TAKHAT SRI KESHGARH SAHIB GURUDWARA

Sri Anandpur Sahib in Rupnagar district of Punjab, is the holy city of Sikhs and known as the “City of Bliss”. The most important shrines at Anandpur Sahib is Gurudwara Keshgarh Sahib, which stands on the place where the "Khalsa" was born. It is regarded as one of the five sacred "Takhats" or seats of Sikh religion. It was here in 1699, on the Baisakhi day (13th April), Tenth Guru Gobind Singh Ji created Khalsa by baptizing five beloved Sikhs known as "Panj Piaras".

Urban Primary Census Abstract. 486

Annexure I	:	Number of villages under each Gram Panchayat	504
Annexure II	:	Fertility and child Mortality, 1991 Census	504
Annexure III	:	Measures of fertility and mean age at marriage, fertility level	505
Annexure IV	:	Percentage distribution of in Migrants by place of birth/place of last residence	506
Annexure V	:	Brief account of main religions in the district/tahsil as per 1991 Census	507
Annexure VI	:	Marital status of population	508
Annexure VII	:	Distribution of Literate by sex and Education Level	509
Annexure VIII	:	Distribution of different mother tongues.	510

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census , is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics, village-wise and town-wise, of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive Censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added to it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA which was restructured. Nine–fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and

recreational facilities. In town directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristics of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv).age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) in all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Inder Jit Singh, IAS, Director of Census Operations, Punjab. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General, (C&T) and Dr. I.C.Aggrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP), helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assitant Director. I am thankful to all of them and others who contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 2007

Preface

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to also include village level data on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B - Primary Census Abstract, giving data for each village within the Community Development (CD) Block and each town in the district. The CD block maps included, presenting village level data, have been prepared by using computer assisted technology. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetters and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Shri D.K. Sikri, IAS, Additional Secretary, Registrar general, India and Census Commissioner and Shri J.K. Banthia, IAS, former Registrar General and Census Commissioner, India for their directions and support from time to time in accomplishing this arduous task.

In the directorate, at the outset we are beholden to Shri Inder Jit Singh, IAS under whose able guidance and direction as Director Census, Punjab, the census operations in the state were successfully completed.

Our thanks are also due to Shri D.R. Khanna, Ex-Deputy Director for getting the compilation of data and Shri Madhav Shyam, Ex-Deputy Director for drafting this specimen model which has been replicated in other DCHBs.

The great effort and hard work done by Shri S.K. Bhandari, Ex-Assistant Director, Shri Bhagirath Singh, Assistant Director and Shri Rajender Prasad, S.I.Gr-I are greatly acknowledged. Sh. Azad Kumar, S.I. Gr-III and Sh. H.S. Sudan, S.I.Gr-III deserved special thanks for having completed the publication work.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

District Highlights - 2001 Census

1. Rupnagar district ranks 13th in area and 10th in population.
2. Rupnagar is the most populous and SAS Nagar (Mohali) is the least populous tahsil.
3. The average population size of village in the district (872) is lower than that of the state (1,311).
4. Chamkaur Sahib (8,284) in Rupnagar tahsil is the largest village by population size followed by Balongi (7,798) in SAS Nagar (Mohali) district.
5. 5 villages in the district are large sized with a population of 5,000 or more.
6. The decadal population growth rate in the district (24.1%) is higher than the state average (20.1%).
7. Out of the total population, of the district 67.5 per cent is rural (ranks 11th) while only 32.5 per cent is urban (ranks 8th).
8. The sex ratio in the district (871) is lower than the state (876). It ranks 12th among the districts in the state.
9. The child sex ratio in the district (794) is also lower than the state (798). It ranks 9th among the districts in the state.
10. Rupnagar district has a population of 1116,108 comprising 596,582 males and 519,526 females.
11. Rupnagar district makes 4.6 per cent of the total population of the State.
12. The district has 4 tahsils viz Anandpur Sahib, Rupnagar, Kharar and SAS Nagar (Mohali).
13. Out of the total population, the district has 35.6 and 3.6 per cent main workers and marginal workers respectively.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Ever since the beginning of first post independence Census of India 1951, the publication of District Census Handbooks (DCHBs) has become a regular feature of the Indian Census. Produced by the Census Organisation of Government of India on behalf of the State Government, the DCHB is a unique publication which gives the census as well as non-census data down to every village in case of rural areas and ward within the town/urban area in the state. It is recognized as one of the most comprehensive sources of information. Infact, this is the only publication which provides primary census abstract based on census, and non-census data on infrastructure and amenities available, such as educational, medical, postal and communicational at the sub-micro level. It is inter- alia used for delimitation of constituencies, formulation of local level and regional plans and serves as a valuable tool for district administration.

Undisputedly, DCHB has remained to be the most comprehensive and valuable product of the census organization ever since its initiation. It has always been the endeavour of the Census of India to enlarge the content and coverage of the data presented at every census. The DCHB series of 1951 Census contained important Census Tables and the Primary Census Abstract. At the 1961 Census, the scope of the DCHB was enlarged by including a descriptive account of the district, administrative statistics, census tables and the village and town directory. In 1971, the DCHBs were planned in three parts; Part-A included the village and town directory, Part-B included village and town wise primary census abstract, while the Part-C was meant to include analysis of census data and a write up covering social, cultural, historical and other important aspects. However, in some states/union territories Part-C remained confined to the district tables only.

During 1981 Census, some new features were added and the formats of village and town directory were restructured, somewhat. These volumes were published for each district in two parts. Part- A included village and town directory, while Part-B included primary census abstract (PCA) of every village and ward in town/urban area. The inclusion of scheduled castes PCA was the additional feature of the 1981 Census. The village directory of 1981 Census included new parameters viz; information on Adult literacy Centres, Primary Health Sub-Centers and Community Health workers in the village (s) to meet the requirement of the Revised Minimum Needs Programme. In addition, information on approach to the village was also provided for the first time in the village directory to help in taking stock of villages requiring road linkages in the district. Likewise, Statement IV-A included in the Town Directory aimed to provide data on slums so as to undertake development activities in such areas.

The manner of presentation of the DCHBs for the 1991 Census was, by and large, same as followed in 1981 Census. However, the format of PCA was slightly restructured in the 1991 Census for the benefit of data users. The village level data were presented Community Development (C.D.) block wise to cater to the needs of grass root level planning as envisaged under the five year plans. Ninefold industrial classification of the main workers was reintroduced by replacing the four-fold industrial categories adopted at the 1981 Census. In addition, the PCA also gave population in the 0-6 age group by sex essential for working out effective literacy rate, besides providing proportion of child population.

The DCHB 2001, the present volume, is the sixth in series. The pattern followed is, by and large, similar to that of the 1991 Census. Among the new features added, information on the availability of newspapers/magazines, banking facility, agricultural and non- agricultural societies, recreational and cultural facilities and income and expenditure of the village panchayatsind mention. More important is that, it is for the first time in the history of Indian

Census that Permanent Location Code Number (PLCN) has been allotted to every village in the state to meet the demand from different organizations to study the village level data over a time spell. It is believed that the permanent location codes assigned to each village would help in tracing the precise location of a village on account of jurisdictional changes in the boundaries of various administrative areas.

(ii) Brief history of the district

The town of Rupnagar is of considerable antiquity. The town is said to have been founded by a Raja called Rokeshar who ruled in the 11th century and named Rupnagar after his son Rup Sen. The recent excavations carried out at Rupnagar have proved that this town was the seat of well developed Indus Valley Civilization . In proto - Historic Punjab, perhaps, Rupnagar is the only known excavation site which can claim the status of a small town or city. The founds in recent excavations consist of earthen bares, statues, coins, etc. It proves that the city dates back to Harrappa - Mohanjodharo civilization which crossed Satluj river. Many of them settled at this place. In the excavations many things founded belongs to Chandra Gupta, Kushan, Hoon and Mughal period. One of rare finds is a seal of Marble on which there are three letters engraved in Sindhi script. One of the finds is the statue of a woman dressing her hair. All these prove that even the people living in this town 4000 years ago were fully civilized and well cultured.

Many historians are of the view that when the first man descended from the mountains in the north to plains, he settled down at Rupnagar. A Mount is still preserved by the Archaeology Department at Rupnagar. S. Hari Singh Rais of Sialba conquered Rupnagar in 1763 A.D. and established his state. His son Charat Singh made Rupnagar capital of the state.

After the fall of Sirhind in 1763, Rupnagar came under the Sikhs Chief Hari Singh. The most famous ruler of Ropar state was Raja Bhup Singh, who fought in the Anglo Sikhs war of 1945. On the side of Maharaja Dalip Singh the minor successor of Maharaja Ranjit Singh, against the British. Consequently, after the victory of the British, Ropar state of Raja Bhup Singh was confiscated.

The history of Ropar district, in fact the war of Guru Gobind Singh Ji against Mughal tyranny, exploiters and social evils. It is here in this district at Sarsa Nangal that the great Guru parted with the family and proceeded to Chamkaur Sahib where two elder Sahibzadas laid down their lives fighting for truth and Guru Sahib left for Machhiwara on a constant struggle.

The other important historical place in this district is Kiratpur Sahib situated on the banks of the river Satluj. This town was established by 6th Shri Guru Har Gobind Singh Ji after buying Land from Raja Tara Chand of Kehloor through Baba Gurditta Ji. It is said that Guru Nanak Dev Ji made a professy regarding the establishment of this place. It is here at this place that Guru Nanak Dev Ji met saint Buddan Shah in a Jungle. It is here in Sheeshmahal that Guru Har Gobind Sahib stayed from Samvat 1691 till the end came. Shri Guru Har Rai Ji and Shri Guru Har Krishan Ji were also born at this place and they were blessed with Guru Gaddi at this place. It is here at Gurudwara Patalpuri Sahib that Sikhs from all over the world immerse the ashes after death. Even the Babhuti of Shri Guru Har Krishan Ji was brought from Delhi and established at this place. About a half-mile away from Kiratpur Sahib the Takia of Saint Buddan Shah is situated.

Anandpur Sahib, a historical town in this district was founded by 9th Guru of Sikhs Shri Guru Teg Bahadar Ji after buying Land in Village Makowal in 1723 A.D. It is at this place that the great 9th Guru performed perance to commemorate the gurudwara Bhaura Sahib built at Anandpur Sahib. It is also here at Anandpur Sahib that Kashmiri Pandits approached 9th Guru to save them from Mughal Tyranny. Acceding their request on the motivation of Guru Gobind Singh Ji, Shri Guru Teg Bahadar Ji left for Delhi to make Supreme Sacrifice. At Anandpur Sahib

the great 10th Guru of Sikhs Shri Guru Gobind Singh Ji spent his early age. It is here that the great Guru mastered the use of arms in Kila Anandgarh Sahib.

Further it was at Anandpur Sahib in Rupnagar District that Shri Guru Gobind Singh Ji created Khalsa in 1699 on Baisakhi Day and brought about a cultural revolution. It was the most important landmark in the history of Sikhs. The Khalsa created by Guru Gobind Singh Ji later on acquired the sovereign power of Punjab under Maharaja Ranjit Singh. The creation of Khalsa at Anandpur Sahib is the most important event not only in the history of Rupnagar district, but also in the history of the Sikhs and Punjab. Gurudwara Keshgarh Sahib at Anandpur Sahib still commemorates the memory of the historical event of creating Khalsa Panth at this place.

Another most important landmark added to the history of the district in April 1999 when 300th Birth of Khalsa Panth was celebrated at Anandpur Sahib. Besides lacs of people from all walks of life from all over of the world comprising heads of important religious bodies, social, political and administrative personalities participated in the Tercentenary functions and paid obeisance at Gurudwara Takhat Shri Keshgarh Sahib. Historic City of Anandpur Sahib has been developed as tourist center. A Khalsa heritage Memorial complex is being constructed here.

(iii) Administrative set-up

The State has experienced a large-scale jurisdictional changes after the 1991 census. The number of districts has increased from 12 in 1991 to 17 in 2001. The newly created districts include; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. With the exception of Kapurthala district, all other 11 districts in the State have experienced inter-district jurisdictional changes of varying magnitude.

These 17 districts are distributed over four divisions. Jalandhar division includes districts of Gurdaspur, Amritsar, Kapurthala, Jalandhar, Hoshiarpur and Nawanshahr; Patiala division covers districts of Rupnagar, Ludhiana, Patiala, Fatehgarh Sahib and Sangrur. Firozpur division spreads over districts of Firozpur, Moga and Muktsar, while Faridkot division embraces districts of Faridkot, Bathinda and Mansa.

All the districts of 1991 Census except Kapurthala has undergone intra-districts jurisdictional changes resulting in increase in the number of tahsils in the State from 46 in 1991 to 72 in 2001 Census. (In Punjab Tahsil and Sub Division are synonymous to each other). Rupnagar district spreads over an area of 2113 sq. kms. Presently it is sub-divided into four tahsils: 1. Anandpur Sahib, 2. Rupnagar, 3. Kharar and 4. SAS Nagar (Mohali).Likewise the number of towns in the district has increased from 8 to 11, out of which 7 have statutory status. The newly added towns Nehon, Mullanpur Garib Dass, Karoran and Bhabat have the status of Census Towns.The district constitutes 11 towns and 889 villages.

Further it is sub divided into 7 Community Development Blocks: Anandpur Sahib and Nurpur Bedi in Anandpur Sahib tahsil; Chamkaur Sahib, Morinda and Rupnagar in Rupnagar tahsil; Kharar and Majri in Kharar tahsil It is the 7th district in the State in chronological order as per census 2001 and was carved out of Ambala district(Now in Haryana State) on 1st November, 1966 consequent upon re-organisation of Punjab State.

The statutory towns are notified by the State government. Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or transitional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the state government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specify by notification in the official gazette any area to be transitional area or a smaller urban area for the

purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the state government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the Ist Class, IInd Class or IIIrd Class.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows:

Sl. No.	Class of Urban Local Bodies	Population	Income
1	Municipal Corporation	3 lac or above	2 Crore or above
2	Municipal Council Class I	50,000 to 3 lac.	50 lac to 2 Crore
3	Municipal Council Class II	10,000 to 50,000	15 lac to 50lac
4	Municipal Council Class III	Up to 10,000	Up to 15 lac
5	Nagar Panchayat	5,000 or above	More than Rs.150

The following statement indicates the jurisdictional changes, which took place after the 1991 Census in Rupnagar district:

Jurisdictional Changes during 1991-2001

Name of District/Tahsil	No. of villages		No. of Towns		Changes since 1991 & Govt. Notification No.
	1991	2001	1991	2001	
1	2	3	4	5	6
Rupnagar	917	889	8	11	
Ananadpur sahib	238	249	1	2	i) Anandpur Sahib tahsil gained 11 villages from Rupnagar tahsil vide notification No. 2/44/94-RE II (1)/6767 dated 20.07.95
Rupnagar	385	367	5	3	ii) Rupnagar tahsil lost 23 villages to Fatehgarh Sahib district (Khamano tahsil) vide notification No. 2/3/92-RE II (1) 4412 dated 09.04.92 iii) Out of above 23 villages 4 villages i.e. (1) Sangatpura H.B. No. 263, (2) Doomcheri H.B. No. 262, (3) Chalaki H.B. No. 256 and (4) Tajpura H.B. No. 261 again transferred from Bassi Pathana to Rupnagar tahsil vide Notification No. 2/58/92-RE II (1)/6269 dated 28/29.06.93 iv) Rupnagar tahsil lost 11 villages to Anandpur Sahib vide Notification No. 2/44/94-RE II(1)6767 dated 20.07.95 v) Rupnagar tahsil gained 13 villages from Kharar tahsil vide Notification No. 2/7/92/RE II(1) 11386 dated 14.08.92 vi) Out of 13 above mentioned villages one village Chatauli H.B. No. 125 again transferred from Rupnagar tahsil to Kharar tahsil vide Notification No. 2/44/94-RE II (1)/6767 dated 20.07.95 vii) Rupnagar tahsil gained 6 villages from Samrala tahsil vide Notification No. 2/3/92-RE II(1) 4727 dated 09.04.92.

Jurisdictional Changes during 1991-2001

Name of District/Tahsil	No. of villages		No. of Towns		Changes since 1991 & Govt. Notification No.
	1991	2001	1991	2001	
1	2	3	4	5	6
Kharar	294	191	2	4	viii) Kharar tahsil lost 7 villages to Bassi Pathana tahsil vide Notification No. 2/3/92-RE-II(I)4412 dated 09.04.92
					ix) Out of above mentioned 7 villages two villages i.e. Grangon H.B. 373 & Sil H.B. No. 390 again transferred to Kharar tahsil vide notification No. 2/44/94-RE-II (1)6769 dated 20.07.95
					x) Kharar tahsil lost 13 villages to Rupnagar tahsil vide notification No. 2/7/92-RE-II(I)11386 dated 14.08.92
					xi) Out of above mentioned 13 villages one village Chatauli H.B. No. 125 again transferred to Kharar tahsil from Rupnagar tahsil vide Notification No. 2/44/94-RE-II(I)6767 dated 20.07.95
					xii) Kharar tahsil gained 3 villages 1) Machhali Kallan (238) 2) Machhi Khurd (240) 3) Chuhar Majra (239) from Rajpura vide Notification No. 2/3/92-RE-II(I)4727 dated 09.04.92
					xiii) Kharar tahsil lost 84 to newly created tahsil Mohali vide notification No. 2/44/94-RE II (I)/6761 dated 20.07.95.
SAS Nagar (Mohali)		82		2	xvi) Tahsil Mohali has been newly created by including 84 villages of existing Kharar tahsil vide notification No. 2/44/94-RE-II(I)6761 dated 20.07.95
					xv) One village Zirakpur (235) transferred to tahsil Dera Bassi of Patiala vide Notification No. 2/9/99-RE-II(I)/2579 dated 07.05.99

For the administrative purposes, the district is a part of Patiala Division. For the purposes of general and revenue set up the district is divided into four tahsils viz., Anandpur Sahib, Rupnagar, Kharar and SAS Nagar (Mohali). All of them have sub divisional status. The district is further sub-divided into 7 community development blocks viz., 1. Anandpur Sahib, 2. Nurpur Bedi, 3. Chamkaur Sahib, 4. Morinda, 5. Rupnagar 6. Kharar and 7. Majri. There are 11 towns viz 1. Anandpur Sahib, 2. Nangal, 3. Nehon, 4. Rupnagar 5. Morinda, 6. Kurali, 7. Mullanpur Garib Dass, 8. Karoran, 9. Kharar, 10. SAS Nagar (Mohali) and 11. Bhabat. The district is the basic unit of administration. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district and revenue administration in the district.

(iv) Physical Features

Origin of Name:

The district takes its name from the district headquarters town, formerly known as Ropar, but re-named as Rupnagar by the state government vide notification dated 16th November, 1976. The

town of Rupnagar is said to have been founded by a Raja called Rokeshar who ruled during the 11th century and named it after his son Rup Sen. Incidentally, the name also fits into the beautiful landscape in the surrounding area. The town is of considerable antiquity. The recent excavations conducted near Government College at Rupnagar indicate that it was a centre of Harrappan culture which prospered here in the 3 rd millennium B.C. The District was carved out on 1st November, 1966 at the time of re-organization of the State. The district has rich historical and religious significance behind it.

Location and Size:

Rupnagar district formerly known as Ropar forms part of Patiala Division of Punjab, falls between north latitude 30°-32' and 31°-24' and east longitude 76°-18' and 76°-55' and is located on the eastern fringes of the state. It is 42 Kms from Chandigarh, the state capital and shares common boundaries with Una, Bilaspur, Nalagarh and Solan districts (Himachal Pradesh) in the north – east, Ambala district (Haryana) and Chandigarh district (Chandigarh Union Territory) in the east, Patiala, Fatehgarh Sahib and Ludhiana districts in the south and south – west and Hoshiarpur and Nawanshahr districts in the west.

