Pong Dam

Pong Dam is constructed across river Beas at a distance about 10 kms from Talwara. The construction of Pong Dam started in 1963 and got completed in 1974. This earth-cum-rock fill dam is the highest of its kind in the country. It is comprised of five tunnels and a power house with an installed capacity of 360 MW (6 units each of 60 MW). The construction of the dam has considerably minimized the incidence of floods downstream which has helped in reclamation of large tracts of lands on both side of river Beas.

At present, it is under the control of Beas Project Power Wing.

Urban Primary Census Abstract. 694

Annexure I : Number of villages under each Gram Panchayat 712
Annexure II : Fertility and child Mortality, 1991 Census 712
Annexure III : Measures of fertility and mean age at marriage, fertility level 713
Annexure IV : Percentage distribution of in Migrants by place of birth/place of last residence. 714
Annexure V : Brief account of main religions in the district/tahsil as per 1991 Census 716
Annexure VI : Marital status of population 717
Annexure VII : Distribution of Literate by sex and Education Level 718
Annexure VIII : Distribution of different mother tongues. 719

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census , is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics, village-wise and town-wise, of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive Censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added to it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA which was restructured. Nine–fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and

recreational facilities. In town directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristics of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) in all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Inder Jit Singh, IAS, Director of Census Operations, Punjab. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General, (C&T) and Dr. I.C.Aggrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP), helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assitant Director. I am thankful to all of them and others who contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 2007

Preface

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to also include village level data on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B - Primary Census Abstract, giving data for each village within the Community Development (CD) Block and each town in the district. The CD block maps included, presenting village level data, have been prepared by using computer assisted technology. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetters and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Shri D.K. Sikri, IAS, Additional Secretary, Registrar general, India and Census Commissioner and Shri J.K. Banthia, IAS, former Registrar General and Census Commissioner, India for their directions and support from time to time in accomplishing this arduous task.

In the directorate, at the outset we are beholden to Shri Inder Jit Singh, IAS under whose able guidance and direction as Director Census, Punjab, the census operations in the state were successfully completed.

Our thanks are also due to Shri D.R. Khanna, Ex-Deputy Director for getting the compilation of data and Shri Madhav Shyam, Ex-Deputy Director for drafting this specimen model which has been replicated in other DCHBs.

The great effort and hard work done by Shri S.K. Bhandari, Ex-Assistant Director, Shri Bhagirath Singh, Assistant Director, Sh. Rajender Prasad, S.I.Gr-I and Sh. B.S. Rai, S.I. Gr-I are greatly acknowledged. Sh. Azad Kumar, S.I. Gr-III and Sh. H.S. Sudan, S.I.Gr-III deserved special thanks for having completed the publication work.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

District Highlights - 2001 Census

1. Hoshiarpur district has a population of 1,480,736 comprising 765,132 males and 715,604 females.
2. Hoshiarpur district makes 6.1 per cent of the total population of the State.
3. Out of the total population of the district, 80.3 per cent is rural while only 19.7 per cent is urban.
4. The district has 4 tahsils viz Dasua, Mukerian, Hoshiarpur and Garhshankar.
5. The district has 1,417 villages out of which 1,386 villages are inhabited and 31 villages are uninhabited.
6. The district population has increased from 12, 98,712 in 1991 to 14,80,736 in 2001 showing an absolute increase of 1,82,0,24 and in percentage terms the district has gained by 14.0 per cent.
7. Hoshiarpur district has a density of 437 and occupies 10th position among the districts in the State.
8. Hoshiarpur district has the highest sex ratio (935) among the districts in the State.
9. With 12.4 per cent of child population in the age group of 0-6, it has a child sex ratio of 812 placing it at 5th place among other districts in the state.
10. The district has 28.0 and 6.6 per cent main workers and marginal workers respectively.
11. The district has a literacy rate of 81.0 per cent and it ranks first among the districts in the State.
12. It has 34.3 per cent of scheduled castes population to total population with a growth rate of 15.5 per cent.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Ever since the beginning of first post independence Census of India 1951, the publication of District Census Handbooks (DCHBs) has become a regular feature of the Indian Census. Produced by the Census Organisation of Government of India on behalf of the State Government, the DCHB is a unique publication which gives the census as well as non-census data down to every village in case of rural areas and ward within the town/urban area in the state. It is recognized as one of the most comprehensive sources of information. Infact, this is the only publication which provides primary census abstract based on census, and non-census data on infra-structure and amenities available, such as educational, medical, postal, and communicational at the sub-micro level. It is inter-alia used for delimitation of constituencies, formulation of local level and regional plans and serves as a valuable tool for district administration.

Undisputedly, DCHB has remained to be the most comprehensive and valuable product of the census organization ever since its initiation. It has always been the endeavour of the Census of India to enlarge the content and coverage of the data presented at every census. The DCHB series of 1951 Census contained important Census Tables and the Primary Census Abstract. At the 1961 Census, the scope of the DCHB was enlarged by including a descriptive account of the district, administrative statistics, census tables and the village and town directory. In 1971, the DCHBs were planned in three parts; Part-A included the village and town directory, Part-B included village and town wise primary census abstract, while the Part-C was meant to include analysis of census data and a write up covering social, cultural, historical and other important aspects. However, in some states/union territories Part-C remained confined to the district tables only.

During 1981 Census, some new features were added and the formats of village and town directory were restructured, somewhat. These volumes were published for each district in two parts. Part-A included village and town directory, while Part-B included primary census abstract (PCA) of every village and ward in town/urban area. The inclusion of scheduled castes PCA was the additional feature of the 1981 Census. The village directory of 1981 Census included new parameters viz; information on Adult Literacy Centers, Primary Health Sub-centers and Community Health workers in the village (s) to meet the requirement of the Revised Minimum Needs Programme. In addition, information on approach to the village was also provided for the first time in the village directory to help in taking stock of villages requiring road linkages in the district. Likewise, Statement IV-A included in the Town Directory aimed to provide data on slums so as to undertake development activities in such areas.

The manner of presentation of the DCHBs for the 1991 Census was, by and large, same as followed in 1981 Census. However, the format of PCA was slightly restructured in the 1991 Census for the benefit of data users. The village level data were presented Community Development (C.D.) block wise to cater to the needs of grass root level planning as envisaged under the five year plans. Ninefold industrial classification of the main workers was reintroduced by replacing the four-fold industrial categories adopted at the 1981 Census. In addition, the PCA also gave population in the 0-6 age group by sex essential for working out effective literacy rate, besides providing proportion of child population.

The DCHB 2001, the present volume, is the sixth in series. The pattern followed is, by and large, similar to that of the 1991 Census. Among the new features added, information on the availability of newspapers/magazines, banking facility, agricultural and non- agricultural societies, recreational and cultural facilities, income and expenditure of the village facilities, income and expenditure of the village panchayats find mention. More important is that, it is

for the first time in the history of Indian Census that a Permanent Location Code Number (PLCN) has been allotted to every village in the state to meet the demand from different organizations to study the village level data over a time spell. It is believed that the permanent location codes assigned to each village would help in tracing the precise location of a village on account of jurisdictional changes in the boundaries of various administrative areas.

(ii) Brief history of the district

There are two versions about the foundation of Hoshiarpur town from which the district Hoshiarpur derives its name. It is said to have been founded by Hargobind and Ram Chand, Diwans of Muhammed Bin Tughlak (AD 1325-1351). The Second version ascribes the foundation of the town to one Khan, a resident of Bajwara (a suburb village of Hoshiarpur) who lived about the same period and after whom the town was named.

The excavations at various sites in the districts of Hoshiarpur and Rupnagar have revealed that the entire area near the Shivalik foot hills was selected for habitation not only by the early Palaeolithic man, but also by those in the protohistoric and historic periods. It is in these regions that the link between the earlier Stone Age and protohistoric periods-neolithic period may probably be found. The archeological remains in Hoshiarpur district and the remains of temples at Dholbaha, 24 Km north of Hoshiarpur and especially the local legends throw much valuable light on the ancient history of this district. As such the district has a long history. Dasua finds its mention in the epic of Mahabharat as the seat of king Virat in whose services the Pandvas remained for one year during their exile when they were expariated by Kaurvas for thirteen years. Even today, Dasua is called "Virat Ki Nagri". Bham, about 11 Km west of Mahilpur, is said to be the place where the Pandvas spent their exile. Lasara, about 19 km north of Jaijon, also has a stone temple stated to date back to the times of the Pandvas.

The scattered notices of Kalhanas "Raja Tarangini", the hints gained from inscriptions and, above all, from the information left on record by the Chinese pilgrim Hieun Tsang, it is surmised that the area, now called Hoshiarpur, was dominated by a tribe of Chanderbansi Rajput who maintained an independent existence for centuries before the Muhammadans Conquest with Jalandhar as its capital. According to the poet Lalman, Ibrahim of Ghorian dynasty, who ruled from AD 1059-1099, penetrated Jalandhar and plain probably came under the Muhammadan rule on the fall of Jalandhar in 1088 AD. The hills, however, remained under the Hindu chieftain. In 1192, whole of the Shivalik hills, along with the principalities of Ghuram, Hansi, Sarusti, Samana and other tracts were subjugated by sultan Muhammad Ghori, who further advanced to Delhi, but the city and its fort were saved by a relation of Khandey Rai, who submitted to the conqueror and paid a handsome tribute to him. The Sultan returned to Ghazni after entrusting the Government with Ghuram as its capital to his slave Qutb-Ud-Din Aibak.

The district was annexed by the British along with the rest of Jalandhar Doab at the close of the First Sikh War in 1846. Afterwards, major jurisdictional changes continued to affect Hoshiarpur district. Rupnagar was transferred to Ambala which used to be a part of Punjab till 1966. Similarly Una became a part of Himachal Pradesh after re-organization of the three states. Recently Balachaur Tahsil of Hoshiarpur District was transferred to newly created district named Nawanshahr.

(iii) Administrative set-up

The State has experienced large scale jurisdictional changes after the 1991 census. The number of districts has increased from 12 in 1991 to 17 in 2001. The newly created districts include; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. With the exception of Kapurthala district all other 11 districts in the State have experienced inter-district jurisdictional changes of varying magnitude.

These 17 districts are distributed over four divisions. Jalandhar division includes districts of Gurdaspur, Amritsar, Kapurthala, Jalandhar, Hoshiarpur and Nawanshahr; Patiala division

covers districts of Rupnagar, Ludhiana, Patiala, Sangrur and Fatehgarh Sahib; Firozpur division spreads over districts of Firozpur, Moga and Muktsar, while Faridkot division embraces districts of Faridkot, Bathinda and Mansa.

All the districts of 1991 Census, except Kapurthala, have undergone intra-district jurisdictional changes resulting in an increase in the number of tahsils in the state from 46 in 1991 to 72 at 2001 Census. In Punjab tahsil and sub division are co-terminus. During 1991-2001, Mukerian tahsil has been newly created while Balachaur tahsil has been transferred to the newly formed district of Nawanshahr .The number of tahsils has remained the same at four in 1991 and 2001. The number of towns in the district has, however, increased from 9 to 12 during the period.

The statutory towns are notified by the State government. Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or transactional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the state government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specify by notification in the official gazette any area to be transitional area or a smaller urban area for the purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the state government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the Ist Class, IInd Class or IIIrd Class.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows:

Serial number	Class of Urban Local Bodies	Population	Income
1	2	3	4
1.	Municipal Corporation	3 lac or above	2 Crore or above
2.	Municipal Council Class I	50,000 to 3 lac	50 lac to 2crore
3.	Municipal Council Class II	10,000 to 50,000	15 lac to 50 lac
4.	Municipal Council Class III	upto 10,000	upto 15 lac
5.	Nagar Panchayat	5,000 or above	More than Rs.150 per head

The following statement indicates the jurisdictional changes which took place after the 1991 Census in Sangrur District.

Jurisdictional Changes during 1991-2001

					vi) 2/6/91-RE.II(1)/10943 dated 16.08.1991

The district is the basic unit of administration. For the purposes of general and revenue set up the district is divided into four tahsils Mukerian, Dasua, Hoshiarpur and Garhshankar. All of them have sub divisional status. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district and revenue administration in the district.

(iv) Physical Features

Origin of Name:

The district takes its name from Hoshiarpur town, which serves as district headquarters. There are two stories about the foundation of Hoshiarpur town from which the district Hoshiarpur derives its name. Firstly, it is said to have been founded by Hargobind and Ram Chand, Diwans of Muhammed Bin Tuglak (AD 1325-1351). The Second ascribes the foundation of the town to one Khan, a resident of Bajwara (a suburb village of Hoshiarpur) who lived about the same period and after whom the town was named.

Location and Size:

Hoshiarpur district is located in the north – east part of the state. It lies between north latitude 30°-57 and 32°-05 and east longitude 75°-32 and 76°-31. The district forms part of Jalandhar division and is situated in the Bist Doab, The district is sub mountainous and stretches from river Beas in the north-west to river Satluj in the south-east. In appearance it is fish shaped i.e. broader in the north-west and narrower at the south-east. It encompasses the entire western watershed and to some extent the eastern watershed of the Katar Dhar or Sola Singh ranges of the Shivalik hills. It shares common boundaries with Gurdaspur district in the north, Himachal Pradesh and Rupnagar district in the east; Jalandhar and Kapurthala districts in the west and Nawanshahr in the south.

Area:

According to 2001 census, Hoshiarpur district covers an area of 3386 sq. km and ranks eleventh in the state out of which 132.7 sq. km is urban and 3253.3 sq. km is rural. The area has been derived by subtracting urban area of the district from the total area as supplied by the Surveyor General, India. The tahsil wise area as supplied by the Director, Land records, Punjab, is Dasua (810.3 sq. km), Hoshiarpur (1138.6 sq. km.), Garhshankar (811.3 sq. km.)

and Mukerian (632.5 sq. km.). The area of tahsils, when added up for the district gives an area of 3392.7 sq. km. which does not tally with area as supplied by the Surveyor General, India. The urban area for the district has been obtained by adding up the area of the towns, as supplied by the urban civic bodies. The rural area for tahsils was supplied by the District Land Records, Punjab.

Climate:

The Climate of this sub mountain district with a hilly terrain in the major part is, on the whole, somewhat milder than that of the adjoining districts to the south. But in the valleys and the terrain strip to the southwest of the Shiwalik Range, it is more like that of the plains of the Punjab.

There is no meteorological observatory in the district. After about the middle of March temperatures begin to rise steadily till June, which is usually the hottest month of the year with the mead daily maximum temperature at about 39° and the mean daily minimum about 24°. In May and June, the maximum temperature may, on individual days exceed 45°. With the advance of the south-west-monsoon over the district early in July the day temperatures decreases appreciably and owing to the increase in the moisture in the air during the south-west monsoon season the weather is often sultry. After about the middle of September temperature begin to decrease, the fall in night temperature being more rapid. January is the coldest month of the year.

Physiography:

Situated in the eastern and north-eastern margins of Punjab, Hoshiarpur district has a transitional location between the up land plain of central Punjab and the outer Himalayan section of Himachal Pradesh. As compared to other districts of Punjab, Hoshiarpur plays the greatest topography variety. The Shivalik Hills which follow a northwest-southeast alignment and run almost through the length of the district, have influenced the disposition of their other physiographic units. These units are clearly identifiable on the basis of significant attributes of physical landscape.

Drainage:

Hoshiarpur district is drained by river Beas and many Choes.

River Beas:

It rises from Beas Kund near Rohtang Pass in Himachal Pradesh. It traverses through the districts of Kullu, Mandi, Hamirpur and Kangra in Himachal Pradesh before entering Hoshiarpur district near Talwara after cutting through the Solasinghi range of the Shivalik. After flowing for about 40 Km to the north west, the river suddenly takes a sharp turn to the south from Motla village and thence forms the boundary between the districts of Hoshiarpur and Gurdaspur. The river has been dammed in the upper reaches at Pandoh (in Mandi district in HP), where waters have been impounded and diverted through a tunnel into the Sunder Nagar valley for Dahar Hydro Power Station where its water falls into the Satluj river and augments the water supplies in the Gobind Sagar Dam near Talwara, it has been dammed and vast reservoir known as Pong Dam impounds its waters for irrigation and power. A little down stream this is joined by its tributary called Sawan. A barrage has been constructed on Beas river little upstream near Talwara to divert its waters in Mukerian Hydel Channel, partly for Kandi canal, which takes out from the Mukerian Hydel Channel below Talwara, but mainly for generation of electricity in four power stations on the Mukerian Hydel Channel, merges into Beas once again after serving its purpose of power generation.

Choes:

Hoshiarpur is known for its Choes and the hill torrents which are identifiable from their sand beds. They have the characteristic of receding as fast as they rise and leave behind deposits of sand on lands which were once fertile. Their other characteristic is that they are almost surface water courses least confined to their defined limits. Hoshiarpur which was once called 'Bagh-e-Punjab' (Garden of Punjab) has been converted into a sand desert due to the vagaries of the choes in the last century. After flowing for some distance, ranging between 5 to 24 kms, wide choes shrink into narrow streams and finally disappear. Of late their courses are being made deeper so that there is minimum loss to crops and property. Also earth filled dams are being constructed for impounding their waters for minimizing the vagaries of floods on the one hand and for supply of water for irrigation on the other.

Natural Economic Resources:

Land Utilization:

According to village papers Hoshiarpur district has an area of 339,000 hectares. Out of this 109,000 and 11,000 hectares is culturable waste. The forest cover is quite thick on western side of the northern fringe of the Katar Dhar falling in Dasua tahsil. There is 218,000 hectares of net area shown in the district out of which 148,000 hectares is shown more than once. Thus, the total cropped area of the district during the year 2000-2001 works out to 366,000 hectares.

Agriculture:

The shift from agriculture to non agricultural activity is quite visible. The proportion of main workers in agriculture has declined from 54.0 per cent in 1991 to 40.7 in 2001 and more stress is now being laid on development of industry after Hoshiarpur was declared as an industrially backward district.

As in other districts of the state – there are two principal crop seasons known as Rabi and Kharif. These are also called Hari and Sawni respectively in the local language. The Rabi (Hari) crops are mainly sown on the onset of winter and mature in summer. The most outstanding crop of this season is wheat. The Kharif (*sawni*) crops are sown in summer and get mature at the close of monsoon season or onset of winter. The most important crop of Kharif season is paddy in the plains where water is available for irrigation but in the hilly areas it is Maize.

Among the two crops seasons, Kharif is more important as against cultivated area of 167 thousand hectares during Rabi, an area of 199 thousand hectares is reported in the Kharif season during the year 2000-2001. The Kharif season's relative importance is attributable to the availability of water moisture in the unirrigated area during the rainy season. But this may not be so during the Rabi season when winter rains are late or untimely.

Out of a total cultivated area of 366,000 hectares, food crops alone account for 308,000 hectares. Thus, area under non-food crops is only 58,000 hectares, out of which 40,000 hectares in Kharif season whereas only 18,000 hectares in Rabi season. The important crops as per area during the year 2000-2001 are wheat 158,000 hectares, Maize 62,000 hectares, Rice 57,000 hectares, Sugarcane 17.100 hectares and potato 13.300 hectares. The district has recorded an average yield of 3047 kg per hectares during 2000-2001. Wheat crop which happens to be the principal food crop in the district, has recorded the lowest yield of 3443 kg during 2000-2001. The reason for poor output is because sizeable areas of the district are hilly and sub-mountain, where availability of irrigation facilities are far from satisfactory.

The area under sugarcane cultivation is second from top (17.100 hectares), the first being Gurdaspur district (18.200 hectares). Potato cultivation is quite popular in this district as Hoshiarpur occupies the second position with area of 13.300 hectares under potato crop.

