MOTIF

GANGOTRI TEMPLE

The temple of Ganga i.e. Gangotri temple is situated on the right bank of the Bhagirathi, right in the middle of the tiny village Gangotri, 3,140 metres above sea level, where the sun filters through the branches of giant deodars and conifers in a mesmeric display of light and shade. The source of the holy river Ganga is at Gomukh, about 18 km. away from Gangotri. The holy shrine of Gangotri is situated at an elevation of 3,200 metres above sea level. Gangotri temple was built by the Gorkha General, Amar Singh Thapa during 18th Century. It is linked by a good motorable road. The distance is about 248 kilometres from Rishikesh. A number of Ashrams are located on the other side, some of them provide accommodation for visitors. Many Hindu pilgrims visits this place during the months of April-October since the place remains snow bound and inaccessible during the rest of the year and the door of the temple also remains close during this period. Gangotri has the civic status of Nagar Panchayat and also offers exciting trekking trail.

Annexure VII Age, Sex and Education in the District, 1991 and 2001 Census 457
Annexure VIII Distribution of different Mother Tongues Returned in 1991 and 2001 Census 459

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision of Shri Mohd. Ahmad, Assistant Director. I am also thankful to Shri Shailendra Singh Negi, S.I. Grade-I, Shri S.K. Banerjee, S.I. Gr. II and Shri U.G. Jhingran, S.I. Gr. III who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map)and Shri J.P. Purohit, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. Uttarkashi district ranks tenth in terms of population in the state Uttaranchal.
2. Uttarkashi is one of the least urbanised districts in the state having less than one tenth (7.8 per cent) of the population in urban areas.
3. Uttarkashi district has the lowest (37) population density (population per sq.km.) in the state.
4. Uttarkashi district ranks ninth in terms of sex ratio (941) below than the state average of 962 females per one thousand males.
5. Uttarkashi district ranks eleventh in literacy (65.7 per cent) below than the state average of 71.6 per cent.
6. There are only 17 un-inhabited villages out of total 699 villages in the district.
7. Decadal growth rate of the district (23.1 per cent) is higher than the state average of 20.4 per cent.
8. The district has three towns and four tahsils. Neither new town has been added nor any town has been declassified.
9. There are 55,558 households in the district accounting for 3.5 per cent of households in the state.
10. More than 69.0 per cent households use firewood as fuel for cooking as against only 24.2 per cent households using LPG in the district.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The District Census Handbooks (DCHBs) were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective district. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in two parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in two parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as that was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with the aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

Uttarkashi district was created on Feb 24, 1960, out of the then parganas of Rawain and Uttarkashi of Rawain tahsil of erstwhile Tehri Garhwal district. It sprawls in the rugged terrain of the mystic Himalayas over an area of 8016 sq.km. The district is named after its headquarters town Uttarkashi, an ancient place with rich cultural heritage and as the name suggests, this place is the 'Kashi' of north ('uttara') as against the 'Kashi' of the plains (Varanasi). Both the Kashis of the plains as well as of north are situated on the banks of Bhagirathi & Ganga respectively. The area, which is held sacred and known as Uttarkashi, lies between the rivers Syalam Gad also known as Varuna and Kaldi Gad also known as Asi. The Varuna and the Asi are also the names of the rivers between which the Kashi of the plains lies. In Uttarkashi, Manikarnika is one of the bathing ghats on the Bhagirathi. There is also a temple dedicated to Lord Vishwanath.

In the early period, the area covered by the district was referred to as Kedar Kshetra (sacred region) where the Hindu kingdom of Brahmapura, Kumaun and Garhwal flourished. During the Rigvedic period, this region was inhabited by one of the five principal tribes of the Aryans. In the Aitareya Brahmana (VIII 141), this land is described to be located beyond the Himalayas and was believed to have been the land where the *devas* performed their sacrifices. Some of the customs of Uttara Kurus are reflected in the life of the rural people of parts of the district. In the Upayana Parva of Mahabharat,

hill tribes – Kiratas, Uttara Kurus, Khasas, Tanganas, Kunindas and Paratanganas are described as who had brought wonderful presents for Yudhishthira's Rajasuya sacrifice. It was about the beginning of the Christian era that Raja Pala, founded a kingdom in the Badrinath region of the adjoining Chamoli district. It is probable that Raja Pala and his successor extended their sway to the present Uttaranchal region. In 634 AD, the Chinese traveler Hiuen Tsang journeyed from Malawar to Mayurapura towards Brahmapura which is present Uttarkashi. It was also the site of the capital of that ancient kingdom. In the 7th century, Katyuris established new kingdom from Satadru (Sutlej) to the Sarda (Kali) with its capital at Joshimath in Chamoli district.

The greater portion of the district during 1209-1216 formed part of Sompal's kingdom. It is said that this king had no son but only a daughter who was married to Kadilpal, a prince from Dharanagar in Malwa. His marriage took place while he was here on pilgrimage. Kadilpal held this region from 1216 to 1221 and was succeeded by Kamdeopal and the later by Salakhanpal 1236-1254 AD. Ajaipal reigned during 1358-70. The present area of the district was ruled by Pal dynasty. The cognomen 'Pal' was changed to 'Sah' during 15th century conferred by sultan of Delhi perhaps Bahlol Lodi (1451-88 A.D.) From an inscription discovered on the gateway of the Raghunath temple at Deoprayag, it may be conjectured that the area was under the dominion of Prithvi Sah during 1664 AD. Prithvi Sah is said to have lived for 76 years. After the death of Prithvi Sah, his grandson Fateh Sah who was a minor of seven years ascended the throne. Perhaps in 1684 Fateh Sah took the reigns of government in his own hands and he appeared to have remained on friendly terms with Aurangzeb till the latter's death in 1707 AD.

