VILLAGE HAVING 5000 & ABOVE POPULATION WITH NAME • Sarwan

URBAN ARIA WITH POPULATION SIZE – CLASS I, III, IV, VI

DEGREE COLLEGE , TECHNICAL INSTITUTION

G – Part Of Ghosi Vikas Khand

M – Part Of Muhammadabad Gohna Vikas Khand

MOTIF

HANDLOOM INDUSTRY

Mau and weaving are synonyms to each other. The town Mau is identified as one of the modern weaving center in the Eastern Uttar Pradesh. Weaving, the culture of the town, originated from this place during the period of Mughal king Jahangir around 16th century AD. It is said that Tan Sen – one of the weavers, produced good variety of cloth at that time. Today it has become the household industry in every Muslim household with a figure of around 75 thousand looms. The 'saris' of Mau are unique in look and embroidery and have a large market potential in the states of Assam, Bengal, Maharastra etc. Pt. Jawaharlal Nehru during his visit in 1957 labeled this town as "Manchester of Handloom".

Annexures I to VII

Annexure I Number of villages under each Gram Panchayat 916
Annexure II Fertility and Mortality, 1991 Census 916
Annexure III Various measures of fertility and mean age at marriage, 1991 Census 917
Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census 918
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 920
Annexure VI Marital status of population as per 1991 Census 921
Annexure VII Age, Sex and Education in the district, 1991 Census 926
Annexure VIII Distribution of different mother tongues returned in 1991 Census 930

Foreword

he District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities

of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri

New Delhi

Registrar General &

Census Commissioner, India

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Mau ranks 45th in terms of population in the state.
2. The percentage share of urban population in the district is 19.4 as against 20.8 of the population in urban areas of the state.
3. Mau district has population density of 1,082 persons per sq.km.which is more than the state average 690 persons per sq. km
4. Mau district ranks 5th in terms of sex ratio (986) which is higher than the state average of 898 females per thousand males.
5. Mau district ranks 18th in literacy (62.2) which is higher than the state average (56.3 percent).
6. There are only 123 uninhabited villages out of total 1,622 villages in the district.
7. Decadal growth rate of the district (28.2) is higher than the state average of 25.8.
8. Mohammadabad Gohna tahsil has the highest number of inhabited villages (449), while, Ghosi tahsil has the lowest number (326).
9. The district has 9 towns (seven statutory towns and two census towns), out of them none is new towns added after 1991 Census and no town has been declassified.
10. There are 250,586 households in the district accounting for about one per cent of the total households in the state. The average size of households in the district is 7.4 persons.

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics on account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the C.D. Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on C.D.-ROM; hence the word "Handbook" seems now to be a misnomer.

(II) Brief History of the District

District Mau is situated in the Eastern part of the Uttar Pradesh. It is carved out from district Azamgarh. The newly created district Mau came into existence on 14th November 1988. Formerly it was a part of Azamgarh district. The district headquarters of the district is at Mau. There are many legends regarding the name of the district .Some learned persons accept that the name is derived from the word

mayur of Sanskrit language and others accept that the name of the district is taken from a word of Turkey language. Mau is a word of Turkish language which means 'Garh', 'Stoppage' and 'Cantonment'. In our country hundred places are known by this name. The word Bhanjan has been added later on which was mentioned by Mau Ziya-ud-din Virani in his historical 'Gramya Granth' in which he stated that at the time of departure for Allahabad the emperor Akbar came first at Mohammedabad and later on at Mau.

In the middle of his reign (1540-1545) Sher Shah went to graveyard of Saiyad Ahmed Baba who was a Sufee saint which is situated at some distance from Kolhoo Vallan (Madhuvan). After he became an a emperor of India, he visited again because his daughter 'Mahavani' started living permanently near the graveyard of 'Saiyad Baba'. Sher Shah during his reign started various project for the development of his subjects. Before settlement of humanity Mau was nothing but a dense forest.

In the ruling period of Sher Shah this region was developed as cantonment for safety point of view. A royal mosque was constructed by 'Chaman Aara Begum' the daughter of Shahjahan which is now located in Katara Mohalla of Mau. Around this many rooms were built in which soldiers lived. At the time of construction of army cantonment and royal mosque a large number of labourers and skilled workmen came to Mau alongwith Mughal army. All workers were related with different type of occupations among them,many were craftsmen who were originally from Iran, Afghanistan and Turkey. They permanently settled here and their clan still exist here. There spoken words of Persion and Turkish language mixed with local language of Mau With the passage of line the language lost its originality. Amongst crafts men the majority were weavers.

(III) Administrative Setup

The district Mau has four tahsils namely Ghosi, Madhuban, Maunath Bhanjan and Mohammadabad Gohna and 9 towns as Doharighat Nagar Panchayat, Amila N.P., Ghosi N.P., Kopaganj N.P., Adari N.P., Maunath Bhanjan Nagar Palika Parishad, Kurthi Jafarpur Census Town, Khairabad Census town and Mohammadabad N.P. There are Nine Community development blocks : Pardaha, Ratanpura, Kopaganj, Ghosi, Fatehpur madaun, Badraon, Dohari Ghat, Mohammadabad and Ranipur.

Jurisdictional Changes (1991-2000)

S.No.	Name of District/Tahsil	Notification No.& Date	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
1	Ghosi Tahsil	3329A/1-5-95-79/95-R-5 dated 19-6-1997	-	354 villages transferred to newly created Madhuban tahsil
2	Madhuban Tahsil	3329A/1-5-95-79/95-R-5 dated 19.6.1997	354 villages transferred from Ghosi tahsil	

A new tahsil Madhuban was created after 1991 Census. 354 villages of Ghosi tahsil was transferred to newly created tahsil, Madhuban.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos's circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a departmental district level office. The development point of view the district is divided into community development block. Block Development Officers (BDO) looks after development works at community development blocks level. Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in small districts are incharge. Additional Superintendent of Police (ASP) in their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge In addition there are several additional District Judge. Civil judge, Chief Judicial Magistrate and Munsif Magistrate and others judiciary officer are also posted for look into the legal matters.

The nucleus of the district body for Local Self Government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv)Physical Features

(1) Location and Size :

The district Mau is situated in a large tract of level ground of the Ganga-Ghaghara doab. It lies between of $83^0 17'$ and $84^0 42'$ east longitude and $24^0 47'$ and $26^0 17'$ north latitude. It is bounded by Ghaghara river on the north, on the east by Ballia district, on the South by Ghazipur and on the West it is bounded by Azamgarh district. Area of the district is 1,713 Sq.Km.

(2) Physiography :

The district Mau represents the geographical characteristics of middle Ganga plains. Physiography of an area depends on certain local features, like topography, geographical features, fertility of soil, water resource, climate, vegetation and wild life. Surface of the district level is plain and

uneven level is found.. The shape of up and down plain level is only available in near the rivers. Considering the topography of the tract within district, it can be divided into two parts, the kachhari, khadar and up land called bangar.

There is deficiency of river flowing in Southern Natural tract. As a result of it this bangar region is full of shingles and saline soil.

(3) Drainage :

Among the water resources, rivers are an important source. The Tons and its tributary chhoti Sarju determines the drainage system of the district. The Ghaghara river determines the Northern boundary of the district. The most part of the Pardaha C.D. Block is affected by flood of Ghaghara and Tons. Many flood control measures have been adopted and implemented by the state government. The capacity of water resource is probably enough. The sub-surface of river and under ground water are other sources. Most of the land of the district is irrigated by ponds. Two famous ponds Talartoi and Tal Pakari with historical importance are located. Ponds and lakes are extremely useful for fisheries and as bird sanctuary. The length and breadth of Pakari Tal is 32 kilometers and 1.7 kilometers respectively. The underground water is boon for the Bangar area. The water is available through well, hand pump and tube well from the average depth of 15th to 20 metres. The underground water is the most important for drinking and irrigation of agricultural crops.

(4) Climate :

The climate of the district is generally damp and beneficial for the health. The rainfall usually comes in third week of June and goes upto the month of October. The months of April, May and June are the season of Summer. The highest temperature recorded during summer. is 44 centigrade and the lowest 27.1 centigrade. The annual rain fall is 1021 milimeters. The rainfall of the winter season is negligible.

(5) Natural and Economic Resources

Forestry :

The climate of the whole district is almost alike. The vegetation depends upon the nature of soil, water and topographical feature. The area under the forest is 173 hectares. Trees of Paras or Dhak, Jhau or Tamarind are found along the great river Ghaghara. The main trees in the district are Sihor, Akal, Babool, Bargad, Kathal, Mahua, Neem, Shisham and Tar. There is deficiency of pasture land for the cattle is also very deficient. The trees bearing fruits are Mango, Guava and Jamun. The most wooded tahsil is Ghosi.

The climate of the district is not appropriate for the wild life. There is none of large carnivore even wolves are found rarely. However, jackals and foxes can be seen occasionally. The wild pigs are found along the low land of the Ghaghara. Peacocks, pigeons, partridge, gees and ducks are common birds. The various varieties of fish are found in the rivers, ponds and lakes. The pet animals of the district are bull, cow and buffalo.

