BANASAR GARDEN, SANGRUR

Sangrur is situated on Ludhiana-Jakhal Railway line and is well connected by road with Patiala, Ludhiana, Chandigarh and Bathinda. The Banasar garden, in addition to its walking trails and plantations is famous for its marble Baradari (building with 12 doors), mini zoo and the old Diwan Khana which is a museum now and which stands out of the middle of a pool. It is decorated with carved marble slabs and four towers. One enters the Baradari through a bridge leading to a marble gate on the western side.

Annexure VII : Distribution of literate by Sex and Education level 529
Annexure VIII : Distribution of different mother tongues 530

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census , is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive Censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructured. Nine –fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and

recreational facilities. In town directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) in all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Inder Jit Singh, IAS, Director of Census Operations, Punjab. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for the various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General, (C&T) and Dr. I.C.Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assistant Director. I am thankful to all of them and others who contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 17.10.2006

Preface

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to also include village level data on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B - Primary Census Abstract, giving data for each village within the Community Development (CD) Block and each town and ward in the district. The CD block maps presenting village level data, have been prepared by using computer assisted technology. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetters and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Shri D.K. Sikri, IAS, Additional Secretary, Registrar general, India and Census Commissioner and Shri J.K. Banthia, IAS, former Registrar General and Census Commissioner, India for their directions and support from time to time in accomplishing this arduous task.

In the directorate, at the outset we are beholden to Shri Inder Jit Singh, IAS under whose able guidance and direction as Director Census, Punjab, the census operations in the state were successfully completed.

Our thanks are also due to Shri D.R. Khanna, Ex-Deputy Director for getting the compilation of data and Shri Madhav Shyam, Ex-Deputy Director for drafting this specimen model which has been replicated in other DCHBs.

The great effort and hard work done by Sh. S.K. Bhandari, Ex-Assistant Director, Shri Bhagirath Singh, Assistant Director, Smt. Kamlesh Gupta, Assistant Director, Shri M.S. Bhatnagar, Assistant Director (since transferred) and Shri Malkit Singh, Ex- SI Gr. I are greatly acknowledged. Sh. Pawan Kumar Bansal, S.I. Gr-II, Sh. Azad Kumar, S.I. Gr-III and Sh. H.S. Sudan, Sr. Compiler deserved special thanks for having completed the publication work.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

District Highlights - 2001 Census

1. Sangrur district ranks 3rd in area and 4th in population.
2. Barnala is the most populous and Moonak is the least populous tahsil.
3. The average population size of village in the district (2,031) is greater than that of the state (1,311).
4. Sehna (13,797) in Barnala tahsil is the largest village in the district.
5. 35 villages in the district are large sized with a population of 5,000 or more.
6. All the 17 towns in the district have statutory status.
7. The decadal population growth rate in the district (18.7%) is lower than the state (20.1%).
8. Sangrur district is relatively less urbanized than the state. 29.24 per cent of its population is urban and ranks 5th in the state.
9. The sex ratio in the district (871) is lower than the state (876). It ranks 13th among the districts in the state.
10. The child sex ratio in the district (786) is lower than the state (798). It ranks 12th among the districts in the state.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Ever since the beginning of first post independence Census of India 1951, the publication of District Census Handbooks (DCHBs) has become a regular feature of the Indian Census. Produced by the Census Organisation of Government of India on behalf of the State Government, the DCHB is a unique publication which gives the census as well as non-census data down to every village in case of rural areas and ward within the town/urban area in the state. It is recognized as one of the most comprehensive sources of information. Infact, this is the only publication which provides primary census abstract based on census, and non-census data on infrastructure and amenities available, such as educational, medical, postal, communicational at the sub-micro level. It is inter-alia used for delimitation of constituencies, formulation of local level and regional plans and serves as a valuable tool for district administration.

Undisputedly, DCHB has remained to be the most comprehensive and valuable product of the census organization ever since its initiation. It has always been the endeavour of the Census of India to enlarge the content and coverage of the data presented at every census. The DCHB series of 1951 Census contained important Census Tables and the Primary Census Abstract. At the 1961 Census, the scope of the DCHB was enlarged by including a descriptive account of the district, administrative statistics, census tables and the village and town directory. In 1971, the DCHBs were planned in three parts; Part-A included the village and town directory, Part-B included village and town wise primary census abstract, while the Part-C was meant to include analysis of census data and a write up covering social, cultural, historical and other important aspects. However, in some states/union territories Part-C remained confined to the district tables only.

During 1981 Census, some new features were added and the formats of village and town directory were restructured, somewhat. These volumes were published for each district in two parts. Part-A included village and town directory, while Part-B included primary census abstract (PCA) of every village and ward in town/urban area. The inclusion of scheduled castes PCA was the additional feature of the 1981 Census. The village directory of 1981 Census included new parameters viz; information on Adult literacy Centres, Primary Health Sub-centers and Community Health workers in the village (s) to meet the requirement of the Revised Minimum Needs Programme. In addition, information on approach to the village was also provided for the first time in the village directory to help in taking stock of villages requiring road linkages in the district. Likewise, Statement IV-A included in the Town Directory aimed to provide data on slums so as to undertake development activities in such areas.

The manner of presentation of the DCHBs for the 1991 Census was, by and large, same as followed in 1981 Census. However, the format of PCA was slightly restructured in the 1991 Census for the benefit of data users. The village level data were presented Community Development (C.D.) block wise to cater to the needs of grass root level planning as envisaged under the five year plans. Ninefold industrial classification of the main workers was reintroduced by replacing the four-fold industrial categories adopted at the 1981 Census. In addition, the PCA also gave population in the 0-6 age group by sex essential for working out effective literacy rate, besides providing proportion of child population.

The DCHB 2001, the present volume, is the sixth in series. The pattern followed is, by and large, similar to that of the 1991 Census. Among the new features added, information on the availability of newspapers/ magazines, banking facility, agricultural and non-agricultural societies, recreational and cultural

facilities, income and expenditure of the village panchayats find mention. More important is that, it is for the first time in the history of Indian Census that a Permanent Location Code Number (PLCN) has been allotted to every village in the state to meet the demand from different organizations to study the village level data over a time spell. It is believed that the permanent location codes assigned to each village would help in tracing the precise location of a village on account of jurisdictional changes in the boundaries of various administrative areas.

(ii) Brief history of the district

Sangrur district was formed in 1948. Prior to that it formed part of the erstwhile States of Patiala, Nabha and Jind, which collectively were known as Phulkian States. The district name appears to have been derived from the name of a jat 'Sanghu' about 400 years ago. The ruling families of these Phulkian States descended from Phul. The recent excavations carried out by the Archaeological department, Punjab at various places in Malerkotla tahsil of Sangrur district have provided enough proof that Sangrur district has a rich and ancient history. Among the important sights excavated in Malerkotla tahsil, Rohira, Mahorana, Bhudan, Bhasaur, Dhingri, Jandali, Malaud Rorian, Mohammadpur, etc. find mention.

During the middle period Raja Jaipal ruled over Punjab, which also included the present Sangrur district with its capital at Bathinda. At that time, Sunam was an important province. During the times of Mohammad-bin-Tuglaq, a rebellion took place in Sunam and its adjoining areas due to the refusal of the peasants against the payment of land tax. At that time, Sunam had a highly strategic position as it fell on the main road to Delhi. Under the Mughals, the Punjab formed important province of their empire with successive Governors as heads of administration. Sunam and Sirhind were the important provinces during the Mughal rule and most of the area of the present Sangrur district fell under them. Akbar, Jahangir, Shahjahan and Aurangzeb were the important rulers of this mughal dynasty. After the death of Aurangzeb, the Mughal empire had become much weaker and by that time Sikhism had become a militant power in Punjab. The Sikhs from Doab and Majha came in large numbers under the banner of Banda Bahadur to take revenge with Wazar Khan, the Faujdar of Sirhind who was responsible for the endless sufferings to Guru Gobind Singh and his sons. The Phulkian Sikhs, who were known as common ancestor of Phul and who later on succeeded in establishing political power in Punjab did not give much physical assistance to Banda Bahadur although they gave him liberal financial assistance for fighting against the mughal rule. Banda Bahadur reigned for a short period in the province, which also included Sunam and other districts of Sangrur. He introduced abolition of zamindari system and recognized the proprietary rights of the tillers of the land. Sangrur, which included areas of erstwhile Phulkian States of Patiala, Nabha and Jind and the Mohammedan State of Malerkotla, was once the headquarters of this Phulkian States of Jind.

During the British period, the active influence of the British in the erstwhile State of Jind was visible during the rule of Raja Bhag Singh when he along with other Phulkian sardars approached the British Government for seeking protection against the rising power of Maharaja Ranjit Singh. Although Ranjit Singh was very moderate towards the Phulkian Rajas, but in due course, with the rising power of Ranjit Singh, the rulers of Phulkian States became suspicious of his designs and hence sought British protection. They pledged their loyalty to every succeeding power in Delhi to which the British were glad to entertain their offer and a treaty was made with Maharaja Ranjit Singh on 25th April,1809.

It is felt that the failure to absorb the Cis-Satluj States was tragedy of the Sikh militant nationalism and success of the Cis-Sikhs with the help of British Government. This marked the disruption of the great creation of Guru Gobind Singh. The British Government looked for every opportunity to disrupt Sikh militant nationalism and their aid to cis-satluj Sikhs gave them enough room to interfere so that these states become absolute depcndencies of the British rather than independent rulers in treaty alliance with the British power.

Raja Sangat Singh son of Fateh Singh, the ruler of Jind state, took the throne at the age of only 11 years. Sangat Singh had very cordial relations with Maharaja Ranjit Singh and the British did not approve of these activities. The natural faults of Sangat Singh's character were carefully encouraged by his

ministers for their own ends. In 1827 Raja Sangat Singh shifted headquarters from Jind to Sangrur. He died at a very young age of 23. It was the period of utmost confusion and uncertainity prevailed with the successive rulers.

In 1837 Raja Sarup Singh was formally installed in the presence of all Phulkian chiefs and the British agent. Raja Sarup Singh rose to power by virtue of British support and was loyal to them. He also lead his troops to join the British army in the second sikh war in 1849.

When the mutiny broke out in 1857, Raja Sarup Singh was not behind Maharaja of Patiala. He was suitably rewarded by the British and his son Raghbir Singh was made the new chief. He also rendered help to the British government on the occasion of agitation launched by Namdhari Sikhs, also called Kukas. Raja Raghbir Singh died in 1887 and his son had also died at an early age during his rule. It was his grandson, Ranbir Singh, who ruled the Jind state till independence in 1947.

The struggle for freedom :

The people of Sangrur were governed by the Phulkian chiefs who owed their alliance to the British. Hence the freedom struggle of the people was mainly the struggle against princely rulers of Phulkian states of Jind, Nabha and Patiala who were following the repressive policy of the British.The people of Sangrur district have played a significant role in the freedom movement in the country. The whole nation is proud of Shaheed Udham Singh, born in Sunam, for his commendable role in the freedom struggle alongwith many other heroes. The daring step of Sardar Udham Singh gave a new spirit to the young revolutionaries of the country. In order to pay homage to this great martyr a memorial has been raised at Sunam, which is reflected as 'motif ' in this publication.

At the time of independence Raja Ranbir Singh was ruling the Jind State with its headquarters at Sangrur. Under the Independence Act of 1947, India was declared a free nation with dominion status with effect from 15th August,1947. As a result of this, Punjab got partitioned. The most disturbing factor in the process was the mass migration of members of different communities from the then west Punjab to east Punjab and vice-versa. Though there was a blood shed in the whole of the district, Malerkotla state was an exception to it. Sikhs showed a great consideration towards Mohammedans of Malerkotla because of the fact that it was only Sher Mohammad khan, the then Nawab of Malerkotla, who condemned the heinous crime of bricking alive the sons of Guru Gobind Singh by Wazir Khan, the Governor of Sirhind.

With the integration of the Princely States of Patiala, Nabha, Jind, Faridkot, Kapurthala, Kalsia, Nalagarh and Malerkotla the Patiala and the East Punjab States Union (PEPSU) was formed on 20th August, 1948. The PEPSU State got merged with Punjab on 1st November, 1956 as per the recommendations of the States Reorganisation Committees report submitted in 1955. The boundaries of the district further underwent a change at the time of re-organisation of the State in 1966 when Jind and Narwana tahsils were transferred to the newly created state of Haryana.

At the time of 1971 Census, Sangrur district included four tahsils of Malerkotla, Sangrur, Sunam and Barnala. The district did not experience any major jurisdictional change till 1991 and the number of tahsils remained the same. However, at this 2001 Census, with the creation of Dhuri and Moonak tahsils, the number of tahsils in the district has risen to six.

(iii) Administrative set-up

The State has experienced large scale jurisdictional changes after the 1991 census. The number of districts has increased from 12 in 1991 to 17 in 2001. The newly created districts include; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. With the exception of Kapurthala district all other 11 districts in the State have experienced inter-district jurisdictional changes of varying magnitude.

These 17 districts are distributed over four divisions. Jalandhar division includes districts of Gurdaspur, Amritsar, Kapurthala, Jalandhar, Hoshiarpur and Nawanshahr; Patiala division covers districts of Rupnagar, Ludhiana, Patiala, Sangrur and Fatehgarh Sahib; Firozpur division spreads over districts of Firozpur, Moga and Muktsar, while Faridkot division embraces districts of Faridkot, Bathinda and Mansa.

All the districts of 1991 Census except Kapurthala have undergone intra-district jurisdictional changes resulting in increase in the number of tahsil

in the state from 46 in 1991 to 72 in 2001 Census. (In Punjab tahsil and sub division are co-terminous). In Sangrur district, with the addition of two newly created tahsils of Dhuri and Moonak, the number of tahsils has gone upto six during this decade. Likewise the number of towns in the district has increased from 12 to 17 and all of them have statutory status. The newly added five towns are; Handiaya, Cheema, Moonak, Khanauri and Dirba and all of them are Nagar Panchayats.

The statutory towns are notified by the State government. Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or transactional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the state government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specify by notification in the official gazette any area to be transitional area or a smaller urban area for the purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the state government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the Ist Class, IInd Class or IIIrd Class.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows :

Sl. No.	Class of Urban Local Bodies	Population	Income
1	2	3	4
1.	Municipal Corporation	3 lac or above	2 Crore or above
2.	Municipal Council Class I	50,000 to 3 lac	50 lac to 2crore
3	Municipal Council Class II	10,000 to 50,000	15 lac to 50 lac
4.	Municipal Council Class III	Upto 10,000	upto 15 lac
5.	Nagar Panchayat	5,000 or above	More than Rs.150 per head

The following statement indicates the jurisdictional changes which took place after the 1991 Census in Sangrur District.

JURISDICTIONAL CHANGES DURING 1991-2001

Name of District/ Tahsil	No. of villages		No. of Towns		Changes since 1991 & Govt. Notification No.
	1991	2001	1991	2001

					viii) 2/26/96-RE.II(1)/5263 dt. 13.6.1996.
					ix) 2/66/96-RE.II(1)/9435 dt. 19.12.1996.

For the administrative purposes, the district forms part of Patiala division. The district is the basic unit of administration. For the purposes of general and revenue set up the district is divided into six tahsils viz, Barnala, Malerkotla, Dhuri, Sangrur, Sunam and Moonak. All of them have sub divisional status. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district and revenue administration in the district.

(iv) Physical Features

Location and Size :

Located in the Malwa track in the southern part of the state, Sangrur district lies between 29°, 44' and 30°, 42' north latitude and 75°, 18' and 76°, 13' east longitude. It is surrounded by the Ludhiana district in the north, Patiala in the east, Bathinda in the west and Faridkot in the northwest. Haryana state lies to its south. Sangrur is the district headquarters town and is located at a distance of 130 km from Chandigarh, the administrative headquarters of the State. As per Census 2001, Sangrur M.Cl has a population of 77,989 and is the second largest town in the district in population size, next only to Malerkotla town which has a population of 107,009. Sangrur town lies on the intersection of Patiala-Barnala State Highway No.12 and Ludhiana-Jakhal State Highway No.11. Ludhiana-Jakhal rail line also passes through Sangrur.

According to 2001 Census, Sangrur district covers an area of 5,108.0 sq.km and has a population of 2,000,173 comprised of 1,069,289 males and 930,884 females. It accounts for 10.1 per cent of the state's area and 8.2 per cent of its population. Among the districts in the State, Sangrur ranks second in area and fourth in population.

Physiography :

The entire district forms part of Malwa plains with general elevation of about 800 metres above mean sea level. It is endowed with nearly a level surface except for the occurrence of sand dune features in some parts which break the monotony of this flat alluvial plain. The district gently slopes from northeast to southwest.

Eastern Sangrur plains spread over the upper eastern part of the district and covers nearly two-fifths of the total area of the district. It extends over parts of Barnala, Sangrur, Dhuri, Malerkotla, Sunam and Moonak tahsils. The climate of the region is similar to other parts of the district and the geological structure is comprised of alluvium.

Western Sangrur plains extend over parts of Barnala, Malerkotla, Sangrur and Dhuri tahsils. This region comprises nearly one-third of the total area of the district. From the point of view of climate and geology, it is almost similar to that of the Eastern Sangrur Plains.

The Southern Sangrur Plains include parts of Sangrur, Sunam and Moonak tahsils. The soils in this region are sandy loam to silt loam, and the Ghaggar branch of the Sirhind canal passes through this area.

Ghaggar flood plain is located in the extreme southern parts of the district and is the smallest of all the physiographic zones in the district. Ghaggar is the main river flowing through this region. Being a flood plain, sand deposits are formed along the Ghaggar river.

