HARIKE WETLAND

Harike Lake and Wetland is situated in the district of Ferozepur in the state of Punjab. A barrage built in 1953 on the confluence of rivers Sutluj and Beas near Harike town resulted in the creation of Harike lake. Over the course of time, this wetland system, the largest in north India, emerged as a fine waterfowl habitat. It was declared a bird sanctuary in 1982 and a Ramsar Site in 1990. In 1992 the sanctuary area was enlarged to 86 sq km. Harike lake constitutes the main reservoir which is the deeper portion of the wetland adjoining the barrage, while the marshy islands and shores together with the extensive wetlands stretching beyond the reservoir area, comprise the rest of the wetland. The lake is triangular in shape, with its apex in the west, a bund, called the Dhussi Bund forming one side, a canal the second and a major road the third.

Annexure VIII	: Distribution of different mother tongues.	560

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census , is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics, village-wise and town-wise, of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive Censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added to it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA which was restructured. Nine–fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and

recreational facilities. In town directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristics of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) in all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Inder Jit Singh, IAS, Director of Census Operations, Punjab. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General, (C&T) and Dr. I.C.Aggrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division,who worked under the overall supervision of Shri Himakar, Addl. Director (EDP), helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assistant Director. I am thankful to all of them and others who contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 2007

Preface

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, 'alike.

At the 1961 Census, a beginning was made to also include village level data on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B - Primary Census Abstract, giving data for each village within the Community Development (CD) Block and each town in the district. The CD block maps included, presenting village level data, have been prepared by using computer assisted technology. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetters and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Shri D.K. Sikri, IAS, Additional Secretary, Registrar general, India and Census Commissioner and Shri J.K. Banthia, IAS, former Registrar General and Census Commissioner, India for their directions and support from time to time in accomplishing this arduous task.

In the directorate, at the outset we are beholden to Shri Inder Jit Singh, IAS under whose able guidance and direction as Director Census, Punjab, the census operations in the state were successfully completed.

Our thanks are also due to Shri D.R. Khanna, Ex-Deputy Director for getting the compilation of data and Shri Madhav Shyam, Ex-Deputy Director for drafting this specimen model which has been replicated in other DCHBs.

The great effort and hard work done by Shri S.K. Bhandari, Ex-Assistant Director, Shri Bhagirath Singh, Assistant Director, Sh. Rajender Prasad, S.I.Gr-I and Sh. B.S. Rai, S.I. Gr-I are greatly acknowledged. Sh. Azad Kumar, S.I. Gr-III and Sh. H.S. Sudan, S.I.Gr-III deserved special thanks for having completed the publication work.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

District Highlights - 2001 Census

1. Firozpur district ranks 1st in area and 7th in population.
2. Firozpur is the most populous and Zira is the least populated tahsil.
3. The average population size of a village in the district (1,338) is higher than that of the state average (1,311).
4. Guru Har Sahai -Rural (20,587) in Jalalabad tahsil is the largest village by population size followed by Abohar Rural (10,394) in the district.
5. 19 villages in the district are large sized with a population of 5,000 or more.
6. The decadal population growth rate in the district (20.5%) is higher than the state 20.1 per cent.
7. Firozpur district is relatively less urbanized (25.8 %) than the state (33.9 %).
8. The sex ratio in the district (885) is higher than the state average (876).
9. The child sex ratio in the district (822) is higher than the state sex ratio (798). It ranks 1th among the districts in the state.
10. Firozpur district has 1,746,107 population comprising 926,224 males and 819,883 females.
11. Firozpur district contributes 7.2 per cent of the total population of the State.
12. Out of the total population of the district 74.2 per cent is rural while only 25.8 per cent in urban.
13. The district has 30.7 and 6.5 per cent main workers and marginal workers respectively

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Ever since the beginning of first post independence Census of India 1951, the publication of District Census Handbooks (DCHBs) has become a regular feature of the Indian Census. Produced by the Census Organisation of Government of India on behalf of the State Government, the DCHB is a unique publication which gives the census as well as non-census data down to every village in case of rural areas and ward within the town/urban area in the state. It is recognized as one of the most comprehensive sources of information. Infact, this is the only publication which provides primary census abstract based on census, and non-census data on infrastructure and amenities available, such as educational, medical, postal and communicational at the sub-micro level. It is inter- alia used for delimitation of constituencies, formulation of local level and regional plans and serves as a valuable tool for district administration.

Undisputedly, DCHB has remained to be the most comprehensive and valuable product of the census organization ever since its initiation. It has always been the endeavour of the Census of India to enlarge the content and coverage of the data presented at every census. The DCHB series of 1951 Census contained important Census Tables and the Primary Census Abstract. At the 1961 Census, the scope of the DCHB was enlarged by including a descriptive account of the district, administrative statistics, census tables and the village and town directory. In 1971, the DCHBs were planned in three parts; Part-A included the village and town directory, Part-B included village and town wise primary census abstract, while the Part-C was meant to include analysis of census data and a write up covering social, cultural, historical and other important aspects. However, in some states/union territories Part-C remained confined to the district tables only.

During 1981 Census, some new features were added and the formats of village and town directory were restructured, somewhat. These volumes were published for each district in two parts. Part- A included village and town directory, while Part-B included primary census abstract (PCA) of every village and ward in town/urban area. The inclusion of scheduled castes PCA was the additional feature of the 1981 Census. The village directory of 1981 Census included new parameters viz; information on Adult literacy Centres, Primary Health Sub-Centers and Community Health workers in the village (s) to meet the requirement of the Revised Minimum Needs Programme. In addition, information on approach to the village was also provided for the first time in the village directory to help in taking stock of villages requiring road linkages in the district. Likewise, Statement IV-A included in the Town Directory aimed to provide data on slums so as to undertake development activities in such areas.

The manner of presentation of the DCHBs for the 1991 Census was, by and large, same as followed in 1981 Census. However, the format of PCA was slightly restructured in the 1991 Census for the benefit of data users. The village level data were presented Community Development (C.D.) block wise to cater to the needs of grass root level planning as envisaged under the five year plans. Ninefold industrial classification of the main workers was reintroduced by replacing the four-fold industrial categories adopted at the 1981 Census. In addition, the PCA also gave population in the 0-6 age group by sex essential for working out effective literacy rate, besides providing proportion of child population.

The DCHB 2001, the present volume, is the sixth in series. The pattern followed is, by and large, similar to that of the 1991 Census. Among the new features added, information on the availability of newspapers/magazines, banking facility, agricultural and non- agricultural societies, recreational and cultural facilities and income and expenditure of the village

panchayats find mention. More important is that, it is for the first time in the history of Indian Census that Permanent Location Code Number (PLCN) has been allotted to every village in the state to meet the demand from different organizations to study the village level data over a time spell. It is believed that the permanent location codes assigned to each village would help in tracing the precise location of a village on account of jurisdictional changes in the boundaries of various administrative areas.

(ii) Brief history of the district

Not much is known of the early history of Firozpur district. This may partly be due to the river Sutluj shifting its course constantly leaving behind ruins and mounds of earth called Theh. The vagary of the river has, however, made a strong impact on the character of the people, making them virile and turbulent and inured to hardships.

The Rajput tribes from the neighbouring Rajasthan were among the early known invaders of the territory. The Punwar Rajputs appears to be earliest with their capital at Janer, followed by Bhati Rajputs, about the time the Muslims established contacts with India. The Bhatis settled south of Muktsar and continued pushing the Punwars northward. The various branches of Bhatis fanned out towards east and west, the Dogars and Naipals to the west towards. Pakpattan and the Manj Rajputs to the east towards Kot Ise Khan and Raikot. Two ruling branches of the Manj Rajputs embraced Islam towards the close of the thirteenth century. Firozpur town was named after their chief, Feroze Khan, the chief of Manj Rajputs, but more reliable sources maintain that it was founded by Feroze Shah Tughlak.

Some two centuries after the immigration of the Bhatis the Jat tribes, namely, Dhaliwals, Gills and Sidhus appear to have made inroads into the territory from the south and south-east and gained possession of various areas. One tribe worthy of mention from among these Jats is Sidhu Barars who came from the same stock as the Bhati Rajputs. They founded the chieftainship of Kot Kapura and were the forefathers of the ruling families of the Faridkot State and the Phulkian States of Patiala, Nabha and Jind. Most of the Jat tribes accepted the Sikh faith in the seventeenth century. In due course they took advantage of the tottering Mughal Empire for strengthening their positions. Thus when Guru Gobind Singh was in flight from Chamkaur Sahib in 1705 A.D., the Chief of Kot Kapura, though a Sikh, did not offer him shelter against the Mughal pursuers, and the Guru went to Muktsar and from there to Deccan.

In the meantime, the Dogars had begun to make depredations eastward from Pakpattan side where they had emigrated earlier. They pushed the Manj Rajputs southward, and established themselves for about a hundred miles along the Sutluj. However, they could not hold for long against the rising power of the Sikh Misls which took them under their sway.

Religious persecution was hammering the Sikhs into a number of staunch and warrior Misls whose common aim was to fight out the Mughal tyranny. In 1760, they inflicted defeat on the Mughal Governor of Lahore. Three years later, Hari Singh, the chief of Bhangi Misl, sacked Kasur, and one of his Sardars named Gujjar Singh crossed the Sutluj and took possession of Firozpur and made over the fort and surrounding territory to his nephew, Gurbakhsh Singh. The dogars gave him a lot of trouble but ultimately he was able to break their resistance and added to his territory a sizable area on both sides of the Sutluj. Near about 1792, while partitioning his possessions among his sons, Gurbakhsh Singh gave the fort and territory of Firozpur to his second son, Dhanna Singh. He did not prove to be a strong ruler. Thereupon a favorite Sardar of Maharaja Ranjit Singh, Nihal Singh Atariwala, crossed the Sutluj and hemmed in Dhanna Singh's territory from all sides. It was the time when the British East India Company was giving protection to the Trans-Sutluj chiefs, and no sooner Dhanna Singh asked for it, the protection was readily given. Ranjit Singh was thus restrained from extending his influence east of the Sutluj. Dhanna Singh died in 1818-19 leaving his widow Lachman Kaur as his successor. The widow died in 1835. She had no issue and the territory passed to the British. The British were yet busy in restoring peace and order and consolidating their position in the area when the First Sikh War broke out in December, 1845.

It is rightly said that the battle for Punjab was fought in Firozpur district. The intrigues and jealousies of the Sikh Darbar left no time with it to give correct direction to the overflowing energies of the brave Khalsa Army of Ranjit Singh, and more to exhaust itself out than for any other purpose, it was allowed to cross the Sutluj and to fight the British.

The first engagement took place at Mudki and Lal Singh, the Sikh Commander, left his men when the victory was in sight, and had the 7,000 odd British troops who had fallen into the hands of the Khalsa Army been destroyed, the subsequent history of Punjab, and possibly of India, would have been different.

Similarly at Firozpur it was only the treachery of the Sikh Commander, Teja Singh, who left the battle field when the victory was within an ace of achievement, which averted a sure defeat for the British. The Sikh Army was all the time let down by its commanders. The next Sikh Commander, Ranjit Singh, defeated the British in the next battle at Buddiwal, but was himself defeated at Aliwal.

The worst reason was yet to be pretreated with this great army at Subraon. Gulab Singh supplied to the British the Sikh plan of battle three days before it was actually fought at Subraon, and the Sikh Army had yet begun hammering the enemy, when its leader, Teja Singh, ran away

The treaty of Lahore was signed in 1845. As a result, the British acquired, inter alia, all the territory east of the Sutluj. The territory was divided among the districts of Firozpur, Badhni and Ludhiana, The Firozpur district getting the ilaqas of Zira, Mudki, Khai and portions of Kot Kapura, Guru Har Sahai, Jhuma, Kot Bhai, Bhucho and Maharaj. In 1847, the Badhni district was dissolved and the ilaqas of Mallanwala, Makhu, Dharamkot, Kot Ise Khan, Badhni, Chuhar Chak, Mari and Sade Singhwala were added to Firozpur district. Sultan khan wala was taken in exchange from Faridkot state. In 1852, portions of the ilaqa of Muktsar and Kot Kapura were added to the district. In 1856, The Nawab of Mamdot was deposed as a result of his and his son's atrocities and misdeeds, and his estate was attached to district Firozpur. In 1884, Sirsa district was partitioned, and its western portion consisting of the Fazilka tahsil and some forty villages of Dabwali tahsil were included in this District. The Composition of Firozpur district has remained more or less the same since then.

Two Regiments of Native Infantry were stationed at Firozpur and Fazilka in 1856-57. They revolted but timely action of the local British Officers did not allow them to do much damage. The native Light Cavalry also rose in revolt but with the help of the artillery manned by the Britishers, they too were overwhelmed. The emissaries succeeded in spreading the flames of revolt in Fazilka side, the Britishers were able not only to suppress the revolt, but also to send succor to the besieged garrison at Delhi. Sant Sham Dass who had rallied some 4,000 adherents round him was defeated near Jaitu or Saidoke. He was captured and executed.

(iii) Administrative set-up

The State has experienced a large-scale jurisdictional changes after the 1991 census. The number of districts has increased from 12 in 1991 to 17 in 2001. The newly created districts include; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. With the exception of Kapurthala district all other 11 districts in the State have experienced inter-district jurisdictional changes of varying magnitude.

These 17 districts are distributed over four divisions. Jalandhar division includes districts of Gurdaspur, Amritsar, Kapurthala, Jalandhar, Hoshiarpur and Nawanshahr; Patiala division covers districts of Rupnagar, Ludhiana, Patiala, Sangrur and Fatehgarh Sahib; Firozpur division spreads over districts of Firozpur, Moga and Muktsar, while Faridkot division embraces districts of Faridkot, Bathinda and Mansa.

All the districts of 1991 Census except Kapurthala has undergone intra-districts jurisdictional changes resulted in increase in the number of tahsils in the State from 46 to 72 in 2001 Census. (In Punjab Tahsil and Sub Division are synonymous to each other).

Firozpur district spreads over an area of 5328.0 sq. kms. Presently Firozpur district is sub-divided into five tahsils viz. Zira, Firozpur, Jalalabad, Fazilka and Abohar Likewise the number of towns in the district has increased from 8 to 9 and all of them have statutory status. The newly added one town Makhu is Nagar Panchayat. The district constitutes 1004 villages, comprising 968 inhabited and 36 uninhabited villages.

The statutory towns are notified by the State government. Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or transitional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the state government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specify by notification in the official gazette any area to be transitional area or a smaller urban area for the purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the state government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the Class I, Class II, Class III.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows;

Sl. No.	Class of Urban Local Bodies	Population	Income
1	Municipal Corporation	3 lac or above	2 Crore or above
2	Municipal Council Class I	50,000 to 3 lac.	50 lac to 2 Crore
3	Municipal Council Class II	10,000 to 50,000	15 lac to 50 lac
4	Municipal Council Class III	Up to 10,000	Up to 15 lac
5	Nagar Panchayat	5,000 or above	More than Rs.150 per head

The following statement indicates the jurisdictional changes, which took place after the 1991 Census in Firozpur district:

JURISDICTIONAL CHANGES DURING 1991-2001

Name of District/ Tahsil	No. of villages as per 1991	No. of villages as per 2001	No. of Towns 1991	No. of Towns 2001	Changes since 1991 & Govt. Notification No.
1	2	3	4	5	6
Firozpur	-	**1001**	-	**9**

					xiv) Fazilka tahsil lost one village Roharanwali H.B. No. 132 to Abohar tahsil vide Notification No. 2/2/97-RE-2(1)/3828 dated 28.09.1995
Abohar	-	75	-	1	xv) Total villages 75 as per 1991 Census Total villages in tahsil 74 i) Abohar tahsil gained one village Roheranwali H.B. 132 from Fazilka tahsil

For the administrative purpose, the district is a part of Firozpur Division. The district is constituted of 1004 villages and 9 towns distributed over five tahsils namely: Zira, Firozpur, Jalalabad, Fazilka and Abohar. All of them have sub divisional status. There are ten community development blocks: Ghall Khurd, Firozpur, Mamdot, Guru Har Sahai, Jalalabad, Fazilka, Khuian Sarwar, Abohar, Makhu and Zira. The district is the basic unit of administration. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district and revenue administration in the district.

(iv) Physical Features

Origin of Name:

The district derives its name from the district headquarters town of the same name, which is reported to have been founded by Firozshah Tughlak (1351-1387 AD), as the place must have occupied an important position on the line of communication between Lahore and Delhi. Another tradition, however, ascribes its foundation to one of the Bhatti chiefs, named Firoze Khan, in the middle of the 16th century.

Location and Size:

Firozpur District is located in the south-western part of the State of Punjab on the Indo-Pakistan border in a tract known as Malwa. It lies between $30^0.58'$ latitude and $70^0.37'$ longitude of the state. It is one of the three districts falling in the Firozpur division, It is surrounded by Amritsar and Kapurthala districts in the north; Jalandhar district in the northeast; Faridkot, Muktsar and Moga districts in the east. It is separated

from Jalandhar and Kapurthala districts by Satluj river and Amritsar district by Satluj and Beas rivers.

