UTTAR PRADESH
DISTRICT KUSHINAGAR

KILOMETRES
5 0 5 10 15 20

Area (Sq. Km.)	2,906.00
Population	2,893,196
Number of Tahsils	4
Number of Vikas Khand	14
Number of Towns	7
Number of Villages	1,641

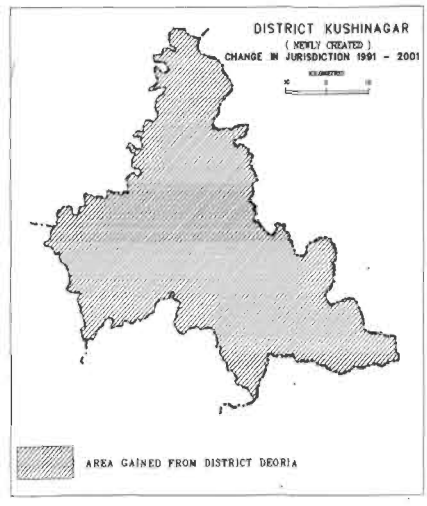

Note :-
Vikas Khand Pathar Deva & Desahi Deoria are spread over in two Districts namely Deoria & Kushinagar.

'A' Part of SIVARHI VIKAS KHAND.
'B' – Part of DESAHI DEORIA VIKAS KHAND.
'C' – Part of PATHAR DEVA VIKAS KHAND.
'D' – Part of TAMKUHI RAJ VIKAS KHAND.
'E' – Part of FAJILNAGAR VIKAS KHAND.
'F' - Part of TAMKUHI RAJ VIKAS KHAND(Tahsil Tamkuhi Raj)

1 – Jungle Nonia Patti
2 – Lala Chhapra

BOUNDARY STATE
" DISTRICT

VILLAGE WITH 5000 AND ABOVE POPULATION WITH NAME — Sohrauna
TOWNS WITH POPULATION SIZE AND CLASS: III , IV
DEGREE COLLEGE , TECHNICAL INSTITUTION

MOTIF

Nirvan Mandir

Kushinagar or Kasya is a small town in district Kushinagar. It is one of the centres of Buddhist pilgrimage where Lord Buddha left his corporial self and attained 'Mahaparinirvana'. This town was equally important for followers of Mahavir in the ancient times. The credit for bringing this ancient site into limelight goes to Gen. A. Cunningham and A.C.L. Caryl who after excavating the site in 1861, established its antiquities for the first time. This process continued and latter between 1904 and 1912, several exhibitions conducted by Archaeological Survey of India confirmed its identity. Mahavira's Nirvan had taken place at Pawa (Faizal Nagar), which is regularly visited by Indians and foreigners throughout the year. The monuments of Kushinagar are situated in three distinct groups, comprising the main site of the temple, the central Stupa and surrounding monestries, the 'Mathakqarkola' to the South-west and Rambhar Stupa to the East.

Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 976
Annexure VI Marital status of population as per 1991 Census 978
Annexure VII Age, Sex and Education in the district, 1991 Census 983
Annexure VIII Distribution of different mother tongues returned in 1991 Census 987

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Kushinagar ranks 24th in terms of population in the state.

2. The percentage share of urban population in the district is 4.6 as against 20.8 of the population in urban areas of the state.

3 Kushinagar district has population density of 996 persons per sq.km.which is more than the state average of 690 persons per sq. km.

4. Kushinagar district ranks 10th in terms of sex ratio (963) which is higher than the state average of 898 females per thousand males.

5. Kushinagar district ranks 60th in literacy (46.9) which is below than the state average of 56.3 per cent.

6. There are only 69 uninhabited villages out of total 1641 villages in the district.

7. Decadal growth rate of the district (28.2) is higher to the state average of 25.8per cent.

8. Padrauna tahsil has the highest number of inhabited villaes (514) while Kasya tahsil has the lowest number (288).

9. The district has seven towns, no new town has been added, declassified or merged with other town during the decade 1991-2001.

10. There are 427,910 households in the district accounting for 1.7 per cent of the total households in the state. The average size of households in the district is 6.8 persons.

Important Statistics, 2001

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 Census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

(II) Brief History of the District

Before coming up as a new district, Kushinagar was an important part of the district Deoria. By separating from Deoria , the newly created district Kushinagar (Ex name-Padarauna since 1994 and there after renamed Kushinagar since 19th June 1997)) came into existence on 13 May 1994. The formation of tahsils Tamkuhi Raj and Kasya was done in 1987 and 1995 respectively. During the reign of British, this area was included in Banaras division. But now it is in Gorakhpur division.

The district has remained the centre of civilization and culture from earlier times. This place has been a shelter of Rishis, Monks and Ascetics.

In pre-epic period, this region was associated with the name of Chakravarty ruler 'Mahasudassana' whose reference is contained in 'Mahasuddassana sutlanta'. His capital Kushavati, which contained a commercially important and a significant position, reached the utmost limit of its glory. In the course of his reign all defensive measures were taken up by erecting seven round posts and four gateways in every direction of his capital . In epic period Rama, who was the greatest King of Ikshvakshu dynasty, the regent of Kosala Kingdom was designated to his youngest son Kusa to assume the reign of Kushavati. Kushavati, Kushanira, Kushigram, Kushinagari, Kushinagar and modern Kasya are different names of ancient Kushavati. After Rama, Kusa did not remain in Kushavati for a long time and left it in favour of Ayodhya. Subsequently the sovereignty of Kushavati was passed over to Chandra Ketu, the son of Lakshman. He entitled Malla (Valiant) whose exposition is found in Ramayan and established a kingdom known as Malla State. There were two Ganatantra of Malla's; Kushinira and Pava. In Jataka stories these were known as 'Rattha'. According to Bauddha Grantha ' Mahaparinirvansutanta' Mallas were known as 'Bhasatth' or 'Vashistha Gomi. Mallas were famous in the art of warfare and their good reputation was widespread.

By six century B.C. Prasenjit, the son of Mahakosala, the last sovereign of the Suryavansh dynasty, was a famous king of his time. In the course of his reign, the Kingdom gained great reputation and success. The Malla monarchy also represented as one of the sixteen Mahajanapadas with an independent entity and status equal to that of Kosala itself. Its chief Bandhula was a close confederate of Prasenjit and equally with Mohali, the Lichchavi prince of Vaisali. The Mallas were grately impressed by the teaching of Mahavira (Jainism) and Buddha (Buddhism) and many of them followed their path. With a view of Lord Mahavira and Buddha, the precedence of religious and meditative revolution of that time, this place was the most sacred. Hence, Lord Buddha selected this place on the part of publicity of his religion and Parinirvan. Images, sculpture, clay seals, votive tablets, ruins of stupas, monasteries and the mounds found at Padrauna and Kasya confirm that Kushinagar which was then known as Kushinara was the favourite resort of Buddha. During his visits Buddha stayed at the Baliharana Vana also where he preached the 'Kushinara Sutta' and the 'Kinti Sutta'. The stories of the Mahasudassana Suttanta and the Mahusudassana Jataka were narrated by Buddha at Kushinara. Buddha felt that the end of his life was near so he arrived at the Salvana of Kushinagar, where he imparted a message to the Mallas. The Mallas paid him a great homage, on his departure from this world which was suitable for the revered teacher.

In accordance with tradition at the close of the sixth century B.C. Vashistha a prince of the Suryavanshi Kshatriya race settled in this region but either he or his successor was driven out by the Bhars during the first half of the 5th century B.C. At the beginning of the 5th century B.C. the rising power of Magadha under Ajatsatru had reduced the political importance of the Mallas. Nearly the middle of the 4th century B.C. the area covered by this district was attached to the empire of Magadha by Mahapadma Nanda. Ashoka (273-236 B.C.) the first great royal protector of Buddhism came on pilgrimage to Kushinagar with monk Upagupta. Stupas and pillars at this place are attributed to him. One of the stupa was made near by Parinirvana temple with a stone pillar in front of it on which the description of Buddha's Nirvana were engraved. The excavated large sized bricks at this place explain about the building of the Mauryan age. The Mauryans were rooted out by the Sungas. Pushyamitra (187-151 B.C.) who was a saviour of Brahmanical Hindusim warded off the

Mallas republic. A large mutilated statue of Buddha known as Matha Kunwar found in Kushinagar is said to belong to this period. The political history of this area again remains dressed for the grave for over a century till Chandra Gupta I (320-335 A.D.) who employed political power over the district. During the reign of his grand son Chandra Gutpa II (380-415 A.D.) Kushinagar formed a part of the Shravasti Bhukti (Province). The celebrated Buddhist Pilgrim from China Fa-Hiuen (400-411 A.D.) who was paying homage to Buddhist holy places during his visit to India, arrived at Kushinagar. He found the city populated only by monks. Sixteen silver coins of Kumar Gupta (414-455 A.D.) were discovered by Carlleyle in the excavation at Kushinagar in 1875-77. During excavation, conducted by Hiranand Shastri in 1910-12, a copper vessel covered with an imprinted copper plate was found in a Stupa standing behind the Parinirvana temple.

After the downfall of the Guptas the district appears to have remained under the sway of the Bhars. At the beginning of the 6th century, the Maukharis, who ruled this region, were overpowered by Harsha (606-647 A.D.) and the district came to form part of his Vast empire. In the course of his reign, Hiuen-Tsang another famous Buddhist Pilgrim from China (629-644 A.D.) frequented Kushinagar, and the name written by him as a Kou-Sulh-Na-Ka. He has given mournful account of the Dewastation of this place. About six stupas marking the spot associated with the remarkable events of Buddha's life were also observed by him. Harsha has probably made all efforts to bring back to former position of Kushinagar by providing a number of facilities to the people. The whole district was conquered by Govind Chandra (1114-1115) a Gahadvala king whose kingdom extended as far East as Bihar. His grand son, Jai Chandra was over thrown by Shahabi-ud-din Ghauri in 1194, bringing the Gahadvala power to an end.

When Bahadur Shah enthroned on the royal seat in June 1707 he appointed Chin Qulich Khan the supreme faujdar of Gorakhpur who held it till his resignation in 1710. But actual power was in possession of the local Rajput ruler. Saadat Khan a saiyad of Nishapur and a trustworthy shia was nominated governor of the suba of Avadh accompanying the faujdari of Gorakhpur in September 1772. By 1724 Saadat Khan had made an independent Kingdom of Avadh. During Nawab's rule Tilaksen created a nuisance with the help of hired Banjara . But his inheritor Abul Mansur Khan Safdarjang (1739-1754) re-established law and order in 1750. During the reign of Shuja-ud-daula the Sarkar of Gorakhpur prospered to a great extent.

After the death of Shuja-ud-daula in 1775, Asif-ud-daula assumed the reign of sway. In 1778 Hannary an officer in the British army, was lent to the Avadh Government and was entrusted with the command of the Nawab's soldier for the collection of revenue in this tract. He clearly put in practice supreme power and enacted it with cruelty and calamity. His aim was only to make clear ground for the entry of the British. The mutiny of 1857-58 came after by the transfer of power from East India Company to the British Crown. The town area of Padrauna was established in 1871. In 1873-74 the region was affected by severe famine. The region was again influenced by famine in 1877 and 1896 and in 1906 serious flood affected this region.

Mahatma Gandhi started his famous non-co-operation movement in 1920 which was whole heartedly supported by the people of this region. When the second world war came to an end, the British Crown made up his mind to give complete independence to India. In 1946,

the Deoria region was detached from the district of Gorakhpur and was made a separate district. On August 15, 1947 India (and with it the district Deoria and Kushinagar district as a part of then Deoria) was liberated from British rule and became independent. Kushinagar (Former named Padrauna and renamed Kushinagar in 1997) district was formed on May 13, 1994 by separating it from Deoria.

(III) Administrative Setup

For administrative purpose, the District Kushinagar is divided in to 4 tahsils namely Padrauna, Hata, Kasya and Tamkuhi Raj. Among these tahsils, Padrauna is the biggest and Tamkuhi Raj is the smallest tahsil. Kasya is newly created tahsil in the year 1995. The tahsils are further divided into 16 community development blocks. The district H.Qr. is in Padrauna NPP. and attached to Gorakhpur Division which is situated at a distance of 71 Km. The district has an area of 2906.00 Sq.Km. The district is further divided in 944 Gram Sabhas and in 1641 total villages in which 1572 are inhabited and 69 are uninhabited. One Nagar palika Parishad (padrauna) and 6 Nagar Panchayat namely Kaptanganj, Ramkola, Khadda, Kushinagar, Sevarhi and Hata are in the district.

Jurisdictional Changes (1991-2000)

During the decade Padrauna was made as new district in the year 1994, which was renamed as Kushinagar in the year 1997. This district was created by transferring the entire tahsils namely Padrauna, Hata and Tamkuhi Raj from Deoria District. In the year 1995, new tahsil Kasya was created by transferring the villages from Padrauna, Hata and Tamkuhi Raj Tahsils of this district. Fourteen villages of Deoria tahsil of district Deoria were also trasnfered to Kasya tahsil in the year 1999.