Minerals and Mining :

The whole of the district is devoid of mineral occurrences.

Soil :

Soil of the district may be divided into three parts. The first part spreads over North of the Tons and South of the Ghaghara which is called 'Kachhar' region. The soil of the region is Matiar. It is very fertile land. In this region all sorts of crops can be grown with high output. The second part of the district is known as 'Domat region'. In this region come Muhammedabad and Pardaha C.D. Blocks. Soil of this region is blending of stiffened and sandy clay. The third part is barren part regarding production of crops. Bangar region is replete with saline soil.

Land and Land Use Pattern :

The district has a geographical area of 1,713.0 sq.km., out of which 128,607 hectares is utilized as net area sown.Area of 211,694 hectares is covered for sowing Rabi and Kharif crops. Cultivable land is decreasing because of increasing population. In 1996-97 net sown area was 127,311 hectares which was less than preceding years. Area covering forest, culturable and current fallow are 560 hectare 2,424 hect. and 8,380 hect. Respectively. Usar land is 2,678 hectare. Area sown more than once or double sown is 83,087 hectare in the district. Barren land is being made cultivable using modern method by govt. bodies. Other incultivated land is 3,429 hectare and land use other than cultivation is 21,215 hectare

Agriculture and Crop Pattern :

The district has a good agricultural base and majority of the population are engaged in cultivation. Three harvests newly Rabi, Kharif cover a large area of the district. Zaid is the third harvest which cover very small area. Principal Rabi crops are wheat, pea, barley and gram. The area covered by these staples (in 1997-98) are 91,207 hectare. 2,499 hectare, 3,265 hectare and 2,968 hectare respectively. Besides these crops, some other crops are also grown by farmers. Arhar is grown in 3,672 hectare area. Commercial crops like sugarcane, oil seeds etc. are also grown in some area of the district. Sugarcane covers 11,434 hectare area. The largest area covered by any crop in the Kharif harvest is paddy. The total area under paddy is 87,189 hectare (41.2%). Maize an important staple crop known by the names of Junhari or makai, is sown on the up lands. It is sown an area of 778 hectare. The other important Kharif crops are jwar and bajra and fodder also for cattle. Other cereals like Sawan, Urd etc. covers an area of 134 hectares, 54 hectares respectively. Net sown area covering by all sorts of crops is 128,607 hectare (74.9%).

Irrigation :

The district is well provided with the means of irrigation. Total irrigated area of the district is 152,784 hectare of which 131,687 hectare or 86.2 per cent land was irrigated by tube wells, 20,767 hectare or 13.6 per cent by canals and 330 hectare or 0.2 p.c. by tank, ponds, wells etc.

Animal Husbandry :

The development of animal husbandry is inevitable for the better economic life of people. Numerous people live with live stock in a large area of the district for their livelihood. To improve the breed of cattle, government has established many artificial insemination centers. Govt. provides loans on easy terms to the farmers for the purchase of cattle of improved breed. Development of cattle is necessary both milk and draught power. According to the cattle census, the total number of animals was 822,791 in the district of Mau. Cattle census, shows 420,441 cows, 164,737 buffaloes, 19,589, sheep, 189,647 goats and the other animals numbered 8,861 in the district. There are 26 veterinary hospital, 24 animal development centers, 3 artificial insemination centers, 16 sub centers in the district. The farmers are conscious of cattle diseases, therefore, they visit these centers.

Fishery :

Different varieties of fishes are found in the district. Fish seeds are collected from rivers and reared in the nurseries. People of weaker section of the society are engaged in the profession related to fisheries. The number of fingerlings distributed during 1999-2000 were 8,578, thousand in the district. Increase in supply of fish seeds shows the propensity of people to adopt this business for their betterment.

Industry :

There is no heavy industry in the district. Small scale industries are found in every corner of the district. Village and cottage industries include mostly the handicrafts which being carried over generation to generation. Handloom and power loom clothes, Khadi weaving, leather goods, wooden articles etc. fall under the group of small scale industries. Maximum employments are offered by this group. There are 61,526 units of small scale industries in the district, out of which 61,438 are owned by private industrialists, 15 by registered institutions and 73 by industrial cooperative societies. There are few spinning mills, sugar mills, wine factory also in the district. Swadesh Cotton Mill and Spinning Mill manufactures well known Banarasi Saris. Number of persons engaged in small scale industries is 64,235.

Trade and Commerce:

Trade and commerce has flourished with the development of water ways traffic along with railways and inter connectivity of roads constructed around the district. The railways gave tremendous impetus to trade as faster rail wagons has replaced the bullock carts which was the main means of road transport in the past. A fleet of trucks is always available for the transport of goods. Import and export of agricultural commodities cloth and general merchandise etc got tremendous boost due to development of railways and road transport in the region. The district has numerous trade centers. The common requirements of the people are met by small traders and peddlers. Handlooms and power loom clothes are exported to all over India and abroad from Mau Nath Bhanjan. This has become the main trade centre for

saris and clothes of good quality. Only from Sari based business, Rs. 1.60 crores is earned per day in other words it is Rs. 480.00 crores per year.

Transport :

The district is well connected by railways and road transport. Taxis, buses and etc are easily available for passengers. Trucks are available in great numbers for the transportation of goods. Maintained by PWD, at present the district has 54 km. National highways, 56 km State high ways, 94 km. Main district road and 452 km. other district and rural roads. Under local bodies, total length of roads is 121 km. and under other departments total length includes 48 km. There are 98 bus stop in the district.

The improvement in transportation was brought by railways. Imports and exports increased in leaps and bounds after the advent of railways. There are 16 railway station in the district for the movement of passengers ,agricultural produce and other commodities.

Electricity and Power :

Electricity and power for the district is available from the U.P. Grid. Power has become the powerful factor for the progress of the area. In every sphere of life, power plays an important role. The consumption of power is shared by various sector of economy in the district. The total consumption of electricity in the district is 233,885 thousand K.W.H, out of which 27,780 thousand K.W.H. is consumed by domestic sector, 8,996 thousand K.W.H. by commercial light sector, 52,176 thousand K.W.H. by industrial sector. 43 thousand K.W.H. by street light, 144,163 thousand K.W.H. in Agricultural use and 727 thousand K.W.H. for other public service. In the district total number of electrified villages is 1,873 and electrified schedule castes villages is 527. Pump sets operated by powers are 10,817.

Gram Panchayat, its composition, jurisdiction and role in village development –

A Gram Panchayat acts as the executive of the Gram Sabha and plays a vital role in village development.

Composition :

The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 597 Gram Sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its Terms :

The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualifications :

In order to be elected to a village panchayat, a candidate should posses the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions :

A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.
5. It gets metalled roads built from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigational facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer for the area of the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine upto Rs. 100

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unborn bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 meters and a breadth of at least 11/2 meters and 2 meters in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the

buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, work shed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for

presentation of data. In un-surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or

groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	37	Gual
2	Badhik	38	Habura
3	Badi	39	Hari
4	Baheliya	40	Hela
5	Baiga	41	Kalabaz
6	Baiswar	42	Kanjar
7	Bajaniya	43	Kapariya
8	Bajgi	44	Karwal
9	Balahar	45	Khairaha
10	Balai	46	Kharwar (excluding Banbasi)
11	Balmiki	47	Khatik
12	Bangali	48	Khorot
13	Banmanus	49	Kol
14	Bansphor	50	Kori
15	Barwar	51	Korwa
16	Basor	52	Lalbegi
17	Bawariya	53	Majhwar
18	Beldar	54	Mazhabi
19	Beriya	55	Musahar
20	Bhantu	56	Nat

Scheduled Castes list : Contd....

21	Bhuiya	57	Pankha
22	Bhuyiar	58	Parahiya
23	Boria	59	Pasi, Tarmali
24	Chamar,Dhusia, Jhusia, Jatawa	60	Patari
25	Chero	61	Rawat
26	Dabgar	62	Saharya
27	Dhangar	63	Sanaurhiya
28	Dhanuk	64	Sansiya
29	Dharkar	65	Shilpkar
30	Dhobi	66	Turaiha
31	Dom		**Scheduled Tribes**
32	Domar	1	Bhotia
33	Dusadh	2	Buksa
34	Gharami	3	Jaunsari
35	Ghasiya	4	Raji
36	Gond	5	Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural laborer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural laborers. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural laborers or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural laborers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtrations through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (C.D.R)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$C.D.R = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \Sigma_{15\text{-}19}^{45\text{-}49} ASFR}{} \times 1000$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{} \quad 1000$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people have been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants.

Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of

UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 1,853,997 in which 1,493,628 live in rural and rest 360,369 in urban parts. There are 4 tahsils in district namely Ghosi,Madhuban,Maunath Bhanjan and Mohammadabad Gohna. The most populous tahsil is Maunath Bhanjan followed by Mohammadabad Gohna. Madhuban is least populated tahsil. The urban population in the district is 19.4 percent. The urban population is maximum at 36.1 percent in Maunath Bhanjan tahsil. There are 1,622 revenue villages in which 123 are un-inhabited. The total rural population of 1,493,628 is spread over 9 C.D. blocks. There are no inhabited forest villages. The most populous C.D. block is Ranipur with a population of 196,436, The maximum number of inhabited villages (267) are also in Ranipur C.D. block. About half of populated villages have a population in the size of 200-499 and 500-999 and such villages form as high as 45.6 percent of total populated villages. Although the population density in the rural area is 916.(highest proportion (77.7) of villages are with a population density range of 501+ per square kilometre. Such villages contain as much as 93.9 percent of total rural population.

Size-class and status of towns:

In the total urban population the maximum 212,657 live in Maunath Bhanjan NPP, the next big town is Ghosi with a population of 35,903. The above two are class I and III towns having the civic status of Nagar Palika Parishad (NPP) and Nagar Panchayat (NP). Rest of 7 towns are Nagar Panchayat (N.P.) and Census town (C.T). Out of which 2 towns are class III, .4 towns and are class IV one is class VI town.

Ghosi tahsil contains 3 towns, Maunath Bhanjan tahsil has 4 towns, and Mohammadabad Ghona tahsil has two towns.

Population growth:

At the present territorial jurisdiction the population of the district was 1,445,782 at 1991 Census and growing by 28.2 percent during the decade 1991-2001 it is 1,853,997 at 2001 Census. The decadal growth at 28.2 percent in the district is higher than the state at 25.8 percent.

Population Density:

The district has an area of 1,713 square kilometre. The population density in the district is 1,082. In the rural areas of the district the density is 916.

Sex-Ratio:

The sex-ratio in the district at 986 is way ahead to 898 at the state level. Indeed the sex-ratio at the district has been all along higher in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is higher in rural areas. Among tahsils, highest sex-ratio is in Madhuban and lowest in Maunath Bhanjan. Among C.D. blocks the sex-ratio is highest in Badraon at 1,037 and lowest in Pardaha at 948. Out of 1,499 inhabited villages in the district there are 34.0 percent villages (with 36.1 percent of rural population) which are having a sex-ratio range 1000-1099. In the urban parts of the district the sex-ratio is 938 and highest of 970 in Kurhi Jafarpur CT and lowest of 927 in Ghosi NP. The sex-ratio of population on the age-group 0-6 is 946 in the district which is lower than the state being at 916. As against a sex-ratio of 943 in the age-group 0-6 of rural population of the district, it is highest at 953 in Pardaha block and lowest at 930 in Fatehpur Madaun. It may be noted that out of 1,499 inhabited villages in 18.9 percent of villages with 21.3 percent rural population the sex ratio in the age-group o-6 is between 1000-1099. As against o-6 age-group, sex ratio of 943 in the rural area of the district it is 955 in urban. Among towns this sex-ratio is highest at 993 in Amila NP and lowest at 918 in Adari NP.

Work Participation Rate:

In the total population of the district of 1,853,997 as much as 32.3 percent are workers and rest of 67.7 percent are non-worker. Among worker 21.4 percent are main workers and rest of 10.9 percent are marginal workers of total population. In absolute terms females out number males as marginal workers. The extent of main workers is highest at 23.6 percent in Maunath Bhanjan tahsil and lowest at 19.6 percent in Ghosi tahsil. In case of marginal workers the population is highest in Ghosi tahsil as 12.6 persent in comparison to only 10.8 percent in Mohammadabad Gohna and 10.4 percent in Maunath Bhanjan tahsil. The extent of workers in rural parts and non-workers in urban parts is lower. In the district among workers 34.0 percent are cultivators and 22.1 percent other workers. Over 27.9 percent of female workers are engaged as cultivators.

Literacy:

In the district 62.2 percent population is literate. The literacy is 71.1 percent in urban areas and 60.0 percent in rural areas. The male literacy is higher at 75.6 percent against 48.7 percent female literacy, and therefore, the gap in male/female literacy rate is 26.9 percentage points. In rural areas among 9 C.D. blocks, the highest literacy is at 61.6 percent in Ghosi and lowest at 56.0 percent in Badraon. The literacy among males in rural areas is 74.6 percent in comparison to 45.6 percent among females. The lowest female literacy of 41.8 percent is in Badraon C.D. block. The gap in male/female literacy rate is highest in Ranipur C.D. block which is 29.0 percent. In 34.1 percent of villages covering also 38.2

percent of rural population the literacy range is 61-70. Among urbanites in the district, as much as 79.6 percent males are literates as against 61.9 percent females. The highest urban literacy is in Kopaganj NP at 77.6 percent and lowest in Adari NP at 68.7 percent. The maximum male literacy is found in Amila NP at 85.6 percent and lowest at 77.3 percent in Maunath Bhanjan NPP. However, the highest female literacy is in Kopaganj NP at 70.7 percent and lowest at 56.7 percent in Adari NP. Still, the maximum gap in male-female literacy rate at 23.4 percentage points is found in Adari NP. The literacy among Scheduled Castes in the countryside it is 54.4 percent and 52.6 percent in towns. There is a very small percentage of literate in Scheduled Tribes at district level. Only 107 persons out of 429 Scheduled Tribes population are found literate in the district.

(viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36 :

Primary Census Abstract gives data up to C.D. Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001

4	Mohammadabad Gohna	N.A	N.A	N.A	421,639	379,524	42,115	NA	N.A	N.A	N.A	10.0
	District Total	**1,445,782**	**1,201,787**	**243,995**	**1,853,997**	**1,493,628**	**360,369**	**28.2**	**24.3**	**47.7**	**16.9**	**19.4**

The growth rates of the district for total, rural and urban areas and percentage of urban population to total population is given in table. The decadal growth rate of the district is 28.2 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 24.3 and 47.7 per cent respectively . Out of the total population of the district 80.6, per cent lives in rural areas while 19.4 per cent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 16.9 per cent in 1991 to 19.4 per cent in 2001 in the district. The highest growth of urban population is recorded in Maunath Bhanjan tahsil 36.1 per cent and no urban population is registered in Madhuban tahsil. Urban population is mainly concentrated in Maunath Bhanjan tahsil while other tahsils are more rural.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Table-2 gives number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1,499 inhabited villages, 316 (21.1 per cent) are small size villages with population below 200 persons. In the size of 200 - 499 persons there are 341 villages having 22.7 per cent villages of the district while in the size class of 500-999 population claims 344 villages with 22.9 per cent of the total villages in the district. 295 villages (19.7 per cent) are in the size class of 1,000-1,999 and 185 villages (12 3 per cent) are in the size class of 2,000-4,999 only 15 villages fall in the ranges of 5,000 - 9999 and 3 villages of above 10,000 population. The biggest village in the district having a population of 22,018 persons is located in Mohammadabad Gohna C.D. block of district.

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic
During the decade 1991-2001, no new town has been added or declassified /merged with other town in the district.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	13	0.9	4,099	0.3
11-20	12	0.8	70	0.0
21-50	27	1.8	1,446	0.1
51-100	31	2.1	861	0.1
101-200	56	3.7	5,529	0.4
201-300	59	3.9	19,521	1.3
301-500	136	9.1	59,652	4.0
501 +	1,165	77.7	1,402,450	93.9
Not known	0	0.0	0	0.0
District Total:	**1,499**	**100.0**	**1,493,628**	**100.0**

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 1,165 accounting for 77.7 per cent of the total inhabited villages fall in the density range of 501+ persons having 93.9. per cent population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 25 villages (1.7 per cent). 136 villages (9.1 per cent) have density between 301 - 500 persons while the corresponding proportion in the lower range of 201- 300 is 3.9 per cent of the total inhabited villages with 1.3 per cent population of the district. In the medium density ranges of 21- 50 and 51-100 persons account for 1.8 and 2.1 per cent of inhabited villages respectively. Both these ranges claim 0.2 per cent rural population.

Table : 5 Sex Ratio of State and District 1901- 2001

	UTTAR PRADESH			MAU		
Year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	1,026	1,025	1,039
1911	916	922	866	991	990	1,010
1921	908	918	834	968	968	968
1931	903	916	813	967	971	933
1941	907	922	824	988	995	925
1951	908	922	827	1,001	1,010	908
1961	907	921	817	1,012	1,020	930
1971	876	884	826	976	984	898
1981	882	889	850	996	1,010	917
1991	876	879	864	974	982	932
2001	898	904	876	986	998	938

As per 2001 Census sex-ratio of 986 females per 1,000 males has been recorded in the district against the state average of 898. The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 2001and remained above the state average figures during this period. The lowest sex ratio of 967 females per 1000 males were recorded in the district during 1931 against the

state average of 903. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and state.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Ghosi	1,009	1,021	932
2	Madhuban	1,015	1,015	—
3	Maunath Bhanjan	954	964	937
4	Mohammadabad Gohna	1,002	1,007	950
	District Total	**986**	**998**	**938**

Table-6 gives sex-ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 986 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas. The sex-ratio among rural and urban population is 998 and 938 respectively. The rural sex-ratio in the tahsils varies between 964 to 1021 in all four tahsils of the district. The sex-ratio in Ghosi (1021), Madhuban (1,015) and Mohammadabad (1,007) is higher than district rural average (998). Among urban areas the highest sex-ratio is recorded in Mohammadabad (950) and the lowest is in Ghosi urban (932).

