MOTIF

The carpet Insustry of the district bears which exports carpets of very high quality to various foreign countries from where; the country earns a valuable foreign exchange. It is the main occupation of the residents of the district carried on as household industry. For the first time, district's name was highlighted in the map of the world in 1851 when the carpets made here got popularity and earned prestige from the East India Company in a world level exhibition. In Bhadohi and adjoining carpet-belts alone, approximately one lac carpet (*Kaleen*) and fifty thousand cotton carpet (*Dari*) industries are busy in manufacturing and approximately 8 lac labourers are engaged therein, including those engaged in jobs of washing, dyeing and finishing of the product. Though the trade at world level market is a bit low presently, but even then, about 500 industrial houses are earning about 15 hundred crore rupees per annum. Carpet weaving started here about 400 years ago during the Mughal regime and since then Bhadohi is called as 'carpet weavers home town' and thereon, day by day elegant and artistic designs created by their artistic fingers. Carpet trade of the district is the main occupation and principal industry for their livelyhood as generally, whole of the family members keep them engaged in it. The local carpet products are purely hand-woven and surprisingly there is no electricity consumption and expenses on it.

Annexure V Brief account of main religions in the district/tahsil as per 1991 Census 752
Annexure VI Marital status of population as per 1991 Census 753
Annexure VII Age, Sex and Education in the district, 1991 Census 758
Annexure VIII Distribution of different mother tongues returned in 1991 Census 762

FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserve all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Gr. II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. District Sant Ravidas Nagar ranks 59th in terms of population in the state.
2. The percentage share of urban population in the district is 12.8 as against 20.8 of the population in urban areas of the state.
3. Sant Ravidas Nagar district has population density of 1,334 persons per sq.km.which is more than the state average 690 persons per sq. km
4. Sant Ravidas Nagar district ranks 19th in terms of sex ratio (917) which is more than the state average (898) females per one thousand males.
5. Sant Ravidas Nagar district ranks 34th in literacy. The literacy rate of the district is 57.9 which is higher than the state (56.3 percent).
6. There are only 127 uninhabited villages out of total 1,224 villages in the district.
7. Decadal growth rate of the district 25.6 is lower to the state average of 25.8.
8. Gyanpur tahsil has the highest number of inhabited villages 635 while Bhadohi tahsil has the lowest number (462).
9. The district has seven towns and no new town has been added after 1991 census, nor has been declassified.
10. There are 161,865 households in the district accounting for 0.62 percent of the total households in the state. The average size of households in the district is 8.4 persons.

ANALYTICAL NOTE

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the C.D Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on C.D-ROM; hence the word "Handbook" seems now to be a misnomer.

Brief History of the District:

It is said that during the period of Mahabharata Pandavas escaped from lakshyagrah through a tunnel and took shelter here at a place called Semradhnath . Sant Ravi Das, known as Raidas also, was Chamar by cast and was one of the twelve pupils of Saint Ramanand . The devotee of ' Nirgun Brahama' Raidas never discriminated between Hindu and Muslim. He established the ' Raidasi Sampradaya.'

The region covered by the present district of Sant Ravi Das Nagar Bhadohi once formed part of ancient kingdom of Kashi. As the district is situated in the middle of Kashi and Prayag, the two grand teerathas (holy places) and many legends are linked with it Sitamarhi is the place where 'Ramayana' was written by Maharshi Balmiki. It is said that Mata Sita, wife of lord Rama, lived here in the ashram of Maharshi Balmiki when she was abondoned by Lord Rama. Here Lav and Kush were born and Mata Sita immersed herself in the lap of goddess Earth. It is said that besides the first poet Maharishi Balmiki, the saint Goswami Tulsidas also stayed at

Sitamarhi for three days. The region is also linked with Sant Ravidas, after whom the district has been given the name Sant Ravidas Nagar Bhadohi.

Sant Ravi Das Nagar Bhadohi was known by the name of Anand Van in ancient times as confirmed by many historians. It is also known by the name of Saghan Van or Kanchan van at some places while it has been shown as Sundar Van in Maunas history. After some time Bhars captured the region from forest tribes and named it as Bhardoi and declared it as the kingdom of Bhar's. When the soldiers of Sultan Mohammad Gauri captured the Mirzapur's forest areas, the Bhars defeated the forest chieftains and captured the forest area of Bhadhoi and established there own estate. They constructed their own forts and coats, the remains of which are , still found in the villages Rohi, Bankat, Beribeesa, Bharduwar, Sarai Kot (Sair) etc. The Suriyawan was the capital of Bhar's kingdom. Bhars ruled on Bhadoi for nearly 200 years from 1193 to 1394. After 1394 Maunas Rajputs overthrew Bhar from this region and it was named Bhardrohi which after some time transformed into Bhadohi. Before 1828, in the English record it appeared as Bhadohi. The first king of Maunas dynasty was Anant Rai followed by Balwain Singh, Birabh Dev, Saeav Rai, Jagdish Rai, Harivansh Rai, Ramchandra Rai, Jodhram Madan singh, Sankatha singh, Tej singh and Pancham Singh etc. who ruled on it. The last king of Maunas dynasty Balwant Singh took the throne in 1728 but due to financial crisis in the state the kingdom ended in 1728 itself.

At the end of Maunas kingdom the Banaras kingdom came into power and ruled the region from 1748 to 1948. In 1911, Banaras got the status of state. After independence when all the states of India merged with Union of India, Banaras state was also merged in it. During the period of Maharaja Udit Narain Singh, Gyanpur was a pargana of Mirzapur district and before 1911 Bhadohi was made district of Banaras state. After independence Bhadohi was separated from Mirzapur district and made a tahsil of Varanasi district. After going through so many changes Bhadohi was ultimately declared as Sant Ravi Das Nagar Bhadohi district on 30th June 1994, by separating it from the western part of district Varanasi. On 25-05-1997, eastern part of Varanasi district, comprising the three tahsils Sakaldiha, Chandauli and Chakia, was cut off from it and a new district named Chandauli was creatied.

In the ancient time the Bhadhoi region was the part of well known Kashi kingdom which was one of the sixteen Mahajanpadas of Bharatvarsha. Before the birth of Lord Buddha, nearly about in 6th century B.C. its capital was Varanasi, which is situated between Varuna and Assi. In the reign of Ajatshatru, it was merged with Magadh empire. Kashi Naresh participated in Mahabharat war. Varanasi city is the holy and oldest city among the ancient towns of world. It famous as Shivpur. It is has been a centre of learning since long time. It's name is found in Puana , Mahabharata and Ramayana. It is a sacred place of Hindu as well as of Bouddh and Jain.

Punarnava, the great son of Manu was the founder of the Kashi dynasty and ruled over this region. The name of Kashi comes after the name of Kasha the seventh king of this dynasty. After the seventh generation, famous king Dhanvantari, ruled over this region, whose name is famous in medicine sector as founder of Ayurveda, the Pancham Veda. According to Hindu mythology, in Satyug, the king Satya Harish Chandra with his wife sold himself to Dom Raja at Kashi, to pay the Dhakshina to Rajarshi Vishwamitra . In Dwaper,in Mahabharat, it is stated the Bhisma Pitamah took forcibly the three daughters of Kashi Naresh to wed their step brothers, but one of them known as Shikhandi denied and after sometimes she became the cause of death of Bhisma Pitamah during Mahabharat war.

Kashi kingdom was however , dominated by Brahamdutta dynasty of Magadh during the centuary preceeding the Mahabharat war but past Mahabharat period saw the rise of Brahamdutta dynasty. About hundred kings of this generation are said to have had their supremacy over this region and some of these rulers became the Chakravorty Samrat. King Manoj of Kashi brought the kingdom of Kaushala, Anga and Magadh in his possession and annexed their territories into his empire.

In the Jain seripts, a king of Kashi named Ashwasewa was the father of 23rd and historical Tirthankar Parshavanath. In the ninth century B.C. Nagas subdued the Brahamdutta dynasty. Generally , during the eighth and seventh century B.C, the kingdom of Kashi had completely lost its vigour and power and consequently it was tossed between Kaushala and Magadh in that duration. Mean while, Kashi (Varanasi) attained a new importance in the cultural history of India, when lord Buddha delivered his first sermon at Sarnath nearby after the achievement of enlightenment in Gaya. It was the place where the first Sangha of sixty monks was founded who were later on sent to different directions for the propogation of Buddha Dharma.

Bimbsar of Magadh conquered Kaushala at about the third quarter of sixth century B.C. but came into more importance at the time of the emperor Ashoka, the great. In Sarnath, Ashoka built a 100 feet high stupa, probably on the spot where Lord Buddha delivered his first sermon. He also erected the famous Dharam Chakra pillar mounted on a lion made of marble stone, which government of India has adopted as national emblem. Later on Kushans also built their supremacy over this region before the advent of the Gupta empire, which ruled over this region for nearly two centuries (320-540 A.D.). It was the Gupta period when this region was most prosperous and glory of the state spread everywhere. The innumerable images depicting fine arts and seulptures were made during this period. In the first half of the seventh century Kashi formed an integral part of Harshvardhan region.

After the death of Harshvardhan, there was uttar confusion in whole of the northern India. Consequently by the middle of the ninth century to 1027 A.D., it remained under the control of Ghazni. After the death of Jaichandra of Gahadwal dynasty, the independent Hindu dynasty in Kashi came to an end in 1194-1195 A.D. and went in the hands of Mohd. Gauri. In 1526, Ibrahim Lodhi was defeated in the battle of Panipat and Humayun, the son of victorious mughal emperor Babar, took over the charge of the region. Humayon was , however defeated in the battle of Chausa by Sher Khan. Akbar, the great emperor, is said to have reached Varanasi in 1556 A.D. and conferred the three sirkars of Varanasi, Jaunpur and Ghazipur on Munim Khan after taking them away from Ali Quli Khan. The area continued to be administered by various governors appointed by mughal emperors. In 1738 Mansaram-a Gautam Bhimkha and Zamindar was given the administration of Sirkars of Varanasi, Jaunpur and Chunar by Sadat Khan a subedar of Avadh. The administration was passed on to his son Balwant Singh, after his death. In 1775 Kashi kingdom had come under the influence of British empire . He had a confrontation with Warren Hastings, the governor general successor to Chati Singh. The last king of this generation was Bibhuti Narayan Singh who ruled for about eight years till the emergence of independent India. At the time of emergence Banaras state was merged with India.

A great freedom fighter of 1857 freedom struggle, Amar Shaheed Jhoorin Singh was born on this holy land. So many great personalities like Pandit Mahaveer Prasad Malvila, Warrior poet Maharshi Sheobrat Lal, Sohar Baba, Pandit Rajnath Misra, and Swami Atmanand were born on this holy land of this district. The district is also of international fame for its carpets.

Administrative Setup:

The newly created district Sant Ravidas Nagar Bhadohi is divided into two tahsil namely Gyanpur and Bhadohi from the administrative point of view. The district is further divided into 5 community development blocks Gyanpur, Aurai, Digh, Bhadohi and Suriyawan and 79 Nyay Panchayats, 487 gram Sabhas, 1224 revenue villages and 7 towns. Among the towns two are Nagar Palika parishad i.e. Bhadohi and Gopiganj and remaining five are Nagar Panchayats namely. Suriyawan, Nai Bazar, Gyanpur, Khamaria and Ghosia Bazar. C.D. block Aurai and Gyanpur are spread over both the tahsils.

