" TAHSIL
" C.D. BLOCK
HEADQUARTERS: DISTRICT/TAHSIL/C.D.BLOCK
NATIONAL HIGHWAY — NH 1
STATE HIGHWAY — SH 12A
IMPORTANT METALLED ROAD
RAILWAY LINE WITH STATION BROAD GAUGE — RS
VILLAGE HAVING 5000 AND ABOVE POPULATION WITH NAME — SANCHOL
TOWNS WITH POPULATION SIZE AND CLASS II,III,IV AND V
DEGREE COLLEGE AND TECHNICAL INSTITUTION

DISTRICT/TAHSIL HEADQUARTERS ARE ALSO C.D.BLOCK HEADQUARTERS.

DISTRICT FATEHGARH SAHIB
CHANGE IN JURISDICTION
1991–2001

NEWLY CREATED DISTRICT OF FATEHGARH SAHIB HAS BEEN FORMED BY GAINING :-
i) AREA FROM PATIALA DISTRICT
ii) AREA FROM LUDHIANA DISTRICT
iii) AREA FROM RUPNAGAR DISTRICT

Based upon Survey of India map with the permission of the Surveyor General of India. © Government of India Copyright,2005.

Sanghol

Fatehgarh Sahib district has a village called Sanghol (Ucha Pind) which holds a special position on the archaeological atlas of India. It is an ancient site of Harrapan culture situated on top of a mound. Ucha Pind Sanghol is famed for the Sanghol Museum. A large number of relics dating from the late Harrappan civilization (1720 – 1300 B.C.) to 6th century A.D. have been found here. The Chinese pilgrim Hieun Tsang noticed flourishing Buddhist establishment at Sanghol during the 7th Century A.D. The discovery of Sanghol sculptures together with the huge Buddhist establishment has opened up a new dimension in the legacy of Punjab. The archaeological discoveries of Sanghol testify the glory of artistic participation of Punjab in the mainstream of Indian cultural efflorescence and its distractive contributory role. Excavations at Sanghol yielded archaeological treasures of great significance indicating a long history of the cultural heritage of Punjab. A vast treasury of about 15000 antiquities have been collected by the department through various archaeological excavations and explorations at Sanghol. They comprises antiquities of diverse nature like sculptures, terracotta, pottery, seals, coins, ivory, carvings, precious stones and other art objects.

Urban Primary Census Abstract. 308

Annexure I : Number of villages under each Gram Panchayat 320

Annexure II : Fertility and child Mortality, 1991 Census 320

Annexure III : Measures of fertility and mean age at marriage, fertility level 321

Annexure IV : Percentage distribution of in Migrants by place of birth/place of last residence. 322

Annexure V : Brief account of main religions in the district/tahsil as per 1991 Census 324

Annexure VI : Marital status of population 325

Annexure VII : Distribution of Literate by sex and Education Level 326

Annexure VIII : Distribution of different mother tongues. 327

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census , is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics, village-wise and town-wise, of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive Censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added to it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA which was restructured. Nine–fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and

recreational facilities. In town directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristics of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) in all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Inder Jit Singh, IAS, Director of Census Operations, Punjab. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General, (C&T) and Dr. I.C.Aggrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP), helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assitant Director. I am thankful to all of them and others who contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 2007

Preface

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to also include village level data on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B - Primary Census Abstract, giving data for each village within the Community Development (CD) Block and each town in the district. The CD block maps included, presenting village level data, have been prepared by using computer assisted technology. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetters and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Shri D.K. Sikri, IAS, Additional Secretary, Registrar general, India and Census Commissioner and Shri J.K. Banthia, IAS, former Registrar General and Census Commissioner, India for their directions and support from time to time in accomplishing this arduous task.

In the directorate, at the outset we are beholden to Shri Inder Jit Singh, IAS under whose able guidance and direction as Director Census, Punjab, the census operations in the state were successfully completed.

Our thanks are also due to Shri D.R. Khanna, Ex-Deputy Director for getting the compilation of data and Shri Madhav Shyam, Ex-Deputy Director for drafting this specimen model which has been replicated in other DCHBs.

The great effort and hard work done by Shri S.K. Bhandari, Ex-Assistant Director, Shri Bhagirath Singh, Assistant Director, Shri Malkit Singh, Ex- SI Gr. I and Shri Rajinder Prasad, S.I.Gr-I are greatly acknowledged. Sh. Azad Kumar, S.I. Gr-III and Sh. H.S. Sudan, Sr. Compiler deserved special thanks for having completed the publication work.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

District Highlights - 2001 Census

1. Fatehgarh Sahib district has a population of 538,041 comprising 290,137 males and 247,904 females.
2. Fatehgarh Sahib district ranks 17th in area and 17th in population.
3. Fatehgarh Sahib is the most populous and Khamanon is the least populous tahsil.
4. The average population size of a village in the district (875) is lower than that of the state (1,311).
5. Sanghol (5,015) in Khamanon tahsil is the largest village by population size followed by Ajnali (3,965) in Amloh Tahsil.
6. 1 village in the district is large sized with a population of 5,000 or more.
7. The decadal population growth rate in the district (18.3%) is lower than that of the state average (20.1%).
8. Fatehgarh Sahib district is less urbanized (28.1%) then the state (33.9%).
9. The sex ratio in the district (854) is lower than the state (876). It ranks 16th among the districts in the state.
10. The child sex ratio in the district (766) is lower than the state (798). It ranks 17th among the districts in the state.
11. Literacy rate of Fatehgarh Sahib is 73.6 per cent as compared to state (69.7%).

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Ever since the beginning of first post independence Census of India 1951, the publication of District Census Handbooks (DCHBs) has become a regular feature of the Indian Census. It is prepared by the Census Organisation of Government of India on behalf of the State Government, the DCHB is a unique publication which gives the census as well as non-census data down to every village in case of rural areas and ward within the town/urban area in the state. It is recognized as one of the most comprehensive sources of information. Infact, this is the only publication which provides primary census abstract based on census, and non-census data on infra-structure and amenities available, such as educational, medical, postal, communicational at the sub-micro level. It is inter-alia used for delimitation of constituencies, formulation of local level and regional plans and serves as a valuable tool for district administration.

Undisputedly, DCHB has remained to be the most comprehensive and valuable product of the census organization ever since its initiation. It has always been the endeavour of the Census of India to enlarge the content and coverage of the data presented at every census. The DCHB series of 1951 Census contained important Census Tables and the Primary Census Abstract. At the 1961 Census, the scope of the DCHB was enlarged by including a descriptive account of the district, administrative statistics, census tables and the village and town directory. In 1971, the DCHBs were planned in three parts; Part-A included the village and town directory, Part-B included village and town wise primary census abstract, while the Part-C was meant to include analysis of census data and a write up covering social, cultural, historical and other important aspects. However, in some states/union territories Part-C remained confined to the district tables only.

During 1981 Census, some new features were added and the formats of village and town directory were restructured, somewhat. These volumes were published for each district in two parts. Part-A included village and town directory, while Part-B included primary census abstract (PCA) of every village and ward in town/urban area. The inclusion of scheduled castes PCA was the additional feature of the 1981 Census. The village directory of 1981 Census included new parameters viz; information on Adult literacy Centres, Primary Health Sub-centers and Community Health workers in the village (s) to meet the requirement of the Revised Minimum Needs Programme. In addition, information on approach to the village was also provided for the first time in the village directory to help in taking stock of villages requiring road linkages in the district. Likewise, Statement IV-A included in the Town Directory aimed to provide data on slums so as to undertake development activities in such areas.

The manner of presentation of the DCHBs for the 1991 Census was, by and large, same as followed in 1981 Census. However, the format of PCA was slightly restructured in the 1991 Census for the benefit of data users. The village level data were presented Community Development (C.D.) block wise to cater to the needs of grass root level planning as envisaged under the five year plans. Ninefold industrial classification of the main workers was reintroduced by replacing the four-fold industrial categories adopted at the 1981 Census. In addition, the PCA also gave population in the 0-6 age group by sex essential for working out effective literacy rate, besides providing proportion of child population.

The DCHB 2001, the present volume, is the sixth in series. The pattern followed is, by and large, similar to that of the 1991 Census. Among the new features added, information on the availability of newspapers/magazines, banking facility, agricultural and non- agricultural societies, recreational and culturalfacilities, income and expenditure of the village panchayats find mention. More important is that, it is for the first time in the history of Indian Census that a Permanent Location Code Number (PLCN) has been allotted to every village in the state to meet the demand from different organizations to study the village level data over a time spell. It is believed that the permanent location codes assigned to each village would help in tracing the precise location of a village on account of jurisdictional changes in the boundaries of various administrative areas.

(ii) Brief history of the district

Sirhind is one of the oldest historical places of the Punjab. It is believed that Sirhind existed as a town in the beginning of the Christian era and was a settlement of Sairindhas. In all probability, the place seems to have got its name 'Saihrind' from the Aryan settlement of the Sairindhas. The stones found during excavations near the precincts of the Gurudwara Fatehgarh Sahib are believed to be belonging to the Hindu temple of the Gupta period. The antiquity of Sirhind is also affirmed by Huen Tsang, the Chinese pilgrim who visited India during the earlier period of seventh century. Although, there may have been some kind of dispute over the origin and antiquity of Sirhind, two factors seem to have been responsible for the birth and growth of this town at a very early stage of the history of this region. One was its distance from the arid and dry areas of the southern Punjab because it was situated at the periphery of one of the three major ground basins in India, which stretches from Ludhiana to Lahore. Secondly, it lay at the important trade route which served the Indo-Gangetic plain passing through Peshawar, Lahore, Jalandhar and Sirhind.

Sirhind during the Sultanate period

At the time of Heun Tsang's visit to India, Satadru constituted an independent state with Sirhind as its capital subsequently it became part and parcel of Trigut kingdom with Jalandhar as its capital. In the beginning of the ninth century, Jaichandra was ruling over this kingdom. After about a century, Shankarvarman, the king of Kashmir defeated Prithvi Chandra of Jalandhar and his kingdom, including Sirhind, was annexed to the kingdom of Kashmir. After the death of Shankarvarman, the Hindushahi Raja Jaipal was successful in building up a vast empire extending from Sirhind to Lamghan and Sirhind came under the rule of the Hindusshahi dynasty. In the meantime the Turks of Ghazna set up a sovereign independent state. During the struggle between Turks of Ghazna and Hindushahi Raja, which lasted for several decades, Sirhind figured more than once, being an important post on eastern frontier of the Hindushahi empire. After the loss of Nandna, the capital of Hindushahi empire to Mahmud of Ghazna, Sirhind was made the headquarters of Hindushahi empire. With the death of Trilochanpal in 1021, the Hindushahi of Sirhind passed into oblivion and the Punjab was annexed to the Ghaznavid empire. It appears that the Ghaznavid rule, perhaps,did not extend beyond the river Satluj.

The Chauhans first ruled in Ajmer. It appears that by 1164 A.D., Chauhans had occupied Delhi as well as the entire tract lying in between Delhi and Satluj of Sirhind continued to retain its special significance as a strategic post even during the Rajput kingdom. In 1192, Rajput chief was defeated and killed by the forces of Shihabudin and the entire territory of Delhi along with Sirhind came under the control of Turks. Sirhind then ceased to be a frontier defence post, the position it had occupied ever since the beginning of the eleventh century. However, Sirhind continued to retain much of its reputation as a political and administrative unit due to its location on the main route linking the north-west with the Yamuna-Ganga doab and Delhi. Indeed, Sirhind was one of the most important Muslim possessions west of Delhi and was always kept in the hands of trusted and efficient Naibs and Maliks. During this period, Sirhind was listed among the important defence posts of the area with troops and fortifications. The Khilji Sultans succeeded the mamluks. Under the Khiljis, Sirhind was attached to the viceroyalty of Samana. It remained so till the Firozshah Tughlaq conferred upon it an independent status.

Under the Tughlaq Sultans, Sirhind gained a far more prominent position in the political and administrative affairs of the Sultanate. It continued to increase its wealth and importance until the time of Akbar.. Firozshah is rightly famous for the canals dug out by him, and one such canal passed through Sirhind. Firozshah Tughlaq liked Sirhind and raised its status significantly.

The invasion of Timur in 1399 gave a shock to the Tughlak administration, which had already fallen on account of sharp dissensions among the descendants of Firozshah. . Subsequently, the governorship of Sirhind remained under the control of Afgan Governors and it emerged as a great center of Afgan power. Sirhind assumed special significance in view of its being the strongest Afgan fortification between Delhi and Lahore.

Well aware of the significance of Sirhind as a strategic place, in 1525 Babur marched against Ibrahim Lodhi via Sirhind. During the Mughal period which was ushered in with the victory of Babur over Ibrahim Lodhi at the battle of Panipat in 1526, Sirhind rose to its pinnacle of glory and became the second largest city of Punjab.

At the advent of the Mughals in India, Sirhind was one of the important places of great military and strategic importance. After the defeat of Ibrahim Lodhi, Sirhind assumed an altogether different importance for the Mugal Empire. Besides its strategic importance, Sirhind was the most fertile region in the Punjab that had fallen into the hands of Mughal Emperor, Babur. On Humayun's accession to the throne in 1530, some shift in the political scene was noticeable. Keeping in view the historical importance of Sirhind, Humayun tried to come to some sort of political settlement with Sher Khan by proposing that the Indian Empire be divided between the Afghans and the Mughals. Sher Khan however, was quite shrewd and knew that Delhi could be considered safe if the hinterland of Sirhind remained was securely with him.

The battle of Sirhind on June 22, 1555 altered the political situation of Sirhind. The Afghans were beaten disastrously. The victory entailed not merely the conquest of the entire Punjab, but also the dispersal of one force which might have barred the way to Delhi.

The Mughal Empire under Hamayun fell when he fell from the staircase of the library in Purana Qila at Delhi. Thereafter, Akbar took throne at Kalanaur in Punjab. Under Akbar, Sirhind continued to play an important role in the social, political and cultural history of the people. He was deeply fascinated by the matchless beauty of its gardens and buildings. It is said that Sirhind at that time possessed building which had no parallel in the whole of India. And it enjoyed great commercial importance. Under the regime of Akbar, the prosperity of Sirhind continued to rise further. It had become a great center for trade and Chinese goods also poured in large quantities for commercial purposes. Infact, Akbar made it a mint town for minting copper coins. By the time of Shahjahan, perfect peace had descended on the land of Punjab, the land of five rivers, and Sirhind had ceased to serve as a base for stemming tide of invasions from the north-west as no such invasions threatened the security of this region. The prosperity and popularity of Sirhind can be measured from the ruins of the old city. But Aurangjeb's dastardly attack on Guru Tegh Bahadur, the ninth Sikh Guru, exposed the policy of religious persecution which he had set before himself in the conduct of his official duties. Wazir Khan's treacherous conduct put a seal on that policy when in 1704 he martyred two innocent grandsons of the Great Martyr. This single incident raised the ire of the persecuted people of Punjab, and then Sirhind, where the blood of Martyrs was shed, suffered along with the Mughal tyrants a fate which has few parallels in human history.

(iii) Administrative set-up

The State has experienced large scale jurisdictional changes after the 1991 census. The number of districts has increased from 12 to 17 in 2001. The newly created districts include; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. With the exception of Kapurthala district all other 11 districts in the State have experienced inter-district jurisdictional changes of varying magnitude.

These 17 districts are distributed over four divisions. Jalandhar division includes districts of Gurdaspur, Amritsar, Kapurthala, Jalandhar, Hoshiarpur and Nawanshahr; Patiala division covers districts of Rupnagar, Ludhiana, Patiala, Sangrur and Fatehgarh Sahib; Firozpur division spreads over districts of Firozpur, Moga and Muktsar, while Faridkot division embraces districts of Faridkot, Bathinda and Mansa.

All the districts of 1991 Census except Kapurthala have undergone intra-district jurisdictional changes resulting in increase in the number of tahsil in the state from 46 in 1991 to 72 in 2001 Census. (In Punjab tahsil and sub division are co-terminous). Fatehgarh Sahib was created on 13th April, 1992 and is one of the five newly added districts in Punjab at the 2001. Fatehgarh Sahib district has four tahsils which among themselves are comprised of 444 villages (including 2 uninhabited) and five towns and all of them have statutory status.

The statutory towns are notified by the State government. Under Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or

transactional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the state government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specify by notification in the official gazette any area to be transitional area or a smaller urban area for the purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the state government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the Ist Class, IInd Class or IIIrd Class.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows :

Sl. No.	Class of Urban Local Bodies	Population	Income
1	Municipal Corporation	3 lac or above	2 Crore or above
2	Municipal Council Class I	50,000 to 3 lac.	50 lac to 2 Crore
3	Municipal Council Class II	10,000 to 50,000	15 lac to 50lac
4	Municipal Council Class III	Up to 10,000	Up to 15 lac
5	Nagar Panchayat	5,000 or above	More than Rs.150 per head

The following statement indicates the jurisdictional changes which took place after the 1991 Census in Fatehgarh Sahib district.

Jurisdictional Changes during 1991-2001

Name of District/ Tahsil	No. of villages as per		No. of Towns as per		Changes since 1991 & Govt. Notification No.
	1991	2001	1991	2001	
1	2	3	4	5	6
Fatehgarh Sahib	-	444	-	5	
Bassi Pathana	-	100	-	1	1. 2/3/92-RE-II(1)/4402 dated 09.04.1992.
					2. 2/3/92-RE-II(1)/4412 dated 09.04.1992.
Fatehgarh Sahib	-	169	-	1	3. 2/3/92-RE-II(1)/4461 dated 09.04.1992.
					4. 2/33/92-RE-II(1)/10316 dated 13.08.1992
Amloh	-	102	-	2	5. 2/3/92-RE-II(1)/4412 dated 9.04.1992
					6. 2/44/94-RE-II(1)/6769 dated 20.07.1995
Khamanon	-	73	-	1	7. 2/58/92-RE-II(1)/6269 dated 29.06.1993
					8. 2/3/92-RE-II(1)/4644 dated 09.04.1992
					9. 2/3/92-R-II/(1)/4644 dated 09.04.1992
					10. 2/44/94-RE-II-(1)/6770 dated 20.07.1995
					11. 2/74/92-RE-II(1)/3702 dated 05.05.1995
					12. 2/11/95-RE-II(1)/6315 dated 03.07.1996
					13. 2/3/92-RE-II(1)/4727 dated 09.04.1992
					14. 2/57/95-RE-II(1)/2164 dated 04.03.1996

For the administrative purposes, the district forms part of Patiala division. The district is the basic unit of administration. For the purposes of general and revenue set up the district is divided into four tahsils viz, Bassi Pathana, Fatehgarh Sahib, Amloh and Khamanon. All of them have sub divisional status. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district and revenue administration in the district.

