Gurudwara Damdama Sahib, Talwandi Sabo

Talwandi Sabo is one of the five takhats of the Sikhs. After the fierce battles with the Mughals at Anandpur, Chamkaur and Muktsar, Guru Gobind Singh retired to the jungles of Malwa. Talwandi Sabo where the Guru took rest (dam) came to be known as damadama Sahib. The Guru stayed here for more than nine months. During this period, he redicated the Adi Granth and made Damdama Sahib a centre for spreading his mission. He called this place Khalsa Da Takhat (throne of the Khalsa).

Annexure VIII	:	Distribution of different mother tongues.	296

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census , is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics, village-wise and town-wise, of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive Censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added to it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA which was restructured. Nine–fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and

recreational facilities. In town directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristics of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) in all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Inder Jit Singh, IAS, Director of Census Operations, Punjab. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General, (C&T) and Dr. I.C.Aggrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP), helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assitant Director. I am thankful to all of them and others who contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 2007

Preface

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to also include village level data on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town and ward level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physiographic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B - Primary Census Abstract, giving data for each village within the Community Development (CD) Block and each town in the district. The CD block maps included, presenting village level data, have been prepared by using computer assisted technology. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form Village Directory and Town Directory. The District Gazetters and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Shri D.K. Sikri, IAS, Additional Secretary, Registrar General, India and Census Commissioner and Shri J.K. Banthia, IAS, former Registrar General and Census Commissioner, India for their direction and support from time to time in accomplishing this arduous task.

In the directorate, at the outset we are beholden to Shri Inder Jit Singh, IAS under whose able guidance and direction as Director, Census Punjab, the census operations in the state were successfully completed.

Our thanks are also due to Shri D.R. Khanna, Ex-Deputy Director for getting the compilation of data and Shri Madhav Shyam, Ex-Deputy Director for drafting specimen model DCHB which has been replicated in other DCHBs.

The great effort and hard work done by Shri Bhagirath Singh, Assistant Director, Shri M.S. Bhatnagar, Assistant Director (since transferred) and Shri Malkit Singh, Ex- S.I. Gr. I are greatly acknowledged. Sh. Pawan Kumar Bansal, S.I. Gr. II, Sh. Azad Kumar, S.I.Gr.-III and Sh. H.S. Sudan, Sr. Compiler deserve special thanks for having completed the publication work.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

District Highlights - 2001 Census

1. Bathinda district ranks 8th in area and 9th in population.
2. Bathinda is the most populous and Talwandi Sabo is the least populous tahsil.
3. The average population size of village in the district (2,970) is greater than that of the state (1,311).
4. Mehna (27,029) in Bathinda tahsil is the largest village by population size followed by Talwandi Sabo (16,754) in the district.
5. 32 villages in the district are large sized with a population of 5,000 or more.
6. The decadal population growth rate in the district (20.1%) is equal to the state average (20.1%).
7. Bathinda district is relatively less urbanized (29.7%) than the state (33.9%) and it ranks 8th in the state.
8. The sex ratio in the district (870) is lower than the state (876). It ranks 14th among the districts in the state.
9. The child sex ratio in the district (785) is lower than the state (798). It ranks 13th among the districts in the state.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Ever since the beginning of first post independence Census of India 1951, the publication of District Census Handbooks (DCHBs) has become a regular feature of the Indian Census. Produced by the Census Organisation of Government of India on behalf of the State Government, the DCHB is a unique publication which gives the census as well as non-census data down to every village in case of rural areas and ward within the town/urban area in the state. It is recognized as one of the most comprehensive sources of information. Infact, this is the only publication which provides primary census abstract based on census, and non-census data on infrastructure and amenities available, such as educational, medical, postal and communicational at the sub-micro level. It is inter- alia used for delimitation of constituencies, formulation of local level and regional plans and serves as a valuable tool for district administration.

Undisputedly, DCHB has remained to be the most comprehensive and valuable product of the census organization ever since its initiation. It has always been the endeavour of the Census of India to enlarge the content and coverage of the data presented at every census. The DCHB series of 1951 Census contained important Census Tables and the Primary Census Abstract. At the 1961 Census, the scope of the DCHB was enlarged by including a descriptive account of the district, administrative statistics, census tables and the village and town directory. In 1971, the DCHBs were planned in three parts; Part-A included the village and town directory, Part-B included village and town wise primary census abstract, while the Part-C was meant to include analysis of census data and a write up covering social, cultural, historical and other important aspects. However, in some states/union territories Part-C remained confined to the district tables only.

During 1981 Census, some new features were added and the formats of village and town directory were restructured, somewhat. These volumes were published for each district in two parts. Part- A included village and town directory, while Part-B included primary census abstract (PCA) of every village and ward in town/urban area. The inclusion of scheduled castes PCA was the additional feature of the 1981 Census. The village directory of 1981 Census included new parameters viz; information on Adult literacy Centres, Primary Health Sub-Centers and Community Health workers in the village (s) to meet the requirement of the Revised Minimum Needs Programme. In addition, information on approach to the village was also provided for the first time in the village directory to help in taking stock of villages requiring road linkages in the district. Likewise, Statement IV-A included in the Town Directory aimed to provide data on slums so as to undertake development activities in such areas.

The manner of presentation of the DCHBs for the 1991 Census was, by and large, same as followed in 1981 Census. However, the format of PCA was slightly restructured in the 1991 Census for the benefit of data users. The village level data were presented Community Development (C.D.) block wise to cater to the needs of grass root level planning as envisaged under the five year plans. Ninefold industrial classification of the main workers was reintroduced by replacing the four-fold industrial categories adopted at the 1981 Census. In addition, the PCA also gave population in the 0-6 age group by sex essential for working out effective literacy rate, besides providing proportion of child population.

The DCHB 2001, the present volume, is the sixth in series. The pattern followed is, by and large, similar to that of the 1991 Census. Among the new features added, information on the availability of newspapers/ magazines, banking facility, agricultural and non-agricultural societies, recreational and cultural facilities

and income and expenditure of the village panchayats find mention. More important is that, it is for the first time in the history of Indian Census that Permanent Location Code Number (PLCN) has been allotted to every village in the state to meet the demand from different organizations to study the village level data over a time spell. It is believed that the permanent location codes assigned to each village would help in tracing the precise location of a village on account of jurisdictional changes in the boundaries of various administrative areas.

(ii) Brief history of the district

Bathinda as a District came into existence with the formation of PEPSU in 1948. Bathinda and Mansa Tahsils till then formed part of Patiala State, and Faridkot Tahsil of Faridkot State. The history of Bathinda and Mansa Tahsils consequently followed the fortunes of Patiala State and the history of Faridkot State. The following account has been extracted from the Phulkian State Gazetteer of 1904 "Bathinda is of great antiquity," but its earlier history is very obscure having been confused with Sirhind, Bhatia and Ohind. According to the khalifa Muhammad Hasan's capital and place of residence, which Mahmud captured, Tabarhindh was, in all probabilities the old name of Bathinda. This is distinctly asserted in the labb-ut-Tawarik. Another form was Batrind, and this is found in Ibn Batuta. The earliest mention to Tabarhindh occurs in the Jami-ul-Hakayat written about 607 H. or 1211 A.D. It is called Tabarhindh or in two MSS, Barhindh or Tarindh (Bathinda). In the Tabaqat-I-Nasiri Tabarhindh is repeatedly mentioned.

The Aina-I-Barar Bans preserves the following traditions:- Bathinda was built by Bhai Rao, son of Bal Band, who in 336 Sambat became the ruler of Punjab, and to whom the foundation of Bhatner is also ascribed.

Medieval Period:

The medieval period of history starts with the Muhammadan invasion of India. The invasion of Sultan Mahmud of Ghazni in the 11th century shook the Indian rulers completely. It is believed that Bathinda was capital of Hindushahi rulers for more than a century. There is no doubt that the Hindushahi rulers defended this country from the onslaughts of Muhammandan invaders for a considerable period, but they could not stand against the incessant invasions of Mahmud of Ghazni. The decline and decay of the Hindushahi kingdom, which was the first to bear the brunt of the Turkish onslaught, enabled Mahmud to penetrate into the heart of Hindustan. First of all, he besieged in 1004 AD the fort of Bathinda which lay on the route from the north-west into the rich Ganga valley.

The Rajputs rose to power after the fall of the Hindushahi in Punjab. The Chauhans first ruled in Ajmer, but it appears that by 1164 they had occupied Delhi as well as the entire tract of territory lying between it and the Satluj. Sirhind and Bathinda constituted the two most important military stations on the north-western frontiers of the Rajput kingdom. The area of Bathinda District was then under Chauhan Rajput and Prithvi Raj Chauhan was an illustrious ruler of this dynasty. He did not seem to have been ready for the attack and had to surrender. Muhammad Ghori stationed his men in the fortress under the commander, named Zia-ud-din. When the Sultan was about to return, Prithvi Raj appeared in the vicinity of the fortress to recover it. A fierce battle was fought in 1191. Prithvi Raj besieged the fortress of Bathinda from Zia-ud-din.

Prithvi Raj Chauhan was defeated in the second battle of Tarain, in 1192 which was a landmark in the history of India, and ensured the ultimate succeess of Muhammad Ghori against Hindustan. After the defeat of Prithvi Raj Chauhan the area of Bathinda came under the rule of the Muhammadan. Accordingly, he was the first Muhammadan ruler who was subsequently succeeded by his most prominent slave, named Qutab-ud-din Aibak who laid the foundations of Slave Dynasty. The period between 1206-1526 is known as 'The Period of the Sultan of Delhi'. It is also believed that area of present Bathinda District was part and parcel of the main Delhi Province.

After Illutmish, Raziya who reigned from 1236-1240 was the next important ruler of the Slave Dynasty. Virtually, she was the first woman ruler of India but undue favour shown by her to the slave Jalal-ud-din Yaqut, offended the Turkish nobles who brought about her downfall in an ignoble manner.

The above causes led to a conspiracy against the queen. Altunia, the Governor of Bathinda, was

also an active member of the conspiracy. He revolted and as soon as Raziya reached Bathinda to suppress the revolt, some agents of the conspirators killed Yaqut, the favourite of the queen and threw her into prison in April,1240 and Bahram was proclaimed the Sultan of Delhi.

In the redistribution of offices Altunia did not get what he had expected. He thought of a plan to avenge himself. In August 1240, he released Raziya from the prison, married her and proceeded to Delhi to capture it by force. But they were defeated by Bahram's army and were compelled to return towards Bathinda. Their troops deserted them and they were murdered by some robbers on October 13, 1240.

The most important slave king was Balban who ruled this country from 1246-1287. He made his cousin Sher Khan, the Governor of Bathinda and adjoining areas. As the Governor of the frontier provinces, he had become so powerful and influential that Balban began to consider him as a danger to his personal authority. It is believed that Balban had managed to get Sher Khan poisoned and appointed his eldest son Bughra Khan, as the Governor of Bathinda. He died in 1285 while he was engaged in a fight against the Mangols.

After the Slave dynasty, the Khilzi Dynasty ruled about 34 years (1288-1321). Ala-ud-din Khilzi was an important ruler of this dynasty. After the Khilzis, the Sayyids reigned from 1414-1451. Sayyid Mubarak Shah was an important ruler of this dynasty, Shaikh Salim was the Governor of Bathinda who had collected a large treasure and in 1430, Faulad Turkbacha confiscated the treasure in July, 1430. The pact of Faulad with Shaikh Ali was a grave danger to Sultanate Delhi.

Before the rule of the Mughal, India was ruled by the Lodhi Dynasty from 1451-1526. Ibrahim Lodhi was the last ruler of the Lodhi Dynasty from whom Babar snatched power after defeating him in the first battle of Panipat in 1526. It is worthwhile to mention here that the area of present Bathinda District was dominated by the Sidhu-Brars.

Both Tiloka and Rama were sons of Chaudhary Phul and the followers of Guru Gobind Singh. During the battle of Guru with Wazir Khan of Sirhind, Tiloka and Rama helped Guru alongwith their soldiers. They fought at Anandpur Sahib and also at Chamkaur Sahib. Guru Gobind Singh also stayed for sometime at Damdama sahib in Bathinda District. Here, Guru stayed for quite some time dictating the Addi Granth to a devout Sikh, Bhai Mani Singh. When they asked the Guru where his young sons were, the Guru replied, pointing to his followers: "For these thousands, I sacrificed the other four". It is worthwhile to mention here that two elder sons of Guru Gobind Singh, laid down their lives in the battle of Chamkaur Sahib and remaining two younger sons were martyred at Sirhind by Wazir Khan, the Faujdar of Sirhind.

The most important thing that happened during the rule of Raja Sahib Singh was that Patiala State, including the most of the area of Bathinda District, came under the domination of the British Government as he sought and obtained the protection of the British. He died on March 26, 1813 and was succeeded by his son Karam Singh.

During the first Anglo-Sikh War in 1845-46, Karam Singh fought on the side of the British. He died during this war and his son and successor Maharaja Narinder Singh also helped the British in the Anglo-Sikh War. On November 1,1861, he was invested with the Most Exalted Order of the Star of India, at Allahabad; and about the same time, he was appointed a member of the Governor General Council for making laws and regulations. On November 13, 1862, Maharaja Narinder Singh, the most enlightened ruler of the State, passed away.

In 1873, Rajinder Singh became the Maharaja of Patiala and laid the foundation of Rajendra Hospital in 1877. It gave some sort of medical relief to the people of Malwa. In 1881, railway line from Rajpura to Bathinda was installed. It added to the facilities of communication to the people of this area. Maharaja Rajinder Singh passed away in 1900.

The Struggle for Freedom :

Namdhari Movement-Namdhari Movement popularly known as Kuka Movement was initiated by Bhai Ram Singh on April 1, 1857 at Ludhiana District. He knew of the hardships and sufferings of the ordinary peasants and based his movement on redressal of their grievances. He had served as a soldier in the Sikh Army and had been influenced by the idea of Sikh dominion over the Punjab. Within a few years, Bhai Ram Singh emerged as Guru Ram Singh with a considerable following in Ludhiana and adjoining areas.

Within a short period, Namdhari Movement spread in the rest of Punjab including the area of present Bathinda District. The Namdharis of Bathinda District took an active part in the freedom struggle of the country. However, the movement was ruthlessly suppressed by the British in 1872.

The Ghadar Movement-The Ghadar Movement was the first purely secular movement which aimed at to liberate India by force of arms. The rebellion was planned in the United States and funds were raised from Indians living in foreign countries. The headquarter of the movement was at San Francisco. Sohan Singh Bhakna was the President and Lala Hardyal was the General Secretary of the Party. Pt. Kanshi Ram of Rupnagar District was the treasurer of the Ghadar Party. A weekly paper called *Ghadar* (The Rebellion) was started with Lala Hardyal as Chief Editor. Because of the Journal, the organisation came to be known as the Ghadar Party.

The harassment of the passengers of the ship 'Kamagata Maru' comprising mostly Punjabis, instigated the people of Punjab living in foreign to participate actively in the Ghadar Movement. Unfortunately, the movement failed because of the leakage of information by Kirpal Singh who had been planted by the British among the Ghadarites.

The Punjab Ryasti Praja Mandal Movement-The Punjab Ryasti Praja Mandal Movement remained very forceful in Patiala State. As much of the area of Bathidna District was under Patiala State; the movement had also its impact on the district. To begin with, it focussed its attention on political issues such as liberty of movement and speech and misuse of state finances by the rulers, particularly Maharaja Bhupinder Singh of Patiala. The All India States People's Conference was held at Bombay in 1927, and under its inspiration, Praja Mandals were organized in a large number of states.

Akalis were actively associated with this movement. They started their campaign with a long tour of Patiala State under the leadership of Baba Kharak Singh, who was known as the 'uncrowned king of the Panth'. He addressed a big political conference at Mansa in Bathinda District where the birth of the Punjab Ryasti Praja Mandal was announced on July 17, 1928 and exhorted his audience to participate in the agitation launched by the Akalis. Sewa Singh Thikriwala was elected as its president and Bhagwan Singh Longowalia as its general secretary. A rally was attended by thousands of peasants from neighbouring villages. Akali jathas from Barnala, Bathinda, Mansa, Maur, Sardulgarh, Sunam and Bhawanigarh took part in the procession. Baba Kharak Singh in his speech attacked the misdeeds and loose morals of Maharaja Bhupinder Singh of Patiala.

Throughout 1931, the agitation for the sack of Maharaja Bhupinder Singh continued unabated. Budhlada was another important centre of Praja Mandal Movement. In a public meeting held there, resolutions were adopted condemning enhancement of land revenue and *abiana* and demanding relief in taxes. Religious-cum-political conferences were also held at Mansa and Talwandi Sabo in 1940 by Akalis. There were not much disturbances in the wake of the Quit India Resolution passed by the Bombay Session of the Indian National Congress in August, 1942. The people of Bathinda District took an active part in overall freedom movement of the country. A big political conference was held at Phul on 25th and 26th April, 1946 which was addressed by prominent Congress leaders from Punjab.

Independence and its Aftermath :

At the time of Independence in 1947, Maharaja Yadvindra Singh was ruling over most of the present Bathinda district, with headquarters at Patiala. As in the rest of the country, people celebrated achievements of Independence with great enthusiasm. Among the states, Maharaja Yadvindra Singh of Patiala played a significant role in the history of India

There was a lot of bloodshed during the partition period in the entire district. India's Independence brought about a little change in the attitude of the princes. The Praja Mandal and the Akalis continued with their demands and remained quarrelling over the details of future set up. But after a very short interval, they patched up their differences, forged a united front and started demanding a responsible government. The Akalis issued an ultimatum to the East Punjab States to introduce responsible Government or face a morcha. The Praja Mandal had already been threatening a struggle. It was no

longer possible for the States to continue in their old ways. Administration was crisis-ridden and the Central Government at Delhi was not too sympathetic. In such a situation, the movement for merger of these states gained ground.

Formation of PEPSU and its merger with Punjab:

The Patiala and the East Punjab States Union or the PEPSU, as it was popularly called, had come into existence on August 20, 1948, with the integration of the princely States of Patiala, Nabha, Jind, Faridkot, Kapurthala, Nalagarh and Malerkotla. This union came into being under the active guidance of Sardar Valabh Bhai Patel who was then the Home Minister and incharge of Indian States Department. Maharaja Yadvindra Singh of Patiala was appointed as the Rajparmukh (Head of State).

With the formation of the PEPSU, the Praja Mandal also changed its name to the PEPSU Pradesh Congress. All the princes in the East Punjab States except the Maharaja of Patiala were eliminated. Even the Patiala ruler was nothing more than the constitutional head of the State and the real power passed into the hands of the representatives of the people. In 1956, with the reorganization of the States, PEPSU was merged with Punjab and constitutional position of the Maharaja of Patiala ended. The Praja Mandalist now claimed that they had fought till the consummation of the great struggle which they had launched nearly thirty years earlier. At present, the district has three tahsils/sub divisions, viz. Bathinda, Talwandi Sabo and Rampura Phul. After merger of PEPSU with Punjab, the district has made rapid strides in the fields of agriculture and industry. The establishment of Guru Nanak Dev Thermal Plant and the National Fertilizer Ltd. at Bathinda are the monuments of modern history of the district.

(iii) Administrative set-up

The State has experienced a large-scale jurisdictional changes after the 1991 census. The number of districts has increased from 12 in 1991 to 17 in 2001. The newly created districts include; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. With the exception of Kapurthala district all other 11 districts in the State have experienced inter-district jurisdictional changes of varying magnitude.

These 17 districts are distributed over four divisions. Jalandhar division includes districts of Gurdaspur, Amritsar, Kapurthala, Jalandhar, Hoshiarpur and Nawanshahr; Patiala division covers districts of Rupnagar, Ludhiana, Patiala, Sangrur and Fatehgarh Sahib; Firozpur division spreads over districts of Firozpur, Moga and Muktsar, while Faridkot division embraces districts of Faridkot, Bathinda and Mansa.

