# Gurudwara Nanaksar - Samadh Bhai

This Gurdwara is located in Village Samadh Bhai of District Moga in Punjab. The total area of the Gurdwara is 24 acres. This Gurdwara was established by Sant Baba Gurdev Singh Ji in the year 1964. On request of the Sangat of Samadh Bhai, the process of establishment of Nanaksar in Samadh Bhai was started by Sant Baba Ishar Singh Ji which was completed by Sant Baba Gurdev Singh Ji. Katha and Kirtan is carried out at this place both in the early morning and evening hours daily as per the Maryada of Nanaksar. Similarly the Akhand Path of Sri Sukhmani Sahib is carried out without any break. Each month, the day of Sankrant is celebrated at this Gurdwara. The Sangat from far and near take the holy bath in the Sarovar and then attend the Sri Sampat Akhand Paths of Sri Guru Granth Sahib Ji and Kirtan and Katha by renowned Ragiis.

# Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census , is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics, village-wise and town-wise, of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive Censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added to it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA which was restructured. Nine–fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and

recreational facilities. In town directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristics of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) in all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Inder Jit Singh, IAS, Director of Census Operations, Punjab. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General, (C&T) and Dr. I.C.Aggrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP), helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assistant Director. I am thankful to all of them and others who contributed to make this publication possible.

# Preface

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to also include village level data on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B - Primary Census Abstract, giving data for each village within the Community Development (CD) Block and each town in the district. The CD block maps included, presenting village level data, have been prepared by using computer assisted technology. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetters and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Shri D.K. Sikri, IAS, Additional Secretary, Registrar general, India and Census Commissioner and Shri J.K. Banthia, IAS, former Registrar General and Census Commissioner, India for their directions and support from time to time in accomplishing this arduous task.

In the directorate, at the outset we are beholden to Shri Inder Jit Singh, IAS under whose able guidance and direction as Director Census, Punjab, the census operations in the state were successfully completed.

Our thanks are also due to Shri D.R. Khanna, Ex-Deputy Director for getting the compilation of data and Shri Madhav Shyam, Ex-Deputy Director for drafting the specimen model which has been replicated in other DCHBs.

The great effort and hard work done by Shri Bhagirath Singh, Assistant Director, Sh. Rajender Prasad, S.I.Gr-I, Sh. B.S. Rai, S.I. Gr-I and Sh. C.K. Dutta, S.I.Gr-I are greatly acknowledged. Sh. Azad Kumar, S.I. Gr-III and Sh. H.S. Sudan, S.I.Gr-III deserved special thanks for having completed the publication work.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

# District Highlights - 2001 Census

1. Moga district is having same rank i.e. 11th in area and 11th in population in the state.
2. Moga is the most populous and Nihal Singhwala is the least populous tahsil.
3. The average population size of a village in the district (2,231) is higher than that of the state (1,311).
4. Kot Ise Khan (10,499) in Moga tahsil is the largest village by population size followed by Buttar (10,053).
5. There are 40 large size villages in the district with a population of 5,000 or more.
6. The decadal population growth rate in the district (15.0%) is lower than the state 20.1 per cent.
7. Moga district is relatively less urbanized (20.0%) than that of the state average (33.9%).
8. The sex ratio in the district (887) is higher than that of the state (876).
9. The child sex ratio in the district (818) is higher than the state sex ratio (798).
10. Moga district has a population of 8,94,854 comprising 4,74,139 males and 4,20,715 females.
11. Moga district makes 3.7 per cent of the total population of the State.
12. Out of the total population of the district 80.0 per cent is rural while only 20.0 per cent is urban.
13. The district has 33.8 and 6.3 per cent main workers and marginal workers respectively.

# ANALYTICAL NOTE

# Analytical Note

## (i) History and scope of the District Census Handbook

Ever since the beginning of first post independence Census of India 1951, the publication of District Census Handbooks (DCHBs) has become a regular feature of the Indian Census. Produced by the Census Organisation of Government of India on behalf of the State Government, the DCHB is a unique publication which gives the census as well as non-census data down to every village in case of rural areas and ward within the town/urban area in the state. It is recognized as one of the most comprehensive sources of information. Infact, this is the only publication which provides primary census abstract based on census, and non-census data on infrastructure and amenities available, such as educational, medical, postal and communicational at the sub-micro level. It is inter- alia used for delimitation of constituencies, formulation of local level and regional plans and serves as a valuable tool for district administration.

Undisputedly, DCHB has remained to be the most comprehensive and valuable product of the census organization ever since its initiation. It has always been the endeavour of the Census of India to enlarge the content and coverage of the data presented at every census. The DCHB series of 1951 Census contained important Census Tables and the Primary Census Abstract. At the 1961 Census, the scope of the DCHB was enlarged by including a descriptive account of the district, administrative statistics, census tables and the village and town directory. In 1971, the DCHBs were planned in three parts; Part-A included the village and town directory, Part-B included village and town wise primary census abstract, while the Part-C was meant to include analysis of census data and a write up covering social, cultural, historical and other important aspects. However, in some states/union territories Part-C remained confined to the district tables only.

During 1981 Census, some new features were added and the formats of village and town directory were restructured, somewhat. These volumes were published for each district in two parts. Part- A included village and town directory, while Part-B included primary census abstract (PCA) of every village and ward in town/urban area. The inclusion of scheduled castes PCA was the additional feature of the 1981 Census. The village directory of 1981 Census included new parameters viz; information on Adult literacy Centres, Primary Health Sub-Centers and Community Health workers in the village (s) to meet the requirement of the Revised Minimum Needs Programme. In addition, information on approach to the village was also provided for the first time in the village directory to help in taking stock of villages requiring road linkages in the district. Likewise, Statement IV-A included in the Town Directory aimed to provide data on slums so as to undertake development activities in such areas.

The manner of presentation of the DCHBs for the 1991 Census was, by and large, same as followed in 1981 Census. However, the format of PCA was slightly restructured in the 1991 Census for the benefit of data users. The village level data were presented Community Development (C.D.) block wise to cater to the needs of grass root level planning as envisaged under the five year plans. Ninefold industrial classification of the main workers was reintroduced by replacing the four-fold industrial categories adopted at the 1981 Census. In addition, the PCA also gave population in the 0-6 age group by sex essential for working out effective literacy rate, besides providing proportion of child population.

The DCHB 2001, the present volume, is the sixth in series. The pattern followed is, by and large, similar to that of the 1991 Census. Among the new features added, information on the availability of newspapers/magazines, banking facility, agricultural and non- agricultural societies, recreational and cultural facilities and income and expenditure of the village panchayat is mention. More important is that, it is for the first time in the history of Indian Census that Permanent

Location Code Number (PLCN) has been allotted to every village in the state to meet the demand from different organizations to study the village level data over a time spell. It is believed that the permanent location codes assigned to each village would help in tracing the precise location of a village on account of jurisdictional changes in the boundaries of various administrative areas.

**(ii) Brief history of the district**

Initially Moga was the part of Firozpur district. Later, on August 7th 1972, Moga tahsil became a part of Faridkot district. In the year 1995, Moga tahsil along with Bhagha Purana tahsil clubbed together to form a new district Moga. Now at present Moga district consists of three tahsils viz Nihal Singhwala, Bhagha Purana and Moga.

In the past, the Brar communities lived in Moga. They generally called themselves 'Sindhu Brars'. Another prominent community, who lived there were the 'Gils' an important section of Jats. The Gils says that they came from Raja of the Variah Clan of Rajputs, who ruled at Garhmathela. The name 'Gil' is explained by a story to the effect that the Raja had no children by his Rajputni wives and therefore married a Jat women. She born a son. But the other wives of Raja became jealous of her and exposed the newly born baby in a marshy spot in the jungle. The infant was accidently found by the king's minister and called Gil, from the palace where he was found, Gil, meaning moisture.

The Wadan Gils (totally there are twelve sections among Gils) were settled about the beginning of the 17th century in the south and west of Moga. The Barars of Sangar clan attacked them and took these places, and the Gils were driven further to the north. Then they established themselves about Chhirak, Chal and Moga as at present.

Peace was lastly established by the marriage of one of the daughter of Sangar Brars to one of the Gils. This alliance also helped in raising the Brars considerably in the social scale. After the marriage, the daughter of Sangar gave birth to two male children, 'Moga' and 'Vega'. The district was named Moga in the remembrance of the great 'Moga', who was a man of great importance among the Wadan Gils.

**Ancient Period**

The history of Moga district pertaining to the ***ancient period*** has been traced to the Indus valley civilization. A few sites explored in Moga district link it with the Indus valley civilization sites. The sites explored in Moga sub-division has been classified into Pre- Harappan and Late-Harappan period. The various types of pottery found here from the mounds explored lead to these conclusions.

**Medieval Period**

The period of history begins with the Mohammedan invasion of India. With the death of the ruler Bhimpala, the mighty Hindushahi dynasty of North western Hindustan which included the present area of 'Moga', came to an end. Then power went into the hands of Muhammedan's. After Sindh, the Punjab was considered to have become the next Muslim kingdom in India.

Kot Ise Khan which is one of the towns of Moga got its name from the great man 'Isa Khan'. Isa khan belonged to the family of Mokalsi (also called Mokal) who is believed to be the actual founder of Faridkot. Family disputes were common between Brars and Isa Khan. Later in a quarrel Isa Khan was killed by Brars and they became dominant. A large number of people living in Moga district, claim to be the descendants of the Brar community.

**The struggle for freedom**

During the British period, the active influence of the British in all the affairs of Moga district is quite evident. The people of Moga became restless due to the harassment of the British. Finally they raised their voice against the British and thus the 'Struggle for Freedom' was started. Many freedom fighters who were laurelled as revolutionaries belong to Moga district.

**Independence and its aftermath**

On the eve of Independence in 1947, the Faridkot state was being ruled by Raja Harinder Singh. Accordingly, with the rest of the country, Faridkot state and other areas that is Moga and Muktsar tahsils also became free from the British paramountcy. The most agonising factor during the process of independence was the mass migration. Almost majority of the Muhammadan population of 'Moga' district migrated to Pakistan and a large number of non-muslims from West Pakistan shifted to the 'Moga' district which distrupted its whole economy. Even though, the people of Moga area celebrated the achievement of Independence with great enthusiasm.

**(iii) Administrative set-up**

The State has experienced a large-scale jurisdictional changes after the 1991 census. The number of districts has increased from 12 in 1991 to 17 in 2001. The newly created five districts include Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. With the exception of Kapurthala district, all other 11 districts in the State have experienced inter-district jurisdictional changes of varying magnitude.

These 17 districts are distributed over four divisions. Jalandhar division includes districts of Gurdaspur, Amritsar, Kapurthala, Jalandhar, Hoshiarpur and Nawanshahr; Patiala division covers districts of Rupnagar, Ludhiana, Patiala, Fatehgarh Sahib and Sangrur. Firozpur division spreads over in districts of Firozpur, Moga and Muktsar, while Faridkot division embraces districts of Faridkot, Bathinda and Mansa.

All the districts of 1991 Census except Kapurthala has undergone intra-districts jurisdictional changes resulting in increase in the number of tahsils in the State from 46 in 1991 to 72 in 2001 Census. (In Punjab, Tahsil and Sub Division are synonymous to each other). Moga district spreads over an area of 2235.0 sq. kms. Presently Moga district is sub-divided into three tahsils: 1. Nihal Singhwala, 2. Bagha Purana., and 3. Moga, constituting 329 villages. Likewise the number of towns in the district has increased from 3 to 4. Likewise, the urban population is spread over in four towns in the district and all of them have statutory status.

The newly added town Badhni Kalan has the status of Nagar Panchayat.

The statutory towns are notified by the State government. Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or transitional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the state government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specify by notification in the official gazette any area to be transitional area or a smaller urban area for the purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the state government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the I Class, II Class or III Class.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows;

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows:

| Sl. No. | Class of Urban Local Bodies | Population | Income |
|---|---|---|---|
| 1 | Municipal Corporation | 3 lac or above | 2 Crore or above |
| 2 | Municipal Council Class I | 50,000 to 3 lac. | 50 lac to 2 Crore |
| 3 | Municipal Council Class II | 10,000 to 50,000 | 15 lac to 50lac |
| 4 | Municipal Council Class III | Up to 10,000 | Up to 15 lac |
| 5 | Nagar Panchayat | 5,000 or above | More than Rs.150 per head |

The following statement indicates the jurisdictional changes, which took place after the 1991 Census in Moga District.

**Jurisdictional Changes during 1991-2001**

| Name of District/Tahsil | Number of villages as per | | Number of towns as per | | Changes since 1991 & Govt. Notifications. |
|---|---|---|---|---|---|
| | 1991 | 2001 | 1991 | 2001 | |
| 1 | 2 | 3 | 4 | 5 | 6 |

| Nihal Singhwala Tahsil | - | 40 | 1 | 1 | |
| Bagha Purana Tahsil | - | 56 | 1 | 1 | |
| Moga Tahsil | 175 | 233 | 3 | 2 | |

For the administrative purpose, the district is a part of Firozpur Division. For the purposes of general and revenue set up the district is divided into three tahsils viz Nihal Singhwala, Bagha Purana and Moga. All of them have sub divisional status. The district is further sub-divided into 7 community development blocks viz. Dharamkot, Moga-I, Moga II, Bagha Purana, Nihal Singhwala CD blocks of Moga district and Makhu and Zira of Firozpur district.15 villages of Moga district form part of Makhu CD block of Firozpur district and 12 villages of Moga district form part of Zira CD block of Firozpur district. As such Makhu and Zira CD blocks of Firozpur partly lie in Moga district. There are 4 towns viz. Badhni Kalan, Bagha Purana, Moga, and Dharamkot. The district is the basic unit of administration. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district and revenue administration in the district.

**(iv) Physical Features**

**Origin of Name:**

The district has derived its name from the town Moga which was inhabited by the Gils. According to local dictum Moga Singh and Joga Singh were two brothers. Joga Singh's successors established two different villages called Moga Mehla Singh and Moga Ajit Singh. By mingling these two villages a new village called Moga was created which had five *pattis* on the names of Moga Gil's sons viz Chirag *Patti*, Sangali *Patti*, Ausang *Patti*, Bagha *Patti* and Rupa *Patti*.

**Location and Size:**

Moga District is the 17th District drawn on the map of Punjab State on 24th day of November 1995. Before this, Moga was the sub-division of Faridkot District. Moga town the head quarter of the District is situated on Ferozpur-Ludhiana road.

Moga District falls under the jurisdiction of Ferozpur division. Its boundaries touch the boundaries of Jalandhar district in north, Ludhiana district in East, Sangrur in South and Faridkot & Ferozpur in West. It stretches between longitude 75 degree - 15, 75 degree - 25 east and latitude 30 degree - 35 and 31 degree 15 North. It spreads over an area on 2235 km which comes to 4.42 % of the Punjab State.

**Area:**

According to Surveyor General of India, the area of the district is 2235.0 km. it ranks 11$^{th}$ in area in the State and out of it, 45.0 km is urban, shared between urban civic bodies, whereas the remaining 2190.0 sq. km. is rural. The rural area of the district is derived by subtracting urban area of the district from the total district area, as supplied by the Surveyor General of India. The tahsil wise area, as supplied by the Director, Land Records, Punjab is as follows: (1) Nihal Singhwala tahsil 438.45 sq. km., (2) Bagha Purana 591.01 sq. km (3) Moga tahsil 640.24 sq. km and It would be noticed that tahsils area when added up works out to1669.7sq. kms which does not tally with the area as supplied by the Surveyor General of India. The urban area of the district has been obtained by adding up areas of the towns as supplied by urban local bodies. The Community Development Block area has, however, been obtained by adding up village areas of the constituent villages, including census towns and outgrowth of Urban Agglomerations (UA), if any.

**Climate:**

The climate of the district is characterized by dryness (except in the brief monsoon season), a very hot summer and bracing winter. The year may be divided into four seasons. The cold season from about the middle of November to the early part of March is followed by the hot season which lasts till about the end of June. July, August and first half of September constitute the south-west monsoon season. The period from mid-September to about the middle of November may be termed as the post-monsoon or transitional period.

After February, there is a steady increase in temperature. June is generally the hottest month. Scorching hot winds laden with dust blow during summer and on individual days the day temperature reaches even about 45° C. With the onset of the monsoon in the district in around first week of July, there is an appreciable drop in day temperature. The weather is sultry and uncomfortable during rains due to the presence of moisture in the air. After the monsoon, by mid

September, there is a rapid drop in the temperature, especially during night. January is usually the coldest month. Cold waves affect the district in the wake of passing the freezing point.

The rainfall in the district generally increases from the south-west towards north-east. About 70 per cent of the annual rainfall is received during the monsoon months (July to September), July being the wettest month. There is also some rainfall during the period from December to March which amounts to about 12 per cent of annual rainfall. The remaining rainfall is received in the rest of the months of the year. The following table shows monthly rainfall of 5 years, 1996-2000 for the district.

**Monthly Rainfall: Average of 5 years 1996-2000**

| Month | Rainfall (mm) | Month | Rainfall (mm) |
|---|---|---|---|
| 1. January | 16.5 | 7 July | 52.6 |
| 2. February | 18.1 | 8. August | 119.7 |
| 3. March | 21.2 | 9. September | 38.4 |
| 4. April | 13.5 | 10. October | 14.9 |
| 5. May | 19.9 | 11. November | 3.9 |
| 6. June | 46.7 | 12. December | 1.9 |
| Total | | | 367.3 |

**(Source: Statistical Abstract of Punjab, 2001)**

**Physiography:**

The topography of the district could be divided into five physiographic units which are briefly described as under:--

The knowledge of topography is indispensable for understanding the personality of any area in terms of socio-cultural attributes and levels of economic development. Viewed in this perspective, Moga District is characterized by flat alluvial plain formed by river deposition in recent geological past. It is part of interfluvial tract between Satluj and Ghaggar rivers. Thus, it shares the characteristics of Punjab plains or whole of Indo Gangetic plains. Macroscopically, surface topography appears to be flat featureless surface, but microscopic analysis may yield some variation in topography even over a small area covered by Moga District. However, distinctive geomorphic regions may not be delineated, yet micro geomorphic variation may be highlighted which is the result of changing course of river Satluj in last many centuries.

Slope of the ground is from north-east to south-west as evident from different values of elevations above sea level. Highest elevations are found in north-east where elevations cross 227 metres and lowest elevations are recorded in south-west i.e. about 209 metres. Thus the range of elevational change is 18 metres.

Moga District is part of upland plain between Satluj and Ghaggar rivers and more precisely it is part of south-west Punjab where large part of upland plain is covered with sand dunes or sand. Moga District forms an exception that there is no continuous tract of sand or sand dunes. However, some small sand ridges characterized the topography but now most of them have been cleared.

**River System and Water Resources**

No perennial river passes through the district, however in earlier days or during last many centuries Satluj used to cross this area, which has now taken northerly, turn and joined with river Beas. The palaeo channel of this river can be seen in this area. Moga *nala* is one such old channel of the river, which is filled with water during rainy season. Moga *nala* enters the district from

Ludhiana District near Ajitwal. It flows westward through Moga city and then passes into Faridkot District. Its course is almost parallel to the course of river Satluj. It originates in Ludhiana District.

**Canals.**- Abohar Branch of Sirhind Canal passes through Moga District and it enters into the district from Ludhiana side. Sirhind Canal is Largest Canal System of Punjab, which provides irrigation facilities to large part of Malwa region. It is a perennial canal constructed by British People in association with Princely States. It takes its birth near Rupnagar from Satluj river. The Abohar Branch of Sirhind Canal crosses the Moga District. Distributaries/channels have been constructed to provide water to agricultural crops.

Apart from the canal irrigation, wells are being used and now the traditional types of wells have been replaced by tubewells run by either electricity or diesel engines.

**Soils and Crops**

In this district the annual rainfall ranges from 400 mm to 800 mm. The MAT is 24°C while the MAST is 25°C. According to water balance diagram the soil moisture regime is ustic and the soil temperature regime is hypothermic. These soils are very deep, well to moderately well drained with texture varying from sandy loam to silty clay loam. The major soils are sandy, over *loamy, coarse loamy and fine loamy.*

*The soils* are cultivated for wheat, rice, potato, sugarcane, oil seeds and other crops. The *main constraint of the soils are low to medium fertility, poor tilth in some fine textured soils and* low water holding capacity in coarse textured soils.

Most of the soils *are highly potential and produced very high yields of wheat, rice, potato,* sugarcane and other crops with intensive use of irrigation, fertilizers and other inputs. Fine loamy soils are best suited for paddy and sugarcane cultivation. The productivity of fine textured soils can be improved by maintaining proper soil, water, air relationship.

**Major characteristics of the District**

**Forestry:**

Moga district falls under the jurisdiction of Divisional Forest Officer, Firozpur. Forest of the district is situated along with rail, roads and canal strips. Vegetation is also found within the small scattered birs throughout the district. Besides, the plantations along with the drains and bunds are under the management of forest department. The main trees found in the local forest are: Shisham, Kikar, *Mango, Tut, Jamun, Serin, Neem, Dak/Darek, Pipal, Eucalyptus, Beriand* Khajur etc. Also there is a profuse growth of Kana, Kahi, Arjun, Dale and Battar etc in the water logged strips of the district. The break up of area under various types of forests in the district during 1990-91 and 2000-01 is as follows:

| Serial No. | Type of Forest | 2000-01 (in sq. kms.) |
|---|---|---|
| 1. | Reserved Forests. .... | - |
| 2. | Protected Forests | 20 |
| 3. | Unclassified Forests | - |
| 4. | State Forests (Total 1to 3) | 20 |
| 5. | Under S/38 of Indian Forest Act, | - |

*(Source: Statistical Abstract of Punjab, 2001)*

The table reveals that during the 2000-01 the area under forests is 20.0 sq. kms. However, during 2000-01, no area has been reported under reserved forests, whereas 20.0 sq. kms are under State forests.