After the death of Fateh Sah in 1716 AD, his son Dilip Sah ruled only for few months and made way for Upendra Sah. He also did not stay long on the throne and after ruling for about nine months, was succeeded by his nephew Pradip Sah who ruled over Garhwal for over half a century. The district was ravaged by a severe earthquake in the beginning of 1803. Subsequently the Gorakhas of Nepal invaded Garhwal and Amar Singh Thapa was made Governor of this region. Gurkhas came into contact with the British as their frontier in Garhwal had become coterminous with that of the British. The border troubles prompted the British to invade Garhwal. In April 1815, Gorkhas were ousted from Garhwal region and Garhwal was annexed as British district and was split into eastern Garhwal and western Garhwal. The eastern Garhwal was retained by British Government. The western Garhwal, lying to the west of Alaknanda river with the exception of Dun was made over to the heir of Garhwal Dynasty, Sudarshan Sah. This State came to be known as Tehri Garhwal and it was merged with the State of Uttar Pradesh in 1949 after India attained independence in 1947.

(iii) Administrative Set-up

District Uttarkashi is located on the northern portion of Uttaranchal State. For administrative convenience, the district has four tahsils, viz. Bhatwari, Dunda, Rajgarhi, and Puraula. The administrative seat of the district is at headquarters town Uttarkashi which is 200 km. away from State capital Dehradun. For the purpose of rural development, the district is divided into six community development blocks. The district comprised 699 villages at the 2001 Census out of which 682 are inhabited and 17 uninhabited. There are 30 forest villages in the district. Out of the three towns, Barkot (Nagar Panchayat) lies in Rajgarhi tahsil whereas Gangotri (NP) falls in Bhatwari tahsil and the third town is known as Nagar Palika Parishad (NPP) Uttarkashi. Development activities in the district operate through Panchayat Raj Institutions. A total of 36 Nyay Panchayats and 373 Gram Sabhas were part of it upto 1997-98. No jurisdictional changes took place during 1991-2001 in boundaries of the district as well as in tahsil set-up.

District level officers belonging to various departments administer departments under them while the revenue wing is undertaken by the District Collector in association with Additional District Magistrate and Sub-Divisional Magistrates. Other district level officers include District Judge, Superintendent of Police, Chief Development Officer, District Development Officer, Assistant District Development Officer, Chief Medical Oficer, Treasury Officer, District Rural Development Authority, District Inspector of Schools, District Employment Officer, District Horticulture Officer, District Informatics Officer (NIC, Govt. of India), District Information Officer (State Govt.), General Manager, District Industry Centre, District Election Officer, District Public Relation Officer, District Economic and Statistics Officer, Assistant Director Small Industries, District Forest Officer, District Forest Officer (Soil

Conservation), DFO (Logging), District Agriculture Officer, Assistant Registrar, Coperative Societies, Additional Forest Conservator (Forest Division), Commandant (Home Guards), Executive Engineer, *Jal Nigam* (Water Corporation), Executive Engineer, Electricity Distribution Division, Superintendent Engineer, Public Works Department, Executive Engineer Rural Engineering Services, Executive Engineer, Irrigation, Executive Engineer, Mandi Parishad, etc.

(iv) Physical Features

Location and Size :

The physical features of the district may be described in terms of location, boundaries and area. The district is situated in the valley of two small ridges of Himalayas. The two natural divisions are valley region and hilly region. The main concentration of population is found in valley division and the land found here is fertile also. The major portion of the district is hilly surrounded by small and big mountain peaks. The district lies between latitude 30°28' and 31°28' North and longitude 77°49' and 79°25' East. Its maximum length from east to west is about 154 kms. and maximum breadth from north to south is about 109 kms. It is surrounded by district Chamoli in the east, on the north are Himalayan Ranges and state of Himachal Pradesh with international boundary formed by China (Tibet) and on the west is Dehradun and State of Himanchal Pradesh. On the south, districts Tehri Garhwal and Rudraprayag are situated. The total area of the district is 8016 sq.km. and area wise it is the largest district of the state Uttaranchal.

Physiography :

Lying in the upper Himalayas, Uttarkashi contains within itself varying geographical environment ranging from snow free valleys and outer hills to the high peaks with perpetual snow and glaciers. The terrain runs into series of ridges and valleys. Each ridge leads to another coiling up in seemingly unending chairs. Most of the terrain is mountainous consisting of high rise ridges, hills and plateaus. Flat pieces of land are rare. The land in these areas is low in fertility due to large content of outcrops of boulders and grovels. According to the factors like topography, geology, soils, climate and natural vegetation as taken up for the delineation of regional divisions, the district of Uttarkashi has been divided into the following seven sub micro regions:

Dhaola Dhar
Tons Basin
Lesser Himalaya-West
Yamuna Basin
Upper Bhagirathi Basin
Lesser Himalaya-East
Greater Himalaya

A brief description of these sub micro regions is as under :

Dhaola Dhar :

The region is situated in the extreme north western part of the Uttarkashi district. This is a high mountainous region lying in the lesser Himalaya Zone. The topography is highly rugged with high ridges, glaciers and high altitude valleys. The altitude varies from 1200 to 4800 metres above the sea level. Western part of the region is comparatively low and covered by mixed jungles, while the eastern part is covered by snowcaps. River Tons, alongwith its tributaries Supin and Rupin, flow towards the south-east. In general, areas above 4000 metres are snowcapped, while snow melts in zones between 2500-4000 metres during March to November.