The intra-districts jurisdictional changes resulted in increase in the number of tahsils in the State from 46 in 1991 to 72 in 2001 Census. (In Punjab Tahsil and Sub Division are synonymous to each other). Bathinda district spreads over an area of 3353 sq. kms. Presently Bathinda district is sub-divided into three tahsils: 1. Rampura Phul, 2. Bathinda., and 3. Talwandi Sabo. Likewise the number of towns in the district has increased from 8 to 9, out of which 8 have statutory status. The newly added one town Bhisiana has the status of Census Town .The district constitutes 284 villages. Comprising 280 inhabited and 4 uninhabited villages. All the 4 uninhabited villages falls in Bathnida tahsil.

The statutory towns are notified by the State government. Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or transitional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the state government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specify by notification in the official gazette any area to be transitional area or a smaller urban area for the purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the state government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the Class I, Class II, Class III.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows;

Sl. No.	Class of Urban Local Bodies	Population	Income
1	2	3	4
1.	Municipal Corporation	3 lac or above.	2 crore or above
2.	Municipal Council Class I	50,000 to 3 lac.	50 lac to 2 crore
3	Municipal Council Class II	10,000 to 50,000	15 lac to 50 lac
4.	Municipal Council Class III	Upto 10,000	upto 15 lac.
5	Nagar Panchayat	5,000 or above	More than Rs. 150 per head

The following statement indicates the jurisdictional changes, which took place after the 1991 Census in Bathinda District.

JURISDICTIONAL CHANGES DURING 1991-2001

Name of District/ Tahsil	No. of villages		No. of Towns		Changes since 1991 & Govt. Notification No.
	1991	2001	1991	2001	
1	2	3	4	5	6
Bathinda District	527	284	8	9	i) 240 villages of Mansa Tahsil of Bathinda district transferred to newly created district Mansa vide notification No.2/2/92-RE-II (1)/4247 dated 8-4-92.
Rampura Phul Tahsil	76	76	1	1	i) No change in Rampura Phul Tahsil since 1991 Census.
Bathinda Tahsil	121	120	5	6	i) No change in Bathinda Tahsil since 1991 Census except Bhisiana was made C.T. in 2001
Talwandi Sabo Tahsil	85	88	2	2	i) Talwandi Sabo Tahsil lost village Nangala HB 149 to newly created Tahsil Sardugarh vide notification No. 2/44/94-RE II (1)/ 6765 dated 20.7.95. ii) Above village again transferred to Talwandi Sabo Tahsil from Sardulgarh Tahsil vide notification No. 2/44/94-RE-II (1)/8011 dated 6.8.95. iii) Talwandi Sabo tahsil gained 3 villages i.e. Ghuman Khurd HB 68, Ghuman Kalan HB 69 and Sukha Singhwala HB 70 from Tahsil Mansa vide notification No. 2/68/96-RE II(1) 9453 dated 9.12.1996.

For the administrative purpose, the district is a part of Faridkot Division. For the purposes of general and revenue set up the district is divided into three tahsils viz. Rampura Phul, Bathinda., and Talwandi Sabo. All of them have sub divisional status. The district is further sub-divided into 7 community development blocks viz. 1. Bathinda, 2. Nathana, 3. Talwandi Sabo, 4. Sangat, 5. Phul, 6. Rampura Phul, and 7. Maur. There are 9 towns viz 1. Rampura Phul, 2. Goniana , 3. Bhisiana, 4.. Bhucho Mandi, 5. Bathinda, 6.Sangat, 7.Kot Fatta, 8.Raman and 9. Maur. The only addition of Bhisiana Census town is a creation of Census 2001. The district is the basic unit of administration. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district and revenue administration in the district.

(iv) Physical Features

Location and Size :

Bathinda district is located in the Central Southern part of Punjab State in the Malwa region, It forms part of Faridkot Revenue Commissioner's Division and is situated between 29°-45' and 30°-45' North latitude and 74°-30' and 75°- 30' East longitude. The district shares boundaries with Muktsar and Faridkot districts in the North and the West, Mansa district in the South and Sangrur district in the East. It is constituted of areas of the erstwhile princely the state of Patiala which was known as the Phulkian States.

According to 2001 Census, Bathinda covers an area of 3353 sq. kms and has a population of 1,183,295 comprised of 632,809 males and 550,486 females. This makes 4.9 per cent of State's population and 6.7 per cent of area. Among the districts it ranks eighth in area in the State. In terms of population, it ranks ninth in the state.

Physiography :

Bathinda district is a part of the Punjab Malwa plain and is sub-divided into following micro-regions on the basis of soils, topography, climate and natural vegetation, which are briefly described below:

Bathinda district forms part of Satluj Ganga plain and is characterized by low-lying flat area. The elevation of the land surface ranges from 208 meters in the southwest to 223 meters in the northeast. Thus the slope of the ground is from northeast to southwest. The range of elevation in the district is about 15 meters, hence, gentle slope is characteristic feature of the area. On a macro scale this area may be considered as one landform unit but at microscopic scale the topographical variation may be delineated which is due to flooding of river and presence of sand dunes in some parts of the district.

1.Bathinda Sandy Plain - The region is spread over the parts of Bathinda, Rampura Phul and Talwandi sabo. Being sandy plain the region is dotted with scattered sand dunes, which have the tendency to shift towards eastern side. The geological structure of this region is formed of Alluvium and the main soils are coarse sandy loam to loam, grey or red desert which are orthids Fluvents. Ochrepts Psamments and Psamments Fluvents-Orthid. The maximum height of 220 meters is located near village Sooch of Rampura Phul tahsil and the minimum height of 199 meters is found near village Sardargarh of Bathinda tahsil. The natural vegetation includes Kikar, Ber, Neem and thorny bushes.

2.Rampura-Plain - The region spreads over the large parts of Rampura Phul and Bathinda tahsils. This region covers the eastern portion of the district. This is a plain area dotted with sand dunes. The geological structure of this region consists of Alluvium and main soils of region are coarse sandy-loam to loam to silty-clay loam, which are classified as Psamment-Fulvents-Orthids and Ochrepts-Psamments. Natural vegetation includes, Kikar, Ber, Neem and thorny Bushes. It has Bathinda branch, Kotla branch, Odat branch and Biroke branch (Sirhind Canal) and other numerous distributories for irrigation.

Canals :

There is no major river flowing through the district. There are some canals, which flow through this district. The district is served by two canal system, the Sirhind canal and the Bhakra canal. The main source of irrigation in the district is the Sirhind canal, and its other three branches namely the Abohar branch, the Bathinda branch and the Kotla branch. The Bhakra canal system also serves the district but only a small area is irrigated by it.

Water resources:

The water resources of the district include canals, wells & tubewells. Firstly the canals serve large parts of the district. The Bhakra Main canal and branch of Sirhind canal are passing through the district. Various distributaries of these canals provide irrigation to a large area of the district. The traditional types of wells have almost been replaced by tubewells run by electricity and diesel engines. Because of increasing supply of electric power the tubewells run by electricity are increasing in number.

Climate:

The western Himalayas in the north and the Thar Desert in the south and southwest mainly determine the climatic conditions. Geographically Bathinda district falls in the Central-Southern part of Punjab and is distantly located from the Himalayas. The Rajasthan desert is also not far away and its heat,

sand and dust storms influence its weather to a great extent, the district has a very hot summer, mild rainy season and dry but embracing winter. Due to extension of irrigation facilities during the last few decades, the weather has undergone some changes.

The climate, on the whole, is dry in the district. Temperatures start rising from middle of February and increase rapidly from the beginning of March till June, which normally is the hottest month of the season. The temperature occasionally touches 47^0 centigrade and scorching dust-laden winds; commonly known as loo, blow during the hot season. The temperature drops considerably with the onset of monsoon in early July, although the nights continue to be quite warm. Due to increased humidity in the monsoon period, the weather is oppressive during rains.

Based on the climatic conditions in the district, the year may be divided into four seasons. November to March is the cold season, which is followed by the hot season lasting up to the end of June. The period from July to mid September constitutes the rainy season commonly known as the period of southwest monsoon. The second half of September and October is termed as the period of post monsoon. January is the coldest and June, the hotest month. The period from November to February is cold; in winter, light frost or rains may be experienced. In March weather becomes fine. The following table gives monthly rainfall based on average of 5 years, 1996-2000 for the district

MONTHLY RAINFALL-AVERAGE OF 5 YEARS, 1996-2000

Month	Rainfall (mm.)	Month	Rainfall (mm.)
1. January	6.1	7. July	67.9
2. February	8.9	8. August	51.4
3. March	3.0	9. September	43.1
4. April	7.8	10. October	7.5
5. May	4.9	11. November	1.0
6. June	20.1	12. December	1.5
Total			223.2

Forestry:

Bathinda district falls under the jurisdiction of Divisional Forest Officer, Bathinda. Due to the extension of agriculture the area under forests has declined appreciably during the present century. The district was known as jungle once but jungles are no longer to be seen anywhere. The break up of area under various type of forests in the district during 2000-01 is as follows :-

Serial No.	Type of Forest	2000-01 (in sq. km.)
1	Reserved Forests	-
2	Protected Forests	67
3	Unclassified Forests	8
4	State Forests (Total 1 to 3)	75
5	Under S/38 of Indian Forest Act, 1927	-
6	Total Forest (total 4+5)	75
7	Percentage of area under forest	2.2 %

The table reveals that during 2000-01 the area under state forests is 75 sq. km. However, during 2000-01, no area has been reported under the private forests. But the percentage of area under forest is 2.2 per cent, which is far below the norm prescribed for forest cover in the State. With the shifting over of management of road sides, canal banks and strips of land along railway lines to the Forest Department for growing and maintaining tree plantation therein, some improvements have taken place during last few decades in the district. The plantation of **shisham** and **kikar** trees will not only provide much needed timber to the people but also ensure better returns to department.

Natural Economic Resources

Mineral and Mining :

The district is poor so far as mineral wealth is concerned. Some **Kankar** (calcarious nodules) is found at some places, particularly in Utar. It is used for road construction and is also burnt for lime. Black clay from which bricks are made also occurs in small quantities. Fine white clay is also found which is used for white washing. In some areas **Shora** (Saltpetre) is extracted but it is limited only to a few pockets bordering Faridkot district, where patches of **Kallar** have appeared

Land and Land use Pattern:

In the year 2000-2001 against a geographical area of 334,000 hectares, the area of the district. as per the village records is 337.000 hectare. The two sets of areas show difference due to different methods adopted for measurement by two separate agencies.

However, for the purpose of discussion in the succeeding pages we will refer to area as per village papers only. It may be noted that out of a total area of 337 thousand hectares as per village papers, 7 thousand hectares is under forest, 30 thousand hectares is put to non-agricultural use and 1 thousand hectares is under Culturable Waste. There are 299 thousand hectares. 'Net Area Sown' in the district during 2000-01, which is 88.7 per cent of total area out of which 263 thousand hectares, is sown more than once. Thus the total cropped area works out to 562 thousand hectares in the district during 2000-01.

Bathinda district is mainly an agricultural district as 70.3 per cent of its population is reported to be residing in the rural areas during 2001 Census. Further agriculture alone engaged 51.3 per cent of its main workers during 2001 Census (cultivators 29.8 per cent, agricultural labourers 21.5 per cent). Thus it would be seen that agriculture provides the single largest source of employment in the district though decline is noticeable during the last few decades.

Kharif (sawani) and Rabi (harhi) are two main harvesting seasons The principle Kharif crops include paddy(rice), jawar, bajra, sugarcane, groundnut. The Rabi crops include wheat, gram, barley, some oil seeds, pulses, etc. Seasons additional crops are also grown where conditions so permit. These are known as zaid-Kharif and zaid-Rabi.

Bathinda district, like other districts in Punjab is progressing towards a rice-wheat cropping system along with the prevalent cotton-wheat cropping system. Rice crop is grown more in northern part of the district, where the irrigation is mostly by wells, whereas the cotton crop is grown mostly in central and southern part of the district, where the irrigation is mostly by canals.

During 2000-01 the district reported an area of 277,000 hectares under Rabi against 285,000 hectares under kharif. Further out of 562,000 hectares of total cropped area of district, 360,000 hectares and 202,000 hectares are reported under food and non-food crops respectively. Thus the total cropped area is reported under food and non-food crops in the district is the 2nd highest for any district in the State The break up of area under various crops in the district during 2000-01 was as under ! wheat 243.0 thousand hectares cotton 447.0 thousand hectares (American 414.7 thousand-hectares and desi 32.3 thousand hectares) and Paddy 99.0 thousand hectares.

Irrigation:

This district relatively falls in low rainfall region and thus irrigation has a vital role to play. The main sources of irrigation are the canals. as the rains are low and erratic even during the monsoons. Also the sub-soil water is low and brackish, which is considered unsuitable for irrigation. Besides the canals, tubewells (13958 as on 31st march, 2001) are the other source of irrigation in the district, Irrigation by well is also resorted to but to a limited extent. The irrigation is done mainly from Sirhind canal (Bathinda branch, Musa branch, Kotla branch, Odat branch, Biroke branch and New Dhodal branch), but some areas are also irrigated from Bhakra canal and other fluvial distributories (Dhapali, Phul, Gumman, Bangi, Bhadaur, Raonta, Joga Bhikhi and Sunam).

During the year 1990-91 the net irrigated area reported was 451,600 hectares, out of which 368,000 hectares from government canals and 83,600 hectares from tube wells. Thus percentage of net area irrigated to net area sown worked out to 92.0 per cent for this district during 1990-91. Also during 1990-91 out of 838,000 hectares gross cropped area 786,000 hectares was irrigated. During 1990-91 percentage of gross irrigated area to gross cropped area worked out to 93.8 per cent for Bathinda.

However, during the year 2000-01 the net irrigated area reported was 294,900 hectares, out of which 2,30,500 hectares from government canals and 64,400 hectares from tubewells. Thus percentage of net area irrigated to net area sown worked out to 98.6 per cent for this district during 2000-01. Also during 2000-01 out of 562,000 hectares gross cropped area 557,800 hectares was irrigated. During 2000-01 the percentage of gross irrigated area to gross cropped area worked out to 99.3 per cent for Bathinda.

Horticulture:

Horticulture is gaining popularity in the district for the last few years. During 2000-01, an area of 2119 hectares was reported under various fruit trees. The break up of area under various fruit is as follows: Kinnows 670 hectares, Grapes 806 hectares, Orange

and Malta 173 hectares, Ber 271 hectares, Guava 249 hectares, other miscellaneous fruit 50 hectares. The area under orchards is very limited due to various factors such as high temperature, stormy wind conditions, and unsuitability of sub-soil water for irrigation and inadequacy of canal water. In spite of these limited factors the district has reported sizeable area under grapes and kinnows. The area under grapes would have been much more had there been efficient arrangements for procurement of grapes, the farmers had to make their own arrangements for marketing these fruit. The farmers have persistently demanded the setting up of some factory to process their produce to bring them remunerative returns from grapes, which require very delicate handling before disposal. Day by day the attitude of the farmers is changing and horticulture has become very popular in the district.

The vegetables are also grown in the district. An area of 5,645 hectare was reported under vegetables during 2000-01. The break up of area is as follows. (1) Potatoes 3350 hectares, (2) Onions 113 hectares,(3) winter vegetables 1072 hectares and summer vegetables 1110 hectares. The demand for vegetables is picking up in the district as the urban centres have grown over the years. The establishment of various colonies etc. under various central and state projects increased the demand for vegetables.

Besides compost (both in urban and rural), cattle dung, green manures and chemical fertilizers are increasingly being used in this district. During 2000-01, 68,000 tonnes of chemical fertilizers mainly nitrogenous (50,000 tonnes) and phosphatic (17,000 tonnes) were consumed in the district for growing improved varieties of wheat, paddy sugarcane, cotton, etc. The farmers are, however, becoming conscious of the deleterious effects of reckless use of chemical fertilizers in their farms. The farming scientists are required to provide them with some alternative nutritive soil agents so that crop yields do not suffer.

Animal Husbandry :

Livestock, the back bone of the peasantry and the farmer, has traditionally been depending upon draught animals for plouging and on milch cattle, mainly cows and buffaloes, for milk and other dairy products for domestic use and for supplementing their farm income.

The data on live stock in Punjab is available for the year 1997. It reveals that there are 1,31,700 cows, 2,28,900 buffaloes, 2700 horses and ponies, 2,100 donkeys, 300 mules, 77,100 sheep, 53,700 goats, 21,400 camels and 2,700 pigs, totalling 5,20,600 animals. Cows (25.3%) and Buffaloes (44.0%), as else where, are the two most dominant milch animals in the district. The district can boast of a fairly rich cattle wealth. The decline in the number of cattle is attributable to the mechanization of agriculture and transportation, which makes lesser demand of draught cattle. However, the ever- increasing demand of milk in the urban centres and the state has increased demand of milch buffaloes, which are mainly of good breads (murrah and nili).

In 2000-01 there were 87 veterinary Hospitals, 87 veterinary dispensaries and 3 sheep and wool extension centres and insemination units in the district wherein 72 veterinary officers and 147 veterinary pharmacists were posted.

The poultry birds had recorded 9.9 per cent increase from 288,100 birds in 1990 to 316,600 birds in 1997. The poultry farming is now being practiced on scientific lines, which is evident from the large number of poultry farms located in the district. This has been made due to acceptability of egg as a vegetarian food.

In order to provide good quality meat to the general public, 11 recognized slaughterhouses were functioning in the district during 2000-01 where 28,771 animals (26,099 sheep and goats, 2,672 pigs) were slaughtered.

A 1.25-lakh litre capacity milk plant is located at Bathinda. It had 5 chilling centres attached to it which not only collect milk from the villagers at the remunerative price, but process and supply milk and various milk products also to the general public throughout the year at reasonable prices.

Fisheries:

Pisciculture has been taken up in a big way in the district. An area of 552 hectares was stocked with fish wherein 7940 thousand fingerlings were raised. An income of Rs. 61,000 accrued at the fisheries department in the district during 2001. One fish seed farm and one fish seed nursery were located in the district where seeds were produced for distribution among the fish farmers of the district.

Tenancy:

The areas now constituting this district were earlier in Patiala state, where feudal institutions like Jagirdari and Biswedari were prevalent which had since been abolished under various land reforms measures introduced after independence. As a result many occupancy tenants had become proprietors. Similarly tenancies at will that were able to purchase land under the law also became proprietors. Also ceilings on land resulted in surplus lands, which were distributed among the landless cultivators on payment of compensation. For fear of being deprived of their land many landlords have taken to self- cultivation and have introduced mechanization in agriculture in a big way. The farmers generally cultivate their land themselves or through servants. This system is known as Khudkasht (Self-cultivation). In some cases the land is leased out to other marginal farmers or tenants on Batai (share cropping) or Theka (contract). The general rate of Theka (contract) varies from time to time depending upon the provision of irrigation, fertilizers etc. However, the rate of Theka (contract) varies from time to time depending upon the quality of land and the period of contract. As a large number of farmers own tractors, some of them offer services for various agricultural operations against cash payments. This system is gaining popularity in the rural areas.

Agriculture is now being carried on commercial lines as cash crops like cotton and paddy are being raised in the farms with the help of contractual labour which is available locally or from outside. This has imbibed a scientific outlook among the farmers resulting in a vast and fast development of agriculture in the district.

Industry :

During the princely times there was not much industrial activity in the district. Village industries like handloom weaving, oil extraction by wooden Kohlus, manufacture of agricultural implements, juti making, baan making, gur and shaker manufacture, calico printing and phulkari making were in vogue in the rural areas. Durries in floral designs were manufactured in the urban centres like Bathinda, Rampura Phul etc. Calico printing was popular in Talwandi Sabo. There was a colony of potters (Kumhars) at Bathinda who produced quality earthenware, especially surahis. Desi juties (country shoes)of good quality were produced at Bathinda. Ban making was done at Bathinda. Phulkaries were produced at Rampura Phul.