Drainage :

Sangrur district is drained by river Ghaggar which originates in Sirmaur district of Himachal Pradesh. River Ghaggar is seasonal and often subject to floods during rainy season. It does contain some water in its upper course throughout the year. Ghaggar river enters Sangrur district near village Pakki Khanauri and traverses through the southern part of the district falling in Sunam tahsil.

Sirhind choe, also known as Sunam choe, is the other small stream which forms part of surface drainage in the district. This too, is seasonal. As such, the district is devoid of any perennial major water source.

Climate :

The climate, on the whole, is dry in the district. Temperatures start rising from middle of February and increase rapidly from the beginning of March till June, which normaly is the hottest month of the season. The temperature occasionally touches 47° centigrade and scorching dust laden winds, commonly known as loo, blow during the hot season. The temperature drops considerably with the onset of monsoon in early July, although the days continue to be quite warm as compared to nights. Due to increased humidity in the monsoon period, the weather is oppressive in between the rains.

Based on the climatic conditions in the district, the year may be divided into four seasons. November to March is the cold season which is followed by the hot season lasting up to the end of June. The period from July to mid September constitutes the rainy season commonly known as the period of southwest monsoon.The second half of September and October is termed as the period of post monsoon. January being the coldest and June the hottest months.

Natural Economic Resources

Minerals and Mining :

A reserve of 4.4 million tones of bedded kankar has been estimated around villages Nadampur, Matran, Nandgarh and Balad Khurd (in tahsil Sangrur). Bedded kankar is also reported from Fatehgarh, Bhadson, Jaulian, Sangatpura, Panwan, Kakra, Phaguwala, Ramnagar, Jalan, Raisinghwala, Roshanwala, Ghabdan (in tahsil Sangrur) and Tolewal, Jakhepal, Bas, Sataluj (in Sunam Tashil). The kankar around Sunam-Sangrur has been estimated at about 42.5 million tonnes, out of which 15.4 million tonnes is that of bedded variety.

Saltpetre (Shora) is reported in villages Cheema in the blocks of Sunam and Barnala. In the production of Saltpetre this district is next to Firozpur.

Land and Land use Pattern :

As per the village records for the year 2000-2001, Sangrur district has an area of 502,000 hectares (5,020 Sq.km.) out of which 6,000 hectares is under forests, 12,500 hectares is barren and uncultivable land, 24,000 hectares is put to non-agricultural uses, 2,000 hectares is under miscellaneous crops and groves, 1,000 hectares is current fallow, and 456,000 hectares is net sown area. A small proportion of area (less than 500 hectares each) is cultivable waste, and under permanent pastures and other grazing land. In other words, net sown area constitutes nearly 91 per cent of the total area of the district. Out of this total net sown area of 456,000 hectares, 445,000 hectares is sown more than once. The district with barely 60 Sq.km. (1.2%) of its area under forest is almost devoid of any forest cover. There are no reserved forests in the district and the forest cover of the district is mainly protected forest.

In the district, 70.8 per cent of population is residing in rural area and 29.2 per cent in urban area. However, there has been marked shift in the economic composition of its population. Less than one-half (46.6%) of its population is engaged in agriculture (29.3% as cultivators and 17.3% as agricultural labourers).

Khaif (Sawani) and Rabi (Harhi) are the two main harvesting seasons. The principal kharif crops include paddy (rice), jawar, bajra, sugarcane and groundnut. The rabi crops include wheat, barley, gram, oil seeds, etc.

During 2000-2001, 357,000 hectares of area was under rice cultivation in the district, 2000 hectares under bajra, and 1000 hectares under maize. This signifies that rice (paddy) is the most dominant kharif crop grown in the district. During 2000-2001 the district produced 1,342 metric tonnes of rice at an average yield of 3,759 kg. per hectare.

Among the rabi crops, wheat is the most dominant. During 2000-2001, 393,000 hectares of agricultural land was under wheat cultivation. The district produced 1,921 metric tonnes of wheat during 2000-2001. The average yield of 4,888 kgs of wheat per hectare in the district was the third highest in the state, next only to Ludhiana (5,169) and Fatehgarh Sahib (5,041).

Barley and Gram are the other important crops grown in the district and area under cultivation of these two crops is 6,000 hectares and 900 hectares respectively.

Among pulses grown in the district, moong, and rapeseed and mustard are the most important. During 2000-01, 4,500 hectares of land was under moong cultivation and 3,500 hectares were under cultivation of rapeseed and mustard. Out of the total production of 184 metric tonnes of moong and 66 metric tonnes of rapeseed and mustard in the state, the share of Sangrur district was 2.4 metric tonnes and 4.8 metric tonnes respectively.

Sugarcane, an important plantation crop in the district is grown over 3,400 hectares of land and 24 metric tonnes of sugarcane was produced during 2000-01. The yield of sugarcane per hectare too, is very high (7,059 kg.) and this is almost at par with district Patiala (97,248 kg.) in the state.

Cotton is another plantation crop, which is grown in the district. In the State 473,000 hectares of land was under cotton cultivation (358,000 hectares under American cotton and 115,000 under dessi cotton) during 2000-01. The area under cotton plantation in Sangrur district is 21,500 hectares (6000 American and 15,500 dessi cotton). The dessi cotton grown in Sangrur district is in great demand. Further, out of the total production of 1,197 bales (203.5 metric tonnes) in the state, the share of Sangrur district was 42 bales (7.1 metric tonnes).

Irrigation :

This district is marked with relatively low rainfall and thus, irrigation has a vital role. In absolute terms, 422,500 hectares of net sown area is irrigated and this constitutes 92.7 per cent of the net area sown in the district.

Tubewells and wells are the main source of irrigation as 341,200 hectares of net sown area in the district is irrigated through this source. Well irrigation is a very old agricultural practice in the district where bullocks and camels provide the main source of power for running the Persian wheel. However, the introduction of pumping sets run by diesel and hydro-electric power has considerably increased in the district. Well or tubewell irrigation, unlike the canal Irrigation, does not cause water logging.

Irrigation through canals is equally important in the district as 81,300 hectares of net sown area is irrigated by this source. Bhakra main canal and Sirhind canal are the two canals which irrigate lands in the district. The Sirhind canal has following three branches;

1. Bathinda branch, 2. Kotla branch and 3. Ghaggar branch.

The Bathinda branch and Kotla branch of Sirhind canal irrigate lands in Malerkotla, Barnala, Dhuri and Sangrur tahsils whereas the Bhakra main canal and Ghaggar branch of Sirhind Canal irrigate lands of Sunam and Moonak tahsils.

Animal Husbandry :

Livestock, the backbone of the peasantry and the farmer, has traditionally been depending upon draught animals for ploughing on milch cattle, mainly cows and buffaloes for milk and other dairy products for domestic use and for supplementing their farm income.

The data on livestock and Poultry in Punjab is available for the year 1997. It reveals that there are 253,900 cattle (cows) in Sangrur district and this makes nearly one-tenth (9.6%) of the cattle wealth of the state. Likewise, buffaloes (781,100) in the district make 12.7 percent of their total number in the state. Cows and Buffaloes, as else where, are the two most dominant milch animals in the district. There are 1100 horses and ponies, 200 donkeys and 2,200 mules in the district and their share in total number in the state is 3.2, 0.9 and 12.6 per cent respectively.

Out of the total sheep in the state, 48,300 (11.1%) are in Sangrur district and this number is the second highest, next only to Mansa (48,500). There are 29,700 camels in the State out of which 200 are in Sangrur district. Likewise, out of 93,700 pigs in the state, 4,800 are in this district.

Industry :

Sangrur district is not very well developed from industrial point of view. However, since the declaration of Sangrur as industrially backward district, many large scale units have been set up in the district and important among them are : 1) Pepsi foods, Channo 2) Punjab Power Generation Machines, Ltd., Channo 3) Indian Acrylics, Channo; 4) The Barnala Co-operative spinning mills Ltd. Tapa: 5) Kewal Vanaspati Oils Pvt.Ltd., Sangrur; 6) Abhishek Spinning Mills Ltd., Barnala; 7) Arihant Cots Ltd., Dhuri: 8) Varindra Agro, Barnala; 9) Steel Strips Ltd. Malerkotla and Bagrian Shoe Factory, Bagrian.

Trade and Commerce :

The district has emerged as a leading district in trade and commerce. As per the data available for the year 2000-01, out of 144 regulated markets in the state, 17 are located in Sangrur and this number is the highest for any of the districts in the State. On an average, each regulated market is serving 41 villages in the district compared with 88 villages in the State as such.

Malerkotla, Dhuri, Sangrur, Sunam, Barnala, Dhanaula and Moonak are the main centres of trade in the district. Agricultural commodities constitute the main items of export. They include wheat, paddy, gram, cotton, gur, sugar, etc. Among the non-agricultural items, export of bicycle, sewing machine parts, leather goods, etc find mention.

Among the market arrivals, the district reported the highest arrival of paddy during 2000-01. Out of the market arrival of 11,057,000 tonnes of paddy in the State, 1,793,000 tonnes (16.2%), was contributed by Sangrur district. Likewise, the market arrival of wheat from Sangrur district (1,208,000 tonnes) was the second highest among the districts, next only to

Firozpur (1,240,000 tonnes). Sangrur district has shown a significant improvement in the market arrivals of food grains in the State pool. The share of food grains from Sangrur district in State pool has increased from 34,086,000 tonnes during 1990-91 to 36,104,000 tonnes in 2000-01.

Transport :

An efficient network of roads and railways is an essential requirement for development of any area as it is the backbone of any developmental activity.

Sangrur district falls under Ambala division of northern railway. A total rail length of 152 km is located in this district. Dhuri is the only rail junction in the district. Two rail lines which pass through this district are; Ludhiana-Jakhal broad gauge rail line which passes through Malerkotla, Sangrur and Sunam; and Ambala-Bathinda broad gauge railway line which passes through Malerkotla and Barnala. As such, the district is not very well connected through rail links.

Anyhow, there is an efficient network of roads through out the district. The district has a road length of 4,198 km out of which 157 km is under National highways and 4,041 is under State highways. Further, as per the data available from P.W.D. (B&R) department for the year 2000-01 the Punjab state has a road length of 54,836 km giving an overall average of 109 km per 100 sq.km. of area. This by all means exhibits a fairly well developed system of roads in the State. Sangrur district has a road length of 82 km per 100 sq.km of area which, though some what lower than that of the State as a whole, is quite satisfying in itself. Further more, all the villages in the district, barring one, are connected by road.

Electricity and Power :

The district is served by Sangrur, Barnala and Patiala circles of Punjab State Electricity Board (PSEB). Prior to Independence, there was only one thermal plant at Sangrur and one diesel generating plant at Malerkotla in the district. The hydro-electric power came to Sangrur on 25th march, 1956.

The consumption of electric power in Punjab for various purposes has increased substantially; from 11,906.9 million Kwh in 1990-91 to 19,184.5 million Kwh during 2000-01 . The most significant increase in consumption is for domestic use (1619.9 million Kwh in 1990-91 to 4224.1 million Kwh in 2000-01). The consumption of power for industry has almost doubled in the State during this decade (4,317.6 to 8,047.1 million Kwh). In the district, out of the total consumption of 1701.6 million Kwh, 301.4 million Kwh is consumed for domestic use, 47.0 million Kwh for commercial use, 615.1 million Kwh for industrial use, 726.6 million Kwh for agricultural purposes and 11.5 million Kwh for other uses.

Sangrur district receives 8.9 per cent of the total power produced in the state and its usage for various purposes reads as ; domestic (17.7%), commercial (2.8%), industrial (36.2%), agricultural (42.7%), while a small proportion (0.7%) is consumed for other uses. In the Sangrur district 93.8 per cent of the households are using elcctricity and this percentage is higher than that of the State (86.7%).

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of

from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Gorporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms,

each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituents a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) a minimum population of 5,000;
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of

a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 100,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in huge pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

List of Scheduled Castes and Scheduled Tribes:

The Government of India by Gazette Notification under Article 314(1) of Indian Constitution has declared some castes, races or tribes or parts of or groups within castes, races or tribes as Scheduled Castes as there is no standard definition of Scheduled Castes. Similarly, Scheduled Tribes mean all such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are declared by the President of India to be treated as Scheduled Tribes under Article 342(1) of the Indian Constitution. There is slight change in the definition of Scheduled

Castes in 1991. Before that, Scheduled Castes could belong to Hindu or Sikh religion. But from 1990, in addition to Hindu and Sikh religions, Scheduled Castes may belong to Buddhists religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In Punjab State, 37 castes were notified by the State Government as Scheduled Castes at the 1991 Census and there is no change at the 2001 Census. Following 37 castes have been notified as scheduled castes in Punjab;

1. Ad Dharmi
2. Balmiki, Chura, Bhangi
3. Bangali
4. Barar, Burar or Berar
5. Batwal
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar Raigar, Ramdasi or Ravidasi
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhilla, Gandil, Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut, Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and / or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

(vi) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

* Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz.

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live birthsduring the year}} \times 1,000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000$$

i) Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1,000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1,000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100,000$$

Eligible couple (Couples per 1,000 population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

1) Migration

2) Internal and International Migration

3) Rural - Urban component of migration

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/ Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UACity/Town. These are :

M7 (5,000,000 and above)
M6 (2,000,000 to 4,999,999)
M5 (1,000,000-1,999,999)
M4 (500,000-999,999)
M3 (300,000-499,999)
M2 (200,000-299,999) and
M1 (100,000-199,999)

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001-Census Findings-Population and its distribution

The following table shows distribution of rural and urban population by tahsils in the district.

POPULATION, NUMBER OF VILLAGES AND TOWNS, 2001

Name of Tahsil	Population									Number of Villages		No. of Towns
	Total			Rural			Urban					
	P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13
Barnala	526,931	281,494	245,437	366,364	194,932	171,432	160,567	86,562	74,005	125	124	5
Malerkotla	386,439	206,068	180,371	251,408	134,357	117,051	135,031	71,711	63,320	189	188	2
Dhuri	240,080	128,341	111,739	190,674	101,916	88,758	49,406	26,425	22,981	96	95	1
Sangrur	322,371	172,458	149,913	206,351	110,472	95,879	116,020	61,986	54,034	125	124	3
Sunam	328,799	176,554	152,245	250,224	134,572	115,652	78,575	41,982	36,593	95	95	3
Moonak	195,553	104,374	91,179	150,333	80,349	69,984	45,220	24,025	21,195	71	71	3
District Total	**2,000,173**	**1,069,289**	**930,884**	**1,415,354**	**756,598**	**658,756**	**584,819**	**312,691**	**272,128**	**701**	**697**	**17**

Sangrur district has a population of 2,000,173 including 1,069,289 males and 930,884 females. A tahsil in Sangrur district on an average has a population of 333,362, which is quite close to the average size of tahsil in the State (338,319) as such.

Among the tahsils in the district, Barnala (526,931) is the most populous and Moonak (195,553) is the least populous. In other words, tahsil with the highest population in the district is more than 2½ times bigger than the tahsil with least population. The remaining tahsils in order of population size are; Malerkotla (386,439), Sunam (328,799), Sangrur (322,371) and Dhuri (240,080).

Out of the total population in the district 1,415,354 (70.8%) is residing in rural and 584,819 (29.2%) in urban areas. The rural population spreads over 697 inhabited villages and urban population is distributed over 17 towns in the district. An inhabited village in

the district on an average has a population of 2,031 as against 1,311 in the state signifying that the villages in Sangrur district are much larger in size. Towns, on the other hand, are comparatively smaller in the district compared with that of the State; a town in Sangrur district on an average has a population of 34,401 compared with 52,627 in the state.

Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the census organization to classify towns into six classes according to their population size. A town with a population of 100,000 or more is termed as 'city' in Indian Census.

The distribution of towns of Sangrur district by size class is exhibited in the following table.

Class	Population size	No. of Towns
1	2	3
Class – I	100,000 and above (Generally referred to as city)	1
Class – II	50,000 to 99,999	3
Class – III	20,000 to 49,999	3
Class – IV	10,000 to 19,999	8
Class – V	5,000 to 9,999	2
Class – VI	Less than 5,000	-

Malerkotla with a population of 107,009 is the only class I town in the district. Among the remaining towns, three each fall in Class II and Class III, eight are class-IV towns and the remaining two are Class V towns. There is no town under Class-VI.

Malerkotla, the only class I town in the district, accommodates almost one-fifth (18.3%) of the district's urban population and three class II towns contain two-fifths (39.5%) of the urban population. This signifies that nearly three-fifths (57.8%) of the urban population of the district is concentrated in these four towns. The share of Class III, Class IV and class V towns is 16.7, 22.3 and 3.2 per cent respectively.

Population, Growth, Density and Sex Ratio

Population Growth :

During 1991-2001, population of the district has increased from 1,685,449 in 1991 to 2,000,173 in 2001 resulting in a net addition of 314,724 persons during this decade. In percentage terms Sangrur district has recorded a decadal growth rate of 18.7 per cent. Among the districts, it ranks 11th, and this growth rate is significantly lower than that of the state (20.1%).

Density :

Sangrur district with a population of 2,000,173 and an area of 5,108 sq.km has a density of 392 persons per sq. km, which is significantly lower than that of the State (484) and ranks 13th among the districts in the state.

Within the district, Malerkotla (556) is the most densely populated and Moonak (253) is the most thinly populated tahsil. Likewise, rural density varies between 376 in Malerkotla and 199 in Moonak tahsil. The urban density is the highest in Malerkotla (4,961) and the lowest in Sunam (1,094) tahsil.