TABLE 7 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Dohri Ghat	1,014
2	Ghosi	1,016
3	Badraon	1,037
4	Fatehpur Madaun	1,007
5	Kopaganj	966
6	Pardaha	948
7	Ratanpura	975
8	Mohammadabad Gohna	1,010
9	Ranipur	1,005
	District (Rural) Total:	**998**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 998 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 1037 is found in Badraon C.D. block and is followed by Ghosi (1016) while the lowest of 948 is recorded in Pardaha C.D. block. The sex-ratios of Dohri Ghat, Ghosi, Badraon, Fatehpur Madaun, Mohammdabad Gohna and Ranipur C.D. blocks are higher than the district rural average of 998 females and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	36	2.4	1,254	0.1
700-749	7	0.5	622	0.0
750-799	24	1.6	2,918	0.2

850-899	84	5.6	58,968	3.9
900-949	219	14.6	284,309	19.0
950-999	302	20.1	432,270	28.9
1000-1099	509	34.0	539,071	36.1
1100+	268	17.9	155,223	10.4
District Total:	**1,499**	**100.0**	**1,493,628**	**100.0**

Sex ratio (Rural) for District: ***998***

Table 8 presents the distribution of villages by sex-ratio ranges based on 2001 Census. The maximum number of villages i.e.509 accounting for 34.0 per cent of the total villages having largest population of 36.1 per cent in the district fall in the sex-ratio range of 1,000-1,099 females per 1,000 males. It is followed by the sex-ratio range of 950-999 which claims 302 villages (20.1 per cent) with 28.9 per cent population. The highest range of 1,100 and above claims 268 villages (17.9 per cent). This range shares 10.4.per cent rural population of the district while in the sex-ratio range of 900-949, there are 219 villages (14.6 per cent). In remaining sex-ratio ranges of 850-899,800-849, 750-799, 700-749 and less than 700, the number of villages are 84 (5.6 per cent), 50 (3.3 per cent), 24 (1.6 per cent), 7 (0.5 per cent) and 36 (2.4 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum rural population fall in the higher sex-ratio ranges of 1000-1099 females and above showing that in majority of villages the sex-ratio is significantly higher.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Adari	NP	937
2	Amila	NP	966
3	Dohri Ghat	NP	934
4	Ghosi	NP	927
5	Khairabad	CT	967

The Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district.Total population in this group 0-6 is 373,910 persons comprising of 192,183 males and 181,727 females. The total sex-ratio in this age-group works out to 946 females for every thousand males in the district. The proportion of females in rural areas is lower than that of urban areas. The sex-ratio in rural and urban areas comes to 943 and 955 females in this age-group respectively. The rural sex-ratio in tahsil varies between 937 in Madhuban tahsil and 952 in Maunath Bhanjan tahsil. The sex-ratio of Maunath Bhanjan is higher than district rural average (946). Madhuban tahsil has lowest sex-ratio of 937 females among the total population, as a whole. In urban areas, the higher sex-ratio is recorded in Maunath Bhanjan urban (959) and the lowest is found in Ghosi (945).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Dohri Ghat	30,375	15,573	14,802	950
2	Ghosi	27,888	14,329	13,559	946
3	Badraon	32,665	16,858	15,807	938

8	Mohammadabad Gohna	38,770	19,888	18,882	949
9	Ranipur	39,730	20,549	19,181	933
	District (Rural) Total:	**303,221**	**156,034**	**147,187**	**943**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 943 for the district (rural). The sex-ratio of C.D. block varies between 930 to 953. It is highest in Pardaha C.D. block which is 953 followed by 952 in Ratanpura C.D. block and lowest 930 females is found in Fatehpur Madaun C.D. block. The sex-ratio of Dohri Ghat, Ghosi, Kopaganj, Pardaha ,Ratanpura and Mohammadabad Gohna C.D. blocks are higher than the district rural (943)while in remaining blocks, they are below than the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	184	12.3	7,718	2 5
700-749	60	4.0	7,967	2.6
750-799	90	6.0	13,254	4 4
800-849	138	9.2	25,562	8.4
850-899	145	9.7	41,186	13.6
900-949	171	11.4	58,935	19.4
950-999	146	9.7	52,714	17.4
1000-1099	284	18.9	64,728	21.3
1100+	281	18.7	31,157	10.3
District (Rural) Total	**1,499**	**100.0**	**303,221**	**100.0**
Sex ratio (Rural) for District:		**943**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 284 (18.9 per cent) having largest population (21.3 per cent) in the district (rural) fall in the sex-ratio range of 1000-1099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 1100 and above which claims 281 villages (187 per cent) with 10.3 per cent population. Next to it, 184 villages (12.3 per cent) are in the range of less than 700 with 2.5 per cent population. 146 villages (9.7 per cent) having 17.4 per cent population fall in sex-ratio range of 950-999. In remaining sex-ratio ranges of 700-749, 750-799, 800-849, 900-949 and 850-899 claim less number of villages and these are distributed as 60 (4.0 per cent), 90 (6.0 per cent), 138 (9.2 per cent), 145 (9.7) per cent and 171 (11.4 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that approximately fifty per cent of villages i.e. 711 having population (49.0 per cent) fall in the higher sex-ratio ranges of 950 - 999 and above.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

District(Urban) Total			**70,689**	**36,149**	**34,540**	**955**

Table 13 shows sex-ratio of population in the age-group 0-6 of urban agglomerations/towns in 2001 in urban areas of the district total population in this group is 70,689 in which 36,149 are males and 34, 540 females and sex-ratio of the urban areas is 955 . Among 9 towns sex ratio in age group 0-6 varies from 918 in Adari (N.P) town to 993 in Amila (N.P). In Dohri Ghat (N.P), Amila (N.P), Maunath Bhanjan (NPP) and Kurthi Jafarpur (C.T) towns, the sex ratio is more than the district average. Among towns Maunath Bhanjan (NPP) has highest population.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

		Rural	379,524	115,359	180	30.4	0.0
		Urban	42,115	3,593	0	8 5	0.0
	District Total:	**Total**	**1,853,997**	**421,677**	**429**	**22.7**	**0.0**
		Rural	**1,493,628**	**387,310**	**312**	**25.9**	**0.0**
		Urban	**360,369**	**34,367**	**117**	**9.5**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 1,853,997 total population of the district, 22.7 per cent belongs to the Scheduled Castes and zero per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 25.9 per cent in rural population and 9.5 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Mohammadabad Gohna tahsil (28.2) while the lowest is found in Maunath Bhanjan tahsil (19.3). The proportion of Scheduled Tribes population is zero in both rural and urban areas. Scheduled Tribes population in the district is mainly concentrated in tahsil of Mohammadabad Gohna ana Maunath Bhanjan tahsils which are very negligible.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Dohri Ghat	155,194	42,773	73	27.6	0.0
2	Ghosi	135,326	31,586	0	23.3	0.0
3	Badraon	160,713	34,287	0	21.3	0.0
4	Fatehpur Madaun	190,544	44,324	1	23.3	0.0
5	Kopaganj	181,868	43,188	30	23.7	0.0
6	Pardaha	130,607	39,822	25	30.5	0.0
7	Ratanpura	159,852	35,971	3	22.5	0.0

9	Ranipur	196,436	61,237	139	31.2	0 1
	District (Rural) Total:	**1,493,628**	**387,310**	**312**	**25.9**	**0.0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 25.9 per cent of rural population of the district belongs to Scheduled Castes and 0 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 21.3 per cent in Badraon and 31.2 per cent in Ranipur C.D. block. The other C.D. block containing the high percentage of Scheduled Castes is Mohammadabad Gohna (29.6), Pardaha (30.5) and Dohri Ghat (27.6). The highest proportion of 0.1 per cent Scheduled Tribes population is counted in Ranipur C.D. block. No Scheduled Tribe population is recorded in two C.D.Blocks.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	355	23.7	0	0.0
Less than 5	87	5.8	2,223	0.6
5-10	97	6.5	9,327	2.4

51-75	151	10.1	66,626	17.2
76 and above	120	8.0	32,198	8.3
District Total	**1,499**	**100.0**	**387,310**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 355 villages accounting for 23.7 per cent of total 1,499 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5 per cent in 87 villages (5.8 per cent). In 97 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 204 villages constituting 13.6 per cent of the total villages. The range 21-30 and 31-40 per cent contains 221 and 164 villages respectively. Both these ranges together account for 25.6 per cent villages of the district. 100 villages fall in the range of 41-50 per cent. 120 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 8.3 per cent Scheduled Castes population of the district. The maximum of the 25.3 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,484	99.0	0	0.0
Less than 5	9	0.6	89	28.5
5-10	2	0.1	64	20.5
11-20	2	0.1	110	35.3
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	1	0.1	20	6.4

