Gurudwara Hatt Sahib

In A.D. 1484, Jai Ram brother-in-law of Guru Nanak, brought the latter to Sultanpur Lodhi and got him appointed as Modi or storekeeper. Guru Nanak Dev worked diligently and soon earned for himself reputation for honesty and liberal views. His job was to issue provisions to the palace and the army. One day he was weighing out grains and was counting the weighments slowly. When he reached thirteen, which is equivalent to 'teran' and went on whispering 'teran', 'teran', - 'Thine', 'Thine', as if in a trance. There was a group of people who was not pleased with Guru Nanak Dev on account of his honesty. There was yet another group which for their fanatic attitude did not like the religious bent of mind of the Guru and cherished ill-will against him. They reported to the Nawab that his storekeeper was squandering away food grains from the store and was distributing the same among the poor and the needy. The Nawab ordered an inquiry into the matter. On investigation, the accounts were found in order and there was no shortage of any sort.

5. C.D. block Phagwara 362

Urban Primary Census Abstract. 374

Annexure I : Number of villages under each Gram Panchayat 386
Annexure II : Fertility and child Mortality, 1991 Census 386
Annexure III : Measures of fertility and mean age at marriage, fertility level 387
Annexure IV : Percentage distribution of in Migrants by place of birth/place of last residence. 388
Annexure V : Brief account of main religions in the district/tahsil as per 1991 Census 389
Annexure VI : Marital status of population 390
Annexure VII : Distribution of Literate by sex and Education Level 391
Annexure VIII : Distribution of different mother tongues. 392

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census , is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics, village-wise and town-wise, of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive Censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added to it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA which was restructured. Nine–fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and

recreational facilities. In town directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristics of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) in all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Inder Jit Singh, IAS, Director of Census Operations, Punjab. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General, (C&T) and Dr. I.C.Aggrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP), helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assitant Director. I am thankful to all of them and others who contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 2007

Preface

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to also include village level data on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B - Primary Census Abstract, giving data for each village within the Community Development (CD) Block and each town in the district. The CD block maps included, presenting village level data, have been prepared by using computer assisted technology. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetters and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Shri D.K. Sikri, IAS, Additional Secretary, Registrar general, India and Census Commissioner and Shri J.K. Banthia, IAS, former Registrar General and Census Commissioner, India for their directions and support from time to time in accomplishing this arduous task.

In the directorate, at the outset we are beholden to Shri Inder Jit Singh, IAS under whose able guidance and direction as Director Census, Punjab, the census operations in the state were successfully completed.

Our thanks are also due to Shri D.R. Khanna, Ex-Deputy Director for getting the compilation of data and Shri Madhav Shyam, Ex-Deputy Director for drafting this specimen model which has been replicated in other DCHBs.

The great effort and hard work done by Shri S.K. Bhandari, Ex-Assistant Director, Shri Bhagirath Singh, Assistant Director, Shri Malkit Singh, Ex- SI Gr. I and Shri Rajinder Prasad, S.I.Gr-I are greatly acknowledged. Sh. Azad Kumar, S.I. Gr-III and Sh. H.S. Sudan, Sr. Compiler deserved special thanks for having completed the publication work.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

District Highlights - 2001 Census

1. Kapurthala district has a population of 754,521 comprising 399,623 males and 354898 females.
2. Kapurthala district ranks 7th in area and 13th in population.
3. Kapurthala is the most populous and Bhulath is the least populous tahsil.
4. The average population size of a village in the district (822) is lower than that of the state (1,311).
5. Hamira (7,099) in Kapurthala tahsil is the largest village by population size followed by Talwandi Chaudharian (6,467) in Sultanpur Lodhi Tahsil.
6. 5 villages in the district are large sized with a population of 5,000 or more.
7. The decadal population growth rate in the district (16.7%) is lower than that of the state average (20.1%).
8. Kapurthala district is almost equally urbanized (32.7%) as the state (33.9%).
9. The sex ratio in the district (888) is higher than the state (876). It ranks 5th among the districts in the state.
10. The child sex ratio in the district (785) is lower than the state (798). It ranks 14th among the districts in the state.
11. Literacy rate of Kapurthala is 73.9 per cent as compared to state (69.7%).

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Ever since the beginning of first post independence Census of India 1951, the publication of District Census Handbooks (DCHBs) has become a regular feature of the Indian Census. Produced by the Census Organization of Government of India on behalf of the State Government, the DCHB is a unique publication which gives the census as well as non-census data down to every village in case of rural areas and ward within the town/urban area in the state. It is recognized as one of the most comprehensive sources of information. In fact, this is the only publication which provides primary census abstract based on census, and non-census data on infra-structure and amenities available, such as educational, medical, postal, and communicational at the sub-micro level. It is inter-alia used for delimitation of constituencies, formulation of local level and regional plans and serves as a valuable tool for district administration.

Undisputedly, DCHB has remained to be the most comprehensive and valuable product of the census organization ever since its initiation. It has always been the endeavour of the Census of India to enlarge the content and coverage of the data presented at every census. The DCHB series of 1951 Census contained important Census Tables and the Primary Census Abstract. At the 1961 Census, the scope of the DCHB was enlarged by including a descriptive account of the district, administrative statistics, census tables and the village and town directory. In 1971, the DCHBs were planned in three parts; Part-A included the village and town directory, Part-B included village and town wise primary census abstract, while Part-C was meant to include analysis of census data and a write up covering social, cultural, historical and other important aspects. However, in some states/union territories Part-C remained confined to the district tables only.

During 1981 Census, some new features were added and the formats of village and town directory were restructured, somewhat. These volumes were published for each district in two parts. Part-A included village and town directory, while Part-B included primary census abstract (PCA) of every village and ward in town/urban area. The inclusion of scheduled castes PCA was the additional feature of the 1981 Census. The village directory of 1981 Census included new parameters viz; information on Adult Literacy Centres, Primary Health Sub-centers and Community Health workers in the village (s) to meet the requirement of the Revised Minimum Needs Programme. In addition, information on approach to the village was also provided for the first time in the village directory to help in taking stock of villages requiring road linkages in the district. Likewise, Statement IV-A included in the Town Directory aimed to provide data on slums so as to undertake development activities in such areas.

The manner of presentation of the DCHBs for the 1991 Census was, by and large, same as followed in 1981 Census. However, the format of PCA was slightly restructured in the 1991 Census for the benefit of data users. The village level data were presented Community Development (C.D.) block wise to cater to the needs of grass root level planning as envisaged under the five year plans. Nine fold industrial classification of the main workers was reintroduced by replacing the four-fold industrial categories adopted at the 1981 Census. In addition, the PCA also gave population in the 0-6 age group by sex essential for working out effective literacy rate, besides providing proportion of child population.

The DCHB 2001, the present volume, is the sixth in series. The pattern followed is, by and large, similar to that of the 1991 Census. Among the new features added, information on the availability of newspapers/magazines, banking facility, agricultural and non- agricultural societies, recreational and cultural facilities, income and expenditure of the village panchayats find mention. More important is that it is for the first time in the history of Indian Census that Permanent Location Code Number (PLCN) has been allotted to every village in the state to meet the demand from different organizations to study the village level data over a time spell. It is believed that the permanent location codes

assigned to each village would help in tracing the precise location of a village on account of jurisdictional changes in the boundaries of various administrative areas.

(ii) Brief history of the district

The ruling Ahluwalia family of the erstwhile princely State of Kapurthala traces its origin to the ruling Rajput house of Jaisalmer. Sadhu Singh, an enterprising scion of this family, is said to have founded four villages near Lahore, one of which was named Ahlu. The family derives its title of Ahluwalia from that village.

However, the real founder of the family was Jassa Singh who was a Contemporary of Nadar Shah and Ahmed Shah and took a leading part in the Sikh struggle against the Mughul Governors in Punjab. In 1748, he killed the Governor of Amritsar seizing a large portion of the district. Then he extended his conquest to Beas and defeated the Governor of Jalandhar Doab. Turning south-ward he crossed the Satluj and captured Sirhind and Dialpur and then marched west-ward for seizing the Parganas of Dogran and Makhu. Hoshiarpur, Bharog and Naraingarh also came under his sway. He then turned his attention towards Jhang and Gujranwala but was not successful on that side. He was one of those Sikh Chiefs who were defeated by Ahmed Shah in 1762 near Barnala in the battle known as 'Ghalu Ghara', meaning great destruction of life, massacre or ruin. But no sooner did Ahmed Shah return to Kabul, the Sikh Chiefs mustered their strength under the leadership of brave Jassa Singh and defeated Zain Khan in 1763 whom Ahmed Shah had appointed as Governor of Sirhind. Returning victorious from Sirhind, Jassa Singh made a large contribution towards the re-building of the Sikh temple at Amritsar which Ahmed Shah had blown up and also constructed the Ahluwalia bazar. Intelligent, brave and religious, Jassa Singh contributed most to consolidate the position of the Sikhs before Ranjit Singh came on the scene. Jassa Singh died in 1787. He made Kapurthala his capital.

Jassa Singh was succeeded by his second cousin Bhag Singh who did little to improve the fortunes of the family. He died in 1801 and was succeeded by his son Fateh Singh who began as a friend and ally of Ranjit Singh and they both concluded a treaty with the British in 1806 whereby the British undertook not to enter the territories of these trans-Satluj Chiefs. But soon the over-bearing Ranjit Singh proved too much for Fateh Singh and the latter fled across Satluj to seek protection from the British. The British brought about conciliation between Ranjit Singh and Fateh Singh and the latter got back his territories. Fateh Singh was responsible for including the 'ilaqas' of Phagwara and Bhunga within his territory. He died in 1837 and was succeeded by Nihal Singh. The first Sikh War Broke out. The army of Nihal Singh broke away from his control, murdered his Wazir and fought against the British both at Aliwal and Badowal. Nihal Singh's explanation was that he was not responsible for it and the British accepted this explanation though they could not forgive him for his vacillated attitude. At the end of the First Sikh War, Nihal Singh was confined to his territories in Jalandhar Doab Subject to an annual nazrana of Rs. 1, 38,000 fixed in lieu of military service. His estates south of the Satluj were, however, declared escheat to the British Government. In the second Sikh War, Nihal Singh helped the British and in recognition of his services he was given the title of Raja. He died in 1852 and was succeeded by Raja Randhir Singh. The latter helped the British greatly during the Mutiny Marching at the head of his men to Jalandhar, he helped to hold the Doab, which was almost denuded of troops, until the fall of Delhi. Randhir Singh and his army later helped the British in pacifying the disturbed District of Oudh. The British rewarded his services by bestowing upon him the title of Raja -i-Rajagan in perpetuity, and granting him on "istamrari" tenure the two confiscated estates of Baundi and Bithauli in Baraich and Bara Banki District. He died at Aden in 1870 on his way to England but his remains were brought back to India and cremated at Nasik. He was succeeded by his son Kharak Singh who ruled for seven years. Kharak Singh suffered from mental trouble and died in 1877 and was succeeded by his five year old son Maharaja Jagatjit Singh. During the minority of the latter the State was administered by an officer of the Punjab Commission assisted by a council composed of the principal officials of the State. He was installed on the gaddi and vested with full powers by the British Government in November, 1890. He was an enlightened ruler and widely travelled. His contribution in the field of education and industry was particularly note worthy and many educational institutions and industries installed in his time bore his name. On the formation of The Patiala and East Punjab States Union (PEPSU), into which Kapurthala State was merged along with other princely States of East Punjab on 20th August, 1948, he was appointed Up-Raj Pramukh of

the newly formed State. He died in June, 1949 and was succeeded by his son Maharaja Paramjit Singh. The latter died in July, 1955, and was succeeded by his son Maharaja Sukhjit Singh who was a Commissioned Officer in the Indian army.

Before the partition of the country in 1947, Kapurthala was a princely State and comprised 5 tahsils, (1) Kapurthala, (2) Sultanpur Lodhi, (3) Phagwara, (4) Dhilwan and (5) Bhulath (including Bhunga). On 20th August, 1948 it was merged with the Patiala and East Punjab State Union (PEPSU). Bhulath and Sultanpur Lodhi tahsils were merged with Patiala and Kapurthala tahsil and Bhunga tahsil was merged with Phagwara tahsil.

On 26th January, 1950, under Provinces and State (Absorption of Enclaves) Order, 1950, twenty four villages of erswhile Bhunga sub-tahsil which formed part of Phagwara tahsil and 4 bastis (Basti Nau, Basti Sheikh, Basti Kotla and Basti Kot Sadiq) of the Kapurthala tahsil were transferred to Hoshiarpur and Jalandhar districts, respectively. On the merger of PESPU on Ist Novemebr, 1956, the district was placed under Jalandhar division for administrative convenience. In 1970, Sultanpur Lodhi and Bhulath were made a tahsil and a sub-tahsil, respectively.

(iii) Administrative set-up

The State has experienced a large scale jurisdictional changes after the 1991 census. The number of districts has increased from 12 in 1991 to 17 in 2001. The newly created districts include; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. With the exception of Kapurthala district all other 11 districts in the State have experienced inter-district jurisdictional changes of varying magnitude.

These 17 districts are distributed over four divisions. Jalandhar division includes districts of Gurdaspur, Amritsar, Kapurthala, Jalandhar, Hoshiarpur and Nawanshahr; Patiala division covers districts of Rupnagar, Ludhiana, Patiala, Sangrur and Fatehgarh Sahib; Firozpur division spreads over districts of Firozpur, Moga and Muktsar, while Faridkot division embraces districts of Faridkot, Bathinda and Mansa.

All the districts of 1991 Census have undergone intra-district jurisdictional changes resulting in increase in the number of tahsils in the state from 46 in 1991 to 72 in 2001 Census. (In Punjab tahsil and sub division are co-terminus). In Kapurthala district, with the addition of one newly created tahsil of Bhulath, the number of tahsil has gone upto four during this decade. Likewise the number of towns in the district has increased from 3 to 7 and all of them have statutory status barring Hussainpur. Out of the newly added four towns are, Bhulath, Begowal,Dhilwan are Nagar Panchayats and Hussainpur has the status of Census Town. The district constitutes 7 towns and 690 villages.

The statutory towns are notified by the State government. Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or transactional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the state government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specified by notification in the official gazette any area to be transitional area or a smaller urban area for the purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the state government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the I Class, II Class or III Class.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows:

Serial number	Class of Urban Local Bodies	Population	Income
1	2	3	4
1.	Municipal Corporation	3 lac or above	2 Crore or above
2.	Municipal Council Class I	50,000 to 3 lac	50 lac to 2crore
3.	Municipal Council Class II	10,000 to 50,000	15 lac to 50 lac
4.	Municipal Council Class III	upto 10,000	upto 15 lac
5.	Nagar Panchayat	5,000 or above	More than Rs.150 per head

The following statement indicates the jurisdictional changes which took place after the 1991 Census in Kapurthala District.

Jurisdictional Changes during 1991-2001

Name of District/ Tahsil	No. of villages as per		No. of Towns		Changes since 1991 & Govt. Notification No.
	1991	2001	1991	2001	
1	2	3	4	5	6
Kapurthala	**699**	**690**	**3**	**7**	
Bhulath	-	101	-	2	i.) 2/44/94-RE.II (1)/1645 dt. 20.7.1995
Kapurthala	370	260	1	3	ii.) 2/44/94-RE.II (1)/8011 dt. 26.8.1995
Sultanpur Lodhi	215	215	1	1	iii.) L/22/95RE.II (1)/11756 dt. 1.1.1996
Phagwara	114	114	1	1	iv.) 2/44/94-RE.II (1)/6745 dt. 20.7.1995

For the administrative purposes, the district forms part of Jalandhar division. The district is the basic unit of administration. For the purposes of general and revenue set up the district is divided into four tahsils viz, Bhulath, Kapurthala, Sultanpur Lodhi and Phagwara. All of them have sub divisional status. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district and revenue administration in the district.

(iv) Physical Features

Origin of Name:

The district derived its name from Kapurthala town which also served as its headquarters and was formerly the capital of the princely state of the same name. The town was said to have been founded in the early part of the eleventh century in the time of Sultan Mahmud of Ghazni by Rana Kapur, a scion of the ruling Rajput house of Jaisalmer (Rajasthan State).

Location and Size:

Kapurthala district is split into two parts which are non-contiguous and are located apart each other. Bhulath, Kapurthala and Sultanpur Lodhi tahsils forming one part and Phagwara tahsil forming the other part. The former part lies between north latitude 31°- 07' and 31°- 39' and east longitude 74° - 57' and 75 ° - 36', while the other part lies between north latitude 31°- 10' and 31°- 22' and east longitude 75 ° - 40' and 75 ° - 55'. The length of the district is about 72 kms and its breadth varies from

about 11 kms to 32 kms at different places bounded partly in the north and wholly in the west by Beas river which separates it in the south from Firozpur district, but it is mainly bounded in the south partly by the Jalandhar district. In the east, it is bounded by the Jalandhar and Hoshiarpur districts and in the north partly by the Hoshiarpur districts. Phagwara tahsil is surrounded mostly by Ludhiana, Nawanshahr and Jalandhar districts, except in the north-east where it joins Hoshiarpur district. It is situated in the Bist Doab across rivers Satluj and Beas, generally known as Doaba. For administrative purpose it is included in the Jalandhar Division.

Area:

According to Surveyor General of India, the area of the district is 1633 sq. kms. It ranks 14th in area in the State consisting 105.0 sq. kms urban, and 1527.9 sq. kms. rural areas. The rural area of the district is derived by subtracting urban area of the district from the total district area, as supplied by the Surveyor General of India. The tahsilwise area, as supplied by the Director, Land Records, Punjab is as follows: (1) Bhulath tahsil 247.8 sq.kms., (2) Kapurthala tahsil 675.5 sq.kms (3) Sultanpur Lodhi tahsil 451.0 sq.kms and (4) Phagwara tahsil 304.5 sq.kms. It would be noticed that tahsils area when added up works out to 1678.8 sq. kms. which does not tally with the area as supplied by the Surveyor General of India. The urban area of the district has been obtained by adding up areas of the towns as supplied by urban local bodies. The Community Development Block area has, however, been obtained by adding up area of the constituent villages, including census towns and outgrowth of Urban Agglomerations (UA), if any.

Climate:

The climate of the district is characterized by a very hot summer and bracing winter. The year may be divided into four seasons. The cold season from about the middle of November to the early part of March is followed by the hot season which lasts around half of September constitute the south-west monsoon season. The period from mid-September to middle of November may be termed as the post-monsoon or transitional period.

After March, there is a steady increase in temperature. June is generally the hottest month. Scorching hot winds laden with dust blow during summer and temperature reaches even about 45° C. With the onset of the monsoon in the district around first week of July, there is an appreciable drop in day temperature. The weather is sultry and uncomfortable during rains due to humidity. After the monsoon, there is a rapid drop in the temperature, especially during night.