Sex Ratio :

Sex ratio is derived as the number of females per 1,000 males. Generally speaking differentials in mortality conditions of males and females, male-female ratio at birth and sex selective migration are the key factors which determine the sex composition. It reflects the socio-economic and demographic characteristic of the population, and unfolds the status of women in the society and care of the girl child in particular.

Significant feature of Punjab's population is the preponderance of males over females. According to Census 2001, out of the total population of 24,358,999 in the State, 12,985,045 are males and 11,373,954 are females resulting in an overall sex ratio of 876 which is significantly lower than the country as a whole (933).

The sex ratio in the State and its constituent districts has remained to be low throughout. At the beginning of the 20th century, the sex ratio was 832 in 1901, which declined to 780 in 1911. Ever since, the sex ratio in the state showed gradual improvement till 1991 when the sex ratio in the state reached 882. However, it has declined to 876 at 2001, exhibiting a fall of 6 points in the State.

In Sangrur district details prior to 1951 census are not available. Ever since 1951 the sex ratio in the district has gradually improved from 821 in 1951 to 871 in 2001.

Within the State, the districts among themselves show considerable disparity which is the highest in Hoshiarpur District (935) and the lowest in Ludhiana (824). Sangrur district with a sex ratio of 871 ranks 13th among the districts in the State. Apparently, sex ratio in the district is significantly lower than the State, which in itself is marked with a low sex ratio.

Among the tahsils in the district the sex ratio is the highest in Malerkotla (875) and the lowest is Sunam (862). The rural sex ratio varies between 879 in Barnala and 859 in Sunam tahsil, and the urban sex ratio fluctuates between 883 in Malerkotla and 855 in Barnala tahsil. Contrary to the general trends, the urban sex ratio is appreciably better than the rural in Malerkotla, Sangrur, Sunam and Moonak tahsils. The towns among themselves exhibit significant disparity in this regard; it varies between 902 in Dhanaula and 822 in Longowal.

The sex ratio of child population in age-group 0-6 in the State and its constituent districts is quite low and this has become a matter of deep concern. Punjab has a child sex ratio of 798; it is almost identical with its rural (799) and urban (796) areas. In Sangrur district, the child sex ratio (786) is even lower than that of the State. Within the district, the tahsils among themselves display a considerable disparity in their child sex ratio; it is the maximum in Malerkotla (830) and the minimum in Sunam (754).

Like wise, the disparity in the rural and urban child sex ratio among the tahsils is also quite marked; the rural child sex ratio varies between 813 in Malerkotla and 760 in Dhuri, while the variation in urban child sex ratio is to the extent of 862 in Malerkotla and 737 in Sunam.

Literacy :

Any person who is able to read and write with understanding in any language is recorded as literate. As in 1991 all the children below 7 years of age have been treated as illiterates.

69.7 per cent of the state's population is literate which is higher than that of the country as such (64.8%). Among the States/Union Territories, Punjab ranks 15th in terms of literacy.

In Sangrur district 60.0 per cent of the population is recorded as literate, which is significantly lower than the state as such. It ranks quite low among the districts in the State. Muktsar and Mansa are the only other two districts which have literacy rate lower than that of Sangrur. Among the tahsils in the district, Malerkotla (65.8%) ranks at the top while Moonak (50.3%) is placed at the bottom.

Between the two sexes, the gap in the literacy rate in the district is more significant as compared to that of the State. In Sangrur district 65.8 per cent among males and 53.4 per cent among females are literate, while the corresponding figures for the State are 75.2 and 63.4 per cent respectively.

Malerkotla (65.8%) is the most literate tahsil in the district. By contrast, Moonak (50.3%) with only one-half of its population as literate is placed at the bottom. Besides Malerkotla, the literacy rate is higher than the district average in Dhuri (63.4%), Sangrur (63.0%) and Barnala (60.3%). However, none of these tahsils in the district has literacy rate higher than the overall literacy rate in the state.

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district 55.9 per cent of the rural population and 69.9 per cent of the urban population is literate. The urban literacy is higher than the rural in all the tahsils and the gap in rural-urban literacy rate is the maximum in Moonak (urban- 67.1% and rural 45.3%) and the minimum in Malerkotla (urban- 66.8% and rural 65.3%).

Work Participation Rate

Definition of Work and Classification of Workers:

How the 'work' is defined by the Census needs to be understood religiously. Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the Census of India 2001, as persons engaged in rearing of animals for production of milk for their own use have been treated as workers. Further more in the 1991 Census cultivation of certain crops even for one's self consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as tomatoes,

all types of flowers, fruits and tubers potatoes, chilies and turmerics, viper, cardmoms, vegetables etc. In other words plantation of tea, coffee, rubber, coconut and betel nuts have been classified under plantation and not included in cultivation.

The reference period for recording the economic activity of any person is preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last year are recorded as main workers while those who had worked for less than six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, workers in Household Industries and Other Workers.

Punjab, with a work participation rate of 37.5 per cent, ranks 24th among the States/Union Territories in the Country. The work participation rate in the State is lower than that of India (39.1%). Among the districts in the State, the proportion of workers varies between 44.9 per cent in Nawanshahr district and 33.3 per cent in Gurdaspur district. In all 10 out of 17 districts in the State have shown work participation above the state average and among them five districts have atleast two-fifths of their population reported as worker. Besides Nawanshahr, they include Bathinda (42.3%), Mansa (40.9%), Sangrur (40.7%) and Moga (40.1%).

Main Workers and Marginal Workers:

32.2 per cent of Punjab's population is recorded as 'main worker' and 5.3 per cent as 'marginal worker'; the corresponding figures for 1991 Census are 30.1 per cent and 0.8 per cent respectively. In Sangrur district main workers and marginal workers constitute 35.7 and 5.0 per cent of the total population respectively. This signifies that the work participation rate (main + marginal) in Sangrur district (40.7%) is better than that of the State (37.5%).

Among the tahsils in the district the percentage of main workers varies between 39.0 in Dhuri tahsil and 32.1 in Sangrur tahsil and that of marginal workers it varies between 6.9 in Moonak tahsil and 3.7 per cent in Malerkotla tahsil. Further, the proportion of main workers is the highest in Barnala tahsil (39.8%) and the lowest in Sangrur tahsil (32.1%). Further, the incidence of marginal workers is observed to be more among females in comparison to males; the proportion of female marginal workers in the district (7.3%) is more than twice that of males (3.0%). By and large, a similar pattern is observed among all the tahsils in this regard. In Moonak tahsil 10.7 per cent of females are marginal workers as against 3.5 per cent among males. Dhuri (8.9%), Sunam (8.0%) and Barnala (7.3%) too, have high proportion of female marginal workers.

In the district 54.7 per cent among males and 24.6 per cent among females are reported as workers showing a significant reduction in the gap between the two. In Dhuri tahsil, one-third (33.3%) of the females are recorded as workers and this is the highest among all the tahsils in the district.

Religion :

It has been customary for the Indian Census to provide information on religious persuations of its people. Religion is one of the basic cultural characteristics of population and several religions have thrived in the secular state of India. Apparently, information on various religious communities in the country has been of great interest and use to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. The instructions for recording this information are same as in 1991. Question 7 of the household schedule canvassed at the 2001 Census pertained to religion. The instructions to enumerators were to record faithfully the religion of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes:

Hindus	-	1
Muslims	-	2
Christians	-	3
Sikhs	-	4
Buddhists	-	5
Jains	-	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

The brief analysis based on 2001 Census data is given under annexure V.

Mother Tongue and Language :

The definition of 'Mother Tongue' adopted at 2001 Census is the same as in 1991. Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. It may be different for different members in the household.

Question 11 of the Household Schedule was aimed to collect information on 'other languages known' (upto two languages in order of proficiency).

In order to provide a broad scenario a brief note alongwith tables based on 1991-2001 Census data is given in Annexure VIII.

Scheduled Castes and Scheduled Tribes :

Out of the total population of 24,358,999 in the state 7,028,723 belong to scheduled castes as per 2001 Census. As such 28.9% of the state's population belongs to scheduled castes. In Sangrur scheduled castes population accounted for 27.6% of the district population.

During 1991-2001 scheduled castes population in the state has increased by 22.4% which is marginally higher than that of Sangrur district (22.3%). In the district 37.2% of the scheduled castes population is literate which is significantly lower than that of the state (47.5%). 45.8% in rural areas and 61.9% in urban areas of Sangrur district are literate. During 1991-2001, the district recorded a growth rate of 18.6 per cent as against 19.8 per cent for the state. Among the tahsils, it varies between 19.8 per cent in Moonak and 14.6 per cent in Dhuri. Besides Dhuri, the decadal growth rate is lower than that of the district in Malerkotla (16.4%). All the tahsils in the district have witnessed the decadal growth rate which is higher than the state average.

The Scheduled castes urban population in the district grew by 50.8 per cent which is nearly three times that of the rural (16.3%).

20.3 per cent of the population in the district is urban. Among tahsil this percentage is maximum in Barnala (28.1) and minimum in Malerkotla (7.3) per cent. Similarly in rural this percentage is (33.2) in Sangrur and (28.5) in Moonak.

37 castes are notified as scheduled castes in the state and their numerical strength is very considerably.

There is no scheduled tribes population in the state.

(viii) Brief Analysis Based on Primary Census Abstract

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Barnala	440,772	320,406	120,366	526,931	366,364	160,567	19.5	14.3	33.4	27.3	30.5
2	Malerkotla	331,822	217,662	114,160	386,439	251,408	135,031	16.5	15.5	18.3	34.4	34.9

District Total:		**1,685,449**	**1,267,455**	**417,994**	**2,000,173**	**1,415,354**	**584,819**	**18.7**	**11.7**	**39.9**	**24.8**	**29.2**

During 1991-2001, Sangrur district recorded a growth rate of 18.7 per cent as against 20.1 per cent for the State. Among the tahsils, it varies between 21.8 per cent in Sangrur and 15.0 per cent in Dhuri. Besides Dhuri, the decadal growth rate is lower than that of the district in Malerkotla (16.5%). All other tahsils exhibit decadal growth rate more than the district average.

Urban growth rate (39.9%) in the district is more than three times that of the rural (11.7%). The urban growth rate in Moonak tahsil (190.7%) is excessively high and this is mainly attributed to the creation of two new towns of Moonak and Khanauri; both these towns have added a population of 25,884. Sunam tahsil (78.9%) also portrays a very high urban growth rate. Here too, there has been an addition of two new towns viz, Cheema and Dirba. By contrast, the urban growth rate is the lowest in Malerkotla (18.3%) and this is less than one-half of the State. The urban growth rate in the remaining three tahsils is; Sangrur (34.0%), Barnala (33.4%) and Dhuri (32.0%).

The rural growth trends are, by and large, converse of the urban growth trends; it is the lowest (1.8%) in Moonak and quite low in Sunam (7.8%). Sangrur tahsil (15.9%) reveals the highest rural growth rate and is closely followed by Malerkotla (15.5%).

The level of urbanization in the district has improved from 24.8 per cent in 1991 to 29.2 per cent in 2001. During 1991-2001, this increase is the most significant in Moonak (from 9.5% to 23.1%) and Sunam (15.9% to 23.9%). On the other hand the increase is nominal in Malerkotla (34.4% to 34.9%).

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Out of 701 villages in the district, 4 are uninhabited; one each in the tahsils of Malerkotla, Dhuri, Sangrur and Barnala. The inhabited villages, which number 697 are distributed over 13 CD blocks in the district. A CD block in the district on an average has 54 inhabited villages and a population of 108,873; the corresponding figures for the State as such are, 89 and 116,641 respectively. Among the inhabited villages, 21 (3.0%) have a population of less than 200. Four (out of 13) CD blocks do not have any village in this category. Another 37 (5.3%) villages too, have small population size in the range of 200-499. As many as 114 (16.4%) constitute the size class 500-999 and another 251(36.0%) have population size in the range of 1,000-1,999. One-third (239) of the inhabited villages form the range of 2,000-4,999 and they make 34.3 per cent of the total inhabited villages in the district. Large villages with population 5,000-9,999 are the characteristics of 33 (4.7%) villages and the remaining 2 (0.3%) villages are exceptionally large having a population of 10,000 or more.

In other words 58 (8.3%) villages in the district are small sized with a population of less than 500 and they contain 1.1 per cent of the rural population of the district, 365 (52.4%) are in the range of 500-1999 and account for 31.1 percent of the district's rural population, 239 (34.3%) are in the range of 2,000-4,999 and they contain one-half (51.2%) of the rural population of the district, and 35 (5.0%) are large sized with a population of 5,000 or more and they accommodate 16.5 per cent of the rural population of the district.

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001

Serial number	Name of town	Urban status of town
1	2	3
New Towns		
1	Handiaya	NP
2	Cheema	NP
3	Dirba	NP
4	Moonak	NP
5	Khanauri	NP
Declassified and Merged Towns		
	Nil	

Table 3 exhibits new towns added, denotified, declassified and merged towns in the district at the 2001 Census.

There are 17 towns in the district and all of them have statutory status. Five of these towns are newly added at the 2001 Census which namely are; Handiaya, Cheema, Dirba, Moonak and Khanauri. The Civil Status of all these five towns is Nagar Panchayat.

Further, in the district, no town of 1991 Census has been denotified or merged at the 2001 Census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	3	0.4	12	0.0
11-20	4	0.6	326	0.0
21-50	8	1.2	1,448	0.1
51-100	8	1.2	8,269	0.6
101-200	40	5.7	31,819	2.2
201-300	224	32.1	516,367	36.5
301-500	348	49.9	741,030	52.4
501 +	62	8.9	116,083	8.2
Not known	0	0.0	0	0.0
District Total:	**697**	**100.0**	**1,415,354**	**100.0**
Population Density (Rural) of the district:	**290**			

Table 4 shows distribution of villages according to density of population. Sangrur district has a rural density of 290 persons per Sq.km.. The villages, however, display a significant variation among themselves. Low density of 100 or below is noticed in 23 (3.4%) villages and they contain barely 0.7 per cent of district's rural population. Another 40 villages, which make 5.7 per cent of the total villages and 2.2 per cent of the total population too, are marked with low density of population in the range of 101-200.

The average density in the range of 201-300 is the characteristics of 224 (32.1%) villages and they accommodate 36.5 per cent of the district population. However, the maximum number of villages (348) fall in the density range of 301-500. This reveals that one-half (49.9%) of the villages have high density varying between 301 and 500 and they accommodate almost the same proportion (52.4%) of the rural population of the district.

Very high density of more than 500 is the characteristics of 62(8.9%) villages and these villages account for 8.2 per cent of the rural population of the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	832	836	804	NA	NA	805
1911	780	785	740	NA	NA	732
1921	799	808	735	NA	NA	704
1931	815	832	721	NA	NA	741
1941	836	855	750	NA	NA	797
1951	844	854	807	821	816	846
1961	854	865	817	832	828	849
1971	865	868	856	840	831	874
1981	879	884	865	860	854	882
1991	882	888	868	870	866	881
2001	876	890	849	871	871	870

Note: Sex Ratio has been defined as number of females per 1000 males.

Sex Ratio, which in Indian Census is defined as the number of females per 1,000 males, is exhibited in Table 5. The sex ratio of an area reflects the socio-economic and demographic characteristics of population. It unfolds the status of women in society and the care for the girl child in particular.

At the begining of this century the State witnessed a decline in its sex ratio from 832 in 1901 to 780 in 1911. Ever since 1911, the State showed gradual improvement in its sex ratio, uninterruptedly, till 1991 when it reached 882. However, during 1991-2001 the sex ratio has declined by 6 points, from 882 to 876.

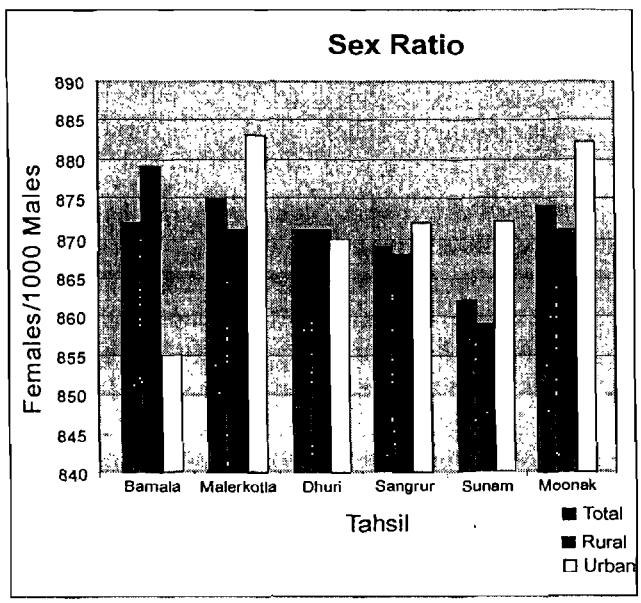

In consonance with the overall patterns in the state, the sex ratio in the district has remained to be low. Sangrur district formed part of the erstwhile princely states prior to independence and thus, population census data are not available for the census decades earlier to 1951 Census other then urban. Sangrur district had a sex ratio of 821 at the 1951 Census, which improved to 832 in 1961, 840 in 1971, 860 in 1981, 870 in 1991 and further to 871 in 2001. During these 50 years, the sex ratio in the district has improved by 50 points. Unlike the State and many of its districts, Sangrur district has shown improvement, though marginal, in its sex ratio during this decade.