Area:

Firozpur District has an area of 5328.00 sq km as supplied by the Surveyor General of India. Out of this area, 5235.73 sq. km. is rural whereas the remaining 92.27 sq. km. is urban. The rural area of the district is derived by subtracting urban area of the district from the total district area, as supplied by the Surveyor General of India. The tahsilwise area, as supplied by the Director Land records, Punjab is as follows: Zira tahsil (1304.6 sq. kms.); Firozpur tahsil (1284.6 sq. kms); Jalalabad tahsil (897.0 sq. kms.); Fazilka tahsil (1157.2 sq. kms.) and Abohar tahsil (1177.9 sq. kms.). The tahsil areas totals up to 5821.4 sq. kms, which does not tally with the area supplied by the Surveyor General of India for the reasons stated above.

The urban area for the district has been obtained by adding up areas of the towns, as supplied by the urban local bodies. The rural area for the tahsil has been obtained by subtracting urban area from the total area of tahsil. Community Development Block area has, however, been obtained by adding up village areas of the constituting villages including census towns and out growths of urban agglomerations, if any.

Climate:

The climate of Firozpur district is, on the whole, dry and is characterized by very hot summer, a short rainy season and a bracing winter. The year may be divided into four seasons. The cold season is from November to March, followed by the summer season which lasts up to end of the June. The period from July to the middle of September may be termed as the post monsoon or the transition period.

From about the end of March, the temperature increases rapidly till June which is generally the hottest month and on individual days, the maximum temperature may be about 47^0 C. However, with the onset of the monsoon by the end of June or July, there is an appreciable drop in day temperature but the weather remains oppressive due to the increase in moisture in July and August. By the second week of September both day and night temperatures begin to fall and reach freezing point of water in January.

The rainfall in the district generally increases from the south-west towards the north-east. About 70 per cent of the annual rainfall in the district is received during monsoon period from July to September. In winters, some rainfall occurs under the influence of westerly disturbance. The following table gives monthly rainfall based on average of 5 years, 1996-2000, for the district.

Monthly Rainfall: Average of 5 years 1996-2000

	Month	Rainfall (MM)		Month	Rainfall (MM)
1.	January	7.8	7.	July	64.5
2.	February	5.1	8.	August	60.9
3.	March	8.2	9.	September	9.2
4.	April	4.7	10.	October	3.8
5.	May	5.0	11.	November	1.5
6.	June	16.4	12.	December	-
Total					**187.1**

(Source: Statistical Abstract of Punjab, 2001)

Physiographic:

Physiographically, Firozpur District constitutes a part of the Punjab Plain, which is largely flat and featureless and is formed of Pleistocene and sub-recent alluvial deposits of the Indo Gangetic system. Wind action has also played a part in shaping the relief of the district as it is in the vicinity of the Rajasthan desert. That is why the alluvial surface of the district is strewn with sand dunes in some parts.

The general elevation of the district ranges from 230 meters in the northeast to about 175 meters in the southwest, giving a northeast to southwest gradient of one meter in 4 km. The physiography of the district is apparently a homogeneous plain in general. The following three terrain units can be identified;

(i) The floodplain of the Sutluj.

(ii) The sand dune infested tract.

(iii) The upland plain.

The floodplain of the Satluj:

This occupies the northern half of the Zira tahsil, northern and western sections of Firozpur tahsil and the northwestern part of Fazilka tahsil. This tract is locally known as 'Satluj Bet'. It is low lying uneven 10-15 km wide stretch of land along the Satluj river. It is covered with new alluvium and is separated from sand dune infested tract to its south and east by a low cliff. Before the damming of the Satluj at Bhakra and construction of barrages at Nangal and Harike, the river used to flood this tract during the rainy season. At Huissainiwala headworks the river contains a trickle of water during major part of the year. But this tract is quite safe from floods at present. At places this tract contains abandoned courses of the river. Patches of marshy land and pockets of thickly growing grasses can be seen along the river course which is now being reclaimed for agriculture and other uses.

The sand dune infested tract:

This tract runs parallel to the 'Bet Satluj' to its south and east and covers the lower part of the Zira tahsil, the eastern half of the Firozpur tahsil and the middle zone of the Fazilka tahsil. It is a linear stretch of numerous closely spaced sand dunes. This tract coincides largely with the old course of the Satluj, through which the river used to flow about 400 years back, since when it has been drifting westwards. The base of the sand dunes infested tract is formed of the alluvium deposited by the river. The sand dunes are small, a few hundred meters long and generally low, only 2-5 meters above the level of the surrounding ground. However, these sand dunes are spaced closed to one another, providing a district type of topography.

The upland plain:

This includes the interior parts of the district and possesses a firm base of old alluvium with sporadically distributed sand dunes superimposed on it. Within the upland plain, the north eastern part is higher (elevation ranging from 215 to 230 meters) than the south western part, the elevation of which is 175 to 200 meters. Moreover, the frequency of sand dunes is more in the latter (which adjoins the Rajasthan Desert) than in the former.

It may be noted that many of the sand dunes, both in the sand dunes infested tract and in the upland plains, have been leveled and brought under cultivation by extending irrigation, particularly by canals, which has brought about considerable changes in the topography of the district.

Rivers and Drains

Satluj River:

It originates from near Mansarover Lake in Western Tibet (China). After flowing through Himachal Pradesh, and Rupnagar and Ludhiana districts, it enters the Firozpur district near village Bhodiwala. From here it follows a north-westerly course for about 40 km. till it reaches Harike, where it is joined by the Beas river. Satluj river flows towards west for about 15 km, from Harike and then it turns southwest, a direction which it keeps through the rest of its journey till it passes into Pakistan at Suleimanki.

Satluj performs a total journey of about 200 km. along the northern and western borders of this district and separates it from the district of Jalandhar, Kapurthala and Amritsar in the north and runs along international border with Pakistan in the west.

Major characteristics of the district

Forestry:

Firozpur district falls under the jurisdiction of Divisional Forest Officer, Firozpur. The area under forest is very small and its break up as "Reserved", "Protected" and "unclassified" is as follows

Serial No.	Type of Forest	2000-01 (in sq. km.)
1	Reserved Forests.	4.0
2	Protected Forests	94.0
3	Unclassified Forests	19.0
4	State Forests (Total 1to 3)	117.0
5	Under S/38 of Indian Forest Act, 1927	-
6	Total Forest (total 4+5)	117.0

(Source: Statistical Abstract of Punjab, 2001)

The table reveals that during the 2000-01 the area under forests is 117.0 sq. kms. However, during 2000-01, no area has been reported under reserved forests, whereas 117.0 sq. kms are under State forests.

Natural Economic Resources

Minerals and Mining:

Firozpur is an important saltpeter producing district of the State. A majority of occurrences are reported from areas lying between the Satluj river and Firozpur-Fazilka road. Saltpeter is essentially a nitrate of potassium and sodium with minor amounts of chloride, sulphate and carbonate radicals. It is used primarily in the production of nitrates and carbonate radicals. Its refined form is used in the gun powder and fireworks industries

Land and Land use Pattern:

During 2000-2001, against a geographical area of 585 thousand hectares, the area of the district according to village papers is 526 thousand hectares which shows some difference in the two sets of area arrived at by different methods of measurement adopted by two separate agencies. However, for the purpose of discussion hereinafter we will refer to the area as per village paper only. Out of an area of 526 thousand hectares, 12 thousand hectares is under forest. 2 thousand hectares is barren and uncultivable, 31 thousand hectares is put to non-agricultural use, about 500 hectares is culturable waste, 5 thousand hectares is current fallow, 1 thousand hectares is other than current fallow and 475 thousand hectares is net area sown in the district, which is 90.0 per cent of the total area. Further out of 475 thousand hectare of net area sown, 428 thousand hectare is sown more than once thus the total cropped area in the district during 2000-01 works out of 903 thousand hectares.

Agriculture:

Agriculture is the main stay of economy of the district and 74.2 per cent of its population is residing in the rural areas. Although there is significant shift from agriculture sector to non-agricultural section, yet it is predominantly agricultural in nature. As per 2001 Census 56.4 per cent of its main workers are engaged in agriculture as against 68.4 per cent in 1991 Census.

There are two main crop seasons, viz., Kharif and Rabi, locally named as Sawni and Hari. The principal Kharif crops are paddy, cotton, maize and sugarcane, whereas the minor ones or subsidiary crops are summer vegetables, Kharif pules etc. The principal rabi crops are oil seeds (sarson, taramira, alsi and toria) and winter vegetables. Cotton and paddy are the main cash crops of the district as the soil and climate is most suited to these crops. Sugarcane is also fast becoming popular as a cash crop but it is mostly grown in the bet areas of the district in the Zira and Fazilka tahsils

Out of 903 thousand hectares of total cropped area of the district, 667 thousand hectares are under food crops and 236 thousand hectares area are under non-food crops, Thus 73.9 per cent of the cropped area is reported under food crops in the district. The break up of area under various crops in the district during the year 2000-01 is as follow; Wheat (378 thousand hectares), Rice (248 thousand hectares) Cotton (113.7 thousand hectares), (98.0 thousand hectares American), (15.7 thousand hectares) Desi. Moong (5.6 thousand hectares), Rapeseed and Mustard seed (11.6 thousand hectares), Gram (1.9 thousand hectares), Sugarcane (7.6 thousand hectare), Sesamum (2.7 thousand hectares), Barley(6 thousand hectares), Bajra and Maize (less than 500 hectares each). Some of the other crops grown in the district are; Dry chillies (0.1 thousand hectare), Mash (less than 50 hectares), Arhar (0.1 thousand hectares), Groundnut (0.1 thousand hectares) and Potatoes (0.4 Thousand hectares), etc.

Horticulture:

During the year 2000-01 an area of 8,270 hectares was reported under various fruits and orchards in the district. Soils and climatically the district is a boon to the orchard growers, especially for citric fruits. Incidentally the district reports the highest area under orchards and fruits in the state. The area under various important fruits in the district are: Orange and Malta (2,156 hectares), Kinnow (5,258 hectares), Grapes (170 hectares), Peach (110 hectares), Pear (58 hectares), Ber (142 hectares), etc. Cultivation of grapes is also picking up but the quality of the grapes is not as good as grown in Maharashtra or Andhra Pradesh and does not fetch good price in the market. But the locally grown Malta is of very high quality and is much sought after by the fruits traders of Delhi and other places.

Firozpur district is not important so far as vegetable growing is concerned. During 2000-01, an area of 3,685 hectares was reported under various vegetables. Out of an area of 3,685 hectares, 1,682 hectares and 1,599 hectares are under winter and summer vegetables, respectively. Some other vegetables grown are potatoes (359 hectares) and onion (45 hectares).

Besides compost cattle dung and green manures, chemical fertilizers are increasingly being used in the district. During the year 2000-01, 151,000 tonnes of chemical fertilizers (NPK) were used in the district.

Since Firozpur district is an important one in citrus, a Regional Fruit Research Station is located in the district at Abhor. The Indian Council of Agricultural Research launched in 1954-55 a coordinated scheme, for the development of date cultivation in the country, under which this station was established. For the first ten years this station remained under ICAR, New Delhi, but later it was passed over to Punjab Agricultural University, Ludhiana. This station has done commendable research work on dates and introduced 49 varieties of dates from various countries. About 34 varieties existed in this station in 1980. Besides, this station has about 180 species/ varieties of citrus and 250 varieties of grapes, and was first to set up three grapes training systems, namely, the Arbour System, the telephone system and the Kniffin system in the country. The orchardist and farmers of this area made good use of the

research conducted at this station, especially in citrus and grapes cultivation and greatly benefited both in technical skills and economic returns.

Irrigation:

Due to scanty and uncertainty of rains agriculture heavily depends on irrigation. The major sources of irrigation are canals and wells, including percolation wells, tube wells and pumping sets.

The three main canal irrigation system in the district are: (1) Sirhind Canal System, (2) Grey Canal System and (3) Eastern Canal System. All these systems are fed from the Satluj river.

1. Sirhind canal system is the oldest system which takes its supplies from Rupnagar (Ropar) Headworks. Before the construction of Sirhind Feeder, this system, used to irrigate areas in Fazilka tahsil up to the left bank of Bikaner canal but subsequently parts of the Abohar Branch. Bathinda Branch and a number of distributaries, off taking from Sirhind canal system have been switched over to the Sirhind Feeder, which takes its supplies from Harike headworks and irrigates areas in Fazilka and Abohar tahsils, east of Bikaner canal.

2. Grey canal system irrigated areas in the Zira tahsil. This originally comprised inundation channels which took of from Satluj river and irrigates areas only near the Satluj river. However, after the constructions of Rajasthan Feeder and Sirhind Feeder the areas situated on the left bank of these two Feeder canals are being irrigated from Sidhwan Branch of the Sirhind canal system. The areas situated on the right bank of Sirhind Feeder are now being irrigated, partly by Makhu canal and partly by Firozpur Feeder, taking off from Harike headworks. These irrigate areas in Zira and Firozpur tahsil.

3. Eastern canal system exists from pre-partition times and irrigates areas between Bikaner canal and the Satluj river in Firozpur and Fazilka tahsils, extending from Firozpur headworks to Suleimanki headworks. In fact this canal system earlier originated from Firozpur headworks at Hussainiwala, but is now being supplied from Firozpur Feeder which also feeds Bikaner canal. Earlier Bikaner canal and Eastern Canal System received waters from Harike headworks.

During 2000-01 the net area irrigated from all sources in the district was 470,900 hectares out of which 143,700 hectares was irrigated from government canals, 327,200 hectares was irrigated from tube wells and wells. However the percentage of net area irrigated to net area sown worked out to 99.1 per cent for this district. During 2000-01 the gross irrigated area was 886.500 hectares out of total cropped area in the district. However, in 1990-91 out of 494,800 hectare of net irrigated area 238,800 hectare was irrigated from government canals, 255,600 hectare was irrigated from tube wells and wells and 200 hectare was irrigated from other sources. Thus the district reported 97.8 per cent of Net irrigated to net area sown in 1990-91.

Animal Husbandry:

Livestock continues to be a valuable possession of the farmers. The district is known for good breeds of Nili buffaloes and Sahiwal cows which are found in large number throughout the district. Both these breeds are known for their heavy yields and long lactation period.

According to 1997 livestock census there were 945,500 live stocks in the district and their break up is as follows: 260,900 cattle; 613,800 buffaloes; 1,900 horses and ponies; 700 donkeys; 900 mules; 38,400 sheep; 20,600 goats; 1,300 camels; 7,000 pigs. Besides, there were 419,900 poultry birds.

In 2000-01 there were 113 veterinary hospitals, 87 veterinary dispensaries, 10 sheep wool extension centres and 2 poultry service centres functioning in the district, wherein 83 Veterinary officers and 178 Veterinary Pharmacists were posted

Fisheries:

The district is rich in fisheries as its resources are vast and varied both in the running water and impounded waters. The running water resources constitute the Satluj river, streams and their tributaries, canals and drains. The impounded water resources constitute dhands (stretches of water formed by the shifting course of the river) village ponds and tanks, the local varieties of fish are: thaila, rohu damra, kaliahan or kalaunch, mori or mrigal, mulke, singhara or singhari, khaga, etc. In 2000-01, an area of 550 hectare was stocked with fish. There is a fish Seed Nurseries in the district.

Tenancy:

The Farmers, generally cultivate the own land themselves. This system is known as Khud Kasht (self cultivation). In some times the land is leased out to other farmers or persons for cultivation on Batai (share cropping) or Theka (contract) which is usually fixed for one half of the gross produce, payable in kind. Contract or Theka is also in vogue and is fast gaining popularity. This is generally paid in cash on yearly basis but may be agreed to in kind depending upon the land contracted and the economic positions of the cultivator. The Batai or Theka may vary depending upon the productivity of the land. Since a large number of farmers/persons own tractors they prefer to provide agriculture services for various agricultural operations for cash payment. This system is gaining popularity in the countryside for quite some time

Industry:

Firozpur district is industrially not much developed due to its borderly location. However, there exist some village and cottage industries such as pottery, leather tanning, handloom weaving, phulkari work, enameling and saltpeter. Also trades like moorah making, wood work, shoe making, pawa making, carpentry and blacksmithly were carried out. Fazilka is known for bann making, Desi jutti of Abohar, in an artistic design with zari and tilla, is quite in demand. Before partition some small units of cotton ginning and pressing were set up at Fazilka and Firozpur. In 1931 a saltpeter refining unit was also set up at Firozpur. Enamelware industry and cutlery goods industry was established at Firozpur. Some of the newly started industries after independence were, cotton spinning mills, brush ware, rubber, insulated cables, cycle parts, plastic goods, etc. Cotton ginning and pressing and agricultural implements manufacturing industries have been set up at Abohar. A few large scale industries located in the district are as follows:

Cotton Ginning and Pressing:

The district being rich in basic raw material i.e. cotton, number of units are located in the district mainly in the Fazilka and Abohar areas. In the year 2000-01, 3,40,000 bales of cotton (of 170 kg. size) were pressed in the district in the large and small scale units.

Flour milling:

A roller flour mill, Satluj Flour Mills was set up at Firozpur in 1945. Its name has been changed to Modi Trading and Industrial Syndicate Ltd. The main products of this unit are: maida, suji, atta, mustard oil, khal (oil-cake) and rice.