The geology of this region belongs to the Proterozoic period of Pre-Cambrians. The main rocks found are granites, schists and quartzites. The top of the hill ranges are generally snowcapped. Mainly brown forested soils of the hill areas are found with podsolic soils in shady and wet places. The settlements are amorphous and situated on the river sides. Tribes living in this region produce rice, potato etc. The region has poor transport facility because of rugged terrain. The region is very tough for human habitation and the economy is very poor.

Tons Basin :

The region extends in the north-western part of Uttarkashi district in between Dhaola Dhar and Lesser Himalaya. It is defined as an elongated basin along Tons river. Width of this basin gradually increases in south-west. Tons river valley is narrow and deep with steep scarps. Height of this region varies from 1200 to 3200 metres. The region belongs to the Tertiary and Proterozoic periods. Most of the crest areas are covered by dense, mixed forests mainly of pine. Areas at lower altitudes are mostly covered by shrubs. Pabar, Rupin and Supin are the main tributaries of the Tons river. The villages are situated in small patches of flat land on the low-lying valley sides. The houses are generally double storyed with stone walls and the roofs covered with slate. All the fields in the villages are terraced. Gul irrigation system provides water for agriculture. Rice is the

main crop cultivated here. Other crops are wheat, potato, *shimla mirch* (Capsicum) etc. The area is not congenial for human habitation due to adverse physiographical conditions and absence of transport facility.

Lesser Himalaya-West :

This region is delineated between the Tons basin in the north-west and the Yamuna basin in the south in Uttarkashi. Greater Himalaya extends in the north-east of this region. The width of the region is about 8 to 25 kms. Altitude of the crests varies between 2500 to 4200 metres from the sea level in this sub-micro region. The Yamuna river originates from the Yamunotri glacier, which is about two kilometres away from this region. Some crests look bare. The Yamuna river flows in a narrow shape with a deep gradient upwards from Janaki Chatti. Here is a *kund* of worship located about 6 km away from Yamunotri. Hanuman Chatti is a small and beautiful place at the Sangam (confluence) of Hanuman Ganga and Yamuna. The region is mostly composed of crystalline and metamorphic rocks with unfossiliferous sedimentary deposits. Most of the areas are covered by dense jungles mainly of pine. Potato and wheat are the main crops of the region. A single metalled road upto Hanuman Chatti connects the area with Rishikesh, Dehradun and Barkot. Tourism activities serve as the main source of economy of this region. Tourist facilities, i.e., hotels, health centres and markets are available on the Yamunotri route.

Yamuna Basin :

This region belongs to the upper basin of the Yamuna river. Lesser Himalaya-West runs along the north boundary and Upper Bhagirathi Basin runs the south and east. The river Yamuna flows in a narrow region with deep gradient. The north western part of the region is higher than its eastern part. Its height varies from 1,500 to 2,500 metres above the mean sea level. South-western part of the basin is comparatively low and broader. Kamola river is the main tributary of Yamuna in this region. It flows north-west to south-east and joins the Yamuna near Naugaon. The rocks here are of Upper Proterozoic period belonging to Garhwal group. Central Himalayan Gneisses are found in eastern part of the region. The soils are fertile and alluvial in the river valleys. Most of the area is covered by mixed dense forest mainly of pine, *deodar* and *banj* except in river valleys. Location of villages is scattered and they are situated on small patches of flat land on the low lying valley side. The fields are terraced and the main crops are rice, wheat, potato etc. Besides, barren land of Dunda Tahsil also appears in this region. Barkot is an important town, which is connected by metal led road with Dehradun, Uttarkashi and Puraula. This place is 40 km. from Brahmkhal and its height is 1,828 metres above the mean sea level. The rich forests, mountains and valleys attract travellers. Way to Yamunotri starts from this place along the banks of Yamuna. Puraula and Rajgarhi are the administrative centres and connected by motorable road with Dehradun and Rishikesh.

Upper Bhagirathi Basin :

The region is bounded by Yamuna Basin in the west, Lesser Himalaya-West and Great Himalaya in the north and Lesser Himalaya-East in south east. The region extends along the Bhagirathi river with its tributaries. This basin is broader in comparison to Yamuna basin. Heights are comparatively low. Its height varies between 1200 to 3000 metres from the mean sea level. The Bhagirathi has steep gradient in its upper course. The river forms deep valley which sometimes narrows and sometimes broadens in accordance with lithology. This region is mainly composed of crystalline rocks of Proterozoic period. The soils are sandy loam and gravels with patches of podzolic soils at shady and wet places. The altitudinal zone above 2,000 metres from the mean sea level is covered by dense mixed jungle mainly of *banj* and *deodar*. Area below 2,000 metres are covered by mixed jungle mainly of pine and scrubs. Main agricultural produce are rice, wheat and potato. Settlements are found comparatively more to the downward from Uttarkashi and are located in the low lying river valleys. The settlements are small and scattered. Uttarkashi, Bhatwari and Dunda situated on the bank of Bhagirathi are the main places and also the administrative centers. Uttarkashi (1,158 metres from the mean sea level) is a beautiful historical place. This is the halting place for travelers from where Gangotri is only 98 km away. Gangotri and Maneri are the other important places of the region. Dharasu (1,036 metres from the mean sea level) is 37 km away from Tehri and a border place of Uttarkashi. From this place the road is bifurcated for Gangotri and Yamunotri.