(iv) Physical Features

Origin of Name :

Fatehgarh Sahib District was constituted on 13 April, 1992 by carving out portions of Patiala, Ludhiana and Rupnagar districts. The district derived its name from its headquarters' place, Fatehgarh Sahib, named after the name historic Gurdwara Fatehgarh Sahib. This Gurudwara is said to have derived its name from Sahibzada Fateh Singh, the youngest of the two martyred sons of Guru Gobind Singh, who were bricked alive at this place (a fort at that time) in 1704 by Wazir Khan, the then Fauzdar (Army Commander) of Sirhind. According to another version, the name is also on the account of Fateh (means victory) of garh (means fort) of Sirhind by Sikhs under the command of *Banda Bairagi, so called as Fatehgarh by depicting the victory of fort.*

Location and Size:

Fatehgarh Sahib District falls in the Patiala Division. It lies between 30^0 27' and 30^0 46' north latitude and 76^0 04' and 76^0 38' east longitude. It is located in south-eastern part of the State and is surrounded by Patiala, Rupnagar, Ludhiana and Sangrur Dsitrict.

Fatehgarh Sahib, the headquarters of the district administration, lies on the Sirhind-Nangal railway line and the Delhi-Ludhiana railway line is also passing through the Sirhind town part and parcel of the place. All the municipal towns except Amloh and Khamanon have railway stations. It is directly linked by road with Chandigarh (51km), Ludhiana (67 km approximately), Patiala (35 km) and Rupnagar (47 km).

According to the 2001 Census, the population of the district was 5,38,041 persons (3,86,950 Rural and 1,51,091 urban) comprising 2,90,137 males and 2,47,904 females. In terms of population the district ranked 17th in the State having only 2.21 per cent population of the State as a whole.

Area :

Fatehgarh Sahib District has an area of 1180.0 sq. kms as supplied by the Surveyor General of India. Out of this area, 1102.3 sq. km. is rural whereas the remaining 77.7 sq. km. is urban. The rural area of the district is derived by subtracting urban area of the district from the total district area, as supplied by the Surveyor General of India. The tahsilwise area, as supplied by the Director, Land Records, Punjab is as follows: 1) Fatehgarh Sahib tahsil 484.1 sq. km ; 2) Bassi Pathana tahsil 206.6 sq. km., 3) Amloh 261.2 ; and 4) Khamanon tahsil 195.9 sq. km. The tahsil areas when totaled up works out to 1147.8 sq. km., which does not tally with the area supplied by the Surveyor General of India.

Climate :

There is no meteorological observation in the district of Fatehgarh Sahib. The description given is based on the records of the observatories in the neighboring districts where similar climate conditions prevail. The climate of Fatehgarh Sahib district is typical of Punjab plains i.e. quite hot in summer and sufficiently cold in winter. The temperature starts rising in March and continues rising till end of June. Hot winds blow during summer, occasionally accompanied by dust storms. The temperature may touch 45°C or more on some days. Generally pre-monsoon showers are experienced in the middle or end of June which may bring down temperature considerably. Rains set in by the first week of July which may continue upto the middle of September. During the rainy season temperatures are considerably lower during the rainy days but it becomes very hot and sultry when it is not raining. From early October, the weather becomes very pleasant as the winter season sets in. November and December are pleasant but nights are cold. There is considerable difference between day and night temperatures during this period. Severe cold is experienced during months of January and February when temperature may touch the freezing point, one or two degree below the freezing point of water. The winter rains are also experienced during these months but these are only shade of rains experienced during July to September. The winter rains are caused due to western disturbances in the Persian Gulf. Mild frost may be experienced during mid-December to mid-January. Some time hail

storms are experienced in winter months which may cause extensive damage to the standing crops. The following table gives monthly rainfall based on average of 5 years, 1996-90, for the district.

Monthly Rainfall: Average of 5 years 1996-2000

Month	Rainfall (mm)	Month	Rainfall (mm)
1	2	3	4
1. January	23.2	7. July	153.4
2. February	27.9	8. August	119.0
3. March	10.3	9. September	78.7
4. April	10.6	10. October	22.8
5. May	20.5	11. November	3.9
6. June	74.2	12. December	15.3
Total			**562.8**

(Source: Statistical Abstract of Punjab, 2001)

Physiography :

This district is sub-divided into following two sub-micro regions on the basis of soils, topography, climate and natural vegetation: (i) Patiala Plain and (ii) Ghaggar Flood Plain. Each of these regions is described briefly as follows:

Sirhind choe :

It is also known as Sunamwala Choe or Mansurpur Choe. It originates in near Sirhind town and flows through areas of Fatehgarh Sahib tahsil and enters in Sangrur district. The choe probably flow northwestern part of the district along the alignment of the Sirhind canal.

Patiali Rao :(Patialewali Nadi)

It is called Patiali Rao Choe and runs through south-eastern part of the district. It rises near Shiwalik Hills. After carrying waters of several other torrents flows through Kharar tahsil of SAS Nagar (Mohali) district and part of Patiala district from south-east, touches Patiala city and moves south – west part of the district to join Ghaggar river after flowing some distance.

Jhambowali Choe :

South of Sirhind Choe runs the Jhambowali Choe. It arises near Chanarthal and flows through Bhawanigarh and Karamgarh areas before joining the Ghaggar near Moonak. Its bed is shallow and ill-defined which causes over flowing during rainy season.

Canal :

The Bhakra Canal crosses the district and is the main source of irrigation. It flows in south-east and north-east. Canal irrigation is a most important form of irrigation in the district. The district receives water from Bhakhra Main Line Canal. The length of Bhakhra Canal in the district is 37.68 Km.

Soil:

In Fatehgarh Sahib District rainfall is around 800mm . The mean annual temperature 24^0 C while the mean annual soil temperature is 25^0 C. According to water balance the soil moisture regime is ustic and the soil temperature regime is Hyper thermic. Soils of the district are alluvial in nature associated with some recent and old flood plain soils. They are very deep, well to moderately well drained with texture varying from sandy loam to silty clay loam. The major soils are sandy over coarse-loamy and fine loamy Typic, Udic and Fluventic ustochrepts, fine, vertic Ustochrepts fine–silty and fine loamy, Typic Haplustalfs and coarse loamy (highly stratified), Typic Ustifluvents.

Major characteristics of the District

Forestry :

The Divisional Forest Officer with its headquarters at Fatehgarh Sahib looks after forestry in the district. This division has been divided into two ranges, i.e. Sirhind and Khamanon. As on 31 March 2001, the Divisional Forest Officer, Fatehgarh Sahib was assisted by 2 Range Officers, 5 Block Officers, 20 Forest Guards, 1 Senior Assistant, 1 Junior Assistant/Clerk, besides Class III and Class IV staff. At the State level, he is under the administrative control of the Chief Conservator of Forests, Punjab, Chandigarh.

Natural Economic Resources

Minerals and Mining :

Kankar, popularly known as Rore, occurs mainly as nodules. The soil zones containing nodular variety of Kankar range in thickness from 50 centimetre to a metre.

Land and Land use:

During the year 2000-01, out of geographical area of 117 thousand hectares, the area of the district as per village papers is 115 thousand hectares. The two sets of areas show difference due to different methods adopted for measurement by two separate agencies viz., Surveyor General of India (for geographical area) and Director Land Records, Punjab (for area according to village paper) The description given hereinafter is only of area according to village papers. It may be noted that out of a total area of 117 thousand hectares as per village papers, 1 thousand hectares is under forest, 11 thousand hectares is put to non-agricultural use and less then 500 hectares is under Culturable Waste. There are 103 thousand hectares. 'Net Area Sown' in the district during 2000-01, which is 90 per cent to total area 91 thousand hectares, is sown more than once. Thus the total cropped area works out to 194 thousand hectares in the district during 2000-01.

Agriculture :

There are two principal crop seasons Kharif (sawni) and Rabi (hari) in the district. Both the seasons are equally important but area wise Rabi is more important of the two as reported 90 thousand hectares-against 88 thousand hectares of area has been reported for Kharif crops in the year 2000-01. Out of 194 thousand hectares cultivated area, the area under food and non-food crops is 178 thousand hectares and 16 thousand hectares, respectively. In terms of percentages the area under food crops is 91.8 per cent against 8.2 per cent under non-food crops. The major and minor crops during Kharif season are; Paddy, Maize, Groundnut, Sugarcane, Cotton, Pulses, Chillies, etc; whereas Wheat, Gram, Barley, Potatoes, Oilseeds are the major and minor crops of the Rabi season. Among the food crops important ones are; Wheat, Rice and Maize, which account for 171 thousand hectares.

Fatehgarh Sahib district is mainly an agricultural district as 71.9 per cent of its population is reported to be residing in the rural areas during 2001 Census. Further agriculture alone engaged 33.9 per cent of workers during 2001 Census (cultivators 22.1 per cent, agricultural labourers 11.8 per cent). Thus it would be seen that agriculture provides the single largest source of employment in the district though decline is noticeable. During the last few decades the main crop of the district are rice, wheat and maize.

During 2000-2001, 84,000 hectares of area was under rice cultivation in the district and 1,000 hectares under Maize. This signifies that rice (paddy) is the most dominant Kharif crop grown in the district. During 2000-2001 the district produced 350 metric tonnes of rice at an average yield of 4,162 kg per hectare and 3 metric tonnes of Maize at an average yield of 3,438 kg. per hectare.

Among the Rabi crops, wheat is the most dominant. During 2000-2001, 86 hectares of agricultural land was under wheat cultivation. The district produced 434 metric tonnes of wheat during 2000-2001. The average yield of wheat per hectare in the district was 5,041 kgs.

The vegetables are also grown in the district. An area of 1,691 hectare was reported under vegetables during 2000-01. The break up of area is as follows. Potatoes 633 hectares, Onions 38 hectares, winter vegetables 554 hectares and summer vegetables 466 hectares. The demand for vegetables is picking up in the district as the urban centers have grown over the years. The establishment of various colonies etc. under various central and state projects increased the demand for vegetables.

Besides compost (both in urban and rural), cattle dung and green manures, chemical fertilizers are increasingly being used in this district. During 2000-01, 31,000 tonnes of chemical fertilizers mainly nitrogenous 24,000 tonnes, Phosphetic and 7,000 tonnes were consumed in the district for growing improved varieties of wheat, paddy, sugarcane, cotton, etc. The farmers are, however, becoming conscious of the delirious effects of reckless use of chemical fertilizers in their farms. The farming scientists are required to provide them with some alternative nutritive soil agents so that crop yields do not suffer.

Horticulture:

Prior to May 1979, Horticulture Department was functioning under the control of the Chief Agricultural Officer at the district level. To diversify the agriculture a separate department of Horticulture was created in the State on 2 May 1979. In Fatehgarh Sahib District, office of the Assistant Director, Horticulture was established on 25 May 1992.

The main functions of the Horticulture Department are to advise the farmers regarding the planning and planting of orchards and to advise them regarding lay out, spraying, manuring of the orchards, etc. The Horticulture Department organizes seminars, shows regarding the horticulture activities in the district, distributes subsidy to the farmers received from the Government and also arranges visits to different districts and inter State tours to popularise horticulture activities among the farmers.

There were two Government Gardens and Nurseries in the district during 2000-2001. The brief details of these centres are given below:

Government Garden and Nursery, Bassi Pathana.- The area of this Garden and Nursery is around 25 acre. The plants of pear, peach, guava, ber, ect. are propagated here.

Aam Khaas Bagh, Sirhind.- This is around 24 acre unit situated on Sirhind-Fatehgarh Sahib road. The main fruits propagated here are ber, mango, peach etc.

Irrigation:

The major sources of irrigation are tube wells and pumping sets, canals and wells. Three canal systems which operate in the district are; The Sirhind Canal system and Bhakra Main Line system The other two canal system are perennial and take off from Roper headworks (Sirhind Canal) and Nangal Dam (Bharkra Main Line Canal), respectively . The Satluj Yamuna Link Canal (SYL) was taken up sometime back but the project could not make any headway due to certain constraints.

The canals irrigation was introduced in the district in 1954 when the construction of Bist Doab canal, which takes off from the Rupnagarr Headwork's on the right bank of river Satluj, was completed. Since the sub-soil water is suitable for irrigation and water table is not low, the well irrigation is preferred. Earlier irrigation was practiced through Persian wheels, charsas and Dhingli but now diesel/electricity operated tubewells and pumping sets are used in irrigation.

However, during the year 2000-01 the net irrigated area reported was 102,600 hectares, out of which 1,400 hectares from government canals and 101,200 hectares from tubewells and wells. Thus percentage of net area irrigated to net area sown worked out of 99.6 per cent for this district during 2000-01. Also during 2000-01 out of 194,000 hectares gross cropped area, 192,900 hectares was gross irrigated area. During 2000-01 the percentage of gross irrigated area to gross cropped area worked out to 99.4 per cent for Rupnagar.

Animal Husbandry:

Live stock, the back bone of the peasantry and the farmer, has traditionally been depending upon draught animals for ploughing and milch cattle, mainly cows and buffaloes for milk and other dairy products for domestic use and for supplementing their farm income. The ever increasing demand for milk and the opening of modern dairies in the district have created quality consciousness among the farmers, who prefer cross-breed cows of exotic breeds like Jersey, Holstein, and Dane etc.

The data on livestock in Punjab is available for the year 1997. It reveals that there are 76,900 cows, 175,600 buffaloes, 300 horses and ponies, less than 50 donkeys, 300 Mules, 4,800 sheep, 4,500 goats, and 1,800 pigs, (total 264,200 animals). Cows and Buffaloes, as else where, are the two most dominant milch animals in the district. The district can boast of a fairly rich cattle wealth. The decline in the number of cattle is attributable to the mechanization of agriculture and transportation, which make lesser demand of draught cattle. However, due to the ever increasing demand of milk in the urban centers, the demand of milch buffaloes, which are mainly of good breads (murrah and nili) has also shot up.

The government too is aware of its responsibility for the development of animal husbandry. It maintained 47 veterinary hospitals, 42 veterinary dispensaries, 1 poultry service centers in the district in 2000-01, where treatment of sick animals, the control and prevention of contagious diseases among animals, the castration of useless male stock for the improvement of breeds, the supply of bulls of improved breeds is carried out. The above veterinary hospitals/dispensaries were manned by 36 veterinary officers and 65 veterinary pharmacists under the overall control of an Assistant Director stationed at the district headquarters.

The poultry had recorded 516,200 birds (351,000 Hens and 165,200 Chickens) in 1997. The poultry farming is now being practiced on scientific lines, which is evident from the large number of poultry farms located in the district. This has been made to understand due to acceptability of egg as a vegetarian food.

A milk plant with a capacity to process 300,000 liters of milk and milk product was working in the district in the year 2000-01. It has enable the farmers to make handsome income by selling milk to various milk collection centres in the district.

Tenancy:

The farmers generally cultivate their land themselves or through servants. This system is known as Khudkasht (self cultivation). In some cases the land is leased out to other marginal farmers or landless-farmers for cultivation on Batai (share cropping) or Theka (contract). The general rate of Batai is half, depending upon the provision of irrigation, fertilizers, etc. However, the rate of Theka (contract) varies from time to time depending upon the quality of land and period of contract. As large number of farmers prefer to offer service for various agriculture operations against cash payments. This is gaining popularity in the rural areas.

Fisheries:

Pisciculture has been taken up in a big way in the district. An area of 362 hectares was stocked with fish wherein 529,000 thousand fingerlings were raised. An income of Rs. 135,000 accrued to the fisheries department in the district during 2001. One Fish Seed Farm and One Fish Seed Nursery was located in the district. In these 16.85 lakhs seeds were produced for distribution among the fish farmers of the district.

Industry:

The rulers of erstwhile Nabha state realizing the importance of industries set up an industrial area at Gobindgarh as far back as 1902. Later this area was declared a free trade-zone in 1928. The first steel re-rolling mill was set up at Gobindgarh in 1940. Gobindgarh is the most flourishing industrial town in Fatehgarh Sahib District and is known as 'Steel Town' because of the blessings of Guru

Hargobind, (the sixth Guru of Sikhs) who stayed here for sometime. The town itself derives its name from Guru Hargobind.

However, since after the migration of Muslims and coming over of Hindus and Sikhs on partition of the sub-continent in 1947 the industrial scenario has undergone a sea change. The district has made rapid progress in the field of industries and has come to occupy and important place in the State. Though number of industrial units have come up all over the district but Gobindgarh industrial centres have gained quite an importance/prominence in the district.

The following are some large scale industrial units located in the district:

Steel Re-rolling

In 1940 a beginning was made in steel re-rolling industry at Gobindgarh. Initially the old wheels, axels and rail lines were procured in auction and were processed into girders, angles, billets, etc. The industry has made tremendous progress and at present more than 200 steel re-rolling units are engaged in meeting the requirement of the industry and building material (iron and steel) in the district, state and many other adjoining states in the country. Thus, Gobindgarh has rightly earned the reputation of '**Steel City** of Punjab'.

Beside there are large number large scale industrial units located in the district which is listed below:-

Aar Kay Industry, G.T Road, Mandi Gobindgarh, Inox Air Products Limited, G.T Road, Mandi Gobindgarh, Datt Steels Limited, Mandi Gobindgarh, M.R. Alloys Pvt. Limited Mandi Gobindgarh. Kandhari Beverages Limited, Fatehgarh Sahib, Nahar Sugar and Allied Industries limited, Amloh, Surendra Steel Rolling Mills, Mandi Gobindgarh, Lakshmi Overseas Industries Ltd, Khamanon, Modern Steels Limited, Mandi Gobindgarh, Northern India Steel Rolling Mills Mandi Gobindgarh, Deepak Gases Pvt. Ltd, Mandi Gobindgarh, A.R Alloys, Mandi Gobindgarh, Sunrise Vanaspati and Allied Industries Pvt. Ltd Village Shahpur (Tahsil Amloh),

Besides, there are a large number of medium and small scale industrial units located in the district which is listed below:-

(ii) Medium scale industries

Food Products, Cotton Textile, Hosiery, Wooden Industry, Paper and Printing, Leather Products, Rubber and Plastic Products, Chemical Products, Non-Metallic Industries, Basic Metal Products, Metal Products, Machinery and Parts, Electrical Machinery and Parts, Transport Equipment and Parts,

(iii) Cottage Industries

Among cottage industry mention may be made of weaving of cotton cloth (susi, durries) gota and zari, azarbands (trouser strings) daryai (silk cloth) raw sugar (gur and shakkar) and khand, country carts, desi jutties, blacksmithy, gold and silver ornaments, agricultural implements and local furniture, pottery, etc.. Amloh nizamat was very famous for ghabrun and susi. All these manufactures were to meet the simple requirement of local areas. In addition to above some cottage industries are working in the district are as under.