Jurisdictional Changes (1991-2000):

The district Sant Ravi Das Nagar (Bhadohi) was created on June 30, 1994 by dividing the western part of the district Varanasi. Details are given below .

Jurisdictional Changes (1991-2000):

Sl.	Name of District /Tahsil	Notification No. & Date	Jurisdictional Changes	
			Added	Subtracted
1	2	3	4	5
1	Sant Ravi Das Nagar Bhadohi	5-4(1)/78-338-R-5 dated 30.06.1994	Entire Bhadohi and Gyanpur tahsils along with towns transferred From Varanasi district	
2	Bhadohi Tahsil		Entire tahsil along with towns transferred from Varanasi district	
3.	Gyanpur Tahsil		Entire tahsil along with towns transferred from Varanasi district -	

District Administration:

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary and Local self- government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge , who is now re-designated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanongoss circles respectively. For each revenue village, Lekhpal is in- charge . Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have offices at District level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD etc. each having departmental district level officers. From the development point of view, the district is further divided into community development, Block Development Officers (BDO) looks after the development works at community development block level and Assistant Development officer and Village Development Officer are deployed at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in smaller districts and Additional Superintendent of Police (ASP) are in-charge of their respective areas. The Deputy Superintendent of Police

(DSP) looks after the Thana allotted to him. Police Inspectors and Sub-Inspectors are in-charge of their respective Police stations depending upon the population and area.

The Judicial administration of the District headed is by District and Session Judge. In addition there are several Additional District Judge, Civil Judge, Chief Judicial Magistrate and Munsif Magistrate and others judiciary officer are also posted for look into the legal matters.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman , Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman at District Board and Gram Pradhan in Panchayat and Pramukh of Kshetra Samiti etc. comes under Local self-government.

Physical Features:

Location and Size:

District Sant Ravi Das Nagar Bhadohi is located in south eastern part of Uttar Pradesh state. Before 30th June 1994, it was western part of district Varanasi. It is bounded by district Varanasi in the east, Jaunpur in north, Allahabad in west and Mirzapur in south. Total area of the district is 1,015 sq. kms.

Physiography:

On the basis of geology, soils, topography, climate and natural vegitation, the district is sub-divided into following regions.

Ganga Khadar:

It is a narrow belt along the Ganga river extending from one end of the district to the other end. Surface is low lying and subject to in inundation during flood. Approach of flood water delimits the boundary of this region. The Ganga is the main river which flows through meanders in central part. Natural levee, dead arms of the river and sand bars are the main physical features along the Ganga river. The Varuna and Gomti are the only streams that join the Ganga in this tract. The general slope is towards east but the area along the Ganga slopes towards river bed. Geologically the region is composed of Alluvium and Dun gravels of Recent period.

Bhadohi Plain:

Bhadohi plain is situated in the western part of the district beyond the flood limit of the Ganga river. The high bank of the Ganga marks its southern limit. It is flat and featureless plain sloping towards east. The Varuna, along with the Morwa, drains towards east and joins the Ganga near Varanasi. The Nand a small rivulet of the Gomti, drains the northern part. Geologically the region is formed of Alluvium and Dun gravels of Recent period.

Drainage:

Varuna is the most effective river of the district which flows from west to east direction. Other rivers of the district are Morwa and Sai, which are seasonal rivers flowing in only rainy season on which dams are being constructed at so many places for irrigation purposes. Ganga river flows through two development block touching Dih and Aurai. A small part of Dih development block is surrounded by Ganga river.

Climate:

Climate of the district is almost of the sub-tropical monsoon types. The month of January and February are cold ones when the westerly and north-westerly winds blows. The hot season starts from March to about middle of June when monsoon commences to give some relief and continues up to September. From October onwards

nights starts cooling down but days are brighter and sunny. August is the month when rain fall is maximum. The average rainfall reported in the district, in the year 2000 was 1,563 m.m. whereas the actual rain fall was 1,331 m.m. The highest temperature recorded was 46.8^{o}C in the year 1998-99 and the lowest was 5.2^{o}C.

Natural Economic Resources:

Forestry:

Forestry play an important role in the economy of the district and it is deeply connected with the agricultural prosperity of the people. It helps in soil and water conservation essential for agriculture. There are no forests in the district but trees of neem, mahua, jamun and mango are found in every part of the district. Wood obtained from these trees are useful in building construction and decoration work.

Minerals and Mining:

Minerals are not found in the district. Sand obtained from Ganga river adds to the income of the district.

Soil:

Most of the part of the district is plain. The soil found in the area is of balui domat and domat matiyar type. At some places in Gyanpur tahsil alkaline soil is also found. Soil of the tract is sandy and water depth is remarkably high.

Land and Land Use Pattern:

Land use pattern as recorded in Statistical Magazine 2000-01 indicates that in the year 1998-99 total are reported in the district was 103,037 hectares, out of this forest covered 13 hectares, usar and cultivable land 2,990 hectares, land use other than agriculture 16,811 hectares, cultivable waste land 349 hectares, permanent pastures 208 hectares, present fallow 7,749 hectares, other fallow 3,666 hectares and others 1,032 hectares. Net irrigated area reported was 55,417 hectare. Total sown area was 101,719 hectares and net sown area was 70,219 hectares and sown area more than one was 31,500 hectares, and total irrigated area was 71,587 hectares.

Agriculture and Crop Pattern:

There are the usual harvests known as the Kharif or autumn, the Rabi or spring and the Zaid or additional harvest. Of the two main harvest Rabi is the most important, its area being 51,227 hectares as compared to 47,993 hectares sown in Kharif in the year 1998-99.

The main crops of Rabi are wheat, Barely, Gram, Pea and Kharif crops are Paddy, Maize, Bazra and Arhar. Cash crops of the district are sugar-can and vegetables.

In the year 1998-99, 17,0981 m.t. food grains were produced followed by 85,838 m.t. sugarcane 146 m.t. oilseeds, 29,070 m.t. potato. The number of seed and manure depot, in the district were 69 of which seed godowns in rural areas were 32 having capacity of 3,200 m.t. Insectidies depot were 5 in which one in every C.D.block. with a capacity of 40 m.t. During the year 1998-99, the chemical fertilizer, nitrogen 13,468 m.t., phosphorus 3,617 m.t., and potash 903 m.t. were distributed in the district.

Irrigation:

Irrigation is an important investment for improved agricultural production. Tube wells and canals are the major source of irrigation in the district along with wells, ponds and streams. The district has 54 kms length of canals, 487 tube wells, 17 wells, 1,313 boring pumps and 126 private tube-wells. 8,939 hectares of land in the district is irrigated through canals, 16,084 hectares through government tube wells, 30,063 hectare through private tube wells, 303 hectare through wells and 28 hectare through ponds, streams etc.

Animal Husbandry:

Animal husbandry is an integral part of the rural economy providing drought power and manures to small and marginal farmers as well as milk and milk products, meat, eggs etc to protein starved people. As per live-stock census of 1997 the district has 285,990 animals, of which 67,922 are cows, 75,699 are buffaloes, 42,232 are cross breeds animals, 46,494 are sheeps, 37,765 goats, 297 horses and poneys, 14,463 pigs and 1118 other animals. Polutry numbers are 82,544, thus total livestock of district being 368,534.

For the treatment and development of animals the district had 9 veterinary hospitals, 9 animal husbandry development centers, 5 artificial insemination centers and 4 sub artificial insemination center in the district in the year 1999-2000. There is no govt. poultry farm and pig fertility centre in the district . Poultry farms are working in private sector. There were 9 sheep development centres in 1998-99 in the district

Fishery:

All the usual species like rohu, nain, bhakur, mahaseer, chilwa, gooch, saul etc are found in the rivers of the district. Nets of different shapes and names and wickerwork traps of various sorts are employed. In the rains mullet are harpooned. The main fishing castes are mallahs, kewats, khalites, pasis and gonds. Very few of these devote themselves entirely to this occupation as a means of lively hood.

The main activities of the fisheries department are development and exploitation of reservoirs for pisi culture, and supply of fingerlings to private breeders and gram panchayat under the small water scheme. The department distributed 3,113 thousands fingerlings in the district in the year 1998-99. There is no departmental ponds in the district . Two matasaya sahkari samiti are working in the district .

Industry:

The district has good agricultural base but the industrial potential is very low. The district has s significant place in handicraft industries and house hold industries. Bhadohi became popular first time in the year 1851 when East India Company recognised it for its carpet industry. The raw material used in carpet weaving is wool. Manufacturing and dying of wool is done here on a large scale. About 500 units are doing worth Rs. 1,500 crores usiness annually. Carpet weaving is a household industry here, 244 units of Khadi Gram Udyog are working under rural industry. Under small scale industry, 11engineering units, 2 chemical units and 119 handicraft units are working in the district. Under large scale industry, a sugar mill is working in Aurai development block.

Trade and Commerce:

Almost all parts of the district is plain and mineral deposits are not found in the district but from the industrial point of view the district has an important place in the name of Carpet industry. It contributes 90 percent in the economy of the district. About one lakh Carpet looms and 50 thousand Duree looms are working in Bhadohi in which 3.5 lakh Carpet weavers, two lakh Duree weavers and 2.5 lakhs labourers are engaged in washing and colouring work etc related to Carpet. Total of 1,250 production units and 788 units as exporters are registered in the district. Government has also established Bhadohi Industrial Development Authority (BIDA) which provides help to people engaged in Carpet industry. A Carpet city has also been established close to and in the east of Bhadohi town. There were 104 post offices, 8 telegraph offices, and 5,495 telephone connections in the district during 1999-2000.

The district has one Rural Development Bank and 8 branches of Co-operative Bank. There were 22 branches of Rural bank, 39 branches of nationalised banks and

15 branches of other banks during the 1999-2000 year. Only one cold storage is running. There were 55 Prarambhik krishi Rin Sahkari Samitiyan.

Transport:

The district is well connected by rail and road. In all 12 railway station including halts are linked with 74 km. long broad gauge railway track within the district. Bhadohi is the main railway station of the district.

The district has a total of 992 km long pucca road of which 838 km long roads are under Public Works Department and 8 km long road passes through town limits. State Road Transport Corporation does not provide sufficient bus services in the district. Private buses, jeeps, trucks etc serve the people of the district. Approximately 75% villages are connected with pucca roads. In the year 1999-2000, 757 villages were connected with the roads fit for every season. In the year 1998-99, total registered vehicles were 2925, in which 50 were govt. vehicles while 2,875 were private vehicles.