The rainfall in the district generally decreases from the south-west and about 70 per cent of the annual rainfall is received during the monsoon months (July to September), July being the wettest month. There is also some rainfall during winter which is very beneficial for agriculture.

Monthly Rainfall: Average of 5 years 1996-2000

Month	Rainfall (mm)	Month	Rainfall (mm)
1	2	3	4
1. January	23.2	7. July	166.6
2. February	28.6	8. August	162.4
3. March	24.0	9. September	83.6
4. April	8.5	10. October	19.8
5. May	13.4	11. November	14.0
6. June	74.8	12. December	0.6
Total			**619.5**

(Source: Statistical Abstract of Punjab, 2001)

Physiographic:

Kapurthala district consists of two separate pieces of territory, but both form part of Bist Doab plain area enclosed by Beas and Satluj rivers. The district can be divided into two main physiographic units (i) Beas lowlands and (ii) the upland plain. A brief description of each is given below:-

The Beas Lowlands:

These cover the north-western and southern peripheries of the district along the Beas river down to the Satluj in the south. The Beas lowlands, locally known as the Bet (flood plain), are characterized by poor drainage. The topsoil of the flood plain contains loam, sand and new alluvium. During the floods the top soil is renewed. The Beas lowlands may be divided into: (a) the active flood plain which is regularly flooded and (b) the cover floodplain which is affected only when the river carries an enormous discharge of water.

(a) The active floodplain is a narrow belt along the Beas which varies in breadth and its boundary is slightly to the north of the rural settlements. Beyond this boundary up to the Beas river, there are no settlements and the strip of land only consists of sand, loam and low lying embankments. This belt of the active floodplain varies in breadth being narrower in the north and the south than in the middle where it is as wide as 4 kms. from Khizarpur to Faziabad and Dhaliwal bet.

(b) The cover floodplain is the area lying between the upland plain. It is roughly between the active flood plain and the west or black Bein and is dotted by a number of water pools locally known as Jhils or Chhambs. Although the actual area of the Jhils has been covered by sand, yet some depressions can still be located in Begowal town and Khairanwali, Ratta Kadim, Gopipur and Dulowal villages etc.

The Upland Plain:

This covers the area beyond Sultanpur Lodhi and Kapurthala and the whole of Phagwara tahsil. It is also infested with Chhambs and low dunes mounds not exceeding 3 meters in Kapurthala and Sultanpur Lodhi upland plain. Phagwara tahisl has some of the district Jhils and a portion of the upland plain is cut across by the east or white Bein and to the north of this lies an area locally called Sirowal. There is water logging here on account of the seasonal chocking of Chos, most of which terminate near the boundary between Phagwara tahsil and Hoshiarpur district.

Drainage:

Kapurthala district is drained by the Beas and the Satluj, the west of Black Bein and the east or white Bein. A brief description of these is as follows:-

Beas and Drains:

It originates from Beas Kund near the Rohtang Pass in Kullu district (Himachal Pradesh). After flowing through Kullu, Mandi, Kangra (Himachal Pradesh) and Hoshiarpur districts, it marks the northern and western boundary of Kapurthala district. It enters Kapurthala district 3 kms north of village Mand Dogranwala in tahsil Kapurthala. It takes a smooth turn to the west when it makes its entrance and flows for a distance of 13 kms. After the first turn to the west, it flows almost straight for some distance until it takes a second turn to the west from near Charangewala to Jhugian Araian for about 8 kms. The Beas has been shifting its course to the west. There is a high river bluff along the western side of the Beas, at places rising to a height of 27 meters.

Black Bein:

This enters Kapurthala district in two streams from Dasua tahsil of Hoshiarpur distict. One of these which joins to form Black Bein after a short distance comes from Ranipind (Hoshiarpur district). And the other enters the district slightly to the east of the first near Talwandi Dadiar (Hoshiarpur district). The streams mentioned above join to form the Black Bein a little south of Awan. The Black

Bein has deep valleys varying in depth from 1.5 to 3 meters. The valley is more than 3 meters deep near Busowal and Bhawanipur villages in Sultanpur Lodhi and Kapurthala tahsils, respectively. The Black Bein joins the Beas River at the confluence of Satluj and Beas and flows almost parallel to Beas river in south –west direction.

White Bein:

It has its beginning in Garhshankar tahsil of Hoshiarpur district and enters Phagwara tahsil at Malikpur. After flowing 13 kms. through Phagwara tahsil, it enters Jalandhar district at village Ucha. It has deep valleys varying in depth from 1.5 to 3 meters. It is joined by a number of small water-courses and taking a south westerly direction it empties itself into the Satluj river. There are two seasonal streams, one just to the south of the white Bein, called the Kail Nala and the other to the north of it.

Major characteristics of The District

Forestry:

Kapurthala district falls under the jurisdiction of Divisional Forest Officer, Jalandhar. Forest of the district is exposed along with railway track, roads and canal strips. Vegetation is also found within the small scattered birs throughout the district. Besides, the plantation along with the drains and bunds are under the management of forest department. The main trees found in the local forest are: Shisham, Kikar, Mango, Tut, Jamun, Serin, Neem, Dak/Darek, Pipal, Eucalyptus, Beriand Khajur etc. Also there is a profuse growth of Kana, Kahi, Arjun, Dale and Battar etc in the water logged strips of the district. The break up of area under various types of forests in the district during 2000-01 is as follows:

Serial number	Type of Forest	2000-01 (in sq. kms..)
1	Reserved Forests	-
2.	Protected Forests	15
3.	Unclassified Forests	5
4	State Forests (Total 1+3)	20
5.	Under S/38 of Indian Forest Act, 1927	-
6.	Total Forest (Total 4+5)	20
7.	Percentage of area under forest	1.2%

The table reveals that during the 2000-01 the area under forests is 20 sq. kms. However, during this period, no area has been reported under the private forests, whereas 20 sq. kms are under State forests. But the area under forest is 1.2 per cent only, which is far below the norm prescribed for forest cover in the State.

Natural Economic Resources

Minerals and Mining:

The district is very poor in mineral resources as certain minor minerals are found in the western and south western parts. Building materials such as boulders, pebbles, shingles and sands are found west of Sultanpur Lodhi around the confluence of Satluj with Beas. Brick clays used for making hard burnt bricks are found at many localities, especially around shallow water depressions.

Land and Land use Pattern:

As per the village records for the year 2000-2001, Kapurthala district has an area of 163,300 hectares (1,633 Sq. kms.) out of which 2,000 hectares is under forests, 1,000 hectares is barren and uncultivable 22,800 hectares is put to non-agricultural uses, 1,000 hectares is under miscellaneous crops and groves, 1,000 hectares is current fallow, and 135,000 hectares is net sown area. A small proportion of area (less than 500 hectares) is under culturable waste and permanent pastures and other

grazing land, net sown area constitutes nearly 82.7 per cent of the total area of the district. Out of this total net sown area, 127,000 hectares is sown more than once. Thus the total cropped area works out to 262 thousand hectares in the district during 2000-01. The district with barely 20 Sq. kms (1.2%) of its area under forest is almost devoid of any forest cover. There are no reserved forests in the district and the forest cover of the district is mainly protected forest.

Kapurthala district is mainly an agricultural district as 67.3 per cent of its population is reported to be residing in the rural areas during 2001 Census. Further agriculture alone engaged 35.8 per cent of its main workers during 2001 Census (cultivators 22.2 per cent, agricultural labourers 13.6 per cent). Thus it would be seen that agriculture provides the single largest source of employment in the district though decline is noticed during the last few decades.

Kharif (Sawani) and Rabi (Harhi) are two main harvesting seasons. The principle Kharif crops include paddy (rice), jawar, bajra, sugarcane, and groundnut. The Rabi crops include wheat, gram, barley, some oil seeds, pulses, etc. Seasons additional crops are also grown where conditions so permit. These are known as Zaid-Kharif and Zaid-Rabi.

During 2000-2001, 103,000 hectares of area was under rice cultivation in the district and 4000 hectares under Maize. This signifies that rice (paddy) is the most dominant Kharif crop grown in the district. During 2000-2001 the district produced 358 metric tonnes of rice at an average yield of 3,476 kg per hectare.

Among the Rabi crops, wheat is the most dominant. During 2000-2001, 111,000 hectares of agricultural land was under wheat cultivation. The district produced 493 metric tonnes of wheat during 2000-2001. The average yield of wheat per hectare in the district was 4441 kgs.

Rapeseed and mustard and Sun flower are the other important crops grown in the district and area under cultivation of these two crops is 1,000 hectares and 600 hectares respectively.

Out of the total production of 66 metric tonnes of rapeseed and mustard and 9 metric tonnes of Sun flower in the state, the share of Kapurthala district was 1.0 metric tonnes and 0.9 metric tonnes respectively.

Irrigation:

The main sources of irrigation in the district are wells/tubewells and pumping sets. Some area is also irrigated by canals. The canals irrigation was introduced in the district in 1954 when the construction of Bist Doab canal, which takes off from the Rupnagar headwork's on the right bank of river Satluj, was completed. Since the sub-soil water is suitable for irrigation and water table is not low, the well irrigation is preferred. Earlier irrigation was practiced through Persian wheels and Dhingli but now diesel/electricity operated tubewells and pumping sets are used in irrigation.

However, during the year 2000-01 the net irrigated area reported was 134,700 hectares, out of which 1,200 hectares was irrigated by government canals and 133,500 hectares by tubewells. Thus percentage of net area irrigated to net area sown worked out to 99.8 per cent for this district during 2000-01. Also during 2000-01, out of 262,000 hectares gross cropped area, 261,800 hectares was irrigated. During 2000-01 the percentage of gross irrigated area to gross cropped area worked out to 99.9 per cent for Kapurthala.

Horticulture:

Horticulture is gaining popularity in the district for the last few years. During 2000-01, an area of 230 hectares was reported under various fruit trees. The break up of area under various fruit is as follows: Kinnows 28 hectares, Grapes 4 hectares, Orange and Malta 3 hectares, Ber 6 hectares, Guava 80 hectares, peach 7 hectares, Lemon 9 hectares, Mangoes 47 hectares, Litchi 3 hectares, Pear 30 hectares, Plum 1 hectare and 12 hectares under miscellaneous. The area under orchards is very limited due to various factors such as high temperature, stormy wind conditions and unsuitability of sub-soil water for irrigation and inadequacy of canal water. In spite of these limited factors the district has

reported sizeable area under Guava, Mango, Pear and Kinnows. The area under grapes would have been much more had there been efficient arrangements for procurement of grapes. The farmers have to make their own arrangements for marketing these fruit. The farmers have persistently demanded the setting up of some factories to process their produce to bring them remunerative returns from grapes which require very delicate handling before disposal. Day by day the attitude of the farmers is changing and horticulture has become very popular in the district.

The vegetables are also grown in the district. An area of 9511 hectares was reported under vegetables during 2000-01. The break up of area is as follows. Potatoes 7,226 hectares, Onions 33 hectares, winter vegetables 1,489 hectares and summer vegetables 763 hectares. The demand for vegetables is picking up in the district as the urban centers have grown over the years. The establishment of various colonies etc. under various central and state projects increased the demand for vegetables.

Besides compost (both in urban and rural), cattle dung and green manures, chemical fertilizers are increasingly being used in this district. During 2000-01, 40,000 tonnes of chemical fertilizers comprising nitrogenous 28,000 tonnes, phosphetic 10,000 tonnes and potassic K2o 2,000 tonnes were consumed in the district for growing improved varieties of wheat, paddy sugarcane, cotton, etc. The farmers are, however, becoming conscious of the delirious effects of reckless use of chemical fertilizers in their farms. The farming scientists are required to provide them with some alternative nutritive soil agents so that crop yields do not suffer.

Animal Husbandry:

Live stock, the back bone of the peasantry and the farmer, has traditionally been depending upon draught animals for plouging on milch cattle, mainly cows and buffaloes for milk and other dairy products for domestic use and for supplementing their farm income.

The data on livestock in Punjab is available for the year 1997. It reveals that there are 86,400 cows, 179,700 buffaloes, 700 horses and ponies, 600 donkeys, 400 Mules, 300 sheep, 5,700 goats and 300 pigs, (total 274,100 animals). Cows and Buffaloes, as else where, are the two most dominant milch animals in the district. The district can boast of a fairly rich cattle wealth. The decline in the number of cattle is attributed to the mechanization of agriculture and transportation which make lesser demand of draught cattle. However due to the ever- increasing demand of milk in the urban centers, the demand of milch buffaloes, which are mainly of good breads (murrah and nili), has also shot up.

In 2000-01 there were 45 veterinary hospitals, 41 veterinary dispensaries and insemination units in the district wherein 36 veterinary officers and 99 veterinary pharmacists were posted.

The poultry had recorded 198,300 birds (138,600 Hens and 59,700 Chikens) in 1997. The poultry farming is now being practiced on scientific lines which is evident from a large number of poultry farms located in the district. This has been made to understand due to acceptability of egg as a vegetarian food.

In order to provide good quality meat to the general public, 3 recognized slaughter houses were functioning in the district during 2000-01 where 8,502 animals (8,419 sheep and goats, 83 pigs) were slaughtered.

Fisheries:

Pisciculture has been taken up in a big way in the district. An area of 254 hectares was stocked with fish wherein 2,578 thousand fingerlings were raised. An accrued income of Rs. 1,298,000 was shown by the fisheries department in the district during 2001.

Tenancy:

The cultivators generally cultivate their land themselves. This system is known as Khud Kasht (self cultivation). Some times the land is leased out to other farmers or persons on Batai (share cropping) which is usually fixed for one half of the gross produce payable in kind. Contract or Theka

is also in vogue and is fast gaining popularity. This is generally paid in cash on yearly basis but may be agreed to in kind depending upon the land contracted and the economic positions of the cultivator. The Batai or Theka may vary depending upon the productivity of the land. Since a large number of people own tractors,they prefer to provide agriculture services to the fellow farmers on cash payment. The Jagirdari system has since been abolished after the introduction of various enactments under the land reforms undertaken after independence and merger of the Pepsu areas in the Punjab State.

Industry:

Kapurthala was formerly a princely State wherein rulers provided all type of encouragement and assistance for setting up of various industrial units. Further in Phagwara the Ramgarhias established a number of small industrial units which earned good name to the district. The late Rajas Sukhjit Singh and Jagjit Singh were especially instrumental in connecting Kapurthala with Jalandhar by rail and establishment of some large and medium scale industrial units in the princely State of Kapurthala.

The District was known for gur/ shakkar, phulkaries, brass/copper/ bell metal utensils, bann, daris, etc. Later some large and medium scale units, engaged in the manufacture of sugar, cotton textile, liquor, starch, beverages, edible oils, etc, were set up in the district. Recently, Rail Coach Factory has been set up at Hussainpur (near Kapurthala). Some of the large and medium scale units located in the district areas follows:-

1. Rail Coach Factory, Kapurthala (Hussainpur):- It is engaged in the manufacturing of railway coaches for the Indian Railways and is by far the largest central project installed in the State.

2. The Jagjit Sugar Mills Co. Ltd., Phagwara: - It was established in 1933 and initially had manufacturing capacity of 15,000 tonnes of sugar. Subsequently it was taken over by the Oswals and renamed as 'Oswal Agro Mills Ltd. (Sugar Division). followed by the Wahid Sandhar Sugar Ltd., in 2001. It produced 26,800 tonnes of sugar during 2000-2001.

3. The Sukhjit Starch and Chemicals Ltd., Phagwara: - It was established in 1944 and is engaged in the manufacture of maize starch, maize gluton, maizebran, maize oil, maize oil cake, dextrines, liquid glucose, steep solids and maize husk.

4. Jagjit Cotton Textile Mills Ltd., Phagwara: - It was established in 1944 and is engaged in the manufacture of cloth, yarn, etc. Its plant has been modernized, which produces fine quality cloth and yarn replacing coarse cloth manufactured in the past.

5. Jagjit Industries Ltd., Hamira: - It was also established in 1944 and is engaged in manufacturing of liquor, malt, malt extract, malted milk food and carbon dioxide gas. It also markets VIVA, a health drink and Boost, a health tonic.

6. Anand Aggarwal Oil Pvt. Ltd., Kapurthala: - It has two units, one located at village Sheikhupur and the other at village Dhudianwala. These units are engaged in the manufacture of edible oil and non edible oil, solvex oil, extraction and rice-bran oil and dehydration of non edible oil.

7. Markfed Refined oil & Allied Industries: - It was set up in 1976 and is engaged in the manufacture of products like cattle feed, poultry feed, rice bran oil, raw groundnut oil, refined groundnut oil, solvent refined groundnut oil, etc.

8. Jain Solvex Ltd., Kapurthala: - It was established in 1980 and is engaged in the manufacture of rice bran oil and de oiled rice-bran.

Besides the above large and medium scale units, there are other various units also engaged in manufacture of : (1) Agricultural implements, (2) Automobile parts, (3) Bolts and Nuts, (4) Ball Bearings, (5) Battery Plates, (6) Adhesive from bone crushing, (7) Cycle parts, (8) Steel casting, (9) Diesel Engines and parts, (10) Electric goods, (11) Electric Fans (kholsa Fans), (12) Electric motors, (13) Pressure Cookers (Apsley Pressure Cookers), (14) Machine tools, (15) Sewing machines and parts, (16) Rolling Mills, (17) Rice Shellers, (18) Steel re-rolling, etc.

In addition there are a number of cottage and household industries such as: (1) Handloom weaving (carpets, bed sheets, shirting, khaddar, khesis etc.), (2) Leather tanning, (3) Leather goods (shoes, suit cases, leather bags), (4) Cane/bamboo products (baskets, chicks, etc.), (5) Baan and rope making, (6) Oil Kohlus, (7) Atta Chakkis, etc.

Trade and Commerce:

The district was a big centre of trade in metals, textiles and agricultural commodities. The principal items of export were brass, copper and bell metal utensils manufactured at Phagwara. Besides, sugar of excellent quality was manufactured at Phagwara. Sultanpur Lodhi was known for the manufacture and trade of gaberdine cloth and bed sheet known as satrang. Cloth curtains, chintz, chicks and jazams (floor covering) were produced and exported from Sultanpur Lodhi. Chillies, tobacco and dates were largely grown and exported. Kala, in tahsil Phagwara, was known for trade in cotton, and carded cloth. Thus in the district, independence, the main items produced and exported from the district are: sugar, khandsari, wheat, maize, gram, cotton, paddy, rice and textiles.

The district has emerged as a leading district in trade and commerce. As per the data available for the year 2000-01, out of 144 regulated markets in the state, 5 are located in Kapurthala district. On an average, each regulated market is serving 138 villages in the district compared with 88 villages in the State as such.