Groundnut is another crop which has reported an area of 2,600 hectares, the highest in the state. The reason for popularity of groundnut cultivation is that sandy and sandy–loam soil are abounds in the district which are considered suitable for groundnut cultivation.

Vegetable growing is also popular in the district as 14,627 hectares of area is under vegetable cultivation during 2000-2001. Besides, there is some area under vegetables which is mainly in the choe beds. This area may not find mention in the revenue records as these crops are grown in summer mainly after the wheat harvesting. The most common types of vegetables are; Pumpkin (*Kadu) Lowki*, Musk Melon, Water Melon (*Hadwana*), Cucumber, (*Kheera*) etc.

Hoshiarpur was once quite known for orchards of different types, especially mangoes. The variety and quantity of juicy mangoes (Sucking type) placed this district much above the rest of the districts. The area under fruits as reported in 2000-2001 is 4,912 hectares holding a record next to Firozpur district with 8270 hectares under fruits. The important fruits in terms of area are Kinnow (2,527 hectares) Mangoes (8,270 hectares). In Kinnow cultivation it occupies record position. In terms of production of fruits it also occupies the second position with 64,670 M tonnes as against a production of 109,553 M tonnes in Firozpur. Shortly, this district will once again emerge on top considering the growth of area under Kinnow fruit.

In the field of consumption of chemical fertilizers, Hoshiarpur district is poorly placed, as it occupies the fourth position from the bottom as regards to nutrients, the lowest being Nawanshahr district. The consumption was 38,000 and 26,000 tonnes respectively in 2000-01. The main reason of low consumption Chemical fertilizers is that people prefer organic manure of green manure to chemical manure. The other reason being that sizeable cultivated land is dependent on rains, which are uncertain. Therefore, the farmers in these areas avoid consumption of chemical fertilizers for minimizing damage to sown crops. Thirdly, maize crop is sown in a large area which is hilly and sloppy and dependent on rains, which may wash away the chemical fertilizer in no time. Same is the case with wheat crop grown in the rain fed areas. The highest consumption is, however, reported by Firozpur (151,000 M. Tonnes) followed by Patiala (143,000 M. Tonnes). It could thus be seen that Hoshiarpur district is not agriculturally progressive. In order to boost agriculture and horticulture, the Punjab Agriculture University Ludhinan is running one research station in the district. The fruit Research Station was set up in 1972 and is situated at a distance of 3 Km. from Dasua on Dasua-Hoshiarpur road. The main objective of this station was to preserve the sucking type of mangoes as also to conduct research on different aspects of Litchi, Citrus, Pear, *Ber*, Peach, Plum, Apricot, Almond, Guava and Loquat. It has established a commercial nursery, which has supplied a large number of fruit plants of different varieties to the growers. A Dry Land Farming Research Station functions at Saroya. Its main purpose is to develop dry land technology for 'Kandi' and 'Bet areas'.

Irrigation:

Irrigation is an essential perquisite for intensive agriculture and increasing crop yields. The development of irrigation also helps to rebuild the agricultural economy. It is, therefore, necessary to improve the water resources and their utilization properly. Canals are major source of irrigation. There are two canals, viz., (1) Shah Nahar Canal and (2) Kandi Canal, in the district. The Shah Nahar canal takes off from river Beas near Mukerian. Till 1949, this canal was controlled by District Board but thereafter its control was passed over to Irrigation Department. The Kandi Canal is a recent origin and takes off from Mukerian Hydel Channel, upstream from Power House near Talwara.

To boost irrigation potential in the district four dams, namely, Dholbaha, Janauri, Maiti and Damsal have been built in the district, which besides, checking floor menace, provide irrigation facilities to 7,070 hectare. Both Cholal Dam and Salaran Dam the irrigation potential touch 9,060 hectares by the end of Eighth Five Year Plan.

Irrigation by percolation wells, fitted with Persian wheels, was the most ancient and common form. But this form is being replaced by tubewells run by electricity or diesel.

As regards area irrigated in the district, a net area of 148,000 hectares availed the facilities in the year 1990-91 which touched 188,300 hectare in the year 2000-2001. The percentage of net irrigated area to net area sown increased from 60.1 to 86.4 in the corresponding period. But in terms of gross area irrigated the percentages are 64.1 in 1990-91 and 80.0 in 2000-2001. It may be noted that during the last decade there was a net increase of 40,300 hectares in the net area irrigated in this district. The singular contribution in this respect is of tube wells and wells which added 32,300 hectares, their figures increasing from 133,600 hectare in 1990-91 to 165,900 hectares in 2000-01. There is a great potential or development of irrigation facilities in this district.

Animal Husbandry:

From times immemorial Punjab is known as home of milk. The minimum hospitality which the Punjabis offered to their guests was a glass full of hot milk or glass of butter milk (*Lassi*). The breed and quality of milch cattle was so good at that time and bovine stock was exported from Punjab to big urban centers like Bombay and Calcutta. The farmers loved their animals immensely and looked after them well. It was on the strength of fine stock of draught cattle that agriculture in Punjab progressed and prospered.

The terrain of Hoshiarpur district had plenty of grass in the Hilly and 'Bet areas'. The *Gujjars*, the traditional graziers or herdsmen found it as their natural habitat. However, after partition, things changed a lot as a sizeable number of *Gujjar* population which was Muslim by religion, migrated to Pakistan. The position did not improve as newcomers did not find surroundings congenial for permanent settlements. But the development of sources of irrigation made it possible to grow green grass in plenty and thereby provided good means of sustenance to animal husbandry. Further, the various schemes undertaken under 'Project' White Revolution' brought a sea change in the quality of animals. The mechanization of agriculture and transport compelled the farmers to go for quality milch cattle. The purchase of milk through rural milk collection centers at remunerative prices by government helped in the process of improvement of animals, whose prices touched all time high. The exotic breeds of cattle like Brown Swiss, Holstain, Friesion, Jersy etc. have become a household craze. The buffalo breeds, like Murrah and Nili Ravi have also gained popularity due to their high milk yields, with the result, all the commercial dairies run in the rural or urban area have now invariably animals of best of these breeds.

Due to the changed conditions, there is a decline in the number of livestock as against 642,400 in 1990 to 542,500 in 1997. The number of cattle has declined from 225,200 in 1990, to 192,400 in 1997. The reasons for these changes are not far to seek. The decline in the number of cattle stock is accounted for people's preference for quality milch cattle on the one hand and mechanization of agriculture and transport on the other. However, there is a marked preference for she-buffaloes for their milk, which fetches better prices. Hence, there was an increase in the number of bovine stock.

In order to keep the animals healthy and secure, the government is running 184 veterinary hospitals/dispensaries in the district in 2000-01 but the increase in staff in these hospitals/dispensaries is not very significant. These veterinary institutions treated 327,515 animals, castrated 1,513 animals and undertook 566,550 vaccinations in 2001-02, which is indeed a laudable service. The quacks that ruled in the past have now been relegated to insignificant importance. There were times when as a result of cattle epidemic, there were a large number of deaths. Now for improvement of cattle and bovine stock artificial insemination centers have been opened, where 151,168 cows and 56,427 buffaloes were provided services in 2000-01, with the result, there were 38,278 (cow stock) and 15,271 (buffalos stock) births which helped to improve quality of milch animals to augment milk supply.

The poultry farming has also become quite popular. The number of poultry birds have increased from 490,300 in 1990 to 542,500 in 1997. The government was running 6 poultry service centres in the district in 1990-91, which reduced to 5 in 2000-01. Now modern

poultry farms, run on scientific lines, could be seen on the main district roads. The egg is finding ready acceptance in households, where it used to be a taboo item.

Tenancy:

In the fifties various, enactments were taken up to simplify land laws in the State. Hoshiarpur district was not affected from these enactments and the occupancy tenants were made owners of land and were required to pay nominal compensation to the actual owners. There were a large number of occupancy tenants in the district. Also 'Ala Malkiyat' was abolished and Adna Malkayat became the absolute owners of land. These changes went a long way in simplifying relations between the owners of land and the tenants.

Generally, tenants are required to pay half of the produce of the land to the owner. This payment is called *Batai* or share cropping. *Theka* or *Chaukuta* which in other terms produce or cash may be agreed to between the land lord and the tenant. Such fix ups may be between the private parties. However, the government leased out land on long term for a period varying from 7 years to 20 years. It is observed that an increasing number of owners are leasing out land on *Theka* (contract) basis. Some well-to-do tenants pay the Theka (contract) money in advance and land with tubewell facility is contracted for lease with additional charges for water supplied for irrigation. These charges may vary depending upon crop. For instance, for sugarcane, the charges may be more than traditional crops like wheat and maize. Likewise, paddy may entail higher charges due to higher water requirement for irrigation. Further there may be higher Theka for longer tenancy as the tenant is in a position to take maximum out of the land due to application of various types of agricultural inputs. This is, however, not preferred in case of short period tenancy.

Industry:

Hoshiarpur was known for lacquer ware ivory goods and ornamental furniture. It was also an important centre for Rosin and Turpentine industry in the State. Besides, many village and cottage industries found here a congenial atmosphere and prospered. But things changed after partition as Muslims, who formed the bulk of the artisans and skilled workers migrated to Pakistan and created a void, which could not be filled in spite of efforts at private and government levels.

The district, though rich in small scale industries, was considered industrially backward due to its geographical location, being situated on Jalandhar - Hoshiarpur railway branch line, with inadequate means of communications. But things started improving on the industrial front after its being declared as 'Industrially Backward District' in 1970. As a result industrial units set up in the district were eligible for a subsidy of 10% which was increased to 15% from March, 1973. This had resulted in the setting up of a number of large and medium sized industrial units in the district. At Hoshiarpur two industrial units are located (1) Mahavir Spinning Mills (an ultra-modern spinning unit with 25,000 spindles, employing some 2,000 persons), (2) Pressure Cookers and Appliances Ltd; engaged in the manufacture of Pressure Cookers and Kitchenware marketed under the brand name 'Hawkins'. Also milk plant 'The Hoshiarpur, Co-operative Milk Producers. Union Limited' is located in village Ajjowal, near Hoshiarpur, with a milk handling capacity of 10,000 litres daily. At Cohal, on the Hoshiarpur-Dharamshala Road about 6 kms from Hoshiarpur are located three industrial units; (1) Sterling Steels and Wires Limited (engaged in the production of steel wires, drawing and their treatment, (2) JCT Mills and (3) JCT Fibers.

Besides the above named important industrial centers, big industrial units have come up in the district such as, Mukerian Paper Mills, near Mukerian (on Dasua-Mukerian Road, Oswal Sugar Mill. This Mill has opened up the area of sugarcane cultivation, which can prove to be a good cash crop. Incidentally this is the only sugar mill in the district as the nearby sugar mills frequented by the farmers of this district are at Nawanshahr and Bhogpur. Both these sugar mills are in the co-operative sector, located outside the district. Another

important industrial unit, Kakkar complex Steel Private Limited, is located 7 kms. from Hoshiarpur on Hoshiarpur-Jalandhar Road. This is a medium sized unit engaged in the manufacturing of high alloy Milk Chilling Plants, each located in Gangian and Dasua which supply milk to the Hoshiarpur Co-operative Milk Plant.

The small scale industrial units engaged in the production of various types of articles are:

1. Plastic Inlay:

After experiencing difficulties in procurement of ivory from Africa, there is substitution of ivory by Plastic (white). Ornamental furniture of various types is produced at various centers.

2. Lacquer ware:

Due to improvement in the availability of quality colour, the production of these wares has picked up. The main articles produced are toys for toddles.

3. Desi Jutties and Embroidered Jutties:

These had been almost out of fashion but for the last few years these have again thronged the market. Due to increasing demand the production has also picked up and new units have entered this field, besides the old units in business.

4. Brass Utensils Manufacturing:

Hand made brass utensils were produced at Bahadurpur, a suburb of Hoshiarpur city, for quite some time. But due to setting up of machine units for production of brassware, there is decline in the production. Still large sized utensils such as *patilas, gagars, parats*, etc. are being produced manually at Bahadurpur.

5. Baan Making:

Due to the easy availability of Munj and Babbar, an important raw material, Baan making is still an important local industry. The introduction of Baan making machines has enhanced the scope of profits. People in their spare time engage themselves in this industry.

6. Rope Making:

Due to the availability of San or Flax, rope making is still pursued as an industry. However, this is on the decline due to stiff competition from synthetic rope, produced in industrial units located outside the district.

7. Khes and Durri Making:

Under the patronage of Khadi Gramodyog Sangh, Adampur, the local weavers get gainful employment in weaving Khes and Durries. The raw material for these articles is supplied by the Khadi Gramodyog Sangh.

The Rosin and Turpentine industry which was an important industry of the district is on the decline as majority of centers of raw material are now located in Himachal Pradesh territory and raw material is not easily available. Whatever industrial units are in operation, they get raw material from within Punjab territory, which is not sufficient.

8. Pottery:

The local *Kumhars* (potters) at Dasua, Tanda, Hoshiarpur had specialized themselves in the manufacture of Surahis of fine shapes and light weight but this has become an extinctive product now. Hoshiarpur was once renowned for the production of woolen/Pashmina Shawls, which in fact was the monopoly of Muslim weavers. This industry extincted with the migration of Muslim weavers. Further the non-availability of fine wool and Pashmina due to import restrictions has also contributed for the extinction of this industry.

The government, realizing its duty towards development of industry, has set up an Industrial Estate Hoshiarpur, where there is provision for 20 industrial units. Two Rural Industrial Estates at Hariana and Dasua have been established, each having provision for 8 industrial units. Also an Industrial Development Colony has been set up at Hoshiarpur with a provision for 53 industrial units. An Industrial Focal Point was developed in Hoshiarpur, which had an area of 82.4 acres. A total of 93 industrial plots were developed here, out of which 91 were allotted and occupied by the parties. Only 2 plots remained vacant as on February, 2001.

In 2000-01 there were 663 registered factories in the district, out of which 655 were working and employed a total of 22,424 workers. As against this in 1990 there were only 369 registered factories, out of which 364 were working and employed 15,840 workers. Thus there was an increase of 41.6 per cent workers over the decade and 79.7 per cent in registered factories in the district. There were 1,541 workers per lakh of population in 2000 as against 1274 workers in the Registered Working Factories in 1990 in the district.

Three Industrial Training Institutions, one each at Hoshiarpur, Talwara and Dasua with total intake of 776 students, were functioning in 1990-91 in the district. These imparted training in many industrial trades and provided skilled worker force to various industrial units in the district. Besides, one Polytechnic-JR (Jagat Ram) Government polytechnic is functioning at Hoshiarpur with intake in Diploma courses for 315 students during 2000-01. However, there is no Engineering College in the district. Since, the Rayat Engineering College in Balachaur Tahsil has been transferred to Nawanshahr. There are two Government industrial Schools, one each for boys and girls functioning at Hoshiarpur. Also there is one Industrial Training Centre at Garhshankar for students belonging to Scheduled Castes and Backward Classes.

Hoshiarpur is considered a home for Shisham wood, an important raw material for plastic inlay work comprising Lacquer ware, wooden toys and ornamental furniture. To meet the demand of wood, Government had opened a wood seasoning plant at Hoshiarpur in 1965, which is rendering good service to the artisans. Besides, government had opened a Quality Marking Centre for Handicrafts and Textiles at Hoshiarpur in 1967. The specifications followed by the centre are as per standards laid down by the Indian Standards Institute (ISI). However, where no standards have been prepared by the ISI, the centre prepares its own specifications in consultation with the manufacturers and the Advisory Committee.

The Punjab State Industrial Department helps the entrepreneurs with (1) Supply of machinery on hire purchase basis, (2) Supply of raw material, (3) Marketing assistance and (4) Quality Marking Scheme. The State organizations like: (1) The Punjab State Small Industries Corporation Limited, Chandigarh: (2) The Punjab State Industrial Development Corporation, Chandigarh: (3) The Punjab Financial Corporation, Chandigarh and (4) The Punjab Export Corporation Limited, Chandigarh, render valuable services to entrepreneurs and artisans with finance and technical guidance in efficient running of the industrial units of various sizes in the district. The cumulative affect of these efforts/schemes has resulted in the development of large, medium and small industries to a great extent and there is hope for future also.

Minerals and Mining:

Occurrence of coal has been reported in Ramtatwali and Dholbaka areas of the district but these deposits are not considered worth exploiting so far. The building material like boulders, gravel and sand are easily available. Boulders and gravel found in various ephemeral and potential streams. These are found in plenty around Garhshankar and Talwara areas of the district, Sand found in all the choes is of fine quality in the villages, viz, Nasrala, Daiwal, Sukhiabad (Bhangi Choe), Brupur and Mandial.

Huge deposits of white quartz fragments have been located in Garhshankar area of the district. Investigations carried out by the State and Central departments have proven the existence of about 4.5 million tonnes of this mineral. Isolated pockets of calcarious tufas have also been located in the Birampur and Hazipur area of Tahsil Garhshankar, So far about 1.6 million tonnes of calcarious tufas deposits have been proved to exist in this area.

Forestry:

Hoshiarpur has suffered the most due to the reckless cutting of forests resulting in the deterioration of soil. The choe menace is the direct result of reckless destruction of trees and vegetation on the hill slopes. The rapid flow of rain water did much mischief throughout the district and one comes across a choe roughly at every kilometer.

The government is aware of this menace. An office of Forest Division was, therefore, opened at Hoshiarpur on 1st April, 1939. Also a forest Research Training School was opened at Hoshiarpur for imparting training in forestry to the Forest Rangers, Foresters and Forest Guards.

In 2000-2001 the area under forests in the Control of the Hoshiarpur Division was 1,094 Sq. km. Out of this (i) 27 Sq. km. was Reserve forests. (ii) 153 Sq. km. was Protected forests and (iii) 21 Sq. km. was un-classed forests (iv) 893 Sq. km. was under Section 4 and 5 of Punjab Land Preservation Act 1900 and no area was reported under Section 38 of the Indian Forest Act 1927. There were three reserve forests viz. Bindra Ban, Karanpur and Ban Nand Bir,. all located in Dasua tahsil. These forests generally have trees like Dhak, Amaltas, Kenchi, Chhal Ber, Kinnu etc. Also Bamboo clumps grew at their best on northern aspects. In the protected forests trees like Chil, Khair Kinuu, Flahi, Mango, and Eucalyptus grew in abundance. In the un-classed forests grew trees like Shisham, Kikar, Khair and Kinnow. In the year 2000-2001 there was an area of 201 Sq. km. under State forests and 893 Sq. km. under Private forests.

Trade and Commerce:

Hoshiarpur was an important centre of trade and commerce dealing with the hilly areas. Its traders had commercial/trade links with Tibet, China and areas in Central Asian republics of present USSR. The important centres with which goods traded were: Leh, Yarik Sumer, Sinkiang etc. Also it served as a major supply centre to newly merged hilly areas of Himachal Pradesh till the emergence of Nangal and Pathankot towns as competitors. The major items of export, apart from the agricultural products were; ivory inlay, wooden furniture, goods, rosin and turpentine. The main trading commodities were: cotton, silk and wool, Phulkaris, shoes, copper and brass vessels, pottery, glass bangles, wood curving, ivory inlay work and sugar.

Trade, both retail and wholesale, is mainly in private hands. Thus private traders are everywhere. Even the retail shopkeepers are found in the remote villages. The marketing cooperatives are also in business but in the restrictive form as only limited items such as sugar, kerosene, cheep clothes, soap, fertilizers, insecticides etc, are dealt by the marketing cooperatives. The consumer items are, however, available from the fair price shops which deal in wheat, wheat flour, sugar, kerosene, cheep cloth, vegetable oil etc. The super bazars or fair price shops sell all types of consumer items of general merchandise grocery.