**Natural Economic Resources**

**Minerals and Mining:**

The important mineral resource of the area are Saltpetre, Sand and Clay. Saltpetre occurs as thin yellowish encustations on the surface of Older Alluvium. It also occurs as thin encrustations of yellowish colour at old inhabitation sites. Its occurrence is known from Janner, Moga and south-west of Bagha Purana. Saltpetre is an important source of potassium nitrate and used for the crackers, matches and fertilizers industries. Grey micaceous alluvial sand is being mined along the Sukar nala. It is being used for construction purposes. Top silty clay of Older Alluvium up to 1 to 1.20 metres depth provided a very good raw material for the brick industry and is exploited at a number of places. Large number of brick kilns occurs near Bagha Purana, Nighalsinghwala and Moga.

**Land and Land use Pattern:**

During 2000-2001, against a geographical area of 168 thousand hectares, the area of the district according to village papers is 223 thousand hectares which shows some difference in the two sets of area arrived at by different methods of measurement adopted by two separate agencies. However, for the purpose of discussion hereinafter we will refer to the area as per village paper only. Out of an area of 223 thousand hectares, 2 thousand hectares is under forest. 1 thousand hectares is barren and uncultivable, 20 thousand hectares is put to non-agricultural use, about 500 hectares is culturable waste, 1 thousand hectares is current fallow, 1 thousand hectares is other than current fallow and 198 thousand hectares is net area sown in the district, which is 89.0 per cent of the total area. Further out of 198 thousand hectare of net area sown, 194 thousand hectare is sown more than once thus the total cropped area in the district during 2000-01 works out of 392 thousand hectares.

Kharif (Sawani) and Rabi (Harhi) are two main harvesting seasons. The principle Kharif crops include paddy (rice), jawar, bajra, sugarcane, and groundnut. The Rabi crops include wheat, gram, barley, some oil seeds, pulses, etc. Seasonal crops are also grown where conditions permit. These are known as Zaid-Kharif and Zaid-Rabi.

**Agriculture :**

There are two principal crop seasons Kharif (sawni) and Rabi (hari) in the district. Both the seasons are equally important but area wise Rabi is more important of the two as it reported 89 thousand hectares against 77 thousand hectares reported in Kharif in the year 2000-01. Out of 210 thousand hectares cultivated area the area under food and non-food crops is 178 thousand hectares and 32 thousand hectares, respectively. In terms of percentages the area under food crops is 84.8 per cent against 15.2 per cent under non-food crops. The major and minor crops during Kharif season are; Paddy, Maize, Groundnut, Sugarcane, Cotton, Pulses, Chillies, etc; whereas Wheat, Gram, Barley, Potatoes, Oilseeds are the major and minor crops of the Rabi season. Among the food crops important ones are; Wheat, Rice and Maize, which account for 163 thousand hectares (77.6%).

Moga district is an agricultural district as 80.04 per cent of its population is reported to be residing in the rural areas as per 2001 Census whereas agriculture engaged only 51.9 per cent of its main workers during 2001 Census (cultivators 28.5%, agricultural labourers 23.4%). This

percentage is next only to Ludhiana district (20.2 %) and surprisingly it is excelled by all districts in agricultural labourer (8.0%). Thus it would be seen that agriculture provide the single largest source of employment in the district and this decline is noticeable during the last few decades.

During 2000-2001, 1,59,000 hectares of area was under rice cultivation in the district. This signifies that rice (paddy) is the most dominant Kharif crop grown in the district. During 2000-2001 the district produced 596 thousand metric tonnes of rice at an average yield of 3,747 kg per hectare.

Among the Rabi crops, wheat is the most dominant. During 2000-2001, 1,72,000 hectares of agricultural land was under wheat cultivation. The district produced 818 thousand metric tonnes of wheat during 2000-2001. The average yield of wheat per hectare in the district was 4,755 kgs.

Rapeseed and mustard and Sesame are the other important crops grown in the district and area under cultivation of these two crops is 2,200 hectares and 100 hectares respectively.

Out of the total production of 66 metric tonnes of rapeseed and mustard and 9 metric tonnes of Sesame in the state, the share of Moga district was 3.0 thousand metric tonnes and 0.5 thousand metric tonnes respectively.

The vegetables are also grown in the district. An area of 7,407 hectares was reported under vegetables during 2000-01. The break up of area is as follows. Potatoes 5,478 hectares, Onions 380 hectares, winter vegetables 853 hectares and summer vegetables 696 hectares. The demand for vegetables is picking up in the district as the urban centers have grown over the years. The establishment of various colonies etc. under various central and state projects increased the demand for vegetables.

Besides compost (both in urban and rural), cattle dung and green manures, chemical fertilizers are increasingly being used in this district. During 2000-01, 67,000 tonnes of chemical fertilizers comprising nitrogenous 50,000 tonnes, phosphetic 16,000 tonnes and potassic K2o 1,000 tonnes were consumed in the district for growing improved varieties of wheat, paddy, sugarcane, cotton, etc. The farmers are, however, becoming conscious of the delirious effects of reckless use of chemical fertilizers in their farms. The farming scientists are required to provide them with some alternative nutriative soil agents so that crop yields do not suffer.

Among the fruits, mango is the most suitable to the local soil. Horticulture is gaining popularity in Moga district for the last few years. During 2000-01, an area of 1928 hectares was reported under various fruit trees. The break up of area under various fruits is as follows: Kinnows 418 hectares, Orange and Malta 20 hectares, Lemon 25 hectares, Mango 947 hectares, Litchi 50 hectares, Guava 341 hectares, Pear 28 hectares, Peach 42 hectares, Plum 4 hectares, Grapes 3 hectares, Ber 13 hectares, and miscellaneous 37 hectares. Farmers have to make their own arrangements for marketing. The farmers have persistently demanded the setting up of some factories to process their produce to bring them remunerative returns from fruits, which require very delicate handling before disposal. Day by day the attitude of the farmers is changing and horticulture has become very popular in the district.

**Horticulture:**

Horticulture is gaining popularity in the district for the last few years. During 2000-01, an area of 132 hectares was reported under various fruit trees. The break up of area under various fruits is as follows: Kinnow 9 hectares, Orange and Malta 11 hectares, Lemon 10 hectares Mangoes 1 hectare, Guava 69 hectares, Grapes 7 hectares, Ber 24 hectares and others 1 hectare. The area under orchards is very limited due to various factors such as high temperature, stormy wind conditions, and unsuitability of sub-soil water for irrigation and inadequacy of canal water. In spite of these limited factors, the district has reported sizeable area under Guava, Ber, Orange and Malta & Lemon. The farmers have to make their own arrangements for marketing. The

farmers have persistently demanded the setting up of some factories to process their produce to bring them remunerative returns from grapes, which require very delicate handling before disposal. Day by day the attitude of the farmers is changing and horticulture has become very popular in the district.

**Irrigation:**

Adequate water supply from whatever source is essential for the growth of plants. Crops can be raised successfully only if water is available in adequate quantity either from rain or suface flow or underground. Artificial irrigation was practised in India as far back as the fourth millennium B.C. With the growth of population and consequent need for larger agricultural production, the requirement of irrigation has increased to a great extent. Irrigation is required not only in low rainfall areas and during non-rainy season but also during long breaks in rains in good rainfall areas. The importance of irrigation has become more important with the new farm technology based on high yielding varieties of crops and increased application of fertilizers.

However, during the year 2000-01 the net irrigated area in Moga was reported 197,400 hectares, out of which 32,400 hectares was irrigated by government canals and 165,000 hectares by tubewells. Thus percentage of net area irrigated to net area sown worked out to 99.7 per cent for this district during 2000-01. Also during 2000-01, out of 392,000 hectares gross cropped area, 391,700 hectares was irrigated. During 2000-01 the percentage of gross irrigated area to gross cropped area worked out to 99.9 per cent.

**Animal Husbandry:**

Live stock, the back bone of the peasantry and the farmer, has traditionally been depending upon draught animals for plouging on milch cattle, mainly cows and buffaloes for milk and other dairy products for domestic use and for supplementing their farm income.

The data on livestock in Punjab is available for the year 1997. It reveals that there are 87,000 cows, 226,700 buffaloes, 500 horses and ponies, 300 donkeys, 500 Mules, 16,400 sheep, 14,600 goats, 200 camels and 4,100 pigs, (total 350,300 animals). Cows and Buffaloes, as else where, are the two most dominant milch animals in the district. The district can boast of a fairly rich cattle wealth. The decline in the number of cattle is attributable to the mechanization of agriculture and transportation, which make lesser demand of draught cattle. However due to the ever- increasing demand of milk in the urban centers, the demand of milch buffaloes, which are mainly of good breads (murrah and nili), has also shoot up.

In 2000-01 there were 52 veterinary Hospitals, 79 veterinary dispensaries and insemination centres and 4 sheep and wool extension centres in the district wherein 35 veterinary officers and 57 veterinary pharmacists were deployed.

The poultry had recorded 210,300 birds (136,700 Hens and 73,600 Chikens) in 1997. The poultry farming is now being practiced on scientific lines, which is evident from a large number of poultry farms located in the district. This has been made to understand due to acceptability of egg as a vegetarian food.

**Fisheries:**

Pisciculture has been taken up in a big way in the district. An area of 151 hectares was stocked with fish wherein 2,052 thousand fingerlings were raised. In the district Punjab government has issued 5 Fishing licenses to pickup the Pisciculture.

**Tenancy:**

The cultivators generally cultivate their land themselves. This system is known as Khud Kasht (self cultivation). Some times the land is leased out to other farmers or persons on Batai (share

cropping) which is usually fixed for one half of the gross produce, payable in kind. Contract or Theka is also in vogue and is fast gaining popularity. This is generally paid in cash on yearly basis but may be agreed to in kind depending upon the land contracted and the economic positions of the cultivator. The Batai or Theka may vary depending upon the productivity of the land. Since large number of people own tractors they prefer to provide agriculture services to the fellow farmers on cash payment. The Jagirdari system has since been abolished after the introduction of various enactments under the land reforms undertaken after independence and merger of the Pepsu areas in the Punjab State.

**Communications:**

An efficient network of roads and railways, posts, telegraph, telephone etc. is an essential requirement for development of any area as it is the backbone of any developmental activity. This also applies to Moga. The district is well served in both roads and railways. It is well connected by roads and railways with stations inside and outside the district.

Some of the important roads connecting various stations inside and outside the district, besides the National Highway - 95. The main roads are: (1) Moga-Ludhiana Road, (2) Moga-Firozpur Road, (3) Moga Faridkot Road, (4) Moga - Bagha Purana, Kot Kapura - Road, (5) Moga-Nihal Singhwala Road, (6) Moga - Sangrur Road.

Anyhow, there is an efficient network of roads through out the district. The district has a road length of 110 kms under National highways and 1,870 kms under State highways. Further, as per the data available from P.W.D. (B&R) department for the year 2000-01 the Punjab state has a road length of 54,836 kms giving an overall average of 109 kms per 100 sq. kms of area. This by all means exhibits a fairly well developed system of roads in the State. Moga district has a road length of 98 kms per 100 sq. kms of area which, though some what lower than that of the State as a whole, is quite satisfying in itself. Further more, all the villages in the district are connected by road.

The district is well served by the Public Road Transport system. The district being part of erstwhile Pepsu State, the bus routes are mainly with the Pepsu Road Transport Corporation (PRTC), Moga depots had 130 buses in 2000-2001 and government hired buses from private sector on kilometer basis to fulfill the requirements of public. The other depots of PRTC and Punjab Roadways also operate buses on various routes in the district. There are a number of private operators also, who provide transport services in areas not served by Government transport operators.

The increase in vehicles has resulted increase in accidents in the district. In 2000-01 there took place 122 accidents in which 71 persons were killed and 74 injured in the district.

The important private bus operators are as follows:-

1) Libra Bus Service.
2) Sindicate Bus Service Pvt. Ltd.
3) Patiala Bus Service.

The first railway line which served the area of present Moga District was Macleod Ganj road-Ludhiana extension opened in 1905, which was further connected with the main line to Karachi via Macleod Ganj. At present the district lies in the Firozpur Division of the Northern Railway. The district is served by Firozpur-Ludhiana railway line. Stations falling on this line are: Mahna, Ajitwal, Moga, Ghall Kalan, Dagru and Mahesari.

There is no navigable river or canal in the district. Also there is no airport in this district.

There is a good net work of post and telegraph offices in the district. The telephone facilities have also been greatly improved throughout the district barring a few pockets here and there. Mobile and land line telephone have reached almost all villages of the district.

**Industry:**

This district is not very important from the industries point of view as it did not attract many industrialists to set up their units in the district. However, there were certain places in the district which was known for small scale/cottage industries. Moga was known for Phulkaries.

In fact every village was a self sufficient unit in many respects as arrangements existed, in Kharas (bullock/camel driven flour mills) before the advent of electricity operated chakkis. The kohlus (formerly) wooden driven by bullock were used for oil extraction. The village potters manufactured and supplied pitchers and other earthenware to meet the local demands. Khaddar was made by the village weavers out of soot (yarn) supplied by their clients in the village. The agricultural implements were manufactured by the local carpenters, who manufactured charkhas (spinning wheels), wooden boxes and bullock carts at important places.

With the growth of urban centers the modern industries were set up at various places in the district. The following are some industries located in the district.

**Nestle India Limited, Moga.**

This unit was established in the private sector at Moga in 1962 by Nestle Company of Switzerland. It was initially named as Food Specialises Limited, Moga, but later its name was changed to Nestle India Ltd., Moga. It is one of the largest dairy plants engaged in the manufacture of various milk products, especially "Everyday" Ghee and condensed milk (Milk-Maid). This plant processes 4.5 lakh liters of milk daily and has many collection centers and 6 chilling units in the district. This company has earned quite a reputation throughout the country.

Besides there are large number of medium and small scale industrial units located in the district which are listed below:-

Rice Shellers - with the popularity of paddy cultivation and large scale purchases of rice by the government large number of rice shellers have come up throughout the district. Agricultural Implements.- throughout the district, but Moga has emerged as an important centre of production of oil-engines and parts manufacture. Mostly in Moga, Sodium Silicate is manufactured which is used in soap manufacturing. Other units concentrated at Moga are Belt fasteners, Hosiery. Radio assembling, Leather tanning and Bus/Truck Body building.

Some of the village and cottage industries located in the district are :

Handloom weaving - Khaddar, Khes, Durries, Chaddars, Country shoes and other leather goods, Leather tanning, Village Ghani-oil, Baan making, Gur and Khandsari, Phulkaris and Earthen-ware are manufactured,

In the year 2000, the district reported 212 registered factories of which all 212 were working factories, which employed 4,194 average number of workers, the district is the lowest in the state.

The State government (Department of Industries) set up Industrial Focal Point, Moga. An area of 108.28 acres was acquired and 209 industrial plots were developed here. Up till 2000-01, 208 plots were allotted, whereas, one was lying vacant.

Government also set up Industrial Training Institute at Moga, Sheet Metal Training Centre, Moga (for backward castes) and Government Polytechnic Institutes were established in the district to improve the technical education in the district.

The district being rich in agricultural product, the establishment of agro based industrial units would be an ideal thing. This thinking is being given a practical shape.

**Trade and Commerce:**

The district was a big centre of grain market, which is important from trade and commerce point of view. Moga has perhaps the largest grain market in the state. The district was a net exporter of food grains like wheat, paddy and maize.

The district has emerged as a leading district in trade and commerce. As per the data available for the year 2000-01, out of 144 regulated markets in the state, 5 are located in Moga district. On an average, each regulated market is serving 138 villages in the district compared with 88 villages in the State as such.

As on March 2001 there are 7 agricultural markets with sub-yards attached to these in the district. The markets are located at the following places: Moga, Bagha Purana, Nihal Singhwala, Badhni Kalan, Ajitwal, Dharmkot and Kot Ise Khan are the biggest grain markets where wheat, paddy, maize, etc. are marketed. Among the market arrivals, the district reported the highest arrival of paddy during 2000-01. Out of the market arrival of 11,057,000 tonnes of paddy in the State, 788,000 tonnes (7.1%), was contributed by Moga district. Likewise, the market arrival of wheat 514,000(5.3%) tonnes was contributed by Moga district.

**Electricity:**

The erstwhile rulers were well aware of the technological changes taking place in the world. They, therefore, were the first to introduce electricity in their areas in the beginning of the present century. The state government Public Works Department replaced the private suppliers of electricity. However, after some time the responsibilities of supplying electricity were bestowed on the Punjab State Electricity Board, Patiala.

During 2000-2001 Moga district consumed 558.3 K.W.H. of electricity, the district was 12th highest in the state. The break up of electricity consumed by various categories of consumers is as follows: Domestic 131.9 K.W.H., Commercial 24.8 K.W.H., Industrial 86.5 K.W.H., Agricultural 312.1 K.W.H. and Others 3.4 K.W.H. If we look back we find that in the year 1990-91 Moga district consumed 558.3 K.W.H. of electricity.

Moga district receives 2.9 percent of the total power produced in the state and its usage for various purposes. In Moga district 90.6 per cent of the households are using electricity and this percentage is higher than that of the State (86.70%).

**(v) Census concepts**

**Building :**

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools,

places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

**Permanent houses :**

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

**Semi-permanent Houses :**

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

**Temporary Houses :**

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

**Dwelling Room :**

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

**Census House :**

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter,

the garage, etc., only one building number was given for this group and each of the constituents a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

**Village :**

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Rural-Urban Area :**

The data in tables on Final Population Totals are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

**City :**

Towns with population of 100,000 and above are called cities.

**Urban Agglomeration :**

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas,

etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

**Household :**

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

**Institutional Household :**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless Household :**

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**List of Scheduled Castes and Scheduled Tribes:**

The Government of India by Gazette Notification under Article 341(1) of Indian Constitution has declared some castes, races or tribes or parts of or groups within castes, races or tribes as Scheduled Castes as there is no standard definition of Scheduled Castes. Similarly, Scheduled

Tribes mean all such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are declared by the President of India to be treated as Scheduled Tribes under Article 342(1) of the Indian Constitution. There is slight change in the definition of Scheduled Castes in 1991. Before that, Scheduled Castes could belong to Hindu or Sikh religion. But from 1990, in addition to Hindu and Sikh religions, Scheduled Castes may belong to Buddhists religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In Punjab State, 37 castes were notified by the State Government as Scheduled Castes at the 1991 Census and there is no change at the 2001 Census. Following 37 castes have been notified as scheduled castes in Punjab;

1. Ad Dharmi
2. Balmiki, Chura, Bhangi
3. Bangali
4. Barar, Burar or Berar
5. Batwal
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar Raigar, Ramdasi or Ravidasi
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhilla, Gandil, Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut, Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband

There is no Scheduled Tribe notified in the Punjab State

**Language and Mother Tongue :**

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

**Literate :**

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

**Literacy Rate :**

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

**Educational Level :**

The highest level of education a person has completed.

**Work :**

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

**Main worker :**

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

**(vi) Non-Census Concepts**

**Improved drinking water :**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

**System of sewerage :**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not

provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

**Type of latrine and Method of disposal of night soil :**

There are three prevalent systems of disposal of human wastes, viz.

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

**Fertility :**

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

**Crude birth rate (CBR) :**

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

**Crude death rate (CDR) :**

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

**Natural growth rate :**

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

**Age specific fertility rate (ASFR) :**

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

**Age specific marital fertility rate (ASMFR) :**

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

**General fertility rate (GFR) :**

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

**General marital fertility rate (GMFR) :**

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

**Total fertility rate (TFR) :**

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1{,}000}$$

**Total marital fertility rate (TMFR) :**

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

**Age-specific mortality rate (ASMR) :**

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

**q1 :**

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

**q2 :**

Probability of dying between birth and age 2.

**q5 :**

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

**Infant mortality rate (IMR) :**

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

**Neo-natal mortality rate (NMR) :**

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

**i) Early neo- natal mortality rate :**

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1,000$$

**ii) Late neo-natal mortality rate :**

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Post neo-natal mortality rate (PNMR) :**

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1,000$$

**Peri-natal mortality rate (PMR) :**

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

**Still birth rate (SBR) :**

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

**Maternal mortality rate (MMR) :**

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

**Eligible couple (Couples per 1,000 population):**

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

**Child woman ratio (0-4) :**

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

**Child woman ratio (5-9) :**

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

**Migration :**

1) Migration
2) Internal and International Migration
3) Rural - Urban component of migration

**Civic status of urban units :**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

**Size class of UA/town :**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are :

M7 (5,000,000 and above)

M6 (2,000,000 to 4,999,999)

M5 (1,000,000-1,999,999)

M4 (500,000-999,999)

M3 (300,000-499,999)

M2 (200,000-299,999) and

M1 (100,000-199,999)

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

**Slum area :**

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as an Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**Mega city :**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

## (vii) 2001- Census Findings - Population and its distribution:

The following table shows distribution of rural and urban population by tahsils in the district.

**POPULATION, NUMBER OF VILLAGES AND TOWNS, 2001**

| Name of Tahsil | Population | | | | | | | | | Number of Villages | | No. of Towns |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Total | | | Rural | | | Urban | | | | | |
| | P | M | F | P | M | F | P | M | F | Total | Inhabited | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| Nihal Singhwala | 156,455 | 82,909 | 73,546 | 150,089 | 79,611 | 70,478 | 6,366 | 3,298 | 3,068 | 40 | 39 | 1 |
| Bagha Purana | 205,085 | 108,407 | 96,678 | 183,489 | 97,071 | 86,418 | 21,596 | 11,336 | 10,260 | 56 | 56 | 1 |
| Moga | 533,314 | 282,823 | 250,491 | 382,636 | 202,640 | 179,996 | 150,678 | 80,183 | 70,495 | 233 | 226 | 2 |
| **District Total** | 894,854 | 474,139 | 420,715 | 716,214 | 379,322 | 336,892 | 178,640 | 94,817 | 83,823 | 329 | 321 | 4 |

Moga has a population of 894,854 comprising 474,139 males and 420,715 females. This makes 3.7 per cent of State's population and 4.4 per cent of the total area of the state.