S. No.	Name of Tahsil	Notification No.	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
47	KUSHI NAGAR	5-4(1) 88-277 dated 13.5.1994	Entire Padrauna, Hata and Tamkuhi Raj tahsils transferred from Deoria district	
1.	Padrauna Tahsil	4593/1-5/94-74/92/R-5 dated 7.2.1995		89 villages and one town transferred to Kasya Tahsil

3.	Tamkuhi Raj Tahsil	4593/1-5/94-74/92-R-5 dated 7.2.1995		134 villages transferred to Kasya tahsil

District Administration

District administration comprises departments Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Zila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos's circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for developmental activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a departmental district level office from the development point of view the district is divided into community development blocks. Block Development Officer (BDO) looks after development works at community development block level. They are also assisted by Assistant Development Officers and Village Development Officers.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) is also incharge in their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area. The Judicial administration of the District is headed by District and Session Judge. In addition there are several Additional District Judges, Civil judge, Chief Judicial Magistrate and Munsif Magistrate and others judiciary officer are also posted for look into the legal matters.

The nucleus of the district body for Local self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(IV) Physical Features

(I) Location and size:

The newly created district of Kushinagar is located in the North-Eastern corner of the state. It lies between latitude of $26^0$33' and $27^0$18' North and longitude of $83^0$29' and $84^0$26'East. It has its boundaries with Mahrajganj and Gorakhpur districts in the West, whereas the district of Mahrajganj is also extended in the North.The district is bounded in the East and South-East by Bihar state and in South with the Deoria District. The district is drained by the Burhi Gandak and Chhoti Gandak rivers. It is totally a Marsh or Tarai area. It has an area of 2906.0 Sq.Kilometres.

(2) Physiography:

On the basis of geology, soils, topography, climate and natural vegetation the district is covered in following region.

Gandak Flood Plain : The region is situated along the Gandak river. The regional boundary separates the water catchment zone of the Gandak in the North-East side and other streams towards South-East. The general slope is towards South-East direction. Although the Gandak

river has great impact on the physical characteristics of the region yet only a small portion of its drainage course falls in the Northern part. The river is known as 'Sorrow' of the region, because of its shifting course. The Chhoti Gandak makes boundary between Mahrajganj and Kushinagar districts. Other small streams draining in this zone are Maun, Khanua and Bansi. There are numerous small streams along the Gandak river,which are flooded by the bank flow water and large part of this zone is submerged under the water. Besides, there are a number of oxbow lakes along the rivers. The area along Gandak is marshy but other part is fertile and productive.

(3) Drainage:

The Burhi and Chhoti Gandak are the main rivers in the district. The Burhi Gandak is flowing towards the Gopalganj district of Bihar state. These rivers are excessively flooded every year by which the crops are effected largely. The rivers are in the form of a net of canals, drawn from Burhi and Chhoti Gandak. These rivers are flowing from North-West to South-East direction.

(4) Climate :

The climate of the district is similar to that of the adjoining district of South but in the Northern portion it is influenced by tarai swamps. It is neither so hot nor so cold. The year may be divided into four seasons; the cold season from mid-November to February followed by the summer from March to the middle of June. The period from mid June to the end of September, is the South-West monsoon season and October and the first half of November, constitute the post monsoon season. Most frequently rains start from mid of June and continues upto October. The highest rainfall is found in the month of July and August. May and June are the hottest months of the district, while the coldest months are December and January. The maximum temperature is 43.5^{0}C and the minimum is 5.1^0 Celsius. The salient features of the season are humidity, cloudiness, wind and events like thunder storms accompanied by hail. Fog occurs occasionally in the cold season, specially in the Northern parts of the district. Winds are generally light and aggravate during the late summer and monsoon months. During the cold season the winds blow mostly from the West. In the the year 2001 normal rainfall was recorded 1203 mm., while the actual rainfall was 635 millimetres.

Natural and Economic Resources

Forestry:

The total area of forest is 815 hectares. Sagon, Shisham and Sakhu are main trees found in these forests. Thus many families depend on the forest for their livelihood, by selling the firewoods, leaves etc.

In the early days, as the most part of the district was covered with dense forest which was mentioned by Huien Tsang too, it was infested with wild animals and robbers. In the middle ages, due to deforestation came the end of jungles. By the cause of destructive struggles between the local Rajput chiefs, remaining portion of the forest remained in unsettled condition. In the beginning of British rule an important part of the district was covered with shrubs. Till the time of Zamindari abolition in 1952 there were only private

forests in the district but in that year forest lands measuring about 1535 hectares in tahsil Hata were given to the forest department for scientific management.

The trees found in these areas are Jamun, which grows freely along the bank of the water courses. Benificial trees found in the area are Khair and Haldu along with the Semal, Sain, Jhingan, Aonla, Harra, Bahera, Bel and Bijaisal. Other trees generally found in the district are Mango, Babul, Bargad, Dhau, Deethori, Gular, Neem and Sheesham. Among the shrubs, which grow commonly are Ail, Akala, Ban Nibva, Ban Tulsi, Ber, Jhau, Karaunda, Madar, Mainphal, Musali, Rohini and Sarpgandha, the chief climbers being the Dudhi Bel, Gurich, Harijor and Kalibel. Among grasses Narkut is mainly found in tahsil Hata and Padrauna and Munia sentha, Pater, Dub and Kus are found in every part of the district.

In earlier days a large number and different sort of wild animals, birds and reptiles were found in the district because the most part of the tract was overspread with forests and grass land. In order to clear the forest area for agricultural and other purposes and careless shooting, large varietis of wild animals have now practically been disappeared from the district. The large animals found in the district are nilgai and some species of deer. The other animals found in the district include the jackal, fox, hare, porcupine and monkeys. The species found in the terrain is alike to that of bordering district and includes varieties of duck, partridge and pigeon. Besides other varieties, the birds commonly found in the district are quail, jungle fowl, snipe, parrot, kite, crow, vulture and sparrow. The majority of the species of snake present in the district are non-poisonous excluding the cobra, the krait and the Russell's viper. Fish are found in the rivers, lakes and large ponds of the district. The most important fish found in the district are rohu, mahasher, bhakur, karaunch and bata.

Minerals and Mining:

No minerals are found in the district except Kankar stone and Sand. Kankar stone is used in road construction work and in manufacturing of lime. Due to the network of canals of Burhi and Chhoti Gandak, the sand is available in a large quantities, which is used in building construction work.

Soil:

All types of soils are found in the district, like Domat, Bhat, Matiyar and Baluai Domat. Domat is mainly found in Hata and Padrauna tahsils. This soil is very fertile and all kinds of crops are sown in the soil. The Bhat soil is found in the Kaptanganj Ramkola, Dudahi, Padrauna, Nebua Naurangia, Sevarahi and Tamkuhi Raj C.D.block. This soil is fit for sugarcane. Besides these, all other soils are found every where in the district.

Land and Land Use Pattern:

According to statistical magazine 1999-2000, the total reported area in the year 1997-98 was 284,898 hectares, of which forest covered 815 hectares and is only 0.3 per cent of total reported area. The Cultiviable Banjar land is 2901 hectares (1.0%), present fallow land (parti) 3822 hectares, (1.3%), other fallow 2941 hectares, (1.0%), Usar and unclutiviable land 6048 hectares, (2.1%), land used for other purposes other than agriculture 45480 hectares (16.0%), grazing land 114 hectares (0.04%) and Gardens, Orchards and bushes are in 3093 hectares (1.1%). Total net sown area was 219,684 hectare and area sown more than once was 104,953 hectares, which was 77 per cent and 23 per cent respectively of the total area. The Total sown area was 324,637 hectares and out of which Rabi in 122,199 hectares, Kharif in 193,367 hectares and Zaid 7368 hectares were sown . According to the main crops, the area

sown was as follows. Wheat was sown in total area of 103,187 hectares of which 96,682 hectares was irrigated and remaining 6,505 hectares was unirrigated area Paddy was sown in 111,830 hectares, Gram was sown in an area of 30 hectares of which 26 hectares was irrigated area. Pea was sown in total area of 925 hectares of which 390 hectares was irrigated.

Paddy was sown much more than other crops in Sevarahi C.D.block. which was 11,069 hectares and out of which 2,206 hectares was irrigated. Wheat was sown much more than others in Dudahi C.D.block. which was 10,632 hectares of which irrigated area was10,632 hectares. Oilseeds crop was sown much more than others in C.D.block Khadda, which was 1,442 hectares of which irrigated area was 229 hectares. Sugarcane is main crop among the commercial crops which was sown in 78,707 hectares. Sugarcane has a second place after paddy in Kharif crops, and it was sown in much more area. In Bishunpura C.D block which was 9,151 hectares the irrigated area was nil. Potato was sown in a total area of 2,679 hectares of which irrigated area was 2,079 hectare. The potato was sown much more than others in the Fazilnagar C.D.block. on 263 hectares in which irrigated area was 125 hectares.

According to statistical magazine 1999, the agriculture census was done in 1990-91, by which the operational land holdings in the district were as follows ; below 0.5 hectare size holdings were 250123 in numbers having an area of 74358 hectares between 0.5 hectares to 1.00 hectares size were 70859 in numbers having 27580 hectares area; holdings within 1.00 to 2.00 hectares size were 37245 in numbers with 53868 hectares area; size between 2.00 to 4.00 hectares were 10079 in numbers having an area of 25209 hectares, size between 4.00 to 10.00 hectares were 5457 in numbers with an area of 22184 hectares, while size of 10 hectares and above were 1943 in numbers with an area of 19069 hectares. Total number of holdings were 375706 with an area of 222268 hectares. Thus the number of holdings having size below 0.5 hectare were more than others but area covered by these holdings were less in comparison to others.

Agriculture and Crop Patterns:

Rabi, Kharif and Zaid are the main crops in the district. According to statistical magazine 1999 in the year 1997-98, the total area under the agriculture was 313,121 hectares under the agriculture for the main crops, of which 111.830 hectares was under paddy which was 35.7 per cent of the total area, 103,187 hect. with 33.0 per cent was under wheat, 74,539 hectares with 23.8 per cent area was under sugarcane, 9,922 hectares with 3.2 per cent area was under total oilseeds, 7,468 hectares with 2.4 per cent area was under total pulses, 3,222 hectares with 1.0 per cent was under the maize, 1,931 hectares with 0.6 per cent was under the potatoes and 1,022 hectares with 0.3 per cent was under the other crops.

Average grown crops in quintals per hectare in the year 1997-98 was as follows, rice 26.82, wheat 23.59, barley 25.00, juwar 9.92, bajra 16.87, maize 15.37, urd 4.59, moong 4.18, masoor 9.75, gram 6.74, peas 12.99, arhar 9.38 and moth was 5.29 quintals per hectare, total pulses 9.41 and total foodgrains was 24.17 quintals per hectare besides these among oil seeds, lahi/sarson 6.48, alsi 4.26, til 1.51, ground nut 8.01, surajmukhi 13.52 and total oil seeds was 6.44 qutls per hectare. Among the commercial crops, the sugarcane was 554.20 qutls per hectare, potato 85.58, sanai 3.85 and termeric was 18.96 qutls. per hect. in the district.

The value of the total agriculture crops production in the year 97-98 was 4,001,589,790 in rupees in the district, of which total food grains value was Rs. 3,547,037,960, oil seeds Rs. 78,850,230 and other crops value was as follows, sugarcane Rs. 289,166,500, potato Rs. 67,752,500, sanai Rs. 2,094,400 and haldi Rs. 16,688,200.

The total fertilizer distribution in the district during 97-98 was 41,608 metric tons, of which nitrogen 30696 mt.tons, phosphorus 9053 mt.tons and potash was 1859 metric tons.

Regarding the main facilities related to agriculture during 98-99, there were 255 godowns and fertilizer depots with a capacity of 26,705 m.t., rural godown 146 nos. with capacity of 14,600 m.t., insecticides depot 15 nos. (capacity 320 m.t.), seed growth's farm 3 in numbers, cold storage 5 nos. with a capacity of 11,050 m.t., agriculture service centres other than agro 128 numbers, Krishi Utpadan Mandi Samiti one in number and biogas plant 2,630 in numbers. In the year 1998-99 the number and capacity of grain depots were 9 in numbers with a capacity of 6,000 metric tons.

Irrigation:

For irrigation, the sources and means in the district in the year 1998-99 were as follows; the length of canals was 1491 kms, the number of govt. tube wells were 129, private tube wells 73 in nos., pumpsets mounted on boring were 8,413 in numbers.

The total area irrigated by different means in the year 1997-98, was 149,968 hectares, of which an area of 80,982 hectares was irrigated by canals which was 54.0% of the total irrigated area, by tubewells (govt. and private), 61,444 hectares (41.0%), by wells 5,117 hectares (3.4%), by other means 521 hectares (0.3%) by ponds, lakes and tanks 1,904 hectares (1.3%). Thus, it is clear that, the canals is main source of irrigation in the district followed by tube wells.

Animal Husbandry:

As given in statistical magazine 1999, as per livestock Census 1993 the total livestock were 735,129 in numbers of which 217,648 were cows and bulls, buffaloes 137,500 in nos., sheeps 8,032 in nos., goats 285,630, horses and ponies 476, pigs 27,502 and other animals were in 58,349 nos. Regarding the poultries, the total no. was 228,469, of which hens and cocks were 225,998 in nos. and other poultry were 2,471 in nos.