Day by day industry is also developing in this backward area. The following kinds of industrial units in the small scale sector are now active in the district: Agricultural implements, Guru Gobind Singh oil refinery, sewing machines parts, steel rolling mill, wood and screws, electric goods, radio transistors and sound equipment, condume pipe and plastic goods. Between the medium and large-scale industrial units there has been quite an expansion. The various medium and large-scale units located in the district are as follow:

1.Milk Plant : A Milk plant is located at Bathinda in the public sector. The Plant has a capacity to process 1.25-lakh litre of milk daily during 2000-01. It has 3 chilling centers and number a of collection centres attached to it in the district.

2.National Fertilizer Plant : A chemical Fertilizer Plant of National Fertilizer Plant Ltd. engaged in the manufacture of Urea, has been set up to meet the needs of the district and other southern districts of the state.

3.Cement Plant : A Cement plant is fast coming up (since completed) in the private sector at Bathinda. It will utilize coal ash from Guru Nanak Dev Thermal Plant for the manufacture of cement. Gujrat Ambuja Group of Companies is installing the plant. It will go a long way in meeting demand of cement of southern district in the state.

4.Rice shellers : There are a large number of rice shellers located in the district, which meet the local demands for dehuskihg of paddy.

5.Dal manufacturing units : The district is a big producer of gram. Hence, a number of units are engaged in the manufacture of dal etc. in the district.

Transports :

An efficient network of roads and railway is an essential requirement for development of any area as it is the backbone of any development activities. The district is well served by both roads and railway. The Bathinda Railway Junction is one of the biggest

junctions in the State. It is from here that railway lines fan out towards various directions in this district such as :

(1) Bathinda-Firozpur railway line : It serves Bathinda tahsil. It is a broad gauge line.

(2) Bathinda-Sri Ganganagar railway line : It also serves Bathinda tahsil. It is a broad gauge line.

(3) Bathinda-Jakhal-Delhi railway line : It serves Bathinda and Talwandi Sabo tahsils. It is a broad gauge line.

(4) Bathinda-Rajpura railway line : It serves Bathinda and Rampura Phul tahsils. It is a broad gauge line.

(5) Bathinda-Kot Kapura-Fazilka railway line : It serves Bathinda tahsil. It was originally a metre gauge line but has recently been converted into broad gauge railway line under the gauge conversion programme.

(6) Bathinda-Hanumangarh-Bikaner railway line : It serves southern part of Bathinda and western part of Talwandi Sabo tahsils. It was originally a metre gauge line but has been converted into broad gauge railway line under the gauge conversion programme.

(7) Bathinda-Sirsa-Rewari railway line : It serves Bathinda and Talwandi Sabo tahsils. It was originally a metre gauge line but has since been converted into broad gauge railway line under the gauge conversion programme undertaken by the railways.

The following railway stations are located in the district : (1) Gehri Bhagi, (2) Shergarh, (3) Bangi Nihalsingh, (4) Raman, (5) Gurusar Sainewala, (6) Sangat, (7) Bagwali, (8) Bathinda, (9) Kartar Singhwala, (10) Kot Fateh, (11) Maisar Khana, (12) Maur, (13) Balluana, (14) Behman Dewana, (15) Phus Mandi, (16) Bhucho, (17) Rampura Phul, (18) Lehra Mohabat.

In the year 2000-01 there were 2,177 Km. of roads maintained by PWD (B & R), in Punjab, out of which 110 Km. was under the National Highways (NH-15), whereas the remaining 2,067 Km. was provincial highway. Besides, there was 417 Km. of municipal roads maintained by the civic bodies.

Taking 2594 Km. of road length into consideration, there were 77.4 Km. of roads per 100 Sq. Km. of area and 219.2 Km. of roads per lakh population in the district in the year 2000-01. But in 1990-91, there were 59 Km. of roads per 100 Sq. Km. of area and 199 Km. of roads per lakh population.

The important roads in the district are : (1) Bathinda- Malout road, (2) Bathinda-Kot Kapura road, (3) Bathinda-Talwandi Sabo road, (4) Bathinda-Muktsar road, (5) Bathinda-Dabwali road, (6) Bathinda- Sunam road, (7) Bathinda- Barnala road, (8) Rampura Phul-Moga road etc.

In the year 2000-2001 (31st March, 2001) 141,609 vehicles were registered in the district. The break up of on road vehicles is as follows: 565 buses; 7,479 station wagons; 1489 jeeps; 150 taxis; 75166 two wheelers, 282 three wheelers. Besides, there were 3149 goods vehicles, 53207 tractors and 122 others. It is pertinent to mention here that the number of tractors was the second highest in the district next only to Firozpur district (55,174), in the State.

The district is well served by the Public Road Transport system. The district being part of erstwhile PEPSU, State, the bus routes are mainly with the Pepsu Road Transport Corporation (PRTC), which has following two depots operating in the district: (1) Bathinda -I (It has 93 buses in 2000-2001, against 98 in 1990-91); and (2) Bathinda-II (It operated 90 buses in 2000-01, against 99 in 1990-91). Thus it would be seen that fleet of buses has decreased in the district on the whole during the 1991-2001 decade due to Mansa tahsil becoming a separate district in 1992. The Government has also been hiring buses from private sector on kilometer basis. The other depots of PRTC and Punjab Roadways also operate buses on various routes in the district. There are a number of private operators also, who provide transport services in areas not served by Government transport operators.

The increase in vehicles has resulted in increase of accidents in the district. In 1990 there were 90 accidents in which 44 persons were killed and 71 injured. But in 2000, 150 accidents took place, which resulted in loss of 97 precious lives and caused injuries to 178 persons in the district.

Post and Telegraph and Radio:

There is a good net work of post and telegraph offices in the district. The telephone facilities have also been greatly improved throughout the district. Mobile and land line telephone have reached almost all villages of the district.

There is a Relay Station of All India Radio (Akashvani) at Bathinda which relays programmes of Jalandhar Station and caters to the needs of local residents as well as residents of the adjoining districts.

Electricity and Power:

The erstwhile rulers were well aware of the technological changes taking place in the world. They therefore, were the first to introduce electricity in their areas in the beginning of the present century. The state government Public Works Department replaced the private suppliers of electricity. However, after some time, the responsibility of supplying electricity as bestowed upon the Punjab State Electricity Board, Patiala.

In the year 2000-01, Bathinda district consumed 595.8 million units of electricity. The break up by various sectors of electricity consumed in the district is as follows: (1) Domestic 171.3 million units, (2) Commercial 34.4 million units, (3) Industrial 181.4 million units, (4) Agricultural 157.7 million units (5) and Others 51.0 million units. During 2001-02, the district consumed 3.09 per cent of the total state's consumption. If we study 1990-91 figures we find that Bathinda district consumed 459.1 million units of electricity. The break up of electricity consumed by various sectors was as follows: (1) Domestic 98.9 million units, (2) Commercial 14.1 million units, (3) Industrial 212.4 million units, (4) Agricultural 111.6 million units, (5) and Others 22.2 million units showing a decadal growth of 29.8 per cent. Also the district consumed 3.9 per cent of state's total consumption of electricity during 1990-91.

The government has set up a thermal plant (Guru Nanak Dev Thermal Plant) at Bathinda to make available electricity to various types of consumers as the district was distantly located from the hydro power stations of Satluj and Beas river system. Further thermal power generation was necessitated to avoid fluctuations during the winter months when less electricity was generated in the hydro power station. This plant has come up in three stages. The first stage envisaged setting up of two units (110 x 2MW) of 220 Mega Watt capacities, the second (200 x 2MW) 400 Mega Watts and the third one (210 x 2) of 420 Mega Watts capacity. The first two stages had been completed since long whereas the third stage has also been completed a late. Thus the GNDTP, Bathinda has a total installed capacity of 1040 Mega Watts in all. The average plant load factor achieved during the year 1986-87 was 58.8 per cent. The total generation during the year 1986-87 was 226,721 Million Units.

It was felt by the Energy Planners that to meet over increasing demand for electricity, another thermal plant should be set up, Consequently work was started on the Guru Hargobind Sahib Thermal Plant at village Lehra Mohabat, in this district. This thermal plant will have a capacity of 220 MW. Bathinda is one of the leading districts in generating the electricity in the state.

Trade and Commerce:

The areas constituting present day Bathinda district were known as "Jungle" where desert like conditions prevailed. But it being an important centre of halt, enroute Delhi, assumed importance as a centre of both administration and trade and commerce. It further developed into an important centre of railways as seven broad gauge railway lines met here from different directions. The extension of canal irrigation with building of Sirhind Canal and Bhakra Canal systems ushered in prosperity. The agricultural development resulted in the emergence of grain markets all over the district, which gave much-needed fillip to the trade and commerce in the district. The position further developed when government built up an excellent road network in the district.

As per the data available for the year 2000-2001, out of 144 regulated markets in the state, 9 are located in Bathinda and on an average, each regulated market is serving 32 villages in the district compared with 88 villages in the state as such. These nine regulated markets are at Bathinda, Bhucho, Goniana, Maur, Raman, Rampura Phul, Sangat, Bhagta Bhaika and Talwandi Sabo. In the year 2000-01 there were arrival of 670,600 tonnes of agricultural produce in the Mandis (Markets) of the district. Out of the total arrivals of agricultural commodities, wheat and paddy accounted for 101,400 tonnes (15.1%) and 35,000 tonnes (5.2%) respectively. There were, however, total arrivals of 1,569,400 tonnes of agricultural commodities in the district during 1990-91, out of which wheat, paddy and maize accounted for 655,000 tonnes and 2,50,000 tonnes respectively, thus showing a 57.3 per cent

decrease in total arrivals in 2000-01 awing to diversification towards other crops and formation of Mansa district out of Bathinda district.

Though the wholesale and retail trade is mostly in the private hands in the district, there is a wholesale Co-operative Marketing and Supply Society at Bathinda, which undertakes wholesale supplies of agricultural implements, seeds, fertilizers, pesticides, kerosene oil, sugar, edible oil, etc. to the farmers/ members.

During 2000-01 there were 8 marketing co-operatives, 236 milk supply co-operatives, 287 weavers' co-operatives, 6 consumer's co-operatives, 56 housing co-operatives, 164 agricultural co-operatives societies and 47 non agricultural co-operatives societies in the district. Besides, there were a number of co-operatives consumer stores in the district. In order to ensure availability of essential commodities, such as wheat, wheat flour, rice, sugar, kerosene oil and cheap cloth to poorer sections of the society in rural as well as in urban areas at reasonable rates, the government introduced State trading. Under this scheme, a large number of fair price shops are being run either through co-operative societies or private traders where essential commodities are supplied to general public at subsidized rates under the scheme of Public Distribution System (PDS).

Goods are also traded at various places in the district on the occasion of fairs participated by a large number of visitors. Cattle fairs are also held at various places in the district where cattle/animals change hands. Bathinda being centrally located between Bangar (Haryana), Bagar (Rajasthan) and Punjab, attracts a large number of cattle traders.

On 31st December 2000, there were 185 branches of various banks, operating in the district. The break up of these branches is as follows; State Bank of India (SBI) 17, State Bank of Patiala (SBP) 47, Punjab National Bank (PNB) 19, Co-operative Banks 51, and Other Commercial Banks 51. As against this in 1980,141 bank branches were functioning in the district (SBI 16, SBP 33, PNB 15, Co-operative Banks 47, Other Commercial Bank 30). Thus, it would be noted that Bathinda district has not made notable progress in the number of bank branches during the last two decades.

Miscellaneous Activities :

Though this district was declared industrially backward a long time ago but it could not make rapid progress in this field due to its location. The government has made special efforts to generate sufficient power for supply to industries and agriculture. Besides expanding the Guru Nanak Dev Thermal Plant at Bathinda, efforts are afoot for setting up a second thermal plant (Guru Har Krishan Thermal Plant) at Lehra Mohabat located on Bathinda- Rajpura railway line. With its completion the district will emerge as the biggest centre of power generation in the State surpassing even Rupnagar District.

Special stress is being laid on the development of this district in education. The State Government has set up an Engineering College at Bathinda. The University has also opened Guru Kashi Institute at Bathinda and a Regional Campus at Damdama Sahib (Talwandi Sabo). This Regional Campus will serve as a nucleus centre for professional courses in the district.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be

any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituents a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under

'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 100,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in huge pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

List of Scheduled Castes and Scheduled Tribes:

The Government of India by Gazette Notification under Article 314(1) of Indian Constitution has declared some castes, races or tribes or parts of or groups within castes, races or tribes as Scheduled Castes as there is no standard definition of Scheduled Castes. Similarly, Scheduled Tribes mean all such

tribes or tribal communities or parts of or groups within such tribes or tribal communities as are declared by the President of India to be treated as Scheduled Tribes under Article 342(1) of the Indian Constitution. There is slight change in the definition of Scheduled Castes in 1991. Before that, Scheduled Castes could belong to Hindu or Sikh religion. But from 1990, in addition to Hindu and Sikh religions, Scheduled Castes may belong to Buddhists religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In Punjab State, 37 castes were notified by the State Government as Scheduled Castes at the 1991 Census and there is no change at the 2001 Census. Following 37 castes have been notified as scheduled castes in Punjab;

1. Ad Dharmi
2. Balmiki, Chura, Bhangi
3. Bangali
4. Barar, Burar or Berar
5. Batwal
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar Raigar, Ramdasi or Ravidasi
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhilla, Gandil, Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut, Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and / or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

(vi) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz.

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live birthsduring the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

i) Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1,000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

1) Migration

2) Internal and International Migration

3) Rural - Urban component of migration

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UACity/Town. These are :

M7 (5,000,000 and above)
M6 (2,000,000 to 4,999,999)
M5 (1,000,000-1,999,999)
M4 (500,000-999,999)
M3 (300,000-499,999)
M2 (200,000-299,999) and
M1 (100,000-199,999)

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001-Census Findings-Population and its distribution

The following table shows distribution of rural and urban population by tahsils in the district.

POPULATION, NUMBER OF VILLAGES AND TOWNS, 2001

Name of Tahsil	Population									Number of Villages		No. of Towns
	Total			Rural			Urban					
	P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13
Rampura Phul	283,606	150,,259	133,347	238,941	126,567	112,374	44665	23,692	20,973	76	76	1
Bathinda	631,475	340,083	291,392	371,480	200,120	171,360	259995	139,963	120,032	120	116	6
Talwandi Sabo	268,214	142,467	125,747	221,120	117,431	103,689	47094	25,036	22,058	88	88	2
District total	**1,183,295**	**632,809**	**550,486**	**831,541**	**444,118**	**387,423**	**351,754**	**188,691**	**163,063**	**284**	**280**	9

Bathinda district has a population of 1,183,295 including 632,809 males and 550,486 females. This makes 4.9 per cent of State's population.

Among the tahsils, Bathinda with a population of 631,475 is the most populous while Talwandi Sabo with a population of 268,214 is the least populous tahsil in the district. In other words, tahsil with the highest population is more than twice the tahsil having least population. The population of other tahsil (Rampura Phul) is 283,606. A tahsil in the district on an average has a population of 394,432 compared with 338,319 in the State as a whole.

Out of the total population in the district 831,541 (70.3%) is residing in rural and 351,754 (29.7%) in urban areas. The corresponding percentages of rural and urban population in the State are 66.1 and 39.9 respectively. The rural population spreads over 280 inhabited villages and urban population is distributed over 9 towns in the district An inhabited village in the district on an average has a population of 2,970 as against 1,311 in the state signifying that the villages in Bathinda district are much larger in size. Towns, on the other hand, are comparatively smaller in the district as compared with that of the State; a town

in Bathinda district on an average has a population of 39,084 as against 52,627 in the state. Among the towns in the district, Bathinda MCI (217,256) is the most populous while Bhisiana C.T (4,775) is the least populous town in the district.

Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the Census organization to classify towns according to their population size. A town with a population of 100,000 or more is termed as 'city' in Indian census.

Class	Population size	No. of Towns
1	2	3
Class – I	100,000 and above (Generally referred to as city)	1
Class – II	50,000 to 99,999	0
Class – III	20,000 to 49,999	2
Class – IV	10,000 to 19,999	3
Class – V	5,000 to 9,999	2
Class – VI	Less than 5,000	1

Bathinda City with a population of 217,256 is the only class I town in the district. There is no Class II town in the district, two fall in the population size class III, three are class-IV towns, the two are Class V towns, and remaining one is Class VI town. Nearly three-fifth (61.8%) of the urban population in the district is residing in Class I town and 20.5 per cent is residing in Class III towns in the district. The share of Class IV towns is 13.0 per cent, while class V and VI towns accommodate only 3.4 per cent and 1.3 per cent respectively of the urban population in the district.

During this decade the number of towns has gone up from 8 in 1991 to 9 in 2001. There has been an addition of 1 town, with a population of 4,775, which is 1.3 per cent of the urban population of the district. The new town added, Bhisiana C.T., falls in the category of Class VI towns. No town of 1991 has been declassified at the 2001 Census.

Population Growth, Density and Sex Ratio

Population Growth :

During 1991-2001, population of Bathinda district has increased from 985,301 in 1991 to 1183,295 in 2001 resulting in a net addition of 197,994 persons during this decade. In percentage terms the Bathinda district has recorded a decadal growth rate of 20.1 per cent. Among the districts, Bathinda ranks 7th and this growth rate is at par with that of state (20.1%).

Density :

Bathinda district with a population of 1,183,295 and an area of 3,353 sq.km has a density of 353 persons per sq. km, which is significantly lower than that of the State (484) and ranks 13th among the districts in the state.

Within the district, Bathinda (416) is the most densely populated tahsil and Talwandi Sabo (275) is the least populated tahsil. Likewise, rural density varies between 267 in Bathinda and 231 in Talwandi Sabo tahsil. The urban density is the highest in Rampura Phul (5,030) tahsil and the lowest in Bathinda (2,015) tahsil.

Sex Ratio :

Sex ratio is derived as the number of females per 1,000 males. Generally speaking differentials in mortality conditions of males and females, male-female ratio at birth and sex selective migration are the key factors, which determine the sex composition. It reflects the socio-economic and demographic characteristic of the population, and unfolds the status of women in the society and care of the girl child in particular.

Significant feature of Punjab's population is the preponderance of males over females. According to Census 2001, out of the total population of 24,358,999 in the State, 12,985,045 are males and 11,373,954 are females resulting in an overall sex ratio of (876) which is significantly lower than the country as whole (933).

The sex ratio in the State and its constituent districts has remained to be low throughout. At the beginning of the 20th century, the sex ratio was 832 in 1901, which declined to 780 in 1911. Ever since, the sex ratio in the state gradually improved till 1991 when the sex ratio in the state reached 882. However, it has declined to 876 at 2001, exhibiting a fall of 6 points in the State.

In Bathinda district details prior to 1951 census are not available. Ever since 1951 the sex ratio in the district has gradually improved from 833 in 1951

to 870 in 2001. Within the State the districts among themselves show considerable disparity which is the highest in Hoshiarpur District (935) and the lowest in Ludhiana (824).Bathinda district with a sex ratio of 870. ranks 14th among the districts in the State exceeding only three districts namely Patiala, Ludhiana and Fatehgarh Sahib. Apparently, sex ratio in the district is significantly lower than the State, which in itself is marked with a low sex ratio.

Among the tahsils in the district the sex ratio is the highest in Rampura Phul (887) and the lowest in Bathinda (857). The rural sex ratio varies between 888 in Rampura Phul and 856 in Bathinda tahsil, the urban sex ratio fluctuates between 885 in Rampura Phul and 858 in Bathinda tahsil. The towns among themselves exhibit significant disparity in this regard; it varies between 893 in Kot Fatta and 683 in Bhisiana.