Cotton Textiles:

An industrial unit was set up at Abohar as far back as 1957 with 25,948 spindles. It produced cotton yarn which was exported throughout the country. Another unit in the cooperative sector, 'The Abohar Cooperative Spinning Nukk, at Abohar was established on 1989.

Oil Mills:

There is one unit located at Abohar.

Sugar Manufacturing:

There are two sugar mills in the cooperative sector located in the district. The first one is Zira cooperative Sugar Mills. Ltd., Zira (its crushing capacity is 2,500 tonnes daily and produced 91,000 tonnes of sugar during 2000-01) The second sugar mill is 'Fazilka Cooperative Sugar Mills Ltd., Fazilka (its crushing capacity is 1,250 tonnes daily and produced 20,900 tonnes of sugar during 2000-01).

Some of the industries in the small scale sector are as follows:

Agricultural Implements, Rice Shelters, Oil Engineers, Electrical Accessories, Automobiles, Dhoop Making, Optical goods, Radio and Radio Parts, Sodium Silocare, Soap manufacturing, Steel Furniture, Brick Tiles, Garments, Spices, Cement Jalis, Wooden furniture, Cold Stores and Ice Factories, Motor Dynamos, Sheet Metal, Flour Mills, Candle Making, Plastic Goods, Bone Fertilizer, Sela Plant manufacturing, Card Board Industry and Enamelware.

The important cottage and village industries in the district are:

(1) Handloom Weaving: The main products were kheses, khaddar blankets, etc.

Durries were woven by the women folk for their domestic use.

(2) Leather Tanning

(3) Jutti-making: Abohar is renowned for jutties of artistic designs.

(4) Ghani-oil

(5) Gur and Khandsari

(6) Baan and Rope Making (Fazilka)

(7) Jail Industries- There is a Central jail located at Firozpur, where prisoner make Niwar, Tape, Durries, etc.

In 1990, there were 542 registered factories out of which 470 were in working condition and deployed 12,608 workers. There has been substantial increase in the number of working factories as 528 with the deployment of 13441 factories workers during 1990-2001 but yet the numbers of factories and workers are quite low against the other districts of the State.

A government Polytechnic started functioning in the district from 1990-91 session. During 2000-01 session 435 students were enrolled for various diploma courses. Apart from this, there are two Government Industrial Training Institutes (ITI) in the district. The first is located at Firozpur, which was set up in 1948 by Government of India but was taken over by the State Government in 1956. The second one is located at Fazilka and was set up in 1963. In the ITIs, instructions are imparted for certificate courses in trades like blacksmithy, fitter, tuner, machinist, stenography (Punjabi). Also, there are two Industrial Training Schools for Girls, one each at Firozpur and Zira. Instructions are imparted in these schools in tailoring, cutting, needle work and embroidery.

Trade and Commerce:

Before advent of railways, Firozpur and Fazilka towns were important centres of trade and commerce in the district as these were situated near the Satluj river through which goods were transported by boats. But with the development of railways other centres also developed such as Abohar, Talwandi Bhai, Jalalabad, Guru Har Sahai, Zira, etc. Fazilka town has emerged as the biggest market for wool, which was brought here from Bikaner and adjoining areas.

As on 31st March, 2001, there were 11 Agricultural Markets (Regulated) with 54 attached sub-yards in the district. The markets are: Abohar, Fazilka, Jalalabad, Makhu, Talwandi Bhai, Zira, Guru Har Sahai, Firozpur city, Firozpur Cantt., Mallanwala and Mamdot.

In 2000-01 the district received total arrivals of 3,821,000 tonnes of food grains and non-food grains which was reported to be the lowest for any district in the State. Under the procurement scheme, the following food grains procurements were made by various agencies in the district: Paddy- State Government 51,000 tonnes: FCI 2,50,000 tonnes; Markfed 95,000; Punsup 1,06,000 tonnes; Traders 4,52,000 tonnes; total 9,52,000 tonnes; and Wheat – State Government 1,25,000 tonnes; FCI 3,73,000 tonnes; Markfed 2,53,000 tonnes; Punsup 1,73,000 tonnes; Traders 2,70,000 tonnes.

Though the trade is mostly in the private hands, there is a District Wholesale Co-operative marketing and Supply Society at Firozpur which was registered on 3rd October, 1953. During 2000-01, there were 7 marketing co-operatives; 299 milk supply co-operatives and 418 weavers co-operatives societies in the district.

There are two co-operative consumer stores in the district. The first one is 'The Firozpur Central Co-operative Consumer Store Ltd., Firozpur which was registered in 1963. The second one is 'The Abohar Central Co-operative Consumer Store Ltd., Abohar, which was registered in 1967.

As on 31st December, 2001 there were 189 bank branches in the district, the break up is as follows: 21 State Bank of India, 7 State Bank of Patiala, 30 Punjab National Bank, 56 Co-operative Banks and 75 other banks.

Transport and Communications:

Transport and Communications are important for the development of any area. This district has a good network of roads, railways, etc. as due attention had been paid for their development both in the pre-partition and post-partition period due to its strategic location.

In 2000-01 there were 3,839, km. of roads maintained by the PWD (B&R) in the district as against 3,561kms during 1990-91. Out of total road length maintained by PWD (B&R), 203 km. road length was under National Highways and 3,636 km. under the Provincial Highways. It is noticeable a road length of 160 km. of National Highways passes through this district. The National Highway are: NH-15 (Harike-Zira- Talwandi Bhai - Faridkot and Malout – Abohar - Ganganagar, NH-10 (Abohar - Fazilka up to Pakistan border). Other important roads in the district are: Firozpur-Fazilka road, Firozpur-Hussainiwala road, Firozpur-Moga-Ludhiana- Chandigarh road, Firozpur - Faridkot road, Firozpur - Muktsar road, Jalalabad - Muktsar road, Fazilka- Malout road, Abohar - Hanumangarh road, Abohar - Dabwali road, Makhu - Lohian road, Makhu-Moga road, Moga - Nakodar road (via Dharamkot), etc.

Firozpur district falls under the jurisdiction of Firozpur Division northern Railways. Six railway lines pass through this district, which are as follows:

(1) Firozpur Cantt.-Ludhiana Branch Line:

It is a broad gauge line, which serves the Firozpur and Zira tahsils. The important railway stations on this line situated within this district are: Saidawala, Dhindsa (Halt), Firozpur, Sulhani and Talwandi Bhai.

(2) Firozpur Cantt.- Jalandhar City Branch Line:

It is a broad gauge line, which serves the Firozpur and Zira tahsils. The important railway stations on this line situated within this district are: Mahlam, Tali Saida Sahu, Mallanwala Khas, Butewala, Makhu and Jogewala.

(3) Firozpur Cantt. - Fazilka Branch Line:

It is a broad gauge line, which serves the Fazilka and Firozpur tahsils. The railway stations on this line falling in the district are: Khai Phemeke, Dodh, Jhok Tahal Singh, Kohar

Singhwala, Guru Har Sahai, Jiwa Arain, Jalalabad, Bahamniwala, Ladhuke, Theh Qalandar and Fazilka.

(4) Firozpur Cantt. - Bathinda-Delhi Main Line:

It is a broad gauge line, which serves the Firozpur tahsil. Only one station located on this line is Kasu Begu.

(5) Shri Ganganagar –Abohar-Bathinda Line:

It is a broad gauge line, which serves Fazilka and Abohar tahsils. The railway stations located on this line are: Bahawal Bassi, Abohar, Kilanwali Punjab, Panjkosi and Balkian.

(6) Fazilka-Bathinda Branch Line:

It was previously a meter gauge but now it has been converted into broad gauge line. It serves Fazilka tahsil. The stations located on this line are: Roranwala, Chak Pakhewala and Chak Banwala in this district.

As on 31st March, 2001, there were 154,537 registered vehicles in the district. Out of which 95,329 were passenger vehicles further breakup of the same is as follows: 844 Buses, 4098 station wagoans and cars, 2213 Jeeps, 279 taxies, 1038 three wheelars and 86857 two wheelers, In addition to these vehicles, there were 3751 goods vehicles (3539 four wheelers & above and 212 three wheelers) 55174 tractors and 283 other vehicles were on the road.

The district is well served by the Public Roads Transport System. The Firozpur depot is the only depot located in the district which serves the district at present. The Pepsu Road Transport Corporation and other depots of Punjab Roadways also serve this district by operating their buses on routes passing through this district. Beside, numbers of private operators are also plying buses on the local routes.

Electricity:

Firozpur district is fed from Joginder Nagar Power Station through Ludhiana Grid Substation. The district is being served by: Firozpur Division, Malout Division (partly), Abohar Division (partly), and Muktsar Division (partly) of the Punjab State Electricity Board, under the overall charge of Superintending Engineer, Firozpur.

During 2000-2001 Firozpur district consumed 938.4 million units of electricity, the district was eighth highest in the state. The break up of electricity consumed by various categories of consumers is as follows: Domestic 185.2 million units, Commercial 36.6 million units, Industrial 160.3 million units, Agricultural 504.6 million units and Others 51.7 million units. If we look back we find that in 1990-91 Firozpur district consumed 841.4 million units of electricity. Thus it would be seen that consumption of electricity has gone up from 841.4 million units to 938.4 million units in 2000-2001 but yet the percentage of electricity consumption has declined from 7.1 per cent to 4.9 per cent in 2000-2001.It would also be noted that Agricultural sector continues to be the largest consumer of electricity in the district.. However, this district can boasts of the largest number of energised tube wells in the state, as against 69,978 energised tube wells as on 31st March, 1991 in the district, there were 77,118 tube wells/pumping sets as on 31st March, 2001 in the district.

In 1990-91 there were 63.5 per cent electrified households (169,248 households out of 266,584 households) in the district, against 65.4 per cent (202,080 households out of 308,873 households) in 2000-2001. Thus the percentage of electrified households has gone up from 63.5 per cent in 1990-91 to 65.4 per cent in 2000-2001.

The district is a net consumer of electricity as there is no power generating station in the district. However, to meet contingencies some big Industrial houses have installed there own diesel generating sets. Needless to say that demand for electricity outstrips the supply which ought to be increased at the earliest.

Medical and Public Health:

The oldest among the hospital is the Frances Newton Hospital at Firozpur Cantt. and this was opened by Dr. D.L. Ferris, wife of Reverend Dr. Frances Newton in 1894. It has now grown in to 300 bed hospital (89 beds for males 142 beds for females, 25 beds for children and 44 beds for infants). Initially, it was meant for treatment of females and children but gradually it started attending to male patients also. It is running two schools, one for the training of nurses and the other for training of laboratory technicians. Beside, this institution has opened up a 10 bed hospital known as Dr. D.L. Ferris Hospital at Guru Har Sahai.

As on Ist April, 2001 there are 149 medical institutions in Firozpur district out of which 123 were located in rural areas and 26 were located in urban areas. As regards ownership of these medical institutions, 146 state government, where 3 are owned by the voluntary organizations. There are 16 Hospitals (6 rural, 10 urban) 35 PHCs (33 rural, 2 urban) and 87 dispensaries (78 rural, 9 urban). Beside there are 38 Ayurvedic, 3 Unani and 8 Homoeopathic dispensaries functioning in the district.

As on Ist April, 2001 there were 1634 beds in the medical institutions in the district, out of these 768 are in rural areas and 866 in the urban areas. Out of 1634 beds, Hospitals accounted for 770 beds, Primary Health Centres accounted for 132 beds , Dispensaries accounted for 356 beds, whereas remaining356 bed are Centres accounted for by combined medical institutions like hospitals/CHC, CHC/PHC.

Education:

As on 30th September 2000 the position of various educational institutions in the district is as follows; 11 arts, sciences, commerce and home science colleges (8 boys, 3 girls), two teacher training (B. Ed) colleges (one each boys and girls), 74 senior secondary schools (61 boys, 13 girls), 133 high schools (128 boys and 5 girls), 210 Middle schools (205 boys and 5 girls), 1060 Primary schools (1047 boys and 13 girls), one teacher training school, 6 technical Industrial Art craft schools (3 each for boys and girls).

A Government polytechnic has been opened at Firozpur. It started functioning from the Academic Session 1990-91. During the 2000-01 session, 435 students were enralled.

Two Industrial Training Institutes are located in the district, one at Firozpur and other one at Fazilka. Besides, there are two government industrial schools for girls at Firozpur and Zira. Also a private school called "Sewa Sadan Industrial School for girls, which is being run by a private institution dedicated to women upliftment.

There is a school for the blind at Firozpur which is being run by the District Council for the welfare of the Handicapped. It was established in 1956. Instructions in Music, Crafts (Bamboo and cane) and handloom weaving are imparted in this institution.

There is an orphanage, called Arya Samaj Orphanage, Firozpur. It has separate hostel facility for boys, girls and widows, who are supported and taught to become self supporting economically.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical

structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with

all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituents a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 100,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in huge pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

List of Scheduled Castes and Scheduled Tribes:

The Government of India by Gazette Notification under Article 314(1) of Indian Constitution has declared some castes, races or tribes or parts of or groups within castes, races or tribes as Scheduled Castes as there is no standard definition of Scheduled Castes. Similarly, Scheduled Tribes mean all such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are declared by the President of India to be treated as Scheduled Tribes under Article 342(1) of the Indian Constitution. There is slight change in the definition of Scheduled Castes in 1991. Before that, Scheduled Castes could belong to Hindu or Sikh religion. But from 1990, in addition to Hindu and Sikh religions, Scheduled Castes may belong to Buddhists religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In Punjab State, 37 castes were notified by the State Government as Scheduled Castes at the 1991 Census and there is no change at the 2001 Census. Following 37 castes have been notified as scheduled castes in Punjab;

1. Ad Dharmi
2. Balmiki, Chura, Bhangi
3. Bangali
4. Barar, Burar or Berar
5. Batwal
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar Raigar, Ramdasi or Ravidasi
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhilla, Gandil, Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and / or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

(vi) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz.

(i) underground sewerage,
(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and
(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part

of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

1) Migration
2) Internal and International Migration
3) Rural - Urban component of migration

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UACity/Town. These are :

M7 (5,000,000 and above)
M6 (2,000,000 to 4,999,999)
M5 (1,000,000-1,999,999)
M4 (500,000-999,999)
M3 (300,000-499,999)
M2 (200,000-299,999) and
M1 (100,000-199,999)

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenom-enon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001- Census Findings - Population and its distribution:

The following table shows distribution of rural and urban population by tahsils in the district:

POPULATION, NUMBER OF VILLAGES AND TOWNS, 2001

Name of Tahsil	Population									Number of Villages		No. of Towns
	Total			Rural			Urban					
	P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13
Zira	223,111	117,398	105,713	179,153	9,4445	84,708	43,958	22,953	21,005	218	211	2
Firozpur	496,601	265,880	230,721	328,875	173,202	155,673	167,726	92,678	75,048	348	337	3
Jalalabad	303,415	158,236	145,179	256,140	133,162	122,978	47,275	25,074	22,201	214	207	2
Fazilka	346,296	182,601	163,695	278,869	147,397	131,472	67,427	35,204	32,223	148	137	1
Abohar	376,684	202,109	174,575	252,345	135,664	116,681	124,339	66,445	57,894	76	76	1
District Total	**1,746,107**	**926,224**	**819,883**	**1,295,382**	**683,870**	**611,512**	**450,725**	**242,354**	**208,371**	**1,004**	**968**	**9**

Firozpur district has a population of 1,746,107 comprising 926,224 males and 819,883 females. A tahsil in district Firozpur on an average has a population of 349,221 which is higher than the average size of tahsil in the state (338,319) as such. Among the tahsils in the district, Firozpur (496,601) is the most populated and Zira (223,111) the least populous tahsil. Among the districts, Firozpur ranks 6th and the growth rate is (20.5%) during the decade 1991-2001.

In the district 1295,382 (74.2%) is residing in rural and 450,725 (25.8%) in urban areas, the corresponding percentages of rural and urban population in the State are 66.1 and 33.9 per cent respectively. Out of 1,004 villages of the district 968 are inhabited. A tahsil on an average has 201 villages. The rural population is distributed over 968 inhabited villages and the number of these inhabited villages varies between 337 in Firozpur tahsil and 76 villages in Abohar tahsil. The urban population is distributed over 9 towns in the district An inhabited village in the district on an average has a population of 1,338 as against 1,311 in the state signifying that the villages in Firozpur district are slightly larger in population size. Similarly, Towns are comparatively smaller in the district compared with that of the State and a town in Firozpur district on an average has a population of 50,081 against 52,627 in the state.

Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the Census organization to classify towns according to their population size. A town with a population of 100,000 or more is termed as 'city' in Indian census.

The distribution of towns of Firozpur district by size class is exhibited in the following table.

Class	Population size	No. of Towns.
1	2	3
Class – I	100,000 and above (Generally referred to as city)	1
Class – II	50,000 to 99,999	3
Class – III	20,000 to 49,999	2
Class – IV	10,000 to 19,999	3
Class – V	5,000 to 9,999	-
Class – VI	Less than 5,000	-

There is only one class I town in the district, accommodates more than one –forth (27.6%) of the district's urban population. Three towns fall in the population size Class-II, 76.5 per cent of the urban population of the district is concentrated in these three towns. Two towns fall in the population size class III, three towns fall in the population size class IV and there is no town under Class-V and VI. The share of class III town is 14.4 per cent while class IV accommodates only 9.1 per cent of the urban population in the district.