In the year1998-99, for treatment and protection from various diseases of the animals and poultries and improvement by breeding and development of livestock and poultry there were 20 veterinary hospitals, 38 livestock development centres, 10 and 20 artificial insemination centres and sub centres, one livestock fertility farm, two sheep development centres, 4 pig development centres, 140 piggon units and 280 poultry units were working in the district.

Poultry development programme has an important role in the district. In the year 1996-97, total 62,800 livestocks have been treated and 83,153 were vaccinated through veterinary hospitals and by livestock service centres.

To solve the economic problem of the district, livestock has a significant role. The livestock has an active participance in production of milk, ghee and manure for strengthing the economic status of the district. For this purpose, the livestock development and development by breeding reform etc., programmes have been launched. Distribution of high breeded oxen in lieu of bad breeded oxen at a low price, by the artificial insemination the female animal pregnanted, the breed reform work has been done successfully. For better

health of the animals feeding production programme has been taken up in the district on a large scale. To improve the progeny of the animals, insemination through high breed oxen have been taken up in the district by the Animal husbandry department.

For the poultry development, the debt and grant facilities have been provided to the low and marginal farmers under the I.R.O. scheme and special component programme. In the year 1997-98 the 25,058 cows and 9,922 buffaloes had been pregnanted through the artificial insemination. Neigther dairy industry, nor milk development office is established in the district. Fifty-one Primary Milk production Societies are working in the district, by these Rs. 1,577,000 hundred valued milk product had been sold in the year 1998-99.

Fishery:

The large and medium sized water reservoirs, ponds are not available in the district. The fish production is only done in the rivers and nullahas. In the year 1998-99, there was only one departmental pond of 5.08 hectares in the district and 1,123 thousand fingerlings have been distributed by fishery department. In the year 1997-98 for the fishery development an amount of Rs. 3.00 lacs had been provided and against it Rs. 2.94 lacs had been spent on the various fishery development programme. By this scheme about 50 per cent grant amount is provided for ponds reformation and fishery work. The short and long term technical training programme for the fisherman is also given under this scheme. Fourteen Matasya Sahkari Samitiyan with 1208 members are working in this field. By these Rs. 41 hundred valued fish product had been sold and purchased in the year 1998-99.

Industry:

There are 9 sugar mills in the district, which are more in comparison to other districts that at least solved the unemployment problem and there is one distillery also functioning in the district. Besides these, no other large scale industrial unit is established in the district nor at present any proposal available in this regard. In the year1997-98, total 36 Karkhanas (factories) were registered and 8,911 persons were working in these Karkhanas (factories) as daily wage labourers.

In the year 1998-99, about 100 Khadi industry were woking in the district, in which 50 were under the registered institutions and another 50 were runed by individual industrialists. 134 industrial units were operated in the year1998-99, in the fiel of rural industries by the Khadi Gramoudyaog of which. 67 each were running by both the registered institutions and individual industrialists. In the area of small scale industries, the figure was nil in the year 1998-99 as shown in the statistical magazine 1999. Over all, there were above 234 industrial units exist in the district and 736 persons were engaged. Statistical Magazine 1999 shows that only industrial estate is exist in the district, in which 28 plots had been allotted and construction work is going on in 9 plots. Rs. 120 hundred valued product had been produced in it. The average number of working people is 16.

Trade and commerce:

Krishi Mandi Samiti and two sale and purchase Co-operative Societies are working in the district. Mandi Samiti is spread over all mandies of the district, where assistance area and cooperation is given to the farmers for distribution and storage of the agriculture products. besides it 4 cold storages are also working, which storage capacity is 8,250 metric tons. The storage facilities for products to the farmers are available at there on some scheduled rates.

Gur is also made in large scale in the rural areas. The farmers are getting good price of their products through Mandi Samiti.144 Primary Agriculture debt Co-operative Societies were working in the district during 1998-99, in which members were 248,183. Total number of 1,546 villages are under these societies. In the year 98-99 a loan of Rs. 106,376 thousand as a short term loan and Rs. 3,841 hundred as mid term loan had been distributed. A loan of Rs. 36,726 hundred had been distributed by the Sahkari Krishi Avam Gramya Vikas Bank in the year 1998-99. There are 22 bránches of Co-operative Bank in the district. Besides these, there are 2 Sale and Purchase Co-operative Societies, whose turn over was Rs.3,921 hundreds valued product. Forteen Sugarcane Cooperative Societies were working in the district in the year 98-99, its members were 285,627 in numbers. Rs. 28,050 hundred valued product had been marketed. The District Cooperative Bank had disbursed Rs. 4,410 hundreds as short term and Rs. 275 hundred as mid term loan in the year 98-99 through their 22 branches in the district.

Forty two branches of Nationalized Banks and 54 branches of Regional Rural Banks were working in the district during1998-99. By these commercial banks, a loan of Rs. 91,654 thousand was distributed during1998-99, of which Rs. 491,471 thousand for agriculture and allied works, and Rs. 162,363 thousand for small industries and Rs. 263,112 thousand for other work in private sectors.

Transport :

The length of roads in the district under P.W.D. was 951 Kms. in the year 1997-98, of which 69 km. was national highway, 185 km. main district roads and 697 km. were other district and rural roads while 543 km. road length was under the local self government, of which 496 km. under district panchayat and 47 km. was under the NPP and N.P. areas. Thus, total road length in the district of 1,494 km. in the year1997-98.

In the district, the length of roads was 580.53 km. per thousand sq.km. and 66.83 per lac population. There were 427 villages of below 1000 population, 200 villages between 1,000 to 1,499 population and 223 villages of above 1,500 population were connected to all seasons fitted roads in the year 1997-98. The programme have been taken up to connect the villages having population above 1000 to the pucca roads under the Rastriya Nyuntam Avashakta Karyakram (National minimum necessity programme) and the work will be soon finished. In the year 1997-98 the 21 trucks was registered for carrying goods. There are no large scale industries available in the distirct. In the medium size industries, the factories of Sugar Mills are connected with the Railway line and its products are generally transported through the rail routes. There are 105 Bus stations/stops existed in the year1998-99.

The total length of railway track was 14 km. broad gauge and 163 km was metre gauge with 18 railway halts or stations in the district in the year 1998-99.

The communication system network was as equipped with 201 post offices, 19 telegraph offices, 180 P.C.O's and 2433 telephone connections, Saving Bank facilities are available in all post office and in all telegraph offices and P.C.O's have trunk and telephone facilities.

Electricity and Power :

The economy of any area is based on the facilities of electricity, road transport and communication. As per statistical magazine 1999, in the year 1998-99, position of electrification in the district was as follows, the electrified number of villages according to

the Central Electricity Authority were 1,025 and the number of electrified villages with L.T. Mains was 1,010, the electrified Scheduled Castes localities in 1,060 numbers and the number of electrified private tube wells/ pump sets were 3,738 in numbers. 66.3 per cent villages have been electrified in 1998-99 out of total inhabited villages.

The total consumption of the electricity in the district was 124,630 thousand kilowatt per hour in the year 1997-98. Out of total consumption 69,394 thousand kilo watt per hour consumed in domestic light and low electricity power, 3,371 thousand kilo watt in commercial purposes, 25,671 kilo watt in industrial sector, 1,017 kilo watt in public light system, and 25,177 in agriculture sector. No electricity generating station is established in the district. Under the National Minimum Necessity Programme, the scheme is taken up to provide electricity more and more villages as early as possible. All seven towns are electrified. Under the non conventional energy programme 2,630 biogas plant had been installed in the district in the year 1998-99.

Gram Panchayat, its composition, jurisdiction and role in villages development:

A Gram Panchayat acts as the executive of the Gram Sabha. It is vital for village development.

Composition : The members of the village of Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 944 gram sabhas in the district.

It is necessary that the village panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The village panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its Terms: The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

Qualifications : In order to be elected to a village panchayat, a candidate should possess the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions : A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It look the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.

5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the upliftment of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100

(v) Census Concepts

Building:

A 'building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While, huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different

persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.
b) A place satisfying the following three criteria simultaneously:
   i) a minimum population of 5,000;
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, University campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an Urban Agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'Household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent

Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes:

1	Agariya	37	Habura
2	Badhik	38	Hari
3	Badi	39	Hela
4	Baheliya	40	Jhusia, Jatawa
5	Baiga	41	Kalabaz
6	Baiswar	42	Kanjar
7	Bajaniya	43	Kapariya
8	Bajgi	44	Karwal
9	Balahar	45	Khairaha
10	Balai	46	Kharwar (excluding Banbasi)
11	Balmiki	47	Khatik
12	Bangali	48	Khorot
13	Banmanus	49	Kol
14	Bansphor	50	Kori
15	Barwar	51	Korwa
16	Basor	52	Lalbegi
17	Bawariya	53	Majhwar
18	Beldar	54	Mazhabi
19	Beriya	55	Musahar
20	Bhantu	56	Nat
21	Bhuiya	57	Pankha
22	Bhuyiar	58	Parahiya
23	Boria	59	Pasi, Tarmali
24	Chamar, Dhusia, Chero	60	Patari
25	Dabgar	61	Rawat
26	Dhangar	62	Saharya
27	Dhanuk	63	Sanaurhiya
28	Dharkar	64	Sansiya
29	Dhobi	65	Shilpkar
30	Dom	66	Turaiha
31	Domar		
32	Dusadh		
33	Gharami		
34	Ghasiya		
35	Gond		
36	Gual		

Scheduled Tribes

1	Bhotia
2	Buksa
3	Jaunsari
4	Raji
5	Tharu

Language and Mother Tongue:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate

Literacy rate of the population is defined as the per centage of literates in the age group seven years and above. For different age groups the per centage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main Worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non Worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or

institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jwar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural Labourers

A person who works on another person's land for wages in money or kind or shareis regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry Worker

Household industry is defined as an industry run by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Washerman, Barber, etc., or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Per centage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water:

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{} \quad 1000$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs /Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city:

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 2,893,196 in which 2,760,673 live in rural and rest 132,523 in urban parts. There are 4 tahsils in the district namely Padrauna, Hata, Kasya and Tamkuhi Raj. The most populous tahsil is Padrauna followed by Hata and Tamkuhi Raj, whereas Kasya is least populated tahsil. The urban population in the district is 4.6 per cent. The urban population is maximum in Padrauna tahsil. There are 1,641 revenue villages in which 69 are un-inhabited. The total rural population, 2,760,673 is spread over in 16 C.D blocks. The most populous C.D block is Padrauna with a population of 314,233 having maximum number of inhabited villages (176) also. More than half of populated villages have a population size of 1000-1999 and 2000-4999 and such villages form as high

as 56.9 per cent of total populated villages. Although the population density in the rural area is 976, whereas, the highest proportion of 69.7 per cent of villages are in a population density range of 501+ per sq. km. Such villages contain as much as 75.9 per cent of total rural population.

Size-class and status of towns:

In the total urban population of 132,523 the maximum population 44,383 live in Padrauna town, and the next big town is Sêvarhi with a population of 19,825. The above two are class III and IV towns having the civic status of Nagar Palika Parishad (NPP) and Nagar Panchayat (NP). Rest of the 5 towns are Nagar Panchayat (N.P).

Population growth:

At the present territorial jurisdication, the population of the district was 2,256,334 at 1991 Census and grown 28.2 per cent during the decade 1991-2001, it is 2,893,196 at 2001 Census. The decadal growth of population (28.2 per cent) of the district is higher than the state growth rate of 25.8 per cent.

Population Density:

The district has an area of 2,906 sq. kms. The population density in the district is 996 persons per sq.kms.

Sex-Ratio:

The sex-ratio in the district at state 963 is way ahead to 898 at level. Indeed the sex-ratio at the district has been all along higher in the district as against to the state since 1901. As against to rural areas of the district, the sex-ratio is always lower in urban areas. Among tahsils, highest sex-ratio is in Kasya and lowest in Padrauna. Among C.D blocks the sex-ratio is highest in Fazilnagar at 1,028 and lowest in Khadda at 923. Out of 1,572 inhabited villages in the district there are 14.6 per cent villages (with 10.2 per cent of rural population) are having a sex-ratio below 900. In the urban parts of the district the sex-ratio is 903 and highest of 920 is in Hata NP and lowest of 876 in Khadda NP. The sex-ratio in the age-group 0-6 is 955 in the district. As against the sex-ratio of 956 in the age-group 0-6 of rural population, the highest at 990 is in Dudhahi block and lowest at 925 in Sukrauli C.D. block. It may be noted that out of 1,572 inhabited villages, 21.0. per cent of villages with 23.7 per cent of rural population, the sex-ratio is between 1000-1099. In the 0-6 age-group, sex-ratio in the rural areas is 956 against 920 in urban. Among towns this sex-ratio is highest at 996 in Kaptanganj and lowest at 881 in Hata N.P.

Work Participation Rate:

In the total population of the district as much as 34.2 per cent are workers and rest of 65.8 per cent are non-worker. Among workers 19.9. per cent are main workers and rest of 14.4 per cent are marginal workers. In absolute terms, females outnumber males as main worker and marginal workers as well. The extent of main workers is highest at 21.0 per cent in Padrauna tahsil and lowest at 18.4 per cent in Kasya tahsil. In case of marginal workers the population is highest in Hata tahsil as 15.4 per cent in comparsion to only 13.3 per cent in Kasya tahsil. The extent of workers in rural parts and non-workers in urban parts is higher. In the district among workers, 37.1 per cent are cultivators and 13.9 per cent other workers. Only 28.6 per cent of female workers are engaged as cultivators.