Electricity and Power:

Electricity plays an important role in the economic development of the district. In the year 1999-2000 the total consumption of electricity in the district was 207,422 thousand kwh. Largest consumer of electricity was agriculture sector which consumed 157,106 thousands kwh followed by domestic sector 32,508 thousands kwh, industrial sector 9,714 thousands kwh, commercial sector 4,857 thousands kwh, public lights 413 thousands kwh and others 2,824 thousands kwh. electrified villages, according to central power authority's difinition were 602 and where L.T. mains lying were 322. The total 367 harizan basti were electrified and 6,947 private tube wells and pump sets were energised by electricity in the year 1999-2000. There are 29 bio gas plant in the district. All the seven towns are electrified.

Gram Panchayat, its Composition, Jurisdiction and role in village Development:

A Gram Panchyat acts as the executive of the Gram Sabha and plays a vital role in village development. There are 487 Gram Sabhas in the district.

Composition:

The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat.

It is necessary that the village Panchayat should have member belonging to the scheduled caste and also a women member. If they are not elected, then the government itself appoints two such members. The village Panchayaat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

Its Term:

The new panchayat Raj act of 1993 has fixed a uniform five-year for every Panchayat.It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district authorities must be obtained beforehand.

The Panchayat normally meets once in a month. If need be, an emergency meeting can also be called by the Sarpanch.

Qualifications:

In order to be elected to a village panchayat, a candidate should possess the following qualifications**:**

(1) He should be resident of the village concerned and his name should be in the voter's list of the village.
(2) He should be twenty-five year old.
(3) He should be mentally and physically sound.
(4) He should not be a proclaimed offender.

Functions

A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Center opened in the village. The Panchayat has also provide land and building for such a center.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the district.
6. It arranges for sufficient irrigational facilities, improved seeds, insectidies, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. It some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal cases and imposes fine unto Rs.100.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made

from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These

different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomer-ation should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

List The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1	Agariya	37	Gual
2	Badhik	38	Habura
3	Badi	39	Hari
4	Baheliya	40	Hela
5	Baiga	41	Kalabaz
6	Baiswar	42	Kanjar
7	Bajaniya	43	Kapariya
8	Bajgi	44	Karwal
9	Balahar	45	Khairaha
10	Balai	46	Kharwar (excluding Banbasi)
11	Balmiki	47	Khatik
12	Bangali	48	Khorot
13	Banmanus	49	Kol
14	Bansphor	50	Kori
15	Barwar	51	Korwa
16	Basor	52	Lalbegi
17	Bawariya	53	Majhwar
18	Beldar	54	Mazhabi
19	Beriya	55	Musahar
20	Bhantu	56	Nat
21	Bhuiya	57	Pankha
22	Bhuyiar	58	Parahiya
23	Boria	59	Pasi, Tarmali
24	Chamar,Dhusia, Jhusia, Jatawa	60	Patari
25	Chero	61	Rawat
26	Dabgar	62	Saharya
27	Dhangar	63	Sanaurhiya
28	Dhanuk	64	Sansiya
29	Dharkar	65	Shilpkar
30	Dhobi	66	Turaiha
31	Dom	**Scheduled Tribes**	
32	Domar	1	Bhotia
33	Dusadh	2	Buksa
34	Gharami	3	Jaunsari
35	Ghasiya	4	Raji
36	Gond	5	Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any eco-nomically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or

groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural Labourers

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns

which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (C.DR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{C.DR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,00,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from

the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrange-ment and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population.Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census finding

Population Distribution:

The total population of the district is 1,353,705 in which 1,180,220 live in rural and rest 173,485 in urban parts. There are 2 tahsils in district namely Bhadohi and Gyanpur . The most populous tahsil is Gyanpur followed by Bhadohi . The urban population in the district is 12.8 percent. The urban population is maximum at 18.4 percent in Bhadohi tahsil. There one 1,224 revenue village of which 127 are uninhabited. The total rural population of district Sant Ravidas Nagar is spread over 5 C.D blocks. The most populous C.D Block is Aurai with a population of 267,635 with the maximum number of inhabited villages (257). 273 villages have a population in the size of 1000-1999 and such villages form as high as 24.9 percent of total populated villages. Although the population density in the rural district is 1,206 highest proportions (78.2) of villages are with a population density range of 501+ per square kilometer. Such villages contain as much as about 86.5 percent of total rural population.

Size-class and status of towns:

In the total urban population of 173,485. a number of 74,522 live in Bhadohi NPP the next big town is Khamaria NP with a population of 23,546. The above two are class II and III towns having the civic status of Nagar Palika Parisad NPP and Nagar panchayat (NP). Rest of 5 towns are NPP and class IV Towns Nagar Panchayat (N.P.)

Population growth:

At the present territorial jurisdication the population of the district was 1,077,633 at 1991 Census and growing by 25.6 percent during the decade 1991-2001 it is 1,353,705 at 2001 Census. The decadal growth at 25.6 percent in the district has been at near equal level with in the state at 25.8 percents.

Population Density:

The district has area of 1015 square kilometer. The population density in the district is 1,334. In the rural areas of the district the density is 1,206.

Sex-Ratio:

The sex-ratio in the district at 917 is way ahead to 898 at the State level. Indeed the sex-ratio at the district has been all along been higher in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is higher in rural areas. Among tahsils, highest sex-ratio is in Bhadohi and lowest in Gyanpur. Among C.D Block the sex-ratio is highest in Suriyawan at 963 and lowest in Aurai at 893 Out of 1097 inhabited villages in the district there are about 2.0 percent villages (with 0.3 percent of rural population) which are having a sex-ratio below 700.In the urban parts of the district the sex-ratio is 881 and highest of 911 in Gopigang (NPP) and lowest of 836 in Nai Bazar (NP). The sex-ratio of population on the age-group 0-6 is 916 in the district which is higher than the state being only at 898. As against a sex-ratio of 916 in the age-group 0-6 of rural population of the district, it is highest at 925 in Suriyawan Block and lowest at 910 in C.D Digh C.D. Block. It may be noted that out of 1097 inhabited villages in the district in over 15.2 percent of villages with about 23.0 percent of rural population the sex-ratio in the age-group 0-6 is between 900-949. As against the 0-6 age-group sex-ratio of 916 in the rural area of the

district is only 912 in urban. Among towns this sex-ratio is highest at 925 in Nai Bazar (NP) and lowest at 863 in Gyanpur (NP).

Work Participation Rate:

In the total population of the district of Sant Ravidas Nagar as much as 28.7 percent are workers and rest of 71.3 percent are non-worker. Among worker 20.1 percent are main workers and rest of 8.6 percent are marginal workers of total population. In absolute terms males outnumber females as main worker and vice versa in marginal workers . The extent of main workers is highest at about 20.4 percent in Bhadohi tahsil and lowest at about 19.8 percent in Gyanpur tahsil. In case of marginal workers the population is highest in Gyanpur tahsil as 9.5 percent in comparision to only about 7.5 percent in Bhadohi tahsil. In the district among workers about 25.8 percent are cultivators and 33.1 percent other workers. Over 29.3 percent of female workers are engaged as cultivators.

Literacy:

In the district about 57..9 percent population is literate. The literacy is 67.0 percent in urban areas and about 56.5 percent in rural areas. The males literacy is as highest as 75.8 percent as against about 38.4 percent females literacy, and therefore the gap in male/female literacy rate is 37.3 percent. In rural areas among 5 C.D Blocks, the highest literacy is at 58.2 percent in Bhadohi and lowest at 55.6 percent in Suriyawan and Aurai. The literacy among males in rural areas is 75.4 percent in comparison to 36.1 percent among females. The lowest female literacy of 35.2 percent is in Suriyawan C.D Block. The gap in male/female literacy rate is highest in Gyanpur C.D Block which is 40.7. percent. In about 36.6 percent of villages covering also about 45.0 percent of rural population the literacy range is51 to 60. Among urbanites in the district, as much as 77.8 percent males are literates as against 54.6 percent females. The highest urban literacy is inGyanpur (NP) at 77.1 percent and lowest in Ghasia Bazar at 46.4 percent. The maximum males literacy is also found in Gyanpur (NP) at 85.5 percent and lowest at 56.5 percent in Ghosia Bazar (NP) The highest females literacy is in Gyanpur (NP) at 67.4 percent and lowest at 34.6 percent in Ghosia Bazar (NP) Still, the maximum gap in male-female literacy rate at 34.6 percent is found in Suriyawan (NP). The literacy among scheduled castes is 42.9 percent in the countryside and 45.0 percent in towns. The literact around scheduled tribes is 48.4 percent in rural and 33.3 percent in urban.

(viii) Brief Analysis of Primary Census Abstract Data Based on inset Tables 1 to 36:

Primary Census Abstract gives data up to C.D Block/UA/City/Town level for the country and state. It contains information relating to area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, Scheduled Caste and Scheduled Tribe population with male-Female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Bhadohi	447,618	363,237	84,381	562,843	459,010	103,833	25.7	26.4	23.1	18.9	18.4

	District Total	**1,077,633**	**938,395**	**139,238**	**1,353,705**	**1,180,220**	**173,485**	**25.6**	**25.8**	**24.6**	**12.9**	**12.8**

The growth rates of each tahsil in Sant Ravidas Nagar district for total, rural and urban areas and percentage of urban population to total population are given in table. The decadal growth rate of the district is 25.6 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 25.8 and 24.6 per cent respectively . Out of the total population of the district 87.2 per cent lives in rural areas while 12.8 per cent lives in urban areas of the district. The proportion of urban population has very slightly declined during the decade from 12.9 per cent in 1991 to 12.8 per cent in 2001 in the district.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 1097 inhabited villages, 153 (13.9 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 218 villages having (19.9) per cent villages of the district while in the size class of 500-999 population claims 294 villages with 26.8 per cent of the total villages in the district. 273 villages (24.9 per cent) are in the size class of 1,000-1,999 and 149 villages (13.6 per cent) are in the size class of 2,000-4,999 In the size of 5000-9999 persons there are 10 villages having 0.9 per cent villages of the district. None of villages in the district fall in the range of 10,000 and above population. The biggest village in the district having population of 9,029 persons is located in Digh C.D. block of district.

Table 3: New Towns, Denotified, Declassified and Merged Towns in 2001 Census

Name of town
1
(a) New
(i) Statutory town
1.
2. Nil
3.
(ii) Census town
1.
2. Nil
3.
(b) Denotified
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIi
1.
2. Nil
3.
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria – Nil
1.
2. Nil
3.
(iii) Census towns of 1991 census are notified as statutory town in 2001 census - Nil
1.
2. Nil
3.
(c) Declassified
1.
2. Nil
3.
(d) Wholly merged with other town(s)
. Nil
3.

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

During the decade 1991-2001, no new town has been added or declassified or merged with other town in the district

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	110	10.0	122,893	10.4
11-20	1	0.1	31	0.0
21-50	8	0.7	724	0.1
51-100	7	0.6	1,181	0.1
101-200	16	1.5	6,435	0.5
201-300	35	3.2	4,735	0.4
301-500	62	5.7	22,991	1.9
501 +	858	78.2	1,021,230	86.5
Not known	0	0.0	0	0.0
District Total	**1,097**	**100.0**	**1,180,220**	**100.0**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 858 accounting for 78.2 per cent of the total inhabited villages of the district fall in the density range of 501+ persons having 86.5 per cent population. The lowest ranges of 0-10 & 11-20 persons per sq. km. cover 111villages (10.1 per cent). 62 villages (5.7 per cent) have high density with 301-500 persons per sq. km. while the corresponding proportion in the range of 101 to 300 is 4.7 per cent of the total inhabited villages having 0.9 per cent population of the district. In the medium densities ranges of 21 - 50 and 51-100 persons account for 0.7 and 0.6 per cent of inhabited villages respectively. Both these ranges claim 0.2 per cent rural population.