During this decade the number of towns has gone up from 8 to 9 in 2001. There has been an addition of one town viz. Makhu NP with a population of 12,175, which is nearly 2.7 per cent of the urban population of the district. Among the towns in the district, Abohar 124,339 is the most populated and Makhu 12,175 the least populous town in the district.

Population Growth, Density and Sex Ratio

Population Growth:

Population of district has increased from 1448,903 to 1746,107 during 1991- 2001, resulting in a net increase of 297,204 persons during decade. Firozpur district has recorded a decadal growth of 20.5 per cent which is significantly higher than the state.

Density:

Firozpur district with a population of 1746,107 and an area of 5,328 sq. km has a density of 328 persons per sq. km, which is significantly lower than that of the State (484) and ranks 15th among the districts in the state. Within the district, Firozpur (387) is the most densely populated tahsil and Zira (171) is the least populated tahsil. Likewise, rural density varies between 289 in Jalalabad tahsil and 139 in Zira tahsil. The urban density is the highest (6,716) in Fazilka tahsil and the lowest (2,986) in Zira tahsil.

Sex Ratio:

Sex ratio is derived as the number of females per 1,000 males. Generally speaking differentials in mortality conditions of males and females, male-female ratio at birth and sex selective migration are the key factors, which determine the sex composition. It reflects the socio-economic and demographic characteristic of the population and unfolds the status of women in the society and care of the girl child in particular.

Significant feature of Punjab population is the preponderance of males over females. According to Census 2001, out of the total population of 24,358,999 in the State, 12,985,045 are males and 11,373,954 females resulting in an overall sex ratio of (876). All the districts in the state barring Hoshiarpur (935) and Nawanshahr (914) have a sex ratio of less than 900.

In fact the sex ratio in the State and its constituent districts has remained to be low throughout. At the beginning of the 20th century, the sex ratio was 832 in 1901, which declined to 780 in 1911. Ever since, the sex ratio in the state, showed gradually improvement till 1991, when the sex ratio in the state reached 882. However, it has declined to 876 at 2001, exhibiting a fall of 6 points in the State.

Within the State the districts among themselves show considerable disparity which is the highest in Hoshiarpur district (935) and the lowest in Ludhiana (824). Firozpur district with a sex ratio of 885 is higher than the State 876.

Among the tahsils in the district the sex ratio is the highest in Jalalabad (917) and the lowest in Abohar (864). The rural sex ratio varies between 924 in Jalalabad and 860 in Abohar tahsil. The urban sex ratio varies between 915 each in Zira and Fazilka and 810 in Firozpur tahsil.

The Child sex ratio is reported to be the highest in Firozpur district (822) and the lowest in Fatehgarh Sahib (766) signifying that child sex ratio is appalling low in all the districts in the state. All the districts in the state have reported substantial decrease which varies between 47 points in Muktsar district and 108 points in Fatehgarh Sahib district. It has declined from 875 in 1991 to 798 in 2001 exhibiting a decrease of 77 points in child sex ratio. There are 8 districts which exhibit a child sex ratio of over 800. Besides Firozpur, they include Moga (818), Ludhiana (817), Hoshiarpur and Faridkot (812 each), Firozpur (811), Nawanshahr (808) and Jalandhar (806).

In Firozpur district, the child sex ratio (822) is higher than that of the State. Within the district, the tahsils display a considerable disparity in their child sex ratio; it is the maximum in Jalalabad (838) and the minimum in Abohar (815).

Likewise, the disparity in the rural and urban child sex ratio is quite marked; the rural child sex ratio varies between 844 in Jalalabad and 817 each in Abohar and Fazilka tahsils, while the variation in urban child sex ratio is to the extent of 824 in Fazilka and 795 in Jalalabad tahsil.

Literacy:

Any person who is able to read and write with understanding in any language is recorded as literate. As in 1991 all the children below 7 years of age have been treated as illiterates.

69.7 per cent of the state's population is literate which is higher than that of the country as such 64.8 per cent. Among the States /Union Territories, Punjab, ranks 16th in terms of literacy.

In Firozpur district 60.7 per cent of the population is recorded as literate, which is significantly lower than the state as such. It ranks at 14th among the districts in the State. Among the tahsils in the district, Firozpur (63.4%) ranks at the top while Jalalabad (57.8%) is placed at the bottom.

Between the two sexes, the gap in the literacy rate among males and females in the district is more significant as compared to that of the State. In Firozpur district 68.7 per cent among males and 51.7 per cent among females are literate, while the corresponding figures for the State are 75.2 and 63.4 per cent respectively.

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district 55.0 per cent of the rural population is literate while in urban areas 76.5 per cent of the population is literate. The urban literacy is higher than the rural in all the tahsils. The gap in rural – urban literacy rate is the maximum in Firozpur (urban 79.9 per cent and rural 54.7 per cent) and the minimum in Zira (urban 71.1 per cent and rural 54.9 per cent).

Work Participation Rate:

Definition of Work and Classification of Workers:

Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the Census of India 2001, which includes production of milk even for domestic consumption. In the 1991 Census cultivation of certain crops even for one's self-consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as tomatoes, all types of flowers, fruits and tuber potatoes, chilies and turmerics, viper, cardamoms, vegetables etc, in other words plantation of tea, coffee, rubber, coconut and betel nuts have been classified under plantation and not included in cultivation.

The reference period for recording the economic activity of any person is preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last year are recorded as main workers while those who had worked for less then six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, Household Industries and other workers.

Punjab, with a work participation rate of 37.5 per cent, ranks 24th among the States/Union Territories in the Country and thus, the work participation rate in the State is lower than that of India (39.1%). Among the districts in the State, the proportion of workers varies between 44.9 per cent in Nawanshahr district and 33.3 per cent in Gurdaspur district. In all, 10 out of 17 districts in the state have shown work participation above the state average and among them five districts have reported two-fifths of their population as worker. Besides Nawanshahr, they include Bathinda (42.3%), Mansa (40.9%), Sangrur (40.7%) and Moga (40.1%).

Main Workers and Marginal Workers:

85.8 per cent of Punjab's total workers have been recorded as Main Workers and 14.2 per cent as Marginal Workers. The corresponding figures for 1991 Census were 97.4 per cent and 2.6 per cent respectively. In Firozpur district the per cent of main workers and marginal workers is 82.6 and 17.4 per cent to the total worker respectively. Significantly the work participation rate (main + marginal) in Firozpur district (37.1%) is lower than the state average (37.5%).

Among the tahsils in the district, it varies between 39.1 per cent in Abohar and 35.6 cent in Zira and that of marginal worker; it varies between 9.0 per cent in Jalalabad and 4.7 per cent in Firozpur. In the district 53.3 per cent among males and 18.9 per cent among females are reported as workers showing a significant reduction in the gap between the two.

The proportion of main workers is the highest in Abohar (32.2%) and the lowest in Jalalabad tahsil (29.3%). However, the proportion of marginal workers is significantly the highest in Jalalabad tahsil (9.0%), and the lowest in Firozpur (4.7%). Further, the incidence of marginal workers is observed to be more among females compared with males. The proportion of marginal workers in the district among females (9.1%) is more than twice of males (4.1%). By and large, a similar pattern is observed among all the tahsils in the district.

Religion:

It has been customary for the Indian Census to provide information on religious persuasions of its people. Religion is one of the basic cultural characteristics of population and several religions have thrived in the secular state of India. Apparently, information on

various religious communities in the country has been of great interest and useful to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. Question 7 of the household schedule canvassed at the 2001 Census pertained to religion. The instructions to enumerators were to record faithfully the religion of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes in 2001:-

Religion		Code
Hindu	-	1
Muslim	-	2
Christian	-	3
Sikh	-	4
Buddhist	-	5
Jains	-	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

In Firozpur district there are 51.4 per cent Sikhs, 47.0 per cent Hindus, 1.3 per cent Christians, 0.2 per cent Muslims, Jains 0.1 per cent and Buddhists is negligible.

The instructions for recording this information are by and large the same as in 1991. A brief analysis based on 2001 Census data is given in annexure V.

Mother Tongue and Language :

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. It may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Question 11 of the Household Schedule was aimed to collect information on 'Other Languages known' (up to two languages in order of proficiency) other than Mother Tongue.

In order to provide a broad scenario a brief note along with table based on 1991-2001 Census data is given in Annexure VIII.

Scheduled Castes and Scheduled Tribes:

Out of the total population of 24,358,999 in the state 7,028,723 belong to Scheduled Castes as per 2001 Census. As such 28.9 per cent of the state's population and 22.8 per cent population in the district belong to Scheduled Castes. Among the district, two- fifth (40.5%) of the total population in Nawanshahr belongs to Scheduled Castes and it is the highest among the districts in the state. Firozpur district with a proportion of 22.8 per cent is placed at bottom. Besides Firozpur, Amritsar (28.8%), Sangrur (27.6%), Ludhiana (25.0%), Gurdaspur (24.7%), Rupnagar (23.9%) and Patiala (23.1%) are the districts which have proportion of Scheduled Castes population lower than that of the state average, while the remaining ten districts exhibit this percentage higher than that of state.

Out of 1,746,107 persons enumerated in the district 398,409(22.8%) belong to Scheduled Castes. Among the tahsils it is the highest in Firozpur (25.2%) and lowest in Jalalabad tahsil (16.7 %).

In consonance with the general trends in the state, Scheduled Castes are more rural by residence. In the district 23.8 per cent population in rural area belongs to Scheduled Castes while the corresponding percentage in urban areas is 19.9 per cent. In Firozpur tahsil Scheduled Castes comprise more than one-fourth (28.8%) of rural population and this percentage is the highest among all the tahsils in the district. On the other hand it is the lowest in Jalalabad (16.4%).

During 1991-2001 Scheduled Castes population in the state has increased by 22.4 per cent which is lower than the Firozpur district (30.2%). In the district 40.1 per cent of the Scheduled Castes population is literate which is significantly lower than that of the state 56.2 per cent. 37.6 per cent in rural areas and 48.7 per cent in urban areas in Firozpur district are literate.

There is no Scheduled Tribe population in the State.

(viii) Brief Analysis Based on Primary Census Abstract

TABLE 1: DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001

District Total:		**1448,90**	**1084,088**	**364,815**	**1746,107**	**1295,382**	**450,725**	**20.5**	**19.5**	**23.5**	**25.2**	**25.8**

Table 1 shows tahsil wise population for total, rural and urban areas of the district. During 1991-2001, Firozpur district recorded a growth rate of 20.5 per cent as against 20.1 per cent for the State. Among tahsils the Firozpur is the most populous and Zira is the least populous. The highest growth rate during this decade is recorded in Jalalabad tahsil (26.5%) which is higher than that of district growth rate. In other four tahsils it varies between 18.6 per cent in Abohar and 19.7 per cent in Firozpur. For the rural areas the maximum growth of population has been observed in tahsil Jalalabad (24.2%) while the least has been found in tahsil Zira (9.8%). During 1991-2001, the urban growth rate was witnessed 23.5 per cent in the district and varies between 85.3 per cent in Zira tahsil and 16.0 per cent in Abohar. Percentage of urban population has increased in the district by 0.6 percentage points, during 1991-2001.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Table 2 reveals CD block wise number of villages and population along with their percentages by size class. Out of 1004 villages, 968 are inhabited and 36 uninhabited villages. A village on an average has a population of 1338 in the district, the corresponding size of an inhabited village in the state, as a whole is 1,311.Evidently inhabited villages in Firozpur district are slightly larger in population size as compared to the state. The inhabited villages which number 968 are distributed over 10 CD blocks in the district, A CD block in the district on an average has 97 inhabited villages and population of 129,538, whereas corresponding figures for the state as such are 89 and 116,641 respectively.

Among the inhabited villages, 91 (9.4%) have population of less than 200, Another 172 (17.8%) villages too, have small population size in the range of 200-499. As many as 258 (26.7%) villages constitute the size class of 500-999. One-fourth (245) of the inhabited villages form the range of 1,000-1,999 and they make 25.3 per cent of the total inhabited villages in the district and another 183(18.9%) have population size in the range of 2,000-4,999.Large villages with population 5,000-9,999 are the characteristics of 16 (1.7%) villages and the remaining 3 (0.3%) villages are exceptionally large having a population of 10,000 or more.

In other words 263 (27.2%) villages in the district are small sized with a population of less than 500 and they contain 5.3 per cent of the rural population of the district, 503 (51.9%) are in the range of 500-1999 and account for 41.2 per cent of the district's rural population, 183 (18.9%) are in the range of 2,000-4,999 and they contain two- fifth (42.0%) of the rural population of the district, and 19(2.0%) are large sized with a population of 5,000 or more and they accommodate 11.5 per cent of the rural population of the district.

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001

Serial number	Name of town	Urban status of town
1	2	3
(a) New Towns		
(i) Statuary town	(i)Makhu	NP
(ii) Census town	Nil	
(b) Denotified		
(i) Statutory town of 1991 Census denotified which did not satisfy the criteria to be treated as towns	Nil	
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	Nil	
(iii) Census towns of 1991 census are notified as statutory town in 2001 census	Nil	
(C) Declassified	Nil	
(d) Wholly merged with other town (s)	Nil	

This table exhibits new towns added, denotified, declassified and merged towns in the district for the 2001 Census.

There are 9 towns in the Firozpur district and all of them have statutory status. Only one town Makhu is newly created town added to the district at the 2001 Census.

Further, in the district none of towns of 1991 Census has either been denotified or merged at the 2001 Census

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	6	0.6	100	0.0
11-20	6	0.6	163	0.0
21-50	16	1.7	1,368	0.1
51-100	45	4.6	17,113	1.3
101-200	252	26.0	275,808	21.3
201-300	360	37.2	538,371	41.6
301-500	203	21.0	322,794	24.9
501 +	80	8.3	139,665	10.8
Not known	0	0.0	0	0.0
District Total:	**968**	**100.0**	**1,295,382**	**100.0**
Population Density (Rural) of the district:		**249**		

This table shows distribution of villages according to density of population. The district on an average has a rural density of 249 persons per Sq. km. The villages however display a significant variation among themselves. As many as 73 (7.5%) villages have a low density of 100 or below persons per sq. km. and they contain barely 1.4 per cent of district's rural population. Another 252 villages which constitute 26.0 per cent of the total villages and 21.3

per cent rural population of the district, have a relatively low density population in the range of 101-200. The average density in the range of 201-300 is the characteristics of 360 (37.2 %) villages and they accommodate 41.6 per cent rural population of the district.

203(21.0%) villages fall in the density range of 301-500. and these villages accommodate 24.9 per cent rural population of the district. Further more, 80 (8.3%) villages exhibit a very high density of more than 500 and these villages account for 10.8 per cent rural population of the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	832	837	798	826	857	663
1911	780	785	740	778	809	649
1921	799	808	735	802	825	686
1931	815	832	721	814	854	666
1941	836	855	750	810	856	654
1951	844	854	807	835	862	754
1961	854	865	817	840	862	871
1971	865	868	856	876	878	871
1981	879	884	865	884	885	878
1991	882	888	868	895	898	887
2001	876	890	849	885	894	860

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 Shows the sex ratio of the state and district from 1901 to 2001.

Sex Ratio reflects the socio-economic and demographic characteristics of population. It unfolds the status of women in the society and the care for the girl child in particular. Unfortunately, in consonance with the overall patterns of the State, The sex ratio declined from 832 to 780 in 1911 in the state. Ever since 1911, the sex ratio showed a gradual improvement uninterruptedly, till 1991 when it reached 882. During 1991-2001, the sex ratio has again declined by 6 points, from 882 to 876.

Firozpur district had a sex ratio of 778 in 1911 and gradually improved to 835 in 1951, which further improved to 840 in 1961, 876 in 1971, 884 in 1981 and 895 in 1991. During these 40 years, the sex ratio in the district had improved by 60 points. However like wise the overall state patterns, the sex ratio in the district had declined by 10 points from 895 to 885 in 2001. This decline is more noticeable in urban areas in comparison to the rural. In the state, the urban sex ratio has declined from 868 in 1991 to 849 in 2001, while the corresponding decline in the urban sex ratio of the district is from 887 to 860. The rural sex ratio has marginally increased in the state by two points from 888 to 890 in 2001, while it showed a decreased of 4 points from 898 to 894 in rural areas of the district during this decade.

TABLE 6: SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Zira	900	897	915
2	Firozpur	868	899	810
3	Jalalabad	917	924	885
4	Fazilka	896	892	915
5	Abohar	864	860	871
	District Total:	**885**	**894**	**860**

Table 6 gives the sex ratio by tahsils. The sex ratio of the district is revealed as 885 which is higher than that of the state (876). It is 894 for rural and 860 for urban areas.

Among the tahsils it varies between 917 as maximum in Jalalabad and 864 as minimum in Abohar. The sex ratio of 3 tahsils exceeds district average. Similarly sex ratio for rural area falls in between 924 in Jalalabad and 860 in Abohar.

It is pertinent to mention here that with the exception of Firozpur and Abohar tahsils all other tahsils and the district itself exceed the State urban sex ratio (849). Contrary to the general trends, the urban sex ratio is better than that of their rural counterpart in Zira, Fazilka, and Abohar tahsils.