Literacy:

In the district 46.9 per cent population is literate. The literacy is 69.4 per cent in urban areas and 45.8 per cent in rural areas. The male literacy is as high as 63.6 per cent as against 29.6 per cent female literacy, and therefore, the gap in male/female literacy rate is 34.0 per centage points. In rural areas, among 16 CD blocks, the highest literacy is 54.0 per cent in Hata and Pathar Dewa and lowest at 34.1 per cent in Khadda. The literacy among males in rural areas is 62.8 per cent in comparison to 28.3 per cent among females. The lowest female literacy of 18.2 per cent is in Khadda CD block. The gap in male/female literacy rate is highest in Nebua Naurangiya CD Block which is 38.8 percentage points. In 40.9 per cent villages, covering also 36.1 per cent of rural population the literacy is more than 50 per cent. Among urban in the district, as much as 79.4 per cent males are literates as against 58.3 per cent females. The highest urban literacy is 73.6 per cent in. Hata NP and lowest in Kaptanganj at 60.4. per cent. The maximum males literacy is also found in Hata NP at 83.8 per cent and lowest at 71.2 per cent in Kaptanganj. However, the highest females literacy is also in Hata NP. at 62.7 per cent and lowest at 47.5 per cent in Khadda NP. Still, the maximum gap in male-female literacy rate at 26.8 percentage points is found in Ram Kola NP. The literacy among Scheduled Castes is 36.3 per cent in rural areas and 45.9 per cent in urban areas. In case of Scheduled Tribes only 13.7 per cent are literates in rural areas and in urban areas none of literate Scheduled Tribes population is recorded.

(viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36:

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. The main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Sl. No.	Tahsil	Population						Per centage decadal variation 1991-2001			Per centage urban population	
		1991			2001						1991	2001

	District Total	**2,256,334**	**2,147,570**	**108,764**	**2,893,196**	**2,760,673**	**132,523**	**28.2**	**28.5**	**21.8**	**4.8**	**4.6**

The growth rate of the district for total, rural and urban areas and per centage of urban population to total population is given in the table. The decadal growth rate of the district is 28.2 per cent during 1991-2001. The growth rate for rural and urban areas are 28.5 and 21.8 per cent respectively. Out of the total population of the district, 95.4 per cent live in rural areas, while 4.6 per cent live in urban areas of the district. The proportion of urban population has slightly declined during the decade from 4.8 per cent in 1991 to 4.6 per cent in 2001 in the district.

TABLE 2: NUMBER AND PER CENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C D. block	Total number of inhabited villages	Total rural population			Number and per centage of villages	Population less than 200

Table-2 gives C.D. block-wise population, number and per centage of villages falling in each range of population size of villages and number of males and females in each population range in the district. Out of 1,572 inhabited villages, 91 (5.8 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 158 villages having 10.1 per cent villages of the district, while the size class of 500-999 population claims 355 villages with 22.6 per cent of the total villages in the district. 514 villages (32.7 per cent) are in the size class of 1,000-1,999 and 381 villages (24.2. per cent) are in the size class of 2,000-4,999. In the size of 5000-9999 persons there are 64 villages having 4.1 per cent villages of the district while the size of 10,000 and above population claims 9 villages with 0.6 per cent of the total villages in the district. The biggest village in the district having population of 20,009 persons is located in Dudhahi C.D. block.

The table 3 given below shows that During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district.

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Per centage of villages in each population density range	Population	Per centage distribution of population
1	2	3	4	5
0-10	338	21.5	572,577	20.7
11-20	4	0 3	78	0.0
21-50	4	0.3	348	0.0
51-100	10	0.6	1,417	0 1
101-200	15	1.0	6,342	0.2
201-300	20	1.3	14,150	0.5
301-500	85	5.4	69,369	2.5
501 +	1,096	69.7	2,096,392	75.9
Not known	0	0.0	0	0.0
District Total	**1,572**	**100.0**	**2,760,673**	**100.0**

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density.The maximum number of villages i.e. 1,096 accounting for 69.7 per cent of the total inhabited villages of the district fall in the very high density range of 501 and above persons having

75.9 per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 342 villages (21.8 per cent). 85 villages (5.4 per cent) have also high density of 301- 500 persons per sq. km. while the corresponding proportion in the lower range of 201 to 300 has 20 villages, 1.3 per cent of the total inhabited villages having 0.5 per cent population of the district. In the medium densities ranges of 21-50 and 51-100 persons account for 0.3 and 0.6 per cent of inhabited villages respectively. Both these ranges claim 0.1 per cent rural population.

Table- 5 Sex Ratio of State and District1901-2001

Year	UTTAR PRADESH			KUSHINAGAR		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	1,011	1,012	893
1911	916	922	866	995	996	871
1921	908	918	834	966	967	894
1931	903	916	813	944	946	835
1941	907	922	824	968	970	811
1951	908	922	827	975	978	791
1961	907	921	817	969	971	814
1971	876	884	826	931	933	813
1981	882	889	850	955	960	850
1991	876	879	864	940	944	868
2001	898	904	876	963	966	903

NOTE- Sex Ratio has been defined here as the number of females per 1,000 males

Table 5 presents total rural and urban sex ratio for the state and district since 1901 to 2001. As per 2001 Census, sex-ratio of 963 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 931 females per 1000 males were recorded in the district during 1971 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and state.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Padrauna	933	936	900
2	Hata	968	971	904
3	Kasya	990	993	911
4	Tamkuhi Raj	978	981	900
District Total		**963**	**966**	**903**

Table-6 gives sex-ratio for total, rural and urban areas at tahsil level as per 2001 Census. There are 963 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas. The sex-ratio among rural and urban population is 966 and 903 females respectively. The rural sex-ratio in the tahsils varies between 936 in Padrauna tahsil and 993 females in Kasya tahsil. The rural sex-ratio in Hata, Kasya and Tamkuhi Raj tahsils is higher than district rural average (966). In urban areas the highest sex-ratio is recorded in Kasya tahsil (911) and the lowest is in Padrauna and Tamkuhi Raj tahsils (900).

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Khadda	923
2	Nebua Naurangiya	941
3	Vishunpura	925
4	Padrauna	952
5	Kaptanganj	945
6	Ramkola	949
7	Motichak	993
8	Sukrauli	990
9	Hata	996
10	Pathar Dewa	976
11	Desahi Deoria	984
12	Kasya	956
13	Fazilnagar	1,028
14	Tamkuhi Raj	1,011
15	Dudhahi	958
16	Sivrahi	976
	District (Rural) Total	**966**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 966 females per 1,000 males. Among the C.D. blocks the highest sex-ratio of 1,028 females is found in Fazilnagar C.D. block and is followed by Tamkuhi Raj (1011) while the lowest of 923 is recorded in Khadda C.D. block. The sex-ratio of Motichak, Sukrauli, Hata, Pathar Dewa, Desahi Deoria, Fazilnagar, Tamkuhi Raj and Sivrahi C.D. blocks are higher than the district rural average of 966 females and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Per centage of villages in each range	Population 2001	Per centage distribution of population
1	2	3	4	5
Less than 700	13	0.8	914	0.0
700-749	13	0.8	3,085	0.1
750-799	12	0.8	2,789	0.1
800-849	51	3.2	33,044	1.2
850-899	141	9.0	243,300	8.8
900-949	415	26.4	936,158	33.9
950-999	395	25.1	772,663	28.0
1000-1099	416	26.5	663,948	24.1
1100+	116	7.4	104,772	3.8
District Total	**1,572**	**100.0**	**2,760,673**	**100.0**
Sex ratio (Rural) for District		**966**		

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 416 accounting for 26.5 per cent of the total villages having population of 24.1 per cent fall in the sex-ratio range of 1,000-1,099 females per 1,000 males. It is followed by the sex-ratio range of 900-949 which claims 415 villages (26.4 per cent) and 33.9 per cent population. The highest range of 1,100 and above claims 116 villages (7.4 per cent). This range shares 3.8 per cent rural population of the district, while in the sex-ratio range of 950-999, there are 395 villages (25.1 per cent). In remaining sex-ratio ranges of 850-899,800-849, 750-799, 700-749 and less than 700, the number of

villages are 141 (9.0 per cent), 51 (3.2 per cent), 12 (0.8 per cent), 13 (0.8 per cent) and 13 (0.8 per cent) respectively. In these ranges, the per centage of population is comparatively low. The maximum number of villages i.e 1226 having maximum population (86.0 per cent) fall in the higher sex-ratio ranges of 900-1099 females, showing that, in majority of villages the sex-ratio is significantly higher.

TABLE 9: SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Hata	(NP)	920
2	Kaptanganj	(NP)	904
3	Khadda	(NP)	876
4	Kushinagar	(NP)	911
5	Padrauna	(NPP)	908
6	Ramkola	(NP)	890
7	Sivrahi	(NP)	900
Sex ratio (Urban) for the district			**903**

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 903 females per 1,000 males. Among seven towns of the district the sex-ratio varies between 876 to 920. Hata (NP) has the highest sex-ratio of 920, while Khadda (NP) has the lowest sex-ratio of 876 females.

TABLE 10: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Padrauna	Total	188,038	96,354	91,684	952
		Rural	178,111	91,175	86,936	954
		Urban	9,927	5,179	4,748	917
2	Hata	Total	158,216	81,383	76,833	944

		Urban	3,230	1,709	1,521	890
	District Total	**Total**	**586,465**	**299,996**	**286,469**	**955**
		Rural	**564,272**	**288,438**	**275,834**	**956**
		Urban	**22,193**	**11,558**	**10,635**	**920**

Table 10 presents the population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in the group of 0-6 year is 586,465 persons comprising 299,996 males and 286469 females. The total sex-ratio in this age-group works out to 955 females per thousand male in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 956 and 920 females in this age-group respectively. The rural sex-ratio in tahsils

varies between 944 in Hata tahsil and 979 in Tamkuhi Raj tahsil. The sex-ratio of Tamkuhi Raj (T) is higher than district rural average (956). Padrauna (T) has lowest sex-ratio of 933 females among the total population, but claims second highest rank in the sex-ratio of children. In urban areas, the highest sex-ratio is recorded in Hata urban (936) and the lowest is found in Tamkuhi Raj urban (890).

TABLE 11: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Khadda	40,633	20,916	19,717	943
2	Nebua Naurangiya	37,159	18,937	18,222	962
3	Vishunpura	43,784	22,303	21,481	963
4	Padrauna	64,987	33,314	31,673	951
5	Kaptanganj	35,090	17,982	17,108	951
6	Ramkola	39,470	20,152	19,318	959
7	Motichak	32,876	16,889	15,987	947
8	Sukrauli	32,099	16,679	15,420	925

	District (Rural) Total	**564,272**	**288,438**	**275,834**	**956**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group of 0-6 years in the district. The sex-ratio is 956 for the district (rural) and at C.D. block level it varies between 925 to 990. It is highest in Dudhahi C.D. block i.e. 990 followed by 986 in Desahi Deoria C.D. block and lowest 925 is found in Sukrauli C.D. block. The sex-ratio of Nebua Naurangiya,Vishunpura, Ramkola, Pathar Dewa, Desahi Deoria, Tamkuhi Raj, Dudhahi and Sivrahi C.D. blocks are higher than the district rural (956) while in remaining blocks, it is below the average of district figure.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Per centage distribution of villages	Population 2001	Per centage distribution of population
1	2	3	4	5
Less than 700	68	4.3	5,436	1.0
700-749	37	2.4	5,689	1.0
750-799	75	4.8	16,417	2.9
800-849	121	7.7	39,829	7.1
850-899	196	12.5	75,809	13.4
900-949	258	16.4	119,212	21.1
950-999	240	15.3	121,577	21.5
1000-1099	330	21.0	133,478	23.7
1100+	247	15.7	46,825	8.3
District (Rural) Total	**1,572**	**100.0**	**564,272**	**100.0**

Sex ratio (Rural) for District in age (0-6) year 956

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as per centage of villages, total population and per centage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 330 (21.0 per cent) having highest population (23.7 per cent) in the district (rural) fall in the sex-ratio range of 1,000-1,099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 900-949 which claims 258 villages (16.4 per cent) with 21.1 per cent population. Next to it, 247 villages (15.7 per cent) are in the range of 1,100 and above with 8.3 per cent population. 240 villages (15.3 per cent) having 21.5 per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of 700-749, 750-799, 800-849, 850-899 and less than 700 claim less number of villages and these are distributed as 37 (2.4 per cent), 75 (4.8 per cent), 121 (7.7 per cent), 196 (12.5 per cent) and 68 (4.3 per cent) respectively. In these ranges, the per centage of population is also low. It becomes clear from the table that 1,075 villages having 74.6 per cent population fall in the higher sex-ratio ranges of 900- 949 and above ranges.