76 and above	1	0.1	29	9.3
District Total	**1,499**	**100.0**	**312**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. There are 1,484 (99.0 per cent) villages where none of Scheduled Tribes have been recorded in the district. Only 9 (0.6 per cent) villages have proportion of Scheduled Tribes population up to 28.5 per cent and 2 (0.1 per cent) villages have 20.5 percent Scheduled Tribes population. Two villages are such where proportion of Scheduled Tribes population is above 35.3 per cent accounting for 0.1 per cent of the total villages in the district. In One village the proportion of Scheduled Tribes population ranges between 41-50 per cent accounting for 6.4 per cent of the total population of the district The proportion of Scheduled Tribes population ranges between 76 and above percent accounting for 9.3 percent of the total population in one village.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Adari (NP)	11,977	925	0	7.7	0.0
2	Amila (NP)	4,760	1,193	0	25.1	0.0
3	Dohri Ghat (NP)	10,248	2,082	0	20.3	0.0
4	Ghosi (NP)	35,903	3,451	0	9.6	0.0

District(Urban) Total		**360,369**	**360,369**	**34,367**	**9.5**	**0.0**

Table 18 shows number and percentage of Scheduled caste and Scheduled Tribes population recorded in urban areas during 2001 Census in district. The table depicts that Scheduled Caste population in Amila (N.P) and Dohri Ghat (N.P) were 25.1 and 20.3 percent respectively. Scheduled Tribe population is negligible in the urban areas of the district. There are no Scheduled Tribe population in any town except in Maunath Bhanjan (NPP).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Badraon	1,052	0
2	Dohri Ghat	1,008	1,517
3	Fatehpur Madaun	1,011	0
4	Ghosi	1,021	0
5	Kopaganj	957	1,308
6	Mohammadabad Gohna	1,009	1,733
7	Pardaha	969	923
8	Ranipur	1,005	904
9	Ratanpura	972	0
	District (Rural) Total	**1,000**	**1,182**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 1,000 for district (rural). Among the C.D.blocks, the highest sex ratio of 1,052 is found in Bardaon C.D. block and lowest of 957 is recorded in Kopaganj C.D. block. This table also shows sex ratio of ST population in rural areas of the district which is 1,182. The

higher value of sex ratio of 1,517followed by 1,308 and 1,733 is recorded in Dohri Ghat, Kopaganj and Mohammadabad Gohna C.D. block respectively. The lower value of sex ratio of zero females is recorded in Ghosi, Badraon, Fatehpur Madaun and Ratanpura C.D. blocks.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Adari (NP)	943	0
2	Amila (NP)	918	0
3	Dohri Ghat (NP)	921	0
4	Ghosi (NP)	917	0
5	Khairabad (CT)	900	0
6	Kopaganj (NPP)	864	0
7	Kurthi Jafarpur (CT)	996	0

	Mohammadabad Gohna UA	946	0
	Mohammadabad (NP+OG)	946	0
9	(i) Mohammadabad (NP)	912	0
Sex ratio (Urban) for the district:		**919**	**983**

Table 20 shows sex-ratio among Scheduled Castes and Scheduled Tribes in urban agglomerations/towns in 2001. Among 9 towns, sex ratio of Scheduled Castes is highest in Kurthi Jafarpur (C.T) town and it is lowest in Kopaganj (NPP). Eight towns have zero sex ratio in Scheduled Tribes population. It means ST female population is zero. In urban areas of the district Maunath Bhanjan the sex ratio of SC and ST are 918 and 983 respectively.

		Urban	**205,831**	**119,193**	**86,638**	**154,538**	**66,754**	**87,784**	**71.1**	**79.6**	**61.9**	**17.7**

District and tahsil-wise literacy rate besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rate is worked out by excluding the population of 0-6 years. As per 2001 Census, the proportion of literates to total population comes to 62.2 per cent in the district. This proportion in rural area is 60.0 per cent against 71.1 per cent in urban areas. In the district the literacy rate of males (75.6 per cent) is much higher than that of females (48.7 per cent). Among the tahsils, Maunath Bhanjan tahsil tops with 63.9 per cent literates followed by Ghosi tahsil (61.2 per cent). Madhuban tahsil with 60.5 per cent literates stands at the bottom in the district. Out of 4 tahsils, the literacy rates of one tahsil is higher than that of district average. It is observed that in urban areas of district the literacy rate is higher than the rural areas.

The gap between male and female literacy is very high which comes to 26.9 percentage points in the district, as a whole. The trend at tahsil level is not much different. However this gap in urban literacy is low which comes to 17.7 points against the rural areas, where the gap between male and female literacy is 29.0 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

	District (Rural) Total:	**714,143**	**441,273**	**272,870**	**779,485**	**306,303**	**473,182**	**60.0**	**74.6**	**45.6**	**29.0**

Table 22 reveals number of literates, illiterates and the literacy rate in rural areas at C.D. block level in the district. 60.0 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 74.6 and 45.6.per cent respectively which shows very wide gap of 29.0 percentage points in male and female literacy. At C.D. block level, Ghosi C.D. block has the highest rural literacy rate of 61.6 per cent while 76.5 per cent males and 47.1 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Badraon. C.D.block (56.0 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 29.7 percentage points is found in Ranipur and Ratanpura C.D. block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	10	0.7	52	0.0
1-10	1	0.1	44	0.0
11-20	5	0.3	489	0.0
21-30	19	1.3	5,013	0.3
31-40	65	4.3	26,804	1.8
41-50	193	12.9	153,145	10.3
51-60	495	33.0	599,911	40.2
61-70	511	34.1	571,146	38.2
71-80	147	9.8	125,200	8.4
81-90	38	2.5	11,162	0.7
91-99	6	0.4	614	0.0
100	9	0.6	48	0.0
District Total:	1,499	100.0	1,493,628	100.0
Literacy rate for District:		62.2		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 10 villages (0.7 per cent) of the district and population of these villages is only 52 persons. In 9 (0.6 per cent) villages the total population is literate. 495 villages accounting for 33.0 per cent of the total villages are in the literacy range of 51-60 per cent and 511 villages (34.1 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent is observed in 283 villages (18.9 per cent) of the district. The higher literacy ranges of 71- 100 per cent covers 200 villages (13.3 per cent). The range of 51-70 have the maximum number of 1,006 villages forming 67.1 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

9	(i) Mohammadabad (NP)	12,586	7,242	5,344	8,717	3,730	4,987	74.3	82.9	65.2	17.7
District(Urban) Total		**205,831**	**119,193**	**86,638**	**154,538**	**66,754**	**87,784**	**71.1**	**79.6**	**61.9**	**17.7**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Maunath Bhanjan (NPP) town is way ahead of

other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (71.1). The literacy rate is quite high (above 79.6 per cent) in ten towns among males. Female literacy rate is not far behind in eight towns (above 61.9 per cent). However, literacy rate among females is very low (56.7 per cent) in Adari (N.P), thus the gap in male/ female literacy rate is very high (23.4) percentage points.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in C.D. blocks during 2001. In rural areas of the district proportion of literates is 54.4 per cent in which 70.1 per cent males and 38.8 females. Thus, the gap in male and female literacy rate is 31.3. Among nine C.D. blocks, Ghosi C.D. block has the highest literacy rate and Badraon C.D. block has the lowest literacy rates. The gap in male/female literacy rate in Mohammadabad Gohna C.D. block is highest and this gap is lowest in Badraon C.D. block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

9	Mohammadabad (NP+OG)	1,214	744	470	1,425	612	813	58.3	70.7	45.6	25.1
	District (Urban)	**14,284**	**9,391**	**4,893**	**20,083**	**8,519**	**11,564**	**52.6**	**66.4**	**37.7**	**28.4**

Table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 Census. The absolute number of literates is less than illiterates in the district (urban). The percentage of literates is least in Khairabad (CT) among 9 towns but the gap in male/female literacy rate is highest in case of Ghosi (N.P). The gap in male/female literacy rate is least in case of Mohammadabad (N.P) and also the female literacy rate is highest. The males in all the towns enjoy higher literacy rate than females.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

7	Ranipur	1	1	0	138	72	66	1.0	2.2	0	2.2
	District (Rural) Total:	**65**	**35**	**30**	**247**	**108**	**139**	**28.6**	**35.0**	**23.6**	**11.4**

Table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in C.D. blocks at the 2001 census. The number of illiterates is more than literates in the district and C.D. blocks, with exception to Dohri Ghat, Fatehpur Madaun and Kopaganj C.D. block. The literacy rate of the Scheduled Tribes population at 28.6 per cent is lesser than the corresponding rate at 54.4 per cent in case of Scheduled Castes community The gap in male and female literacy rates at 11.4 percentage points is also lesser than what it is in case of the Scheduled Castes community (31.3 percent). The literacy rate is highest in Fatehpur Madaun C.D. block and lowest in Ranipur C.D. block. The gap in male/female literacy rate in Ranipur C.D block is in favour of the females.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5

81-90	0	0.0	0	0.0
91-99	0	0.0	0	0.0
100	2	13.3	2	0.6
District Total:	**15**	**100.0**	**312**	**100.0**

Literacy rate for District (Rural): 28.6

Table 29 gives the distribution of villages by literacy rate range for the Scheduled Tribes population at the 2001 Census. In the district, Scheduled Tribes population is found in 15 villages out of which in 2 villages the literacy rate is 100 per cent. However, the maximum (34.6 per cent) of the Scheduled Tribes population is found in only 2 villages with literacy range from 1 - 10 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Maunath Bhanjan (NPP)	42	30	12	75	29	46	44.7	58.8	27.9	30.9

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out to 32.3 per cent of the total population in the district. The total workers are comprised of 21.4 per cent of main workers and 10.9 per cent of marginal workers and the remaining 67.7 per cent are non-workers.