The sub-yards are located at New Mandi, Bhulath, Begowal, Nadala, Ramgarh, Ibrahimwal, Sabzi Mandi Kapurthala, Chara Mandi Kapurthala, Balér Khanpur, Khalu, Surkhpur, Sabzi Mandi Phagwara, Manak Wahad, Ranipur Rajputan, Sabzi Mandi Sultanpur Lodhi, Tibba Kabirpur and Dall. Kapurthala and Phagwara are the biggest grain markets where wheat, paddy, maize, etc. are marketed. Among the market arrivals, the district reported the highest arrival of paddy during 2000-01. Out of the market arrival of 11,057,000 tonnes of paddy in the State, 358,000 tonnes was contributed by Kapurthala district. Likewise, the market arrival of wheat from Kapurthala district 493,000 tonnes was contributed by Kapurthala district. The share of food grains from Kapurthala district in State pool has increased from 612,000 tonnes during 1990-91 to 851,000 tonnes in 2000-01.

Communications:

An efficient network of roads and railways, posts, telegraph, telephone etc. is an essential requirement for development of any area as it is the backbone of any developmental activity. This also applies to Kapurthala. The district is well served by both roads and railways. Though it is well connected by roads and railways with stations inside and outside the district, some of the places along the banks of Beas and the Beins pose difficulty during the rainy season, especially during floods.

Some of the important roads connecting various stations inside and outside the district, besides the National Highway (Sher Shah Suri Marg, connecting Mughal Sarai with Amritsar) are: (1) Kapurthala-Jalandhar Road (2). Kapurthala-Sultanpur Lodhi-Zira Road (3) Kapurthala-Nakodar Road (4) Kapurthala–Tanda Road (5) Kapurthala-Tarn Taran Road (6) Sultanpur Lodhi-Nakodar Road (7) Phagwara – Hoshiarpur Road (8) Phagwara–Nakodar Road and (9) Phagwara-Nawanshahr Road.

Anyhow, there is an efficient network of roads through out the district. The district has a road length of 13 kms under National highways and 1,480 kms under State highways. Further, as per the data available from P.W.D. (B&R) department for the year 2000-01, the Punjab state has a road length of 54,836 kms. giving an overall average of 109 kms per 100 sq. kms. of area. This by all means exhibits a fairly well developed system of roads in the State. Kapurthala district has a road length of 91 kms. per 100 sq. kms. of area which, though some what lower than that of the State as a whole, is quite satisfying in itself. Further more, all the villages in the district are connected by road.

The district is well served by the Public Road Transport System. The district being part of erstwhile Pepsu State, the bus routes are mainly with the Pepsu Road Transport Corporation (PRTC), Kapurthala depots had 82 buses in 2000-2001 and government hired buses from private sector on kilometer basis to fulfill the requirements of public. The other depots of PRTC and Punjab Roadways

also operate buses on various routes in the district. There are a number of private operators also, who provide transport services in areas not served by Government transport operators.

The important private bus operators are as follows:-

1) The Prince Bus & Transport Co. Ltd., Kapurthala.

2) The Ex-servicemen Motor Transport Cooperative Society Ltd., Kapurthala.

3) The Janta Express Bus Service, BO., Phagwara.

4) Jhawar Enterprises (P), Ltd., Phagwara.

Kapurthala district falls under the Firozpur Division of the Northern Railway. Two railway lines passing through this district are:

Amritsar-Saharanpur-Mughal Serai Rail Line: It was built in 1869-70 and is a broad gauge line. It serves Phagwara and Kapurthala tahsils of the district. The five railway stations situated in the district are located at: (i) Dhilwan, (ii) Ramidi, (iii) Dudhwindi, (iv) Cheharu and (v) Phagwara.

Firozpur Cantt.—Jalandhar City Rail Line: It was built in 1912 and is also a broad gauge line. It serves Kapurthala and Sultanpur Lodhi tahsils of the district. The six main railway stations located at this line in this district are: (i) Sultanpur Lodhi, (ii) Dudhwindi, (iii) Pajian, (iv) Husainpur, (v) Kapurthala and (vi) Khojewala.

Kapurthala district is separated from Amritsar and Gurdaspur districts by Beas river, which forms its Northern and Western boundary. There are rail and road bridges at Beas which serve this district for going to Amritsat and Gurdaspur districts. There was a ferry bridge on Beas river on the Tanda –Sri Hargobindpur road (in Hoshiarpur district) which served the northern areas of the district. It has been replaced shortly by a permanent concrete bridge on the Nangal-Tanda-Amritsar Highway. There is another ferry bridge on Kapurthala-Tarn Taran road. Besides there are following ferry crossing on the Beas river: (i) Brahmwal, (ii) Nadala, (iii) Surakhpur, (iv) Fattu Dhinga (v) Saiflabad, (vi) Talwandi Chaudrian, (vii) Hazara and (viii) Ahli. Rail-cum-road bridge (in Jalandhar district) on the Firozpur cantt.-Jalandhar city railway line on the Satluj river, which forms the Northern boundary of Firozpur district, separates it from Kapurthala and Jalandhar districts.

There is no navigable river or canal in the district. Also there is no airport in this district.

There is a good net work of post and telegraph offices in the district. The telephone facilities have also been greatly improved throughout the district barring a few pockets here and there. Mobile and land line telephones have reached almost all villages of the district.

Electricity:

The erstwhile rulers were well aware of the technological changes taking place in the world. They, therefore, were the first to introduce electricity in their areas in the beginning of the present century. The state government Public Works Department replaced the private suppliers of electricity. However, after some time the responsibility of supplying electricity was handed over to The Punjab State Electricity Board, Patiala.

The consumption of electric power in Punjab for various purposes has increased substantially from 11,906.9 million Kwh in 1990-91 to 19,184.5 million Kwh during 2000-01 in the state. The most significant increase in consumption is for domestic use (1619.9 million Kwh in 1990-91 to 4224.1 million Kwh in 2000-01). The consumption of power for industry has almost doubled in the State during last decade (4,317.6 to 8,047.1 million Kwh).

Kapurthala district receives 3.1 per cent of the total power produced in the state and is used for various purposes. In Kapurthala district 98.3 per cent of the households are using electricity and this

percentage is much higher than that of the State (86.7%). These figures are based on statistical abstract of Punjab -2001.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the

garage, etc., only one building number was given for this group and each of the constituents a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 100,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in huge pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

List of Scheduled Castes and Scheduled Tribes:

The Government of India by Gazette Notification under Article 314(1) of Indian Constitution has declared some castes, races or tribes or parts of or groups within castes, races or tribes as Scheduled Castes as there is no standard definition of Scheduled Castes. Similarly, Scheduled Tribes mean all such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are declared by the President of India to be treated as Scheduled Tribes under Article 342(1) of the Indian Constitution. There is slight change in the definition of Scheduled Castes in 1991. Before that, Scheduled Castes could belong to Hindu or Sikh religion. But from 1990, in addition to Hindu and Sikh religions, Scheduled Castes may belong to Buddhists religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In Punjab State, 37 castes were notified by the State Government as Scheduled Castes at the 1991 Census and there is no change at the 2001 Census. Following 37 castes have been notified as scheduled castes in Punjab;

1. Ad Dharmi
2. Balmiki, Chura, Bhangi
3. Bangali
4. Barar, Burar or Berar
5. Batwal
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar Raigar, Ramdasi or Ravidasi
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhilla, Gandil, Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut, Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and / or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

(vi) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across-all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz.

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

1) Migration

2) Internal and International Migration

3) Rural - Urban component of migration

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UACity/Town. These are :

M7 (5,000,000 and above)
M6 (2,000,000 to 4,999,999)
M5 (1,000,000-1,999,999)
M4 (500,000-999,999)
M3 (300,000-499,999)
M2 (200,000-299,999) and
M1 (100,000-199,999)

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenom-enon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001- Census Findings - Population and its distribution:

The following table shows distribution of rural and urban population by tahsils in the district.

POPULATION, NUMBER OF VILLAGES AND TOWNS, 2001

Name of Tahsil	Population									Number of Villages		No. of Towns
	Total			Rural			Urban					
	P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13
Bhulath	102,896	53,025	49,871	83,189	42,749	40,440	19,707	10,276	9,431	101	86	2
Kapurthala	310,909	165,682	145,227	201,913	105,953	95,960	108,996	59,729	49,267	260	245	3
Sultanpur Lodhi	114,816	60,781	54,035	99,245	52,471	46,774	15,571	8,310	7,261	215	181	1
Phagwara	225,900	120,135	105,765	123,647	64,800	58,847	102,253	55,335	46,918	114	106	1
District Total	**754,521**	**399,623**	**354,898**	**507,994**	**265,973**	**242,021**	**246,527**	**133,650**	**112,877**	**690**	**618**	**7**

Kapurthala has a population of 754,521 comprising 399,623 males and 354,898 females as per 2001 census and this makes 3.1 per cent of State's population and 3.2 per cent of the total area of the state.

Among the tahsils, Kapurthala with a population of 310,909 is the most populous while Bhulath with a population of 102,896 is the least populous tahsil in the district. The population of Phagwara tahsil is 225,900 and of Sultanpur Lodhi 114,816. In other words, tahsil with the highest population is a little over three times bigger than the tahsil having the least population.

On an average, a tahsil in the district has a population of 188,630 compared with 338,319 in the State as a whole.

Out of 690 villages of the district 618 are inhabited. A tahsil on an average has 155 inhabited villages. The number of inhabited villages among tahsils varies between 245 in Kapurthala tahsil and 86 in Bhulath.

Out of the total population in the district 507,994 (67.3%) are residing in rural and 246,527 (32.7%) in urban areas. The rural population spreads over 618 inhabited villages and urban population is distributed over 7 towns in the district An inhabited village in the district on an average has a population of 822 as against 1,311 in the state signifying that the villages in Kapurthala are smaller in size. Similarly, towns are also smaller in the district compared with that of the State and a town in Kapurthala district on an average has a population of 35,218 against 52,627 in the state.

Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the Census organization to classify towns according to their population size. A town with a population of 100,000 or more is termed as 'city' in Indian census.

Class	Population size	No. of Towns.
1	2	3
Class – I	100,000 and above (Generally referred to as city)	1
Class – II	50,000 to 99,999	1
Class – III	20,000 to 49,999	-
Class – IV	10,000 to 19,999	3
Class – V	5,000 to 9,999	2
Class – VI	Less than 5,000	-

The number of towns in this district has increased from 3 in 1991 to 7 in 2001.

Out of 7 towns in the district, one is Class I town (city), one falls in the population size class II, there is no town under class III, three towns fall in the population size of class IV and the remaining two are Class V towns. There is no town under Class-VI. As regards distribution of population by size class of towns, it is observed that a little over two-fifth (41.5%) of the urban population in the district is residing in Class I town and 34.8 per cent is residing in Class II town. These two Class I and Class II towns together accommodate more than two third (76.3%) of the urban population of the district. The share of Class IV towns is 16.6 per cent while class V towns accommodate only 7.1 per cent of the urban population in the district.

Population Growth, Density and Sex Ratio

Population Growth:

During 1991-2001, population of Kapurthala has increased from 646,647 in 1991 to 754,521 in 2001 resulting in a net addition of 107,874 persons during this decade. In percentage terms the district has recorded a decadal growth rate of 16.7 per cent which is lower than that of state average (20.1%). Among the districts, it ranks 13th in population size.

Density:

Kapurthala with a population of 754,521 and an area of 1633 sq. kms. has a density of 462 persons per sq. km, which is significantly lower than that of the State (484) and ranks 7th among the districts in the state.

Within the district, Phagwara tahsil (742) is the most densely populated and Sultanpur Lodhi tahsil (255) is the least populated. The rural density in the district varies between 429 in Phagwara tahsil and 225 in Sultanpur Lodhi tahsil and urban density is the highest in Phagwara tahsil (6,391) and the lowest in Bhulath tahsil (1,147).

Sex Ratio:

Sex ratio is derived as the number of females per 1,000 males. Generally speaking differentials in mortality conditions of males and females, male-female ratio at birth and sex selective migration are the key factors which determine the sex composition. It reflects the socio-economics and demographic characteristics of the population and unfolds the status of women in the society and care of the girl child in particular.

Significant feature of Punjab's population is the preponderance of males over females. According to Census 2001, out of the total population of 24,358,999 in the State, 12,985,045 are males and 11,373,954 are females resulting in an overall sex ratio of 876 which is significantly lower than the country as a whole (933).

The sex ratio in the State and its constituent districts has remained low throughout. At the beginning of the 20th century, the sex ratio was 832 in 1901 which declined to 780 in 1911.Ever since, the sex ratio in the state showed gradual improvement till 1991 when it reached 882. However, it has again declined to 876 as per census 2001, exhibiting a fall of 6 points in the State.

In Kapurthala details prior to 1951 census are not available. Ever since 1951 the sex ratio in the district has gradually improved from 880 in 1951 to 898 in 1981. Afterwords it declined to 896 in 1991 and again to 888 in 2001. Within the districts it is the highest in Hoshiarpur (935) and the lowest in Ludhiana (824).Kapurthala with a sex ratio of 888, ranks 5th among the districts in the State

At the tahsils level the sex ratio is the highest in Bhulath (941) and the lowest in Kapurthala (877). The rural sex ratio varies between 946 in Bhulath and 891 in Sultanpur Lodhi tahsils and the corresponding figures in the urban sex ratio is 918 in Bhulath and 825 in Kapurthala tahsils. The towns display a variation of disparity of 947 in Begowal and 815 in Kapurthala. The urban sex ratio is lower than their rural counterparts. Among the tahsils, the sex ratio is above the state average (849) in two tahsils in urban areas whereas it is above the state average (890) in all the tahsils in rural areas.

The sex ratio of child population in age group 0-6 in the State and its constituent districts is quite low and it has become a matter of deep concern. Punjab has a child sex ratio of 798 and it is almost identical in its rural (799) and urban (796) areas. In Kapurthala, the child sex ratio (785) is even lower than that of the State and. ranks 14th among all the districts. Within the district the child sex ratio is the maximum in Phagwara (820) and the minimum in Bhulath (707) tahsils.

Likewise, rural child sex ratio varies between 830 in Phagwara and 701 in Bhulath tahsils while the variation in urban child sex ratio is to the extent of 806 in Phagwara and 734 in Bhulath tahsils.

Literacy:

Any person who is able to read and write with understanding in any language is recorded as literate. As in 1991 all the children below 7 years of age have been treated as illiterates.

69.7 per cent of the state's population is literate which is higher than that of the country (64.8%) as such. Among the States /Union Territories, Punjab ranks 16th in terms of literacy.

73.9 per cent of the district's population is literate which is slightly better than the state. In other words more than two third of its population in the district is literate. It ranks 6th among the districts in the State. Among the tahsils in the district, Phagwara (78.8%) ranks at the top while Sultanpur Lodhi (66.5%) is placed at the bottom. However, three tahsils in the district have literacy rate higher than the overall literacy rate in the state.

Between the two sexes, the literacy rate in the district varies between 79.0 per cent among males and 68.3 per cent among females, exhibiting a gap of 10.7 percentage points. The male-female differential is the widest (12.4 percentage points) in Sultanpur Lodhi tahsil (males 72.4 % and females 60.0%) and the narrowest (10.1 percentage points) in Phagwara tahsil (males 83.6% and females 73.5%).

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district 69.7 per cent of the rural population and 82.5 per cent of the urban population is literate. The urban literacy is higher than the rural in all the tahsils and the gap in rural- urban literacy rate is the widest in Sultanpur Lodhi (urban 80.3 % and rural 64.3 %) and the narrowest in Bhulath (urban 77.3 % and rural 74.0%) tahsils.

Work Participation Rate

Definition of Work and Classification of Workers:

How the 'work' is defined by the Census needs to be understood properly. Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the Census of India 2001, which includes production of milk even for domestic consumption. In the 1991 Census, cultivation of certain crops even for one's self-consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as tomatoes, all types of flowers, fruit and tuber potatoes, chilies and turmeric, cardamoms, vegetables etc., in other words plantation of tea, coffee, rubber, coconut and betel nuts has been classified under plantation and not included in cultivation.

The reference period for recording the economic activity of any person was preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last one year are recorded as main workers while those who had worked for less then six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, Household Industries and other workers.

Punjab, with a work participation rate of 37.5 per cent, ranks 24th among the States/Union Territories in the Country and thus, the work participation rate in the State is lower than that of India (39.1%). Among the districts in the State, the proportion of workers varies between 44.9 per cent in Nawanshahr district and 33.3 per cent in Gurdaspur. In all, 10 out of 17 districts in the State have shown work participation rate above the state average and among them five districts have at least two-fifth of their population reported as workers. Besides Nawanshahr, they include Bathinda (42.3%), Mansa (40.9%), Sangrur (40.7%) and Moga (40.1%).

Main Workers and Marginal Workers:

85.8 per cent of Punjab's total workers have been recorded as Main Workers and 14.2 per cent as Marginal Workers. The corresponding percentages for 1991 Census were 97.4 and 2.6 per cent respectively. In Kapurthala Main Workers and Marginal Workers constitute 88.0 per cent and 12.0 per cent of the total worker respectively.

The work participation rate in Kapurthala (34.8%) is lower than the state average (37.5%). Among the tahsils in the district, it varies between 41.7 per cent in Bhulath and 32.0 per cent in Phagwara. Further 52.8 per cent among males and 14.6 per cent among females are reported as workers showing a significant,reduction in the gap between the two. In Bhulath, nearly one-third of the females (31.8%) are recorded as workers.

Out of total population 30.6 per cent are main workers and 4.2 per cent are marginal workers. The proportion of main workers is the highest in Bhulath tahsil (35.8%) and the lowest in Kapurthala

tahsil (28.6 %). However, the proportion of marginal workers is the highest (6.7 %) in Sultanpur Lodhi tahsil and the lowest (2.7%) in Phagwara tahsil. Further, the incidence of marginal workers is observed to be more among females as compared to males, the proportion of female marginal workers (4.3 %) is a little more than the males (4.1%). By and large, a similar pattern is observed among Bhulath and Sultanpur Lodhi tahsils in this regard. In Sultanpur Lodhi tahsil, 9.0 per cent of females are marginal workers as against 4.7 per cent among males. Bhulath (8.1 %) has a high proportion of female marginal workers as against 3.9 per cent among males. Amazingly males superate females as marginal workers in Kapurthala tahsil (males 4.5% and females 2.9%) and in Phagwara tahsil (males 3.4% and females 1.9%).