The first cooperative consumer store namely The Hoshiarpur Central Cooperative Consumer Store Ltd. was opened in the district in August, 1963. There were 404 Cooperative agricultural and 100 non agricultural Cooperative Societies in the district in 2000-2001.

In order to regulate marketing of agricultural produce the government has declined certain markets as regulated markets. In these markets market committees have been formed to ensure proper functioning of the markets. In the year 2000-2001 there were only 4 regulated markets in the district. These markets are located at; (i) Garhshankar, (ii) Hoshiarpur,(iii) Mukerian,(iv) Urmar Tanda and (v) Dasua. To these markets 29 sub yards have been attached. There were 19,240,000 quintals of food grains and non-food grains arrivals in these markets in the year 2000-2001 as against 4,355,000 quintals in the year 1990-91. The main arrivals in these markets were; however food grains: Paddy 224,000 tonnes, wheat 221,000 tonnes and maize 5,000 tonnes in 2000-2001. All the food grain arrivals in the district were purchased by various agencies such as State Govt., FCI, Markfed Punsup, PSWC and other traders.

In order to facilitate sale and purchase of milk and draught animals, cattle fairs are held in the district at various places under the management and control of Block Samitis/ Zila Parishads. There are four places where the cattle fairs are held: (i) Mukerian every month, (ii) Tanda every month, (iii) Bhunga twice a year in the month of May and October, and (iv) Mahilpur once in August. The traders of Hoshiarpur dealing in goats, sheep and pigs visit Jalandhar Cantonment (Jalandhar district) which has emerged as the biggest purchase centre.

At Hoshiarpur there is one vegetable-cum-fruit market which serves both sellers and buyers. The market which was previously located in the congested area of the city has been shifted to a new location on the Hoshiarpur - Phagwara road near the old habitation of village Purhiran.

Communication:

An efficient system of communications is a sign of development of any area. The backwardness of Hoshiarpur in the industrial field was attributed to the under-development of various means of communications. Over the years the district has made good progress in this field and has succeeded in attracting large and medium sized industrial units, which have thrown open vast opportunities for employment to the local youth, who hitherto had to migrate to foreign for gainful employment. The pace of out migration has also slowed down in the recent past.

Hoshiarpur district lies in the Firozpur Division of Northern Railway with all the rail lines passing through it being of broad gauge. There are in all 16 railway stations on the three rail lines passing through this district viz:

Jammu Tawi- Pathankot-Mukerian-Jalandhar City Branch line; I) Chack Kalan,(ii) Bhangala,(iii) Mikerian; (iv) Ghausipur, v) Uchi bassi,(vi) Dasua,(vii) Garna Sahib,(viii) Khudda Kurala and (ix) Urmar Tanda;

Jalandhar City-Hoshiarpur branch Line; (i) Nasrala and (ii) Hoshiarpur and **Jalandhar City Branch Line** (i) Garhshankar (ii) Satnaur Badesron (iii) Saila Khurd (iv) Mahangralwal Doabs and (v) Hoshiarpur City were linked by rail with Jalandhar Cantonment in 1913. Mukerian was linked with by rail in 1915. Mukerian was further connected by rail with Pathankot after partition as there was necessity to connect Pathankot with Jalandhar City as an alternate rail route to Amritsar-Pathankot rail line. The Jaijron Doabe was connected by rail with Nawashahr in 1917. Both Hoshiarpur Jaijron Doab stations are railway terminals in the district.

Since the completion of Bhakra Dam Project, need was felt for gainful absorption of huge technical manpower and machinery, the work on Pong Dam was started. As a result a rail track from Mukerian to Pong Dam site was laid out for carrying men and materials. This rail

track comprising a total length of 40 Kms. remained under the exclusive control of the Project Authorities and was never opened for general public. A part of the track from Mukerian to Talwara, is presently lying idle. However, track between Talwara to Terrace is still being utilised for carrying men and materials to the Power House for maintenance.

The district being strew with choes on all sides used to present a very pathetic picture during the rainy season. The things started improving after independence when a plan was chalked out to tame these choes by constructing bridges over them and canalisation. The metalling of roads was also taken up and some of the roads were widened to facilitate road traffic. The net result was that there emerged some good roads, which could be described as all weather roads. The National Highway No. I passed through this district in its Jalandhar – Mukerian-Pathankot portion. (85 km through Hoshiarpur district). A total length of 232 km of State Highways also passed through this district. The following are the State Highways: i) SH-19 Jalandhar-Hoshiarpur-Dharamshala: ii) SH-22 Chandigarh-Nangal-Hoshiarpur-Tanda-Gurdaspur and (iii) SH-24 Dasua-Hoshiarpur-Garhshankar Balachaur. Thus there is a marginal increase in road length to the tune of 151 kms. from 3140 kms. to 3291 kms. It would be seen that as far as extension of road length is concerned, near saturation point has been reached. In fact, much more attention is being now devoted to improve the quality of roads, which are now wider, better maintained and provided with bridges to give them an all weather look. But this is not the case with many link roads, which do not get adequate attention in maintenance/repairs. The following roads are all weather roads; (i) Hoshiarpur-Jalandhar, (ii) Hoshiarpur-Tanda, (iii) Hoshiarpur-Rupnagar, (iv) Hoshiarpur-Dharamshala and (v) Hoshiarpur-Phagwara. The Hoshiarpur-Una Road though an important road, is not all weather as few bridges are still being built in the Punjab territory. The district is also connected by road with Gurdaspur district through Tanda-Sri Hargobindpur road. A permanent bridge constructed some years back on Anandpur Sahib-Garhshankar road over Satluj and Sawan rivers in Rupnagar district has greatly facilitated traffic as the distance between Anandpur Sahib and Garhshankar has shortened. This also serves as an alternate route between Garhshankar and Rupnagar whenever there is breach of Balachaur-Rupnagar road due to heavy rains. The Anandpur Sahib Bridge is the longest bridge in the State.

Electricity and Power:

The first electricity generating unit was installed in the district by the Hoshiarpur Electricity Supply Company at Hoshiarpur. This was a Diesel Generator Set, which started supplying electricity in the year 1930-31. This was considered to be a costly proposition. In 1953-54, the Hydro power produced at Joginder Nagar was supplied in the district. The distribution of electricity was the responsibility of Punjab Public works Department (PWD) from 1931 to 31st Jan, 1959. Its functions were, however, taken over by the Punjab State Electricity Board (PSEB) from 1st February, 1959. This arrangement continues till today.

On the Mukerian Hydel Channel 4 Power Stations have been set up. Each of these power stations is fitted with 4 generators (turbines) having a capacity of 15 Mega Watt (MW). Thus, each power station has a capacity of 60 MW which works out to a total power capacity of 240 MW. These power stations are being operated and maintained by the Punjab State Electricity Board (PSEB). The Pong Dam Power House is, however, located outside the district in Himachal Pradesh territory and is under the control of the Bhakra Beas Management Board (BBMB).

During the year 2000-01 the district consumed 784.8 million KWH units of electricity which in terms of total consumption of electricity in the State works out to 4.1 percent. The corresponding figures for 1990-91 were 68.2 crore units of electricity and 5.3 per cent electricity consumed. This shows that during the decade the consumption of electricity has gone up by 15.2 per cent whereas the percentage to total has increased by 1.2 per cent. Another noticeable feature of consumption of electricity is that during 1980-81 agriculture sector was the top consumer with 10.1 crore units consumed. This trend continued during 2000-2001 also with industrial sector on the top consuming 270.0 million units. The

households using electricity in 1990-1991 constituted 89.4 per cent which increased to 99.8 per cent during 2000-2001. There were 272,325 consumers of electricity in the year 1990-91 which have increased to 345,094 during 2000- 2001.

The number and percentage of consumption by users was domestic 269,611 (78.1 %), commercial 38,571 (11.2 %), Industrial 38.39 (1.1 %), Public lighting and bulbs consumers 29(Negligible) and Agriculture 33,044 (9.6 %) during 2001-2001. The average sale of electricity per consumer in the district decreased from 2503 units in 1990-1991 to 2330 units during 2000-2001. The number of tubewells energized was 28,969 in 1990-1991 which increased to 33,044 during 2001.

Medical and Public Health:

The first Civil Hospital was opened at Hoshiarpur in 1904. It had provision for 45 beds (33 males and 12 females). Also there were government Civil Dispensaries at Dasua, Tanda, Garhshankar, Hariana Gardhiwala, Maini, Mukerian, Hazipur and Mahilpur. Earlier the American Presbyterian Mission opened a Zanana Hospital at Hoshiarpur. It had an indoor provision for 6 beds. The local *Sianas* (wise men) or *Pehalwans* used to attend to broken limbs. They are also consulted even in the present day.

After independence the government has made sincere efforts to popularize indigenous systems of medicines, viz., Ayurveda and Unani with the result, the number of Ayurveda and Unani dispensaries in the district shot up to 46 and 2 respectively in the year 2001. These are under the charge of Director, Ayurveda, Punjab. A belief that Ayurvedic medicines do not produce any adverse effect on the patients during or after treatment has added to the popularity of this system of medicine. Government is now laying more stress on research and development of indigenous systems of medicines.

The State Government had done much to open and run a number of medical institutions such as Hospitals, Public Health Centres and Dispensaries throughout the length and breadth of the district. As on 1st April, 2001 there were 167 medical institutions, 7 Hospitals, 34 Public Health Centres, 81 Dispensaries in the district. Out of these 127 are in rural areas and 40 in the urban areas. As many as 164 of these are owned by the State Government, one by the local government and only 2 by the voluntary organizations under the control of Director, Health and Family Welfare, Punjab, Besides there are 7 Homeopathic dispensaries under the control of Chief Homoeopathic, Punjab.

Education:

Though Hoshiarpur is an economically backward district, yet in the field of education and literacy, it is one of the most advanced districts of the State. The people of the district being adventurous were the first to migrate to foreign countries in the nineteenth century. Consequently it aroused political consciousness and sense of patriotism in them to serve their motherland and they brought with them new ideas about education. They had sufficient finances to start a number of educational institutions in the district. In 1901 the number of private educational institutions was 4 High Schools, 8 Anglo-Vernacular Middle Schools and 134 Primary Schools. The number of private institutions in 1911 was 4 High Schools, 9 Anglo-Vernacular Middle Schools and 189 Primary Schools.

The Government High School, Hoshiarpur, was established on 27th June, 1948. The private educational organization such as the Dayanand Anglo-Vedic (DAV) Trust. The Chief Khalsa Diwan, The Sanatan Dharm Sabha, Christian Mission and Muslim education Society opened and ran a number of educational institutions throughout the length and breadth of the district. By December 1947, there were 3 colleges, 46 high schools, 28 middle schools and 294 primary schools in the district.

As on 30th September, 1990, there were 13 (all boys) Arts/Science/Commerce/Home Science colleges, 1 (boys) B. Ed. college, 48 (40 boys and 8 girls), 4 S/Secondary Schools, 193 (181 boys and 12 girls) High/Post Basic Schools, 64 (all boys) Middle Schools, 849 (845 boys and 4 girls) Primary Schools, 1(Boys), JBT Teachers Training School, 1 (boys), Polytechnic Institute and 6 (5 boys and 1 girls) Technical Industrial Art Craft Schools. It may, however, be noted that colleges/schools mentioned as girls are exclusively for girls, whereas those shown as boys are mostly co-educational.

As on 30th September, 2000 there were 17 Arts, Science, Commerce and Home Science Colleges (12 boys and 5 girls), 1 B. Ed College (boys), 77 Senior Secondary Schools (71 boys and 6 girls), 178 High/Post Basic Schools (165 boys and 13 girls), 186 Middle/Senior Basic Schools (182 boys and 4 girls), 1,259 Primary/Junior Basic Schools (1,256 boys and 3 girls), 1 Teacher/Training School (boys) and 1 Polytechnic (boys).

At Hoshiarpur, is located a Vishveshvan and Vedic Research Institute which was initially started at Shimla in 1903 for the preparation of vedic lexicon. After its sojourn at Shimla, Indore and Lahore, it ultimately found its permanent home in November, 1947, in Sadhu Ashram at Hoshiarpur. This institute is engaged in research work in Sanskrit and Indian History. Punjab University has opened its Sanskrit Department in the Sadhu Ashram, where MA classes in Sanskrit are held for quite some time. This institute has preserved old rare manuscripts on which research is conducted. It has gained distension in research work in Sanskrit and Indo-Logical studies.

The government of India has opened a Navodya Vidyala at Paujowal in Garhshankar tahsil, where students from different nearby areas get instructions in various subjects. The students are required to reside in the hostel in the rural background. However, there is no Central School in this district.

Occupations:

Hoshiarpur is primarily a rural district as according to 2001 Census 80.3 per cent of its population is reported residing in the villages. Therefore, very sizeable part of its population may be engaged in Agriculture. In 2001 Census 40.7 per cent of its workers are reported as engaged in agriculture which forms the principal source of livelihood of the people in the district. Out of a total work force of 415,123 main workers, 341,093 are male workers, whereas remaining 74,030 are females main workers. This shows preponderance of male workers over female workers by a wide margin. The break up of main workers by Industrial Categories as per 2001 Census is: 105,701 cultivators, 46,435 agricultural labourers, 10,425 households' industry workers and 252,562 other workers.

Besides, there are 98,228 marginal workers (Males 46,269 and Females 51,959). Thus it will be seen that among marginal workers, female workers out number male workers by a large proportion. Further there are 967,385 non workers comprising 377,770 males and 589,615 females.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical

structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These

different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituents a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 100,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in huge pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

List of Scheduled Castes and Scheduled Tribes:

The Government of India by Gazette Notification under Article 314(1) of Indian Constitution has declared some castes, races or tribes or parts of or groups within castes, races or tribes as Scheduled Castes as there is no standard definition of Scheduled Castes. Similarly, Scheduled Tribes mean all such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are declared by the President of India to be treated as Scheduled Tribes under Article 342(1) of the Indian Constitution. There is slight change in the definition of Scheduled Castes in 1991. Before that, Scheduled Castes could belong to Hindu or Sikh religion. But from 1990, in addition to Hindu and Sikh religions, Scheduled Castes may belong to Buddhists religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the

jurisdiction of that State or Union Territory and not outside. In Punjab State, 37 castes were notified by the State Government as Scheduled Castes at the 1991 Census and there is no change at the 2001 Census. Following 37 castes have been notified as scheduled castes in Punjab;

1. Ad Dharmi
2. Balmiki, Chura, Bhangi
3. Bangali
4. Barar, Burar or Berar
5. Batwal
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar Raigar, Ramdasi or Ravidasi
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhilla, Gandil, Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut, Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and / or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

(vi) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz.

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$\text{SBR} = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

1) Migration

2) Internal and International Migration

3) Rural - Urban component of migration

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UACity/Town. These are :

M7 (5,000,000 and above)
M6 (2,000,000 to 4,999,999)
M5 (1,000,000-1,999,999)
M4 (500,000-999,999)
M3 (300,000-499,999)
M2 (200,000-299,999) and
M1 (100,000-199,999)

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for

Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001- Census Findings - Population and its distribution:

The following table shows distribution of rural and urban population by tahsils in the district.

POPULATION, NUMBER OF VILLAGES AND TOWNS, 2001

Name of Tahsil	Population									Number of Villages		No. of Towns
	Total			Rural			Urban					
	P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13
Dasua	340,494	173,873	166,621	292,068	148,679	143,389	48,426	25,194	23,232	396	381	3
Mukerian	308,195	156,270	151,925	258,877	130,369	128,508	49,318	25,901	23,417	310	306	3
Hoshiarpur	516,110	271,275	244,835	346,946	181,079	165,867	169,164	90,196	78,968	414	405	4
Garhshankar	315,937	163,714	152,223	290,771	150,548	140,223	25,166	13,166	12,000	297	294	2
District Total	**1480,736**	**765,132**	**715,604**	**1188,662**	**610,675**	**577,987**	**292,074**	**154,457**	**137,617**	**1417**	**1386**	**12**

According to 2001 Census, Hoshiarpur district has a population of 1,480,736 and is comprised of 765,132 males and 715,604 females. This makes 6.1 per cent of State's population.

Among the tahsils, Hoshiarpur with a population of 516,110 is the most populous while Mukerian with a population if 308,195 is the least populous tahsil in the district. In other words, tahsil with the highest population is 207,915 more than the tahsil having the least population. The population of other tahsils; Dasua 340,494 and Garhshankar 315,937. On an average, a tahsil in the district has a population of 370,184 compared with 338,319 in the State as a whole. Out of the total population the district 80.3 per cent is rural and 19.7 per cent is urban; the corresponding percentages of rural and urban population in the State are 66.1 and 33.9 respectively.

Out of 1,417 villages of the district 1,386 are inhabited. A tahsil on an average has 354 villages. The number of inhabited villages among tahsils varies between 294 in Garhshankar tahsil and 405 in Hoshiarpur tahsil. Three of the four tahsils are comprised of more than 84 per cent of rural population namely Gharhshankar (92.0%), Dasua (85.8%) and Mukerian (84.0%).

Urban population in the district is distributed over 12 towns in the district. Out of which 9 towns are statutory towns where as remaining 3 towns are Census towns. A town on an average has a population of 24,340 compared with 52,627 of the State as such. This signifies that the average size of a town in Hoshiarpur district is significantly smaller than that of the State. Among the towns in the district, Hoshiarpur (149,668) is the most populous while Sham Chaurasi (4,245) the least populous town in the district. Even Hoshiarpur tahsil as a whole is better urbanized (32.8%)as compared to other tahsils (16 % or below).

Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the Census organization to classify towns according to their population size.

Class	Population size	No. of Towns.
1	2	3.
Class – I	100,000 and above (Generally referred to as city)	1
Class – II	50,000 to 99,999	-
Class – III	20,000 to 49,999	4
Class – IV	10,000 to 19,999	2
Class – V	5,000 to 9,999	4
Class – VI	Less than 5,000	1

Out of 12 towns in the district, one is Class I town (city), four each fall in the population size class III and class V, two are class-IV towns and the remaining one is Class VI town. There is no town under Class II. Nearly half 51.2 % of the urban population in the district is residing in Class I town and 29.5 per cent is residing in Class III town in the district. These Class I and Class III towns accommodate more than 80 per cent of the urban population of the district. The share of Class IV and Class V towns is 17.8 per cent, while class VI accommodates only 1.5 per cent of the urban population of the district.

During this decade the number of towns has changed from 9 in 1991 Census to 12 in 2001. There has been an addition of 3 towns consisting 2 census towns and one Nagar Panchayat. These three towns together have added a population of 22,811 which is nearly one-eight (7.8%) of the urban population of the district. Among the new towns added, one is Class IV town and the remaining two are Class V towns. No town of 1991 has been declassified at the 2001 Census.

Population Growth, Density and Sex Ratio

Population Growth :

During 1991-2001, Population of Hoshiarpur district has increased from 1298,712 in 1991 to 1,480,736 in 2001 resulting in a net addition of 182,024 persons during this decade. In percentage terms the district has recorded a decadal growth rate of 14.0 per cent which is quite lower than that of the Sate (20.1%). Among the districts, Hoshiarpur with a decadal growth rate of 14.0 per cent during 1991-2001 ranks 16th and this growth rate is significantly lower than that of the district (16.8%) during 1981-1991 owing to the transfer of Balachaur tahsil to Nawanshahr district.

At the 1901 Census the district had a population of 650,662 which reduced to 603,685 in 1911. It further rose to 609,650 in 1921. In 1981 the population of this district crossed one million mark with 1,157,498. Again it increased to 1,298,712 in 1991 Census. At 2001 Census the population recorded was 1,480,736.