Leather Products, Processing of Cereals and Pulses Industry, Village Oil Industry, Match Industry, Non-Edible Oil and Soap, Bee Keeping, Pottery, Fibre, Carpentry and Black Smithy, Lime, Bamboo and Cane Industries, Fruit Processing Industries, Electronics, Hand Paper and Polymer.

Transport and Communications:

An efficient network of roads and railways, posts, telegraph, telephone etc. is an essential requirement for development of any area as it is the backbone of any developmental activity. This also applies to Fatehgarh Sahib. The district is well served in both roads and railways. Though it is well connected by roads and railways with stations inside and outside the district.

Fatehgarh Sahib district falls under the jurisdiction of Ambala Division of Northern Railway. It has good network of railways, two railway lines pass through it. The railway lines are: (1) Delhi-Amritsar line, (2) Sirhind-Una line. The Delhi-Amritsar line passes through Rajpura and Fatehgarh Sahib tahsil. The Sirhind-Una line serves the northern part of Fatehgarh Sahib district. All the two rail lines running through this district are broad gauge. The following railway stations are located in the district :- (1) Sirhind, (2) Bassi Pathana, (3) Gobindgarh.

The district has a road length of 46 kms. under National highways and 1,364 kms. under State highways. Further, as per the data available from P.W.D. (B&R) department for the year 2000-01, the Punjab state has a road length of 54,836 kms. giving an overall average of 109 kms. per 100 sq. kms. of area. This, by all means, exhibits a fairly well developed system of roads in the State. Fatehgarh Sahib district has a road length of 135 kms. per 100 sq. kms. of area which, though some what higher than that of the State as a whole, is quite satisfying in itself. Further more, all the villages in the district are connected by road.

The district is well served by the Public Road Transport system. The district being part of erstwhile Pepsu State, the bus routes are mainly with the Punjab Roadways and Pepsu Road Transport Corporation (PRTC), The other depots of PRTC and Punjab Roadways also operate buses on various routes in the district. There are a number of private operators also, who provide transport services in several areas and among them are Ambala -Syndicate bus service, New Fatehgarh –Sirhind Private Ltd. and Libra Bus service etc.

The important roads in the district are :(1) Fatehgarh Sahib- Chandigarh road, (2) Fatehgarh Sahib - Ludhiana road, (3) Fatehgarh Sahib -Morinda road :(4) Fatehgarh Sahib- Patiala road etc.

Electricity:

The erstwhile rulers were well aware of the technological changes taking place in the world. They, therefore, were the first to introduce electricity in their areas in the beginning of the present century. The state government Public Works Department replaced the private suppliers of electricity. However, after some time the responsibilities of supplying electricity were bestowed on the Punjab State Electricity Board, Patiala.

During 2000-2001 Fatehgarh Sahib district consumed 1292.0 million units of electricity, The break up of electricity consumed during 2000-2001 is as follows: Domestic 105.3 (8.1%) million units, Commercial 16.9(1.3%) million units, Industrial 998.6(77.3%) million units, Agricultural 167.4(13.0%) million units and others 3.8(0.3%) million units.

Fatehgarh Sahib district receives 6.7 per cent of the total power produced in the state for its utilization in various public interest purposes. In Fatehgarh Sahib district 95.3 per cent of the households are using electricity and this percentage is higher than that of the State (86.7%).

Trade and Commerce:

The district is surplus in agricultural produce and has good markets at Sirhind, Bassi Pathana and Gobindgarh, where the surplus commodities are brought for sale. Iron and steel products, rolling stocks, diesel engine, cycle/cycle parts, spare parts of sewing machines, enamelled copper, agricultural implements, piston rings, PVC cables, electric wires, staple yarn, groundnut oil, seeds, foodgrains (wheat, rice and maize), pulses, chillies, *desi* ghee, biscuits are most important commodities exported from the district.

Education:

In ancient days, the state of education in Punjab and its Princely States was very much same as in the rest of the country, so far as the indigenous system of education was concerned. Private or indigenous schools were found in every part of the area. Under the indigenous system, pathshalas, chathshalas, dharmshalas and makta bas were run. In the pathshalas, religious education relating to Hindu religion was imparted to the boys of Brahamin community. In the chathshalas or Mahajani

reading schools, land and accounts were taught to the boys of the trading community. In Gurmukhi schools, Gurmukhi or Punjabi was taught by the Bhai or priest of the gurdwara to the children of the Sikh community and these schools were generally located in dharamshalas\gurdwaras. The maktabas were the vernacular, Persian or Arabic schools for the Muslim boys. These were of two kinds the one where only the Quran was taught, the others where Arabic was taught. Female education was looked upon with disfavour. Girls used to learn kashidas and other needle work, i.e. embroidery, sewing, making gloves, hosiery trouser-string, etc. at home from other women. Women were taught only Gurmukhi, Nagri, Sanskrit or Arabic according to their religion. Only religious books were taught to the girls.

After Independence in 1947, the National Government gave priority to the expansion of education with the avowed policy of arranging free and compulsory education. With the formation of PEPSU in 1948, the old system of education remained continued. The PEPSU was merged with Punjab in 1956 and the educational pattern of Punjab became applicable to the areas of present Fatehgarh Sahib District. With this the substantial progress has been made, the number of educational institution increased rapidly and the Punjab Government took a bold step of provincialising the schools maintained by the local bodies on 1 October 1957. This step was a landmark in the post Independence history of education. The Compulsory Primary Education Act, 1960, was promulgated from1 April 1961, in the present area of Fatehgarh Sahib District and as a result of its implementation a large number of schools were opened. Education has been made free in all government schools upto middle standard and for girls upto 10+2 standard. To provide facilities of higher education in the area of present Fatehgarh Sahib District, degree colleges have been started at Mandi Gobindgarh and Fatehgarh Sahib. The number of educational institutions in the District as on 30 September 2001 was 597 (3 colleges, 39 senior secondary schools, 49 high schools, 65 middle schools and 406 primary schools.

Health and medical facility:

Little is known about the medical facilities which were available in ancient times in the area comprising the present Fatehgarh Sahib District. But it may be presumed that the Ayurveda, was the system practiced then by the physicians, known as Vaids. Muslim rulers introduced the Unani system of medicine, which became more popular in urban areas due to the patronage of the rulers. But in the rural areas, Ayurvedic system continued to be practised. The factors responsible for the popularity of these systems were availability, cheapness and conditions then prevailing.

The advent of the British led to the gradual introduction of the western system of medicines known as Allopathy. The beginning was made in this direction in the last quarter of the 19th Century, by the then rulers of the Patiala and Nabha Princely States. A regular Medical Department was organised by Maharaja Mohinder Singh of Patiala in 1873 and placed under Surgeon-Major C.M. Calthrop, the first Medical Adviser to the State, who also had charge of the vaccination work.

The work of providing medical relief was greatly accelerated after Independence. Under the democratic set-up, the need of healthy life has been realised. Since the launching of the Five Year Plans rapid strides have been made in the expansion of medical services in the district. A number of hospitals, clinics and dispensaries have been established, and these have adequate and qualified staff. Side by side with the allopathic system of medicine, Ayurvedic, Unani and Homeopathic system of medicines which were relegated into the background also came to receive patronage of the Government. As a result of various preventive and prophylactic measures taken by the Government for improving health of the people the death rate has been brought down considerably. Plague and small pox have totally disappeared and other diseases have been brought under control.

As on 31 March 2001, there were 53 allopathic, 10 Ayurvedic and two Unani medical institutions in the district. No Homeopathic Medical Dispensary was functioning in the district

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either the wall or the roof is made of permanent material & the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway & a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituents a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for

presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas.

The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

a) All places with in a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) a minimum population of 5,000;
ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 100,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

List of Scheduled Castes and Scheduled Tribes:

The Government of India by Gazette Notification under Article 341(1) of Indian Constitution has declared some castes, races or tribes or parts of or groups within castes, races or tribes as Scheduled Castes as there is no standard definition of Scheduled Castes. Similarly, Scheduled Tribes mean all such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are declared by the President of India to be treated as Scheduled Tribes under Article 342(1) of the Indian Constitution. There is slight change in the definition of Scheduled Castes in 1991. Before that, Scheduled Castes could belong to Hindu or Sikh religion. But from 1990, in addition to Hindu and Sikh religions, Scheduled Castes may belong to Buddhists religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In Punjab State, 37 castes were notified by the State Government as Scheduled Castes in the 1991 Census and there is no change at the 2001 Census. Following 37 castes have been notified as scheduled castes in Punjab;

1. Ad Dharmi
2. Balmiki, Chura, Bhangi
3. Bangali
4. Barar, Burar or Berar
5. Batwal
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar Raigar, Ramdasi or Ravidasi
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhilla, Gandil, Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and / or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

(vi) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz.

(i) underground sewerage,
(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and
(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$\text{SBR} = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

Migration

1) Internal and International Migration

2) Rural - Urban component of migration

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are :

M7 (5,000,000 and above)
M6 (2,000,000 to 4,999,999)
M5 (1,000,000-1,999,999)
M4 (500,000-999,999)
M3 (300,000-499,999)
M2 (200,000-299,999) and
M1 (100,000-199,999)

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings-Population and its distribution

The following table shows distribution of rural and urban population by tahsils in the district.

POPULATION, NUMBER OF VILLAGES AND TOWNS, 2001

Name of Tahsil	Population									Number of Villages		No. of Towns
	Total			Rural			Urban					
	P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13
Bassi Pathana	93,080	49,535	43,545	74,022	39,608	34,414	19,058	9,927	9,131	100	100	1
Fatehgarh Sahib	186,243	99,827	86,416	136,418	73,110	63,308	49,825	26,717	23,108	169	169	1
Amloh	172,877	94,974	77,903	99,511	54,284	45,227	73,366	40,690	32,676	102	101	2
Khamanon	85,841	45,801	40,040	76,999	40,935	36,064	8,842	4,866	3,976	73	72	1
Fatehgarh Sahib *	**538,041**	**290,137**	**247,904**	**386,950**	**207,937**	**179,013**	**151,091**	**82,200**	**68,891**	**444**	**442**	**5**

Fatehgarh Sahib district has a population of 538,041 including 290,137 males and 247,904 females. A tahsil in Fatehgarh Sahib district on an average has a population of 134,510, which is quite smaller to the average size of tahsil in the State (338,319) as such.

Among the tahsils in the district, Fatehgarh Sahib (186,243) is the most populated and Khamanon (85,841) is the least populous. In other words, tahsil with the highest population in the district is more than twice times bigger than the tahsil with least population. The remaining tahsils in order of population size are; Amloh (172,877) and Bassi Pathana (93,080).

Out of the total population in the district 386,950 (71.9%) is residing in rural and 151,091 (28.1%) in urban areas. The rural population spreads over 442 inhabited villages and urban population is distributed over 5 towns in the district. An inhabited village in the district on an average has a population of 875 as against 1,311 in the state signifying that the villages in Fatehgarh Sahib district are much smaller in size. Towns, on the other hand, are comparatively smaller in the district compared with that of the State; a town in Fatehgarh Sahib district on an average has a population of 30,218 compared with 52,627 in the state.

Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the census organization to classify towns into six classes according to their population size. A town with a population of 100,000 or more is termed as 'city' in Indian Census.

The distribution of towns of Fatehgarh Sahib district by size class is exhibited in the following table.

Class	Population size	No. of Towns.
1.	2.	3.
Class – I	100,000 and above (Generally referred to as city)	-
Class – II	50,000 to 99,999	1
Class – III	20,000 to 49,999	1
Class – IV	10,000 to 19,999	2
Class – V	5,000 to 9,999	1
Class – VI	Less than 5,000	-

Out of 5 towns in the district, there is no town falling under Class I, one town each falls in the population size class II, III and V, two town falls in the population size class IV and there is no town under Class- VI. (40.2 %) of the urban population in the district is residing in Class II towns and 33.0 per cent is residing in Class III, 21.0 per cent is residing in class IV towns and remaining 5.8 per cent is residing in Class V in the district.

During this decade the number of towns has gone up from 4 to 5 in 2001. There has been an addition of one town viz. Khamanon with a population of 8,842, which is holding a status of Nagar Panchayat. The new town added, is Class V town having statutory status. No town of 1991 has been declassified at the 2001 Census.

Population Growth, Density and Sex Ratio

Population Growth:

During 1991-2001, population of the district has increased from 454,919 to 538,041 in 2001 resulting in a net addition of 83,122 persons during this decade. In percentage terms Fatehgarh Sahib District has recorded a decadal growth rate of 18.3 per cent. Among the districts, it ranks 11th, and this growth rate is significantly lower than that of the state (20.1%).

Density:

Fatehgarh Sahib District with a population of 538,041 and an area of 1,180 sq.km has a density of 456 persons per sq. km, which is significantly lower than that of the State (484) and ranks 13th among the districts in the state.

Within the district, Amloh (662) is the most densely populated and Fatehgarh Sahib (385) is the most thinly populated tahsil. Likewise, rural density varies between 448 in Amloh and 299 in Fatehgarh Sahib Tahsil. The urban density is the highest in Bassi Pathana (6,353) and the lowest in Khamanon (1,216) tahsil.

Sex Ratio:

Sex ratio is derived as the number of females per 1,000 males. Generally speaking differentials in mortality conditions of males and females, male-female ratio at birth and sex selective migration are the key factors which determine the sex composition. It reflects the socio-economic and demographic characteristic of the population, and unfolds the status of women in the society and care of the girl child in particular.

Significant feature of Punjab's population is the preponderance of males over females. According to Census 2001, out of the total population of 24,358,999 in the State, 12,985,045 are males and 11,373,954 females resulting in an overall sex ratio of 876 which is significantly lower than the country as a whole (933).

The sex ratio in the State and its constituent districts has remained to be low throughout. At the beginning of the 20th century, the sex ratio was 832 in 1901, which declined to 780 in 1911. Ever since, the sex ratio in the state showed gradual improvement till 1991 when the sex ratio in the state reached 882. However, it has declined to 876 at 2001, exhibiting a fall of 6 points in the State.

In Fatehgarh Sahib district details prior to 1951 census are not available. Ever since 1951 the sex ratio in the district has gradually improved from 773 in 1951 to 871 in 1991 and it has declined to 854 in 2001

Within the State, the districts among themselves show considerable disparity which is the highest in Hoshiarpur District (935) and the lowest in Ludhiana (824). Fatehgarh Sahib district with a sex ratio of 854 ranks 16th among the districts in the State. Apparently, sex ratio in the district is significantly lower than the State, which in itself is marked with a low sex ratio.

Among the tahsils in the district the sex ratio is the highest in Bassi Pathana (879) and the lowest is Amloh (820). The rural sex ratio varies between 881 in Khamanon and 833 in Amloh tahsil, and the urban sex ratio fluctuates between 920 in Bassi Pathana and 803 in Amloh tahsil. Contrary to the general trends, the urban sex ratio is appreciably better than the rural in Bassi Pathana.

The sex ratio of child population in age-group 0-6 in the State and its constituent districts is quite low and this has become a matter of deep concern. Punjab has a child sex ratio of 798; it is almost identical with its rural (799) and urban area (796). In Fatehgarh Sahib district, the child sex ratio (766) is even lower than that of the State. Within the district, the tahsils among themselves display a

considerable disparity in their child sex ratio; it is the maximum in Amloh (781) and the minimum in Bassi Pathana (744).

Like wise, the disparity in the rural and urban child sex ratio among the tahsils is also quite marked; the rural child sex ratio varies between 775 in Khamanon and 746 in Fatehgarh sahib, while the variation in urban child sex ratio is to the extent of 811 in Khamanon and 732 in Bassi Pathana.

Literacy :

Any person who is able to read and write with understanding in any language is recorded as literate. As in 1991 all the children below 7 years of age have been treated as illiterates.

69.7 per cent of the state's population is literate which is higher than that of the country as such (64.8%). Among the States/Union Territories, Punjab ranks 15th in terms of literacy.

In Fatehgarh Sahib district 73.6 per cent of the population is recorded as literate, which is significantly higher than the state as such. It ranks quite high among the districts in the State. Among the tahsils in the district, Bassi Pathana (76.5%) ranks at the top while Amloh (72.3%) is placed at the bottom.

Male - female gap in the literacy rate is better in the district as compared to that of the State. In Fatehgarh Sahib district 78.3 per cent among males and 68.3 per cent among females are literate, while the corresponding figures for the State are 75.2 and 63.4 per cent respectively.

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district 71.3 per cent of the rural population and 79.7 per cent of the urban population is literate. The urban literacy is higher than the rural in all the tahsils and the gap in rural- urban literacy rate is the maximum in Amloh (urban- 78.4% and rural 67.9%) and the minimum in Khamanon (urban- 78.4% and rural 73.8%).

Work Participation Rate

Definition of Work and Classification of Workers:

How the 'work' is defined by the Census needs to be understood religiously. Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the Census of India 2001, as persons engaged in rearing of animals for production of milk for their own use have been treated as workers. Further more in the 1991 Census cultivation of certain crops even for one's self consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as tomatoes, all types of flowers, fruits and tubers potatoes, chillies and turmerics, viper, cardmoms, vegetables etc. In other words plantation of tea, coffee, rubber, coconut and betel nuts have been classified under plantation and not included in cultivation.

The reference period for recording the economic activity of any person is preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last year are recorded as main workers while those who had worked for less than six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, workers in Household Industries and Other Workers.

Punjab, with a work participation rate of 37.5 per cent, ranks 24th among the States/Union Territories in the Country. The work participation rate in the State is lower than that of India (39.1%). Among the districts in the State, the proportion of workers varies between 44.9 per cent in Nawanshahr district and 33.3 per cent in Gurdaspur district. In all 10 out of 17 districts in the State have shown work participation above the state average and among them five districts have atleast

two-fifths of their population reported as worker. Besides Nawanshahr, they include Bathinda (42.3%), Mansa (40.9%), Sangrur (40.7%) and Moga (40.1%).

Main Workers and Marginal Workers:

85.8 per cent of Punjab's total workers have been recorded as 'Main Worker' and 14.2 per cent as 'Marginal Worker'; the corresponding figures for 1991 Census are 97.4 per cent and 2.6 per cent respectively. In Fatehgarh Sahib district main workers and marginal workers constitute 88.3 and 11.7 per cent of the total population respectively.

The work participation rate in Fatehgarh Sahib (38.3%) is little higher than the state average (37.5%). Among the tahsils in the district, it varies between 41.1 per cent in Amloh and 33.7 per cent in Bassi Pathana. Further 54.9 per cent among males and 18.9 per cent among females are reported as workers showing a significant reduction in the gap between the two. In Fatehgarh Sahib tahsil, more than one-Fifth of the females (22.6%) are recorded as workers.