TABLE 5: Sex Ratio of State and District 1901-2001

Year		UTTAR PRADESH		SANT RAVIDAS NAGAR		
	Total	Rural	Urban	Total	Rural	Urban
1901	938	941	916	1,001	1,001	0
1911	916	922	866	994	994	0
1921	908	918	834	966	968	881
1931	903	916	813	957	966	845
1941	907	922	824	956	959	830
1951	908	922	827	1,022	1,029	922
1961	907	921	817	1,042	1,052	881
1971	876	884	826	965	973	853
1981	882	889	850	921	926	882
1991	876	879	864	896	901	859
2001	898	904	876	917	923	881
NOTE- SexRatio has been defined here as the numberof females per 1000 males						

As per 2001 Census sex-ratio of 917 females per 1,000 males has been recorded in the district against the state average of 898 The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 896 females per 1,000 males were recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and state.

TABLE 6: SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Bhadohi	929	940	878
2	Gyanpur	910	912	886
	District Total	**917**	**923**	**881**

The table-6 gives sex-ratio for total, rural and urban areas at tahsil level as per 2001 census. There are 917 females for every thousand males in Sant Ravidas Nagar district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas. The sex-ratio among rural and urban population is 923 and 881 females respectively. The rural sex-ratio in the tahsils varies between 912 in Gyanpur tahsil and 940 females per 1,000 males in Bhadohi tahsil. The sex-ratio in Bhadohi (tahsil) is higher than district rural average (923) In urban areas the highest sex-ratio is recorded in Gyanpur (886) and the lowest is in Bhadohi urban (878).

TABLE 7 : SEX RATIO BY C.D BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Suriyawan	963
2	Bhadohi	924
3	Aurai	893
4	Gyanpur	921
5	Digh	925
	District (Rural) Total	**923**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 923 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 963 females is found in Suriyawan C.D. block and is fallowed by Digh (925) while the lowest of 893 is recorded in Aurai C.D. block. The sex-ratios of Suriyawan,Bhadohi and Digh C.D. block are higher than the district rural average of 923 females and in remaining blocks, this is below the district average.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	22	2.0	3,202	0.3
700-749	12	1.1	4,266	0.4
750-799	30	2.7	15,377	1.3
800-849	108	9.8	93,285	7.9
850-899	215	19.6	308,442	26.1
900-949	300	27.3	409,874	34.7
950-999	184	16.8	201,966	17.1
1000-1099	165	15.0	120,781	10.2
1100+	61	5.6	23,027	2.0
District Total:	**1,097**	**100.0**	**1,180,220**	**100.0**
Sex ratio (Rural) for District		**923**		

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 300 accounting for 27.3 per cent of the total

villages having largest population of 34.7 per cent in the district fall in the sex-ratio range of 900-949 females per 1,000 males. It is followed by the sex-ratio range of 850-899 which claims 215 villages (19.6 per cent) and 26.1 per cent population. The highest range of 1,100 and above claims 61 villages (5.6 per cent). This range shares 2.0 per cent rural population of the district while in the sex-ratio range of 950-999, there are 184 villages (16.8 per cent). In remaining sex-ratio ranges of 1000-1099,800-849, 750-799, 700-749 and less than 700, the number of villages are 165 (15 per cent), 108 (9.8 per cent), 30 (2.7 per cent), 12 (1.1 per cent) and 22 (2.0 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e 699 having maximum population (77.9 per cent) fall in the sex-ratio ranges of 850-999 females.

TABLE 9: SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Bhadohi	NPP	884
2	Ghosia Bazar	NP	871
3	Gopi Ganj	NPP	911
4	Gyanpur	NP	859
5	Khamaria	NP	890
6	Nai Bazar	NP	836
7	Suriyawan	NP	881
Sex ratio (Urban) for the district			**881**

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 881 females per 1,000 males. Among the 7 towns of the district the sex-ratio varies between 836 to 911. Gopiganj. has the highest sex-ratio (911) while Nai Bazar N.P. has the lowest sex-ratio of 836 females.

TABLE 10: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bhadohi	Total	113,664	59,296	54,368	917
		Rural	93,587	48,803	44,784	918
		Urban	20,077	10,493	9,584	913
2	Gyanpur	Total	159,871	83,485	76,386	915
		Rural	147,212	76,858	70,354	915
		Urban	12,659	6,627	6,032	910
	District Total	**Total**	**273,535**	**142,781**	**130,754**	**916**
		Rural	**240,799**	**125,661**	**115,138**	**916**
		Urban	**32,736**	**17,120**	**15,616**	**912**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is273,535 persons comprising 142,781 males and 130,754 females. The total sex-ratio in this age-group works out 916 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas is 916 and 912 females respectively in this age-group. The rural sex-ratio in tahsil varies between 915 in Gyanpur tahsil and 917 in Bhadohi tahsil. The sex-ratio of Bhadohi tahsil is higher than district rural average (916) Gyanpur (Urban) has lowest sex-ratio of 910 females among the total population and also claims lowest rank in the sex-ratio of children.

In urban areas, the higher sex-ratio is recorded in Bhadohi urban (913) and the lowest is found in Gyanpur urban (910).

TABLE 11: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Suriyawan	40,122	20,845	19,277	925
2	Bhadohi	51,505	26,948	24,557	911
3	Aurai	56,019	29,236	26,783	916
4	Gyanpur	48,588	25,296	23,292	921
5	Digh	44,565	23,336	21,229	910
	District (Rural) Total	**240,799**	**125,661**	**115,138**	**916**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 916 for the district (rural). The sex-ratio of C.D. block varies between 910 to 925. It is highest in Suriyawan C.D. block i.e. 925 followed by 921 in Gyanpur C.D. block and lowest 910 females is found in Digh C.D. block. The sex-ratio of Gyanpur and Suriyawan C.D. block are higher than the district rural (916) and Aurai equals to the district average while in remaining blocks, it is below the average of the district.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	107	9.8	6,194	2.6
700-749	54	4.9	7,915	3.3
750-799	82	7.5	15,750	6.5
800-849	108	9.8	25,942	10.8
850-899	156	14.2	46,044	19.1
900-949	167	15.2	55,349	23.0
950-999	102	9.3	32,412	13.5
1000-1099	160	14.6	33,237	13.8
1100+	161	14.7	17,956	7.5
District (Rural) Total	**1,097**	**100.0**	**240,799**	**100.0**
Sex ratio (Rural) for District		**916**		

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e. 167 (15.2 per cent) having largest population (23.0 per cent) in the district (rural) fall in the sex-ratio range of 900-949 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 1100+ which claims 161 villages (14.7 per cent) and 7.5 per cent population. Next to it, 160 villages (14.6 per cent) are in the range of 1,000-1,999 with 13.8 per cent population. 156 villages (14.2 per cent) having 19.1 per cent population fall in sex-ratio range of 850-899. In remaining sex-ratio ranges of 700-749, 750-799, 800-849, less than 700 and 950-999 claim less number of villages and these are distributed as 54 (4.9 per cent), 82 (7.5 per cent), 108 (9.8 per cent), 107(9.8 per cent and 102 (9.3 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty per cent of villages i.e. 590 having population (57.8 per cent) fall in the higher sex-ratio ranges of 900 to 949 and above.

TABLE13: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

District(Urban) Total			**32,736**	**17,120**	**15,616**	**912**

Table 13 shows sex ratio of population in the age group 0-6 of urban towns 2001. In urban area of the district total population in age group of 0-6 is 32,736 in which 17,120 are males and 15,616 females and sex ratio of the urban areas of the district is 912 . Among 7 towns sex ratio in age group 0-6 varies from 863 in Gyanpur town to 925 In Nai Bazar (N.P.) In Nai Bazar,Bhadohi,Gopalganj,Khamaria and Ghosia Bazar. towns sex ratio is more than the district average. Among 7 towns Bhadohi town has highest population.

TABLE 14: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Bhadohi	Total	562,843	123,068	87	21.9	0
		Rural	459,,010	110,083	81	24	0
		Urban	103,833	12,985	6	12.5	0
2	Gyanpur	Total	790,862	169,679	138	21.5	0
		Rural	721,210	163,508	135	22.7	0
		Urban	69,652	6,171	3	8.9	0
	District Total:	**Total**	**1353,705**	**292,747**	**225**	**21.6**	**0**
		Rural	**1180,220**	**273,591**	**216**	**23.2**	**0**
		Urban	**173,485**	**19,156**	**9**	**11**	**0**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil/ level in rural and urban areas of the district. Of the 1,353,705 total population of the district, 21.6 per cent of the total population belong to the Scheduled Castes and negligible per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 23.2 per cent in rural and 11.0 percent in urban areas of the district. The highest percentage of Scheduled Castes population is recorded in Bhadohi tahsil (21.9) while the lowest is found in Gyanpur tahsil (21.5). Scheduled Tribes population in the district is only 225 out of which tahsil Bhadohi has 87 and tahsil Gyanpur has 138 Scheduled Tribes.

TABLE 15: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Suriyawan	200,775	48,519	0	24.2	0
2	Bhadohi	248,707	59,560	81	23.9	0
3	Aurai	267,635	67,206	0	25.1	0
4	Gyanpur	237,941	48,691	134	20.5	0.1
5	Digh	225,162	49,615	1	22	0
	District (Rural) Total	**1180,220**	**273,591**	**216**	**23.2**	**0**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 23.2 per cent of rural population of the district belongs to Scheduled Castes and negligible per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 20.5 per cent in Gyanpur and 25.1 per cent in Aurai C.D. block.. The other C.D. block containing the highest percentage of Scheduled Castes are Suriyawan (24.2) Bhadohi (23.9) and Digh (22.0). The Scheduled Tribes population in the district is mainly concentrated in Gyanpur and Bhadohi C.D. blocks.

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	227	20.7	0	0.0
Less than 5	75	6.8	1,995	0.7
5-10	99	9.0	8,803	3.2
11-20	197	18.0	49,957	18.3

51-75	74	6.7	32,736	12.0
76 and above	44	4.0	13,246	4.8
District Total	**1,097**	**100.0**	**273,591**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 227 villages accounting for 20.7 per cent of total 1,097 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5 per cent in 75 villages (6.8 per cent). In 99 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 197 villages constituting 18.0 per cent of the total villages. The range 21-30 and 31-40 per cent contains 216 and 104 villages respectively. Both these ranges together account for 29.2 per cent villages of the district. 179 villages fall in the range of 41-50 and above per cent. 44 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 4.8 per cent

Scheduled Castes population of the district. The maximum of the 30.9 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

TABLE 17: PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District Total	**1,097**	**100.0**	**216**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. Negligible percent of rural population of the district belong to Scheduled Tribes population. There are 1091 (99.5 per cent) villages where none of Scheduled Tribes have been recorded in the district. 4 (0.4 per cent) villages have proportion of Scheduled Tribes population up to 5 per cent and remaining 2 (0.2 per cent) villages have 5-20 percent Scheduled Tribes population.