Religion :

It has been customary for the Indian Census to provide information on religious persuasions of its people. Religion is one of the basic cultural characteristics of population and several religions have thrived in the secular state of India. Apparently, information on various religious communities in the country has been of great interest and useful to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. Question 7 of the household schedule canvassed at the 2001 Census pertained to religion. The instructions to enumerators were to record faithfully the religion of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes:

Hindus	1
Muslims	2
Christians	3
Sikhs	4
Buddhists	5
Jains	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

There are 59.5 per cent Sikhs and 38.0 per cent Hindus in Kapurthala district. Surprisingly Buddhists (1.0%) route Muslims (0.8%) and Christians (0.6%) while Jains are negligible.

The instructions for recording this information are by and large the same as in 1991. A brief analysis based on 2001 Census data is given under Annexure V.

Mother Tongue and Language :

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. It may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Question 11 of the Household Schedule was aimed to collect information on 'Other Languages known' (up to two languages in order of proficiency) other than Mother Tongue.

In order to provide a broad scenario a brief note along with table based on 1991 Census data is given in Annexure VIII.

Scheduled Castes and Scheduled Tribes :

Out of the total population of 24,358,999 in the state 7,028,723 belong to Scheduled Castes as per 2001 Census. As such 28.9 per cent of the state's population and 29.9 per cent of the population in the district belong to Scheduled Castes. Among the tahsils, it is the highest in Phagwara (38.3%), and the lowest in Bhulath (14.9%). The proportion of Scheduled Castes population in Kapurthala (29.9 %) is at par with the district average.

In consonance with the general trends in the state, Scheduled Castes are more rural by residence as 75.7 per cent of Scheduled Castes population in the State and 76.8 per cent in the district are rural by residence.

In the district 34.1 per cent of population in rural areas belongs to Scheduled Castes while the corresponding percentage in urban areas is 21.3 per cent. In Phagwara tahsil Scheduled Castes comprise a little less than one-half (48.5%) of rural population and this percentage is the highest among all the tahsils in the district. The proportion of Scheduled Castes population residing in urban areas varies between 25.9 per cent in Phagwara tahsil and 11.1 per cent in Bhulath tahsil.

During 1991-2001 Scheduled Castes population in the state has increased by 22.4 per cent which is higher than that of Kapurthala (18.5%). In the district 64.01 per cent of the Scheduled Castes population is literate which is higher than that of the state (56.2 %.).62.1 per cent in rural areas and 70.1 per cent in urban areas in Kapurthala are literate.

There is no Scheduled Tribes population in the State.

(viii) Brief Analysis Based on Primary Census Abstract.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Bhulath	911,86	91,186	0	102,896	83,189	19,707	12.8	-8.8	0.0	0.0	19.2
2	Kapurthala	254,921	190,354	64,567	310,909	201,913	108,996	22.0	6.1	68.8	25.3	35.1
3	Sultanpur Lodhi	103,139	89,417	13,722	114,816	99,245	15,571	11.3	11.0	13.5	13.3	13.6
4	Phagwara	197,401	109,085	88,316	225,900	123,647	102,253	14.4	13.3	15.8	44.7	45.3
	District Total:	**646,647**	**480,042**	**166,605**	**754,521**	**507,994**	**246,527**	**16.7**	**5.8**	**48.0**	**25.8**	**32.7**

Kapurthala district has recorded a growth rate of 16.7 per cent during 1991-2001as against 20.1 per cent for the state. The decadal growth rate in Kapurthala tahsil (22.0%) is almost double that of Sultanpur Lodhi tahsil (11.3%). Besides Sultanpur Lodhi, the decadal growth rates of Phagwara tahsil (14.4%) and Bhulath tahsil (12.8%) are also below the district average.

The urban population in the district grew by 48.0 per cent which is more than eight times that of the rural (5.8 %) growth rate next only to Mansa (66.9%), Rupnagar (56.0%) and Fatehgarh Sahib (49.8%) districts. Bhulath tahsil was entirely rural at the 1991 Census. Kapurthala tahsil has recorded an urban growth rate of 68.8 per cent, which is more than five times of Sultanpur Lodhi (13.5 %) sent. Rural growth rate varies between 13.3 per cent in Phagwara and - 8.8 per cent in Bhulath since Begowal and Bhulath are newly created Nagar Panchayats. Rural growth rate of Kapurthala district (5.8%) is the lowest among all the districts barring Jalandhar (5.2%).

32.7 per cent of the population in the district is urban as against 25.8 per cent in 1991. The level of urbanization in the district, however, is slightly lower than the average of state (33.9 %). It has increased from 25.3 per cent to 35.1 per cent in Kapurthala tahsil and from 44.7 per cent to 45.3 per cent in Phagwara tahsil. In Bhulath tahsil more than one fifth (19.2%) of the population is urban and Sultanpur Lodhi with 13.6 per cent legs behind.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/ C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females

Out of 690 villages in the district, 72 villages are uninhabited,15 each in Bhulath and Kapurthala, 34 villages in Sultanpur Lodhi and 8 villages in Phagwara tahsils. A village on an average has a population of 822 in the district, the corresponding size of an inhabited village in the State as a whole is 1,311. The inhabited villages which number 618 are distributed over 5 CD blocks in the district, on an average a CD block has 124 inhabited villages and population of 101,599, whereas total villages of the state are distributed over 138 CD blocks. In the state a CD block has 89 inhabited villages and population of 116,641. Evidently, the inhabited villages in Kapurthala district are much smaller in population size as compared to the State. Among 618 inhabited villages, 142(23.0%) villages have a population of less than 200, 144(23.3%) fall in the population size Class of 200-499, 164(26.5%) in the category of 500 –999, 110(17.8%) in the range of 1,000 – 1,999, 53(8.6%) with population varying between 2,000 – 4,999, 5(0.8%) are having population varying between 5,000 – 9,999 and none of the villages in the district crosses the population of 10,000 and above. In other words 450 villages are small sized with a population of less than 1,000 and they contain 35.6 per cent of the rural population of the district, 163 are medium sized having population 1,000–4,999 and they contain 58.4 per cent of rural population of the district, 5 villages in the district are large sized having population 5,000 and above and they contain 6.0 per cent of the rural population of the district.

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001

Serial number	Name of Town	Urban status of town
1	2	3
1	Begowal	N P
2	Bhulath	N P
3	Dhilwan	N P
4	Hussainpur	CT

DENOTIFIED, DECLASSIFIED AND MERGED TOWN

NIL

Table 3 revealed new towns added, denotified, declassified and merged in the district at the 2001 Census.

There are 7 towns in the district and 6 of them are statutory in status and only one is a census town. Begowal (NP), Bhulath (NP) and Dhilwan (NP) are newly added towns and have statutory status and Hussainpur is a Census Town added to the district at the 2001 Census.

Further, no town of Kapurthala district of 1991 Census has been denotified /declassified or merged at the 2001 Census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	12	2.0	77	0.0
11-20	15	2.4	349	0.1
21-50	34	5.5	1,967	0.4
51-100	48	7.8	5,128	1.0
101-200	99	16.0	42,507	8.4
201-300	109	17.6	85,121	16.7
301-500	154	24.9	160,017	31.5
501 +	147	23.8	212,828	41.9
Not known	0	0.0	0	0.0
District Total:	**618**	**100.0**	**507,994**	**100.0**
Population Density (Rural) of the district:	**332.0**			

Table 4 shows distribution of villages according to density of population per Sq. km. Kapurthala district has a rural density of 332 persons per Sq. km. The villages however, display a significant variation among themselves. Low density of 100 or below is noticed in 109 villages (17.7%) and they contain barely 1.5 per cent of district's rural population. Another 99 villages which make 16.0 per cent of the total villages and 8.4 per cent of the total population too are marked with a low density of population in the range of 101-200.Yet another 109 villages which make 17.6 per cent of the total villages and 16.7 per cent of the total population too are marked with a low density of population in the range of 201-300.

The maximum number of villages (154) fall in the average density range of 301-500. This reveals that almost one-fourth (24.9%) of the villages have a high density in the range of 301-500 and they accommodate nearly one third (31.5%) of the rural population of the district.

However, very high density of 501+ is the characteristics of 147 (23.8%) villages and they accommodate more than two fifth (41.9%) of the rural population of the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	832	837	798	NA	NA	NA
1911	780	785	740	NA	NA	NA
1921	799	808	735	NA	NA	NA
1931	815	832	721	NA	NA	NA
1941	836	855	750	NA	NA	NA
1951	844	854	807	880	887	856
1961	854	865	817	886	896	853
1971	865	868	856	889	905	840
1981	879	884	865	898	919	850
1991	882	888	868	896	910	857
2001	876	890	849	888	910	845

Note: Sex Ratio has been defined as number of females per 1000 males.

Table 5 shows sex ratios of state and the district since 1901.

Sex Ratio reflects the socio-economic and demographic characteristics of population. It unfolds the status of women in society and the care for the girl child in particular. Unfortunately, in consonance with the overall patterns of the State, the sex ratio in the district has declined by 8 points from 896 in 1991 to 888 in 2001. The sex ratio declined from 832 in 1901 to 780 in 1911 in the state. Ever since 1911, the sex ratio showed a gradual improvement, uninterruptedly, till 1991 when it reached 882. During 1991-2001, the sex ratio has declined by 6 points, from 882 to 876.

The population census data are not available for Kapurthala district prior to 1951 Census. Kapurthala district had a sex ratio of 880 in 1951 which increased to 898 in 1981 and again declined to 896 in 1991and 888 in 2001. The increase is more noticeable in rural areas of the state where sex ratio has gradually increased from 854 in 1951 to 890 in 2001and district figures increased from 887 in 1951 to 919 in 1981 and remained stationary at 910 for 1991 and 2001 after plunging by 9 points. In the state, the urban sex ratio has declined from 868 in 1991 to 849 in 2001 and the corresponding slump in the urban sex ratio of the district is from 857 to 845.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Bhulath	941	946	918
2	Kapurthala	877	906	825
3	Sultanpur Lodhi	889	891	874
4	Phagwara	880	908	848
	District Total:	**888**	**910**	**845**

Sex ratio by tahsils is shown in table 6. The sex ratio is appreciably higher than the district average in Bhulath (941) and Sultanpur Lodhi (889) tahsils. It is quite low in Kapurthala (877) and Phagwara (880) tahsils, similar pattern is observed in tahsilwise rural –urban sex ratio in the district. However, contrary to all the tahsils the urban sex ratio (918) in Bhulath is better by 73 points than the overall urban sex ratio (845) and is the only tahsil crossing 900 mark. The dwindling urban sex ratio is the lowest among all the districts barring Ludhiana district (783). However, Kapurthala district (910) ranks 4th among all the districts of the state regarding rural sex ratio.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Nadala	944
2	Dhilwan	902
3	Kapurthala	908
4	Sultanpur Lodhi	891
5	Phagwara	908
	District (Rural) Total:	**910**

Table 7 exhibits C.D. blockwise sex ratio in the district. Among the CD.blocks rural sex ratio varies between 944 in Nadala and 891 in Sultanpur Lodhi. In all, one CD block shows rural sex ratio above and four below the rural sex ratio of the district. All CD blocks fall above the state average. Amazingly 4 out of 5 C.D. blocks cross sex ratio above 900 mark.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	29	4.7	1,636	0.3
700-749	12	1.9	3,592	0.7
750-799	30	4.8	11,767	2.3
800-849	66	10.7	46,444	9.1
850-899	155	25.1	159,228	31.3
900-949	147	23.8	155,282	30.6
950-999	92	14.9	92,325	18.2
1000-1099	63	10.2	32,802	6.5
1100+	24	3.9	4,918	1.0
District Total:	**618**	**100.0**	**507,994**	**100.0**
Sex ratio (Rural) for District:		**910**		

Sex ratio of rural population by ranges is portrayed in Table 8. The district as such is not marked with a low rural sex ratio (910). This is low (less than 800) in 71 villages only. The villages with low sex ratio comprise 11.4 per cent of the total villages in the district and contain 3.3 per cent of district rural population. 66 villages (10.7 per cent) are marked with a rural sex ratio of 800-849 and they contain 9.1 per cent of the district rural population.

The maximum number of 155 villages exhibits a rural sex ratio in the range of 850-899. These make 25.1 per cent of the total villages and have 31.3 per cent of the rural population of the district.

The high sex ratio in the range of 900-949 is noted in 147 villages and they constitute 23.8 per cent of the villages and account for 30.6 per cent of the rural population of the district.

Male-Female ratio is quite close to parity in the range of 1000-1099 as 63 (10.2%) villages are having 6.5 per cent of rural population of the district. Furthermore, 24 villages are highly female biased. This is a welcome sign for the State as well as for the district.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Begowal	NP	947
2	Bhulath	NP	890

7	Phagwara*	UA	848
	(i) Phagwara	M Cl+OG	848
	(ii) Phagwara	M Cl	854
	Sex ratio (Urban) for the district:		**845**

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Sex ratio of urban agglomerations/towns is exhibited in Table 9. The district has an urban sex ratio of 845 which is lower than the urban sex ratio of the State (849).

Among the UAs/ towns, the sex ratio varies between 947 in Begowal and 815 in Kapurthala. In all, as many as 5 towns have sex ratio higher than that of the district and in Hussainpur and Kapurthala towns, it is below the district average. Besides Begowal, Dhilwan also crosses 900 mark. Surprisingly Begowal (947) topples all the districts regarding total, rural and urban sex ratio.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bhulath	Total	12,856	7,531	5,325	707
		Rural	10,515	6,181	4,334	701
		Urban	2,341	1,350	991	734

		Urban	11,361	6,289	5,072	806
	District Total:	**Total**	**95,004**	**53,235**	**41,769**	**785**
		Rural	**66,254**	**37,187**	**29,067**	**782**
		Urban	**28,750**	**16,048**	**12,702**	**792**

The sex ratio of child population in the age-group 0-6 is shown in Table 10. The State and its constituent districts are marked with a very low child sex ratio and this has become a matter of deep concern. Punjab has a child sex ratio of (798) as compared to India (927) and Kapurthala district has even lower child sex ratio (785) holding 14th rank in the state.

Within the district, child sex ratio is the maximum in Phagwara (820) and the minimum in Bhulath (707).

Likewise, the rural child sex ratio varies between Phagwara (830) and Bhulath (701), while the variation in urban child sex ratio is between 806 in Phagwara and 734 in Bhulath. Surprisingly only Phagwara tahsil crosses 800 mark in total, rural and urban child sex ratio. In Bhulath, contrary to other tahsils, urban child sex ratio out does rural sex ratio which is a very rare phenomenon.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females

1	Nadala	10,964	6,450	4,514	700
2	Dhilwan	11,586	6,351	5,235	824
3	Kapurthala	15,317	8,617	6,700	778
4	Sultanpur Lodhi	13,705	7,745	5,960	770
5	Phagwara	14,682	8,024	6,658	830
	District (Rural) Total:	**66,254**	**37,187**	**29,067**	**782**

Table 11 shows CD Blockwise sex ratio of population in the age-group 0-6 termed as child sex ratio.

The gap of 128 points in rural child sex ratio (782) and the over all rural sex ratio (910) in the district is alarming. More so, three CD blocks viz. Kapurthala (778), Sultanpur Lodhi (770) and Nadala (700) are marked with a child sex ratio even lower than the district average. Phagwara (830) and Dhilwan (824) are the only two CD blocks having sex ratio more than 800.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	215	34.8	15,495	23.4
700-749	67	10.8	10,269	15.5
750-799	69	11.2	11,068	16.7
800-849	68	11.0	10,462	15.8
850-899	47	7.6	6,605	10.0
900-949	35	5.7	3,921	5.9
950-999	17	2.7	2,084	3.1
1000-1099	50	8.1	4,253	6.4
1100+	50	8.1	2,097	3.2
District (Rural) Total	**618**	**100.0**	**66,254**	**100.0**
Sex ratio (Rural) for District:		**782**		

Table 12 shows sex ratio of rural population in the age group 0-6 by ranges. It is very low (782) in the district. As many as 215 (34.8%) villages are marked with an excessively low child sex ratio of less than 700. Together these villages constitute 23.4 per cent of the child population in the age group 0-6 in rural areas of the district. The sex ratio is equally low in the range of 700-749 in 67 (10.8%) villages constituting 15.5 per cent of the district's child population. Another 69(11.2%) villages fall in the range of 750-799 and they contain one-sixth (16.7 %) of the rural child population of the district.

267 villages (out of 618) which make a little more than two-fifth (43.2%) of the villages and contain 44.4 per cent of child population have crossed 800 mark. Among, them 68(11.0%) fall in the range of 800-849+ and cover 15.8 per cent of district rural child population. Another 47(7.6%) villages having 10.0 per cent of child population are in the range of 850-899. The rural child sex ratio is fairly high in the range of 900-949 in 35 (5.7%) villages containing 5.9 per cent of the child population, and another 17 (2.7%) villages having 3.1 per cent of the population display a very high sex ratio of 950-999.

As many as 100 villages in the district are female child biased and all of them fall in the range of 1,000 + and make 16.2 per cent of the total villages and share 9.6 per cent of the rural child population of the district.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town+*	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 13 shows sex ratio of child population in the age group 0-6 of urban agglomerations/towns in 2001. The urban child sex ratio in the district (792) is significantly lower than the overall urban sex ratio (845) exhibiting a gap of 53 points.

Among the UAs/ towns in the district, Child sex ratio is the highest in Kapurthala (823) and the lowest in Hussainpur (696). Further more it is deplorably low in four more towns, Sultanpur (768), Dhilwan (755), Bhulath (741) and Begowal (727). Precipitation of sex ratio of 0-6 age group in Hussainpur is startling since it used to be a village before it was declared a Census Town and stands 12.7 points below Kaputthala M Cl.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

	District Total:	**Total**	**754,521**	**225,787**	-	**29.9**	-
		Rural	**507,994**	**173,297**	-	**34.1**	-
		Urban	**246,527**	**52,490**	-	**21.3**	-

Table 14 shows the number and percentage of Scheduled Castes and Scheduled Tribes by tahsils. As already stated there is no Scheduled Tribes population in the State and its constituent districts.

29.9 per cent of the population in the district belongs to Scheduled Castes as compared to 28.9 per cent in the State. The proportion of Scheduled Castes among tahsils is; Phagwara (38.3%), Kapurthala (29.9%), Sultanpur Lodhi (27.0%) and Bhulath (14.9%). The proportion of Scheduled Castes population in Kapurthala tahsil is at par with the district average (29.9 %).