Out of total population 33.8 per cent are main workers and 4.5 per cent are marginal workers. The proportion of main workers is the highest in Amloh tahsil (36.3%) and the lowest in Bassi Pathana tahsil (29.2 %). However, the proportion of marginal workers is the highest (4.7 %) each in Fatehgarh Sahib & Amloh tahsil and the lowest (3.6%) in Khamanon tahsil. Further, the incidence of marginal workers is observed to be more among females as compared to males, the proportion of female marginal workers (5.3 %) is more than the males (3.8%).

Religion :

It has been customary for the Indian Census to provide information on religious persuations of its people. Religion is one of the basic cultural characteristics of population and several religions have thrived in the secular state of India. Apparently, information on various religious communities in the country has been of great interest and use to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. The instructions for recording this information are same as in 1991. Question 7 of the household schedule canvassed at the 2001 Census pertained to religion. The instructions to enumerators were to record faithfully the religion of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes:

Hindus	-	1
Muslims	-	2
Christians	-	3
Sikhs	-	4
Buddhists	-	5
Jains	-	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

The brief analysis based on 2001 Census data is given under Annexure V.

In Fatehgarh Sahib district there are 74.6 per cent Sikhs, 22.8 per cent Hindus, 2.4 per cent Muslims and 0.2 per cent Christians whereas Buddhists and Jains are negligible.

The instructions for recording this information are, by and large, the same as in 1991. A brief analysis based on 2001 Census data is given under Annexure V.

Mother Tongue and language:

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded.

Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. It may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Question 11 of the Household Schedule was aimed to collect information on 'Other Languages known' (up to two languages in order of proficiency) other than Mother Tongue.

In order to provide a broad scenario a brief note along with table based on 1991 Census data is given in Annexure VIII.

Scheduled Castes and Scheduled Tribes:

Out of the total population of 24,358,999 in the state 7,028,723 belong to Scheduled Castes as per 2001 Census. As such 28.9 per cent of the state's population and 30.7 per cent of the population in the district belong to Scheduled Castes. Among the districts, two- fifth (40.5%) of the total population in Nawanshahr belong to Scheduled Castes and it is the highest among the districts in the state. Firozpur district with a proportion of 22.8 per cent is placed at bottom. Besides Firozpur, Amritsar (28.8%), Sangrur (27.6%), Ludhiana (25.0%), Gurdaspur (24.7%), Rupnagar (23.9%) and Patiala (23.1%) are the districts which have proportion of Scheduled Castes population lower than that of the state while the remaining ten districts exhibit this percentage higher than that of state.

Out of the total population of 538,041 in the district 165,036 belong to Scheduled Castes and this makes (30.7%) of the district's population. Among the tahsils, it is the highest in Khamanon (36.7%), and the lowest in Amloh (28.4%). The proportion of Scheduled Castes population is recorded in Bassi Pathana tahsil (32.1%) and Fatehgarh Sahib (29.3%)

In consonance with the general trends in the state, Scheduled Castes are more rural by residence as 75.7 per cent of Scheduled Castes population in the State and 82.1 per cent in the district are rural by residence.

In the district 35.0 per cent of population in rural areas belongs to Scheduled Castes while the corresponding percentage in urban areas is 19.6 per cent. In Khamanon tahsil Scheduled Castes comprise more than one-third (36.7%) of rural population and this percentage is the highest among all the tahsils in the district. The proportion of Scheduled Castes population residing in urban areas varies between 31.8 per cent in Khamanon tahsil and 15.1 per cent in Amloh tahsil.

During 1991-2001 Scheduled Castes population in the state has increased by 22.4 per cent which is higher than that of Fatehgarh Sahib (20.7%). In the district 63.6 per cent of the Scheduled Castes population is literate which is lower than that of the state (56.2 %.), 62.6 per cent in rural areas and 68.1 per cent in urban areas in Fatehgarh Sahib are literate.

There is no notified Scheduled Tribes in the State.

(viii) Brief Analysis Based on Primary Census Abstract.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Bassi Pathana	84,549	66,411	18,138	93,080	74,022	19,058	10.1	11.5	5.1	21.5	20.5
2	Fatehgarh Sahib	158,854	128,036	30,818	186,243	136,418	49,825	17.2	6.5	61.7	19.4	26.8
3	Amloh	135,534	83,617	51,917	172,877	99,511	73,366	27.6	19.0	41.3	38.3	42.4
4	Khamanon	75,982	75,982	0	85,841	76,999	8,842	13.0	1.3	0.0	0.0	10.3
	District Total:	**454,919**	**354,046**	**100,873**	**538,041**	**386,950**	**151,091**	**18.3**	**9.3**	**49.8**	**22.2**	**28.1**

Table 1 shows decadal change in population of tahsils by residence in the district during 1991-2001. The population of the district has increased from 454,919 to 538,041 in 2001 exhibiting an absolute increase of 83,122. In percentage terms, the district has recorded a growth rate of 18.3 per cent during this decade which is lower than that of the state as such. Among tahsils in the district, the decadal growth rate of population varies between 27.6 per cent in Amloh and 10.1 per cent in Bassi Pathana tahsil. Fatehgarh Sahib (17.2%) and Khamanon tahsils (13.0%) also exhibit growth rate lower than the district.

Fatehgarh Sahib is relatively less urbanized district in the state.. In the district 28.1 per cent of the population is urban as compared with 33.9 per cent in the state. However, the urbanisation level in the district has improved from 22.2 per cent in 1991 to 28.1 per cent in 2001. In the district, Amloh (42.4%) is the most urbanized tahsil, followed by Fatehgarh sahib (26.8%), and Bassi Pathana (20.5%). Khamanon tahsil was entirely rural at the 1991 Census. However, as per 2001 Census, one – tenth (10. 3%) of its population is urban.

The urban growth rate (49.8%) in the district during 1991-2001 is more than five times that of the rural growth rate (9.3%). The urban growth rate is as high as 61.7 per cent in Fatehgarh Sahib tahsil, while the same is barely 5.1 per cent in tahsil Bassi Pathana. The growth rate of urban population in Amloh tahsil is 41.3 per cent. The rural growth rate among the tahsils in the district varies between 19.0 per cent in Amloh and 1.3 per cent in Khamanon.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Table 2 presents number and percentage of inhabited villages in specified population size ranges with the related population in the district as per 2001 Census. Out of 444 villages in the district, two are uninhabited. In the district, a village on an average has a population of 875 as compared with 1,311 in the state as a whole. The inhabited villages (442) are distributed over 5 Community Development (C.D.) blocks. A part of C.D.blocks namely, Amloh, Sirhind and Khera cut across the district boundary. A C.D.block in the district on an average has 88 villages a population of 77,390; the corresponding figures for the state are; 89 and 116,641 respectively. As such, the villages in Fatehgarh Sahib are relatively smaller in terms of population size.

Among the inhabited villages, 27 (6.1%) are very small sized each having a population of less than 200; 90 (20.4%) in the range of 200-499; 188 (42.5%) fall in the range 500-999; 115 (26.0%) in the size class 1,000-1,999; 21 (4.8%) in the range 2,000-4,999; and one village is Sanghol (0.2%) with a population of 5,015 belongs to the size class of 5,000-9,999. In other words, majority of the villages in the district 305 (69%) are relatively small sized having a population of less than 1,000; 136(30.8%) are medium sized having population in the range of 1,000-4,999; and one village is large sized with a population of 5,000 and above.

Table 3 : New Towns, De-Notified, Declassified and Merged Town in 2001 Census

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001

Serial number	Name of town	Urban status of town
1	2	3
(a) New Towns		
(i) Statuary town		
1	Khamanon	NP
(ii) Census town		
Nil		
(b) Denotified		
(i) Statutory town of 1991 Census denotified which did not satisfy the criteria to be treated as towns		
Nil		
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria		
Nil		
(iii) Census towns of 1991 census are notified as statutory town in 2001 census		
Nil		
(C) Declassified*		
Nil		
(d) Wholly merged with other town (s)		
Nil		

*Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Table 3 revealed new towns added, denotified, declassified and merged in the district at the 2001 Census.

As can be noted from Table 3, Khamanon Nagar Panchayat is the only new town added in the district at the 2001 Census and no town of 1991 Census has been declassified or merged during the decade 1991-2001.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	2	0.5	33	0.0
11-20	1	0.2	19	0.0
21-50	5	1.1	652	0.2
51-100	11	2.5	2,443	0.6
101-200	34	7.7	11,272	2.9
201-300	113	25.6	83,017	21.5
301-500	202	45.7	194,419	50.2
501 +	74	16.7	95,095	24.6
Not known	0	0.0	0	0.0
District Total:	**442**	**100.0**	**386,950**	**100.0**
Population Density (Rural) of the district:		**351**		

Table 4 shows distribution of villages according to density of population per sq. km. The rural part of the district has an overall density of 351 persons per sq. km. A low density of 100 or below is noted in 19 villages. These villages constitute barely 0.8 per cent of the rural population in the district. Apparently these villages have a small population, which possibly has resulted in low density. The density of population in the range of 101-200 in 34 villages accounting for 2.9 per cent of the district's rural population; and 113(25.6%) villages comprising 21.5 per cent of the district's rural population in the density range of 201-300. The maximum number of villages 202 belong to the density range of 301-500 and they contain one half (50.2%) of the district's rural population. A high density of 501 or more is noted in 74 villages which make 16.7 per cent of the total villages and account for almost one-fourth (24.6%) of the rural population in the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	832	836	804	NA	NA	896
1911	780	785	740	NA	NA	834
1921	799	808	735	NA	NA	869
1931	815	832	721	NA	NA	861
1941	836	855	750	NA	NA	813
1951	844	854	807	773	768	806
1961	854	865	817	815	814	821
1971	865	868	856	831	830	839
1981	879	884	865	841	855	791
1991	882	888	868	871	870	873
2001	876	890	849	854	861	838

Table 5 presents sex ratio of state and the district during 1901-2001. Sex ratio reflects the socio-economic and demographic characteristics of population. It unfolds the status of women in society and the care for the girl child in particular. The sex ratio in the state declined from 832 in 1901 to 780 in 1911. Ever since 1911, the sex ratio has shown gradual improvement uninterruptedly till 1991 when it reached 882. However, during 1991-2001, it has declined by six points, from 882 to 876.

The data for the district is not available prior to 1951 as it was part of the princely states. The sex ratio in the district has always remained lower than the state average. Fatehgarh Sahib district had a sex ratio of 773 in 1951 and sharply increased to 815 in 1961, 831 in 1971, 841 in 1981 and 871 in 1991. However, during 1991-2001, the sex ratio in the district has fallen by 17 points from 871 to 854 in 2001.

By and large, a similar trend is observed in rural sex ratio. In the district, the rural sex ratio increased consistently from 768 in 1951 to 870 in 1991 and declined to 861 in 2001. By contrast, the trends in urban sex ratio are found to be uneven. The urban sex ratio in the district after showing increase from 806 in 1951 to 839 in 1971(by 33 points), abruptly fell to 791 in 1981(by 48 points). The sex ratio sharply rose to 873 in 1991 (by 82 points). However, the decade 1991-2001 has witnessed a decline of 35 points (from 873 to 838).

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Bassi Pathana	879	869	920
2	Fatehgarh Sahib	866	866	865
3	Amloh	820	833	803
4	Khamanon	874	881	817
	District Total:	**854**	**861**	**838**

Table 6 depicts sex ratio by tahsils in the district as per 2001 Census. Barring Amloh, all other tahsils in the district portray a better sex ratio than the district as such; Bassi Pathana (879), Khamanon (874) and Fatehgarh sahib (866). The sex ratio in Amloh tahsil (820) is significantly less than the district average (854). A similar trend is observed in rural sex ratio. However, the urban sex ratio is more than the district average in Bassi Pathana (920) and Fatehgarh Sahib(865), while it is below the district average in Khamanon (817) and Amloh (803).

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Khamanon	881
2	Bassi Pathana	866
3	Amloh (P)	856
4	Sirhind (P)	837
5	Khera (P)	872
	District (Rural) Total:	**861**

Sex ratio by C.D.Blocks in the district is given in Table 7. Out of five C.D. blocks in the district, part of the C.D.Blocks of Amloh, Sirhind and Khera falls in the adjacent district. Among the C.D. blocks, the sex ratio varies between 881 in Khamanon and 837 in Sirhind. In all, three C.D.blocks fall above and two below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	10	2.3	8,781	2.3
700-749	11	2.5	5,506	1.4
750-799	29	6.6	21,579	5.6
800-849	100	22.6	88,813	23:0
850-899	170	38.5	163,197	42.2
900-949	90	20.4	81,951	21.2
950-999	20	4.5	12,823	3.3
1000-1099	8	1.8	3,389	0.9
1100+	4	0.9	911	0.2
District Total:	**442**	**100.0**	**386,950**	**100.0**
Sex ratio (Rural) for District:		**861**		

Table 8, shows sex ratio of rural population by grouping of villages into different ranges according to 2001 Census. The sex ratio is less than 800 in 50 villages. These villages together account for almost one-tenth (9.3%) of the rural population of the district. Sex ratio in the range of 800-899 in 270(61.1%) villages were having 65.2 per cent of the district's rural population. High sex ratio in the range of 900-999 is recorded in 110(24.9%) villages accommodating 24.5 per cent of the rural population of the district. As many as 12 villages have emerged as female biased having a sex ratio of 1,000 or more. However, these villages are having a small population, which possibly has resulted in very high sex ratio.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Amloh	M Cl	872
2	Bassi Pathana	M Cl	920
3	Gobindgarh	UA	789
	(i) Gobindgarh	M Cl+OG	789
	(ii) Gobindgarh	M Cl	792
4	Khamanon	NP	817
5	Sirhind Fatehgarh Sahib	M Cl	865
	Sex ratio (Urban) for the district:		**838**

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 9 shows sex ratio of urban agglomerations/towns in the district. All the five towns in the district have statutory status, and among them Gobindgarh forms an urban agglomeration (U.A.) as well. Gobindgarh U.A., by virtue of its industrial activity has a sizeable number of in-migrants, which possibly has resulted in the lowest sex ratio in urban area (789). Khamanon town (817), famous for its grain mandi, also has sex ratio lower than the urban sex ratio of the district. The sex ratio in the remaining towns viz; Bassi Pathana (920), Amloh (872) and Sirhind Fatehgarh sahib (865) is above the district average.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bassi Pathana	Total	11,040	6,329	4,711	744
		Rural	8,958	5,127	3,831	747
		Urban	2,082	1,202	880	732
2	Fatehgarh Sahib	Total	23,307	13,258	10,049	758
		Rural	17,019	9,749	7,270	746
		Urban	6,288	3,509	2,779	792
3	Amloh	Total	21,904	12,300	9,604	781
		Rural	12,393	7,021	5,372	765

		Urban	1,016	561	455	811
	District Total:	**Total**	**66,374**	**37,578**	**28,796**	**766**
		Rural	**47,477**	**27,027**	**20,450**	**757**
		Urban	**18,897**	**10,551**	**8,346**	**791**

Sex ratio of child population in age group 0-6 is given in Table 10. Punjab and its constituent districts are marked with a very low child sex ratio, which has become a matter of deep concern. As against the over all sex ratio of 876 in Punjab, the sex ratio in child population in age-group 0-6 is 798 showing a gap of 78 points. The child sex ratio in Fatehgarh Sahib district is the lowest in Punjab; it has a sex ratio of 766 compared with 798 in the state as a whole. Further more, contrary to the over all patterns in the state, rural child sex ratio in the district (757) is much low than its urban counterpart (791).

Among the tahsils, the child sex ratio varies between 781 in Amloh and 744 in Bassi Pathana in the district. The urban child sex ratio exceeds the rural in three out of four tahsils namely; Fatehgarh Sahib (rural 746 & urban 792), Amloh (rural 765 & urban 802) and Khamanon (rural 775 & urban 811). Bassi Pathana (rural 747 & urban 732) is the only tahsil where rural child sex ratio is more than the urban.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

2	Bassi Pathana	7,053	4,028	3,025	751
3	Amloh (P)	11,536	6,550	4,986	761
4	Sirhind (P)	11,168	6,384	4,784	749
5	Khera (P)	8,613	4,935	3,678	745
	District (Rural) Total:	**47,477**	**27,027**	**20,450**	**757**

Table 11 shows sex ratio of population in the age group 0-6 at C. D. block level in Fatehgarh Sahib district as per 2001 Census. As against the over all rural sex ratio of 890 in Punjab, the sex ratio in child population in age-group 0-6 is 799 showing a gap of 91 points. The C.D.Blocks do not exhibit any significant variation in this regard in the district. Three C.D.Blocks namely; Bassi Pathana (751), Sirhind (749) and Khera (745) fall below and two C.D.Blocks viz; Khamanon (775) and Amloh (761) above the district average.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	172	38.9	16,083	33.9
700-749	54	12.2	6,768	14.3
750-799	44	10.0	5,563	11.7
800-849	47	10.6	6,782	14.3
850-899	38	8.6	4,434	9.3
900-949	28	6.3	2,744	5.8
950-999	13	2.9	1,834	3.9
1000-1099	25	5.7	2,053	4.3
1100+	21	4.8	1,216	2.6
District (Rural) Total	**442**	**100.0**	**47,477**	**100.0**
Sex ratio (Rural) for District:		**757**		

Table 12 shows sex ratio of rural population in the age group 0-6 by ranges as per 2001 Census. The number of villages falling under different ranges shows that 172 villages have a very low child sex ratio of less than 700. In other words almost two-fifths (38.9%) villages accounting for one-third (33.9%) of the rural population fall in this category in the district. The child sex ratio in the range of 700-799 in 98 (22.2%) villages comprising 26.0 per cent of the district's rural population.

The number of villages 47(10.6%) are in the Child sex ratio range of 800-849 and 38(8.6%) villages in the range of 850-899. This reflects that 85 (19.2%) villages constituting 23.6 per cent of the district's rural population.

Child sex ratio is high in the range of 900-999 in 41(9.2%) villages covering 9.7 per cent of district's rural population. Out of these 41 villages, 28 villages fall in the category 900-949 and 13 villages belong to the range 950-999.

In the district 46 villages are female biased having a child sex ratio of 1,000 or more. These villages constitute 10.5 per cent of the total villages and 6.9 per cent of district's rural population. Very high child sex ratio in these villages appears to be attributed to their small population size in the villages.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town+*	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns in the district. Interestingly, the urban child sex ratio (791) is better than the rural (757) in the district. Further more, Khamanon (811) and Gobindgarh U.A. (805) display a relatively higher child sex ratio. The remaining three towns in descending order of their child sex ratio are; Sirhind Fatehgarh Sahib (792), Amloh (785) and Bassi Pathana (732).