Rural sex ratio in the State and in Sangrur district is relatively better than their urban counterparts . As per 2001 Census, the State has a rural sex ratio of 890 as compared to 849 in the urban areas showing a gap of 41 points between the two. However, in Sangrur district the gap between rural (871) and urban sex ratio (870) is negligible. Further, during 1991-2001, the rural sex ratio has shown improvement in the State (from 888 to 890) and the district (from 866 to 871), while there has been significant fall in their urban sex ratio; it has declined from 868 to 849 in Punjab and 881 to 870 in Sangrur district during this decade.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Barnala	872	879	855
2	Malerkotla	875	871	883
3	Dhuri	871	871	870
4	Sangrur	869	868	872
5	Sunam	862	859	872
6	Moonak	874	871	882
	District Total:	**871**	**871**	**870**

Among the tahsils, the sex ratio varies between 875 in Malerkotla and 862 in Sunam. The remaining tahsils do not portray much variation among themselves; Moonak (874), Barnala (872), Dhuri (871) and Sangrur (869).

The rural sex ratio varies between 879 in Barnala and 859 in Sunam tahsil, and the urban sex ratio varies between 883 in Malerkotla and 855 in Barnala tahsil. Contrary to the general trends, the urban sex ratio is appreciably better than the rural in Malerkotla, Sangrur, Sunam and Moonak tahsils.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Mahal Kalan	893
2	Sehna	882
3	Barnala	871
4	Dhuri	870
5	Malerkotla-II	854
6	Malerkotla-I	885
7	Amargarh	882
8	Sherpur	869
9	Sangrur	868
10	Bhawanigarh	868
11	Sunam	857
12	Lehragaga	867
13	Andana	879
	District (Rural) Total:	**871**

Table 7 exhibits C.D. block wise sex ratio in the district. Among the CD.blocks rural sex ratio varies between 854 in Malerkotla-II ahd 893 in Mahal Kalan. In all five CD blocks show rural sex ratio higher than that of the rural sex ratio of district. Besides Mahal Kalan, they include; Malerkotla-I (885), Sehna and Amargarh (882 each), and Andana (879) and it is at par with the district average in Barnala (871). All other CD blocks fall below the district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	8	1.1	8,119	0.6
700-749	8	1.1	6,957	0.5
750-799	16	2.3	23,581	1.7
800-849	142	20.4	286,997	20.3
850-899	328	47.1	787,794	55.7
900-949	161	23.1	271,213	19.2
950-999	23	3.3	26,154	1.8
1000-1099	9	1.3	4,496	0.3
1100+	2	0.3	43	0.0
Total:	**697**	**100.0**	**1,415,354**	**100.0**
Sex ratio (Rural) for District:		**871**		

Sex ratio of rural population by ranges is exhibited in Table 8. The district is marked with a relatively low rural sex ratio (871). This is rather low (less than 800) in 32 villages and these villages comprise 4.5 per cent of the total villages in the district and contain 2.8 percent of district's rural population. 142 (20.4%) villages are marked with a rural sex ratio of 800-849 and they contain almost same proportion (20.3%) of the district's rural population.

The maximum number of villages (328) exhibit rural sex ratio in the range of 850-899. These village make a little less than one-half (47.1%) of the total villages and more than one-half (55.7%) of the rural population of the district.

The high sex ratio in the range of 900-949 is noted in 161 villages and they constitute 23.1 per cent of the villages and account for 19.2 per cent of the rural population of the district.

Female- Male ratio is quite close to parity in the range of 950-999 in 23 (3.3%) villages having 1.8 per cent of distrct's rural population of the district. Furthermore, eleven villages are female biased i.e. having more females than males. This is a welcome sign for the State, as well as for the district, which are marked with deplorably low sex ratio.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./ Town+*	Urban status of town	Sex ratio

	Sex ratio (Urban) for the district:		**870**

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Sex ratio of urban agglomerations/towns is exhibited in Table 9. The district has an urban sex ratio of 870 which is higher than the urban sex ratio of the State (849).

Among the UAs/towns the sex ratio varies between 822 in Longowal and 902 in Dhanaula. In all, as many as 12 towns have sex ratio higher than that of the district and it is at par with the district average in one town namely Dhuri (870). Four (out 17) towns in the district have sex ratio below the district average. Besides Longowal, they include Barnala (838), Handiaya (843) and Dirba (853).

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

		Rural	**188,641**	**106,043**	**82,598**	**779**
		Urban	**75,352**	**41,791**	**33,561**	**803**

The sex ratio of child population in age-group 0-6 is shown in Table 10. The State and its constituent districts are marked with a very low child sex ratio and this has become a matter of deep concern. Punjab has a child sex ratio of 798; it is even lower in Sangrur district (786).

Within the district, the tahsils among themselves display a considerable disparity in their child sex ratio; it is the maximum in Malerkotla (830) and the minimum in Sunam (754). Besides Malerkotla, Barnala (792) and Moonak (795) are the other two tahsils, which exhibit child sex ratio higher than that of the district.

Likewise, the disparity in the rural and urban child sex ratio among the tahsils is also quite marked; the rural child sex ratio varies between 813 in Malerkotla and 753 in Sangrur, while the variation in urban child sex ratio is to the extent of 862 in Malerkotla and 737 in Sunam.

The above patterns indicate that Malerkotla tahsil excels all other tahsils in the district both in the rural as well as urban child sex ratio.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Table 11 shows CD Blockwise sex ratio of population in the age-group 0-6 termed as the child sex ratio.

The gap in the child sex ratio in rural areas (779) and the over all rural sex ratio (871) in the district is alarming; showing a gap of 92 points between the two. This is a cause of concern and looks for possible remedial measures in bridging this gap and also in improving the prevailing low levels of sex ratio. More so, five CD blocks viz, Sunam (750), Bhawanigarh (751) Dhuri (755), Sangrur (756) and Sehna (765) are marked with child sex ratio even lower than the district average. Malerkotla-I (814), Amargarh (806), Malerkotla-II (805) and Lehragaga (800) CD blocks are the only exceptions, which have reached 800 mark.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	170	24.4	36,518	19.4
700-749	88	12.6	29,822	15.8
750-799	125	17.9	39,322	20.8
800-849	113	16.2	37,286	19.8
850-899	91	13.1	24,445	13.0
900-949	44	6.3	10,717	5.7
950-999	28	4.0	5,543	2.9
1000-1099	25	3.6	3,432	1.8
1100+	13	1.9	1,556	0.8
District (Rural) Total	**697**	**100.0**	**188,641**	**100.0**
Sex ratio (Rural) for District:		**779**		

The maximum number of villages, 170 (24.4%) are marked with an excessively low child sex ratio of less than 700. Together these villages constitute almost one-fifth (19.4%) of the child population in age group 0-6 in rural areas of the district. The sex ratio is equally low, in the range of 700-749 in 88

(12.6%) villages constituting 15.8 per cent of the district's child population. Another 125 (17.9%) villages fall in the range of 750-799 and they contain one-fifth (20.8%) of the districts rural child population.

314 villages (out of 697), which make a little less than one-half (45.1%) of the villages and contain more than two fifths (44.0%) of the child population have recorded sex ratio of 800 or more. Among them 113 (16.2%) fall in the range of 800-849 and they include 19.8 per cent of population. Another 91 (13.1%) villages having 13.0 per cent of child population lie in the range of 850-899. The rural child sex ratio is fairly high in the range of 900-949 in 44 (6.3%) villages containing 5.7 per cent of the child population, and another 28 (4.0%) villages having 2.9 per cent of the population display a very high sex ratio of 950-999.

As many as 38 villages in the district are female biased. Among them 25 fall in the range of 1000-1099 and 13 in the range of 1100 +. Together these 38 villages make 5.5 per cent of the total villages and share 2.6 per cent of the districts rural child population.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 13 shows sex ratio of child population in age-group 0-6. Urban child sex ratio in the State (796) is significantly lower than the overall urban sex ratio (849). It is somewhat better than that of the State in Sangrur (803), although it remaing to be quite low in itself.

Among the towns/UAs in the district, Child sex ratio is the highest in Malerkotla (880) and the lowest in Sunam (734). As many as 13 towns show urban child sex ratio, which is lower than that of the district. It exceeds the district average only in four towns which besides Malerkotla (880) are; Bhadaur (852), Dhuri (816) and Khanauri (813).

27.6 per cent of population in the district belongs to scheduled castes compared with 28.9 per cent in the State. Among tahsils, it is the highest in Barnala (30.1%), and the lowest in Malerkotla (21.2%). Sangrur (29.1%), Dhuri (28.9%) and Sunam (28.6%) are the other tahsils having percentage of scheduled castes population higher than the district.

Scheduled castes are predominantly rural by residence as 75.7% of SC Populaiton in the State and 78.5% in the district is rural by residence.

In the district 30.6 per cent of population in rural area belongs to scheduled castes while the corresponding percentage in urban areas is 20.3 per cent. In Sangrur tahsil scheduled castes comprise one-third (33.2%) of rural population which is the highest among all the tahsils in the district. On the other hand it is the lowest in Moonak (28.5%) followed by Malerkotla (28.7%). The proportion of scheduled castes population residing in urban areas varies between 28.1 per cent in Barnala tahsil and 7.3 per cent in Malerkotla tahsil.

There is no scheduled tribes population in the State.

Table 15 gives CD blockwise distribution of scheduled castes population in the district. Among the CD blocks they themselves exhibit spatial disparities in the proportion of scheduled castes population. It is the maximum in Sangrur (33.5%) and is closely followed by Mahal Kalan (33.4%) and Amargarh (33.3%). In all, six CD blocks reveal percentage higher than the district average and two CD blocks Sehna and Sunam are at parity with that of the district. The remaining five CD blocks fall below the district average and among them the percentage varies between 24.8 in Malerkotla-I and 29.9 in Barnala.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District (Rural) Total	**697**	**100.0**	**432,966**	**100.0**

Table 16 presents proportion of scheduled castes population in villages by ranges. Nine villages in the district do not have any scheduled castes population and in another nine villages scheduled castes comprise less than 5 per cent of the total population. Yet another 15 villages have scheduled castes population in the range of 5-10 per cent and they contain 0.4 per cent of the scheduled castes population of the district. All these 33 villages, which make 4.7 per cent of the total villages, have a small population size.

One-tenth (10.5%) of the villages, which number 73 fall in the range of 11-20 per cent and they comprise 4.4 per cent of the scheduled castes population of the district. Two out of every five (39.6%) villages have scheduled castes population in the range of 21-30 per cent. In absolute terms they number 276, which is the highest among all the categories, and contain 42.9 per cent of the district's scheduled castes population in rural areas.

196 (28.1%) of the villages having 35.7 percent of the districts rural scheduled castes population in

the range of 31-40 per cent and another 73 villages which comprise 10.5 per cent of the total villages and almost same proportion (10.9%) of rural scheduled castes population of the district, fall in the range of 41-50 per cent exhibit a relatively high proportion of scheduled castes population.

Scheduled castes comprise more than one-half of the total population in 46 villages. These villages constitute 6.5 per cent of the total villages and 5.7 per cent of rural scheduled castes population of the district. Further, within this group 38 villages fall in the range of 51-75 per cent, while the proportion in eight villages exceeds 76 per cent.

Towns arranged in alphabetical order.

In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

In urban areas scheduled castes comprise one-fifth (20.3%) of the population of the district as shown in Table 18. In Bhadaur 42.6 per cent of the population belongs to scheduled castes, while in Malerkotla this percentage is barely 5.6 per cent. Dhanaula (34.4%), Tappa (30.6%), Khanauri (30.3%) and Longowal (25.5%) are the other towns having at least one-fourth of their population belonging to scheduled castes. On the other hand, besides Malerkotla, Ahmedgarh (13.8%) and Dirba (18.4%) are the other two towns where percentage of scheduled castes population is lower than the district average.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

	Sex ratio (Urban) for the district:	**889**	-

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

In urban areas of the district scheduled castes population have a sex ratio of 889, which is better than that of the overall urban sex ratio (870) in the district. The situation is also quite encouraging in towns of Ahmedgarh (918), Lehragaga (914), Khanauri (913), Sangrur (910), Dhanaula (907), Cheema (905) and Bhawanigarh (903) having a sex ratio of over 900. In all ten towns show urban sex ratio in scheduled castes population below and seven above the district average.

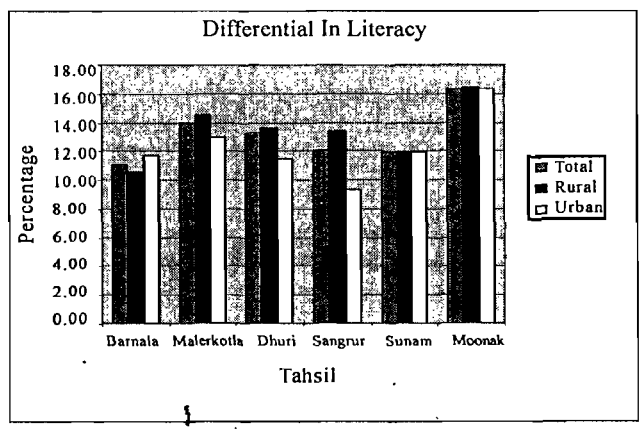

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Serial number	Name of Tahsil	Total/ Rural/ Urban	Number of literates and illiterates									Gap in male-female literacy rate
			Number of literates			Number of illiterates			Percentage of literates

60.0 per cent of the district's population is literate compared with 69.7 per cent in the state as such. In other words, three out of every five persons in the district are literate.

Malerkotla (65.8%) is the most literate tahsil in the district. By contrast, Moonak (50.3%) with only one-half of its population as literate is placed at the bottom. Besides Malerkotla, the literacy rate is higher than the district average in Dhuri (63.4%), Sangrur (63.0%) and Barnala (60.3%). However, none of the tahsils in the district has literacy rate higher than the overall literacy rate in the State.

Between the two sexes, the literacy rate in the district varies between 65.8 per cent among males and 53.4 per cent among females, exhibiting a gap of 12.4 percentage points. The male-female differential is the maximum in Moonak tahsil (15.9 percentage points) and the minimum in Barnala tahsil (10.9 percentage points).

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district; 55.9 per cent of the rural population and 69.9 per cent of the urban population is literate. The urban literacy is higher than

the rural in all the tahsils and the gap between the two is the maximum in Moonak (urban 67.1% and rural 45.3%) and the minimum in Malerkotla (urban 66.8% and rural 65.3%).

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

	District (Rural) Total:	**685,403**	**402,163**	**283,240**	**729,951**	**354,435**	**375,516**	**55.9**	**61.8**	**49.2**	**12.6**

Rural areas of the district are marked with a relatively low literacy rate as can be seen from Table 22. A little over one-half (55.9%) of the ruralities in the district are literate compared with 69.8 percent in urban areas. Among the CD blocks, the rural literacy rate varies between 66.3 per cent in Amargarh and 43.8 per cent in Lehragaga. Besides Amargarh, Malerkotla-II (66.0%), Mahal Kalan (63.9%), Malerkotla - I (62.9%), Dhuri (60.4%) and Sherpur (58.9%) are the other C.D. blocks which portray literacy levels better than the district.

In Lehragaga (43.8%), Andana (48.2%) and Sunam (49.2%) CD Blocks more than one- half of their population is illiterate.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	1	0.0
1-10	0	0.0	0	0.0
11-20	1	0.1	23	0.0
21-30	0	0.0	0	0.0

51-60	240	34.5	524,272	37.0
61-70	238	34.2	398,017	28.1
71-80	46	6.6	57,294	4.0
81-90	4	0.6	2,124	0.2
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District (Rural) Total:	**697**	**100.0**	**1,415,354**	**100.0**
Literacy rate for District (Rural)		**55.9**		

Table 23 shows distribution of villages by ranges of literacy rate. Very low literacy rate (30% or below) is reported in two villages and they have a very small population. It is equally low in 26 villages (3.7%) in the range of 31-40 per cent and they contain 4.5 per cent of the district's rural population. Almost one-fifth (20.2%) of the villages, which number 141 and contain 26.2 per cent of rural population have a literacy rate of 41-50 per cent.

The maximum number of villages (240) which comprise almost one-third (34.5%) of the total villages and 37.0 per cent of the rural population of the district lie in the range of 51-60 per cent. Almost an equal number of villages, 238 (34.2%) containing 28.1 per cent of the district's rural population constitute the range 61-70 per cent. This is to say that high literacy rate varying between 51 and 70 per cent is the characteristics of more than two-third (68.7%) of the villages and these villages account for 65.1 per cent of the rural population of the district.

Quite a sizeable number of villages (50) in the district show a very high literacy rate of 71 to 90 per cent. These villages make 7.2 per cent of the total villages and 4.2 per cent of the rural population of the district. Furthermore, the literacy rate in four out of these 50 villages is exceptionally high in the range of 81-90 per cent.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 24 reveals that 69.9 per cent of the urban population in the district is literate. Among the towns it varies between 81.3 per cent in Sangrur and 52.1 per cent in Cheema. In all, five towns have literacy rate higher than the district average (urban). Besides Sangrur they include, Ahmedgarh (80.2%), Dhuri (76.7%), Barnala (73.9%) and Lehragaga (72.7%). As many as 12 towns fall below the district average. Apart from Cheema, the literacy rate is quite low in Bhadaur (57.2%), Dirba (57.7%), Longowal and Handiaya (58.8%) each.

In the district, 75.4 per cent among males and 63.6 per cent among females are literate. Likewise in the urban area, male literacy rate is the highest in Sangrur (86.3%) and the lowest in Cheema (56.5%). This is so in case of female literacy too; with Sangrur (75.7%) and Cheema (47.1%). Cheema is one town in the district where more than one-half of the females are still illiterates.

Male-Female literacy rate in urban areas show a gap of 11.8 percentage points. This gap is the maximum (16 percentage points each) in Moonak and Khanauri. On the other hand it is relatively narrow in Bhadaur (9.2) and Cheema (9.4).