TABLE 18: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bhadohi (NPP)	74,522	7,543	0	10.1	0
2	Ghosia Bazar (NP)	16,105	1,483	0	9.2	0
3	Gopi Ganj (NPP)	17,935	893	0	5	0
4	Gyanpur (NP)	12,066	761	0	6.3	0
5	Khamaria (NP)	23,546	3,034	3	12.9	0
6	Nai Bazar (NP)	11,888	2,400	0	20.2	0
7	Suriyawan (NP)	17,423	3,042	6	17.5	0
District(Urban) Total		**173,485**	**19,156**	**9**	**11**	**0**

Table 18 shows number and percentage of Scheduled Caste and Scheduled Tribes population recorded during 2001 census in district Sant Ravidas Nagar. The table depicts that Scheduled Caste population in Nai Bazar (NP) was 20.2 per cent but very low (5.0 per cent) in the Gopiganj (NPP) town. Scheduled Tribe population is negligible in the urban areas of the district. There are scheduled tribe population only in Suriyawan and Khamaria (N.P.) town. Highest Scheduled Tribe population was recorded in Suriyawan N.P. (6).

TABLE 19: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Suriyawan	919	0
2	Bhadohi	909	1077
3	Aurai	888	0
4	Gyanpur	890	675
5	Digh	884	0
	District (Rural) Total	**897**	**800**

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 897 for district (rural). Among the C.D.blocks, the highest sex ratio of 919 females is found in Suriyawan C.D. block and lowest of 884 females is recorded in Digh C.D. block. This table also shows that sex ratio of ST population in rural areas of the district is 800. The sex ratio in Bhadohi C.D block is above the district (rural) while in Gyanpur C.D block it is below the district (rural). The lower value of sex ratio of 675 females is recorded in Gyanpur C.D block.

TABLE 20: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bhadohi (NPP)	869	0
2	Ghosia Bazar (NP)	877	0
3	Gopi Ganj (NPP)	916	0
4	Gyanpur (NP)	782	0
5	Khamaria (NP)	951	2,000
6	Nai Bazar (NP)	843	0
7	Suriyawan (NP)	871	2,000
Sex ratio (Urban) for the district		**878**	**2,000**

Table 20 shows sex-ratio among Scheduled Castes and Scheduled Tribes in urban agglomerations/towns 2001. Among 7 towns sex ratio of Scheduled Castes is highest in Khamaria town (951) and lowest in Nai Bazar town (843). Nai Bazar,Bhadohi, Gyanpur,Gopi Ganj and Ghosia Bazar. towns have zero sex ratio in Scheduled Tribes population. It means ST population is zero. In urban area of the district Sant Ravidas Nagar sex ratio of SC and ST are 878 and 2000 respectively.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
			Number of literates			Number of illiterates

	District Total	**Total**	**625,404**	**426,692**	**198,712**	**728,301**	**279,305**	**448,996**	**57.9**	**75.8**	**38.4**	**37.3**
		Rural	**531,096**	**368,249**	**162,847**	**649,124**	**245,507**	**403,617**	**56.5**	**75.5**	**36.1**	**39.4**
		Urban	**94,308**	**58,443**	**35,865**	**79,177**	**33,798**	**45,379**	**67.0**	**77.8**	**54.7**	**23.2**

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total

population excluding 0-6 years comes to 57.9 per cent in the district. This proportion in rural area is 56.5 per cent against 67.0 per cent in urban areas. In the district the literacy rates of males (75.8 per cent) is much higher than that of females (38.4 per cent). Among the tahsils, Bhadohi tahsil tops with 58.9 per cent literates followed by Gyanpur tahsil (57.2 per cent). Out of 2 tahsils, the literacy rates of Bhadohi tahsil is higher than that of district average. It is observed that in urban areas of district the literacy rates are lower than the rural areas. The gap between male and female literacy is very high which comes to37.3 per cent in the district. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 23.2 points against the rural areas, where the gap between male and female literacy is 39.4 points.

TABLE 22: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Male	Female	Persons	Male	Female	Persons	Male	Female	
1	2	3	4	5	6	7	8	9	10	11	12
1	Suriyawan	89,390	61,479	27,911	111,385	40,797	70,588	55.6	75.5	35.2	40.3
2	Bhadohi	114,678	78,020	36,658	134,029	51,258	82,771	58.2	76.2	38.6	37.6
3	Aurai	117,749	82,546	35,203	149,886	58,846	91,040	55.6	73.6	35.4	38.2
4	Gyanpur	107,262	75,063	32,199	130,679	48,770	81,909	56.6	76.2	35.5	40.7
5	Digh	102,017	71,141	30,876	123,145	45,836	77,309	56.5	76	35.5	40.5
	District (Rural) Total:	**531,096**	**368,249**	**162,847**	**649,124**	**245,507**	**403,617**	**56.5**	**75.4**	**36.1**	**39.4**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 56.5 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 75.4 and 36.1per cent respectively, which shows very wide gap of 39.4 per cent in male and female literacy. At C.D. block level, Bhadohi C.D. block has the highest rural literacy rate of 58.2 percent where 76.2 cent males and 38.6 cent females are literates in this block. The lowest literacy rate in rural areas is noted in Suriyawan and Aurai C.D. block (55.6 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 40.7 points is found in Gyanpur C.D. block.

TABLE 23: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	47	0.0
1-10	1	0.1	79	0.0
11-20	2	0.2	111	0.0
21-30	20	1.8	7,687	0.7
31-40	61	5.6	39,209	3.3
41-50	218	19.9	237,407	20.1
51-60	401	36.6	531,231	45.0

71-80	89	8.1	55,000	4.7
81-90	28	2.6	8,921	0.8
91-99	5	0.5	1,185	0.1
100	1	0.1	3	0.0
District Total:	**1097**	**100.0**	**1,180,220**	**100.0**

Literacy rate for District: 57.9

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in one village (0.1 per cent) of the district and population of these villages is only 47 persons. One village (0.1 per cent) have all the literate population. 401 villages

accounting for 36.6 per cent of the total villages are in the literacy range of 51-60 per cent and 270 villages (24.6 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent is observed in 302 villages (27.6 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 123 villages (11.3 per cent). The range of 51-70 have the maximum number of 671 villages forming 61.2 per cent of the total inhabited villages.

TABLE 24: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Male	Female	Persons	Male	Female	Persons	Male	Female	
1	2	3	4	5	6	7	8	9	10	11	12

4	Gyanpur (NP)	7,798	4,652	3,146	4,268	1,839	2,429	77.1	85.5	67.4	18.1
5	Khamaria (NP)	12,839	7,938	4,901	10,707	4,518	6,189	66.5	77.5	54	23.4
6	Nai Bazar (NP)	6,082	3,928	2,154	5,806	2,547	3,259	64.1	75.1	50.6	24.6
7	Suriyawan (NP)	9,637	6,349	3,288	7,786	2,915	4,871	68.6	84.7	50.1	34.6
District(Urban) Total		**94,308**	**94,308**	**58,443**	**35,865**	**79,177**	**33,798**	**45,379**	**77.8**	**54.6**	**23.1**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. The table reveals that literacy rate is high in the urban areas of the district (67.0 percent). The literacy rate is quite high (above 84.0 per cent in two towns) among males. Female literacy rate is also not far behind in two towns (above 65.0 per cent). However, literacy rate among females is very low (34.6 per cent) in Ghosia Bazar town, thus the gap in male female literacy rate is high (23.1).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Male	Female	Persons	Male	Female	Persons	Male	Female	
1	2	3	4	5	6	7	8	9	10	11	12
1	Suriyawan	16,474	12,427	4,047	32,045	12,857	19,188	43.2	62.7	22.1	40.6
2	Bhadohi	20,780	15,400	5,380	38,780	15,807	22,973	45.2	63.6	24.7	38.9

5	Digh	16,338	12,796	3,542	33,277	13,545	19,732	42.3	62.1	19.6	42.5
	District (Rural) Total:	**91,032**	**69,308**	**21,724**	**182,559**	**74,893**	**107,666**	**42.9**	**61.7**	**21.7**	**40.0**

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by sex in C.D blocks 2001. In rural areas of the district proportion of literates is 42.9 per cent in which 61.7 per cent are males and 21.7 per cent females. Thus, the gap in male and female literacy rates is 40.0 Among 5 C.D blocks, Bhadohi has the highest literacy rate and Aurai C.D block has the lowest literacy rates. The gap in male/female literacy rates in Digh C.D block is highest (42.5) and lowest in Aurai C.D block (37.5).

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5

Literacy rate for District (Rural)	42.9			

The table 26 presents the distribution of villages by literacy rate range for Scheduled Castes population at the 2001 census. In majority of inhabited villages which form 57.8 per cent of total rural Scheduled Castes population the literacy range is between 31 to 50 per cent. In the district there are 870 inhabited villages with scheduled castes population and having (42.9) per cent of literacy rate.

TABLE 27 :NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/Female literacy rate
		Number of literates			Number of illiterates						
		Persons	Male	Female	Persons	Male	Female	Persons	Male	Female

District (Urban) Total		**6,714**	**5,028**	**1,686**	**12,442**	**5,173**	**7,269**	**45.0**	**62.6**	**24.5**	**38.1**

The table 27 brings out the number and percentage of Scheduled Castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is more than literates in the district (urban).The percentage of literates is least in Nai Bazar (N.P.) among 7 towns but the gap in male/female literacy rate is highest in case of Suriyawan (N.P.). The males in all the 7 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Nai Bazar (N.P.) and the female literacy rate is highest in Gyanpur NP. (41.6 per cent).

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bhadohi	28	17	11	53	22	31	50.9	65.4	37.9	27.5
2	Gyanpur	48	36	12	86	44	42	46.6	59.0	28.6	30.4
3	Digh	1	1	0	0	0	0	100.0	100.0	0.0	100
District (Rural) Total:		**77**	**54**	**23**	**139**	**66**	**73**	**48.4**	**61.4**	**32.4**	**29.0**

The table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in C.D Blocks at the 2001 census. The number of illiterates is more than literates in the district and C.D Blocks, with exception to Digh C.D Block. The literacy rate of the Scheduled Tribes population at 48.4 per cent is higher than the corresponding rate of only 42.9 per cent in case of Scheduled Castes community. The gap in male and female literacy rates at about 29.0 per cent is lesser than what it is in case of the Scheduled Castes community (40.0 per cent). The literacy rate is highest in Digh C.D Block and lowest in Gyanpur C.D Block. The gap in male/female literacy rate in Bhadohi C.D Block is in favour of the females, which is an exception otherwise the highest gap is in case of Digh C.D Block.