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Bassi Pathana	Total	93,080	29,908	-	32.1	-

		Urban	**151,091**	**29,602**	-	**19.6**	-

Table 14 presents number and percentage of scheduled castes and scheduled tribes population in tahsils of the district as per 2001 Census. Scheduled castes constitute 30.7 per cent population of the district. The table reveals highest percentage of scheduled caste in Khamanon tahsil 36.7 per cent followed by Bassi Pathana 32.1 per cent. The lowest percentage of Scheduled castes is reported in the Amloh tahsil (28.4 %)

The concentration of scheduled caste population is more in the rural areas than the urban areas of the district. In rural areas 35.0 per cent of the population belongs to scheduled castes while the corresponding percentage in urban areas is 19.6. A similar pattern is observed among tahsils in the district. The proportion of scheduled caste population is higher in rural areas as compared with the urban in all the tahsils.

There is no scheduled tribe notified in the state.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

21-30	96	21.7	25,917	19.1
31-40	120	27.1	47,956	35.4
41-50	64	14.5	27,296	20.2
51-75	59	13.3	26,834	19.8
76 and above	4	0.9	1,165	0.9
District (Rural) Total	**442**	**100.0**	**135,434**	**100.0**

Table 16 shows proportion of scheduled caste population to total population in villages. The number of villages falling under different ranges shows that 19 (4.3%) villages do not have any scheduled caste population. 80 (18.1%) villages having 4.6 per cent scheduled caste population in the district. Among these 80 villages, 15 fall in the range of less than 5 per cent, 12 villages in the category of 5-10 per cent and 53 villages lie in the range 11-20 per cent. It would be noted that 343(77.5%) villages have more than 95.4 per cent scheduled caste population in the range of 21-76 and above in the district.

The maximum number of villages, 120 (27.1%) accommodating 35.4 per cent scheduled caste population in the range of 31-40 per cent. High concentration of scheduled caste population is recorded in 64 (14.5%) villages in the range of 40-50 per cent and sharing one-fifth (20.2%) scheduled caste population in the district.

In 63(14.2%) villages have more than 51 per cent Scheduled castes and they accommodate more than one-fifth (20.7%) of the district's scheduled caste population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5

There are no Scheduled Tribes in Punjab State.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town+*	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Amloh (M Cl)	12,689	3,184	-	25.1	-
2	Bassi Pathana (M Cl)	19,058	4,936	-	25.9	-
3	Gobindgarh UA	60,677	7,912	-	13.0	-
	(ii) Gobindgarh (M Cl+OG)	60,677	7,912	-	13.0	-
	(ii) Gobindgarh (M Cl)	55,403	6,998	-	12.6	-
4	Khamanon (NP)	8,842	2,816	-	31.8	-
5	Sirhind Fatehgarh Sahib (M Cl)	49,825	10,754	-	21.6	-
	District (Urban) Total	**151,091**	**29,602**	-	**19.6**	-

The above table gives population, scheduled castes population and percentage of scheduled castes population by UA/ towns. The table reveals highest percentage of scheduled castes in Khamanon NP (31.8%) followed by Bassi Pathana M.Cl. (25.9 %) and Amloh M.Cl. (25.1%). The lowest percentage of scheduled castes is reported in Gobindgarh M.Cl. (12.6%).The table further reveals that out of a population of 151091 persons in the UAs / towns, there are 29,602 persons of scheduled castes, who constitute 19.6 percent population of urban area.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Khamanon	893	-
2	Bassi Pathana	883	-
3	Amloh (P)	869	-
4	Sirhind (P)	864	-
5	Khera (P)	861	-
	District (Rural) Total	**874**	-

The above table gives sex ratio (number of females per thousand males) by CD Blocks. The table reveals the highest and second highest sex ratio in Khamanon Block (893) and Bassi Pathana Block (883) respectively. The lowest and the second lowest are in Khera Block (861) and Sirhind (P) (864) respectively. The sex ratio for the district (Rural sector) is recorded at 874.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Amloh (M Cl)	895	-

3	Gobindgarh UA	813	-
	(i) Gobindgarh (M Cl+OG)	813	-
	(ii) Gobindgarh (M Cl)	808	-
4	Khamanon (NP)	938	-
5	Sirhind Fatehgarh Sahib (M Cl)	883	-
	Sex ratio (Urban) for the district:	**872**	-

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

The above table 20 shows sex ratio among scheduled castes by urban agglomerations/towns in the district. The sex ratio (number of females per thousand males) for all towns is (872), which is little lower than rural areas (874).Among towns, barring Gobindgarh U.A., all other towns have sex ratio in scheduled caste population better than the district average. It is the highest in Khamanon NP (938), followed by Bassi Pathana (897), Amloh (895) and Sirhind-Fatehgard Sahib (883). The sex ratio in scheduled caste population in Gobindgarh U.A (813) is the lowest possibly due to the male selective in-migration to this steel town in the state.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
			Number of literates			Number of illiterates

		Rural	**242,063**	**138,085**	**103,978**	**144,887**	**69,852**	**75,035**	**71.3**	**76.3**	**65.6**	**10.8**
		Urban	**105,301**	**59,601**	**45,700**	**45,790**	**22,599**	**23,191**	**79.7**	**83.2**	**75.5**	**7.7**

The above table 21 presents the number and percentage of literates and illiterates by tahsils in the district according to 2001 Census. The literacy rate for district Fatehgard Sahib is reported 73.6 percent, which is higher than that of state average (69.7%) The tahsils within the district do not show any significant variation in their literacy rate. The literacy rate is the highest in Bassi Pathana (76.5%), followed by Khamanon (74.3%), Fatehgarh Sahib (73.1%) and Amloh (72.3%).

Likewise, the male-female and rural-urban differentials in literacy are also not very significant. In the district 78.3 per cent among males and 68.3 per cent females are literate showing a gap of 10 percentage points. This gap is the maximum in Bassi Pathana tahsil (10.8 percentage points) and the minimum in Amloh tahsil (8.9 percentage points).

The rural-urban gap in the literacy rate is even narrower. In the district 71.3 per cent of the rural population and 79.7 per cent of the urban population is literate exhibiting a gap of 8.4 percentage points.

Tahsil wise male-female and rural-urban differentials in literacy rates, by and large follow the over all patterns at district level.

TABLE 22: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Khamanon	50,089	28,213	21,876	26,910	12,722	14,188	73.8	78.8	68.2	10.6
2	Bassi Pathana	38,735	21,958	16,777	20,387	9,720	10,667	74.4	79.4	68.7	10.7
3	Amloh (P)	55,585	31,855	23,730	37,132	18,097	19,035	68.5	73.4	62.8	10.6
4	Sirhind (P)	54,132	31,370	22,762	36,157	17,768	18,389	68.4	73.4	62.6	10.8
5	Khera (P)	43,522	24,689	18,833	24,301	11,545	12,756	73.5	78.9	67.5	11.4
District (Rural) Total:		**242,063**	**138,085**	**103,978**	**144,887**	**69,852**	**75,035**	**71.3**	**76.3**	**65.6**	**10.8**

The above table gives number and percentage of literates with break up into males and females by CD Blocks. It would be noticed that 71.3 per cent rural population is literate in the district. The C.D. blocks do not exhibit any significant variation. It varies between 74.4 per cent in Bassi

Pathana and 68.4 per cent in Sirhind. Besides Bassi Pathana, two C.D. blocks namely; Khamanon and Khera have higher literacy rate than the district average (rural) 71.3 per cent.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	0	0.0	0	0.0
11-20	1	0.2	31	0.0
21-30	0	0.0	0	0.0
31-40	1	0.2	122	0.0
41-50	2	0.5	577	0.1
51-60	19	4.3	15,494	4.0
61-70	146	33.0	142,865	36.9
71-80	247	55.9	216,234	55.9
81-90	26	5.9	11,627	3.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**442**	**100.0**	**386,950**	**100.0**
Literacy rate for District Rural :		**71.3**		

Table 23 shows distribution of villages in the district by literacy ranges. In the district 438 (out of 442) villages have a literacy rate more than 50 per cent. 19 villages have literacy rate in the range of 51-60 per cent, 146 in the range of 61-70 per cent, 247 villages fall in the range 71-80 per cent and 26 villages in the range of 81-90 per cent. The highest number of villages 247 (55.9%) are in the literacy range of 71-80 and second highest villages 146 (33.0%) in the range of 61-70 and contributes both together 92.8 percent population in the range of 61-80 percent..

Low literacy of less than 50 per cent is noted in only four villages. These four villages have a total population of 730 which makes barely 0.1 per cent of the rural population of the district.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/ Town +*	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons		Females	Persons	Males	Females	Persons	Males	Females	
1	2	3		5	6	7	8	9	10	11	12

	(ii) Gobindgarh (M Cl)	38,117	21,934	16,183	17,286	8,978	8,308	78.8	81.2	75.7	5.5
4	Khamanon (NP)	6,134	3,489	2,645	2,708	1,377	1,331	78.4	81.1	75.1	5.9
5	Sirhind Fatehgarh Sahib (M Cl)	34,779	19,482	15,297	15,046	7,235	7,811	79.9	83.9	75.2	8.7
	District(Urban) Total	**105,301**	**59,601**	**45,700**	**45,790**	**22,599**	**23,191**	**79.7**	**83.2**	**75.5**	**7.7**

Table 24 reveals that four out of every five persons (79.7%) are literate in urban area in the district. Among the towns it varies between 84.5 per cent in Bassi Pathana and 78.1 per cent in Gobindgarh U.A. In the district 83.2 per cent among males and 75.5 per cent females are literate; This gap is the maximum (11.9 percentage points) in Amloh and the minimum (5.9 percentage points) in Khamanon.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Khamanon	16,204	9,517	6,687	12,467	5,632	6,835	66.1	73.9	57.6	16.3
2	Amloh (P)	18,108	10,842	7,266	17,874	8,405	9,469	59.3	66.6	50.9	15.7
3	Sirhind (P)	14,765	8,959	5,806	14,954	6,983	7,971	58.5	66.5	49.5	17.0
4	Bassi Pathana	11,581	6,835	4,746	8,628	3,896	4,732	67.0	74.8	58.2	16.6
5	Khera (P)	11,542	6,931	4,611	9,311	4,277	5,034	65.2	73.2	55.9	17.3
District (Rural) Total:		**72,200**	**43,084**	**29,116**	**63,234**	**29,193**	**34,041**	**62.6**	**70.4**	**53.9**	**16.5**

Almost two-thirds (62.6%) scheduled caste population is literate in rural area in the district. This percentage is lower than the over all rural literacy rate of 71.3 per cent. At C.D. Block level the literacy rate is the highest in Bassi Pathana (67.0%) followed by Khamanon (66.1%), Khera (65.2%), Amloh (59.3%) and Sirhind (58.5%).

In the scheduled caste population 70.4 per cent among males and 53.9 per cent females are literate exhibiting a gap of 16.5 percentage points. As such almost every second female among scheduled castes in rural areas of the district is illiterate. At C.D. block level, both the male and female literacy is the highest in Bassi Pathana and the lowest in Sirhind C.D. block respectively.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

District Total:	**422**	**100.0**	**135,434**	**100.0**
Literacy rate for District (Rural) :		**62.6**		

Table 26 shows distribution of villages by literacy ranges for scheduled caste population in the district. Among the inhabited villages 19 villages have no scheduled caste population.

Low literacy of less than 50 per cent is noted in only 51 villages containing 8.8 per cent rural scheduled caste population in the district.

In the remaining 372 inhabited villages more than half of their population is literate in the district. Among them 123 (29.1%) of the villages sharing 29.6 per cent of the district's rural scheduled caste population have literacy rate in the range of 51-60 per cent. Majority of the villages, 172 (40.7%) comprising 46.2 per cent of the scheduled caste population fall in the range of 61-70 per cent. High literacy rate of more than 70 per cent is the characteristics of 77 villages covering 15.4 per cent of the scheduled caste population. Within this range of high literacy rate, 69 (16.3%) villages having 14.8 per cent of scheduled caste population fall in the range of 71-80 per cent.

TABLE 27: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town+*	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

The table 27 gives percentages of literates for persons, males and females by towns. The table reveals that for towns taken together, the literacy rate for persons is 68.1 percent. The highest and the second highest literacy rate is reported is Bassi Pathana M.CL (74.8%) and Khamanon (NP) (74.5%) respectively, Whereas the lowest is reported in Amloh M.CL (61.1%) in case of persons. The literacy rate for all towns, taken together for males is reported to be 75.2 percent. Khamanon (NP) (83.5%) and Bassi Pathana M.CL (80.8%) have reported the highest and the second highest literacy rates respectively, whereas the lowest and the second lowest literacy rates have been reported in Gobindgarh, UA (69.4%) and Amloh M.CL (70.6) respectively. In case of female literacy rates Bassi Pathana M.CL (68.3%) and Khamanon (NP) (65.0%) occupy by the top and the second top positions, whereas, Amloh M.CL (50.6%) and Gobindgarh UA (55.9%) occupy the lowest and the second lowest positions respectively. For towns, taken together, the female literacy rate is reported 60.2 percent.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

The above table 31 presents percentages of main workers, marginal workers, total workers and non-worker, with break up into males and females by tahsils. In respect of persons, main workers are reported 33.8 percent and marginal workers 4.5 percent in the district. The proportion of main workers is the highest in Amloh tahsil (36.3%) and the lowest in Bassi Pathana tahsil (29.2%). However, the proportion of marginal workers is the highest each in Fatehgarh Sahib & Amloh Tahsils (4.7%) and the lowest in Khamanon tahsil (3.6%). The proportion of female marginal workers (5.3%) is more than the males (3.8%) in the district. However, at tahsil level the participation of females as marginal workers is higher than the males in Fatehgarh sahib and Amloh tahsils, and lower than the males in Bassi Pathana and Khamanon tahsils.

The work participation rate (main + marginal) in Fatehgarh Sahib District (38.3%) is a little higher than that of the state (37.5%). Among tahsils it varies between 41.1 per cent in Amloh and 33.7 per cent in Bassi Pathana.

In the district 54.9 per cent among males and 18.9 per cent females are reported as workers. The male – female gap in the total work participation rate is relatively narrow in Fatehgarh sahib and

Amloh tahsils. In Fatehgarh Sahib Tahsil 22.6 per cent females and 54.9 per cent males are workers and the corresponding percentage for Amloh tahsil is 21.9 per cent and 56.9 percent respectively.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

		Males	36,234	18,217	50.3	1,852	5.1	20,069	55.4	16,165	44.6
		Females	31,589	5,493	17.4	2,377	7.5	7,870	24.9	23,719	75.1
	District (Rural)	**Persons**	**386,950**	**134,624**	**34.8**	**21,384**	**5.5**	**156,008**	**40.3**	**230,942**	**59.7**
	Total:	**Males**	**207,937**	**105,916**	**50.9**	**9,341**	**4.5**	**115,257**	**55.4**	**92,680**	**44.6**
		Females	**179,013**	**28,708**	**16.0**	**12,043**	**6.7**	**40,751**	**22.7**	**138,262**	**77.2**

Table 32 presents the number and percentage of main workers, marginal workers and non-workers by sex in C.D. Blocks. 40.3 per cent of the rural population is working in the district; 34.8 per cent as main workers and 5.5 per cent as marginal workers. Among C.D. blocks the work participation rate varies between 46.9 per cent in Amloh (P) and 34.3 per cent in Khamanon. Besides Amloh, the work participation is high in Sirhind (P) (41.7%) and Khera (P) C.D. blocks (41.2%).

The percentage of main workers is the highest in Amloh (P) C.D. block (39.1%) and the lowest in Bassi Pathana C.D. block (30.3%). In case of marginal workers Amloh (7.8%) and Khamanon (3.9%) C.D. blocks represent the highest and the lowest value.

Punjab State, in general is characterized by low female participation rate. It was the lowest (4.4%) among all the States/Union Territories in the country at the 1991 Census. It might be due to non-reporting of female's work by the respondents. Special efforts introduced at the 2001 Census for netting female's work have helped some what in obtaining accurate picture of female's work. The female work participation in Punjab recorded in 2001 Census (19.1%) is nearly five times that of 1991 (4.4%).

In the district 22.7 per cent of the rural females are reported as workers (16.0 % main workers and 6.7 % marginal workers). Further, the participation of females as marginal workers is more than the males in Amloh, Sirhind and Khera C.D. blocks.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

The above table presents percentages of main workers, marginal workers, total workers and non-workers, with break up into males and females by UAs/towns. The work participation rate in urban areas of the district (33.2%) is at par with that in the State ((33.5%). Among the towns it is the highest in Khamanon (34.3%) closely followed by Sirhind-Fatehgarh Sahib (34.1%), Gobindgarh U.A.(33.1%), Amloh (31.8%) and Bassi Pathana (31.6%). The participation in marginal work is much less. In the district 1.8 per cent of the urban population is reported as marginal worker. All the towns in the district have a small proportion of marginal workers; it varies between 3.3 per cent in Bassi Pathana and 0.8 per cent in Gobindgarh U.A.

Contrary to the over all trends in the state the proportion of female marginal workers in the district (1.5%) is less than that of males (2.0%). This trend is observed in all the towns in the district barring Bassi Pathana where the proportion of female marginal workers (4.3%) is nearly twice than that of the males (2.4%).

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN TAHSILS, 2001

				(18.9)	**(5.8)**	**(6.0)**	**(3.3)**	**(84.9)**

Note: Percentage of workers to total workers is given in brackets

Table 34 shows distribution of workers by sex in four categories of economic activity by tahsils in the district.

Among the total workers in the district 22.1 per cent are cultivators, 11.8 per cent agricultural workers, 2.2 per cent household industry workers and 63.9 per cent other workers. In other words one-third (33.9%) of the total workers are engaged in agriculture sector in the district and the remaining two-thirds (66.1%) are non-agricultural workers.

At tahsil level the proportion of cultivators in Khamanon tahsil (30.2%) is more than double in Amloh (14.0%). Similarly proportion of agricultural labourers in Khamanon tahsil (16.8%) is more than twice that of Amloh (7.7 %).

The proportion of workers engaged in household industry is the highest in Bassi Pathana tahsil (2.9%) closely followed by Khamanon tahsil (2.7%) and Fatehgarh Sahib Tahsil (2.5%). In Amloh 1.4 per cent household industry workers are reported and it is the lowest among tahsils in the district. Further, the participation of females in household industry is greater than that of the males in the district as well as its constituent tahsils.

