DEGREE COLLEGE , TECHNICAL INSTITUTION

MOTIF

SHAHEED PARK

Shaheed Park, Ballia city recalls the Quit India movement of 1942, which aroused the passion of the masses. On 15th August 1942, a mob attacked the Bauria police station and hoisted the tricolor atop it's building, which was later removed by the police. The infuriated mob, numbering about 25,000 raided the police station again on August 18th making numerous attempts to rehoist the flag. The police responded by a volley of bullets, resulting in death of at least 20 persons. The sacrifice of the people is marked by the martyrdom, who sacrificed their lives here during the freedom struggle of 1942.

Annexure VII Age, Sex and Education in the district, 1991 Census 1140
Annexure VIII Distribution of different mother tongues returned in 1991 Census 1143

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. *The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract* (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage

enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

ANALYTICAL NOTE

Analytical Note

(i) *History and Scope of the District Census Handbook*

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

There is no single opinion about the name of the district. It is locally said to have been derived from the sage Valmiki. Another belief is that the name is derived from the sandy nature of the land of the place, locally known as 'Ballua'.

In ancient times the region covered by the present district of Ballia, lay in the Kingdom of Kosala. The brick-strewn mounds and fragmentary remains, found at a number of places in the district are associated with mythological history of the place. In the sixth century B.C. Kosala was known as one of the sixteen Mahajanpadas (great kingdoms). About the middle of the 4th century B.C., the realm of Kosala was brought to an end by Mahapadma Nanda. The Nandas were supplanted by Mauryas under Chandragupta (324-300 B.C.). With the fall of the Mauryas a new dynasty that of the Sungas came to power. The history of the district in the era immediately following the fall of the Sungas is shrouded in obscurity till the advent of the Kushanas. After the dismemberment of the Kushanas empire, the history of Ballia is mostly enveloped in darkness. Chinese (Buddhist) pilgrim, Fa-hien (400-411) came to India to pay homage to the holy places of Buddhism. He mentions that on his way from Kashi to Patliputra, he came across a Buddhist monastery and a Buddhist temple in Ballia.

Harsha Vardhana (606-647) established an extensive empire including this district. During his reign Hiuen Tsang (629-644) another famous Chinese

pilgrim and a Buddhist monk, passed through this district on his way from Varanasi to Nepal. After the death of Harsha, nearly three quarters of a century later, Yashovarman reigned in this district. After Yashovarman the kingdom of Kannauj came under the sway of the Gurjara Pratiharas.

Muslims names of places are rare in this district and its references given by Muslim historians are less common. This tract remained unconquered due to its geographical position and remoteness. According to tradition, pargana Sikandarpur was colonised by Muslims. It is believed that Qutub-ud-din Aibak, Muhammad Gauri's general passed through this district in 1194.

The tract occupied by the present district of Ballia finds no mention in the history of mediaeval India written by Muslims historians probably because the surrounding areas of Ghazipur, Jaunpur and Saran (in Bihar) remained in the possession of Hindu rulers. At certain periods the district was actually subjected to the Muslim rulers of Bengal. The tract covering the present district of Ballia appears to have remained under the undisputed control of the Jaunpur kingdom till 1479. About the beginning of the 13th Century, Muslim immigrants began to arrive in the district. In 1528 Babur marched eastwards touching the border of the district. When Akbar came to the throne (1556) the eastern part, in which included the district of Ballia, was conquered in 1559. About 1565, Ballia was affected by the rebellion Khan Zaman against Akbar. The records of Akbar's reign in the Ain-i-Akbari furnish a certain amount of information regarding the condition of Ballia in respect of cultivation, revenue and the principal land holders in each pargana. The names of the parganas have remained unchanged.

In 1738, Mansa Ram was in charge of the sirkars of Jaunpur, Varanasi and Chunar. Mansa Ram died within a year and was succeeded by his son Balwant Singh. Balwant Singh was the best administrator that the people of the region had known. Balwant Singh retained his estate till his death on August 23, 1770. He was succeeded by his son Chait Singh.

In May, 1857 with the news of the outbreak of the freedom struggle, Ballia rapidly fell into a disorganised state and general anarchy, which prevailed there for a time. People of the district fought with the British forces under Kunwar Singh (the famous freedom fighter of Bihar). In the later half of the 19th century great leaders of country raised the voice of freedom and Ballia could not remained untouched by these national leaders. People of this district acted positively to every call given by the eminent national leaders regarding freedom movement.

In 1921, Mahatma Gandhi launched his famous non-cooperation movement which received enthusiastic response from all sections of the people in the district. Jawahar Lal Nehru visited Ballia in 1922 and again in 1923. Mahatma Gandhi visited Ballia in 1925. The civil disobedience movement was launched in 1930 and Ballia played an important role in the movement. During the quit India movement of August 1942, on August 16, the Rasra treasury was attacked and two days later the police station of Bairia was reattacked. On August 20, 1942, 'Independence' was declared for Ballia and a popular government was formed with Chittu Pandey as its first head. The sacrifices of the people earned for Ballia the reputation of Revolutionary Ballia during the Quit India movement. At last on August 15, 1947 the country and with it the district was liberated from alien rule and became to be independent.

(iii) Administrative Set-up:

The district is the eastern most part of the state and touches the borders of Bihar state. It is triangular in shape. For administration it is divided into six sub-divisions or tahsils namely Ballia, Bairia, Bansdih, Sikandarpur, Belthara Road and Rasra. Number of development blocks are 17. There are 9 towns in the district, out of which two towns are under Nagar Palika Parishad and 7 are Nagar Panchayats.

Jurisdictional Changes (1991-2000)

The notable jurisdictional changes, that has taken place, were the creation of two new tahsils namely Belthara Road and Sikandarpur. 283 villages and one town were transferred from Rasra tahsil to the new tahsil of Belthara road, whereas 272 villages and two towns of Bansdih tahsil were subtracted

Sl. No.	Name of District/ Tahsil	Notification No. & Date	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
1	Belthara Road Tahsil	5-2 (337/84-34-R-5 Dated 01-09-1994	283 villages and one town transferred from Rasra tahsil	
2	Sikandarpur Tahsil	3649/1-5/94-34/84 -R-5 Dated 17-09-1994	272 villages and two towns transferred from Bansdih tahsil	
3	Rasra tahsil	5-2 (33)/84-34-R-5 Dated 01-09-1994		283 villages and one town transferred to Belthara road tahsil
4	Bansdih Tahsil	3649/1-5/94-34/84-R-5 Dated 17-09-1994		272 villages and two towns transferred to Sikandarpur tahsil

and added to new tahsil of Sikandarpur.

District Administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level e.g. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, and etc. each have a departmental district level office, departments point of view the district is divided into community development block. Block Development Officers (BDO) looks after development works at community developments blocks level. Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in small districts are in charge. Additional Superintendent of Police (ASP) in their respective area. Deputy Superintendent of Police (DSP) look-after the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The judicial administration of the district is headed by District and Session Judge. In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate etc.

The nucleus of the district body for Local self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

(1) Location and size :

District Ballia is bounded in the west by Mau district, on the north by Deoria, in the north east and south-east by Siwan and Saran districts of Bihar State, on the south by Ghazipur district of Uttar Pradesh and Buxar and Bhojpur districts of Bihar state. The district lies between the parallels of 25°33' and 26°11' North latitudes and 83°38' and 84°39' East longitudes. Its maximum length from east to west is about 185 km. and maximum breadth from north to south is about 60 kms. The geographical area of the district is 2981 sq.kms.

(2) Physiography :

District Ballia is a part of Middle– East Ganga Plain. It is a level plain with very little variation in height. On the basis of geology, soils, climate, topography and natural vegetation, the district is divided into three regions.

1. Ghaghra Khadar :

The region is situated parallel to Ghaghra river. It has an elongated shape. The Khadar tract is locally known as 'Diara'. The general slope of the region is towards east. The Ghaghra is the main river which drains at the boundary line of the district and joins the Ganga in the eastern end of the district. This river is notorious for its changing drainage course and flood havoc. The region is composed of Alluvium and Dun gravels. The soil of this region has high productivity.

2. Ballia Plain – The region is situated in between the high bank of the Ganga in the south and the Ghaghra in the north. It is a central upland of the Ballia district. The general slope of the region is towards southeast direction, whereas in north of Ballia town, it is towards south. Towards north, the surface height increases. Natural depressions or tals have special significance in this zone. Some of the Tals are very large in size. Geologically the region is formed by Alluvium and Dun gravels.

Ganga Khadar

The region is situated parallel to the Ganga river in an elongated shape. The tract is locally known as 'Diara'. The Ganga flows on the boundary line of Uttar Pradesh and Bihar states. Due to changing courses of Ganga, boundary dispute arises between Uttar Pradesh and Bihar. To check the extent of flood water, embankment has been constructed parallel to the river.

(3) Drainage :

There are only three main rivers in the district the Ghaghra, the Ganga and the Saryu. Ghaghra is a great river and flow on the northern border of the district. The Ghaghra is much more unstable and flood prone. The Ganga first touches the boundary of the

district in the extreme south. The chief tributaries of the Ganga in this district is the Saryu. Mangai river is the main tributary of Saryu. The Budhi river is another tributary of the Saryu.

The most important lake in the district is the great Suraha Tal which covers a large area. It is the largest lake of Uttar Pradesh with its circumference is about 24.9 sq. km. It is drained or filled by the Katehar which connects it with the Ganga. Other Lakes in the district are Mundiari Dah, Reoti Dah, Kawal Dah, Taliji Tal and Goka Tal.

Climate :

The climate of the district is moist and relaxing except in the summer and cold seasons. The year may be divided into four seasons; the cold which starts from half of November to February; the hot from March to middle of June; the south west monsoon from middle of June to the end of September and lastly the post monsoon or transitional season between October and half of November. May is generally the hottest month. The mean daily maximum temperature is 41.6°C. On individual day the maximum temperature may reach over 47°C. January is usually the coldest month with the mean minimum of about 9.9°C. Cold waves affect the district during the winter and temperature drops to 2°C. About 88 percent of the annual rainfall is received during the south west monsoon months. The variation in the rainfall from place to place in the district is not much. The general rainfall recorded during 1998 in the district was 983mm. The relative humidity is generally high during the south west monsoon season. The driest part of the year is summer season. Winds are generally light.