Density :

Punjab with a population of 24,358,999 and an area of 50,362 sq. km. has a density of 484 persons per sq. km. Among the states and Unior Territories in the country, Punjab occupies 10th position in terms of population density. The states/Uts which are more densely populated than Punjab includes; Delhi, Chandigarh, Pondicherry, Lakshadweep, Daman & Diu, West Bengal, Bihar, Kerala and Utter Pradesh. During 1991-2001 Punjab population density has improved from 403 to 484.

The density of population varies considerably among the districts in the state. Ludhiana (848) is most densely populated in the state. Hoshiarpur district (437) occupies 10th position among the districts in the State.

Sex Ratio :

Sex ratio is derived as the number of females per 1000 males. Generally speaking differentials in mortality conditions of males and females, 'male-female ratio at birth, sex selective migration are the key factors which determine the sex composition. Significant feature of Punjab's population is the preponderance of males over females. Out of the total population in the State 12,985,045 are males and 11,373,954 are females resulting in an overall sex ratio of 876 which is significantly lower than the country as a whole (933).

Within the State, the districts among themselves show considerable disparity, it is the highest in Hoshiarpur District (935) and the lowest in Ludhiana (824). Hoshiarpur district with a sex ratio of 935 ranks 1st among the districts in the State. Apparently, sex ratio in the district is significantly much higher than the State (876) and even slightly better than India (933).

Among the tahsils in the district the sex ratio is the highest in Mukerian (972) and the lowest is Hoshiarpur (903). The remaining two tahsils of Dasua and Garshankar have the sex ratio of 958 and 930 respectively.

Rural sex ratio in the district is 946. Among its constituent tahsils, it varies between 916 in Hoshiarpur tahsil and 986 in Mukerian tahsil. Likewise the urban areas in the district have a sex ratio of 891 and among the tahsils it varies between 876 in Hoshiarpur tahsil and 922 in Dasua tahsil.

The sex ratio in child population is considerably low in the State (798) and Hoshiarpur district has a sex ratio of 812. Among the tahsils Garhshankar with a child sex ratio of 841 emerges at the top while in other three tahsils it fluctuates between 779 in Dasua tahsil and 828 in Hoshiarpur tahsil. Among the towns of Hoshiarpur district the sex ratio varies between 684 in Chohal and 926 in Urmar Tanda.

Sex Ratio reflects the socio-economic and democratic characteristics of the population. It unfolds the status of women in the society and care of the girl child in particular. Unfortunately the sex ratio within the State and its constituent districts has remained to be low throughout. At the beginning of the 20th century, the sex ratio was 832 in 1901 which declined to 780 in 1911. Ever since, the sex ratio in the state showed gradual improvement till 1991 when it reached 882, however, it has declined to 876 at 2001 Census, exhibiting a fall of 6 points in the State.

Work Participation Rate

Definition of Work and Classification of Workers:

How the 'work' is defined by the Census needs to be understood properly. Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the Census of India 2001, which includes production of milk even for domestic consumption. In the 1991 Census cultivation of certain crops even for one's self-consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as tomatoes, all types of flowers, fruit and tuber potatoes, chilies and turmeric,

pepper, cardamoms, vegetables etc, in other words plantation of tea, coffee, rubber, coconut and betel nuts have been classified under plantation and not included in cultivation.

The reference period for recording the economic activity of any person is preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last one year are recorded as main workers while those who had worked for less then six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, workers in Household Industries and Other Workers.

Punjab, with a work participation rate of 37.5 per cent, ranks 24th among the States/Union Territories in the Country and thus, the work participation rate in the State is lower than that of India (39.1%). Among the districts in the State, the proportion of workers varies between 44.9 per cent in Nawanshahr district and 33.3 per cent in Gurdaspur district. In all 10 out of 17 districts in the State have shown work participation above the state average and among them five districts have two-fifth of their population reported as worker. Besides Nawanshahr, they include Bathinda (42.3%), Mansa (40.9%), Sangrur (40.7%) and Moga (40.1%).

Main workers and Marginal workers:

32.2 per cent of Punjab's population has been recorded as Main Workers and 5.3 per cent as Marginal Workers. The corresponding figures for 1991 Census were 30.1 per cent and 0.9 per cent respectively. In Hoshiarpur district Main Workers and marginal Workers constitute 28.0 per cent and 6.6 per cent of the total population respectively. Among the tahsils in the district the percentage of workers varies between 33.6 in Dasua and Mukerian tahsils and 35.9 in Garhshankar tahsil. The percentage of Marginal Workers varies between 5.1 in Hoshiarpur tahsil and 8.5 in Mukerian tahsil.

Literacy :

Any person who is able to read and write with understanding in any language is recorded as literate. As in 1991 all the children below 7 years of age have been treated as illiterates.

69.7 per cent of the State population is literate which is higher than that of the country as such (64.8%). Among the States and Union Territories Punjab occupies 16th Place in term of literacy. In Hoshiarpur district 81.0 per cent of the population is recorded as literate which is not only higher than the State average by 11.3 percentage points but exceeds all other districts in the State. Rupnagar (78.1%) and Jalandhar (78.0%) are the only two districts which have fairly comparable literacy rate with Hoshiarpur. Among the tahsils, Hoshiarpur with 83.0 per cent ranks at the top while Garhshankar with 78.0 per cent is placed at the bottom. Between the two sexes the literacy among males and females in the district does not show a wider gap. In Hoshiarpur district 86.5 per cent among males and 75.3 per cent among females are literate while the corresponding figures for the State are 75.2 per cent and 63.4 per cent respectively.

Male Female Literacy :

64.7 per cent in rural area 79.1 per cent in urban area are illiterate in the State. Among the districts the rural literacy rate varies between 79.8 per cent in Hoshiarpur and 47.5 per cent in Mansa. The corresponding variation in urban areas is 85.8 per cent in Hoshairpur and 69.9 per cent in Sangrur district. This reflects that in urban literacy Sangrur district is the lowest among all the districts in the State. Among tahsils in the district rural literacy varies between 87.1 per cent in Hoshiarpur and 84.2 per cent in Garhshankar tahsil while the urban literacy varies between Mukerian 91.6 per cent and Garhshankar tahsil 84.2 per cent. Among males

85.6 per cent and among 73.7 per cent are literate in rural areas in the district while the corresponding percentage in urban areas are 89.4 per cent and 81.8 per cent.

Religion:

It has been customary for the Indian Census to provide information on religious persuations of its people. Religion is one of the basic cultural characteristics of population and several religions have thrived in the secular state of India. Apparently, information on various religious communities in the country has been of great interest and useful to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. Question 7 of the household schedule canvassed at the 2001 Census pertained to religion. The instructions to enumerators were to record faithfully the religion of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes in Census 2001:-

Hindus	-	1
Muslims	-	2
Christians	-	3
Sikhs	-	4
Buddhists	-	5
Jains	-	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Sikhs form predominant religious community in the State as they account for 59.9 per cent of the State's population as per 2001 Census. In absolute terms Sikh population in the State is 14592387. Hindus form the second largest community in the State and their share in total population is 36.9 per cent. The share of Muslims, Christians, Buddhists and Jains in total population is 1.6 per cent, 1.2 per cent, 0.2 per cent and 0.2 per cent respectively. Sikhs and Hindus together constitute 96.8 per cent of the total population of the State.

In Hoshiarpur district 58.9 per cent are Hindus, 38.8 per cent Sikhs, 1.0 per cent Muslims, 0.9 per cent Christians, 0.2 per cent Buddhists and 0.1 per cent Jains. Hindus and Sikhs together constitute 97.7 per cent of the total population of the district and is among 4 districts where Hindus population exceeds Sikh in the state. Besides Hoshiarpur, they include Gurdaspur (47.3%), Jalandhar (59.0%) and Nawanshahr (60.7%).

Scheduled Castes and Scheduled Tribes:

In the State out of 24,358,999 persons 7,028,723 persons belong to Scheduled Castes as per 2001 Census. As such 28.9 per cent of the State population belongs to Scheduled Castes. In Hoshiarpur district Scheduled Castes population accounts for 34.3 per cent of the district. Among the tahsils, it is the highest in Garhshankar (40.6%), and the lowest in Mukerian (21.1%).

During 1991-2001 Scheduled Castes population in the State has increased by 22.4 per cent which is higher than that of Hoshiarpur district (15.5 %). In the district 77.7 per cent of the scheduled castes population is literate which is significantly much higher than that of State (52.2%).

In the district 25.6 per cent of the population is urban whereas the rural population is 36.4 per cent.

There is no Scheduled Tribes population in the State.

(viii) Brief Analysis Based on Primary Census Abstract

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Dasua	303,018	260,722	42,296	340,494	292,068	48,426	12.4	12.0	14.5	14.0	14.2
2	Mukerian	266,032	230,840	35,192	308,195	258,877	49,318	15.8	12.1	40.1	13.2	16.0
3	Hoshiarpur	445,031	312,142	132,889	516,110	346,946	169,164	16.0	11.2	27.3	29.9	32.8
4	Garhshankar	284,631	272,870	11,761	315,937	290,771	25,166	11.0	6.6	114.0	4.1	8.0
District Total:		**1,298,712**	**1,076,574**	**222,138**	**1,480,736**	**1,188,66**	**292,074**	**14.0**	**10.4**	**31.5**	**17.1**	**19.7**

Table 1 shows tahsil wise population for Total, Rural and Urban areas of the district. Two sets of population data have been given for all the tahsils of the district i.e. for 1991 and 2001 Census. When we analyse the decadal variation of population between 1991 and 2001, we find that among all the tahsils the maximum growth of population is in tahsil Hoshiarpur (16.0%) while the least decadal growth is in tahsil Garhshankar (11.0%) for total population. For rural areas the maximum growth of population has been observed in tahsil Mukerian (12.1%) while the least has been found in tahsil Garhshankar (6.6%). Among urban areas, the maximum growth of population is in tahsil Garhshankar (114.0%) while the least has been observed in tahsil Dasua (14.5%).

Further, it has been seen that Hoshiarpur tahsil which was highly urbanised in 1991 ranks first in 2001 Census also where proportion of urban population increased to 32.8 per cent in 2001 Census from 29.9 per cent reported in 1991 Census. No other tahsil supersedes district average (19.7%).

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

10	Garhshankar	19 (13.4)	27,132	25,210	0 (0.0)	0	0	0 (0.0)	0	0
Districts (Rural) Total:		**97 (7.0)**	**140,683**	**131,539**	**5 (0.4)**	**16,495**	**15,629**	**0 (0.0)**	**0**	**0**

Out of 1417 villages in the district, 31 are uninhabited comprising 15 villages in Dasua tahsil, 4 villages in Mukerian tahsil, 9 villages in Hoshiarpur tahsil and 3 villages in Garhshankar tahsil, The inhabited villages, which number 1386 are distributed over 10 CD blocks in the district. A CD block in the district on an average has 139 inhabited villages and a population of 118,866; the corresponding figures for the State as such are 89 and 116,641 respectively. Among these, 162 (11.7%) inhabited villages have a population of less than 200, Another 355 (25.6%)villages too, have small population size in the range of 200-499. As many as 767(55.3%) constitute the size class 500-999 and another 97(7.0%) have population size in the range of 2,000-4,999. Large villages with population 5,000-9,999 are the characteristics of 5(04%) villages. There is no village having a population of 10,000 or above.

In other words 517 (37.3%) villages in the district are small sized with a population of less than 500 and they contain 12.2 per cent of the rural population of the district, 767 (55.3%) are in the range of 500-1999 and they contain more than one-half (62.2 %) of the districts rural population, 97 (7.0%) are in the range of 2,000-4,999 and they contain little more than one-fifth (22.9%) of the rural population of the district, and 5 (0.4%) are large sized with a population of 5,000 or more and they accommodate 2.7 per cent of the rural population of the district.

Similarly in different C.D. blocks maximum number of 36 (21.2%) villages fall in the range of less than 200 in Dasua, 36 (31.9%) and 27 (23.9%) villages in Tanda fall in the range of 200-499) and 500-999 respectively. Further 51 (35.9%) villages fall in population range of 1000-1999 in Garhshankar and 21 (17.4%) villages in Hoshiarpur-II are covered in the range of 2000-4999 whereas only 2 (1.4%) villages represent the range of 5000+ in Mukerian.

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001

Serial number	Name of town	Urban status of town
1	2	3
New Towns		
1	Hazipur	NP
2	Chohal	NP
3	Mahilpur	NP
Declassified and Merged Towns		
1	Denotified	NIL
2	Declassified	NIL
3	Merged	NIL

Table 3 exhibits new towns added, denotified, declassified and merged towns in the district at the 2001 Census

Further, no town of Hoshiarpur district of 1991 Census has been denotified /declassified or merged at the 2001 Census.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	4	0.3	15	0.0
11-20	4	0.3	77	0.0
21-50	31	2.2	7,106	0.6
51-100	59	4.2	25,900	2.2
101-200	141	10.2	61,566	5.2
201-300	191	13.8	125,252	10.5
301-500	434	31.3	381,020	32.1
501 +	522	37.7	587,726	49.4
Not known	0	0.0	0	0.0
District Total :	**1,386**	**100.0**	**1,188,662**	**100.0**
Population Density (Rural) of the district:			**365**	

Table 4 gives the distribution of villages by population density. 98 (7.1%) villages have a population density of less than 100 which is quite less than that of the district (rural) average of 365. Another 141 villages (10.2%) have a population density of 101-200 while 191 villages (13.8%) have a population density above 200 but less than 300. The majority of the

villages i.e. 434(31.3%) have a population density of 301-500 representing 32.1 per cent population. The highest number of villages i.e. 522 (37.7%) have the highest population density of 501 + comprising 49.4 per cent of the rural population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	832	837	798	878	877	891

1991	882	888	868	924	932	890
2001	876	890	849	935	946	891

Note: Sex Ratio has been defined as number of females per 1000 males.

Table 5 shows the sex ratio for the Punjab State and Hoshiarpur district from 1901 to 2001. It is revealed that the maximum sex ratio (935) at district level has been observed in 2001 whereas at state level it was 876. At the state level, the sex ratio has declined by 6 points between 1991 and 2001 Census. The corresponding decrease in urban areas was 19 points whereas it increased by 2 points in rural areas. At the districts level it has increased by 11 points for the district as a whole, by 14 points in rural areas and by one point in urban areas. Amazingly Hoshiarpur district (935) outstrips all other districts and excels Ludhiana district (824) by 111 points and Punjab state by 59 points in sex ratio. It is the only district in the state which stands above par the national (933) sex ratio.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Dasua	958	964	922
2	Mukerian	972	986	904
3	Hoshiarpur	903	916	876
4	Garhshankar	930	931	911
	District Total:	**935**	**946**	**891**

Table 6 shows that among the tahsils the sex ratio varies between 972 in tahsil Mukerian and 903 in Hoshiarpur. The remaining 2 tahsils Dasua and Garhshankar show the sex ratio as 958 and 930 respectively. Hoshiarpur district as a whole leads with total (935) and rural (946) and is second only to Nawanshahr (913) in urban (891) sex ratio. Whereas Hoshiarpur district surpasses all other districts, Hoshiarpur tahsil itself exhibits the lowest sex ratio (903) among the tahsils within the district. Contrary to other districts, Hoshiarpur boats of having sex ratio above 900 mark both for total and rural in all tahsils.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Mukerian	963
2	Talwara	1,045
3	Hazipur	966
4	Dasua	963
5	Tanda	966
6	Bhunga	961
7	Hoshiarpur-I	918
8	Hoshiarpur-II	896
9	Mahilpur	924
10	Garhshankar	937
	District (Rural) Total:	**946**

Table 7 exhibits C.D. block wise sex ratio in the district. Rural sex ratio in this district (946) is significantly higher than that of the state (890). Among the C.D. blocks rural sex ratio varies between Hoshiarpur- II (896) and Talwara (1045). All the C.D. blocks also have sex ratio more than the state sex ratio of 890. Amazingly Talwara C.D. block supersedes all other C.D. blocks of the district in sex ratio.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	28	2.0	5,225	0.4
700-749	8	0.6	5,948	0.5
750-799	44	3.2	22,653	1.9
800-849	91	6.6	43,877	3.7
850-899	217	15.7	198,987	16.7
900-949	353	25.5	355,099	29.9
950-999	290	20.9	279,308	23.5
1000-1099	265	19.1	228,766	19.2
1100+	90	6.5	48,799	4.1
District Total:	**1,386**	**100.0**	**1,188,662**	**100.0**
Sex ratio (Rural) for District:		***946***		

Sex ratio of rural population by ranges is portrayed in the above table. The district (Rural) is marked with the sex ratio of 946. 353 villages (25.5%) have a sex ratio of more than 900 but less than 950 consisting 29.9 per cent whereas, in 290 villages (20.9%) male-female sex ratio is almost equal. and 353 (25.5%) villages have females more than males comprising 29.9 per cent population. There are only 28 villages where sex ratio is less than 700 and 8 villages have a sex ratio of more than 700 but less than 750. Further 44 villages have a sex ratio of more than 750 but less than 800. As many as 91 villages have a sex ratio of more than 800 but less than 850 whereas 217 (15.7%) villages have a sex ratio of more than 850 but less than 900 accommodating16.7 per cent of the population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Chohal	CT	684
2	Dasua	M.Cl	922
3	Gardhiwala	M.Cl	909
4	Garhshankar	M.Cl	915
5	Hariana	M.Cl	906
6	Hoshiarpur	M.Cl	884
7	Hazipur	CT	914
8	Mahilpur	NP	907
9	Mukerian	M.Cl	913
10	Sham Chaurasi	M.Cl	905
11	Talwara	CT	893
12	Urmar Tanda	M.Cl	926
	Sex ratio (Urban) for the district:		**891**

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 9 shows Sex ratio of urban agglomeration/towns. The district on an average has an urban sex ratio of 891 which is higher than the urban sex ratio of the State (849) and is second only to Nawanshahr district (913).

Among the towns/UAs the sex ratio varies between 684 in Chohal (CT) and 926 in Urmar Tanda. In all as many as 10 towns have the sex ratio higher than that of the district and two towns viz Chohal CT (684) and Hoshiarpur M Cl (884) have the sex ratio less than the district average sex ratio. Amazingly 9 out of 12 towns have crossed 900 mark which is a healthy sign.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Dasua	Total	42,207	23,720	18,487	779
		Rural	36,889	20,784	16,105	775
		Urban	5,318	2,936	2,382	811
2	Mukerian	Total	39,948	22,252	17,696	795
		Rural	34,540	19,190	15,350	800
		Urban	5,408	3,062	2,346	766
3	Hoshiarpur	Total	63,136	34,544	28,592	828
		Rural	44,146	24,040	20,106	836
		Urban	18,990	10,504	8,486	808
4	Garhshankar	Total	38,932	21,150	17,782	841
		Rural	36,115	19,583	16,532	844
		Urban	2,817	1,567	1,250	798
	District Total:	**Total**	**184,223**	**101,666**	**82,557**	**812**
		Rural	**151,690**	**83,597**	**68,093**	**815**
		Urban	**32,533**	**18,069**	**14,464**	**800**

Table 10 shows that sex ratio in child population in the age group 0-6 in the district is 812 as against 798 for the state as such. Low child sex ratio in the state and its constituents

has become a matter of deep concern. However position is not so bad in Hoshiarpur district as it stands 5th in the state and numerary shares the rank with Faridkot (812) though, actually, the later ranks 4th.