Two out of every three workers (63.9%) are recorded as 'other workers'. In Amloh tahsil more than three-fourths (76.9 %) workers are reported as other workers, while Fatehgarh Sahib (61.1%) Bassi Pathana (53.6%) and Khamanon (50.3%) have just about one –half of their workers as other workers.

The participation of female workers in non-agricultural sector (84.9 %) is more than that of males (57.7%) in the district. The same holds true for all the tahsils in the district.

TABLE 35: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Note: Per cent of Worker to total worker is given in brackets

Table 35 shows distribution of workers by sex in four categories of economic activity at C.D.block level in the district. In rural areas of the district 28.4 per cent of the total workers are cultivators, 14.5 per cent agricultural labourers, 2.2 percent engaged in household industry and 55.0 percent other workers. This signifies that even in rural areas more than one-half (57.2 %) of the workers are following non-agricultural pursuits. Even among C.D. blocks barring Khamanon, all other C.D. blocks have higher proportion of workers under the non-agricultural sector.

The proportion of rural workers reported as agricultural workers (cultivators + agricultural labourers) is the highest in Khamanon (50.1%) followed by Bassi Pathana (49.6%), Khera (47.7%), Sirhind (41.0%) and Amloh (33.7%). It is significant to note that in Amloh C.D.block barely one out of every three workers is engaged in agricultural sector.

In the district 2.2 per cent of the rural workers are engaged in household industry. The C.D. blocks do not display any significant variation in this regard; it varies between 2.7 per cent each in Khamanon and Bassi Pathana and 1.5 per cent in Amloh C.D. block. Further, as true in case of the district the participation of female workers in household industry is more than that of males in all the C.D. Blocks.

Among the rural workers, 55.0 per cent are noted as other workers in the district. The percentage is even lesser in Khamanon (47.1%), Bassi Pathana (47.6%) and Khera CD block (50.0%)

C.D. blocks. In Amloh C.D. block almost two-thirds (64.8%) are 'other workers' and the corresponding proportion in Sirhind C.D. block is 56.9 per cent.

Table 35 also reveals that participation of females in non-agricultural sector is much greater than the agricultural sector. In the district 12.7 per cent of the female workers are agricultural workers (C – 6.4% and AL – 6.3%) and 87.3 per cent (HHI – 3.2% and OW – 84.1%) non-agricultural workers.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Serial number	Name and urban status of UA/ Town+*	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

				(8.7)	(1.5)	(3.6)	(4.4)	(90.5)

Note : Per cent of worker to total worker is given in brackets.
+ Towns arranged in alphabetical order.

- In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns

The above table 36 presents the percentages of workers by sex in four categories of economic activities in UAs\ towns, table further reveals that a small segment of urban workers (6.2%) in the district are reported as agricultural workers (cultivators 2.5 % and agricultural labourers 3.7%). In Khamanon town every fifth worker (19.8%) is recorded as an agricultural worker. The proportion is fairly high in Sirhind - Fatehgarh Sahib where every tenth (10.2%) worker is engaged in agricultural activity. By contrast, the proportion of urban workers in agricultural sector is the minimum in Gobindgarh UA (1.3%).

In the district 2.3 per cent of the urban workers are working in household industry. In Sirhind – Fatehgarh Sahib 3.7 per cent of the workers are household industry workers and this is the highest among the towns in the district. The participation of female workers in household industry (4.4%) is more than the males (2.0%) in the district. However, among the towns, the pattern is inverse in case of three towns namely; Bassi Pathana, Sirhind Fatehgarh Sahib & Gobindgarh UA.

(ix) Brief Analysis of the Village Directory and Town Directory Data

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

		(100.0)	(94.8)	(38.7)	(100.0)	(20.6)	(46.4)	(80.8)	(5.2)	(30.8)	(100.0)	(100.0)

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 shows distribution of villages according to availability of different amenities at C.D. block level in the district.

Education:

Educational amenity is available to 419 (94.8%) villages in the district. Any how there are 23 villages for whom the facility is not available within the village and the same can be availed of at some distance. In most cases these villages are small in population size.

Among the C.D. Blocks the percentage of villages having educational facility is below the district average in Bassi Pathana (90.8%) and Sirhind (94.1%); in the case of the former ten villages are devoid of this facility within the village and for the later the corresponding number is six. The remaining three C.D. Blocks which fall above the district average are; Khera (97.6%), Khamanon (97.2%) and Amloh (94.9%).

Medical:

In the district 171 villages (38.7%) have some kind of medical facility available to them within the village. In Khamanon (52.8%) and Amloh (50.0%) C.D. Blocks at least one half of the villages have this facility available to them within the village. Sirhind and Khera are comparatively poorly placed in this regard as in case of the former 23 (out of 102) villages and in the latter's case 20 (out of 83) villages do not have availability of this facility within the village.

Improved drinking water:

Improved drinking water is available to all the villages in the district.

Post Office:

One-fifth (20.6%) of the villages have availability of post office within the village and the villagers of the remaining 79.4 per cent villages avail this facility at some distance in the district. The situation is the best in Khamanon C.D.block where every third (33.3%) village has post office. In Sirhind (20.6%), Khera (20.5%) and Amloh (18.4%) every-fifth village has a post office. This percentage is the lowest in Bassi Pathana where only 12.6 per cent of the villages have availability of post office.

Telephone:

Telephone facility is available in less than one-half (46.4%) of the villages in the district. The C.D. Blocks show significant variation in this regard. In Khamanon C.D. block 87.5 per cent of the villages have this facility. In Amloh C.D.block also telephone facility is available to 79.6 per cent of the villages.

Transport and Communication:

Transport and communication facility is available within the village in respect of 80.8 per cent villages in the district. Among the C.D. blocks, all the villages in Sirhind block have this facility, while Bassi Pathana with 58.6 per cent of the villages having this facility is placed at the bottom. The corresponding percentage in Khamanon, Khera and Amloh is 91.7, 83.1 and 70.4 per cent respectively.

Banks:

The banking facility is available in 23 (5.2%) villages in the district. In other words almost one in 20 villages has a bank. This percentage is the highest in Khamanon (9.7%) followed by Khera (6.0%), Sirhind (4.9%), Bassi Pathana (3.4%) and Amloh (3.1%).

Agricultural Credit Societies:

Nearly one – third (30.8%) of the villages have agricultural credit societies in the district. Among the C.D. blocks it varies between 40.3 per cent in Khamanon and 22.9 per cent in Khera. The remaining three C.D. Blocks in order of their percentage of villages having agricultural credit societies are Amloh (32.7%), Bassi Pathana (32.2 %) and Sirhind (27.5%).

Approach by pucca:

All the villages in the district are linked through pucca roads.

Power Supply:

All the villages in the district are having power supply.

TABLE 38: NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communic ations $	Banks	Agricul- tural Credit Societies	Approach by pucca road	Power supply

5	Khera (P)	67,823	67,578	23,440	67,823	19,446	22,286	56,500	9,876	19,254	67,823	67,823
		(100)	(99.6)	(34.6)	(100.0)	(28.7)	(32.9)	(83.3)	(14.6)	(28.4)	(100.0)	(100.0)
	District	386,950	384,446	190,565	386,950	122,753	228,314	324,716	42,663	160,050	386,950	386,950
	Total:	(100)	(99.4)	(49.2)	(100.0)	(31.7)	(59.0)	(83.9)	(11.0)	(41.4)	(100.0)	(100.0)

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 shows number and percentage of rural population served by different amenities in the district. More than 99 per cent of the rural population in the district and its constituent C.D.Blocks is being served by educational institutions. The proportion is fractionally less in Bassi Pathana C.D.block.

Almost one – half of the rural population in the districts is being served by some kind of medical facility available to them. Khamanon C.D.block with 64.8 per cent of its population having medical services is better placed than Amloh (57.5%), Bassi Pathana (56.2%), Khera (34.6%) and Sirhind (34.1%).

Improved drinking water is available to the entire rural population in the district and its C.D. Blocks. Similar situation is noticeable with regard to approach by pucca road and availability of power supply.

Post offices are serving 31.7 per cent of the district's rural population. There is quite a variation at C.D.block level in this regard; it varies between 48.6 per cent in Khamanon and 21.0 per cent in Bassi Pathana C.D Block.

In the district telephone is serving the needs of 59.0 per cent of the rural population, and transport and communication facilities are serving 83.9 per cent of the population. The facility of agricultural credit societies (41.4%) outstrips Banks (11.0%) badly and this is true for all the C.D. blocks in the district.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 to 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	23	0	0	23
(b) Middle School	258	55	0	313
(c) Degree College	47	128	267	442
2. Medical:-				
(a) Hospital	141	166	131	438
(b) PHC	334	70	27	431
3. Post Office	334	17	0	351
4. Telephone	237	0	0	237
5. Bus Service	86	0	0	86
6. Banks				
(a) Commercial Bank	378	43	4	425
(b) Cooperative Bank	270	151	12	433
7. Agricultural Credit Societies	295	11	0	306

Table 39 shows distribution of villages which are not having certain amenities by distance ranges from the places where these are available.

Education:

There are 23 villages, which do not have availability of any educational amenity and for all of them, the primary school is available within a distance of 5 kms.

313 villages do not have middle school in the district. Among them, this facility is available within 5 kms. in case of 258 villages, and at a distance of 5-10 kms for the remaining 55 villages.

There is no village in the district having a degree college. Out of 442 villages in the district, the same is available to 47 villages within 5 Kms, at a distance of 5-10 km. in case of 128 villages and for the remaining 267 villages, the villagers have to cross over a distance of more than 10 kms to avail this facility.

Medical:

Only four villages in the district have a hospital. For the remaining 438 villages, the services of a hospital can be availed of at a distance of upto 5 km in case of 141 villages, at a distance of 5-10 km for 166 villages and at a distance of more than 10 km in respect of 131 villages.

Likewise, only eleven villages in the district have PHC. As many as 431 villages do not have PHC within the village and same is available at a distance of less than 5 kms. in respect of 334 villages, at a distance of 5-10 kms. in case of 70 villages and at a distance of more than 10 kms. for 27 villages.

Post office:

In the district 351 villages do not have the post office; the same is available to 334 villages within 5 kms, and the remaining 17 villages avail this facility by covering a distance of 5-10 kms..

Telephone:

Telephone facility is available to 205 villages. For the remaining 237 villages the same can be availed of at a distance of upto 5 kms.

Bus Service:

There are 86 villages do not have bus service available to them in the village and for them the same is available at a distance of up to 5 km.

Bank:

Rural banking, commercial as well as co-operative, seems to be lacking in the district. Commercial banking within the village is not available in 425 villages. Among them 378 villages avail this facility at a distance of less than 5 kms, for 43 villages it is available at a distance of 5-10 kms and for the remaining 4, the villagers have to travel a distance of 10 kms. and above to avail this amenity.

Likewise, Co-operative banking is not available in 433 villages. Among them 270 villages avail it within 5 kms, 151 villages avail it within 5-10 kms., while for 12 villages cooperative banking is available at a distance of more than 10 kms.

Agricultural Credit Societies:

Out of 306 villages for whom Agricultural Credit Societies are not available, the same is available at a distance of upto 5 km in respect of 295 villages and at a distance of 5-10 kms in case of 11 villages..

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport commun-ications $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows that 141 villages are located within 5 km from the nearest town in the district, 291 villages in the distance range of 5-15 kms and 10 villages within 16-50 kms from the nearest statutory town.

Among 141 villages in the distance range of less than 5 km, educational facility is available to 131 (92.9%) villages, medical facility to 72 villages (51.1%), 29 (20.6%) villages have post office, 82 (58.2%) villages have telephone, 108 (76.6%) villages have transport communication facility, one village (0.7%) has a bank and 51 (36.2%) of the villages have availability of agricultural credit societies. The maximum numbers of villages (291) fall in the distance range of 5-15 kms. and among them educational facility is available to 278 (95.5%) villages, medical facility to 97 (33.3%) villages, post office to 62 (21.3%) villages, 121(41.6%) villages have availability of telephone, transport and communications to 242 (83.2%) villages, 22 (7.6%) villages have banks, and 82 (28.2%) villages have

agricultural credit societies. There are ten villages in the distance range of 16-50 km and all of them have educational facility. Two each of the villages have medical and telephone facility, transportation communication facility is available to seven villages, and three have agricultural credit societies. None of the villages in this distance range have either a post office or any bank.

The villages under all the distance ranges are approachable by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 presents distribution of villages by population ranges and amenities available.

Out of 442 villages, 117 have a population of less than 500, 188 fall in size class 500-999, 115 have population in the range of 1000-1999, 21 are in the range of 2000-4999, and one village belongs to size class 5,000-9,999.

Educational facility is available to cent per cent of the villages under various size classes, barring size class 1-499 where 94 (80.3%) villages have this facility.

Medical facility is available to 28 (23.9%) of the villages in size class 1-499, 63 (33.5%) villages in the range of 500-999, 64 (55.7%) of the villages with population 1,000-1,999 and 15 (71.4%) villages in size class 2,000-4,999. The single village falling in the size class 5,000 – 9,999 is also equipped with medical facility.

Improved drinking water is available to all the villages in different size classes.

One – fifth (20.6%) of the villages in the district have post office. Villages in the higher size class are better equipped. Only 8.5 per cent of the villages in the smallest size class of 1 – 499 have post office and this proportion progressively increases to 12.2 per cent for size class 500 – 999, 37.4 per cent for size class 1,000 – 1,999, and 66.7 per cent of villages in category 2,000 – 4,999. The sole village in size category 5,000 – 9,999 also has post office.

In the district 205 (46.4%) of the villages have telephone facility and this too is more of the characteristics of the bigger villages. The village in size class 5,000 – 9,999 has availability of

telephone and this percentage is 66.7 for villages in size class 2,000 – 4,999, 70.4 per cent for size class 1,000 – 1,999 and 55.9 per cent for the villages in range 500 – 999.In the smallest size class of less than 500 only four (3.4%) of the villages have telephone facility.

The status of transport communications is relatively better as the same is available to 357 (80.8%) of the villages in the district. Among different size classes this percentage varies between 70.9 per cent in category of less than 500 to cent per cent in size class 5,000 – 9,999.

Only one in every twenty (5.2%) of the villages have bank in the district. Besides one village in size class 5,000 – 9,999, one – third (33.3%) of the villages in size class 2,000 – 4,999 have this facility, while the corresponding percentage is less than 10 per cent for all other categories.

In the district 30.8 per cent of the villages in the district have availability of agricultural credit societies. Among different size classes this percentage gradually improves from 13.7 per cent in size class of less than 500 to 25.0 per cent under category 500 – 999, 50.4 per cent in the range 1,000 – 1,999, 66.7 per cent in case of villages in size class 2,000 – 4,999 and the single village belonging to the range of 5,000 – 9,999 has this facility.

All the villages in the district have approach by pucca road and availability of power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Khamanon	72	18,504	92.0	99.0
2	Bassi Pathana	87	18,399	91.5	97.9
3	Amloh (P)	98	25,292	91.0	94.5
4	Sirhind (P)	102	28,731	91.5	97.6
5	Khera (P)	83	20,504	84.8	97.4
	District Total:	**442**	**111,430**	**90.2**	**97.1**

Note : - Cultivable area = irrigated area + unirrigated area

The distribution of villages according to land use by C.D.block is presented in Table 42. The district has a rural area of 111,430 hectares out of which 90.2 per cent is cultivable. The percentage of cultivable area varies from 92.0 per cent in Khamanon C.D.block and 84.8 per cent in Khera C.D.block. Further, 97.1 per cent of the cultivable area in the district is irrigated. Among the C.D. blocks the proportion of irrigated area varies between 99.0 per cent in Khamanon and 94.5 per cent in Amloh C.D.block.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administ -ration	Public health and convenien-ces	Public works	Public institutions	Other (s)
1	2	3	4	5	6	7	8	9	10	11
1	V Khamanon (N.P.)	302.5	200.7	101.8	302.6	17.4	0.0	225.9	0.0	59.3
2	II Gobindgarh (M.Cl.)	1062.8	59.5	1003.3	867.4	300.5	40.3	336.8	-	189.8
3	IV Amloh (M.Cl.)	492.9	357.4	135.5	468.6	334.3	0.4	124.4	0.0	9.5
4	III Sirhind Fatehgarh Sahib (M.Cl.)	457.6	368.9	88.7	441.2	163.0	68.5	189.6	0.0	20.1
5	IV Bassi Pathana (M.Cl.)	445.5	376.8	68.7	396.6	194.5	0.0	196.4	0.0	5.7
	District Total	1119.8	258.7	861.1	949.3	348.8	55.0	381.5	0.0	164.0

Table 43 shows per capita receipt and expenditure in statutory towns in the district. On an average the district has a per capita receipt of Rs 1119.8. It is the highest in Gobindgarh (Rs. 1,062.8) which is more than double of the any other town in the district. Out of the total per capita receipt Rs 258.7 comes through taxes and Rs 861.1 is obtained through other sources.

The per capita expenditure incurred in the district amounts to Rs 949.3 and major part of which is consumed for public works (Rs 381.5) and general administration (Rs 348.8). The per capita expenditure on public health and conveniences and other(s) is Rs. 55.0 and Rs. 164.0 respectively.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary/ Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Amloh (MCI)	5.5	2.4	1.6	1.6	0.0
2	Bassi Pathana (M.Cl.)	3.7	2.6	2.1	1.6	0.5
3	Khamanon (NP)	6.8	3.4	2.3	1.1	0.0
4	Gobindgarh (M.Cl.)	3.0	1.0	0.8	0.5	0.3
5	Sirhind Fatehgarh Sahib (M.Cl.)	3.4	2.0	2.0	1.4	0.2
	District Total	**3.6**	**1.8**	**1.5**	**1.1**	**0.3**

Table 44 shows number of schools/colleges per 10,000 of population for towns. In the district there are 3.6 primary schools, 1.8 junior secondary/middle schools, 1.5 secondary/matriculation schools, 1.1 senior secondary school and 0.3 colleges per 10,000 of population. In other words, there is a primary school after a population 2,778, junior secondary/middle school for every 5,555 persons, secondary/matriculation school for 6,667 persons, senior secondary school for 9,091 populations and a college for a population of 33,333.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Amloh(MCI)	43
2	Bassi Pathana (M.Cl.)	21
3	Khamanon(NP)	16
4	Gobindgarh(MCI)	27
5	Sirhind Fatehgarh Sahib(MCI)	20
	District Total	**25**

Table 45 shows number of beds in medical institutions in towns per 10,000 of population. The district on an average has 25 beds per 10,000 of population. The number of beds per 10,000 population is the highest in Amloh town (43). The ratio between the two i.e. the number of beds vis -a - vis population is below the district average in the remaining four towns except Gobindgarh.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Amloh	12,689	2,600	20.5
2	Sirhind Fatehgarh Sahib	49,825	8,826	17.7
	District Total	**62,514**	**11,426**	**18.3**

Table 46 shows proportion of slum population in towns in the district. Amloh and Sirhind – Fatehgarh sahib are the two towns, which have reported slum population. There is no slum population in the remaining three towns in the district.