Among the tahsils, Moga with a population of 533,314 is the most populous while Nihal Singhwala with a population of 156,455 is the least populous tahsil in the district. The population of other tahsil Bagha Purana is 205,085. In other words, tahsil with the highest population is more than three times bigger than the tahsil having the least population.

In the district 716,214 (80.0%) persons residing in rural and 178,640 (20.0%) in urban areas, the corresponding percentages of rural and urban population in the State are 66.1 and 33.9 respectively. Out of 329 villages of the district, 321 are inhabited. A tahsil on an average has 107 inhabited villages. The rural population is distributed over 321 inhabited villages and the number of these inhabited villages varies between 226 in Moga tahsil and 39 in Nihal Singhwala. The urban population is distributed over 4 towns in the district. An inhabited village in the district on an average has a population of 2,231as against 1,311 in the state signifying that the villages in Moga district are much bigger in size. Contrary to it, towns are smaller in the district as compared with the State and a town in Moga district on an average has a population of 44,660 against 52,627 in the state.

### Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the Census organization to classify towns according to their population size. A town with a population of 100,000 or more is termed as 'city' in Indian census.

| Class | Population size | No. of Towns. |
|---|---|---|
| 1 | 2 | 3 |
| Class – I | 100,000 and above (Generally referred to as city) | 1 |
| Class – II | 50,000 to 99,999 | - |
| Class – III | 20,000 to 49,999 | 1 |
| Class – IV | 10,000 to 19,999 | 1 |
| Class – V | 5,000 to 9,999 | 1 |
| Class – VI | Less than 5,000 | - |

Moga, the only class I town in the district, accommodates three- forth (75.7%) of the district's urban population. The second big town namely Bagha Purana is in the population size Class-III, this signifies that 87.8 per cent of the urban population of the district is concentrated in these two towns, there is no town under class II, one falls each in the population size class IV and V. There is no town under Class-VI, the share of class III, class IV and class V is 12.1, 8.6 and 3.6 per cent respectively.

During this decade the number of towns has gone up from 3 in 1991 to 4 in 2001. There has been an addition of one town viz. Dharmkot with a population of 15,399, which is nearly 8.6 per cent of the urban population of the district. Among the towns in the district, Moga (UA) 135,279 is the most populous while Badhni Kalan ( NP) with 6,366 is the least populous town in the district.

**Population Growth, Density and Sex Ratio**

**Population Growth:**

During 1991-2001, population of Moga has increased from 777,922 in 1991 to 894,854 in 2001 resulting in a net addition of 116,932 persons during this decade. In percentage terms the district has recorded a decadal growth rate of 15.0 per cent which is lower than that of state average (20.1%). Moga district has a population of 894,854 including 474,139 males and 420,715 females.

**Density:**

Moga with a population of 894,854 and an area of 2235.0 sq. kms. has a density of 400 persons per sq. km, which is significantly lower than that of the State (484) and ranks 11$^{th}$ among the districts in the state badly excelled by Ludhiana (848) and Jalandhar (748) districts.

Within the district, Moga (833) is the most densely populated tahsil and Bagha Purana (347) is the least populated tahsil. Likewise, rural density varies between 633 in Moga and 314 in Bagha Purana tahsils. The urban density is the highest in Moga tahsil (4,233) and the lowest in Nihal Singhwala tahsil (1,872).

**Sex Ratio:**

Sex ratio is derived as the number of females per 1,000 males. Generally speaking differentials in mortality conditions of males and females, male-female ratio at birth and sex selective migration are the key factors, which determine the sex composition. It reflects the socio-economic and demographic characteristic of the population and unfolds the status of women in the society and care of the girl child in particular.

Significant feature of Punjab population is the preponderance of males over females. According to Census 2001, out of the total population of 24,358,999 in the State, 12,985,045 are males and 11,373,954 females resulting an overall sex ratio of (876) which is significantly lower than the country as a whole (933). All the districts in the state barring Hoshiarpur (935) and Nawanshahr (914) have a sex ratio of less than 900.

In fact the sex ratio in the State and its constituent districts has remained to be low throughout. At the beginning of the 20$^{th}$ century, the sex ratio was 832 in 1901, which declined to 780 in 1911. Ever since, the sex ratio in the state, showed gradually improvement till 1991, when it reached 882. However, it has declined to 876 in 2001, exhibiting a fall of 6 points in the State.

Within the State the districts among themselves show considerable disparity which is the highest in Hoshiarpur district (935) and the lowest in Ludhiana (824). Moga district with a sex ratio of 887 is slightly higher than that of state average.

Among the tahsils in the district the sex ratio is the highest in Bagha Purana (892) and the lowest in Moga (886). The rural sex ratio varies between 890 in Bagha Purana and 885 in Nihal Singhwala tahsils and the corresponding figures in the urban sex ratio is 930 in Nihal Singhwala and 879 in Moga.

The Child sex ratio is reported to be the highest in Firozpur district (822) and the lowest in Fatehgarh Sahib (766) signifying that child sex ratio is appalling low in all the districts in the state. There are 8 districts which exhibit a child sex ratio of over 800. Beside Firozpur, they include Moga (818), Ludhiana (817), Hoshiarpur and Faridkot (812 each), Muktsar (811), Nawanshahr (808) and Jalandhar (806).

Likewise, the disparity in the rural and urban child sex ratio is quite marked; the rural child sex ratio varies between 824 in Bagha Purana and 821 in Moga while the variation in urban child sex ratio is to the extent of 889 in Nihal Singhwala and 794 in Bhagha Purana.

**Literacy:**

Any person who is able to read and write with understanding in any language is recorded as literate. As in 1991 all the children below 7 years of age have been treated as illiterates. 69.7 per cent of the state's population is literate which is higher than that of the country (64.8%) as such. Among the States /Union Territories, Punjab ranks 16th in terms of literacy. In Moga district 63.5 per cent of the population is recorded as literate, which is significantly lower than the state as such. It ranks at 11th among the districts in the State. Among the tahsils in the district, Moga (65.7%) ranks at the top while Bagha Purana (59.4%) is placed at the bottom. However, all tahsils in the district have literacy rate lower than the overall literacy rate in the state.

Between the two sexes, the gap in the literacy rate among males and females in the district is almost at par with the state. In Moga district 68.0 per cent among males and 58.5 per cent among females are literate, while the corresponding figures for the State are 75.2 and 63.4 per cent respectively.

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district; 60.6 per cent of the rural population and 75.1 per cent of the urban population is literate. The urban literacy is higher than the rural in all the tahsils and the gap in rural-urban literacy rate is the widest in Moga (urban 76.0 % and rural 61.6 %) and the narrowest in Nihal Singhwala (urban 68.4 % and rural 61.1%).

**Work Participation Rate:**

**Definition of Work and Classification of Workers:**

Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the Census of India 2001, which includes production of milk even for domestic consumption. In the 1991 Census cultivation of certain crops even for one's self-consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as tomatoes, all types of flowers, fruits and tuber potatoes, chilies and turmeric, viper, cardamoms,

vegetables etc, in other words plantation of tea, coffee, rubber, coconut and betel nuts have been classified under plantation and not included in cultivation.

The reference period for recording the economic activity of any person is preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last year are recorded as main workers while those who had worked for less a six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, Household Industries and Other workers.

Punjab, with a work participation rate of 37.5 per cent, ranks 24th among the States/Union Territories in the Country and thus, the work participation rate in the State is lower than that of India (39.1%). Among the districts in the State, the proportion of workers varies between 44.9 per cent in Nawanshahr district and 33.3 per cent in Gurdaspur district. In all, 10 out of 17 districts in the State have shown work participation above the state average and among them five districts have at least two-fifths of their population reported as worker. Besides Nawanshahr, they include Bathinda (42.3%), Mansa (40.9%), Sangrur (40.7%) and Moga (40.1%).

**Main Workers and Marginal Workers:**

85.8 per cent of Punjab's total workers have been recorded as Main Workers and 14.2 per cent as Marginal Workers. The corresponding figures for 1991 Census were 97.4 per cent and 2.6 per cent respectively. In Moga district the per cent of main workers and marginal workers is 84.3 and 15.7 per cent to the total worker respectively. Significantly work participation rate (main+ marginal) in Moga (40.1%) is higher than the state average (37.5%).

Among the tahsils in the district, it varies between 38.8 per cent in Nihal Singhwala and 32.0 per cent in Moga and for that of marginal worker it varies between 7.6 per cent in Nihal Singhwala and 5.4 per cent in Bagha Purana tahsil. In the district 49.2 per cent among males and 17.6 per cent among females are reported as workers showing a significant reduction in the gap between both.

**Religion**

It has been customary for the Indian Census to provide information on religious persuasions of its people. Religion is one of the basic cultural characteristics of population and several religions have thrived in the secular state of India. Apparently, information on various religious communities in the country has been of great interest and useful to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. Question 7 of the household schedule canvassed during the 2001 Census pertained to religion. The instructions to enumerators were to record faithfully the religion of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes in 2001:-

| Religions | Code |
|---|---|
| Hindus | 1 |
| Muslims | 2 |
| Christians | 3 |
| Sikhs | 4 |
| Buddhists | 5 |
| Jains | 6 |

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Out of 894,854 persons in Moga district, there are 117,786 (13.2%) Hindus and 767,769 (85.8%) are Sikhs. Population of other communities recorded as 9,299 (1.0%) which is negligible. Amazingly district Moga excels all other districts of Punjab regarding percentage of Sikh population and ranks at the top position.

The instructions for recording this information are by and large the same as in 1991. A brief analysis based on 2001 Census data is given under annexure V.

**Mother Tongue**

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. It may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Question 11 of the Household Schedule was aimed to collect information on 'Other Languages known' (up to two languages in order of proficiency) other than Mother Tongue.

In order to provide a broad scenario a brief note along with table based on 1991-2001 Census data is given in Annexure VIII.

**Scheduled Castes and Scheduled Tribes**

Out of the total population of 24,358,999 in the state 7,028,723 belong to Scheduled Castes as per 2001 Census. As such 28.9 per cent of the state's population and 31.8 per cent of the population in the district belong to Scheduled Castes. Among the tahsils, it is the highest in Nihal Singhwala (36.4%), and the lowest in Moga (29.2%). The proportion of Scheduled Castes population in Moga (29.2 %) is nearer to the district average (29.9 %).

In consonance with the general trends in the state, Scheduled Castes are recorded more in rural area by residence as 75.7 per cent of Scheduled Castes population in the State and 86.6 per cent in the district are rural by residence.

In the district 34.5 per cent of population in rural areas belongs to Scheduled Castes while the corresponding percentage in urban areas is 21.4 per cent. In Nihal Singhwala tahsil Scheduled Castes comprise a little less than two-fifth (36.8%) of rural population and this percentage is the highest among all the tahsils in the district. The proportion of Scheduled Castes population residing in urban areas varies between 28.2 per cent in Bagha Purana tahsil and 20.1 per cent in Moga tahsil.

During the 1991-2001 Scheduled Castes population in the state has increased by 22.4 per cent which is higher than that of Moga (15.0%). In the district 62.1 per cent of the Scheduled Castes population is literate which is higher than that of the state (56.2 %.), 69.2 per cent in rural areas and 54.2 per cent in urban areas in Moga are literate.

There is no notified Scheduled Tribes population in the State.

## (viii) Brief Analysis Based on Primary Census Abstract

**TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001**

| Serial number | Tahsil | Population | | | | | | Percentage decadal variation 1991-2001 | | | Percentage urban population | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | 1991 | | | 2001 | | | | | | | |
| | | Total | Rural | Urban | Total | Rural | Urban | Total | Rural | Urban | 1991 | 2001 |

| 3 | Moga | 458,726 | 328,183 | 130,543 | 533,314 | 382,636 | 150,678 | 16.3 | 16.6 | 15.4 | 28.5 | 28.3 |
| **District Total:** | | **777,922** | **621,520** | **156,402** | **894,854** | **716,214** | **178,640** | **15.0** | **15.2** | **14.2** | **20.1** | **20.0** |

Table 1 shows tahsil wise population for total, rural and urban areas of the district. During 1991 -2001 Moga district recorded a growth rate of 15.0 per cent as against 20.1 per cent for the state. Among the tahsils, it varies between 16.3 per cent in Moga and 12.3 per cent in Nihal Singhwala. Besides Nihal Singhwala, the decadal growth rate of Bagha Purana (14.0 per cent) is also below the district average.

The urban population in the district grew by 14.2 per cent which is almost equal to that of the rural (15.2%) growth rate. Moga tahsil has recorded an urban growth rate of 15.4 per cent, which is less than Bagha Purana (24.9 %), the urban growth rate of Nihal Singhwala has decreased to (-) 25.7 per cent as area of Badhni Kalan was reduced from 24.0 sq. km in 1991 to 3.4 sq. km in 2001. Rural growth rate varies between 16.6 per cent in Moga and 12.9 per cent in Bagha Purana.

20.0 per cent of the population in the district is urban as against 20.1 per cent in 1991. The level of urbanization in the district however, is much below the average of state (33.9 %). The percentage of urban population to total population has increased from 9.6 per cent to 10.5 per cent in 2001 in Bagha Purana but in Nihal Singhwala tahsil it decreased from 6.2 per cent to 4.1 per cent and in Moga Tahsil from 28.5 per cent to 28.3 per cent.

Out of 329 villages in the district, eight are uninhabited comprising one in Nihal Singhwala tahsil and seven in Moga tahsil. A village on an average has a population of 2,231 in the district, the corresponding size of an inhabited village in the State, as a whole is 1,311. The inhabited villages (321) are distributed over 7 CD blocks( 5 CD blocks of Moga district and two of Firozpur district) in the district, on an average a CD block has 46 inhabited villages and population of 102,316, whereas total villages of the state are distributed over 138 CD blocks. In the state a CD block has 89 inhabited villages and population of 116,641. Evidently, the inhabited villages in Moga district are smaller in population size as compared to the State. Among these 321 inhabited villages, 21(6.5%) villages have a population of less than 200, 48(15.0%) fall in the population size Class of 200-499, 51(15.9%) in the range of 500-999, 71(22.1%) in the range of 1,000-1,999, 90 (28.0%) are having population varying between 2,000-4,999, 38(11.8%) between 5,000 – 9,999 and the remaining 2 (0.6%) villages have a population of 10,000 and above. In other words 120 villages are in small size with a population of less than 1,000 and they contain 7.8 per cent of the rural population of the district, 161 are medium sized having population 1,000–4,999 and they contain 52.7 per cent of rural population of the district, 40 villages in the district are large sized having population 5,000 and above and they contain 39.5 per cent of the rural population of the district. Among them 2 are exceptionally large sized villages falling in the population range of 10,000 and above and they accommodate 2.9 per cent of the district rural population.

**TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001**

| Serial number | Name of town | Urban status of town |
|---|---|---|
| 1 | 2 | 3 |
| **(a) New Towns** | | |
| (i) Statuary town | | |
| | Nil | |
| (ii) Census town | | |
| | Nil | |
| **(b) Denotified** | | |
| (i) Statutory town of 1991 Census denotified which did not satisfy the criteria to be treated as towns | | |
| | NIL | |
| (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria | | |
| | NIL | |
| (iii) Census towns of 1991 census are notified as statutory town in 2001 census | | |
| | Nil | |
| **(C) Declassified*** | | |
| | Kot Ise Khan | |
| **(d) Wholly merged with other town (s)** | | |
| | Nil | |

*Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

Table 3 exhibits new towns added, denotified, declassified and merged towns in the district at the 2001 Census.

There are 4 towns in the district and all of them have statutory status.

Further, in the district, no town of 1991 Census has been denotified or merged in the 2001 Census

**TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001**

| Range of population density (per square kilometer) | Total number of villages in each population density range | Percentage of villages in each population density range | Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0-10 | 1 | 0.3 | 6 | 0.0 |
| 11-20 | 1 | 0.3 | 48 | 0.0 |
| 21-50 | 8 | 2.5 | 1,115 | 0.2 |
| 51-100 | 5 | 1.6 | 2,580 | 0.4 |
| 101-200 | 33 | 10.3 | 22,184 | 3.1 |
| 201-300 | 93 | 29.0 | 168,881 | 23.6 |
| 301-500 | 166 | 51.7 | 476,681 | 66.6 |
| 501 + | 14 | 4.4 | 44,719 | 6.2 |
| Not known | 0 | 0.0 | 0 | 0.0 |
| **District Total:** | **321** | **100.0** | **716,214** | **100.0** |
| **Population Density (Rural) of the district:** | | **327** | | |

Table 4 shows distribution of villages according to density of population per Sq. km. Moga district has a rural density of 327 persons per Sq. km. The villages however, display a significant variation among themselves. Low density of 100 or below is noticed in 15 (4.7%) and they contain barely 0.6 per cent of district's rural population. Another 33 villages, which make 10.3 per cent of the total villages and 3.1 per cent of the total population too, are marked with low density of population in the range of 101-200.

The maximum number of villages i.e. 166 fall in the average density range of 301-500. This reveals that more than one-half (51.7%) of the villages have density varying between 301and 500 and they accommodate two - third (66.6%) of the rural population of the district. However, the high density in the range of 501+ is the characteristics of 14(4.4%) villages only and they accommodate 6.2 per cent of the district population

**TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001**

| Census Year | State | | | District | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1901 | 832 | 836 | 804 | NA | NA | 891 |
| 1911 | 780 | 785 | 740 | NA | NA | 852 |
| 1921 | 799 | 808 | 735 | NA | NA | 666 |
| 1931 | 815 | 832 | 721 | NA | NA | 733 |
| 1941 | 836 | 855 | 750 | NA | NA | 743 |
| 1951 | 844 | 854 | 807 | 867 | 867 | 862 |
| 1961 | 854 | 865 | 817 | 862 | 862 | 864 |
| 1971 | 865 | 868 | 856 | 866 | 863 | 884 |
| 1981 | 879 | 884 | 865 | 881 | 880 | 888 |
| 1991 | 882 | 888 | 868 | 884 | 883 | 889 |
| 2001 | 876 | 890 | 849 | 887 | 888 | 884 |

Note: Sex Ratio has been defined as number of females per 1000 males.

Sex Ratio reflects the socio-economic and demographic characteristics of population. It unfolds the status of women in society and the care for the girl child in particular. Unfortunately, in consonance with the overall patterns of the State, the sex ratio in the district has remained low in all censuses except in 1991. The sex ratio declined from 832 in 1901 to 780 in 1911 in the state. Ever since 1911, the sex ratio showed a gradual improvement, uninterruptedly, till 1991 when it reached 882. During 1991-2001, the sex ratio in Punjab has declined by 6 points, from 882 to 876.

The population census data are not available for Moga district prior to 1951 Census. Moga district had a sex ratio of 867 in 1951, which increased 881 in 1981, and improved 884 in 1991 and 887 in 2001 and the sex ratio of the district remains higher than the sex ratio of the state during 1951-2001. In the state, the urban sex ratio has declined from 868 in 1991 to 849 in 2001 while the corresponding decrease in the urban sex ratio of the district is from 889 to 884. The rural sex ratio in the state has increased by 2 points from 888 in 1991 to 890 in 2001, while in the district it has shown 5 points increase from 883 to 888 during this decade. In a way the loss of urban is the gain in rural area.

**TABLE 6 : SEX RATIO BY TAHSILS, 2001**

| Serial number | Name of Tahsil | Sex ratio | | |
|---|---|---|---|---|
| | | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 |
| 1 | Nihal Singhwala | 887 | 885 | 930 |
| 2 | Bagha Purana | 892 | 890 | 905 |
| 3 | Moga | 886 | 888 | 879 |
| | **District Total:** | **887** | **888** | **884** |

Sex ratio by tahsils is shown in table 6. The sex ratio of the district is revealed as 887 while it is 888 for rural and 884 for urban.

Among the tahsils, the sex ratio varies between 892 in Bagha Purana and 886 in Moga. The rural sex ratio varies between 890 in Bagha Purana and 885 in Nihal Singhwala tahsils, and the urban sex ratio varies between 879 in Moga and 930 in Nihal Singhwala tahsils. The urban sex ratio is better than their rural counterparts in two tahsils, Bagha Purana and Nihal Singhwala. The sex ratio in all three tahsils is above the state average (849) in urban areas whereas it is below state average (890) in two tahsils in rural areas.

**TABLE 7 : SEX RATIO BY CD BLOCKS, 2001**

| Serial number | Name of C D block | Sex ratio |
|---|---|---|
| 1 | 2 | 3 |
| 1 | Dharamkot | 890 |
| 2 | Moga-I | 889 |
| 3 | Moga-II | 885 |
| 4 | Bagha Purana | 892 |
| 5 | Nihal Singhwala | 884 |
| 6 | Makhu (P) | 888 |
| 7 | Zira (P) | 889 |
| | **District (Rural) Total:** | **888** |

Table 7 exhibits C.D. blockwise sex ratio in the district. Among the CD blocks rural sex ratio varies between 892 in Bagha Purana and 884 in Nihal Singhwala. In all, Four CD blocks show rural sex ratio above and two below and one equal to the rural sex ratio of district (888). Amazingly none of the CD blocks crosses 900 mark.

**TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001**

| Range of sex ratio for villages | Number of inhabited villages | Percentage of villages in each range | Population 2001 | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Less than 700 | 3 | 0.9 | 256 | 0.0 |
| 700-749 | 2 | 0.6 | 122 | 0.0 |
| 750-799 | 7 | 2.2 | 1,899 | 0.3 |
| 800-849 | 37 | 11.5 | 37,735 | 5.3 |
| 850-899 | 149 | 46.4 | 443,061 | 61.9 |
| 900-949 | 81 | 25.2 | 205,940 | 28.8 |
| 950-999 | 29 | 9.0 | 23,852 | 3.3 |
| 1000-1099 | 11 | 3.4 | 3,243 | 0.5 |
| 1100+ | 2 | 0.6 | 106 | 0.0 |
| **District Total:** | **321** | **100.0** | **716,214** | **100.0** |
| **Sex ratio (Rural) for District:** | | **888** | | |

Sex ratio of rural population by ranges is portrayed in Table 8. The district as such is marked with a relatively low sex ratio (888). This is rather less than 800 in 12 villages. The villages with low sex ratio comprise 3.7 per cent of the total villages in the district and contain 0.3 per cent of district rural population. 37 villages (11.5 per cent) are marked with a rural sex ratio of 800-849 and they contain 5.3 per cent of the district rural population.

The maximum number of 149 villages exhibit a rural sex ratio in the range of 850-899. These make 46.4 per cent of the total villages and have more than three-fifth (61.9%) of the rural population of the district.

As many as 81 villages are marked with a high sex ratio of 900-949 and they constitute 25.2 per cent of the total villages and account for 28.8 per cent of the population. Male-Female ratio is quite close to parity in the range of 950-1099 in 40(12.4%) villages having 3.8 per cent of the rural population of the district.

**TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001**

| Serial number | Name of U.A./ Town+* | Urban status of town | Sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Badhni Kalan | N.P. | 930 |
| 2 | Bagha Purana | N.P. | 905 |
| 3 | Dharamkot | M.Cl. | 892 |
| 4 | Moga | UA | 878 |
| | i Moga | MCl+OG | 878 |
| | ii Moga | M.Cl. | 877 |
| | **Sex ratio (Urban) for the district:** | | **884** |

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Sex ratio of urban agglomerations/towns is exhibited in Table 9. The district has an urban sex ratio of 884, which is higher than the urban sex ratio of the State (849).

Among the UAs/ towns, the sex ratio varies between 930 in Badhni Kalan and 878 in Moga. In all, as many as 3 towns have sex ratio higher than that of the district and only in Moga town it is below the district average

**TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001**

| Serial number | Name of Tahsil | Total / Rural / Urban | Total population in 0-6 age group | | | Sex ratio for 0-6 age group |
|---|---|---|---|---|---|---|

| 3 | Moga | Total | 69,008 | 38,015 | 30,993 | 815 |
| | | Rural | 50,863 | 27,934 | 22,929 | 821 |
| | | Urban | 18,145 | 10,081 | 8,064 | 800 |
| | **District Total:** | **Total** | **116,296** | **63,967** | **52,329** | **818** |
| | | **Rural** | **94,468** | **51,856** | **42,612** | **822** |
| | | **Urban** | **21,828** | **12,111** | **9,717** | **802** |

Sex ratio in 0-6 population by tahsils exhibited in table 10. The district has a sex ratio 818 while it is 822 in rural and 802 in urban areas. In urban area sex ratio in 0-6 population is highest in Nihal Singhwala (889) and lowest in Bagha Purana (794). In rural area it is highest in Bagha Purana (824) and lowest in Moga (821).

**TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001**

| Serial number | Name of C.D. block | Total population in 0-6 age group | | | Sex ratio for 0-6 age group |
|---|---|---|---|---|---|
| | | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Dharmkot | 20,247 | 11,048 | 9,199 | 833 |
| 2 | Moga-I | 16,619 | 9,189 | 7,430 | 809 |
| 3 | Moga-II | 12,793 | 6,971 | 5,822 | 835 |
| 4 | Bagha Purana | 23,283 | 12,793 | 10,490 | 820 |
| 5 | Nihal Singhwala | 17,954 | 9,855 | 8,099 | 822 |
| 6 | Makhu (P) | 1,388 | 790 | 598 | 757 |
| 7 | Zira (P) | 2,184 | 1,210 | 974 | 805 |
| | District (Rural) Total: | **94,468** | **51,856** | **42,612** | **822** |

Table 11 shows CD Blockwise sex ratio of population in the age group 0-6 termed as child sex ratio.

The gap in the child sex ratio in rural areas (822) and the over all rural sex ratio (888) in the district is alarming; showing a gap of 66 points between the two. This is a cause of great concern and looks for possible remedial measures in bridging the gap between the two and also in improving the prevailing low levels of sex ratio. More so, four CD blocks viz. Bagha Purana (820), Moga-I (809), Zira (P) (805) and Makhu (P) (757) are marked with a child sex ratio even lower than the district average. Moga-II (835) and Dharamkot (833) are the only two CD blocks crossing district average (822) whereas Nihal Singhwala also with 822 equals the district sex ratio.

**TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001**

| Range of sex ratio for villages | Number of inhabited villages | Percentage distribution of villages | Population 2001 | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Less than 700 | 48 | 15.0 | 4,134 | 4.4 |
| 700-749 | 36 | 11.2 | 10,074 | 10.7 |
| 750-799 | 60 | 18.7 | 25,189 | 26.7 |
| 800-849 | 58 | 18.1 | 23,439 | 24.8 |
| 850-899 | 47 | 14.6 | 18,430 | 19.5 |
| 900-949 | 23 | 7.2 | 6,680 | 7.1 |
| 950-999 | 11 | 3.4 | 2,293 | 2.4 |
| 1000-1099 | 23 | 7.2 | 3,154 | 3.3 |
| 1100+ | 15 | 4.7 | 1,075 | 1.1 |
| **District (Rural) Total** | **321** | **100.0** | **94,468** | **100.0** |

Table 12 shows the sex ratio of rural population in the district in different ranges.

The district (Rural) is marked with a very low sex ratio (822). 48 (15.0%) villages are marked with an excessively low child sex ratio of less than 700. Together these villages constitute

4.4 per cent of the child population in age group 0-6 in rural areas of the district. The sex ratio is equally low in the range of 700-749 in 36 (11.2%) villages constituting 10.7 per cent of the district's child population. Another 60(18.7%) villages fall in the range of 750-799 and they contain one-fourth (26.7%) of the rural child population of the district.

177 (out of 321) villages which make a little more than one-half (55.2%) of the villages and contain 58.2 per cent of child population have crossed 800 mark. Among, them 58(18.1%) fall in the range of 800-849 and cover 24.8 per cent of district rural child population. Another 47 (14.6%) villages having 19.5 per cent of child population are in the range of 850-899. The rural child sex ratio is fairly high in the range of 900-949 in 23 (7.2%) villages containing 7.1 per cent of the child population, and another 11(3.4%) villages having 2.4 per cent of the population display a very high sex ratio of 950-999.

As many as 38 villages in the district are female biased and all of them fall in the range of 1000-1100 + and make 11.9 per cent of the total villages and share 4.4 per cent of the rural child population of the district.

**TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001**

| Serial number | Name of UA / Town+* | Urban status of town | Total population in 0-6 age group | | | Sex ratio for 0-6 age group |
|---|---|---|---|---|---|---|
| | | | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 13 shows sex ratio of child population in the age group 0-6 of urban agglomerations/towns in 2001. Urban child sex ratio in the district (802) is significantly lower than the overall urban sex ratio (884) and ranks 6$^{th}$ among all the districts in the state. The urban child sex ratio in Badhni Kalan (889) is somewhat better than that of the State, although it is quite low in itself.

Among the towns in the district, Child sex ratio is highest in Badhni Kalan (889) and the lowest in Dharamkot (783). As many as 2 towns viz. Bagha Purana (794) and Dharamkot (783) show urban child sex ratio lower than that of the district (802). Besides Badhni Kalan , Moga UA (802) also stands parallel to the district average.

**TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001**

| Serial number | Name of Tahsil | Total / Rural / Urban | Total population | Total Scheduled Castes population | Total Scheduled Tribes population | Percentage of Scheduled Castes population to total population | Percentage of Scheduled Tribes population to total population |
|---|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |

| | | Rural | 150,089 | 55,188 | - | 36.8 | - |
| | | Urban | 6,366 | 1,780 | - | 28.0 | - |
| 2 | Bhagha Purana | Total | 205,085 | 72,158 | - | 35.2 | - |
| | | Rural | 183,489 | 66,064 | - | 36.0 | - |
| | | Urban | 21,596 | 6,094 | - | 28.2 | - |
| 3 | Moga | Total | 533,314 | 155,813 | - | 29.2 | - |
| | | Rural | 382,636 | 125,537 | - | 32.8 | - |
| | | Urban | 150,678 | 30,276 | - | 20.1 | - |
| | **District Total:** | **Total** | **894,854** | **284,939** | **-** | **31.8** | **-** |
| | | **Rural** | **716,214** | **246,789** | **-** | **34.5** | **-** |
| | | **Urban** | **178,640** | **38,150** | **-** | **21.4** | **-** |

Table 14 shows 31.8 per cent of the population in the district belongs to Scheduled Castes as compared to 28.9 per cent in the State. Among the tahsils, it is the highest in Nihal Singhwala (36.4%) and the lowest in Moga (29.2 %). The proportion of Scheduled Castes population in Nihal Singhwala and Bagha Purana is higher than that of the district average (31.8%).

In consonance with the general trends in the State, Scheduled Castes population is more in rural areas by residence than urban areas. In rural areas of the district the highest percentage of Scheduled Castes has been observed in tahsil Nihal Singhwala (36.8%) while the lowest in Moga (32.8%).

There is no notified Scheduled Tribe population in the State.

**TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001**

| Serial number | Name of C.D. block | Total population | Total Scheduled Castes population | Total Scheduled Tribes population | Percentage of Scheduled Castes population to total population | Percentage of Scheduled Tribes population to total population |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | Dharmkot | 146,790 | 44,852 | - | 30.6 | - |
| 2 | Moga-I | 132,112 | 46,241 | - | 35.0 | - |
| 3 | Moga-II | 95,928 | 35,437 | - | 36.9 | - |
| 4 | Bagha Purana | 178,267 | 62,205 | - | 34.9 | - |
| 5 | Nihal Singhwala | 138,088 | 51,390 | - | 37.2 | - |

| | **District (Rural) Total:** | **716,214** | **246,789** | **-** | **34.5** | **-** |

Table 15 gives CD block wise distribution of Scheduled Castes population in the district. Population of Moga district is spread over in seven CD blocks.

The CD blocks among themselves exhibit spatial disparities in the proportion of Scheduled Castes population. It is the maximum in Nihal Singhwala (37.2%) and is closely followed by Moga-II (36.9%), Moga-I (35.0%). In all 4 CD blocks reveal percentage higher than the district average and three CD blocks fall below the district average and among them the percentage of Scheduled Castes population varies

**TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001**

| Percentage range of Scheduled Castes population to total population | Number of villages | Percentage | Scheduled Castes Population | Percentage |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Nil | 28 | 8.7 | 0 | 0.0 |
| Less than 5 | 12 | 3.7 | 202 | 0.1 |
| 5-10 | 6 | 1.9 | 300 | 0.1 |
| 11-20 | 37 | 11.5 | 5,951 | 2.4 |
| 21-30 | 71 | 22.1 | 49,981 | 20.3 |
| 31-40 | 95 | 29.6 | 110,283 | 44.7 |
| 41-50 | 50 | 15.6 | 58,743 | 23.8 |
| 51-75 | 18 | 5.6 | 20,554 | 8.3 |
| 76 and above | 4 | 1.2 | 775 | 0.3 |
| **District Total** | **321** | **100.0** | **246,789** | **100.0** |

Table 16 presents proportion of Scheduled Castes population in villages by ranges. 28 (8.7%) villages in the district do not have any Scheduled Castes population and in another 12 (3.7%) villages Scheduled Castes comprise 0.1 per cent of the total population. Yet another 6 (1.9%) villages have Scheduled Castes population in the range of 5-10 per cent and they contain only 0.1 per cent of the Scheduled Castes population of the district. All these 46 (14.3%) villages together make 0.2 per cent of the total population.

37 (11.5%) of the villages fall in the range of 11-20 per cent and they account for 2.4 per cent of the Scheduled Castes population of the district. One out of every five (22.1%) villages have Scheduled Castes population in the range of 21-30 per cent.

95 (29.6%) villages having 44.7 per cent of the district's rural Scheduled Castes population exhibit a relatively high proportion of Scheduled Castes population in the range of 31-40 per cent and another 50 villages which comprise 15.6 per cent of the total villages and 23.8 per cent of rural Scheduled Castes population of the district fall in the range of 41-50 per cent.

Further more 18 villages fall in the range of 51-75 per cent comprising 5.6 per cent of the total villages and 8.3 per cent of rural Scheduled Castes population of the district. 4(1.2%) of the villages fall in the range of 76.0 per cent and above having 0.3 per cent Scheduled castes population of the district.

**TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001**

| Percentage range of Scheduled Tribes population to total population | Number of villages | Percentage | Scheduled Tribes Population | Percentage |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |

There is no Scheduled Tribes in Punjab State.

## TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

| Serial number | Name of UA/ Town+* | Total population | Total Scheduled Castes population | Total Scheduled Tribes population | Percentage of Scheduled Castes population to total population | Percentage of Scheduled Tribes population to total population |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | Badhni Kalan (NP) | 6,366 | 1,780 | - | 28.0 | - |
| 2 | Bhagha Purana (NP) | 21,596 | 6,094 | - | 28.2 | - |

| 4 | Moga UA | 135,279 | 26,856 | - | 19.9 | - |
| 5 | Moga (M Cl+OG) | 135,279 | 26,856 | - | 19.9 | - |
| 6 | (i) Moga (M Cl) | 125,573 | 23,483 | - | 18.7 | - |
| | **District(Urban) Total** | **178,640** | **38,150** | - | **21.4** | - |

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 18 gives the number and percentage of scheduled castes population to total population in Urban Agglomeration/Towns.

In urban areas Scheduled Castes comprise about one-fifth (21.4%) population of the district as shown in Table 18 which is slightly better than the state (20.7%). The towns among themselves show wide disparity in this regard. In Bagha Purana 28.2 per cent of the population belongs to Scheduled Castes, while in Moga UA this percentage is barely 19.9 per cent.

There is no scheduled tribe in the state of Punjab

## TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

| Serial number | Name of C D block | Scheduled Castes sex ratio | Scheduled Tribes sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Dharamkot | 877 | - |
| 2 | Moga-I | 868 | - |
| 3 | Moga-II | 873 | - |
| 4 | Bagha Purana | 879 | - |
| 5 | Nihal Singhwala | 877 | - |
| 6 | Makhu (P) | 884 | - |
| 7 | Zira (P) | 849 | - |
| | **District (Rural) Total** | **875** | - |

Table 19 shows CD block wise sex ratio of Scheduled Castes population in the district. It is the maximum in Makhu (P) (884) and the minimum in Zira (P) (849). Moga-II (873) CD block falls in line with the district average. Moga-I (868), Moga-II (873) and Zira (P) (849) CD blocks fall below the district average (875) whereas Makhu (P) (884), Bagha Purana (879), Nihal Singhwala and Dharamkot (877) each excel the state.

There is no notified Scheduled Tribes population.

## TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

| Serial number | Name of U.A./ Town +* | Scheduled Castes sex ratio | Scheduled Tribes sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Badhni Kalan (NP) | 906 | - |
| 2 | Bagha Purana (NP) | 895 | - |
| 3 | Dharamkot (M Cl) | 904 | - |
| 4 | Moga UA | 910 | - |
| | (i) Moga (M Cl+OG) | 910 | - |
| | (ii) Moga (M Cl) | 916 | - |
| | **Sex ratio (Urban) for the district:** | **907** | — |

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 20 shows that Scheduled Castes population in urban areas of the district has a sex ratio of 907 which Surpasses all the districts except Faridkot (915) and is better than that of the overall urban sex ratio (884) of the district also. The situation is also quite encouraging in Moga UA (910) which has sex ratio more than the district average. In all, one town i.e. Moga shows urban sex ratio in Scheduled Castes population above and three below the district average. Amazingly, all the towns, except Bagha Purana (NP), cross 900 mark.

## TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

| Serial number | Name of Tahsil | Total / Rural / Urban | Number of literates and illiterates | | | | | | Percentage of literates | | | Gap in male-female literacy rate |

| 3 | Moga | Total | 305,104 | 172,045 | 133,059 | 228,210 | 110,778 | 117,432 | 65.7 | 70.3 | 60.6 | 9.7 |
| | | Rural | 204,338 | 116,052 | 88,286 | 178,298 | 86,588 | 91,710 | 61.6 | 66.4 | 56.2 | 10.2 |
| | | Urban | 100,766 | 55,993 | 44,773 | 49,912 | 24,190 | 25,722 | 76.0 | 79.9 | 71.7 | 8.2 |
| | **District Total:** | **Total** | **494,525** | **278,962** | **215,563** | **400,329** | **195,177** | **205,152** | **63.5** | **68.0** | **58.5** | **9.5** |
| | | **Rural** | **376,706** | **213,651** | **163,055** | **339,508** | **165,671** | **173,837** | **60.6** | **65.2** | **55.4** | **9.8** |
| | | **Urban** | **117,819** | **65,311** | **52,508** | **60,821** | **29,506** | **31,315** | **75.1** | **79.0** | **70.9** | **8.1** |

Table 21 reveals that 63.5 per cent of the district's population is literate compared with 69.7 per cent in the state as such. In other words, a little less than two third of its population in the district is literate.

Moga (65.7%) is the most literate tahsil in the district and exceeds the district average also. By contrast, Bagha Purana (59.4 %) with more than one-half of its population as literate is placed at the bottom. However, none of the tahsils in the district has literacy rate exceeding the overall literacy rate of the State.

Between the two sexes, the literacy rate in the district varies between 68.0 per cent among males and 58.5 per cent among females, exhibiting a gap of 9.5 percentage points. The male-female

differential is the widest (9.7 percentage points) in Moga tahsil (males 70.3 % and females 60.6%) and the narrowest (9.2 percentage points) in Bagha Purana tahsil (males 63.8 % and females 54.6 %).

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district; 60.6 per cent of the rural population and 75.1 per cent urban population is literate. The urban literacy is higher than the rural in all the tahsils and the gap in rural- urban literacy rate is the widest in Moga (urban- 76.0% and rural 61.6%) and the narrowest in Nihal Singhwala (urban- 68.4% and rural 61.1%). But both rural and urban literacy rates fail to excel the rates of the state.

**TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001**

| Serial number | Name of C.D.block | Number of literates and illiterates | | | | | | Percentage of literates | | | Gap in male-female literacy rate |

| 7 | Zira (P) | 6,984 | 4,017 | 2,967 | 7,911 | 3,870 | 4,041 | 54.9 | 60.2 | 49.2 | 11.0 |
| **District (Rural) Total:** | | **376,706** | **213,651** | **163,055** | **339,508** | **165,671** | **173,837** | **60.6** | **65.2** | **55.4** | **9.8** |

Rural areas of the district are marked with a relatively low literacy rate as can be seen from Table 22. More than one-half (60.6%) of the ruralites in the district are literate compared with 75.1 per cent in urban areas. Among the CD blocks, the rural literacy rate varies between 65.2 per cent in Moga-I and 54.9 per cent in Zira. Besides Moga-I (65.2%), Nihal Singhwala (61.3%) CD block has a literacy rate higher than the district average.

In all the C.D. blocks a little over one- half of their population is literate and male-female gap is 9.8 percentage points in district and the maximum 11.6 percentage points in Makhu C.D. Block.

**TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0 | 0 | 0.0 | 0 | 0.0 |

| **Literacy rate for District:** | | **63.5** | | |

Table 23 shows distribution of villages by ranges of literacy rate. Very low literacy rate in the range of 31-40 per cent is reported by 7(2.2 %) villages and they contain 0.3 per cent of the district's rural population. The maximum number of villages 135, which comprise two-fifth (42.1%) of the total villages and 44.5 per cent of the rural population of the district, are placed in the literacy range of 61-70 per cent.

Further more, 260(81.0%) villages containing 89.6 per cent of the district rural population together fall in the range of 51-70 per cent out of which 125 villages, which make a little more than one-third (38.9%) of the total villages and contain 45.1 per cent of rural population of the district fall in the range 51-60 per cent. 25 (7.8%) villages fall in the range of 71-90 having 5.1 per cent population.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 24 reveals that 75.1 per cent of the urban population in the district is literate. Among the towns, the literacy rate varies between 76.6 per cent in Moga UA and 68.4 per cent in Badhni Kalan. In all, one town i.e. Moga has literacy rate higher than the district average and as many as 3 towns fall below the district average.

Between the two sexes, 79.0 per cent among males and 70.9 per cent among females are literate. Likewise in urban, male literacy rate is the highest in Moga (80.5%) and the lowest in Badhni Kalan (70.3%). This is so in case of female literacy too; it is the highest in Moga UA (72.2%) and the lowest in Bagha Purana (66.2%). Besides Bagha Purana, the female literacy rate is lower than district average in Dharamkot (67.1%) and Badhni Kalan (66.4%).What to speak of female literacy rate, even male literacy rate of Moga urban beats Muktsar (78.4%), Mansa (77.3%) and Sangrur (75.4%) district.

Male-Female literacy rate in urban areas shows a sizeable gap of 8.1 percentage points. This gap is the maximum (8.8 percentage points) in Bagha Purana. On the other hand this gap is relatively the narrowest in Badhni Kalan (3.9 percentage points).

Table 25 shows the number and percentage of scheduled castes literates and illiterates by sex in CD blocks.