TABLE 29: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	1	16.7	1	0.5
1-10	1	16.7	15	6.9
11-20	0	0.0	0	0.0

100	1	16.7	1	0.5
District Total:	**6**	**100.0**	**216**	**100.0**

Literacy rate for District (Rural): 48.4

The table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population as per 2001 Census. In the district the scheduled tribes population is found in 6 villages out of which in one village the literacy range is 100 per cent. However, the maximum (68.5 per cent) of the Scheduled Tribes population (148) is found in only 2 villages with literacy range from 51 to 60 percentages.

TABLE 30: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Male	Female	Persons	Male	Female	Persons	Male	Female	
1	2	3	4	5	6	7	8	9	10	11	12
1	Suriyawan (NP)	1	1	0	5	1	4	16.7	50.0	0.0	50.0
2	Khamaria (NP)	2	1	1	1	0	1	66.7	100.0	50.0	50.0
District Total:		**3**	**2**	**1**	**6**	**1**	**5**	**33.3**	**66.7**	**16.7**	**50.0**

The Table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in urban agglomerations/town population as per 2001 census.There is small Scheduled Tribes population in the towns of the district. In 5 towns there is no Scheduled Tribe population.In Suriyawan N.P. and Khamana N.P. which have Scheduled Tribe population, the percentage of literates is 33.3 of which 66.7 per cent of males and 16.7 per cent of female are literates.The gap in male/female literacy rate in the district Sant Ravidas Nagar (urban) is 50.0 percentage points.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN TAHSILS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils level in the district as per 2001 Census. The proportion of the total workers works out 28.7 per cent of the total population in the district. The total workers are comprised of 20.1 per cent of main workers and 8.6 per cent of marginal workers and the remaining 71.3 per cent are non-workers.

Among the main workers, males participation rate in the district is 33.9 per cent and 5.0 per cent of females. Male and female marginal workers account for 7.4 and 10.0 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 27.9 per cent in Bhadohi tahsil to 29.3 per cent in Gyanpur tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 1,180,220 total rural population of the district, 19.7 per cent has been categoriser as main workers and the marginal workers constitute 9.3 per cent and the remaining 71.0 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 33.2 per cent males and 5.1 per cent females are in the category of main workers. Male and female marginal workers account for 7.9 and 10.8 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 29.0 per cent. At the C.D. block level, Gyanpur and Digh has highest proportion of total workers with each tahsil having 30.3 per cent of the total population. It is closely followed by Aurai (28.4 per cent), Suriyawan (28.2 per cent). The lowest percentage of 28.1 per cent is recorded in Bhadohi C.D. block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Note: Percent of Worker to total worker are given in brackets

It can be seen from the table 34 that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 25.8 per cent of the total workers (main + marginal) and remaining 15.1 per cent of total workers are engaged as agricultural labourers, Household industry workers 26.0 per cent and other workers are 33.1 per cent in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 25.2 per cent in Gyanpur tahsil and 26.6 per cent in Bhadohi tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of female cultivators is 29.3 per cent which is high as compared to 24.6 per cent male cultivators in the district. The percentage of agricultural labourers is low in the district as stated above. The workers in other activities occupy the first position next to house hold industry workers in the district as well as in each tahsil. The highest proportion of 36.8 per cent of other workers is recorded in Bhadohi tahsil while the lowest proportion of 30.6 per cent is found in Gyanpur tahsil.

TABLE 35: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Note: Percent of Worker to total worker are given in brackets

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal)29.0 per cent of total population. Among these workers, cultivators constitute 29.0 per cent, 16.8 per cent agricultural labourers, 26.3 per cent household industry workers and 27.9 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 26.3 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (31.4 per cent) is higher than males (28.1 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators

and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 21.9 per cent in Aurai C.D. block to 32.2 per cent in Suriyawan C.D. block. Similarly for other workers, the lowest proportion is 21.9 per cent in Suriyawan C.D. block while 35.6 per cent is the highest in Bhadohi C.D. block. The percentage of agricultural labourers is quite low i.e. only 16.8 per cent in the district. The percentage of agricultural labourers is highest in Digh (22.9) block and is followed by Suriyawan (19.6). Similarly, household industry workers varies in C.D. blocks between 20.3 per cent in Bhadohi and 33.1 per cent in Aurai.

TABLE 36: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district . It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (72.2), followed by House hold industry workers with 23.9 per cent (19.9 per cent male and 46.4per cent female). If we observe each town, the table reveals that highest percentage of household industry workers (47.4) is recorded in Ghosia Bazar (N.P.) In the agriculture labourers category Nai Bazar (N.P.) recorded very low percentage (0.2) cultivators are also very low (0.3 per cent) in Gopiganj (NPP). 1.1 per cent in Gyanpur and 1.4 per cent in Bhadohi . As the usual trend recorded in the urban areas, other workers are in high percentage (94.5) per cent in Gopiganj (NPP) 89.4 per cent in Gyanpur (N.P.) and 80.3 per cent in Khamaria (N.P.).

(ix) Brief analysis of the village Directory and Town Directory data based on inset tables 37 to 47.

One of the major parts of the District Census Handbook is Village and Town directories. These are non-census date incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37: DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C.D. block	Number of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

District Total:		**1097**	**544**	**229**	**1063**	**88**	**465**	**79**	**42**	**39**	**825**	**971**
		(100)	**(49.6)**	**(20.9)**	**(96.9)**	**(8.0)**	**(42.4)**	**(7.2)**	**(3.8)**	**(3.6)**	**(75.2)**	**(88.5)**

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly. # Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 1097 inhabited villages in the district 544 villages or 49.6per cent have been provided with the education facilities of one type or the other. Similarly 229 villages in the district constituting 20.9per cent have medical facilities of one type or the other. Improved drinking water facility is available in 1063 or 96.9 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 88 villages constituting 8.0per cent of villages have been provided with post office facility within the village. 465or 42.4per cent villages have been provided with the telephone facility, 79 or 7.2 per cent with transport facility, 42 or 3.8 per cent villages with bank facility and 39 or 3.6 per cent with agricultural credit societies. Similarly there are 825 or 75.2per cent villages which have been linked with the pucca road. Total 971 or 88.5 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block level has been found with slight variation. Digh C.D. block has the highest 58.6 per cent villages where educational facility is available and lowest 42.4per cent is found in Aurai Medical facility is highest in Digh (28.2 per cent) and lowest (16.1 per cent) in Gyanpur C.D. block. Improved drinking water is available to in all the blocks above 93.0 per cent villages. Telephone facility is highest in Gyanpur (52.1 per cent) while 33.7 per cent villages of Bhadohi C.D. block enjoy this facility. Transport and communications is less developed in Aurai where only 0.4per cent villages are covered by this facility whereas 14.6 per cent villages of Suriyawan C.D. block are availing this facility. Banks and agricultural credit societies facilities are very less in the district. Approach by pucca road facility is highest in Digh C.D. block (79.3 per cent) and lowest (65.5 per cent) in Bhadohi. Power supply is available in above 88 per cent villages of the district.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 1180220 persons in the district, 812187 or 68.8 per cent have educational facility of one or the other type. Similarly 410374 or 34.8 per cent population has medical facilities while 1169172 or 99.1 per cent have got improved drinking water facility. Post office facilities are available to 209340 or 17.7 per cent population. Telephone facility is available to 648416 or 54.9 per cent. Transport communications facility is available to 133878 or 11.3 per cent. Bank facility is available to 74568 or 6.3 per cent. 76497 or 6.5per cent have been provided with the facility of agricultural credit societies. 990164 or 83.9 per cent have been provided with the facility of approach by pucca road. Power supply is available to 1093837 or 92.7 per cent rural population in the district. Similar pattern of availability of facilities is visible in the rural population at C.D. block level. However, in Digh C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	426	151	2	579
(b) Middle School	492	433	5	930
(c) Degree College	135	337	623	1,095
2. Medical:-				
(a) Hospital	278	551	259	1,088
(b) PHC	207	685	192	1,084
3. Post Office	615	384	10	1,009
4. Telephone	427	187	18	632
5. Bus Service	323	575	151	1,049
6. Banks				
(a) Commercial Bank	519	480	60	1,059
(b) Cooperative Bank	195	734	160	1,089
7. Agricultural Credit Societies	594	415	49	1,058

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 579 villages do not have primary school in their villages and out of these villages, children of 426 villages have to travel less than 5 kms. for schooling Out of 1,097 inhabited villages as many as 930 are deprived of middle school and 1095 of degree college. Of these 492 avail the facility of middle school at a distance of less than 5 kms., 433 at a distance 5-10 kms. and the remaining 5 at a distance of 10+ kms. In respect of degree college 135 avail this facility at a distance of less than 5 kms, 377 between 5 to 10 kms. and rest 623 villages at a distance of 10+ kms.

Similarly there are 1,088 villages in the district which have been deori red of Hospital facility and 1,084 villages of PHC facilities. Of these 278 villages have the facility of

Hospital available within 5 kms. while in respect of 551 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 259 villages have this facility at a distance of 10+ kms. As regards PHC 207 avail this facility at a distance of less than 5 kms., 685 at a distance of 5-10 kms. and the remaining 192 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 1,009 villages do not have this facility in the village itself. Of these majority i.e. 615 have this facility at a distance of less than 5 kms., another 384 villages avail it at a distance of 5-10 kms. In the remaining 10 villages habitants have to travel a distance of 10+ kms. As regards Telephone, there are 632 villages in the district which are without telephone facilities. Of these 427 avail this facility at a distance of less than 5 kms., 187 at a distance of 5-10 kms and remaining 18 have to traverse a distance of 10+ kms.

For Bus service out of 1,049 villages which do not have facility, 323 villages avail this facility at a distance of less than 5 kms., 575 at a distance between 5-10 kms. and 151 at a distance of 10+ kms.

In the entire district 1,059 villages are deprived of Commercial Bank and 1,089 of Co-operative Bank. Of these 1,059 villages which are deprived of Commercial Banks 519 villages avail this facility at a distance of less than 5 kms., 480 between 5-10 kms. & the remaining 60 at a distance of 10+ kms. Regarding Co-operative Banks out of 1089 villages 195 villages avail this facility at a distance of less than 5 kms., 734 at a distance of 5-10 kms. and remaining 160 at a distance of 10+ kms., 058 villages do not have agricultural credit societies. This facility to 594 villages is available at a distance of less than 5 kms, 415 at a distance of 5-10 kms and the remaining 49 at a distance of 10+ kms.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities. Out of total 1097 inhabited villages in the district, there are 275 villages which have nearest towns up to a distance of 5 kms. Of these only 144 villages forming 52.4 per cent of total villages, are having the educational facilities of one type or the other and 45 villages constituting 16.4 per cent, have the medical facilities within the village, 19 villages forming 6.9 per cent have the facility of post office within the village and 122 or 44.4 per cent have the facility of telephone. 23 villages constituting 8.4 per cent have been linked by transport service. 12 villages comprising 4.4

per cent have been provided bank facilities, while 10 villages constituting only 3.6 per cent have been provided by agricultural credit societies. 214 villages comprising 77.8 per cent have been provided with pucca road.