In the district 34.1 per cent of population in rural areas belongs to Scheduled Castes while the corresponding percentage in urban is 21.3 per cent. In Phagwara tahsil Scheduled Castes comprise a little less than one-half (48.5 %) of rural population and this percentage is the highest among all the tahsils in the district. The proportion of Scheduled Castes population residing in urban varies between 25.9 per cent in Phagwara tahsil and 11.1 per cent in Bhulath tahsil.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Table 15 gives CD blockwise distribution of Scheduled Castes population in the district. The percentage of Scheduled Castes population is the maximum in Phagwara (48.5%) and is followed by Kapurthala (36.7%). In all 2 CD blocks reveal percentage higher than the district average and three CD blocks fall below and among them the percentage of Scheduled Castes population, beside Phagwara and Kapurthala, it is 33.1% in Dhilwan, 29.2 % in Sultanpur Lodhi and 16.6 % in Nadala. The percentage of Scheduled Castes population is slightly better in the district rural (34.1%) as compared to State (33.0 %) and it ranks 9th among all the districts.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District (Rural) Total	**618**	**100.0**	**173,297**	**100.0**

Table 16 presents proportion of Scheduled Castes population in villages by ranges. 109 (17.6%) villages in the district do not have any Scheduled Castes population and in another 28 (4.5%) villages, Scheduled Castes comprise merely 0.3 per cent of the total population in the range of less than 5 per cent. Yet another 38(6.1%) villages have Scheduled Castes population in the range of 5-10 per cent and they contain 1.7 per cent of the Scheduled Castes population of the district. All these 175 villages which make 28.2 per cent of the total villages have a small population (2.0%) only.

A little over one-tenth (11.5%) of the villages, which number 71, fall in the range of 11-20 per cent and they account for 6.6 per cent of the Scheduled Castes population of the district. One out of every sixth (16.2%) village has Scheduled Castes population in the range of 21-30 per cent and in absolute terms they number 100 which is the highest among all the ranges and they contain 17.4 per cent of the district's rural Scheduled Castes population.

92 (14.9%) of the villages having 18.5 per cent of the districts rural Scheduled Castes population exhibit a relatively high proportion of Scheduled Castes population in the range of 31-40 per cent and another 55 villages which comprise 8.9 per cent of the total villages and 17.7 per cent of rural Scheduled Castes population of the district fall in the range of 41-50 per cent.

Scheduled Castes comprise more than one-half of the total population in 125 villages. These villages constitute 20.3 per cent of the total villages and 37.8 per cent of rural Scheduled Castes population of the district. Further, within this group, 85 villages fall in the range of 51-75 per cent comprising 13.8 per cent of the total villages and 26.7 per cent of rural Scheduled Castes population of the district, while the proportion of Scheduled Castes in 40 (6.5%) villages in the range of 76 per cent and above counts for 11.1 per cent population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

UAs /Townswise number and percentage of Scheduled Castes and Scheduled Tribes population is shown under table 18.

Urban Scheduled Castes comprise one-fifth (21.3%) of the total urban population of the district as shown in Table 18.It is slightly better as compared to state (20.7%). The towns among themselves show a wide disparity in this regard. In Dhilwan 30.2 per cent of the population belongs to Scheduled Castes, while in Begowal this percentage is barely 8.1 per cent. Besides Begowal, Scheduled Castes population in Kapurthala and Hussainpur (19.2% each), Bhulath (13.9 %) and Sultanpur(12.7 %) also falls below the district average. Apart from Dhilwan, only Phagwara supersedes district percentage of scheduled castes population to total population.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Nadala	911	-
2	Dhilwan	908	-
3	Kapurthala	899	-
4	Sultanpur Lodhi	876	-
5	Phagwara	904	-
	District (Rural) Total	**899**	-

Table 19 shows CD blockwise sex ratio of Scheduled Castes population in the district. It is the maximum in Nadala (911) and the minimum in Sultanpur Lodhi (876). Kapurthala CD block falls in line with the district average (899). Besides Nadala, Dhilwan (908) and Phagwara (904) CD blocks also fall above the district average but the district exceeds the State (894) rural sex ratio among Scheduled Castes.

It is assertable that Kapurthala district occupies 5th position among all the districts in the state regarding sex ratio of scheduled castes population in rural area.

There is no Scheduled Tribes population in the state.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4

	(ii) Phagwara (M Cl)	879	-
7	Sultanpur (M Cl)	902	-
	Sex ratio (Urban) for the district:	**880**	-

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Scheduled Castes population in urban areas of the district has a sex ratio of 880 which is better than the overall urban sex ratio of the district (845). The situation is also quite encouraging in towns of Dhilwan (927), Sultanpur (902) and Kapurthala (882) which have sex ratio more than the district average. In all four towns show urban sex ratio in Scheduled Castes population below and three above the district average . It is a matter of concern that district Kapurthala backs down to 14 districts and supersedes only Fatehgarh Sahib (872) and Ludhiana (853) districts in sex ratio among scheduled castes in urban area.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Table No. 21 shows that 73.9 per cent of the district's population is literate compared with 69.7 per cent in the state as such. In other words, more than seven out of ten persons in the district are literate.

Of the four tahsils in the district, Phagwara (78.8%) is the most literate tahsil in the district. By contrast, Sultanpur Lodhi (66.5 %) with almost two third of its population as literate is placed at the bottom.

Between the two sexes, the literacy rate in the district varies between 79.0 per cent among males and 68.3 per cent among females, exhibiting a gap of 10.7 percentage points. The male-female differential is the widest (12.4 percentage points) in Sultanpur Lodhi tahsil (males 72.4 per cent and females 60.0 per cent) and the narrowest (10.1 percentage points) in Phagwara tahsil (males 83.6 per cent and females 73.5 per cent).

Likewise, the rural-urban literacy rates in the district exhibit significant disparity; 69.7 per cent of the rural population and 82.5 per cent of the urban population is literate. The urban literacy is higher than the rural in all the tahsils and the gap in rural- urban literacy rate is the widest (16.0 percentage points) in Sultanpur Lodhi (urban-80.3 % and rural 64.3 %) and the narrowest (3.3 percentage points) in Bhulath (urban-77.3 % and rural 74.0%). Amazingly the district exceeds the state in total, rural and urban literacy rate.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

District (Rural) Total:		**307,881**	**172,293**	**135,588**	**200,113**	**93,680**	**106,433**	**69.7**	**75.3**	**63.7**	**11.6**

CD blockwise literacy rate is shown in Table 22.

Rural areas of the district are marked with a relatively low literacy rate. A little more than two-third (69.7%) of the ruralities in the district are literate compared with 82.5 per cent in urban areas. Among the CD blocks, the rural literacy rate varies between 74.4 per cent in Phagwara and 64.3 per cent in Sultanpur Lodhi. Besides Phagwara, Nadala (73.7%) CD block has a literacy rate higher than the district average but the district itself topples the state (64.7) by 5.0 percentage points. There is a 11.6 percentage points gap in male- female literacy rate in the district whereas in CD blocks, this gap is the maximum in Sultanpur Lodhi (13.1 percentage points) and the minimum in Nadala (10.6 percentage points).

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	4	0.6	14	0.0
1-10	0	0.0	0	0.0
11-20	3	0.5	183	0.0

District Total:	**618**	**100.0**	**507,994**	**100.0**
Literacy rate for District Rural :		**69.7**		

Table 23 shows distribution of villages by ranges of literacy rate. Very low literacy rate (30% or below) is reported by 13 villages and they have a very small (0.1%) population. It is equally low in 22 villages (3.5%) in the range of 31-40 per cent and they contain 2.4 per cent of the districts rural population. Another 34 (5.5%) villages in the range of 41-50 per cent contain 2.3 per cent of the districts rural population. Yet another 69(11.2%) villages in the range of 51-60 per cent contain 8.2 per cent of rural population of the district. Again 198 villages which make around one-third (32.0%) of the total villages comprising 33.5 per cent of rural population of the district fall in the range of 61-70 per cent.

The maximum number of villages 234 which comprise more than one-third (37.9%) of the total villages and a little less than one half (46.9%) of the rural population of the district are placed in the literacy range of 71-80 per cent.

Further more, 48 (7.8%) villages containing more than 6.7 per cent of the districts rural population constitute the range of 81 per cent and above. This is to say that high literacy rate varying between the range of 81-99 per cent is the characteristics of 47(7.6%) villages. Only one village in the district with 19 population is having cent per cent literacy rate.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 24 reveals the number of literates and illiterates and percentage of literates by sex in UAs/ towns. The literacy rate is significantly higher than the overall urban literacy rate of the district in Hussainpur (93.9%) and Phagwara (84.1%). All other towns in the district fall below the district average.

Between the two sexes, 86.2 per cent among males and 78.1 per cent among females are literates. Likewise in urban, male literacy rate is the highest in Hussainpur (96.7%) and the lowest in Begowal (79.6%). This is so in case of female literacy too; it is the highest in Hussainpur (90.6%) and the lowest in Dhilwan (69.7%). Besides Dhilwan, the female literacy rate is lower than district average in Kapurthala (76.8%), Sultanpur(76.1%), Bhulath (73.9%) and Begowal (70.9%).

Male-Female literacy rate in urban shows a sizeable gap of 8.1 percentage points. This gap is comparatively more in Dhilwan (10.9 percentage points) and relatively less in Hussainpur (6.1 percentage points).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Rural) Total:		**91,717**	**53,551**	**38,166**	**81,580**	**37,694**	**43,886**	**62.1**	**69.2**	**54.2**	**15.0**

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by CD blocks.

Scheduled Castes have a literacy rate of 62.1 per cent compared with an overall rural literacy rate of 69.7 per cent in the district. Other than CD block Phagwara (71.3%), all the CD blocks show low literacy rate as compared to the district. The rural scheduled castes literacy rate is the lowest in Sultanpur Lodhi (53.1%), followed by Dhilwan (54.8%), Nadala (57.3%) and Kapurthala (61.0%).

More than two-third (69.2%) of the Scheduled Castes males and a little over one-half (54.2%) of the scheduled castes females in the district are literates. Among the CD blocks male literacy rate varies between 78.3 per cent in Phagwara and 59.6 per cent in Sultanpur Lodhi.

Likewise, the scheduled castes female literacy shows wide variations; it is the highest (63.7%) in Phagwara and the lowest (45.8%) in Sultanpur Lodhi.

Male-female Scheduled Castes rural literacy rates show a gap of 15.0 percentage points in the district and this gap is to the extent of 16.5 percentage points in Kapurthala and 13.8 percentage points in Sultanpur Lodhi.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

District Total:	**509**	**100.0**	**173,297**	**100.0**
Literacy rate for District (Rural) :		**62.1**		

Table 26 shows distribution of villages by ranges of Scheduled Castes literacy rate.

In this district seven villages which make 1.4 per cent of the total villages and share negligible district's Scheduled Castes population, fall in the range of 20 per cent or less. Another 6 villages which constitute 1.2 per cent of the total villages and 0.5 per cent of the district's Scheduled Castes population have literacy rate varying between 21-30 per cent. Evidently all these villages are marked with a very low literacy rate in their Scheduled Castes population.

Further 22 (4.3%) villages contain 2.3 per cent of scheduled castes population in the range of 31-40 per cent of scheduled castes population of the district. Scheduled Castes literacy rate is relatively better in 78 (15.3%) villages containing 12.7 per cent of scheduled castes population in the range of 41-50 per cent.

In brief, more than one-half of the Scheduled Castes population in 396 villages comprising 77.8 per cent of total villages and 84.5 per cent of total Scheduled Castes population fall in the literacy range of 51+. Among them a little over one fourth (29.1%) villages which number 148 and almost equal (28.1%) to the district's Scheduled Castes population, have literacy rate in the range of 51-60

per cent. The maximum number of villages 151 which make 29.6 per cent of the total villages and 30.1 per cent of the Scheduled Castes population, constitute the range of 61-70 per cent. Another 81 villages which constitute 15.9 per cent of the total villages and 25.3 per cent of the Scheduled Castes population have literacy rate in the range of 71-80 per cent.

Very high Scheduled Castes literacy rate of more than 80 per cent is noticed in 16 (3.2%) villages. However, their share in Scheduled Castes population of the district is (1.0%) only.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

A little less than three fourth (70.1%) of the Scheduled Castes population in urban areas of the district is literate. Among the towns, it is the highest in Hussainpur (90.0%) and Phagwara (75.4%) is the second best. By contrast, urban Scheduled Castes literacy rate is the lowest in Begowal (48.7%) and next above to it is Dhilwan (59.8%).

76.8 per cent of Scheduled Castes males and 62.5 per cent of females in urban areas are literates reflecting a gap of 14.3 percentage points between the two. Male-female disparity in this regard is quite conspicuous. Among the towns Scheduled Castes male literacy rate varies between 93.6 per cent in Hussainpur and 53.0 per cent in Begowal, while the corresponding percentage among females is 85.9 per cent in Hussainpur and 43.8 per cent in Begowal.

Furthermore, male-female differential in Scheduled Castes literacy rate is the maximum in Bhulath (19.3 percentage point) and the minimum in Hussainpur (7.7 percentage point).

Table 31 shows number and percentage of main workers, marginal workers and non workers by sex in tashils.

Out of the total population in the district, 30.6 per cent are main workers and 4.2 per cent are marginal workers. The proportion of main workers is the highest in Bhulath tahsil (35.8 %) and the lowest in Kapurthala tahsil (28.6 %). The proportion of marginal workers is the highest (6.7%) in Sultanpur Lodhi tahsil and the lowest (2.7 %) in Phagwara tahsil. Further, the incidence of

marginal workers is observed to be more among females in comparison with males, the proportion of female marginal workers in the district (4.3 %) is a little more than the males (4.1 %). By and large, a similar pattern is observed in Bhulath and Sultanpur Lodhi tahsils. In Sultanpur Lodhi tahsil, 9.0 per cent of females are marginal workers as against 4.7 per cent among male counterparts. Bhulath (8.1 %), has a high proportion of female marginal workers as against 3.9 per cent among males.

The work participation rate (main + marginal) in Kapurthala district 34.8 per cent is lower than that of State average 37.5 per cent. Among tahsils, it varies between 41.7 per cent in Bhulath and 32.0 per cent in Phagwara.

In the district 52.8 per cent among males and 14.6 per cent among females are reported as workers showing a significant reduction in the gap between the two. In Bhulath tahsil, a little less than one-third 31.8 per cent of the females are recorded as workers and this is the highest among all the tahsils in the district.

Among non workers, 38.3 per cent are males and 61.7 per cent are females whereas out of total population, 47.2 per cent males and 85.4 per cent females are non workers.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table No. 32 reveals that 35.3 per cent of the rural population in the district are worker; comprising 30.3 per cent as main workers and 5.0 per cent as marginal workers. Among the CD blocks, the work participation rate varies between 42.2 per cent in Sultanpur Lodhi and 31.1 per cent each in Phagwara and Dhilwan

Main workers show that proportion is the highest (36.3 %) in Nadala C.D. block and the lowest (27.0% each) in Dhilwan and Kapurthala. However, the proportion of marginal workers is the maximum in Sultanpur Lodhi CD block (7.3 %) and the minimum in Phagwara (3.5%).

Punjab State, in general is characterized by low female work participation rate. It was the lowest (4.4%) among all the States/Union Territories in the country at the 1991 Census. It was more due to non-reporting of female's work by the respondents. Special efforts made in 2001 Census for netting more accurate female's work have helped in obtaining more accurate picture of female's work; total female work participation rate in Punjab (19.1 %) recorded at the 2001 Census is nearly five times

that of 1991 Census and the district is far below of the state with only 14.6 per cent female work participation rate.

In the district, 16.2 per cent of the rural females are reported as workers comprising 11.1 per cent main workers and 5.1 per cent marginal workers. This percentage is quite high in itself and stands comparable with the male counterparts (52.6 %). Further, the female participation in marginal work is greater than that of males. In rural areas of the district, the female work participation rate as marginal workers (5.1 %) is amazingly higher than the males (4.8 %) by 0.3 percentage point.

Among the CD blocks Female work participation rate varies between 31.3 per cent in Nadala and 7.5 per cent in Dhilwan. In all, two CD blocks have female work participation rate higher and three CD blocks lower than the district average of 16.2 per cent in this regard.

Of the total non workers 38.4 per cent are males and 61.6 per cent are females whereas to total population 47.4 per cent males and 83.8 per cent females are non- workers.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

The work participation rate in urban areas of the district, 33.9 per cent, is by and large identical with that of the State (33.5 %). Among the towns in the district, it is the highest in Begowal (44.9%) and the lowest in Dhilwan (29.1 %) as is evident from Table 33.

The participation in marginal work is relatively much less. In the district 2.5 per cent of the urban population is reported as marginal workers compared with 31.4 per cent reported as main workers. The percentage of population reported as marginal workers shows a variation of 11.6 per cent in Begowal and 0.7 per cent in Hussainpur, the corresponding proportion of main workers varies between 33.3 per cent in Begowal and 26.6 per cent in Dhilwan.

Urban female work participation rate in the district is 11.0 per cent compared with 53.3 per cent among males. Among the towns it is the highest in Begowal (36.6%) and the lowest in Dhilwan (4.6%). In all, female work participation rate is less than the urban female participation rate of the district in three towns namely Phagwara (7.9%), Hussainpur (6.2%) and Dhilwan (4.6%) and it is at par with the district average in case of one town viz, Sultanpur

Out of total population 46.7 per cent males and 89.0 per cent females are non-workers and among non workers 38.3 per cent are males and 61.7 per cent are females in the district for urban areas.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN TAHSILS, 2001

Note: Percentage of workers to total workers is given in brackets

Table 34 shows distribution of workers by sex in four categories of economic activity by tahsils in the district.

Among the total workers in the district, 22.2 per cent are cultivators, 13.6 per cent are agricultural labourers 3.2 per cent are engaged in household industry and 61.0 per cent are reported as other workers. This signifies that 35.8 per cent of the total workers in the district are engaged in agricultural sector, while 64.2 per cent are in non-agricultural sector of economy.

At tahsil level, the percentage of cultivators is the highest in Sultanpur Lodhi (35.0%) and the lowest in Phagwara (11.6 %) Likewise, the proportion of agricultural labourers varies between 23.5 per cent in Sultanpur Lodhi tahsil and 6.9 per cent in Phagwara tahsil.

The proportion of workers engaged in household industry is the highest in Phagwara (4.2%) and the lowest in Kapurthala (2.7%). In all, one tahsil falls above and three below the district average.

The participation of females in non-agricultural sector is greater than the agricultural sector. In the district 70.5 per cent of the female workers are non-agricultural workers comprising HH1-5.5 per cent and OW- 65.0 per cent.

Note: Per cent of Worker to total worker is given in brackets

Table 35 shows distribution of workers by sex in four categories of economic activity by CD blocks in the district.

Among C.D. Blocks the proportion of rural workers recorded as cultivators is the highest in Sultanpur Lodhi (38.7 %) and the lowest in Phagwara (20.9 %). Likewise, the proportion of Agricultural labourers shows a variation of 25.4 per cent in Sultanpur Lodhi and 8.5 per cent in Nadala CD blocks. This signifies that in Sultanpur Lodhi CD block more than three-fifth (64.1 %) of the workers are in agricultural sector, while the corresponding percentage is only 32.1 per cent in Phagwara CD block.