Scheduled Castes population in rural areas in the district has a literacy rate of 41.7 per cent compared with an overall rural literacy rate of 60.6 per cent in the district. Moga-I (46.8%) and Nihal Singhwala (43.8%) are the only two CD blocks which have literacy rate above the district average. In rural, scheduled castes literacy rate is the lowest in Makhu (31.3%), followed by Moga-II (38.0%), Zira (38.3%), Bagha Purana (39.0%) and Dharamkot (41.3%).

Nearly one-half (47.5%) of the males and a little over one-third (35.0%) of the scheduled castes females in the district are literate. Among the CD blocks male literacy rate varies between 53.4 per cent in Moga-I and 36.6 per cent in Makhu.

Likewise the scheduled castes female literacy shows wide variations; it is the highest (39.4%) in Moga-I and the lowest (25.0%) in Makhu (P).

Male-female Scheduled Castes rural literacy rates show a gap of 12.5 percentage points in the district, and among the C.D. blocks this gap is to the extent of 14.2 percentage points in Dharamkot and 10.9 per cent in Moga-II.

**TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001**

| **Literacy rate for District (Rural):** | | **41.7** | | |

Table 26 shows the distribution of villages by ranges of literacy rate for scheduled castes population.18 villages which make 6.2 per cent of the total villages and share 0.6 per cent of district's Scheduled Castes population fall in the range of 20 per cent or less. Another 27 villages which constitute 9.2 per cent of the total villages and 6.4 per cent of the district's Scheduled Castes population have literacy rate in the range of 21-30 per cent. All these villages are experiencing very low level of literacy in Scheduled Castes population. Similarly, 90 (30.7%) villages comprising 37.5 per cent of population fall in the range 31-40.

The maximum number of villages 97 which make 33.1 per cent of the total villages and 43.7 per cent Scheduled Castes population fall in the range of 41-50 per cent. Another 43 villages which constitute 14.7 per cent of the total villages and 9.5 per cent of the district's Scheduled Castes population have literacy rate in the range of 51-60 per cent. 4 villages which make 1.4 per cent of the total villages and 0.4 per cent Scheduled Castes population fall in the range of 71-80 per cent.

Very high Scheduled Castes literacy rate of more than 80 per cent is noticed in 1(0.3%) village only. However, its share in Scheduled Castes population of the district is negligible.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

The table 27 shows the number and percentage of scheduled castes literate and illiterate by sex in towns. A little less than one-half (45.7%) Scheduled Castes population in urban areas of the district is literate. Among the towns it is the highest in Moga UA (47.2%) and Badhni Kalan (44.7%) is the second best.

By contrast, urban Scheduled Castes literacy rate is lowest in Bagha Purana (40.5%) and followed by Dharamkot (44.0%).

51.4 per cent Scheduled Castes males and 39.5 per cent females in urban areas are literate reflecting a gap of 11.9 percentage points between the two. Male-female disparity in this regard is quite conspicuous. Among the towns Scheduled Castes male literacy rate varies between 53.1 per cent in Moga UA and 46.2 per cent in Bagha Purana, while the corresponding percentage among females is 41.6 per cent in Badhni Kalan and 34.2 per cent in Bagha Purana. Further more, male-female differential in Scheduled Castes literacy rate is the maximum in Moga UA (12.4 percentage points) and the minimum in Badhni Kalan (5.8 percentage points).

Table 31 shows that the work participation rate in Moga district (40.1%) is comparatively higher than the state average (37.5%). Among the tahsils it varies between (46.4%) in Nihal Singhwala and (38.2%) in Moga. In the district 53.9 per cent among males and 24.5 per cent among females are reported as workers.

Out of the total population in the district, 33.8 per cent are main workers and 6.3 per cent are marginal workers. The proportion of main workers is highest in Nihal Singhwala (38.8 per cent) and the lowest (32.0 per cent) in Moga tahsils. Similarly, the proportion of marginal workers is highest (7.6 per cent) in Nihal Singhwala and the lowest (5.4 per cent) in Bagha Purana tahsils. Further, the incidence of marginal workers is observed to be more among females in comparison to males; the proportion of female marginal workers in the district (8.2 per cent) is nearly twice that of males (4.6 per cent). By and large, a similar pattern is observed among all the tahsils in this regard. In Nihal Singhwala tahsil, 11.1 per cent of females are marginal workers as against 4.5 per cent among male counterparts. Moga (8.0 per cent) and Bagha Purana (6.4 per cent) too, have high proportion of female marginal workers.

The work participation rate (main + marginal) in Moga district (40.1 per cent) is better than the State average (37.5 per cent). Among tahsils, it varies between 46.4 per cent in Nihal Singhwala and 38.2 per cent in Moga. As compared to other districts, Moga is counted among five districts which cross 40.0 per cent mark regarding total workers and 15.0 per cent mark regarding female workers.

In the district 53.9 per cent among males and 24.5 per cent among females are reported as total workers showing a significant reduction in the gap between the two. In Nihal Singhwala tahsil, more than one-third (36.5 per cent) of the females are recorded as workers and this percentage is highest among all the tahsils in the district.

## TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 gives the number and percentage of main workers, marginal workers and non-workers by sex at CD block level. It is observed that 41.4 per cent of the rural population in the district is working, out of which 34.4 per cent are main workers and 7.1 per cent are marginal workers. This percentage is higher than that of the state where 39.5 per cent of the rural population is reported as workers out of which 32.2 per cent are main workers and 6.9 per cent are marginal workers.

Among the CD blocks, the work participation rate varies between 46.6 per cent in Nihal Singhwala and Makhu 35.6 per cent.

The percentage of main workers is highest in Nihal Singhwala C.D. block (38.7 per cent) and the lowest in Moga-II (30.7 per cent). However, the proportion of marginal workers is the maximum in Dharamkot CD block (10.1 per cent) and the minimum in Makhu (P) (3.6 per cent).

Punjab State, in general is characterised by low female work participation rate. It was the lowest 4.4 per cent among all the States/Union Territories in the country in 1991 Census. It was more due to non-reporting of female's work by the respondents.

Special efforts introduced at 2001 Census for netting female's work participation have helped in obtaining more accurate picture of female's work; Female work participation rate in Punjab (19.1 per cent) recorded in 2001 Census is nearly five times that of 1991 Census and Moga district is far ahead of the State with 27.1% female work participation rate comprising 17.6 per cent main workers and 9.5 per cent marginal workers

Among the C D blocks the women work participation rate varies between 36.6 per cent in Nihal Singhwala and 16.1 per cent in Zira (P).

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 33 gives the number and percentage of main workers, marginal workers and non- workers by sex in urban Agglomerations/Towns.

The work participation rate in urban areas of the district (34.7 per cent) is almost identical with that of the State (33.5 per cent). Among the towns in the district, the participation rate is highest in Badhni Kalan (37.0 per cent) and the lowest in Bagha Purana (32.8 per cent) as is evident from Table 33. Out of 4 towns one falls above and one below the district average while, it is nearly at par with the district average in case of two towns viz, Moga (M.Cl.) and Dharamkot.

The participation in marginal work is comparatively much less. In the district 3.0 per cent of the urban population is reported as marginal workers compared with 31.7 per cent main workers.

The percentage of population reported as marginal workers shows a variation of 4.2 per cent in Dharamkot and 2.1 per cent in Badhni Kalan. The corresponding proportion of main workers varies between 34.9 per cent in Badhni Kalan and 29.8 per cent in Bagha Purana.

The urban female work participation rate in the district is 14.2 per cent compared with 52.8 per cent among males. Among the towns it is highest in Badhni Kalan 20.3 per cent and the lowest in Bagha Purana 10.7 per cent. In all, female work participation rate is less than the urban female participation rate of the district in one town namely Bagha Purana.

Note: Percentage of Workers to total worker is given in brackets

Table 34 shows distribution of workers by sex in four categories of economic activity by tahsils in the district.

Among the total workers in the district, 28.5 per cent are cultivators, 23.4 per cent agricultural labourers 5.8 per cent household industry workers and 42.3 per cent reported as other workers. This signifies that 51.9 per cent of the total workers in the district are engaged in agricultural sector, while 48.1 per cent are in non-agricultural sector of economy.

Among tahsils, the percentage of cultivators is the highest in Bagha Purana (33.0 per cent) and the lowest in Moga (26.3 per cent). Likewise, the proportion of workers reported as agricultural labourers varies between 25.5 per cent in Bagha Purana tahsil and 22.0 per cent in Moga tahsil.

The proportion of workers engaged in household industry is again highest in Bagha Purana (8.7 per cent) and the lowest in Moga (3.6 per cent). In all, two tahsils fall above and one below the district average.

The participation of females in non-agricultural sector is greater than the agricultural sector. In the district 67.6 per cent female workers are engaged in non-agricultural sector (HHI-13.0 per cent and OW- 54.6 per cent).

Note: Percentage of workers to total worker is given in brackets

Table 35 presents distribution of workers by sex in four categories of economic activity in C.D. blocks. Among rural workers in the district, 33.3 per cent are cultivators, 27.0 per cent are agricultural labourers, 6.0 per cent are household industry workers and 33.6 per cent are other workers. This shows that 60.3 per cent of rural workers are engaged in agricultural and 39.6 per cent in non-agricultural sector.

Among C.D. Blocks, the proportion of rural workers recorded as cultivators is the highest in Makhu (P) (39.3 per cent) whereas the lowest has been observed in Nihal Singhwala (29.8 per cent). Likewise, the proportion of Agricultural labourers shows a variation of 38.1 per cent in Zira (P) and 24.3 per cent in Makhu (P) CD blocks. The proportion of rural workers engaged in household industry also exhibits significant variation at CD block level. It is highest in Bagha Purana (10.1%) and lowest in Makhu (P) (0.5 per cent).'Other workers' constitute nearly one third of the rural workers, 33.1 per cent such as in Dharamkot, 37.5 per cent in Moga-I, 36.4 per cent in Moga-II, 36.5 per cent in Nihal Singhwala and 36.0 per cent in Makhu (P) CD blocks. On the other hand, in Bagha Purana & Zira (P) one out of five workers (23.0 per cent) is reported as other worker.

Further, it reveals that participation of females is greater in non-agricultural sector in comparison with the agricultural sector except Dharmkot & Zira (P). Among rural female workers in the district, 35.6 per cent (C-13.7 per cent and AL-21.9 per cent) are agricultural workers and 64.5 per cent (HHI-13.5 per cent and OW-51.0 per cent) are non-agricultural workers.

Note: Percentage of workers to total workers is given in brackets.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 36 gives the distribution of workers by sex in four categories of economic activity of urban agglomerations/towns. Interestingly, almost one-ninth (11.7 per cent) of the workers in urban areas in the district are engaged in agricultural activities either as cultivator or agricultural labourer and this percentage is next only to Sangrur (15.5 per cent) and Mansa (12.3 per cent) and the remaining 88.3 per cent are occupied in non-agricultural pursuits as household industry workers and other workers. The table reveals that among towns/ UA's the proportion of urban workers recorded as cultivator is the highest in Badhni Kalan (17.4%) which is fairly high as

compared to the district urban (5.4%). The lowest being 3.3 in Moga UA. The proportion of agricultural labourers shows a variation of (13.2%) as the highest in Badhni Kalan and (5.1%) as the lowest in Moga UA whereas the district urban displays (6.3%).

It is further revealed that the percentage of household industry workers is the highest in Badhni Kalan (5.6%) and the lowest in Dharamkot (2.4%).

The proportion of other workers also shows significant variation at town level with the highest (86.6%) in Moga UA and the lowest (63.7%) in Badhni Kalan while at district level it is observed as (83.7%).

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 shows distribution of villages according to availability of different amenities by CD blocks.

**Education**

Educational amenity is available to 92.5 per cent of villages in the district. It is in case of 24 villages this facility is not available within the villages, but the same can be availed at some distance.

Among the CD blocks, all the villages in Bagha Purana and Nihal Singhwala have educational facility available to them within the village. In Dharamkot 86.7 per cent, Moga-I 95.6

per cent, Moga-II 95.5 per cent Makhu (P) (80.0 per cent) and Zira (P) 91.7 per cent of villages are having availability of educational facility within the village.

**Medical**

70.1 per cent villages in the district are equipped with some kind or the other medical facility. This percentage is as high as 97.9 per cent in Bagha Purana and 95.6 per cent in Moga-I CD blocks. Apart from this, one-half of the villages in the CD block of Zira (P) 50.0 per cent is having availability of medical facility within the village. The proportion of villages having medical facility is less than one-half of the villages in Dharamkot (48.3%) and Makhu (P) (46.7%) CD blocks.

**Improved Drinking Water**

The availability of improved drinking water refers to availability of drinking water through tap, handpump and tubewell. It is available to all the villages in the district.

**Post Office**

49.5 per cent of the villages in the district have availability of post office within the village and the villagers of the remaining 50.5 per cent avail this facility at some distance. One- half (52.3%) of the villages in Moga-II CD block have the availability of post office, Besides Moga-II , Bagha Purana (85.1%), Moga-I and Nihal Singhwala (71.1% each) also portray percentage of villages higher than the district average. Dharamkot, Makhu (P) and Zira (P) are having the availability of this facility less than that of the district average.

**Telephone**

Telephone facility is available in 87.2 per cent of the villages in the district, which by all means is a very high percentage. The position is the best in Bagha Purana and Nihal Singhwala CD blocks where cent per cent of the villages are enjoying this facility.The position is equally good in Moga –I (95.6%), Moga –II (95.5 per cent) and Zira (P) (91.7 per cent).

**Transport and Communication**

The villages in the district are fairly well equipped with transport and communication as 71.7 per cent of the villages have this facility. 91 (out of 321) villages are devoid of this facility, and avail it at some distance. Cent per cent of the villages in a CD block namely Bagha Purana have this facility available within the village.

**Banks**

Every fifth village (19.3%) in the district has a bank facility. In as many as four CD blocks the proportion of villages having banking facility falls below the district average while CD blocks viz. Bagha Purana (38.3%), Nihal Singhwala (31.6%) and Moga- I (26.7%) are above the district average.

**Agricultural Credit Societies**

Almost one out of every two villages (47.0%) in the district has agricultural credit societies. Among the CD blocks it varies between 89.5 per cent villages in Nihal Singhwala and 13.3 per cent in Makhu (P). In all, four CD blocks exhibit percentage of villages with agricultural credit societies above and three below the district average.

**Approach by pucca roads**

The percentage of villages approachable by pucca road in the district, as true for the state, is fairly high. In the district 100 per cent villages are approachable by pucca roads.

**Power Supply**

All the villages in the district are having power supply.

**TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001**

| Serial number | Name of C. D. block | Total population of inhabited villages | Type of amenity available | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Education | Medical | Improved drinking water* | Post Office # | Tele-phone | Transport communi cations $ | Banks | Agricultur al Credit Societies | Approach by pucca road | Power supply |

| | **District Total:** | 716,214 | 713,130 | 635,175 | 716,214 | 548,026 | 709,638 | 636,165 | 333,414 | 547,052 | 716,214 | 716,214 |
| | | (100) | (99.6) | (88.7) | (100.0) | (76.5) | (99.1) | (88.8) | (46.6) | (76.4) | (100.0) | (100.0) |

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 shows number and percentage of rural population served by different amenities in the district. It is very satisfying that almost the entire rural population in the district and its constituent CD blocks is being served by educational institutions. The same is true in case of safe drinking water supply, pucca roads and power supply.

As regards medical facility available, it is serving more than three-fourth (88.7%) of the rural population. Among the CD blocks, the proportion of population served by medical institutions is highest in Bagha Purana (99.6%) and the lowest in Makhu (P) (64.5%). The position is fairly good in Moga-I (98.9%) and Nihal Singhwala (92.8%) also where almost nine out of ten persons are enjoying these facilities

Post offices are serving 76.5 per cent of the rural population in the district and this percentage of population varies between 87.5 per cent in Bagha Purana and 45.7 per cent in Makhu (P) CD block.

Telephone facility is available to 99.1 per cent of the total population. The entire population in 5 C.D. blocks is availing the facility.

Transport and communication facility comprising bus and rail services is available to 88.8 per cent population of 7 C.D. blocks. Bagha Purana is the only C D block where (100.0%) of rural population is having the facility closely followed by Nihal Singhwala (98.8%) and Moga-I (91.5%) while in other blocks, it is available to nearly three fourth population.

Banks cater to the needs of 46.6 per cent population. Among the 7 C D blocks, the proportion of population served by banks is the highest in Bagha Purana (58.3%) whereas it is only (27.5%) in Zira (P).

A large number of people are having the facility of agricultural credit societies. In this regard CD blocks Nihal Singhwala (95.8%) and. Bagha Purana (88.9%) surpass district average (76.4 %).

**TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001**

| Village not having the amenity of | Distance range of place from the villages where the amenity is available | | | |

| 3. Post Office | 150 | 11 | 1 | 162 |
| 4. Telephone | 41 | 0 | 0 | 41 |
| 5. Bus Service | 91 | 0 | 0 | 91 |
| 6. Banks | | | | |
| (a) Commercial Bank | 179 | 54 | 27 | 260 |
| (b) Cooperative Bank | 176 | 78 | 37 | 291 |
| 7. Agricultural Credit Societies | 150 | 19 | 1 | 170 |

Table 39 shows distribution of villages which are not having certain amenities arranged by distance ranges from the places where these are available.

**Education**

24 villages, which do not have educational amenity and avail it within a distance of less than 5 kms.

116 villages in the district do not have middle schools. However, among them, this facility is available within 5 kms in case of 110 villages, and for the remaining 6 villages, it is available at a distance of 5-10 kms.

309 villages do not have Degree Colleges. In fact only 12 villages in the district have a degree college. However, this facility is available to 51 villages within five kilometers, in case of 75 villages at a distance of 5-10 kms. and the remaining 183 villages avail this facility by covering a distance of more than 10 kms.

**Medical**

311 villages in the district do not have availability of hospital within the village. The same is available to 87 villages within a distance of 5 kms, 90 villages avail it at a distance of 5-10 Kms and the residents of 134 villages cover a distance of more than 10 kms to avail this facility.

Likewise out of 289 villages, which do not have PHC, the same is available at a distance of less than 5 kms in respect of 85 villages, at a distance of 5-10 kms in case of 76 villages and at a distance of more than 10 kms to 128 villages.

**Post office**

Among the 162 villages in the district which do not have the post office, the same is available to 150 villages within a distance of 5 kms, at a distance of 5-10 Kms in case of another 11 villages and the remaining one village avails this facility by covering more than 10 kms.

**Telephone**

The district is well equipped with this facility as barely 41 (out of 321) villages do not have this facility and the same is available within a distance of 5 kms.

**Bus Service**

There are 91 villages, which do not have bus service available to them in the village itself but can avail it within a distance of 5 kms.

**Bank**

Rural banking seems to be lacking in the district. Commercial banking within the village is not available in 260 villages. Among them 179 villages avail this facility at a distance of less than 5 kms. In case of 54 villages it is available at a distance of 5-10 kms and for the remaining 27, villagers travel a distance of over 10 kms to avail this amenity.

Likewise, Co-operative banking facility is not available in 291 villages. Among them 176 villages avail it within a distance of 5 kms and in case of 78 villages it is available at a distance of 5-10 kms and for the remaining 37, villagers have to travel a distance of over 10 kms to avail this amenity.

**Agricultural Credit Societies**

Out of 170 villages, which are not having Agricultural Credit Societies, 150 can avail this facility within a distance of 5 Kms and for 19 villages it is available at a distance of 5-10 kms and only one village avails this facility by covering more than 10 kms.

**TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001**

| Distance range from the nearest statutory town (in kilometers) | Number of inhabited villages in each range | Type of amenity available | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Education | Medical | Post Office # | Telephone | Transport communications $ | Banks | Agricultural Credit Societies | Approach by pucca road |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |

# Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows that 45 villages in the district are located within a distance of less than 5 kms, 231 villages in the distance range of 5-15 Kms and 45 villages are located within 16-50 Kms from the nearest statutory town. None of the villages falls in 51 + and unspecified ranges.

Maximum number of villages (231) fall in the distance range of 5-15 Kms and among them educational facility is available to 211(91.3 per cent) villages, medical facility is available to 163(70.6 per cent) villages, post office to 113 (48.9 per cent) villages and 198(85.7 per cent) villages have availability of telephone. Transport and communications facility is available to 168(72.7 per cent) villages, 47 (20.3 per cent) villages have banks and 104(45.0 per cent) villages have agricultural credit societies and all the villages in this range are approached by pucca road. Similar trends are seen in the availability of amenities in the distance range of 16-50 kms.

**TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001**

| Population range | Number of inhabited villages in each range | Type of amenity available | | | | | | | | | |

# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 presents distribution of villages by population ranges and amenities available.

Out of 321 villages, 69 have a population of less than 500, 51 fall in size class of 500-999, 71 have population in the range of 1,000-1999, 90 in the range of 2,000-4999, 38 villages comprise the size class 5,000-9,999 and 2 villages are having population of 10,000 or more.

Educational facility is available to cent per cent of the villages under various size classes, barring size classe 1-499 where out of 69 villages, 45 (65.2 per cent) villages have this facility.

Medical facility is available to all the 40 villages having population of 5,000 or more. Among others, this facility is available to 28 (54.9 per cent) villages in the range of 500-999, 49(69.0 per cent) villages with population 1,000-1,999, and 82 (91.1 per cent) villages in size class 2,000-4,999.

Improved drinking water is available to all the villages in the district.

Post office is available in all the 2 villages having population of 10,000 or more. Among others, this facility is available to 6 (8.7 per cent) villages in the population range of 1-499, 12 (23.5 per cent) villages in size class 500-999, 33(46.5%) villages with population 1,000-1,999, 71 (78.9 per cent) villages in size class 2,000-4,999 and 35(92.1 per cent) villages with population 5000-9999.

Cent per cent of the villages with population in the range of 500 and more have availability of telephone. It is only in size class 1-499 where 28 (40.6 per cent) out of 69 villages enjoy this facility.