Lesser Himalaya-East :

It is the smallest region delineated in the southern part of the district, which runs in narrow and

elongated shape. The region is bounded by Bhagirathi Basin is the north-west and Greater Himalaya in the north-east. The width of the region is about 5 to 10 km. The region is a part of Lesser Himalaya and has rugged topography with difficult precipitous slopes. Horned peaks, torrential rapids, gigantic escarpments and springs provide a gorgeous topography. The region has its own grace and charm due to its natural scenic beauty of the charming vegetation. General slope of the region is towards the north-west (Bhagirathi). Several tributaries of Bhagirathi originate from these ranges. Height varies from 2,000 to 4,000 metres from the mean sea level. The region is composed of crystalline and metamorphic rocks with unfossiliferous sedimentary deposits of the middle Proterozoic age. Most parts of the region are covered by fairly dense mixed jungle mainly *banj* and sometimes open scrubs. Human activities are limited due to rugged topography. Most of the settlements are located in the southern part of the region. Terraced agriculture fields provide cultivation of rice, wheat and potato. Transport facilities are negligible.

Greater Himalaya :

This is the largest region of the district carved out in the extreme north. The topography of the Greater Himalaya is highly rugged and difficult with precipitous slopes. Horned peaks, serrated crest of high ridges, glaciers, snow-clad slopes, hanging valleys, cascades of sparkling water coming from melting ice and rapids and escarpments provide a typical topography of the high mountains of the Himalaya. Deep valleys, roaring streamlets, huge boulder and snow caps present a beautiful scenery. Altitude in this region varies from 3,000 to 7,000 metres from the mean sea level. Some of the main peaks of the region are Bandarpunch (6,320 meters), Gangotri (6,614 meters), Chaukhambha (7,138 meters), Sri Kailash (6,932 meters), Trimukhi Parbat (6,422 m) and Srikantha (6,133 meters). The Yamuna river originates from Bandarpunch glacier while Bhagirathi originates from Gangotri glacier. Yamunotri located at a height of 3,235 metres from the mean sea level is the holy place of Hindus and the place of origin of river Yamuna. There are few hot water *kunds* of which Surya Kunda is the prominent one. Dibya Shila is the main place of worship. The region is composed of a series of highly fossiliferous sediments. The rocks belong to the Proterozoic period. These are mainly quartzites, granites, gneiss, diorite, amphibolites, etc. The uppermost parts of ridges are snow capped. Metalled road is available from Hardwar to Hanuman Chatti. The temple of Yamunotri opens on the auspicious day of Akshaya-Tritiya (Last week of April or first week of May) and closes on the sacred day of Dewali festival. Another sacred place of this region is Gangotri, which is situated at a height of 3,140 metres from the mean sea level. The route of Bhagirathi is quite different from that of the Yamuna because the hills through which it passes are formed by soft rocks and subject to the land sliding. Gangotri is 248 km from Rishikesh and is connected with metalled road.

Geographically the northern part of the district falls under Greater Himalaya and rest of the district belongs to the Lesser Himalaya Zone. The average height of the district varies between 1,500 and 6,800 metres above the mean sea level. The region is mostly composed of crystalline and metamorphic rocks with unfossiliferous sedimentary deposits of the proterozoic period. The Greater Himalayan part is composed of a series of highly fossiliferous sediments.

In general, brown forested soils are found in the district with meadow soils. The valley land is alluvival, generally forests occur on the upper ridges that bound the valley, on their sloping hill side lie a chain of sparsely populated settlements interseparated with terrace cultivation.

Drainage :

It is the land of Uttarkashi that gives rise to two great and reverent rivers of India, the Bhagirathi called Ganga in the plains and the Yamuna. The Ganga coming up in the glacier 'Gaumukh' traverses 128 km. in Uttarkashi district. Hardly 18 km. away from Gaumukh is the place Gangotri of great pilgrimage importance. The Yamuma rises from the west of Bandarpunch peak and revered highly is the place Yamunotri situated nearby and visited by pilgrims. The third important river of this district is Tons besides host of tributaries that drain these areas. The general slope of the rivers and the district is from north to south.

Topographical factors attribute scarcity of roads in some of the villages. Private buses, Government Buses, Tehri Garhwal Motors Union, ex-soldier's agencies ply their buses on different routes. These also include 340 private taxis. Nearly 15 to 20 thousand persons move daily. For cartage of goods i.e., consumer goods, construction materials, industrial goods, wood, potato, apples, etc., as many as 15 transport agencies are in operation.

Electricity and Power :

In order to strengthen power generation and self sufficiency in power sector, State Electricity Board has taken up Maneri Bhali, Pala Barsu and Dharsu power projects. These units are operational since the year 2002.