Child sex ratio within the district is the maximum in Garhshankar (841) and the minimum in Dasua (779). As such the tahsils among themselves display a considerable disparity in their child sex ratio. Amazingly Hoshiarpur district is counted among the six districts which cross 800 mark for total, rural and urban sex ratio for 0-6 age group.

Likewise, the disparity in the rural and urban child sex ratio is also evident among the tahsils. Rural child sex ratio varies between 775 in Dasua and 844 in Garhshankar and urban between Mukerian (766) and Dasua (811).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Mukerian	15,325	8,589	6,736	784
2	Talwara	9,187	4,960	4,227	852
3	Hazipur	10,028	5,641	4,387	778
4	Dasua	14,915	8,329	6,586	791
5	Tanda	14,028	8,022	6,006	749
6	Bhunga	16,242	8,966	7,276	812
7	Hoshiarpur-I	17,614	9,641	7,973	827
8	Hoshiarpur-II	18,236	9,866	8,370	848
9	Mahilpur	15,364	8,387	6,977	832
10	Garhshankar	20,751	11,196	9,555	853
	District (Rural) Total:	**151,690**	**83,597**	**68,093**	**815**

Table 11 shows C.D. block wise child sex ratio in the age group 0-6. Child sex ratio in rural and urban shows a gap of 15 points. In this district the child sex ratio is above the district rural average sex ratio of 815 in five C D blocks whereas in other five C D blocks i.e. Mukerian, Hazipur, Dasua, Tanda, and Bhunga the child sex ratio is less than the district rural. Talwara CD block with 852 sex ratio is at the top while Tanda with 749 is at the bottom.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	371	26.8	28,269	18.6
700-749	146	10.5	19,725	13.0
750-799	127	9.2	18,616	12.3
800-849	148	10.7	23,205	15.3
850-899	140	10.1	18,861	12.4
900-949	111	8.0	15,122	10.0
950-999	79	5.7	10,283	6.8
1000-1099	125	9.0	9,575	6.3
1100+	139	10.0	8,034	5.3
District (Rural) Total	**1,386**	**100.0**	**15,1690**	**100.0**
Sex ratio (Rural) for District:		**815**		

Table 12 shows the maximum number of villages i.e. 371 (26.8%) are marked with an excessively low child sex ratio of less than 700 consisting 18.6 per cent rural population. The sex ratio is equally low in the range of 700- 749 in 146 (10.5%) villages. Another 127 villages (9.2%) fall in the range of 750-799, 148 villages (10.7%) containing (15.3%) population fall in the population range of 800-849, and another 140 villages (10.1%) have a sex ratio of 850-899. The rural child sex ratio is fairly high in the range of 900-949 in 111 (8.0%) villages containing 10.0 per cent population and another 79 villages (5.7%) having 6.8 per cent population has a very high sex ratio of 950-999.

Quite a good number of villages i.e. 125 (9.0%) containing (6.3%) population have a very high child sex ratio of 1000-1099. Interestingly 139 (10.0%) villages having a child sex ratio of more than 1100 are female biased villages but they represent only 5.3 per cent of the rural population.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town+*	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns

Table 13 shows Sex ratio of child population in the age group 0-6 in urban area of the district. With 800 it is slightly lower than the overall total sex ratio (812) in the district.

Among the towns/UAs child sex ratio is the highest in Sham Chaurasi (993) and the lowest in Hazipur (729). As many as 6 towns show the urban sex ratio of the child population lower than that of the district urban whereas in other six towns the sex ratio of child population exceeds the district urban. Though Ludhiana district (819) leads all the district in urban child sex ratio, Hoshiarpur district is among the seven district which cross 800 mark.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Dasua	Total	340,494	109,137	-	32.1	-
		Rural	292,068	97,059	-	33.2	-
		Urban	48,426	12,078	-	24.9	-

	District Total	**Total**	**1,480,736**	**507,544**	-	**34.3**	-
		Rural	**1,188,662**	**432,702**	-	**36.4**	-
		Urban	**292,074**	**74,842**	-	**25.6**	-

Table 14 shows that 34.3 per cent of the population in the district belongs to Scheduled Castes as compared to the State with 28.9 per cent and is placed at 5th position among the districts. Among the tahsils it is the highest in Garhshankar with 40.6 per cent and the lowest in Mukerian with 21.1 per cent.

In consonance with the general trends in the State, Scheduled Castes population is more in rural areas by residence than in urban areas. In rural areas of the district the highest percentage of Scheduled Castes has been observed in tahsil Hoshiarpur (46.6%) while the lowest in Mukerian (21.4%). Similarly in urban areas, it is 38.5 per cent in Garhshankar and 19.9 per cent in Mukerian.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

	District (Rural) Total:	**1,188,662**	**432,702**	-	**36.4**	-

Table 15 shows the number and percentage of Scheduled Castes population in C.D. blocks. It is the maximum in Hoshiarpur- II (48.6%) closely followed by Hoshiarpur- I (48.4%). Among all the C.D. blocks, five C.D. blocks reveal the percentage of Scheduled Castes population more than the district rural proportion (36.4%) whereas five C. D. blocks show this proportion below the district rural.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	114	8.2	0	0.0
Less than 5	50	3.6	911	0.2

76 and above	85	6.1	37,331	8.6
District Total	**1,386**	**100.0**	**432,702**	**100.0**

Table 16 shows that 114 (8.2%) villages in the district have no Scheduled Castes population while in 50 (3.6%) villages the proportion of Scheduled Castes population is less than 5 per cent, yet another 88 (6.4%) of the villages have Scheduled Castes population in the range of 5-10 per cent and they contain nearly 1.5 per cent of the Scheduled Castes population in the district. Over one eighth (11.8%) of the villages numbering 164 villages fall in the range of 11-20 per cent and account for 5.9 per cent of Scheduled Castes population of the district.

More than one seventh of the villages have Scheduled Castes population in the range of 21-30 per cent. In absolute terms they number 187 (13.5%) villages which is higher than five other groups of villages.

221 (16.0%) villages having 18.4 per cent Scheduled Castes population exhibit Scheduled Castes in the range of 31-40 per cent. Another 205 (14.8%) villages contain 21.3 per cent Scheduled Castes population which is significantly higher.

As many as 272 (19.6%) villages containing 31.8 per cent Scheduled Castes population has the highest range of 51-75 per cent. Only 85 (6.1%) villages fall in the range of 76.0 per cent and above comprising 8.6 per cent Scheduled Castes population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5

There are no Scheduled Tribes in Punjab State.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTESAND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 18 shows that Scheduled Castes comprise more than one fourth (25.6%) of the population of the district urban. The towns among themselves show wide disparity in this regard. While in Sham Chaurasi, 59.3 per cent of the total population belongs to scheduled castes, in Dasua only 19.0 per cent population belongs to said castes. There are five towns which have Scheduled Castes population lower than the district urban. The population of Scheduled Castes in all other towns is greater than the district urban average. Nawanshahr being atop with 33.2 per cent, Hoshiarpur district ranks fifth among all the districts regarding Scheduled Castes population to total population. There is no scheduled tribe in the state of Punjab.

TABLE 19 SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Mukerian	947	-
2	Talwara	993	-
3	Hazipur	939	-
4	Dasua	966	-
5	Tanda	941	-
6	Bhunga	961	-
7	Hoshiarpur-I	930	-
8	Hoshiarpur-II	918	-
9	Mahilpur	921	-
10	Garhshankar	924	-
	District (Rural) Total	**937**	-

Table 19 shows that Sex ratio among Scheduled Castes in most of the C D blocks is higher than the district rural sex ratio of 937. In four C D blocks the sex ratio is less as compared to district rural. Among all the C D blocks, Scheduled Castes sex ratio in Talwara is the highest with 993, whereas the lowest sex ratio is 918 in Hoshiarpur-II. Surprisingly, abrupt fall in sex ratio in most of the districts spares Hoshiarpur district (Rural) which excels all other district with 937 sex ratio and beats the state by 43 point.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Chohal (CT)	894	-
2	Dasua (M Cl)	946	-
3	Garhdiwala (M Cl)	912	-
4	Garhshankar (M Cl)	890	-
5	Hariana (M Cl)	917	-
6	Hoshiarpur (M Cl)	909	-
7	Hazipur (CT)	928	-
8	Mahilpur (NP)	922	-
9	Mukerian (M Cl)	923	-

11	Talwara (CT)	854	-
12	Urmar Tanda (M Cl)	919	-
	Sex ratio (Urban) for the district	**909**	-

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 20 shows that Scheduled Castes in urban areas of the district has a sex ratio of 909 which is better than that of overall urban sex ratio (891) of the district. The position in the towns like Dasua (946), Hazipur (928), Mukerian (923), Mahilpur (922) & Urmar Tanda (919) is also quite encouraging as all these towns have sex ratio more than 900. Only three towns i.e. Garhshankar 890, Chohal 894 & Talwara 854 reveal the urban sex ratio in Scheduled Castes population lower than the district urban average whereas Talwara CT (854) stands at bottom low.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

		Urban	18,678	10,211	8,467	6,488	2,955	3,533	83.6	88.0	78.8	9.2
District Total:		**Total**	**1,050,378**	**573,589**	**476,789**	**430,358**	**191,543**	**238,815**	**81.0**	**86.5**	**75.3**	**11.2**
		Rural	**827,653**	**451,643**	**376,010**	**361,009**	**159,032**	**201,977**	**79.8**	**85.7**	**73.7**	**12.0**
		Urban	**222,725**	**121,946**	**100,779**	**69,349**	**32,511**	**36,838**	**85.8**	**89.4**	**81.8**	**7.6**

Table 21 reveals that 81.0 per cent of the district's population is literate as compared with 69.7 per cent for the state as such. In other words eight out of 10 persons are literate in the district and this percentage is quite high among the districts. It also stands atop and is one and only one district which strikes more than 80 per cent literacy rate and that is why it is truly called Hoshiarpur (A habitat of intelligent people).

In all the tahsils of the district, Hoshiarpur tahsil is the most literate with 83.0 per cent. There is not wide difference among other tahsils as all other tahsils have the literacy rate of more than 80 per cent except tahsil Garhshankar (78.0%).

Between the two sexes the literacy rate in the district varies between 86.5 per cent among males and 75.3 per cent among females exhibiting a gap of 11.2 percentage points. Among the tahsils, this gap is the widest (13.7 percentage points) in Garhshankar tahsil and the narrowest (10.2 percentage points) in Hoshiarpur and Dasua tahsils.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	*Name of C.D.block*	*Number of literates and illiterates*						*Percentage of literates*			*Gap in male-female literacy rate*

9	Mahilpur	90,143	50,090	40,053	37,512	16,242	21,270	80.3	86.4	73.7	12.7
10	Garhshankar	107,121	60,284	46,837	55,995	23,932	32,063	75.2	82.6	67.5	15.1
District (Rural) Total:		**827,653**	**451,643**	**376,010**	**361,009**	**159,032**	**201,977**	**79.8**	**85.7**	**73.7**	**12.0**

Table 22 shows that rural areas of this district are relatively marked with the best literacy rate than other districts of the state. Almost 79.8 per cent of the rural population of this district is literate, which is not much below the urban literacy of (85.7%).

Among the C D blocks rural literacy varies between 75.2 per cent in Garhshankar and 82.9 per cent in Hoshiarpur –I. Other C D blocks are also having good literacy rates.

Male female literacy rate has a sizable gap of 12.0 percentage points. It is the minimum (10.4) in Dasua and the maximum (15.1) in Garhshankar. Amazingly male literacy rate crosses 82.0 per cent mark in 100 per cent C D blocks whereas more than 73.0 per cent among females in 90.0 per cent C D blocks of the district are literate. The dazzling literacy rate of persons, males and females rip apart all other districts.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	2	0.0
1-10	0	0.0	0	0.0
11-20	3	0.2	156	0.0
21-30	2	0.1	259	0.0
31-40	2	0.1	115	0.0
41-50	5	0.4	673	0.1
51-60	16	1.2	5,415	0.5
61-70	89	6.4	58,948	5.0
71-80	613	44.2	548,261	46.1
81-90	621	44.8	559,801	47.0
91-99	33	2.4	15,030	1.3
100	1	0.1	2	0.0
District Total:	**1386**	**100.0**	**1,188,662**	**100.0**
Literacy rate for District:		**81.0**		

Table 23 above shows distribution of villages by ranges of literacy rate. Very low literacy rate (30% or below) is reported by only 6 villages having a very small population. Only 2 villages (0.1%) which contain negligible percentage of the districts rural population have literacy rate in the range of 31-40 per cent. Only 5 (0.4%) villages with population 673 fall in the range of 41-50 per cent literacy rate. 16 (1.2%) villages containing 0.5 per cent population fall in the range of 51-60. 89 (6.4%) villages which contain 5.0 per cent of the population have a literacy rate of 61-70 per cent. In brief, almost 89.0 per cent of the villages containing 93.1 per cent population have the literacy rate between 71-90 per cent. Only 34 (2.5%) villages have the literacy rate more than 91 per cent comprising 1.3 per cent population.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 24 shows that 85.8 per cent of the urban population in the district is literate and it is 2nd only to district Rupnagar (86.2%). Among the towns it varies between 89.0 per cent in Talwara and 78.4 per cent in Sham Chaurasi. In six towns the literacy rates is higher than that of the district urban average, while in all towns the literacy rate is above 80 per cent except one.

The male-female literacy rates in urban shows a sizeable gap of 7.6 percentage points. This gap is the widest in Sham Chaurasi with 13.0 per cent and narrowest in Hoshiarpur with 6.4 percentage points. Amazingly the female urban literacy rate is the highest among all the districts in the state. Only Rupnagar (81.8%) and Jalandhar (79.0 %) districts venture to stand on dais with Hoshiarpur district regarding percentage of female literacy.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

	District (Rural) Total:	**288,263**	**162,672**	**125,591**	**144,439**	**60,761**	**83,678**	**77.5**	**85.2**	**69.3**	**15.9**

Table 25 shows that Scheduled Castes population in the district rural has a literacy rate of 77.5 per cent compared with an overall rural literacy rate of 79.8 per cent in the district. Bhunga (80.5%) and Hoshiarpur-I (80.4%) are the two C D blocks where literacy rate of Scheduled Castes population in rural area is more than 80 per cent. On the other hand the lowest literacy rate is revealed in the two other C D blocks of Mukerian with 73.8 per cent and Garhshankar with 73.3 per cent. Out of every five Scheduled Castes male, four are literate and on an average 7 out of 10 females are literate. The variation in literacy rate among female in different C D blocks varies between 73.5 per cent in Bhunga and 63.4 per cent in Garhshankar. Male and female Scheduled Castes literacy rate shows a gap of 15.9 percentage points in the rural area of the district. The gap is to the extent of 19.0 percentage points in Garhshankar CD block and 13.9 per cent in Bhunga C D block.

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	2	0.2	2	0.0
1-10	0	0.0	0	0.0
11-20	4	0.3	118	0.0
21-30	2	0.2	33	0.0
31-40	6	0.5	246	0.1
41-50	14	1.1	1,162	0.3
51-60	50	3.9	10,725	2.5
61-70	148	11.6	42,951	9.9
71-80	594	46.7	233,013	53.8
81-90	415	32.6	140,442	32.5
91-99	25	2.0	3,928	0.9
100	12	0.9	82	0.0
0	2	0.2	2	0.0
District Total:	**1272**	**100.0**	**432,702**	**100.0**
Literacy rate for District (Rural):		77.7		

Table 26 shows that the distribution of villages by ranges of literacy rate for scheduled castes population. 6 villages which make 0.5 per cent of the total villages and accommodate negligible population of the district fall in the range of 20 or less. Another 8(0.7 %) villages with 0.1 per cent of Scheduled Castes population fall in the range of 21-40 per cent. All these villages have low level of literacy. Literacy rate is relatively better in 14 (1.1%) villages where Literacy rate is in the range of 41-50 per cent. 50 villages (3.9%) fall in the literacy range of 51-60 per cent which accommodate 2.5 per cent of the scheduled castes population.

More than one tenth i.e. 148 (11.6%) villages accommodating 9.9 per cent scheduled castes population fall in the range of 61-70 per cent. Almost half of the villages 594 (46.7%) accommodating more than half of the Scheduled Castes population (53.8%) falls in the literacy range of 71-80 per cent, which is a good sign. The highest literacy rate (more than 80%) is noticed in 454 (35.7 %) villages accommodating 33.4 per cent Scheduled Castes population.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 27 shows that in urban areas of the district, eight out of ten every scheduled caste persons (78.8%) are literate. Among the towns it is the highest in Mahilpur (81.4 %). and followed by Talwara (81.3%), Hoshiarpur (80.5 %) and Hazipur (80.1%) are the other towns which reveal literacy rate above 80 per cent.

By contrast urban scheduled castes literacy rate is the lowest in Urmar Tanda (73.4%) followed by Gardhiwala (74.6 %).

85.5 per cent of the scheduled castes males and 71.5 per cent of the females in urban areas are literate reflecting a gap of 14 percentage points. Amazingly almost all the towns cross 80 per cent mark in male literacy whereas in female literacy 7 out of 12 towns cross 70 per cent mark. As compared to all other districts, it is, by all means, a very fascinated literacy rate.

Among the towns male- female gap in percentage point is the maximum in Gardhiwala (18.6%) while the lowest is 12.6 per cent in Hoshiarpur.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Table 31 shows that work participation rate in Hoshiarpur district (34.7%) is comparatively lower than the state average (37.5%) and beats Jalandhar (34.5%) and Gurdaspur (33.3%) districts at the bottom. Among the tahsils it varies between 33.7 per cent each in Dasua and Mukerian and 36.0 per cent in Garhshankar. In the district 50.6 per cent among males and 17.6 per cent among females are reported to be total workers.

Out of the total population 28.0 per cent are main workers whereas 6.6 per cent are marginal workers. As prefigured, whereas Hoshiarpur district outdoes all other districts in literacy, it is just above Gurdaspur (27.0%) pertaining to main workers. The proportion of main workers in the tahsils is the highest in Hoshiarpur with 30.0 per cent and the lowest in Mukerian with 25.2 per cent. However, the proportion of marginal workers is the highest in Mukerian with 8.5 per cent and the lowest in Hoshiarpur with 5.1 per cent. Further, the incidence of marginal worker is observed to be more among females as compared to males. Surprisingly the rate of male marginal worker is lower only to Gurdaspur (6.3%) and far ahead of state (4.1%).

Table 32 shows that 35.4 per cent of the rural population in the district is working, out of which 27.6 per cent are main workers and 7.8 per cent are marginal workers. This percentage

is a little lower than that of the state where 39.5 per cent of the rural population is reported as workers out of which 32.6 per cent are main workers and 6.9 per cent are marginal workers.

Among the C D blocks the work participation rate varies between 37.3 per cent in Garhshankar and 33.9 per cent in Tanda. Similarly, female work participation rate is the highest in Talwara (22.5%) and the lowest in Hoshiarpur –I (16.8%) CD blocks.

The percentage of main workers is the highest (30.3%) in Hoshiarpur –II whereas the lowest has been reported in Talwara (23.2%) after the completion of Pong Dam project. However the proportion of marginal workers is the highest in Talwara with 11.3 per cent whereas the lowest is reported in Hoshiarpur –I with 5.6 per cent.

In rural areas 19.3 per cent of the females are reported as workers out of which 10.7 per cent are main workers and 8.7 per cent are marginal workers.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns

Table 33 shows that 31.8 per cent of the urban population in the district is working, out of which 29.9 per cent are main workers and 2.0 per cent are marginal workers. This percentage is little lower than that of the state where 31.3 per cent of the urban population is reported as workers. Among the towns the work participation rate is the highest in Chohal with 40.4 per cent whereas the lowest is reported in Hazipur with 26.6 per cent.