Area:

According to Surveyor General of India, the area of the district is 2113.0 sq. kms. and it ranks 13th in area in the State. Out of an area of 2113.0 sq. kms., as supplied by Surveyor General of India, an area of 136.4 sq. kms. is urban, shared between urban civic bodies, whereas the remaining 1976.6 sq. kms. is rural. The rural area of the district is derived by subtracting urban area of the district from the total district area, as supplied by the Surveyor General of India. The tahsil wise rural area, as supplied by the Director, Land Records, Punjab is as follows: (1) Anandpur sahib tahsil 632.0 sq. kms., (2) Rupnagar tahsil 754.2 sq. kms.,(3) Kharar tahsil 471.9 sq. kms., and (4) SAS Nagar (Mohali) 159.9 sq. kms. It would be noticed that tahsil areas when added up work out to 2018.0 sq. kms. which do not tally with the area as supplied by the Surveyor General of India. The urban area of the district has been obtained by adding up areas of the towns as supplied by urban local bodies. The rural area of each tahsil has been obtained by subtracting urban area from the tahsil area as supplied by the Director, Land Records, Punjab. The Community Development Block area has, however, been obtained by adding up village areas of the constituting villages, including census towns and outgrowth of Urban Agglomerations (UA), if any.

Climate:

The district is located in the sub mountain region of the state. It is interspersed with low hills of Katar Dhar and Kolhai range of the Shivaliks. The districts proximity to the outer Himalayan Range brings moderation and severity to the summer and winter seasons respectively. Compared to southern districts of Punjab which are away from the hills, this district experiences more rainfalls.

There are two principal seasons, summer (April to September) and winter (October to March). The summer months of May and June are the hottest during which maximum temperature may touch 47°C on some days in the month of June. May and June are both hot and dry.

The climate of the district is characterized by dryness (except in the brief monsoon seasons), a very hot summer and bracing winter. The year may be divided into four seasons. The cold season from about the middle of November to the early part of March is followed by the hot season which lasts till about the end of June. July, August and first half of September constitute the

south-west monsoon season. The period from mid-September to about the middle of November may be termed as the post-monsoon or transitional period.

After February, there is a steady increase in temperature. June is generally the hottest month. Scorching hot winds laden with dust blow during summer. With the onset of the monsoon in the district in about the first week of July, there is an appreciable drop in day temperature. The weather is sultry and uncomfortable during rains due to the presence of moisture in the air. After the monsoon, by about mid September, there is a rapid drop in the temperature, especially during night. January is usually the coldest month. Winter is at peak in the month of December and January when minimum temperature may dip as low as between 1°C - 4°C on some days. In winter rains are experienced mainly in January and February due to western disturbances. Cold waves affect the district in the wake of passing the freezing point.

The rainfall in the district generally increases from the south-west towards north-east. About 70 per cent of the annual rainfall is received during the monsoon months (July to September), July-August being the wettest months. There is also some rainfall during the period from December to March which amounts to about 10 per cent of annual rainfall. The remaining rainfall is received in the rest of the months of the year. The following table shows monthly rainfall of 5 years, 1996-2000 for the district.

Monthly Rainfall: Average of 5 years 1996-2000

Month	Rainfall (mm)	Month	Rainfall (mm)
1. January	29.2	7. July	214.8
2. February	28.8	8. August	202.5
3. March	14.4	9. September	74.0
4. April	7.8	10. October	5.5
5. May	24.4	11. November	8.8
6. June	94.5	12. December	26.2
Total			**740.9**

(Source: Statistical Abstract of Punjab, 2001)

Physiography:

The topography of the district could be divided into five physiographic units which are briefly described as under:--

I-The Anandpur Dun:

It is an elongated valley enclosed by Shivalik hills on the south-west and the outer Himalayas on the north-east. It runs from Nangal in the north to Kakrala village in the south over a distance of about 50 kms. with an average width of 10 kms. The Satluj river enters this valley near Nangal and flows along its longer axis. The Soan Nadi (river) joins Satluj in the upper section of this valley from the north-west and the Sirsa Nadi merges with it in the south-west from east. Elongated strips of land between the river and the adjoining hills are traversed by a large number of seasonal streams, locally called Chos.

II- The Hilly Tract:

It has 3 characteristic division; (i) Eastern slopes of Katar Dhar; (ii) The western slopes of slopes of Kolhai Range and (iii) The western peripheral fringe of Naina Devi Range.

The eastern slopes of Katar Dhar (A range of Shivalik hills) stretch along the south –western boundary of Anandpur Sahib tahsil over a distance of 36 kms. The western slopes of this range, however, fall in Balachaur tahsil of Nawanshahr district. The western slopes of Kolhai range of

the Shivalik running along, the tract of the district over a distance of 35 kms. The western peripheral fringe of Naina Devi runs along the western and south-eastern boundary of Anandpur Sahib tahsil, facing Anandpur Dun.

III- The Foothill Dissected Plain:

The foothill plain lies to the immediate south – west of Kolhai Range of the Shivalik. It stretches 30 kms in length and 7 kms in breadth. A large number of closely spaced seasonal streams called chos dissect this plain.

IV- The Upland Plain:

This is located to the south-west of the Foothill Plain both in Rupnagar and Kharar tahsils. This is a flat featureless plain. Some seasonal streams traverse this tract after merging with each other in the Foothill Plain.

V- The Flood Plain of the Satluj:

This physiographic unit consists of strip running for a distance of about 20 kms along the Satluj river from Rupnagar in the east to the western boundary of the district. It is only one to two kms wide in the east but widens to about 4 kms in the western part. Previously, it was waterlogged but now has been reclaimed. The ravages of Satluj floods have decreased with the construction of Bhakra Dam and Nangal Dam.

River and Drains:

The district being sub-mountains is criss-crossed by a number of seasonal streams and rivers. The important ones are: Satluj, Soan and Sirsa.

Satluj River:

It is the most important river of the district as well as the State and is counted among the sacred rivers of India. It originates from Mansrover Lake in Tibet and enters into India in Himachal Pradesh through Shipkila Pass and finally enters this district near Nangal, the place where it leaves Himalayas. From Nangal onwards, it flows sluggishly through Anandpur Sahib Dun for a distance of 60 kms leaving the Dun through an opening in the Shivaliks near Rupnagar and from there it roughly demarcates boundary between Rupnagar and Nawanshahr districts for about 25 kms. The river has been dammed at Bhakra in Himachal Pradesh, where the man made lake called Gobind Sagar has been formed. In the district, however, 2 barrages, one at Nangal and the other at Rupnagar have been constructed to utilise its waters for irrigation and power generation. From Nangal Dam, 2 channels, one known as Nangal Hydel (later known as Bhakra main Canal) and the other Anandpur Hydel (later known as Satluj) have been taken out. From Ropar headworks, Sirhind Canal and Bist Doab Canal have been taken out.

Soan River:

It is a major tributary of Satluj in the district. This originates near Daulatpur chowk in Una district in Himachal Pradesh. After flowing some 50 kms. in Una district, it enters Rupnagar district near Santokhgarh and flows some 16 kms. before merging into Satluj river near Bhallan in Anandpur Sahib tahsil. Earlier, it was known as the river of misery due to flash floods and caused extensive damage to both cattle and properly and also took heavy toll of human life during rains

due to non-existence of bridges over this river. The position has since changed after construction of bridge at Santikhgarh (Himachal Pradesh) on Nangal – Garhshankar Road.

Sirsa Nadi:

It originates near Kalka (Haryana). After flowing through Nalagarh Dun (Himachal Pradesh) for about 40 kms, it enters Rupnagar district near village Banda Basot and flows 6 kms further before joining the Satluj. In the past, it was a dreaded stream because it took a heavy toll of human life from amongst pilgrims, who visited Naina Devi and Anandpur Sahib shrines. The stream has since been bridged on the Rupnagar-Nangal Road.

Besides the above described rivers, there are a number of seasonal streams which recede as fast as they rise during rains. Some important streams descending from the western slopes of Naina Devi range are; Donai-di-Khad; Debat Wali Khad; Charan Ganga; Mlssewal Khad; Kundlu-di- Khad etc. Streams rising from western slopes of Kolhai range of Shivalik hills, Budki-Nadi and Ṣiswan Nadi; fall in river Satluj, whereas, Jainti Devi-ki-Rao, Patiali Rao and Sukhna Nadi fall in Ghaggar Nadi. The streams emanating from eastern slopes of Katar Dhar join the Satluj after traversing 4 to 5 kms. However, there is no stream of any significance emanating from Katar Dhar.

Forestry:

Rupnagar district falls under the jurisdiction of Divisional Forest Officer, Patiala. Forest of the district is situated along with rail, roads and canal strips. Vegetation is also found within the small scattered birs throughout the district. Besides, the plantations along with the drains and bunds are under the management of forest department. The main trees found in the local forest are Shisham, Kikar, Mango, Tut, Jamun, Serin, Neem, Dak/Darek, Pipal, Eucalyptus, Beri and Khajur etc. Also there is a profuse growth of Kana, Kahi, Arjun, Dale and Battar etc in the water logged strips of the district. The break up of area under various types of forests in the district during 1990-91 and 2000-01 is as follows:

Serial No.	Type of Forest	1990-91 (in sq.kms)	2000-01 (in sq. kms.)
1.	Reserved Forests	-	-
2.	Protected Forests	7	56
3.	Unclassified Forests	10	13
4.	State Forests (Total 1 to3)	17	69
5.	Under S/38 of Indian Forest Act, 1927	-	446
6.	Total Forest (total 4+5)	17	515
7.	Percentage of area under forest	1.1	24.4%

The table reveals that during the 2000-01 the area under forests is 515 sq. kms. However, during 2000-01, no area has been reported under reserved forests, whereas 515 sq. kms are under State forests. But the percentage of area under forest is 24.4 per cent, which is amazingly above the norm prescribed for forest cover in the State.

Natural Economic Resources

Minerals and Mining:

There are no mines or quarries of significance in the district. However, foundry sand has been reported from Khanpur. Also occurrences of Ochre have been reported from near Nangal. Nearly 2.3 million tonnes of white quartzite boulders have been estimated in the Khads and Chos around Nangal and Mehatpur. Between Manakpur and Barari villages about 12.9 million tonnes of white fragments have been detected. The caltufa (calcarious Tufa) deposits occur mainly around Khera, Kalmot and Mehatpur villages.Sand and gravel used for construction of buildings etc. are taken out from chos and river bed at various places in the district. Gatka (crushed stone in big size) and Bajri (crushed stone in small size), made from boulders found in chos and river bed, are made in crushers located at various places in the district. These are used for metalling roads, tracks and construction of buildings etc.

Land and Land use Pattern:

As per the village records for the year 2000-2001, Rupnagar district has an area of 211,300 hectares (2,113 Sq. kms.) out of which 51,500 hectares is under forests, 11,000 hectares is barren and 12,800 hectares is put to non-agricultural uses, 3,000 hectares are under culturable waste and 3,000 hectares is under permanent pastures and other grazing land, 4,000 hectares is current fallow, and 126,000 hectares is net sown area, which works out to nearly 59.6 percent of the total area of the district. Out of this total net sown area, 84,000 hectares is sown more than once. Thus the total cropped area works out to 210 thousand hectares in the district during 2000-01. The district with 515 Sq. kms (24..4%) of its area under forest is nicely placed. There are no reserved forests in the district and the forest cover of the district is mainly protected forest.

Agriculture :

There are two principal crop seasons Kharif (sawni) and Rabi (hari) in the district. Both the seasons are equally important but area wise Rabi is more important of the two as it reported 89 thousand hectares against 77 thousand hectares reported in Kharif in the year 2000-01. Out of 210 thousand hectares cultivated area the area under food and non-food crops is 178 thousand hectares and 32 thousand hectares, respectively. In terms of percentages the area under food crops is 84.8 per cent against 15.2 per cent under non-food crops. The major and minor crops during Kharif season are; Paddy, Maize, Groundnut, Sugarcane, Cotton, Pulses, Chillies, etc; whereas Wheat, Gram, Barley, Potatoes, Oilseeds are the major and minor crops of the Rabi season. Among the food crops important ones are; Wheat, Rice and Maize, which account for 163 thousand hectares (77.6%).

Rupnagar district is not an agricultural district though 67.5 per cent of its population is reported to be residing in the rural areas during 2001 Census whereas agriculture engaged only 29.5 per cent of its main workers during 2001 Census (cultivators 21.5%, agricultural labourers 8.0%). This percentage is next only to Ludhiana district (20.2 %) and surprisingly it is excelled by all districts in agricultural labourer (8.0 %). Thus it would be seen that agriculture does not provide the single largest source of employment in the district and this decline is noticeable during the last few decades.

During 2000-2001, 49,000 hectares of area was under rice cultivation in the district and 28,000 hectares under Maize. This signifies that rice (paddy) is the most dominant Kharif crop grown in the district. During 2000-2001 the district produced 163 metric tonnes of rice at an

average yield of 3,327 kg per hectare and 70 metric tonnes of Maize at an average yield of 2,500 kg. per hectare.

Among the Rabi crops, wheat is the most dominant. During 2000-2001, 86,000 hectares of agricultural land was under wheat cultivation. The district produced 312 metric tonnes of wheat during 2000-2001. The average yield of wheat per hectare in the district was 3,628 kgs.

Rapeseed and mustard and Sesame are the other important crops grown in the district and area under cultivation of these two crops is 2,100 hectares and 600 hectares respectively.

Out of the total production of 66 metric tonnes of rapeseed and mustard and 9 metric tonnes of Sesame in the state, the share of Rupnagar district was 1.8 metric tonnes and 0.6 metric tonnes respectively.

The vegetables are also grown in the district. An area of 2,244 hectare was reported under vegetables during 2000-01. The break up of area is as follows. Potatoes 904 hectares, Onions 53 hectares, winter vegetables 702 hectares and summer vegetables 585 hectares. The demand for vegetables is picking up in the district as the urban centers have grown over the years. The establishment of various colonies etc. under various central and state projects increased the demand for vegetables.

Besides compost (both in urban and rural), cattle dung and green manures, chemical fertilizers are increasingly being used in this district. During 2000-01, 27,000 tonnes of chemical fertilizers mainly nitrogenous 21,000 tonnes, Phosphetic and 6,000 tonnes were consumed in the district for growing improved varieties of wheat, paddy sugarcane, cotton, etc. The farmers are, however, becoming conscious of the delirious effects of reckless use of chemical fertilizers in their farms. The farming scientists are required to provide them with some alternative nutritive soil agents so that crop yields do not suffer.

Irrigation:

The main sources of irrigation in the district used to be Bhakra Main Canal and Sirhind Canal which flow through the district in sizable length, however, rain fed streams are also highly crop productive. However, major part of area is irrigated by tubewell and wells.

The canals irrigation was introduced in the district in 1954 when the construction of Bist Doab canal, which takes off from the Rupnagarr Headwork's on the right bank of river Satluj, was completed. Since the sub-soil water is suitable for irrigation and water table is not low the well irrigation is preferred. Earlier irrigation was practiced through Persian wheels, charsas and Dhingli but now diesel/electricity operated tubewells and pumping sets are used in irrigation.

However, during the year 2000-01 the net irrigated area reported was 93.100 hectares, out of which 1,700 hectares from government canals and 91,400 hectares from tubewells and wells. Thus percentage of net area irrigated to net area sown worked out of 73.9 per cent for this district during 2000-01. Also during 2000-01 out of 210,000 hectares gross cropped area, 165,500 hectares was gross irrigated area. During 2000-01 the percentage of gross irrigated area to gross cropped area worked out to 78.8 per cent for Rupnagar.

Horticulture:

Among the fruits, mango is the most suitable to the local soil. Horticulture is gaining popularity in the district for the last few years. During 2000-01, an area of 1928 hectares was reported under various fruit trees. The break up of area under various fruits is as follows: Kinnows 418 hectares, Orange and Malta 20 hectares, Lemon 25 hectares, Mango 947 hectares, Litchi 50 hectares, Guava 341 hectares, Pear 28 hectares, peach 42 hectares, Plum 4 hectares, Grapes 3 hectares, Ber 13 hectares, and Miscellaneous 37 hectares. Farmers have to make their

own arrangements for marketing these fruits. The farmers have persistently demanded the setting up of some factories to process their produce to bring them remunerative returns from fruits, which require very delicate handling before disposal. Day by day the attitude of the farmers is changing and horticulture has become very popular in the district.

Animal Husbandry:

Live stock, the back bone of the peasantry and the farmer, has traditionally been depending upon draught animals for ploughing and milch cattle, mainly cows and buffaloes for milk and other dairy products for domestic use and for supplementing their farm income. The ever increasing demand for milk and the opening of modern dairies in the district have created quality consciousness among the farmers, who prefer cross-breed cows of exotic breeds like Jersey, Holstein, and Dane etc. The fast development of urban centres like, S.A.S. Nagar (Mohali) and Chandigarh (out side district as well as State) provide excellent markets for milk, poultry and meat products. This has put the animal Husbandry in a state of flux. Modern dairy farms, poultry farms and modest sized piggeries have come up in the district.

The data on livestock in Punjab is available for the year 1997. It reveals that there are 73,400 cows, 260,000 buffaloes, 500 horses and ponies, 100 donkeys, 400 Mules, 3300 sheep, 19,400 goats, 100 camels and 1500 pigs, (total 358,700 animals). Cows and Buffaloes, as else where, are the two most dominant milch animals in the district. The district can boast of a fairly rich cattle wealth. The decline in the number of cattle is attributable to the mechanization of agriculture and transportation, which make lesser demand of draught cattle. However, due to the ever increasing demand of milk in the urban centers, the demand of milch buffaloes, which are mainly of good breads (murrah and nili) has also shot up.

The government too is aware of its responsibility for the development of animal husbandry. It maintained 63 veterinary hospitals, 70 veterinary dispensaries, 6 poultry service centers in the district in 2000-01, where treatment of sick animals, the control and prevention of contagious diseases among animals, the castration of useless male stock for the improvement of breeds, the supply of bulls of improved breeds is carried out. The above veterinary hospitals/dispensaries were manned by 52 veterinary officers and 110 veterinary pharmacists under the overall control of an Assistant Director stationed at the district headquarters.

The poultry had recorded 391,600 birds (274,100 Hens and 117,500 Chickens) in 1997. The poultry farming is now being practiced on scientific lines, which is evident from the large number of poultry farms located in the district. This has been made to understand due to acceptability of egg as a vegetarian food.

In order to provide good quality meat to the general public, 4 recognized slaughter houses were functioning in the district during 2000-01 where 19,034 animals (17,441 sheep and goats, 1593 pigs) were slaughtered.

Cattle fairs and shows are held every month at Rupnagar, Kurali, Anandpur Sahib, Morinda and Kharar, where farmers sell and purchase animals according to their requirements. Cattle traders from Punjab, Himachal Pradesh, Haryana and Uttar Pradesh visit these fairs in large numbers. Rupnagar is, however, famous for bullocks throughout the State.

A milk plant with 6 chilling centres with a capacity to process 100,000 liters of milk and milk product was working in the district in the year 2000-01. It has enable the farmers to make handsome income by selling milk to various milk collection centres in the district.

Fisheries:

There is little scope for pisciculture as major part of district is sub-mountainous and the ponds do not retain water throughout the year. The main source of fish is river Satluj. The supplies for local consumption are augmented from Gobind Sagar (Himachal Pradesh). Efforts are, however, being made for development of fish production locally and the results have been encouraging so far. Pisciculture has been taken up in a big way in the district. An area of 289 hectares was stocked with fish wherein 3,243 thousand fingerlings were raised. In the year 2001 there was one Fish Seed Farm and one Fish Nursery working in the district, which produced 15.68 Lakh Fish Seed.

Tenancy:

The Farmers, generally small, cultivate their own land by using bullocks and tractors. This system is known as Khud Kasht (self cultivation). Some times the land is leased out to other farmers or persons on Batai (share cropping) which is usually fixed for one half of the gross produce, payable in kind. Contract or Theka is also in vogue and is fast gaining popularity. This is generally paid in cash on yearly basis but may be agreed to in kind depending upon the land contracted and the economic positions of the cultivator. The Batai or Theka may vary depending upon the productivity of the land. Since a large number of people own tractors, they prefer to provide agriculture services to the fellow farmers on cash payment. The Jagirdari system has since been abolished after the introduction of various enactments under the land reforms undertaken after independence and merger of the PEPSU areas in the Punjab State.