TABLE 25 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

	District (Rural) Total:	**156,564**	**97,172**	**59,392**	**276,402**	**133,611**	**142,791**	**43.2**	**50.4**	**35.0**	**15.4**

Rural scheduled castes population in the district has a literacy rate of 43.2 per cent compared with an overall rural literacy rate of 55.9 per cent. Malerkotla-II (59.5%), Malerkotla-I (58.0%), Amargarh (55.4%) and Mahal Kalan (50.2%) are the only four CD blocks where more than one-half of the scheduled castes population in rural areas is literate. Rural scheduled castes literacy rate is the lowest in Lehragaga (30.8%), followed by Andana (33.1%), Sunam (35.3%), Sehna (37.4%) and Barnala (38.7%). Bhawanigarh (42.6%) and Sangrur (42.7%) too, have literacy rate below the district average.

One-half (50.4%) of the scheduled castes among males and one-third (35.0%) among females in the district are literate. In other words every second scheduled caste male and every third scheduled caste female in the rural areas of the district is literate. The CD blockwise male literacy rate shows a variation of 68.3 per cent in Malerkotla-II and 36.6 per cent in Lehragaga.

Likewise, the scheduled castes female literacy shows wide variations; it is the highest (49.5%) in Malerkotla-II and the lowest (22.2%) in Andana CD Blocks.

Male-female scheduled castes rural literacy rates show a gap of 15.4 percentage points in the district, and among the C.D. blocks this gap is to the extent of 21.3 percentage points in Malerkotla-I.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population

District Total:	**688**	**100.0**	**432,966**	**100.0**
Literacy rate for District (Rural):			**43.2**	

Table 26 shows distribution of villages by ranges of scheduled castes literacy rate.

20 villages which make 2.9 per cent of the total villages and share 1.5 per cent of district's scheduled castes population fall in the range of 20 per cent or less. Another 71 villages which constitute 10.3 per cent of the total villages and 14.0 per cent of the district's scheduled castes population have literacy rate of 21-30 per cent. All these villages are experiencing very low levels of literacy in their scheduled castes population. Scheduled castes literacy rate is relatively better, in the range of 31-40 per cent, in 151 (21.9%) villages containing 26.3 per cent of scheduled castes population of the district.

The maximum number of villages (182) which makes 26.5 per cent of the total villages and 28.5 per cent of the scheduled castes population fall in the range of 41-50 per cent. Almost an equal number of villages (178) having 25.9 per cent of total villages and 22.7 per cent of population exhibit a high literacy of 51-60 per cent. It is quite high, in the range of 61-70 per cent, in 72 (10.5%) villages containing 6.1 per cent of the scheduled castes population.

Very high scheduled castes literacy rate of more than 70 per cent is noticed in 14 villages. However, their share in scheduled castes population in the district is quite negligible.

In brief, 264 villages which comprise 38.4 per cent of total villages and 29.7 per cent of total scheduled castes population of the district reveal that less than one-half of population is literate in the scheduled castes.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

A little less than one-half (48.9%) of the scheduled castes population in urban areas of the district is literate. Among towns, it is the highest in Ahmedgarh (66.0%) followed by Malerkotla (63.3%) and the district headquarters town of Sangrur (62.4%). Dhuri (56.3%) and Barnala (50.5%) are the other two towns where more than-one half of the scheduled castes population is literate.

By contrast, urban scheduled castes literacy rate is quite less in Cheema (33.1%) and Dirba (33.6%).

56.2 per cent of scheduled castes males and 40.7 per cent of females in urban areas are literate reflecting a gap of 15.5 percentage points between the two. Male-female disparity in this regard is quite conspicuous. Among towns scheduled castes male literacy rate varies between 74.7 per cent in Ahmedgarh and 38.2 per cent in Cheema, while the corresponding percentage among females is 56.5 per cent in Ahmedgarh and 26.6 per cent in Dirba. Furthermore, male-female differential in scheduled castes literacy rate is the maximum in Malerkotla (19.6%).and the minimum in Bhadaur (9.5%).

Out of the total population in the district, 35.7 per cent are main workers and 5.0 per cent are marginal workers. The proportion of main workers is the highest in Barnala tahsil (39.8%) and the lowest in Sangrur (32.1%) tahsil. However, the proportion of marginal workers is the highest in Moonak tahsil (6.9%) and the lowest in Malerkotla (3.7%) tahsil. Further, the incidence of marginal workers is observed to be more among females in comparison to males; the proportion of female marginal workers in the district (7.3%) is more than twice that of males (3.0%). By and large, a similar pattern is observed among all the tahsils in this regard. In Moonak tahsil 10.7 per cent of females are marginal workers as against 3.5 per cent among male counterparts. Dhuri (8.9%) and Sunam (8.0%) too, have high proportion of female marginal workers.

The work participation rate (main + marginal) in Sangrur district (40.7%) is better than the State average (37.5%). Among tahsils, it varies between 44.9 per cent in Dhuri and 37.4 per cent in Malerkotla.

In the district 54.7 per cent among males and 24.6 per cent among females are reported as workers showing a significant reduction in the gap between the two. In Dhuri tahsil, one-third (33.3%) of the females are recorded as workers and this is the highest among all the tahsils in the district while it is the lowest in Sangrur (18.2%).

43.7 per cent of the rural population in the district is working; 37.6 per cent as main workers and 6.1 per cent as marginal workers. Among CD blocks the work participation rate varies between 50.3 per cent in Sehna and 38.0 per cent in Sangrur. Besides Sehna, Sherpur (50.2%) is the other CD block where more than one-half of its population is recorded as worker.

The percentage of main workers is the highest in Sherpur C.D. block (42.5%) and the lowest in Sangrur (32.0%). However, the proportion of marginal workers is the maximum in Andana CD block (8.5%) and the minimum in Malerkotla - II (4.5%).

Punjab State, in general is characterised by low female participation rate. It was the lowest (4.4%) among all the States/Union Territories in the country at the 1991 Census. It might be due to non-reporting of female's work by the respondents. Special efforts introduced at 2001 Census for netting female's work have helped, some what in obtaining more accurate picture of female's work as Female work participation rate in Punjab (19.1%) recorded at the 2001 Census is nearly five times that of 1991 (4.4%).

In the district, 29.9 per cent of the rural females are reported as workers (20.7% main workers and 9.2% marginal workers). This percentage is quite high in itself and stands comparable with their male counterparts (55.7%). Further, the female participation in marginal work is greater than that of males. In rural areas of the district, the female work participation rate as marginal workers (9.2%) is almost thrice that of the males (3.3%).

Female work participation rate among the CD blocks varies between 43.3 per cent in Sherpur and 23.2 per cent in Bhawanigarh. Besides Sherpur, Sehna (41.9%) and Mahal Kalan (40.5%) are the other two CD blocks where at least two out of every five females are reported as workers. In all six CD blocks have female work participation rate higher than the district average (29.9%).

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

The work participation rate in urban areas of the district (33.5%) is identical with that of the State (33.5%). Among towns it is the highest in Longowal (40.2%) and the lowest in Lehragaga (29.2%) as is evident from table 33. Out of 17 towns, nine fall above and eight below the district average. The participation in marginal work is comparatively much less. In the district 2.4 per cent of the urban population is reported as marginal worker compared with 31.1 per cent reported as main workers. The percentage of population reported as marginal workers shows a variation of 6.6 per cent in Handiaya and 0.4 per cent in Ahmedgarh; the proportion of main workers varies between 34.2 per cent in Barnala and 27.1 per cent in Lehragaga.

Urban female work participation rate in the district is 11.7 per cent compared with 52.4 per cent among males. Among towns, it is the highest in longowal (28.8%) and the lowest in Cheema (4.9%). Female work participation rate is more than the urban female participation rate of the district in nine towns and it is at par with the district average in case of one town viz, Sangrur (11.7%).

Note: Percentage of Workers to total workers are given in brackets

Table 34 shows distribution of workers by sex in four categories of economic activity by tahsils in the district by sex.

Among the total workers in the district, 29.3 per cent are cultivators, 17.3 percent are agricultural labourers 3.2 per cent are household industry workers and 50.2 per cent are reported as other workers. This signifies that 46.6 per cent of the total workers in the district are engaged in agricultural sector, while 53.4 per cent are in non-agricultural sector of economy.

Among tahsils, the percentage of cultivators is the highest in Moonak (41.9%) and the lowest in Malerkotla (22.1%). Likewise, the proportion of workers reported as agricultural labourers varies between 25.1 per cent in Moonak tahsil and 12.4 per cent in Malerkotla tahsil.

The proportion of workers engaged in household industry is the highest in Malerkotla (3.9%) and the lowest in Dhuri (2.7%). Two tahsils fall above and three below the district average, and one tahsil is at par with the district average.

The participation of females in non-agricultural sector is greater than the agricultural sector. In the district 72.5 per cent of the female workers are non-agricultural workers (HH1-6.5% and OW-66.0%).

				(29.9)	**(15.2)**	**(14.4)**	**(6.2)**	**(64.2)**

Note: Percentage of Workers to total worker are given in brackets

Among rural workers in the district, 36.2 per cent are cultivators, 20.3 per cent are agricultural labourers, 3.2 per cent are household industry workers and 40.3 per cent are other workers. This shows that 56.5 per cent of rural workers are engaged in agricultural and 43.5 per cent in non-agricultural sector.

Among C.D. Blocks, the proportion of rural workers recorded as cultivators is the highest in Andana (49.7%) and the lowest in Malerkotla - II (28.0%). Likewise, the proportion of Agricultural labourers shows a variation of 26.3 per cent in Andana and 15.2 per cent in Sherpur CD. blocks. This signifies that in Andana CD block three-fourth (76.0%) of the workers are in agricultural sector, while the corresponding percentage is only 43.3 per cent in Malerkotla-II CD block.

The proportion of rural workers engaged in household industry also exhibits significant variation at CD block level; it is the highest in Sehna (4.6%), closely followed by Malerkotla-I (4.5%), Amargarh and Lehragaga (4.4%). By contrast, it is the lowest in Mahal Kalan (1.9%). In all, six CD blocks fall above and seven below the district average.

'Other workers' constitute more than one-half of the rural workers in Malerkotla-II (54.1%) and Sherpur (53.0%) CD blocks. On the other hand, in Andana, barely one out of every five workers (21.9%) is reported as other worker.

Table 35 further reveals that participation of females is greater in non-agricultural sector in comparison to the agricultural sector. Among the rural female workers in the district, 29.6 percent (C-15.2% and AL-14.4%) are agricultural workers and 70.4 per cent (Household Industries-6.2% and Other Workers 64.2%) are non agricultural workers.

Note : Percentage of workers to total workers are given in brackets.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Interestingly, almost one-sixth (15.3%) of the workers in urban areas in the district are engaged in agricultural activities, either as cultivator or agricultural labourer, and the remaining 84.7 per cent are occupied in non-agricultural pursuits as household industry workers or other workers. The proportion of agricultural workers (cultivator or agricultural labourer) in towns is the highest (60.2%) in Cheema and the lowest (2.0%) in Ahmedgarh. Similarly, the proportion of workers engaged in household industry is the maximum (9.3%) in Dhanaula and the minimum (0.9%) in Bhadaur. As regards 'other workers', Ahmedgarh (94.4%) and Cheema (38.0%) represent the highest and the lowest percentages. As regards female work participation, they excel male in agricultural labour and household industry work. Position is equally good in the category of cultivators and other workers

Note:- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 shows distribution of villages according to availability of different amenities by CD blocks.

Education :

Educational amenity is available to 98.1 per cent of villages in the district. It is in case of only 13 villages that this facility is not available within the village, but the same can be availed at some distance. These villages generally have a small population base.

Among the CD blocks, all the villages in Mahal Kalan, Sehna, Dhuri, Sherpur and Lehragaga have educational facility available to them within the village. Among the remaining, the percentage of villages having availability of educational facility varies between 94.4 per cent in Malerkotla-I and 98.8 per cent in Sunam.

Medical :

41.8 per cent of the villages in the district are equipped with some kind of medical facility. This percentage is as high as 76.5 per cent in Barnala CD block and the lowest (14.1%) in Malerkotla-I.

Improved drinking water :

This amenity is available to all the villages in the district.

Post Office :

37.7 per cent of the villages in the district have availability of post office within the village and the villagers of the remaining 62.3 per cent villages avail this facility at some distance.

More than one- half of the villages of four CD blocks have the availability of post office. They include; Barnala (82.4%), Sehna (54.1%), Mahal Kalan (52.8%) and Sherpur (52.6%). Besides Lehragaga (43.2%), Sunam (42.7%) also portrays percentage higher than the district average.

In Malerkotla-I CD block only one in nine villages (11.3%) has the availability of post office and this is the lowest among all the CD blocks in the district.

Telephone :

Telephone facility is available in 97.4 per cent of the villages in the district, which by all means is a very high percentage. The position is the best in Mahal Kalan, Sehna and Lehragaga CD blocks where cent percent of the villages are enjoying this facility. It surpasses 90.0% mark in all other CD Blocks

Transport and Communication :

The villages in the district are fairly well equipped with transport and communication as 96.7 per cent of the villages have this facility. Only 23 (out of 697) villages are devoid of this facility, and avail it at some distance. Cent percent of the villages in 5 CD blocks namely; Mahal Kalan, Sehna, Dhuri, Sherpur and Lehragaga have this facility available to them within the village.

Banks :

Every eighth village (12.2%) in the district has a bank. Among the CD blocks the percentage of villages having bank facility is the maximum in Sehna (18.9%) and the minimum in Sunam (7.3%). As many as nine CD blocks fall above and four below the district average in this regard.

Agricultural Credit Societies :

Three out of every five villages (59.4%) in the district have agricultural credit societies. In Dhuri and Sherpur CD blocks all the villages have agricultural credit societies, among the remaining CD blocks it varies between 94.4 per cent in Mahal Kalan and 31.0 per cent in Malerkotla-I. Amargarh (32.3%) and Malerkotla-II (34.3%) too, have significantly low percentage. In all, 6 CD blocks exhibit percentage above and 7 below the district average.

Approach by pucca :

The percentage of villages approachable by pucca road in the district, as true for the state, is fairly high. In the district 96.7 per cent of the villages are approachable by pucca roads. The situation is the best in Mahal Kalan, Sehna, Dhuri, Sherpur and Lehragaga CD blocks where all the villages are approachable through pucca roads.

Power Supply :

All the villages in the district, infact in the state, are having power supply.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 shows number and percentage of rural population served by different amenities in the district. It is very satisfying that the entire rural population in the district and its constituent CD blocks is being served by educational institutions. The same is true in case of safe drinking water supply and power supply.

As regards medical facility, it is serving nearly two-thirds (65.9%) of the rural population. Among the CD blocks, the proportion of population served by medical institutions is the highest in Barnala (89.5%) and the lowest in Malerkotla-I (28.3%). The position is fairly good in Sehna (86.2%) and Sangrur

(75.4%) also where more than three-fourth of the rural population is enjoying these services. Out of 13 CD blocks, 6 fall above and 7 below the district average.

Post offices are serving 61.7 per cent of the rural population in the district and this percentage of population served varies between 93.3 per cent in Barnala and 23.3 per cent in Malerkotal-I CD block.

More than 99 per cent of rural population enjoys amenities of telephones, transport and communication and approach by pucca road. The facility of agricultural credit societies (78.0%) outstrips Banks (23.4%) badly.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 to 4)
1	2	3	4	5
1. Education :				
(a) Primary School	13	0	0	13

(a) Commercial Bank	322	263	37	622
(b) Cooperative Bank	302	302	55	659
7. Agricultural Credit Societies	198	80	5	283

Table 39 shows distribution of villages which are not having certain amenities by distance ranges from the places where these are available.

Education :

There are 13 villages, which do not have availability of educational amenity and for all of them the same is available within a distance of 5 kms.

280 villages in the district do not have middle school. However,among them, this facility is available within 5 kms. in case of 269 villages, and for the remaining 11 villages, it is available at a distance of 5-10 kms.

As many as 695 villages do not have the degree college. Anyhow, the same is available to 107 villages within 5 Kms, at a distance of 5-10 km. in case of 239 villages and for the remaining 349 villages, the villagers avail this facility by covering a distance of more than 10 kms.

Medical :

668 villages in the district do not have availability of hospital within the village. Among the same is available to 72 villages within 5 kms, 201 villages have it available at a distance of 5-10 kms. and the residents of 395 villages cover a distance of more than 10 kms. to avail this facility.

Likewise out of 662 villages which do not have PHC, the same is available at a distance of less than 5 kms. in respect of 121 villages, at a distance of 5-10 kms. in case of 224 villages and at more than 10 kms. for 317 villages.

Post office :

Among the 434 villages in the district which do not have the post office, the same is available to 362 villages within 5 kms, at a distance of 5-10 kms. in case of another 61 villages and the remaining 11 villages avail this facility by covering more than 10 kms.

Telephone :

The district is well equipped with this facility as barely 18 (out of 697) villages do not have this facility. Six of these villages avail this facility within 5 kms. and 12 others avail it at a distance of 5-10 kms.

Bus Service :

There are 23 villages, which do not have bus service available to them in the village; 22 of them can avail it within 5 kms and for one village this facility is available at a distance of 5-10 kms.

Bank :

Rural banking seems to be lacking in the district. Commercial banking within the village is not available in 622 villages. Among them 322 villages avail this facility at a distance of less than 5 kms. In case of 263 villages it is available at a distance of 5-10 kms and for the remaining 37, the villagers travel a distance of over 10 kms to avail this amenity.