Natural and Economic Resources

Forestry :

There are no forests in the district. Whatever vegetation is visible in the district it is planted under social forestry. Forest department is planting trees on both sides of roads, canals and railway track. Trees are also being planted in the lands of gram sabhas. A few patches of dhak (Butea monosperma) are visible. The other trees which rare commonly found in the district are bargad mahua neem, pipal, gular, Jamun, aonla, Kathal or Jackfruit and shishum. The toddy palm is found in abundance.

Not being endowed with forests, the variety and number of wild animals is limited. The fox and jackal are common. The wild pig and black buck are occasionally seen. The nilgai (blue bull) is found in most parts of the district. A variety of birds is found in the district. Partridge and pigeon are commonly found.

Minerals and Mining :

District Ballia is deprived of mineral product of any repute. The mineral products are confined to the saline earth or reh and limestone conglomerate known as Kankar and sand. Kankar is quarried and is used for road construction and for producing lime.

Soil :

There are natural soils such as matiyar or clay, bhur or sand and dumat or loam. The clay soils vary in character and can only be used for the cultivation of rice during the rains. The bhur ranges from a very light loam to soil filled with Kankar or which is almost pure sand. The loam of the district is light and fertile soil. The soil can also be divided into rabi and rice land. A heavy soil containing a good deal of clay is classed as dumat matiyar and sandy loam as dumat baluhi.

Land and Land use Pattern :

The district had a geographical area of 299,266 ha., out of which 221,169 hect. was net area sown. There was no forest area in the district. Cultivable waste land was 1666 hact., present fallow 13,389 hact. other fallow 7,481 and land not available for cultivation 12,905 hact. The land not available for cultivation consists chiefly of sterile usar plains and sandy tracts. The land use other than cultivation was 37,035 hact. and orchards occupied 5,493 hact. Pastures had only 128 hact of area. Multiple cropped area was 122,865 hact. These statistics are quoted for the year 1997-98 available in Sankhyakiya Patrika – 1999.

Agriculture and Crop Pattern :

The three harvests of the district are Rabi, Kharif and Zaid. Kharif (the rainy season crop) is sown in June and July and is harvested in September –October and Rabi (irrigated crops) the winter crop is sown in October–November and is harvested in February–March. Zaid is summer crop. The area and number of crops are negligible. Foremost among the Kharif crops is rice. Maize is a very important staple in some parts of the district. Next in importance among the Kharif staples are jowar and bajra. Other crops are pulses. Principal rabi crops are barley, wheat gram, pea and pulses. The main non-food crops of the district are sugarcane and oil seeds of different kinds. Sugar-cane is an important crop. The importance of crops can be gruped in the statistics for the area under different crops. During 1997-98. paddy occupied 112,791 hectare, wheat 130,162 hectare barley 7,669 hectare., Jowar 1,606 hectare bajra 1,717 hectare maize 22,771 hectare,

pulses 34,714 hectare., and oilseeds 1,055 hectare. Among commercial crops sugarcane occupied 11,215 hectare and potato 7,001 hectare. The crop density during 1996-97 was 158.42.

The cultivators of the district could avail the services of 66 seed godown/fertilizers depot, 18 insecticide depot, 4 seed farm, 17 cold storages and 2 agriculture service centres. For storage of cereals, the district had 7 warehousing godowns under various agencies during 1998-99.

Various scheme and programme are being undertaken by the agriculture department for promotion of better agriculture methods, equipments and improved variety of seeds.

Irrigation :

The district is well provided with means of irrigation. A large proportion of the land is low lying and consists of recent alluvium which does not require artificial irrigation. The district is surrounded by rivers from three sides and with numerous ponds and lakes. Therefore the district has to face havoc of floods every year.

As far as modes of irrigation are concerned, nearly 78 percent cultivated land is irrigated by private and government tubewells and 22 percent land is irrigated by canals. Other means of irrigation, irrigates nominal area. During 1998-99, the district had 407 km. long canal network, 676 government and 8,310 private tubewells, 636 wells and 591 persian wheels and 50384 pumping sets. The Dohrighat canal system is the chief source of canal irrigation in the district.

Animal Husbandry :

Agriculture and animal husbandry are complimentary to each other in the rural economy, therefore, due emphasis has been given fot the development of animal husbandry by the government through animal husbandry department. District animal husbandry department is divided into two sections – the veterinary and the animal husbandry. These two sections play important role for the development of cattle, poultry farming, sheep breeding and allied schemes.

The ordinary cattle of the district are small and inferior in strength. The breed of local animals are being improved by selective breeding and artificial insemination from improved species of animals. Regular cattle census is undertaken in the district after every five years. According to the livestock census of 1993, the district had 382,419 bovine cattle of different breed. Buffaloes were 162,602, sheep 29,132, goats 200,438, horses and ponies 3,897, pigs 50,320 and other animals were 12,200 in number.

Cattle development has been receiving the attention of government since long time. Schemes for intensive cattle development have been launched in the district from time to time. To improve the breed of the cattle, government has established artificial insemination centres. There were 20 such centres and 44 sub centres in the district during 1998-99. There were also 53 veterinary dispensaries, 40 animal development centres, one animal breeding farm, one sheep development centre and 9 piggary development centres. Under operation flood scheme, milk producing societies came int existence. There were 235 milk producing co-operative societies in the district.

Fishery :

Fish of different varieties are found in the district. The main activities of the fisheries department are development of reservoirs for pisciculture and supply of fingerlings to private breeders. During 1998-99, the number of departmental ponds were 4 having an area of 9.70 hectare. During the same period 11,501 thousand fingerlings were supplied to fish breeders.

Industry :

The district has a good agricultural base and a reasonably good infrastructure of various facilities, but the industrial base is weak, resulting in a low economic return to the district. Kisan Sahkari Chini Mill Ltd. Rasra is the only large scale unit in the district. Another Mill U.P. Yarn Company Ltd., Rasra (weaving mill) is closed for a long time. Among medium and small scale industries there are units of Bidi making, offset press, cold storage, rice mill, leather products, glass and ceramics, wood work, brick kiln, readymade garments and buildings materials. Under the village and cottage industries, gur making, handloom, leather shoe making, blanket weaving, edible oil extraction and pottery are the main goods produced in the industrial units. As per the statistics available for 1997-98, the number of industrial estate was one, that had eight sheds, and out of which 2 sheds are working. During 1998-99, number of small scale units were 9,716.

Trade and commerce :

The pattern of trade has not changed over the years. Agriculture produce is the main item of export while general merchandise, cloth and other consumer goods make the imports. The district has numerous trade centres, and prominent among them are Ballia, Rasra and Bansdih.

Transport :

Railways, motor cars/jeeps, buses, scooter/ motor cycle, bicycles, cycle rikshaws, and trucks are main mode of transport for vehicular traffic and goods. Tractors are used for agricultural purposes but are also used as a means of transport in rural areas. Boats are used for river traffic and carry passengers, cattle and goods.

There are three categories of roads in the district viz. the state highways, major district roads and roads which belong to the local bodies. Total length of roads in the district during 1997-98 was 1,714 km. out of which public works department of state government manages 1,298 km. The state highways passing through the district are 196 km. During 1998-99, the district had 290 bus stations/bus stops. Number of railways stations are 20 (including halts) and length of railway line is 126 km. Number of villages connected with all weather roads were 634.

Electricity and Power :

Electric power is available from the U.P. Grid to the district. The district has no power producing units and power is supplied from Mirzapur, Varanasi and Sonbhadra . During 1997-98, out of the total available electricity of 200,972 thousand kwh. agriculture consumed 113,915 thousand kwh. distantly followed by domestic light 51,433 thousand kwh. and industry 24,096 thousand kwh. A total of 1,784 villages have been electrified.

Gram Panchayat, its composition, jurisdiction and role in villages development –

A Gram Panchayat acts as the executive of the Gram Sabha and plays vital role in village development.

Composition : The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 820 gram sabhas in the district.

It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its term :

The new Panchayat Raj Act of 1993 has fixed a uniform five year for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand. The panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualifications :

In order to be elected to a village panchayat, a candidate should posses the following qualifications :

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

Functions :

A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a centre.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigational facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area of the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments

such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc. have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has

not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously;

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits and

iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member

households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	38	Habura
2	Badhik	39	Hari
3	Badi	40	Hela
4	Baheliya	41	Jhusia, Jatawa
5	Baiga	42	Kalabaz
6	Baiswar	43	Kanjar
7	Bajaniya	44	Kapariya
8	Bajgi	45	Karwal
9	Balahar	46	Khairaha
10	Balai	47	Kharwar
11	Balmiki		(excluding Banbasi)
12	Bangali	48	Khatik
13	Banmanus	49	Khorot
14	Bansphor	50	Kol
15	Barwar	51	Kori
16	Basor	52	Korwa
17	Bawariya	53	Lalbegi
18	Beldar	54	Majhwar
19	Beriya	55	Mazhabi
20	Bhantu	56	Musahar
21	Bhuiya	57	Nat
22	Bhuyiar	58	Pankha
23	Boria	59	Parahiya
24	Chamar, Dhusia,	60	Pasi, Tarmali
25	Chero	61	Patari
26	Dabgar	62	Rawat
27	Dhangar	63	Saharya
28	Dhanuk	64	Sanaurhiya
29	Dharkar	65	Sansiya
30	Dhobi	66	Shilpkar
31	Dom	67	Turaiha
32	Domar	**Scheduled Tribes**

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded

as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting

wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \text{S ASFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \text{å ASMFR}_{15\text{-}19}^{45\text{-}49}}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\textit{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of

ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution:

The total population of the district is 2,761,620 divided into the 2,491,676 in rural and 269,944 in urban areas. The most populous tahsil is Ballia with 822,125 followed by Rasra tahsil with a population of 472,773 persons. The least populous tahsil is Belthara Road with a population of 334,773. The maximum urban population is found in Ballia tahsil with 121,694persons followed by the Bansdih with 61,208 urban population whereas, the urban population in Bairia tahsil which is Nil. At the 2001 Census the district has 9.8 per cent of its population living in towns. As compated to this in the State the same is about 20.8 per cent. The proportion of urban population is highest at 14.8 per cent in Ballia tahsil followed by about 14.7 per cent in Bansdih tahsil and least of 5.1 per cent found in the Belthara Road tahsil. In Bairia tahsils there is no urban population.