Transport and communication is available to all the 40 villages under size classes 5,000 +, and to 83(92.2per cent) villages in size class 2000-4999. Even among the smaller villages, this facility is available to 27(39.1 per cent) villages with population below 500, and 34(66.7 per cent) villages in size class 500-999 and 46(64.8 per cent) villages in size class 1000-1999.

Availability of banks is predominantly the characteristic of larger villages. 2 (100.0 per cent) villages with population 10,000 or more have banks. Likewise, 2(3.9 per cent) villages in size class 500-999, 3(4.2 per cent) villages with population in the range of 1000-1999, 24(26.7 per cent) villages with population in the range of 2000-4999 and 31(81.6 per cent) villages with population range 5000-9999 have the availability of banks.

Agricultural credit societies are available in all the villages under population size 5000+, It is also available to 77.8 per cent of villages with population 2000-4999, 32.4 per cent villages in size class 1,000- 1,999, 31.4 per cent villages having population in size class 500-999 and 4.3 per cent villages with population below 500.

All the Villages in the District are approachable by Pucca road.

All the villages in the district have the availability of power supply.

**TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001**

| Serial number | Name of C. D. block | Number of inhabited villages | Total area (Hect.) | Percentage of cultivable area to total area | Percentage of irrigated area to total cultivable area |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Dharmkot | 120 | 45,688 | 90.2 | 98.9 |
| 2 | Moga-I | 45 | 37,041 | 87.4 | 96.8 |
| 3 | Moga-II | 44 | 32,620 | 91.4 | 98.8 |
| 4 | Bagha Purana | 47 | 55,665 | 90.8 | 92.8 |
| 5 | Nihal Singhwala | 38 | 39,057 | 90.0 | 95.6 |
| 6 | Makhu (P) | 15 | 3,342 | 91.7 | 99.6 |
| 7 | Zira (P) | 12 | 4,943 | 89.8 | 100 |
| | **District Total:** | **321** | **218,356** | **90.1** | **96.4** |

Note : - Cultivable area = irrigated area + unirrigated area

CD blockwise villages, according to land use are given in Table 42. Bagha Purana CD block (55,665 hectares) is the largest and Makhu (P) (3,342 hectares) is the smallest in area. In the district 90.1 per cent of the area is cultivable and among the CD blocks this percentage varies between 91.7 per cent in Makhu (P) and 87.4 per cent in Moga-I. Four, out of 7 CD blocks have percentage of cultivable area greater than that of the district average.

96.4 per cent of the cultivable area in the district is irrigated. All the CD blocks have fairly high proportion of their cultivable area under irrigation and this percentage varies between 100.0 per cent in Zira (P) and 92.8 per cent in Bagha Purana.

## TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

| Serial number | Class, name & urban status of the Town | Per capita receipt | | | Per capita expenditure | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Total | Through taxes | From all other sources | Total | General Administration | Public health and conveniences | Public works | Public institutions | Other (s) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 1 | V Badhni Kalan (NP) | 312.4 | 280.7 | 31.7 | 153.0 | 1.0 | 31.4 | 34.7 | 0.0 | 85.9 |
| 2 | III Bagha Purana (MCI) | 611.9 | 413.5 | 198.4 | 633.5 | 38.9 | 134.2 | 292.6 | 0.0 | 167.6 |
| 3 | IV Dharamkot (MCI) | 448.9 | 253.7 | 195.2 | 412.8 | 117.6 | 137.1 | 67.8 | 0.0 | 90.3 |
| 4 | I Moga (UA) | 611.1 | 481.4 | 129.7 | 595.9 | 68.4 | 158.5 | 101.4 | 0.0 | 267.6 |
| 5 | I Moga (MCI) | 611.1 | 481.4 | 129.7 | 595.9 | 68.4 | 158.5 | 101.4 | 0.0 | 267.6 |
| | **District Total** | 586.6 | 446.4 | 140.2 | 568.9 | 66.7 | 149.2 | 119.2 | 0.0 | 233.7 |

Table 43 shows per capita receipt and expenditure incurred for all the statutory towns in the district. The per capita receipt in the district is Rs 586.6 out of which Rs 446.4 comes through taxes and Rs 140.2 through all other sources. The per capita receipt is as high as Rs 611.9 in Bagha Purana and as low as Rs 312.4 in Badhni Kalan.

As against the per capita receipt of Rs 586.6 the district is incurring per capita expenditure of Rs 568.9. The per capita expenditure on general administration is to the extent of Rs. 66.7, on Public health and conveniences Rs 149.2, public works Rs. 119.2 and Per capita expenditure on public institutions is nil, while it is Rs. 233.7 for all other types of activities. Interestingly, per capita expenditure exceeds per capita receipts in Bagha Purana.

## TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

| Serial number | Name and urban status of Town | Type of educational institution | | | | |
|---|---|---|---|---|---|---|
| | | Primary | Junior Secondary / Middle | Secondary / Matriculation | Senior Secondary | College |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | Badhni Kalan (NP) | 4.7 | 3.1 | 3.1 | 3.1 | 0 |
| 2 | Bagha Purana (MCI) | 4.2 | 2.8 | 2.8 | 0.9 | 0 |
| 3 | Dharamkot (MCI) | 1.9 | 1.3 | 1.3 | 0.6 | 0.6 |
| 4 | Moga (UA) | 658.3 | 518.6 | 139.7 | 641.9 | 73.7 |
| | **District Total** | **1.6** | **1.0** | **1.0** | **0.7** | **0.1** |

Table 44 shows number of schools/colleges per 10,000 population for towns. In the district there are 1.6 primary schools, 1.0 junior secondary/middle schools, 1.0 secondary/matriculation schools, 0.7 senior secondary schools and 0.1 colleges per 10,000 population.

In other words, there is a primary school for a population of 6,250, a junior secondary/middle school and secondary/matriculation school for 10,000 persons, a senior secondary school for 14,286 populations and a college for a population of 100,000.

**TABLE 45: NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001**

| Serial number | Name and urban status of the Town | Number of beds in medical institutions per 10,000 population |
|---|---|---|
| 1 | 2 | 3 |
| 1 | Badhni Kalan(NP) | 13 |
| 2 | Bagha Purana(MCI) | 21 |
| 3 | Dharamkot(MCI) | 10 |
| 4 | Moga(UA) | 0 |
| 5 | Moga(MCI) | 29 |
| | **District Total** | **14** |

Table 45 shows number of beds in medical institutions in towns per 10,000 population. The district on an average has 14 beds per 10,000 population. Among the towns, Moga has 29 beds per 10,000 population and this is the highest among all the towns in the district. Besides Moga, Bagha Purana (21) is the other town which has more beds per 10,000 populations, than that of the district average. Only Dharamkot is having lowest number of 10 beds per 10,000 population.

**TABLE 46: PROPORTION OF SLUM POPULATION IN TOWNS, 2001**

| Serial number | Name of the Town | Total population | Slum population approximately | Percentage of slum population to total population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 1 | Bagha Purana | 21,596 | 3,176 | 14.7 |
| 2 | Moga (MCl.) | 1,25,573 | 10,125 | 8.1 |
| | **District Total** | **1,47,169** | **13,301** | **9.0** |

Table 46 shows proportion of slum population living in statutory towns in the district. Bagha Purana and Moga towns have reported slum population. In absolute terms 13,301 persons are living in slums which accounts for 9.0 per cent of the total urban population. In the town of Bagha Purana 14.7 per cent of the total population is residing in slums and contributes only 7.5 per cent slum population.

**TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001**

| Serial number | Name and urban status of Town | Most important commodity | |
|---|---|---|---|
| | | Manufactured | Exported |
| 1 | 2 | 3 | 4 |
| 1 | Badhni Kalan (NP) | | Wheat<br>Paddy<br>Cotton |
| 2 | Bagha Purana (MCI) | Mustard Oil<br>Agricultural Implements<br>Wooden Furniture | Wheat<br>Paddy<br>Wooden Furniture |
| 3 | Dharamkot (MCI) | Monoblock Motors<br>Cattle Feed<br>Wooden Furniture | Sugar Cane<br>Rice<br>Wheat |

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

| Serial number | Name and urban status of Town | Most important commodity | |
|---|---|---|---|
| | | Manufactured | Exported |
| 1 | 2 | 3 | 4 |
| 4 | Moga (UA) | | |
| 5 | Moga (MCl) | Coffee<br>Thrasher<br>Nestle Milk Products (Ghee) Skimmed Milk & Chocklate) | Coffee<br>Agriculture Machinery<br>Nestle Milk Products |

Table 47 shows most important commodities manufactured in the towns and exported out.

The manufacturing of agricultural implements is an important commodity in three towns. Generally speaking, each town has its own characteristics as revealed by this table. Manufacturing of Thrashers and Nestle Milk Products is the Characteristics of Moga. Agricultural implements, and cattle feed are manufactured by Bagha Purana and Dharamkot.

Besides the agriculture-oriented products, Agriculture Machinery, Nestle Milk Products, and wooden furniture are the other key items exported from the towns of the district.

## (x) Brief Analysis Based on Houses and Household Amenities

TABLE 48: HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

**Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".**

Table 48 shows households by tenure status and number of rooms occupied in the district.

143,385 households in the district are living in houses owned by them, 6,701 in rented houses and 3,583 in houses with tenure status 'others' i.e. neither owned nor rented. This reflects that 93.3 per cent of the households are living in owned houses, 4.4 per cent in rented houses and remaining 2.3 per cent in 'others'.

Among the households living in owned houses, 29,932 (20.9%) have one room, 44,745(31.2%) have two rooms, 31,807 (22.2%) have three rooms and 36,240 (25.3%) have more than three rooms. This reveals that the majority of the owned houses have two or more rooms. Interestingly 661(0.5%) of the households living in owned houses do not have any exclusive room.

By and large a similar pattern is observed both in rural and urban areas. In rural areas 21.5 per cent of households are living in owned houses having one room; 31.4 per cent in 2 rooms, 21.7 per cent have 3 rooms, and 24.9 per cent have more than 3 rooms; the corresponding percentages for urban areas are 17.9, 30.2, 24.2 and 27.1 respectively. Further more, 0.4 per cent of rural households and 0.5 per cent of urban households are residing in owned houses, which do not have any exclusive room.

Among the Scheduled Castes, 0.5 per cent have no exclusive room, 39.5 per cent are residing in owned houses with one room, 36.9 per cent have two rooms, 14.2 per cent have three rooms and 8.9 per cent houses with more than 3 rooms.

**TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001**

| Sl. No. | District/ Tahsil | Total | | | Rural | | | Urban | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Permanent | Semi-permanent | Temporary | Permanent | Semi-permanent | Temporary | Permanent | Semi-permanent | Temporary |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| | **Moga** | **134,141** | **11,737** | **7,776** | **104,703** | **10,031** | **7,070** | **29,438** | **1,706** | **706** |
| | | **(100.0)** | **(100.0)** | **(100.0)** | **(100.0)** | **(100.0)** | **(100.0)** | **(100.0)** | **(100.0)** | **(100.0)** |
| 1 | Nihal Singhwala | 23,902 | 1,845 | 1,006 | 22,967 | 1,780 | 967 | 935 | 65 | 39 |
| | | (17.8) | (15.7) | (12.9) | (21.9) | (17.7) | (13.7) | (3.2) | (3.8) | (5.5) |
| 2 | Bagha Purana | 30,281 | 2,513 | 1,760 | 27,037 | 2,375 | 1,709 | 3,244 | 138 | 51 |
| | | (22.6) | (21.4) | (22.6) | (25.8) | (23.7) | (24.2) | (11.0) | (8.1) | (7.2) |
| 3 | Moga | 79,958 | 7,379 | 5,010 | 54,699 | 5,876 | 4,394 | 25,259 | 1,503 | 616 |
| | | (59.6) | (62.9) | (64.4) | (52.2) | (58.6) | (62.1) | (85.8) | (88.1) | (87.3) |

Table 49 shows percentage distribution of households living in permanent, semi-permanent and temporary houses. It is to the tune of 87.3 per cent, 7.6 per cent and 5.1 per cent to total households respectively.

Table 49 shows percentage distribution of households by tahsil living in permanent, semi permanent and temporary houses. Out of 134,141 households living in permanent houses in the district, 17.8 per cent are in Nihal Singhwala, 22.6 per cent in Bagha Purana and 59.6 per cent are in Moga. The percentage share of households living in semi-permanent houses of the district shows a variation of 62.9 per cent in Moga and 15.7 per cent in Nihal Singhwala. There are 7,776 households living in temporary houses and make 5.1 per cent of the total households in this category. Moga and Bagha Purana constitute 64.4 and 22.6 per cent each of the households living

in temporary houses in the district respectively and the share of remaining tahsil Nihal Singhwala is 12.9 Per cent.

Out of the total households living in permanent houses, 104,703 (78.1 per cent) are in rural areas and 29,438 (21.9 per cent) in urban areas. Likewise percentage of households living in semi-permanent houses in rural and urban areas is 85.5 and 14.5 respectively. There are 7,776 households living in temporary houses and among them 7,070 (90.9 per cent) are in rural and 706 (9.1 per cent) in urban.

**TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001**

| Serial number | Tahsil | Total / Rural / Urban | Number of households | Number and percentage of households having | | | | |
|---|---|---|---|---|---|---|---|---|

**Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".**

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

**Note:** Percentage is given in brackets after the number of household.

Bathrooms means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table 50 shows proportion of households having improved drinking water, electricity, bathroom, and toilet and drainage connectivity.

**Improved drinking water**

Households having tap, hand pump, and tubewell as the source are grouped as having improved drinking water facility. In the district it is available to 97.5 per cent of the households, the corresponding figures for the rural and urban areas are 97.0 and 99.1 per cent respectively. The trends are, by and large, the same among the tahsils in the district.

**Electricity:**

Electricity as the source of lighting is available to 91.7 per cent of the households in the district; the corresponding figures for rural and urban areas are 90.6 and 95.6 per cent respectively signifying that the rural areas do not lag much behind their urban counterparts. The trends are, by and large, the same for all the tahsils barring Bagha Purana where 89.2 per cent of the households have electricity and this percentage is significantly lower in rural parts (88.5%) compared with the urban (95.7%).

**Bathroom**

Bathroom is available to nearly three-fourth (70.9%) of the households in the district. Even in rural areas this facility is available to 68.3 per cent households compared with 80.8 per cent of the urban households.

Among the tahsils, Nihal Singhwala with 78.3 per cent of the households having this facility ranks at the highest and Moga with 66.3 per cent is at the tail.

**Toilet**

Two-third of the households (66.6 per cent) have toilet facility. Among the tahsils this percentage varies between 69.5 per cent in Nihal Singhwala and 65.3 per cent in Bagha Purana.

61.8 per cent of the households in rural areas are equipped with toilet facility as compared to 85.2 per cent in urban areas. Here too in rural areas, Nihal Singhwala tahsil (69.2 per cent) at ranks the highest and Moga (57.9 per cent) at the lowest. In urban area, the Moga tahsil with 86.1 per cent is on top and Nihal Singhwala with 76.5 per cent at the bottom.

**Drainage:**

76.2 per cent households are having drainage facility in comparison to 74.1 per cent in rural and 84.2 per cent in urban. Among tahsils, Moga leads with 76.0 per cent in rural and Nihal Singhwala with 93.9 per cent in urban. Amazingly the over all position of drainage system in Moga district is appreciable.

## TABLE 51: DISTRIBUTION OF HOUSEHOLDS BY AVAILABILITY OF SEPARATE KITCHEN AND TYPE OF FUEL USED FOR COOKING

| Sl. No. | District/ Tahsil | Total/ Rural/ Urban | Total household | Type of fuel used for cooking | | | | | | | | | |

**Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".**

Table 51 gives the distribution of households by availability of separate kitchen and type of fuel used for cooking.

Cow dung cake is the most dominant fuel used for cooking in the district as it is being used by 40.5 per cent of the households. This percentage is as high as 43.3 per cent in Bagha Purana tahsil. In urban areas 15.3 per cent of households are using Cow dung cake and this percentage is almost three times less than that of the rural (47.0 per cent).

Cooking gas (LPG) is the second most dominant fuel used for cooking in the district as it is being used by 27.2 per cent of the households. This percentage is as high as 32.6 per cent in Moga tahsil. In urban areas 59.0 per cent of households are using cooking gas (LPG) and this percentage is three times more than that of the rural (18.8%).

Firewood is the third largest fuel used for cooking. In the district almost every sixth household (15.2 per cent) is using firewood, the corresponding percentages for rural and urban areas are 16.8 and 9.3 per cent respectively. The use of firewood as fuel for cooking in rural areas is more than urban in all the tahsils and Bagha Purana rural is leading with 24.5 per cent and Moga urban with 9.5 per cent.

Among rest of the fuels being used, only crop residue (11.8 per cent) and kerosene (3.4 per cent) are worth mentioning. Other type of fuel used is noticed negligible such as coal, electricity and biogas are used the least.

**TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET**

| District/ Tahsil | Total/ Rural/ Urban | Total number of households | Total number of households availing banking service | Availability of Assets | | | | | | |

**Data Source: Census of India 2001, H-Series: "Tables on Houses, Household Amenities and Assets".**

Table 52 shows the number of households availing Banking services and number of households having each of the specified assets. It is revealed from the table that Out of 153,669 households in the district, 63,228 (41.1 per cent) are availing banking services; 52,030 (33.9 per cent) have Radio, Transistor; 96,377 (62.7 per cent) have television; 23,855 (15.5 per cent) have telephone; 116,756 (76.0 per cent) have bicycle; 43,192 (28.1 per cent) have scooter, motorcycle, moped and 9,389 (6.1 per cent) have car/ jeep/van. The over all scenario of availability of assets in the district can be graded as fairly good. Nevertheless, 17,651(11.5 per cent) of the households have none of these assets available to them. By and large the same trend is noticed among all the tahsils with slight variations in different assets such as Moga leads in availability of banking services (43.7 per cent), television (67.3 per cent), scooter, motor cycle, moped (30.2 per cent), telephone (19.7 per cent), bicycle (74.9 per cent) and car, jeep, van (6.8 per cent) and radio (35.5 per cent).

### (xi) Places of tourist, religious, historical or archeological importance

Moga was formed as a new district on 23 November 1995 by carving out Moga and Nihal Singhwala Subdivisions of Faridkot District and some area of Zira Tahsil (45 villages of Zira Tahsil, 47 villages of Makhu Sub Tahsil along with the whole of Dharmkot Sub Tahsil). At present the district comprises three tahsils/subdivisions viz. Moga, Nihal Singhwala and Bagha Purana and two sub tahsils namely Dharmkot and Badhni Kalan.

Moga District falls under the jurisdiction of Firozpur Division. The district lies in the west of Punjab and is surrounded by Jalandhar District in the north, Firozpur District in the north-west, Faridkot District in the west, Ludhiana District in the east, Sangrur District in the south-east and Bhatinda District in the south. It is situated 30° 29 and 30 53° north latitude and 74° 54 to 75° 25 east longitude. It spreads over an area of 2,235 sq. km. It is 4.44 per cent of the total area of the Punjab State.

**Dhudike**

The village Dhudike is located to the south of village Ajitwal from Jagraon G. T. Road. It lies 3 km from Ajitwal railway station on the Ludhiana-Firozpur railway line and is linked with a pucca road between Moga and Jagraon, some 16 km from either town. The village has one rural hospital and one degree college viz. Lala Lajpat Rai Memorial Government College, Dhudike. Dhudike was the sub centre of Ghadar Movement from where nine Ghadari Baba's belong. Two Ghadari Baba's of this village were sentenced to death on 18 June 1916 at Lahore for Lahore Conspiracy case, two were given life time imprisonment, two were imprisoned for three years and one was jailed for six months.

Dhudike is not only the historical village of Moga District but it is also the birth place of Punjab *Kesri* Lala Lajpat Rai one of the most prominent patriots of India. Punjab *Kesri* Lala Lajpat Rai was born on 28 January 1865 to Munshi Radha Krishan and Gulab Devi at village Dhudike (his maternal village) district Moga. His birthday is celebrated every year in this village which attracts a large number of persons. Lala Lajpat Rai immensely contributed in attaining India's Independence. In 1920 after his return from America, he plunged into the Non-Cooperation Movement which was launched in response to the Rowlatt Act in principle. The movement was led by Lala Lajpat Rai in Punjab and he soon came to be known as Punjab *Kesri* (The Lion of Punjab). On 30 October 1928, to boycott the arrival of the members of the Simon Commission in Lahore, a peaceful procession, headed by Lala Lajpat Rai was launched. Intercepting the march, Superintendent of Police, Scott ordered his police force to '*lathi charge*' at the activists. The police targeted Lala Lajpat Rai, in particular, and hit him on the chest. The confrontation left Lala Lajpat Rai with severe injuries and also led to his death. A memorial-cum-museum has been erected here in the memory of the great freedom fighter which also contains photos of the patriots who participated in Ghadar Movement.

**Daroli Bhai**

The name of the village has been transcribed after the name of 'Gujjar' woman,'Daroli'. Daroli Bhai is an important historical place and is situated at a distance of 13 km. from Moga on the Moga-Firoz Shah road. Various historical places associated with the visit of Guru Hargobind Sahib located in this village are described below:

**Gurdwara Guru Ka Mahal (Gurdwara Attari Sahib).-** The history of this Gurdwara is associated with the visit of Sixth Guru Hargobind Sahib and his family. Bhai Sai Dass brother-in-law of Guru Hargobind Sahib constructed a palatial house and requested Guru Ji to visit the house. Guru Hargobind Sahib visited this place on the spiritual request of Bhai Sai Dass and stayed here for sometime. During this stay, the eldest son of Guru, Baba Gurditta Ji was born where now a magnificent Gurdwara named as '*Janam Asthan* Baba Gurditta Ji' stands. Some personal belongings of Guru Hargobind Sahib viz. the *chola* or *gown, kachhehra,* shawl of Mata Damodari Ji and an iron hot plate are preserved and displayed here for the devotees. It is said that Guru Ji cooked *chapattis* on this hot plate, when he founded a free kitchen on Baisakhi day in this village.