Out of 12 towns 5 towns fall below the district average of 31.8 per cent whereas 7 towns come above the district average. The participation in marginal work is the highest in Sham Chaurasi with 4.1 per cent whereas the lowest is revealed in Mukerian and Chohal with 1.1 per cent each. The participation seems to be quite less (2.0%) in marginal work when compared with the participation in main work (29.9%).

The urban female work participation rate in the district is much less with 10.4 per cent as compared to male work participation rate of 50.9 per cent. Among the towns the female work participation rate is the highest in Hariana with 14.7 per cent whereas the lowest is revealed in Hazipur with 5.6 per cent.

Note: Percentage of Worker to total workers is given in brackets

Table 34 shows the distribution of workers by sex in four categories of economic activity by tahsils in the district.

Among the total workers (Main + Marginal) in the district 24.1 per cent are cultivators, 16.6 per cent are agricultural labourers, 2.8 per cent are household industry workers and 56.5 per cent are other workers. The corresponding percentage for the state are 22.6, 16.3, 3.7 and 57.4 per cent respectively. This signifies that 40.7 per cent of the total workers in the district are engaged in agricultural sector whereas 59.3 per cent are in non-agricultural sector of economy.

Among the tahsils, the percentage of cultivators is the highest in Garhshankar with 28.4 per cent and the lowest in Hoshiarpur with 17.3 per cent. Likewise the proportion of workers reported as agricultural labourers varies between Hoshiarpur with 18.2 per cent and Mukerian with 14.9 per cent. The proportion of workers in household industry is the highest in Hoshiarpur with 3.0 per cent and the lowest in Mukerian with 2.6 per cent. The participation of males -females in non-agricultural sector is greater than in the agricultural sector. Significantly, in agricultural sector females (43.2%) excel males (39.9%) in Hoshiarpur district which is a very rare phenomenon in the state.

Note: Percentage of workers to total worker is given in brackets

Table 35 shows that among the C D blocks the proportion of rural workers recorded as cultivators is the highest in Talwara (42.9%) and the lowest in Hoshiarpur-II (21.6%). Likewise the proportion of agricultural labourers shows a variation of (25.2%) in Bhunga and (11.5%) in Talwara. It is observed that more than half of the workers are engaged in agricultural sector in Talwara, Tanda, Bhunga and Mahilpur C D blocks.

The proportion of rural workers engaged in household industry also exhibits significant variation at C D block level. It is the highest in Hoshiarpur-II (3.9%) whereas it is the lowest in Garhshankar (2.4%). Other workers constitute more than one half of the rural workers in Garhshankar (54.4%) followed by Hazipur (51.8%), Hoshiarpur-I (50.5%) and Mukerian and Dasua 51.4 per cent each. The table further reveals that participation of females in other work is also very encouraging as 58.0 per cent females are other workers in CD block Garhshankar.

Note: Percentage of workers to total workers is given in brackets

\+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 36 shows that among towns/UA's the proportion of urban workers recorded as cultivator is the highest in Hariana (6.9%) and the lowest in Mukerian (1.2%). Likewise the proportion of agricultural labourers shows a variation of 29.2 per cent in Sham Chaurasi and 0.3 per cent in Hazipur.

When we analyse the data further we find that the percentage of household industry workers is the highest in Sham Chaurasi (4.9 %), where as the lowest percentage has been observed as (0.6 %) in Talwara.

The proportion of other workers also exhibit significant variation at town level. It is the highest in Mukerian (96.7%) and the lowest in Sham Chaurasi (59.9%). In all, five towns fall above and seven towns below the district average. Amazingly the percentage of females engaged in other work is next only to Rupnagar district (94.5%) for urban areas of the state.

Out of every ten workers nine are engaged as other workers. This also holds true for males and females. The other significant factor is that female work participation in non-agricultural sector is 93.2 per cent compared to 94.5 per cent of males at district level.

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

 # Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 shows the distribution of villages according to the availability of different amenities. It reveals that out of a total number of 1386 inhabited villages 1233 (89.0%) villages are availing education facility, whereas only 382 (27.6%) villages are availing medical facility. 1357 (97.9%) villages are getting improved drinking water. Post office and telephone facilities are available to 328 (23.7%) and 1060 (76.5%) villages respectively. Transport and communication facility is available to 847 (61.1%) villages. A meager number of villages i.e. 87 (6.3%) are availing banking facility. The facility of agricultural credit societies is available to 297 (21.4%) villages. As many as 1292 (93.2%) villages are approachable by Pucca road whereas power supply is available in all the villages.

As regards CD blocks, more than 80 per cent education facility is available to all the blocks, Medical facility is available to less than 50 per cent villages in 9 blocks except Tanda

(72.6%), 100 per cent drinking water available to 5 CD blocks, less than 40 per cent facility of post office in all CD blocks. Only Mukerian block is lagging behind in transport facility with 28.1 per cent, banking facility is very poor in all CD blocks and the position of pucca roads and power supply is excellent in all 10 CD blocks.

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 shows the number and percentage of rural population served by different amenities. The table when analyzed shows that 98.1 per cent population avails the educational facility. Medical facility is being availed of by 38.0 per cent of the population. The improved drinking water is available in the district to 98.6 per cent population. Post office facility is available to 43.8 per cent. Telephone facility is available to 88.8 per cent while the transport and communication is available to 68.6 per cent. Banking facility is available only to a small section of population in the district with 16.2 per cent. 26.9 per cent population of the district is availing the facility of agricultural credit societies. 93.4 per cent population of the district is availing the facility of pucca road while power supply is available to the entire population.

Within CD blocks, apart from power supply, Mukerian, Hazipur and Tanda excel in education whereas Talwara, Dasua, Bhunga, Hoshiarpur-I, Hoshiarpur-II, Mahilpur and

Garhshankar exceed in drinking water facility available to the population. The proportion of medical facility is bad in taste in Talwara (3.9%) and captivative in Tanda (78.0%). The position of other facilities available to population is reasonably good.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 to 4)

3. Post Office	866	183	9	1058
4. Telephone	258	56	12	326
5. Bus Service	468	86	5	559
6. Banks				
(a) Commercial Bank	746	535	38	1319
(b) Cooperative Bank	806	491	49	1346
7. Agricultural Credit Societies	963	118	8	1089

Table 39 shows the distribution of villages which are not having certain amenities by distance ranges from the places where these are available.

Education:

There are 154 villages which are not having amenity of primary school and the same is available at a distance of less than 5 km. except one village where this facility is available at a distance of more than 10 km.

1054 villages do not have middle school; however, among them this facility is available within a distance of five kilometers to 1026 villages and for the remaining 28 villages the same is available at a distance of five to 10 km.

As many as 1381 villages do not have Degree College. This facility is available to 297 villages at a distance of less than five kilometers and at a distance between 5-10 kilometers to 627 villages. Another 457 villages avail this facility at a distance of more than 10 km.

Medical:

1386 villages do not have the facility of Hospital within the villages. Among them the same is available to 292 village at a distance of less than five kilometer and to 641 villages at a distance of 5-10 km. while 453 villages avail this facility at a distance of more than 10 km. Likewise, out of 1348, 293 villages avail the facility of Primary Health Centre at a distance of less than five km., 614 villages at a distance of 5-10 km. while 441 villages at a distance of more than 10 km.

Post Office:

The post office facility is not available to 1058 villages and among these, 866 villages avail this facility at a distance of less than five kilometers, while 183 villages at a distance of 5-10 kilometers. Another 9 villages avail it at a distance of more than 10 kilometers.

Telephone:

326 villages do not have telephone facility. Out of these, 258 villages avail this facility at a distance of less than five kilometers while 56 villages at a distance of 5-10 kilometers. Another 12 villages avail it at a distance of 10 kilometers and above.

Bus service:

559 villages do not have the facility of Bus service. Out of these, 468 villages avail this facility at a distance of less than five kilometers while 86 villages at a distance of 5-10 kilometers. Another five villages avail this facility at a distance of 10 kilometers and above.

Bank:

A total of 1319 villages do not have banking facility (Commercial) while 1346 villages do not have the banking facility (Co-Operative). A total of 1089 villages do not have the facility of agricultural credit society. These facilities are available at a distance ranges from less than five kilometers to 10 kilometers and above.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometers)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows the distribution of villages according to the distance from the nearest statutory town and availability of different amenities. Of the total villages, 309 are located with in a distance of 5 kms. 962 villages within a distance range of 5-15 kms. and 115 villages are at a distance between 16-50 kms. from the nearest statutory town. Of the 962 villages falling in the distance range of 5-15 kms., education facility is available in 847 villages (88.0%), medical facility in 259 villages (26.9%), post office facility in 218(22.7%), telephone in 721 villages (75.0%) transport and communication in 587 villages (61.0%), bank in 67 villages (7.0%), agriculture credit societies in 216 villages (22.4%) and approach by pucca road in 909 villages (94.5%). Proportionately, the position is almost the same in other distance ranges. District level figures have already been explained in Table No. 37 for all ranges.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 reveals the expounded distribution of villages by population ranges and amenities available. Of the 1386 villages, 517 villages fall in the population range of 1-499, 460 villages fall in the population range of 500-999 and 307 villages fall in the range of population between 1000-1999 there are 97 villages falling in the population range of 2000-4999 and only 5 villages have population more than 5000 but less than 10000. Education Facility is available to 1233 (89.0%) villages. Medical facility is available to 382 (27.6%) villages. Improved drinking water facility is available to 1357 (97.9%) villages. Post office facility is available only to 328 (23.7%) villages. Telephone facility is available to 1060 (76.5%) villages. Transport & communications and Banking facility is available to 847(61.1%) and 87 (6.3%) villages respectively. Agricultural credit societies are available to 297(21.4%) villages. 1292 (93.2%) villages are linked with Pucca road whereas power supply is available to all the villages. As regards population availing these amenities in different ranges, only the villages falling in the range of 1-499 are lagging behind the district in all facilities, otherwise, position is comparable in other ranges, 5000-9999 being the best.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Mukerian	139	23,433	82.4	80.7
2	Talwara	75	21,544	37.3	21.5
3	Hazipur	92	16,851	80.1	62.9

5	Tanda	113	25,713	87.8	97.1
6	Bhunga	198	55,029	46.9	64.4
7	Hoshiarpur-I	184	31,211	82.6	82.1
8	Hoshiarpur-II	121	42,866	70.3	71.2
9	Mahilpur	152	39,778	64.5	65.8
10	Garhshankar	142	38,348	62.2	71.9
	District Total:	**1386**	**326,295**	**66.4**	**72.5**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 shows the distribution of villages according to land use. The total area of the district is reported to be 326,295 hectares. Out of the total area 66.4 per cent area is cultivable area. 72.5 per cent is the irrigated area of the total cultivable area. The highest cultivable area is reported 87.8 per cent in Tanda CD block while the lowest is 37.3 per cent in Talwara. The highest irrigated area is reported in Tanda CD block with 97.1 per cent while the lowest in Talwara with 21.5 per cent.

	District Total	622.2	408.5	213.7	633.5	149.8	99.4	212.5	0.5	171.3

Table 43 shows per capita receipt and expenditure incurred in statutory towns in the district. The per capita receipt in the district is Rs 622.2 out of which Rs 408.5 comes through taxes and Rs 213.7 through all other sources. The per capita receipt is as high as Rs 838.9 in Gardhiwala and as low as Rs 114.5 in Sham Chaurasi.

As against the per capita receipt of Rs 622.2 the district is incurring per capita expenditure of Rs 633.5. The break up of this expenditure comprises general Administration Rs 149.8, public health & conveniences Rs 99.4, public works Rs.212.5, public institutions Rs 0.5 and on other items the expenditure is to the tune of Rs. 171.3.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Dasua (M.Cl.)	5.0	4.0	2.5	1.0	0.5
2	Gardhiwala (M.Cl.)	11.2	9.6	6.4	4.8	1.6
3	Garhshankar (M.Cl.)	4.0	3.3	3.3	2.6	1.3
4	Hariana (M.Cl.)	7.7	6.4	5.1	5.1	1.3
5	Hoshiarpur (M.Cl.)	1.5	0.7	0.5	0.3	0.3
6	Mahilpur (N.P.)	2.0	2.0	2.0	2.0	1.0
7	Mukerian (M.Cl.)	3.3	2.3	2.3	0.9	0.9
8	Sham Churasi (M.Cl.)	9.4	4.7	4.7	4.7	0.0
9	Urmar Tanda (M.Cl.)	3.6	1.4	1.4	0.9	0.5
	District Total	**2.8**	**1.8**	**1.4**	**1.0**	**0.5**

Table 44 shows the number of schools/colleges per 10,000 of population for towns. There are 2.8 Primary schools, 1.8 Junior Secondary/Middle School, 1.4 Secondary/Matriculation Schools, 1.0 Senior Secondary school and 0.5 College per 10,000 of population. Gardhiwala, Hariana, and Sham Chaurasi towns have very good average of educational institutions.

Surprisingly Hoshiarpur, Mahilpur, Mukerian, Urmar Tanda and Garhshankar towns are lagging behind regarding availability of educational institutions, former being at bottom (1.5).

TABLE 45: NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Chohal(C.T.)	34
2	Dasua(M.Cl.)	17
3	Gardhiwala(M.Cl.)	80
4	Garhshankar(M.Cl.)	33
5	Hazipur(C.T.)	93
6	Hariana(M.Cl.)	19
7	Hoshiarpur(M.Cl.)	18
8	Mahilpur(N.P.)	25
9	Mukerian(M.Cl.)	23
10	Sham Chaurasi (M.Cl.)	9
11	Talwara(C.T.)	44
12	Urmar Tanda(M.Cl.)	16
	District Total	**24**

Table 45 shows the number of beds in medical institutions in various towns of the district per 10,000 population. The district on average has 24 beds per, 10,000 population. Among the towns, Hazipur has 93 beds per 10,000 population followed by Garhdiwala with 80 beds per 10,000 population. The minimum number of beds i.e. 9 per 10,000 population is in Sham Chaurasi which is quite less in comparison with other towns. Six towns fall above par and six below the district average.

TABLE 46: PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population approximately	Percentage of slum population to total population
1	2	3	4	5
1	Dasua	20114	2020	10.0
2	Garhshankar	15148	6858	45.3
3	Hoshiarpur	149668	12982	8.7
	District Total	**184930**	**21860**	**11.8**

Table 46 shows the population of the towns as well as their slum population and percentage to total population. Among the three towns of the district, Garhshankar has the highest percentage of slum population with 45.3 per cent whereas Dasua and Hoshiarpur have only 10.0 and 8.7 per cent slum population respectively. All the three towns of district Hoshiarpur combined together have only 11.8 per cent slum population to their total population.

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Dasua (M.Cl.)	Foundry Work Auto Gears Washing Soap	Machine Parts Soap Washing Furniture
2	Gardhiwala (M.Cl.)	Jams & Pickles Shoes Wooden Furniture	Mangoes Gur Jams & Pickles
3	Garhshankar (M.Cl.)	Petrol & Diesel Shoes Furniture	Potatoes Sugareane Leather Products
4	Hariana (M.Cl.)	Material Of Durries Pickles Sarees	Cauli Flower Pickles Vegetable
5	Hoshiarpur (M.Cl.)	Thread Pressure Cookers Thread	Pressure Cookers Thresher -
6	Mahilpur (N.P.)	- -	Wheat Mangoes
7	Mukerian (M.Cl.)	Agricultural Implements Oil Cake (Khal) Wooden Furniture	Vegetable Oil Rubber Belts Rice
8	Sham Churasi (M.Cl.)	Shoes Biscuits Pots	Wheat Maize Sugarcane
9	Urmar Tanda (M.Cl.)	Harmonium Rubber Moulding Cotton Thread	Wheat Maize Rice

Table 47 shows the most important commodities manufactured in statutory towns and exported out of the towns in the district.

The manufacturing of foundry work, auto gears and washing soaps in Dasua, Jams & pickles, shoes and wooden furniture etc., in Gardhiwala. are some of the important items. It is revealed from the above table that each item has its own characteristic in manufacturing and export of various items. Hoshiarpur town is famous for "Hawkins" pressure cookers. These are manufactured and exported on a large scale. Sugarcane, wheat, maize, rice and vegetables are the other commodities which are exported in routine.

(x) Brief Analysis Based on Houses and Household Amenities

TABLE 48: HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

	Median number of rooms	2	2	2	1	2	1	-	-	-

Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".

Table 48 shows that 2,53,239 households in the district are living in houses owned by them, 13,896 in rented houses and 10,633 in houses with tenure status 'other' i.e. neither owned nor rented. This reflects that 91.2 per cent of the households are living in owned houses, 5.0 Per cent in rented houses while 3.8 per cent in others.

Among the households living in owned houses 42,323 (16.7 %) have one room, 77,863 (30.7%) have two rooms, 62,628 (24.7%) have three rooms, 69,182 (27.3%) have more than three rooms. This reveals that majority of the households have two rooms. Surprisingly households having more than three rooms (27.3%) excel households having three rooms (24.7%). Further 1,243 (0.5%) are living in owned houses but do not have any exclusive room. By and large the pattern is similar in rural and urban area.

Among the scheduled castes, 22,628 (24.2%) have one room whereas two rooms have been occupied by 34,157 (36.5%), 20,909 (22.3%) households have three rooms and 15,511 (16.6%) households have more than three rooms. This shows that among Scheduled Castes also the majority of the households have two rooms.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1		3	4	5	6	7	8	9	10	11
	Hoshiarpur	**255,145**	**16,014**	**6,564**	**200,181**	**13,985**	**5,378**	**54,964**	**2,029**	**1,186**
		(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**
1	Dasua	59,860	2,658	1,392	51,347	2,285	1,314	8,513	373	78
		(23.4)	(16.6)	(21.2)	(25.7)	(16.3)	(24.4)	(15.5)	(18.4)	(6.6)
2	Mukerian	47,699	7,142	2,363	38,297	6,761	2,082	9,402	381	281
		(18.7)	(44.6)	(36.0)	(19.1)	(48.4)	(38.7)	(17.1)	(18.8)	(23.7)
3	Hoshiarpur	91,795	4,139	1,959	59,334	3,060	1,172	32,461	1,079	787
		(36.0)	(25.8)	(29.9)	(29.6)	(21.9)	(21.8)	(59.1)	(53.2)	(66.3)
4	Garhshankar	55,791	2,075	850	51,203	1,879	810	4,588	196	40
		(21.9)	(13.0)	(12.9)	(25.6)	(13.4)	(15.1)	(8.3)	(9.6)	(3.4)

In brevity Table 49 shows the percentage distribution of households by tahsil living in permanent, semi-permanent and temporary houses. Out of 255,145 households living in permanent houses in the district 23.4 per cent are in Dasua, 18.7 per cent in Mukerian, 36.0 per cent in Hoshiarpur and 21.9 per cent in Garhshankar tahsil.

The percentage share of households living in semi- permanent houses of the district shows a variation of 44.6 per cent in Mukerian tahsil and 13.0 per cent in Garhshankar. There are 6564 households living in temporary houses and these make 2.6 per cent of the total households. At tahsil level, Mukerian tahsil constitutes 36.0 per cent while Dasua (21.2 %), Hoshiarpur (29.9%) and Garhshankar (12.9 %) of temporary houses. In concise of the table appended above reveals that in Mukerian the figures of temporary houses excel permanent houses in total, rural and urban which seems to be very anomalous.

Out of the total households living in permanent houses 200,181 (78.5%) are in rural areas and 54,964 (21.5%) in urban areas.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is given in brackets after the number of household.
Bathrooms means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

Table 50 shows the proportion of households having improved drinking water source, electricity, bathroom, toilet and drainage facility.