Communications:

An efficient network of roads and railways, posts, telegraph, telephone etc. is an essential requirement for development of any area as it is the backbone of any developmental activity. This also applies to Rupnagar. The district is well served in both roads and railways. Though it is well connected by roads and railways with stations inside and outside the district, some of the places along the banks of Beas and the Beins pose difficulty during the rainy season, especially during floods.

Some of the important roads connecting various stations inside and outside the district, besides the National Highway (Sher Shah Suri Marg, connecting Mughal Serai with Amritsar) are: (1) Rupnagar-Jalandhar road, (2) Rupnagar-Hoshiarpurr road, (3) Rupnagar-Patiala road, (4) Rupnagar-Ludhiana road, (5) Rupnagar –Nangal road, (6) Rupnagar-Nalagarh road, (7) Rupnagar-Nurpur Bedi road, (8) Rupnagar-Bella road and (9)Rupnagar-Ambala road.

Anyhow, there is an efficient network of roads through out the district. The district has a road length of 95 kms. under National highways and 2,254 kms. under State highways. Further, as per the data available from P.W.D. (B&R) department for the year 2000-01, the Punjab state has a road length of 54,836 kms. giving an overall average of 109 kms. per 100 sq. kms. of area. This, by all means, exhibits a fairly well developed system of roads in the State. Rupnagar district has a road length of 159 kms. per 100 sq. kms. of area which, though some what higher than that of the State as a whole, is quite satisfying in itself. Further more, all the villages in the district are connected by road.

The district is well served by the Public Road Transport system. The district being part of erstwhile Pepsu State, the bus routes are mainly with the Punjab Roadways and Pepsu Road Transport Corporation (PRTC), Rupnagar main road is a gate way to Jammu & Kashmir and half of Punjab and Himachal Pradesh states. Rupnagar depots had 122 buses and Nangal depots had 101 buses in 2000-2001 and government hired buses from private sector on kilometer basis to provide services to the public. The other depots of PRTC and Punjab Roadways also operate

buses on various routes in the district. There are a number of private operators also, who provide transport services in several areas and among them are Ambala -Syndicate bus service, New Fatehgarh –Sirhind Private Ltd. and Libra Bus service etc.

Industry:

Rupnagar district is fast rising on the industrial map of the State. In fact, it has already made a niche and has come to occupy a place next only to Ludhiana, the Manchester of Punjab. The industrial units producing chemicals have come up in Naya Nangal Industrial belt and the electronic units have mainly concentrated in S.A.S. Nagar (Mohali). A third industrial centre is also fast taking shape at Village Chanalon, near Kurali town on Chandigarh-Rupnagar Road. Besides, there are many other places where industrial units have come up.

Before partition, there was big industrial unit viz., Panipat Woollen Mills Ltd. at Kharar. It was set up in 1944 to meet the demand for woolens which had become scarce during the Second World War. Besides, lock-making was an important industry confined to Rupnagar and Kurali towns. The Ropari locks were famous throughout the State. This industry, however, suffered heavily due to partition as Muslim artisans migrated to Pakistan leaving this industry in the doldrums. Thus, the industries which confined to this district were traditional village and cottage industries. . These were pottery work, leather tanning, handloom weaving, shoe making, phulkari embroidery baan making, basket making, Panja darri, etc. Thus, whatever progress had been made in the district on the industrial front was, infact, after partition and the start of work on the Bhakra Dam Project and Chandigarh Capital Project. The completion of Bhakra Dam and its ancillary projects provided plenty of power so essential for the expansion of industry on the one hand and on the other, the location of Chandigarh as Capital threw up many opportunities for the entrepreneurs to start new industries in this area. The reorganization of Punjab State in 1966 brought into main focus the idea of S.A.S. Nagar (Mohali) rightly described as Show Window of Punjab Industry.

As said earlier, the industrial units engaged in the production of chemicals and fertilizers are mainly located in Naya Nangal industrial belt. The important industrial units located there are; National Fertilizer Limited, Punjab Alkalis and Chemicals Limited, Punjab National Fertilizers Limited, Heavy Water Plant. However, the electronic units are mostly concentrated at S.A.S. Nagar (Mohali). The important electronic units located here are; Semi-Conductor and Devices Limited, India (A Government of India Undertaking), Universal Magnetics Limited, Punjab Electronics Components Limited, Punjab Bio-Medical Equipment Limited, Punjab Display Devices, Limited, Punjab Digital Industrial Systems Limited. Some other prominent industrial units located at S.A.S. Nagar (Mohali) are; Malwa Steel Tubes Limited, Punjab Anand Batteries Limited, Ranbaxy Laboratories Limited, Punjab Acumeasures Limited, Ajay Electricals, AGK Computer Papers Limited, Punjab Tractors Limited, Government offset Printing Press, Swami Rubber, Mohali Milk Plant etc. Elsewhere in the district the important industrial units are; Panipat Woollen Mills at Kharar, Swaraj Harvester Combines at Chapper Chiri (On Landran –Kharar Road), Swaraj Engine Foundary at Majri (on Kurali-Mullanpur Road), Morinda Co-operative Sugar Mills Limited at Morinda. Some small and medium sized industrial units have also come up at Village Chanalon (near Kurali). Besides, there are large numbers of floor mills and rice shellers scattered throughout the district.

The State Government has rightly visualised the need of trained man power for the development of industrial in the district and have opened up two industrial training institutes, one each at Nangal and Rupnagar where training is being imparted in a number of technical trades to meet the ever rising demand for technical personnel. Government also provided facilities such as; i) Supply of machinery on hire purchase basis; ii) Assistance to educated unemployed; iii) Interest subsidy; iv) Allotment of built up sheds; v) Holiday from sales tax; vi) Exemption from electricity duty; vii) Price preference in purchase of finished goods, etc. The resultant effect of

these measures was that there were 335 registered factories (333 working) employed 8,464 workers in 1990 in the district. The pace of development of industries is picking up fast and soon this district will be reckoned as one of the leading districts in the State.

Electricity:

In the field of the electricity generation, Rupnagar district has achieved quite a prominence. After the completion of Bhakra Dam and its ancillary projects, two hydro power houses each of 75.5 MW capacity at Ganguwal in 1954 and Kotla in 1956 on Nangal Hydro Channel (Bhakra Main Land) were completed. Two more power stations have come on the map of the district, near the old units at Ganguwal and Kotla on the Anandpur Hydel Chemical (Satluj – Yamuna Link), each having capacity of 67 MW. Besides, a super power Thermal Plant (Sri Guru Gobind Singh Super Thermal Power Station) has come up at census town Nehon (Sirsa Aqueduct) on the left bank of Satluj river, 10 kms away from Rupnagar town on Rupnagar – Nangal road. Now 6 units each of 210 MW with total capacity of 1260 MW have been completed.

The erstwhile rulers were well aware of the technological changes taking place in the world. They, therefore, were the first to introduce electricity in their areas in the beginning of the present century. The state government Public Works Department replaced the private suppliers of electricity. However, after some time the responsibilities of supplying electricity were bestowed on the Punjab State Electricity Board, Patiala.

The consumption of electric power in Punjab for various purposes has increased substantially; from 11,906.9 million Kwh in 1990-91 to 19,184.5 million Kwh during 2000-01 in the state. The most significant increase in consumption is for domestic use (1619.9 million Kwh in 1990-91 to 4224.1 million Kwh in 2000-01). The consumption of power for industry has almost doubled in the State during last decade (4,317.6 to 8,047.1 million Kwh). In Rupnagar district, out of the total consumption of 1130.4 million Kwh, 232.5 (20.6%) million Kwh is consumed for domestic use, 43.6(3.9%) million Kwh for commercial use, 707.1 (62.6%) million Kwh for industrial use, 137.7 (12.2%) million Kwh for agricultural purposes and 9.5 (0.8%) million Kwh for other uses.

Rupnagar district receives 5.9 per cent of the total power produced in the state for its utilization in various public interest purposes. In Rupnagar district 90.1 per cent of the households are using electricity and this percentage is higher than that of the State (86.7%).

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos

sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own

the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituents a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) a minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 100,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in huge pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

List of Scheduled Castes and Scheduled Tribes:

The Government of India by Gazette Notification under Article 314(1) of Indian Constitution has declared some castes, races or tribes or parts of or groups within castes, races or tribes as Scheduled Castes as there is no standard definition of Scheduled Castes. Similarly, Scheduled Tribes mean all such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are declared by the President of India to be treated as Scheduled Tribes under Article 342(1) of the Indian Constitution. There is slight change in the definition of Scheduled Castes in 1991. Before that, Scheduled Castes could belong to Hindu or Sikh religion. But from 1990, in addition to Hindu and Sikh religions, Scheduled Castes may belong to Buddhists religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In Punjab State, 37 castes were notified by the State Government as Scheduled Castes at the 1991 Census and there is no change at the 2001 Census. Following 37 castes have been notified as scheduled castes in Punjab;

1. Ad Dharmi
2. Balmiki, Chura, Bhangi
3. Bangali
4. Barar, Burar or Berar
5. Batwal
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar Raigar, Ramdasi or Ravidasi
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhilla, Gandil, Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut, Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and / or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

(vi) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz.

(i) underground sewerage,
(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and
(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with

flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1,000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1,000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1,000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1,000}$$

Age-specific mortality rate (ASMR) :

· Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate :

$$\frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

1) Migration

2) Internal and International Migration

3) Rural - Urban component of migration

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UACity/Town. These are :

M7 (5,000,000 and above)
M6 (2,000,000 to 4,999,999)
M5 (1,000,000-1,999,999)
M4 (500,000-999,999)
M3 (300,000-499,999)
M2 (200,000-299,999) and
M1 (100,000-199,999)

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenom-enon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001- Census Findings - Population and its distribution:

The following table shows distribution of rural and urban population by tahsils in the district.

POPULATION, NUMBER OF VILLAGES AND TOWNS, 2001

Name of Tahsil	Population									Number of Villages		No. of Towns
	Total			Rural			Urban					
	P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13
Anandpur Sahib	297,508	155,327	49,871	238,251	124,020	40,440	59,257	31,307	27,950	249	246	2
Rupnagar	331,338	177,622	145,227	249,382	133,880	95,960	81,956	43,742	38,214	367	351	3
Kharar	257,505	139,026	54,035	165,661	89,374	46,774	91,844	49,652	42,192	191	189	4
S.A.S.Nagar (Mohali)	229,757	124,607	105,765	100,407	55,873	58,847	129,350	68,734	60,616	82	78	2
District Total	**1,116,108**	**596,582**	**519,526**	**753,701**	**403,147**	**350,554**	**362,407**	**193,435**	**168,972**	**889**	**864**	**11**

Rupnagar has a population of 1,116,108 comprising 596,582 males and 519,526 females as per 2001 census and this makes 4.6 per cent of State's population and 4.2 per cent of the total area of the state.

Among the tahsils, Rupnagar with a population of 331,338 is the most populous while SAS Nagar (Mohali) with a population of 229,757 is the least populous tahsil in the district. The population of Anandpur Sahib tahsil is 297,508 and Kharar tahsil is 257,505. In other words, tahsil with the highest population is almost one and half time bigger than the tahsil having the least population.

On an average, a tahsil in the district has a population of 279,027 compared with 338,319 in the State as a whole.

Out of 889 villages of the district 864 are inhabited. A tahsil on an average has 216 inhabited villages. The number of inhabited villages among tahsils varies between 351 in Rupnagar tahsil and 78 in SAS Nagar (Mohali).

Out of the total population in the district 753,701 (67.5%) are residing in rural and 362,407 (32.5%) in urban areas. The rural population spreads over 864 inhabited villages and urban population is distributed among 11 towns in the district An inhabited village in the district on an average has a population of 872 as against 1,311 in the state signifying that the villages in Rupnagar are smaller in size. Similarly towns also are smaller in the district compared with that of the State and a town in Rupnagar district on an average has a population of 32,946 against 52,627 in the state.

Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the Census organization to classify towns according to their population size. A town with a population of 100,000 or more is termed as 'city' in Indian census.

Class	Population size	No. of Towns.
1	2	3
Class – I	100,000 and above (Generally referred to as city)	1
Class – II	50,000 to 99,999	-
Class – III	20,000 to 49,999	6
Class – IV	10,000 to 19,999	2
Class – V	5,000 to 9,999	2
Class – VI	Less than 5,000	-

The number of towns in this district has increased from 8 in 1991 to 11 in 2001.comprising 7 statutory towns and 4 census towns.

Out of 11 towns in the district, one is Class I town (city), there is no town under class II, six fall in the population size class III and two towns fall in the population size class IV and the remaining two are Class V towns. There is no town under Class-VI. As regards distribution of population by size class of towns, it is observed that more than one-third (34.1 %) of the urban population in the district is residing in Class I town and more than one-half (56.0 %) is residing in Class III towns. These two Class I and Class III towns together accommodate (90.1 %) of the urban population of the district. The share of Class IV towns is 6.6 per cent while class V towns accommodate only 3.3 per cent of the urban population in the district.

Population Growth, Density and Sex Ratio

Population Growth:

During 1991-2001, population of Rupnagar has increased from 899,587 adjusted for 1991 to 1,116,108 in 2001 resulting in a net addition of 216,521 persons during this decade. In percentage terms the district has recorded a decadal growth rate of 24.1 per cent which is higher than that of state average (20.1%). Among the districts, it ranks 10th in population size. Amazingly Rupnagar excels all other district except Ludhiana (24.9%) in growth rate for total persons. It topples Amritsar (23.8%) with 24.2 per cent female growth rate and ranks at the top in the state.

Density:

Density of population refers to number of persons per unit of area in the state. There are 484 persons per sq. Kms. as per 2001 census as against 403 persons per sq. Kms. as per 1991 showing increase of 81 points during this decade. Among the districts, Ludhiana (848) is the most densely populated while the density of population is only 300 in Muktsar district. Jalandhar (748),

Amritsar (609), Rupnagar (528) and Patiala (5050 are the other districts having density of population higher than that of state.

Rupnagar with a population of 1,116,108 and an area of 2113.0 sq. kms has a density of 528 persons per sq. km, which is significantly higher than that of the State (484) and ranks 5th among the districts in the state. It also excels the state in rural density (381) but is out done in urban density (2658).

Within the district, SAS Nagar (Mohali) tahsil (1,213) is the most densely populated and Rupnagar tahsil (422) is the least populated tahsil. The rural density in the district varies between 628 in SAS Nagar (Mohali) tahsil and 331 in Rupnagar tahsil and urban density is the highest in SAS Nagar (Mohali) (4,377) and the lowest in Kharar tahsil (1,820).

Sex Ratio:

Sex ratio is derived as the number of females per 1,000 males. Generally speaking differentials in mortality conditions of males and females, male-female ratio at birth and sex selective migration are the key factors which determine the sex composition. It reflects the socio-economics and demographic characteristics of the population and unfolds the status of women in the society and care of the girl child in particular.

A Significant feature of Punjab's population is the preponderance of males over females. According to Census 2001, out of the total population of 24,358,999 in the State, 12,985,045 are males and 11,373,954 are females resulting in an overall sex ratio of 876 which is significantly lower than the country as a whole (933). All the districts in the state barring Hoshiarpur (935) and Nawanshahr (914) have a sex ratio of less than 900.

There has been a phenomenal decline in the child sex ratio in Punjab during 2001, from 875 in 1991 to 798 in 2001 exhibiting a decrease of 77 points in child sex ratio. All the districts in the state have reported substantial decrease which varies between 47 points in Muktsar and 108 points in Fatehgarh Sahib districts. The Child sex ratio is reported to be the highest in Firozpur district (822) and the lowest in Fatehgarh Sahib (766). This exhibits that the child sex ratio is quite poor in all the districts in the state. There are 8 districts which exhibit a child sex ratio of over 800. Besides Firozpur, they include Moga (818), Ludhiana (817), Hoshiarpur and Faridkot (812 each), Muktsar (811), Nawanshahr (808) and Jalandhar (806).

The sex ratio in the State and its constituent districts has remained low throughout. At the beginning of the 20th century, the sex ratio was 832 in 1901 which declined to 780 in 1911. Ever since, the sex ratio in the state showed gradual improvement till 1991 when it reached 882. However, it has again declined to 876 in 2001, exhibiting a fall of 6 points in the State.

Ever since 1911 the sex ratio in Rupnagar district has gradually improved from 756 to 871 in 2001. It was only in 1911 when sex ratio declined to 756 from 807 in 1901.The state surpasses the district in total and rural sex ratio whereas the district excels the state in urban sex ratio Within the districts it is the highest in Hoshiarpur (935) and the lowest in Ludhiana (824).Rupnagar with a sex ratio of 871 ranks 12th among the districts but below the State (876).

At the tahsils level the sex ratio is the highest in Anandpur Sahib (915) and the lowest in SAS Nagar (Mohali) (844). The rural sex ratio varies between 921 in Anandpur Sahib and 797 in SAS Nagar (Mohali) tahsils and the corresponding figures in the urban sex ratio 893 in Anandpur Sahib and 850 in Kharar tahsils. The towns display a variation of disparity of 898 in Nangal and 770 in Nehon. The urban sex ratio is lower than their rural counterparts. Among the tahsils, the sex ratio is above the state average (849) in all tahsils in urban areas whereas it is above the state average (890) in only one tahsil in rural areas. Amazingly the district female growth rate (24.2%) excels all other districts but it is to be thoroughly examined as to why the sex ratio is so low then.

The sex ratio of child population in age group 0-6 in the State and its constituent districts is quite low and it has become a matter of deep concern. Punjab has a child sex ratio of 798 and it is almost identical in its rural (799) and urban (796) areas. In Rupnagar, the child sex ratio (794) is even lower than that of the State and it ranks 9th among the districts. Within the tahsils the child sex ratio is the maximum in Anandpur Sahib (821) and the minimum in Rupnagar (779).

Likewise, rural child sex ratio varies between 824 in Anandpur Sahib and 769 in Rupnagar while the variation in urban child sex ratio is to the extent of 814 in Rupnagar and 778 in SAS Nagar (Mohali).

Literacy:

Any person who is able to read and write with understanding in any language is recorded as literate. Since 1991 all the children below 7 years of age are being treated as illiterates, even though, some children in this age group may be attending school and may have picked up some words.

69.7 per cent of the state's population is literate which is higher than that of the country (64.8%) as such. Among the States and Union Territories Punjab occupies 16th place in term of literacy.

78.1 per cent of the district's population is literate which is much better than the state. In other words more than three-forth of its population in the district is literate. It ranks 2nd among the districts in the State superseded by district Hoshiarpur (81.0%) only. Among the tahsils in the district, SAS Nagar (Mohali) (84.7%) ranks at the top while Anandpur Sahib (75.6%) is placed at the bottom. However, all the tahsils in the district have literacy rate higher than the overall literacy rate in the state.

Between the two sexes, the literacy rate in the district varies between 84.0 per cent among males and 71.4 per cent among females, exhibiting a gap of 12.6 percentage points. The male-female differential is the widest (17.0 percentage points) in Anandpur Sahib tahsil (males 83.3 per cent and females 66.8 per cent) and the narrowest (8.1 percentage points) in SAS Nagar (Mohali) tahsil (males 88.4 per cent and females 80.3 per cent).

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district; 74.1 per cent of the rural population and 86.2 per cent of the urban population is literate. Urban literacy rate is the highest among all the districts in state and it is the only district whose male literacy rate crosses 90.0 percentages mark. The urban literacy is higher than the rural in all the tahsils and the gap in rural- urban literacy rate is the widest in SAS Nagar (Mohali) (urban 91.6 % and rural 75.6 %) and the narrowest in Kharar (urban 81.6 % and rural 74.4%).

Work Participation Rate:

Definition of Work and Classification of Workers:

How the 'work' is defined by the Census needs to be understood properly. Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the Census of India 2001, which includes production of milk even for domestic consumption. In the 1991 Census, cultivation of certain crops even for one's self-consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as tomatoes, all types of flowers,

fruits and tuber potatoes, chilies and turmerics, pepper, cardamoms, vegetables etc, in other words plantation of tea, coffee, rubber, coconut and betel nuts has been classified under plantation and not included in cultivation.

The reference period for recording the economic activity of any person was preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last one year are recorded as main workers while those who had worked for less then six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, Household Industries and other workers.