The sex ratio of child population in age group 0-6 in the State and its constituent districts is quite low and this has become a matter of deep concern. Punjab has a child sex ratio of 798; it is almost identical in its rural (799) and urban (796) areas. In Bathinda district, the child sex ratio (785) is even lower than that of the State. Within the district, the tahsils among themselves display a considerable disparity in their child sex ratio; it is the maximum in Rampura Phul (795) and the minimum in Bathinda (780).

Likewise, the disparity in the rural and urban child sex ratio among the tahsils is also quite marked; the rural child sex ratio varies between 798 both in Rampura Phul and Bathinda and 786 in Talwandi Sabo, while the variation in urban child sex ratio is to the extent of 794 in Talwandi Sabo and 752 in Bathinda.

Literacy:

Any person who is able to read and write with understanding in any language is recorded as literate. As in 1991 all the children below 7 years of age have been treated as illiterates.

69.7 per cent of the state's population is literate which is higher than that of the country as such (64.8%). Among the States/Union Territories, Punjab ranks 16th in terms of literacy.

In Bathinda district 61.2 per cent of the population is recorded as literate which is significantly lower than the state by 8.5 percentage points. It ranks quite low among the districts in the State. Firozpur, Muktsar, Sangrur and Mansa are the only other four districts which have literacy rate lower than that of Bathinda. Among the tahsils in the district, Bathinda (65.8%) ranks at the top while Talwandi Sabo (53.4%) is placed at the bottom. However, none of these tahsils in the district has literacy rate higher than the overall literacy rate in the state.

Between the two sexes, the gap in the literacy rate among males and females in the district is more significant as compared to that of the State. In Bathinda district 67.8 per cent among males and 53.7 per cent among females are literate, while the corresponding figures for the State are 75.2 and 63.4 per cent respectively.

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district 55.1 per cent of the rural population and 75.4 per cent of the urban population is literate. The urban literacy is higher than the rural in all the tahsils and the gap in urban literacy rate is maximum in Bathinda (19.6 percentage points) and minimum in Talwandi Sabo (16.4 percentage points). The corresponding gap in male and female literacy rate in rural areas is highest in Bathinda (16.5 percentage points) and lowest in Rampura Phul (11.4 percentage points). Similarly for urban areas, this gap is 15.2 percentage points in Talwandi Sabo and 12.0 percentage points in Bathinda

Work Participation Rate

Definition of Work and Classification of Workers:

How the 'work' is defined by the Census needs to be understood properly. Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the Census of India 2001, which includes production of milk even for domestic consumption. In the 1991 Census cultivation of certain crops even for one's self-consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as

tomatoes, all types of flowers, fruit and tuber potatoes, chilies and turmeric, viper, cardamoms, vegetables etc, in other words plantation of tea, coffee, rubber, coconut and betel nuts have been classified under plantation and not included in cultivation.

The reference period for recording the economic activity of any person is preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last year are recorded as main workers while those who had worked for less then six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, workers in Household Industries and other workers.

Punjab, with a work participation rate of 37.5 per cent, ranks 24th among the States/Union Territories in the Country and thus, the work participation rate in the State is lower than that of India (39.1%). Among the districts in the State, the proportion of workers varies between 44.9 per cent in Nawanshahr district and 33.3 per cent in Gurdaspur district. In all 10 out of 17 districts in the State have shown work participation above the state average and among them five districts have two-fifths of their population reported as worker. Besides Nawanshahr, they include Bathinda (42.3%), Mansa (40.9%), Sangrur (40.7%) and Moga (40.1%).

Main Workers and Marginal Workers :

32.2 per cent of Punjab's population has been recorded as Main Workers and 5.3% as Marginal Workers. The corresponding figures for 1991 Census were 30.1 per cent and 0.8 per cent respectively. In Bathinda district Main Workers and Marginal Workers constitute 34.6 per cent and 7.8 per cent of the total population respectively. Among the tahsils in the district the percentage of workers varies between 46.9 in Rampura Phul and 39.3 in Talwandi Sabo tahsil. The percentage of Marginal Workers varies between 23.5 in Talwandi Sabo tahsil and 14.0 in Bathinda tahsil.

The work participation rate in Bathinda district (42.3%) is better than the state average (37.5%). Among the tahsils in the district, it varies between 47.0 per cent in Talwandi Sabo and 39.4 per cent in Bathinda. In the district 55.2 per cent among males and 27.5% among females are reported as workers showing a significant reduction in the gap between the two. In Talwandi Sabo, one-third of the females (36.7 per cent) are recorded as workers.

Out of the total workers, 34.6 per cent are main workers and 7.8 per cent are marginal workers. The proportion of main workers is the highest in Talwandi Sabo (36.0%) and the lowest in Bathinda tahsil (33.9%). However, the proportion of marginal workers is significantly higher in Talwandi Sabo tahsil (1.0%) followed by Rampura Phul (9.6%) and Bathinda (5.5%). Further, the incidence of marginal workers is observed to be more among females compared with males. The proportion of marginal workers in the district among females (12.2%) is excelled only by district Mansa (12.4%) and is more than thrice that of males (3.9%). By and large, a similar pattern is observed among all the tahsils in the district. In Talwandi Sabo, 19.0 per cent of females are marginal workers as against 4.0 per cent among male counterparts. Rampura Phul (15.1%) and Bathinda (7.9%) too, have a higher proportion of female marginal workers.

Religion :

It has been customary for the Indian Census to provide information on religious persuations of its people. Religion is one of the basic cultural characteristics of population and several religions have thrived in the secular state of India. Apparently, information on various religious communities in the country has been of great interest and useful to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. Question 7 of the household schedule canvassed at the 2001 Census pertained to religion. The instructions to enumerators were to record faithfully the religion of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes in Census 2001:-

Hindus	-	1
Muslims	-	2
Christians	-	3
Sikhs	-	4
Buddhists	-	5
Jains	-	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

The instructions for recording this information are by and large the same as in 1991. A brief analysis based on 2001 Census data is given under annexure V.

Mother Tongue :

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. It may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Question 11 of the Household Schedule was aimed to collect information on 'other languages known' (up to two languages in order of proficiency).

A brief note along with table based on 1991 & 2001Census data is given in Annexure VIII.

Scheduled Castes and Scheduled Tribes :

Out of the total population of 24,358,999 in the state 7,028,723 belong to scheduled castes as per 2001 Census. As such 28.9 % of the state's population belongs to scheduled castes and 30.0 % of the district population belongs to scheduled castes.

Among the tahsils it is the highest in Talwandi Sabo (30.9%), while Bathinda (29.3 %) is the lowest and Rampura Phul (30.7%) falls in-between Talwandi Sabo and Rampura Phul tahsils and both of these have recorded higher percentage than that of the district average.

In consonance with the general trends in the state, scheduled castes are more rural by residence. In the district 32.7 per cent of population in rural area belongs to scheduled castes while the corresponding percentage in urban areas is 23.5 per cent. In Bathinda tahsil scheduled castes comprise one-third (34.0%) of rural population and this percentage is the highest among all the tahsils in the district. On the other hand it is the lowest in Talwandi Sabo (31.0%) outdone by Rampura Phul (32.2%).

During the 1991-2001 scheduled castes population in the state has increased by 22.4 per cent which is marginally higher than that of Bathinda district (22.1%). In the district 41.5 per cent of the scheduled castes population is literate which is significantly lower than that of the state (56.2%).37.2 per cent of scheduled castes population in rural areas and 55.3 per cent in urban areas of Bathinda district is literate.

There is no scheduled tribe population in the State.

(viii) Brief Analysis Based on Primary Census Abstract

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Rampura Phul	241,634	206,104	35,530	283,606	238,941	44,665	17.4	15.9	25.7	14.7	15.7
2	Bathinda	507,651	319,846	187,805	631,475	371,480	259,995	24.4	16.1	38.4	37.0	41.2
3	Talwandi Sabo	236,016	193,561	42,455	268,214	221,120	47,094	13.6	14.2	10.9	18.0	17.6
	District Total:	**985,301**	**719,511**	**265,790**	**1,183,295**	**831,541**	**351,754**	**20.1**	**15.6**	**32.3**	**27.0**	**29.7**

During 1991-2001, the district recorded a growth rate of 20.1 per cent, which is at par with the state average. Among the tahsils, it varies between 24.4 per cent in Bathinda and 13.6 per cent in Talwandi Sabo. Besides, Talwandi Sabo, the decadal growth rate is lower than that of the district in Rampura Phul (17.4%) also.

Only Bathinda tahsil in the district has witnessed the higher growth rate than that of the state average.

The urban population in the district grew by 32.3 per cent, which is double than that of the rural growth rate (15.6%). The urban growth rate is 38.4 per cent in Bathinda tahsil followed by 25.7 per cent in Rampura Phul. The urban (10.9%) as well rural (14.2%) growth rates are the lowest Talwandi Sabo. The other two tahsils experienced slightly higher rural growth rate than that of the district average.

29.7 per cent of the population in the district is urban as against 27.0 per cent in 1991. Except Talwandi Sabo tahsil, the other two tahsils have noted increase in their urban population as compared to 1991 census. This increase is the maximum in Bathinda where 41.2 per cent of the population is recorded as urban as against 37.0 per cent in 1991 and this increase is marginal in Rampura Phul tahsil where the proportion of urban population has improved from 14.7 per cent in 1991 to 15.7 per cent in 2001.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District/C.D.block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200

	Districts (Rural) Total:	**128 (45.7)**	**217,468**	**193,459**	**28 (10.0)**	**99,677**	**87,973**	**4 (1.4)**	**40,097**	**28,789**

Out of 284 villages in the district, 4 are un-inhabited and all of them fall in Bathinda tahsil. A village on an average has a population of 2,970 in the district, the corresponding size of the inhabited

village in the State, as a whole is 1311. Evidently, the inhabited villages in Bathinda district are much larger in population size as compared to the State. Among 280 inhabited villages, 1(0.4%) village has a population of less than 200, 3(1.1%) fall in the population size Class of 200-499, 116(41.4%) in the category 500-1999, 128(45.7%) in the range of 2000-4999, 28 (10.0%) are having population varying between 5000-9999 and the remaining 4 (1.4%) villages have a population of 10,000 and above. In other words 27 villages are small sized with a population of less than 1000 and they contain 2.4 per cent of the rural population of the district, 221 villages are medium sized having population 1000-4999 and they contain 66.8 per cent of rural population of the district, 32 villages in the district are large sized having population 5000+ and they contain 30.8 per cent of the rural population of the district. Among them 4 are exceptionally large sized and they accommodate 8.3 per cent of the district rural population.

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001

Serial number	Name of town	Urban status of town
1	2	3
New Towns		
1	Bhisiana	CT
Declassified and Merged Towns		
	Nil	

This table exhibits new towns added, denotified, and merged in the district for the 2001 Census.

There are 9 towns in the district and 8 of them are statutory in status and only 1 is a census town i.e. Bhisiana which is newly added to the district at the 2001 Census.

Further, in the district, no town of 1991 Census has either been de-notified or merged at the 2001 Census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	0	0.0	0	0.0
11-20	1	0.4	199	0.0
21-50	1	0.4	1,076	0.1
51-100	0	0.0	0	0.0
101-200	50	17.9	99,800	12.0
201-300	150	53.6	464,966	55.9
301-500	73	26.1	218,374	26.3
501 +	5	1.8	47,126	5.7
Not known	0	0.0	0	0.0
District Total:	**280**	**100.0**	**831,541**	**100.0**
Population Density (Rural) of the district:		**260**		

This table shows distribution of villages according to density of population. The district on an average has a rural density of 260 persons per Sq. km. The villages however display a significant variation among themselves. As many as 2 (0.8%) villages have a low density of 100 or below persons per sq. km. and they contain barely 0.1 per cent of district's rural population. 50 villages which constitute 17.9 per cent of the total villages and 12.0 per cent of the total population have density of population in the range of 101-200. The average density in the range of 201-300 is the characteristics of 150 (53.6 %) villages and they accommodate 55.9 per cent of the district population.

73 villages fall in the density range of 301-500. This is to say that more than one-fourth

(26.1%) of the villages have high density varying between 301 and 500 and accommodate more than one-fourth (26.3%) of the district's rural population.

Very high density of more than 500 is the characteristics of 5 (1.8 %) villages. These villages account for 5.7 per cent of the rural population of the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	832	836	804	NA	NA	712
1911	780	785	740	NA	NA	657
1921	799	808	735	NA	NA	644
1931	815	832	721	NA	NA	693
1941	836	855	750	NA	NA	783
1951	844	854	807	839	845	812
1961	854	865	817	834	837	824
1971	865	868	856	851	850	852
1981	879	884	865	861	869	843
1991	882	888	868	884	888	873
2001	876	890	849	870	872	864

Note: Sex Ratio has been defined as number of females per 1000 males.

Sex Ratio reflects the socio-economic and demographic characteristics of population. It unfolds the status of women in society and the care for the girl child in particular. Unfortunately, in consonance with the overall patterns of the State, the sex ratio in the district has remained low throughout except in 1991. The sex ratio declined from 832 in 1901 to 780 in 1911 in the state. Ever since 1911, the sex ratio showed a gradual improvement, uninterruptedly, till 1991 when it reached 882. During 1991-2001, the sex ratio has declined by 6 points, from 882 to 876.

The population census data are not available for Bathinda district prior to 1951 Census other than urban areas. Bathinda district had a sex ratio of 839 in 1951, which declined to 834 in 1961, and improved to 851 in 1971, 861 in 1981 and 884 in 1991 and further decreased to 870 in 2001 However, likewise the overall state patterns, the sex ratio in the district has declined by 14 points; from 884 in 1991 to 870 in 2001. This decline is more noticeable in urban areas in comparison with the rural. In the state, the urban sex ratio has declined from 868 in 1991 to 849 in 2001 while the corresponding decline in the urban sex ratio of the district is from 873 to 864. The rural sex ratio in the state has increased by 2 points from 888 in 1991 to 890 in 2001, while in the district it has shown 16 point decrease from 888 to 872 during this decade. Similarly urban sex ratio of the district had been shooting up from 644 in 1921 to 852 in 1971 and after that it continued to go down and up during every census and tumbled down from 873 in 1991 to 864 in 2001 to stand at 11th position among all the districts in the state.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Rampura Phul	887	888	885
2	Bathinda	857	856	858
3	Talwandi Sabo	883	883	881
	District Total:	**870**	**872**	**864**

Among the tahsils, the sex ratio varies between 887 in Rampura Phul and 857 in Bathinda, which is the lowest among all the tahsils followed by 883 in Talwandi Sabo tahsil.

The rural sex ratio varies between 888 in Rampura Phul and 856 in Bathinda tahsil, and the urban sex ratio fluctuates between 885 in Rampura Phul and 858 in Bathinda tahsil. The rural sex ratio is better than their urban counterparts in Rampura Phul and Talwandi Sabo tahsil. The rural

and urban sex ratios in these two tahsils are 888 & 885 and 883 & 881 respectively. The position is vice versa in Bathinda tahsil where urban (858) sex ratio exceeds rural (856). District as a whole, rural (872) sex ratio excels urban (864) by 8 points.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Phul	895
2	Rampura	877
3	Nathana	791
4	Bathinda	888
5	Sangat	903
6	Talwandi Sabo	884
7	Maur	877
	District (Rural) Total:	**872**

Table 7 exhibits CD blockwise sex ratio in the district. Among the CD.blocks sex ratio varies between 903 in Sangat and 791 in Nathana. In six CD blocks sex ratio is higher than that of the sex ratio of district. Whereas in C.D. Block Nathana (791) it is below the district average of 872. A vital contrast is screened while comparing sex ratio of these two CD blocks. Whereas Sangat boasts of crossing 900 mark, Nathana is exhibiting a poor below 800 mark.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	1	0.4	27,029	3.3
700-749	1	0.4	2,657	0.3
750-799	0	0.0	0	0.0
800-849	31	11.1	59,286	7.1
850-899	134	47.9	420,960	50.6
900-949	99	35.4	303,708	36.5
950-999	14	5.0	17,901	2.2
1000-1099	0	0.0	0	0.0
1100+	0	0.0	0	0.0
District Total:	**280**	**100.0**	**831,541**	**100.0**
Sex ratio (Rural) for District:	**872**			

Sex ratio of rural population by ranges is portrayed in Table 8. The district as such is marked with a relatively low sex ratio (872). This is rather low (less than 800) in 2 villages. The villages with low sex ratio comprise 0.8 per cent of the total villages in the district and contain 3.6 per cent of district rural population. 31 villages (11.1%) are marked with a rural sex ratio of 800-849 and they contain 7.1 per cent of the district rural population. Maximum number of 134 villages exhibit a rural sex ratio in the range of 850-899. These make a little less than one-half (47.9%) of the total villages and more than one-half (50.6%) of the rural population.

As many as 99 villages are marked with a high sex ratio of 900-949 and they constitute 35.4 per cent of the total villages and account for 36.5 per cent of the district rural population. Male-female ratio is quite close to parity in the range of 950-999 in 14 (5.0%) villages having 2.2 per cent of the rural population of the district.

Not even a single village in Bathinda district falls in the sex ratio ranges of 1000-1099 and 1100 and above.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

9	Sangat	(M Cl)	887
	Sex ratio (Urban) for the district:		**864**

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Sex ratio in urban agglomerations/towns is exhibited in Table 9. The district on an average has an urban sex ratio of 864, which is higher than that of the urban sex ratio of the state (849).

Among the towns/UAs, the sex ratio varies between 683 in Bhisiana and 893 in Kot Fatta. As many as in 7 towns the sex ratio is higher than that of the district average and is below the district average in Bhisiana CT. (683) and Bathinda MCl (858). The deplorable part of the sex ratio is that Bhisiana Census town is exhibiting sex ratio ever below 700 mark.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total/ Rural/ Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

		Rural	29,209	16,357	12,852	786
		Urban	6,186	3,448	2,738	794
	District Total:	**Total**	**149,358**	**83,656**	**65,702**	**785**
		Rural	**107,471**	**59,884**	**47,587**	**795**
		Urban	**41,887**	**23,772**	**18,115**	**762**

The sex ratio of child population in age-group 0-6 is shown in Table 10. The State and its districts are marked with a very low child sex ratio and this has become a matter of deep concern. Punjab has a child sex ratio of (798) as compared to India (927) and Bathinda district has even lower child sex ratio of 785.

Within the district, the tahsils among themselves display a considerable disparity in their child sex ratio; it is the maximum in Rampura Phul (795) and the minimum in Bathinda (780).

Likewise, the disparity in the rural and urban child sex ratio among the tahsils is also quite marked; the rural child sex ratio varies between Rampura Phul and Bathinda (798 each) and in Talwandi Sabo (786), while the variation in urban child sex ratio is between 794 in Talwandi Sabo and 752 in Bathinda.