Size-class and status of towns:

There are 9 statutory Town in the district. Ballia (NPP) with 101,465 population is Class I town. There are five Class III towns in the district namely Sikandarpur (NP), Rasra (NPP), Chitbaragaon (NP), Bansdih (NP) and Revti (NP). Also in the district there are three class IV towns viz. Belthara Road (NP), Maniyar (NP) and Sahatwar (NP).

Population Growth

The population of the district in 1991 adjusted to jurisdiction of 2001 was 2,262,273 in the district. Where as at 2001 Census it become 2,761,620 persons. There has been a decadal increases since 1991 amounting to 499,347 in absolute term (22.1 per cent). The males who were 1,162,307 at 1991 Census increased to 1,413,774 and females increased from 1,099,966 to 1,347,846. As against to 22.3 per cent decadal growth in the district, the growth rate has come down to 22.1 per cent in the in the district during 1991-2001

Population Density :

The area of the district is 2981.0.square kilometre. The density of population in the district is 926 as compared to 690 in the state. In the rural areas of the district the population density is 850.

Sex ratio:

The sex ratio in the district is 953 while it is 898 in the state. In the rural areas of the district the sex ratio is high at 959 while it is only 905 in urban areas. The rural sex ratio of the district is better to the state. The sex ratio among tahsils varies between 920 in Bairia to 998 Sikendarpur. Among C.D. blocks the sex ratio varies from 909 Bairia to 1016 Pandha. Among towns of the district the least sex ratio is found in Ballia (NPP) 862 and highest in Revti (NP) 951. The sex ratio of population in the age-group 0-6 is 942 in the district which is quite low to 953 from the general population. The sex ratio of population of the age-group 0-6 in rural areas is 943 against 931 in urban areas. The sex ratio of population in the age-group 0-6 among 18 C.D. blocks varies from as low as 877 in Ratanpura as high as 966 in Rasra. The sex ratio of rural population in the age-group 0-6 by ranges for about 24.0 per cent population fall in the range 900-949. The sex ratio of population in the age-group 0-6. among towns varies from 887 in Rasra (NPP) to 974 in Chitbara Gaon (NP).

Work Participation Rate

In the district about 28.8 per cent population is worker. In which males working population is 41.5 per cent against 15.4 per cent among females. Main workers constitute 18.3 per cent of population. Mail

Male workers predominate female among marginal workers. Non-workers contribute about 71.2 per cent of total population. In which 58.5 percent males and 84.6 percent are females. In rural areas 83.7 per cent females are non-workers. Of the total worker population in the district 30.1 per cent are cultivators, 40.1 per cent engaged as agricultural labourers, 5.4 per cent in household industry and 24.4 per cent as other workers. Among male workers about 33.7 per cent are cultivators as compared to about 20.0 per cent among females. Similarly as against 28.9 per cent male other workers, the proportion of female is only 11.6 percent. In rural areas of the district as much as about 30.1 per cent of working population is cultivators as against only 9.0.per cent in urban areas. In case of other workers, the composition of rural and urban proportion is 20.6 and 66.0 per cent of working population. It may be mentioned that the working population in the district is about 28.8 per cent as compared to about 32.5 per cent in the state

Literacy

In the district 57.9 per cent of the population is literate as against about 56.3 per cent in the state. In the district 71.9. per cent of the male population is literate as compared to 43.2 per cent in the female. In the district literacy rate is about 68.3 per cent in urban areas as against about 56.7 per cent in rural areas. The gap in male/female literacy rate is 29.9 per cent points in rural areas as compared to 18.0 per cent in urban areas. The literacy rate among C.D. blocks varies between 62.6.per cent in Hanumanganj to 44.8 per cent in Revati. Similarly, the literacy rate among towns varies from about 81.3 per cent in Belthara Road (NP). to 50.7per cent in Revati (NP).

(viii) Brief analysis of PCA data based on inset tables 1 to 36 :

The district throw up vivid picture of its population by varying parameters at the 2001 Census. A few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables 1 to 36.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Sl. No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Belthara Road	NA	NA	NA	334,773	317,539	17,234	NA	NA	NA	NA	5.1
2	Sikanderpur	NA	NA	NA	377,297	336,727	40,570	NA	NA	NA	NA	10.8
3	Rasra	NA	NA	NA	472,773	443,535	29,238	NA	NA	NA	NA	6.2
4	Ballia	NA	NA	NA	822,125	700,431	121,694	NA	NA	NA	NA	14.8
5	Bansdih	NA	NA	NA	417,558	356,350	61,208	NA	NA	NA	NA	14.7
6	Bairia	NA	NA	NA	337,094	337,094	0	NA	NA	NA	NA	0
	District Total:	**2,038,186**	**224,087**	**2,262,273**	**2,761,620**	**2,491,676**	**269,944**	**22.1**	**22.2.**	**20.5**	**9.9**	**9.8**

The growth rates of each tahsil in the Ballia district for total, rural and urban areas and percentage of urban population to total population is given in above table1. The decadal growth rate of the district is 22.1 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 22.0 and 20.4 per cent respectively. Out of the total population of the district 90.2 per cent lives in rural areas while 9.8 per cent lives in urban areas of the district. The proportion of urban population has slighyly declined during the decade from 9.9 per cent in 1991 to 9.8 per cent in 2001 in the district. The highest growth of urban population is recorded in Ballia tahsil (14.8) per cent tahsil and lowest is registered in Bairia tahsil (0.0.).

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Sl. No.	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages
			Persons	Males	Females		Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Ratanpura	1	953	478	475	0 (0.0)	0	0	0 (0.0)	0	0	1 (100.0)
2	Siar	159	203,123	102,243	100,880	25 (15.7)	1,233	1,248	27 (17.0)	5,060	5,048	34 (21.4)
3	Nagra	168	230,228	115,535	114,693	16 (9.5)	784	796	37 (22.0)	6,687	6,695	42 (25.0)
4	Navanagar	95	137,266	68,912	68,354	13 (13.7)	460	468	19 (20.0)	3,469	3,452	25 (26.3)

Table-2 gives C.D. blockwise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range in the

district. Out of 1',830 inhabited villages, 343 (18.7 per cent) are small sized villages with population below 200 persons. In the size of 200-499 persons there are 357 villages having 19.5 per cent villages of the district while in the size class of 500-999 population there are 403 villages with 22.0 per cent of the total villages in the district. 357 villages (19.5 per cent) are in the size class of 1,000-1,999 and 291 villages (15.9 per cent) are in the size class of 2,000-4,999, Only 65 villages (3.6 percent) are in the size class of 5000- 9999 and 14 villages (0.8 Percent) are in the size class of 10,000 and above population.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New

(i) Statutory town – NIL

(ii) Census town - NIL

(b) Denotified - NIL

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL

(iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL

(c) Declassified - NIL

(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	68	3.7	84,111	3.4
11--20	10	0.5	124	0.0
21-50	28	1.5	1,633	0.1
51-100	35	1.9	4,652	0.2
101-200	91	5.0	19,437	0.8
201-300	73	4.0	34,738	1.4
301-500	168	9.2	102,942	4.1
501 +	1,357	74.2	2,244,039	90.1
Not known	0	0.0	0	0.0
District Total:	**1,830**	**100.0**	**2,491,676**	**100.0**

Table 4 shows the distribution of villages by population density ranges. Total inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 1,357 accounting for 74.2 per cent of the total inhabited villages fall in the density range of 501+ persons having 90.1 per cent population. While the corresponding proportion in the lower range of 0 to 10 is 3.7 per cent of the total inhabited villages having 3.4 per cent population of the district., the range 11-20 covers only 10 villages (0.5 per cent). In the medium densities ranges of 21-50 and 51-100 persons account for 1.5 and 1.9 per cent of inhabited villages respectively. Both these ranges claim 0.3 per cent of rural population.

TABLE-5: SEX RATIO OF STATE AND DISTRICT 1991-2001

Census Year	UTTAR PRADESH			BALLIA		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	938	941	916	1085	1081	1115
1911	916	922	866	996	997	988
1921	908	918	834	949	953	906
1931	903	916	813	947	954	878
1941	907	922	824	986	993	920
1951	908	922	827	1041	1049	966
1961	907	921	817	1037	1048	806
1971	876	884	826	975	982	858
1981	882	889	850	984	992	911
1991	876	879	864	946	951	904
2001	898	904	876	953	959	905

Note :- Sex ratio has been defined here as the number of female per 1000 male

As per 2001 Census the sex-ratio of 953 female per 1,000 male has been recorded as 953 in the district against the state average of 898. The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 2001 and remained above the state average. The lowest sex ratio of 946 females per 1000 males were recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in district.

TABLE-6 : SEX RATIO BY TAHSILS, 2001

Sl.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Belthara Road	983	987	913
2	Sikanderpur	998	1,004	945
3	Rasra	971	975	908
4	Ballia	923	932	875
5	Bansdih	959	962	939
6	Bairia	920	920	0
	District Total:	**953**	**959**	**905**

The table-6 gives sex-ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 953 female for every thousand male in the district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas. The sex-ratio among rural and urban population is 959 and 905 respectively. The rural sex-ratio in the tahsils varies between 920 in Bairia tahsil and 1,004 fin Sikanderpur tahsil.