Punjab, with a work participation rate of 37.5 per cent, ranks 24th among the States/Union Territories in the Country and thus, the work participation rate in the State is lower than that of India (39.1%). Among the districts in the State, the proportion of workers varies between 44.9 per cent in Nawanshahr district and 33.3 per cent in Gurdaspur. In all, 10 out of 17 districts in the State have shown work participation rate above the state average and among them five districts have at least two-fifth of their population reported as workers. Besides Nawanshahr, they include Bathinda (42.3%), Mansa (40.9%), Sangrur (40.7%) and Moga (40.1%) and Rupnagar apparently falls short of this figure marginally with 39.2 per cent as total workers.

Main Workers and Marginal Workers:

85.8 per cent of Punjab's total workers have been recorded as Main Workers and 14.2 per cent as Marginal Workers. The corresponding percentages for 1991 Census were 97.4 and 2.6 per cent respectively. In Rupnagar Main Workers and Marginal Workers constitute 90.8 and 9.2 per cent of the total worker respectively.

The work participation rate in Rupnagar (39.2%) is higher than the state average (37.5%). Among the tahsils in the district, it varies between 42.1 per cent in Kharar and 35.4 per cent in SAS Nagar (Mohali). Further 52.6 per cent among males and 23.8 per cent among females are reported as workers showing a significant reduction in the gap between the two. In Anandpur Sahib nearly one-third of the females (29.1%) are recorded as workers.

Out of total population 35.6 per cent are main workers and 3.6 per cent are marginal workers. The proportion of main workers is the highest in Kharar tahsil (39.0%) and the lowest in SAS Nagar (Mohali) tahsil (33.4%). However, the proportion of marginal workers is the highest (6.3 %) in Anandpur Sahib tahsil and the lowest (2.0%) in SAS Nagar (Mohali) tahsil. Further, the incidence of marginal workers is observed to be more among females as compared to males, the proportion of female marginal workers (4.3 %) is more than the males (3.0%). By and large, a similar pattern is observed among SAS Nagar (Mohali) Kharar and Rupnagar tahsils in this regard. Anandpur Sahib tahsil has a high proportion of female marginal workers (7.9 per cent) as against (4.8 per cent) among males, with 68.5 per cent other workers, Rupnagar stands next only to Ludhiana (74.9%) and Jalandhar (70.6%) among all the districts of the state exhibiting that it is basically a non – agricultural district.

Religion

It has been customary for the Indian Census to provide information on religious persuasions of its people. Religion is one of the basic cultural characteristics of population and several religions have thrived in the secular state of India. Apparently, information on various religious communities in the country has been of great interest and useful to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. Question 7 of the household schedule canvassed at the 2001 Census pertained to religion. The instructions to

enumerators were to record faithfully the religion of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes in 2001:

Religions	Code
Hindu	1
Muslim	2
Christian	3
Sikh	4
Buddhist	5
Jain	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

In Rupnagar district there are 57.0 per cent Sikhs, 40.5 per cent Hindus, 2.0 per cent Muslims and 0.3 per cent Christians whereas Buddhists and Jains are negligible. The district holds 3rd and 7th positions regarding Muslims and Hindus population as per census 2001.

The instructions for recording this information are, by and large, the same as in 1991. A brief analysis based on 2001 Census data is given under annexure V.

Mother Tongue and Language :

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. It may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Question 11 of the Household Schedule was aimed to collect information on 'Other Languages known' (up to two languages in order of proficiency) other than Mother Tongue.

In order to provide a broad scenario a brief note along with table based on 1991 Census data is given in Annexure VIII.

Scheduled Castes and Scheduled Tribes :

Out of the total population of 24,358,999 in the state 7,028,723 belong to Scheduled Castes as per 2001 Census. As such 28.9 per cent of the state's population and 23.9 per cent of the population in the district belong to Scheduled Castes. Among the districts, two- fifth (40.5%) of the total population in Nawanshahr belong to Scheduled Castes and it is the highest among the districts in the state. Firozpur district with a proportion of 22.8 per cent is placed at bottom. Besides Firozpur, Amritsar (28.8%), Sangrur (27.6%), Ludhiana (25.0%), Gurdaspur (24.7%), Rupnagar (23.9%) and Patiala (23.1%) are the districts which have proportion of Scheduled Castes population lower than that of the state while the remaining ten districts exhibit this percentage higher than that of state.

Out of the total population of 1116,108 in the district 266,672 belong to Scheduled Castes and this makes (23.9%) of the district's population belong to Scheduled Castes. Among the tahsils, it is the highest in Rupnagar (30.2%), and the lowest in SAS Nagar (Mohali) (14.8%). The proportion of Scheduled Castes population in Anandpur Sahib (19.9%) and Kharar (28.4 %) is lower and higher than the district average (23.9 %) respectively.

In consonance with the general trends in the state, Scheduled Castes are more rural by residence as 75.7 per cent of Scheduled Castes population in the State and 76.7 per cent in the district are rural by residence.

In the district 27.1 per cent of population in rural areas belongs to Scheduled Castes while the corresponding percentage in urban areas is 17.1 per cent. In Rupnagar tahsil Scheduled Castes comprise one-third (33.4%) of rural population and this percentage is the highest among all the tahsils in the district. The proportion of Scheduled Castes population residing in urban areas varies between 24.7 per cent in Kharar tahsil and 7.1 per cent in SAS Nagar (Mohali) tahsil.

During 1991-2001 Scheduled Castes population in the state has increased by 22.4 per cent which is higher than that of Rupnagar (21.6%). In the district 72.2 per cent of the Scheduled Castes population is literate which is higher than that of the state (56.2 %.), 68.7 per cent in rural areas and 74.9 per cent in urban areas in Rupnagar are literate.

As regard sex ratio among Scheduled Castes in Rupnagar district, it is 881, 879 and 889 for total, rural and urban respectively. Whereas the state excels the district in total and rural sex ratio, it is in urban area only where the district supersedes the state (887) by 2 points.

There is no Scheduled Tribes population in the State.

(viii) Brief Analysis Based on Primary Census Abstract

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Anandpur Sahib	256,123	201,400	54,723	297,508	238,251	59,257	16.2	18.3	8.3	21.4	19.9
2	Rupnagar	279,847	224,411	55,436	331,338	249,382	81,956	18.4	11.1	47.8	19.8	24.7
3	Kharar	204,431	160,730	43,701	257,505	165,661	91,844	26.0	3.1	110.2	21.4	35.7
4	S.A.S.Nagar (Mohali)	159,186	80,729	78,457	229,757	100,407	129,350	44.3	24.4	64.9	49.3	56.3
District Total:		**899,587**	**667,270**	**232,317**	**111,6108**	**753,701**	**362,407**	**24.1**	**13.0**	**56.0**	**25.8**	**32.5**

Table 1 shows tahsilwise population for total, rural and urban areas of the district. Two sets of population data have been given for all the tahsils of the district i e for 1991 and 2001 Census. Rupnagar district has recorded a growth rate of 24.1 per cent during 1991-2001 as against 20.1 per cent for the state. When we analyse the decadal variation of population between 1991-2001, we find that among all the tahsils the maximum growth of population is in tahsil SAS Nagar (Mohali) (44.3 %) while the least decadal growth is in tahsil Anandpur Sahib (16.2%). For the rural areas, the maximum growth of population has been observed in tahsil SAS Nagar (Mohali) (24.4 %) while the least has been found in tahsil Kharar (3.1%). Among urban areas, the maximum growth of population is in tahsil Kharar (110.2%) while the least has been observed in tahsil Anandpur Sahib (8.3%).

Further, it has been seen that SAS Nagar (Mohali) tahsil which was highly urbanised in 1991 also ranks first in 2001 Census where proportion of urban population increased to 56.3 per cent in 2001 Census from 49.3 per cent reported in 1991 Census. The urban population in the district

grew by 56.0 per cent which is more than four times that of the rural (13.0%) growth rate and next only to Mansa (66.9%) district. The level of urbanization in the district (32.5%) however, is slightly lower than the average of state (33.9%).

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

	Districts (Rural) Total:	**55 (6.4)**	**84980**	**72773**	**5 (0.6)**	**19062**	**15583**	**0 (0.0)**	**0**	**0**

Out of 889 villages in the district, 25 villages are uninhabited, 3 villages in the tahsil of Anandpur Sahib, 16 villages in Rupnagar, 2 villages in Kharar and 4 villages in SAS Nagar (Mohali). A village on an average has a population of 872 in the district, the corresponding size of an inhabited village in the State as a whole is 1,311. The inhabited villages which number 864

are distributed over 7 CD blocks in the district, on an average a CD block has 123 inhabited villages and population of 107,672, whereas total villages of the state are distributed over 138 CD blocks. In the state a CD block has 89 inhabited villages and a population of 116,641. Evidently, the inhabited villages in Rupnagar district are much smaller in population size as compared to the State. Among 864 inhabited villages, 100(11.6%) villages have a population of less than 200, 216(25.0%) fall in the population size Class of 200-499, 295(34.1%) in the category of 500 –999, 193(22.3%) in the range of 1,000 – 1,999, 55(6.4%) with population varying between 2,000 – 4,999, 5(0.6%) are having population varying between 5,000 – 9,999 and none of the villages in the district crosses the population of 10,000 and above. In other words 611 villages are small sized with a population of less than 1,000 and they contain 70.7 per cent of the rural population of the district, 248 are medium sized having population 1,000–4,999 and they contain 28.7 per cent of rural population of the district, 5 villages in the district are large sized having population 5,000 and above and they contain 0.6 per cent of the rural population of the district.

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001

Serial number	Name of town	Urban status of town
1	2	3
(a) New Towns		
(i) Statuary town		
	Nil	
(ii) Census town		
1	Nehon	CT
2	Mullanpur Garib Dass	CT
3	Karoran	CT
4	Bhabat	CT
(b) Denotified		
(i) Statutory town of 1991 Census denotified which did not satisfy the criteria to be treated as towns		
1	Naya Nangal	NAC
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria		
	NIL	
(iii) Census towns of 1991 census are notified as statutory town in 2001 census		
	Nil	
(C) Declassified*		
	Nil	
(d) Wholly merged with other town (s)		
(i)	Naya Nangal wholly merged in Nangal MCI	NAC

*Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Table 3 revealed new towns added, denotified, declassified and merged in the district at the 2001 Census.

There are 11 towns in the district and 7 of them are statutory in status and only 4 towns namely Nehon CT, Mullanpur Garib Dass CT, Karoran CT and Bhabat CT are newly added Census Towns to the district at the 2001 Census.

Further, one town Naya Nangal NAC of Rupnagar district was merged with Nangal MCl during Census 2001.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	5	0.6	185	0.0
11-20	5	0.6	522	0.1
21-50	27	3.1	2,728	0.4
51-100	41	4.7	11,657	1.5
101-200	88	10.2	42,202	5.6
201-300	137	15.9	77,565	10.3
301-500	261	30.2	231,705	30.7
501 +	300	34.7	387,137	51.4
Not known	0	0.0	0	0.0
District Total:	**864**	**100.0**	**753,701**	**100.0**
Population Density (Rural) of the district:		**381**		

Table 4 shows distribution of villages according to density of population per Sq. km. Rupnagar district has a rural density of 381 persons per Sq. km. The villages however, display a significant variation among themselves. Low density of 100 or below is noticed in 78 villages (9.0%) and they contain barely 2.0 per cent of district's rural population. Another 88 villages, which make 10.2 per cent of the total villages and 5.6 per cent of the total population too are marked with low density of population in the range of 101-200.Yet another 137 villages, which make 15.9 per cent of the total villages and 10.3 per cent of the total population too are marked with low density of population in the range of 201-300.

A large number of villages (261) fall in the density range of 301-500. Covering more than one-fourth (30.2%) of the villages accommodating nearly one third (30.7%) of the rural population of the district.

However, very high density of 500+ is the characteristics of 300 (34.7%) villages and they accommodate more than one-half (51.4%) of the rural population of the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	832	837	798	807	806	820
1911	780	785	740	756	755	784
1921	799	808	735	781	780	791
1931	815	832	721	789	790	773
1941	836	855	750	802	802	791
1951	844	854	807	812	813	802
1961	854	865	817	812	839	700
1971	865	868	856	854	855	848
1981	879	884	865	862	867	844
1991	882	888	868	870	870	870
2001	876	890	849	871	870	874

Note: Sex Ratio has been defined as number of females per 1000 males.

Sex ratio reflects the socio-economic and demographic characteristics of population. It unfolds the status of women in society and the care for the girl child in particular. Unfortunately, in consonance with the overall patterns of the State, The sex ratio declined from 832 in 1901 to 780 in 1911 in the state. Ever since 1911, the sex ratio showed a gradual improvement, uninterruptedly, till 1991 when it reached 882. During 1991-2001, the sex ratio has declined by 6 points, from 882 to 876.

It is revealed that the sex ratio at district level has been observed as 871 in 2001 census while at state level it has been observed 876. At the state level, the sex ratio has decreased by six points between1991-2001. It has increased by 2 points in rural areas but decreased by 19 points in urban areas. At the district level as a whole it has increased by 1 point. It has increased by 4 points in urban areas. This increase is more noticeable in rural areas of the state where sex ratio has gradually increased from 854 in 1951 to 890 in 2001 and district figures increased from 813 in 1951 to 870 in 2001. In the state, the urban sex ratio has declined from 868 in 1991 to 849 in 2001 and the corresponding increase in the urban sex ratio of the district is from 870 to 874.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Anandpur Sahib	915	921	893
2	Rupnagar	865	863	874
3	Kharar	852	854	850
4	S.A.S.Nagar (Mohali)	844	797	882
	District Total:	**871**	**870**	**874**

Sex ratio by tahsils is shown in table 6. The sex ratio of the district is revealed as 871 while it is 870 for rural and 874 for urban.

Among the tahsils, the sex ratio varies between 915 in Anandpur Sahib tahsil and 844 in SAS Nagar (Mohali) tahsil. Similarly sex ratio for rural area falls in between 921 in Anandpur Sahib and 797 in SAS Nagar (Mohali) tahsils, and the urban sex ratio fluctuates between 893 in Anandpur Sahib and 850 in Kharar tahsils. The rural sex ratio is better than their urban counterparts in Anandpur Sahib and Kharar tahsils. The sex ratio in all tahsils is above the state average (849) in urban areas whereas it is below state average (890) in three tahsils of rural areas barring Anandpur Sahib tahsil (921).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Anandpur Sahib	924
2	Nurpur Bedi	917
3	Rupnagar	866
4	Morinda	855
5	Majri	848
6	Kharar	823
7	Chamkaur Sahib	870
	District (Rural) Total:	**870**

Table 7 shows the sex ratio by CD blocks in the district. Rural sex ratio in this district (870) is lower than that of the state sex ratio (890). Among the CD blocks rural sex ratio varies between

Anandpur Sahib with 924 as the maximum and Kharar with 823 as the minimum. In all, two CD blocks show rural sex ratio above and four below the rural sex ratio of district. One CD block is at par with the district average. Surprisingly 2 out of 7 CD blocks cross sex ratio above 900.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	34	3.9	24,648	3.3
700-749	30	3.5	14,149	1.9
750-799	66	7.7	48,371	6.4
800-849	181	21.0	154,288	20.5
850-899	222	25.7	225,627	29.9
900-949	199	23.0	186,179	24.7
950-999	84	9.7	77,160	10.2
1000-1099	40	4.6	22,542	3.0
1100+	8	0.9	737	0.1
District Total:	**864**	**100.0**	**753,701**	**100.0**
Sex ratio (Rural) for District:		**870**		

Sex ratio of rural population by ranges is portrayed in Table 8. The district as such is marked with a relatively low sex ratio (870). This is rather low in (less than 800) in 130 villages. The villages with low sex ratio comprise 15.1 per cent of the total villages in the district and contain 11.6 per cent of district rural population. 181 villages (21.0 %) are marked with a rural sex ratio of 800-849 and they contain 20.5 per cent of the district rural population.

The maximum number of 222 villages exhibit a rural sex ratio in the range of 850-899. These make 25.7 per cent of the total villages and have 29.9 per cent of the rural population of the district.

The high sex ratio in the range of 900-949 is noted in 199 villages and they constitute 23.0 per cent of the villages and account for 24.7 per cent of the rural population of the district.

As many as 84 villages are marked with a high sex ratio of 950-999 and they constitute 9.7 per cent of the total villages and account for 10.2 per cent of the population.

Male - Female ratio is quite close to parity in the range of 1000 + as 48 (5.5%) villages are having 3.1 per cent of rural population of the district. Out of which, 8 villages are highly female biased. This is a welcome sign for the State as well as for the district otherwise marked with a deplorably low sex ratio.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Anandpur Sahib	M Cl	877
2	Bhabat	CT	897

10	Rupnagar	M Cl	887
11	S.A.S.Nagar (Mohali)	M Cl	881
	Sex ratio (Urban) for the district:		**874**

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Sex ratio of urban agglomerations/towns is exhibited in Table 9. The district has an urban sex ratio of 874, which is higher than the urban sex ratio of the State (849).

Among the UAs/ towns, the sex ratio varies between 898 in Nangal and 770 in Nehon. In all, as many as 7 towns have sex ratio higher than that of the district and four towns viz. Nehon CT (770), Kurali MCI (873), Mullanpur Garib Dass CT (872) and Karoran CT (793) have the sex ratio less than the district.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

		Urban	13,975	7,858	6,117	778
	District Total:	**Total**	**142,623**	**79,478**	**63,145**	**794**
		Rural	**100,272**	**55,933**	**44,339**	**793**
		Urban	42,351	23,545	18,806	799

The sex ratio of child population in age-group 0-6 is shown in Table 10. The State and its districts are marked with a very low child sex ratio and this has become a matter of deep concern. Punjab has a child sex ratio of (798) as compared to India (927) but Rupnagar district has even lower child sex ratio (794) holding 9th rank in the state.

Child sex ratio within the district is the maximum in Anandpur Sahib (821) and the minimum in Rupnagar (779). As such the tahsils among themselves display a considerable disparity in their child sex ratio.

Likewise, the disparity in the rural and urban child sex ratio is also evident among the tahsils. Rural child sex ratio varies between 824 in Anandpur Sahib and 769 in Rupnagar and urban between Rupnagar (814) and S.A.S.Nagar (Mohali) (778).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Anandpur Sahib	18,552	10,097	8,455	837

	District (Rural) Total:	**100,272**	**55,933**	**44,339**	**793**

Table 11 presents the sex ratio in the child population 0-6 for the CD blocks.

Child sex ratio in rural (793) and the over all rural sex ratio (870) in the district is alarming; showing a gap of 77 points between the two. The maximum child sex ratio of 0-6 age group has been observed in CD block Anandpur Sahib (837) while the minimum in CD block Morinda (751). When we compare the child sex ratio of different CD blocks with the district rural sex ratio, we find that in 2 CD blocks the sex ratio is above the district rural while in 5 CD blocks it is lower than the district rural.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	274	31.7	22,243	22.2
700-749	94	10.9	12,521	12.5
750-799	109	12.6	17,724	17.7
800-849	99	11.5	16,171	16.1
850-899	61	7.1	10,202	10.1
900-949	53	6.1	7,397	7.4
950-999	39	4.5	4,888	4.9
1000-1099	65	7.5	4,690	4.7
1100+	70	8.1	4,436	4.4
District (Rural) Total	**864**	**100.0**	**100,272**	**100.0**

Table 12 shows the sex ratio of rural population in the district in different ranges.

It is observed that the maximum number of villages i e 274 (31.7%) containing 22.2 per cent population have the sex ratio of less than 700 while 94 (10.9%) villages having 12.5 per cent population fall in the range of 700-749.

The range of 750-799 covers 109 (12.6) villages and 17.7 per cent population. Almost similar number of villages i.e. 99 (11.5%) containing 16.1 per cent population are covered in the range of 800-849. A number of 61 villages (7.1%) containing 10.1 per cent population fall in the sex ratio range of 850-899.

The rural child sex ratio is fairly high in the range of 900-949 observed in 53 (6.1%) villages with 7.4 per cent population while the sex ratio range 950-999 covers 39 (4.5%) villages and 4.9 per cent population. 135 villages in the district are female biased, out of which, 65 villages fall in the range of 1000-1099 and 70 villages in the range of 1100+. These 135 villages together make 15.6 per cent of the total villages and share 9.1 per cent of the rural child population of the district.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 13 shows sex ratio of child population in the age group 0-6 in urban area of the district as 799. It is significantly lower than the overall urban sex ratio (874) in the district.