TABLE13: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Hata	(NP)	2,016	1,072	944	881
2	Kaptanganj	(NP)	1,986	995	991	996
3	Khadda	(NP)	2,483	1,274	1,209	949
4	Kushinagar	(NP)	2,913	1,508	1,405	932
5	Padrauna	(NPP)	7,444	3,905	3,539	906
6	Ramkola	(NP)	2,121	1,095	1,026	937
7	Sivrahi	(NP)	3,230	1,709	1,521	890
District(Urban) Total			**22,193**	**11,558**	**10,635**	**920**

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns. In urban areas of the district total population in the age group of 0-6 is 22,193 of which 11,558 are males and 10,635 females and sex ratio of the urban areas of the district is 920. Among the towns sex ratio varies between 881 in Hata NP to 996 in Kaptanganj NP, Ramkola NPP, Kaptanganj NP and Kushinagar NP, the sex ratio is more than the district average. Among seven towns Padrauna town has highest population of 0-6 yrs children.

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their per centages to total population at tahsil level in rural and urban areas of the district. Of the total 2,893,196 population, 18.1 per cent belongs to Scheduled Castes, whereas proportion of Scheduled Tribes population is negligible. The per centage of Scheduled Castes population constitutes 18.5 per cent in rural population and 9.9 per cent in urban population.

TABLE 14: NUMBER AND PER CENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Per centage of Scheduled Castes population to total population	Per centage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Padrauna	Total	900,215	162,527	169	18.1	0
		Rural	841,578	157,711	163	18.7	0
		Urban	58,637	4,816	6	8.2	0
2	Hata	Total	810,762	158,996	80	19.6	0
		Rural	774,684	153,650	80	19.8	0
		Urban	36,078	5,346	0	14.8	0
3	Kasya	Total	507,499	82,145	53	16.2	0
		Rural	489,516	80,515	53	16.4	0
		Urban	17,983	1,630	0	9.1	0
4	Tamkuhi Raj	Total	674,720	120,481	117	17.9	0
		Rural	654,895	119,217	117	18.2	0
		Urban	19,825	1,264	0	6.4	0
District Total		Total	2,893,196	524,149	419	18.1	0
		Rural	2,760,673	511,093	413	18.5	0
		Urban	132,523	13,056	6	9.9	0

The highest per centage of total Scheduled Castes population is recorded in Hata tahsil 19.6 while the lowest is found in Kasya tahsil 16.2. The proportion of Scheduled Tribes population is negligible in both the rural and urban areas and they are mainly concentrated in tahsil Padrauna 169 persons and followed by Tamkuhi Raj 117 persosns. The lowest population of Scheduled Tribe is recorded in Kasya tahsil 53 preceded by Hata tahsil with 80.

TABLE 15: NUMBER AND PER CENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Per centage of Scheduled Castes population to total population	Per centage of Scheduled Tribes population to total population

	District (Rural) Total:	2,760,673	511,093	413	18.5	0

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. Only 18.5 per cent of rural population belongs to Scheduled

Castes, whereas proportion of Scheduled Tribes population is negligible. At C.D block level. Scheduled Caste population varies between 14.5 per cent in Desahi Deoria and 21.7 per cent in Dudhahi C.D. block. The other C.D. blocks containing the higher per centage of Scheduled Castes are Ramkola (21.5), Sukrauli (21.1) and Khadda (20.7). The highest Scheduled Tribes population is counted in Khadda C.D. block (108) and is followed by Hata and Sivrahi C.D. blocks (75). The lowest Scheduled Tribes population is recorded in Sukrauli (5) preceded by Nebua Naurangiya C.D. block (22 persons).

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Per centage range of Scheduled Castes population to total population	Number of villages	Per centage	Scheduled Castes Population	Per centage
1	2	3	4	5
Nil	90	5.7	0	0.0
Less than 5	112	7.1	3,707	0.7

51-75	34	2.2	15,403	3.0
76 and above	16	1.0	1,961	0.4
District Total	**1,572**	**100.0**	**511,093**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of per centage at district level. 90 villages accounting for 5.7 per cent of total 1,572 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5 per cent in 112 villages (7.1 per cent). In 253 villages (16.1 per cent) it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 531 villages constituting 33.8 per cent of the total villages. The ranges 21-30 and 31-40 per cent contain 333 and 152 villages respectively. Both these ranges together account for 30.9 per cent villages of the district. 101 villages fall in the range of 41-50 and above percentage whereas 16 villages fall in the category where the proportion of Scheduled Castes is more than 76.0 per cent. These villages contain only 0.4 per cent Scheduled Castes population of the district. The maximum 35.2 per cent of the Scheduled Castes population is covered by range of 11-20 per cent.

TABLE 17: PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Per centage range of Scheduled Tribes population to total population	Number of villages	Per centage	Scheduled Tribes Population	Per centage
1	2	3	4	5
Nil	1,556	99.0	0	0.0
Less than 5	14	0.9	337	81.6

76 and above	0	0.0	0	0.0
District Total	**1,572**	**100.0**	**413**	**100.0**

Table 17 indicates the distribution of villages by per centage ranges of Scheduled Tribes population to total population in the district. Negligible percentage in rural population of the district belongs to Scheduled Tribes population. There are 1,556 (99.0 per cent) villages where no Scheduled Tribes have been recorded in the district while only 16 (1.0 per cent) villages have the proportion of Scheduled Tribes population in the range up to 10 per cent.

TABLE 18: NUMBER AND PER CENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

District(Urban) Total		**132,523**	**13,056**	**6**	**9.9**	**0**

Table 18 shows the number and per centage of Scheduled Caste and Scheduled Tribes population recorded during 2001 Census in the district. 9.9 per cent of urban population belongs to Scheduled Castes and negligible per cent to Scheduled Tribe in the district (urban). Scheduled Castes population is highest 26.4 per cent in Ramkola NP and lowest 6.4 per cent in Sivrahi NP. Scheduled Tribe population is negiligible, only 6 Scheduled Tribes population has been recorded in Khadda NP and in remaining towns Scheduled Tribes population is nil.

TABLE 19: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

15	Dudhahi	963	1,100
16	Sivrahi	988	1,679
	District (Rural) Total	**970**	**1,107**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 970 for district (rural). Among C.D.blocks, the highest sex ratio of 1,077 is found in Desahi Deoria C.D. block and lowest of 937 is recorded in Khadda C.D. block. The sex ratio in seven C.D. blocks is above the parity line while in remaining nine C.D. blocks it is below the line of equality. In case of Scheduled Tribes the sex ratio of district (rural) is 1,107, whereas the highest is recorded in Sivrahi C.D block (1,679) and the lowest (667) is in Sukrauli C.D. block.

TABLE 20: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Hata (NP)	950	0
2	Kaptanganj (NP)	873	0
3	Khadda (NP)	897	1,000
4	Kushinagar (NP)	900	0
5	Padrauna (NPP)	906	0
6	Ramkola (NP)	920	0
7	Sivarhi	948	0
	Sex ratio (Urban) for the district	**913**	**1,000**

Table 20 shows sex-ratio among Scheduled Castes and Scheduled Tribes in urban agglomerations/towns at 2001 census. Among 7 towns, sex ratio of Scheduled Castes is highest (950) in Hata town and it is lowest (873) in Kaptanganj town. In case of Scheduled Tribes, only six persons are recorded in Khadda NP with sex-ratio of 1000. In other remaining six towns Scheduled Tribes population is nil. In urban areas of the district the sex ratio of Scheduled Castes and Scheduled Tribes are 913 and 1000 respectively.

TABLE 21: NUMBER AND PER CENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Sl. N0	Name of Tahsil	Total / Rural / Urban	Number of literates and illiterates						Per centage of literates			Gap in male-female literacy rate

District and tahsil-wise literacy rate besides the number of literates and illiterates for total, rural and urban areas are given in table-21 . The literacy rate is worked out by

excluding population of 0- 6 years. As per 2001 Census, the proportion of literates to total population comes to 46.9 per cent in the district. This proportion in rural areas is 45.8 per cent against 69.4 per cent in urban areas. In the district , literacy rate of males (63.6 per cent) is much higher than that of females (29.6 per cent). Among the tahsils, Kasya tahsil tops with 53.1 per cent literates followed by Hata tahsil (49.9 per cent). Tamkuhiraj tahsil with 42.3 per cent literates stands at the bottom in the district. Out of 4 tahsils, the literacy rate of Hata and Kasya tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 34.0 percentage points in the district, as whole. The trend at tahsil level is not much different. However, this gap in urban literacy id low which comes to 21.1 percentage points against the rural areas, where the gap between rural male and female literacy is 34.5 percentage points.

TABLE 22 : NUMBER AND PER CENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

District (Rural) Total:		**1,006,217**	**700,845**	**305,372**	**1,754,456**	**703,142**	**1,051,314**	**45.8**	**62.8**	**28.3**	**34.5**

Table 22 reveals number of literates, illiterates and the literacy rate in rural areas at C.D. block level in the district. 45.8 per cent of the total rural population (excluding the age-group of 0-6 years) literate in the district. The corresponding proportion of male and female literates come to 62.8 and 28.3 per cent respectively, which shows very wide gap of 34.5 per centage points in male and female literacy. At C.D. block level, Hata and Pathar Dewa C.D. blocks have the highest rural literacy rate of 54.0 per cent, while 72.2 per cent males and 36.0 per cent females in Hata and 72.6 per cent males and 35.0 per cent females in Pathar Dewa are literates. The lowest literacy rate in rural areas is noted in Khadda C.D. block (34.1 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 38.8 percentage points is found in Nebua Naurangiya C.D. block.

TABLE 23: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Per centage distribution of villages	Population	Per centage distribution of population
1	2	3	4	5
0	3	0.2	4	0.0
1-10	12	0.8	6,549	0.2
11-20	44	2.8	40,162	1.5
21-30	116	7.4	202,607	7.3
31-40	273	17.4	572,220	20.7
41-50	482	30.7	943,357	34.2
51-60	461	29.3	797,228	28.9
61-70	157	10.0	183,867	6.7
71-80	20	1.3	14,644	0.5
81-90	1	0.1	14	0.0
91-99	1	0.1	19	0.0
100	2	0.1	2	0.0
District Total:	**1,572**	**100.0**	**2,760,673**	**100.0**
Literacy rate for District:		**46.9**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 3 villages (0.2 per cent) of the district and population of these villages is only 4. Only 2 villages (0.1 per cent) have all the literate population. 461 villages accounting for 29.3 per cent of the total villages are in the literacy range of 51-60 per cent and 157 villages (10.0 per cent) fall in the literacy range of 61-70 per cent. The lowest literacy rate range of 1 to 50 per cent observed in 927 villages (59.1 per cent) of the district. The higher literacy ranges of 71 to 100 covers only 24 villages (1.6 per cent). The range of 31-60 has the maximum number of 1,216 villages forming 77.4 per cent of the total inhabited villages.

TABLE 24: NUMBER AND PER CENTAGE OF LITERATES ANDILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Per centage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

7	Sivarhi (NP)	12,039	7,226	4,813	7,786	3,210	4,576	72.5	82.8	61.2	21.6
District (Urban) Total		**76,562**	**46,108**	**30,454**	**55,961**	**23,542**	**32,419**	**68.8**	**79.4**	**58.3**	**21.1**

Table 24 shows number and per centage of literates and illiterates by sex during 2001 in urban areas of the district. Regarding absolute figures of literates Padrauna NP town is way ahead of other towns. Above table reveals that literacy rate is very high in urban areas of the district (69.4 per cent). The literacy rate is high (above 82. per cent) in Hata and Sevarhi among males. Female literacy rate is not far behind in Padrauna Hata, Sivarhi and Kushinagar towns. However, literacy rate among females is very low (48.2 per cent) in Kaptanganj NP. thus the gap in male female literacy rate is also high (23 percentage points).

TABLE 25: NUMBER AND PER CENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Table 25 shows number and per centage of Scheduled Caste literates and illiterates by sex in C.D. blocks 2001. In rural areas of the district proportion of literates is 36.3 per cent in which 52.6 per cent are males and 19.5 per cent females. Thus, the gap in male and female literacy rates is 33.1 percentage points. Among 16 C.D. blocks, Pathar Dewa C.D. block has the highest literacy rate and Khadda C.D. block has the lowest literacy rate. The gap in male/female literacy rate in Pathar Dewa C.D. block is highest and this gap is lowest in Khadda C.D. block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Per centage distribution of villages	Scheduled Castes Population	Per centage distribution of population

District Total:	**1,482**	**100.0**	**511,093**	**100.0**

Literacy rate for District (Rural): 36.3

Table 26 presents the distribution of villages by literacy rate range for Scheduled Caste population during 2001 Census. Maximum number of villages (405) are in literacy rate range of 41-50 with population of 126,468. In contrast to this, lowest number of only two villages (0.1 per cent) is in the literacy rate of 100 per cent with 15 population. There are 18 villages (1.2 per cent) in which all Scheduled Castes are illitrate. It is observed that in the literacy rate ranges from 21 to 60, there are 1,257 villages (84.8 per cent) covering 88.6 per cent of the population.