TABLE-7 : SEX RATIO BY CD BLOCKS, 2001

Serial No.	Name of C D block	Sex ratio
1	2	3
1	Ratanpura	994
2	Siar	987
3	Nagra	993
4	Navanagar	992
5	Pandah	1,016
6	Maniyar	998

10	Sohaon	927
11	Hanumanganj	911
12	Dubhad	924
13	Belhari	940
14	Bairia	909
15	Veruarwari	969
16	Bansdih	959
17	Reoti	938
18	Murli Chhapra	929
	District (Rural) Total:	**959**

Table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 959 female per 1,000 male, as a whole. Among the C.D. blocks the highest sex-ratio of 1,016 is found in Pandah C.D. block and is followed by Maniyar (998) while the lowest of 909 is recorded in Bairia C.D. block. The sex-ratios of Ratanpura, Siar,nagra, Navanagar, Pandah, Maniyar, Chilkahar, Garwar and Veruarwari C.D. blocks are higher than the district rural average of 959 and in remaining blocks, this value is below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	52	2.8	2,958	0.1
700-749	14	0.8	2,764	0.1
750-799	38	2.1	12,160	0.5
800-849	96	5.2	61,340	2.5
850-899	222	12.1	331,234	13.3
900-949	366	20	675,224	27.1
950-999	396	21.6	758,966	30.5
1000-1099	478	26.1	581,749	23.3
1100+	168	9.2	65,281	2.6
District Total:	**1,830**	**100**	**2,491,676**	**100**
Sex ratio (Rural) for District:		**959**		

Table 8 presents the distribution of villages and population by sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 478 accounting for 26.1 per cent of the total villages having a population of 23.3 per cent in the district fall in the sex-ratio range of 1,000-1,099 females per 1,000 males. It is followed by the sex-ratio range of 950-999 which claims 396 villages (21.6) per cent) and 30.5 per cent population. The highest range of 1,100 & above claims 168 villages (9.2 per cent). This range shares 2.6 per cent rural population of the district while in the sex-ratio range of 900-949, there are 366 villages (20.0 per cent). In remaining sex-ratio ranges of 850-899, 800-849, 750-799, 700-749 and less than 700, the number of villages are 222 (12.1 per cent), 96 (5.2 per cent), 38 (2.1 per cent), 14 (0.8 per cent) and 52 (2.8 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages fall in the higher sex-ratio ranges of 1,000-1,099 and above showing that in majority of villages the sex-ratio is significantly higher.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Ballia	(NPP)	862
2	Bansdih	(NP)	940
3	Belthara Road	(NP)	913
4	Chitbara Gaon	(NP)	941
5	Maniyar	(NP)	948
6	Rasra	(NPP)	908
7	Reoti	(NP)	951
8	Sahatwar	(NP)	924
9	Sikanderpur	(NP)	943
Sex ratio (Urban) for the district:			**905**

Table 9 gives the sex-ratio of urban areas of the district which comes to 905 female per 1,000 male as a whole. Among the nine towns of the district the sex-ratio varies between 862 to 951. Reoti (N.P.) has the highest sex-ratio 951 of while Ballia (NPP) has the lowest sex-ratio of 862.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group

		Urban	**43,650**	**22,607**	**21,043**	**931**

Table 10 presents the population of age-group 0-6 years and sex-ratios for total, rural and urban areas in respect of each tahsil of the district. Total population in the age-group 0-6 is 516,976 persons comprising 266,207 males and 250,769 females. The total sex-ratio in this age-group as 942 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 943 and 931 in this age-group respectively. The rural sex-ratio in tahsil varies between 919 in Bairia tahsil and 956 in Rasra tahsil.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

District (Rural) Total:		**473,326**	**243,600**	**229,726**	**943**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 943 for the district (rural) and at the sex-ratio of C.D. block level it varies between 877- 966. It is highest in Rasra C.D. block i.e. 966 followed by 964 in Maniyar in C.D. block and lowest

877 females is found in Ratanpura C.D. block. The sex-ratio of Nagra, Navanagar, Maniyar, Rasra, Chilkahar, Garwar, Hanumanganj, Veruawari and Bansdih. C.D. blocks are higher than the district rural (943).

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	189	10.3	7557	1.6
700-749	61	3.3	6889	1.5
750-799	113	6.2	21654	4.6
800-849	152	8.3	30036	6.3
850-899	218	11.9	76375	16.1
900-949	244	13.3	113713	24
950-999	187	10.2	97296	20.6
1000-1099	323	17.7	79217	16.7
1100+	343	18.7	40589	8.6
District (Rural) Total	**1830**	**100**	**473326**	**100**
Sex ratio (Rural) for District:		**943**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 343 (18.7 per cent) having population (8.6 per cent) in the district (rural) fall in the sex-ratio range of 1,100 and above females per 1,000 males in the age group of 0-6 years. It is followed by the sex-ratio range 1000-1099 which claims 323 villages (17.7 per cent) and 16.7 per cent population. Next to it, 244 villages (13.3 per cent) are in the range of 900-949 with 24.0 per cent population. 218 villages (11.9 per cent) having 16.1 per cent population fall in sex-ratio range of 850-899. In remaining sex-ratio ranges of 700-749, 750-799, 800-849, claim less number of villages and these are distributed as 61 (3.3 per cent), 113 (6.2 per cent), 152 (8.3 per cent), respectively. In these ranges, the percentage of population is also low.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Ballia	(NPP)	13,182	6,812	6,370	935
2	Bansdih	(NP)	3,481	1,802	1,679	932
3	Belthara Road	(NP)	2,580	1,313	1,267	965
4	Chitbara Gaon	(NP)	3,893	1,972	1,921	974
5	Maniyar	(NP)	3,455	1,786	1,669	934
6	Rasra	(NPP)	5,115	2,710	2,405	887
7	Reoti	(NP)	4,542	2,405	2,137	889
8	Sahatwar	(NP)	3,280	1,718	1,562	909
9	Sikanderpur	(NP)	4,122	2,089	2,033	973
	District (Urban) Total		**43,650**	**22,607**	**21,043**	**931**

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns at 2001 census. In urban areas of the district the total population in this age group is 43,650 in which 22,607 are males and 21,043 females and the sex ratio of urban areas of the district is 931. Among the nine towns sex ratio varies from 887 in Rasra (NPP) to 974 in Chitbara Gaon (N.P.). In six towns sex ratio is more than the district average. Among nine towns Ballia (NPP.) has the highest population.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial No.	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

	District Total:	**Total**	**2,761,620**	**454,647**	**273**	**16.5**	**0.0**
		Rural	**2,491,676**	**427,233**	**245**	**17.1**	**0.0**
		Urban	**269,944**	**27,414**	**28**	**10.0**	**0.0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil in rural and urban areas of the district. Of the total 2,761,620 population of the district, 16.5 per cent belong to the Scheduled Castes and zero per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 17.1 per cent in rural population and 10.0 per cent in urban population of the district. The highest percentage of Scheduled Castes population is recorded in Belthara Road tahsil (24.2) while the lowest is found in Bansdih tahsil (11.1). The proportion of Scheduled Tribes population is zero per cent in both rural and urban areas because of very small population in the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

17	Reoti	124,698	15,334	24	12.3	0.0
18	Murli Chhapra	130,427	14,778	0	11.3	0.0
	District (Rural) Total:	**2,491,676**	**427,233**	**245**	**17.1**	**0.0**

Table 15 shows the distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 17.1 per cent of rural population of the district belongs to Scheduled Castes and zero per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between zero per cent in Ratanpura and 25.6 per cent in Nagra C.D. block. The other C.D. blocks containing the highest percentage of Scheduled Castes are Siar (22.8), Navanagar (20.0 per cent) and Chilakahar (21.5). The Scheduled Tribes population is negligible in rural areas of the district.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	533	29.1	0	0.0
Less than 5	175	9.6	5,874	1.4
5-10	238	13.0	42,301	9.9
11-20	329	18.0	139,795	32.7

31-40	138	7.5	74,947	17.5
41-50	68	3.7	28,667	6.7
51-75	55	3.0	21,047	4.9
76 and above	54	3.0	11,923	2.8
District Total	**1,830**	**100.0**	**427,233**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 533 villages accounting for 29.1 per cent of total 1,830 inhabited villages in the district do not have any Scheduled Castes

population. The proportion of Scheduled Castes population is less than 5 per cent in 175 villages (1.4 per cent). In 238 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 329 villages constituting 18.0 per cent of the total villages. In the percentage range of 21-30 (24.0 per cent) reside in 240 villages which constitutes 13.1 per cent of the total villages of the district. Only 54 (3.0 per cent) villages of the district contain more than 76 per cent Scheduled Castes. population which have 2.8 per cent Scheduled Castes population of the district. Out of 1,830 villages only 109 (6.0 per cent) villages who are having more than 50 per cent Scheduled Castes population, the proportion of Scheduled Castes population is only 7.7 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,820	99.5	0	0.0
Less than 5	9	0.5	179	73.1
5-10	0	0.0	0	0.0
11-20	1	0.1	66	26.9
21-30	0	0.0	0	0.0

41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	**1,830**	**100.0**	**245**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. Below one per cent of rural population belong to Scheduled Tribes. There are 1820 (99.5 per cent) villages where none of Scheduled Tribes have been recorded. Only 9 (0.5 per cent) villages have proportion of Scheduled Tribes population up to 73.1 per cent and remaining one (0.1 per cent) village has 26.9 percent Scheduled Tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Ballia (NPP)	101,465	9,897	7	9.8	0.0
2	Bansdih (NP)	20,111	2,206	0	11	0.0

