel for cooking of food is 19.9 per cent of the household. The composition of rural and urban comes to 20.8 and 3.3 per cent respectively. Cowdung cake is used for cooking in as many as 9.5 per cent of the households (10.0 per cent rural and 0.5 per cent urban households). The other methods like LPG (cooking gas), Kerosene, Electricity, Biogas, Coal, lignite and Charcoal etc. ranges between 0.1 to 1.5 per cent of the households of the district. The trend of fuel used for cooking follows the same pattern in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, Crop residue and cowdung cake are the predominant fuel for cooking in the district.

TABLE 52· NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

S No	Tahsil	Total/ Rural/ Urban	Total number of house holds	Total number of households availing banking services	Availability of household assets

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

This table presents data for total, rural and urban areas at district/tahsil level about the households availing banking services and possession of assets such radio/transistor, telephone, bicycle, scooter and car etc. by the households. There are 334,736 households in the district and among them 162,447 households have been availing banking services. 104,893 households have Radio/Transistor. Television is possessed by 40,593 households. Telephone is available in 9,746 households. Bicycle is a main means of transportation and is available in 260,048 households. Scooter, Motorcycle, Moped and Car, Jeep, Van are used by 16,683 and 6,155 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is almost similar as analysed above for the district as a whole.

(XI) Major Social and Cultural Events, Natural and Administration Development and Significant activities during the decade:-

No significant social, cultural events and natural or administrative development have taken place during the last decade.

(XII) Brief description of Places of Religious, Historical, Archeological importance in villages and places of Tourist Interest in the town of the district.

Brijmanganj : Brijmanganj place was known as a Sahebganj in old time. But now it is associated with the name of J.H.Bridgeman who was the first feudatory of erstwile Lehra estate. It is situated in the north-west of Pharenda at a distance of 13 kms. This place has a prosperous market which occupies rice-mills, co-operative seed stores, allopathic dispensaries, veterinary hospital, maternity and child welfare centre, an intermediate college and a post office.

The temple of Adrauna Devi (Lehra) : It is established in the north of Pharenda at a distance of 7 kms. It is the most celebrated place of Pilgrimage. In the distant past this place namely 'Aardra Van' was covered with dense forests. The holy temple of 'Man Silvan Goddess-Durga' is situated on the bank of ancient river 'pavah' According to hearsay and Hindu mythology, the establishment of this Devi temple had been made by Arjun in his unknown dwelling period. In ancient times in accordance with other hearsay, a woman was crossing 'Pavah' river in the boat when licentious sailors appeared and wanted to touch her with the thought of misdeed . At that time Goddess Durga appeared and rescued her and drowned sailors along-with the boat. This event proves the significance of this place.

Two Shivalinga of Katahara : The two ancient Shivalinga (executed by black stone) is positioned on the two parallel mounds near by Katahara Village towards the western edge of the forest at a distance of 12 kms. from district headquarters. Among two temples one temple has been erected by local villagers recently but the other located on mounds is lying unprotected in its former state. On the basis of historical evidences, this place has been associated with the followers of Shaiv and Buddhism. At present a cultural fair is held here on the auspicious occasion of 'Maha Shiva Ratri".

Banar Singhagarh (Vanarasiya Kalan) : An ancient Shivling (penis) exists here and an area of 35 hectares around it is covered by mounds, stupas and ponds. Every year a fair is held on the occasion of the 'Shivratri'. Some learned person esteem it as 'Fort of Saiyadbanaras, built by a well-wisher of Aalha-Udal, the hero of Buldelkhand. This place sets a good example of communal harmony. Some archaeologist accepts it is a Devasthan..

Place of Sonadi Devi : It is located in Chowk range. Nearly 35 feet lofty mound exits here and many ponds are situated beside it. Doctor Krishna Nand Tripathi accepts it as a 'site of shramrar' because a huge Banyan tree is situated at on this place which is thousand year old. Here a 'Math' of Gorakh Panthies is situated on the site of Sonadi Devi'. On the occasion of Kartik Poornima, Maghamavasya, Poornima and Makar sankranti the 'Bath-Festival has been celebrated year after year on the bank of the river. The enormous' bath-festival and the fair held on 'Trimuhani ghat' on the occasion of Kartik Poornima is remarkable.Other important places in the district are mentioned here . Siswas Bazar of Mahrajganj has became one of the Principal market of the district. Several local marwaris and grain dealers from other district have opened grain agencies here. Besides these Shiva temple of Itahiya, vishnu temple of Mahadeiya and site of Bokada Devi are also the place of public interest.

Nautanwa is an important commercial place situated to the north of Pharenda at a distance of 81 Km. from Gorakhpur connected by . Gorakhpur- Nautanwa branch line of the north- eastern railway. It is also linked with road from Pharenda.Other places which are important places in the district are mentioned here. Siswas Bazar of Mahrajganj has became one of the Principal market of the district. Several local marwaris and grain dealers from other district have opened grain agencies here.