There are 673 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 325 villages constituting 48.3 per cent have been provided with the educational facilities. 138 villages comprising 20.5 per cent have been provided with medical facilities. 55 villages constituting 8.2 per cent enjoy the post office facility. 286 villages comprising 42.5 per cent have been provided the telephone facility. 42 villages constituting 6.2 per cent have been linked with transport communications. 23 villages comprising 3.4 per cent have bank facility. 25 villages constituting 3.7 per cent are having agricultural credit societies, while 494 villages or 73.4 per cent are approachable by pucca road. 31 villages fall in the distance range of 16-50 kms. Of these, 54.8 per cent villages have educational facility, 35.5 per cent with medical, 9.7 per cent with post office, 25.8 per cent with telephone and transport & communications available to 6.5 per cent villages. Banks and agricultural credit societies facilities are available to 3.2 and 3.2 per cent of villages.

None of the villages in the district is situated beyond 50 km and above from the nearest town. In the distance range of unspecified distance, there are 118 villages in which 58 (49.2 percent) have the amenity of educational, 35 (29.7 percent) medical, 11 (9.3 percent) post office, 49 (41.5 percent) telephone and 12 village transport, 6 Bank, 3 agriculture credit society and 97 (82.2 percent) have approach by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Sant Ravidas Nagar district out of a 1,097 inhabited villages, overwhelming 371 have a population of less than 500 persos. Of these, 103 villages (27.8 per cent) have education facility, 24 (6.5 per cent) have medical facility, 346 (93.3 per cent) have

improved drinking water facility. no village have post office facility. 103 (27.8 per cent) have telephone facility. 14 (3.8 per cent) have been linked by bus and rail services. 5 (1.3 per cent) have Bank facility. no village have been provided with the agricultural credit societies, 243 villages (65.5 per cent) have been linked with pucca road. 302 villages (81.4 per cent) have been provided with electricity.

Out of 294 villages, which fall in the population range of 500-999 persons, 129 villages (43.9 per cent) have been provided with the education facility, 47 (16.0 per cent) with medical facility, all the villages except 6 villages have improved drinking water facility. 17 villages (5.8 per cent) have been provided with post office facilities, 120 villages (40.8 per cent) with telephone facility, 16 villages (5.4 per cent) with transport facilities, 7 villages (2.4 per cent) with bank facility, 6 villages (2.0 per cent) with agricultural credit societies 210 villages (71.4 per cent) have approach by pucca road. 266 villages (90.5 percent) have electricity.

273villages fall in population range of 1,000-1,999 persons. All of these villages except 3 villages have improved drinking water facilities. Whereas 82 villages (30.0 per cent) enjoy the medical facility, 23 villages (8.4 per cent) have post office facility, 138 villages (50.5 per cent) have telephone facility, 20 villages (7.3 per cent) have transport communications facilities, 16 villages (5.9 per cent) have bank facilities, 19 villages (7.0 per cent) have agricultural credit societies and 225 villages (82.4 per cent) have approach by pucca road and 256 villages (93.8 per cent) have electricity.

There are 149 villages in the district which are covered under 2,000-4,999 population range. In this range, majority of villages enjoy the facility of education, improved drinking water, telephone, approach by pucca road and power supply. 70 villages (47.0 per cent) have medical facility. 44 villages (29.5 per cent) have post office facility, 27 villages (18.1 per cent) with transport and communication facilities, 13 villages (8.7 per cent) have bank and agricultural credit societies. 10 villages fall in population range of 5000- 10,000 persons. In this range all the villages enjoy the facility of education, improved drinking water, approach by pucca road and power supply. Rest of the facilities are available in majority of the villages. There is no village in the district which is covered under 10,000 and above population range.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Suriyawan	206	16,427.1	49.1	92.3
2	Bhadohi	249	18,231.4	67.3	78.9
3	Aurai	257	18,995.8	77.5	82.2
4	Gyanpur	211	17,046.6	80.6	88.1
5	Digh	174	17,130.4	80.5	83.3
	District Total:	**1,097**	**87,831.3**	**71.3**	**84.4**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D block wise distribution of villages according to land use. It also gives details of total area and cultivable area available in inhabited villages of the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 1097 inhabited villages in the district having a total area of 87831.3 hectares. Of this, 71.3 per cent is cultivable and

84.4 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Suriyawan block with 206 villages have a total area of 16,427.1 hectares, of this 49.1 per cent of land is cultivable and of the aforesaid area 92.3 per cent is irrigated. In Bhadohi block, all the 249 villages have a total land area of 18,231.4 hectares, of this 67.3 per cent of land is cultivable and of the aforesaid area 78.9 per cent is irrigated. In Aurai block, all the 257 villages have a total area of 18,995.8 hectares, of this cultivable area is 77.5 per cent and 82.2 per cent is irrigated. In Gyanpur block, all the 211 villages have a total area of 17,046.55 hectares. Of this, cultivable area is 80.6 per cent. Of cultivable area 88.1 per cent is irrigated. Digh block with 174 villages have a total land area of 17,130.4 hectares, of this 80.5 per cent is cultivable area and out of this cultivable area 83.3per cent.

TABLE 43: PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conve-niences	Public works	Public institutions	Other(s)

District total		168,473	145,015	23,458	44,075	40,890	3,185	1,835	1,514	321

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 168,473 consisting of 145,015 rural and 23,458 urban households. 44,,075 households belong to Scheduled Castes and 1,835 to Scheduled Tribes. 163,237 households are living in their owned houses constituting 96.9 per cent of total households. Of these households, the largest number of households 47,076 have three plus room accommodation followed by double room accommodation numbering to 45,613 households. Next position is claimed by households (39407) occupying single room accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 28,053 households while 3,088 households are without any exclusive room.

3470 households living in rented accommodation account for 2.1 per cent of total number of households in the district. The largest number of 1749 households are living in single room accommodation followed by 975 households in double room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 1766 forming only 1.0 per cent of total households are distributed in single room accommodation numbering 563 double room 554 and 281 in three room accommodation. In rural areas majority of households have smaller size and majority of them have their own houses while urban areas show reverse picture.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Bhadohi	53.0	43.5	3.5	45.4	50.6	4.0	87.9	11.0	1.1
2	Gyanpur	56.6	40.0	3.4	52.7	43.7	3.5	87.8	10.1	2.1
District Total:		**55.1**	**41.5**	**3.4**	**49.7**	**46.5**	**3.7**	**87.9**	**10.6**	**1.6**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:- Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.
Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.
Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

The percentage distribution of households as shown in the above table reveals that more than 55.1 per cent of the households in the district had permanent houses. The trend is almost same in rural (49.7 per cent) and different in urban area (87.9 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Gyanpur (56.6 per cent) followed by Bhadohi (53.0 per cent). In respect of semi-permanent houses, the returns were 41.5per cent at district level whereas among tahsils, in Bhadohi it was 43.5 per cent and lowest was 40.0 per cent in tahsil Gyanpur Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 10.1to 11.0 per cent. Temporary houses in the district lie between the range of 3.4 to 3.5 per cent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.
*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.
Note: Percentage is to be given in brackets after the number of households. Bathroom means bathroom within thehouse Toilet means toilet within the house. Drainage menas closed and open drainage.

The above table shows that out of total households of the district 55.1 per cent of the households had improved drinking water facility. The proportion of rural and urban area was 49.9 and 87.2 per cent. Tahsil Bhadohi had higher order of proportion of households where percentage for rural area was 50.2 and 84.9per cent in urban areas. Electricity was available to 45.3 per cent of households at district level which shows that households of the district had poor access of electricity. Bathrooms and toilet facilities were available in 23.7 and 20.7 per cent of households. Tahsil Gyanpur poorly served in respect of these amenities. Similarly drainage facility was also poor in Gyanpur Tahsil. At district level drainage facility was available to 48.3 per cent of households, whereas the proportion of rural and urban areas households accounted to 42.4 and 85.4 per cent.

TABLE 51: NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total households	Fire wood	Crop residue	Cowdung cake	Electricity	Coal / Lignite (charcoal)	Cooking gas (L.P.G.)	Bio-gas	Kerosene	Others	No cooking

				(31.1)	**(5.1)**	**(10.5)**	**(0.2)**	**(2.3)**	**(40.2)**	**(0.6)**	**(9.8)**	**(0.1)**	**(0.2)**

Percentage in brackets
Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It is observed from the above table that 29.7 per cent of households in the district use firewood as fuel for cooking, the proportion in the rural area being 29.4 percent and in urban area it is 31.1 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 7.9 per cent of the households. The composition of rural and urban comes to 2.7 and 40.2 per cent respectively. Cowdung cake is used for cooking in as many as 52.0 per cent of the households 58.7 per cent in rural and 10.5 per cent in urban households. The other methods like crop residue, kerosene, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 per cent to 7.1 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is cowdung cake. The table shows that firewood, LPG (cooking gas) and Cowdung cake are the predominant fuel for cooking in the district.

TABLE 52: NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Availability of household assets		Availability of household assets				
					Radio/Transistor	Television	Telephone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets
1	2	3	4	5	6	7	8	9	10	11	12

2	Gyanpur	Total	96,272	36,842	36,535	27,065	5,341	74,356	10,765	2,909	14,277
		Rural	85,686	32,183	32,350	20,523	3,742	67,723	8,398	2,498	12,691
		Urban	10,586	4,659	4,185	6,542	1,599	6,633	2,367	411	1,586
District Total		**Total**	**168,473**	**67,860**	**68,219**	**49,719**	**10,921**	**130,562**	**20,182**	**5,356**	**23,547**
		Rural	**145,015**	**57,464**	**58,028**	**35,535**	**6,753**	**115,238**	**14,580**	**4,057**	**20,486**
		Urban	**23,458**	**10,396**	**10,191**	**14,184**	**4,168**	**15,324**	**5,602**	**1,299**	**3,061**

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

The table presents data for total rural and urban areas at district/tahsil level about households availing banking services and possession of assets such as radio/transistor telephones, bicycle, scooter and car etc. by the households. There are 168,473 households in the district and among them 67,860 households have been availing banking services. 68,219 households have Radio/Transistor, Television is possessed by 49,719 households. Telephone is available in 10,921 households and bicycle is also available in 130,562 households. Scooter, Motorcycle, Moped and Car, Jeep and Van are used by 20,182 and 5,356 households respectively. Banking services and possession of assets by households at tahsil level is almost similar as analyzed above for the district as a whole.

(xi) Major Social and Cultural Events, Natural and Administrative Develop ment and Significant Activities during the decade:

Most significant event of the decade was creation of the district Sant Ravi Das Nagar Bhadohi on 30th June, 1994. It was created by dividing the western part of the district Varanasi. The district has two tahsils Gyanpur and Bhadohi and five community Development Blocks Gyanpur, Aurai, Digh, Bhadohi and Suriyawan.

(xii) Brief description of Places of religious, Historical or Archaeological importance in villages and places of Tourist Interest in the town of the district :

From the tourist point of view the district has only two places named as Sitamarhi and Chakwa Mahadev. A Historical temple has been constructed at Sitamarhi which has full tourist and historical values of this place. The place is linked with many historical stories.

Chakwa Mahadev is a very old place where old temples are worth seeing. Tourists used to come here from India and foreign countries visit this place.

Sitamarhi is situated in Digh development block where as Chakwa Mahadev is located in Gyanpur development block.