Among the towns/UAs, Child sex ratio is the highest in Mullanpur Garib Dass (879) and the lowest in S.A.S.Nagar (Mohali) (774). 4 out of 11 towns show urban sex ratio of child population lower than that of the district average. In other seven towns it exceeds the district average. Beside Mullanpur Garib Dass, these include Anandpur Sahib (876), Bhabat (846), Karoran (841), Morinda (819) Nehon (816) and Rupnagar (811).

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

	District Total:	**Total**	**1,116,108**	**266,672**	-	**23.9**	-
		Rural	**753,701**	**204,594**	-	**27.1**	-
		Urban	**362,407**	**62,078**	-	**17.1**	-

Table 14 shows that 23.9 per cent of the population in the district belongs to Scheduled Castes as compared to the state (28.9%). Among the tahsils it is the highest in Rupnagar with 30.2 per cent and the lowest in S.A.S.Nagar (Mohali) with 14.8 per cent.

In consonance with the general trends in the State, Scheduled Castes population is more in rural areas by residence than in urban areas. In rural areas of the district the highest percentage of Scheduled Castes has been observed in tahsil Rupnagar (33.4%) while it is the lowest in Anandpur Sahib (19.2%).

There is no scheduled tribe population in the State.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

7	Chamkaur Sahib	70,004	24,341	-	34.8	-
	District (Rural) Total:	**753,701**	**204,594**	-	**27.1**	-

Table 15 gives CD blockwise distribution of scheduled castes population in the district. CD blocks among themselves exhibit disparity in the proportion of scheduled castes population. It is the maximum in Morinda (36.9%) closely followed by Chamkaur Sahib (34.8%) and Rupnagar (30.0%). Among all the C.D. blocks, five C.D. blocks reveal the scheduled castes population more than the district rural proportion (27.1%) whereas two C. D. blocks show this proportion below the district rural.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	96	11.1	0	0.0
Less than 5	35	4.0	547	0.3

11-20	151	17.5	27,660	13.5
21-30	177	20.5	50,861	24.9
31-40	140	16.2	46,548	22.7
41-50	73	8.4	31,283	15.3
51-75	88	10.2	33,973	16.6
76 and above	29	3.4	8,010	3.9
District Total	**864**	**100.0**	**204,594**	**100.0**

Table 16 shows that 96 (11.1%) villages in the district have no scheduled castes population while in 35 (4.0%) villages the proportion of scheduled castes population is less than 5 per cent, Yet another 75 (8.7%) of the villages have scheduled castes population in the range of 5-10 per cent and they contained nearly 2.8 per cent of the scheduled castes population in the district. Over one sixth (17.5%) of the villages numbering 151 villages fall in the range of 11-20 per cent and account for 13.5 per cent of scheduled castes population of the district.

More than one fifth of the villages have scheduled castes population in the range of 21-30 per cent. In absolute terms they number 177(20.5%) villages. Comprising 24.9 per cent population.

140 (16.2%) villages having 22.7 per cent scheduled castes population exhibit the scheduled castes in the range of 31-40 per cent. Another 73 villages which comprise 8.4 per cent of the total villages and 15.3 per cent of rural Scheduled Castes population of the district fall in the range of 41-50 per cent which is significantly higher.

As many as 88(10.2%) villages containing 16.6 per cent scheduled castes population are in the highest range of 51-75 per cent. Only 29 (3.4%) villages fall in the range of 76 per cent and above scheduled castes population consisting 3.9 per cent population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 18 gives the number and percentage of scheduled castes population to total population in urban Agglomeration/Towns.

It shows that Scheduled Castes comprise more than one sixth (17.1%) of the population of the district urban. The towns among themselves show wide disparity in this regard. While in Morinda 28.8 per cent of the total population belongs to scheduled castes, in S.A.S.Nagar (Mohali) this percentage is barely 6.9 per cent. There are three towns viz. Nehon (16.1%),Bhabat (10.3%) and S.A.S.Nagar (Mohali) (6.3%) which have the scheduled castes population lower than the district urban. The population of scheduled castes in all other towns is greater than the district urban average.

There is no scheduled tribe in the state of Punjab

TABLE 19 SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4

5	Majri	873	-
6	Kharar	860	-
7	Chamkaur Sahib	891	-
	District (Rural) Total	**879**	-

Table 19 exhibits Sex ratio in Scheduled Castes population by CD blocks in the district. Among all the C D blocks, scheduled castes sex ratio in Anandpur Sahib is the highest with 921, whereas the lowest sex ratio is 860 in Kharar. Besides Anandpur Sahib, Nurpur Bedi (897) and

Chamkaur Sahib (891) CD blocks fall above the district average. In all other CD blocks the sex ratio is low as compared to district rural.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 20 shows that Scheduled castes in urban areas of the district has a sex ratio of 889 which is better than that of the overall urban sex ratio (874) of the district. The position in the towns like Bhabat (961), Mullanpur Garib Dass (929), Kurali (926), Morinda (906), Anandpur Sahib (902), Nangal (900) and Rupnagar (896) is also quite encouraging as all these towns have sex ratio more than district urban average. All other towns i.e. Nehon (845), Karoran (861), Kharar (873) and SAS Nagar (Mohali) (870) reveal the urban sex ratio in scheduled castes below the district urban average

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

	District	**Total**	**760,067**	**434,213**	**325,854**	**356,041**	**162,369**	**193,672**	**78.1**	**84.0**	**71.4**	**12.6**
	Total:	**Rural**	**484,240**	**281,077**	**203,163**	**269,461**	**122,070**	**147,391**	**74.1**	**81.0**	**66.4**	**14.6**
		Urban	**275,827**	**153,136**	**122,691**	**86,580**	**40,299**	**46,281**	**86.2**	**90.1**	**81.7**	**8.4**

Table 21 reveals that 78.1 per cent of the district's population is literate as compared to 69.7 per cent for the state as such. In other words almost eight out of 10 persons are literate in the district and this percentage is quite high in the district as compared to the state as a whole. As compared to other districts Rupnagar topples all other districts, barring Hoshiarpur (81.0%) and is closely followed by Jalandhar (78.0%).

In all the tahsils of the district, S.A.S.Nagar (Mohali) tahsil is the most literate with 84.7 per cent. There is not a wide difference among other tahsils as all other tahsils have the literacy rate of more than 75.0 per cent.

Between the two sexes the literacy rate in the district varies between 84.0 per cent among males and 71.4 per cent among females exhibiting a gap of 12.6 percentage points. Among the tahsils, this gap is the widest (17.0 percentage points) in Anandpur Sahib tahsil and the narrowest (8.1 percentage points) in S.A.S. Nagar (Mohali) tahsil.

Likewise, the rural-urban literacy rates also exhibit significant disparity. 74.1 per cent of the population in rural areas and 86.2 per cent of the population in urban areas of the district are literate. The urban literacy is higher than that of the rural in all the tahsils; the gap in the rural urban literacy rate is the widest in S.A.S.Nagar (Mohali) (urban 91.6 % and rural 75.6%) and the closest in Kharar (urban 81.6% and rural 74.4%).

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Anandpur Sahib	86,964	50,142	36,822	48,981	20,519	28,462	74.1	82.8	64.8	18.0

District (Rural) Total:		**484,240**	**281,077**	**203,163**	**269,461**	**122,070**	**147,391**	**74.1**	**81.0**	**66.3**	**14.7**

Table 22 shows that rural areas of this district are marked with a relatively better literacy rate (74.1%) than 14 districts of the state. 74.1 per cent of the rural population of this district is literate compared with 86.2 percent in urban areas.

Among the CD blocks, rural literacy varies between 76.0 per cent in Morinda and 71.0 per cent in Nurpur Bedi. Besides Morinda, Kharar (75.7%) and Rupnagar (74.6%) are the other C.D. blocks displaying literacy rate higher than the district average but the district itself topples the state (64.7) by 9.4 percentage points.

Literacy rate in all other CD blocks in the district is also more than 70 per cent of their population but a bit lower than that of the district average (74.1%)

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	0	0.0	0	0.0
11-20	1	0.1	415	0.1
21-30	2	0.2	518	0.1
31-40	5	0.6	1,436	0.2
41-50	15	1.8	13,828	1.8
51-60	40	4.6	26,637	3.5
61-70	192	22.2	149,637	19.8
71-80	444	51.4	427,862	56.8
81-90	158	18.3	132,015	17.5
91-99	6	0.7	1,347	0.2
100	1	0.1	6	0.0
District Total:	**864**	**100.0**	**753,701**	**100.0**
Literacy rate for District:		**78.1**		

Table 23 shows distribution of villages by ranges of literacy rate. Very low literacy rate (40% or below) is reported by 8(0.9%) villages and they have a very small (0.4%) population. It is equally low in 15 (1.8%) villages in the range of 41-50 per cent containing 1.8 per cent of the districts rural population. Another 40(4.6%) villages in the range of 51-60 per cent contain 3.5 per cent of rural population of the district. Yet another 192 villages, which make 22.2 per cent of the villages and comprising 19.8 per cent of rural population of the district fall in the range of 61-70 per cent.

The maximum number of villages 444 which comprise more than one-half (51.4%) of the total villages and 56.8 per cent of the rural population of the district, are placed in the literacy range of 71-80 per cent.

Further more, 158 (18.3%) villages containing 17.5 per cent of the rural population of the district are placed in the literacy range of 81-90 per cent. This is to say that high literacy rate varying between the ranges of 91-100 per cent is the characteristics of 7(0.8%) villages. Only one village with six habitants in the district has cent per cent literacy rate.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 24 gives the number and percentage of literates and illiterates by sex in Urban Agglomerations/ Towns.

It reveals that 86.2 per cent of the urban population in the district is literate. The male literacy is 90.1 per cent while the female literacy is 81.7 per cent.

Among the towns it varies between 92.2 per cent in S.A.S. Nagar (Mohali) and 75.8 per cent in Karoran. In all, three towns are having literacy rate higher than that of the urban literacy of the district. Besides S.A.S.Nagar (Mohali), they include Nangal (88.0%) and Nehon (87.8%). In as many as 8 out of 11 towns the literacy rate is above the district urban average, while in other three towns the literacy rate is below the district average. Male literacy rate in S.A.S. Nagar (Mohali) (94.7%) rips apart all other towns.

Between the two sexes, 90.1 per cent among males and 81.7 per cent among females are literates. Amazingly Rupnagar is the only district in the state having commendable urban male literacy rate crossing 90 per cent mark and that is why it is said that 'RUPNAGAR ZILE KI YEH PEHCHAN PARIYA LIKHIYA HER INSAN'.

The male-female literacy rates in urban show a sizable gap of 8.4 percentage points. This gap is the widest in the Karoran with 20.0 percentage points. On the other hand this gap is narrowest in S.A.S. Nagar (Mohali) 5.3 percentage points.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

6	Kharar	29,252	17,403	11,849	19,596	8,855	10,741	70.2	78.1	61.2	16.9
7	Chamkaur Sahib	13,805	8,177	5,628	10,536	4,695	5,841	67.3	75.5	58.2	17.3
	District (Rural) Total:	**119,040**	**70,881**	**48,159**	**85,554**	**38,014**	**47,540**	**68.7**	**77.1**	**59.2**	**17.9**

Table 25 shows the number and percentage of scheduled castes literates and illiterates by sex in CD blocks.

It reveals that scheduled castes population in the district rural has a literacy rate of 68.7 per cent compared with an over all rural literacy rate of 74.1 per cent in the district. The maximum literacy rate of 71.7 per cent has been observed in Anandpur Sahib C D block while it is the lowest in Nurpur Bedi with 65.1 per cent. Out of every ten scheduled castes males about eight are literate and 6 out of 10 female are literate.

The variation in literacy rate among female in different C D blocks varies between 61.8 per cent in Anandpur Sahib and 53.3 per cent in Nurpur Bedi. The male and female scheduled castes literacy rate shows a gap of 17.9 percentage points in the rural area of the district. The gap is to the extent of 22.4 percentage points in Nurpur Bedi CD block and 16.7 per cent in Rupnagar C D block. Amazingly, Anandpur Sahib CD block leads all other blocks in total (71.7%), male (80.8%) and female (61.8%) literacy rate.

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	2	0.3	4	0.0
1-10	1	0.1	373	0.2
11-20	1	0.1	220	0.1
21-30	8	1.0	1,180	0.6
31-40	18	2.4	2,836	1.4
41-50	20	2.6	4,205	2.0
51-60	86	11.2	22,321	10.9
61-70	275	35.8	77,280	37.8
71-80	285	37.1	84,057	41.1
81-90	61	8.0	11,493	5.6
91-99	8	1.0	610	0.3
100	3	0.4	15	0.0
District Total:	**768**	**100.0**	**204,594**	**100.0**
Literacy rate for District (Rural):		**68.7**		

Table 26 shows the distribution of villages by ranges of literacy rate for scheduled castes population. 12 villages which make 1.5 per cent of the total villages and accommodate 0.9 per cent population of the district fall in the range of 30 per cent or less. Another 18 villages which constitute 2.4 per cent of the total villages and 1.4 per cent of the district's Scheduled Castes population have literacy rate varying between 31-40 per cent. Evidently all these villages are marked with a very low literacy rate in their Scheduled Castes population. Further Scheduled Castes literacy rate is relatively better in 20 (2.6%) villages containing 2.0 per cent of scheduled castes population in the range of 41-50 per cent. 86 villages (11.2%) fall in the literacy range of 51-60 per cent which accommodate 10.9 per cent of the scheduled castes population. Another 275 (35.8%) villages accommodating 37.8 per cent scheduled castes population fall in the range of 61-70 per cent.

The maximum number of villages 285 which comprise a little less than two-fifth (37.1%) of the total villages and more than two-fifth (41.1%) of the rural population of the district are placed in the literacy range of 71-80 per cent which is a good sign.

Further more, the highest literacy rate (more than 80%) is noticed in 72 (9.4 per cent) villages accommodating 5.9 per cent scheduled castes population. Only three villages in the district have cent per cent literacy rate, reason being, these villages have a meager population of 15 only.

TABLE 27: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town+ *	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

The table 27 shows the number and percentage of scheduled castes literate and illiterate by sex in towns. A little less than three fourth (74.9%) of the Scheduled Castes population in urban areas of the district is literate. Among the towns, it is the highest in Nehon (86.9%) and S.A.S. Nagar (Mohali) (84.2%) is the second best. By contrast, urban Scheduled Castes literacy rate is the lowest in Morinda (64.1%).

82.2 per cent of Scheduled Castes males and 66.8 per cent of females in urban areas are literates reflecting a gap of 15.4 percentage points between the two. Male-female disparity in this regard is quite conspicuous. Among the towns Scheduled Castes male literacy rate varies between 93.9 per cent in Nehon and 72.5 per cent in Morinda, while the corresponding percentage among females is 78.6 per cent in Nehon and 57.6 per cent in Morinda. Fascinating scheduled castes male literacy rate (93.9%) of Nehon census town rips apart male literacy rate (92.6%) of general category. It is very rare, unusual and unbelievable.

Furthermore, male-female differential in Scheduled Castes literacy rate is the maximum in Bhabat 21.5 percentage points and the minimum in S.A.S.Nagar (Mohali) 11.6 percentage points.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

		Females	**519,526**	**101,413**	**19.5**	**22,212**	**4.3**	**123,625**	**23.8**	**395,901**	**76.2**

Table 31 shows that the work participation rate in Rupnagar district (39.2%) is comparatively higher than the state average (37.5%). Among the tahsils it varies between (42.1%) in Kharar and (35.4%) in S.A.S.Nagar (Mohali). In the district 52.6 per cent among males and 23.8 per cent among females are reported as workers.

Out of the total population 35.6 per cent are main workers whereas 3.6 per cent are marginal workers. The proportion of main workers in the tahsils is the highest in Kharar with 39.0 per cent and the lowest in S.A.S. Nagar (Mohali) with 33.4 per cent. However, the proportion of marginal workers is the highest in Anandpur Sahib with 6.3 per cent whereas it is the lowest in S.A.S.Nagar (Mohali) with 2.0 per cent. Further, the incidence of marginal work is observed to be more among females as compared to males except in S.A.S. Nagar (Mohali) where males (2.2%) set aside female (1.8%).

Though Rupnagar district is virtually said to be well attained with industrial units but the picture of non workers (60.8%) is alarming.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 gives the number and percentage of main workers, marginal workers and non-workers by sex at CD block level. It is observed that 42.6 per cent of the rural population in the district is working, out of which 37.8 per cent are main workers and 4.8 per cent are marginal workers. This percentage is higher than that of the state where 39.5 per cent of the rural population is reported as workers out of which 32.2 per cent are main workers and 6.9 per cent are marginal workers.

Among the C D blocks the work participation rate varies between 48.6 per cent in Majri and 38.9 per cent in Rupnagar.

The percentage of main workers is the highest with 43.6 per cent in Majri whereas the lowest has been reported in Anandpur Sahib with 34.2 per cent. However the proportion of marginal workers is the highest in Anandpur Sahib with 7.6 per cent whereas the lowest is reported in Chamkaur Sahib with 2.7 per cent.

Punjab State, in general is characterised by low female work participation rate. It was the lowest 4.4 per cent among all the States/Union Territories in the country at the 1991 Census. It was more due to non-reporting of female's work by the respondents.

Special efforts introduced at 2001 Census for netting female's work have helped in obtaining more accurate picture of female's work; Female work participation rate in Punjab (19.1 per cent) recorded at the 2001 Census is nearly five times that of 1991 Census and Rupnagar

district is far ahead of the State with 29.4% female work participation rate comprising 23.6 per cent main workers and 5.9 per cent marginal workers

The percentage of marginal workers in Kharar CD block is incredible as females (3.2%) are buffeted by males (3.3%). Further this C.D. block has 77.3 per cent of female non workers as compared to Nurpur Bedi C.D. block (60.8%).

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 33 gives the number and percentage of main workers, marginal workers and non-workers by sex in urban Agglomerations/Towns.

The table shows that (32.2%) of the urban population in the district is working, out of which (31.0%) are main workers and (1.2%) are marginal workers. This percentage is slightly lower than the state where (33.5%) of the urban population is reported as total workers. Among the towns it is the highest in Bhabat (35.8%) and the lowest in Nangal (28.1%).

Out of 11 towns, 6 fall below 5 above the district average. The participation in marginal work is comparatively much less. In the district 1.2 per cent of the urban population is reported as marginal workers compared with 31.0 per cent reported as main workers The participation in marginal work is the highest (2.2%) each in Mullanpur Garib Dass, Kharar and Anandpur Sahib whereas the lowest is observed in Bhabat (0.4%).

The urban female work participation rate in the district is much less with 12.1 per cent as compared to male work participation rate of 48.7 per cent. Among the towns the female work participation rate is the highest in Bhabat with 15.5 per cent whereas the lowest is revealed in Nehon with 4.9 per cent.

Note: Percentage of Workers to total worker is given in brackets

Table 34 shows distribution of workers by sex in four categories of economic activity by tahsils in the district.

Among the total workers in the district, 21.5 per cent are cultivators, 8.0 per cent are agricultural labourers, 2.0 per cent are household industry workers and 68.5 per cent are reported as other workers. This signifies that 29.5 per cent of the total workers in the district are engaged in agricultural sector, while 70.5 per cent are in non-agricultural sector of economy.

Among tahsils, the percentage of cultivators is the highest in Anandpur Sahib (33.5%) and the lowest in SAS Nagar (Mohali) (8.4%). Likewise, the proportion of workers reported as agricultural labourers varies between 10.9 per cent in Rupnagar tahsil and 3.4 per cent in SAS Nagar (Mohali) tahsil.

The proportion of workers engaged in household industry is the highest in Kharar with 2.5 per cent and the lowest in Anandpur Sahib with 1.7 per cent. In all, one tahsil falls above and three below the district average. The proportion of other workers is the highest in SAS Nagar (Mohali) (86.3%) and the lowest in Anandpur Sahib (56.0%).

The participation of females in non-agricultural sector is greater than the agricultural sector. In the district 77.7 per cent of the female workers are non-agricultural workers (HH1 - 2.6 per cent and OW- 75.1 per cent).