TABLE 7: SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Makhu (P)	900
2	Zira (P)	895
3	Ghall Khurd	883
4	Firozpur	907
5	Mamdot	915
6	Guru Har Sahai	922
7	Jalalabad	923
8	Fazilka	889
9	Khuian Sarwar	888
10	Abohar	852
	District (Rural) Total:	**894**

Table 7 shows the sex ratio by CD blocks in the district. Rural sex ratio (894) in the district is slightly higher than the State sex ratio of 890. Among the C.D. blocks rural sex ratio varies between Jalalabad with 923 as the maximum and Abohar with 852 as the minimum. In 6 C.D. blocks rural sex ratio is higher than that of rural area of the district. Besides, Jalalabad they include, Guru Har Sahai 922, Mamdot 915, Firozpur 907, Makhu 900 and Zira 895. Amazingly five CD blocks topples 900 marks.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	18	1.9	26,873	2.1
700-749	9	0.9	14,897	1.2
750-799	32	3.3	21,573	1.7
800-849	98	10.1	88,188	6.8
850-899	288	29.8	458,215	35.4
900-949	302	31.2	485,770	37.5
950-999	128	13.2	149,041	11.5
1000-1099	78	8.1	49,512	3.8
1100+	15	1.5	1,313	0.1
District Total:	**968**	**100.0**	**1,295,382**	**100.0**
Sex ratio (Rural) for District:		**894**		

Sex ratio of rural population by ranges is portrayed in Table 8. The district as such is marked with a relatively low sex ratio (894). This is rather low (less than 800) in 59 villages and these villages comprise 6.1 per cent of the total villages in the district and contain 5.0 per cent of the district rural population. 98 villages (10.1%) in the district are marked with a rural sex ratio of 800-849 and they contain (6.8%) of the district's rural population. 288 villages however, fall in the range of 850-899 which make (29.8%) of the total villages and cover 35.4 per cent of the rural population. As many as 302 villages are marked with a high sex ratio of

900-949 and they constitute 31.2 per cent of the villages and account for 37.5 per cent of the district rural population.

Male-female sex ratio is quite close to parity in the range of 950-999 in 128 (13.2%) villages having 11.5 per cent of the rural population of the district. 93 villages in district are female biased i.e. having more females than males. This is a welcome sign for the district, as well as the state, which is marked for excessively high sex ratio.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

	Sex ratio (Urban) for the district:		**860**

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Sex ratio of urban agglomerations/towns is exhibited in Table 9. The district has an urban sex ratio of 860, which is higher than the urban sex ratio of the State (849).

Among the towns/UAs, the sex ratio varies between 673 in Firozpur Cantt. and 915 each in Fazilka, Zira and Makhu. In all as many as eight towns, sex ratio is higher than that of the district and only Firozpur Cantt has the sex ratio less than the district.

		Urban	**58,131**	**32,060**	**26,071**	**813**

Table 10 presents sex ratio in child population of 0-6 age group tahsil wise. The sex ratio for the district has been observed as 822 as against 798 for the State as such.

Child sex ratio within the tahsils is the maximum in Jalalabad (838) and the minimum in Abohar (815). Besides Jalalabad, child sex ratio in Zira tahsil 825 is also higher than that of the district average.while in two tahsils viz Firozpur 819 and Fazilka 818 it is lower than that of the district average.

Likewise, the disparity in the rural and urban child sex ratio is also evident among tahsils. Rural child sex ratio varies between 844 in Jalalabad and 817 each in Fazilka and Abohar, while the corresponding variation in urban child sex ratio is between 824 in Fazilka and 795 in Jalalabad tahsil.

TABLE 11: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

Table 11 shows CD Block wise sex ratio of population in the age-group 0-6 termed as the child sex ratio.

The gap in the child sex ratio in rural areas (825) and the over all rural sex ratio (894) in the district is alarming; showing a gap of 69 points between the two. More so, seven C D blocks viz Khuian Sarwar 824, Fazilka and Makhu (823 each), Guru Har Sahai 821, Firozpur 820, Abohar 809 and Ghall Khurd 803 are marked with child ratio even lower than the district average. Besides, Jalalabad CD block, Mamdot 848 and Zira 829 have shown higher child sex ratio than that of the district average.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5

District (Rural) Total	**968**	**100.0**	**199623**	**100.0**
Sex ratio (Rural) for District:		**825**		

Table 12 shows the sex ratio of 0-6 population in the district (Rural) in different ranges.

It is observed that the maximum number of villages i e 216 (22.3%) containing 11.4 per cent population have less than 700 sex ratio. While 95 (9.8%) villages having 10.3 per cent population fall in the range of 700-749. The range of 750-799 population covers 123 (12.7%) villages and 17.2 per cent population. Almost similar number of villages i.e. 137(14.2%) containing 21.2 per cent population are covered in the range of 800-849. A number of 111 villages (11.5%) containing 16.4 per cent population fall in the sex ratio range of 850-899.

In the range of 900-949 the sex ratio is observed in 82(8.5%) villages with 9.4 per cent population while the sex ratio range 950-999 covers 41 (4.2%) villages and 4.7 per cent population. The maximum sex ratio of 1000-1099 and 1100 and above has been observed in 77 (8.0%) and 86 (8.9%) villages having 6.0 per cent and 3.3 per cent population respectively which may be called female biased villages.

+ Towns arranged in alphabetical order.
* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 13 shows sex ratio of child population in the age group 0-6 in urban areas of the district (813) which is significantly lower than that of the overall urban sex ratio (860) in the district.

Among the towns/UA, child sex ratio is the highest in Guru Har Sahai (853) and the lowest in Jalalabad UA (770). As many as 5 towns show urban sex ratio lower than that of the district average. In four towns it exceeds that of the district average. Besides, Guru Har Sahai (853), Makhu (848), Firozpur Cantt. (846) and Fazilka (824).

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

		Urban	**450,725**	**89,744**	-	**19.9**	-

Table 14 given above shows the number and percentage of Scheduled Castes and Scheduled Tribes population in Tahsils, 2001.

The percentage of Scheduled Castes in the district has been observed as 22.8 per cent as compared to the State with 28.9 per cent. Among the tahsils it is observed that the highest percentage of Scheduled castes is in Firozpur with 25.2 per cent while the minimum has been observed in Jalalabad with 16.7 per cent.

In consonance with the general trends in the state, scheduled castes are more rural by residence. In the district 23.8 per cent of rural population belongs to scheduled castes while the corresponding percentage in urban areas is 19.9 per cent. There is no Scheduled Tribe population in the State.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

	District (Rural) Total:	**1,295,382**	**308,665**	-	**23.8**	-

Table 15 gives the number and percentage of Scheduled castes and Scheduled tribes population in CD block level.

The C D blocks among themselves exhibit disparity in the proportion of Scheduled castes population. It is observed that the highest proportion is in Ghall Khurd (33.4%) closely followed by Zira (31.7%), Firozpur (30.3%) and Abohar (27.9 %). while the lowest in Guru Har Sahai with 14.4 per cent.

It is also observed that in 4 C D blocks the proportion of Scheduled castes population is above the district average (23.8·%), while in rest of the CD blocks this proportion is lower than that of the district average.

There is no Scheduled Tribes population as such in the State.

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 18 gives the number and percentage of scheduled castes and scheduled tribes in urban Agglomeration/Towns, 2001.

Scheduled castes population is comprised almost one fifth (19.9%) urban population of the district. Towns among themselves show wide disparity in this regard. While in Zira UA. 26.1 per cent population belongs to Scheduled Castes which is the maximum; Firozpur cantt.. has the lowest scheduled castes population with 14.0 per cent.

There is no Scheduled Tribe population in the State.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Table 19 exhibits Sex ratio in Scheduled Castes population among CD blocks in the district. Among the CD blocks in the Firozpur districts sex ratio in Scheduled Castes population varies between 923 in Jalalabad and 852 in Abohar CD Block, Besides, Jalalabad, Guru Har Sahai (912), Firozpur (910), Mamdot (906) and Ghall Khurd (895) show higher Sex ratio than that of the district average (891). In 4 CD blocks including Abohar (852), Makhu and Zira each (888) and Khuian Sarwar (887) the sex ratio among scheduled castes population is lower than that of the district average (891), Fazilka CD block is having at par sex ratio (891) with district average among scheduled castes population.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 20 presents the sex ratio among scheduled castes and scheduled tribes in urban Agglomerations / Towns.

Scheduled castes population in urban areas of the district has a sex ratio of 905 which is better than that of the overall urban sex ratio (860) for the district. The situation is also quite encouraging in towns of Firozpur Cantt (935), Makhu and Guru Har Sahai (921 each), Fazilka (913), Talwandi Bhai (916) and Firozpur M.Cl (907), where urban sex ratio in scheduled caste population is higher than that of the district average and in the remaining 3 towns it is below the district average.

Table 21 gives the number and percentage of literates and illiterates by tahsils.

As per the table it is revealed that 60.7 per cent population of the district is literate as compared to the literacy rate of the State 69.7 per cent as such. In other words every sixth person out of 10 persons is literate in the district.

Among the tahsils, Firozpur tahsil has highest literacy rate (63.4%) and the lowest in Jalalabad with 57.8 per cent.

Male-Female literacy rate in the district varies between 68.7 per cent for males and 51.7 per cent for females exhibiting a gap of 17.0 percentage points. Among the tahsils, this gap is widest in Abohar (20.0 percentage points) and the narrowest in Zira with 12.0 percentage points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

10	Abohar	87,192	56,104	31,088	100,674	45,338	55,336	54.4	65.0	41.9	23 1
District (Rural) Total:		**603,054**	**367,021**	**236,033**	**692,328**	**316,849**	**375,479**	**55.0**	**63.9**	**45.3**	**18.6**

The literacy rate in rural area of the district is marked a relatively low as can be seen from table 22. A little over one-half (55.0%) of the ruralities in the district are literate compared with 76.5 per cent in urban areas. Among the CD blocks, the rural literacy rate varies between 60.0 per cent in Ghall Khurd and 50.0 per cent in Firozpur. Besides Ghall Khurd, Khuian Sarwar (57.5%) and Zira (56.8%) are the other C.D. blocks which portray literacy levels better than the district.

Among male-female there is a 18.6 percentage points gap in literacy rate in the district whereas in CD blocks, this gap is maximum in Abohar (23.1 percentage point) and the minimum in Zira (11.5 percentage point).

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.2	4	0.0
1-10	1	0.1	256	0.0
11-20	8	0.8	1,625	0.1
21-30	22	2.3	15,622	1.2
31-40	57	5.9	54,369	4.2
41-50	236	24.4	302,446	23.3

71-80	43	4.4	50,964	3.9
81-90	4	0 4	2,754	0.2
91-99	1	0 1	15	0.0
100	0	0.0	0	0.0
District Total:	**968**	**100.0**	**1,295,382**	**100.0**
Literacy rate for District:		**60.7**		

Table 23 shows distribution of villages by ranges of literacy rate. Very low literacy (30% or below) is reported in 33 villages having a very small population (1.3%). It is equally low in 57 (5.9%) villages in the range of 31-40 per cent and contains 4.2 per cent of the district's rural

population. Almost one-forth 236 (24.4%) villages are in the literacy range of 41-50 per cent and contain 23.3 per ce3nt rural population of the district.

The maximum number of villages (389) which comprise 40.2 per cent of the total villages and 46.2 per cent rural population of the district are placed in the literacy range of 51-60 per cent. Further more, 205(21.2%) villages containing 20.8 per cent of the district rural population fall in the range 61-70 per cent.

A Sizable number of villages 48 show the very high literacy rate of 71-99 per cent. These villages make 4.9 per cent of the total villages and 4.1 per cent rural population of the district. Further more, 5 villages out of 48 villages display very high literacy rate of 81-99 per cent.

+ Towns arranged in alphabetical order.
* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 24 gives the number and percentage of literates and illiterates by sex in Urban Agglomerations/ Towns.

It reveals that 76.5 per cent urban population in the district is literate. The male literacy rate is 81.9 per cent and female literacy 70.2 per cent.

Among the towns the literacy rate varies between 85.5 per cent in Firozpur Cantt. (CB) and 69.9 per cent in Makhu (NP) The male-female literacy rate in Urban areas shows a sizeable gap of 11.7 percentage points. This gap is the widest in Abohar with 14.3 percentage points while the narrowest 7.9 percentage points in Firozpur.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Table 25 shows the number and percentage of scheduled castes literates and illiterates by sex in CD blocks.

It reveals that scheduled castes population in the rural area of the district has a 37.6 per cent literacy rate as against an over all rural literacy rate of 55.0 per cent in the district. The maximum literacy rate of 44.7 per cent has been observed in Jalalabad C D block while the lowest in Zira 33.1 per cent.

The variation in literacy rate among female in different C D blocks varies between 33.7 per cent in Jalalabad and 23.7 per cent in Abohar. The male and female scheduled castes literacy rate shows a gap of 17.7 percentage points in the rural area of the district. The gap is to the extent of 21.4 percentage points in Jalalabad CD block and 12.4 per cent in Zira C D block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

100	1	0.1	5	0.0
District Total:	**832**	**100.0**	**308,665**	**100.0**
Literacy rate for District (Rural):		**37.6**		

Table 26 shows the distribution of villages by literacy rate range for scheduled castes population, 2001.

88 villages which make 10.6 per cent of the total villages and share 3.6 per cent of districts scheduled castes population fall in the range of 20 per cent or less. Another 187 villages which constitute 22.5 per cent of the total villages and 25.1 per cent of the districts scheduled castes population have a range of literacy rate 21-30 per cent. All these villages are experiencing very low level of literacy in scheduled castes population. Scheduled castes literacy rate is relatively better, in the range of 31-40 per cent, in 234 (28.1%) villages containing 34.3 per cent of scheduled castes population of the district.

Almost one - fifth of villages (173) having 20.8 per cent of total villages and 24.2 per cent of population exhibit a medium literacy rate in the range of 41-50 per cent. It is more than one half in the range of 51-60 per cent in 86 (10.3%) villages, containing 11.1 per cent of Scheduled Castes population. It is quite high, in the range of 61-70 per cent in 50 (6.0%) villages, containing 1.5 per cent of Scheduled Castes population.

In 14(1.7%) villages, very high literacy rate was noticed i.e. more than 71 per cent among scheduled castes population in the district. However, the share of scheduled castes population is negligible in these villages.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town+*	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

The table 27 shows the number and percentage of scheduled castes literates and illiterates by sex in Towns, 2001.

The above table reveals that 48.7 per cent scheduled castes population is literate in urban area of the district. Among the towns it is the highest in Firozpur Cantt. (60.9%) while the lowest in Guru Har Sahai 33.2 per cent.

57.1 per cent of scheduled castes males and 39.4 per cent of females in urban areas are literate reflecting a gap of 17.7 percentage points. Male-female disparity in this regard is quite conspicuous. Among towns scheduled castes male literacy rate varies between 70.3 per cent in Firozpur Cantt and 39.4 per cent in Guru Har Sahai, while the corresponding percentage among females is 50.8 per cent in Firozpur Cantt and 26.3 per cent in Guru Har Sahai. Furthermore, male-female differential is observed highest in Abohar with 21.9 percentage points while the lowest in Guru Har Sahai with 13.1 percentage points.

Table 31 shows that the work participation rate in Firozpur district is reported as (37.1%) against the state average of (37.5 %) Among tahsils it varies between (39.1%) in Abohar and (35.6%) in Zira. In the district 53.3 per cent males and 18.9 per cent females have been reported as workers showing a significant gap between the two sexes.

Out of the total population (30.7%) are main workers and (6.5%) marginal workers. The proportion of main workers is the highest in Abohar with (32.2%) while the lowest in Jalalabad (29.3%). However, the proportion of marginal workers is the highest in Jalalabad (9.0%) and the lowest in Firozpur tahsil (4.7%).

Out of the total population of the district the non workers are 62.9 per cent. Among male and female the proportion of non workers is observed more in females (81.1%) as compared to male (46.7%). The same trend is also noticed among the tahsils in the district.

Table 32 gives the number and percentage of main workers, marginal workers and non-workers by sex in CD block level. It is observed that 38.9 per cent of the rural population in the district is working, out of which 30.9 per cent as main workers and 8.0 per cent marginal workers. This percentage is lower than that of the state where 39.5 per cent of the rural population is reported as workers out of which 32.6 per cent are main workers and 6.9 per cent are marginal workers. Among the CD blocks the work participation rate varies between 42.5 per cent in Abohar and 34.1 per cent in Makhu. Besides Abohar, Khuian Sarwar (40.7%) and Guru Har Sahai (40.2%) are the other CD blocks where more than 40.0 per cent of its population is recorded as workers.

The percentage of main workers is the highest in Abohar C.D. block (34.4%) and the lowest in Jalalabad (28.7%). However, the proportion of marginal workers is the maximum in Khuian Sarwar CD block (10.4%) and the minimum in Makhu (4.0%).

In rural areas (22.3%) of the females are reported as workers out of which (10.7%) are main workers and (11.7%) marginal workers. Female work participation rate among the CD blocks varies between 27.1 per cent in Guru Har Sahai and 12.9 per cent in Makhu. Besides, Guru Har

Sahai, Khuian Sarwar (26.3%), Abohar (26.1%) and Jalalabad (24.0%) are the other CD blocks where female work participation rate is higher than the district average (22.3%).