Among the main workers, male participation rate in the district is 33.5 per cent and 9.2 per cent of females. Male and female marginal workers account for 8.6 and 13.3 per cent respectively. The percentage of female marginal workers is higher than males. Total workers (main and marginal) among tahsils varies from 29.9 per cent in Madhuban tahsil to 34.0 per cent in Maunath Bhanjan tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1,493,628 total rural population of the district, 19.9 per cent has been categorised as main workers and the marginal workers constitute 12.2 per cent and the remaining 67.8 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 32.1 per cent males and 7.8 per cent females are in the category of main workers. Male and female marginal workers account for 9.7 and 14.7 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.The percentage of total rural workers of the district comes to 32.2 per cent. At the C.D. block level, Kopaganj C.D block has highest proportion of total workers forming 36.2 per cent of the total population. It is closely followed by Ratanpura (34.2 per cent), Ghosi (34.0 per cent), Badraon (32.5 per cent), Ranipura (31.5 per cent. The lowest percentage of 29.1 per cent is recorded in Fatehpur Madaun C.D. block.

Table 33 shows number and percentage of main workers, marginal workers and non-workers by sex in urban agglomerations/towns in 2001 Census. In urban areas of the district the proportion of total workers is 33.0 per cent, which comprises of 27.5 per cent main worker and 5.5 pr cent marginal workers. The sex wise breakup in urban area shows that 39.1 per cent male and 15.1 per cent females are in category of main workers, proportion of male and female marginal workers accounts to 3.7 percent and 7.4 percent respectively. The proportion of female marginal workers is higher than male marginal workers in towns, except Dohri Ghat (N.P).

Note. Percent of Worker to total worker are given in brackets

It can be seen from the Table 34, that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 34.0 per cent of the total workers (main + marginal) and remaining 26.4 per cent of total workers are engaged as agricultural labourers, 17.5 per cent, household industry workers and 22.1 other workers in this district.The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 23.8 per cent in Maunath Bhanjan tahsil and 45.0 per cent in Madhuban tahsil. These variations within the district may be due to cropping and land holding patterns.The percentage of females cultivators is 27.9 per cent which is lower as compared to 37.2 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district as well as in each tahsil. The highest proportion of 23.1 per cent of other workers is recorded in Maunath Bhanjan and Ghosi tahsil while the lowest proportion of 19.8 per cent is found in Madhuban tahsil.

Note: Percent of Worker to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 32.2 per cent of the total population. Among these workers, cultivators constitute 41.5 per cent, 31.8per cent agricultural labourers, 7.7 per cent household industry workers and 19.0 per cent are other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 7.7 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (33.8 per cent) is lower than males (45.7 per cent) in the rural areas of the district. The females play an important role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 32.2 per cent in Paradaha C.D. block to 47.5. per cent in Ranipur C.D. block. Similarly for other workers, the lowest proportion is 15.1 per cent in Ratanpura C.D. block while 25.5 per cent is the highest in Pardaha C.D. block. The percentage of other workers and household industry workers together is quite low i.e. 26.7 per cent in the district. The percentage of agricultural labourers is highest in Ratanpura block (42.4) and is followed by Kopaganj (35.9). Similarly, other workers varies in C.D. blocks between 15.1 per cent in Ratanpura and 25.5 per cent in Pardaha.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of household industry workers (57.5), followed by other workers with 34.7 per cent (44 per cent male and 16.1 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (11.7) is recorded in Adari (N.P). In the agriculture labourers category Kopaganj (NPP) recorded very low percentage (1.6). Household industry workers are also very low in Amila NP (6.9) per cent and 10.7 per cent in Dohri Ghat. As the usual trend recorded in the urban areas, household industry workers are in high percentage.

(ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C D. block	Number of inhabited villages	Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1499 inhabited villages in the district 873 villages or 58.2 per cent have been provided with the educational facilities of one type or the other. Similarly 292 villages in the district constituting 19.5 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1456 or 97.1 per cent villages. As regards, post office facility which includes facilities like telegraph

office and post & telegraph, 167 villages constituting 11.1 per cent of villages have been provided with post office facility within the village. 471 or 31.4 per cent villages have been provided with the telephone facility, 89 or 5.9 per cent with transport facility, 52 or 3.5 per cent villages with bank facility and 104 or 6.9 per cent with agricultural credit societies. Similarly there are 1000 or 66.7 per cent villages which have been linked with the pucca road. Total 1378 or 91.9 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Kopaganj C.D. block has the highest (67.2 per cent) villages where educational facility is available and lowest 44.6 per cent is found in Ranipur C.D block, medical facility is highest in Dohri Ghat (46.8 per cent) and lowest (9.4 per cent) in Ranipur C.D. block. Improved drinking water is available to cent-percent villages in Badraon block while in other blocks, it is above 93 per cent.Telephone facility is highest in Pardaha C.D.block (40.2 per cent).Transport and communications is less developed in Mohammadabad Gohna where only single(0.5 per cent) village is covered by this facility. In the field of power supply 91.9 per cent villages have been covered.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D block	Total population of inhabited villages	Type of amenity available					Type of amenity available

Note : - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 depicts the number and proportion of rural population served by different type of amenities. Out of total rural population of 1,493,628 persons in the district, 1,273,325 or 85.3 per cent have educational facility of one or the other type. Similarly 661,312 or 44.3 per cent population has

medical facilities while 1,492,316 or 99.9 per cent have got improved drinking water facility. Post office facilities are available to 483,973 or 32.4 per cent population. Telephone facility is available to 828,075 or 55.4 per cent. Transport communications facility is available to 197,436 or 13.2 per cent. Bank facility is available to 192,552 or 12.9 per cent. 301,906 or 20.2 per cent have been provided with the facility of agricultural credit societies. 1,209,471 or 81.0 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1,445,050 or 96.7 per cent rural population in the district. Similar trend of availability of facilities is visible to the rural population at C.D. block level.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE,2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-

7. Agricultural Credit Societies	1,172	184	39	1,395

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table.Total 635 villages do not have primary school in their villages and out of these villages, children of 618 villages have to travel less than 5 kms. for schooling. Out of 1,499 inhabited villages as many as 1,242 are deprived of middle school and 1,487 of degree colleges. Of these 1037 avail the facility of middle school at a distance of less than 5 kms., 202 at a distance 5-10 kms. and the remaining 3.at a distance of 10+ kms. In respect of degree college 279 avail this facility at a distance of less than 5 kms, 501 between 5 to 10 kms. and rest 707 villages at a distance of 10+ kms.

Similarly there are 1,472 villages in the district which have been devoid of Hospital facility and 1,475 villages which are deprived of PHC facilities Of these 675 villages have the facility of Hospital available within 5 kms. while in respect of 429 villages the inhabitants have to cover a distance of 5-10

kms. in order to avail this facility. Similarly overwhelming number i.e. 368 villages have this facility at a distance of 10+ kms. As regards PHC 542 avail this facility at a distance of less than 5 kms., 626 at a distance of 5-10 kms. and the remaining 307 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,332 villages do not have this facility in the village itself. Of these majority i.e. 1231 have this facility at a distance of less than 5 kms., another 91 villages avail it at a distance of 5-10 kms. In the remaining 10 villages inhabitants have to travel a distance of 10+ kms.

As regards Telephone, there are 1,028 villages in the district which are without telephone facilitiy. Of these 846 avail this facility at a distance of less than 5 kms., 132 at a distance of 5-10 kms. and remaining 50 have to travel a distance of 10+ kms.

For Bus service out of 1,441 villages which do not have facility, 803 villages avail this facility at a distance of less than 5 kms., 506 at a distance between 5-10 kms. and 132 at a distance of 10+ kms.