District (Urban) Total		**269,944**	**27,414**	**28**	**10.2**	**0.0**

Table 18 shows number and percentage of Scheduled Caste and Scheduled Tribes population recorded during 2001 census in the district. The table depicts that Scheduled Castes population is very scanty in the towns. Scheduled Tribes population is negligible in the urban areas of the district.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial No.	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Ratanpura	0	0
2	Siar	979	0
3	Nagra	976	0
4	Navanagar	987	0
5	Pandah	977	2,833
6	Maniyar	983	1,000
7	Rasra	969	783
8	Chilkahar	961	0
9	Garwar	951	0
10	Sohaon	902	0
11	Hanumanganj	883	0
12	Dubhad	898	917
13	Belhari	899	0
14	Bairia	871	1042
15	Veruarwari	958	0
16	Bansdih	947	0
17	Reoti	931	1667
18	Murli Chhapra	907	0
	District (Rural) Total	**949**	**1042**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 949 for district (rural). Among the C.D.blocks, the highest sex ratio of 987 is found in Navanagar C.D. block and lowest of 871 is recorded in Bairia C.D. block. This table also shows the sex ratio of Scheduled Tribes population in rural areas of the district is 1,042 above parity reflecting excess (42) of females over 1000 males at district level. The sex ratio in Pandah, Bairia and Reoti CD blocks is above the parity line while in Maniyar,Rasra and Dubhad C.D. blocks it is below the line of equality. The lower value of sex ratio of nill females is recorded in Ratanpura, Siar, Nagara, Navanagar, Chilkahar, Garwar, Sohaon, Hanumanganj, Veruarwari, Bansdih and Murli Chhapara C.D. blocks, sex ratio is zero. It means in these twelve C.D. blocks Scheduled Tribes female population is zero

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Ballia (NPP)	818	167
2	Bansdih (NP)	938	0
3	Belthara Road (NP)	970	0
4	Chitbara Gaon (NP)	915	0

6	Rasra (NPP)	847	1100
7	Reoti (NP)	970	0
8	Sahatwar (NP)	938	0
9	Sikanderpur (NP)	969	0
	Sex ratio (Urban) for the district:	**892**	**750**

Table 20 shows the sex-ratio among Scheduled Castes and Scheduled Tribes in urban agglomerations/towns 2001Census. Among nine towns sex ratio of Scheduled Castes is highest in Maniyar (N.P.) and it is lowest in Ballia (NPP). Seven towns have sex ratio zero in Scheduled Tribes population. It means Scheduled Tribes female population is zero. In urban area of the district the sex ratio of Scheduled Castes and Scheduled Tribes are 892 and 750 respectively.

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 census, the proportion of literates to total population comes to 57.9 per cent in the district. This proportion in rural area is 56.7 per cent against 68.3 per cent in urban areas. In the district the literacy rates of males (71.9 per cent) is much higher than that of females (43.2 per cent). Similarly male literacy among tahsils, Belthra Road tops with 75.5 per cent literates followed by Ballia tahsil (74.9 per cent). Bansdih tahsil with 65.5 per cent literates stands at the bottom in the district. Out of six tahsils, the literacy rates of Belthra Road, Rasra and Ballia tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates is higher than the rural areas. The gap between male and female literacy is very high which comes to 28.8 percentage points in the district, as a whole. The trend at tahsil level is not much different. However this gap in urban literacy is low which comes to 18.0 percentage points against the rural areas 29.9.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female iteracy rate
		Number of literates			Number of illiterates

	District (Rural) Total	**1,144,044**	**733,751**	**410,293**	**1,347,632**	**538,357**	**809,275**	**56.7**	**71.3**	**41.5**	**29.9**

Table 22 reveals the number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 56.7 per cent of the total rural population (excluding the age-group of 0-6 years) literates in the district. The corresponding proportion of male and female literates comes to 71.3 and 41.5 per cent respectively which shows very wide gap of 29.9 percentage points in male and female literacy. At C.D. block level, Hanumanganj C.D. block has the highest rural literacy rate of 62.6 per cent in which 75.6 per cent males and 48.3 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Reoti C.D. block (44.8 per cent). There are wide gaps in male and female literacy in all the C.D. blocks of the district.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	6	0.3	141	0.0
10-Jan	15	0.8	2,633	0.1
20-Nov	36	2.0	12,786	0.5
21-30	73	4.0	44,532	1.8
31-40	153	8.4	124,837	5.0
41-50	305	16.7	354,368	14.2
51-60	545	29.8	1,056,808	42.4
61-70	523	28.6	795,538	31.9
71-80	127	6.9	90,739	3.6
81-90	32	1.7	8,229	0.3
91-99	7	0.4	1,024	0.0
100	8	0.4	41	0.0
District Total:	**1830**	**100.0**	**2,491,676**	**100.0**
Literacy rate for District:		**57.9**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in 6 villages (0.3 per cent) of the district and population of these villages is only 141 persons. 8 villages (0.4 per cent) have all the literate population. 545 villages accounting for 29.8 per cent of the total

villages are in the literacy range of 51-60 per cent and 523 villages (28.6 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1--50 per cent was observed in 582 villages (31.8 per cent) of the district. The higher literacy ranges of 71 -100 per cent covers 174 villages (9.4 per cent). The range of 51-70 have the maximum number of 1068 villages forming 58.4 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name and urban status of UA/ Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Ballia (NPP)	11,909	6,778	5,131	5,325	2,231	3,094	81.3	88.1	73.7	14.3
2	Bansdih (NP)	12,147	7,132	5,015	9,636	4,080	5,556	68.8	78.2	58.7	19.4
3	Belthara Road (NP)	8,522	5,277	3,245	10,265	4,366	5,899	55.6	67.2	43.4	23.8
4	Chitbara Gaon (NP)	18,152	10,332	7,820	11,086	4,989	6,097	75.2	81.9	67.9	14.4
5	Maniyar (NP)	10,470	6,472	3,998	9,759	3,948	5,811	64.1	76.6	50.7	25.9
6	Rasra (NPP)	64,555	37,653	26,902	36,910	16,843	20,067	73.1	79	66.3	12.7
7	Reoti (NP)	10,443	6,469	3,974	9,668	3,895	5,773	62.8	75.6	49.3	26.3
8	Sahatwar (NP)	9,557	5,886	3,671	9,458	3,997	5,461	60.7	72.1	48.5	23.6
9	Sikanderpur (NP)	8,901	5,506	3,395	13,181	5,812	7,369	50.7	61.8	39.4	22.4
District (Urban) Total		**154,656**	**91,505**	**63,151**	**115,288**	**50,161**	**65,127**	**68.3**	**76.9**	**58.9**	**18.0**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Ballia (N.P.P.) is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district. The literacy rate is quite high (above 75.0 per cent in two towns) Belthara Road (N.P.) and Rasra (N.P.P.). Female literacy rate is not far behind in two towns (above 67.0 per cent). However, literacy rate among females is very low (39.4 per cent) in Reoti (N.P.). Thus the gap in male female literacy rate is highest 26.3percentage points in Bansdih (N.P.).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

District (Rural) Total:		**165,643**	**113,892**	**51,751**	**261,590**	**105,338**	**156,252**	**49.0**	**65.6**	**31.4**	**34.2**

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in C.D. blocks at 2001census. In rural areas of the district, proportion of literates is 49.0 per cent in which 65.6 percent are males and 31.4 females. Thus the gap in male and female literacy rates is 34.2 per cent points. Among 18 per cent C.D. blocks, Siar C.D. block has the highest literacy rate and Reoti C.D. block has the lowest literacy rates. The gap in male/female literacy rates in Murli Chapra C.D. block is highest and this gap is lowest in Siar C.D. block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	26	2.0	210	0.0
1-10	11	0.8	513	0.1

100	5	0.4	14	0.0
District Total:	**1297**	**100.0**	**427,233**	**100.0**
Literacy rate for District (Rural):		**49**		

Table 26 presents the distribution of villages by literacy rate range for Scheduled Castes population at the 2001 census. In 373 inhabited villages which form about 34.9 per cent of total rural Scheduled Castes population the literacy rate range is 51-60 per cent. In the district there are 1,297 inhabited villages with Scheduled Castes population. In 26 villages the literacy rate is zero while in 5 (0.4 percent) viilages the rate is cent percent.

TABLE 27 :NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Belthara Road (NP)	996	601	395	787	304	483	68.9	82.1	55.3	26.8

	District (Urban)	**10,485**	**7,251**	**3,234**	**16,929**	**7,241**	**9,688**	**47.6**	**61.7**	**31.4**	**30.3**

The table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is more than literates in the district (urban). The percentage of literates is least in Maniyar (N.P.) among 9 towns but the gap in male/female literatecy rate is highest in Chitbara Gaon (N.P.). The males in all the nine towns enjoy higher literacy rate than females. The gap in male/female literacy rate is 30.3 percentage points at district level.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial No.	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Pandah	0	0	0	23	6	17	0.0	0.0	0.0	0
2	Maniyar	18	10	8	2	0	2	90.0	100.0	80.0	20

The table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in C.D. blocks at the 2001 census. The number of illiterates is more than literates in the district and C.D. blocks, with exception to Maniyar and Bairiya C.D blocks. The literacy rate of the scheduled tribes population at 53.2 per cent is higher than the corresponding rate of 49.0 per cent in case of Scheduled Castes community. The gap in male and female literacy rates at about 43.4 per cent is also higher than what it is in case of the Scheduled Castes community (about 34.2 per cent). The literacy rate is highest in Maniyar C.D block and lowest in Pandah C.D block and Sohaon C.D. block.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	2	20.0	24	9.8
5-10	0	0.0	0	0.0

61-70	1	10.0	20	8.2
71-80	1	10.0	29	11.8
81-90	1	10.0	20	8.2
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**10**	**100.0**	**245**	**100.0**

Table 29 gives the distribution of villages by ranges of literacy rate for Scheduled Tribes population at the 2001 census. Scheduled Tribes population in the district is scattered over 10 villages. In none of the village literacy range is 100 per cent. Literacy rate lie in the range of 31-40 with the coverage of 18.8 percent of population. Twenty percent of the village in the district were in the literacy range of 51-60 and one village each was in the literacy range of 61-70, 71-80 and 81-90 respectively.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial No.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Rasra (NPP)	7	2	5	14	8	6	41.2	28.6	50.0	-21.4
2	Ballia (NPP)	6	5	1	1	1	0	100.0	100.0	100.0	0.0
	District (Urban)	**13**	**7**	**6**	**15**	**9**	**6**	**56.5**	**58.3**	**54.5**	**3.8**