The proportion of rural workers engaged in household industry 3.1 per cent is also comparable with urban workers (3.3 %). It is the highest in Phagwara (4.5 %) and the lowest in Kapurthala (2.5 %).

'Other workers' constitute nearly two third of the rural workers (63.4 %) in Phagwara and 33.1 per cent in Sultanpur Lodhi CD blocks.

It is further revealed that there is no significant variation in participation of females in the category of cultivator and agricultural labourers (C-16.5 % and AL-19.7 %). Rest of the females i.e 63.8 per cent (HHI-5.7 % and OW-58.1 %) are non-agricultural workers.

Note : Per cent of worker to total worker is given in brackets.
+ Towns arranged in alphabetical order.
* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

As is evident from Table 36, 7.6 per cent of the workers in urban areas in the district are engaged in agricultural activities, either as cultivators or agricultural labourers and the remaining 92.4 per cent are occupied in non-agricultural pursuits such as household industry workers and other workers Further the proportion of agricultural workers (cultivator + agricultural labourer) is the highest (29.8 %) in Bhulath and the lowest (2.6 %) in Hussainpur. Similarly, the proportion of workers engaged in household industry is the maximum in Dhilwan (4.8 %) and the minimum (0.3 %) in Hussainpur. As regards 'other workers', Hussainpur (97.1 %) and Bhulath (69.2 %) represent the highest and the lowest percentages.

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 shows distribution of villages according to availability of different amenities by CD blocks.

Education :

Educational amenity of some kind or the other is available to 77.8 per cent of villages in the district. It is in case of only 137 villages that this facility is not available within the village, but the same can be availed at some distance.

Among the CD blocks, in Nadala (86.8 %), Dhilwan (83.3 %) Kapurthala, (81.3 %) Phagwara (81.1 %) and Sultanpur Lodhi (65.7 %) villages have educational facility available within the village itself.

Medical :

58.1 per cent of the villages in the district are equipped with some kind of medical facility or the other. This percentage is as high as 72.6 per cent in Phagwara CD block. This apart, more than one-half of the villages in CD blocks of Nadala (62.6 %), Dhilwan (57.8 %) and Kapurthala (64.7 %) are having availability of medical facility within the village. The proportion of villages having medical facility in less than one-half of the villages is only in Sultanpur Lodhi (42.0 %) CD block.

Improved Drinking Water :

Improved drinking water which refers to availability of drinking water through tap, hand pump and tubewell is available to all the villages in the district.

Post Office :

23.3 per cent of the villages in the district have availability of post office within the village and the villagers of the remaining 76.7 per cent villages avail this facility at some distance. This percentage is as high as 42.5 per cent in Phagwara CD block. This apart, more than one-fifth of the villages in CD blocks of Dhilwan (27.8 %) and Nadala and Kapurthala (22.0 %) each have the availability of post office, Only Sultanpur Lodhi (11.6 %) CD block falls below the district average.

Telephone :

Telephone facility is available in 97.6 per cent of the villages in the district which by all means is a very high percentage. The proportion of villages having telephone facilities in CD blocks Dhilwan (98.9 %), Kapurthala (98.0 %) and Nadala (97.8 %) is above the district average whereas CD block Sultanpur Lodhi (96.7 %) fails to excel the district average.

Transport and Communication :

The villages in the district are fairly well equipped with transport and communication as 48.4 per cent of the villages have this facility. 319 (out of 618) villages are devoided of this facility and avail it at some distance. The percentage of villages availing this facility is as high as 67.0 per cent in Nadala and more than three fifth in Phagwara (65.1 %). Out of 5 CD blocks, three fall below the district average.

Banks :

Every eleventh village (9.1 %) in the district has a bank. As many as in two CD blocks the proportion of villages having banking facility falls below the district average while three CD blocks viz. Phagwara 13.2 per cent, Sultanpur Lodhi 10.5 per cent and Dhilwan 10.0 per cent are above the district average.

Agricultural Credit Societies :

22.0 per cent of the villages in the district have agricultural credit societies. Among the CD blocks it varies between 33.0 per cent villages in Phagwara and 8.9 per cent in Dhilwan. In all, three CD blocks exhibit percentage of villages with agricultural credit societies above and two below the district average.

Approach by pucca roads :

The percentage of villages approachable by pucca road in the district, as true for the state, is fairly high. In the district 85.0 per cent of the villages are approachable by pucca roads. The situation is the best in CD blocks Dhilwan (94.4 %) and Kapurthala (91.3 %), while in CD blocks Nadala (82.4 %), Phagwara (80.2 %) and Sultanpur Lodhi (79.0 %) villages are slightly less approachable through pucca roads.

Power Supply :

All the villages in the district are having power supply.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communic ations $	Banks	Agricul- tural Credit Societies	Approach by pucca road	Power supply

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 shows number and percentage of rural population served by different amenities in the district.

As regards educational facility, it is very satisfying that 97.8 per cent of the rural population in the district avail educational facility. Among the CD blocks, the proportion of population served by educational facility is the highest in Nadala (99.2 %), and the lowest in Sultanpur Lodhi (95.1%) and the other 3 CD blocks also excel the district average.

As regards medical facility, it is serving almost 4 out of 5 persons (83.6 %) of the rural population. Among the CD blocks, the proportion of population served by medical institutions is the highest in Phagwara (94.1 %) and the lowest in Sultanpur Lodhi (66.8 %). The position is fairly good in Nadala (88.2 %), Kapurthala (83.7 %) and Dhilwan (83.1 %) also where a large chunk of the rural population is enjoying these services. Out of 5 CD blocks 3 fall above and 2 below the district average.

Post offices are serving 49.3 per cent of the rural population in the district and this percentage of population varies between 68.1 per cent in Phagwara and 33.9 per cent in Sultanpur Lodhi CD blocks.

Transport and communication facility comprising bus and rail services is available to 63.1 per cent population of the district. Nadala (87.0 %) and Phagwara (84.8 %) are the two C D blocks where 4 out of 5 persons are having this facility. Beside Nadala, Dhilwan (53.8 %), Kapurthala (49.7 %) and Sultanpur Lodhi (38.6 %) C D blocks are availing this facility.

Banks cater to the needs of 23.2 per cent population. Among the 5 C D blocks, the proportion of population served by banks is the highest in Sultanpur Lodhi (29.5 %) whereas it is only 11.2 per cent in Nadala. Only three CD blocks excel the district.

41.7 per cent of people are having the facility of agricultural credit society. In this regard CD blocks Phagwara (56.3 %), Nadala (46.8 %) and. Sultanpur Lodhi (41.8 %) surpass district average.

On an average 94.0 per cent of the population in 5 CD blocks of Kapurthala district comprising Kapurthala (97.1 %), Dhilwan (97.0 %), Sultanpur Lodhi (95.7 %), Phagwara (92.0 %) and Nadala (87.7 %) is served by Pucca road.

The entire population in 5 CD blocks of Kapurthala district is served by Telephone, improved drinking water and power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 to 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	139	1	0	140
(b) Middle School	387	35	2	424
(c) Degree College	157	229	231 .	617
2. Medical:-				
(a) Hospital	193	220	187	600
(b) PHC	387	158	62	607
3. Post Office	362	112	0	474
4. Telephone	15	0	0	15
5. Bus Service	275	44	0	319
6. Banks				
(a) Commercial Bank	414	134	18	566
(b) Cooperative Bank	426	147	17	590
7. Agricultural Credit Societies	437	45	0	482

Table 39 shows distribution of villages which are not having certain amenities by distance ranges from the places where these are available.

Education :

139 villages out of 140 which do not have primary educational amenity, can avail it within a distance of 5 kms and in case of 1 village only, it is available at a distance of 5-10 kms.

424 villages in the district do not have middle school. However, among them, this facility is available within 5 kms in case of 387 villages, for 35 villages, it is available at a distance of 5-10 kms and for the remaining 2 villages, it is available at a distance of more than 10 kms.

617 villages do not have degree colleges. This is to say that only 1 village in the district has a degree college. However, this facility is available to 157 villages within a distance of 5 kms, in case of 229 villages at a distance of 5-10 kms and the remaining 231 villagers avail this facility by covering a distance of more than 10 kms.

Medical :

600 villages in the district do not have availability of hospital within the village. The same is available to 193 villages within a distance of 5 kms, 220 villages avail it at a distance of 5-10 Kms and the residents of 187 villages cover a distance of more than 10 kms to avail this facility.

Likewise out of 607 villages which do not have PHC, the same is available at a distance of less than 5 kms in respect of 387 villages, at a distance of 5-10 kms in case of 158 villages and at a distance of more than 10 kms to 62 villages.

Post office :

Among the 474 villages in the district which do not have the post office, the same is available to 362 villages within a distance of 5 kms and at a distance of 5-10 Kms in case of another 112 villages.

Telephone :

The district is well equipped with this facility as barely 15 (out of 618) villages do not have this facility and the same is available within a distance of 5 kms.

Bus Service :

There are 319 villages which do not have bus service available to them in the village. The same is available to 275 villages within a distance of 5 kms and 44 villages avail it at a distance of 5-10 Kms.

Bank :

Rural banking seems to be lacking in the district. Commercial banking within the village is not available in 566 villages. Among them 414 villages avail this facility at a distance of less than 5 kms. In case of 134 villages it is available at a distance of 5-10 kms and for the remaining 18, the villagers travel a distance of over 10 kms to avail this amenity.

Likewise, Co-operative banking facility is not available in 590 villages. Among them 426 villages avail it within a distance of 5 kms, in case of 147 villages it is available at a distance of 5-10 kms and for the remaining 17, the villagers travel a distance of over 10 kms to avail this amenity.

Agricultural Credit Societies :

Out of 482 villages which are not having Agricultural Credit Societies, 437 can avail this facility within a distance of 5 Kms and for 45 villages; it is available at a distance of 5-10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport commun-ications $	Banks	Agricultural Credit Societies	Approach by pucca road

	(100.0)	**(77.8)**	**(58.1)**	**(23.3)**	**(97.6)**	**(48.4)**	**(9.1)**	**(22.0)**	**(85.0)**

Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows that 105 villages in the district are located within a distance of 5 kms, 466 villages in the distance range of 5-15 Kms and 47 villages are located within 16-50 Kms from the nearest statutory town. None of the villages falls in the distance range of 51+.

Maximum number of villages (466) fall in the distance range of 5-15 Kms and among them educational facility is available to 352 (75.5 %) villages, medical facility is available to 263(56.4%) villages, post office to 114(24.5%) villages, 453(97.2%) villages have availability of telephone, 214 (45.9%) villages have availability of transport communications, 46 (9.9%) villages have banks, 101 (21.7%) villages have agricultural credit societies and 396(85.0 %) villages are connected by pucca road.

The other important range of less than 5 kms. consists of 105 villages and out of these 91 (86.7%) avail education, 71 (67.6%) medical, 19(18.1%) post office, 104(99.0 %) telephone, 59 (56.2%) transport and communication and 94 (89.5%) approach by pucca road facilities. Surprisingly the facilities of Post office, banks and agricultural societies are availed by less than 25.0 per cent villages only.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 presents distribution of villages by population ranges and amenities available.

Out of 618 villages, 286 villages have a population of less than 500, 164 fall in size class 500-999, 110 have population in the range of 1,000-1999, 53 are in the range of 2,000-4999, 5 villages comprise the size class 5,000-9,999. None of the villages in the district has population 10,000 and above.

Educational facility is available to 481(77.8 %) villages under various size classes. Barring size classes 1-499 where out of 286 villages, 149 (52.1 %) villages have this facility, villages in rest of the population ranges have cent per cent education facility.

Medical facility is available to all the 58 villages having population of 2000 or more. Among others, this facility is available to 87 (30.4%) villages in the range of 1-499, 115 (70.1%) villages in the range of 500-999 and 99 (90.0%) villages with population range of 1,000-1,999.

Post office is available in 3(60.0 %) villages having population of 5,000 or more. Among others, this facility is available to 8(2.8 %) villages in size class 1-499, 29(17.7 %) villages with population 500-999, 59(53.6 %) villages with population 1,000-1,999, and 45 (84.9 %) villages in size class 2,000-4,999.

All the villages under size classes 500-999, 1,000-1,999, 2,000-4,999, 5,000-9,999 and 10,000+ and 271(94.8 %) villages in size class 1-499 have availability of telephone facility. In other words, cent per cent of the villages with population 500 and more have availability of telephone.

Transport and communication is available to 94 (32.9%) villages under size class1-499, 90 (54.9%) villages under size class 500-999, 71 (64.5%) villages under size class 1000-1999, 41 (77.4%) villages under size class 2,000-4,999 and 3 (60.9%) villages under size class 5,000-9,999.

Availability of banks is predominantly the characteristic of larger villages. Likewise, 3 (1.0%) villages in size class 1-499, 8 (4.9%) villages in size class 500-999, 20 (18.2%) villages with population in the range of 1,000-1,999, 23 (43.4%) villages with population in the range of 2,000-4,999 and 2 (40.0%) villages with population in the range of 5000-9999 have the availability of banks.

Agricultural credit societies are available in 4 (80.0%) villages under population size 5000+. It is also available to 58.5 per cent of villages with population 2000-4999, 43.6 per cent villages in size class 1,000- 1,999, 21.3 per cent villages having population in size class 500-999 and 6.3 per cent villages with population below 500.

Only 525 (85.0%) out of 618 villages are approachable by pucca road in the district comprising 206 (72.0%) in the range of 1-499,158 (96.3%) in the range of 500-999, 107 (97.3%) in the range of 1000-1999, 49 (92.5%) in the range of 2000-4999 and cent per cent in the range of 5000 +.

All the villages in the district have the availability of drinking water and power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Nadala	91	19,368	98.4	99.6
2	Dhilwan	90	23,843	82.0	98.6
3	Kapurthala	150	36,039	80.8	96.7
4	Sultanpur Lodhi	181	41,143	88.8	97.7
5	Phagwara	106	28,473	85.7	97.8
	District Total:	**618**	**148,866**	**86.4**	**97.9**

Note : - Cultivable area = irrigated area + unirrigated area

CD blockwise villages, according to land use are given in Table 42. Sultanpur Lodhi CD block (41,143 hectares) is the largest in area and is more than twice than that of Nadala (19,368 hectares) which is the smallest in area. In the district 86.4 per cent of the area is cultivable and among the CD blocks this percentage varies between 98.4 per cent in Nadala and 80.8 per cent in Kapurthala. Two out of 5 CD blocks have percentage of cultivable area greater than that of the district.

97.9% of the cultivable area in the district is irrigated. All the CD blocks have fairly high proportion of their cultivable area under irrigation and this percentage varies between 99.6 per cent in Nadala and 96.7 per cent in Kapurthala.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administ-ration	Public health and convenien-ces	Public works	Public institutions	Other (s)
1	2	3	4	5	6	7	8	9	10	11
1	V Begowal (N.P.)	489.2	44.1	445.2	449.0	42.1	16 7	314.5	0 0	75.7
2	IV Bhulath (N.P.)	456.7	392 9	63.8	473.9	56.8	42.1	260 6	27 4	87.0
3	V Dhilwan (N.P.)	367.6	154.0	213 6	354.9	38.6	0.0	281.8	7 4	27 1
4	V Hussainpur (C.T.)	0.0	0.0	0.0	0.0	0.0	0 0	0 0	0 0	0 0
5	II Kapurthala (M.Cl.)	615.7	568.1	47.5	649.1	119.1	272.9	122.9	0 0	134 3
6	II Phagwara (M.Cl.)	546.1	527 3	18 8	542.6	14 7	110 9	248.6	0 0	168 4
7	IV Sultanpur Lodhi (M.Cl.)	521.4	403 8	117.5	535.1	245.5	156.1	103.1	0.0	30.4
	District Total	**523.1**	**464.5**	**58.6**	**532.9**	**68.2**	**153.1**	**184.4**	**1.4**	**125.8**

Table 43 shows per capita receipt and expenditure incurred on all the statutory towns in the district. The per capita receipt in the district is Rs 523.1 out of which Rs 464.5 comes through taxes and Rs 58.6 through all other sources. The per capita receipt is as high as Rs 615.7 in Kapurthala and as low as Rs 367.6 in Dhilwan.

As against the per capita receipt of Rs 523.1, the district is incurring per capita expenditure of Rs 532.9. The per capita expenditure on general administration is to the extent of Rs. 68.2, on Public health and conveniences Rs 153.1, public works Rs. 184.4 and Per capita expenditure on public institutions is only Rs. 1.4, while it is Rs. 125.8 for all other types of activities. As usual per capita expenditure exceeds per capita receipts in Bhulath, Kapurthala and Sultanpur Lodhi as well as in the district as a whole.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

7	Sultanpur Lodhi (.M.Cl.)	2.6	2.6	2.6	1.3	1.3
	District Total	**2.2**	**1.9**	**1.6**	**1.1**	**0.4**

Table 44 shows number of schools/colleges per 10,000 of population for towns. In the district there are 2.2 primary schools, 1.9 junior secondary/middle schools, 1.6 secondary/matriculation schools, 1.1 senior secondary schools and 0.4 colleges per 10,000 population. In other words, there is a primary school for a population of 4,545, junior secondary/middle school for 5,263 persons and secondary/matriculation school for 6,250 persons, senior secondary school for 9,091 population and a college for a population of 25,000.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Begowal(N.P.)	42
2	Bhulath (N.P.)	10
3	Dhilwan(N.P.)	23
4	Hussainpur(C.T.)	65
5	Kapurthala(M.Cl.)	17
6	Phagwara (M.Cl.)	15
7	Sultanpur Lodhi(M.Cl.)	42
	District Total	**19**

Table 45 shows number of beds in medical institutions in towns per 10,000 of population. The district on an average has 19 beds per 10,000 of population. Among the towns, Hussainpur has 65 beds per 10,000 population and this is the highest among all the towns and Bhulath has 10 beds per 10,000 population and this is the lowest among all the towns in the district. Besides Hussainpur, Sultanpur Lodhi and Begowal (42 each), and Dhilwan (23) are the other towns which have more beds per 10,000 population than that of the district average. Phagwara (15) is the only town having beds below the district average.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Kapurthala	85,686	25,077	29.3
2	Phagwara	102,253	2,552	2.5
	District Total	**187,939**	**27,629**	**14.7**

Table 46 shows proportion of slum population living in statutory towns in the district. Kapurthala and Phagwara are the two towns, which have reported slum population. In absolute terms 27,629 persons are living in slums which account for 14.7 per cent of the total urban population of the two towns. Kapurthala town has reported 29.3 per cent of its population living in slum area while it is just 2.5 per cent in Phagwara town.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Begowal (N.P.)	Steel Almirah	Steel Almirah
		Air Cooler Bodies	Air Cooler Bodies
		Burnt Bricks	Burnt Bricks
2	Bhulath (N.P.)	Wooden Furniture	Wheat
		Agricultural Fans	Rice
			Paddy
3	Dhilwan (N.P.)		Wheat
			Paddy
			Sugarcane
4	Hussainpur (C.T.)	A.C.Coaches (Indian Techno.)	A.C.Coach(Indian Techno.)
		A.C.Coaches (German Techno)	A.C.Coach(German Tech.)
		General Coaches	General Coaches

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001 - *concld.....*

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
5	Kapurthala (M.Cl.)	Cattle Feed	Rice
		Rubber Belting	Rubber Belting
		Electric Goods	Electric Goods
6	Phagwara (M.Cl.)	Oil Engine Parts	Oil Engine Parts
		Sugar	Sugar
		Cotton Cloth	Cotton Cloth
7	Sultanpur Lodhi (M.Cl.)	Generator Sets	Electric Motor Generators
		Electric Motors	Asbestos Sheets
		Agricultural Implements	Rice

Table 47 shows most important commodities manufactured in the towns and exported out.