+ Towns arranged in alphabetical order

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns

Table 33 gives the number and percentage of main workers, marginal workers and non-workers by sex in urban Agglomeration/Town. The work participation rate in urban areas is 32.2 per cent of the district which is by and large identical with that of the State (33.5 %). Among the towns in the district, the work participation rate is the highest in Firozpur Cantt. (40.1%) and the lowest in Guru Har Sahai (30.1%).Out of 9 towns, 2 towns fall above and 7 below the district average. The participation in marginal work is comparatively much less. In the district 2 per cent of the urban population is reported as marginal workers as against 30.2 per cent main workers.

The percentage of population reported as marginal workers shows a variation of 2.6 per cent each in Fazilka and Abohar and (1.1%) in Guru Har Sahai. The corresponding proportion of main workers varies between 38.5 per cent in Firozpur Cantt. and 27.7 per cent in Fazilka.

The urban female work participation rate in the district is 9.0 per cent as compared with 52.1 per cent among males. Among the towns this rate is the highest in Talwandi Bhai (12.0%) and the lowest in Firozpur Cantt. (6.4%). In all, female work participation rate is more than the urban female participation rate of the district in four towns and is less in other remaining five towns.

Note: per cent of Worker to total worker are given in brackets

Table 34 shows distribution of workers by sex in four categories of economic activity by tahsils with in the district.

Among the rural workers in the district 30.6 per cent are cultivators, 25.7 per cent agricultural labourers 2.6 per cent household industry workers and 41.1 per cent as other workers. This signifies that 56.3 per cent of the total workers in the district are engaged in agricultural sector, while 43.7 per cent in non-agricultural sector of economy.

Among the tahsils, the percentage of cultivators is the highest in Zira (40.0%) and the lowest in Abohar (26.4%). Likewise, the proportion of workers reported as agricultural labourers varies between 33.2 per cent in Fazilka tahsil and 19.7 per cent in Firozpur tahsil.

The proportion of workers engaged in household industry is the highest in Zira with 3.0 per cent and the lowest in Jalalabad with 2.2 per cent. In case of other workers the percentage is the highest in Firozpur (50.4%) and the lowest in Fazilka (33.2%).

. Note: per cent of Worker to total worker are given in brackets

Table 35 presents distribution of workers by sex in four categories of economic activity in C.D. blocks. Among rural workers in the district, 38.8 per cent are cultivators, 31.8 per cent agricultural labourers, 2.4 per cent household industry workers and 27.0 per cent other workers. This shows that 70.6 per cent of rural workers are engaged in agricultural and 29.4 per cent in non-agricultural sector.

Among CD Blocks, the proportion of rural workers recorded as cultivators is the highest in Makhu (52.9%) and the lowest in Abohar (33.7%). Likewise, the proportion of Agricultural labourers shows a variation of 38.9 per cent in Khuian Sarwar and 24.1 per cent in Makhu CD block. Further it is observed that in Makhu CD block three-fourths (77.0%) of the workers are engaged in agricultural sector, while the corresponding percentage is only 61.0 per cent in Ghal- Khurd CD block.

The proportion of rural workers engaged in household industry also exhibits significant variation at CD block level; it is the highest in Zira (3.5%), closely followed by Ghall Khurd (3.3%), and Mamdot (3.2%). By contrast, it is the lowest in Abohar (1.6%). In all, five CD blocks fall above and five below the district average (2.4%).

Other workers constitute more than one-third of the rural workers in Ghall Khurd (35.7%) On the other hand in Makhu one out of five workers (20.2%) is reported as other worker.

Table 35 further reveals that participation of females workers is greater in agricultural sector in comparison to the non-agricultural sector. Among the rural female workers in the district, 63.7 per cent (C-26% and AL-37.7%) are agricultural workers and 36.3 (HHI-4.5% and OW-31.8%) are non-agricultural workers.

Note: Percentage of Workers to total workers is given in brackets

+ Towns arranged in alphabetical order

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns

The proportion of urban workers recorded as cultivator is the highest in Talwandi Bhai 7.0 per cent and the lowest 0.4 per cent in Firozpur Cantt. Like wise the proportion of Agricultural Labourers varies between the 8.3 per cent in Zira and 1.0 per cent each in Jalalabad town and Firozpur Cantt. The proportion of workers in Household Industry is the highest (4.7%) in Abohar M.C. and the lowest (0.8%) in Firozpur Cantt. and in case of other workers the proportion of workers is the highest (97.8%) in Firozpur Cantt. and the lowest

83.7 per cent in Makhu NP. Sex wise distribution of categories of workers reveals that (2.4%) are male cultivators and (1.7%) female cultivators.

Similarly Male Agricultural labourers are (4.5%) and Female (4.9%). In the household industry males constitute 2.3 per cent and females (8.2%). The proportion of other workers among males is (90.8%) and female 85.2 per cent. It shows that in urban areas the proportion of workers engaged in other works is higher than Cultivator, Agriculture labourer and Household Industry.

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Education:

Educational amenity is available to 89.9 per cent of villages in the district. There are only 98 villages out of 968 where this facility is not available within the village, but the same can be availed at some distance..

Among the CD blocks, all the villages in Khuian Sarwar and Abohar CD blocks have educational facility available to them with in the village. In the remaining CD blocks the Percentage of villages having availability of educational facility varies between 76.3 per cent in Makhu and 96.0 per cent in Jalalabad.

Medical :

78.1 per cent of the villages in the district are equipped with some kind of medical facility. This percentage is as high as 96.6 per cent in Abohar CD Block and lowest (54.0%) in Mamdot.

Improved Drinking Water:

The availability of improved drinking water refers to availability of drinking water through tap, hand pump and tube well. It is available to 952 (98.3%) villages in the district out of 968 villages. The proportion of villages with improved drinking water facility ranges between cent per cent in Zira and 97.3 per cent in Guru Har Sahai.

Post Office:

Only 25.5 per cent of the villages have availability of post office within the village in the district and the remaining 74.5 per cent villages avail this facility at some distance.

More than 70.0 per cent of the villages of two CD blocks have the availability of Post Office within the village. This percentage is as high as 71.4 per cent in Khuian Sarwar CD block and as low as 11.3 per cent in Mamdot.

Telephone:

Telephone facility is available in 87.6 per cent of the villages in the district. The position is the best in Khuian Sarwar and Abohar CD blocks where cent per cent villages are enjoying this facility.

Transport and Communication:

The villages in the district are fairly well equipped with transport and communication as 86.6 per cent of the villages have this facility. 130 (out of 968) villages are devoid of this facility, and avail it at some distance. The percentage of villages availing this facility is cent per cent in Abohar and lowest 76.3 per cent in Jalalabad. Out of 10 CD blocks, five fall below the district average.

Banks:

Out of 968 villages every Eleventh village (9.0%) has the facility of the bank in the district. Among the CD blocks the percentage of villages having bank facility is the maximum in Abohar (25.9%) while minimum (4.0%) in Mamdot CD block.

Agricultural Credit Societies:

Out of 968 villages 301(31.1%) villages have agricultural credit societies in the district. Among the CD blocks 4 CD blocks viz Abohar (65.5%), Khuian Sarwar (61.2%), Fazilka (37.6%) and Ghall Khurd (33.0%) enjoy this facility above the district average. In the remaining 6 CD blocks varies between 21.0 per cent villages in Mamdot CD block and 30.9 per cent villages in Zira CD block.

Approach by pucca Road:

All the 968 villages of the district are approachable by pucca road.

Power Supply:

All the villages in the district are having power supply.

Table 39 shows the distribution of villages not having certain amenities arranged by distance ranges from the places where these are available, 2001.

Education:

There are 102 villages which are not having amenity of primary school and the same is available at a distance of less than 5 km.

562 villages do not have middle schools; however, among them, this facility is available at a distance of less than 5 kilometers in case of 465 villages, for 83 villages, it is available at a distance of 5-10 km. and for remaining 14 villages, it is available at distance of more than 10 kms.

As many as 966 villages do not have Degree Colleges. However, this facility is available to 95 villages within a distance of less than 5 Kms, in case of 199 villages at a distance of 5-10 kilometers and remaining 672 villages avail this facility by covering a distance of more than 10 kms.

Medical:

962 villages do not have the facility of Hospital within the villages. Among them the same is available to 114 villages within less than 5 Kms, 232 villages avail at a distance of 5-10 kms. while the resident of 616 villages cover a distance of more than 10 kms.

Likewise, out of 932 villages do not have PHC, the same is available for 115 villages at a distance of less than 5 kms. 227 villages, at a distance of 5-10 kms and 590 villages have to avail this facility at a distance of more than 10 kms.

Post Office:

The post office facility is not available to 721 villages and among these, 570 villages avail this facility at a distance of less than 5 kilometers, 134 villages at a distance of 5-10 kilometers. Another 17 villages avail it at a distance of more than 10 kilometers.

Telephone:

The district is well equipped with this facility as barely 120 (out of 968) villages do not have this facility. 119 of them can avail it at a distance of less than 5 kilometers and for one village this facility is available at a distance of 5-10 kilometers.

Bus service:

132 villages do not have the facility of Bus service. Out of these, 121 villages avail this facility by covering a distance of less than 5 kilometers and for one village this facility is available at a distance of 5-10 kilometers.

Bank:

Bank facility seem to be lacking in the district. 471 villages can avail commercial bank service at a distance of less than 5 Kms. 324 villages at a distance of 5-10 Kms and 101 villages at a distance of 10 Kms or more.

Likewise for co-operative banking, 475 villages can avail this facility at a distance of less than 5 Kms. For 343 villages it is available at a distance of 5-10 Kms and for 103 villages it is available at a distance of 10 Kms or more.

Agricultural Credit Societies:

Agriculture credit societies are not available in 667 villages of the district and among them for 554 villages it is available within 5 Kms and for 108 at a distance of 5-10 Kms and the remaining 5 villages can be availed at a distance of 10 Kms or more.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 reveals the distribution of villages by population ranges and amenities available. Of the 968 villages, 263 villages fall in the population range of 1-499, 258 villages fall in the population range of 500-999 and 245 villages in 1000-1999. There are 183 villages falling in the population range of 2000-4999, 16 villages have population range of 5000-9,999 and only 3 villages are having population rang of 10,000 or more.

Educational facility is available to 870(89.9%) villages. Medical facility to 756 (78.1%) villages. Improved drinking water facility to 952(98.3%) villages. Post office facility only to 247(25.5%) villages. Telephone facility to 848(87.6%) villages. Transport & communications and Banking facility to 838(86.6%) and 87(9.0%) villages respectively. Agricultural credit societies are available to 301(31.1%) villages. Cent per cent villages are linked with Pucca road whereas power supply is also available to all the villages.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Makhu (P)	114	31,337	87 1	98.4
2	Zira (P)	97	39,326	90.3	98.5
3	Ghall Khurd	100	51,186	88.7	98.2
4	Firozpur	121	41,815	89.6	92.6
5	Mamdot	124	38,740	72.3	98.6
6	Guru Har Sahai	112	46,288	91.0	97.8
7	Jalalabad	100	47,985	89.4	97 1
8	Fazilka	93	65,123	91.2	98.0
9	Khuian Sarwar	49	69,490	92.1	96.3
10	Abohar	58	89,010	89.3	91.3
	District Total:	**968**	**520,300**	**88.7**	**96.2**

Note - Cultivable area = irrigated area + unirrigated area

Table 42 shows the distribution of CD block wise villages according to land use. The total area of the district is reported 520,300 hectares out of which the 88.7 per cent area is cultivable area. 96.2 per cent irrigated area of the total cultivable area. Abohar C.D. block (89,010 hectares) is the largest in area and nearly three times that of Makhu (P) (31,337 hectares) which is the smallest C.D. block in the area. Among the C.D. blocks the percentage cultivable area varies between 92.1 per cent in Khuian Sarwar and 72.3 per cent in Mamdot.

96.2 per cent of the cultivable area in the district is irrigated. All the C.D. blocks have fairly high proportion of their cultivable area under irrigation. Again Mamdot CD Block reports (98.6%) the highest percentage of irrigated area to total cultivable area, where as Abohar CD Block reports the lowest irrigated area of 91.3 per cent.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administ-ration	Public health and convenien-ces	Public works	Public institutions	Other (s)

11	III Zira (M.Cl.)	409.0	269 8	139.1	398 4	168.0	27.4	5.4	0.0	197.6
District Total		**502.1**	**187.5**	**314.6**	**534.3**	**80.9**	**132.0**	**145.2**	**6.2**	**170.1**

Table 43 shows per capita receipt and expenditure for statutory towns in Firozpur district. The per capita receipt in the district is Rs 502.1 out of which Rs 187.5 comes through taxes and Rs. 314.6 through all other sources. The per capita receipt is as high as Rs 977.3 in Firozpur Cantt. and as low as 220.0 in Makhu NP.

Against the per capita receipt of Rs 502.1, the district is incurring per capita expenditure of Rs 534.3. The per capita expenditure in General Administration is to the extent of Rs. 80.9, on public health and conveniences Rs 132, on public works Rs 145.2, on public institutions it is only Rs 6.2, and Rs. 170.0 for all other types of activities.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Abohar (M.Cl)	3.1	2.5	2.3	1.8	0.2
2	Fazilka (M.Cl)	2.2	1.6	1.6	0.9	0.1
3	Firozpur (M.Cl)	1.6	1.3	1.0	0.8	0.2
4	Firozpur Cantt. (C.B)	4.3	2.9	2.1	1.0	0.3
5	Guru Har Sahai (M.Cl)	7.7	7.0	4.9	4.2	0.0
6	Jalalabad (U.A)	3.0	1.5	0.9	0.6	0.6
7	Jalalabad (M.Cl)	3.0	1.5	0.9	0.6	0.6
8	Makhu (N.P)	4.9	3.3	3.3	0.8	0.0
9	Talwandi Bhai (M.Cl)	2.7	2.1	1.4	0.7	0.0
10	Zira (U.A)	2.5	1.9	1.3	0.6	0.9
11	Zira (M.Cl)	2.5	1.9	1.3	0.6	0.9
	District Total	**2.9**	**2.1**	**1.7**	**1.1**	**0.3**

Table 44 shows number of schools/colleges per 10,000 population for towns. In the district there are 2.9 primary schools, 2.1 junior secondary/middle schools, 1.7 secondary/matriculation schools, 1.1 senior secondary school and 0.3 colleges per 10,000 population. In other words, there is a primary school for a population of 3,448, junior secondary/middle school for every 4,761 persons and secondary/matriculation school for 5,882 persons, senior secondary school for 9,092 population and college for a population of 33,333.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Abohar(M.Cl)	16
2	Fazilka(M.Cl)	11
3	Firozpur(M.Cl)	34
4	Firozpur Cantt.(C.B)	81
5	Guru Har Sahai(M.Cl)	24
6	Jalalabad(U.A)	10
7	Jalalabad(M.Cl)	10
8	Makhu(N.P)	25
9	Talwandi Bhai(M.Cl)	17
10	Zira(U.A)	38
11	Zira(M.Cl)	38
	District Total	28

Table 45 shows number of beds in medical institutions in towns per 10,000 population. The district on an average has 28 beds per 10,000 population. There are 81 beds per 10,000 population in Firozpur Cantt.(C.B) which is the highest amongst the towns in the district. Besides Firozpur Cantt (C.B), Firozpur (34), and Zira (38) beds per 10,000 populations are the other two towns where number of beds are higher than that of the district average.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Abohar	124,339	47,789	38.4
2	Fazilka	67,427	13,404	19.9
3	Firozpur	95,475	29,575	31.0
4	Guru Har Sahai	14,351	4,265	29.7
5	Jalalabad	32,924	6,000	18.2
6	Makhu	12,175	4,366	35.9
7	Talwandi Bhai	14,573	3,500	24.0
8	Zira	31,783	11,830	37.2
	District Total	**393,047**	**120,729**	**30.7**

Table 46 shows proportion of slum population living in statutory towns in the district. In absolute terms 120,729 persons are living in slums which account for 30.7 per cent of the total urban population. In Abohar (38.4%) of the total population is residing in slums and for other towns it is between 37.2 per cent in Zira and 18.2 per cent in Jalalabad.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Abohar (M.Cl)	Leather Vessels	Cotton Bales
		Refined Vegetable Oils	Fruits
		Juice	Refined Vegetable Oils
2	Fazilka (M.Cl)	Cotton Khes	Cotton
		Agricultural Implements	Fuel Wood
		Shoes (Desi Jutti)	Rice
3	Firozpur (M.Cl.)	Rice Shelling Machines/Plants	Wheat
		Card Board	Rice
		Bakery	Vegetables
4	Firozpur Cantt. (C.B.)	Wheat Thresher	Wheat Thresher
		Dhoop	Dhoop
		Agricultural Implements	Agricultural Implements
5	Guru Har Sahai (M.Cl.)	Agricultural Implements	Wheat
		Hydraulic Press(Cutting &Bending)	Rice
		Furniture	Rice Bran Oil
6	Jalalabad (U.A.)	Trolleys Of Tractors	Rice
		Steel Furniture	Refined Oil
		Gate shutters	Rice Husk
7	Jalalabad (M.Cl.)	Trolleys Of Tractors	Rice
		Steel Furniture	Refined Oil
		Gate shutters	Rice Husk
8	Makhu (N.P)	Agricultural Implements	Wheat
		Candles	Agricultural Implements
		Wooden Furniture	Rice
9	Talwandi Bhai (M Cl.)	Agricultural Implements	Rice
		Bakery Products	Wheat
		Shoes (Desi Jutti)	Agricultural Implements
10	Zira (U.A)	Agricultural Implements	Rice
		Rice Shelling Machines	Wheat Flour
		Wheat Flour	Agricultural Implements
11	Zira (M.Cl)	Agricultural Implements	Rice
		Rice Shelling Machines	Wheat Flour
		Wheat Flour	Agricultural Implements

This table shows three most important commodities manufactured and exported out of the towns of the district.