Likewise, Co-operative banking is not available in 659 villages. Among them 302 villages avail it within 5 kms and an equal number of villages avail it within 5-10 kms., while for 55 villages, cooperative banking is available at a distance of more than 10 kms.

Agricultural Credit Societies :

Out of 283 villages which are not having Agricultural Credit Societies, the maximum number (198) of villages can avail this facility within 5 kms. and for 80 villages it is available at a distance of 5-10 kms., while dwellers of 5 villages can avail it at a distance of over 10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road

	(100.0)	(98.4)	(41.3)	(29.4)	(96.8)	(95.2)	(11.9)	(54.8)	(94.4)
5 -15	494	484	212	196	481	479	61	297	479
	(100.0)	(98.0)	(42.9)	(39.7)	(97.4)	(97.0)	(12.3)	(60.1)	(97.0)
16 - 50	72	71	24	26	71	70	8	43	71
	(100.0)	(98.6)	(33.3)	(36.1)	(98.6)	(97.2)	(11.1)	(59.7)	(98.6)
51+	0	0	0	0	0	0	0	0	0
Unspecified	5	5	3	4	5	5	1	5	5
	(100.0)	(100.0)	(60.0)	(80.0)	(100.0)	(100.0)	(20.0)	(100.0)	(100.0)
District total	**697**	**684**	**291**	**263**	**679**	**674**	**85**	**414**	**674**
	(100.0)	**(98.1)**	**(41.8)**	**(37.7)**	**(97.4)**	**(96.7)**	**(12.2)**	**(59.4)**	**(96.7)**

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows that 126 villages in the district are located at less than 5 kms. distance, 494 villages in the distance range of 5-10 kms. and 72 villages are located within 16-50 kms. from the nearest statutory town. The distance range of 5 villages could not be specified.

Maximum number of villages (494) fall in the distance range of 5-15 kms. and among them educational facility is available to 484 (98.0%) villages, medical facility is available to 212 (42.9%) villages, post office to 196 (39.7%) villages and 481(97.4%) villages have availability of telephone. This apart, transport and communications is available to 479 (97.0%) villages in this distance range, 61 (12.3%) villages have banks, 297 (60.1%) villages have agricultural credit societies and 479 (97.0%) of the villages are approachable by pucca road. It is a healthy situation that distance range 51+ kms. does not have any village.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 presents distribution of villages by population ranges and amenities available.

Out of 697 villages, 58 have a population of less than 500, 114 fall in size class 500-999, 251 have population in the range of 1000-1999, 239 are in the range of 2000-4999, 33 villages comprise the size class 5,000-9,999 and 2 villages are having population of 10,000 or more.

Educational facilty is available to cent per cent of the villages under various size classes, barring size class 1-499 where 45 (77.6%) villages have this facility. The villages which do not have educational facility available to them in the village have very small population size.

Medical facilty is available to all the 35 villages having population of 5,000 or more. Among others, this facility is available to one (1.7%) village in size class 1-499, 13 (11.4%) villages in the range 500-999, 53(21.1%) of the villages with population 1,000-1,999 and 189 (79.1%) villages in size class 2,000-4,999.

Improved drinking water is available to all the villages in the district.

Post office is available to all the 35 villages having population of 5,000 or more. Among others, this facility is available to one (1.7%) village in size class 1-499, 11 (9.6%) villages in the range 500-999, 46 (18.3%) of the villages with population 1,000-1,999 and 170 (71.1%) villages in size class 2,000-4,999.

All the villages under size classes 500-999, 2000-4,999, 5,000-9,999 and 10,000 + and 98.8 per cent of villages in size class 1,000-1,999 have availability of telephone facility. It reflects that almost cent per cent of the villages with population 500 and more have availability of telephone. Even among the smaller villages with population below 500 almost three-fourths (74.1%) are enjoying this facility.

Transport and communication is available to all the villages under size classes 1,000-1,999, 2000-4,999, 5,000-9,999 and 10,000+. Even among the smaller villages, this facility is available to 108(94.7%) villages in size class 500-999 and 41 (70.7%) villages with population below 500.

Availabilty of banks is predominantly the characteristics of larger villages. Both the villages with population 10,000 or more have bank. Likewise,19 (57.6%) villages in size class 5,000-9,999 and 49 (20.5%) villages with population in the range of 2,000-4,999 have the availability of bank. Among the remaining 423 villages with population below 2,000, only 15 (12 in size class 1,000-1,999 and 3 in size class 500-999) have bank to the tune of 7.4 per cent.

Agricultural credit societies are available in all the villages under size 5,000-9,999 and 10,000 + and 89.1 per cent of villages with population 2,000-4,999, 51.8 per cent villages in size class 1,000- 1,999, 25.4 per cent villages having population between 500-999 and 12.1 per cent villages with population below 500 enjoy this facility.

Barely 23 (out of 697) villages in the district are not approachable by pucca road and all these villages have a population of less than 500.

All the villages in the district have the availability of power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area in hectares	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Mahal Kalan	36	29,674	89.9	98.7
2	Sehna	37	35,792	75.6	95.1
3	Barnala	51	65,826	82.8	94.4
4	Dhuri	42	26,167	89.7	98.0
5	Malerkotla-II	70	28,156	92.1	96.8
6	Malerkotla-I	71	22,599	93.8	96.0
7	Amargarh	62	23,508	91.8	98.1
8	Sherpur	38	27,446	94.9	95.8
9	Sangrur	57	34,857	89.6	97.5
10	Bhawanigarh	67	32,311	89.9	97.1
11	Sunam	82	69,687	92.3	97.9
12	Lehragaga	44	40,229	93.6	97.1
13	Andana	40	28,354	92.8	92.4
	District Total:	**697**	**464,606**	**89.3**	**96.5**

Note : - Cultivable area = irrigated area + unirrigated area

CD block wise villages and area, acording to land use, is given in Table 42. Sunam CD block (69,687 hectares) is the largest in area and is almost three times that of the Malerkotla-I (22,599 hectares), the smallest in area. In the district 89.3 per cent of the area is cultivable and among the CD blocks this percentage varies between 94.9 per cent in Sherpur and 75.6 per cent in Sehna. Eleven, out of 13 CD blocks have percentage of cultivable area greater than that of the district average.

96.5 per cent of the cultivable area in the district is irrigated. All the CD blocks have fairly high proportion of their cultivable area under irrigation and this percentage varies between 98.7 per cent in Mahal Kalan and 92.4 per cent in Andana.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure

15	II Sangrur (M.Cl)	519.5	44.1	475.5	482.8	219.0	141.1	69.3	0.0	53.3
16	II Sunam (U.A)	479.5	415.7	63.7	494.7	127.7	235.5	86.2	2.6	42.7
	II Sunam (M.Cl)	479.5	415.7	63.7	494.7	127.7	235.5	86.2	2.6	42.7
17	IV Tappa (M.Cl)	498.5	256.1	242.4	354.3	110.5	76.1	44.7	0.0	123.0
	District Total	**459.1**	**269.5**	**195.2**	**431.2**	**118.7**	**84.2**	**97.8**	**0.4**	**130.1**

Table 43 shows per capita receipt and expenditure incurred for all the statutory towns in the district. The per capita receipt in the district is Rs. 459.1 out of which Rs. 269.5 comes through taxes and Rs. 195.2 through all other sources. The per capita receipt is as high as Rs. 836.8 in Ahmedgarh and as low as Rs. 183.4 in Longowal.

As against the per capita receipt of Rs. 459.1, the district is incurring per capita expenditure of Rs. 431.2. The per capita expenditure on general administration is to the extent of Rs. 118.7, followed by Public works (Rs. 97.8), and Public health and conveniences (Rs 84.2). Per capita expenditure on public institutions is only Rs. 0.4, while it is Rs. 130.1 for all other types of activities. Interestingly, per capita expenditure exceeds per capita receipt in 6 out of 17 towns.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary/ Middle	Secondary/ Matriculation	Senior Secondary	College

	District Total	**3.1**	**1.0**	**1.1**	**0.6**	**0.3**

Table 44 shows number of schools/colleges per 10,000 of population for towns. In the district there are 3.1 primary schools, 1.0 junior secondary/middle school, 1.1 secondary/matriculation school, 0.6 senior secondary school and 0.3 college per 10,000 of population. In other words, there is a primary school after a population 3,226, junior secondary/middle school for every 10,000 persons, secondary/matriculation school for 9,091 persons, senior secondary school for 16,667 population and a college for a population of 33,333.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Ahmedgarh (M.Cl.)	39
2	Barnala (M.Cl.)	15
3	Bhadaur (M.Cl.)	24
4	Bhawanigarh (M.Cl.)	22
5	Cheema (N.P.)	27
6	Dhanaula (M.Cl.)	16
7	Dhuri (M.Cl.)	16
8	Dirba (N.P.)	19
9	Handiaya (N.P.)	0
10	Khanauri (N.P.)	9
11	Lehragaga (M.Cl.)	16
12	Longowal (M.Cl.)	15
13	Malerkotla (M.Cl.)	20
14	Moonak (N.P.)	20
15	Sangrur (M.Cl.)	24
16	Sunam (M.Cl.)	17
17	Tappa (M.Cl.)	21
	District Total	**19**

Table 45 shows number of beds in medical institutions in towns per 10,000 of population. The district on an average has 19 beds per 10,000 of population. There are 39 beds per 10,000 population in Ahmedgarh and this is the highest among all the towns in the district. Cheema (27), Bhadaur and Sangrur (24each), Bhawanigarh (22), Malerkotla and Moonak (20 each) and Tappa (21) are the other towns which have higher number of beds per 10,000 population than the district average.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population (approximately)	Percentage of slum population to total population
1	2	3	4	5
1	Bhawanigarh	17,792	800	4.5
2	Cheema	9,245	1,172	12.7
3	Dhuri	49,406	934	1.9
4	Khanauri	10,960	2,953	26.9
5	Lehragaga	19,336	2,883	14.9
6	Longowal	20,239	3,320	16.4
7	Malerkotla	107,009	20,491	19.1
8	Moonak	14,924	1,185	7.9
9	Sangrur	77,989	14,214	18.2
	District Total	**326,900**	**47,952**	**14.7**

Table 46 shows proportion of slum population living in 9 statutory towns in the district. In absolute terms 47,952 persons are living in slums and this means that 14.7 per cent population of these towns is dwelling in slum areas. Although the component of slum population in population of the town is almost negligible in Dhuri (1.9%) and Bhawnigarh (4.5%), but in Khanauri more than one-fourth (26.9%) of the total population of the town is residing in slums.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Ahmedgarh (M.Cl.)	Vegetable Oil Agricultural Implements	Paddy Fuel Wood Paper
2	Barnala (M.Cl.)	Super Phosphate (Fertilizer) G.I.Sanitary Fittings Buckets (Iron)	Rock Phosphate Pig Lime Yarn
3	Bhadaur (M.Cl.)	Cotton Earthen Pottery	Pesticides Gur Wheat
4	Bhawanigarh (M.Cl.)	Conduit Pipe Leather Products Electric Goods	Vanaspati Ghee Sugar G.I. Pipe
5	Cheema (N.P.)	Paper Copper Wire Boring Machines	Prali (Rice Straw) Iron Scrap Rice
6	Dhanaula (M.Cl.)	Cotton Maize Rice	Cloth Vanaspati Ghee Wheat

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001 - *concld...*

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported

		Agricultural Implements	Diesel Engine
		Combine Harvester	Chillies
17	Tappa (M.Cl.)	Cotton Bales	Vanaspati Ghee
		Rice	Tea
		Cotton Thread	Wheat

Table 47 shows townwise most important commodities manufactured in the town and exported.

Generally speaking, each town has its own characteristic as is revealed by this table. The manufacture of agricultural implements is an important activity in four towns. Manufacture of rice and cotton is the characteristic of a number of towns, and apart from this, earthen pottery, maize, flour, reaper, wooden furniture and tomato are manufactured and produced in Bhadaur, Dhanaula, Dirba, Handiaya, Lehragaga and Longowal respectively.

Besides the agriculture oriented products, paper, bicycle parts and sewing machine parts, wooden furniture are the key items exported from the towns of the district.

(x) Brief Analysis Based on Houses and Household Amenities

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	Median number of rooms	1	2	1	1	1	1	-	-	-

Data Source : Census of India 2001, H-Series : "Tables on Houses, Household amenities and Assets".

3,23,432 households in the district are living in houses owned by them, 15,726 in rented houses and 7,109 in houses with tenure status 'others' i.e. neither owned nor rented. This reflects that 93.4 per cent of the households are living in owned houses, 4.5 in rented houses and remaining 2.1 per cent in 'others'.

Among the households living in owned houses, 60,569 (18.7%) have one room, 106,395 (32.9%) have two rooms, 75,478 (23.3%) have three rooms and 79,099 (24.5%) have more than three rooms. This reveals that the majority of the owned houses have two rooms. Interestingly 1,891 (0.6%) of the households are living in owned houses which do not have any exclusive room.

By and large a similar pattern is observed in both the rural and urban areas. In rural areas 19.1 per

cent of households are living in owned houses having one room; 33.5 per cent in 2 rooms, 23.2 per cent have 3 rooms, and 23.7 per cent have more than 3 rooms; the corresponding percentages for urban areas are 17.8, 31.3, 23.7 and 26.5 per cent respectively. Further more, 0.5 per cent of rural households and 0.8 per cent of urban households are residing in owned census houses which do not have any exclusive room.

Among the scheduled castes, 0.6 per cent have no exclusive room, 35.0 per cent of the households have one room, 39.8 per cent have two rooms, 15.7 per cent have three rooms and 8.9 per cent in houses with more than 3 rooms.

50.8 per cent of rented households and 51.5 per cent of the other households have one room contrary to households living in owned one room houses 18.7 per cent.

TABLE 49 PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban

This table shows percentage distribution of households by tahsil living in permanent, semi permanent and temporary houses. Out of 294,259 households living in permanent houses in the district, 28.0 per cent are in Barnala, 20.9 per cent in Malerkotla, 18.3 per cent in Sangrur, 13.6 per cent in Dhuri, 12.0 per cent in Sunam and 7.2 per cent in Moonak tahsil. The percentage share of households living in semi-permanent houses of the district shows a variation of 44.8 per cent in Sunam and 4.5 per cent in Dhuri. There are 6,264 households living in temporary houses and they make 1.8 per cent of the total households. Sangrur and Sunam constitute more than 14.1 per cent of the households living in temporary houses in the district; the share of the remaining tahsils is; Barnala (13.8), Moonak (13.7%), Malerkotla and Dhuri (12:4% each).

Out of the total households living in permanent houses, 198,791 (67.6%) are in rural areas and 95,468 (32.4%) in urban areas. Likewise percentage of households living in semi-permanent houses in rural and urban areas is 85.3 and 14.7 per cent respectively. There are 6,264 households living in temporary houses and among them 4,701 (75.0%) are in rural and 1,563 (25.0%) in urban areas.

TABLE 50 : PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source: Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : *Percentage is given in brackets after the number of households.*

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

Table 50 shows proportion of households having improved drinking water source, electricity, bathroom, toilet and drainage connectivity.

Improved drinking water :

Households having tap, handpump, and tubewell as the source are grouped as having improved drinking water facility. In the district it is available to 97.9 per cent of the households, the corresponding figures for the rural and urban areas being 97.5 and 98.9 per cent respectively. The trends are, by and large, the same among the tahsils in the district.

Electricity :

Electricity as the source of lighting is available to 91.9 per cent of the households in the district; the corresponding figures for rural and urban areas are 90.0 and 96.5 per cent respectively signifying that the rural areas do not lag behind much their urban counterpart. The trends are, by and large, the same for all the tahsils barring Moonak where 84.5 per cent of the households have electricity and this percentage is significantly lower in rural parts (81.5%) compared with the urban (94.1%).

Bathroom :

Bathroom is available to nearly three-fourth (74.1%) of the households in the district. Even in rural areas this facility is available with 71.1 per cent of the households compared with 80.9 per cent of the urban households.

Among the tahsils, Malerkotla with 80.0 per cent of the households having this facility ranks highest and Moonak (59.3%) is at the tail.

Toilet :

Three out of every five households (60.4%) have toilet facility available to them. Among the tahsils this percentage varies between 70.9 in Malerkotla and 36.8 per cent in Moonak. Besides Malerkotla, Barnala (64.7%), Dhuri (62.3%) and Sangrur (60.8%) are the other tahsils showing percentage higher than the district as such.

One-half (51.4%) of the households in rural areas are equipped with toilet facility as compared to 81.4 per cent in urban areas. Here too, Malerkotla tahsil ranks the highest and Moonak the lowest, both in rural and urban areas. In Malerkotla tahsil 59.8 per cent of rural and 92.2 per cent of urban households have toilets, while the coresponding percentage for Moonak tahsil are 30.0 and 58.3 per cent respectively.

Data source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

Cowdung Cake is the most dominant fuel used for cooking in the district as it is being used by almost two out of every five (38.9%) of the households. This percentage is as high as 47.6 per cent in Moonak tahsil. In rural areas 47.9 per cent of households are using cowdung cake and this percentage is almost three times that of the urban (17.9%).

The use of cooking gas (LPG) is also fairly high; it is being used by 23.3 per cent of the total households in the district.

In Sangrur tahsil 29.7 per cent of the households are using LPG while in Moonak tahsil one out of every ten households (10.0%) is using LPG for cooking. The urbanities are more privileged than the ruralities.

One-half (50.3%) of the urban households are using LPG for cooking, while it is only 11.7 per cent in case of the rural households.