In the entire district 1,449 villages are deprived of Commercial Bank and 1,490 of Co-operative Bank. Of these 1,449 villages which are deprived of Commercial Banks, 1,091 villages avail this facility at a distance of less than 5 kms., 317 between 5-10 kms. And the remaining 41 at a distance of 10+ kms. Regarding Co-operative Banks out of 1,490 villages 383 villages avail this facility at a distance of less than 5 kms., 676 at a distance of 5-10 kms. and remaining 431 at a distance of 10+ kms. 1,395 villages do not have agricultural credit societies. This facility to 1,172 villages is available at a distance of less than 5 kms., 184 at a distance of 5-10 kms. and the remaining 39 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1,499 inhabited villages in the district, there are 194 villages which have nearest towns upto a distance of 5 kms. Of these only 117 villages forming 603 per cent of these total villages, are having the educational facilities of one type or the other and 36 villages constituting 18.6 per cent have the medical facilities within the village, 23 villages forming 11.9 per cent have the facility of post office within the village and 82 or 42.3 per cent have the facility of telephone. Only 13 villages constituting 6.7. per cent have been linked by transport service, 4 villages comprising of 2.1 per cent have been provided bank facilities, while 18 villages constituting only 9.3 per cent have been provided by agricultural credit societies. 132 villages comprising of 68.0 per cent have been provided with pucca road.

There are 897 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 549 villages constituting 61.2 per cent have been provided with the educational facilities.19.7 villages comprising 22.0 per cent have been provided with medical facilities. 105 villages constituting 11.7 per cent enjoy the post office facility, 279 villages comprising 31.1 per cent have been provided the telephone facility. 58 villages constituting 6.5 per cent have been linked with transport communications. 32 villages comprising of 3.6 per cent have bank facility. 62 villages constituting 6.9 per cent are having agricultural credit societies, while 607 villages or 67.7 per cent are approachable by pucca road. 327 villages fall in the distance range of 16-50 kms. Of these, 49.8 per cent villages have educational facility, 14.1 per cent with medical, 8.6 per cent with post office, 26.3 per cent with telephone and transport and communications available to 4.3 per cent villages. Banks and agricultural credit societies facilities are available to 3.7 and 5.5 per cent of villages respectively.

There are 2 villages in the district which are situated beyond 50 kms.from the nearest town and out of these one or 50 per cent enjoy the educational facility in the village itself whereas one village has been provided with medical facility of one type or the other. One such village comprising of 50.0 per cent has the post office facility and also one village comprising of 50 per cent has been provided with telephone facility. None of the village has been linked by bus service whereas none of the village has been provided with the bank facilities and agricultural credit societies while one village comprising of 50 per cent has been linked by pucca roads. There are 79 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 43.0 or 54.4 per cent villages have the educational facility of one or other type. 12 village constituting 15.2 per cent have the medical, 12.7 per cent villages have post office, 29.1 per cent villages have telephone, 5.1 per cent each villages have transported communication and banks. 7.6 per cent villages have agricultural credet societies and 68.4 per cent villages have approach by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein.Out of a total 1,499 inhabited villages, overwhelming 657 have a population of less than 500 persons. Of these, 157 villages (23.9 per cent) have educational facility, 17 (2.6 per cent) have medical facility, 614 (93.5 per cent) have improved drinking water facility. No village has post office facility. 83 (12.6 per cent) have telephone facility. 12 (1.8 per cent) have been linked by bus service. Single village (0.2 per cent) have Bank facility.. No village has been provided with the agricultural credit societies, 355 villages (54 per cent) have been linked with pucca road. 566 villages (86.1 per cent) have been provided with electricity.

Out of 344 villages, which fall in the population range of 500-999 persons, 255 villages (74.1 per cent) have been provided with the educational facility, 56 (16.3 per cent) with medical facility, all the 344 villages have improved drinking water facility. 16 villages (4.7 per cent) have been provided with post office facilities, 94 villages (27.3 per cent) with telephone facility, 19 villages (5.5 per cent) with transport facilities, 3 villages (0.9 per cent) with bank facility, 16 villages (4.7 per cent) with agricultural credit

societies and 230 villages (66.9 per cent) have approach by pucca road. 94.2 per cent villages in this range have electricity.

295.villages fall in population range of 1,000-1,999 persons. 267 (90.5 per cent) of these villages have educational, 94 villages (31.9 per cent) enjoy the medical facility, 56 villages (19.0 per cent) have post office facility, 153 villages (51.9 per cent) have telephone facility, 24 villages (8.1 per cent) have transport communications facilities, 14 villages (4.7 per cent) have bank facilities, 30 villages (10.2 per cent) have agricultural credit societies and 231 villages (78.3 per cent) have approach by pucca road.

There are 185 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of improved drinking water, 95.7 per cent of these villages have educational, 58.9 per cent villages have medical facility, 42.7 per cent villages have post office, 67.6 per cent villages telephone, 14.6 per cent have transport communication, 13.5 villages have bank, 26.5 per cent villages have agricultural credit societies, 90.3 per cent villages have approach by pucca road and 98.4 per cent villages have power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Dohri Ghat	154	16,611.9	87.4	76.5
2	Ghosi	155	14,430.4	83.0	90.9
3	Badraon	143	17,275.5	83.4	85.3
4	Fatehpur Madaun	201	23,781.7	77.9	79.0
5	Kopaganj	137	17,204.3	95.7	90.3
6	Pardaha	97	14,854.0	89.0	86.6
7	Ratanpura	163	19,491.7	77.6	91.7
8	Mohammadabad Gohna	182	14,874.0	84.4	90.1
9	Ranipur	267	21,597.0	80.0	90.7
	District Total:	**1,499**	**160,120.6**	**83.7**	**86.6**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1,499 inhabited villages in the district having a total area of 160,120.6 hectares. Of this, 83.7 per cent is cultivable and 86.6 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Dohri Ghat block with 154 villages have a total area of 16,611.9. hectares, of this 87.4 per cent of land is cultivable and of the aforesaid area 76.5 per cent is irrigated. In Ghosi block, all the 155 villages have a total land area of 14,430.0 hectares,

of this 83 per cent of land is cultivable and of the aforesaid area 90.9 per cent is irrigated. In Badraon block, all the 143 villages have a total area of 17,275.5 hectares, of this cultivable area is 83.4 per cent and 85.3.per cent is irrigated. In Fatehpur Madaun. block, all the 201 villages have a total area of 23,781.7 hectares. Of this, cultivable area is 77.9 per cent. Of this cultivable area 79.0 per cent is irrigated. Kopaganj block with 137 villages have a total land area of 17,204 hectares, of this 95.7 per cent is cultivable area and out of this cultivable area 90.3 per cent is irrigated. Pardaha. block with 97 .villages has a total land area of 14,854 hectares. Of this 89 per cent is cultivated area, out of which 86.6 per cent is irrigated. Ratanpura block with a total 163 villages have an area of 19,491.7 hectares. Of this 77.6 per cent is cultivable area of which 91.7 per cent area is irrigated. In Mohammadabad Gohna C.D block with total 182 villages have an area of 14,874 hectrares of this 84.4 per cent is cultivable area and 90.1 percent area is irrigated of the total cultivable area. In Ranipur block with 267 villages has a total land 21,597 hectrars of this 80 per cent is cultivable area and out of this cultivable area 90.7 per cent is irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No.	Class, name & urban status of the Town	Per capita receipt(in Rs000)			Per capita expenditure(in Rs 000)

	DistrictTotal	**191**	**35**	**156**	**176**	**64**	**13**	**60**	**1**	**38**

The table 43 gives the per capita receipts and expenditure (in thousand rupees) for each town in the district. The average per capita receipts for towns of the district works out to Rs 191 of which Rs. 35 are derived through local taxes and the remaining Rs.156 received from all other sources. The average of total expenditure incurred per head is Rs 176. Out of this Rs 64 are spent on general administration, Rs 13 on public health and conveniences, Rs 60 on public works, Rs 1 on public institutions and Rs 38 is spent on other items. Among all the seven towns the receipt and expenditure recorded per head are the highest in Amila (N.P).

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Ghosi (NP)	Saree, Furniture, Sugar	Saree, Furniture, Sugar
2	Dohri Ghat (NP)	Pulses, pulses, Sweetmeat	Pulses, Powder of pulses ,Sweetmeat
3	Amila (NP)	Lungi, Sugar powder , Wooden Furniture	Lungi,Edible Oil ,Shos
4	Kopaganj (NP)	Saree , Edible Oil, Lungi	Saree, Edible Oil, Lungi
5	Adari (NP)	Handloom Saree, Lungi, Food grains	Handloom Saree, Lungi, Gur
6	Maunath Bhanjan (NPP)	Cotton Saree, Lungi, Medicated Oil	Cotton Saree, Lungi, Medicated Oil
7	Mohammadabad (NP)	Cotton Saree, Sweet, Banarsi Saree	Cotton Saree , Banarsi Saree, Lungi
8	Khairabad (CT)	Handloom Cloth,Silk Cloth	Saree, Handloom Cloth, Lungi
9	Kurthi Jafarpur,(CT)	Handloom Saree	Saree, Handloom, Lungi

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for lungi, cotton saree, handloom products and these are the main items which are manufactured in Mau Nath Bhanjan (NPP) Amila (N.P) and Adari (N.P) town and mainly exported to other places.