Tersely educing, Bathinda district ranks 13th among other districts in child sex ratio and startling point is that neither district nor any tahsil crosses 800 mark which is some thing serious to ponder over.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

Table 11 shows CD Blockwise sex ratio of population in the age-group 0-6.The gap in the child sex ratio in rural areas (795) and the over all rural sex ratio (872) in the district is alarming; showing a gap of 77 points between the two. This is a cause of concern and looks for possible remedial measures in bridging the gap between the two, and also in improving the prevailing low levels of sex ratio. More so, three CD blocks viz. Talwandi Sabo (790), Rampura (771) and Maur (766) are marked with child sex ratio even lower than the district average. Phul (814) , and Sangat (810) are the only two CD blocks crossing 800 marks.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	41	14.6	12,178	11.3
700-749	48	17.1	13,639	12.7
750-799	66	23.6	32,261	30.0

1000-1099	9	3.2	2,162	2.0
1100+	3	1.1	313	0.3
District (Rural) Total	**280**	**100.0**	**107,471**	**100.0**
Sex ratio (Rural) for District:	**795**			

The district (Rural) is marked with a very 5,low child sex ratio (795). 41 (14.6 %) villages are marked with excessively low child sex ratio of less than 700. These villages together constitute (11.3%) of the child population in age group 0-6 of the district. The rural child sex ratio is equally low in the range of 700-749 in 48 (17.1 %) villages constituting 12.7 per cent of rural child population. Another 66 (23.6 %) villages fall in the range of 750-799 and they contain (30.0%) of the rural child population of the district. Barely 125 villages (out of 280), which make less than (44.6%) of the villages and contain slightly better percentage (45.9%) of rural child population have crossed 800 mark. Among them, 51 (18.2% of the total rural villages) fall in the range of 800-849 and possess 24.6 per cent of district rural child population. Another 32 (11.4%) villages having 10.3 per cent of child population are in the range of 850-899. The rural child sex ratio is fairly high in the range of 900-949 in 20 (7.1%) villages containing 6.2 per cent of the rural child population, and another 10 villages (3.6%) having 2.5 per cent of the rural child population display a very high sex ratio of 950-999. 12 villages in the district are female biased, out of which, 9 villages fall in the range of 1000-1099 and 3 in the range of 1100+. These 12 villages together make 4.3 per cent of the total villages and share 2.3 per cent of the rural child population of the district.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Sex ratio of child population in age-group 0-6 in urban area of the district (762) is significantly lower than that of the overall urban sex ratio (864) in the district.

Among the towns/UAs, child sex ratio is the highest in Kot Fatta (840) and the lowest in Goniana (695). 4 out of 9 towns show urban sex ratio of child population lower than that of the district average. In other five towns it exceeds the district average. Besides Kot Fatta (840), these include Raman (810), Maur (783), Rampura Phul (782) and Bhucho Mandi (763). The most assertable part of urban child sex ratio in Bathinda district is that it is badly superated by all districts except Gurdaspur (762) to whom it equals. Ludhiana excepts with 819 child. Sex ratio in urban areas exceeding Bathinda (762) by 57 points.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

30.0 per cent of the population in the district belongs to scheduled castes as compared to 28.9 per cent in the state as such. Among the tahsils it is the highest in Talwandi Sabo (30.9 %) and the lowest in Bathinda (29.3 %). Rampura Phul has 30.7 per cent scheduled castes. Rural scheduled castes population percentage is higher than the district average.

75.7 per cent Scheduled castes are rural by residence in the state in comparison with the district percentage of 76.7 per cent.

In consonance with the general trends in the state, scheduled castes are more rural by residence. In the district 32.7 per cent of rural population belongs to scheduled castes while the corresponding percentage in urban areas is 23.5 per cent. In Bathinda tahsil scheduled castes comprise one-third (34.0%) of rural population and it is the highest among all the tahsils in the district. On the other hand it is the lowest in Talwandi Sabo (31.0%) followed by Rampura Phul (32.2%). There is no scheduled tribe population in the State.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

76 and above	1	0.4	980	0.4
District Total	**280**	**100.0**	**271,891**	**100.0**

All villages in the district have scheduled castes population. In 2 villages the proportion of scheduled castes comprises 0.4 per cent of the total population. Another 3 villages have scheduled castes population in the range of 5-10 per cent and they contain 0.1 per cent of the scheduled castes population in the district. All these 5 villages make 1.8 per cent of the total villages having a small population size of 0.5 per cent. Less than one-tenth 8.2 per cent of the village fall in the range of 11-20 per cent and they account for 2.3 per cent of the scheduled castes population of the district. 29.3 per cent of the villages have scheduled castes population in the range of 21-30 per cent. In absolute terms they number 82 and contain 25.3 per cent of the district's scheduled castes population residing in rural areas.

115 (41.1%) villages having 48.7 per cent of the district's rural scheduled castes population, which is the highest among all the categories, exhibit high scheduled castes population in the range of 31-40 per cent. Another 43 villages that comprise 15.4 per cent of the total villages and 17.6 per cent of rural scheduled castes population of the district fall in the range of 41-50 per cent.

As many as 12 villages which constitute 4.3 per cent of the total villages and 5.6 per cent of rural scheduled castes population have more than one-half of their population belonging to scheduled castes. Further, within this group, 11 villages fall in the range of 51-75 per cent while in 1 village the proportion of scheduled castes population exceeds 75 per cent.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

In urban areas scheduled castes comprise more than one-fifth (23.5%) of the population of the district. The towns among themselves show wide disparity in this regard. In Kot Fatta 41.4 per cent of the population belongs to scheduled castes while in Bhisiana this percentage is barely 14.3 per cent. Bhucho Mandi (31.4%), Sangat (31.0%), Raman (30.4%) and Maur (30.5%) are the other towns having more than one-fourth of their population belonging to scheduled castes. On the other hand Rampura Phul (22.4%), Goniana (22.5 %%) and Bathinda (21.3%) are the three towns having population of scheduled castes lower than that of the district average.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Scheduled Castes population in urban areas of the district has a sex ratio of 890, which is better than that of the overall urban sex ratio (864) of the district. As compared to other districts of the State, Bathinda ranks 11th among all the districts in urban sex ratio of scheduled castes. The situation is more encouraging in the towns of Sangat (926), Raman (894), Bathinda (892) and Goniana (891). In all, four towns show an urban sex ratio above the district urban while five towns below the district average where it varies between 860 in Kot Fatta and 889 in Bhucho Mandi.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

61.2 per cent of the district's population is literate compared with 69.7 per cent for the state as such. In other words, three out of every five persons in the district are literate and this ratio is somewhat lower than that of the state.

Bathinda (65.8%) is the most literate among the tahsils. By contrast, Talwandi Sabo (53.4%) with only one-half of its population as literate is placed at the bottom. However, none of the tahsils in the district has literacy rate higher than the overall literacy rate in the state.

Between the two sexes, the literacy rate in the district varies between 67.8 per cent among males and 53.7 per cent among females, and, thus, exhibiting a gap of 14.1 percentage points. Among the tahsils,

this gap is the widest (15.2 percentage points) in Talwandi Sabo tahsil (male 60.6 per cent and female 45.4 per cent) and the narrowest (11.5 percentage points) in Rampura Phul (male 63.7 per cent and female 52.2 per cent).

Likewise, the rural-urban literacy rates also exhibit significant disparity. 55.1 per cent of the population in rural areas and 75.4 per cent of the population in urban areas of the district are literate. The urban literacy is higher than that of the rural in all the tahsils; and the gap in the rural urban literacy rate is the widest (19.6 percentage points) in Bathinda (urban 77.2% and rural 57.6%) and the closest (16.4 percentage points) in Talwandi Sabo (urban 66.9% and rural 50.5%).

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Phul	72,419	41,245	31,174	74,893	36,495	38,398	56.5	61.4	51.1	10.3
2	Rampura	42,854	25,280	17,574	48,775	23,547	25,228	53.6	59.9	46.6	13.3
3	Nathana	72,668	45,257	27,411	56,357	26,802	29,555	64.4	71.8	55.1	16.7
4	Bathinda	77,940	46,535	31,405	86,264	40,449	45,815	54.3	61.7	46.2	15.5
5	Sangat	46,314	27,700	18,614	54,367	25,209	29,158	53.0	60.8	44.5	16.3
6	Talwandi Sabo	56,264	33,877	22,387	73,100	34,787	38,313	50.2	57.4	42.2	15.2

	District (Rural) Total:	**399,064**	**238,279**	**160,785**	**432,477**	**205,839**	**226,638**	**55.1**	**62**	**47.3**	**14.7**

Rural areas of the district are marked with a relatively low literacy rate as can be seen from table 22. A little over one-half (55.1%) of the ruralities in the district are literate compared with 75.4 per cent in urban areas.

Among the CD blocks, rural literacy varies between 64.4 per cent in Nathana and. 50.2 per cent in Talwandi Sabo. Besides Nathana, Phul (56.5%) is the other CD block displaying literacy levels better than the district.

Literacy rate in all other CD blocks in the district is more than one half of their population but lower than that of the district average i.e. (55.1). Amazingly, none of the CD blocks exceeds the rural literacy rate (64.7%) of the state. Only Nathana has a decorous percentage of 64.4.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

100	0	0.0	0	0.0
District Total:	**280**	**100.0**	**831,541**	**100.0**
Literacy rate for District: (Rural)		**55.1**		

Table 23 shows distribution of villages by ranges of literacy rate. Very low literacy rate between 21-30 per cent is reported in 1 village having a very small population (0.2%). 4 villages (1.4%), which contain 0.6 per cent of the district's rural population, have literacy rate in the range of 31-40 per cent. One forth (24.6%) of the total villages, which number 69 and contain 24.4 per cent of rural population are in the literacy range of 41-50.

The maximum number of villages (174), which comprise two-third (62.1%) of the total villages and 63.3 per cent of the rural population of the district, are placed in the literacy range of 51-60 per cent. Further more, 30(10.7%) villages containing 8.0 per cent of the district rural population fall in the range 61-70 per cent. High literacy varying between 51 and 70 per cent is the main characteristic of more than two-third (72.8%) of the villages and these villages account for 71.3 per cent of the rural population of the district.

Only 2 villages show a very high literacy rate of 71 to 99 per cent. These villages make 0.8 per cent of the total villages and 3.5 per cent of the rural population.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 24 reveals that 75.4 per cent of the urban population in the district is literate. Among the towns it varies between 87.6 per cent in Bhisiana and 58.0 per cent in Sangat. In all, three towns are having literacy rate higher than that of the urban literacy of the district. Besides Bhisiana, they include Goniana (80.3%) and Bathinda (78.1%) As many as 6 towns fall below the district average. Among these the literacy rate, in addition to Sangat, is significantly low in Kot Fatta (58.7%).

Between the two sexes, 81.2 per cent among males and 68.7 per cent among females are literates. Likewise the total literacy rate, male literacy (91.4%) is also the highest in Bhisiana and the lowest in Sangat (63.3%). On the other hand the female literacy is again the highest in Bhisiana (81.8%) and the lowest in Kot Fatta (51.0%).

Male-Female literacy rates in urban show a sizeable gap of 12.5 percentage points. This gap is the widest (15.7 percentage points) in Bhucho Mandi. On the other hand it is relatively narrow in Bhisiana (9.6%).

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Scheduled Castes population in the district rural has a literacy rate of 37.2 per cent compared with an overall rural literacy rate of 55.1 per cent in the district. Nathana (41.0%), Phul (38.7%) and Bathida (38.2%) are the only three CD blocks where nearly two-fifth of the scheduled castes population is literate. In the remaining CD blocks it is below the district average and ranges between 37.0 per cent in Rampura and 32.7 per cent in Talwandi Sabo.

Less than one-half (43.2%) of the male scheduled castes and one-third (30.4%) of the female scheduled castes in the district are literates. In other words, every fifth male and every third female scheduled castes in the rural areas in the district are literates. Among the CD blocks male literacy rate varies between 47.0 per cent in Nathana and 38.3 per cent in Talwandi Sabo.

Likewise male the scheduled castes female literacy shows wide variation among the CD blocks, it is the highest (34.3%) in Nathana and the lowest (26.3%) in Talwandi Sabo CD blocks.

The male-female scheduled castes literacy rate shows a gap of 12.8 percentage points in the rural areas of the district. The gap is to the extent of 14.2 percentage points in Bathinda CD block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	1	0.4	371	0.1

81-90	0	0.0	0	0.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**280**	**100.0**	**271,891**	**100.0**
Literacy rate for District (Rural):		**37.2**		

The table shows distribution of villages by ranges of literacy rate. 9 villages, which make 3.3 per cent of the total villages and accommodate 1.2 per cent of district's rural scheduled castes population fall in the range of 1-20, Another 41 villages which constitute 14.6 per cent of the total villages and 14.4 per cent of the district rural scheduled castes population have literacy rate in the range of 21-30. All these villages have low literacy rate.

The maximum number of villages (129), which make 46.1 per cent of the total villages and 52.4 per cent of the rural scheduled castes population, fall in the range of 31-40 per cent; another 81(28.9%) villages containing 27.4 per cent of the district rural scheduled castes population fall in the range of 41-50 per cent. 17 villages making 6.1 per cent of total villages and having 3.8 per cent of population exhibit a high literacy of 51-60 per cent. It is quite high between 61-70 per cent in 2 (0.7%) villages containing 0.4 per cent of the rural scheduled castes population of the district.

Very high literacy rate (in the range of 71-80) is noticed in 1 village. However, the share of its population in district rural scheduled castes population is quite negligible (0.4%) as in the previous range.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

In urban area of the district more than one-half (55.3%) of the scheduled castes population has the ability to read and write. Among the towns it is highest in Bathinda (61.1%), the district headquarters town and Goniana (60.8%) is the second best in the district. Bhisiana (52.9%) and Bhucho Mandi (52.2%) are the other two towns where more than one half of the scheduled castes population is literate.By contrast, urban scheduled castes literacy rate is the lowest in Sangat (33.2%), 63.2 per cent of scheduled castes males and 46.6 per cent of females in urban areas are literate reflecting a gap of 16.6 percentage points. Male-female disparity in this regard is quite conspicuous. Among the towns urban male literacy rate of scheduled castes population varies between 70.4 per cent in Goniana and 36.2 per cent in Sangat, while the corresponding percentage for females is 52.2 per cent in Bathinda and 30.1 per cent in Sangat.

Furthermore, male-female differential in scheduled castes literacy rate is the maximum in Goniana (20.1%) and the minimum in Sangat (6.1%) and this difference is upto 14 or more percentage points in 8 out of 9 towns which is deplorable.

The work participation rate in Bathinda district (42.3%) is better than that of the state average (37.5%). Among the tahsils in the district, it varies between 47.0 per cent in Talwandi Sabo and 39.4 per cent in Bathinda. In the district 55.2 per cent among males and 27.5 per cent among females are reported as workers showing a significant reduction in the gap between the two as compared to 1991 census. In Talwandi Sabo, one-third of the females (36.7%) are recorded as workers.

Out of the total population, 34.6 per cent are main workers and 7.8 per cent are marginal workers. The proportion of main workers is the highest in Talwandi Sabo tahsil (36.0%) and the lowest in Bathinda tahsil (33.9%). However, the proportion of marginal workers is significantly highest in Talwandi Sabo tahsil (11.1%) and the lowest in Bathinda (5.5%). Further, marginal workers are more among females in comparison with males. The proportion of female marginal workers in the district (12.2%) is thrice than that of males (3.9%). By and large, a similar pattern is observed among all the tahsils in the district. In Talwandi Sabo, 19.0 per cent of females are marginal workers as against 4.0 per cent among male counterpart. Rampura Phul (15.1%) and Bathinda (7.9%) have also reported higher proportion of female marginal workers than that of male marginal workers. Amazingly Bathinda district with 12.2 per cent female marginal workers stands next only to Mansa district (12.4%) in the state in Census 2001 whereas it ranked atop with 7.2 per cent in Census 1991.

TABLE 32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C.D. BLOCKS, 2001

District (Rural) Total:		**Persons**	**831,541**	**302,533**	**36.4**	**84,007**	**10.1**	**386,540**	**46.5**	**445,001**	**53.5**
		Males	**444,118**	**232,687**	**52.4**	**20,359**	**4.6**	**253,046**	**57.0**	**191,072**	**43.0**
		Females	**387,423**	**69,846**	**18.0**	**63,648**	**16.5**	**133,494**	**34.5**	**253,929**	**65.5**

46.5 per cent of the rural population in the district is economically active comprising 36.4 per cent as main workers and 10.1 per cent as marginal workers. Among the CD blocks the work participation rate varies between 51.6 per cent in Maur and 43.5 per cent in Bathinda. Besides Maur, in other CD blocks less than one half of their population is recorded as workers.

The percentage of main workers is the highest in Sangat C.D. block (39.2%) and the lowest in Phul (34.8%). However, the proportion of marginal workers is the maximum in Maur CD block (14.7%) and the minimum in Nathana (6.4%).

Punjab State, in General is characterized by low female work participation rate. It was the lowest (4.4%) among all the States/Union Territories in the country at the 1991 Census. It was so due to non-reporting of female's work by the respondent. Special efforts were made in 2001 Census to get the true picture of female work participation. The female work participation rate (19.1%) recorded at the 2001 Census is more than four times than that of (4.4%) in 1991 Census.

In the district rural females are reported as 18.0 per cent main workers and 16.5 per cent marginal workers. This percentage is quite high in itself and stands comparable with the male counterparts having 52.4 per cent main and 4.6 per cent marginal workers respectively. The participation of females in marginal work is greater than that of males. In rural areas of the district female work participation rate (16.5%) is almost four times higher than that of the males (4.6%). Among 53.5 per cent non-workers in Bathinda rural, 43.0 per cent are males and 65.5 per cent are females. Bathinda CD block has the maximum number of non-workers (56.5%) and Maur CD block the least (48.4%).

+Town arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Female work participation rate among the CD blocks varies between 46.0 per cent in Maur and 24.5 per cent in Nathana. Besides Maur, Sangat (40.3%) and Talwandi Sabo (39.2%) are the other two CD blocks where at least two out of every five females are reported as workers. In all, four CD blocks fall above and three below the district average (34.5%) of female workers.

The work participation rate in urban areas of the district (32.4%) is almost identical with that of the State (33.5%). Among the towns, the participation rate is the highest in Bhisiana (39.8%) and the lowest in Sangat (31.3%), Out of 9 towns, five fall above and four below the district average. The participation in marginal work is comparatively quite less. In the district 2.2 per cent of the urban population is reported as marginal worker

compared with 30.2 per cent reported as main worker. The percentage of population reported as marginal workers shows a variation of 6.1 per cent in Kot Fatta and 0.2 per cent in Bhisiana. The vice versa corresponding proportion of main workers is 39.6 per cent in Bhisiana and 26.8 per cent in Kot Fatta.

The urban female work participation rate in the district is 11.0 per cent compared with 51.0 per cent among males. Among the towns the female work participation rate is the highest in Rampura Phul (13.8%) and the lowest in Sangat (5.0%). In all, female work participation rate is more than the urban female participation rate of the district in four towns and in other five towns female work participation rate is less than the urban female participation rate of district.

Note: Percentage of Workers to total workers are given in brackets

Table 34 shows distribution of workers by sex in four categories of economic activity by tahsils with in the district.

Among the total workers in the district 29.8 per cent are cultivators, 21.4 per cent are agricultural labourers, 3.1 per cent are household industry workers and 45.7 per cent are reported as other workers. This signifies that 51.2 per cent of the total workers in the district are engaged in agricultural sector, while 48.8 per cent are in non-agricultural sector of economy.

Among the tahsils, the percentage of cultivators is the highest in Talwandi Sabo (39.8%) and the lowest in Bathinda (22.7%). Likewise, the proportion of workers reported as agricultural labourers varies between 26.3 per cent in Talwandi Sabo tahsil and 18.5 per cent in Bathinda tahsil.

The proportion of workers engaged in household industry is the highest in Rampura Phul (3.9%) and the lowest in Bathinda (2.4%). In all, two tahsils fall above while one below the district average (3.1%).

The participation of females in non-agricultural sector is greater than that of males. In the district, 57.6 per cent of the female workers are non-agricultural workers (HH1- 5.9 % and OW-51.7%) as compared to 44.9 per cent males (HHI-1.8% and OW-43.1%).