Note: Percentage of workers to total worker is given in brackets

Table 35 presents distribution of workers by sex in four categories of economic activity in C.D. blocks. Among rural workers in the district, 28.9 per cent are cultivators, 10.3 per cent are agricultural labourers, 1.9 per cent are household industry workers and 58.9 per cent are other workers. This shows that 39.2 per cent of rural workers are engaged in agricultural and 60.8 per cent in non-agricultural sector.

Among C.D. Blocks, the proportion of rural workers recorded as cultivators is the highest in Anandpur Sahib (40.6%) whereas the lowest has been observed in Kharar (18.9%). Likewise, the proportion of Agricultural labourers shows a variation of 15.3 per cent in Morinda and 6.7 per cent in Majri CD blocks. The proportion of rural workers engaged in household industry also exhibits significant variation at CD block level. It is the highest in Rupnagar (2.9%) whereas the lowest has been observed in Morinda 1.1 per cent. Other workers constitute near about three-fifth (58.9%) of the total workers. Among the C.D. Blocks it is the highest in Kharar (69.6%) whereas the lowest is observed in Anandpur Sahib (48.8%).

Further, it reveals that participation of females is greater in non-agricultural sector in comparison to the agricultural sector. Among the rural female workers in the district, 26.4 per cent (C-20.8% and AL-5.6%) are agricultural workers and 73.6 per cent (Household Industries-2.4% and Other Workers 71.2%) are non agricultural workers.

Note: Percentage of workers to total workers is given in brackets.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 36 gives the distribution of workers by sex in four categories of economic activity of urban agglomerations/towns. The table reveals that among towns/ UA's the proportion of urban workers recorded as cultivator is the highest in Mullanpur Garib Dass (6.5%) which is fairly high

as compared to the district urban (1.4%). The lowest being 0.2 in Nehon. The proportion of agricultural labourers shows a variation of (4.3%) as the highest in Kharar and (0.2%) as the lowest in SAS Nagar (Mohali) whereas the district urban displays (1.4%).

It is further revealed that the percentage of household industry workers is the highest in Karoran (5.8%) and the lowest in Nehon (0.4%).

The proportion of other workers also shows significant variation at town level with the highest (98.4%) in Nehon and the lowest (88.4%) in Kharar while at district level it is observed as (95.1%).

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 shows distribution of villages according to availability of different amenities by CD blocks.

Education :

Educational amenity is available to 91.1 per cent of villages in the district. In case of 77 villages only this facility is not available within the village, but the same can be availed at some distance.

Among the CD blocks, this percentage is as high as 97.3 per cent in Kharar C.D. block. This apart, more than 90 per cent villages in three other C.D. blocks of the district are having availability of educational facility with in village.

Medical :

57.4 per cent of the villages in the district are equipped with some kind of medical facility. This percentage is as high as 69.7 per cent in Nurpur Bedi CD block. This apart, more than one-half of the villages in three CD blocks i.e. Morinda (68.8 %), Kharar (66.2%) and Anandpur Sahib (61.9%) are having availability of medical facility within the village. The proportion of villages having medical facility is less than one-half of the villages in Rupnagar (47.9%), Majri (47.8%) and Chamkaur Sahib (45.6%) CD blocks.

Improved Drinking Water :

The availability of improved drinking water refers to availability of drinking water through tap, handpump and tubewell. It is available to all the villages in the district.

Post Office :

Only 21.6 per cent of the villages in the district have availability of post office within the village and the villagers of the remaining 78.4 per cent villages avail this facility at some distance. This percentage is as high as 32.5 per cent in Morinda CD block. This apart, more than one-fifth of the villages in the CD blocks of Anandpur Sahib (29.4 %), Kharar (23.6%) and Majri (21.2%) are having facility of post office within the village. Only 3 CD blocks portray percentage of villages higher than the district average.

Telephone :

Telephone facility is available in 88.9 per cent of the villages in the district which by all means, is a very high percentage. The position is the best in Nurpur Bedi, Kharar, Morinda and Anandpur Sahib CD blocks where more than 90.0 per cent of the villages are enjoying this facility. Only 11.1 per cent of villages are devoid of this facility and avail it at some distance.

Transport and Communication :

The villages in the district are fairly well equipped with transport and communication as 75.7 per cent of the villages have this facility. Only 24.3 per cent of villages are devoid of this facility and avail it at some distance. Kharar with 94.6% beats all other C.D. blocks.

Banks :

Nearly every six village (5.8 %) in the district has a bank. As many as in two CD blocks the proportion of villages having banking facility falls below the district average while in other five CD blocks, it is above the district average. Surprisingly villages in none of the C.D. blocks cross 10.0 per cent mark regarding availability of banks. Rupnagar C.D. blocks (1.6%) is far lagging behind.

Agricultural Credit Societies :

Nearly One out of every five villages (18.6%) in the district has agricultural credit societies. Among the CD blocks it varies between 26.6 per cent villages in Nurpur Bedi and 9.7 per cent in Majri. In all, four CD blocks exhibit percentage of villages with agricultural credit societies above the district average.

Approach by Pucca Road :

The percentage of villages approachable by pucca road in the district, as true for the state, is fairly high. In the district 89.4 per cent of the villages are approachable by pucca roads. Majri with 92.9 per cent is leading followed by Nurpur Bedi C.D. block.

Power Supply :

All the villages in the district are having power supply.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communic ations $	Banks	Agricultu ral Credit Societies	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12	13

5	Majri	87,411 (100)	86,403 (98.8)	60,720 (69.5)	87,411 (100.0)	32,939 (37.7)	85,473 (97.8)	76,622 (87.7)	16,200 (18.5)	17,720 (20.3)	85,528 (97.8)	87,411 (100.0)
6	Kharar	174,571 (100)	174,334 (99.9)	144,979 (83.0)	174,571 (100.0)	73,675 (42.2)	172,918 (99.1)	167,471 (95.9)	33,241 (19.0)	54,639 (31.3)	165,006 (94.5)	174,571 (100.0)
7	Chamkaur Sahib (P)	70,004 (100)	68,409 (97.7)	47,815 (68.3)	70,004 (100.0)	27,285 (39.0)	67,912 (97.0)	62,622 (89.5)	16,407 (23.4)	32,764 (46.8)	60,860 (86.9)	70,004 (100.0)
	District Total:	**753,701 (100)**	**746,398 (99.0)**	**552,226 (73.3)**	**753,701 (100.0)**	**292,072 (38.8)**	**743,486 (98.6)**	**619,351 (82.2)**	**106,436 (14.1)**	**238,397 (31.6)**	**691,569 (91.8)**	**753,701 (100.0)**

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 shows number and percentage of rural population served by different amenities by CD blocks in the district. It is very satisfying that almost the entire rural population in the district (99%) and so in its constituents CD blocks is being served by educational institutions. The same is the position in case of safe drinking water supply, telephone and power supply facilities.

As regards medical facilities available, it is serving 73.3 per cent rural population. Among the CD blocks, the proportion of population served by medical institutions is the highest in Kharar with 83.0 per cent while the lowest is observed in Rupnagar with 56.7 per cent. Out of 7 CD blocks 4 fall above and 3 below the district average.

Post offices are serving 38.8 per cent of the rural population in the district and this percentage of population varies between Anandpur Sahib (43.6%) and Rupnagar (30.8).

Transport and communication amenity is availed by 82.2 per cent population of CD blocks Kharar (95.9%) is leading followed by Chamakaur Sahib (89.5%)

Banks cater to the needs of 14.1 per cent population. Among the 7 CD blocks, the proportion of population served by bank is the highest in Chamkaur Sahib (23.4%) whereas it is the lowest in Rupnagar (6.4%).

As regards agricultural credit societies facilities available, it is serving 31.6 per cent of the rural population in the district and this percentage of population varies between Chamkaur Sahib (46.8%) and Majri (20.3%).

91.8 per cent population is served by pucca road facility. Apart from Majri (97.8%), three other C.D. blocks route the district.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 to 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	79	0	0	79
(b) Middle School	563	21	2	586
(c) Degree College	188	261	410	859
2. Medical:-				
(a) Hospital	316	311	233	860
(b) PHC	341	301	204	846
3. Post Office	625	50	2	677
4. Telephone	95	1	0	96
5. Bus Service	191	21	0	212
6. Banks				
(a) Commercial Bank	661	141	18	820
(b) Cooperative Bank	684	136	27	847
7. Agricultural Credit Societies	645	51	7	703

Table 39 shows distribution of villages which are not having certain amenities by distance ranges from the places where these are available.

Education :

Primary School facility is not available to 79 villages and they avail it within a distance of less than 5 kms.586 villages do not have middle schools. They have to avail this facility at a distance of less than 5 kms for 563 villages, 5-10 kms for 21 villages and 10+ kms for 2 villages.

Similarly out of 864 villages, 859 villages do not have Degree Colleges. This is to say that only 5 villages in the district have a degree college. However, this facility is available to 188 villages within five kilometers, in case of 261 villages at a distance of 5-10 kms and for the remaining 410 villages this facility is available at a distance of 10+ kms.

Medical :

Hospital facility is not available within the villages to 860 villages for which they have to go to different distance ranges. Among them the same is available to 316 villages at a distance of less than 5 kms, in 311 villages it is available at 5-10 kms and the remaining 233 villages have to cover a distance of more than 10 kms to avail the facility of hospital.

Likewise, out of 846 villages which do not have PHC, the same is available at a distance of less than 5 kms in respect of 341 villages, at a distance of 5-10 kms in case of 301 villages and at a distance of more than 10 kms to 204 villages.

Post office:

The post office facility is not available to 677 villages out of which 625 villages avail this facility at a distance of less than 5 kms. while 50 avail it at a distance of 5-10 kms and only 2 villages avail this facility at a distance of more than 10 kms.

Telephone :

96 villages do not have telephone facility out of which 95 villages avail this facility at a distance of less than 5 kms. while only 1 village has to avail this facility at a distance of 5-10 kms.

Bus service :

212 villages do not have bus service and to avail this facility 191 villages have to cover a distance of less than 5 kms while 21 villages cover a distance of 5-10 kms.

Banks :

820 villages do not have banking facility (commercial). 661 villages avail it at a distance of less than 5 kms while 141 villages avail it at a distance of 5-10 kms and the rest of 18 villages have to cover a distance of more than 10 kms.

Likewise, Co-operative banking facility is not available in 847 villages. Among them 684 villages avail it within a distance of 5 kms and in case of 136 villages it is available at a distance of 5-10 kms and for the remaining 27, villagers travel a distance of over 10 kms to avail this amenity.

Agricultural Credit Societies :

A total of 703 villages do not have the facility of agricultural credit societies. 645 villages avail this facility at a distance of less than 5 kms, while 51 villages at a distance of 5-10 kms and the rest 7 villages avail it at a distance of 10 kms or more.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometers)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows the distribution of villages according to the distance from the nearest town and availability of different amenities. Of the total villages, 201 villages in the district are located within a distance of 5 kms, 636 villages in the distance range of 5-15 kms. and 27 villages are located within 16-50 kms from the nearest statutory town.

Maximum number of villages (636) fall in the distance range of 5-15 kms and among them educational facility is available to 577(90.7%) villages, medical facility is available to 374(58.8%) villages, post office to 139(21.9%) villages, telephone facility to 563(88.5%) villages, transport and communications to 489(76.9%) villages and approachable by pucca road to 564(88.7%) villages. The Banking facility is available only in 43 villages (6.8%) and 112(17.6%) villages have agricultural credit societies. Whereas distance ranges below 5 kms. and 5-15 kms. fall in line with the range 16-50 kms. Regarding percentages, the other two ranges 51+ kms. and unspecified have no villages falling under these ranges.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 reveals the distribution of villages by population ranges and amenities available. Of the 864 villages, 316 villages fall in the population range of 1-499, 295 villages fall in the population range of 500-999 and 193 villages in 1000-1999. There are 55 villages falling in the population range of 2000-4999 and only 5 villages have population range of more than 5000-9,999. Educational facility is available to 787(91.1%) villages. Medical facility is available to 496 (57.4%) villages. Improved drinking water facility is available to cent per cent villages. Post office facility is available only to 187 (21.6%) villages. Telephone facility is available to 768(88.9%) villages. Transport & communications and Banking facility is available to 654(75.7%) and 50 (5.8%) villages respectively. Agricultural credit societies are available to 161(18.6%) villages. 772(89.4%) villages are linked with Pucca road whereas power supply is available to all the villages.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Anandpur Sahib	126	31,204	68.1	80.2
2	Nurpur Bedi	109	32,786	53.2	73.9
3	Rupnagar	188	35,546	74.9	89.4
4	Morinda	77	15,543	87.1	94.1
5	Majri	113	25,330	63	84.2
6	Kharar	148	37,928	78.7	86.4
7	Chamkaur Sahib	103	18,231	76.8	93.7
	District Total:	**864**	**196,568**	**70.5**	**85.7**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 shows the distribution of CD blockwise villages according to land use. The total area of the district is reported to be 196,568 hectares which out of the 70.5 per cent area is cultivable area. 85.7 per cent is the irrigated area of the total cultivable area. Rupnagar C.D. block (35,546 hectares) is the largest in area and is more than double than that of Morinda (15,543 hectares) which is the smallest C.D. block in area. Among the C.D. blocks the percentage cultivable area varies between 87.1 per cent in Morinda and 53.2 per cent in Nurpur Bedi. In most of the C.D. blocks the percentage of cultivable area is greater than that of the District.

85.7 per cent of the cultivable area in the district is irrigated. All the C.D. blocks have fairly high proportion of their cultivable area under irrigation and this percentage varies between 94.1 per cent in Morinda and 73.9 per cent in Nurpur Bedi.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other (s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Anandpur Sahib (M.Cl)	1,084.9	43.4	1,041.5	783.6	98.8	171.7	500.7	0.0	12.4
2	III Kharar (M.Cl)	422.6	247.9	174 7	407.9	175.0	47.3	164.7	0.0	20.9
3	III Kurali (M.Cl)	757.7	436.4	321 3	642.4	194.9	94 7	88.7	0.0	264.1
4	III Morinda (M.Cl)	570.1	294.0	276.1	559.9	319.7	47.6	144.6	0.0	47.8
5	III Nangal (M.Cl)	1,382.1	1,258. 9	123.2	1364.2	453.4	0 0	39.9	181.2	689.8
6	III Rupnagar (M.Cl)	434.5	270.3	164.2	415.7	250.7	0.0	165.0	0.0	0.0
7	I SAS.Nagar (Mohali) M.Cl)	1,156.9	1049.4	107.5	1266.4	267.2	27.4	971.2	0.0	0.6
	District Total	**907.3**	**712.1**	**195.2**	**920.2**	**270.1**	**34.5**	**466.1**	**25.7**	**123.8**

Table 43 shows per capita receipt and expenditure incurred in statutory towns in the district. The per capita receipt in the district in Rs. 907.3 out of which Rs. 712.1 come through taxes and Rs. 195.2 through all other sources. The per capita receipt is as high as Rs. 1382.1 in Nangal and as low as Rs. 422.6 in Kharar.

As against the per capita receipt of Rs. 907.3, the district is incurring per capita expenditure of Rs. 920.2. The major chunk of this expenditure is on general administration i.e. Rs. 270.1, public health and conveniences Rs. 34.5, public works Rs. 466.1 and per capita expenditure on public institutions is only Rs. 25.7, while it is Rs. 123.8 for all other types of activities. Nangal (M.Cl.) rips apart all other statutory towns with Rs. 1364.3 as per capita expenditure whereas Kharar (M.Cl) with Rs. 407.9 is quite at sea. Expenditure on public work (Rs.466.1) pulsates all other categories such as general administration, public health and conveniences, public institutions and others.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Anandpur Sahib (M. Cl)	5.0	2.2	2.2	0.7	0.7

7	Mullanpur Garibdass (C.T)	1.6	1.6	1.6	1.6	0.0
8	Nangal (M. Cl)	1.8	1.8	1.8	1.1	0.2
9	Nehon (C.T)	3.0	2.0	2.0	0.0	0.0
10	Rupnagar (M. Cl)	2.0	1.4	1.4	0.6	0.2
11	SAS.Nagar (Mohali) (M. Cl)	5.2	1.9	1.1	0.5	0.2
	District Total	**2.9**	**1.6**	**1.4**	**0.7**	**0.2**

Table 44 shows number of schools/colleges per 10,000 of population for towns. In the district there are 2.9 primary schools, 1.6 junior secondary/middle schools, 1.4 secondary/ matriculation schools, 0.7 senior secondary schools and 0.2 colleges per 10,000 population.

In other words, there is a primary school for a population of 3,448, junior secondary/middle school for every 6,250 persons and secondary/matriculation school for 7,143 persons, senior secondary school for 14,286 population and college for a population of 50,000.

TABLE 45: NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Anandpur Sahib (M.Cl)	36
2	Bhabat (C.T)	0
3	Karoran (C.T)	0
4	Kharar (M.Cl)	34
5	Kurali (M.Cl)	13
6	Morinda (M.Cl)	11
7	Mullanpur Garibdass (C.T)	0
8	Nangal (M.Cl)	32
9	Nehon (C.T)	10
10	Rupnagar (M.Cl)	37
11	SAS.Nagar (Mohali) (M.Cl)	14
	District Total	**23**

Table 45 shows number of beds in medical institutions in towns per 10,000 of population. The district on an average has 23 beds per 10,000 of population. Among the towns, Rupnagar has 37 beds per 10,000 populations and this is the highest among all the towns in the district. Besides Rupnagar, Anandpur Sahib (36), Nangal (32) and Kharar (34) have more beds per 10,000 populations, than that of the district average.

TABLE 46: PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population approximately	Percentage of slum population to total population
1	2	3	4	5
1	Anandpur Sahib	13,889	4,885	35.2
2	Kharar M.C.	42,289	7,843	18.5
3	Kurali M.C.	23,047	7,970	34.6
4	Morinda	22,635	5,800	25.6
5	Nangal	45,368	13,500	29.8
6	Rupnagar	49,159	9,100	18.5
	District Total	**196,387**	**49,098**	**25.0**

Table 46 shows proportion of slum population living in statutory towns in the district. Anandpur Sahib, Kharar, Kurali, Morinda, Nangal and Rupnagar are the six towns which have reported slum population. In absolute terms 49,098 persons are living in slums which account for 25.0 per cent of the total urban population. In the town of Anandpur Sahib (35.2%) of the total population is residing in slums and for other towns it is between 34.6 per cent in Kurali to 18.5 per cent each in Rupnagar and Kharar.

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Anandpur Sahib (M.Cl.)	Baan (twisted Munj for Cots)	Babber Grass
		Modern Articles	Rice
		Shoes	Shoes
2	Bhabat (C.T.)	Navedic Limbs	Wheat
		Bricks	Rice
			Bricks
3	Karoran (C.T.)	Candles	Candles
		Cemented Flower Plant Pots	Cemented Flower Plant Pots
		Baan (Twisted Munj for Cots)	Baskets
4	Kharar (M.Cl.)	Woolen Products	Wool Blankets
		Yarn	Yarn
		Vanaspati Ghee	Vanaspati Ghee
5	Kurali (M.Cl.)	Sewing Machine Parts	Sewing Machine Parts
		Locks	Oils
		Soap	Locks
6	Morinda (M.Cl.)	Sugar	Sugar
		Agricultural Implements	Agricultural Implements
		Machine Parts	Machine Parts
7	Mullanpur Garibdass (C.T.)	Gold Ornaments	Wheat
		Wooden Furniture	Paddy
		Iron Gates &Grills	Milk
8	Nangal (M.Cl.)	Urea	Urea
		Can Khad	Caustic Soda
		Caustic Soda	Chlorine Gas

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
9	Nehon (C.T.)	Electricity	Wheat
		Cement	Electricity
			Paddy
10	Rupnagar (M.Cl.)	Locks	Potatoes
		Soap	Locks
		Wooden Furniture	Soap
11	SAS.Nagar (Mohali) (M.Cl.)	Electronic Parts	Electrical Goods
		Tractors	Tractor Parts
		TV Tubes	TV Tubes

Table 47 shows most important commodities manufactured in the towns and exported out.