(x) Brief analysis of the data on houses and household amenities collected during, Houselisting Operations, Census of India 2001 based on tables 48 to 52.

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

District total		250,542	206,797	43,745	65,930	60,879	5,051	2,015	1,501	514

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands 250,242 consisting of 206,797 rural and 43,745 urban households. 65,930 households belong to Scheduled Castes and 2,015 to Scheduled Tribes. 243,862 households are living in their owned houses constituting 97.3 per cent of total households. Of these households, the largest number of households (93,260) have occupied 3+roomed accommodation and is followed by ouble roomed accommodation numbering to 62.235 households. Next position is claimed by households (49.807) occupying three roomed accommodation. Number of households in owned accommodation occupying one rooms rank at fourth place with 359,161 households while 2,644. households are without any exclusive room.

4,850 households living in rented accommodation account for 1.9 per cent of total number of households in the district. The largest number of 2,109 households are living in single roomed accommodation followed by 1,703 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 1,830 forming only 0.7 per cent of total households are distributed in single roomed accommodation numbering 600 double

roomed 526 and 336 in three roomed accommodation. In rural areas majority of households have bigger size and majority of them have their own houses while in urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

3	Maunath Bhanjan	59.8	35 1	5 1	46 8	47.0	6 2	85 0	12 1	2 9
4	Mohammadabad Gohna	51 0	45.6	3.4	48 1	48.4	3 5	83.3	15 2	1 6
	District Total:	**57.6**	**36.1**	**6.3**	**52.2**	**40.8**	**7.0**	**83.5**	**13.5**	**3.0**
	Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.									
Note :	Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.									
	Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.									
	Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hâtch, mud, unburnt bricks, wood etc.are used for roofs.									

The percentage distribution of households as shown in the above table reveals that 57.6 per cent of the households in the district had permanent houses. The trend is different in rural (52.2 per cent) and urban areas (83.5 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Ghosi (60.8 per cent) followed by Maunath Bhanjan (59.8.per cent), Madhuban (57.3 per cent) and lowest in Muhmmadabad Gohna (51.0per cent). In respect of semi-permanent houses, the returns was 36.1 per cent at district level whereas among tahsils, in Mohammabad Gohna it was highest at 45.6 per cent and lowest at 28.8 per cent in tahsil Madhuban. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 0 to 19.6 per cent. Temporary houses at tahsil level lie between the range of 3.4 per cent (Mohammadabad Gohna) to 13.9 percent (Madhuban).

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or

otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well

situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage menas closed and open drainage.

The above table shows that out of total households of the district 93.9 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 93.6 and 95.1 per cent. Tahsil Maunath Bhanjan had higher order of proportion of households for rural area was 63,211 and 32,751 in urban areas. Electricity was available for 39.8 per cent of households at district level. Households of the district had better access of electricity. Bathrooms and toilet facilities were available in 20.1 and 23.0 per cent of households. Tahsil Madhuban was poorly served in respect of these amenities. Similarly drainage facility was also poor in Madhuban and Mohammadabad Gohna. At district level drainage facility was available for 72.3 per cent of the total households, whereas the proportion of rural and urban areas households accounted to 68.7 and 89.6 per cent

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 41.6 per cent of households in the district use firewood as fuel for cooking, the proportion in the rural area is 40.7 and in urban area it comes to to 45.4 per cent of the households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in to 4.2 per cent of the households. The composition of rural and urban comes to 1.2 and 18.6. per cent respectively. Kerosene is used for cooking in as many as 4.9 per cent of the households (0.6 per cent in rural and 24.8 per cent in urban households). The other methods like crop residue, cowdung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between to 0.2 per cent to 36.0 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in all tahsils where predominant fuel is firewood. The table also shows that firewood, LPG (cooking gas) and kerosene are the predominant fuel for cooking in the urban areas of the district.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

Above the table reveals that out of the total households (250,542) of the district, in all 107,863 could avail banking services at district level while only 85,077 households, 10,481 households, 40,172 households, 177,276 households, 17,280 households and 4,100 households enjoy the availability of households assets like radio/transistor, television and telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively. 55,249 households have no any specified assets.

It also reveals that at tahsil level a highest proportion of 34,331 of households were availing banking services as well as all other households assets in Maunah Bhanjan tahsil. The highest of none of specified assets 23,048 were also found in the tahsil Maunath Bhanjan, on the other hand the lowest of 22,417 households were observed were availing banking services in Madhuban. Number of the enjoyers of none of the specified assets was 8,337 households in Madhuban tahsil was lowest.

(xi) Major Social and Cultural Events, Natural and Administrative Development and Significant Activities during the decade :

Bhojpuri language known as Purbi is largly spoken in the district. Old caste structure has lost rigidity due to impact of progressive social forces. Fasting and feasting are the special feature of Hindu festival spread throughout the year. The main Hindu festivals are Dashahara, Deewali and Holi. Muslim festivals are also celebrated with great enthusiasm. Sikhs take out procession on the birthday of Guru Nanak and Guru Govind Singh. Fairs are held on religious occassions of each community. They wear their traditional dress on the occasionof their festival. No significant social, cultural or natural events have taken place in the last decade. Only administrative change that has taken place is the creation of new tahsil, Madhuban.

(xii) Brief Description of Places of Religious, Historical, Archaeological Importance in villages and places of Tourist Interest in the Town of the District:

Ghosi : The place is undoubtedly of great antiquity.

1. Nahush Ka Qila : The remains of an old mud fort known as Nahush Ka Qila link the name of this place with Nahushi, after the ancient Hindu Raja Nahush, said to be the founder of this town.

2. Maunath Bhanjan : The place of older antiquity than Azamgarh lacks any definite tradition regarding its origin. It is a railway junction on N.E. Railway. Cotton cloths are manufactured here on a large scale. Banarasi Sari's well known to all, are exported from here to all over country and abroad. It has numerous Hindu temples and Muslim mosques namely the Shitala Devi temple. Malik Tahir Baba Ka Rauza, Katara Ki Masjid and Ram Ghat Ki Maszid. Big fairs are also held here at religious occasion and attended by large number of people.

(xiii) Major Characteristics and Contribution of the District

During the period of freedom struggle the contribution of district Mau is still remembered. In the course of first struggle for freedom of 1857 many lovers of freedom co- operated with revolutionaries. Mahatma Gandhi visited Dohrighat on 3rd October 1939 and blazed the flame of freedom among common people. Dandi march against repressive Salts law launched by Mahatma Gandhi on 6th April 1930 had import on numerous people of Mau district who took active part in it. This reflects the awakening and public spirit in the people of the district. Jaibahadur Singh a great patriot of this district.made a plan to plunder the train near by Piparidih station in 1938 and accomplished his plan accompanied by Krishan Deo Rai, Zamin Ali, Uday Narain Dubey, Keshava Shukla and others. Quit India movement led by Mahatma Gandhi on 9th August 942 was enthusiastically supported by the people of the district. The district Magistate of that period, Mr. Navalet got killed by a bullet as people assembled in great multitude to protect against exploitation and oppressive conduct of Madhuvan thana incharge. During that protect rally many revolutionaries became martyr. In the memory of these martyrs a road has benn constructed. Under the leadership of Radhey Rai, Ram Chandra Rai, Baldeo Rai and Pateshwari Rai revolutionaries burnt the Amila town area office on 15th August 1942 to protect against the oppression of the family of prominent revolutionary, Algu Rai Shastri. The revolutionaries exterminated the railway tracks and breached the means of communication and burnt the railway station on Indara 17 August 1942. Three revolutionaries died in police shoot out.

(xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation and Coverage of Data

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order

along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufactured	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities namely Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/Magazine etc.. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundary and separate land records. Thus in Census the basic unit of rural areas is taken as a revenue village which has definite surveyed boundaries. A revenue village may comprise of several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what have been mentioned above since there is no surveyed village in the State. Therefore an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also be included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included :

1. Appendix I — Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II — Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III — Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV — C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility is available.
5. Appendix V — Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI — Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII — List of villages according to the proportion of the Scheduled Caste and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII — Number of villages under each Gram Panchayat (C.D. Block wise)
9. Appendix IX — Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detail and explanatory notes on each of these abbreviations has also been incorporated for easy clarification of the subject concerned

Part A- Village and Town Directory (Section I and II)

Section - I

Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)(vi)	Navigable CanalNavigable waterways other than River,Canal	NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposesEA	

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	The appendix shows the list of villages according to proportion of the
Appendix-VII B	Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES FULLY MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. number	Name of the Village	Location Code Outgrowth	Merged in Town and	Number
1	2	3	4	

Not applicable as there are no villages merged in towns & any outgrowths at 2001 census.