Nichlaul is situated at a distance of 79 km. from Gorakhpur and 24 km. to the north from Mahrajganj district. The place formerly belonged to Lappa Khas. Pharenda is said to have derived its name from Pharenda or Jamun trees that grow here. The railway station of Pharenda is known as Anand Nagar. Thuthibari of Tahsil Mahrajganj is situated on the bank of Piyas river. It was formerly the exchanging place for prisoners to and from Nepal.

(XIII) Major Characteristics and Contribution of the District

Situated in the Indo –Nepal border,this district is strategically located. This district has markets of indigenous goods which caters to the need of Indian and Nepalese people. Being a border district every activity in this district is keenly watched by central and state governments.This is also an important rice producing district.

(XIV) Scope of Village Directory & Town Directory

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii)The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv)Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A

VILLAGE AND TOWN DIRECTORY
(SECTION I & II)

Section I – Village Directory

(a) Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP

(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)Agricultural Credit Society	ACS
(ii)Non-Agricultural Credit Society	NCS
(iii)Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposesEA	

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazine the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not

available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

SECTION II
TOWN DIRECTORY

Section II - Town Directory

(A) NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M.Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

. Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A

(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc..

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as

Matriculation or Secondary schools. Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after

the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important feature of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also.

In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP	Mahrajganj
q1	Persons	99	98
	Males	98	72
	Females	104	102
q2	Persons	117	105
	Males	117	84
	Females	118	110
q5	Persons	134	117
	Males	135	101
	Females	132	121

The probability of dying between birth and at age 1,2 and 5 years are shown in the above table. Child mortality by ages 1,2 and 5 years is lower in the district as against the state, thus child mortality indicators in the district for both male and female shown lower order as compared to the state.

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male Female	Uttar Pradesh	Mahrajganj
1	2	3	4	5
1	CBR		37.2	34 2
2	TFR		5.6	5 0
3	TMFR		6.3	5.3
4	GFR		172	156
5	GMFR		200	167
6	Mean age at marriage (1981-91)		17.3	16 1
7	Number of children ever born per ever married woman aged 45-49 years		4.6	4.1
8	Child woman ratio 0-4 per thousand (age 15-49)		631	637
	Child women ratio (5-9)		752	729

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility is an important component to describe fertility and mortality rate of any area. The table reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 34.2 per thousand in the district. It is below to the state of Uttar Pradesh i.e. of 37.2 per thousand. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is slightly lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state whereas 16.1 years has been observed for the district. It may be observed that lower age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever married women the age group 45-49. The state and the district figures are placed as 4.6 and 4.1 percent respectively. Number of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 637 and 729 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such are below to the state average.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent while it was 79.6 percent during, 2001 Census at state level. In respect of in-migrants by place of birth the corresponding figure for the district was 81.7 in 1991, while in 2001 it was 82.1 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 5.1 percent and 5.8 percent respectively. This shows in-migration from other states to this district was almost same in 2001 in comparison to 1991. At district level in-migration from other countries was 13.3 percent in 1991 and 12.1 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 78.4 percent and 76.8 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 7.8 percent and 9.5 percent respectively. The movement of population from other countries in the district was 13.8 percent in 1991 and 13.7 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

	100.0	1.3	0.1	83.2	0.0	15.2	0.1	0.0	0.1

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 83.7 percent in 1991 and 82.5 percent in 2001, while Muslim were 15.9 percent in 1991 and 16.5 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh along with combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure – VI

Marital status of populations as per 1991 Census

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state of Uttar Pradesh and district Maharajganj for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 46.5 percent male and 40.3 percent female to 52.1 percent male and 45.8 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage of married male was 50.1 percent and female was 55.1 percent in 1991 and in 2001 it was 45.2 percent male and 49.9 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.6 percent male and 4.2 percent female while it was 3.4 percent male and 4.5 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 63.8 percent male and 91.9 percent female in 1991which declined to 49.4 percent male and 78.0 percent female in 2001. Primary level education was 10.1 percent male and 2.9 percent female in 1991, which was 16.6 percent male and 7.4 percent female in 2001. Middle level education was 7.5 percent male and 1.4 percent female in 1991 and 11.4 percent male and 3.5 percent female in 2001. Matriculation and above level of education was achieved by 9.3 percent male and 1.2 percent female in 1991 which was 14.5 percent male and 3.4 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001, while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note: *For state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater that 0.02 percent. The remaining tongues have been merged in the column of "Total of other mother tongue"*

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). In the district Bhojpuri is reported as mother tonguewhich is highest in 1991. The district reported Hindi as mother tongue for 38.8 percent person in 1991 and 85.9 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereasA in the district highest mother tongue reported is Bhojpuri which is 57.9 in 1991 while in 2001 it is second highest 11.8 percent in 2001. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