TABLE 27: NUMBER AND PER CENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Per centage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Hata (NP)	530	338	192	494	187	307	63.5	78.4	47.6	30.8
2	Kaptanganj (NP)	265	184	81	544	248	296	39.4	50 4	26 4	24.0
3	Kushinagar (NP)	701	452	249	929	406	523	52 0	64 3	38.5	25.8
4	Khadda (NP)	451	300	151	854	388	466	43.2	53.7	31.1	22.6

7	Sivarhi (NP)	344	254	90	920	395	525	33.5	47.8	18.1	29.7
District (Urban) Total		**4,874**	**3,303**	**1,571**	**8,182**	**3,521**	**4,661**	**45.9**	**59.3**	**31.1**	**28.3**

Table 27 shows out the number and per centage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. The number of illiterates is more than literates in the district (urban) in all the towns except Hata (NP). The per centage of literates is least in Siwrahi among all towns, but the gap in male/female literacy rate is highest in case of Ramkola town and least in Khadda town. The males in all the towns enjoy higher literacy rate than females.

TABLE 28: NUMBER AND PER CENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Table 28 brings out the number and per centage of Scheduled Tribes literates and illiterates by sex in C.D. Blocks at the 2001 Census. The number of illiterates is much more than literates in the district and C.D. Blocks, with exception to Sukrauli C.D. Block.The literacy rate of the Scheduled Tribes population is about 13.7 per cent, is lower than the corresponding rate of 45.9 per cent in case of Scheduled Castes community. The gap in male and female literacy rates is 17.1 per cent is less than the Scheduled Castes (33.1 per cent) in

rural areas. The literacy rate is highest in Sukrauli C.D. Block and lowest in Sivrahi C.D. Block. The gap in male/female literacy rate in Nebua Naurangiya C.D. Block is in favour of females, which is an exception. Being very small population of Scheduled Tribes in rural areas of the district, the population of females is nil in Sukrauli, Hata and Sivrahi C.D. blocks.

TABLE 29: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Per centage distribution of villages	Scheduled Tribes Population	Per centage distribution of population
1	2	3	4	5
0	5	31.3	121	29.3

District Total	16	100.0	413	100.0
Literacy rate for District (Rural)		13.7		

Table 29 gives the distribution of villages by literacy rate range for the Scheduled Tribes population at the 2001 Census. In the district, Scheduled Tribes population is found in 16 villages out of which in one village it is in the literacy range of 100 per cent. However, the maximum (30.3 per cent) of the Scheduled Tribes population is found in only 3 villages with literacy range from one to 10 per cent.

TABLE 30: NUMBER AND PER CENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Per centage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District (Urban) Total		0	0	0	6	3	3	0	0	0	0

Table 30 gives number and per centage of Scheduled Tribe literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. There is a small Scheduled Tribes population in Khadda town of the district, whereas other 6 towns have no Scheduled Tribes population. Total Scheduled Tribes population is only six persons recorded in Khadda town and they are all illiterates.

Table 31 gives the number and per centage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of total workers are worked out as 34.2 per cent of total population. The total workers are comprised of 19.9 per cent as main workers and 14.4 per cent as marginal workers and the remaining 65.8 per cent of non-workers.

Among the main workers, male participation rate in the district is 32.5 per cent and 6.7 per cent of females. Male and female marginal workers account for 13.0 and 15.8 per cent respectively. The per centage of female marginal workers is higher than males.Total workers (main and marginal) among tahsils varies from 31.6 per cent in Kasya tahsil to 35.8 per cent in Padrauna tahsil.

Table 32 shows C.D. block-wise number and per centage of main workers, marginal workers, and non-workers for rural population of the district. Of the 2,760,673 total rural population. 19.8 per cent has been categorised as main workers and the marginal workers constitute 14.8 per cent and the remaining 65.3 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 32.3 per cent males and 6.9 per cent females are in the category of main workers. Male and female marginal workers account for 13.3 and 16.4 per cent respectively. The per centage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The per centage of total rural workers of the district comes to 34.7 per cent. At the C.D. block level, Nebua Naurangiya has highest proportion of total workers forming 40.8 per cent of the total population. It is closely followed by Sukrauli (38.5 per cent), Khadda (37.9 per cent), Desahi Deoria (37.0 per cent), Vishunpura (36.4 per cent) and Ramkola (36.0 per cent). The lowest per centage of 28.9 per cent is recorded in Tamkuhi Raj C.D. block.

Table 33 gives number and percentage of main workers, marginal workers and non-workers by sex in urban area of the district at the 2001 Census. The proportion of total workers was worked out as 24.9 per cent of the total population of the district. The total workers are comprise of 20.8 per cent of main workers and 4.2 per cent of marginal workers and the remaining 75.1 per cent are non-workers.

Among the main workers, male participation rate in the district is 36.7 per cent whereas female participation rate is only 3.2 per cent. Male and female marginal workers account for 5.9 and 2.3 per cent respectively. Total workers (main and marginal) among towns varies from 22.4 per cent in Kushinagar (NP) to 27.8 per cent in Khadda (NP).

Note. Per centage of Workers to total workers are given in bracket

It can be seen from the table 34 that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 37.1 per cent of the total workers (main + marginal) and remaining 45.4 per cent of total workers are engaged as agricultural labourers. Household industry workers are 3.6 per cent and the other workers are 13.9 per cent in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependencey of population on agriculture sector absorbing a large number of workers. The proportion of cultivators varies between 33.9 per cent in Padrauna and Tamkuhi Raj tahsil and 43.2 per cent in Kasya tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 28.6 per cent which is very low as compared to 41.2 per cent of male cultivators in the district. The percentage of household industry workers and other workers is also very low in the district as stated above. The workers in other activities occupy the second position next to the workers engaged in agriculture sector in the district as well as in each tahsil. The highest proportion of 15.8 per cent of other workers is recorded in Kasya tahsil, while the lowest proportion of 13.2 per cent is found in Hata tahsil.

Note. Per centage of Worker to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district, proportion of total workers (main+marginal) is 34.7 per cent of total population. Among these workers, cultivators constitute 38.1 per cent, 46.6 per cent agricultural labourers, 3.4 per cent household industry workers and 11.9 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries could not make much progress in rural areas as reflected in the data and these household industries employ only 3.4 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of females (28.8 per cent) is lower than males (42.7 per cent) in the rural areas. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 30.8 per cent in Siwrahi C.D. block to 60.3 per cent in Desahi Deoria C.D. block. Similarly for other workers, the lowest proportion is 6.9 per cent in Nebua Naurangiya C.D. block while 17.3 per cent is the highest in Padrauna C.D. block. The percentage of household industry workers is quite low i.e. only 3.4 per cent in the district. The percentage of agricultural labourers is highest in Sivrahi block (54.0) and is followed by Khadda (52.4). Similarly, household industry worker varies in C.D. blocks between 2.6 per cent in Desahi Deoria and 4.0 per cent in Tamkuhi Raj C.D. block.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest per centage of other workers (71.4 per cent), followed by agricultural labourers with 12.2 per cent (10.2 per cent males and 29.2 per cent females). If we observe each town, the table reveals that highest per centage of agricultural labourers (24.4) is recorded in Ramkola. In the cultivators category, Padrauna (NPP) recorded very low per centage (4.0). Household industry workers are also very low 3.3 per cent in Ramkola, 7.3 per cent in Siwrahi and 7.4 per cent in Kushinagar. As the usual trend recorded in the urban areas, other workers are in high per centage of 78.9 in Kushinagar, 78.8 in Padrauna and 72.7 per cent in Siwrahi.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset table 37 to 47.

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37: DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : - Per centages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities such as educational, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1,572 inhabited villages in the district 1,245 villages or 79.2 per cent have educational facilities of one type or the other. Similarly, 418 villages in the district constituting 26.6 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1,554 or 98.9 per cent villages. As regards, post office facility which includes facilities like telegraph office and post and telegraph, 191 villages constituting 12.2 per cent of villages have been provided with post office facility within the

village. 236 or 15.0 per cent villages have been provided with the telephone facility, 215 or 13.7 per cent with transport facility, 96 or 6.1 per cent villages with bank facility and 160 or 10.2 per cent with agricultural credit societies. Similarly, there are 923 or 58.7 per cent villages which have been linked with pucca road. Total 1,055 or 67.1 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Desahi Deoria C.D. block has the highest 100.0 per cent villages where educational facility is available and lowest 65.8 per cent is found in Tamkuhi Raj. Medical facility is highest in Desahi Deoria (50.0 per cent) and lowest (16.7 per cent) in Pathar Dewa C.D. block. Improved drinking water is available to cent-per cent villages in Kaptanganj, Ramkola, Motichak, Sukrauli, Pathar Dewa, Desahi Deoria and Kasya blocks, while in other blocks, it is above 96.0 per cent. Telephone facility is highest in Ramkola (29.4 per cent), while not a single village of Pathar Dewa and Desahi Deoria C.D. blocks enjoys this facility. Transport and communications is less developed in Hata where only 4.5 per cent villages are covered by this facility whereas 22.0 per cent villages of Motichak C.D. block are availing this facility. In the field of power supply 1,055 (67.1 per cent) villages have been covered in the district.

TABLE 38: NUMBER AND PER CENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 depicts the number and proportion of rural population served by different types of amenities. Out of total rural population of 2,760,673 persons in the district, 2,536,994 or 91.9 per cent have educational facility of one or the other type. Similarly 1,179,636 or 42.7 per cent population has medical facilities while 2,748,517 or 99.6 per cent has improved drinking water facility. Post office facilities are available to 766,272 or 27.8 per cent population. Telephone facility is available to 618,083 or 22.4 per cent. Transport communications facility is available to 551,753 or 20.0 per cent. Bank facility is available to 368,419 or 13.3 per cent. 496,251 or 18.0 per cent have been provided with the facility of agricultural credit societies. 1,901,472 or 68.9 per cent have been provided with the facility of approach by pucca road. Power supply is available to 2,080,985 or 75.4 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However, in Ramkola and Desahi Deoria C.D. blocks facilities of educational, medical and improved drinking water are available to major proportion of population.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 Km.	5-10 Km.	10+Km.	Total (Col. 2 - 4)
1	2	3	4	5
1. Education				
(a) Primary School	319	14	1	334
(b) Middle School	888	383	23	1,294
(c) Degree College	322	498	726	1,546
2. Medical				
(a) Hospital	493	691	344	1,528
(b) PHC	412	821	305	1,538
3. Post Office	1,099	258	24	1,381
4. Telephone	673	447	216	1,336
5. Bus Service	626	625	201	1,452
6. Banks				
(a) Commercial Bank	889	475	125	1,489
(b) Cooperative Bank	551	801	175	1,527
7. Agricultural Credit Societies	1,098	280	34	1,412

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according distance ranges in this table. 334 villages do not have primary school in their villages and out of these villages, children of 319 villages have to travel less than 5 kms. 14 at a distance of 5-10 Kms, and the remaining one at a destance of 10+ Kms.for schooling. Out of 1,572 inhabited villages as many as 1,294 are deprived of middle school and 1,546 of degree college. Of these, 888 avail the facility of middle school at a distance of less than 5 kms., 383 at a distance 5-10 kms. and the remaining 23 at a distance of 10+ kms. In respect of degree college, 322 avail this facility at a distance of less than 5 kms., 498 between 5 to 10 kms. and rest 726 villages at a distance of 10+ kms.

Similarly there are 1,528 villages in the district which have been devoid of hospital facility and 1538 villages of PHC facilities. Of these, 493 villages have the facility of hospital available within 5 kms, while in respect of 691 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly, overwhelming number i.e. 344 villages have this facility at a distance of 10+ kms. As regards PHC 412 villages avail this

facility at a distance of less than 5 kms., 821 at a distance of 5-10 kms. and the remaining 305 have to travel a distance of more than 10 kms. Regarding Post Office, 1,381 villages do not have this facility in the village itself. Of these the majority (1,099) have this facility at a distance of less than 5 kms, another 258 villages avail it at a distance of 5-10 kms. In the remaining 24 villages inhabitants have to travel a distance of 10+ kms.

Regarding Telephones, there are 1,336 villages in the district which are without telephone facilitiy. Of these 673 avail this facility at a distance of less than 5 kms, 447 at a distance of 5-10 kms. and remaining 216 have to travel a distance of 10+ kms.

Out of 1,452 villages which do not have the facility of bus services, 626 villages avail this facility at a distance of less than 5 kms., 625 at a distance between 5-10 kms. and 201 at a distance of 10+ kms.

In the entire district 1,489 villages are deprived of Commercial Banks and 1,527 of Co-operative Banks. Of these 1,489 villages, which are deprived of Commercial Banks, 889 villages avail this facility at a distance of less than 5 kms., 475 between 5-10 kms. and the remaining 125 at a distance of 10+ kms. Regarding Co-operative Banks, out of 1,527 villages, 551 villages avail this facility at a distance of less than 5 kms., 801 at a distance of 5-10 kms. and remaining 175 at a distance of 10+ kms. 1,412 villages do not have Agricultural Credit Societies. This facility to 1,098 villages is available at a distance of less than 5 kms., 280 at a distance of 5-10 kms., and the remaining 34 at a distance of 10+ kms.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1,572 inhabited villages in the district, there are 349 villages which have nearest towns upto a distance of less than 5 kms. Of these, only 271 villages forming 77.7 per cent are having the educational facilities of one type or the other and 86 villages constituting 24.6 per cent have the medical facilities within the village, 33 villages forming 9.5 per cent have the facility of post office within the village and 68 or 19.5 per cent have the facility of telephone. 45 villages constituting 12.9 per cent have been linked by transport service. 22 villages comprising 6.3 per cent have been provided bank facilities, while 31 villages constituting only 8.9 per cent have been provided by Agricultural Credit Societies. 241 villages comprising 69.1 per cent have been provided with pucca road.