Generally speaking, each town has its own characteristic as is revealed by this table. Manufacturing of A.C.Coaches (Indian Techno.), A.C.Coaches (German Techno) and General Coaches in Hussainpur, Steel Almirah and air cooler bodies in Begowal, Generator Sets and Electric Motors and Agricultural Implements in Sultanpur Lodhi towns. Burnt Bricks in Begowal, Cattle Feed, Rubber Belting and Electric Goods in Kapurthala, and Sugar and Cotton Cloth in Phagwara.

Besides the agriculture-oriented products, Electric goods and Electric Motor Generators, Rubber Belting and Air Cooler Bodies are the other key items exported from the towns of the district.

(x) Brief Analysis Based on Houses and Household Amenities

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data Source: Census of India 2001, H– Series: "Tables on Houses, Household amenities and Assets".

117,380 households in the district are living in houses owned by them, 13,862 in rented houses and 3,769 in houses with tenure status 'others' i.e. neither owned nor rented. This reflects that 86.9 per cent of the households are living in owned houses, 10.3 per cent in rented houses and remaining 2.8 per cent in 'others'.

Among the households living in owned houses, 22,214 (18.9%) have one room, 34,811(29.7%) have two rooms, 27,284 (23.2%) have three rooms and 32,599 (27.8%) have more than three rooms. This reveals that the majority of the owned houses have two or more rooms. Interestingly 472(0.4%) of the households living in owned houses do not have any exclusive room.

By and large a similar pattern is observed both for rural and urban areas. In rural areas 20.2 per cent of households are living in owned houses having one room; 30.3 per cent in 2 rooms, 22.9 per cent have 3 rooms, and 26.3 per cent have more than 3 rooms; the corresponding percentages for urban areas are 15.7, 28.0, 24.1 and 31.6 per cent respectively. Further more, 0.3 per cent of rural households and 0.6 per cent of urban households are residing in owned houses which do not have any exclusive room.

Among the Scheduled Castes, 0.4 per cent have no exclusive room, 30.8 per cent are residing in owned houses with one room, 36.6 per cent have two rooms, 18.6 per cent have three rooms and 13.6 per cent in houses with more than 3 rooms.

TABLE 49 PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT ,SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sr No.	District/Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temp-orary	Permanent	Semi-permanent	Temp-orary	Perma-nent	Semi-permanent	Temp-orary
1	2	3	4	5	6	7	8	9	10	11
	Kapurthala District	**126,477 (100.0)**	**5,986 (100.0)**	**2,540 (100.0)**	**83,501 (100.0)**	**3,821 (100.0)**	**1,915 (100.0)**	**42,976 (100.0)**	**2,165 (100.0)**	**625 (100.0)**
1	Bhulath	18,088 (14.3)	695 (11.6)	212 (8.3)	14,401 (17.2)	648 (16.9)	141 (7.4)	3,687 (8.6)	47 (8.6)	71 (8.6)
2	Kapurthala	51,183 (40.5)	2,554 (42.7)	949 (37.4)	33,003 (39.5)	1,631 (42.7)	703 (36.7)	18,180 (42.3)	923 (42.3)	246 (42.3)
3	Sultanpur Lodhi	17,211 (13.6)	698 (11.6)	1,038 (40.9)	14,670 (17.6)	485 (12.7)	976 (51.0)	2,541 (5.9)	213 (5.9)	62 (5.9)
4	Phagwara	39,995 (31.6)	2,039 (34.1)	341 (13.4)	21,427 (25.7)	1,057 (27.7)	95 (4.9)	18,568 (43.2)	982 (43.2)	246 (43.2)

This table shows percentage distribution of households by tahsil living in permanent, semi permanent and temporary houses. Out of 126,477 households living in permanent houses in the district, 14.3 per cent are in Bhulath, 40.5 per cent in Kapurthala, 13.6 per cent in Sultanpur Lodhi and 31.6 per cent in Phagwara tahsils. The percentage share of households living in semi-permanent houses of the district shows a variation of 42.7 per cent in Kapurthala and 11.6 per cent in Bhulath. There are 2,540 households living in temporary houses and they make 2.0 per cent of the total households. Kapurthala and Sultanpur Lodhi constitute 37.4 and 40.9 per cent of the households living in temporary houses in the district respectively and the share of remaining tahsils is Bhulath (8.3 %) and Phagwara (13.4 %).

Out of the total households living in permanent houses, 83,501(66.0%) are in rural areas and 42,976 (34.0%) in urban areas. Likewise percentage of households living in semi-permanent houses in rural and urban areas is 63.8 and 36.2 per cent respectively. Among households living in temporary houses 1915 (75.4%) are in rural and 625 (24.6%) in urban. Surprisingly, 51.0 per cent of the temporary households are living in Sultanpur Lodhi tahsil alone in rural.

Data source: Census of India 2001, II-Series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

Table 50 shows proportion of households having improved drinking water source, electricity, bathroom, toilet and drainage connectivity.

Improved drinking water :

Households having tap, handpump, and tubewell as the source are grouped as having improved drinking water facility. In the district it is available to 99.1 per cent of the households, the corresponding figures for the rural and urban areas being 98.7 and 99.8 per cent respectively. The trends are, by and large, the same among the tahsils in the district.

Electricity :

Electricity as the source of light is available to 95.2 per cent of the households in the district; the corresponding figures for rural and urban areas are 93.9 and 97.7 per cent respectively signifying that the rural areas do not lag much behind their urban counterparts. The trends are, by and large, the same for all the tahsils barring Sultanpur Lodhi where 90.6 per cent of the households have electricity and this percentage is significantly lower in rural parts (89.4%) compared with the urban (97.5%).

Bathroom :

Bathroom is available to nearly three-fourth (70.1%) of the households in the district. Even in rural areas this facility is available to 62.8 per cent of the households compared with 84.4 per cent of the urban households.

Among the tahsils, Phagwara with 80.4 per cent of the households having this facility ranks at the highest and Sultanpur Lodhi (55.1%) is at the tail.

Toilet :

Little more than one-half of the households (52.7%) have toilet facility available to them. Among the tahsils this percentage varies between 63.1 per cent in Phagwara and 37.4 per cent in Sultanpur Lodhi.Besides Phagwara , Kapurthala (53.0%) is the other tahsil showing percentage higher than the district as such.

36.0 per cent of the households in rural areas are equipped with toilet facility as compared to 85.4 per cent in urban areas. Here too, Phagwara tahsil (41.8%) ranks the highest and Sultanpur Lodhi (29.0%) the lowest in rural and Phagwara tahsil (87.4%) ranks the highest and Bhulath (58.40%) the lowest in urban areas.

Drainge :

Drainage connectivity is available to 91.9 per cent households in the district. Within tahsils it is available to 96.5 per cent households in Bhulath and to 87.1 per cent in Sultanpur Lodhi.

Data Source: Census of India 2001, II– Series: "Tables on Houses, Household amenities and Assets".

The Caption of Table No. 51 shows the type of fuel used for cooking by households.

Cooking gas (LPG) is the most dominant fuel used for cooking in the district as it is being used by 45.6 per cent of the households. This percentage is as high as 49.7 per cent in Kapurthala tahsil. In urban areas 69.6 per cent of households are using Cooking gas (LPG) and this percentage is more than double that of the rural (33.3%).

In Sultanpur Lodhi tahsil only 30.4 per cent households are using LPG for cooking. The urbanities are more privileged than the ruralities.

The use of Cowdung Cake is also fairly high as it is being used by 22.9 per cent of the total households in the district.

Firewood is the third largest fuel being used for cooking. In the district almost every sixth household (15.7%) is using firewood; the corresponding percentage for rural and urban areas is 19.9 and 7.5 per cent respectively. The use of firewood as fuel for cooking in rural areas is more than the urban in all the tahsils barring Bhulath where 13.6 per cent of the urban households are using firewood compared with 12.4 per cent among rural household, reason being, Begowal (NP)and Bhulath (NP) are newly formed towns which used to be a part of rural area a late.

Among the other fuels being used, only kerosene (7.8%) and crop residue (6.8%) are worth mentioning. The use of coal, electricity and biogas is minimum.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET

Sr. No.	District/ Tahsil	Total/ Rural/ Urban	Total number of house-holds	Total number of households availing banking service	Availability of assets

Data Source: Census of India 2001, II– Series: "Tables on Houses, Household amenities and Assets".

Out of 135,011 households in the district, 86,142 (63.8%) are availing banking services; 69,657 (51.6%) have Radio Transistor; 105,066 (77.8%) have television; 22,770 (16.9%) have telephone; 102,926 (76.2%) have bicycle; 51,613 (38.2%) have scooter, motorcycle, moped and 8,604 (6.4%) have car/ jeep/van. The over all scenario of availability of assets in the district can be graded as fairly good. Nevertheless, 9,249(6.9%) of the households have none of these assets available to them. By and large the same trend is noticed among all the tahsils with slight variations in different assets such as Bhulath leads in availability of television (83.5 %), Kapurthala also in Television (76.7%), Sultanpur Lodhi in Bicycle (76.6%) and Phagwara again in television (80.5%).

(xi) Places of tourist, religious, historical or archeological importance

Chak Hakim :

It is located at a distance of 3 kms. from Phagwara on Phagwara - Jalandhar road on the National Highway No. 1. There is a temple, dedicated to Guru Ravidas built in 1988. Two fairs are held here, one on the 1st and 2nd Asarh every year and the second on the birthday of Guru Ravidas, which is attended by a large number of people from far and near.

Darweshpind :

It is situated at a distance of 7 kms. from Phagwara on the Phagwara- Nakodar road. There is an old tomb of Pir Jumme Shah. People make offerings and light oil-lamps on every Thursday. A fair is held annually on 25-26 Jyaistha in the memory of the Pir. Qwalis are recited on this occasion. Besides the tomb, there is an old tank and a mosque in dilapidated condition.

Dhilwan :

It is situated at a distance of 17 kms. from Kapurthala on Kapurthala Surakpur –Nadala road.It is 1.5 kms. from the Sher Shah Suri Marg. It is also a railway station on the Jalandhar-Amritsar railway

line. There are a tomb of Baba Lahori Shah and a smadh of Baba Brahm Dass Bairagi, both of whom were disciples of the same saint. They are said to have come from Jagraon tahsil of district Ludhiana and started meditating here and persuaded the people to settle in the village.In the memory of Baba Brahm Dass Bairagi, a big fair is held on the Samadh on every Baisakhi and another fair is also held in the month of June on the tomb of Baba Lahori Shah.

Dumeli :

It is situated at a distance of 19 kms. from Phagwara on Phagwara-Hoshiarpur road and is connected by a link road from Rihana Jattan. It has a historical gurudwara known as Tham Sahib, associated with Guru Hargobind. It is said that the guru, while on his way from Kartarpur to Kiratpur, stayed here for the night. During his stay the villagers narrated their tale of woes as their house and belongings used to catch fire under a curse from a saint. The Guru installed a pillar of wood (tham) to counter the curse at the place of gurudwara and said that, thereafter, everything would be safe. A fair is held here on 6-7 Bhadra (August-September), the days during which the guru stayed here. Besides, there is also a Dera in the memory of Sant Baba Dalip Singh on the outskirts of the village. Music is taught in the Dera.. A fair is held here on 6 Bhadra (August-September) on the death anniversary of Baba Dalip Singh in the Dera.

Kala Sanghia :

It is situated at a distance of 16 kms. from Kapurthala on the Kapurthala-Nakodar road. Outside the village at a distance of 2 kms. there is a historical gurudwara known as Tami Sahib, built in the memory of Guru Hargobind, who visited this place. A disciple brought bers as offering to the Guru who distributed these among the followers and then seeds were thrown hither and thither (tawin tawin). Hence, the gurudwara was named as Tawin Sahib. Later on, it was renamed Tami Sahib. A fair is held here on the 1st of Asadha (June-July) on the birth anniversary of the Guru. Besides, at a distance of 3 kms. from Gurudwara Tami Sahib, there is Gurudwara Ber Sahib at village Kesarpur. The legend goes that the Guru rested here under a ber tree and tethered his horse to it. The people complained that the tree did not grow. The Guru said that it would grow but their village would not. The prophecy proved true. A fair is held here on 27th of Bhadra (August-September) every year.

Kapurthala :

Kapurthala was the capital of the princely State of the same name till August 1948, when on the latter's merger with the newly formed PEPSU (Patiala and East Punjab States Union), the town became the headquarters of Kapurthala district. It is said to have been founded in the early part of the eleventh century, in the times of Sultan Mahmud of Ghazni by Rana Kapur, the mythical ancestor of the Ahluwalia family and a cadet of the royal Rajput house of Jaisalmer (Rajasthan). It is a well-planned town having total population 85,686 as per census 2001 and area 56.0 sq. kms. and beautifully laid out gardens now suffering from neglect. The historical Baradari (built in 1820) is located in Shalamar garden. The Panj Mandir (built in 1831), the State Gurudwara (built in 1915) and the Moorish Mosque near the railway station (built in 1930) bear testimony to the liberal outlook of the rulers. Other places of interest in the town are the war memorial (built in recognition of the services of the soldiers from the Kapurthala State in the World War I) opposite the Moorish Mosque, the clock tower, the Jubilee Hall and Sainik School.

Kanjli :

It is situated on the bank of the Black Bein at a distance of 5 kms. from Kapurthala on the Kapurthala-Subhanpur road and is a popular picnic spot. The lake which is an extension of the Bein is embedded by beautiful natural surroundings. The place has been developed into a beautiful tourist resort. Arrangement of boating exists for the tourists. Hundreds of visitors throng this picnic spot on week-ends.

Khati :

It is located on a mound, 5 kms. from Phagwara on the Phagwara-Hoshiarpur road. There is a small temple of great antiquity dedicated to Bhagwan Parshu Ram whose name is mentioned in the Purans. He is said to have meditated at this spot. An annual fair is held here.

Phagwara :

Founded in the reign of Emperor Shah Jahan (1627-1658), it was held by Hindu Jats until Maharaja Ranjit singh captured it in 1804. It has population of 102,253 and area 16.0 sq. kms. as per census 2001.

In the interior of the town, there is Gurudwara Chaura Khuh built in the memory of guru Hargobind. It is said that the guru killed Pande Khan, the Pathan at Kartarpur (district Jalandhar). The Pathans pursued him up to Phagwara where he wanted to take refuge. The citizens of Phagwara, however, refused shelter at this place where now Gurudwara Chaura Khuh stands.

About 3 kms. from Phagwara, there is a historical Gurudwara Sukhchainan Sahib also built in the memory of the Guru Hargobind. When the citizens of Phagwara refused to give him shelter, the Guru had to take refuge at this place. The place is consequently named Sukh-Chain-Ana Sahib (place of relief and rest). A sarover (tank) is also attached to the gurudwara. A fair is held here on every Amavas. On the Phagwara-Banga road, there is a Vishavkarma temple. A fair is held here on Vishavkarma day, a day after Diwali. At Hadiabad, there is a gurudwara on the Phagwara-Nakodar raod built in the memory of Guru Hargobind and Mansa Devi mandir (also known as Jawala ji Mandir).

Saiflabad :

The village of Saiflabad is linked with Kapurthala by kapurthala-Fattu Dhinga road and Kapurthala-Dhilwan-Saiflabad road. It is 13 kms. from Kapurthala and 14 kms. from Dhilwan. It is said that while the Guru was staying at Kartarpur, the people of the area approached him and told him about the tiger who had become a menace in the area. On their request, the Guru hunted the tiger. A gurudwara was erected at the place where the tiger was killed. A sarover (tank) is also attached to the gurudwara. A fair is held here on every Amavas.

Sultanpur :

Falling in Sultanpur Lodhi tahsil, this small but ancient town was earlier known as Surnama.Its population as per census 2001, is 15,571 and area is 10.5 sq. kms. Sultan Khan Lodhi, a Faujdar of Sultan Mahmud of ghazni (A.D. 1000-1030 renamed it as Sultanpur Lodhi. During the reign of Sultan Sikandar Lodhi (A.D. 1418-1517), the Nawab of Lahore, Daulat Khan Lodhi, found the place pleasant and, attracted by its scenic beauty, preserved its surroundings as a hunting ground and settled people in the town. It was once the chief town in the Jalandhar Doab and remained so being on the imperial highway between Delhi and Lohare, till the time of the invasion of India by Nadir Shah in 1739 who sacked and burnt the town and thereafter it never regained its past glory. Aurangzeb and his brother Dara are said to have received their early education here. The ruins of an old bridge over the Bein at the back of Gurudwara Ber Sahib, said to have been constructed in the time of Sher Shah Suri (1540-1555), still remains.

(xii) Scope of Village and Town Directory

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities,

communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

Town Directory :

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV- A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc. Hence the data for the towns of Kapurthala has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of Kapurthala District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class, name Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns of Kapurhtala District. The income and expenditure for the towns of Kapurthala have been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the scheduled castes/scheduled tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

Statement V gives information regarding medical, educational, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Kapurthala which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from towns and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Town. Information on number of banks available in the town has been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII shows the civic amenities available to all the 2 towns having slums falling in the jurisdiction of Kapurthala District.

Part - A
VILLAGE AND TOWN DIRECTORY

Section-I
Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The Village Directory format has 25 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number :

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village :

The name and location code number of the village is shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village :

The area of the villages in hectares is given. Wherever the area figures were not furnished by the concerned department, the column is left blank.

Column 4 : Total population :

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households :

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational :

Classes upto class V are included in Primary School comprising nursery school, kindergarten school, Pre-basic school, pre-primary school and junior basic school.