These two towns have a population of 62,514 out of which 11,426 (18.3%) is living in slums. In Amloh one – fifth (20.5%) is living in slums while the corresponding percentage is 17.7 in Sirhind – Fatehgarh Sahib.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Amloh (MCI)	Agricultural Implements	Wheat
		Iron Patti & Girders	Finished Iron Goods
		Plastic Pipe	Finished Plastic Pipe
2	Bassi Pathana (MCI)	Sewing Machine Parts	Vegetable
		Wooden Furniture	Wheat
		Drill	Sewing Machine Parts
3	Khamano (NP)	Cattle Feed	Rice
		Paneer	Vegetables
		Milk	Rice Husk
4	Gobindgarh (MCI)	Iron Bars Flat	Iron Barsflat, Girders channel
		Girders Steel Channel	Food Grains
		Rolling Mill Machinery	Rolling Mill Machinery
5	Sirhind Fatehgarh Sahib (MCI)	Centrifugal Pumps	Centrifugal Pumps
		Sewing Machine Parts	Truck Bodies
		Agricultural Implements	Sewing Machine Parts

Table 47 shows town wise most important commodities manufactured in the town and exported. Each town has its own characteristic as is revealed by this table. The manufacture of agricultural implements is the most important commodity in Amloh; it is sewing machine parts in case of Bassi Pathana, cattle feed in Khamanon and centrifugal pumps in Sirhind Fatehgarh Sahib. Gobindgarh is famous for manufacture of iron bars flat, girders steel channel and rolling mill machinery.

Iron bars flat/girders channel and rolling mill machinery are the key items of export from Mandi Gobindgarh, while Sirhind Fatehgarh Sahib is famous for the export of centrifugal pumps and truck body building. Wheat in Amloh, rice in Khamanon and vegetables in Bassi Pathana are the most important commodity exported.

(x) Brief Analysis Based on Houses and Household Amenities

TABLE 48: HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes

	Median number of rooms	1	1	1	1	1	1	-	-	-

Data Source: Census of India 2001, H– Series: "Tables on Houses, Household amenities and Assets".

In the district 82,951 households are living in owned houses , 7,616 are residing in rented houses and 2,057 households fall in the category of 'others' i.e. neither owned nor rented. This reflects that 89.6 per cent of the households are living in owned houses, 8.2 per cent in rented houses and remaining 2.2 per cent in the category of 'others'.

Among the households living in owned houses, 15,081(18.2%) have one room, 25,301(30.5%) two rooms, 19,526 (23.5%) three rooms and 22,694 (27.4%) have more than three rooms. This shows that the majority of the owned houses have two rooms. A small number of 349 (0.4%) households are living in houses with no exclusive room.

By and large a similar pattern is observed in both the rural and urban areas. In rural areas, among the owned houses 18.9 per cent of households are living in houses having one room; 30.5 per cent households are residing in houses which have 2 rooms, 23.0 per cent having 3 rooms and 27.3 per cent with more than 3 rooms; the corresponding percentages for urban areas are 16.1, 30.6, 25.0 and 27.6 per cent respectively. Further more, 0.4 per cent of rural households and 0.6 per cent of urban households are residing in owned census houses which do not have any exclusive room.

Among the scheduled caste households living in owned houses in the district, 0.3 per cent have no exclusive room, 30.5 per cent of the households have one room, 37.9 per cent two rooms, 19.1 per cent have three rooms and 12.2 per cent of the households are living in owned houses with more than 3 rooms.

TABLE 49 PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT ,SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sr No.	District/Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temp-orary	Permanent	Semi-permanent	Temp-orary	Perma-nent	Semi-permanent	Temp-orary

		(35.8)	(18.4)	(18.7)	(27.2)	(17.8)	(18.8)	(54.1)	(21.4)	(18.4)
4	Khamanon	12,942	878	371	11,564	813	354	1,378	65	17
		(15.4)	(13.6)	(19.5)	(20.1)	(15.2)	(23.8)	(5.1)	(6.0)	(4.1)

Table 49 shows percentage distribution of households by tahsil living in permanent, semi permanent and temporary houses. Out of 84,280 households living in permanent houses in the district, 35.8 per cent are in Amloh tahsil, 33.2 per cent in Fatehgarh Sahib, 15.6 per cent in Bassi Pathana tahsil and 15.4 per cent in Khamanon tahsil.

The percentage share of households living in semi-permanent houses of the district shows a variation of 43.8 per cent in Fatehgarh Sahib tahsil and 13.6 per cent in Khamanon tahsil.

In the district, 1,903 households are living in temporary houses and they make 2.1 per cent of the total households.

Out of the total households living in permanent houses, 57,408 (68.1%) are in rural areas and 26,872 (31.9 %) in urban areas. Likewise percentage of households living in semi-permanent houses in rural and urban areas is 83.1 and 16.9 per cent respectively. There are 1,903 households living in temporary houses out of which 1,485 (78.0%) are in rural areas and 418 (22.0%) in urban areas of the district.

Data source: Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

Table 50 shows proportion of households having improved drinking water source, electricity, bathroom, toilet and drainage connectivity.

Improved drinking water:

Households having tap, hand pump, and tube well as the source are grouped as having improved drinking water facility. In the district improved drinking water facility is available to 98.0 per cent of the households, the corresponding figures for the rural and urban areas being 97.7 and 98.8 per cent respectively. The trends, by and large, are the same among the tahsils in the district.

Electricity:

Electricity as the source of lighting is available to 96.6 per cent households in the district; the corresponding figures for rural and urban areas are 96.0 and 98.0 per cent respectively signifying that the rural areas do not lag behind their urban counterpart. The trends are, by and large, the same for all the tahsils.

Bathroom:

Bathroom is available to 77.5 per cent of the households in the district. Even in rural areas this facility is available with 74.3 per cent of the households compared with 84.8 per cent of the urban households.

The tahsils do not display any significant variation among themselves in this regard; it is the highest in Bassi Pathana (79.5%) closely followed by Amloh (79.0%), Khamanon (78.3%) and Fatehgarh Sahib (74.7%).

Toilet:

Three out of every five households (60.2%) have toilet facility available to them. Among the tahsils this percentage varies between 73.2 per cent in Amloh and 48.4 per cent in Bassi Pathana.

Almost one-half (48.9%) of the households in rural areas have toilet facility as compared to 85.7 per cent in urban areas. The availability of toilet facility in rural areas shows a variation of 55.4 per cent in Amloh tahsil and 39.6 per cent in Bassi Pathana tahsil. Likewise, in urban areas it varies between 93.4 per cent in Amloh and 71.3 per cent in Khamanon tahsil.

Data Source: Census of India 2001, II– Series: "Tables on Houses, Household amenities and Assets".

Table 51 shows distribution of households by availability of separate kitchen and type of fuel used for cooking.

In the district, for two out of every five households (41.0%) cow-dung cake is the most dominant fuel being used for cooking. This percentage is as high as 59.1 per cent in Khamanon tahsil. In rural

areas 56.3 per cent of households are using cow-dung cake and this percentage is almost ten times that of the urban (6.2 %) in the district.

Cooking gas (LPG) is the predominant fuel used for cooking in 31.2 per cent of the households. The percentage is even higher in Fatehgarh Sahib (35.0%), Bassi Pathana (33.6%) and Amloh (32.5%) tahsils.

The use of cooking gas in rural areas of the district is also quite significant. For one out of every five rural households (19.1%), LPG is the main fuel for cooking. Among tahsils, this percentage varies between 24.0 in Bassi Pathana and 14.3 in Amloh. In urban areas LPG is the main fuel used for cooking in 58.8 per cent of the households and this percentage is thrice that of the rural. In Fatehgarh Sahib (68.6%) and Bassi Pathana (68.5%) more than two – thirds of the households are using LPG for cooking in the area of the district.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET

Sr. No.	District/ Tahsil	Total/ Rural/ Urban	Total number of house-holds	Total number of households availing banking service	Availability of assets

Data Source: Census of India 2001, H– Series: "Tables on Houses, Household amenities and Assets".

Table 52 shows number of households availing banking services and number of households having each of the specified assets. Out of 92,624 households in the district, 52,407 (56.6%) are availing banking services; 36,118 (39.0%) have radio, transistor; 65,253 (70.4%) television; 17,570 (19.0%) telephone; 74,192 (80.1%) bicycle; 37,400 (40.4%) scooter, motorcycle, moped and 5,649 (6.1%) have car/jeep/van. The over all scenario of availability of assets in the district can be graded as fairly good. Nevertheless, 6,077 (6.6%) of the households have none of these assets available to them.

(xi) Places of tourist, religious, historical or archeological importance

Gobindgarh:-

It is situated at about 37 km. north-west of Rajpura on the Grand Trunk Road and is connected by road with Amloh and Nabha. The town is of recent origin and is known as Steel Town of Punjab as large number of iron and steel re-rolling mills have come up in and around this town. It was earlier part of Nabha State, whose erstwhile rulers provided all the assistance and encouragement in the development of industry at this place. It is the main supplier of iron and steel products in the state and to some neighbouring states.

Sirhind:

It is located at about 26 km. north –west of Rajpura on the Grand Trunk Road and is connected by road with Morinda and Patiala. It is a railway junction on the Delhi-Amritsar railway line. The Sirhind-Una railway line starts from here. The town is of quite an antiquity. There are different version about the founding of the town. According to the first version it was founded by Sahir Rao or Loma Rao, a descendent of Krishna, who ruled at Lahore from 531 Sambat. It was named as Sahir Ant (Boundry of Sahir), which corrupted to Sirhind the present name. According to the second version it was founded by Feroze Shah III and was named as such which was derived from Sih (lion) and Rind (forest) meaning 'lions' forest ' According to another version it was named as such as it was considered 'Sir-Hind' Head of India' because of its strategic location. It is said that Feroze Shah dug out a canal from the Satluj which once flowed nearby. The canal has now converted into a choe which flows near the town. In 1,704 Wazie Khan, or Wazir Khan, the Governor of Sirhind bricked alive the two sons of Guru Gobind Singh ji, the 10th Sikh Guru. In 1,760 under the command of Banda Bahadur the Sikhs repeated their attack on Sirhind in 1,762 and killed its new Governor Zain Khan. Thereafter it fell in the hands of Baba Ala Singh and became part of Patiala State. The Sikhs looked upon this place with contempt and hatred and made kit part of Amargarh Nizamat and fixed its tahsil headquarters at Bassi.

There are number of places of historical and archaeological interest in the town. The Aam Khas Bagh used to be residence of the Moghul Governor and was connected with fort through a subterranean tunnel. Now it is being looked after by the Horticulture Department as a garden and nursery. The Jahaji Haveli (looking like a ship) built by Diwan Todar Mall, the mosque built by Sadna, a buture by profession but of saintly disposition, Dear Baba Dyalpuri with a beautiful temple, Dera Baba Vidyagar and Luxmi Narain Temples are some other important place. Roza Taj Bibi entombs remains of Subhan, daughter of Behlol Ludhji. Besides there are mausoleums of two queens Haj-un-Nisa and Taj-un-nisa known as Haz-o-Taj.

Fatehgarh Sahib:

It is a village which is located at a distance of about 5 km. on the Sirhind-Bassi road and is a railway station of the Sirhind-Una railway line. It is the tahsil and sub-divisional headquarter of the same name. The place derives its name from Baba Fateh Singh, the younger of the two sons of Guru Gobind Singh who were bricked alive in the fort located here. The place also signifies victory of Sikhs over Sirhind under Baba Banda Bahadur. Maharaja Karam Singh of erstwhile Patiala State renamed the place as Fatehgarh Sahib. Earlier in 1710 Banda Bairagi raised a memorial over the remains of the fort where the two martyrs were bricked alive.

The place is a centre of pilgrimage for the Sikhs as Gurdwara Shri Fatehgarh Sahib is located here. The Gurdwara has two gates. One named after Banda Bahadur and the other after Maharaja Yadvindra Singh of Patiala. In the basement of the gurudwara, there is an old wall of small bricks in which two martyrs were bricked alive. On one side of the gurudwara is a memorial in the shape of a platform called Chhe Hazar Shahidan Da Katalgarh Angitha, where Banda Bahadur cremated bodies of 6000 Sikh martyrs who died during the attack on Sirhind. There is another gurdwara called 'Burj Mata Gujri' where Mata Gujri, mother and two sons of Guru Gobind Singh were detained before

martyrdom. Gurdwara Bibangarh Sahib' is another place of pilgrimage where bodies of two martyrs and their grand mother were preserved before cremation. 'Gurdwara Jyoti Sarup' is another gurdwara where bodies of Mata Gujari and two Sahibzadas were cremated, after the piece of land was purchased by Todar Mal. This gurdwara was first built by Banda Bahadur but later remodeled by Maharaja Karam Singh of Patiala who added the three upper stories. Another gurdwara known as Gurdwara Shahib Ganj' is located between Gurdwara Fatehgarh Sahib and Sirhind where 40 bullock carts laden with the bodies of the slain Sikhs were ceased and cremated. A Muslim shrine known as Raza Sharif (mausoleum of Mujaddid Alf-i-Sani) is located towards north-east of Gurdwara Fategarh Sahib.

A big fair is held on martyrdom from 11-14 Poh of Bikrami Sambat which is participated by lakhs of Sikhs. Also an annual fair (Urs) is held on the Roza Sharif on the death anniversary of the Saint which is participated by pilgrims from all over India and Pakistan. The saint breathed his breath last on 10th December, 1625. Besides there is a Khangah of Mian Bandgi Sahib which is located half a mile west of Roza Sharif and revered by Muslims.

Sanghol:

Sanghol is a village in khamanon tahsil on Ludhiana-Chandigarh Road. It leis at a distance of 40 kms. from Chandigarh. It is also known as Ucha Pind. The new habitation is said to have been constructed from the bricks dug out from the old mound. The coins and antiquities from the bricks dug out from the old mound. The coins and antiquities found from this place clearly establish the historical sequence from Gupta period to the Sultanate period. Among the coins the earliest coin is a gold coin of Kumar Gupta and the last one bears the name of Sultan Balban. Some of the stone sculptures recovered from Sanghol bear marked Mongoloid features. Sanghol is said to be the ancient Sanghol Deep ruled by Raja Sang. The famous Rup Basant brothers, who figure in legendry history, are said to have belonged to Sanghol. The mound is still 70-80 feet from the surrounding area. The recent excavations from it have thrown very useful information about its antiquity and old connections. The findings and relics have been displayed in a museum set up by Government of Punjab on the main Ludhiana- Chandigarh road.

Amloh:

During the period of princely rule Amloh was a Nizamat headquarter (district) of erstwhile Nabha State. After the independence on the formation of PEPSU in 1948, it was merged with Patiala district and made a sub tahsil of Nabha Tahsil. On 13 April 1992, when Fatehgarh Sahib was made a separate district, Amloh was upgraded to the level of a subdivision. Amloh is situated on Nabha-Gobindgarh road and is at a distance of about 12 KM from Mandi Gobindgarh. It was originally founded by Fair Bakhsh, the governor of Sirhind. After the fall of the Sirhind in 1763, Amloh was annexed by Raja Hamir Singh, the ruler of Nabha State. It was given the status Nizamat headquarter. The major portion of the fort is in dilapidated condition. A sub divisional Complex has been constructed in one part of the fort.

Bassi Pathana:

It is located at about 8 km. from Sirhind Railway station and is a railway station on Sirhind-Una railway line. It is connected with Patiala (via Sirhind) and Chandigarh (via Morinda).It is said to have been founded in 1540 by an Afghan named , Haider Khan, who settled here during the reign of Sher Shah Suri. Since it was originally settled by Pathans, It was named as Bassi but is also addressed as Bassi Pathana. In 1763, it was occupied by Sardar Diwan Singh of the Dallewala Misl who built here a fort which was also as lock up. Later on it passed on to the possession of Maharaja of Patiala. Before partition, there was a place called Darbar Sahib where a hair of Prophet Mahammads beard was kept in 2 glass show- cases to be displayed on his birthday and his death anniversary. Large number of Muslims used to pay a visit to have a didar of the relic which was, however, taken away to Pakistan in 1947. Tehe Kasturba Sewa Mandir, Rajpura, is running a Khadar Bhandar, where Khandar, woolen blankets, soap, etc. are manufactured. Besides, some industrial units engaged in the

manufacture of sewing machine parts, scientific instruments and agricultural implements are located here.

(xii) Scope of Village and Town Directory

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village, against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

Town Directory:

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV- A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc. Hence the data for the towns of Fatehgarh Sahib has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of Fatehgarh Sahib District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class, name Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns of Fatehgarh Sahib District. The income and expenditure for the towns of Fatehgarh Sahib have been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the scheduled castes/scheduled tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire

fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

Statement V gives information regarding medical, educational, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Fatehgarh Sahib which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from towns and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Town. Information on number of banks available in the town has been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII shows the civic amenities available to all the 5 towns having slums falling in the jurisdiction of Fatehgarh Sahib District.

Part - A
VILLAGE AND TOWN DIRECTORY

Section-I
Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number :

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village :

The name and location code number of the village is shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village :

The area of the villages in hectares is given. Wherever the area figures were not furnished by the concerned department, the column is left blank.

Column 4 : Total population :

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households :

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph office, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational :

Classes upto class V are included in Primary School comprising nursery school, kindergarten school, Pre-basic school, pre-primary school and junior basic school.

Classes from VI to VIII are included in the middle school.

Classes from IX and X are included in Higher secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr.
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M (4), etc.

Column 7 : Medical :

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water :

The type of drinking water supply sources available within the village is indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone :

It is indicated by following codes :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks :

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available within the village, distance of the nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies :

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given.

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities:

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in these columns. If not available, the particulars of the nearest place with the facility exists is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications :

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways, they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village :

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance :

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply :

Availability of Power Supply in the village, whatever may be the form of its use, is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine :

If village receives any News Paper/Magazine the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured :

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use :

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare (s) up to one decimal. Desh '-' is

recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Blockwise having primary, middle, High and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A and B The appendices show the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates CD Block wise number of villages.

Appendix-IX Shows number of different types of girls schools in a village.