				(34.5)	**(21.8)**	**(25.2)**	**(5.9)**	**(47.1)**

Note: Percentage of Workers to total worker are given in brackets

Among CD Blocks the proportion of rural workers recorded as cultivators is the highest in Maur (44.0%) and the lowest in Nathana (24.7%). Likewise the proportion of Agricultural labourers shows a variation of 29.9 per cent in Talwandi Sabo and 18.8 per cent in Nathana CD blocks. It is observed that in Sangat (73.5%), Talwandi Sabo (70.3%) and Maur CD block (70.0%) of the workers are in agricultural sector, while the corresponding percentage is only (43.5) per cent in Nathana CD block.

The proportion of rural workers engaged in household industry also exhibits significant variation at CD block level; it is the highest in Maur (5.3%), followed by Phul (4.9%). By contrast it is the lowest in Sangat (1.8%). In all, two CD blocks fall above four CD blocks below and one CD block is equal to the district average (3.2%).

Other workers constitute more than one-half of the rural workers in Nathana (54.4%) CD block. On the other hand in Maur and Sangat nearly one out of four workers (24.7%) is reported as other worker.

Table 35 further reveals that participation of females in agricultural sector is 47.0 per cent only (Cultivators-21.8% and Agricultural Labourers-25.2%). 53.0 per cent (Household Industry Workers 5.9% and Other Workers 47.1%) are in non-agricultural sector.

Note : Percentage of workers to total workers are given in brackets.

\+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

As per the above table 8.9 per cent of the workers in urban areas in the district are engaged in agricultural activities either as cultivator or agricultural labourer, and the remaining 91.1 per cent are engaged in non-agricultural pursuits either as household industry workers or other workers. Among the towns, the

proportion of agricultural workers (cultivator and agricultural labourer) is the highest in Kot Fatta (62.9%) and the lowest in Bathinda. (3.2%). Sangat is the only other town which has 48.1 per cent agricultural workers.

The percentage of males (89.0%) and females (86.0%) engaged in other work is quite comparable and on the contrary, there is a vide disparity in males (1.9%) and females (6.1%) as household industry workers in the urban area of the district.

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table shows distribution of villages according to availability of different amenities by CD blocks.

Education :

Educational amenity is available to all the (280) villages in the district comprising 7 CD blocks namely Phul, Rampura, Nathana, Bathinda, Sangat, Talwandi Sabo and Maur.

Medical :

64.6 per cent of the villages in the district are equipped with one or the other type of medical facility. This percentage is as high as 87.0 per cent in Phul. Apart from this, 78.1 per cent villages of CD blocks Nathana, 63.3 per cent of Rampura, 63.0 per cent of Bathinda, 63.2 per cent of Sangat and 54.5 per cent of Maur are having medical facility within the village. The proportion of villages in the CD block having medical facility is low in Talwandi Sabo (44.7%).

Improved Drinking Water :

The availability of improved drinking water refers to availability of drinking water through tap, hand pump and tubewell. It is available to all the villages in the district.

Post Office :

52.9 per cent of the villages in the district have

the facility of post office within the village. More than one half of the villages in each of five CD blocks have the availability of post office. They include CD blocks Nathana (62.5%), Rampura (60.0%), Sangat (55.3%), Bathinda (57.4%) and Phul (56.5%). In Talwandi Sabo (42.6%) and Maur (36.4%) the proportion of villages availing this facility is less than that of the district average (52.9%).

Telephone :

In the district telephone facility is available in 98.9 per cent of the villages, which by all means, is a very high percentage. The position is the best in 6 CD blocks where cent percent of the villages are enjoying this facility with the exception of Bathinda (94.4%).

Transport and Communication :

All the villages in the district are fairly well equipped with transport and communication facility.

Banks :

Every sixth village (16.8%) in the district has the banking facility. Among the CD blocks the percentage of villages having bank facility is the maximum in Nathana (28.1%) and the minimum in Maur (3.0%). In this regard as many as four CD blocks fall above and three below the district average (16.8%).

Agricultural Credit Societies :

Two out of every three villages (64.3%) in the district have agricultural credit societies. Among the CD blocks it varies between 73.9 per cent villages in Phul and 57.9 per cent in Sangat. Maur (66.7%), Talwandi Sabo (63.8%), Bathinda (63.0%), Nathana (62.5%) and Rampura (60.0%) are having this facility by and large nearer to district average

Approach by pucca Road :

In the district 99.6 per cent of the villages are approachable by pucca roads. Only one village in C.D. Block Bathinda is deprived of this facility.

Power Supply :

All the villages in the district are having power supply.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 shows number and percentage of rural population served by different amenities by CD blocks in the district. It is very satisfying that the entire rural population in the district and so in its constituents CD blocks is being served by educational institutions. The same is the position in case of safe drinking water supply transport and communication and power supply facilities.

As regards availability of medical facility, it is available to more than three forth (76.9%) of the rural population. Among the CD blocks, the proportion of population served by medical institutions is the highest in Phul (94.2%) and the lowest in Talwandi Sabo (58.7%). The position is fairly good in Nathana (88.4%), Rampura (81.9%) and Bathinda (74.2%) also where almost three-fourth of the rural population is enjoying these services. Out of 7 CD blocks 4 fall below and 3 above the district average.

Post offices are serving 71.9 per cent of the rural population in the district and this percentage of population varies between 83.0 per cent in Nathana and 49.8 per cent in Maur CD block.

Telephone facility is available to 98.5 per cent of population. It is cent per cent in six CD blocks except Bathinda where 92.3 per cent of population is availing the facility.

Banks cater to the needs of 32.5 per cent population. Among the 7 CD blocks, the proportion of population served by bank is the highest in Nathana (55.2%) whereas it is the lowest in Maur (6.1%).

A large number of people are having the facility of agricultural credit societies and in CD blocks Phul (86.0%), Rampura (83.1%), Bathinda (79.5%) and Talwandi Sabo (79.3%), it surpasses district average (77.6%).

The entire population is served by Pucca road in all CD blocks except in CD block Bathinda (98.7%) which is also not much below the district average (99.8%).

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 to 4)

(b) PHC	51	170	38	259
3. Post Office	96	34	2	132
4. Telephone	3	0	0	3
5. Bus Service	0	0	0	0
6. Banks				
(a) Commercial Bank	99	132	10	241
(b) Cooperative Bank	70	147	40	257
7. Agricultural Credit Societies	84	16	0	100

This table shows distribution of villages, which are not having certain amenities, by distance ranges from the places where these are available.

Education :

All the 280 inhabited villages are having Primary educational facility where as 95 villages in the district do not have middle schools. However, among them, this facility is available at a distance of less than five kilometers in case of 87 villages and for the remaining 8, the same is available at a distance of 5-10 kms.

279 villages do not have Degree Colleges. This is to say that only 1 village in the district has a degree

college. However, this facility is available to 34 villages within five kilometers, in case of 66 villages at a distance of 5-10 kms. and for the remaining 179, this facility is available at a distance of 10+ kms.

Medical :

271 villages in the district do not have availability of a Hospital within the village. Among them the same is available to 54 villages at a distance of less than 5 kms, in 122 villages it is available at 5-10 kms and the remaining 95 villages have to cover a distance of more than 10 kms to avail the facility of hospital.

Likewise, out of 259 villages which do not have PHC, the same is available at a distance of less than 5 kms. in respect of 51 villages, at a distance of 5-10 kms. in case of 170 villages and at a distance of more than 10 kms. to 38 villages.

Post office :

In the district 132 villages do not have the Post Office facility. Among them in 96 villages, it is available at a distance of less than 5 kms, in 34 villages, at a distance of 5-10 kms and the remaining 2 villages avail this facility by covering more than 10 kms.

Telephone :

The district is well equipped with this facility as barely 3 (out of 280) villages do not have this facility and same is available at a distance of less than 5 kms from the village itself.

Bus Service :

The district is well served with this facility and all villages are having this facility within the village.

Bank :

Of the 280 villages, Commercial Bank facility is available in 39 villages only. 99 villages can avail Commercial Bank service at a distance of less than 5 kms, 132 villages at a distance of 5-10 kms and 10 villages at 10 +kms.

Likewise, the Co-operative banking facility to 70 villages is available at less than 5 kms from the village, to 147 villages it is available at 5-10 kms while for remaining 40 villages, the people have to cover a distance of more than 10+ kms.

Agricultural Credit Societies :

Agricultural Credit Societies are not available in 100 villages of which for 84 villages, it is available at a distance of less than 5 kms while for other 16 villages it is available at a distance of 5-10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows that 50 villages in the district are located within a distance of less than 5 kms, 193 villages in the distance range of 5-15 Kms and 37 villages within 16-50 Kms from the nearest statutory town.

Maximum number of villages (193) fall in the distance range of 5-15 Kms and educational facility is available to cent percent villages, medical facility is available to 125 (64.8 %) villages, post office to 109 (56.5%) villages and 191 (99.0%) villages have availability of telephone. Apart from this, transport and communication facility is available to 193 (100%) villages in the distance range of 5-15 kms., 36 (18.7%) villages have banks, 128 (66.3%) villages have agricultural credit societies and all (100%) villages are approachable by pucca road. Each of the 37 villages located at a district range of 16-50 kms from the nearest town has the facility of education, telephone, transport, communication and is duly connected by Pucca Road.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 presents distribution of villages by population range and amenities available.

Out of 280 villages, 4 have a population of less than 500, 23 fall in size class 500-999, 93 have population in the range of 1000-1999, 128 are in the range of 2000-4999, 28 villages comprise the size class 5,000-9,999 and 4 villages are having population of 10,000 or more.

Educational facility is available to cent per cent villages under various size classes.

Medical facility is available to 30 villages having population of 5,000 or more. This facility is available to 1 (2.5%) villages in size class 1-499, 6(26.1%) villages in the range of 500-999, 48 (51.6%) of the villages with population 1,000-1,999, and 96 (75.0%) villages in size class 2,000-4,999.

Improved drinking water is available to all the villages in the district.

Post office facility is available to 32 villages having population of 5,000 or more. This facility is available to 2 (8.7%) villages in the range of- 500-999, 27 (29.0%) villages with population 1,000-1,999, and 87 (68.0%) villages in size class 2,000-4,999.

All the villages under size class 1-499, 500-999,

1000-1,999, and 10,000 + are having telephone facility. Only 3 villages, 2 in the range of 2000-4999 and 1 in the range of 5000-9999 are deprived of this facility.

Transport and communication facility is available to all the villages in the district.

Availability of banks is predominantly the characteristic of larger villages. All the 4 (100.0%) villages with population 10,000 or more have banks. Likewise, 15(53.6%) villages out of 28 in size class 5,000-9,999 and 24(18.8%) villages out of 128 with population in the range of 2,000-4,999 have the availability of banks. Among the remaining 120 villages with population below 2,000 only 4.3 per cent villages in size class 1,000-1,999 have banking facility.

Agricultural credit societies are available in all the villages under size 5,000-9,999 and in 75.0 per cent of villages with population 10,000 +, in 81.3 per cent of villages with population 2,000-4,999, in 38.7 per cent villages in size class1000-1999, to 30.4 per cent villages having population between 500-999 and to 50.0 per cent villages with population below 500.

All the villages in the district are approachable by pucca road.

All the villages in the district have the availability of power supply.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area in hectares	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Phul	46	54,408	90.1	90.1
2	Rampura	30	33,199	87.8	93.0
3	Nathana	32	39,903	84.9	85.4
4	Bathinda	54	63,364	89.1	85.2
5	Sangat	38	46,187	92.3	80.3
6	Talwandi Sabo	47	54,020	87.5	83.2
7	Maur	33	28,278	91.8	92.1
	District Total:	**280**	**319,359**	**89.0**	**86.4**

Note : - Cultivable area = irrigated area + unirrigated area

CD blockwise villages, according to land use are given in Table 42. Bathinda CD block (63,364 hectares) is the largest in area and is more than twice than that of Maur (28,278 hectares), the smallest CD block in area. In the district 89.0 per cent of the area is cultivable and among the CD blocks this percentage varies between 92.3 per cent in Sangat and 84.9 per cent in Nathana. Four out of 7 CD blocks have percentage of cultivable area greater than that of the district average.

86.4 per cent of the cultivable area in the district is irrigated. All the CD blocks have fairly high proportion of cultivable area under irrigation and this percentage varies between 93.0 per cent in Rampura and 80.3 per cent in Sangat.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and convenience	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Bathinda (M.Cl)	722.2	631.1	91.1	738.2	90.1	414.8	117.7	0.0	115.6
2	VI Bhisiana (C.T)	10.5	0.0	10.5	10.5	0.0	10.5	0.0	0.0	0.0
3	IV Bhucho Mandi (M.Cl)	738.0	310.3	427.6	706.8	48.1	0.0	5.5	8.1	693.2
4	IV Goniana (M.Cl)	651.6	595.4	56.2	591.4	438.0	0.0	131.4	0.0	22.0
5	V Kot Fatta (M.Cl)	125.4	7.4	117.9	88.7	25.8	26.4	29.7	0.0	6.8
6	III Maur (M.Cl)	358.9	278.8	80.1	359.9	254.8	77.1	0.6	0.0	27.4
7	IV Raman (M.Cl)	466.5	33.2	433.3	438.1	35.2	69.2	11.3	0.0	322.4
8	III Rampura Phul (U.A)	470.2	24.7	445.5	424.4	336.2	0.0	83.5	0.0	4.8
	III Rampura Phul (M.Cl)	470.2	24.7	445.5	424.4	336.2	0.0	83.5	0.0	4.8
9	V Sangat (M.Cl)	287.5	130.3	157.2	272.2	90.9	12.8	28.5	0.0	140.0
	District Total:	**618.2**	**452.1**	**166.1**	**616.5**	**139.9**	**266.9**	**90.0**	**0.3**	**121.2**

Table 43 shows per capita receipt and expenditure incurred for all the statutory towns in Bathinda district. The per capita receipt in the district is Rs 60.2 out of which Rs 40.4 comes through taxes and Rs 19.8 through all other sources. The per capita receipt is as high as Rs 73.8 in Bhucho Mandi and as low as Rs 12.5 in Kot Fatta.

As against the per capita receipt of Rs 60.2 the district is incurring per capita expenditure of Rs 59.6 The per capita expenditure on general administration is to the extent of Rs. 16.2, on Public health and conveniences (Rs 23.7), public works (Rs. 8.9), and per capita expenditure on public institutions is only Rs. 0.3, while it is Rs. 10.8 for all other types of activities. Interestingly, per capita expenditure exceeds per capita receipts in Bathinda, Bhucho Mandi and Maur.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary/ Middle	Secondary/ Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bathinda (M.Cl)	1.9	1.0	0.7	0.5	0.2
2	Bhucho Mandi (M.Cl)	4.5	3.0	1.5	0.8	0.0
3	Goniana (M.Cl)	11.7	7.0	4.7	0.8	1.6
4	Kot Fatta (M.Cl)	6.2	3.1	1.5	0.0	0.0
5	Maur (M.Cl)	4.0	2.2	1.5	0.4	0.0
6	Raman (M.Cl)	6.1	3.6	2.6	1.0	0.0
7	Rampura Phul (M.Cl)	4.0	2.2	1.8	0.4	0.2
8	Sangat (M.Cl)	9.3	5.6	3.7	1.9	0.0
	District Total	**3.3**	**1.8**	**1.3**	**0.5**	**0.2**

Table 44 shows number of schools/colleges per 10,000 of population for towns. In the district there are 3.3 primary schools, 1.8 junior secondary/middle schools, 1.3 secondary/ matriculation schools, 0.5 senior secondary schools and 0.2 colleges per 10,000 population. In other words, there is a primary school after a population 3,030, junior secondary/middle school for every 5,556 persons, and secondary/ matriculation school for 7,692 persons, senior secondary school for 20,000 population and a college for a population of 50,000.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bathinda (M.Cl)	18
2	Bhisiana (C.T)	0
3	Bhucho Mandi (M.Cl)	26
4	Goniana (M.Cl)	27
5	Kot Fatta (M.Cl)	6
6	Maur (M.Cl)	23
7	Raman (M.Cl)	18
8	Rampura Phul (M.Cl)	22
9	Sangat (M.Cl)	93
	Distrct Total :	**20**

Table 45 shows number of beds in medical institutions in towns per 10,000 of population. The district on an average has 20 beds per 10,000 of population. Among the towns, Sangat has 93 beds per 10,000 population and this is the highest among all the towns in the district. Besides Sangat, Maur (23), Goniana (27), Bhucho Mandi (26) and Rampura Phul (22) are the other towns, which have more beds per 10,000 populations, than that of the district average Kot Fatta has only 6 beds per 10,000 population

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population (approximately)	Percentage of slum population to total population
1	2	3	4	5
1	Bhucho Mandi	13,246	5,381	40.6
2	Goniana	12,813	3,000	23.4
3	Kot Fatta	6,504	980	15.1
4	Maur	27,543	11,760	42.7
5	Raman	19,551	7,260	37.1
6	Sangat	5,401	746	13.8
	District Total	**85,058**	**29,127**	**34.2**

Table 46 shows proportion of slum population living in statutory towns in the district. Bhucho Mandi, Goniana, Kot Fatta, Maur, Raman and Sangat are the six towns which have reported slum population. In absolute terms 29,127 persons are living in slums which accounts for 34.2 per cent of the total urban population of these six towns. In the towns of Bucho Mandi (40.6%) and Maur (42.7%), more than two-fifth of the total population of the towns is residing in slums. Goniana, Kot Fatta and Sangat towns have less than 25.0 per cent slum population

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bathinda (M.Cl.)	Fertilizer S.W.Pipe Seeds	Fertilizer Vanaspati Oil S.W.Pipe
2	Bhisiana (C.T.)	- - -	Wheat Cotton Green Fodder
3	Bhucho Mandi (M.Cl.)	Mustard Oil Buckets Agricultural Implements	Cotton Seed Oil Cake Agricultural Implements
4	Goniana (M.Cl.)	Shoes Agricultural Implements	Raw Cotton Wooden Furniture Oil Seeds
5	Kot Fatta (M.Cl.)	Agricultural Implements Shoes Furniture	Cotton Wheat Soda
6	Maur (M.Cl.)	Plastic Shoes Electrical Material (Wooden) Zarda	Processed Cotton Mustard Oil Wheat
7	Raman (M.Cl.)	Cotton Bales, Agricultural Implements Mustard Oil	Cotton Bales Vegetable Oils Mustard Oil
8	Rampura Phul (M.Cl.)	Thread Agricultural Implements Transformers	Agricultural Implements Cotton Washing Soap
9	Sangat (M.Cl.)	Agricultural Implements Shoes Wooden Furniture	Wheat Pulses Agricultural Implements

Table 47 shows most important commodities manufactured in the towns and exported out.

The manufacturing of agricultural implements is an important commodity in six towns. Generally speaking, each town has its own characteristic as is revealed by this table. Manufacturing of Fertiliser is the characteristic of Bathinda; wooden furniture in Sangat and Kot Fatta. Transformers in Rampura Phul deserve special mention.

Besides the agriculture-oriented products, fertilizers, Vanaspati Oil, S.W.Pipe, washing Soap, oil seeds and wooden furniture are the other key items exported from the towns of the district.

(x) Brief Analysis Based on Houses and Household Amenities

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	3+ rooms	590	199	391	79	40	39	-	-	-
	Median number of rooms	2	2	2	1	1	2	-	-	-

Data Source : Census of India 2001, H-Series : "Tables on Houses, Household amenities and Assets".

1,81,521 households in the district are living in houses owned by them, 14,495 in rented houses and 5,492 in houses with tenure status 'others' i.e. neither owned nor rented. This reflects that 90.1 percent of the households are living in owned houses, 7.2 in rented houses and remaining 2.7 per cent in 'others'.

Among the households living in owned houses, 30,670(16.9%) have one room, 51,796 (28.5 %) have two rooms, 39,935 (22.0%) have three rooms and 58,482 (32.2%) have more than three rooms. This reveals that the majority of the owned houses have two or more rooms. Interestingly, 638 of the households living in owned houses, do not have any exclusive room.