Firewood is the third largest fuel being used for cooking. In the district every fifth household (21.6%) is using firewood; the corresponding percentage for rural and urban areas are 24.3 and 15.4 per cent respectively. The use of firewood as fuel for cooking in rural areas is more than the urban in all the tahsils barring Moonak; in Moonak tahsil 33.7 per cent of the urban households are using firewood compared with 33.3 per cent among rural households.

One in every 25 households (4.9%) in the district is using kerosene as fuel for cooking and its use is more in urban (11.5%) in comparision to the rural (2.0%) households. This trend holds true for all the tahsils in the district.

Data source: Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

Out of 346,267 households in the district, 134,593 (38.9%) are availing banking services; 101,757 (29.4%) have Radio, Transistor; 191,401 (55.3%) have television; 76,732 (22.2%) have telephone; 258,647 (74.7%) have bicycle; 95,189 (27.5%) have scooter, motorcycle, moped and 13,994 (4.0%) have car/jeep/van. The over all scenario of availability of assets in the district can be graded as fairly good. Nevertheless, 46,667 (13.5%) of the households have none of these assets available to them.

(xi) Places of tourist, religious, historical or archeological importance

Akoi :

It is situated at about five kilometers from Sangrur town on Sangrur-Malerkotala road. It has a historical Gurudwara said to have association with a Sikh Guru.

Badrukhan :

It is situated at a distance of five kilometers from Sangrur town on Sangrur-Barnala road. It is believed that Maharaja Ranjit was born at this village on 13th November, 1780. There is a Smadhi of Baba Gudar Shah . People offer and take prasad of rot on the anniversary of Baba Gudar Shah.

Barnala :

It is situated at a distance of about 37 kilometers from Sangrur town on the Sangrur-Bathinda road. Baba Ala Singh the founder of Patiala and Phulkian State occupied it in 1722 and retained it as his capital till 1763. It is also the tahsil headquarters town.

Bhadaur :

It is situated at a distance of 27 kilometers from Barnala on Barnala-Jaito road. There is a Gurudwara which was built to memorate the visit of Guru Gobind Singh . A big fair is held in this Gurudwara on every Baishakhi day. There is a Sheetla Mata Mandir where Mata Rani Ka Mela is held. This shrine was built by Balmiki Kripa. There is a Smadh of Baba Charan Dass located in this town.

Dhanaula :

It is situated at a distance of 18 km. From Sangrur on the Sangrur-Barnala road. The town was founded by Gurditta, the eldest son of Taloka and remained capital of Nabha State until 1755. A fort was built here by Raja Hamir Singh and a fair is held in the temple of Hanumanji on every Tuesday. The legend goes that idol of Hanumanji was discovered while digging the earth. The idol was installed in the temple. A Durga Mela is held for one day only in the Navratras on Ashtami in March-April and September-October. Some people perform here *Mundan* ceremony of their children. A fair is also held in Pir da Dera on 1st Tuesday of Bhadon, Maghar and Phagan.

Longowal :

It is situated at about 18 km. from Sangrur on Sangrur-Barnala road. Earlier it was known as Lalgarh and is said to have been founded by Ala Singh of Patiala State. Bhai Mani Singh, who made supreme sacrifice for religious freedom, belonged to this place. Late Sant Harchand Singh Longowal also belonged to this place. A gurudwara has been built here to commemorate the martyrdom of Bhai Mani Singh. A fair is held here on Maghar 27th every year. The fair lasts for three days.

Lehragaga :

It is situated at a distance of 26 km. from Sunam, the tahsil headquarters. It has a railway station on Ludhiana-Jakhal railway line. The town is comprised of two villages-Lehra and Gaga. A gurudwara associated with the visit of ninth Sikh guru, Guru Teg Bahadur, has been built in Gaga. The Guru stopped here while going to Delhi to offer martyrdom. There is quite an abundance of monkeys and that is why it is also known as 'Lehra Bandran Da'.

Malerkotla :

It is situated on Sangrur-Ludhiana road at a distance of 32 km. from Sangrur. It is railway station on Ludhiana-Jakhal railway line passing through Malerkotla. It was founded by Sadrudin in 1466 AD. He was a disciple of Rukan Alam of Multan (Pakistan). The legend goes that Pir Sadrudin made a hut here which was then known as Malhergarh. Emperor Behlol Lodhi stayed at the place on his way to Delhi, where he was crowned as emperor. He married his daughter Taj with Sadrudin, a Sherwani Afghan of Daraband and gave 68 villages in dowry. The place was known as Malhar due to the location of a kacha fort of malhargarh. Later the name corrupted to Maler. The Kotla portion was established by Bazid Khan who built a protection wall around the place. In 1901-02 Nawab Ahmed Ali Khan built Moti Bazar, which linked Maler and Kotla and named it Malerkotla.

It was headquarters of Malerkotla princely State, which was merged in PEPSU in 1948. Guru Gobind Singh exhorted his followers to desist from doing any harm to the ruler and his subjects as its ruler had raised his voice of protest on inflicting death sentence

to his two younger sons at Sirhind. Accordingly no harm was done to any muslim who entered the territories of Malerkotla State even in 1947. The place is also known for Kuka's anti cow slaughter struggle. 66 Kukas were blown away with cannon under British order in January, 1872. Sheesh Mahal (old residence of Nawab) and jama Masjid are the places worth seeing. A fair is held for two days on 17th and 18th January, every year to commemorate their martyrdom. A fair is also held in May-June and September-October in honour of Hazrat Sheikh Sadrudin.

The place is fast growing into an industrial town and is known for the manufacture of bicycle parts and sewing machines. Many large scale units have also come up in and around the town.

Sangrur :

It is the district headquarters town and is connected by road with Patiala. It is a railway station on Ludhiana-Jakhal railway line. The town was founded by one Sanghu Jat, some 400 years ago. Prior to its merger in PEPSU in 1948 it was capital of princely State of Jind. It was made capital in 1827 by Raja Sangat Singh due to its proximity to Patiala and Nabha. It was earlier part of Nabha State but was snatched and merged in Jind State by Raja Gajpat Singh. Raja Raghbir Singh did his best to develop the town on the lines of Jaipur. The town has four gates such as Patiala, Dhuri, Nabha and Sunami. The Banasar gardens, with Bardari and mini zoo are places of great attraction. Diwan Khana, where the Rajas used to hold their *Darbar,* now houses a museum, wherein weapons and other articles belonging to princely times have been displayed.

Ranike :

It is located on the Dhuri-Barnala road at about 8 km. from Dhuri. It has an ancient Shiv Mandir, where according to a legend Shivling appeared. A large fair is held at this place in which a large number of people from far off places pay a visit. It is believed that childless women, if they stay here for a pre-shivratri night are blessed with a child.

Kup :

It is situated at about 12 km. north of Malerkotla and 8 km. south-east of Ahmedgarh town in Malerkotla tahsil. A historic gurudwara built here in memory of 30,000 Sikhs killed by the troops of Ahmed Shah Abdali in the *Wadda Ghallughara* on 28th Mahar 1818 Bikrami Samvat (1761 AD), exists here. A big fair is held in the month of October to commemorate the martyrdom of the *Shahids.* A large number of people from far and near attend this fair to pay their homage.

Jandiali :

Located at about 5 km. east of Ahmedgarh town on the bank of Bathinda branch of Sirhind Canal. It is also called Jandiali Kalan. It has a gurudwara called Damdama Sahib built in 1966. The place is said to have an association with the sixth Sikh Guru, Guru Hargobind, who stayed here for quite some time. The foundation of the gurudwara was laid by Sant Ishar Singh on 9th March, 1966. A fair is held here on the 10th day of each Bikrami month. The main fair is, however, held on Dashmi of Magh (December-January), which is participated by a large number of people from all areas, especially the Doaba region.

Handiaya :

It is situated at a distance of 5 km. from Barnala. There is a historic gurudwara which is associated with the ninth Sikh Guru, Guru Teg Bahadur who visited this place in 1722 Bikrami (1665 AD). During his visit a fatal disease had broken in the village. A patient came to the guru to seek his blessings. The guru asked him to take bath in the *chhappar*, where hides used to be washed. Guru also took bath himself and blessed that it is guru-ka-chhappar and whosoever took a bath in it will be cured. The villagers took bath and were cured of the diseases. People take bath in the tank on every Amavas. Fairs are held on *Amavas* and *Puranmashi* in another gurudwara dedicated to Sant Kaleranwale. Another fair known as Mata-Ka-mela is held for one day in March-April and September-October.

Sunam :

It is located on the Ludhiana-Hisar railway line and is connected by road with Patiala, Sangrur, Bathinda etc. It is tahsil as well as sub-divisional headquarters. It dates back its history from the vedic period. The Saraswati river used to flow by its side.

It finds mention in Al-Baruni's, Tuz-ke-Babri. The legend goes that Gujri named Sona who guided Mohammad Gauri to Bathinda Fort, got this place in reward and it was named after her. It also finds mention in Abl Fazal's Ain-I-Akbari. During Muslim rule it was centre of politics like Samana and Sirhind. It was a centre of great learning (Dar-ul-Uloom), where Mulsim were taught theology.

Sunam is the birth place of great martyr, Udham Singh, who shot dead Michael O' Dyer on 13th March, 1940 in London and took revenge of 1919 Jalianwala Bagh Massacre at Amritsar. A fair is held in the memory of Shahid Udham Singh at Sunam on 31st July every year.

Moonak :

It is situated on Patiala-Jakhal road at a distance of 45 km. from Sunam towards south on the bank of river Ghaggar. It was also called Akalgarh. There is an old fort, said to have been built during the Muslim rule which had a well whose water was considered not good for health. Hence, hardened prisoners were sent to this place, who died after a short period. The old fort was called Qila Mubarik. There is a gurudwara associated with the visit of Guru Teg Bahadur, the ninth Sikh Guru.

Mulowal:

It is situated on the Dhuri-Barnala road at about 13 km. west of Dhuri in Barnala Tahsil. It has association with Guru Teg Bahadur and Guru Gobind Singh, the ninth and tenth Gurus, respectively. Guru Teg Bahadur is said to have lived here for four days and laid the foundation of Gurudwara Manji Sahib by laying four bricks. He blessed the caretaker for permanent bliss. During his stay Guru Tegh Bahadur used to take bath in the nearby pond from where a brick laid by guru has been recovered. The guru blessed that whosoever will take bath in this pond on Amavas day, all his sufferings will vanish. A *hukamnama* dated 15 Poh 1761 Samvat (1704 AD) said to have been issued by Guru Gobind singh, tenth guru, is also preserved here. The *hukamnama* stated that Guru Gobind Singh will appear at this place on 15 Poh every year. A big fair is held here on 15 Poh every year. People gather here in large numbers on every Amavas day.

(xii)Scope of Village and Town Directory

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

Town Directory :

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV – A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc.Hence the data for the towns of Sangrur has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of Sangrur District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class, name Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns of Sangrur District. The income and expenditure for the towns of Sangrur have been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the scheduled caste/scheduled tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

Statement V gives information regarding medical, educational, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Sangrur which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from towns and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Town. Information on number of banks available in the town has been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII shows the civic amenities available to all the 9 towns having slums falling in the jurisdiction of Sangrur District.

Part - A
VILLAGE AND TOWN DIRECTORY

Section-I

Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The Village Directory format has 25 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number :

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village :

The name and location code number of the village is shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village :

The area of the villages in hectares is given. Wherever the area figures were not furnished by the concerned department, the column is left blank.

Column 4 : Total population :

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households :

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational :

Classes upto class V are included in Primary School comprising nursery school, kindergarten school, Pre-basic school, pre-primary school and junior basic school.

Classes from VI to VIII are included in the middle school.

Classes from IX and X are included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr.
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M (4), etc.

Column 7 : Medical :

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water :

The type of drinking water supply sources available within the village is indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone :

It is indicated by following codes :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks :

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available within the village, distance of the nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies :

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given.

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities:

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in these columns. If not available,

the particulars of the nearest place with the facility exists is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications :

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways, they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village :

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance :

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply :

Availability of Power Supply in the village, whatever may be the form of its use, is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine :

If village receives any News Paper/Magazine the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured :

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use :

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare (s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A and B The appendices show the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates CD Block wise number of villages.

Appendix-IX Shows number of different types of girls schools in a village.

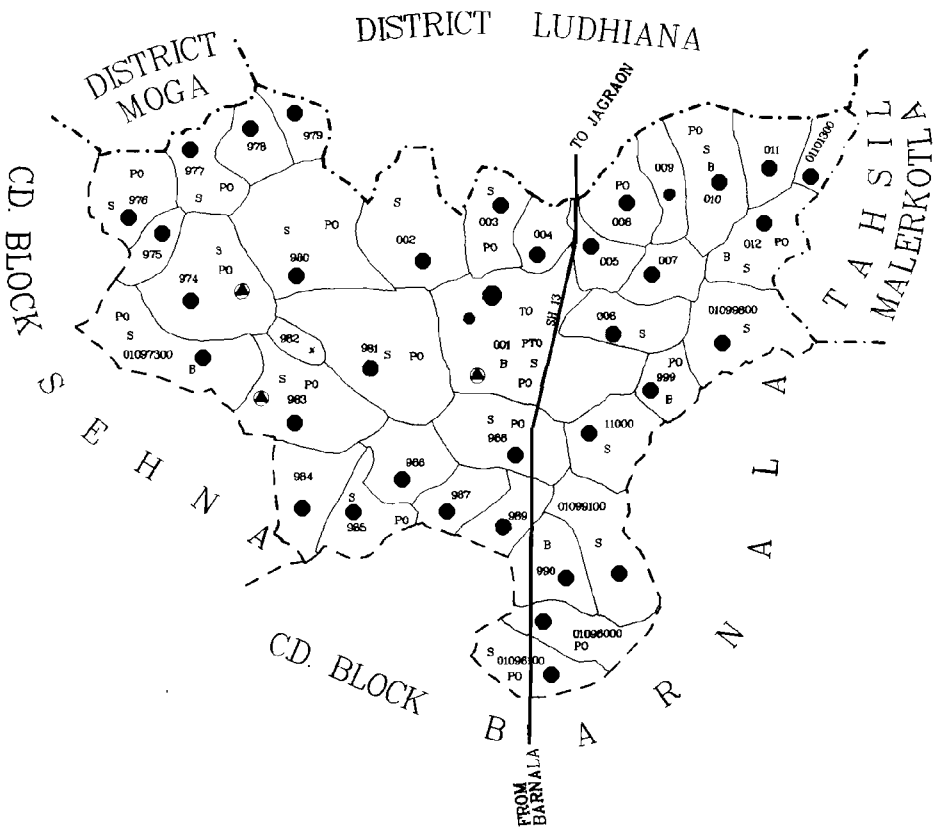

LIST OF VILLAGES TREATED AS TOWNS AT 2001 CENSUS

Serial No.	Name of village	Status of town
1	2	3
1	Handiaya (58)	N.P.

PUNJAB
C.D.BLOCK SHERPUR
TAHSIL DHURI
DISTRICT SANGRUR

Km. 1 0 1 2 3 4 5 6 Km.

BOUNDARIES ARE UPDATED UPTO 1.1.2000

TOTAL AREA OF C.D. BLOCK (In Sq Km)	274.46
TOTAL POPULATION OF C.D BLOCK	93,666
TOTAL NUMBER OF TOWNS IN C.D. BLOCK	NIL
TOTAL NUMBER OF VILLAGES IN C.D. BLOCK	39
DISTANCE FROM DISTRICT HEADQUARTERS (In Kms).	35

BOUNDARY, TAHSIL
" C.D.BLOCK
" VILLAGE WITH P.L.C.NUMBER — 01120300
HEADQUARTERS: C.D.BLOCK
POPULATION SIZE CLASS OF VILLAGES: BELOW 200, 200-499, 500-999, 1000-4999, 5000 AND ABOVE
UNINHABITED VILLAGE WITH P.L.C.NUMBER — X 01121500
IMPORTANT METALLED ROAD
RAILWAY LINE WITH STATION, BROAD GAUGE — RS
POST OFFICE/TELEPHONE OFFICE/POST AND TELEGRAPH OFFICE — PO/TO/PTO
SECONDARY OR SENIOR SECONDARY SCHOOL — S
PRIMARY HEALTH CENTRE
BANK — B

INDIA
PUNJAB
C.D. BLOCK SUNAM
TAHSIL SUNAM
DISTRICT SANGRUR

BOUNDARY, DISTRICT	
" TAHSIL	
" C.D. BLOCK	
" VILLAGE WITH P.L.C.NUMBER	01142800
HEADQUARTERS : C.D. BLOCK	
POPULATION SIZE CLASS OF VILLAGES:BELOW 200, 200-499,500-999,1000-4999,5000 & ABOVE	
UNINHABITED VILLAGE WITH P.L.C.NUMBER	
URBAN AREA WITH LOCATION CODE	X, XV
NATIONAL HIGHWAY	NH 71
STATE HIGHWAY	SH 12A
IMPORTANT METALLED ROAD	
RAILWAY LINE WITH STATION,BROAD GAUGE	RS
POST OFFICE/TELEPHONE OFFICE/POST AND TELEGRAPH OFFICE	PO/TO/PTO
SECONDARY OR SENIOR SECONDARY SCHOOL	S
PRIMARY HEALTH CENTRE	
BANK	B

C.D. BLOCK BOUNDARY EXCLUDES STATUTORY TOWN (S)

BOUNDARIES ARE UPDATED UPTO 1.1.2000.