There are 987 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 800 villages constituting 81.1 per cent have been provided with the educational facilities. 280 villages comprising 28.4 per cent have been provided with medical facilities. 127 villages constituting 12.9 per cent enjoy the post office facility. 143 villages comprising 14.5 per cent have been provided the telephone facility. 132 villages constituting 13.4 per cent have been linked with transport communications. 58 villages comprising 5.9 per cent have bank facility. 108 villages constituting 10.9 per cent are having Agricultural Credit Societies, while 552 villages or 55.9 per cent are approachable by pucca road. 211 villages fall in the distance range of 16-50 kms. Of these, 75.8 per cent villages have educational facility, 21.8 per cent with medical, 12.3 per cent with post office, 8.5 per cent with telephone and transport and communications available to 14.7 per cent villages. Banks, Agricultural Credit Societies and approach by pucca road facilities are available to 6.2 per cent, 9.0 per cent and 54.5 per cnt of villages respectively.

There is no village in the district which is situated beyond 50 kms.from the nearest town. Further 25 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 14 villages constituting 56.0 per cent have been provided with the educational facilities. 6 villages comprising 24.0 per cent have been provided with medical facilities. 5 villages constituting 20.0 per cent enjoy the post office facility. 7 villages comprising 28.0 per cent have been provided the telephone facility and linked by transport service. 3 villages comprising 12.0 per cent have been provided bank facilities, while 2 villages constituting only 8.0 per cent have been provided the facility of Agricultural Credit Societies. 15 villages comprising 60.0 per cent have been provided with pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district, out of 1,572 inhabited villages there are 249 villages have a population of less than 500 persons. Of these, 83 villages (33.3 per cent) have educational facility, 16 (6.4 per cent) have medical facility, 238 (95.6 per cent) with improved drinking water facility. 5 (2.0 per cent) with telephone facility, 20 (8.0 per cent) linked by bus service and 2 (0.8 per cent) with Bank facility. 101 villages (40.6 per cent) have been linked with pucca road and 112 villages (45.0 per cent) have been provided with electricity. There is no village in this population range, which has post office and Agricultural Credit Society.

Out of 355 villages, which fall in the population range of 500-999 persons, 260 villages (73.2 per cent) have been provided with the educational facility, 60 (16.9 per cent) with medical facility, all the villages except one village have improved drinking water facility. 11 villages (3.1 per cent) have been provided with post office facilities, 23 villages (6.5 per cent) with telephone facility, 24 villages (6.8 per cent) with transport facilities, 3 villages (0.8 per cent) with bank facility, 17 villages (4.8 per cent) with Agricultural Credit Societies. 177 villages (49.9 per cent) have approach by pucca road and 209 villages (58.9 per cent) have electricity.

514 villages fall in the population range of 1,000-1,999 persons. 459 villges (89.3 per cent) have educational facility, whereas 121 villages (23.5 per cent) enjoy the medical facility, 44 villages (8.6 per cent) with post office facility, 82 villages (16.0 per cent) with telephone facility and 69 villages (13.4 per cent) have transport communications facilities. 20 villages (3.9 per cent) have bank facilities, 49 villages (9.5 per cent) with Agricultural Credit Societies and 308 villages (59.9 per cent) have approach by pucca road. 509 villages (99.0 per cent) enjoy improved drinking water facility and 381 villages (74.1 per cent) have been provided with electricity.

There are 381 villages in the district, which are covered under 2,000-4,999 population range. Out of these, 373 (97.9 per cent) have been provided with the educational facility. 165 villages (43.3 per cent) with medical facility and 380 villages (99.7 per cent) have improved drinking water facility. 86 villages (22.6 per cent) have post office facility, 100 villages (26.2 per cent) with telephone facility and 81 villages (21.3 per cent) have transport communication facility. 43 villages (11.3 per cent) have bank facility, 72 villages (18.9 per cent) with Agricultural Credit Societies and 277 villages (72.7 per cent) have approach by pucca road whereas 291 villages (76.4 per cent) have power supply.

Out of 64 villages, which are in the population range of 5000-9999 persons, 61 villages (95.3 per cent) have educational facility. 49 villages (76.6 per cent) with medical facility and all the villages have improved drinking water facility. 41 villages (64.1 per cent) have post office facility. 23 villages (35.9 per cent) with telephone facility, 18 villages (28.1 per cent) with transport and communications facilities whereas, 26 villages (40.6 per cent) have bank facilities, 18 villages (28.1 per cent) with Agricultural Credit Societies, 52 villages (81.3 per cent) linked with pucca road and 56 villages (87.5 per cent) have been provided with power supply.

There are only 9 villages in the population range of 10,000 and above persons. All the 9 villges have educational, improved drinking water and post office facilities, while seven villages have medical, three each telephone and transport, four Agricultural Credit Society, eight linked by pucca road and six villages have power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Per centage of cultivable area to total area	Per centage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Khadda	117	20,349.6	72.2	64.5
2	Nebua Naurangiya	112	5,206.2	31 2	85.1
3	Vishunpura	134	20,013 9	91.9	67 0

7	Motichak	82	8,008 7	90.5	88.5
8	Sukrauli	104	15,371.9	78 4	89 9
9	Hata	110	14,777.5	53.8	92.1
10	Pathar Dewa	12	2,097 9	61 6	80.7
11	Desahi Deoria	2	0.0	0 0	0.0
12	Kasya	60	7,046.5	16 8	77.5
13	Fazilnagar	123	12,924.7	56.9	93 3
14	Tamkuhi Raj	158	16,124 0	86.6	82.9
15	Dudhahi	91	17,531.0	NA	NA
16	Sivrahi	128	25,235.3	52.0	84 1
	District Total	**1,572**	**219,848.1**	**78.4**	**75.4**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available to inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates is the extent of cultivable area under irrigation. There are total 1,572 inhabited villages in t district having a total area of 219848.1 hectares. Of this, 78.4 per cent is cultivable and 75.4 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

The land use pattern at C.D. block level shows that the per centage of cultivable area to total area is highest (99.5 per cent) in Kaptanganj C.D block and is lowest (16.8 per cent) in Kasya C.D block. Similarly, the per centage of irrigated area to total cultivable area is highest (93.3 per cent) in Fazilnagar C.D block and is lowest (64.5 per cent) in Khadda C.D block.

TABLE 43: PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt				Per capita expenditure				
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)

District Total		**228**	**11**	**217**	**185**	**77**	**21**	**50**	**0**	**37**

Table 43 gives per capita receipt and expenditure (in thousand rupees) for each town in the district. The average per capita receipt for towns of the district was Rs288 of which Rs

11 are derived through local taxes and the remaining Rs 217 received from all other sources. The average of total expenditure incurred per head is Rs185.Out of this Rs77 is spent on general administration, Rs21 on public health and conveniences, Rs50 on public works, no expenditure on public institutions and Rs37 is spent on other items. Among all the seven towns the receipt and expenditure recorded per head is the highest in Padrauna (NPP).

TABLE 44: SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Hata (NP)	1 8	1.8	0 9	0 9	0 0
2	Kaptanganj (NP)	1.7	2 6	1.7	1 7	0 0
3	Khadda (NP)	0.7	0.7	0 7	2.1	0 0
4	Kushinagar (NP)	4.4	3 3	0.6	0.6	0.6
5	Padrauna (NPP)	1 8	1.4	0.9	0.7	1.1
6	Ramkola (NP)	3.8	0 8	0.8	0.8	0.0
7	Sivarhi (NP)	6.1	0.5	0.5	1.5	0 0
	District Total	**2.9**	**1.5**	**0.8**	**1.1**	**0.1**

Table 44 shows schools/colleges per 10,000 population in urban areas of the district. The average number of educational institutions per 10,000 population, which comes 2.9 primary schools, 1.5 junior secondary/middle, 0.8 secondary/matriculation, 1.1 senior secondary schools and the ratio of colleges is only 0.1 colleges. Among the towns, the ratio of primary and junior secondary/ Middle is highest in Sivarhi NP and Kushinagar NP respectively and Kaptanganj (NP) has highest ratio of secondary/ matriculation schools, while in case of senior secondary school this position is claimed by Khadda (NP) 2.1. College education is available only in Kushinagar (NP) and Padrauna (NPP).

TABLE 45: NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Hata (NP)	28
2	Kaptanganj (NP)	30
3	Khadda (NP)	0
4	Kushinagar (NP)	89
5	Padrauna (NPP)	43
6	Ramkola (NP)	3
7	Sivarhi (NP)	0
	Distrct	**32**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of the district. On an average there are 32 beds per 10,000 population available in urban areas. Whereas, it is the highest 89 in Kushinagar Nagar (NP) while lowest number of 3 beds is recorded in Ramkola (NP). In town Khadda (NP) and Sevarhi (NP) the facility of beds is not available.

TABLE 46: PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Sl NO	Nameof Town	Total population	Slum population	Percentageofslum population to total population
1	2	3	4	5
Not Available				

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Hata (NP)	Plastic Goods	Wheat
		Rice	Rice
		Butter	Sugar Cane
2	Kaptanganj (NP)	Sugar	Wheat
		Rice	Rice
		Furniture	Sugar
3	Khadda (NP)	Sugar	Sugar
		Rice	Rice
		Cane Furniture	Vegetable
4	Kushinagar (NP)	Rice	Rice
		Ice Cream	Wheat
			Vegetable
5	Padrauna (NPP)	Sugar	Sugar
		Gur	Gur
		Flower Pots	Flower Pots
6	Ramkola (NP)	Sugar	Sugar
		Mollassers	Mustard Oil
		Mustard Oil	Rice
7	Sivarhi (NP)	Sugar	Sugar
		Rice	Rice
		Cane Furniture	Vegetable

Table 47 indicates most important articles manufactured and exported out of the each town in the district.The district is well known for manufacturing of sugar, rice and cane furniture. The chief export items of the district are mostly the same which are manufactured in the towns.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001 tables 48 to 52.

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared. In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television. telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc., for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 436,564 consisting of 417,762 rural and 18,802 urban households. 93,957 households belong to Scheduled Castes and 5,097 to Scheduled Tribes. 427,543 households are living in their owned houses constituting 97.9 per cent of total households. Of these households, the maximum number of households (144,007) have occupied double rooms accommodation and is followed by three plus room accommodation numbering to 97,310 households. Next position is claimed by households (93,560) occupying single room accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 84,064 households while 8,602 households are without any exclusive room.

5,720 households living in rented accommodation account for 1.3 per cent of total number of households in the district. The maximum number of 2,245 households are living in double room accommodation followed by 2,074 households in single room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 3,301 forming only 0.8 per cent of total households are distributed in single room accommodation numbering 1,083, two rooms 1,363 and 432 in three rooms accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while urban areas show reverse picture.

TABLE 49: PER CENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets

Note -

Permanent - 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i e where, burnt briks. G I Sheets

or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets

bricks, lime and stone and RBC/RCC concreate are used for roof

Semi permanent - 2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i e where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass ,leavesreeds, bamboohatch, mud, unburnt,bricks, wood etc are used for roofs

The per centage distribution of households as shown in the above table reveals that 53.0 per cent of the households in the district had permanent houses. The trend is almost similar in rural (51.8 per cent) and different in urban areas (79.2 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Hata (71.0 per cent) followed by Kasya (66.0 per cent), Padrauna (41.8 per cent) and lowest in Tamkuhi Raj (37.2 per cent). In respect of semi-permanent houses, the returns were 6.9 per cent of district level. whereas among tahsils, it was 10.0 per cent in Hata and lowest was 4.9 per cent in tahsil Padrauna. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 4.0 to 7.2 per cent. Temporary houses in the tahsils lie between the ranges of 19.0 to 57.7 per cent.

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or

otherwise If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note: Per centage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

The above table shows that out of total households of the district 93.4 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 93.3 and 95.6 per cent respectively. Tahsil Tamkuhi Raj had higher order of proportion of

households where per centage for rural area was 95.1 and 97.1 in urban areas. Electricity was available for 21.2 per cent of households at district level. Bathrooms and toilet facilities were available in 17.0 and 12.3 per cent of households respectively. Tahsil Tamkuhi Raj was poorly served in respect of these amenities. Similarly drainage facility was also poor in Padrauna and Tamkuhi Raj. At district level drainage facility was available for 46.1 per cent of households, whereas the proportion of rural and urban areas households accounted for 44.8 and 75.6 per cent respectively.

Per centage in brackets

Data source Census of India 2001, H-series. Tables on Houses, Household amenities and Assets.