The manufacture of agricultural implements is the important items in five towns of the district. Table is self explanatory and requires no comments. Rice and Wheat are the most important commodities exported from the town in the district.

(x) Brief Analysis Based on Houses and Household Amenities

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households

Data Source: Census of India 2001, H- Series: "Tables on Houses, Household amenities and Assets"

Table 48 shows households by tenure status and number of rooms occupied in the district.

The table reveals that 269,174 households in the district are living in the houses owned by them, 14,730 in rented houses and 10,505 households live in houses with tenure status 'others' i.e. neither owned nor rented. This reflects that, out of 294,409 households, 91.4 per cent are living in owned houses further out of them 70,872 (26.3%) have one room, 85,149 (31.6%) two rooms, 51,995 (19.3%) three rooms, 60,050 (22.3%) more than 3 rooms while 0.4 per cent no exclusive room. This reveals that majority of the households have two rooms (31.6%). If we analyse it rural and urban wise, the position is by and large the same as majority of the households have two rooms accommodation.

Among the scheduled castes, out of 78,811 households, 70,594 (89.6%) households have the houses owned by them and further out of them, majority of the households 30,174 (42.7%) have one room, 24,781 (35.1%) two rooms while only 9,533(13.5%) three rooms houses and 5,753 (8.1%) have more than 3 rooms.

TABLE 49 PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT ,SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sr. No.	District/Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temp-orary	Permanent	Semi-permanent	Temp-orary	Perma-nent	Semi-permanent	Temp-orary
1	2	3	4	5	6	7	8	9	10	11
	Firozpur	202,622	27,840	63,928	136,483	21,782	60,070	66,139	6,058	3,858

1	Zira	28,932	2,893	4,918	22,209	2,461	4,643	6,723	432	275
		(14.3)	(10 4)	(7 7)	(16.3)	(11 3)	(7.7)	(10.2)	(7.1)	(7.1)
2	Firozepur	60,893	8,502	11,939	38,635	5,442	10,805	22,258	3,060	1,134
		(30.1)	(30.5)	(18.7)	(28.3)	(25.0)	(18.0)	(33.7)	(50.5)	(29.4)
3	Jalalabad	32,992	6,379	11,398	25,541	5,930	11,018	7,451	449	380
		(16.3)	(22.9)	(17.8)	(18.7)	(27.2)	(18.3)	(11.3)	(7.4)	(9.8)
4	Fazilka	38,207	5,403	17,091	27,913	4,604	16,535	10,294	799	556
		(18.9)	(19.4)	(26.7)	(20.5)	(21.1)	(27.5)	(15.6)	(13.2)	(14.4)
5	Abohar	41,598	4,663	18,582	22,185	3,345	17,069	19,413	1,318	1,513
		(20.5)	(16.7)	(29.1)	(16.3)	(15.4)	(28.4)	(29.4)	(21.8)	(39.2)

Table 49 shows percentage distribution of households living in permanent, semi-permanent and temporary houses. It is to the tune of 68.8 per cent, 9.5 per cent and 21.7 per cent to total households respectively.

The distribution of permanent houses among the tahsils shows that the highest percentage of permanent houses is in Firozpur (30.1%) while the lowest in Zira (14.3%). The corresponding figures for rural and urban show that the highest percentage is observed in Firozpur (28.3%) in rural area and lowest 16.3 percent each in Zira and Abohar. Surprisingly in the urban areas too, the highest percentage is observed in Firozpur (33.7%) and the lowest in Zira (10.2%).

The distribution of Semi-permanent houses shows that the highest percentage is observed in Firozpur (30.5%) and the lowest in Zira (10.4%). In the rural area it is the highest in Jalalabad (27.2%) and the lowest in Zira (11.3%) and in urban area also the maximum (50.5%) in Firozpur and the minimum in Zira (7.1%).

The percentage distribution of temporary houses is inversely the highest in Abohar (29.1%) and the lowest in Zira (7.7%). In rural area it is the highest in Abohar (28.4%) and the lowest in Zira (7.7%). In urban areas it is the highest in Abohar (39.2%) and the lowest in Zira (7.1%).

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE , ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note : Percentage is given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

Table 50 shows the Percentage of households having improved drinking water source, electricity, bathroom, toilet and drainage facility.

Improved drinking water :

Households having tap, hand pump and tubewell as the source of drinking water are grouped as having improved drinking water facility. In the district, this facility is available to 96.7 per cent households. While screening the corresponding figures for the rural and urban areas, the same trend is visible among all the tahsils.

Electricity :

Electricity as the source of lighting is available to 85.7 per cent of the households in the district; the corresponding figures for rural and urban areas are 82.3 per cent and 95.6 per cent respectively signifying that the rural areas do not lag behind the urban in this regard. The trends are, by and large, the same for all the tahsils.

Bathroom :

Bathroom facility is available to 59.8 per cent households in the district. This facility is available to only 53.3 per cent households in the rural area of the district while in urban areas this percentage is as high as 78.5 per cent.

Toilet :

Little more than one-half of the households (50.4%) have toilet facility available to them. Among the tahsils this percentage varies between 76.6 per cent in Abohar and 31.1 per cent in Jalalabad.

39.2 per cent of the households in rural areas are equipped with toilet facility as compared to 82.6 per cent in urban areas. Here too, Abohar (76.6%) ranks the highest and Jalalabad (31.1%) the lowest in rural and Firozpur (85.1%) ranks the highest and Zira (72.1%) the lowest in urban areas.

Drainage :

Drainage facility is available to 58.8 per cent households in the district. The corresponding figures for the rural and urban areas of the district are 48.6 per cent and 88.1 per cent respectively.

Data Source: Census of India 2001, H– Series: "Tables on Houses, Household amenities and Assets".

Table 51 gives the distribution of households by availability of separate kitchen and type of fuel used for cooking.

Firewood is the most dominant fuel used for cooking in the district as it is being used by 38.4 per cent of the households. This percentage is highest in Fazilka tahsil 48.6 per cent and the lowest 27.5 per cent each in Zira and Firozpur. Cooking gas (LPG) is the second most dominant fuel used for cooking in the district which is being used by 22.9 per cent of the households.

In the district, the users of Firewood and cooking gas (LPG) alone constitute 61.3 per cent of the total households and apart from these two, cow dung cake kerosene and crop residue are the other fuels being used by households.

Cow dung Cake is the third largest fuel being used for cooking. In the district almost every sixth household (17.4%) is using Cow dung Cake; the corresponding percentage for rural and urban areas is 21.9 and 4.4 per cent respectively.

Among the other fuels being used, crop residue (16.2%) and kerosene (4.2%) are worth mentioning. The use of coal, electricity and biogas is minimum.

Data Source: Census of India 2001, H– Series: "Tables on Houses, Household amenities and Assets".

Table 52 shows the number of households availing Banking services and number of households having each of the specified assets. It is revealed from the table that out of 294,409 households in the district 92,580 (31.4%) are availing banking facility. The facility of Radio/Transistor and Television are being availed by 96,577 (32.8%) and 165,245 (56.1%) households respectively. Telephone facility is available to 36,464 (12.4%) households. Bicycle is owned by 190,196 (64.6%) households while Scooter/Motorcycle/Moped 71,555 (24.3%) households. Car/Jeep/van is available to 12,734 (4.3%) households only. There are 49,739 (16.9%) such households which do not have any specified asset

(xi) Places of tourist, religious, historical or archeological importance

Bazidpur:

It is located at a distance of about 7 Kms from Firozpur Cantt. on the Firozpur-Moga road. The place has a historical Gurdwara known as Gurusar constructed in the memory of the visit of Guru Gobind Singh, who rested at this village after the battle of Muktsar. The jand tree with which Guru Sahib tied his horse still exists here.

Mudki: It is located at about 32 kms south east of the Firozpur and is also connected by road with Zira, Faridkot and Bagha Purana. The first Anglo-Sikh War (1845-46) was fought here although the British won this battle; they suffered a loss of 50 officers and 850 other ranks. The Britisher created a pillar in 1870 at Mudki to commemorate their victory.

Firozshah: It is located at about 16 Kms on the Firozpur Moga Road. Here a battle was fought at on 21st and 22nd December, 1845 under the Ist Anglo- Sikh War 1845-46 between the British and Sikhs. Although the British triumphed in this battle but suffered a heavy loss of 2,000 causalities. The Sikhs also suffered heavily but fought with such determination. The Britishers erected a pillar in 1869 to commemorate their victory. In 1976, the Punjab Government also set up an Anglo-Sikh War memorial in memory of Sikh martyrs who laid down their lives fighting the British. This memorial is located in village Ghall Khurd, near the bridge of Rajasthan Feeder. The memorial has a majestic building spread over an area of 1042 square meters. It has a museum having collection of paintings and weapons used in the war by both sides.

Sobraon Battle Field: It is situated on the left bank of river Satluj in Zira tahsil near the confluence of Satluj and Beas rivers, opposite to village Sobraon (in Patti tahsil of Amritsar). It is about 24 Kms from Zira and 42 Kms from Firozpur. A battle took place on 10th February, 1846 between the Sikhs and the British under the Anglo-Sikh War (1845-46). The Sikhs had built up here best of the fortifications but lost due to treachery on the one hand and nature on other. This battle cost the British 116 causalities in officers and 2383 causalities in other ranks. The losses on the Sikhs side were also heavy. Sardar Sham Singh Attriwala, who had

taken a vow to return victorian or die in the battle field stood his vow and died fighting against the British. In 868 British raised a pillar in village Roda to commemorate their victory.

Hussainiwala:

It is located on the Firozpur- Kasur (Pakistan) road on the right bank of the river of Satluj in the village Hussian-Shahwala. A memorial has been built up here, the foundation stone of which was laid on 23rd March, 1965. The memorial is dedicated to the three martyrs, Bhagat Singh, Rajguru and Sukhdev, who were hanged in Central Jail, Lahore on 23rdd March, 1931. Their dead bodies were brought to this place stealthily at the dead of night and consigned to flames. Outside the memorial there is a smadh of the Punjab Rajmata (mother of martyr Bhagat Singh). A large function is held here on 23rd March every year which is participated by state and national leaders to pay homage to the martyrs. Large number of people also visits this place on this occasion and throughout the year to pay homage to the martyrs.

It is small village. There are pickets of Border Security force (BSF), as it is located on the Indo-Pak border.

Guru Har Sahai:

It is a town falling in Jalalabad tahsil situated on the Firozpur, tahsil and district headquarters town. It is a historical place associated with the Sikh Guru Nanak Dev whose descendents reside here. It has a Pothi Mata Temple, which preserved a Pothi (book lost since 1970) and Mala.(Rosary) of Guru Nanak Dev. There is also a stone in which image of Guru Nanak Dev is said to be visible. The stone is displayed by the descendents of the Guru to the public on special occasions. Besides, there are two temples dedicated to two versions, known as Mata Jajot and Mata Hansewali, Fairs are held here twice a year.

Abohar:

It is tahsil and Sub-divisional Headquarter town, and is connected with Ganganagar and Bathinda by broad gauge line. It is also connected by the road with Ganganagar (Rajasthan).Fazilka, Malout, Dabwali (Haryana) and Hanumangarh (Rajasthan). Abohar is an ancient town, said to have been founded by one Abheraj Bhatti in 12th century. It was named as Abhegarh after the name of its founder which later corrupted to Abohar. It finds mention in the travelogue of Ibn Batuta, an Egytian traveler who visited this place about 1341 AD. There exist remains of an old fort which speaks about the importance of this place. There is a shrine of Panj Bir, where a fair is held in July-August every year. People also pay visit to this shrine on every Thursday. The town is considered as an important market for cotton. There are number of cotton mills. The Regional Fruit research Station at Abohar carries research on citrus fruits, dates and grapes.

Fazilka:

It is tahsil and Sub-division headquarters town, which is connected with Firozpur Cantt and Bathinda (via Kot Kapura) by rail. It is also connected by road with Firozpur, Abohar, Malout and Sulemanki (Pakistan). This is a rail terminus on the Bathinda- Kot Kapura-Fazilka line.

The town had no habitation before 1844 when this territory was coded by Bahawalpur State to the British. A British officer named Vas Agnew was the first to build a bungalow here for his residence. Thereafter it became known as Bangla. But two years later, on the development of a small market, it was named as Fazilka after Fazil, one of the early watt settlers. The place picked up trade and flourished as it was located near Satluj River through which goods were transported from and to Sindh. The floods of 1908 devastated the town completely and had to be rebuilt. Later this developed into the biggest market of wool, which was received from the areas now in Pakistan and other adjoining areas in Rajasthan It is an important wool and cotton market. The town is also known for Baan, Sirkis and Juties. A Co-operative Sugar Mill has been set up here. Besides, there are number of cotton ginning and pressing mills located here.

Firozpur City:

It is situated on Firozpur Cantt-Fazilka rail line at a distance of about 4 Kms from Firozpur Cantt. It is connected by road with Moga, Fazilka Hussainiwala, Harike and Zira. It is an old town said to have been founded in about 1360 AD by Firozshah Tuglak, who ruled Delhi from 1351-1387 AD According to another version the town was founded by Bhatti Chief Feroz Khan. In 1838 Maharaja Ranjit Singh visited this place to witness the war exercises of the British troops on a review by British Governor General Lord Aukland. At the time of its occupation by the British, the town was in a declining state. However, it gained importance gradually and became chief arsenal of the British in north India. The old town is divided into two parts by the main bazaar which runs from Delhi Gate to Banasanwala Gate. The town has a tomb of Mahammedan Saint Nur Shah Wali. There is a tank known as Rani Talab, built by Sardarni Lachhman Kaur and her husband Sardar Dhanna Singh and is located on one side of the tank.

Firozpur Cantonment:

It is the seat of the district administration and is an important military cantonment in the state. The British had realized its strategic importance and converted it into the biggest military station, west of Ambala Cantt. They used it as a spring board for annexing Punjab in which they succeeded after the First Anglo-Sikh war (1845-46). There is a memorial known as Saragarhi Memorial where a function is held on 12th Sept. every year to celebrate "Saragarhi Day" at this memorial. A large number of ex-servicemen, troops and their relatives participate in the celebrations and pay their homage to the martyrs. There is another monument known as "Burki Monument" which was raised near Saragarhi Memorial, in memory of officers and Jawans killed during the capture of the Burki town (Pakistan) by the Indian Army on 10th September, 1965.

(xii) Scope of Village and Town Directory

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

Town Directory:

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV- A in 1991 Census. Statements I to VI contain data about growth,

density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc. Hence the data for the towns of Firozpur has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of Firozpur District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class, name Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns of Firozpur District. The income and expenditure for the towns of Firozpur have been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the scheduled castes/scheduled tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

Statement V gives information regarding medical, educational, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Firozpur which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from towns and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Town. Information on number of banks available in the town has been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII shows the civic amenities available to all the 8 towns having slums falling in the jurisdiction of Firozpur District.

Part - A
VILLAGE AND TOWN DIRECTORY

Section-I
Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The Village Directory format has 25 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number :

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village :

The name and location code number of the village is shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village :

The area of the villages in hectares is given. Wherever the area figures were not furnished by the concerned department, the column is left blank.

Column 4 : Total population :

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households :

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:-

Column 6 : Educational :

Classes upto class V are included in Primary School comprising nursery school, kindergarten school, Pre-basic school, pre-primary school and junior basic school.

Classes from VI to VIII are included in the middle school.

Classes from IX and X are included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr.
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M (4), etc.

Column 7 : Medical :

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water :

The type of drinking water supply sources available within the village is indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone :

It is indicated by following codes :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks :

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available within the village, distance of the nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies :

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given.

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities:

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in these columns. If not available, the particulars of the nearest place with the facility exists is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications :

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways, they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village :

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance :

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply :

Availability of Power Supply in the village, whatever may be the form of its use, is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine :

If village receives any News Paper/Magazine the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured : '

The name of three most important commodities manufactured in the village is recorded against this column:

Column 19 to 23 : Land use i.e. area under different types of land use :

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare (s) up to one decimal. Desh '-' is

recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A and B The appendices show the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates CD Block wise number of villages.

Appendix-IX Shows number of different types of girls schools in a village.

Section-II
Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Contonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects :

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 & 8 :

Name or the State headquarters, District headquarters and Tahsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory :

Column 6 : Road length (in kms.) :

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage :

Generally, sewerage system is implied by the net-work of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines :

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil :

The various prevalent methods of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply :

Source and capacity of storage system. The following codes are used in these columns :

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major sources of water supply is given in column 13 and the storage capacity against each in kilo-litres (in bracket) is presented in column 14.