By and large a similar pattern is observed both in rural and urban areas. In rural areas 17.3 per cent of households are living in owned houses having one room; 28.4 per cent in 2 rooms, 21.0 per cent have 3 rooms, and 33.0 per cent have more than 3 rooms; the corresponding percentages for urban areas are 15.8, 29.0, 24.8 and 30.1 per cent respectively. Further more, 0.3 per cent of rural households and 0.3 per cent of urban households are residing in owned census houses, which do not have any exclusive room.

Of the total scheduled castes households, 90.9 per cent have owned houses, 6.3 per cent live in rented houses and 2.8 per cent houses with tenure status as other. Among the scheduled castes, 0.4 per cent have no exclusive room, 32.8 per cent are residing in owned houses with one room, 38.7 per cent have two rooms, 16.4 per cent have three rooms and 11.7 per cent in houses with more than 3 rooms.

In other words 66:8% of scheduled castes households are having two or more rooms. Among rented households, 51.1 per cent have one room and 31.6 per cent have two rooms.

TABLE 49 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban

This table shows percentage distribution of households by tahsils living in permanent, semi permanent and temporary houses. Out of 170,129 households living in permanent houses in the district, 53.6 per cent are in Bathinda, 24.7 per cent in Rampura Phul, and 21.7 per cent are in Talwandi Sabo, The percentage share of households living in semi-permanent houses of the district shows a variation of 47.0 per cent in Bathinda and 26.3 per cent in Rampura Phul. There are 11,486 households living in temporary houses and these makes 5.7 per cent of the total households. Bathinda Tahsil constitute 57.8 per cent of the total households living in temporary houses; the share of the remaining Tahsils is Talwandi Sabo (29.1%) and Rampura Phul (13.1).

Out of the total households living in permanent houses, 11,0663 (65.0%) are in rural areas and 59466 (35.0%) in urban areas. Likewise percentage of households living in semi-permanent houses in rural and urban area is 84.2 per cent and 15.8 per cent respectively. There are 11486 households living in temporary houses and among them 9558 (83.2%) are in rural and 1928 (16.8%) in urban areas of the district.

Data source: Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

This table shows proportion of household having improved drinking water source, electricity, Bathroom, toilet and drainage activity.

Improved drinking water :

Households having tap, hand pump, and tubewell as the source are grouped as having improved drinking water facility. In the district it is available to 97.5 per cent of the households. The corresponding figures for the rural and urban areas are being 97.1 per cent and 98.3 per cent respectively. The trends are, by and large, the same among the tahsils in the district.

Electricity:

Electricity as the source of lighting is available to 89.0 per cent of the households in the district; the corresponding figures for rural and urban areas are 86.2 per cent and 95.0 per cent respectively signifying that the rural areas do not lag behind the urban much in this regard. The trends are, by and large, the same for all the tahsils barring Talwandi Sabo where 86.4 per cent of the households have electricity and this percentage is significantly lower in the rural parts (84.7%) as compared with the urban (94.2%).

Bathroom :

Bathroom is available to more than three-fourths (79.0%) of the households in the district. Even in rural area this facility is available to 76.6 per cent of the households as compared to 84.1 per cent urban households.Among the tahsils, Bathinda (81.7%) is at the first place and Rampura Phul (73.4%) is at the tail.

Toilet :

Four out of every five households (79.4%) have toilet facility. Among the tahsils this percentage varies between 84.9 per cent in Bathinda and 66.1 per cent in Rampura Phul. Besides Bathinda, Talwandi Sabo tahsils (80.6%) has higher percentage than that of the district as such.Three fourth (75.1%) of the rural households have toilet facility as compared to 88.6 per cent in urban. Bathinda tahsil ranks first and Rampura Phul tashil occupies the last position.

Drainage :

72.9 per cent of the households have closed or open drainage facility comprising 65.9 per cent in rural and 87.7 per cent in urban. In rural, Rampura Phul tahsil (72.5%) and in urban. Bathinda tahsil (89.5%) stand atop.

TABLE 51: DISTRIBUTION OF HOUSEHOLDS BY AVAILABILITY OF TYPE OF FUEL USED FOR COOKING

Serial number	District / Tahsil	Total/ Rural/ Urban	Total household	Type of fuel used for cooking

Data source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

Firewood is the main fuel used for cooking in the district as it is being used by 32.1 per cent households. This percentage is as high as 41.1 per cent in Talwandi Sabo tahsil. In rural areas 38.8 per cent of households are using firewood and this percentage is more than double than that of the urban (17.8) percentage.

The use of cooking gas (LPG) is also fairly high. It is being used by 29.8 per cent of the total households in the district. In Bathinda tahsil 39.1 per cent of the households are using LPG while the corresponding percentage is only 16.0 per cent in Talwandi Sabo,65.9 per cent of the urban households are using LPG for cooking, while it is only 12.8 per cent in case of the rural households.

Crop residue is the third main fuel being used for cooking. In the district more than one-forth households (26.0%) are using crop residue; the corresponding figure for rural and urban areas are 36.2 per cent and 4.4 per cent respectively. The use of crop residue as fuel for cooking in rural areas is four to eleven times more than urban areas in tahsils.

6,149 households (3.0%) in the district are using kerosene as fuel for cooking and its use is more in urban (7.7%) in comparison with the rural (0.9%) households. This trend holds true for all the tahsils in the district.

Cowdung Cake (8.0 %) still exceeds kerosene and all other types of fuel available to households in Bathinda district other than firewood, LPG and crop residue.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET

Serial number	District/ Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking service	Availability of assets

Data source: Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

Out of 201,508 households in the district, 73,687 (36.6%) are availing banking services; 58,944 (29.3%) have Radio/ Transistor; 121,902 (60.5%) have television; 42,091 (20.9%) have telephone; 130,280 (64.7%) have bicycle; 50,138 (24.9%) have scooter, motorcycle, moped and 10,787 (5.4%) have car, jeep and van. The over all scenario of availability of assets in the district can be graded as fairly good. Nevertheless 34,847 (17.3%) of the households have reported none of these assets available to them which is unbelievable keeping into mind present day standard of living.

As regards banking service available to households at tahsil level, only Bathinda tahsil (43.0%) excels Bathinda district and Talwandi Sabo tahsil (27.3%) is badly outshot.

(xi) Places of tourist, religious, historical or archeological importance

Bathinda :

Bathinda, the principal town and headquarters of the district/sub division/tahsil of the same name, is a big railway junction of Northern railway. It is well connected by road with Chandigarh (210 km), Ludhiana (136 km), Faridkot (63 km) and Firozpur (101 km). Its population as per 2001 Census is 1,183,295 persons.

It is also called Gobindgarh, because Guru Gobind Singh, the tenth Guru of the Sikhs, is said to have stayed in the fort of Bathinda. A Gurudwara in the memory of the Guru was also constructed here by Maharaja Narinder Singh of Patiala State.

The Rose Garden is today one of the attractive spots in the town. It has been developed into a beautiful picnic spot and is visited by a large number of people.

There is also a traffic Park for the children situated in the heart of the city.

At a distance of 6 km from Bathinda, there is a zoological park called 'Bir Talab Forest and Tourist Complex.

The Guru Nanak Dev Thermal Plant at Bathinda is another important landmark. Amongst the other big industries in the town are the units of National Fertilizers Limited and a Milk Plant in the co-operative sector.

There is a historic gurudwara known as Gurudwara Haji Rattan named after Haji Rattan, a sadhu who used to meditate here. It is also associated with the visits of Guru Nanak Dev, Guru Hargobind and Guru Gobind Singh.

There are 3 colleges in the town, viz. Government Rajindra College, Shri Sanatan Dharam Girls College,

D.A.V. (Mata Gunwanti) College. Besides, there are 4 higher secondary schools. 6 high schools, 13 middle schools, 23 primary schools, 3 hospitals, I.T.B. Clinic, 10 dispensaries and 2 public libraries.

Goniana Mandi :

It is situated at a distance of 12 km from Bathinda on the Bathinda-Faridkot road. It falls on the Bathinda-Firozpur railway line. Its population as per 2001 Census is12,813 persons.

Goniana Mandi is well known for Tikana Bhai Jagta Ji, the dera (seat) of the seva Panthi Addan Shahi Sect. It is said that this sect pioneered by Bhai Ghanaia is an old and supreme institution similar to the International Red Cross Society. Bhai Ghanaia presented an ideal of selfless and unique service of offering drinking water to the friends and foes alike in the battle field. Guru Gobind Singh was much impressed by his service and blessed that his mission would be run after him.

Har Raipura (Bhokari) :

Har Raipura or Bhokari lies west of Bathinda on the Bathinda-Nathana road. It falls in the Bathinda tahsil and is about 19 km from the tahsil headquarters and about 5 km form Goniana Mandi.

Gurudwara Jand Sahib has been built here in the memory of Guru Har Rai's visit to this place. It is said that the Guru who was at that time staying at Kiratpur Sahib (district Rupnagar) had an intuition that the inhabitants of the village Bhokari remembered him. He went there and stayed for a few days under a Jand tree. The tree still stands in the premises of the gurudwara. The issueless women of the area come to this place and tie a thread around the tree with the hope that their desire will be fulfilled.

This place is also said to have been visited by Guru Gobind Singh.

Jassi Bagwali :

Jassi Bagwali falls in Bathinda Tahsil and lies about 26 km. south of Bathinda on the Bathinda-Dabwali road. The nearest town is Sangat which is 11 km. from the village.

Gurudwara Bagsar has been built here in the memory of Guru Gobind Singh who is said to have visited this place while on his way to Talwandi Sabo. It is said that Guru Gobind Singh stayed here for ten days under a tree. It is also said that a small pond existed at this place. When Guru Gobind Singh riding on his horse crossed through this pond, the horse and the dark brown dress of Guru Gobind Singh became white. When asked by his followers, the guru told that it was a sacred *tirath* and had been visited by Lord Rama while fighting with Lav and Kush. The Guru further added that whosoever would take bath in this tank, all his sins would be washed.

A fair is held here on the first *Magh* (January-February) known as 'Maghi fair'. It lasts for three days. Besides, a fair is held on every *Amavas*. People in large numbers visit the place on these occasions and take bath in the sacred tank.

Maisar Khana :

This village falls in tahsil Talwandi Sabo on the New Delhi-Bathinda-Firozpur railway line and is about 30 km from Bathinda, the district headquarters. It is connected with Maur Mandi, another town of the district and is about 10 km from this place.

About 500 years ago, a Sadhu who was Brahim by caste used to live in village Maisar Khan. He was a staunch follower of Lattan Wali, goddess of Kangra. Once he asked the people of the village to accompany him to pay homage to the goddess at Kangra. Some of the villagers accompainied him to the place and were so much impressed at the sight of the flames erupting in the temple that they prayed to the goddess for the appearance of similar flames in their own village. Next year, similar flames appeared at the spot in the village, where a temple was constructed by the villagers.

A fair is held here in September-October for one day in the memory of the Sadhu. On this day, offerings of Halwa and cash are made to the deity. Religious preachers give sermons to the people on the occasion.

Maur Mandi :

Situtated on Bathinda-Mansa road at a distance of 42 km from Bathinda, the district headquarters, Maur Mandi is a railway station on the Firozpur-Bathinda-New Delhi railway line. It falls in tahsil Talwandi Sabo whose headquarters are 18 km from here. It is well connected by road with the state

headquarters Chandigarh (187 km), Patiala (122 km) and Talwandi Sabo (18 km). It has a class II Municipal Committee. Its population as per 2001 Census is 27,543.

The town is said to have been founded by one Maur, a Jat of Mann sub-caste. There exists a gurudwara which is associated with the visit of Guru Teg Bahadur, the ninth Guru of the Sikhs. It is said that the Guru stayed here for a few days to get rid the villagers of a ghost. A fair is held here on every Amavas.

Mehma Sarja :

This village falls in Bathinda Tahsil and the nearest town is Goniana Mandi which is 6 km. from this place.

The historic Gurudwara Lakhi Jangal was built in this village in the memory of Guru Nanak Dev who is said to have recited Japji Sahib one lakh times at this place. It is also said that Guru Hargobind, Guru Har Rai and Guru Gobind Singh, the 6th, 7th and 10th Gurus, respectively, also visited this place.

A big fair is held here on Baisakhi day. Besides, fairs are held on the occasion of Maghi and every Puranmashi. People in large number visit the place during these fairs and take a dip in the holy tank.

Patti Karam Chand (Mehraj) :

It falls in Rampura Phul Tahsil and is 5 km from Rampura Phul, the tahsil headquarters.

A gurudwara called 'Gurudwara Gurusar' stands here. It is associated with Guru Hargobind, the 6th Guru of the Sikhs and his fight with the Muslim Commander, Lalla Beg. A fair is held here (January-February) for one day which is attended by a large number of people. People take bath in the holy tank on this day.

Rampura Phul :

Headquarters of the tahsil and sub-division of the same name, Rampura Phul is situated at a distance of 26 km from Bathinda, the district headquarters on the Bathinda –Patiala road. It is also a railway station on the Ambala-Bathinda railway line. It is a Class II Municipal Committee. Its population as per 2001 Census is 44,665 persons.

Formerly, the town of Rampura Phul was in Barnala District of PEPSU. But in 1954, it was transferred to Bathinda District. These are the twin towns, Rampura and Phul, part of the town was founded by Phul, an ancester of the Phulkian family, in 1770 B.K. (A.D. 1827). Rampura was founded by Rama, the son of Phul. These towns are now called Rampura Phul. Phul was earlier a part of the Nabha State. The Fort at Phul was constructed by Chaudhri Phul. Even in 1904, there existed a Vernacular Middle School at Phul. The town had, at that time, a garden too.

The town is famous for the manufacture of ginning blades, cotton thread and soap. The important agricultural commodities are foodgrain, cotton and oilseeds.

Talwandi Sabo :

Headquarters of the tahsil/sub-division of the same name. Talwandi Sabo is situated at a distance of 28 km from Bathinda on the Bathinda – Sardulgarh road.

It is also popularly known as Damdama Sahib is named after one Sahabo, a Gujar girl. It is said that in 1149, it was inhabited by Hindu Gujars, who were converted into Muslims during the reign of Sgamsh-ud-din Illutmish and given forty –eight villages. Since the head of Gujras did not have any male issue, his daughter Sahabo became the head of these villages and in this way the area came to be known as Talwandi Sahabo, which is now called Talwandi Sabo. It is also said that Guru Nanak Dev, the first Guru of the Sikhs, came here during his Second Journey (Udasi). The Guru blessed the place that one day it will emerge as an important pilgrim center. There is a Sarovar called Nanak Sar associated with guru Nanak.

The place is also said to have been visited by Guru Teg Bahadur, the ninth Guru of the Sikhs. He bowed before the raised mound and sat beneath it. When asked about it by his followers, he said that this place had been visited by the first Guru, and it will be visited by the tenth Guru and develop as a great tirath (pilgrim centre).

Talwandi Sabo is one of the five takhats of the Sikhs. After his fierce battles with the Mughals at

Anandpur, Chamkaur and Muktsar, Guru Gobind Singh retired to the jungles of Malwa. Talwandi Sabo where the Guru took rest (dam) came to be known as damadama Sahib. The Guru stayed here for more than nine months. During this period, he redicated the Adi Granth, and made Damdama Sahib a centre for spreading his mission. He called the place Khalsa Da Takhat (throne of the Khalsa).

At Gurudwara Damdama Sahib, some sacred weapons of Guru Gobind Singh are preserved. Besides Gurudwara Damdama Sahib, there are a number of gurudwaras in Talwandi Sabo such as Manji Sahib, Jand Sar, Mata Sahib Kaur and Mata Sundri, Ber Sahib etc.:

(xii)Scope of Village and Town Directory

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

Town Directory :

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV – A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc.Hence the data for the towns of Bathinda has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of Bathinda District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class, name Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns of Bathinda District. The income and expenditure for the towns of Bathinda have been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the scheduled castes/scheduled tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present

data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

Statement V gives information regarding medical, educational, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Bathinda which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from towns and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Town. Information on number of banks available in the town has been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII shows the civic amenities available to all the 6 towns having slums falling in the jurisdiction of Bathinda District.

Part - A
VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The Village Directory format has 25 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number :

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village :

The name and location code number of the village is shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village :

The area of the villages in hectares is given. Wherever the area figures were not furnished by the concerned department, the column is left blank.

Column 4 : Total population :

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households :

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational :

Classes upto class V are included in Primary School comprising nursery school, kindergarten school, Pre-basic school, pre-primary school and junior basic school.

Classes from VI to VIII are included in the middle school.

Classes from IX and X are included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr.
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M (4), etc.

Column 7 : Medical :

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water :

The type of drinking water supply sources available within the village is indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone :

It is indicated by following codes :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks :

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available within the village, distance of the nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies :

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given.

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities:

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in these columns. If not available,

the particulars of the nearest place with the facility exists is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications :

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways, they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village :

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance :

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply :

Availability of Power Supply in the village, whatever may be the form of its use, is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine :

If village receives any News Paper/Magazine the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured :

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use :

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare (s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A and B The appendices show the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates CD Block wise number of villages.

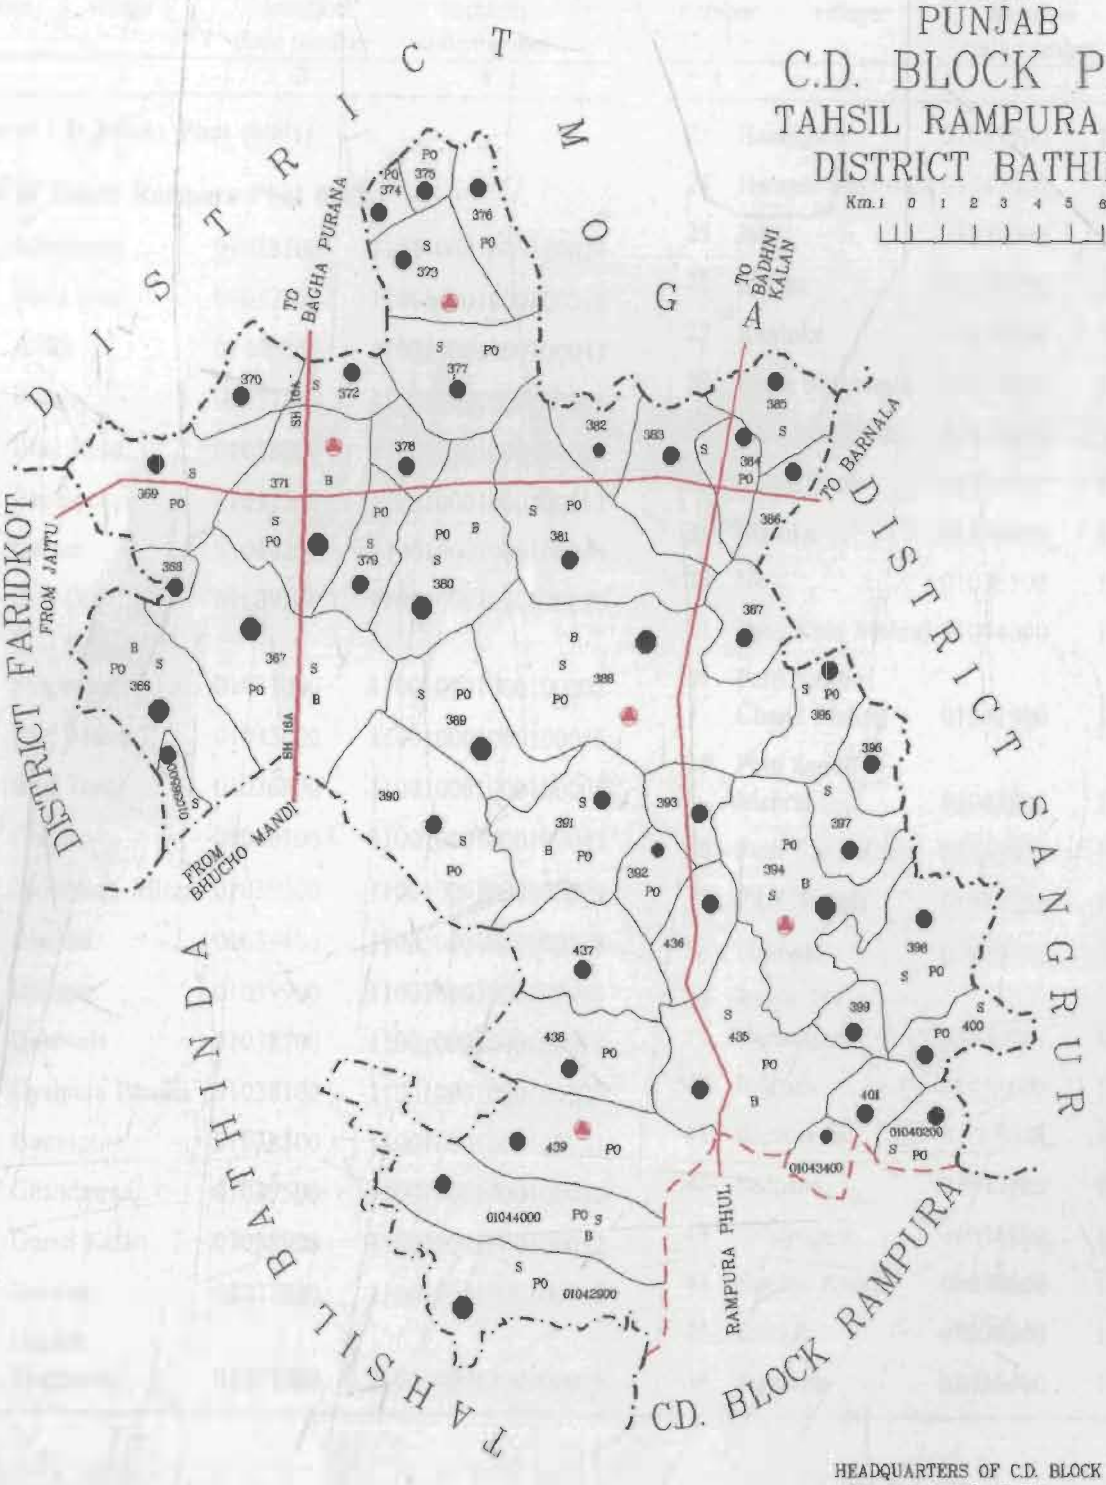

Appendix-IX Shows number of different types of girls schools in a village.