Improved drinking water:

Households having tap, handpump and tubwell as the source of drinking water are grouped as haivng improved drinking water facility. In the district it is available to 96.6 per cent of the total households. The corresponding figures for the rural and urban areas being 96.1 per cent and 98.4 per cent respectively. The trends, by and large, are the same among the tahsils in the district with Dasua (98.1%) at the top and Mukerian (93.4%) at the bottom.

Electricity:

Electricity as the main source of lighting is available to 94.7 per cent of the households in the district. The corresponding figures for rural and urban areas are 94.3 per cent and 96.5 per cent respectively signifying that the rural areas also do not lag behind the urban areas in tahsils.

Bathroom:

Bathroom facility is available to 69.8 per cent households in the district. Even in rural areas this facility is available to 66.1 per cent compares with urban areas with 83.8 per cent. Garhshankar tahsil leads with 77.9 per cent whereas Mukerian lags behind with 52.5 per cent.

Toilet:

Toilet facility is available to nearly 4 households out of every 10 households in the district. Among the rural and urban areas there is a great disparity. This facility is available to 82.1 per cent households in urban areas while it is available only to 24.7 per cent households in rural areas. Hoshiarpur tahsil (45.6%) excels others.

Drainage:

82.8 per cent of the households have drainage facility. The proportion for rural and urban areas being 80.8 per cent and 90.1 per cent respectively is reasonably good. Garhshankar with 86.6 per cent outdoes other tahsils but is closely followed by Hoshiarpur (86.5%) and Dasua (85.1%).

TABLE 51: DISTRIBUTION OF HOUSEHOLDS BY AVAILABILITY OF SEPARATE KITCHEN AND TYPE OF FUEL USED FOR COOKING

Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".

The chronology of Table 51 shows that Firewood is the most dominant fuel used for cooking in the district as it is being used by 43.1 per cent of the total households, the second largest used is cooking gas (LPG) with 33.6 per cent. In rural areas 50.5 per cent households are using firewood as fuel whereas in urban areas it is only 14.9 per cent.

The use of cooking gas (LPG) is also fairly high. It is being used by 24.7 per cent in the rural areas whereas in urban areas this percentage is a as high as 67.3 per cent.

Among the tahsils Garhshankar has the highest percentage (56.5%) using firewood as fuel whereas the lowest is Dasua (36.6%). The largest number of users of cooking gas (LPG) are in Mukerian (40.2%) and the lowest in Garhshankar (19.4 %).

In the district firewood and cooking gas (LPG) constitute about 76.7 per cent of the total households using the two most dominant fuels for cooking. Cow dung cakes is used by 13.7 per cent households in the district, 16.8 in rural areas and 2.0 per cent in urban areas, 13.2 per cent urban households and using kerosene as compared to 2.2 per cent rural households. The use of other types of fuel such as coal electricity, biogas etc. is negligible.

Data source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets".

The segregated assets in Table 52 shows that out of 277,768 households in the district 196,530 (70.8 % are availing Banking facility, 141,655 (51.0%) households are having Radio, Transistor, 217,707 (78.1%) have Television and 49,124 (17.7%) Telephone. As many as 217,707 (78.4%) households have Bicycle, 95,551(34.4%) households have Scooter/Motorcycle/Moped and 12,397 (4.5%) have Car/Jeep/Van.

Garhshankar tahsil excels other tahsils in banking (75.2%) and bicycle (82.1%), Dasua in radio transistor (54.4%), television (81.2%), telephone (17.0%) and scooter motor cycle (37.5%), Mukerian in none of the specified assets (10.0%) and Hoshiarpur tahsil in car, jeep and van (5.8%).

(xi) Places of tourist, religious, historical or archeological importance

Talwara:

It is located at about 27 km from Mukerian and is connected by road and rail with Mukerian. It is a modern township and was built for housing, offices and staff of Pong Dam Project. The township is fast emerging on the tourist map of India as it serves as a gateway to Pong Dam, which is the largest earth-cum-rock filled dam in the country. The vast and beautiful lake behind the dam offers excellent fishing and boating facilities to the visitors, who throng from all over the country.

The township has an Industrial Training Institute, an Employment Exchange, a 124 Bed Hospital, a Cinema hall, a modern Tourist Guest House, and educational facilities. The places of tourist interest are the lake, Dap Power House and Talwara Barrage. The barrage diverts part of waters released from the Pong Dam and Power House into the Mukerian Hydel Channel. There is a Shiv Temple in a near by village Sri Pandian said to have been constructed by the Pandavas. A fair is held at the temple annually on Shivratri day.

Dasua:

It is a tahsil and Sub-division headquarters town, located at about 41 kms from Hoshiarpur on the Jalandhar-Pathankot rail line and connected with Talwara, Pathankot, Jalandhar and Hoshiarpur by road.

Dasua is a historical town tracing its origin to the Mahabharata times when it was called Virat-ki-Nagri being capital of King Virat. The ruins of an old fort could be seen towards the north of the town. It finds mention in 'Ain-e-Akbari. It was a stronghold of Sardars of Ramgarhia Misl from whom Maharaja Ranjit Singh annexed it. Later Maharaja Ranjit Singh bestowed it to Prince Tara Singh. There is an old well and tank said to have been dug by Pandavas.

Datarpur (Rakri) :

It is situated at a distance of about 2 km from 'Jhir-di-Khui' on Mukerian-Talwara road. It was a part of Datarpur state which was annexed by the British. The Raja was deposed, who took shelter in village Pirthipur in Tahsil Amb, District Una (Himachal Pradesh) which used to be a part of district Hoshiarpur before reorganization of states.

There is a Thakardwara of Baba Lal Dayal, a contemporary of Guru Nanak. It was built about the year 1809 by Tapa Dass. Later the local Raja Gobind Chand built a temple and bestowed a 'Jagir' to this Thakardwara. A Sanatan Dharam Sanskrit Mahavidyalaya is being run by the Thakardwara Management Committee. The Vidyalaya prepares students for Prabhakar, Vishard and Shastri Examinations of the Punjab University. No fee is charged from students, they also get free boarding and lodging facilities. Besides Sanskrit Mahavidyalaya, there is one Senior Secondary School, two High Schools, six Primary Schools, a Hospital, an Ayurvedic Dispensary and a Post and Telegraph Office.

Mukerian:

It is a tahsil and Sub-division headquarters town situated on Jalandhar-Pathankot railway line and is connected by road with Jalandhar, Hoshiarpur, Talwara and Pathankot. The National Highway No. IA, passes through it. There are two versions about its founding. According to the first version, the place is said to have been founded by Chaudhary Dara Kyan Awan in 1754 A.D. But according to the second version it was founded by Mukeria Kalal from whom its present name is derived.

It is said to have passed into the hands of Sardar Jai Singh Kanhaya of Kanhaya 'Misl' about 1768 A.D. His grand daughter Mahtab Kaur (daughter of Sada Kaur) was married to Maharaja Ranjit Singh. Prince Sher Singh who later became Maharaja was born from this union. A fort named Atalgar situated nearby was annexed by Maharaja Ranjit Singh but the fort is now in utter ruins and in a portion, a gurudwara stands now.

Dholbaha:

It is located at about 30 km from Hoshiarpur towards north-west in the foothills of Shivaliks and is approachable from Hariana by a pucca road.

It is a historical place as its name is linked with legendary King Dhol. According to another version the name Dholbaha is derived from Dhavalavaha (white rivulet) stream with crystalline water flowing through it.

The place is of great antiquity and is described as an ancient temple town. The archaeologists have pushed back its antiquity to the Pleistocene period when Stone Age man roamed about terraces and valleys of Shivaliks in search of food, water and shelter. The place flourished (700-1200 AD) like rest of India. It saw the most brilliant efflorescence of temple architecture and sculptural art. The ruins of various temples and sculptural pieces buried under these will bear ample testimony to it. Some of the pieces of sculptures discovered at Dholbaha have been displayed in the Punjab University Museum at Sadhu Ashram, Hoshiarpur. Also a local museum maintained by State Department of Archaeology displays sculptures found from the place. There is a Mahishasurmardini temple, which is stated to be 500 years old. Besides, there is a temple of goddess Mansa Devi.

Hariana:

It is a town falling in Hoshiarpur tahsil situated on the Hoshiarpur-Dasua road. It was a tahsil headquarters from 1846 to 1860 but was merged in Hoshiarpur tahsil in 1861. The place has some buildings of historical importance. One is Mufti Mosque situated in the west of the habitation built by Haji Sambal Khan in the regime of Emperor Akbar in 1597-98 AD. The second is the Qazi's mosque which is larger and built later. This place is known for quality vegetables. It has a municipal committee, a degree college (Hindu National College), a civil dispensary, a veterinary hospital, a police station, a post and telegraph office and a rest house.

Bajwara:

It is located at about 3 km. from Hoshiarpur towards South-East on the Hoshiarpur-Una road. It is a place of great historical importance and was once a thriving town. It is said to have spread over a vast area. The place was known for pious Brahmans and weavers. The place is said to have been named after Baiju Bawra, the great singer. The town is mentioned in the Ain-e-Akbari as famous for horses. It suffered from the wrath of Todar Mal, Akbar's revenue minister who was not accorded due respect by the locals. The place prospered in the period of Afghans, who used it as a military base for checking the activities of the hill chiefs. Later it came under the control of Sardar Bhup Singh Faizalpuria who was ousted in 1801 AD by Raja Sansar Chand Katoch. The Katoch Raja built a fort, which was taken over by Maharaja Ranjit Singh in 1825. This fort was used by the British as a prison. At present only two of its ruined bastions are standing. The debris has been used for road construction. It is also the birth place of a great Arya Samajist Lala Hans Raj.

Hoshiarpur:

It is the seat of the district administration and is connected by rail with Jalandhar Cantonment. It is a rail terminus but also connected by road with Pathankot, Phagwara, Rupnagar, Chandigarh, Dharamshala (Himachal Pradesh) and Una (Himachal Pradesh). The town was considered as an important gateway to hilly areas but has lost much importance after merger of hilly areas with Himachal Pradesh. In the past it had trade links with Tibet, China, Leh and Central Asian Republics.

There are two versions about the founding of the town. According to the one version Hargobind and Ram Chand, Diwans of Emperor Mohammad Bin Tughlak, (1325-1351 AD), founded this town. According to the second version Hoshiar Khan, an inhabitant of Bajwara founded it. The town was named Hoshiarpur after the name of its founder. During the Sikh period it passed into the hands of Sardar Bhup Singh Faizalapuria, who was ousted by Raja Sansar Chand Katoch. He was subsequently driven out by Maharaja Ranjit Singh.

Gardhiwala:

It is a town falling in Dasua tahsil situated at a distance of 28 km from Hoshiarpur on Hoshiarpur-Dasua road. The place was built in 1443 AD by one Garhia after whose name it was known as Garh. Later a temple of goddess was built here to commemorate incarnation of goddess (Devi). The suffix deviwala was added to its name. The suffix deviwala later corrupted and the place became known as Gardhiwala. A fort was built here in 1812 AD, the traces of which are hardly visible now.

Jaijon:

It is located 16 km. to the north of Garhshankar. Jaijon is a rail terminus and connected with Phagwara by rail. It is also known as Pathranwala. It was an important supply centre to the hills as trade and business prospered in the past. The development of other centers like Hoshiarpur, Nangal, Garhshankar etc., has contributed towards its decay. Now much of it is in ruins and most of the business families and residents have shifted elsewhere. It was founded

by one Jaijon Shah in whose memory a fair is held annually in the month of June. It was later the seat of Jaswal Rajas, Raja Ram Singh Jaswal built a fort here in 1701 AD. The fort was annexed by Maharaja Ranjit Singh in 1815 and was dismantled in the time of British rule.

Bham:

It is located at a distance of 13 Kms. from Chabewal, which falls on Hoshiarpur-Garhshankar Road. Bham is connected with Chabewal by link road. It is a religious place, Pandavas are said to have passed here a part of their exile. A temple, dedicated to Shiva, to commemorate this event, has been constructed here. A fair is held annually on Shivratri Day. There is another temple dedicated to 'Sri Durga Mata' which was got constructed by the living goddess (Devi). A fair, which lasts for four days, is also held annually during July-August (Sawan 15-18). The fair is participated by a large number of visitors from far and wide.

Gurudwara Garna Sahib (Bodal):

It is situated at about 15 km. from Garna Sahib Railway Station and about 1 km from the habitation of village Bodal in tahsil Dasua. It is built in the sacred memory of Sikh guru Hargobind. The guru is said to have planted a branch of Garna tree after which the place was named as Garna Sahib. A fair is held annually on the birthday of Guru Horgobind in the month of June. There is a museum on the upper storey of the Gurudwara, where paintings of Sikh gurus are displayed.

Gurudwara Tahli Sahib (Moonak Kalan):

It is situated at about 5 km from Urmar Tanda on Jalandhar-Pathankot road and is about 1.5 km from from village Moonak Kalan in Tahsil Dasua. This gurudwara has also association with Guru Hargobind who rested at this place on way to Garna Sahib. The twig of 'Shisham' tree planted by the guru sprouted into a tree which is worshipped by the people. A fair is held every month on Amavas.

Kamahi Devi (Beh Nangal):

Kamahi Devi temple is located at about 11 km from 'Jhir-di-Khuhi' on Mukerian-Talwara road in village Beh Nangal. The temple is said to have been built by Pandavas who dedicated it to 'Kamakshi Devi'. The name later corrupted to Kamahi Devi. Near this temple there is an old tank and a well.

Rajni Devi:

It is situated at a distance of about 3 km from Chabewal in Hoshiarpur Tahsil. A temple is dedicated to Rajni Devi. A Brahmin girl Rajni who on molestation by the Muslims cursed them and committed suicide. The village became deserted. To commemorate the memory of Rajni, Raja Sansar Chand of Kangra built a temple. People from far and wide visit this temple and perform 'Mundan' ceremony during the Navratras in the months of Assu and Chet. A fair is held during the Navratras which is participated by a large number of visitors.

Garhshankar:

It is a tahsil and Sub-divisional Headquarter town situated at about 40 km. from Hoshiarpur. It is connected by rail and located on the Jalandhar City-Jaijon Doaba Railway Section. It is also connected by road with Balachaur, Nurpur Bedi, Nawanshahr, Hoshiarpur, Anandpur Sahib and Banga.

The town has a very ancient history. Raja Shankar Das is said to have constructed a fort here which was taken over by Mahmud Ghaznavi and subsequently, emperor Shahab-ud-Din

Ghauri gave it to the sons of Raja Man Singh of Jaipur. The Mehtons, who were the original inhabitants of this place, were driven out by the Rajputs in 1175 AD. Among the architectural remains of the town is Kali mosque.

Sham Chaurasi:

It is situated at a distance of 17 km. from Hoshiarpur and is connected by link road with Hoshiarpur-Jalandhar road. It is a railway station on the Hoshiarpur- Jalandhar railway section.

It finds mention in the 'Ain-e-Akbari' as Chaurasi, There is 'Khankah' of Hazrat-Shami Sahib, It is probable that the present name Sham Chaurasi has probably, an origin in the two names i.e. Shami and Chaurasi. It was occupied by Naru Rajputs from Bajwara after driving out the Brahmins, the original inhabitants.

Urmar Tanda:

It is situated at about 16 Km from Dasua towards Jalandhar on Pathankot-Jalandhar road (National Highway). It is a railway station on Jalandhar City-Pathankot section. It is also connected with Hoshiarpur, Kapurthala and Amritsar.

There is a famous Muslim Shrine of Saint Sakhi Sarwar. A fair is held annually at this shrine. Besides, there are four "dargahs" of Muslim saints and a Dera Mastgarh at Tanda. There is a Buta Bhagat Ashram, where a fair is held annually during the month of June. The fair lasts for three days. Musical gatherings are held at the 'Samadh' of Baba Hargobind in the month of March-April. The Samadh is one century old.

(xii) Scope of Village and Town Directory

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

Town Directory :

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was

numbered as IV- A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc. Hence the data for the towns of Hoshiarpur has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of Hoshiarpur District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class, name Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns of Hoshiarpur District. The income and expenditure for the towns of Hoshiarpur have been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the scheduled castes/scheduled tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

Statement V gives information regarding medical, educational, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Hoshiarpur which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from towns and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Town. Information on number of banks available in the town has been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII shows the civic amenities available to all the 3 towns having slums falling in the jurisdiction of Hoshiarpur District.

Part - A
VILLAGE AND TOWN DIRECTORY

Section-I
Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The Village Directory format has 25 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number :

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village :

The name and location code number of the village is shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village :

The area of the villages in hectares is given. Wherever the area figures were not furnished by the concerned department, the column is left blank.

Column 4 : Total population :

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households :

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational :

Classes upto class V are included in Primary School comprising nursery school, kindergarten school, Pre-basic school, pre-primary school and junior basic school.

Classes from VI to VIII are included in the middle school.

Classes from IX and X are included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr.
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M (4), etc.

Column 7 : Medical :

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water :

The type of drinking water supply sources available within the village is indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP

(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone :

It is indicated by following codes :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks :

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available within the village, distance of the nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies :

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given.

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities:

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in these columns. If not available, the particulars of the nearest place with the facility exists is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications :

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways, they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village :

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance :

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply :

Availability of Power Supply in the village, whatever may be the form of its use, is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine :

If village receives any News Paper/Magazine the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured :

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use :

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare (s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW

(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A and B The appendices show the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates CD Block wise number of villages.

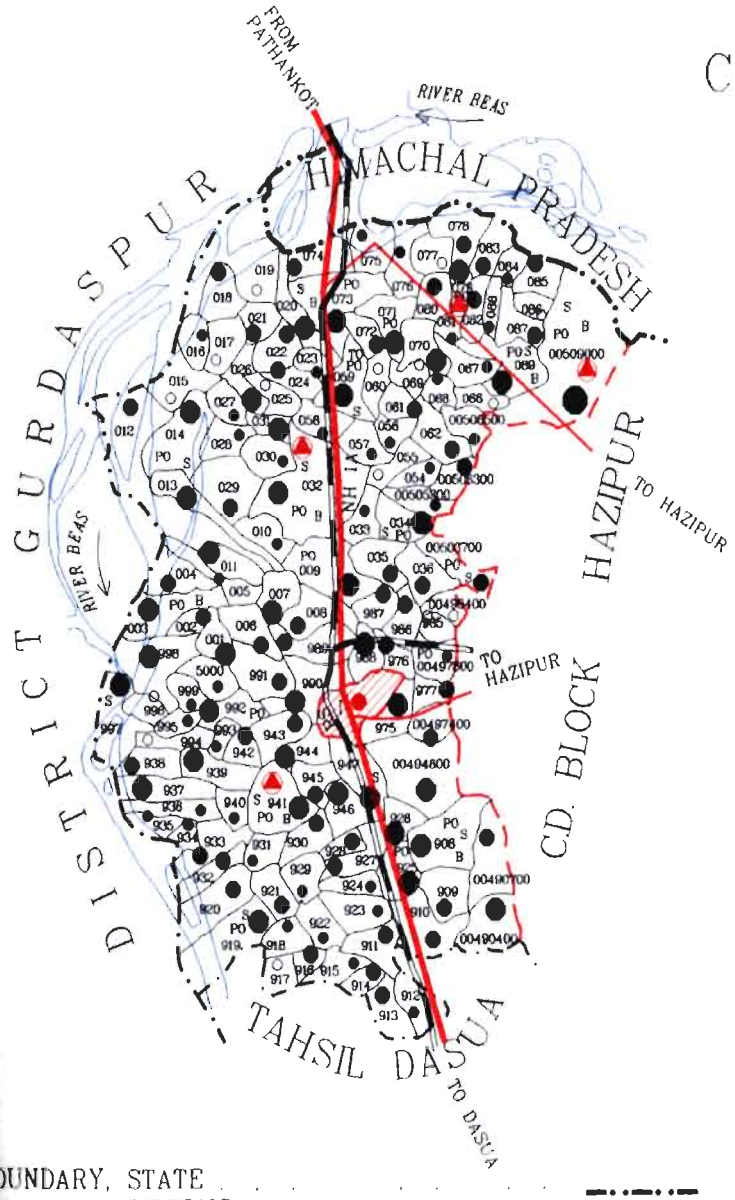

Appendix-IX Shows number of different types of girls schools in a village.