Climate :

According to the location Uttarkashi district is situated in rugged region. The mean monthly temperature varies from minimum 4°C to maximum 31°C. The coldest period of the year is from December 15 to January 31 and the hottest period is April 15 to first week of May. Wind characteristics in the district are almost cold. The temperature drops below freezing point at high altitude during winter and snowfalls at as low an altitude as 1,200 metres. above the sea level. Rains start from early May to September. Winter rains are very frequent. The average annual rainfall in the year 1997 was 1,470 milimetres and the actual rainfall recorded was 1,601 mm. Intensity of cold increase as and when rains occur. However, the climate varies greatly from tropical to severe cold depending upon the altitude of the area and the extent of exposure to sun. Generally, valleys are warm during summer as against being intensely cold during winter and snow falls at low altitude of 4000 feet.

Natural Economic Resources

Forestry :

The varying climate and topography produce a range of vegetation and serve as habitat to diverse species of wild life. Forests occupy a place of pride in the environment of the district not only for the sheer bulk of the area they occupy but also for richness of variety of vegetations. As much as 58.52 per cent of the total area of the district is administered by forest department. Of the total forests, 69 percent lie in Bhatwari tahsil, 7 percent in Dunda, 13 per cent in Rajgarhi and remaining 11 percent in Puraula tahsil. *Deodar, Sheesham, Cheer* and *Bamboo* are the main forest produce besides *Jhula* grass extracted from *Moru* tree. Medicinal plants of great commercial value grow spontaneously in the forest. Rich variety of grass, shrubs and herbs come up during June-September while during the remaining part of the year these areas remain covered with snow. Some of the grasses grow in the valley, some in sub-mountain and others on higher altitudes.

Minerals and Mining :

The stray survey of the district reveals the availability of Copper, Graphite, Limestone, Kyanite and Mica. Copper occurs at various places. Boulders of malachite stained quartzite are reported to have been noticed near Dasumdu, Chalcopyrite bearing quartz veins in granite boulders have been noticed in the south western branch of Mana glacier. Graphite near Harsil, Kyanite near Suki, Mica near Loharinag and Suki are found in the district. Commercial extraction of minerals in the district has not been taken up.

Soils :

In general, brown forested soils are found in the district with meadow soils. The top of the hill ranges are generally snow-capped. Mainly brown forested soils of hill areas are found with podzolic soils in shady and wet places. The soils in the Yamuna basin region are fertile and alluvial in the river valleys. The soils in the Upper-Bhagirathi basin are sandy loam and gravels with patches of podzolic soils at shady and wet places.

Land and Land use :

As per the Agriculture Bulletin 1992-93 the land use statistics shows 88.5 percent under forest, 1.51 percent agriculture & barren land, 0.043 per cent is fallow land, orchards, *usar* and area not available for cultivation comprise 0.94 per cent and 2.23 per cent of the area not available for agriculture. More than 48 percent of the land holdings are below 1 hectare, 47 percent between 1-2 hectares and remaining above 2 hectares to 10 hectares. Owing to the existence of high gradients and a large number of rivers and streams, the problem of soil erosion in the district is acute. The government have started several schemes to check it, such as plantation of trees and construction of irrigation chanals. Scientific methods are being employed in ploughing the fields and line-sowing is being stressed.

Tenancy :

After the enforcement of the Kumaon and Uttarakhand Zamindari Abolition and Land Reforms Act, 1960, the old land tenures were abolished. This Act replaced the multiplicity of tenures existing in the region by three types: the bhumidhar, sirdar and asami. The intermediaries became bhumidhars in respect of groves held by them. Those who were

hissedars (shareholders) and khaikars became bhumidhars in respect of lands in their actual possession. A sirdar has a permanent and heritable interest in his land holdings but can use his land only for agriculture, horticulture and animal husbandry, although he can acquire bhumidhari rights under the provisions of the Act. An *asami's* right is heritable but not transferable or permanent and he can be evicted from his holdings.

Agriculture and Crop Pattern :

The cultivation in the district is carried by making terraces on the sloping hill side. Some cultivation is done on steephill also where terracing and tilling can't be done and the place is cleared by burning shrubs and bushes. The seeds are sown with the help of hoe. Rabi and Kharif are the main crops. Besides wheat, paddy, maize, *madua* and *sawa* are being cultivated in the district. Wheat is sowed in about 90 per cent of the total cropped area during Rabi. The production of commercial crops like potato and oil seeds bears significance. *Urad, masoor, matar* and *arhar* are also harvested. Among fruits, apples comprise 80 per cent share mainly in the development blocks Naugaon, Bhatwari, Dunda, Chinialisain, Puraula and Mori.

Irrigation :

More than 40 per cent of the area available for cultivation in the district is irrigated through government canals and private *gools* and *hauzes* etc. Nearly 75 per cent of the cultivated land is irrigated through these sources including *gools* and *hauzes*.

Animal Husbandry :

Animal Husbandry is an important source of supplementing income of rural population. As per cattle census of 1993 to 1998 the percentage increase in the number of cattle in the district was recorded as 15.62 per cent mainly due to increased hybrid variety of cows and buffaloes. Mules and horses are other animals of importance in the district. They are utilized for transportation of goods and services from one place to other. Number of poultry has also increased from 6,202 in 1993 to 10,103 in 1998; similarly piggaries are also coming up. Sheep rearing is an important industry in the district and all efforts have been made to improve the production of wool. State Government has provided high yielding variety of Bhera Sand on each sheep farm. Artificial Fertilization Centres have contributed too much towards animal husbandry in the district. The district has 20 Animal Husbandry Centres, 25 Sheep Development Centres, 11 Artificial Insemination Centres, 2 Sheep Fertilization Centres and 61 Natural Fertilization Centres in the year 2000.