Table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in urban agglomerations/town population at the 2001 census. There is a small population of Scheduled Tribes in the towns of the district. Out of nine only town Rasra (N.P.P) and Ballia (N.P.P) have Scheduled Tribe populatio. In the urban area of district the percentage of literates is 56.5 percent, in which 58.3 per cent of males and 54.5 per cent of females are literates. The gap in male/female literacy in town is 3.8 percentage points.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN TAHSILS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers are 28.8 per cent of the total population in the district. The total workers are comprised of 18.3 per cent of main workers and 10.5 per cent of marginal workers and the remaining 71.2 per cent are non-workers. Among the main workers, males participation rate in the district is 30.4 per cent and 5.5 per cent of that

females. Male and female marginal workers account for 11.0 and 9.9 per cent respectively. The percentage of female marginal workers is lower than male. Total workers (main and marginal) among tahsils varies from 27.6 per cent in Ballia tahsil and Bairia tahsil to 30.4 per cent in Belthra Road and Bansdih tahsil.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 2,491,676 total rural population 18.1 per cent has been categorised as main workers and the marginal workers constitute 11.1 per cent and the remaining 70.8 per cent are in the category of non-workers. The sex-wise break up at the district level shows that 30.1 per cent males and 5.6 per cent females are in the category of main workers. Male and female marginal workers account for 11.6 and 10.6 per cent respectively. The percentage of female marginal workers is lower than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 29.2 per cent. At the C.D. block level, Ratanpura has highest proportion of total workers forming 35.9 per cent of the total population. It is closely followed by Maniar (33.9 per cent), Reoti (31.8 per cent) and Sohaon (30.8 per cent). The lowest percentage of 24.9 per cent is recorded in Belhari C.D. block.

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34, that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 30.1 per cent of the total workers (main + marginal) and 40.1 per cent are engaged as agricultural labourers, Household industry workers 5.4 per cent and other workers are 24.4 per cent in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector, absorbing a large number of workers. The proportion of cultivators varies between 22.4 per cent in Ballia tahsil and 35.2 per cent in Belthra Road tahsil. These variations within the district may be due to cropping

and land holding patterns. The percentage of females cultivators is 20.0 per cent which is very low as compared to 33.7 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The workers in other activities occupy the third position next to agricultural sector in the district as well as in each tahsil. The highest proportion of 33.9 per cent of other workers is recorded in Ballia tahsil while the lowest proportion of 16.7 per cent is found in Bairia tahsil.

Note: Percentage of Workers to total worker are given in brackets

Table 35 presents C.D. blockwise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 29.2 per cent of the total

population. Among these workers, cultivators constitute 32.1 per cent, 42.3 per cent agricultural labourers, 5.0 per cent household industry workers and 20.6 per cent are engaged as other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries could not make much progress in rural areas as reflected in the data and these household industries employ only 5.0 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of females (20.7 per cent) is lower than males (36.3 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 19.5 per cent in Dubhad C.D. block to 43.2 per cent in Pandah C.D. block. Similarly for other workers, the lowest proportion is 2.0 per cent in Ratanpura C.D. block while 39.6 per cent is the highest in Hanumanganj C.D. block. The percentage of agricultural labourers is highest in Ratanpura block (71.1 percent) and is followed by Reoti (51.1 percent). In other C.D. blocks, this proportion is quite insignificant. Similarly, household industry workers varies in C.D. blocks between 9.1 per cent in Dubhad and 0.6. per cent in Ratanpura

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers i.e. 66.0 per cent, followed by Agricultural labourers with 15.4 per cent (11.6 per cent male and 37.4 per cent female). If we observe each town, the table reveals that highest percentage of agricultural labourers (43.6) is recorded in Reoti (N.P.). In cultivator category it has recorded a very low percentage (9.0.). The number of household industry workers are also very low (9.6 per cent) in urban areas of the district.

(ix) Brief analysis of the Village Directory and Town Directory data : Based in inset tables 37-47

One of the major parts of the District Census Handbook is Village and Town Directory. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data inset tables 37 -47 have been generated and reproduced here showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like educational, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1830 inhabited villages in the district 1085 villages or 59.3 per cent have been provided with the educational facilities of one type or the other. Similarly 457 villages in the district constituting 25.0 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1,786 or 97.6 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 289 villages constituting 15.8 per cent of villages have been provided with post office facility within the village. 402 or 22.0 per cent villages have been provided with the telephone facility, 270 or 14.8 per cent with transport facility, 87 or 4.8 per cent villages with bank facility and 131 or 7.2 per cent with agricultural credit societies. Similarly there are 1,070 or 58.5 per cent villages which have been linked with the pucca road. Total 1,550 or 84.7 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Murli Chhapra C.D. block has the highest 89.3 per cent villages where educational facility is available and lowest 33.3 per cent is found in Bansdih C.D block Medical facility is highest in Murli Chhapra (78.6 per cent) and lowest (10.7 per cent) in Bansdih C.D. block. Improved drinking water is available to cent-percent villages in Ratanpura, Maniyar, Belhari Bairiya and Veruarwari C.D. blocks while in other blocks, it is above 89.0 per cent. Telephone facility is highest in Dubhad (43.4 per cent) while no village of Ratanpura C.D. block enjoy this facility. Transport and communications is less developed in Ratanpura C.D. block where no village is covered by this facility. In the field of power supply near about 85 per cent villages have been covered in the district.

Table 38 depicts the number and proportion of rural population served by different type of amenities. Out of total rural population of 2,491,676 persons in the district, 2,182,097 or 87.6 per cent have educational facility of one or the other type. Similarly 1,327,812 or 53.3 per cent population has medical facilities while 2,481,509 or 99.6 per cent have got improved drinking water facility. Post office facilities are available to 1,163,924 or 46.7 per cent population. Telephone facility is available to 1,073,272 or 43.1 percent. Transport communications facility is available to 820,929 or 32.9 per cent. Bank facility is available to 417,339 or 16.7 per cent. 545,969 or 21.9 per cent have been provided with the facility of agricultural credit societies. 1,915,903 or 76.9 per cent have been provided with the facility of approach by pucca road. Power supply is available to 2,309,525 or 92.7 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level.However, in Murli Chapra C.D. block the facilities of educational, medical and improved drinking water are available to larger proportion of population.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of		Distance range of place from the villages where the amenity is available			
		Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1		2	3	4	5
1.	Education :-

5.	Bus Service	897	631	87	1,615
6.	Banks				
(a)	Commercial Bank	1,016	602	136	1,754
(b)	Cooperative Bank	630	952	225	1,807
7.	Agricultural Credit Societies	1,167	413	119	1,699

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 757 villages do not have primary school in their villages and out of these villages, children of 681 villages have to travel less than 5 kms. for schooling. Out of 1830 inhabited villages as many as 1490 are deprived of middle school and 1,822 of degree college. Of these 1082 avail the facility of middle school at a distance of less than 5 kms., 396 at a distance 5-10 kms. and the remaining 12 at a distance of 10+ kms. In respect of degree college 343 avail this facility at a distance of less than 5 kms., 493 between 5 to 10 kms. and rest 986 villages at a distance of 10+ kms.

Similarly there are 1,770 villages in the district which have been devoid of Hospital facility and 1,791 villages are deprived of PHC facilities. Of these 760 villages have the facility of Hospital available within 5 kms. while in respect of 685 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 325 villages have this facility at a distance of 10+ kms. As regards PHC 617 avail this facility at a distance of less than 5 kms., 835 at a distance of 5-10 kms. and the remaining 339 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,541 villages do not have this facility in the village itself. Of these majority i.e. 1201 have this facility at a distance of less than 5 kms., another 320 villages avail it at a distance of 5-10 kms. In the remaining 20 villages inhabitants have to travel a distance of 10+ kms.

As regards Telephone, there are 1,428 villages in the district which are without telephone facilitiy. Of these 808 avail this facility at a distance of less than 5 kms., 416 at a distance of 5-10 kms. and remaining 204 have to traverse a distance of 10+ kms.

For Bus service out of 1,615 villages which do not have the facility, 897 villages avail this facility at a distance of less than 5 kms., 631 at a distance between 5-10 kms. and 87 at a distance of 10+ kms.

In the entire district 1754 villages are deprived of Commercial Bank and 1,807 of Co-operative Bank. Of these 1754 villages which are deprived of Commercial Banks 1,016 villages avail this facility at a distance of less than 5 kms., 602 between 5-10 kms. and the remaining 136 at a distance of 10+ kms. Regarding Co-operative Banks out of 1,807 villages 630 villages avail this facility at a distance of less than 5 kms., 952 at a distance of 5-10 kms. and remaining at a distance of 10+ kms. 1,699 villages do not have agricultural credit societies. This facility to 1,167 villages is available at a distance of less than 5 kms., 413 at a distance of 5-10 kms. and the remaining 119 at a distance of 10+ kms.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 1830 inhabited villages in the district, there are 404 villages which have nearest towns upto a distance of 5 kms. Of these only 210 villages forming 52.0 per cent, are having the educational facilities of one type or the other and 74 villages constituting 18.3 per cent, have the medical facilities within the village, 38 villages forming 9.4 per cent have the facility of post office within the village and 74 or 18.3 per cent have the facility of telephone. 49 villages constituting 12.1 per cent have been linked by transport service. 13 villages comprising 3.2 per cent have been provided bank facilities, while 31 villages constituting only 7.7 per cent have been provided by agricultural credit societies. 258 villages comprising 63.9 per cent have been provided with pucca road.