It is observed from the above table 51 that 53.9 per cent of households in the district use firewood as fuel for cooking, the proportion in the rural area is 53.9 and in urban area it

comes to 53.0 per cent Crop residue has been reported as one of the fuel for cooking of food, which constitute 38.2 per cent of the households. The composition of rural and urban comes to 39.5 and 8.5 per cent respectively. Cowdung cake is used for cooking in as many as 4.5 per cent of the households comprising of 4.7 per cent of rural and 0.9 per cent of urban areas. The other methods like LPG (cooking gas), coal, lignite, charcoal, electricity and biogas etc, ranges between 0.1 per cent to 1.4 per cent of the households. The pattern of fuel used for cooking is the same in tahsils (rural areas), where predominant fuel is firewood. Above table also shows that firewood, crop residue and cowdung cake are the predominant fuel for cooking in the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets

This table presents data for total rural and urban areas at district/tahsil level about households availing banking services and possession of assets such as Radio/Transistor, Telephone, Bicycle, Scooter and Car etc. There are 436,564 households in the district and among them, 278,645 households have been availing banking services. 140,024 households have Radio/Transistor. Television is possessed by 51,883 households. Telephone is available in 9,931 and bicycle is also available in 329,510 households. Scooter, Motorcycle, Moped and Car/ Jeep / Van are used by 23,205 and 8,071 households respectively. The picture in use of banking services and possession of assets by households at tahsil level is almost similar as analysed above for the district as a whole. 83,899 households do not have any such type of assets in the district.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade :

District Kushinagar (former name Padrauna) has been created by carving out the entire tahsils Padrauna, Hata and Tamkuhi Raj from Deoria district on 13th May 1994, which was the north area of Deoria District. Now it has four tahsils, Kasya tahsil is formed by carving out from all the tahsils of Kushinagar District in the year 1995 and 14 villages of tahsil Deoria were added to it in the year 1999.

(xii) Places of Religious, Historical or Archaeological importance in villages and Places of Tourist Intrest in the Towns.

Kasya (Kushinagar): Kushinagar is familiar as one of the greatest Buddhist sacred places. Lord Buddha breathed his last and acquired Mahaparinirvana in Kushinagar. Excavation at this place have revealed that a Buddhist Vihar was located here, which is preserved in the form of ruins of Stupas along with a very large idol of the Buddha in the Mahaparinirvana position. Among these ruins there is a temple perceived clearly as the Nirvan Temple, where in there is a 12 feet long heavy and impressive statue of the Buddha in a lying position carved out of one piece of red sand stone. Buddhists from every nook and corner of the world specially from Nepal, Tibet, China, Burma and Sri Lanka, visit this place. Fa-Hien the Chinies recluse came to see the Buddhists places in India between A.D. 405 and 411, and found many Buddhist Stupas and abbeys in Kushinagar. A few km. away from the Nirvana temple. there is another site of great archaeological importance being remarkable by the discovery of a rectangular but with adjacent side unequal mound crowned by brick Stupa known by name of Rambhar Stupa. It is inferred that the place marks the position of the Mukutbandhan Chaitya, where the body of Buddha, was placed on pyre and the Stupa was preserved in the memory of the dead master. A fair is held every year at Kushinagar on the day of Vaishakha Purnima in memory of the Buddha, which lasts for several days and is attended by a large number of people not only from g near by districts but also from other states of the country. A large number of foreign pilgrims also come to this place on this auspicious occasion.

Pava (existing now Fazilnagar): Pava is located on the road from Gorakhpur to Salemgarh about 37 km. away to the South-East of the district headquarters Padrauna. In previous times, it was known as Pava nagar. It is generally accepted by the Jain and Buddhist literatures to have been the place where Mahavira often came to see Pava (Fazilnagar). Before getting Kaivalya, he gave his last moral reflection in Fazilnagar. The followers of the Jainism accept it as their sacred place. It has such a recognition that the twenty fourth Tirthankara, the Lord Mahavira, got parinirvana here in 543 B.C. and on the same place his funeral was made by the Mallas King Hastipal.

Siwrahi: The seven persons of Siwrahi became martyr together in the struggle of the freedom.

(xiii) Major Characteristics and Contribution of the District:

In the district two sacred places pertaining to Jain and Buddh religion is situated here, one of them, the Kushinagar (Kasya), is the Mahaparinirvana place of Lord Buddha and the other Pava (now Fazilnagar) is the Nirvana place of Lord Mahavir, where the followers of the both religion come from all over the country and the world, as well as especially the Buddhist countries like China, Japan, Tibet, Nepal, Shri Lanka etc.

xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation and Coverage of Data

Village Directory:

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block, a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages, which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1. Population and households Cols.4 & 5
2. Amenities. Cols.6 to 13
3. Other infrastructural facilities etc. Cols.14 to 16
4. Availability of news paper/ magazine Column 17
5. Commodities manufactured Column 18
6. Total area of village and land use pattern Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status, which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns, which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration.However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns, which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns. location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way, population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns,

receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Diretoary:

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities namely Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/Magazine etc.The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundary and separate land records. Thus in Census the basic unit of rural areas is taken as a revenue village, which has definite surveyed boundaries. A revenue village may comprise several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what have been mentioned above since there is no surveyed village in the State. Therefore, an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also been included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils, which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included :

1. Appendix I — Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II — Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III — Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV — C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility is available.
5. Appendix V — Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI — Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII — List of villages according to the proportion of the Scheduled Caste and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII — Number of villages under each Gram Panchayat (C.D. Block wise)
9. Appendix IX — Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detail and explanatory notes on each of these abbreviations have also been incorporated for easy clarification of the subject concerned.

PART – A

VILLAGEAND TOWN DIRECTORY

(SECTION I AND II)

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , their amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures were not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes up to class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW

(xv) Others O,

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposesEA	

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

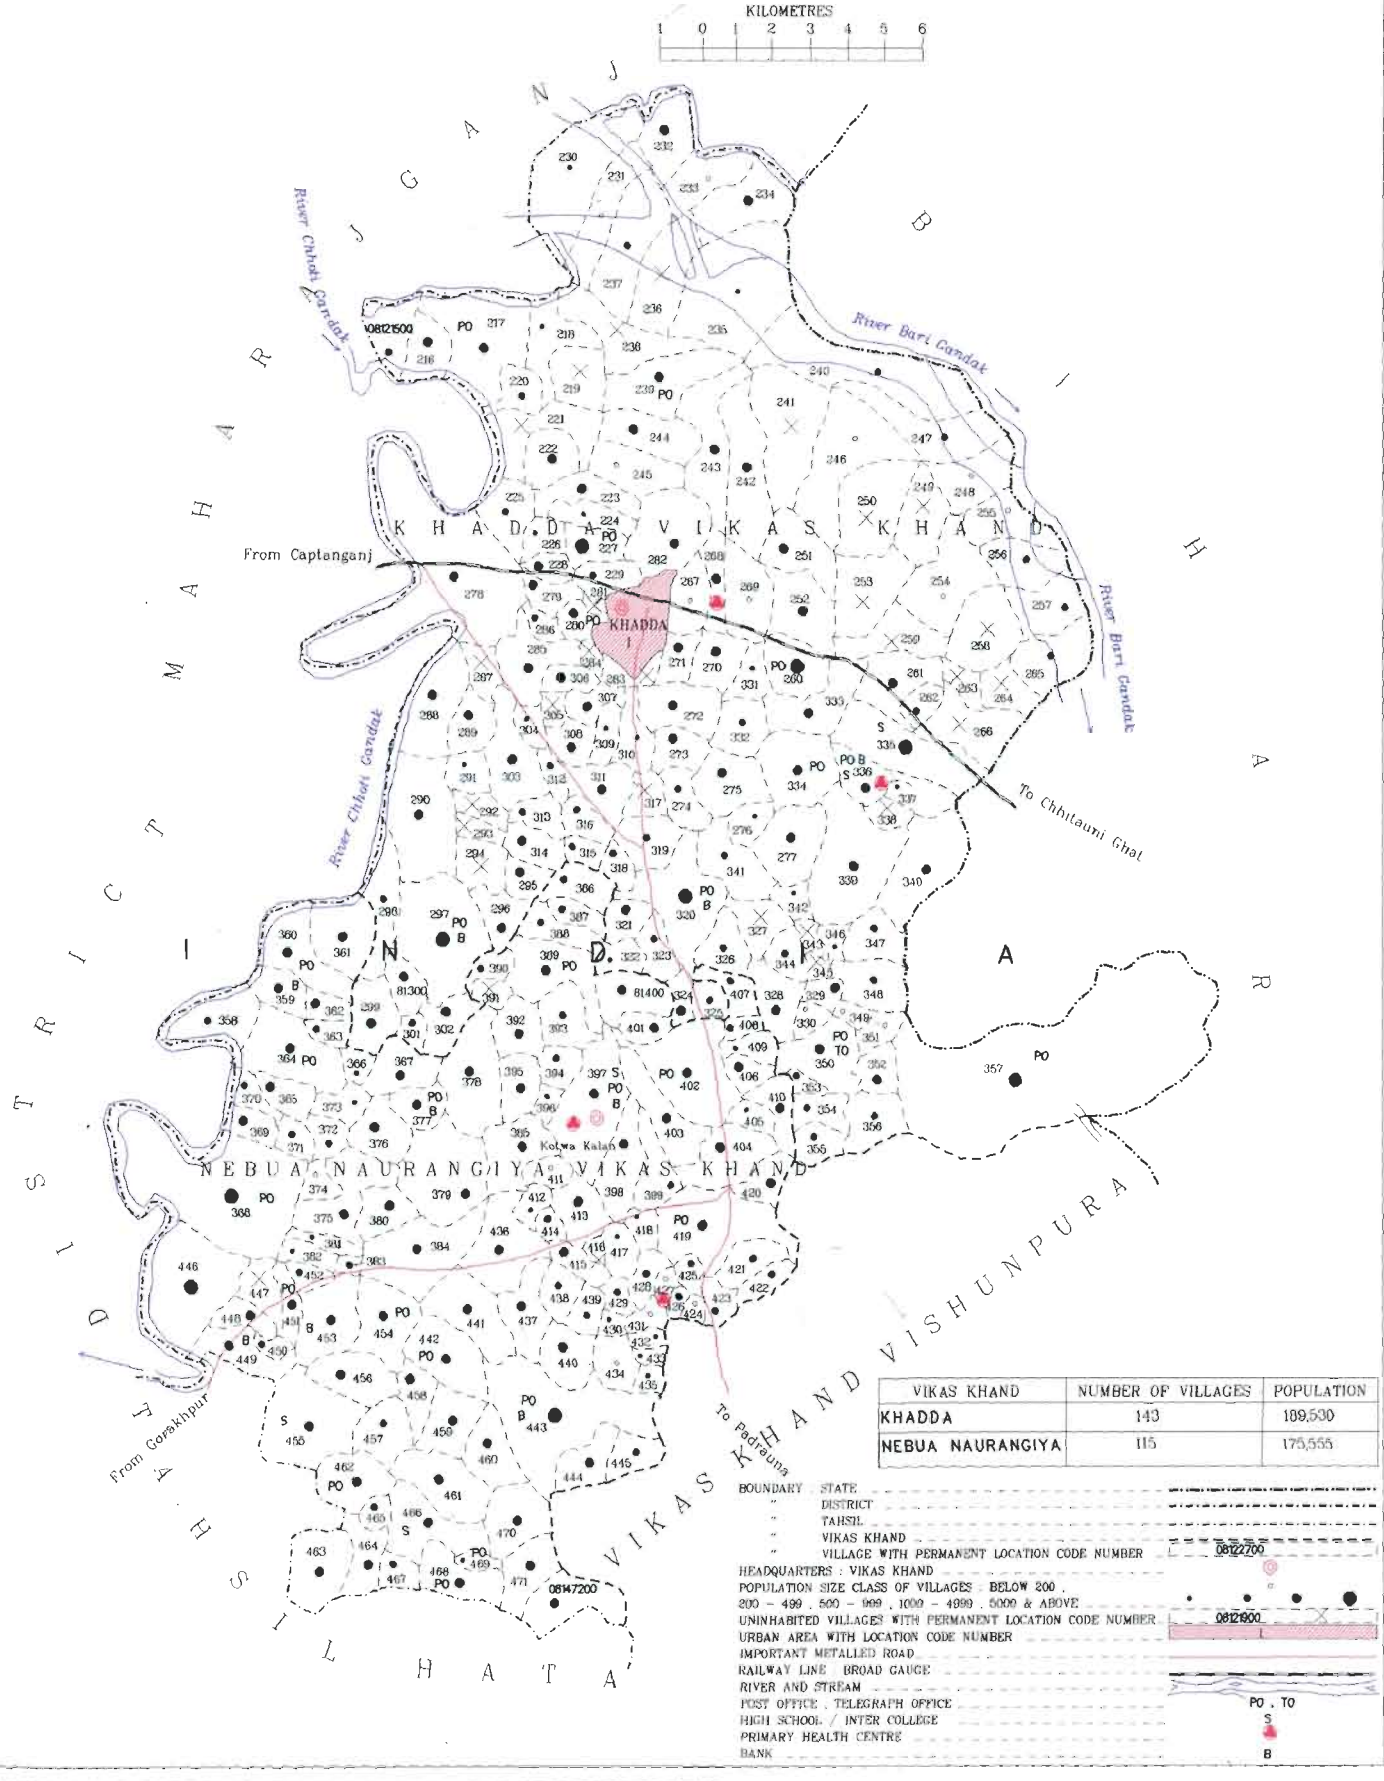

STATEMENT
LIST OF VILLAGES MERGED IN TOWNS AND OUT-GROWTH AT 2001 CENSUS

Serial Number	Name of Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there are no villages merged in towns & any outgrowths at 2001 census.