The manufacturing of Electronic Parts, Urea, Baan, Sugar and Agricultural Implements are important commodities in towns. Manufacturing of Fertiliser is the characteristic of Nangal and Electronic Parts, Tractors, TV tubes and locks, are the characteristics of SAS Nagar (Mohali) and Rupnagar. Generally speaking, each town has its own characteristic as is revealed by this table.

Besides the fertilizers, Electrical Goods, Tractor Parts, TV Tubes, Wool Blankets, Sewing Machine Parts, wooden furniture Locks, Ghee, Sugar, Milk, Wheat, Rice and Potatoes are the other key items exported from the towns of the district.

(x) Brief Analysis Based on Houses and Household Amenities

TABLE 48: HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data Source: Census of India 2001, II-Series: "Tables on Houses, Household Amenities and Assets".

Table 48 shows households by tenure status and number of rooms occupied in the district.

The table reveals that 163,440 households in the district are living in the houses owned by them, 30,847 in rented houses while 9,843 households live in houses with tenure status 'others' i.e. neither owned nor rented. This reflects that, out of 204,130 households, 80.1 per cent are living in owned houses further out of them 25,009 (15.3%) have one room, 46,201 (28.3%) have two rooms, 37,401 (22.9%) have three rooms, 53,923 (33.0%) have more than 3 rooms while 0.6 per cent have no exclusive room. This reveals that majority of the households have more than three rooms (33.0%). If we analyse it rural and urban wise, the position is by and large the same as majority of the households have three and more rooms accommodation.

Among the scheduled castes, out of 55,305 households, 46,075(83.3%) households have the houses owned by them and further out of them, majority of the households 11,994 (26.0%) have one room, 16,607 (36.0%) have two rooms while only 9,251 (20.1%) have three rooms houses and 7,919 (17.2%) have more than 3 rooms.

The percentage of households living in rented houses is only 5.8 per cent in rural whereas it is 31.5 per cent in urban.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sl. No.	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
	Rupnagar	**180,033**	**16,544**	**7,535**	**111,537**	**13,225**	**5,516**	**68,496**	**3,319**	**2,019**

1	Anandpur Sahib	48,857	2,351	3,035	37,752	2,189	2,687	11,105	162	348
		(27.1)	(14.2)	(40.3)	(33.8)	(16.5)	(48.7)	(16.2)	(4.9)	(17.2)
2	Rupnagar	51,028	4,440	2,147	36,916	3,677	1,126	14,112	763	1,021
		(28.4)	(26.9)	(28.5)	(33.1)	(27.8)	(20.4)	(20.6)	(23.0)	(50.6)
3	Kharar	37,440	6,392	1,077	21,629	4,811	832	15,811	1,581	245
		(20.8)	(38.6)	(14.3)	(19.4)	(36.4)	(15.1)	(23.1)	(47.6)	(12.1)
4	S.A.S.Nagar (Mohali)	42,708	3,361	1,276	15,240	2,548	871	27,468	813	405
		(23.7)	(20.3)	(16.9)	(13.7)	(19.3)	(15.8)	(40.1)	(24.5)	(20.1)

Table 49 shows percentage distribution of households living in permanent, semi-permanent and temporary houses. It is to the tune of 88.2 per cent, 8.1 per cent and 3.7 per cent to total households respectively.

The distribution of permanent houses among the tahsils shows that the highest percentage of permanent houses is in Rupnagar (28.4%) while the lowest is observed in Kharar (20.8%). The corresponding figures for rural and urban show that the highest percentage is observed in Anandpur Sahib (33.8%) in rural area while the lowest in SAS Nagar (13.7%). In the urban areas the highest percentage is observed in SAS Nagar (40.1%) while the lowest in Anandpur Sahib (16.2%).

The distribution of Semi-permanent houses shows that the highest percentage is observed in Kharar (38.6%) while the lowest in Anandpur Sahib (14.2%). In the rural area again it is the

highest in Kharar (36.4%) while the lowest in Anandpur Sahib (16.5%) and in urban area also it the maximum (47.6%) in Kharar and the minimum in Anandpur Sahib (4.9%).

The percentage distribution of temporary houses is inversely the highest in Anandpur Sahib (40.3%) while the lowest is observed in Kharar (14.3%). In rural area it is again the highest in Anandpur Sahib (48.7%) while the lowest in Kharar (15.1%). In urban areas it is the highest in Rupnagar (50.6%) while the lowest is observed in Kharar (12.1%).

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".

+ Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is given in brackets after the number of household.

Bathrooms means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table 50 shows the percentage of households having improved drinking water source, electricity, bathroom, toilet and drainage facility.

Improved drinking water :

Households having tap, hand pump and tubewell as the sources of drinking water are grouped as having improved drinking water facility. In the district, this facility is available to 91.8 per cent households. While screening the corresponding figures for the rural and urban areas, the same trend is visible among all the tahsils.

Electricity :

Electricity as the source of lighting is available to 94.2 per cent of the households in the district; the corresponding figures for rural and urban areas are 93.1 per cent and 96.2 per cent respectively signifying that the rural areas do not lag behind the urban much in this regard. The trends are, by and large, the same for all the tahsils.

Bathroom :

Bathroom facility is available to 75.8 per cent in the district. This facility is available to only 68.7 per cent households in the rural area of the district while this percentage in urban areas is as high as 88.3 per cent.

Toilet :

Toilet facility is available to 49.0 per cent households in the district. In the rural areas of the district nearly 3 persons out of 10 are enjoying this facility whereas in the urban areas more than 8 out of 10 persons are enjoying such facility.

Drainage :

Drainage facility is available to 83.8 per cent households in the district. The corresponding figures for the rural and urban areas of the district are 78.9 per cent and 92.4 per cent respectively S.A.S.Nagar (Mohali) tahsil in rural, (93.7%) and urban (96.5%) stands atop.

Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".

Table 51 gives the distribution of households by availability of separate kitchen and type of fuel used for cooking.

Cooking gas (LPG) is the major fuel used for cooking in the district with 45.1 per cent households followed by Firewood with 30.0 per cent. Cooking gas (LPG) in the rural areas is used by 27.5 per cent and 76.3 per cent in urban area.

Among the tahsils the highest percentage of cooking gas (LPG) users as fuel is S.A.S Nagar with 68.2 per cent while the lowest is Rupnagar with 36.2 per cent.

Firewood users as the source of fuel are the highest in Anandpur Sahib (54.4%) while the lowest in S.A.S. Nagar (5.8%). S.A.S. Nagar is the only tahsil where urban households using cooking gas as fuel touch 90 per cent mark.

In the district, the users of cooking gas (LPG) and Firewood alone constitute 75.1 per cent of the total households and apart from these two, cow dung cake kerosene and crop residue are the other fuels being used by households.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET

Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".

Table 52 shows the number of households availing Banking services and number of households having each of the specified assets. It is revealed from the table that out of 204,123 households in the district 144,049 (70.6%) are availing banking facility. The facility of Radio/Transistor and Television is being availed of by 99,268 (48.6%) and 146,615 (71.8%) households respectively. Telephone facility is available to 43,798 (21.5%) households. Bicycle is owned by 158,018 (77.4%) households while Scooter/Motorcycle/Moped is owned 84,359 (41.3%) households. Car/Jeep/van is available to 16,912 (8.3%) households only. There are 14,377 (7.0%) such households which do not have any specified asset

(xi) Places of tourist, religious, historical or archeological importance

Nangal :

It is situated on the left bank of river Satluj at a distance of 60 kms, from Rupnagar, the seat of district head-quarters, and gained importance with the completion of Bhakra Dam project in November, 1955 Since it is a place of known tourist interest, a large number of tourists visit this place to see the modern monument in gigantic Bhakra Dam, which is located nearby. At Nangal another dam has been built up,whence two canals; Nangal Hydel (Bhakra Main Canal) and Anandpur Hydel (Satluj-Yamuna Link) have been taken out for irrigating vast track of areas in Punjab and Haryana.But unluckily, the later has become 'an apple of discord' between the two States. In fact, it was Nangal which ushered in modern concepts of architecture in housing for the first time. The town, at the first stage, was completely planned and served as a model for other towns. Recently, another township has come up on the other side of the river which is called Naya Nangal where modern industrial plants in chemicals have come up. The two townships, infact, were quite separate administratively but looked as one. Its population is 45,368 as per census 2001 and area 22.8 sq. Kms. It has a density of 1,990 persons per sq. Kms and sex ratio 898. It was a railway terminus prior to the extension of railway line to Una (Himachal Pradesh). Bhakara

Management Board is also operating Nangal Bhakra rail line, which is used to carry material and staff to Bhakra. The township is flourishing now even through it had an initial set back after completion of Bhakra Dam Project. There are a number of places of tourist and religious interest in and around Nangal Township such as ; Gobind Sagar (known for water sport), Nangal Dam, Gurudwara Bhabour Sahib, Geeta Mandir (Panj Gatran) Gurudwara Ghat Sahib, Shiv Ashram etc.

Anandpur Sahib:

It is located on Rupnager-Nangal road some 40 kms from Rupnager on the left bank of river Satluj. This place is of a great religious importance for the Sikhs as it was here that the birth of Khalsa Panth took place. The place was founded by Guru Teg Bahadur, the 9th Sikh Guru, on land purchased from Raja of Bilaspur. He named it Anandpur, the place of bliss. It is also known as Makhowal after the name of a demon who occupied this place for many years before his final eviction by the Guru. Guru Gobind Singh, the 10th Guru, had a long association with this place where he spent 25 years of his early life. He started the ceremony of pahul (Baptism) among the Sikhs in a place now known as Gurudwara Keshgarh Sahib on Baisakhi day in 1699. Many battles were waged here by the 10th Guru against the Mughals and the neighboring hill chiefs. This place also served as an ideal place for the recruitment and training of his followers from amongst the pilgrims who visited Naina Devi Shrine. This houses many Sikh shrines such as: Gurudwara Keshgarh Sahib, Gurudwara Manji Sahib, Gurudwara Sisganj, Gurudwara Bhora Sahib, Gurudwara Anandgarh Sahib, Gurudwara Mata Jito. However, Gurudwara Keshgarh Sahib is regarded as one of the five sacred 'Takhts' or seats of Sikh religion. It is now a town and has a municipal committee, which provides civic amenities. There is one museum, which is exclusively devoted to the life and teachings of the Sikh gurus and was built at the cost of Rs 12 lakh. The museum has 24 oil paintings depicting various events connected with the lives of Sikh gurus. The museum has been named as Guru Tegh Bahadaur Museum. The town has been linked with Garhshankar in Hoshiarpur district through a bridge over Satluj river which has shortened distances with Doaba and Majha tracts of Punjab. Besides, two hydel power stations, one each on Nangal Hydel and Anandpur Hydel have been built up which supply power to the Bhakara Power Grid. At a distance of 4 kms. from Anandpur Sahib, Dashmesh Academy is located which is wholly residential where wards of armed forces and para military forces are imparted instructions for enabling them to get admission in Defence Educational Establishments. A fair called Hola Mohalla is held here annually on the occasion of Holi which is participated by a large number of Sikhs from all over the state. According to reserved estimates more than a million pilgrims participate in this fair. There is also a large gathering on the occasion of Baisakhi which is celebrated with great zeal.

Kiratpur Sahib:

It is situated on the left bank of river Satluj at a distance of 10 kms from Anandpur Sahib towards south on the Nangal-Rupnagar-Chandigarh road. It is of great religious importance for the Sikhs who immerse here, at river Satluj, ashes of their dead. It was visited by Guru Nanak the 1st Sikh Guru. Later Guru Hargobind, the 6th Guru and his successors had a deep association with this place. Some important shrines connected with the place are: Guru Charan Kamal, Gurudwara Baba Gurditta, Gurudwara Tir Sahib, Tomb of Baba Budden Shah, Gurudwara Bavangarh, Gurudwara Patalpuri, Gurudwara Shish Mehal, Gurudwara Harminder Sahib and Gurudwara Kot Sahib. It also serves as a gateway to Central Himachal as National Highway No. 21 which proceeds from here to Bilaspur, Sundar Nagar, Kulu, Manali, Leh etc. It has emerged as a good market for Timber which reaches here from Himachal Pradesh.

Gurudwara Parivar Vichhora Sahib:

It is situated near village Nangal Sirsa on Rupnagar – Nangal road about 14 kms from Rupnagar adjacent to Bhakra Main Canal and a Gurudwara has been built here in 1975 in the memory of the separation of Guru Gobind Singh from his family. It was here that Gangu, the domestic servant of Guru Gobind Singh, took Guru's mother and two youngest sons to his native village Saheri, to avoid detection but unfortunately they were captured on a tip off. The two youngest sons were later buried alive at Sirhind on their refusal to convert to Islam. Guru Gobind Singh's three wives Mata Jito ji, Mata Sundari and Mata Sahib Kaur were, however, taken in disguise to Delhi. A fair lasting for three days is held here annually in January.

Jateshwar Mahadev Temple, Jatwahr :

It is located in village Jatwahr which is about 6 kms from village Bains on Rupnagar-Nurpur Bedi road. The antiquity of the temple, according to the local people, goes back to remote past. But the present building is only 100 years old, which was built by Jai Dayal Sharma, a resident of village Takhtgarh. There is a clear evidence of earlier temple attributed to 10th-11th century. The temple is visited by pilgrims from Punjab, Haryana, and Himachal Pradesh. A big fair is held on 1st of Bhadon. Besides, a fair on Shivratri is also held here every year.

Rupnagar:

The town is of considerable antiquity and is said to have been founded by Raja Rokeshwar, who named it after his son Rup Sen from whom it took its present name. Recent excavations under taken here suggest that Rupnagar was one of the oldest towns in the Punjab. The relics excavated from a mound, known as Nalagarh Tibbi near Government College reveal that the town had flourished in the past with an advanced civilization similar to Harappa and Mohenjodaro Civlisation. Moreover, it was here that a historic treaty between Maharaja Ranjit Singh and Lord William Bentick, the British Governor General, was signed on 26th October, 1831. The place of treaty is situated near the Rupnagar Headworks on the left bank of river Satluj. There are a number of places of interest in the town and the vicinity, such as, Gurudwara Sada Barat, Ropar headwork, place of treaty between Sikhs and the British, Shiv Mandir Lehri Shah, Dargah of Shah Khalid Bin Walid, Tomb of Masto Gujri and a stone inscription in a deep well pertaining to Emperor Shah Jahan (AD 1627--1658). From the Ropar headwork two canals; Sirhind Canal and Bist Doab Canal have been taken out, which irrigate large areas in Malwa and Doaba areas. Its population is 49,159 as per census 2001 and area 25.0 sq. Kms. It has a density of 1,966 persons per sq. Kms and sex ratio 887.

Kotla Nihang:

It is situated on the periphery of Rupnagar town on Rupnagar-Chandigarh road. It houses a Gurudwara called Gurudwara Bhatha Sahib which bears association with Guru Govind Singh. According to a legend Guru Govind Singh took refuge here in a live kiln which became dead on his entry into it. The Pathans who had shown apathy in lodging the Guru and his horses expressed deep regrets for their conduct and accommodated him in their houses. A Gurudwara was built in1914 by Baba Jiwan Singh at the site of the kiln to commemorate the memory of the Guru. A silver sword, a Katar and dat gifted by the Guru to the Pathans are preserved in the Gurudwara. Piligrams from far and wide pay visit to Gurudwara Bhatha Sahib to seek benediction. On fulfillment of their vows they make liberal offerings in cash and kind. A fair is held here on 11th Bhadon on the death anniversary of Baba Jiwan singh. Another 3 days fair called 'Jor Mella' is held in 24 Paush which is thronged by a large number of visitors. The place is gaining an importance day by day.

Chamkaur Sahib:

Situated on the bank of Sirhind Canal at a distance of 15 kms. from Morinda and 16 kms. from Rupnagar, it is of great religious importance for the Sikhs as it was here that two elder sons of Guru Govind Singh, Baba Ajit Singh and Baba Jujhuar Singh along with 37 followers of the Guru attained martyrdom by fighting the Mughal forces. The place is also called Chamakaur-Di-Garhi. A number of Gurudwaras have been constructed here to perpetuate the memories of the Guru and the martyrs. The important shrines located here are; Gurudwara Damdama Sahib, Gurudwara Garhi Sahib, Gurudwara Shaheed Burj Sahib, Gurudwara Tarri Sahib and Gurudwara Ranjitgarh Sahib. A fair is held every year in the Bikrami month of Paush to commemorate the memory of the sons and the followers of the guru Govind , who laid down their lives fighting the tyrants.

Manakpur Sharif:

It is situated in village Manakpur some 10 kms from Kurali. The place is known for the tomb of Hafiz Mussa Sahib, a Muhammedan saint. It is said to have been built some 200 years back by Muhammed Shah, a disciple of the Pir. A fair is held annually on a day after 14 days of Mithi Id. Also, devotees pay visit to the Dargah on every thursday.

Mata Jainti Temple:

It is situated on the top of a hillock in village Majrian at a distance of 15 kms from Chandigarh and is connected with an approach road of 5 kms from the Punjab barrier on the Chandigarh-Mullapur road. The place was part of Hathnour state to which daughter of a king of Kangra state was married. The princess was a devotee of Goddess Durga but was not allowed to worship here. This infuriated the goddess Durga who, said to have appeared in a dream to Garib Dass, a notorious dacoit of the area, who started construction of the temple which was, however, completed by his grandson Bhagwan Dass. Every year a fair is held for two days in the month of Magh.

(xii) Scope of Village and Town Directory

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

Town Directory :

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV- A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc. Hence the data for the towns of Rupnagar has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of Rupnagar District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class, name Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns of Rupnagar District. The income and expenditure for the towns of Rupnagar have been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the scheduled castes/scheduled tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

Statement V gives information regarding medical, educational, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Rupnagar which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from towns and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Town. Information on number of banks available in the town has been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII shows the civic amenities available to all the 6 towns having slums falling in the jurisdiction of Rupnagar District.

Part - A
VILLAGE AND TOWN DIRECTORY

Section-I
Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The Village Directory format has 25 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number :

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village :

The name and location code number of the village is shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village :

The area of the villages in hectares is given. Wherever the area figures were not furnished by the concerned department, the column is left blank.

Column 4 : Total population :

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households :

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational :

Classes upto class V are included in Primary School comprising nursery school, kindergarten school, Pre-basic school, pre-primary school and junior basic school.

Classes from VI to VIII are included in the middle school.

Classes from IX and X are included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr.
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M (4), etc.

Column 7 : Medical :

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water :

The type of drinking water supply sources available within the village is indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone :

It is indicated by following codes :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks :

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available within the village, distance of the nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies :

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given.

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities:

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in these columns. If not available, the particulars of the nearest place with the facility exists is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications :

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways, they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village :

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance :

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply :

Availability of Power Supply in the village, whatever may be the form of its use, is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine :

If village receives any News Paper/Magazine the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured :

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use :

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare (s) up to one decimal. Desh '-' is

recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A and B The appendices show the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates CD Block wise number of villages.