There are 1235 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 752 villages constituting 60.9 per cent have been provided with the educational facilities. 301 villages comprising 24.4 per cent have been provided with medical facilities. 212 villages constituting 17.2 per cent enjoy the post office facility. 272 villages comprising 22.0 per cent have been provided the telephone facility. 188 villages constituting 15.2 per cent have been linked with transport and communications. 59 villages comprising 4.8 per cent have bank facility and 83 villages constituting 6.7 per cent are having agricultural credit societies, while 716 villages or 58.0 per cent are approachable by pucca road. 100 villages fall in the distance range of 16-50 kms. Of these, 65.0 per cent villages have educational facility, 39.0 per cent with medical, 19.0 per cent with post office, 23.0 per cent with telephone and transport and communications available to 17.0 per cent villages. Banks and agricultural credit societies facilities are available to 6.0 and 7.0 per cent of villages and 40 villages comprising 40.0 percent have been provided with pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In the district out of a total 1,830 inhabited villages, overwhelming 700 have a population of less than 500 persons. Of these, 146 villages (20.9 per cent) have educational facility, 25 (3.6 per cent) have medical facility, 659 (94.1 per cent) have improved drinking water facility. Non of the village have post office facility while 43 (6.1 per cent) have telephone facility. 40 (5.7 per cent) have been linked by bus service. 4 (0.6 per cent) have Bank facility. 301 villages (43.0 per cent) have been linked with pucca road and 510 villages (72.9 per cent) have been provided with electricity.

Out of 403 villages, which fall in the population range of 500-999 persons, 262 villages (65.0 per cent) have been provided with the educational facility, 75 (18.6 per cent) with medical facility, 402 (99.8 per cent) villages have improved drinking water facility. 18 villages (4.5 per cent) have been provided with post office facilities, 73 villages (18.1 per cent) with telephone facility, 35 villages (8.7 per cent) with transport facilities, 3 villages (0.7 per cent) with bank facility, 15 villages (3.7 per cent) with agricultural credit societies and 216 villages (53.6 per cent) have approach by pucca road and 358 (88.8 per cent) villages in this range have electricity.

357 villages fall in population range of 1,000-1,999 persons. All of these villages have improved drinking water facilities. Whereas 317 villages (88.8 per cent) enjoy the educational facility, 126(35.3 per cent) villages enjoy the medical facility, 60 villages (16.8 per cent) have post office facility, 107 villages (30.0 per cent) have telephone facility, 64 villages (17.9 per cent) have transport and communications facilities, 9 villages (2.5 per cent) have bank facilities, 20 villages (5.6 per cent) have agricultural credit societies and 235 villages (65.8 per cent) have approach by pucca road.

There are 291 villages in the district which are covered under 2,000-4,999 population range. In this range, (97.6 per cent) the villages enjoy the facility of education and 289 (99.3 per cent) have improved drinking water, telephone, transport and communication, approach by pucca road and power supply facilities are also in better condition..

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No.	Name of C. D. block	Number of inhabited villages	Total area in hectare	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6

	District Total:	**1,830**	**2,536,16.6**	**89.3**	**78.0**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available in inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates the extent of cultivable area under irrigation. There are total 1,830 inhabited villages in the district having a total area of 253616.6 hectares. Of this, 89.3 per cent area is cultivable and 78.0 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Siar block with 159 villages have a total area of 18,480.5 hectares, and out of it area 85.6 per cent is irrigated. In Nagra block, all the 168 villages have a total land area of 28,225.5 hectares, of this 97.1 per cent of land is cultivable and of the aforesaid area 94.0 per cent is irrigated. In Navanagar block, all the 95.villages have a total area of 19651.8 hectares. Of this cultivable area is 65.1 per cent and 88.2.per cent is irrigated. In Pandah block, all the 80 villages have a total area of 13,542.3 hectares. Of this, cultivable area is 94.8 per cent. and out of cultivable area 84. per cent is irrigated. In Maniyar block 110 villages have a total land area of 15,562.8 hectares, of this 67.1 per cent is cultivable area and out of this 86.2 per cent is irrigated. In Rasra block with 145 villages have a total land area of 18,652.5 hectares. Out of which 89.1.per cent is irrigated. In Chilkahar block 136 villages have an area of 1585.6 hectares. Of this 90.2 per cent is cultivable area. There is no irrigation facility in the Ratanpura block hence area shown under irrigation is zero.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Ballia (NPP)	325	7	318	305	30	93	39	0	143
2	III Bansdih (NP)	103	5	98	83	24	1	19	0	39
3	IV Belthara Road (NP)	202	60	142	150	47	0	0	0	103
4	III Chitbara Gaon (NP)	167	29	138	109	47	34	1	0	27
5	IV Maniyar (NP)	119	2	117	67	55	1	11	0	0
6	III Rasra (NPP)	243	36	207	179	35	63	81	0	0
7	III Reoti (NP)	119	7	112	116	62	0	0	0	54
8	IV Sahatwar (NP)	147	14	133	299	89	0	0	0	210
9	III Sikanderpur (NP)	97	1	96	100	22	43	35	0	0
	District Total	218	15	203	201	40	48	29	0	84

The table 43 gives the per capita receipt and expenditure for each town in the district. The average per capita receipt for towns of the district is Rs 218 of which Rs 15 are derived through local taxes and the remaining Rs 203 received from all other sources. The average of total expenditure incurred per head is Rs 201. Out of this Rs 40 are spent on general administration, Rs 48 on public health and conveniences, Rs 29 on public works, and Rs 84 is spent on other works. Among all the nine towns the receipt and expenditure recorded per head are the highest in Ballia NPP.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Ballia (NPP)	3.1	1.0	0.6	0.6	0.4
2	Bansdih (NP)	3.0	1.5	0.5	0.5	0.0
3	Belthara Road (NP)	7.5	2.9	1.7	2.3	0.6
4	Chitbara Gaon (NP)	3.0	1.0	1.0	1.0	0.0
5	Maniyar (NP)	2.7	1.1	0.5	0.5	0.0
6	Rasra (NPP)	4.1	1.7	1.4	0.3	0.3
7	Reoti (NP)	2.3	0.9	0.5	0.5	0.0
8	Sahatwar (NP)	1.6	1.1	0.5	0.5	0.0
9	Sikanderpur (NP)	1.8	0.9	0.5	0.5	0.0
	District Total	**3.1**	**1.2**	**0.7**	**0.7**	**0.1**

Table 44 shows that in urban areas of the district the average number of primary schools per 10,000 population comes to 3.1 schools, where as there are 1.2 junior secondary/middle, 0.7 secondary/ matriculation and 0.7 senior secondary schools and the ratio of colleges is only 0.1 college. Among the towns, the ratio of primary, junior secondary/ matriculation. secondary/matriculation schools and senior secondary school is highest in Belthra Road (N.P.).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial Number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Ballia (NPP)	30
2	Bansdih (NP)	3

			Cauliflower

Table 47 indicates most important articles manufactured and exported from the each town of the district. The district is known for Bidi and Tobaco. There are the main items which are manufactured in Chitbara Gaon, Maniyar (N.P.),Rasara (NPP) and Sikanderpur (N.P.).

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 : Based in inset tables 48 to 52.

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/ moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

District total		388,142	352,464	35,678	73,743	69,582	4,161	3,669	3,481	188

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

TThe data presented in the table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 388,142

consisting of 352,464 rural and 35,678 urban households. 73,743 households belong to Scheduled Castes and 3,669 to Scheduled Tribes. 380,010 households are living in their owned houses constituting 97.9 per cent of total households. Of these households, the largest number of households 116458 have occupied 3+ roomed accommodation and is followed by double roomed accommodation numbering to 102,878 households. Next position is claimed by 83,874 households occupying single roomed accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 69,962 households while 6,838 households are without any exclusive room. 5,495 households living in rented accommodation account for 1.4 per cent of total number of households in the district. The largest number of 2,053 households are living in single roomed accommodation followed by 2,042 households in double roomed accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 2,637 forming only 0.7 per cent of total households are distributed in single roomed accommodation numbering to 895 while double roomed 741 and 364 are in three roomed accommoda-tion. In rural areas majority of households have bigger size and majority of them have their own houses while the urban areas show a reverse picture.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refer to those houses whose wall and roofs are made of pucca materials i.e., burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate a re-used for roof

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refer to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 56 per cent of the households in the district had permanent houses. The trend is different in rural (54.4 per cent) and urban areas (79.9 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Ballia (62.1 per cent) followed by Baria (57.7 per cent), Sikanderpur (57.2 per cent) and lowest in Rasra (47.8 per cent). In respect of semi-permanent houses, it was 28.3 per cent at district level whereas among tahsils, the highest was in Rasra at 42.2 per cent and lowest was 21.8 per cent in tahsil Baria. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion of 13.5 per cent. Temporary houses in the urban areas were 6.6 per cent only.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage menas closed and open drainage.

The above table shows that out of total households of the district 344,593 (88.8 per cent) households had improved drinking water facility. The proportion of rural and urban areas were 88.3 and 93.1 per cent respectively. Tahsil Ballia had higher order of proportion of households where percentage for rural area was 86.0 and 95.8 per cent in urban areas. Electricity was available for 24.4 per cent of households at district level thus the households of the district had better access of electricity. Bathrooms and toilet facilities were available in 13.9 and 21.4 per cent of households. Similarly drainage facility was also poor in Bansdih and Bairia tahsils.At district level drainage facility was available for 69.8 per cent of households, whereas the proportion of rural and urban area households accounted to 68.1 and 86.4 per cent respectively.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that to 46.1 per cent of households in the district use firewood as fuel for cooking and the proportion in the rural area is 46.1 In urban area it comes to 45.4 per cent

of households. LPG (cooking gas) has been reported as one of the fuel for cooking for food in to 5.2 per cent of the households. The composition of rural and urban comes to 3.0 and 26.7 per cent respectively. Kerosene is used for cooking in as many as 1.5 per cent of the households (0.6 per cent rural and 10.2 per cent urban households). The other methods like crop residence, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 per cent to and 32.6 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, LPG (cooking gas) and kerosene are the predominant fuel for cooking in the district.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

* Houselist Households.