Section-II
Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i) Municipal Corporation	M.Corp.
(ii) Municipal Committee	MC
(iii) Municipal Council	M Cl
(iv) City Municipal Council	CMC
(v) Town Municipal Council	TMC
(vi) Municipal Board	MB
(vii) Municipality	M
(viii) Cantonment Board/Contonment	CB
(ix) Notified Area	NA
(x) Notified Town	NT
(xi) Notified Area Committee/ Notified Area Council	NAC
(xii) Notified Town Area	NTA
(xiii) Industrial Notified Area	INA
(xiv) Industrial Township	ITS
(xv) Township	TS
(xvi) Town Panchayat	TP
(xvii) Nagar Panchayat	NP
(xviii) Town Committee/Town Area Committee	TC
(xix) Small Town Committee	ST
(xx) Estate office	EO
(xxi) Gram Panchayat	GP
(xxii) Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects :

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 & 8 :

Name or the State headquarters, District headquarters and Tahsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory :

Column 6 : Road length (in kms.) :

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage :

Generally, sewerage system is implied by the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines :

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil :

The various prevalent methods of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply :

Source and capacity of storage system. The following codes are used in these columns :

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major sources of water supply is given in column 13 and the storage capacity against each in kilo-litres (in bracket) is presented in column 14.

Column 15 : Fire Fighting Service :

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections) :

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, they may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes :

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institutes	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like-Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

Schools up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle schools or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres :

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats :

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities :

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms:

Number of public libraries and reading rooms available in the referent town is recorded in codes as follows :

(i) Public Library PL

(ii) Reading room RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded in these columns.

Column 9 : Number of Banks :

Number of Banks available in the referent town both Commercial and Co-operative banks is recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies:

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town is recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

STATEMENT

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting from October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Caste and the Scheduled Tribe population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Caste/Tribe returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribe at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes and Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts, Cities and Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented into four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Villagewise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of Tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration, block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure I

Number of villages under Gram Panchayat :

With the Constitution (73rd amendment) Act, 1992, the Census Organisation felt it necessary to provide population data for the territorial area of Panchayat. This required precise details of the territorial area of each Panchayat so that delineation of enumeration blocks (EBs) to be allotted to the enumerators could be done to meet this requirement.

It required careful delineation of enumeration blocks by the Charge Officers to ensure that EBs do not cut across the territorial area falling in the Panchayat. Different situations were well perceived. A Panchayat could consist of only one village or a number of complete villages. There could be another situation where the Panchayat may consist of some complete villages and parts of villages. Still there could be another situation where Panchayat could consist of a number of villages etc.

An exhaustive exercise was done to prepare Panchayat level data. However, we came across following types of situations which made it difficult to compile the Panchayat level data:

i) Some of the Panchayats have one or more than one village.

ii) Some of the Panchayats have only a part of the village.

iii) Some Panchayats include full village (s) as well as part of village (s).

All this has not made it feasible for us to present Panchayat level PCA.

Annexure-II

Fertility and Child Mortality :

The following table shows age specific fertility rates in Punjab and Bathinda district for the years 2001 and 1991. The trends observed are almost identical both for the State and the district. Among different age- groups the fertility rate is the highest in age-groups 20-24, 25-29 and 30-34. The trend is the same for rural and urban areas also.

The trends also show some fall in the fertility levels during 1991 and 2001 and this decline is noticeable in all age-groups except 45-49.

AGE SPECIFIC FERTILITY RATES 2001 AND 1991

Annexure-III

Measures of Fertility and Mean Age At Marriage Fertility Levels :

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples and number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever married women and the last question related to currently married women only. The measures of fertility worked out are based on the F-Series Tables of 1991 & 2001 Census pertaining to Punjab State.

The following table presents important indices of fertility in Punjab and Bathinda district for the years 2001 and 1991 separately for total, rural and urban areas. There has been significant decline in the number of children ever born per ever married woman in the age group (45-49); the decline is relatively more in rural areas than urban in Bathinda district and the position is by and large the same for the state. Likewise there has been a significant decline in the child-women ratio also. However, the number of married couples per 1,000 of population has gone up both in the state and the district with exception of urban areas.

IMPORTANT INDICES OF FERTILITY

Fertility indices	Bathinda						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991
1	2	3	4	5	6	7	8	9	10	11	12	13
No. of Children ever born per ever married woman in the age group (45-49)	3.42	4.37	3.52	4.47	3.21	4.01	3.50	4.27	3.69	4.45	3.16	3.81
Couples per 1000 Population	169	167	167	164	172	176	161	160	160	156	164	168
Child-Woman ratio (0-4 Years)	334	493	351	496	296	483	349	480	369	493	311	448

Annexure IV

MOVEMENT OF POPULATION

What is migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence, if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International Migration :

The migrational movements are of three types- (i) Migration within the State itself with its components-(a) Migration within the district of enumeration (intra-district migration), (b) Migration from one district of the state to another district of the State/UT (inter-district migration), (ii) Migration from one State to another state of the country (inter-state migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why the people migrate ?

For the first time in the census, reasons for migration were elicited in 1981. Keeping operational constraints in view, the reasons for migration were broadly categorized as (1) employment, (2) education, (3) marriage, (4) family movement and (5) other reasons. Other Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration :

The growth of population of a particular place depends upon the biological variates such as mortality and fertility and migration. The knowledge of trends in migration helps in future planning of a place.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF BIRTH

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Migrants born within the state of enumeration	1,450,609	794,429	656,180	357,445	91,400	266,045
	(93.0)	(95.7)	(89.9)	(79.9)	(73.6)	(82.3)
(i) Migrants born else where in the district of enumeration	267,742	51,500	216,242	189,353	56,764	132,589
	(17.2)	(6.2)	(29.6)	(42.3)	(45.7)	(41.0)
(ii) Migrants born in other districts of the State	151,236	31,503	119,733	168,092	34,636	133,456
	(9.7)	(3.8)	(16.4)	(37.6)	(27.9)	(41.3)
(II) Migrants born in other states of India	97,344	29,330	68,014	85,690	30,515	55,175
	(6.2)	(3.5)	(9.3)	(19.2)	(24.5)	(17.1)
(III) Migrants born in other countries	10,880	5,800	5,080	4,251	2,331	1,920
	(0.7)	(0.7)	(0.7)	(0.9)	(1.9)	(0.6)
(IV) Unclassifiable	1,130	290	840	0	0	0
	(0.7)	(0.1)	(0.1)	(0.0)	(0.0)	(0.0)
Total Migrants	**1,559,963**	**829,849**	**730,114**	**447,386**	**124,246**	**323,140**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

The above table gives distribution of in-migrants by place of birth in Bathinda district as per 1991 and 2001 Censuses. Out of the total in-migrants, 79.9 per cent are born within the state of enumeration and 19.2 per cent are born in other states/Union Territories of India in Census 2001. Whereas the figures for persons, males and females are constant for migrants born elsewhere in the district of enumeration the disparity among the same in Census 1991 is quite noticeable.

The following table gives distribution of inmigrants by place of last residence in Bathinda district. As per 1991 Census. 79.8 per cent of the inmigrants had the place of last residence within the state but out of the place of enumeration. Another 18.3 per cent had place of last residence in other states/UTs within the country, while 1.7 per cent had their last residence out side India. The corresponding figures for 2001 Census are 80.7 per cent, 18.6 per cent and 0.7 per cent respectively.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF LAST RESIDENCE

Last residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Last residence within the state of enumeration	422,803	84,843	337,960	365,934	94,160	271,774
	(79.8)	(71.1)	(82.3)	(80.7)	(74.8)	(82.9)
(i) Elsewhere in the district of enumeration	271,872	53,120	218,752	197,220	59,244	137,976
	(51.3)	(44.5)	(53.3)	(43.5)	(47.1)	(42.1)
(ii) In other districts of the state of enumeration	150,931	31,723	119,208	168,714	34,916	133,798
	(28.5)	(26.6)	(29.0)	(37.2)	(27.7)	(40.8)
(II) States in India beyond the state of enumeration	96,879	29,260	67,619	84,255	29,825	54,430
	(18.3)	(24.5)	(16.4)	(18.6)	(23.7)	(16.6)
(III) Last residence outside India	9,230	4,890	4,340	3,449	1,895	1,554
	(1.7)	(4.1)	(1.1)	(0.7)	(1.5)	(0.5)

	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

Annexure V

Main Religions :

The instructions for recording this information are same as in 1991. A brief analysis based on 1991 and 2001 Census data is presented below.

Question 7 of the Household Scheduled canvassed at the 2001 census pertained to religion of a person. The religion of the person was recorded as returned by the respondent. The six main religions in the country were recorded by using following codes:

Hindu	:	1
Muslim	:	2
Christian	:	3
Sikh	:	4
Buddhist	:	5
Jain	:	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Religious Composition of Punjab's Population:

The numerical strength of the six main religious communities in the State and Bathinda district as per 1991 and 2001 Census is as follows :

RELIGIOUS COMPOSITION OF POPULATION, PUNJAB AND BATHINDA 1991 AND 2001

Religious Communities	Punjab				Bathinda district			
	Total Population		Percentage in total population		Total Population		Percentage in total population	
	1991	2001	1991	2001	1991	2001	1991	2001
1	2	3	4	5	6	7	8	9

As can be seen from the above statement, Sikhs form the predominant religious community in Punjab and they account for 59.9 per cent of the State's population according to the 2001 Census. The corresponding percentage for 1991 Census was 63.0 per cent. Hindus is the second largest religious community in the State and their share in the total population is 36.9 per cent which was 34.4 per cent as per 1991 Census. This signifies that Sikhs and Hindus, the two most dominant religious communities in the state, together constitute 96.8 per cent of the state's total population. The share of Muslims, Christians, Buddhists and Jains in the total population is 1.6, 1.2, 0.2 and 0.2 per cent respectively.

In Bathinda district, Sikhs constitute 74.1 per cent of the total population and this is significantly higher than that of the state as a whole. Hindus, the second dominant religious community in the district, account for 24.8 per cent of the district's total population. Together, the Sikhs and the Hindus account for 98.9 per cent of the district's population. Muslims constitute 0.8 per cent while the share of Christians is only 0.1 per cent, the percentages of Sikhs and Hindus as per 1991 Census in the district were 77.1 and 22.1 per cent respectively The proportion of Muslims has slightly increased from 0.6 per cent in 1991 to 0.8 in 2001 Census.

Annexure VI

Marital Status :

Current marital status of each individual, irrespective of age, was obtained through Question 5 of the household schedule canvassed at the 2001 census into following four categories:

1. Never married
2. Currently married
3. Widowed
4. Divorced or separated.

The instructions to enumerators for eliciting marital status were same as adopted in 1991 census. A brief analysis based on 1991 and 2001 census is presented here.

Punjab State has a population of 24,358,999 as per 2001 Census comprising 11,871,211 (48.7%), never married, 11,499,566 (47.2%) married, 938,678 (3.9%) widowed and 49,544 (0.2%) divorced or separated. As per 1991 Census Punjab State had a population of 20,281,969 comprising 10,452,444 (51.5%) never married, 9,146,158 (45.1%) married, 673,569 (3.3%) widowed, 8,768 (0.1%) divorced or separated and 1,030 (0.0%) un-specified.

MARITAL, STATUS OF POPULATION AS PER, 1991 AND 2001 CENSUS

Marital Status	Punjab						Bathinda					
	1991			2001			1991			2001		
	P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13
Total Population	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Never Married	51.5	55.4	47.1	48.7	53.1	43.8	51.1	55.5	46.1	47.3	51.7	42.3
Married	45.1	42.3	48.2	47.2	44.6	50.2	45.5	42.4	49.0	48.9	46.1	52.0
Widowed	3.3	2.2	4.6	3.9	2.1	5.8	3.4	2.1	4.9	3.6	1.9	5.6
Divorced or Separated	0.0	0.0	0.0	0.2	0.2	0.2	0.0	0.0	0.0	0.2	0.2	0.2
Un-Specified	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0

In Bathinda district, out of the total population of 1,183,295 as per 2001 census; 559,974 (47.3%) are never married, 578,274 (48.9%) are married, 42,892 (3.6%) are widowed, 2,155 (0.2%) are divorced or separated. Thus, the patterns observed for the State and the district are almost identical.

Similarly, out of the total population of 1,559,963 as per 1991 Census, 797,029 (51.1%) were never married, 709,379 (45.5%) were married, 53,0671 (3.4%) were widowed, 438 (0.0%) were divorced or separated and the marital status of a small population (50 in number) could not be specified. Thus the patterns observed for the State and the district were almost identical. Total population of 1991 of Bathinda has not been recasted.

Annexure VII

Sex and Educational level :

It has become customary for the Indian Census to obtain details of educational levels of the literates in the society. Question 13 of the Household Schedule canvassed at the 2001 census aimed to elicit information on the highest educational level attained. The data so collected is put to public domain by classifying the population by sex and educational levels.

The following table shows percentage distribution of literates by educational level for Punjab State and Bathinda district as per 1991 as well 2001 Census.

PERCENTAGE DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL AS PER 1991 AND 2001 CENSUS

Educational Levels	Total Rural Urban	Punjab						Bathinda					
		1991			2001			1991			2001		
		P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Below Primary	Total	21.8	20.9	23.1	20.0	19.7	20.4	26.6	24.9	29.6	23.0	22.2	24.0
	Rural	24.2	22.9	26.2	22.9	22.3	23.7	30.0	27.5	34.5	26.9	25.6	28.7
	Urban	17.6	17.2	18.2	15.5	15.6	15.4	20.1	19.3	21.3	16.2	16.2	16.3
Primary but below middle	Total	27.9	25.3	31.7	25.6	23.7	28.3	28.0	26.3	30.8	26.4	24.5	29.2
	Rural	31.8	28.4	37.0	29.3	26.6	33.0	31.5	29.4	35.2	29.9	27.3	33.8
	Urban	21.2	19.7	23.3	19.9	19.0	21.1	21.2	19.7	23.4	20.4	19.5	21.7
Middle but below matric	Total	18.1	19.0	16.7	16.9	17.5	16.1	15.9	17.0	14.1	16.0	16.7	15.0
	Rural	18.5	19.8	16.7	17.7	18.5	16.8	15.8	17.3	13.1	16.4	17.2	15.2
	Urban	17.3	17.7	16.8	15.7	16.1	15.1	16.1	16.3	15.8	15.3	15.8	14.7
Matric but below graduate	Total	26.3	28.6	22.8	30.8	32.7	28.4	24.2	26.5	20.4	28.3	30.5	25.1
	Rural	23.0	26.0	18.3	27.5	29.9	24.3	20.4	23.3	15.4	24.3	27.2	20.0
	Urban	32.0	33.5	30.0	36.0	37.1	34.6	31.3	33.2	28.7	35.1	36.4	33.4
Graduate and above	Total	5.9	6.1	5.7	6.6	6.4	6.7	5.3	5.4	5.2	6.4	6.1	6.7
	Rural	2.5	3.0	1.8	2.5	2.8	2.2	2.2	2.5	1.8	2.5	2.7	2.2
	Urban	11.8	11.9	11.8	12.9	12.2	13.7	11.2	11.5	10.9	12.9	12.1	14.0

As per 1991 census 21.8 per cent of the literates in Punjab were below primary level of education, 27.9 per cent were primary but below middle and 18.1 per cent were middle but below matric. A little over one-fourth (26.3%) of the literates in the State were matric but below graduation. It was only 5.9 per cent of the literates who had attained graduation or above level of education.

According to 2001 census 20.0 per cent of the literates in Punjab are below primary level of education, 25.6 per cent are primary but below middle and 16.9 per cent are middle but below matric; 30.8 per cent are matric but below graduation. Only 6.6 per cent of the literates in Punjab are graduate and above.

In Bathinda district, the incidence of lower educational level is greater than that of the State. In the district 23.0 per cent of the literates are below primary and another 26.4 per cent are primary but below middle; the corresponding percentage for the State are 20.0 and 25.6 per cent respectively. By contrast, the percentage of literates with middle or above level of education is lesser in Bathinda district as compared to the State as such. In the district 16.0 per cent of the literates are middle passed as compared to state with 16.9 per cent. Likewise the percentage of matriculation, graduation and above with 28.3 and 6.4 in Bathinda district is lower than that of the State.

Annexure VIII

Distribution of Different Mother Tongues :

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood is recorded as the mother-tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. These may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Mother Tongue and Language data based on 1991 & 2001 Censuses is given here. The distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each) for the district by sex separately for rural and urban areas. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table is divided into two parts; Part A- Scheduled languages with the mother tongues grouped under each, and Part B- Non-Scheduled languages with the mother tongues grouped under each. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census, are basically the designations provided by the respondents. These designations or mother tongue label need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects, the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1576 rationalized mother tongues in 1991 for the entire Country, which were further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.

Table below shows languages arranged in descending order of number of speakers in Bathinda district as per 1991 and 2001 censuses. Punjabi is the most dominant language spoken in the State and the district. It is spoken by 1,084,933 persons in Bathinda district and this forms 91.69 per cent of the district's total population. Hindi, the second most dominant language is spoken by 82,995 (7.01%) persons in the district.