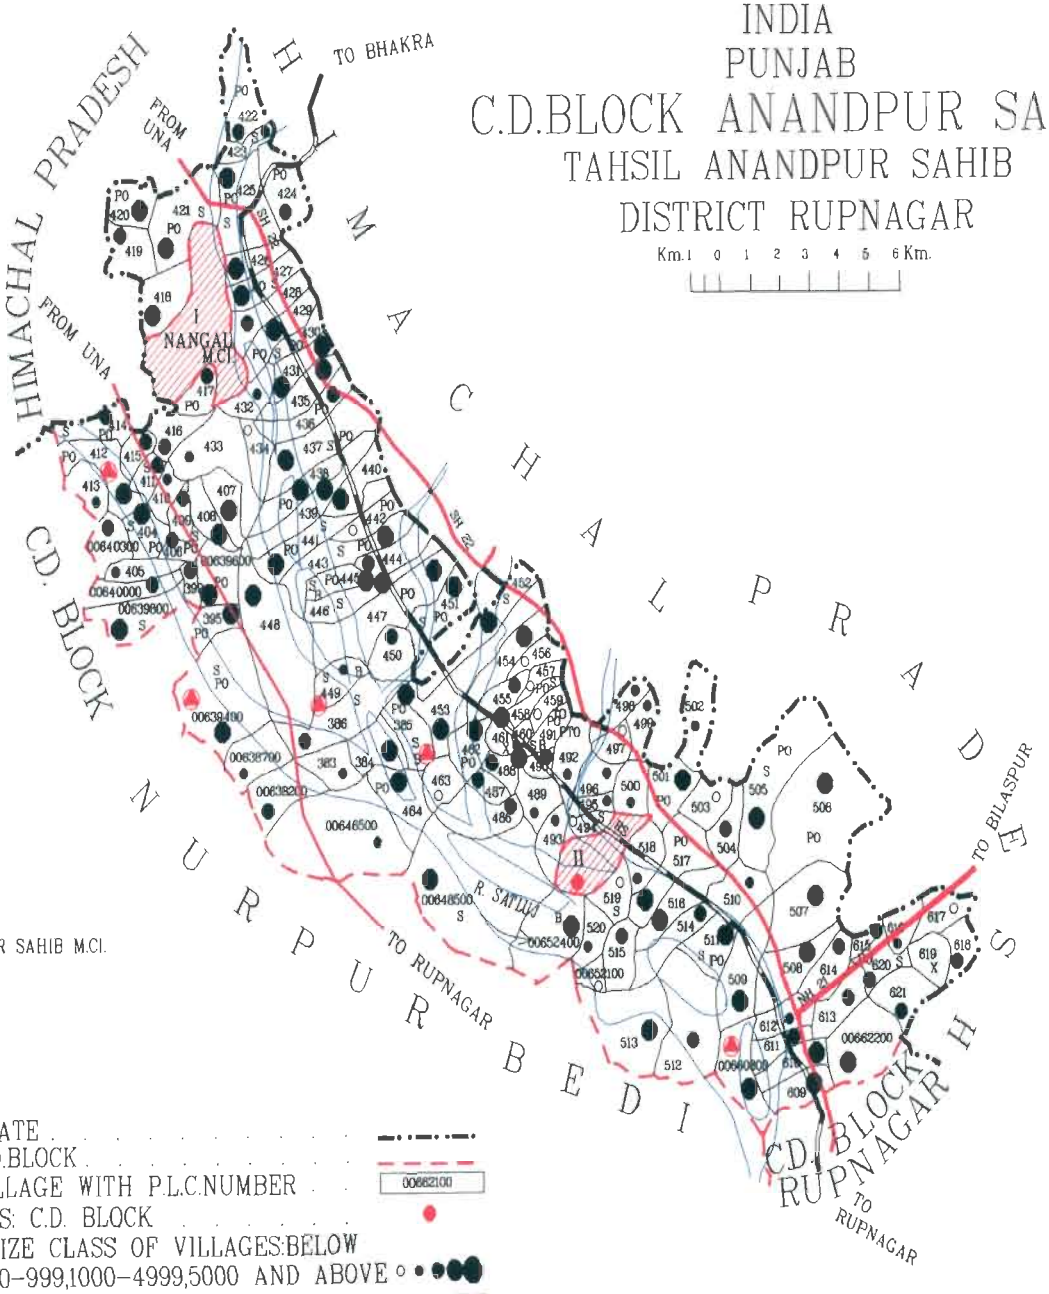

Appendix-IX Shows number of different types of girls schools in a village.

Section-II
Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Contonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects :

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 & 8 :

Name or the State headquarters, District headquarters and Tahsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory :

Column 6 : Road length (in kms.) :

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage :

Generally, sewerage system is implied by the net-work of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines :

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil :

The various prevalent methods of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt

Sewerage	S
Others	O

Column 13 and 14 : Water supply :

Source and capacity of storage system. The following codes are used in these columns :

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major sources of water supply is given in column 13 and the storage capacity against each in kilo-litres (in bracket) is presented in column 14.

Column 15 : Fire Fighting Service :

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections) :

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, they may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes :

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institutes	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like-Applied Art/Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/ Intermediate/ Senior Secondary/ PUC/ Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle schools or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres :

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 ; Working Women's hostels with number of seats :

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities :

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms:

Number of public libraries and reading rooms available in the referent town is recorded in codes as follows : .

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded in these columns.

Column 9 : Number of Banks :

Number of Banks available in the referent town both Commercial and Co-operative banks is recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies:

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town is recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

STATEMENT

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting from October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices

which were specially set up for this purpose. The individual Scheduled Caste and the Scheduled Tribe population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Caste/Tribe returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribe at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes and Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts, Cities and Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main

workers were presented into four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/CD Block/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4. Village Primary Census Abstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of Tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration, block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure-I

Number of villages under Gram Panchayat :

With the Constitution (73rd amendment) Act, 1992, the Census Organisation felt it necessary to provide population data for the territorial area of Panchayat. This required precise details of the territorial area of each Panchayat so that delineation of enumeration blocks (EBs) to be allotted to the enumerators could be done to meet this requirement.

It required careful delineation of enumeration blocks by the Charge Officers to ensure that EBs do not cut across the territorial area falling in the Panchayat. Different situations were well perceived. A Panchayat could consist of only one village or a number of complete villages. There could be another situation where the Panchayat may consist of some complete villages and parts of villages. Still there could be another situation where Panchayat could consist of a number of villages etc.

An exhaustive exercise was done to prepare Panchayat level data. However, we came across following types of situations which made it difficult to compile the Panchayat level data:

i) Some of the Panchayats have one or more than one village.

ii) Some of the Panchayats have only a part of the village.

iii) Some Panchayats include full village (s) as well as part of village (s).

All this has not made it feasible for us to present Panchayat level PCA.

Annexure-II

Fertility and Child Mortality:

The following table shows age specific fertility rates in Punjab as well as in Rupnagar district for the years 2001 and 1991. The trends observed are almost identical both for the State and the district for 2001. Among different age groups the fertility rate is the highest in age-groups 20-24, 25-29 and 30-34. The trend is the same for rural and urban areas also.

The trends also show some fall in the fertility levels during 1991 and 2001 and this decline is noticeable in four age-groups, at par in two and above in the age group 45-49 in the state. In district Rupnagar, the fertility rate plunged in all age groups except one i.e. 45-49.

AGE SPECIFIC FERTILITY RATES 2001 AND 1991

Age Group	Rupnagar						Punjab					
	Total		Rural		Urban		Total		Rural		Urban

The following table shows age specific marital fertility rates in Punjab as well as in Rupnagar district for the year 2001 and 1991. The trends observed are similar to those of total fertility levels, although the decline in marital fertility levels is at a relatively lower pace. ASMFR is amazingly higher in rural as compared to urban both in Rupnagar district and Punjab state in the all age groups for the years 1991 and 2001.

AGE SPECIFIC MARITAL FERTILITY RATES 2001 AND 1991

Annexure-III

Measures of Fertility and Mean Age At Marriage Fertility Levels:

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally is assessed by relating number of births to size of some section of the population, such as number of married couples and number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever married women and the last question was related to currently married women only. The measures of fertility worked out are based on the F-Series Tables of 1991 & 2001 Census pertaining to Punjab State.

The following table presents important indices of fertility in Punjab as well as in Rupnagar district for the years 2001 and 1991 separately for total, rural and urban areas. There has been significant decline in the number of children ever born per ever married woman in the age group (45-49); the decline is relatively more in rural areas than urban both in state and district. Likewise there has been a significant decline in the child-women ratio also. However, the number of married couples per 1,000 of population has gone up both in the state and district in rural it is vice-versa for urban areas.

IMPORTANT INDICES OF FERTILITY

Fertility indices	Rupnagar						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991
1	2	3	4	5	6	7	8	9	10	11	12	13
No. of Children ever born per ever married woman in the age group (45-49)	3.42	4.23	3.69	4.46	2.92	3.60	3.50	4.27	3.69	4.45	3.16	3.81
Couples per 1000 Population	163	162	159	157	171	176	161	160	160	156	164	168
Child-Woman ratio (0-4 Years)	344	483	371	503	295	428	349	480	369	493	311	448

Annexure IV

MOVEMENT OF POPULATION

What is migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence, if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International Migration:

The migrational movements are of three types- (i) Migration within the State itself with its components-(a) Migration within the district of enumeration (intra-district migration), (b) Migration from one district of the state to another district of the State/UT (inter-district migration). (ii) Migration from one State to another state of the country (inter-state migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why the people migrate?

For the first time in the census, reasons for migration were elicited in 1981. Keeping operational constraints in view, the reasons for migration were broadly categorized as (1) employment, (2) education, (3) marriage, (4) family movement and (5) other reasons. Other Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration:

The growth of population of a particular place depends upon the biological variates such as mortality and fertility and migration. The knowledge of trends in migration helps in future planning of a place.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF BIRTH

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Migrants born within the state of enumeration	260,948	74,402	186,546	338,417	103,383	235,034
	(66.4)	(55.4)	(72.2)	(64.6)	(53.9)	(70.8)
(i) Migrants born else where in the district of enumeration	156,258	38,270	117,988	211,431	60,512	150,919
	(39.8)	(28.5)	(45.7)	(40.4)	(31.5)	(45.5)
(ii) Migrants born in other districts of the State	104,690	36,132	68,558	126,986	42,871	84,115
	(26.7)	(26.9)	(26.5)	(24.2)	(22.3)	(25.4)

	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)

The above table gives distribution of immigrants by place of birth in Rupnagar district as per 1991 and 2001 Censuses. Out of the total immigrants in 2001, 64.6 per cent are born within the state of enumeration and 32.6 per cent are born in other states/Union Territories of

India while 2.7 per cent are born in other country. The figures for 1991 are 66.4 per cent, 29.1 per cent and 4.0 per cent respectively.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF LAST RESIDENCE

Last residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Last residence within the state of enumeration	261,607	74,464	187,143	342,081	104,867	237,214
	(66.5)	(55.3)	(72.3)	(64.8)	(54.1)	(70.9)
(i) Elsewhere in the district of enumeration	160,928	39,880	121,048	224,561	66,304	158,257

	(0.4)	(0.4)	(0.4)	(0.0)	(0.0)	(0.0)
Total	**393,537**	**134,660**	**258,877**	**528,242**	**193,884**	**334,358**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

The above table gives distribution of immigrants by place of last residence in Rupnagar district. As per 1991 and 2001 Censuses. 64.8 per cent of the immigrants have the place of last residence within the state but out of the place of enumeration. Another 33.7 per cent have place of last residence in other states/UTs within the country, while 1.6 per cent have their last residence out side India. The corresponding figures for 1991 are 66.5 per cent, 30.3 per cent and 2.9 per cent respectively.

Annexure V

Main Religions:

The instructions for recording this information are the same as in 1991. A brief analysis based on 1991 and 2001 Census data is presented below.

Question 7 of the Household Scheduled canvassed at the 2001 census pertained to religion of a person. The religion of the person was recorded as returned by the respondent. The six main religions in the country were recorded by using following codes:

Hindu	:	1
Muslim	:	2
Christian	:	3
Sikh	:	4
Buddhist	:	5
Jain	:	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Religious Composition of Punjab's Population:

The numerical strength of the six main religious communities in the State and Rupnagar district for 2001 Census is as follows :

RELIGIOUS COMPOSITION OF POPULATION, PUNJAB AND RUPNAGAR1991 AND 2001

Religious Communities	Punjab				Rupnagar district			
	Total Population		Percentage in total population		Total Population		Percentage in total population	
	1991	2001	1991	2001	1991	2001	1991	2001
1	2	3	4	5	6	7	8	9
Hindus	6,989,226	8,997,942	34.4	36.9	344,013	452,419	38.2	40.5
Muslims	239,401	382,045	1.2	1.6	11,574	22,600	1.3	2.0
Christians	225,163	292,800	1.1	1.2	1,775	3,434	0.2	0.3
Sikhs	12,767,697	14,592,387	63.0	59.9	539,645	635,651	60.0	57.0
Buddhists	24,930	41,487	0.1	0.2	102	276	0.0	0.0
Jains	20,763	39,276	0.1	0.2	614	1,156	0.1	0.1
Others Religions and persuations	883	8,594	0.0	0.0	9	387	0.0	0.0
Religion not stated/ Unspecified	13,906	4,468	0.1	0.0	1,855	185	0.2	0.0
All Religions	**20,281,969**	**24,358,999**	**100.0**	**100.0**	**899,587**	**1,116,108**	**100.0**	**100.0**

As can be seen from the above statement, Sikhs form the predominant religious community in Punjab and they account for 59.9 per cent of the State's population according to the 2001 Census. The corresponding percentage for 1991 Census was 63.0 per cent. Hindus is the second largest religious community in the State and their share in the total population is 36.9 per cent which was 34.4 per cent as per 1991 Census. This signifies that Sikhs and Hindus, the two most dominant religious communities in the state, together constitute 96.8 per cent of the state's total population. The share of Muslims, Christians, Buddhists and Jains in the total population is 1.6, 1.2, 0.2 and 0.2 per cent respectively.

As per 2001 Census, in Rupnagar district, Sikhs constitute 57.0 per cent of the total population and this is significantly slightly lower than that of the state as a whole. Hindus, the second dominant religious community in the district, accounts for 40.5 per cent of the district's total population. Together, the Sikhs and the Hindus account for 97.5 per cent of the district's population. Muslims constitute 2.0 per cent and Jain 0.1 per cent while the share of Christians is only 0.3 per cent.

Annexure VI

Marital Status :

Current marital status of each individual, irrespective of age, was obtained through Question 5 of the household schedule canvassed at the 2001 census into following four categories:

1. Never married
2. Currently married
3. Widowed
4. Divorced or separated.

The instructions to enumerators for eliciting marital status were same as adopted in 1991 census. A brief analysis based on 1991 and 2001 census is presented here.

The following table exhibits data for Persons, Males and Females in percentage form regarding Marital Status.

MARITAL, STATUS OF POPULATION AS PER, 1991 AND 2001 CENSUS

Marital Status	Punjab						Rupnagar					
	1991			2001			1991			2001		
	P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13
Total Population	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Never Married	51.5	55.4	47.1	48.7	53.1	43.8	50.6	54.7	45.9	48.2	52.6	43.1
Married	45.1	42.3	48.2	47.2	44.6	50.2	45.9	42.8	49.4	47.7	45.0	50.9
Widowed	3.3	2.2	4.6	3.9	2.1	5.8	3.5	2.4	4.7	3.9	2.2	5.9
Divorced or Separated	0.0	0.0	0.0	0.2	0.2	0.2	0.0	0.0	0.0	0.2	0.2	0.2
Un-Specified	0.0	0.0	0.0	0	0	0	0.0	0.0	0.0	0	0	0

Punjab State has a population of 24,358,999 as per 2001 Census comprising 11,871,211 (48.7%), never married, 11,499,566 (47.2%) married, 938,678 (3.9%) widowed and 49,544 (0.2%) divorced or separated. As per 1991 Census Punjab State had a population of 20,281,969 comprising 10,452,444 (51.5%) never married, 9,146,158 (45.1%) married, 673,569 (3.3%) widowed, 8,768 (0.1%) divorced or separated and 1,030 (0.0%) un-specified.

In Rupnagar district, out of the total population of 1,116,108 as per 2001 census; 537,490 (48.2%) are never married, 532,588 (47.7%) are married, 43,869 (3.9%) are widowed, 2,161 (0.2%) are divorced or separated. Thus, the patterns observed for the State and the district are almost identical. Amazingly the percentages of both state and district for widowed and divorced or separated tally with each other.

Annexure VII

Sex and Educational level:

It has become customary for the Indian Census to obtain details of educational levels of the literates in the society. Question 13 of the Household Schedule canvassed at the 2001 census aimed to elicit information on the highest educational level attained. The data so collected is put to public domain by classifying the population by sex and educational levels.

The following table shows percentage distribution of literates by educational level for Punjab State and Rupnagar district as per 1991 as well as 2001 Census.

PERCENTAGE DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL AS PER 1991 AND 2001 CENSUS

Educational Levels	Total Rural Urban	Punjab						Rupnagar					
		1991			2001			1991			2001		
		P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Below Primary	Total	21.8	20.9	23.1	20.0	19.7	20.4	20.5	19.2	22.5	17.7	17.3	18.4
	Rural	24.2	22.9	26.2	22.9	22.3	23.7	22.7	20.8	25.8	20.1	19.2	21.3
	Urban	17.6	17.2	18.2	15.5	15.6	15.4	15.6	15.4	15.8	13.7	13.7	13.6
Primary but below middle	Total	27.9	25.3	31.7	25.6	23.7	28.3	27.5	24.5	32.1	24.8	22.2	28.2
	Rural	31.8	28.4	37.0	29.3	26.6	33.0	31.7	27.8	37.9	29.3	25.9	34.1
	Urban	21.2	19.7	23.3	19.9	19.0	21.1	18.0	16.2	20.4	16.8	15.5	18.4
Middle but below matric	Total	18.1	19.0	16.7	16.9	17.5	16.1	17.5	18.5	16.1	16.8	17.4	16.1
	Rural	18.5	19.8	16.7	17.7	18.5	16.8	19.0	20.3	16.8	18.9	19.7	17.8
	Urban	17.3	17.7	16.8	15.7	16.1	15.1	14.3	14.0	14.7	13.1	13.0	13.3
Matric but below graduate	Total	26.3	28.6	22.8	30.8	32.7	28.4	27.5	30.6	22.7	31.8	34.3	28.5
	Rural	23.0	26.0	18.3	27.5	29.9	24.3	24.0	27.9	17.7	29.0	32.2	24.7
	Urban	32.0	33.5	30.0	36.0	37.1	34.6	35.4	37.3	32.9	36.7	38.2	34.8
Graduate and above	Total	5.9	6.1	5.7	6.6	6.4	6.7	6.9	7.2	6.5	8.8	8.9	8.8
	Rural	2.5	3.0	1.8	2.5	2.8	2.2	2.6	3.2	1.8	2.7	3.0	2.2
	Urban	11.8	11.9	11.8	12.9	12.2	13.7	16.7	17.0	16.2	19.7	19.6	19.9

As per 1991 census 21.8 per cent of the literates in Punjab were below primary level of education, 27.9 per cent were primary but below middle and 18.1 per cent were middle but below matric. A little over one-fourth (26.3%) of the literates in the State were matric but below graduation. It was only 5.9 per cent of the literates who had attained graduation or above level of education.

According to 2001 census 20.0 per cent of the literates in Punjab are below primary level of education, 25.6 per cent are primary but below middle and 16.9 per cent are middle but below matric; 30.8 per cent are matric but below graduation. Only 6.6 per cent of the literates in Punjab are graduate and above. Whereas there is some decline in first 3 levels as compared to 1991, last 2 level exhibit slight improvement.

In Rupnagar district, the incidence of educational level is lower than that of the State in 2001. In the district 17.7 per cent of the literates are below primary and another 24.8 per cent are primary but below middle. The percentage of literates with middle and matric levels of education is lower in Rupnagar district as compared to the State. In the district 16.8 per cent of the literates are middle passed as compared to state with 16.9 per cent. Likewise the percentage of matriculation, with 31.8 in Rupnagar district is higher than that of the State with 30.8 per cent and for graduate and above Rupnagar district (8.8%) outdoes the state (6.6%).

Annexure VIII

Distribution of Different Mother Tongues:

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood is recorded as the mother-tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. These may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Mother Tongue and Language data based on 1991 & 2001 Censuses is given here. The distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each) for the district by sex separately for rural and urban areas. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table is divided into two parts; Part A- Scheduled languages with the mother tongues grouped under each, and Part B-Non-Scheduled languages with the mother tongues grouped under each. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census are, basically, the designations provided by the respondents. These designations or mother tongue label need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects, the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1576 rationalized mother tongues in 1991 for the entire Country, which were further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.

NUMERICALLY BIGGEST LANGUAGE ARRANGED IN DESCENDING ORDER OF THE NUMBER OF SPEAKERS, 2001-1991

Table above shows languages arranged in descending order of number of speakers in Rupnagar district as per 1991 and 2001 censuses. Punjabi is the most dominant language spoken in the State and the district. As per Census 2001, it is spoken by 992,175 persons in Rupnagar district and this forms 88.9 per cent of the districts total population. Hindi, the second most dominant language is spoken by 111,064 (10.0%) persons in the district. Amazingly number of speakers of Punjabi and Hindi shot up in urban but dipped in rural in 2001.