The table reveals that out of the total households (388,142) of the district 188076 household could avail banking services at district level while 152,694, 60,922, 10,643, 244,818, 2,393 and 6,585 households enjoyed the availability of household assets like radio/transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van respectively whereas only 108,698 households had none of the specified assets.

It also reveals that at tahsil levels a highest number of 57,704 of households were availing banking services in Ballia tahsil. The highest number having

none of specified assets were 33194 households in tahsil Ballia. Where as on the other hand the lowest of 10630 householdsfor the same were observed in Belthra Road tahsil.

(XI) Major Social and Cultural Events, Natural and Administration Development and Significant activities during the decade:-

No significant event of social or cultural events nor any natural and administrative development has taken place during the last decade. However, intra district jurisdictional changes in the form of creation of two tahsils namely Belthara Road and Sikanderpur have occurred during the last decade.

(XII) Places of Religious Historical, or Archaeological importance in villages and places of Tourist Interest in the towns of the district.

Bairia –

It is a tahsil headquarters and historical place. The place is famous for a big fair, locally known as the 'Sudhist Baba' fair, which is held in December and continues for a fortnight.

Ballia –

The town is situated on the banks of Ganga. It is a historical town. A memorial raised in the Shaheed park in the central chowk area of the town stands as a testimony of respect to the martyrs. The place has two beautiful spots – Surha Tal and Korantadih, which have the potential for being developed into picnic or tourist centres. A big cattle fair known as the Dadri fair is held here during the month of November.

Bansdih –

It is an ancient place. It was the centre of great activity during the freedom struggle of 1942.

Hanumanganj –

An important bazar, it was founded more than a century ago by one Ram Manorath, who established it as a large centre of trade in sugar. The Hanumanganj development block is also famous for Surha Tal, said to be the biggest lake in the state and has great potential to be developed as a tourist centre and birds santuary.

Maniyar–

It has a temple dedicated to Brahma Baba also known as Nanka Baba. It also has a temple dedicated to Parushram. A big fair is held here during Navaratri every year in March-April.

Rasra –

It is an old place and occupies an important place in the freedom movement. Adjoining the town on the west is an extensive grove, containing a tank and a shrine dedicated to Nath Baba, the patron saint of all Sengars. The place is the site of a big fair lasting about a week, which is held in October during Dasahra.

Sikanderpur –

This place, one of the oldest town in the district, is said to have derived its name from Sikandar Lodi. The place has a temple dedicated to Jalpa Kalpa Devi and a small tank named Chatarmukh Pokhra. The remains of a trench dating back to the time of Sikander Lodi (1489-1517) are found here. Among important fairs, held here, are the Jalpa Kalpa Devi fair during Durga Puja and Muharram and a local fair known as Hashim Data Ka Mela.

(XIII) Major Characteristics and Contribution of the District:

Although Ballia is not a pilgrim centre, its great antiquity and its being at the confluence of the Ganga with the Saryu give it a peculiar sanctitity in the eyes of Hindus which has made it a scene of great assemblages during the fairs held annually in the district.

Nondescript district of Ballia has its own identity. Practically the diabect of the entire population is the Bihari form of eastern form of eastern Hindi and the particular dialect current in Ballia is known as the southern variety of Bhojpuri. The district possesses a rich variety of folk literature and stories.

District Ballia has produced many luminaries. On the top of all great men of the district is the name of Mangal Pandey. The doyen of the first struggle of independence of 1857, Shri Mangal Pandey, was born here. Next great freedom fighters name was Shri Chittu Pandey, Other freedom fighter of the district were Pt. Ram Dahin Ojha, Thakur Jagannath Singh and Pandit Ram Anant Pandey. Loknayak Jai Prakash Narayan was also born in this district. This district has given us one Prime Minister Shri Chandra Sekhar. Great Hindi writer Acharya Hazari Prasad Dwivedi was also born in this district. Other great men of the district who served the nation in different field are Dr. Ram Vichar Pandy, Bhagwat Sharan Upadhaya, Dr. Kedar Nath Singh, Pt. Jagannath Upadhya, Padmshri Pt. Raghunath Sharma, Mahanand Mishra, Rajkishor Singh and Bhola Thakur.

With the change of time, the district is also changing. The pattern of dress, jewellery, ornaments, social customs, food and the various habits of the people, their mode of living, religions beliefs and practices etc. have undergone substantial changes over the years.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(SECTION I & II)

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

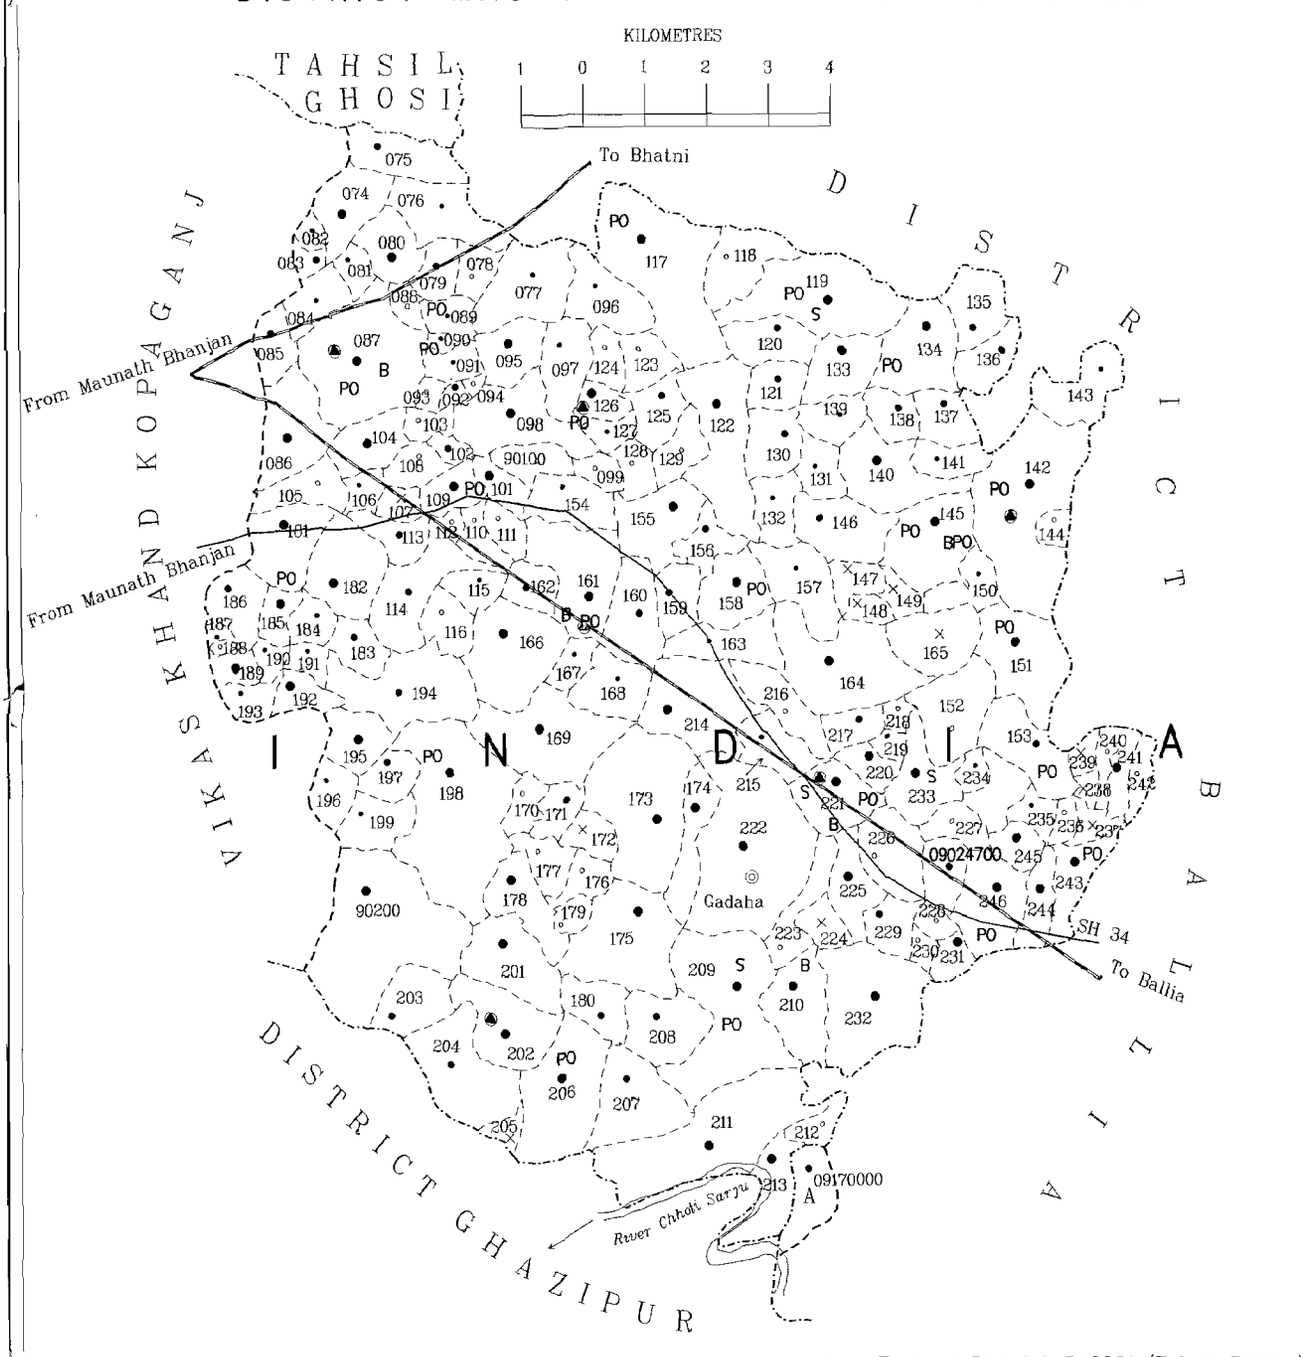

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.