TOTAL AREA OF C.D. BLOCK (In Sq. Km).	696.87
TOTAL POPULATION OF C.D. BLOCK	214,776
TOTAL NUMBER OF TOWNS IN C.D. BLOCK	3
TOTAL NUMBER OF VILLAGES IN C.D. BLOCK	82
DISTANCE FROM DISTRICT HEADQUARTERS (In Kms).	15

Section-II
Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i) Municipal Corporation	M.Corp.
(ii) Municipal Committee	MC
(iii) Municipal Council	M Cl
(iv) City Municipal Council	CMC
(v) Town Municipal Council	TMC
(vi) Municipal Board	MB
(vii) Municipality	M
(viii) Cantonment Board/Contonment	CB
(ix) Notified Area	NA
(x) Notified Town	NT
(xi) Notified Area Committee/ Notified Area Council	NAC
(xii) Notified Town Area	NTA
(xiii) Industrial Notified Area	INA
(xiv) Industrial Township	ITS
(xv) Township	TS
(xvi) Town Panchayat	TP
(xvii) Nagar Panchayat	NP
(xviii) Town Committee/Town Area Committee	TC
(xix) Small Town Committee	ST
(xx) Estate office	EO
(xxi) Gram Panchayat	GP
(xxii) Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects :

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 & 8 :

Name or the State headquarters, District headquarters and Tahsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory :

Column 6 : Road length (in kms.) :

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage :

Generally, sewerage system is implied by the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines :

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil :

The various prevalent methods of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply :

Source and capacity of storage system. The following codes are used in these columns :

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major sources of water supply is given in column 13 and the storage capacity against each in kilo-litres (in bracket) is presented in column 14.

Column 15 : Fire Fighting Service :

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections) :

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, they may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L

(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes :

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institutes	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like-Applied Art/ Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

Schools up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle schools or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres :

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats :

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities :

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms:

Number of public libraries and reading rooms available in the referent town is recorded in codes as follows :

(i) Public Library PL

(ii) Reading room RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded in these columns.

Column 9 : Number of Banks :

Number of Banks available in the referent town both Commercial and Co-operative banks is recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies:

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town is recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

STATEMENT

PART - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting from October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Caste and the Scheduled Tribe population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus, a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Caste/Tribe returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribe at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes and Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts, Cities and Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented into four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Villagewise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of Tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration, block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure I

Number of villages under Gram Panchayat :

With the Constitution (73rd amendment) Act,1992, the Census Organisation felt it necessary to provide population data for the territorial area of Panchayat. This required precise details of the territorial area of each Panchayat so that delineation of enumeration blocks (Ebs) to be allotted to the enumerators could be done to meet this requirement.

It required careful delineation of enumertion blocks by the Charge Officers to ensure that EBs do not cut across the territorial area falling in the Panchayat. Different situations were well perceived. A Panchayat could consist of only one village or a number of complete villages. There could be another situation where the Panchayat may consist of some complete villages and parts of villages. Still there could be another situation where Panchayat could consist of a number of villages etc.

An exhaustive exercise was done to prepare Panchayat level data. However, we came across following types of situations which made it difficult to compile the Panchayat level data:

i) Some of the Panchayats have one or more than one village.

ii) Some of the Panchayats have only a part of the village.

iii) Some Panchayats include full village (s) as well as part of village (s).

All this has not made it feasible for us to present Panchayat level PCA.

Annexure-II

Fertility and Child Mortality

The following table shows age specific fertility rates in Punjab and Sangrur district for the years 2001 and 1991. The trends observed are almost identical both for the State and the district. Among different age- groups the fertility rate is the highest in age-groups 20-24, 25-29 and 30-34. The trend is the same for rural and urban areas also.

The trends also show some fall in the fertility levels during 1991 and 2001 and this decline is noticeable in all age-groups except 45-49.

AGE SPECIFIC FERTILITY RATES 2001 AND 1991

Annexure-III

Measures of Fertility and Mean Age At Marriage Fertilty Levels :

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating number of births to size of some section of the population, such as number of married couples and number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever married women and the last question related to currently married women only. The measures of fertility worked out are based on the F-Series Tables of 1991 & 2001 Census pertaining to Punjab State.

The following table presents important indices of fertility in Punjab and Sangrur district for the years 2001 and 1991 separately for total, rural and urban areas. There has been significant decline in the number of children ever born per ever married woman in the age group (45-49); the decline is relatively more in urban areas than rural in Sangrur district and the position is vice-versa for the state. Likewise there has been a significant decline in the child-women ratio also. However, the number of married couples per 1,000 of population has gone up both in the state and the district.

IMPORTANT INDICES OF FERTILITY

Fertility Indices	Sangrur						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991
1	2	3	4	5	6	7	8	9	10	11	12	13
No. of Children ever born per ever married woman in the age group (45-49)	3.6	4.4	3.7	4.4	3.5	4.3	3.5	4.3	3.7	4.5	3.2	3.8
Couples per 1000 Population	165	163	165	162	165	165	161	160	160	156	164	168
Child-Woman ratio (0-4 Years)	359	491	367	491	339	493	349	480	369	493	311	448

Annexure IV

MOVEMENT OF POPULATION

What is migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence, if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International Migration :

The migrational movements are of three types- (i) Migration within the State itself with its components-(a) Migration within the district of enumeration (intra-district migration), (b) Migration from one district of the state to another district of the State/UT (inter-district migration), (ii) Migration from one State to another state of the country (inter-state migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why the people migrate ?

For the first time in the census, reasons for migration were elicited in 1981. Keeping operational constraints in view, the reasons for migration were broadly categorized as (1) employment, (2) education, (3) marriage, (4) family movement and (5) other reasons. Other Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration :

The growth of population of a particular place depends upon the biological variates such as mortality and fertility and migration. The knowledge of trends in migration helps in future planning of a place.

PERCENTAGE DISTRIBUTION OF IN-MIGRANTS BY PLACE OF BIRTH

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Migrants born within the state of enumeration	462,543	82,110	380,433	618,251	138,814	479,437
	(85.6)	(73.9)	(88.6)	(86.1)	(77.6)	(89.0)
(i) Migrants born else where in the district of enumeration	287,957	51,070	236,887	407,087	98,670	308,417
	(53.3)	(46.0)	(55.2)	(56.7)	(55.2)	(57.3)
(ii) Migrants born in other districts of the State	174,586	31,040	143,546	211,164	40,144	171,020
	(32.3)	(27.9)	(33.4)	(29.4)	(22.4)	(31.7)
(II) Migrants born in other states of India	63,333	21,723	41,610	90,856	35,510	55,346
	(11.7)	(19.6)	(9.7)	(12.7)	(19.8)	(10.3)
(III) Migrants born in other countries	12,580	6,970	5,610	8,461	4,578	3,883
	(2.3)	(6.3)	(1.3)	(1.2)	(2.6)	(0.7)
(IV) Unclassifiable	1,830	210	1,620	0	0	0
	(0.4)	(0.2)	(0.4)	0	0	0
Total Migrants	**540,286**	**111,013**	**429,273**	**717,568**	**178,902**	**538,666**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

The above table gives distribution of in-migrants by place of birth in Sangrur district as per 1991 and 2001 Censuses. Out of the total in-migrants, 86.1 per cent are born within the state of enumeration and 12.7 per cent are born in other states/Union Territories of India.

The following table gives distribution of in-migrants by place of last residence in Sangrur district. As per 1991 Census. 86.1 per cent of the in-migrants had the place of last residence within the state but out of the place of enumeration. Another 11.5 per cent had place of last residence in other states/UTs within the country, while 2.0 per cent had their last residence out side India. The corresponding figures for 2001 Census are 86.7 per cent, 12.3 per cent and 1.0 per cent .

PERCENTAGE DISTRIBUTION OF IN MIGRANTS BY PLACE OF LAST RESIDENCE

Place of Last Residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7

Annexure V

Main Religions :

The instructions for recording this information are same as in 1991. A brief analysis based on 1991 and 2001 Census data is presented below.

Question 7 of the Household Scheduled canvassed at the 2001 census pertained to religion of a person. The religion of the person was recorded as returned by the respondent. The six main religions in the country were recorded by using following codes:

Hindu	:	1
Muslim	:	2
Christian	:	3
Sikh	:	4
Buddhist	:	5
Jain	:	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Religious Composition of Punjab's Population:

The numerical strength of the six main religious communities in the State and Sangrur district as per 1991 and 2001 Census is as follows :

RELIGIOUS COMPOSITION OF POPULATION, PUNJAB AND SANGRUR 1991 AND 2001

Religious Community	Punjab				Sangrur			
	Total Population		Percentage in Total population		Total Population		Percentage in Total Population	
	1991	2001	1991	2001	1991	2001	1991	2001
1	2	3	4	5	6	7	8	9
Hindus	6,989,226	8,997,942	34.4	36.9	338,760	434,873	20.1	21.7
Muslims	239,401	382,045	1.2	1.6	121,256	157,838	7.2	7.9
Christians	225,163	292,800	1.1	1.2	742	2,071	0.1	0.1
Sikhs	12,767,697	14,592,387	63.0	59.9	1,222,130	1,400,149	72.5	70.0
Buddhists	24,930	41,487	0.1	0.2	544	256	0.0	0.0
Jains	20,763	39,276	0.1	0.2	1,779	3,642	0.1	0.2
Other Religions and persuations	883	8,594	0.0	0.0	97	1,154	0.0	0.1
Religion not stated/ Unspecified	13,906	4,468	0.1	0.0	141	190	0.0	0.0
All religions	**20,281,969**	**24,358,999**	**100.0**	**100.0**	**1,685,449**	**2,000,173**	**100.0**	**100.0**

As can be seen from the above statement, Sikhs form the predominant religious community in Punjab and they account for 59.9 per cent of the State's population according to the 2001 Census. The corresponding percentage for 1991 Census was 63.0. Hindus is the second largest religious community in the State and their share in the total population is 36.9 per cent which was 34.4 per cent as per 1991 Census. This signifies that Sikhs and Hindus, the two most dominant religious communities in the state, together constitute 96.8 per cent of the state's total population. The share of Muslims, Christians, Buddhists and Jains in the total population is 1.6, 1.2, 0.2 and 0.2 per cent respectively.

In Sangrur district, Sikhs constitute 70.0 per cent of the total population and this is significantly higher than that of the state as a whole. Hindus, the second dominant religious community in the district, account for 21.7 per cent of the district's total population. Together, the Sikhs and the Hindus account for 91.8 per cent of the district's population. Muslims constitute 7.9 per cent while the share of Christians is only 0.1 per cent, the percentage of Sikhs and Hindus as per 1991 Census in the district were 72.5 and 20.1 per cent respectively The proportion of Muslims has slightly increased from 7.2 per cent in 1991 to 7.9 in 2001 Census and this percentage is the highest among all the districts in the state.

Annexure VI

Marital Status

Current marital status of each individual, irrespective of age, was obtained through Question 5 of the household schedule canvassed at the 2001 census into following four categories:

1. Never married
2. Currently married
3. Widowed
4. Divorced or separated.

The instructions to enumerators for eliciting marital status were same as adopted in 1991 census. A brief analysis based on 1991 and 2001 census is presented here.

Punjab State has a population of 24,358,999 as per 2001 Census comprising 11,871,211 (48.7%), never married, 11,499,566 (47.2%) married, 938,678 (3.9%) widowed and 49,544 (0.2%) divorced or separated. As per 1991 Census Punjab State had a population of 20,281,969 comprising 10,452,444 (51.5%) never married, 9,146,158 (45.1%) married, 673,569 (3.3%) widowed, 8,768 (0.0%) divorced or separated and 1,030 (0.0%) un-specified.

MARITAL, STATUS OF POPULATION AS PER, 1991 AND 2001 CENSUS

Marital Status	Punjab						Sangrur					
	1991			2001			1991			2001		
	P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13
Total Population	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Never married	51.5	55.4	47.1	48.7	53.1	43.8	50.8	54.8	46.2	48.0	52.6	42.8
Married	45.1	42.3	48.2	47.2	44.6	50.2	45.6	42.7	49.0	47.9	44.9	51.3
Widowed	3.3	2.2	4.6	3.9	2.1	5.8	3.5	2.4	4.8	3.9	2.3	5.8
Divorced or separated	0.0	0.0	0.0	0.2	0.2	0.2	0.0	0.0	0.0	0.2	0.2	0.2
Un-specified	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0

In Sangrur district, out of the total population of 2,000,173 as per 2001 census; 960,753(48.0%) are never married, 956,987 (47.9%) are married, 78,482 (3.9%) are widowed, 3,951 (0.2%) are divorced or separated. Thus, the patterns observed for the State and the distirict are almost identical.

In Sangrur district out of the total population of 1,710,120 as per 1991 Census 869,145 (50.8%) were never married, 780,314 (45.6%) were married, 59,831 (3.5%) were widowed, 750 (0.0%) were divorced or separated and the marital status of a small population (80 in number) could not be specified. Thus the patterns observed for the State and the district were almost identical.Total population of 1991 of Sangrur has not been recasted.

Annexure VII

Sex and Educational level :

It has become customary for the Indian Census to obtain details of educational levels of the literates in the society. Question 13 of the Household Schedule canvassed at the 2001 census aimed to elicit information on the highest educational level attained. The data so collected is put to public domain by classifying the population by sex and educational levels.

The following table shows percentage distribution of literates by educational level for Punjab State and Sangrur district as per 1991 as well 2001 Census.

PERCENTAGE DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL AS PER 1991 AND 2001 CENSUS

Educational level	Total Rural Urban	Punjab						Sangrur					
		1991			2001			1991			2001		
		P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Below Primary	Total	21.8	20.9	23.1	20.0	19.7	20.4	24.9	23.4	27.3	23.9	23.4	24.6
	Rural	24.2	22.9	26.2	22.9	22.3	23.7	27.0	25.0	30.3	26.3	25.6	27.4
	Urban	17.6	17.2	18.2	15.5	15.6	15.4	20.4	19.6	21.5	19.2	19.1	19.4
Primary but below middle	Total	27.9	25.3	31.7	25.6	23.7	28.3	29.7	27.1	33.8	27.8	25.5	31.1
	Rural	31.8	28.4	37.0	29.3	26.6	33.0	32.8	29.4	38.5	30.7	27.6	35.1
	Urban	21.2	19.7	23.3	19.9	19.0	21.1	23.1	21.8	24.9	22.2	21.2	23.5
Middle but below matric	Total	18.1	19.0	16.7	16.9	17.5	16.1	16.7	17.9	14.8	16.1	16.7	15.1
	Rural	18.5	19.8	16.7	17.7	18.5	16.8	16.8	18.3	14.3	16.6	17.4	15.5
	Urban	17.3	17.7	16.8	15.7	16.1	15.1	16.4	16.9	15.6	15.1	15.5	14.4
Matric but below graduate	Total	26.3	28.6	22.8	30.8	32.7	28.4	24.0	26.7	19.7	27.3	29.5	24.2
	Rural	23.0	26.0	18.3	27.5	29.9	24.3	21.2	24.6	15.4	24.2	27.0	20.3
	Urban	32.0	33.5	30.0	36.0	37.1	34.6	30.1	31.5	28.1	33.2	34.4	31.5
Graduate and above	Total	5.9	6.1	5.7	6.6	6.4	6.7	4.7	4.9	4.4	4.9	4.9	4.9
	Rural	2.5	3.0	1.8	2.5	2.8	2.2	2.2	2.7	1.5	2.2	2.5	1.7
	Urban	11.8	11.9	11.8	12.9	12.2	13.7	10.0	10.1	9.9	10.3	9.7	11.1

As per 1991 census 21.8 per cent of the literates in Punjab were below primary level of education, 27.9 per cent were primary but below middle and 18.1 per cent were middle but below matric. A little over one-fourth (26.3%) of the literates in the State were matric but below graduation. It was only 5.9 per cent of the literates who had attained graduation or above level of education.

According to 2001 census 20.0 per cent of the literates in Punjab are below primary level of education, 25.6 per cent are primary but below middle and 16.9 per cent are middle but below matric; 30.8 per cent are matric but below graduation. Only 6.6 per cent of the literates in Punjab are graduate and above.

In Sangrur district, the incidence of lower educational level is greater than that of the State. In the district 23.9 per cent of the literates are below primary and another 27.8 per cent are primary but below middle; the corresponding percentage for the State are 20.0 and 25.6 per cent respectively. By contrast, the percentage of literates with middle or above level of education is lesser in Sangrur district as compared to the State as such. In the district 16.1 per cent of the literates are middle passed as compared to state with 16.9 per cent. Likewise the percentage of matriculation, graduation and above with 27.3 and 4.9 in Sangrur district is lower than that of the State.

Annexure VIII

Distribution of Different Mother Tongues :

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood is recorded as the mother-tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. These may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Mother Tongue and Language data based on 1991 & 2001 Censuses is given here.The distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each) for the district by sex separately for rural and urban areas. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table is divided into two parts; Part A- Scheduled languages with the mother tongues grouped under each, and Part B-Non-Scheduled languages with the mother tongues grouped under each. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census, are basically the designations provided by the respondents. These designations or mother tongue label need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects, the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1576 rationalised mother tongues in 1991 for the entire Country, which were further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.

Table below shows languages arranged in descending order of number of speakers in Sangrur district as per 1991 and 2001 censuses. Punjabi is the most dominant language spoken in the State and the district. It is spoken by 1,911,011 persons in sangrur district and this forms 95.54 per cent of the district's total population. Hindi, the second most dominant language is spoken by 71,042 (3.55%) persons in the district.

NUMERICALLY BIGGEST LANGUAGE ARRANGED IN DESCENDING ORDER OF THE NUMBER OF SPEAKERS, 2001-1991