Besides the personal belongings of Guru Hargobind Sahib, a handwritten copy of Shri Guru *Granth Sahib* containing *Mohr* of Guru Gobind Singh Ji and *Rag Mala* is also preserved and displayed here for the devotees. At the time of Bhangani War this *Bir* was consigned by Guru Gobind Singh Ji to river Yamuna at Paunta Sahib.The *Bir* remained in Yamuna for nine days and

about four hours. After the war Guru Ji sent five Sikhs to Yamuna and prayed their trust may be returned. The supplication was accepted and with the trap of water the *Bir* reached on the bank of the river . After occupying it, the Sikhs presented the *Bir* to Guru Sahib, who entrusted this *Bir* to Bhai Nand Chand Ji *wazir* of Guru Gobind Singh's army after the victorious end of Bhangani War.

**Gurdwara Dehra Sahib (Angitha Sahib).**-Gurdwara Dehra Sahib (Angitha Sahib) has been constructed in the memory of Mata Damodari Ji wife of Guru Hargobind Sahib who breathed her last in village Daroli Bhai. The place where cremation ceremony of Mata Damodari Ji was peformed was bestowed by Guru Hargobind Sahib as 'Kashi.' Later on cremation ceremonies of other near relatives of Mata Damodari Ji were also performed at this place.

Besides these Gurdwaras, Gurdwara Hargobind Sahib and *Smadh* Baba Des Raj Ji are also located in this village.

**Gurdwara Lohgarh Sahib.**- Gurdwara Lohgarh Sahib is situated in village Dina (tahsil/subdivision, Nihal Singhwala) of the Moga District. It is located on the Barnala-Nihalsinghwala road. It is 15 km. from Nihalsinghwala and 13 km. from Bhadaur. After evacuating Anandpur Sahib in December 1705 A.D., Guru Gobind Singh ji came here and stayed for a few days. Guru Ji was served with devotion by Chaudhari Shamir and Lakhmir, grandsons of the local Chief Rai Jodh who fought on the side of Guru Hargobind Sahib Ji in the battle of Mahraj in December 1634 A.D.

At this place namely 'Kangar' 2 km. south of Dina, Guru Gobind Singh Ji wrote the famous letter in persian language called '*Zafarnama*' to Emperor Aurangzeb. The commemorative shrine established here is named Gurdwara Lohgarh Sahib. To commemorate the memory of Guru Gobind Singh Ji, a big religious fair is held here every year on 13 and 14 January. Here Guru Gobind Singh Ji discarded his blue dress of *Uch Ka Pir*. Till then, very few people know that *Uch Ka Pir* was none else but the tenth master. Nawab of Sirhind Wazir Khan also got the news about the Guru and consequently directed the Chaudhary to arrest the Guru and send him to Sirhind. A man of steadfast faith Shamir after consulting his brother write back "Just as you hold your '*Pir*' in high respect, we too are dedicated to the service of our Guru, since he loves all, we cannot carry out your orders and we would beg to be excused".

**Gurdwara Nanaksar, Takhtupura.**- Gurdwara Nanaksar Sahib is situated in village Takhtupura, tahsil Nihalsinghwala. It is 32 km. south east of Moga and is 3 km. from the main Moga-Barnala road between village Lohara and Bilaspur. The place has been sanctified by the visits of three Sikh Gurus viz. Guru Nanak Dev Ji, Guru Hargobind Sahib Ji and Guru Gobind Singh Ji. Separate shrines dedicated to each one of them are located there around a beautiful *sarovar* in the premises of Gurdwara Nanaksar. Gurdwara Sahib *Patshahi Pehli* is on the bank of *sarovar*, which commemorates the visit of Guru Nanak Dev Ji. Guru Ji came to this village alongwith *Bhai* Mardana and *Bhai* Bala. Guru Ji had a dialogue with Sidh *Yogis* who lived on a nearby mound. Gurdwara Sahib *Patshahi Chhevin* marks the site of the camp where Guru Hargobind Sahib stayed when he came after winning the battle of Mahraj in the 1634 A.D. Gurdwara Sahib *Patshahi Dasvin* located on the eastern side of the *sarovar* is associated with the visit of Guru Gobind Singh Ji. Guru Ji came here on his way from Chakar to Dina in December 1705 A.D. He is said to have bathed in the *sarovar*. Every year *Jor* Mela is organized in a big way from 13 January to 17 January.

**Gurdwara Gurusar, Lopon.**- This Gurdwara is situated in village Lopon, tahsil Nihal Singhwala in the memory of Shri Guru Hargobind Sahib Ji. Guru Ji stayed here for two days. A new building of Gurdwara was constructed in 1960.

**Gurdwara Aaduporh Sahib.**- Gurdwara Aaduporh Sahib is situated in village Machhike 3-4 km. away from the main Barnala-Moga road and is near village Bilaspur and Himmatpur. The Gurdwara Aaduporh is a historical shrine commemorating the visit of Guru Hargobind Sahib Ji.

Guru Ji came to the site while riding his horse, where now the present Gurdwara Sahib stands. At this place, Guru Ji met a holyman whose name was Aadu and asked him about the well being of the villagers. Aadu apprised Guru Ji that the village faces acute water problem hence the village development was suffering. On hearing the problem, it so happened that Guru Ji's horse struck on the ground with *porh* (Horse's hoof) and then water started pouring out of the earth. The water was sweet and in plenty. Thus, Guru Ji blessed the place with adequate water and left for Bilaspur. The historical well is located in the Gurdwara premises.

**Gurdwara Malla Sahib,** ***Patshahi Chhevin*** .- Gurdwara Malla Sahib is situated in village Himmatpura once known as Jusampura of district Moga. It is 3 km. from canal bridge on Moga-Barnala road. The village is 8 km. from Machhike, Takhtupura as well as from Bhadaur. Gurdwara Malla Sahib is dedicated to Guru Hargobind Sahib, who had come to the village Himmatpura from village Bali located about two kilometers away.

On hearing of Guru Hargobind Sahib's arrival, a large number of people gathered to get his blessings. In that congregation, villagers from nearby place named Jusampura, came to Guru and requested him to bless their village by paying a visit there. Guru Ji expressed his inability, however he told them that he would come to their village as and when possible. Thereafter they went back but interestingly enough, one of the villagers had managed to steal the saddle of Guru's horse. Next day Guru Ji was told about the theft. On the following day Guru Ji went towards their village Jusampura. The villagers extended whole hearted hospitality to Guru and requested forgiveness for the saddle mischief by saying that the man who had taken the saddle was mad. When Guru noticed that the saddle thief had returned the saddle back without one of its *pedas* (gold ring), he expressed his unhappiness over the thief's behaviour. Leaving the place Guru blessed the villagers for their prosperity. Guru also changed the name of the village Jusampura to Himmatpura.

**(xii) Scope of Village and Town Directory**

**Village Directory :**

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

**Town Directory :**

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV- A in 1991 Census.

Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc. Hence the data for the towns of Moga has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

**Statement I** shows status and growth history of the towns of Moga District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

**Statement II** shows physical aspects and location of each town as in 1999. Column 2 shows the class, name Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

**Statement III** shows the municipal finance of the Towns of Moga District. The income and expenditure for the towns of Moga have been presented in this Statement.

**Statement IV** provides information for civic and other amenities available to the Town. This Statement presents general population as well as the scheduled castes/scheduled tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

**Statement V** gives information regarding medical, educational, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Moga which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from towns and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

**Statement VI** presents information in respect of trade, commerce, industry and banking services in the town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Town. Information on number of banks available in the town has been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

**Statement VII** shows the civic amenities available to all the 4 towns having slums falling in the jurisdiction of Moga

# Part - A
# VILLAGE AND TOWN DIRECTORY

# Section-I
# Village Directory

## NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

**Column 1 : Serial Number :**

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

**Column 2 : Name and Location Code Number of village :**

The name and location code number of the village is shown against this column. This also includes the forest and uninhabited villages.

**Column 3 : Area of the village :**

The area of the villages in hectares is given. Wherever the area figures were not furnished by the concerned department, the column is left blank.

**Column 4 : Total population :**

The total population of the village as per 2001 Census is given against this column.

**Column 5 : Number of households :**

The number of households as per 2001 Census is given in this column.

**Amenities :**

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village, has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:

**Column 6 : Educational :**

Classes upto class V are included in Primary School comprising nursery school, kindergarten school, Pre-basic school, pre-primary school and junior basic school.

Classes from VI to VIII are included in the middle school.

Classes from IX and X are included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

| | | |
|---|---|---|
| (i) | Primary School | P |
| (ii) | Middle School | M |
| (iii) | Secondary School | S |
| (iv) | Senior Secondary School | PUC |
| (v) | College | C |
| (vi) | Industrial School | I |
| (vii) | Training School | Tr. |
| (viii) | Adult literacy class/centre | AC |
| (ix) | Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc. | O |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M (4), etc.

**Column 7 : Medical :**

Availability of medical facility within the village is indicated by following codes :

| | | |
|---|---|---|
| (i) | Allopathic Hospital | H |
| | Ayurvedic Hospital | HA |
| | Unani Hospital | HU |
| | Homeopathic Hospital | H Hom |
| (ii) | Allopathic Dispensary | D |
| | Ayurvedic Dispensary | DA |
| | Unani Dispensary | DU |
| | Homeopathic Dispensary | D Hom |
| (iii) | Maternity & Child Welfare | MCW |
| (iv) | Maternity Home | MH |
| (v) | Child Welfare Centre | CWC |
| (vi) | Health Centre | HC |
| (vii) | Primary Health Centre | PHC |
| (viii) | Primary Health Sub-Centre | PHS |
| (ix) | Family Welfare Centre | FWC |
| (x) | T.B. Clinic | TB |
| (xi) | Nursing Home | NH |
| (xii) | Registered Private Medical Practitioner | RMP |
| (xiii) | Subsidised Medical Practitioner | SMP |
| (xiv) | Community Health Worker | CHW |
| (xv) | Others | O |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

**Column 8 : Drinking Water :**

The type of drinking water supply sources available within the village is indicated by codes as follows :

| | | |
|---|---|---|
| (i) | Tap Water | T |
| (ii) | Well Water | W |
| (iii) | Tank Water | TK |
| (iv) | Tubewell Water | TW |
| (v) | Handpump | HP |
| (vi) | River Water | R |
| (vii) | Canal | C |
| (viii) | Lake | L |
| (ix) | Spring | S |
| (x) | Others | O |
| (xi) | Summer Source | SS |

**Column 9 : Post, Telegraph and Telephone :**

It is indicated by following codes :

| | | |
|---|---|---|
| (i) | Post Office | PO |
| (ii) | Telegraph Office | TO |
| (iii) | Post & Telegraph Office | PTO |
| (iv) | Telephone Connection | PH |

**Column 10 : Commercial and Co-operative Banks :**

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available within the village, distance of the nearest place where the facility exists is given:

| | | |
|---|---|---|
| (i) | Commercial Bank | CM |
| (ii) | Co-operative Bank | CP |

**Column 11 : Credit Societies :**

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given.

| | | |
|---|---|---|
| (i) | Agricultural Credit Society | ACS |
| (ii) | Non-Agricultural Credit Society | NCS |
| (iii) | Other Credit Society | OCS |

**Column 12 : Recreational and cultural facilities:**

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in these columns. If not available, the particulars of the nearest place with the facility exists is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

| | | |
|---|---|---|
| (i) | Cinema/Video Hall | CV |
| (ii) | Sports Club | SP |
| (iii) | Stadium/Auditorium | ST |

**Column 13 : Communications :**

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways, they are to be mentioned as follows:

| | | |
|---|---|---|
| (i) | Bus | BS |
| (ii) | Railway Station | RS |
| (iii) | Navigable Waterway | NW |

**Column 14 : Approach to village :**

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

| | | |
|---|---|---|
| (i) | Paved Road | PR |
| (ii) | Mud road | MR |
| (iii) | Foot path | FP |
| (iv) | Navigable River | NR |
| (v) | Navigable Canal | NC |
| (vi) | Navigable waterways other than River, Canal | NW |

**Column 15 : Nearest Town and distance :**

The distance is given in kilometers in brackets against the name of the town nearest to the village.

**Column 16 : Power supply :**

Availability of Power Supply in the village, whatever may be the form of its use, is given by using following codes :

| | | |
|---|---|---|
| (i) | Electricity for domestic use | ED |
| (ii) | Electricity for agricultural use | EAG |
| (iii) | Electricity for other purposes | EO |
| (iv) | Electricity for all purposes | EA |

**Column 17 : News Paper/Magazine :**

If village receives any News Paper/Magazine the same is noted in this column using following codes :

| | | |
|---|---|---|
| (i) | News Paper | N |
| (ii) | Magazine | M |

**Column 18 : Most important commodities manufactured :**

The name of three most important commodities manufactured in the village is recorded against this column.

**Column 19 to 23 : Land use i.e. area under different types of land use :**

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare (s) up to one decimal. Dash '-' is

recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

| | | |
|---|---|---|
| (i) | Government Canal | GC |
| (ii) | Private Canal | PC |
| (iii) | Well (without electricity) | W |
| (iv) | Well (with electricity) | WE |
| (v) | Tubewell (without electricity) | TW |
| (vi) | Tubewell (with electricity) | TWE |
| (vii) | Tank | TK |
| (viii) | River | R |
| (ix) | Lake | L |
| (x) | Waterfall | WF |
| (xi) | Others | O |
| (xii) | Total | T |

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Blockwise having primary, middle, high and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A and B The appendices show the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

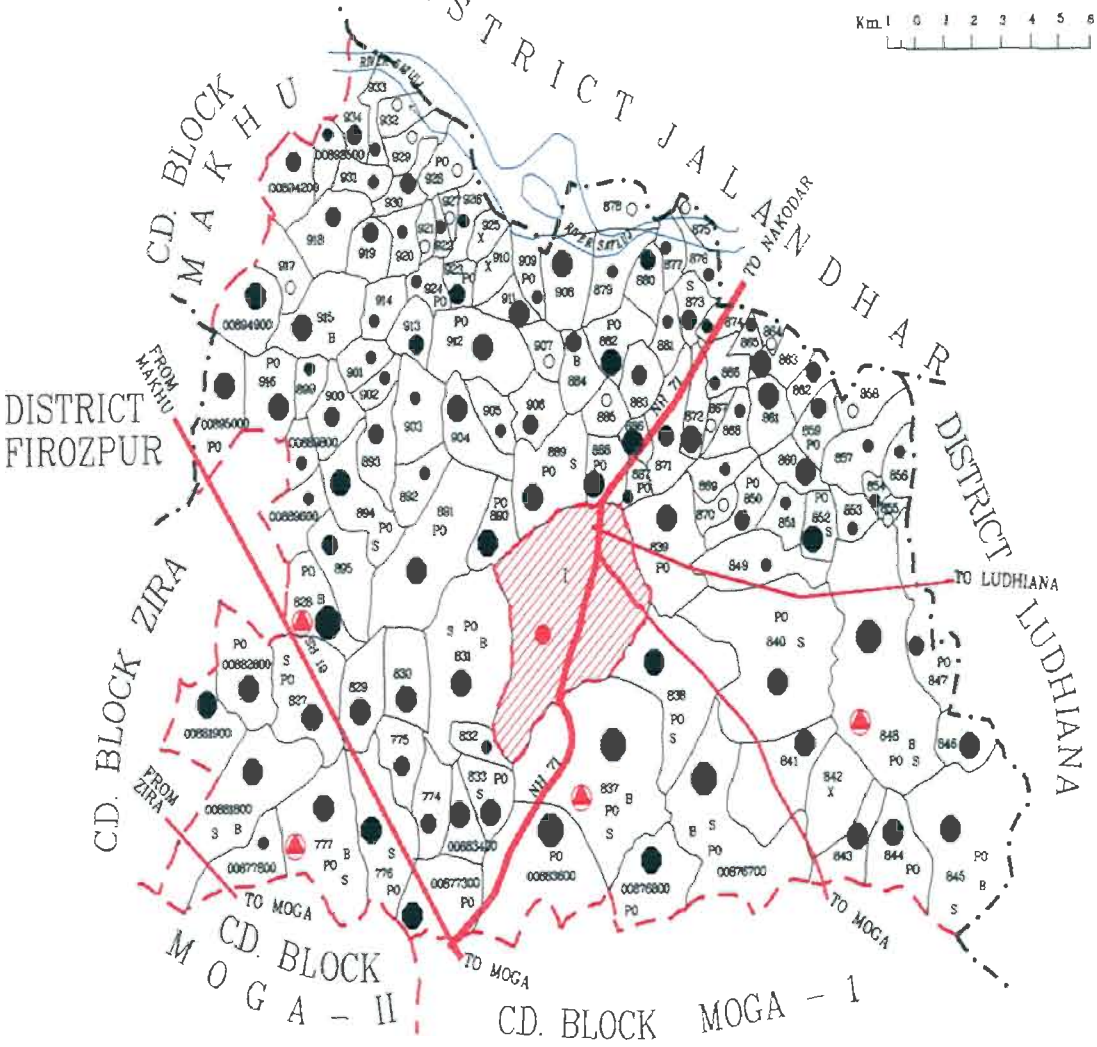

Appendix-VIII Indicates CD Block wise number of villages.

Appendix-IX Shows number of different types of girls schools in a village.

" C.D.BLOCK
" VILLAGE WITH P.L.C.NUMBER (00866700)
HEADQUARTERS: C.D. BLOCK
POPULATION SIZE CLASS OF VILLAGES:BELOW 200, 200-499,500-999,1000-4999,5000 AND ABOVE
UNINHABITED VILLAGE WITH P.L.C.NUMBER (X)
URBAN AREA WITH LOCATION CODE (III)
STATE HIGHWAY (SH 16)
IMPORTANT METALLED ROAD
POST OFFICE/TELEPHONE OFFICE/POST AND TELEGRAPH OOFICE — PO/TO/PTO
SECONDARY OR SENIOR SECONDARY SCHOOL — S
PRIMARY HEALTH CENTRE
BANK — B

C.D. BLOCK BOUNDARY EXCLUDES STATUTORY TOWN (S)

BOUNDARIES ARE UPDATED UPTO 1.1.2000.

| | |
|---|---|
| TOATAL AREA OF C.D BLOCK (In Sq. Km) | 556.65 |
| TOTAL POPULATION OF C.D BLOCK | 178,267 |
| TOTAL NUMBER OF TOWNS IN C.D BLOCK | 1 |
| TOTAL NUMBER OF VILLAGES IN C.D. BLOCK | 47 |
| DISTANCE FROM DISTRICT HEADQUARTERS (In Kms) | 20 |

# Section-II
# Town Directory

## NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

**Town Directory statements (I to VII)**

**Statement I : Status and Growth History**

**Column 2 : Class, name and civic administration status of town**

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

| Population | Class |
|---|---|
| 100,000 and above | I |
| 50,000-99,999 | II |
| 20,000-49,999 | III |
| 10,000-19,999 | IV |
| 5,000-9,999 | V |
| Below 5,000 | VI |

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

| | | |
|---|---|---|
| (i) | Municipal Corporation | M.Corp. |
| (ii) | Municipal Committee | MC |
| (iii) | Municipal Council | M Cl |
| (iv) | City Municipal Council | CMC |
| (v) | Town Municipal Council | TMC |
| (vi) | Municipal Board | MB |
| (vii) | Municipality | M |
| (viii) | Cantonment Board/Cantonment | CB |
| (ix) | Notified Area | NA |
| (x) | Notified Town | NT |
| (xi) | Notified Area Committee/ Notified Area Council | NAC |
| (xii) | Notified Town Area | NTA |
| (xiii) | Industrial Notified Area | INA |
| (xiv) | Industrial Township | ITS |
| (xv) | Township | TS |
| (xvi) | Town Panchayat | TP |
| (xvii) | Nagar Panchayat | NP |
| (xviii) | Town Committee/Town Area Committee | TC |
| (xix) | Small Town Committee | ST |
| (xx) | Estate office | EO |
| (xxi) | Gram Panchayat | GP |
| (xxii) | Census Town | CT |
| | Other columns need no comments. | |

**Statement II : Physical Aspects and Location of towns, 1999**

**Column 3 to 5 : Physical Aspects :**

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

**Column 6, 7 & 8 :**

Name or the State headquarters, District headquarters and Tahsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

**Column 9 & 10 :**

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

**Column 11, 12 and 13 :**

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

**Statement III : Municipal Finance 1998-1999**

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

**Statement IV : Civic and Other amenities, 1999**

**Column 1 to 5 : Self explanatory :**

**Column 6 : Road length (in kms.) :**

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

| | | |
|---|---|---|
| (i) | Pucca Road | PR |
| (ii) | Kutcha Road | KR |

**Column 7 : Sewerage System:**

Generally, sewerage system is implied by the net-work of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

| | | |
|---|---|---|
| (i) | Sewer | S |
| (ii) | Open Surface Drains | OSD |
| (iii) | Box Surface Drains | BSD |
| (iv) | Sylk Drains | SD |
| (v) | Cesspool method | CP |
| (vi) | Pit System | Pt |
| (vii) | Others | O |

**Column 8 to 11 : Number of latrines :**

Number of various types of latrines both Public and Private are given in these columns.