(xiii) Major Characteristics and Contribution of the District:

Sitamarhi in the district is the place where Maharshi Balmiki wrote the great India epic Ramayan. Goswami Tulsidas stayed here for some time. Pandit Mahabir Prasad Malviya,

great poet Maharshi Shiv Vrat Lal, Soha Baba, Pandit Rajnath Mishra and Swami Atma Nand were born in the district. The great freedom fighter of 1857 freedom struggle Amar Shahid Jhuri Singh was also born here.

Bhadohi is famous for its Carpets all over the world. A Carpet city has also been established in the east of Bhadohi town . It caters to a major contribution in the economy of the district and source of employment.

(xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation and Coverage of Data

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.Population and households	Cols.4 & 5
2.Amenities.	Cols.6 to 13
3.Other infrastructural facilities etc.	Cols.14 to 16
4.Availability of news paper/ magazine	Column 17
5.Commodities manufactured	Column 18
6.Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities namely Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/Magazine etc.. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundary and separate land records. Thus in Census the basic unit of rural areas is taken as a revenue village which has definite surveyed boundaries. A revenue village may comprise of several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what have been mentioned above since there is no surveyed village in the State. Therefore an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also be included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included :

1. Appendix I Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility is available.
5. Appendix V Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII List of villages according to the proportion of the Scheduled Caste and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII Number of villages under each Gram Panchayat (C.D. Block wise)
9. Appendix IX Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detail and explanatory notes on each of these abbreviations has also been incorporated for easy clarification of the subject concerned.

Village and Town Directory (Section I and II)

Section -I

Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the C.D Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10

kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC

(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)(vi)	Navigable CanalNavigable waterways other than River,Canal	NC,NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposesEA	

Column 17 : Newspaper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.

APPENDIX VIII

NUMBER OF VILLAGES UNDER EACH GRAM PANCHYAT (C.D. BLOCK WISE)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttar Pradesh due to certain reasons.

APPENDIX - IX

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Name of District	Name of C.D. Block	Location Code Number	Name of Village	No. of Girls School
1	2	3	4	5

Information not available for this district

SECTION II
TOWN DIRECTORY

Town Directory

Note explaining the abbreviations used in Town Directory :

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Cor/NN
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB/NPP
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III

Municipal Finance 1998 -1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV

Civic and Other amenities,1999

Column (1 to 6) : Self explanatory.

Column (7) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 9 to 12 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 13 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 14 and 15 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 14:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 15:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 16 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 17 to 21 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (8) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/

Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 :Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were

made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

URBAN PRIMARY CENSUS ABSTRACT

ANNEXURE I - VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Varanasi
Q1	Persons	99	76
	Males	98	70
	Females	104	83
Q2	Persons	117	90
	Males	117	86
	Females	118	104
Q5	Persons	134	112
	Males	135	107
	Females	132	112

The child mortality by ages 1, 2 and 5 years was lower in the district as against the State, thus child mortality indicators in the district for both male and females shows lower order as compared to the State.

Note :*Sant Ravidasnagar (Bhadhoi) district was carved out mainly from Varanasi after 1991 census . Since data of 1991 census is not separately available for Sant Ravidasnagar (Bhadhoi). Hence for comparison purpose of Annexures, the data of undivided Varanasi have been used, assuring that the trends and patter of district are same.*

Annexure – III

Various Measures of Fertility and Mean Age at Marriage – 1991

Sl. No.	Fertility Measures	Person Male Female	Uttar Pradesh	Varanasi
1	2	3	4	5
1	CBR		37.2	34.6
2	TFR		5.6	5.1
3	TMFR		6.3	5.5
4	GFR		172	160
5	GMFR		200	179
6	Mean age at marriage (1981-91)		17.3	16.7
7	Number of children ever born per ever married woman aged 45-49 years		4.6	4.2
8	Child woman ratio 0-4 (Years)age group		631	664
	Child woman ratio 5-9 (Years)age group		752	805

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

Measures of fertility are an important component to describe fertility and mortality rate of any area. The table reveals that the Crud Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 34.5 per thousand in the district.It is below to the state of Uttar Pradesh i.e. of 37.2 per thousand. In respect of Total Fertility rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower proportion from the state figures. The conclusion that may be drawn is lower fertility ratio for the district. The mean age at marriage during the period 1981-91 has been 17.3 years for the state where as 16.73 years has been observed for the district. It may be observed that lower age at marriage leads to low rate of fertility in the state and district as well. Similar trend is observed in the number of children born per ever-married women in the age group 45-49. The state and the district figures are placed as 4.6 and 4.2 per thousand respectively. Nnumber of children in the age group 0-4 and 5-9 years per one thousand women in the age group 15-49 has been calculated to 664 and 805 for the district while in case of the state the corresponding figures are 631 and 752. The various measures of fertility presents that fertility levels as such are above to the state average. Another important factors i.e. the probability of dying between birth and at age 1,2 & 5 has been of lower order in the district.

The annexure presented above shows percentage distribution of in-migrants as per the 1991 and 2001 Census amongst the total migrants in the state and district. There are two type of in-migration in the district such as in-migration by place of birth (in which a person is enumerated during the census at a place other than place of birth) and in-migration by place of last residence (a person is enumerated during the Census at other than his place of last residence). The comparison between 1991 Census and 2001 Census reveals that among the total migrants the proportion of in-migrants within the state (from other districts of state) was 81.3 percent and 79.6 percent respectively. The corresponding figure for the district was 74.8 in 1991, while in 2001 it was 93.2 percent respectively. The proportion of in-migrants from other states was 16.2 percent at state level during 1991 Census, whereas it rose to 19.3 percent in 2001. The district level figure was 24.5 percent and 6.6 percent respectively. This shows in-migration from other states to this district was decreased in 2001 in comparison to 1991. At district level in-migration from other countries was 0.6 percent in 1991 and 0.2 percent in 2001. While at state level figures were 2.5 percent and 1.1 percent during 1991 and 2001 Census respectively.

In respect of in-migrants by place of last residence, it is evident that in-migrants from other districts of the state amongst total migrants, constituted 79.6 percent in 1991, while it was recorded 74.1 percent in 2001 at state level. District level figures were 71.5 percent and 88.8 percent during 1991 and 2001 Census respectively. The percentage of in-migrants from other states worked out to be 18.9 in 1991 and 25.2 percent in 2001 at state level, whereas district figures for both the Censuses were 28.0 percent and 10.7 percent respectively. The movement of population from other countries in the district was 0.5 percent in 1991 and 0.5 percent in 2001, while state level figures were 1.5 percent and 0.7 percent respectively.

Annexure-V presents composition based on religions at the state, district and tahsil level. If we compare the data for 1991 and 2001 Census, we find that demographic pattern based on religions is almost same in both Censuses at the state level. Hindu religion predominates with 81.7 percent population in 1991 and 80.7 percent in 2001 followed by Muslim which were 17.3 and 18.5 percent respectively. Against this, district figure for Hindu religion were 86.9 percent in 1991 and 87.7 percent in 2001, while Muslim were 12.8 percent in 1991 and 12.0 percent in 2001. Rest of the four religions i.e. Buddhist, Christian, Jain and Sikh alongwith combined population of other religion had insignificant proportion which was less than one percent of total population for each religion. Similar trend is visible for state, district and at tahsil level in 1991 as well as 2001 Census.

Annexure-VI deals with marital status of different age groups of population. On perusal of the annexure for state and district for two respective Census in the years 1991 and 2001, it is evident that, for all ages the percentage of never married is higher than proportion of married for state and at the district level also. Percentage of never married has increased from 54.4 percent male and 45.9 percent female in 1991 to 57.5 percent male and 48.9 percent female in 2001 at state level, while it rose marginally in the district from 52.7 percent male and 45.3 percent female to 56.6 percent male and 47.4 percent female. Percentage of married male was 45.0 percent and female was 50.7 percent in 1991 and in 2001 it was 41.3 percent male and 48.9 percent female. Percentage of married male and female shows declining trend in comparison to 1991 from 42.4 percent male and 49.4 percent female to 39.8 percent male and 46.2 percent female. Percentage for widowed persons at state level was 3.0 percent male and 4.6 percent female in 1991 and in 2001 it was 2.6 percent male and 4.8 percent female. At district level in 2001 it was 2.0 percent male and 3.6 percent female while it was 2.2 percent male and 3.9 percent female in 1991 Census. Percentage of divorced and Separated remained constant at 0.1 percent for male and female in state and district level during 1991 and 2001. None person was recorded in the category of Unspecified marital status in state and district during 2001 Census. Among the age groups, the proportion is in the descending order for never married and ascending order for widowed. The trend for married is pyramidal the peak being between 25-29 and 45-49 (years) age-groups.

Age and sex wise education in the state and district has been presented in the Annexure - VII. From the annexure it can be observed that percentage of illiterates has declined from 55.3 percent male and 80.0 percent female in 1991 to 44.2 percent male and 65.9 percent female in 2001 at the state level. Consequently percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 percent male and 0.7 percent female in 1991 at state level, which increased to 2.8 percent male and 2.1 percent female in 2001. Similarly primary level education was 10.7 percent male and 6.1 percent female in 1991 and percentage for male and female rose to 16.0 and 11.5 respectively in 2001. Middle level education was 9.8 percent male and 3.7 percent female in 1991 which increased to 13.8 percent male and 7.1 percent female in 2001. Matriculation and above level was 13.5 percent male and 4.4 percent female in 1991 which was 20.4 percent male and 9.0 percent female in 2001.

Similar trend can be observed in the district also. Illiterates were 45.1 percent male and 77.5 percent female in 1991 which declined to 39.6 percent male and 69.3 percent female in 2001. Primary level education was 11.1 percent male and 6.3 percent female in 1991, which was 18.6 percent male and 12.1 percent female in 2001. Middle level education was 8.9 percent male and 3.7 percent female in 1991 and 13.2 percent male and 6.2 percent female in 2001. Matriculation and above level of education was achieved by 16.6 percent male and 4.8 percent female in 1991 which was 23.0 percent male and 5.3 percent female in 2001. Primary level of education was highest in the age-group 7-14 in 2001, while middle level education was highest in 15-19 and the age group that had highest percentage of matriculation and above level of education was 20-24 (years).

Note:-For the state level only first 28 mother tongues and at district level only those mother tongues are shown in the table whose proportion is greater than 0.02%. The remaining tongues have been merged in the column of " Total of Other Mother Tongues."

Annexure-VIII presents distribution of population according to different mother tongues with percentage for the state and the district. There is identical trend for Census of 1991 and 2001 as the highest percentage of the people reporting Hindi as the mother tongue (82.1 percent in 1991 and 83.1 percent in 2001). This trend is visible for the district as well. The district reported Hindi as mother tongue for 84.1 percent person in 1991 and 94.8 percent in 2001. Urdu returned as second largest spoken mother tongue as 9.0 percent was recorded in 1991 and 8.0 percent at the state level whereas 12.8 percent and 3.0 percent at district level in 1991 and 2001 Census respectively. Persons speaking other languages as mother tongue were very small in number in both the state, and district, in both Censuses.