Fishery :

The lakes, rivers and streams abound in various species of fish. The most common varieties of fish found in district are *mahaseer, rohu, catla, nain, saul* and *tengan*. During 1997-98, there were two departmental ponds in the district. During the same period Fishery Department had distributed 46 thousand fingerlings to the fishermen. Due to rugged topography fishery has not developed as an economically viable occupation in the district.

Industry :

Industrially the district remains still backward. Two hundred small units are registered employing more than 270 persons. Crafts, carpet weaving and wool production are the premier items of production. Silk is also being produced from silkworm. During the year 1999-2000 nearly 280 families reported to be engaged in this household industry.

Trade and Commerce :

The district touches Himachal Pradesh on the west side and its northern boundary marches with Tibet with which this region had a brisk trade till 1958. Local residents used to trade commodities, like barley, rice, wheat, pulses, onion, potato, cloth, sugar, jaggery, dried fruits and silver for salt, borax, musk, ponies, goats, sheep, woolen goods, ornamental saddles, tea, butter, gold, nails and horn of Yak. Since 1962 most of the trade is carried out with Himachal Pradesh and adjoining areas of UP. Cutting of logs of timber that are floated down the rivers is an old trade. The commodities exported are timber, resin, potatoes and wool and its products and the commodities imported are clothes, foodgrains, sugar, kerosene, cement, salt and coal.

Transport :

Road transport is the only mode by which people move from one place to other. The net work of roads is very rich. The roads managed by PWD is 870 km, Local Governments 9 km, Border Roads Organisation 148 km and other roads totaled 1,050 km. Beside motorable roads, 751 km footpath and 45 km *pagdandies* included road network. Still 40 per cent of the villages don't enjoy link road facility.

Gram Panchayats, its composition, jurisdiction and role in village development

Gram Sabha plays pivotal role in the development of the economy of the village. There are in total 373 *Gram Sabhas* in the district. In each *Gram Sabha* one village *Pradhan* and six other members are elected by voters of the *Gram Sabha*. The members and the village head decide priority areas of development in the village and funds are made available through Block Development Office. The *panchayat* is the executive body of the *Gram Sabha* which consists of the adult population of the area. A fixed number of members and a *pradhan* are elected by the members of the village community aged 18 and above usually for a period of 5 years. The *pradhan* and *uppradhan* also function as chairman and vice-chairman respectively of the Gram Sabha. The functions of the *Gram Panchayat* include the construction, repair, cleaning and lighting of streets, improvement of sanitation, and other properties belonging to the *Gram Sabha*, registration of births and deaths, regulation of markets and fairs, provision for potable drinking water and the welfare of the backward groups of the people particularly *harijan* (scheduled castes), women and children.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is

considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates

structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as a part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Majhwar
28 Mazhabi
29 Musahar
30 Nat
31 Pankha
32 Parahiya
33 Pasi, Tarmali
34 Patari
35 Rawat
36 Saharya
37 Dhangar
38 Dhanuk
39 Dharkar
40 Dhobi
41 Dom
42 Domar
43 Dusadh
44 Gharami
45 Ghasiya
46 Gond
47 Gual
48 Habura
49 Hari
50 Hela
51 Kalabaz
52 Kanjar
53 Kapariya
54 Karwal
55 Khairaha
56 Kharwar (excluding Banbasi)
57 Khatik
58 Khorot
59 Kol
60 Kori
61 Korwa
62 Lalbegi
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e., in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e., last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at

home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a Pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births

to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be bc to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

There were 295,013 persons in the district in 2001 Census, out of which males were 152,016 and females number 142,997. As much as 92.23 per cent (272,095) population of the district live in rural areas and rest reside in urban areas. The share of rural population at the 1991 Census was 92.80 per cent (222,448) out of the total population of 239,709. In

fact, except the newly created districts of Bageshwar, Rudraprayag and Champawat, this district has lowest in population size in the state. The share of population (16.9 per cent) in age-group 0-6 years at 2001 Census in the district is slightly higher than in the State (16.0 per cent).

Population Growth :

The percentage decadal growth rate during 1991-2001 has been 23.1 as against 25.5 per cent in the previous decade. The increase in the district has been greater as compared to the Uttaranchal State, which witnessed only 20.4 per cent of growth during the decade 1991-2001.

Sex-Ratio :

The sex-ratio (females per 1000 males), which was 918 at the 1991 Census, has improved to 941 in the 2001 Census. But in comparison to the State at the 1991 and 2001 Censuses the sex- ratios in the district had remained lower at 918 and 941 as against 937 and 962, respectively. In fact, since the 1971 Census the district has had a lower sex-ratio as compared to the state. Among the districts steeped in the Himalayas this district has the lowest sex-ratio, higher only to districts of Hardwar, Dehradun, Udham Singh Nagar and Nainital.

Population Density :

The population density per square km. has also increased from 30 at the 1991 Census to 37 at 2001 Census. In respect of ranking of districts by population density in the state of Uttaranchal this district stood at the bottom at the both of the Censuses. In contrast to 133 persons per square km. in the state at the 1991 Census the district had only 30 persons. Similarly as against 159 persons at the 2001 Census in the State, the density is only 37 in the district. In fact; in the State there are only two districts namely Uttarkashi and Chamoli with below 50 persons per square km. density.