Section-II
Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Contonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects :

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 & 8 :

Name or the State headquarters, District headquarters and Tahsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory :

Column 6 : Road length (in kms.) :

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage :

Generally, sewerage system is implied by the net-work of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines :

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil :

The various prevalent methods of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt

Sewerage	S
Others	O

Column 13 and 14 : Water supply :

Source and capacity of storage system. The following codes are used in these columns :

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major sources of water supply is given in column 13 and the storage capacity against each in kilo-litres (in bracket) is presented in column 14.

Column 15 : Fire Fighting Service :

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections) :

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, they may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes :

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institutes	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like-Applied Art/Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/ Intermediate/ Senior Secondary/ PUC/ Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle schools or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres :

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats :

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities :

- Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms:

Number of public libraries and reading rooms available in the referent town is recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded in these columns.

Column 9 : Number of Banks :

Number of Banks available in the referent town both Commercial and Co-operative banks is recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies:

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town is recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing :

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting from October, 2002.

Task Force on Quality Assurance :

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices

which were specially set up for this purpose. The individual Scheduled Caste and the Scheduled Tribe population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Caste/Tribe returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribe at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract :

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes and Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts, Cities and Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main

workers were presented into four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/CD Block/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4. Village Primary Census Abstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures :

The area figures supplied by local revenue authorities of the district in respect of Tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration, block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure – I

Number of villages under Gram Panchayat:

With the Constitution (73rd amendment) Act, 1992, the Census Organisation felt it necessary to provide population data for the territorial area of Panchayat. This required precise details of the territorial area of each Panchayat so that delineation of Enumeration Blocks (Ebs) to be allotted to the enumerators could be done to meet this requirement.

It required careful delineation of enumeration blocks by the Charge Officers to ensure that EBs do not cut across the territorial area falling in the Panchayat. Different situations were well perceived. A Panchayat could consist of only one village or a number of complete villages. There could be another situation where the Panchayat may consist of some complete village and parts of some villages. Still there could be another situation where Panchayat could consist of a number of villages, etc.

An exhaustive exercise was done to prepare Panchayat level data. However, we came across following types of situations which made it difficult to compile the Panchayat level data:

i) Some of the Panchayats have one or more than one village.
ii) Some of the Panchayats have only a part of the village.
iii) Some Panchayats include full village (s) as well as part of village (s).

All this has not made it feasible for us to present Panchayat level PCA.

Annexure-II

Fertility and Child Mortality

The following table shows age specific fertility rates in Punjab as well as in Hoshiarpur district for the years 2001 and 1991. The trends observed are almost identical both for the State and the district for 2001. Among different age groups the fertility rate is the highest in age-groups 20-24, 25-29 and 30-34. The trend is the same for rural and urban areas also.

The trends also show some fall in the fertility levels during 1991 and 2001 in the State and this decline is noticeable in four age-groups, at par in two and above in the age group 45-49 in the state. In district Hoshiarpur, the fertility rate increased in three age groups 25-29, 30-34 and 45-49 and decreased in four groups 15-19, 20-24, 35-39 and 40-44.

AGE SPECIFIC FERTILITY RATES 2001 AND 1991

Age	Hoshiarpur						Punjab					
Group	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991

The following table shows age specific marital fertility rates in Punjab as well as in Hoshiarpur district for the year 2001 and 1991. In case of the state the trends observed are similar to those of total fertility levels, although the decline in marital fertility levels is at a relatively lower pace. But the reverse scenario has been observed in case of the district where four groups are exhibiting higher ASMFR in 2001. Only three groups 15-19, 35-39 and 40-44 followed the state pattern. ASMFR is amazingly higher in rural as compared to urban in Punjab state in the all age groups for the years 1991 and 2001. In the district Hoshiarpur same trend has been exhibited in the year 1991, excepting the two age groups 15-19 and 40-44. But in the year 2001, ASMFR in rural areas of the district, surpassed its urban counterpart in all age groups excepting the age group 40-44.

AGE SPECIFIC MARITAL FERTILITY RATES 2001 AND 1991

Annexure-III

Measures of Fertility and Mean Age at Marriage Fertility Levels:

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally is assessed by relating number of births to size of some section of the population, such as number of married couples and number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever married women and the last question was related to currently married women only. The measures of fertility worked out are based on the F-Series Tables of 1991 & 2001 Census pertaining to Punjab State.

The following table presents important indices of fertility in Punjab as well as in Hoshiarpur district for the years 2001 and 1991 separately for total, rural and urban areas. There has been significant decline in the number of children ever born per ever married woman in the age group (45-49) in both the rural and urban areas. Likewise there has been a significant decline in the child-women ratio also. However, the number of married couples per 1,000 of population has gone up both in the state and district in rural and it is vice-versa for urban areas.

IMPORTANT INDICES OF FERTILITY

Fertility indices	Hoshiarpur						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991
1	2	3	4	5	6	7	8	9	10	11	12	13
No. of Children ever born per ever married woman in the age group (45-49)	3.6	4.2	3.7	4.4	3.2	3.9	3.50	4.27	3.69	4.45	3.16	3.81

Child-Woman ratio (0-4 Years)	333	427	345	433	284	418	349	480	369	493	311	448

Annexure IV

MOVEMENT OF POPULATION

What is migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence, if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International Migration:

The migrational movements are of three types- (i) Migration within the State itself with its components-(a) Migration within the district of enumeration (intra-district migration), (b) Migration from one district of the state to another district of the State/UT (inter-district migration), (ii) Migration from one State to another state of the country (inter-state migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why the people migrate?

For the first time in the census, reasons for migration were elicited in 1981. Keeping operational constraints in view, the reasons for migration were broadly categorized as (1) employment, (2) education, (3) marriage, (4) family movement and (5) other reasons. Other Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration:

The growth of population of a particular place depends upon the biological variates such as mortality and fertility and migration. The knowledge of trends in migration helps in future planning of a place.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF BIRTH

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Migrants born within the state of enumeration	406,890	83,464	323,426	422,082	81,026	341,056
	(78.5)	(61.3)	(84.6)	(77.9)	(58.7)	(84.4)
(i) Migrants born else where in the district of enumeration	275,475	52,187	223,288	293,339	55,135	238,204
	(53.2)	(38.3)	(58.4)	(54.1)	(40.0)	(59.0)
(ii) Migrants born in other districts of the State	131,415	31,277	100,138	128,743	25,891	102,852
	(25.4)	(23.0)	(26.2)	(23.8)	(18.8)	(25.5)
(II) Migrants born in other states of India	72,828	30,256	42,572	94,911	42,835	52,076
	(14.1)	(22.2)	(11.1)	(17.5)	(31.1)	(12.9)
(III) Migrants born in other countries	38,081	22,285	15,796	24,818	14,063	10,755
	(7.3)	(16.4)	(4.1)	(4.6)	(10.2)	(2.7)
(IV) Unclassifiable	490	140	350	2	1	1
	(0.1)	(0.1)	(0.1)	(0.0)	(0.0)	(0.0)
Total Migrants	**518289**	**136,145**	**382,144**	**541,813**	**137,925**	**403,888**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

The above table gives distribution of immigrants by place of birth in Hoshiarpur district as per 1991 and 2001 Censuses. Out of the total immigrants in 2001, 77.9 per cent are born within the state of enumeration and 17.5 per cent are born in other states/Union Territories of India while 4.6 per cent are born in other country. The figures for 1991 are 78.5 per cent, 14.1 per cent and 7.3 per cent respectively.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF LAST RESIDENCE

Last residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Last residence within the state of enumeration	422,248	91,411	330,837	433,577	85,094	348,483
	(80.5)	(65.3)	(86.1)	(79.2)	(60.8)	(85.5)
(i) Elsewhere in the district of enumeration	288,646	57,697	230,949	304,811	58,755	246,056
	(55.1)	(41.2)	(60.1)	(55.7)	(42.0)	(60.3)
(ii) In other districts of the state of enumeration	133,602	33,714	99,888	128,766	26,339	102,427
	(25.5)	(24.1)	(26.0)	(23.5)	(18.8)	(25.1)
(II) States in India beyond the state of enumeration	70,666	29,484	41,182	93,356	42,075	51,281
	(13.5)	(21.1)	(10.7)	(17.0)	(30.1)	(12.6)
(III) Last residence outside India	30,895	19,030	11,865	20,776	12,756	8,020
	(5.9)	(13.6)	(3.1)	(3.8)	(9.1)	(2.0)
(IV) Unclassifiable	480	150	330	3	2	1
	(0.1)	(0.1)	(0.1)	(0.0)	(0.0)	(0.0)
Total	**524,289**	**140,075**	**384,214**	**547,712**	**139,927**	**407,785**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

The above table gives distribution of immigrants by place of last residence in Hoshiarpur district as per 1991 and 2001 Censuses. Out of total immigrants79.2 per cent of the immigrants have the place of last residence within the state but out of the place of enumeration. Another 17.0 per cent have place of last residence in other states/UTs within the country, while 3.8 per cent

have their last residence out side India. The corresponding figures for 1991 are 80.5 per cent, 13.5 per cent and 5.9 per cent respectively.

Annexure V

Main Religions:

The instructions for recording this information are same as in 1991. A brief analysis based on 1991 and 2001 Census data is presented below.

Question 7 of the Household Scheduled canvassed at the 2001 census pertained to religion of a person. The religion of the person was recorded as returned by the respondent. The six main religions in the country were recorded by using following codes:

Hindu	:	1
Muslim	:	2
Christian	:	3
Sikh	:	4
Buddhist	:	5
Jain	:	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Religious Composition of Population, Punjab state and Hoshiarpur district

The numerical strength of the six main religious communities in the State and Hoshiarpur district as per 1991 and 2001 Census is as follows:

RELIGIOUS COMPOSITION OF POPULATION, PUNJAB AND MUKTSAR1991 AND 2001

Religious Communities	Punjab				Hoshiarpur district			
	Total Population		Percentage in total population		Total Population		Percentage in total population	
	1991	2001	1991	2001	1991	2001	1991	2001
1	2	3	4	5	6	7	8	9
Hindus	6,989,226	8,997,942	34.4	36.9	712,874	871,923	54.9	58.9
Muslims	239,401	382,045	1.2	1.6	7,581	15,394	0.6	1.0
Christians	225,163	292,800	1.1	1.2	10,017	12,726	0.8	0.9
Sikhs	12,767,697	14,592,387	63.0	59.9	559,075	574,862	43.0	38.8
Buddhists	24,930	41,487	0.1	0.2	5,891	2,928	0.5	0.2
Jains	20,763	39,276	0.1	0.2	1,263	2,143	0.1	0.1
Others Religions and persuasions	883	8,594	0.0	0.0	58	552	0.0	0.0
Religion not stated/ Unspecified	13,906	4,468	0.1	0.0	1,953	208	0.2	0.0
All Religions	**20,281,969**	**24,358,999**	**100.0**	**100.0**	**1,298,712**	**1,480,736**	**100.0**	**100.0**

As can be seen from the above statement, Sikhs form the predominant religious community in Punjab and they account for 59.9 per cent of the State's population according to the 2001 Census. The corresponding percentage for 1991 Census was 63.0. Hindus is the second largest religious community in the State and their share in the total population is 36.9 per cent which was 34.4 per cent as per 1991 Census. This signifies that Sikhs and Hindus, the two most dominant religious communities in the state, together constitute 96.8 per cent of the state's total population. The share of Muslims, Christians, Buddhists and Jains in the total population is 1.6, 1.2, 0.2 and 0.2 per cent respectively as per 2001 Census.

On the contrary Hindus form the predominant religious community in Hoshiarpur district. Hindus constitute 58.9 per cent of the total population and this is significantly higher than that of the state as a whole. Sikhs, the second dominant religious community in the district, account for 38.8 per cent of the district's total population. Together, the Sikhs and the Hindus account for 97.7 per cent of the district's population. Muslims constitute 1.0 per cent while the share of Christians is only 0.9 per cent. The percentage of Hindus and Sikhs as per 1991 Census in the district were 54.9 and 43.0 per cent respectively. The proportion of Muslims has slightly increased from 0.6 per cent in 1991 to 1.0 per cent in 2001 Census.

Annexure VI

Marital Status:

Current marital status of each individual, irrespective of age, was obtained through Question 5 of the household schedule canvassed at the 2001 census into following four categories:

1. Never married
2. Currently married
3. Widowed
4. Divorced or separated.

The instructions to enumerators for eliciting marital status were same as adopted in 1991 census. A brief analysis based on 1991 and 2001 census is presented here.

The following table exhibits data for Persons, Males and Females in percentage form regarding Marital Status.

MARITAL, STATUS OF POPULATION AS PER, 1991 AND 2001 CENSUS

Marital Status	Punjab						Hoshiarpur					
	1991			2001			1991			2001		
	P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13
Total Population	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Never Married	51.5	55.4	47.1	48.7	53.1	43.8	52.0	56.6	47.1	49.5	55.0	43.7
Married	45.1	42.3	48.2	47.2	44.6	50.2	43.5	40.6	46.7	45.6	42.3	49.0
Widowed	3.3	2.2	4.6	3.9	2.1	5.8	4.4	2.8	6.1	4.7	2.5	7.0
Divorced or Separated	0.0	0.0	0.0	0.2	0.2	0.2	0.1	0.1	0.1	0.2	0.2	0.2
Un-Specified	0.0	0.0	0.0	0	0	0	0.0	0.0	0.0	0	0	0

Punjab State has a population of 24,358,999 as per 2001 Census comprising 11,871,211 (48.7%), never married, 11,499,566 (47.2%) married, 938,678 (3.9%) widowed and 49,544 (0.2%) divorced or separated. As per 1991 Census Punjab State had a population of 20,281,969

comprising 10,452,444 (51.5%) never married, 9,146,158 (45.1%) married, 673,569 (3.3%) widowed, 8,768 (0.1%) divorced or separated and 1,030 (0.0%) un-specified.

In Hoshiarpur district, out of the total population of 1,480,736 as per 2001 census; 733,203 (49.5%) are never married, 674,826 (45.6%) are married, 69,243 (4.7%) are widowed, 3,464 (0.2%) are divorced or separated. Thus, the patterns observed for the State and the district are almost identical. Amazingly the percentages of both state and district for divorced or separated tally with each other.

Annexure VII

Sex and Educational level:

It has become customary for the Indian Census to obtain details of educational levels of the literates in the society. Question 13 of the Household Schedule canvassed at the 2001 census aimed to elicit information on the highest educational level attained. The data so collected is put to public domain by classifying the population by sex and educational levels.

The following table shows percentage distribution of literates by educational level for Punjab State and Hoshiarpur district as per 1991 as well 2001 Census.

PERCENTAGE DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL AS PER 1991 AND 2001 CENSUS

Educational Levels	Total Rural Urban	Punjab						Hoshiarpur					
		1991			2001			1991			2001		
		P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Below Primary	Total	21.8	20.9	23.1	20.0	19.7	20.4	19.3	17.9	21.2	17.6	17.6	17.6
	Rural	24.2	22.9	26.2	22.9	22.3	23.7	20.0	18.4	22.3	18.5	18.4	18.6
	Urban	17.6	17.2	18.2	15.5	15.6	15.4	15.9	15.5	16.4	14.3	14.6	14.0
Primary but below middle	Total	27.9	25.3	31.7	25.6	23.7	28.3	29.0	25.4	34.1	25.5	22.9	28.7
	Rural	31.8	28.4	37.0	29.3	26.6	33.0	30.5	26.4	36.3	27.1	24.1	30.7
	Urban	21.2	19.7	23.3	19.9	19.0	21.1	21.7	20.0	23.9	19.5	18.1	21.2
Middle but below matric	Total	18.1	19.0	16.7	16.9	17.5	16.1	20.2	21.6	18.3	18.7	19.5	17.7
	Rural	18.5	19.8	16.7	17.7	18.5	16.8	20.9	22.4	18.8	19.4	20.4	18.3
	Urban	17.3	17.7	16.8	15.7	16.1	15.1	17.0	17.4	16.4	15.8	16.2	15.4
Matric but below graduate	Total	26.3	28.6	22.8	30.8	32.7	28.4	27.1	30.2	22.8	33.1	34.7	31.2
	Rural	23.0	26.0	18.3	27.5	29.9	24.3	25.8	29.3	20.8	31.9	33.6	29.8
	Urban	32.0	33.5	30.0	36.0	37.1	34.6	33.4	34.6	31.9	37.5	38.5	36.4
Graduate and above	Total	5.9	6.1	5.7	6.6	6.4	6.7	4.4	5.0	3.6	5.2	5.4	4.9
	Rural	2.5	3.0	1.8	2.5	2.8	2.2	2.8	3.5	1.8	3.1	3.5	2.7
	Urban	11.8	11.9	11.8	12.9	12.2	13.7	12.0	12.5	11.4	12.8	12.6	13.0

As per 1991 census 21.8 per cent of the literates in Punjab were below primary level of education, 27.9 per cent were primary but below middle and 18.1 per cent were middle but below matric. A little over one-fourth (26.3%) of the literates in the State were matric but below graduation. It was only 5.9 per cent of the literates who had attained graduation or above level of education.

According to 2001 census 20.0 per cent of the literates in Punjab are below primary level of education, 25.6 per cent are primary but below middle and 16.9 per cent are middle but below matric; 30.8 per cent are matric but below graduation. Only 6.6 per cent of the literates in Punjab are graduate and above. Whereas there is some decline in first 3 levels as compared to 1991, last 2 level exhibit slight improvements.

In Hoshiarpur district, the incidence of educational level is lower than that of the State in 2001 in the three cases below primary, primary but below middle and graduate and above. In the

district 17.6 per cent of the literates are below primary and another 25.5 per cent are primary but below middle. The percentage of literates with middle and matric levels of education is higher in Hoshiarpur district as compared to the State. In the district 18.7 per cent of the literates are middle passed as compared to state with 16.9 per cent. Likewise the percentage of matriculation, with 33.1 in Hoshiarpur district is higher than that of the State with 30.8 per cent and for graduate and above the State (6.6%) outdoes the district (5.2%).

Annexure VIII

Distribution of Different Mother Tongues:

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood is recorded as the mother-tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. These may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Mother Tongue and Language data based on 1991 & 2001 Censuses is given here. The distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each) for the district by sex separately for rural and urban areas. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table is divided into two parts; Part A- Scheduled languages with the mother tongues grouped under each, and Part B- Non-Scheduled languages with the mother tongues grouped under each. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census, are basically the designations provided by the respondents. These designations or mother tongue label need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects, the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1576 rationalized mother tongues in 1991 for the entire Country, which was further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.

Table below shows languages arranged in descending order of number of speakers in Hoshiarpur district as per 1991 and 2001 censuses. Punjabi is the most dominant language spoken in the State and the district. It is spoken by 1,405,862 persons in Hoshiarpur district and this forms 94.94 per cent of the district's total population. Hindi, the second most dominant language is spoken by 61,716 (4.17%) persons in the district.