Column 15 : Fire Fighting Service :

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections) :

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, they may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes :

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institutes	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like-Applied Art/Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/ Intermediate/ Senior Secondary/ PUC/ Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle schools or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres :

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats :

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities :

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms:

Number of public libraries and reading rooms available in the referent town is recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded in these columns.

Column 9 : Number of Banks :

Number of Banks available in the referent town both Commercial and Co-operative banks is recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies:

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town is recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

Part - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract.

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing :

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting from October, 2002.

Task Force on Quality Assurance :

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices

which were specially set up for this purpose. The individual Scheduled Caste and the Scheduled Tribe population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Caste/Tribe returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribe at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract :

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes and Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts, Cities and Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main

workers were presented into four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/CD Block/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4. Village Primary Census Abstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures :

The area figures supplied by local revenue authorities of the district in respect of Tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration, block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure-I

Number of villages under Gram Panchayat:

With the Constitution (73rd amendment) Act, 1992, the Census Organisation felt it necessary to provide population data for the territorial area of Panchayat. This required precise details of the territorial area of each Panchayat so that delineation of enumeration blocks (EBs) to be allotted to the enumerators could be done to meet this requirement.

It required careful delineation of enumeration blocks by the Charge Officers to ensure that EBs do not cut across the territorial area falling in the Panchayat. Different situations were well perceived. A Panchayat could consist of only one village or a number of complete villages. There could be another situation where the Panchayat may consist of some complete villages and parts of villages. Still there could be another situation where Panchayat could consist of a number of villages etc.

An exhaustive exercise was done to prepare Panchayat level data. However, we came across following types of situations which made it difficult to compile the Panchayat level data:

i) Some of the Panchayats have one or more than one village.

ii) Some of the Panchayats have only a part of the village.

iii) Some Panchayats include full village (s) as well as part of village (s).

All this has not made it feasible for us to present Panchayat level PCA.

Annexure-II

Fertility and Child Mortality:

The following table shows age specific fertility rates in Punjab as well as in Firozpur district for the years 2001 and 1991. The trends observed are almost identical both for the State and the district for 2001. Among different age groups the fertility rate is the highest in age-groups 20-24, 25-29 and 30-34. The trend is the same for rural and urban areas also.

The trends also show some fall in the fertility levels during 1991 and 2001 and this decline is noticeable in all age-groups except 25-29, 40-44 and 45-49 in the state. In district Firozpur, the fertility rate plunged in all age groups barring one age Group 45-49. Almost same trend has been observed in the rural and urban areas of the district.

AGE SPECIFIC FERTILITY RATES 2001 AND 1991

Age	Firozpur						Punjab					
Group	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991

The following table shows age specific marital fertility rates in Punjab as well as in Firozpur district for the year 2001 and 1991. The trends observed are similar to those of total fertility levels. ASMFR is amazingly higher in rural as compared to urban in Firozpur district in the all age groups for the years 1991 and 2001.

AGE SPECIFIC MARITAL FERTILITY RATES 2001 AND 1991

Annexure-III

Measures of Fertility and Mean Age at Marriage Fertility Levels:

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally is assessed by relating number of births to size of some section of the population, such as number of married couples and number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever married women and the last question was related to currently married women only. The measures of fertility worked out are based on the F-Series Tables of 1991 & 2001 Census pertaining to Punjab State.

The following table presents important indices of fertility in Punjab as well as in Firozpur district for the years 2001 and 1991 separately for total, rural and urban areas. There has been significant decline in the number of children ever born per ever married woman in the age group (45-49); the decline is relatively more in rural areas than urban in Punjab. Likewise there has been a significant decline in the child-women ratio also. However, the number of married couples per 1,000 of population has gone up both in the state and district in rural it is vice-versa for urban areas.

IMPORTANT INDICES OF FERTILITY

Fertility indices	Firozpur						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991
1	2	3	4	5	6	7	8	9	10	11	12	13
No. of Children ever born per ever married woman in the age group (45-49)	3.8	4.6	3.9	4.8	3.4	4.1	3.5	4 3	3.7	4.5	3.2	3.8
Couples per 1000 Population	164	163	164	160	164	169	161	160	160	156	164	168
Child-Woman ratio (0-4 Years)	399	549	423	566	334	497	349	480	369	493	311	448

Annexure IV

MOVEMENT OF POPULATION

What is migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence, if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International Migration:

The migrational movements are of three types- (i) Migration within the State itself with its components-(a) Migration within the district of enumeration (intra-district migration), (b) Migration from one district of the state to another district of the State/UT (inter-district migration), (ii) Migration from one State to another state of the country (inter-state migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why the people migrate?

For the first time in the census, reasons for migration were elicited in 1981. Keeping operational constraints in view, the reasons for migration were broadly categorized as (1) employment, (2) education, (3) marriage, (4) family movement and (5) other reasons. Other Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration:

The growth of population of a particular place depends upon the biological variates such as mortality and fertility and migration. The knowledge of trends in migration helps in future planning of a place.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF BIRTH

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Migrants born within the state of enumeration	346,524	80,389	266,135	406,381	102,142	304,239
	(67.3)	(52.5)	(73.5)	(72.4)	(63.9)	(75.7)
(i) Migrants born else where in the district of enumeration	207,023	48,310	158,713	277,947	76,275	201,672
	(40.2)	(31.5)	(43.8)	(49.5)	(47.7)	(50 2)
(ii) Migrants born in other districts of the State	139,501	32,079	107,422	128,434	25,867	102,567
	(27.1)	(20.9)	(29.7)	(22.9)	(16.2)	(25.5)
(II) Migrants born in other states of India	87,348	28,190	59,158	106,016	31,889	74,127
	(17.0)	(18.4)	(16.3)	(18.9)	(19.9)	(18.5)
(III) Migrants born in other countries	80,298	44,228	36,070	49,192	25,832	23,360
	(15.6)	(28.9)	(10.0)	(8.8)	(16.2)	(5.8)
(IV) Unclassifiable	1,000	350	650	1	0	1
	(0.2)	(0.2)	(0.2)	(0.0)	(0.0)	(0.0)
Total Migrants	**515,170**	**153,157**	**362,013**	**561,590**	**159,863**	**401,727**
	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)

The above table gives distribution of inmigrants by place of birth in Firozpur district as per 1991 and 2001 Censuses. Out of the total inmigrants in 2001, 72.4 per cent are born within the state of enumeration and 18.9 per cent are born in other states/Union Territories of

India while 8.8 per cent are born in other country. The figures for 1991 are 67.3 per cent, 17.0 per cent and 15.6 per cent respectively.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF LAST RESIDENCE

Last residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Last residence within the state of enumeration	361,054	87,209	273,845	425,515	108,413	317,102
	(69.96)	(56.84)	(75.52)	(74.4)	(66.6)	(77.5)
(i) Elsewhere in the district of enumeration	220,173	53,880	166,293	294,757	81,273	213,484
	(42.66)	(35 12)	(45.86)	(51.5)	(49 9)	(52.2)
(ii) In other districts of the state of enumeration	140,881	33,329	107,552	130,758	27,140	103,618
	(27 30)	(21.72)	(29.66)	(22.9)	(16.7)	(25.3)
(II) States in India beyond the state of enumeration	86,428	27,770	58,658	105,627	31,453	74,174
	(16.75)	(18.10)	(16.18)	(18 5)	(19.3)	(18.1)
(III) Last residence outside India	67,558	38,098	29,460	40,853	22,858	17,995
	(13.09)	(24.83)	(8.12)	(7.1)	(14.0)	(4.4)
(IV) Unclassifiable	1,020	360	660	0	0	0
	(0.20)	(0 23)	(0.18)	(0.0)	(0.0)	(0.0)
Total	516,060	153,437	362,623	571995	162724	409271
	(100.00)	(100.00)	(100.00)	(100.0)	(100.0)	(100.0)

The above table gives distribution of inmigrants by place of last residence in Firozpur district. As per 2001 Census, 74.4 per cent of the inmigrants had the place of last residence within the state but out of the place of enumeration. Another 18.5 per cent have place of last residence in other states/UTs within the country, while 7.1 per cent have their last residence out side India. The corresponding figures for 1991 are 70.0 per cent, 16.8 per cent and 13.1 per cent respectively.

Annexure V

Main Religions:

The instructions for recording this information are the same as in 1991. A brief analysis based on 1991 and 2001 Census data is presented below.

Question 7 of the Household Scheduled canvassed at the 2001 census pertained to religion of a person. The religion of the person was recorded as returned by the respondent. The six main religions in the country were recorded by using following codes:

Hindu	:	1
Muslim	:	2
Christian	:	3
Sikh	:	4
Buddhist	:	5
Jain	:	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Religious Composition of Punjab's Population:

The numerical strength of the six main religious communities in the State and Kapurthala district for 2001 Census is as follows:

RELIGIOUS COMPOSITION OF POPULATION, PUNJAB AND KAPURTHALA 1991 AND 2001

Religious Communities	Punjab				Firozpur district			
	Total Population		Percentage in total population		Total Population		Percentage in total population	
	1991	2001	1991	2001	1991	2001	1991	2001
1	2	3	4	5	6	7	8	9
Hindus	6,989,226	8,997,942	34.4	36.9	660,124	820,234	45.6	47.0
Muslims	239,401	382,045	1.2	1.6	1,970	3,370	0.1	0.2
Christians	225,163	292,800	1.1	1.2	15,402	23,093	1.1	1.3
Sikhs	12,767,697	14,592,387	63.0	59.9	769,979	896,628	53.1	51.4
Buddhists	24,930	41,487	0.1	0.2	122	548	0.0	0.0
Jains	20,763	39,276	0.1	0.2	643	958	0.0	0.1
Others Religions and persuations	883	8,594	0.0	0.0	30	1,062	0.0	0.1
Religion not stated/ Unspecified	13,906	4,468	0.1	0.0	633	214	0.0	0.0
All Religions	**20,281,969**	**24,358,999**	**100.0**	**100.0**	**1,448,903**	**1,746,107**	**100.0**	**100.0**

As can be seen from the above statement, Sikhs form the predominant religious community in Punjab and they account for 59.9 per cent of the State's population according to the 2001 Census. The corresponding percentage for 1991 Census was 63.0 per cent. Hindus is the second largest religious community in the State and their share in the total population is 36.9 per cent which was 34.4 per cent as per 1991 Census. This signifies that Sikhs and Hindus, the two most dominant religious communities in the state, together constitute 96.8 per cent of the state's total population. The share of Muslims, Christians, Buddhists and Jains in the total population is 1.6, 1.2, 0.2 and 0.2 per cent respectively.

As per 2001 Census, in Firozpur district, Sikhs constitute 51.4 per cent of the total population and this is significantly lower than that of the state as a whole. Hindus, the second dominant religious community in the district, account for 47.0 per cent of the district's total population. Together, the Sikhs and the Hindus account for 98.4 per cent of the district's population. Christians constitute 1.3 per cent, Muslims 0.2 per cent while Jains and other religions constitute 0.1 per cent each.

Annexure VI

Marital Status:

Current marital status of each individual, irrespective of age, was obtained through Question 5 of the household schedule canvassed at the 2001 census into following four categories:

1. Never married
2. Currently married
3. Widowed
4. Divorced or separated.

The instructions to enumerators for eliciting marital status were same as adopted in 1991 census. A brief analysis based on 1991 and 2001 census is presented here.

The following table exhibits data for Persons, Males and Females in percentage form regarding Marital Status.

MARITAL STATUS OF POPULATION AS PER 1991 AND 2001 CENSUS

Marital Status	Punjab						Firozpur					
	1991			2001			1991			2001		
	P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13
Total Population	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Never Married	51.5	55.4	47.1	48 7	53 1	43 8	52 5	56.0	48.5	50.0	53.8	45.8
Married	45.1	42.3	48.2	47.2	44.6	50.2	44.6	42.1	47.3	46.3	44.2	48.6
Widowed	3.3	2.2	4.6	3 9	2 1	5.8	2 9	1 8	4 1	3 5	1 9	5.4
Divorced or Separated	0.0	0 0	0.0	0.2	0 2	0.2	0 0	0.0	0.0	0.2	0.2	0 2
Un-Specified	0 0	0.0	0.0	0	0	0	0.0	0.0	0.0	0	0	0

Punjab State has a population of 24,358,999 as per 2001 Census comprising 11,871,211 (48.7%), never married, 11,499,566 (47.2%) married, 938,678 (3.9%) widowed and 49,544 (0.2%) divorced or separated. As per 1991 Census Punjab State had a population of 20,281,969 comprising 10,452,444 (51.5%) never married, 9,146,158 (45.1%) married, 673,569 (3.3%) widowed, 8,768 (0.1%) divorced or separated and 1,030 (0.0%) un-specified.

In Firozpur district, out of the total population of 1,746,107 as per 2001 census; 873,751 (50.0%) are never married, 808,135 (46.3%) are married, 61,344 (3.5%) are widowed, 2,877 (0.2%) are divorced or separated. Thus, the patterns observed for the State and the district are almost identical.

Annexure VII

Sex and Educational level:

It has become customary for the Indian Census to obtain details of educational levels of the literates in the society. Question 13 of the Household Schedule canvassed at the 2001 census aimed to elicit information on the highest educational level attained. The data so collected is put to public domain by classifying the population by sex and educational levels.

The following table shows percentage distribution of literates by educational level for Punjab State and Firozpur district as per 1991 as well as 2001 Census.

PERCENTAGE DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL AS PER 1991 AND 2001 CENSUS

Educational Levels	Total Rural Urban	Punjab						Firozpur					
		1991			2001			1991			2001		
		P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Below Primary	Total	21 8	20.9	23 1	20.0	19 7	20 4	26 1	24.8	28.1	24.5	23.4	26.0
	Rural	24.2	22.9	26 2	22.9	22 3	23 7	29.9	27.9	33.6	28.5	26 8	31.0
	Urban	17.6	17.2	18.2	15.5	15 6	15.4	18.7	18.2	19.3	16.4	16.2	16.7
Primary but below middle	Total	27.9	25.3	31 7	25 6	23.7	28.3	28 3	26.2	31 7	27 6	25.3	30.9
	Rural	31.8	28.4	37 0	29.3	26.6	33 0	32.2	29.5	37 4	31 2	28.3	35 6
	Urban	21 2	19 7	23.3	19 9	19 0	21.1	20 7	19 3	22.6	20.3	19 0	22.1
Middle but below matric	Total	18 1	19.0	16.7	16.9	17 5	16.1	18	19.1	16	17.0	17 8	15.8
	Rural	18.5	19.8	16 7	17 7	18 5	16 8	17.4	18.9	14 8	17 2	18 2	15.8
	Urban	17 3	17 7	16 8	15 7	16.1	15 1	18.9	19 6	18 1	16 6	17.1	15 9
Matric but below graduate	Total	26 3	28.6	22 8	30.8	32 7	28 4	23 3	25 4	19.7	26.3	28.8	22.5
	Rural	23.0	26.0	18.3	27.5	29 9	24 3	18.6	21 7	13	21.4	24 7	16.3
	Urban	32 0	33 5	30.0	36 0	37 1	34 6	32 2	33 4	30.5	36.1	37.7	33 8
Graduate and above	Total	5 9	6 1	5.7	6 6	6 4	6 7	4 4	4 4	4.4	4.7	4.6	4.8
	Rural	2.5	3.0	1 8	2 5	2 8	2 2	1 8	2	1 3	1 7	2.0	1 2
	Urban	11 8	11.9	11.8	12 9	12 2	13 7	9 5	9.5	9 5	10.6	10 0	11.5

As per 1991 census 21.8 per cent of the literates in Punjab were below primary level of education, 27.9 per cent were primary but below middle and 18.1 per cent were middle but below matric. A little over one-fourth (26.3%) of the literates in the State were matric but below graduation. It was only 5.9 per cent of the literates who had attained graduation or above level of education.

According to 2001 census 20.0 per cent of the literates in Punjab are below primary level of education, 25.6 per cent are primary but below middle and 16.9 per cent are middle but below matric; 30.8 per cent are matric but below graduation. Only 6.6 per cent of the literates in Punjab are graduate and above. Whereas there is some decline in first 3 levels as compared to 1991, last 2 level exhibit slight improvements.

In Firozpur district, the incidence of educational level is lower than that of the State in 2001. In the district 24.5 per cent of the literates are below primary. Another 27.6 per cent are primary but below middle and 17.0 per cent are middle but below matric. By contrast, the percentage of literates with Graduate and above level of education is lower in Firozpur district as compared to the State. In the district 26.3 per cent of the literates are matric passed as compared to State with 30.8 per cent. Likewise the percentage of Graduate and above, with 6.6 in the State outdoes the district's percentage (4.7%).

Annexure VIII

Distribution of Different Mother Tongues:

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood is recorded as the mother-tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. These may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Mother Tongue and Language data based on 1991 & 2001 Censuses is given here. The distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each) for the district by sex separately for rural and urban areas. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table is divided into two parts; Part A- Scheduled languages with the mother tongues grouped under each, and Part B-Non-Scheduled languages with the mother tongues grouped under each. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census are, basically, the designations provided by the respondents. These designations or mother tongue label need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects, the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1576 rationalized mother tongues in 1991 for the entire Country, which was further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.