Literacy :

The literacy in the district is at 65.7 per cent at the 2001 Census, quite low to the state level of 71.6 per cent but the share of male literates is somewhat higher (83.6) in the district, while the share of female literates (46.7) is quite low. The percentage rise in the literacy rates of the district during the decade 1991-2001 has been all along higher as against the State in respect of persons, males and females. The most significant rise at the state and at the district levels took place in respect of female literacy, which increased by 18.00 and 23.1 percent points at the State and district levels from 41.6 per cent at the 1991 to 59.6 per cent at the 2001 Census in the case of the State and from 23.6 per cent at 1991 Census to 46.7 per cent at the 2001 Census at the district level. It may be added that the literacy rate is the percentage of literates to population aged 7 years and above. Female literacy in the district at 46.7 per cent in the 2001 Census against 59.6 per cent observed for the State shows the backwardness of the district.

Work Participation Rate :

Total workers in the district are 135,904 (73,398 males and 62,506 females). In rural areas there are 128,165 workers (67,252 males and 60,913 females) as against to 7,739 workers in urban areas (6,146 males and 1,593 females). In the district for every 100 male workers there are 85 female workers. In urban areas of the district there are only 26 female workers as against 91 such workers in rural areas for every 100 male workers. Moreover, 47.0 per cent of rural population is worker in contrast to 33.8 per cent urban population. Participation in work by sex in rural and urban population is as following:

Category of Workers	Urban female	Urban male	Rural female	Rural male	Total female	Total male
Other Workers	71.4	94.9	4.7	29.2	6.4	34.7
Cultivators	26.2	4.0	91.7	67.0	90.1	61.7
Household Industry Workers	2.0	0.9	1.5	1.6	1.5	1.6
Agricultural Laborers	0.4	0.2	2.1	2.1	2.0	2.0

It may be noted that the percentage share of female cultivators is pronounced vis-à-vis male cultivators among respective total workers of the sexes. In rural areas 67 per cent male workers are cultivators as against 91.7 per cent of female workers. Similarly, in urban areas 4.0 percent of male workers are cultivators while 26.2 per cent of female workers are cultivators. In rural as well as in urban areas the share of female Other Workers is lower in comparison to male Other Workers. As high as 45.7 per cent of rural female population is worker while such urban female population is 16.5 per cent. The share of main and marginal workers in rural and urban areas is as following:

Rural/ Urban	Share of Main Workers	Share of Marginal Workers
Rural	84.0	16.0
Urban	93.5	6.5

The better economic prospects in urban centers are indicated in above statement. The worker position of females in contrast to males is evident in the following statement:

Proporation of female workers as Main Workers	Proportion of male workers as Main Workers	Proportion of female workers as Marginal Workers	Proportion of male workers as Marginal Workers
80.8	87.7	19.2	12.3

The picture of workers and non-workers in the district are as shown below:

Total population	Total workers	Total non-workers
295013	135904	159109

Main Workers and Marginal Workers in the Total Workers are as following:

Total Workers	Main Workers	Marginal Workers
135,904	114,842	21,062

Total Workers in the four categories are as provided below:

Total workers	Cultivators	Agricultural labourers	Household Industry workers	Other Workers
135,904	101,607	2,705	2,075	29,517

Distribution of male and female non-workers is placed below:

Rural/ Urban	Male Non Workers	Male Population	Female Non Workers	Female Population
Rural	71,485	138,737	72,445	133,358
Urban	7,133	13,279	8,046	9,639

Towns in the district

There are three towns in the district, Uttarkashi, Barkot and Gangotri.Gangotri (Nagar Panchayat) was treated as town (Notified Area) for the first time in 1991. Barkot (Nagar Panchayat) was treated as town for the first time in 1981 and continuing as such in 1991and 2001 Censuses. At the 1991 Census Uttarkashi (NPP) was the most populous town in the district followed by Barkot (NP) and Gangotri (NP). At the 2001 Census Uttarkashi (NPP) has a population of 16,218 (9,267 males and 6,951 females). Barkot (NP) is populated by 6,095 persons (3,434 males and 2,661 females) and Gangotri (NP) has only a population of 605 (males 578 and females 27).

(viii) Brief analysis of PCA data

At the 2001 Census Uttarkashi district throws up a vivid picture of its population by varying parameters.

A few peculiar characteristics of the population of the district are being highlighted through the following inset tables.

TABLE - 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001			Total	Rural	Urban	1991	2001
		Total	Rural	Urban	Total	Rural	Urban					
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Puraula	51,060	51,060	0	62,794	62,794	0	23.0	23.0	0.0	0.0	0.0
2	Rajgarhi	50,196	46,982	3,214	62,274	56,179	6,095	24.1	19.6	89.6	6.4	9.8
3	Dunda	81,504	81,504	0	100,130	100,130	0	22.9	22.9	0.0	0.0	0.0
4	Bhatwari	56,949	42,902	14,047	69,815	52,992	16,823	22.6	23.5	19.8	24.7	24.1
	District Total	**239,709**	**222,448**	**17,261**	**295,013**	**272,095**	**22,918**	**23.1**	**22.3**	**32.8**	**7.2**	**7.8**

Table 1 gives tahsilwise percentage decadal variation in the population during the last decade 1991-2001 alongwith the percentage of urban population for last two censuses.