Classes from VI to VIII are included in the middle school.

Classes from IX and X are included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr.
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M (4), etc.

Column 7 : Medical :

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water :

The type of drinking water supply sources available within the village is indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP

(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone :

It is indicated by following codes :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks :

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available within the village, distance of the nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies :

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given.

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities:

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in these columns. If not available, the particulars of the nearest place with the facility exists is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications :

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways, they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village :

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance :

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply :

Availability of Power Supply in the village, whatever may be the form of its use, is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine :

If village receives any News Paper/Magazine the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured :

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use :

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare (s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW

(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A and B The appendices show the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates CD Block wise number of villages.

Appendix-IX Shows number of different types of girls schools in a village.

Section-II
Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Contonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT
	Others columns need no comments.	

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects :

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 & 8 :

Name or the State headquarters, District headquarters and Tahsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory :

Column 6 : Road length (in kms.) :

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage :

Generally, sewerage system is implied by the net-work of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines :

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil :

The various prevalent methods of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt

Sewerage	S
Others	O

Column 13 and 14 : Water supply :

Source and capacity of storage system. The following codes are used in these columns :

Column 13 :

(i) Tap water	T
(ii) Tube-well water	TW
(iii) Tank Water	TK
(iv) Well water	W

Column 14 :

(v) Over Head Tank	OHT
(vi) Service Reservoir	SR
(vii) River Infiltration Gallery	RIG
(viii) Bore Well Pumping System	BWP
(ix) Pressure Tank	PT

The information on major sources of water supply is given in column 13 and the storage capacity against each in kilo-litres (in bracket) is presented in column 14.

Column 15 : Fire Fighting Service :

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections) :

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, they may be treated as independent units and counted separately using following codes :

(i) Hospital	H
(ii) Dispensary	D
(iii) Health Centre	HC
(iv) Family Welfare Centre	FWC
(v) T.B. Clinic	TB
(vi) Nursing Home	NH
(vii) Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes :

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institutes	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like-Applied Art/Painting college, Pharmacy college, B.Ed. College. Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/ Intermediate/ Senior Secondary/ PUC/ Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle schools or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres :

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats :

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities :

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms:

Number of public libraries and reading rooms available in the referent town is recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded in these columns.

Column 9 : Number of Banks :

Number of Banks available in the referent town both Commercial and Co-operative banks is recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies:

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town is recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting from October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices

which were specially set up for this purpose. The individual Scheduled Caste and the Scheduled Tribe population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Caste/Tribe returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribe at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes and Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts, Cities and Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main

workers were presented into four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/CD Block/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4. Village Primary Census Abstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of Tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration, block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure-I

Number of villages under Gram Panchayat :

With the Constitution (73rd amendment) Act, 1992, the Census Organisation felt it necessary to provide population data for the territorial area of Panchayat. This required precise details of the territorial area of each Panchayat so that delineation of enumeration blocks (EBs) to be allotted to the enumerators could be done to meet this requirement.

It required careful delineation of enumeration blocks by the Charge Officers to ensure that EBs do not cut across the territorial area falling in the Panchayat. Different situations were well perceived. A Panchayat could consist of only one village or a number of complete villages. There could be another situation where the Panchayat may consist of some complete villages and parts of villages. Still there could be another situation where Panchayat could consist of a number of villages etc.

An exhaustive exercise was done to prepare Panchayat level data. However, we came across following types of situations which made it difficult to compile the Panchayat level data:

i) Some of the Panchayats have one or more than one village.

ii) Some of the Panchayats have only a part of the village.

iii) Some Panchayats include full village (s) as well as part of village (s).

All this has not made it feasible for us to present Panchayat level PCA.

Annexure-II

Fertility and Child Mortality :

The following table shows age specific fertility rates in Punjab as well as in Kapurthala district for the years 2001 and 1991. The trends observed are almost identical both for the State and the district for 2001. Among different age groups the fertility rate is the highest in age-groups 20-24, 25-29 and 30-34. The trend is the same for rural and urban areas also.

The trends also show some fall in the fertility levels during 1991 and 2001 and this decline is noticeable in all age-groups except 25-29, 40-44 and 45-49 in the state. In district Kapurthala, the fertility rate plunged in first four age groups and shot up in other three.

AGE SPECIFIC FERTILITY RATES 2001 AND 1991

Age Group	Kapurthala						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991

The following table shows age specific marital fertility rates in Punjab as well as in Kapurthala district for the year 2001 and 1991. The trends observed are similar to those of total fertility levels, although the decline in marital fertility levels is at a relatively lower pace. ASMFR is amazingly higher in rural as compared to urban in Kapurthala district in all age groups for the years 1991 and 2001.

AGE SPECIFIC MARITAL FERTILITY RATES 2001 AND 1991

Annexure-III

Measures of Fertility and Mean Age At Marriage Fertility Levels :

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally is assessed by relating number of births to size of some section of the population, such as number of married couples and number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever married women and the last question was related to currently married women only. The measures of fertility worked out are based on the F-Series Tables of 1991 & 2001 Census pertaining to Punjab State.

The following table presents important indices of fertility in Punjab as well as in Kaputhala district for the years 2001 and 1991 separately for total, rural and urban areas. There has been significant decline in the number of children ever born per ever married woman in the age group (45-49); the decline is relatively more in rural areas than urban in Punjab. Likewise there has been a significant decline in the child-women ratio also. However, the number of married couples per 1,000 of population has gone up both in the state and district in rural it is vice-versa for urban areas.

IMPORTANT INDICES OF FERTILITY

Fertility indices	Kapurthala						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991

Annexure IV

MOVEMENT OF POPULATION

What is migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence, if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International Migration :

The migrational movements are of three types- (i) Migration within the State itself with its components-(a) Migration within the district of enumeration (intra-district migration), (b) Migration from one district of the state to another district of the State/UT (inter-district migration), (ii) Migration from one State to another state of the country (inter-state migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why the people migrate ?

For the first time in the census, reasons for migration were elicited in 1981. Keeping operational constraints in view, the reasons for migration were broadly categorized as (1) employment, (2) education, (3) marriage, (4) family movement and (5) other reasons. Other Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration :

The growth of population of a particular place depends upon the biological variates such as mortality and fertility and migration. The knowledge of trends in migration helps in future planning of a place.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF BIRTH

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Migrants born within the state of enumeration	182,969	44,410	138,559	240,483	69,177	171,306
	(75.7)	(57.3)	(84.4)	(78.9)	(65.7)	(85.9)
(i) Migrants born else where in the district of	62,595	15,710	46,885	107,965	39,333	68,632
enumeration	(25.9)	(20.3)	(28.5)	(35.4)	(37.4)	(34.4)
(ii) Migrants born in other districts of the State	120,374	28,700	91,674	132,518	29,844	102,674
	(49.8)	(37.0)	(55.8)	(43.5)	(28.4)	(51.5)
(II) Migrants born in other states of India	32,907	18,697	14,210	47,400	26,959	20,441
	(13.6)	(24.1)	(8.7)	(15.6)	(25.6)	(10.2)
(III) Migrants born in other countries	24,983	14,113	10,870	16,839	9,124	7,715
	(10.3)	(18.2)	(6.6)	(5.5)	(8.7)	(3.9)
(IV) Unclassifiable	870	250	620	0	0	0
	(0.4)	(0.3)	(0.4)	(0.0)	(0.0)	(0.0)
Total Migrants	**241,729**	**77,470**	**164,259**	**304,722**	**105,260**	**199,462**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

The above table gives distribution of inmigrants by place of birth in Kapurthala district as per 1991 and 2001 Censuses. Out of the total immigrants in 2001, 78.9 per cent are born

within the state of enumeration and 15.6 per cent are born in other states/Union Territories of India while 5.5 per cent are born in other country. The figures for 1991 are 75.7 per cent, 13.6 per cent and 10.3 per cent respectively.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF LAST RESIDENCE

Last residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Last residence within the state of enumeration	188,169	46,640	141,529	248,333	71,873	176,460
	(77.7)	(60.0)	(86.0)	(80.3)	(67.3)	(87.1)
(i) Elsewhere in the district of enumeration	67,015	17,460	49,555	114,921	41,701	73,220
	(27.7)	(22.5)	(30.1)	(37.1)	(39.1)	(36.1)
(ii) In other districts of the state of enumeration	121,154	29,180	91,974	133,412	30,172	103,240
	(50.0)	(37.6)	(55.9)	(43.1)	(28.3)	(50.9)
(II) States in India beyond the state of enumeration	32,717	18,677	14,040	47,024	26,658	20,366
	(13.5)	(24.0)	(8.5)	(15.2)	(25.0)	(10.0)
(III) Last residence outside India	20,543	12,113	8,430	14,083	8,207	5,876
	(8.5)	(15.6)	(5.1)	(4.6)	(7.7)	(2.9)
(IV) Unclassifiable	900	270	630	0	0	0
	(0.4)	(0.4)	(0.4)	(0.0)	(0.0)	(0.0)
Total	**242,329**	**77,700**	**164,629**	**309,440**	**106,738**	**202,702**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

The above table gives distribution of inmigrants by place of last residence in Kapurthala district. As per 2001 Census. 80.3 per cent of the inmigrants had the place of last residence within the state but out of the place of enumeration. Another 15.2 per cent have place of last residence in other states/UTs within the country, while 4.6 per cent have their last residence out side India. The corresponding figures for 1991 are 77.7 per cent, 13.5 per cent and 8.5 per cent respectively.

Annexure V

Main Religions :

The instructions for recording this information are the same as in 1991. A brief analysis based on 1991 and 2001 Census data is presented below.

Question 7 of the Household Scheduled canvassed at the 2001 census pertained to religion of a person. The religion of the person was recorded as returned by the respondent. The six main religions in the country were recorded by using following codes:

Hindu	:	1
Muslim	:	2
Christian	:	3
Sikh	:	4
Buddhist	:	5
Jain	:	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Religious Composition of Punjab's Population:

The numerical strength of the six main religious communities in the State and Kapurthala district for 2001 Census is as follows :

RELIGIOUS COMPOSITION OF POPULATION, PUNJAB AND KAPURTHALA 1991 AND 2001

Religious Communities	Punjab				Kapurthala district			
	Total Population		Percentage in total population		Total Population		Percentage in total population	
	1991	2001	1991	2001	1991	2001	1991	2001
1	2	3	4	5	6	7	8	9
Hindus	6,989,226	8,997,942	34.4	36.9	228,212	286,438	35.3	38.0
Muslims	239,401	382,045	1.2	1.6	3,988	6,408	0.6	0.8
Christians	225,163	292,800	1.1	1.2	1,794	4,353	0.3	0.6
Sikhs	12,767,697	14,592,387	63.0	59.9	411,014	448,654	63.6	59.5
Buddhists	24,930	41,487	0.1	0.2	1,215	7,740	0.2	1.0
Jains	20,763	39,276	0.1	0.2	329	541	0.1	0.1
Others Religions and persuations	883	8,594	0.0	0.0	57	138	0.0	0.0
Religion not stated/ Unspecified	13,906	4,468	0.1	0.0	38	249	0.0	0.0
All Religions	**20,281,969**	**24,358,999**	**100.0**	**100.0**	**646,647**	**754,521**	**100.0**	**100.0**

As can be seen from the above statement, Sikhs form the predominant religious community in Punjab and they account for 59.9 per cent of the State's population according to the 2001 Census. The corresponding percentage for 1991 Census was 63.0 per cent. Hindus is the second largest religious community in the State and their share in the total population is 36.9 per cent which was 34.4 per cent as per 1991 Census. This signifies that Sikhs and Hindus, the two most dominant religious communities in the state, together constitute 96.8 per cent of the state's total population. The share of Muslims, Christians, Buddhists and Jains in the total population is 1.6, 1.2, 0.2 and 0.2 per cent respectively.

As per 2001 Census, in Kapurthala district, Sikhs constitute 59.5 per cent of the total population and this is significantly slightly lower than that of the state as a whole. Hindus, the second dominant religious community in the district, account for 38.0 per cent of the district's total population. Together, the Sikhs and the Hindus account for 97.5 per cent of the district's population. Muslims constitute 1.0 per cent and Jain 0.1 per cent while the share of Christians is only 0.6 per cent.

Annexure VI

Marital Status :

Current marital status of each individual, irrespective of age, was obtained through Question 5 of the household schedule canvassed at the 2001 census into following four categories:

1. Never married
2. Currently married
3. Widowed
4. Divorced or separated.

The instructions to enumerators for eliciting marital status were same as adopted in 1991 census. A brief analysis based on 1991 and 2001 census is presented here.

The following table exhibits data for Persons, Males and Females in percentage form regarding Marital Status.

MARITAL, STATUS OF POPULATION AS PER, 1991 AND 2001 CENSUS

Marital Status	Punjab						Kapurthala					
	1991			2001			1991			2001		
	P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13
Total Population	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Never Married	51.5	55.4	47.1	48.7	53.1	43.8	51.5	55.2	47.4	48.8	53.2	43.8
Married	45.1	42.3	48.2	47.2	44.6	50.2	45.2	42.5	48.1	47.3	44.4	50.5
Widowed	3.3	2.2	4.6	3.9	2.1	5.8	3.3	2.3	4.4	3.7	2.2	5.5
Divorced or Separated	0.0	0.0	0.0	0.2	0.2	0.2	0.1	0.0	0.1	0.2	0.2	0.2
Un-Specified	0.0	0.0	0.0	0	0	0	0.0	0.0	0.0	0	0	0

Punjab State has a population of 24,358,999 as per 2001 Census comprising 11,871,211 (48.7%), never married, 11,499,566 (47.2%) married, 938,678 (3.9%) widowed and 49,544 (0.2%) divorced or separated. As per 1991 Census Punjab State had a population of 20,281,969 comprising 10,452,444 (51.5%) never married, 9,146,158 (45.1%) married, 673,569 (3.3%) widowed, 8,768 (0.1%) divorced or separated and 1,030 (0.0%) un-specified.

In Kapurthala district, out of the total population of 754,521 as per 2001 census; 368,112 (48.8%) are never married, 356,636 (47.3%) are married, 28,180 (3.7%) are widowed, 1,593 (0.2%) are divorced or separated. Thus, the patterns observed for the State and the district are almost identical.

Annexure VII

Sex and Educational level :

It has become customary for the Indian Census to obtain details of educational levels of the literates in the society. Question 13 of the Household Schedule canvassed at the 2001 census aimed to elicit information on the highest educational level attained. The data so collected is put to public domain by classifying the population by sex and educational levels.

The following table shows percentage distribution of literates by educational level for Punjab State and Kapurthala district as per 1991 as well as 2001 Census.

PERCENTAGE DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL AS PER 1991 AND 2001 CENSUS

Educational Levels	Total Rural Urban	Punjab						Kapurthala					
		1991			2001			1991			2001		
		P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Below Primary	Total	21.8	20.9	23.1	20.0	19.7	20.4	19.6	19.0	20.5	18.2	18.5	17.9
	Rural	24.2	22.9	26.2	22.9	22.3	23.7	20.8	20.0	22.0	20.4	20.6	20.0
	Urban	17.6	17.2	18.2	15.5	15.6	15.4	17.0	16.7	17.3	14.6	14.9	14.3
Primary but below middle	Total	27.9	25.3	31.7	25.6	23.7	28.3	27.7	25.1	31.4	24.7	23.2	26.7
	Rural	31.8	28.4	37.0	29.3	26.6	33.0	30.6	27.4	35.3	28.1	26.2	30.4
	Urban	21.2	19.7	23.3	19.9	19.0	21.1	21.3	20.0	23.1	19.0	18.0	20.3
Middle but below matric	Total	18.1	19.0	16.7	16.9	17.5	16.1	20.0	20.6	19.1	17.6	18.2	16.9
	Rural	18.5	19.8	16.7	17.7	18.5	16.8	20.6	21.4	19.6	18.7	19.4	17.9
	Urban	17.3	17.7	16.8	15.7	16.1	15.1	18.6	19.0	18.1	15.8	16.2	15.4
Matric but below graduate	Total	26.3	28.6	22.8	30.8	32.7	28.4	26.9	29.1	23.8	32.9	33.9	31.6
	Rural	23.0	26.0	18.3	27.5	29.9	24.3	24.8	27.5	20.9	29.8	30.6	28.7
	Urban	32.0	33.5	30.0	36.0	37.1	34.6	31.6	32.7	30.1	38.3	39.6	36.6
Graduate and above	Total	5.9	6.1	5.7	6.6	6.4	6.7	5.7	6.2	5.1	6.5	6.2	6.8
	Rural	2.5	3.0	1.8	2.5	2.8	2.2	3.1	3.8	2.2	3.1	3.2	2.9
	Urban	11.8	11.9	11.8	12.9	12.2	13.7	11.5	11.6	11.4	12.2	11.3	13.4

As per 1991 census 21.8 per cent of the literates in Punjab were below primary level of education, 27.9 per cent were primary but below middle and 18.1 per cent were middle but below matric. A little over one-fourth (26.3%) of the literates in the State were matric but below graduation. It was only 5.9 per cent of the literates who had attained graduation or above level of education.

According to 2001 census 20.0 per cent of the literates in Punjab are below primary level of education, 25.6 per cent are primary but below middle and 16.9 per cent are middle but below matric; 30.8 per cent are matric but below graduation. Only 6.6 per cent of the literates in Punjab are graduate and above. Whereas there is some decline in first 3 levels as compared to 1991, last 2 level exhibit slight improvement.

In Kapurthala district, the incidence of educational level is lower than that of the State in 2001. In the district 18.2 per cent of the literates are below primary and another 24.7 per cent are primary but below middle. By contrast, the percentage of literates with middle and matric levels of education is greater in Kapurthala district as compared to the State. In the district 17.6 per cent of the literates are middle passed as compared to state with 16.9 per cent. Likewise the percentage of matriculation, with 32.9 in Kapurthala district is higher than that of the State with 30.8 per cent.

Annexure VIII

Distribution of Different Mother Tongues :

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood is recorded as the mother-tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. These may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Mother Tongue and Language data based on 1991 & 2001 Censuses is given here. The distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each) for the district by sex separately for rural and urban areas. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table is divided into two parts; Part A- Scheduled languages with the mother tongues grouped under each, and Part B-Non-Scheduled languages with the mother tongues grouped under each. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census are, basically, the designations provided by the respondents. These designations or mother tongue label need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects, the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1576 rationalized mother tongues in 1991 for the entire Country, which were further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.

NUMERICALLY BIGGEST LANGUAGE ARRANGED IN DESCENDING ORDER OF THE NUMBER OF SPEAKERS, 2001-1991