**Column 12 : Method of disposal of night soil :**

The various prevalent methods of disposal of night soil are given below with codes :

| | |
|---|---|
| Head Loads | HL |
| Basket | B |
| Wheel Barrows | WB |
| Septic Tank | ST |
| Pit System | Pt |

| | |
|---|---|
| Sewerage | S |
| Others | O |

**Column 13 and 14 : Water supply :**

Source and capacity of storage system. The following codes are used in these columns :

**Column 13 :**

| | |
|---|---|
| (i) Tap water | T |
| (ii) Tube-well water | TW |
| (iii) Tank Water | TK |
| (iv) Well water | W |

**Column 14 :**

| | |
|---|---|
| (v) Over Head Tank | OHT |
| (vi) Service Reservoir | SR |
| (vii) River Infiltration Gallery | RIG |
| (viii) Bore Well Pumping System | BWP |
| (ix) Pressure Tank | PT |

The information on major sources of water supply is given in column 13 and the storage capacity against each in kilo-litres (in bracket) is presented in column 14.

**Column 15 : Fire Fighting Service :**

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

**Column 16 to 20 : Electrification (Number of connections) :**

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

**Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999**

**Column 1 to 3 : Self explanatory.**

**Column 4 & 5 :**

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, they may be treated as independent units and counted separately using following codes :

| | | |
|---|---|---|
| (i) | Hospital | H |
| (ii) | Dispensary | D |
| (iii) | Health Centre | HC |
| (iv) | Family Welfare Centre | FWC |
| (v) | T.B. Clinic | TB |
| (vi) | Nursing Home | NH |
| (vii) | Others | O |

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

| | |
|---|---|
| Ayurvedic | A |
| Unani | U |
| Homoeopathic | Hom |

**Column 6 to 9 :**

The codes used for these columns are as follows:

| | | |
|---|---|---|
| (i) | Arts only | A |
| (ii) | Science only | S |
| (iii) | Commerce only | C |
| (iv) | Arts & Science only | AS |
| (v) | Arts & Commerce only | AC |
| (vi) | Combined for all categories-Arts, Science and Commerce | ASC |
| (vii) | Law | L |
| (viii) | University | U |
| (ix) | Others | O |

**Column 10 : Recognized shorthand, typewriting and vocational training institutes :**

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

| | | |
|---|---|---|
| (i) | Vocational Training Institutes | VT |
| (ii) | Shorthand | SH |
| (iii) | Typewriting | Type |
| (iv) | Shorthand & Typewriting | SH Type |
| (v) | Others | O |

The vocational institutions like-Applied Art/Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

**Column 11 to 14 :**

Higher Secondary/ Intermediate/ Senior Secondary/ PUC/ Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle schools or Junior Secondary.

Schools upto class X are considered as Matriculation or High schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

**Column 15 : Adult literacy class/centres :**

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

**Column 16 : Working Women's hostels with number of seats :**

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

**Column 17 to 19 : Recreational and Cultural Facilities :**

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

**Column 20 : Public Libraries, Reading Rooms:**

Number of public libraries and reading rooms available in the referent town is recorded in codes as follows :

| | | |
|---|---|---|
| (i) | Public Library | PL |
| (ii) | Reading room | RR |

**Statement VI : Trade, Commerce, Industry and Banking, 1999**

**Column 3 to 8 :**

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded in these columns.

**Column 9 : Number of Banks :**

Number of Banks available in the referent town both Commercial and Co-operative banks is recorded against this column.

**Column 10 & 11 : Number of Agricultural Credit Societies and Non-Agricultural Credit Societies:**

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town is recorded against these columns.

**Statement VII : Civic and other Amenities in Slums, 1999**

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

## STATUS AND

| Serial number | Class, name and civic status of town | Location code number | Name of Tahsil | Name of C.D. block | Area (in sq. km.) | Number of households incl. houseless households (2001 Census) | Population and growth rate | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | 1901 | 1911 | 1921 | 1931 |

# Part - B
# PRIMARY CENSUS ABSTRACT

# Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century, the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

**Data Processing**

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting from October, 2002.

**Task Force on Quality Assurance**

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices

which were specially set up for this purpose. The individual Scheduled Caste and the Scheduled Tribe population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Caste/Tribe returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribe at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

**Primary Census Abstract**

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes and Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts, Cities and Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main

workers were presented into four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

**Level of presentation in District Census Handbooks**

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

| Name of the Primary Census Abstract | Level of presentation |
|---|---|
| 1. District Primary Census Abstract | District/CD Block/UA/City/Town |
| 2. Primary Census Abstract for Scheduled Castes | District/CD Block/Town |
| 3. Primary Census Abstract for Scheduled Tribes | District/CD Block/Town |
| 4. Village Primary Census Abstract | CD Block/Villagewise |
| 5. Urban Primary Census Abstract | Town/Ward level |

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

**Area Figures**

The area figures supplied by local revenue authorities of the district in respect of Tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration, block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

| Location code number | District/ CD Block/ U.A./ City/ Town | Total/ Rural/ Urban | Area of Town/ Ward in square kilometre | Number of households | Total population (including institutional and houseless population) | | | Population in the age-group 0-6 | | |

**Number of villages under Gram Panchayat:**

With the Constitution (73rd amendment) Act, 1992, the Census Organisation felt it necessary to provide population data for the territorial area of Panchayat. This required precise details of the territorial area of each Panchayat so that delineation of enumeration blocks (EBs) to be allotted to the enumerators could be done to meet this requirement.

It required careful delineation of enumeration blocks by the Charge Officers to ensure that EBs do not cut across the territorial area falling in the Panchayat. Different situations were well perceived. A Panchayat could consist of only one village or a number of complete villages. There could be another situation where the Panchayat may consist of some complete villages and parts of villages. Still there could be another situation where Panchayat could consist of a number of villages etc.

An exhaustive exercise was done to prepare Panchayat level data. However, we came across following types of situations which made it difficult to compile the Panchayat level data:

i) Some of the Panchayats have one or more than one village.

ii) Some of the Panchayats have only a part of the village.

iii) Some Panchayats include full village (s) as well as part of village (s).

All this has not made it feasible for us to present Panchayat level PCA.

# Annexure-III

**Measures of Fertility and Mean Age At Marriage Fertility Levels :**

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally is assessed by relating number of births to size of some section of the population, such as number of married couples and number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever married women and the last question was related to currently married women only. The measures of fertility worked out are based on the F-Series Tables of 1991 & 2001 Census pertaining to Punjab State.

The following table presents important indices of fertility in Punjab as well 2001 and 1991 separately for total, rural and urban areas. There has been significant decline in the number of children ever born per ever married woman in the age group (45-49); the decline is relatively more in rural areas than urban in Punjab. Likewise there has been a significant decline in the child-women ratio also. However, the number of married couples per 1,000 population has gone up in rural area of the State and it is vice-versa for urban areas. But in the totality, number of married couples per thousand population has gone up declined by 1 point from 160 to 161 in the year during 1991-2001.

IMPORTANT INDICES OF FERTILITY

# Annexure IV

## MOVEMENT OF POPULATION

**What is migration?**

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence, if the place in which he is enumerated during the census is other than his place of immediate last residence.

**Internal and International Migration:**

The migrational movements are of three types- (i) Migration within the State itself with its components-(a) Migration within the district of enumeration (intra-district migration), (b) Migration from one district of the state to another district of the State/UT (inter-district migration), (ii) Migration from one State to another state of the country (inter-state migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

**Why the people migrate ?**

For the first time in the census, reasons for migration were elicited in 1981. Keeping operational constraints in view, the reasons for migration were broadly categorized as (1) employment, (2) education, (3) marriage, (4) family movement and (5) other reasons. Other Reasons for migration have been elicited only with reference to movement from place of last residence.

**Impact of migration:**

The growth of population of a particular place depends upon the biological variates such as mortality and fertility and migration. The knowledge of trends in migration helps in future planning of a place.

## PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF BIRTH

| Place of Birth | 1991 Census | | | 2001 Census | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| (I) Migrants born within the state of enumeration | N.A. | N.A. | N.A. | 2,86,255 | 65,384 | 2,20,871 |
| | | | | (91.02) | (82.55) | (93.88) |
| (i) Migrants born else where in the district of enumeration | N.A. | N.A. | N.A. | 1,53,633 | 44,429 | 1,09,204 |
| | | | | (48.85) | (56.09) | (46.41) |
| (ii) Migrants born in other districts of the State | N.A. | N.A. | N.A. | 1,32,622 | 20,955 | 1,11,667 |
| | | | | (42.17) | (26.46) | (47.46) |
| (II) Migrants born in other states of India | N.A. | N.A. | N.A. | 20,605 | 9,829 | 10,776 |
| | | | | (6.55) | (12.41) | (4.58) |
| (III) Migrants born in other countries | N.A. | N.A. | N.A. | 7,630 | 3,996 | 3,634 |
| | | | | (2.43) | (5.04) | (1.54) |
| (IV) Unclassifiable | N.A. | N.A. | N.A. | 0 | 0 | 0 |
| | | | | (0.00) | (0.00) | (0.00) |
| **Total Migrants** | N.A. | N.A. | N.A. | **3,14,490** | **79,209** | **2,35,281** |
| | | | | (100.00) | (100.00) | (100.00) |

The above table gives distribution of inmigrants by place of birth in Moga district as per 1991 and 2001 Censuses. Out of the total inmigrants in 2001, 91.02 per cent are born within the state of enumeration and 6.5 per cent born in other states/Union Territories of the country while 2.43 per cent born in other country. The figures for 1991 are not available.

## PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF LAST RESIDENCE

| Last residence | 1991 Census | | | 2001 Census | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| (I) Last residence within the state of enumeration | N.A. | N.A. | N.A. | 2,92,742 | 67,143 | 2,25,599 |
| | | | | (91.47) | (83.26) | (94.23) |
| (i) Elsewhere in the district of enumeration | N.A. | N.A. | N.A. | 1,59,516 | 45,815 | 1,13,701 |
| | | | | (49.8) | (56.8) | (47.5) |
| (ii) In other districts of the state of enumeration | N.A. | N.A. | N.A. | 1,33,226 | 21,328 | 1,11,898 |
| | | | | (41.6) | (26.4) | (46.7) |
| (II) States in India beyond the state of enumeration | N.A. | N.A. | N.A. | 20,654 | 9,852 | 10,802 |
| | | | | (6.5) | (12.2) | (4.5) |
| (III) Last residence outside India | N.A. | N.A. | N.A. | 6,656 | 3,646 | 3,010 |
| | | | | (2.1) | (4.5) | (1.3) |
| (IV) Unclassifiable | N.A. | N.A. | N.A. | 0 | 0 | 0 |
| | | | | (0.0) | (0.0) | (0.0) |
| **Total** | N.A. | N.A. | N.A. | **3,20,052** | **80,641** | **2,39,411** |
| | | | | **(100.0)** | **(100.0)** | **(100.0)** |

The above table gives distribution of inmigrants by place of last residence in Moga district. As per 2001 Census, 91.47 per cent of the inmigrants had the place of last residence within the state but out of the place of enumeration. Another 6.5 per cent have place of last residence in other states/UTs within the country, while 2.1 per cent have their last residence out side India. The figures for Census 1991 for Moga are not available.

# Annexure V

**Main Religions:**

The instructions for recording this information are the same as in 1991. A brief analysis based on 1991 and 2001 Census data is presented below.

Question 7 of the Household Scheduled canvassed at the 2001 census pertained to religion of a person. The religion of the person was recorded as returned by the respondent. The six main religions in the country were recorded by using following codes:

| | | |
|---|---|---|
| Hindu | : | 1 |
| Muslim | : | 2 |
| Christian | : | 3 |
| Sikh | : | 4 |
| Buddhist | : | 5 |
| Jain | : | 6 |

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

**Religious Composition of Punjab's Population:**

The numerical strength of the six main religious communities in the State and Moga district in 2001 Census is as follows:

**RELIGIOUS COMPOSITION OF POPULATION, PUNJAB AND MOGA 1991 AND 2001**

| Religious Communities | Punjab | | | | Moga district | | | |
|---|---|---|---|---|---|---|---|---|
| | Total Population | | Percentage in total population | | Total Population | | Percentage in total population | |
| | 1991 | 2001 | 1991 | 2001 | 1991 | 2001 | 1991 | 2001 |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| Hindus | 6,989,226 | 8,997,942 | 34.4 | 36.9 | 99,077 | 1,17,786 | 12.7 | 13.2 |
| Muslims | 239,401 | 382,045 | 1.2 | 1.6 | 3,800 | 5,994 | 0.5 | 0.7 |
| Christians | 225,163 | 292,800 | 1.1 | 1.2 | 4,810 | 2,564 | 0.6 | 0.3 |
| Sikhs | 12,767,697 | 14,592,387 | 63.0 | 59.9 | 6,69,832 | 7,67,769 | 86.1 | 85.8 |
| Buddhists | 24,930 | 41,487 | 0.1 | 0.2 | 26 | 35 | 0.0 | 0.0 |
| Jains | 20,763 | 39,276 | 0.1 | 0.2 | 88 | 286 | 0.0 | 0.0 |
| Others Religions and persuations | 883 | 8,594 | 0.0 | 0.0 | 7 | 257 | 0.0 | 0.0 |
| Religion not stated/ Unspecified | 13,906 | 4,468 | 0.1 | 0.0 | 282 | 163 | 0.0 | 0.0 |
| **All Religions** | 20,281,969 | 24,358,999/ | 100.0 | 100.0 | 7,77,922 | 8,94,854/ | 100.0 | 100.0 |

As can be seen from the above statement, Sikhs form the predominant religious community in Punjab and they account for 59.9 per cent of the State's population according to the 2001 Census. The corresponding percentage for 1991 Census was 63.0 per cent. Hindus is the second largest religious community in the State and their share in the total population is 36.9 per cent which was 34.4 per cent in 1991 Census. This signifies that Sikhs and Hindus, the two most dominant religious communities in the state, together constitute 96.8 per cent of the state's total population. The share of Muslims, Christians, Buddhists and Jains in the total population is 1.6, 1.2, 0.2 and 0.2 per cent respectively.

As per 2001 Census, in Moga district, Sikhs constitute 85.8 per cent of the total population and this is higher than that of the state as a whole. Hindus, the second dominant religious community in the district, account for 13.2 per cent of the district's total population. Together, the Sikhs and the Hindus account for 99.0 per cent of the district's population. The population of Muslims and Christians are negligible.

## Annexure VI

**Marital Status:**

Current marital status of each individual, irrespective of age, was obtained through Question 5 of the household schedule canvassed during 2001 census into following four categories:

1. Never married
2. Currently married
3. Widowed
4. Divorced or separated.

The instructions to enumerators for eliciting marital status were same as adopted in 1991 census. A brief analysis based on 1991 and 2001 census is presented here.

The following table exhibits data for Persons, Males and Females in percentage form regarding Marital Status.

**MARITAL, STATUS OF POPULATION AS PER, 1991 AND 2001 CENSUS**

| Marital Status | Punjab | | | | | | Moga | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | 1991 | | | 2001 | | | 1991 | | | 2001 | | |
| | P | M | F | P | M | F | P | M | F | P | M | F |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| Total Population | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | N.A. | N.A. | N.A. | 100.0 | 100.0 | 100.0 |
| Never Married | 51.5 | 55.4 | 47.1 | 48.7 | 53.1 | 43.8 | N.A. | N.A. | N.A. | 48.9 | 53.4 | 43.8 |
| Married | 45.1 | 42.3 | 48.2 | 47.2 | 44.6 | 50.2 | N.A. | N.A. | N.A. | 46.9 | 44.0 | 50.1 |
| Widowed | 3.3 | 2.2 | 4.6 | 3.9 | 2.1 | 5.8 | N.A. | N.A. | N.A. | 4.0 | 2.3 | 5.9 |
| Divorced or Separated | 0.1 | 0.1 | 0.1 | 0.2 | 0.2 | 0.2 | N.A. | N.A. | N.A. | 0.2 | 0.3 | 0.2 |
| Un-Specified | 0.0 | 0.0 | 0.0 | 0 | 0 | 0 | N.A. | N.A. | N.A. | 0 | 0 | 0 |

According to 2001- Census, the population of the State is recorded 24,358,999 comprising 11,871,211 (48.7%) never married, 11,499,566 (47.2%) married, 938,678 (3.9%) widowed and 49,544 (0.2%) divorced or separated. As per 1991 Census Punjab State had a population of 20,281,969 comprising 10,452,444 (51.5%) never married, 9,146,158 (45.1%) married, 673,569 (3.3%) widowed, 8,768 (0.1%) divorced or separated and 1,030 (0.0%) unspecified.

In Moga district, out of the total population of 894,854 as per 2001 census; 48.9 per cent are never married, 46.9 percent are married, 4 percent widowed, 0.2 percent divorced or separated. Thus, the patterns observed for the State and the district are almost identical.

# Annexure VII

**Sex and Educational level:**

It has become customary for the Indian Census to obtain details of educational levels of the literates in the society. Question 13 of the Household Schedule canvassed during 2001 census aimed to elicit information on the highest educational level attained. The data so collected is put to public domain by classifying the population by sex and educational levels.

The following table shows percentage distribution of literates by educational level for Punjab State and Moga district as per 1991 as well as 2001 Census.

**PERCENTAGE DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL AS PER 1991 AND 2001 CENSUS**

| Educational Levels | Total / Rural / Urban | Punjab | | | | | | Moga | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | 1991 | | | 2001 | | | 1991 | | | 2001 | | |
| | | P | M | F | P | M | F | P | M | F | P | M | F |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 |
| Below Primary | Total | 21.8 | 20.9 | 23.1 | 20.0 | 19.7 | 20.4 | N.A. | N.A. | N.A. | 22.8 | 23.1 | 22.6 |
| | Rural | 24.2 | 22.9 | 26.2 | 22.9 | 22.3 | 23.7 | N.A. | N.A. | N.A. | 24.7 | 24.8 | 24.6 |
| | Urban | 17.6 | 17.2 | 18.2 | 15.5 | 15.6 | 15.4 | N.A. | N.A. | N.A. | 17.0 | 17.4 | 16.4 |
| Primary but below middle | Total | 27.9 | 25.3 | 31.7 | 25.6 | 23.7 | 28.3 | N.A. | N.A. | N.A. | 28.6 | 26.7 | 31.1 |
| | Rural | 31.8 | 28.4 | 37.0 | 29.3 | 26.6 | 33.0 | N.A. | N.A. | N.A. | 30.6 | 28.4 | 33.6 |
| | Urban | 21.2 | 19.7 | 23.3 | 19.9 | 19.0 | 21.1 | N.A. | N.A. | N.A. | 22.2 | 21.3 | 23.4 |
| Middle but below matric | Total | 18.1 | 19.0 | 16.7 | 16.9 | 17.5 | 16.1 | N.A. | N.A. | N.A. | 16.7 | 17.7 | 15.4 |
| | Rural | 18.5 | 19.8 | 16.7 | 17.7 | 18.5 | 16.8 | N.A. | N.A. | N.A. | 17.0 | 18.0 | 15.6 |
| | Urban | 17.3 | 17.7 | 16.8 | 15.7 | 16.1 | 15.1 | N.A. | N.A. | N.A. | 15.8 | 16.7 | 14.7 |
| Matric but below graduate | Total | 26.3 | 28.6 | 22.8 | 30.8 | 32.7 | 28.4 | N.A. | N.A. | N.A. | 27.9 | 28.8 | 26.7 |
| | Rural | 23.0 | 26.0 | 18.3 | 27.5 | 29.9 | 24.3 | N.A. | N.A. | N.A. | 25.8 | 27.0 | 24.3 |
| | Urban | 32.0 | 33.5 | 30.0 | 36.0 | 37.1 | 34.6 | N.A. | N.A. | N.A. | 34.5 | 34.9 | 33.9 |
| Graduate and above | Total | 5.9 | 6.1 | 5.7 | 6.6 | 6.4 | 6.7 | N.A. | N.A. | N.A. | 4.0 | 3.7 | 4.3 |
| | Rural | 2.5 | 3.0 | 1.8 | 2.5 | 2.8 | 2.2 | N.A. | N.A. | N.A. | 1.9 | 1.9 | 1.9 |
| | Urban | 11.8 | 11.9 | 11.8 | 12.9 | 12.2 | 13.7 | N.A. | N.A. | N.A. | 10.6 | 9.7 | 11.7 |

As per 1991 census 21.8 per cent of the literates in Punjab were below primary level of education, 27.9 per cent primary but below middle and 18.1 per cent middle but below matric. A little over one-fourth (26.3%) of the literates in the State were matric but below graduation. It was only 5.9 per cent of the literates who had attained graduation or above level of education.

According to 2001 census 20.0 per cent of the literates in Punjab are below primary level of education, 25.6 per cent primary but below middle and 16.9 per cent are middle but below matric; 30.8 per cent matric but below graduation. Only 6.6 per cent of the literates in Punjab are graduate and above. Whereas there is some decline in first 3 levels as compared to 1991, last 2 level exhibit slight improvements.

In the district 22.8 per cent of the literates are below primary and another 28.6 per cent are primary but below middle. In the district 16.7 per cent of the literates are middle passed as compared to state with 16.9 per cent. The percentage of matriculation, with 27.9 in Moga district is lower than that of the State with 30.8 per cent. In respect of Graduate and above level, this district (4.0%) also lower than that of State (6.6%).

# Annexure VIII

**Distribution of Different Mother Tongues:**

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood is recorded as the mother-tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. These may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Mother Tongue and Language data based on 1991 & 2001 Censuses is given here. The distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each) for the district by sex separately for rural and urban areas. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table is divided into two parts; Part A- Scheduled languages with the mother tongues grouped under each, and Part B-Non-Scheduled languages with the mother tongues grouped under each. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census are, basically, the designations provided by the respondents. These designations or mother tongue label need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects, the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1576 rationalized mother tongues in 1991 for the entire Country, which was further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.

**NUMERICALLY BIGGEST LANGUAGE ARRANGED IN DESCENDING ORDER OF THE NUMBER OF SPEAKERS, 2001-1991**