C.D.BLOCK BASSI PATHANA
TAHSIL BASSI PATHANA
DISTRICT FATEHGARH SAHIB

BOUNDARY, DISTRICT	
" TAHSIL	
" C.D.BLOCK	
" VILLAGE WITH P.L.C.NUMBER	00736700
HEADQUARTERS: C.D. BLOCK	
POPULATION SIZE CLASS OF VILLAGES:BELOW 200,200-499,500-999,1000-4999,5000 AND ABOVE	
UNINHABITED VILLAGE WITH P.L.C.NUMBER	X
URBAN AREA WITH LOCATION CODE	V
IMPORTANT METALLED ROAD	
RAILWAY LINE WITH STATION,BROAD GAUGE	RS
POST OFFICE/TELEPHONE OFFICE/POST AND TELEGRAPH OFFICE	PO/TO/PTO
SECONDARY OR SENIOR SECONDARY SCHOOL	S
PRIMARY HEALTH CENTRE	
BANK	B

C.D. BLOCK BOUNDARY EXCLUDES STATUTORY TOWN (S)

BOUNDARIES ARE UPDATED UPTO 1.1.2000

TOTAL AREA OF C.D BLOCK (In Sq. Km)	183.99
TOTAL POPULATION OF C.D. BLOCK	59,122
TOTAL NUMBER OF TOWNS IN C.D BLOCK	1
TOTAL NUMBER OF VILLAGES IN C.D. BLOCK	87
DISTANCE FROM DISTRICT HEADQUARTERS (In Kms)	6

Based upon Survey of India map with the permission of the Surveyor General of India.

Section-II
Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects :

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 & 8 :

Name or the State headquarters, District headquarters and Tahsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory :

Column 6 : Road length (in kms.) :

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage :

Generally, sewerage system is implied by the net-work of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines :

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil :

The various prevalent methods of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt

Sewerage	S
Others	O

Column 13 and 14 : Water supply :

Source and capacity of storage system. The following codes are used in these columns :

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(i)	Over Head Tank	OHT
(ii)	Service Reservoir	SR
(iii)	River Infiltration Gallery	RIG
(iv)	Bore Well Pumping System	BWP
(v)	Pressure Tank	PT

The information on major sources of water supply is given in column 13 and the storage capacity against each in kilo-litres (in bracket) is presented in column 14.

Column 15 : Fire Fighting Service :

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections) :

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, they may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes :

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institutes	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like-Applied Art/Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/ Intermediate/ Senior Secondary/ PUC/ Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle schools or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres :

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats :

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities :

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms:

Number of public libraries and reading rooms available in the referent town is recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded in these columns.

Column 9 : Number of Banks :

Number of Banks available in the referent town both Commercial and Co-operative banks is recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies:

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town is recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century, the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting from October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices

which were specially set up for this purpose. The individual Scheduled Caste and the Scheduled Tribe population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Caste/Tribe returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribe at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes and Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts, Cities and Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main

workers were presented into four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/CD Block/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4. Village Primary Census Abstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, then portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of Tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration, block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure-I

Number of villages under Gram Panchayat:

With the Constitution (73rd amendment) Act, 1992, the Census Organisation felt it necessary to provide population data for the territorial area of Panchayat. This required precise details of the territorial area of each Panchayat so that delineation of enumeration blocks (EBs) to be allotted to the enumerators could be done to meet this requirement.

It required careful delineation of enumeration blocks by the Charge Officers to ensure that EBs do not cut across the territorial area falling in the Panchayat. Different situations were well perceived. A Panchayat could consist of only one village or a number of complete villages. There could be another situation where the Panchayat may consist of some complete villages and parts of villages. Still there could be another situation where Panchayat could consist of a number of villages etc.

An exhaustive exercise was done to prepare Panchayat level data. However, we came across following types of situations which made it difficult to compile the Panchayat level data:

i) Some of the Panchayats have one or more than one village.

ii) Some of the Panchayats have only a part of the village.

iii) Some Panchayats include full village (s) as well as part of village (s).

All this has not made it feasible for us to present Panchayat level PCA.

Annexure-II

Age Specific Fertility and Marital Fertility Rates:

The following table shows age specific fertility rates in Punjab as well as in Fatehgarh Sahib district for the years 2001 and 1991. The trends are observed almost identical both for the State and the district for 2001. Among different age groups, the fertility rate is the highest in age-groups 20-24, 25-29 and 30-34. The trend is the same for rural and urban areas also.

AGE SPECIFIC FERTILITY RATES 2001 AND 1991

The following table shows age specific marital fertility rates in Punjab as well as in Fatehgarh Sahib district for the year 2001 and 1991. The trends observed are similar to those of total fertility levels. Surprisingly in Fatehgarh Sahib district, ASMFR shot up in all the age groups in the year 2001. ASMFR is higher in rural as compared to urban in Fatehgarh Sahib district in age groups 15-19, 20-24 and it is lower in all other age groups.

AGE SPECIFIC MARITAL FERTILITY RATES 2001 AND 1991

Annexure-III

Measures of Fertility and Mean Age At Marriage Fertility Levels :

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally is assessed by relating number of births to size of some section of the population, such as number of married couples and number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever married women and the last question was related to currently married women only. The measures of fertility worked out are based on the F-Series Tables of 1991 & 2001 Census pertaining to Punjab State.

The following table presents important indices of fertility in Punjab 2001 and 1991 separately for total, rural and urban areas the figures for Census 1991 for Fatehgarh Sahib district are not available. There has been significant decline in the number of children ever born per ever married woman in the age group (45-49); the decline is relatively more in rural areas than urban in Punjab. Likewise, there has been a significant decline in the child-women ratio also. However, the number of married couples per 1,000 population has gone up in the state and in rural areas of the district and it is vice-versa for urban areas. But in the totality, number of married couples per thousand population has gone up by 1 point from 160 to 161 in the year during 1991-2001.

IMPORTANT INDICES OF FERTILITY

Fertility indices	Fatehgarh Sahib						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991

Annexure IV

MOVEMENT OF POPULATION

What is migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence, if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International Migration:

The migrational movements are of three types- (i) Migration within the State itself with its components-(a) Migration within the district of enumeration (intra-district migration), (b) Migration from one district of the state to another district of the State/UT (inter-district migration), (ii) Migration from one State to another state of the country (inter-state migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why the people migrate ?

For the first time in the census, reasons for migration were elicited in 1981. Keeping operational constraints in view, the reasons for migration were broadly categorized as (1) employment, (2) education, (3) marriage, (4) family movement and (5) other reasons. Other Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration:

The growth of population of a particular place depends upon the biological variates such as mortality and fertility and migration. The knowledge of trends in migration helps in future planning of a place.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF BIRTH

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Migrants born within the state of enumeration	N.A.	N.A.	N.A.	171,886	432,27	128,659
				(77.8)	(61.5)	(85.4)
(i) Migrants born elsewhere in the district of enumeration	N.A.	N.A.	N.A.	61,204	19,683	41,521
				(27.7)	(28.0)	(27.6)
(ii) Migrants born in other districts of the State	N.A.	N.A.	N.A.	110,682	23,544	87,138
				(50.1)	(33.5)	(57.9)
(II) Migrants born in other states of India	N.A.	N.A.	N.A.	40,221	21,921	18,300
				(18.2)	(31.2)	(12.2)
(III) Migrants born in other countries	N.A.	N.A.	N.A.	8,746	5,107	3,639
				(4.0)	(7.3)	(92.4)
(IV) Unclassifiable	N.A.	N.A.	N.A.	0	0	0
				(0.0)	(0.0)	(0.0)
Total Migrants	N.A.	N.A.	N.A.	220,853	70,255	150,598
				(100.0)	(100.0)	(100.0)

The above table gives distribution of inmigrants by place of birth in Fatehgarh Sahib district as per 1991 and 2001 Censuses. Out of the total inmigrants in 2001, 77.8 per cent are born within the state of enumeration and 18.2 per cent born in other states/Union Territories of the country while 4.0 per cent born in other country. The figures for 1991 are not available.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF LAST RESIDENCE

Last residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Last residence within the state of enumeration	N.A.	N.A.	N.A.	176,850	45,074	131,776
				(78.8)	(63.0)	(86.3)
(i) Elsewhere in the district of enumeration	N.A.	N.A.	N.A.	67,209	21,728	45,481
				(30.0)	(30.4)	(29.8)
(ii) In other districts of the state of enumeration	N.A.	N.A.	N.A.	109,641	23,346	86,295
				(48.9)	(32.6)	(56.5)
(II) States in India beyond the state of enumeration	N.A.	N.A.	N.A.	39,983	21,833	18,150
				(17.8)	(30.5)	(11.9)
(III) Last residence outside India	N.A.	N.A.	N.A.	7,461	4,612	2,849
				(3.3)	(6.4)	(1.9)
(IV) Unclassifiable	N.A.	N.A.	N.A.	0	0	0
Total	N.A.	N.A.	N.A.	528,242	193,884	334,358
				(100.0)	(100.0)	(100.0)

The above table gives distribution of inmigrants by place of last residence in Fatehgarh Sahib district. As per 2001 Census, 78.8 per cent of the inmigrants had the place of last residence within the state but out of the place of enumeration. Another 48.9 per cent have place of last residence in other states/UTs within the country, while 3.3 per cent have their last residence out side India.

Annexure V

Main Religions:

The instructions for recording this information are the same as in 1991. A brief analysis based on 1991 and 2001 Census data is presented below.

Question 7 of the Household Scheduled canvassed at the 2001 census pertained to religion of a person. The religion of the person was recorded as returned by the respondent. The six main religions in the country were recorded by using following codes:

Hindu	:	1
Muslim	:	2
Christian	:	3
Sikh	:	4
Buddhist	:	5
Jain	:	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Religious Composition of Punjab's Population:

The numerical strength of the six main religious communities in the State and Fatehgarh Sahib district in 2001 Census is as follows:

RELIGIOUS COMPOSITION OF POPULATION, PUNJAB AND FATEHGARH SAHIB 1991 AND 2001

Religious Communities	Punjab				Fatehgarh Sahib district			
	Total Population		Percentage in total population		Total Population		Percentage in total population	
	1991	2001	1991	2001	1991	2001	1991	2001
1	2	3	4	5	6	7	8	9
Hindus	6,989,226	8,997,942	34.4	36.9	96,706	1,22,656	21.3	22.8
Muslims	239,401	382,045	1.2	1.6	8,979	12,789	2.0	2.4
Christians	225,163	292,800	1.1	1.2	606	1,085	0.1	0.2
Sikhs	12,767,697	14,592,387	63.0	59.9	3,47,982	4,01,172	76.5	74.6
Buddhists	24,930	41,487	0.1	0.2	60	57	0.0	0.0
Jains	20,763	39,276	0.1	0.2	76	153	0.0	0.0
Others Religions and persuations	883	8,594	0.0	0.0	81	110	0.0	0.0
Religion not stated/ Unspecified	13,906	4,468	0.1	0.0	429	19	0.1	0.0
All Religions	20,281,969	24,358,999	100.0	100.0	4,54,919	5,38,041	100.0	100.0

As can be seen from the above statement, Sikhs form the predominant religious community in Punjab and they account for 59.9 per cent of the State's population according to the 2001 Census. The corresponding percentage for 1991 Census was 63.0 per cent. Hindus is the second largest religious community in the State and their share in the total population is 36.9 per cent which was 34.4 per cent in 1991 Census. This signifies that Sikhs and Hindus, the two most dominant religious communities in the state, together constitute 96.8 per cent of the state's total population. The share of Muslims, Christians, Buddhists and Jains in the total population is 1.6, 1.2, 0.2 and 0.2 per cent respectively.

As per 2001 Census, in Fatehgarh Sahib district, Sikhs constitute 74.6 per cent of the total population and this is higher than that of the state as a whole. Hindus, the second dominant religious community in the district, account for 22.8 per cent of the district's total population. Together, the Sikhs and the Hindus account for 97.4 per cent of the district's population. Muslims constitute 2.4 per cent and the share of Christians is only 0.2 per cent.

Annexure VI

Marital Status:

Current marital status of each individual, irrespective of age, was obtained through Question 5 of the household schedule canvassed during 2001 census into following four categories:

1. Never married
2. Currently married
3. Widowed
4. Divorced or separated.

The instructions to enumerators for eliciting marital status were same as adopted in 1991 census. A brief analysis based on 1991 and 2001 census is presented here.

The following table exhibits data for Persons, Males and Females in percentage form regarding Marital Status.

MARITAL, STATUS OF POPULATION AS PER, 1991 AND 2001 CENSUS

Marital Status	Punjab						Fatehgarh Sahib					
	1991			2001			1991			2001		
	P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13
Total Population	100.0	100.0	100.0	100.0	100.0	100.0	N.A.	N.A.	N.A.	100.0	100.0	100.0
Never Married	51.5	55.4	47.1	48.7	53.1	43.8	N.A.	N.A.	N.A.	47.3	51.5	42.3
Married	45.1	42.3	48.2	47.2	44.6	50.2	N.A.	N.A.	N.A.	48.5	45.8	51.7
Widowed	3.3	2.2	4.6	3.9	2.1	5.8	N.A.	N.A.	N.A.	3.9	2.4	5.7
Divorced or Separated	0.1	0.1	0.1	0.2	0.2	0.2	N.A.	N.A.	N.A.	0.2	0.3	0.2
Un-Specified	0.0	0.0	0.0	0	0	0	N.A.	N.A.	N.A.	0	0	0

According to 2001 Census, the population of the State is recorded 24,358,999 comprising 11,871,211 (48.7%), never married, 11,499,566 (47.2%) married, 938,678 (3.9%) widowed and 49,544 (0.2%) divorced or separated. As per 1991 Census Punjab State had a population of 20,281,969 comprising 10,452,444 (51.5%) never married, 9,146,158 (45.1%) married, 673,569 (3.3%) widowed, 8,768 (0.1%) divorced or separated and 1,030 (0.0%) unspecified.

In Fatehgarh Sahib district, out of the total population of 538,041 as per 2001 census; 254,521 (47.3%) are never married, 261,143 (48.5%) married, 21,043 (3.9%) widowed, 1,334 (0.2%) divorced or separated. Thus, the patterns observed for the State and the district are almost identical.

Annexure VII

Sex and Educational level:

It has become customary for the Indian Census to obtain details of educational levels of the literates in the society. Question 13 of the Household Schedule canvassed during 2001 census aimed to elicit information on the highest educational level attained. The data so collected is put to public domain by classifying the population by sex and educational levels.

The following table shows percentage distribution of literates by educational level for Punjab State and Fatehgarh Sahib district as per 1991 as well as 2001 Census.

PERCENTAGE DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL AS PER 1991 AND 2001 CENSUS

Educational Levels	Total Rural Urban	Punjab						Fatehgarh Sahib					
		1991			2001			1991			2001		
		P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Below Primary	Total	21.8	20.9	23.1	20.0	19.7	20.4	N.A.	N.A.	N.A.	19.0	18.9	19.2
	Rural	24.2	22.9	26.2	22.9	22.3	23.7	N.A.	N.A.	N.A.	20.5	20.3	20.7
	Urban	17.6	17.2	18.2	15.5	15.6	15.4	N.A.	N.A.	N.A.	15.8	15.9	15.7
Primary but below middle	Total	27.9	25.3	31.7	25.6	23.7	28.3	N.A.	N.A.	N.A.	28.3	25.7	31.7
	Rural	31.8	28.4	37.0	29.3	26.6	33.0	N.A.	N.A.	N.A.	30.8	27.5	35.2
	Urban	21.2	19.7	23.3	19.9	19.0	21.1	N.A.	N.A.	N.A.	22.4	21.4	23.8
Middle but below matric	Total	18.1	19.0	16.7	16.9	17.5	16.1	N.A.	N.A.	N.A.	18.3	19.1	17.2
	Rural	18.5	19.8	16.7	17.7	18.5	16.8	N.A.	N.A.	N.A.	19.0	19.8	17.9
	Urban	17.3	17.7	16.8	15.7	16.1	15.1	N.A.	N.A.	N.A.	16.7	17.5	15.7
Matric but below graduate	Total	26.3	28.6	22.8	30.8	32.7	28.4	N.A.	N.A.	N.A.	29.4	31.2	27.1
	Rural	23.0	26.0	18.3	27.5	29.9	24.3	N.A.	N.A.	N.A.	27.2	29.5	24.1
	Urban	32.0	33.5	30.0	36.0	37.1	34.6	N.A.	N.A.	N.A.	34.7	35.4	33.8
Graduate and above	Total	5.9	6.1	5.7	6.6	6.4	6.7	N.A.	N.A.	N.A.	5.0	5.1	4.8
	Rural	2.5	3.0	1.8	2.5	2.8	2.2	N.A.	N.A.	N.A.	2.6	3.0	2.1
	Urban	11.8	11.9	11.8	12.9	12.2	13.7	N.A.	N.A.	N.A.	10.4	9.9	11.0

As per 1991 census 21.8 per cent of the literates in Punjab were below primary level of education, 27.9 per cent primary but below middle and 18.1 per cent middle but below matric. A little over one-fourth (26.3%) of the literates in the State were matric but below graduation. It was only 5.9 per cent of the literates who had attained graduation or above level of education.

According to 2001 census 20.0 per cent of the literates in Punjab are below primary level of education, 25.6 per cent primary but below middle and 16.9 per cent are middle but below matric; 30.8 per cent matric but below graduation. Only 6.6 per cent of the literates in Punjab are graduate and above. Whereas there is some decline in first 3 levels as compared to 1991, last 2 level exhibit slight improvements.

In the district 19.0 per cent of the literates are below primary and another 28.3 per cent are primary but below middle. By contrast, the percentage of literates with below middle and matric levels of education is greater in Fatehgarh Sahib district as compared to the State. In the district 18.3 per cent of the literates are middle passed as compared to state with 16.9 per cent. Likewise the percentage of matriculation, with 29.4 in Fatehgarh Sahib district is slightly lower than that of the State with 30.8 per cent. In respect of Graduate and above level, this district (5.0%) also lower than that of State (6.6%).

Annexure VIII

Distribution of Different Mother Tongues:

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood is recorded as the mother-tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. These may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Mother Tongue and Language data based on 1991 & 2001 Censuses is given here. The distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each) for the district by sex separately for rural and urban areas. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table is divided into two parts; Part A - Scheduled languages with the mother tongues grouped under each, and Part B-Non-Scheduled languages with the mother tongues grouped under each. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census are, basically, the designations provided by the respondents. These designations or mother tongue label need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects, the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1576 rationalized mother tongues in 1991 for the entire Country, which was further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.

NUMERICALLY BIGGEST LANGUAGE ARRANGED IN DESCENDING ORDER OF THE NUMBER OF SPEAKERS, 2001-1991