The percentage decadal variation for urban population during 1991-2001 has been lower in Bhatwari tahsil than that the rural variation of the tahsil. In Rajgarhi tahsil, the urban percentage decadal variation has been high, but even then the percentage of urban population in the district has increased only slightly over the 1991 population.

TABLE - 2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial Number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages	Population 500-999

Table-2 gives distribution of inhabited villages by population size ranges. Out of 682 inhabited villages 44.3 per cent are in the population size of 200-499. The share of this population size villages is least in Puraula CD Block and highest in Mori CD Block among all CD Blocks. There is no village in the

district with 5,000 and above population. The maximum number of inhabited villages in the district is in Naugaon CD Block, whereas minimum is in Purala CD block.

TABLE - 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL
(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE - 4

DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	39	5.7	10,259	3.8
11-20	3	0.4	41	0.0
21-50	16	2.3	1,535	0.6
51-100	49	7.2	10,615	3.9
101-200	153	22.4	43,573	16.0
201-300	104	15.2	41,102	15.1
301-500	150	22.0	62,758	23.1
501 +	168	24.6	102,212	37.6
Not known	0	0.0	0	0.0
District Total:	**682**	**100.0**	**272,095**	**100.0**

Population Density (Rural) of the district: 171.7

Table 4 reveals densitywise number of villages and their population. The highest proportion is in 501+ range, while lowest proportion is in 11-20 range.

TABLE - 5

SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	918	943	668	1,015	1,015	-
1911	907	944	585	1,026	1,026	-
1921	915	902	547	1,035	1,035	-
1931	913	948	604	1,017	1,017	-
1941	907	953	570	976	976	-
1951	940	990	669	993	996	759
1961	947	995	695	964	977	517
1971	940	990	721	899	915	579
1981	939	987	767	881	909	571
1991	937	982	810	918	939	683
2001	962	1,007	845	941	961	726

Note : Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows that sex ratio in the state lie in the range of 907 to 962 during the census years 1901 to 2001. Highest sex ratio of 962 is observed in the year 2001. The rural areas of the state accounted sex ratio of 902 in 1921 to 1007 in 2001 whereas in the urban areas it ranged from 547 in the year 1921 to 845 in the year 2001. The sex ratio in the state did not follow a definite trend. At the district level, a favorable sex ratio was existing from 1901 to 1931 and thereafter it declined. The rural part of the district followed the trend in the total population upto the census year 1941 as there were no urban units in the district. Since 1951, the urban sex ratio lie in the range of 517 to 759, but the most interesting fact is that sex ratio in the urban areas has been less than the rural areas.

TABLE - 6
SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Puraula	947	947	
2	Rajgarhi	939	958	775
3	Dunda	1,019	1,019	
4	Bhatwari	835	879	709
	District Total	**941**	**961**	**726**

Table 6 gives sex ratio by tahsils, 2001. The sex ratio in rural areas of the district is greater (961) than in urban areas (726). Among tahsils Dunda has highest rural sex ratio (1019) as against lowest in Bhatwari (879). The sex-ratio in Bhatwari and Rajgarhi tahsils is below district level.

TABLE - 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Mori	935
2	Puraula	964
3	Naugaon	961
4	Dunda	995
5	Chinyalisaur	1,051
6	Bhatwari	888
7	Forest Villages	627
	District (Rural) Total:	**961**

Table 7 gives sex ratio of community developments blocks. The returns for the district rural accounted to 961 females per thousand males. Highest sex ratio is observed in CD Block Chinyalisaur while lowest lie in CD Block Bhatwari. Among six CD Blocks only in Bhatwari and Mori the sex ratios are below 961 at the district level.

TABLE - 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	27	4.0	6,461	2.4
700-749	5	0.7	7,741	2.8
750-799	18	2.6	8,087	3.0
800-849	45	6.6	20,306	7.5
850-899	69	10.1	28,063	10.3
900-949	96	14.1	37,629	13.8
950-999	101	14.8	45,976	16.9
1000-1099	199	29.2	82,389	30.3
1100+	122	17.9	35,443	13.0
District Total:	**682**	**100.0**	**272,095**	**100.0**

Sex ratio (Rural) for District: 961

Table 8 gives sex ratio of rural population of the district by ranges at the 2001 Census.Out of 682 inhabited villages in the district, in 199 villages (29.2 per cent), the sex ratio range is 1000-1099. In about 62 per cent of villages the sex ratio is 950 or above. These villages form about 60 per cent of the total rural population in the district. As against this the share of villages having a sex ratio of below 800 is only about 7 per cent, with percentage population of such villages being about 8 per cent in the total rural population of the district.

TABLE - 9
SEX RATIO OF URBAN AGGLOMERATIONS (INCLUDING CONSTITUENT UNITS)/ TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Barkot	NP	775
2	Gangotri	NP	47
3	Uttarkashi	NPP	750

Sex ratio (urban) for the district 726

Table 9 gives sex ratio of Urban Agglomerations/ Towns at the 2001 Census. The female population at the holy town of Gangotri is uniquely in low proportion.

TABLE - 10
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial Number	Name of Tahsil	Total/ Rural/ Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Male	Female	
1	2	3	4	5	6	7
1	Puraula	Total	11,381	5,691	5,690	1,000
		Rural	11,381	5,691	5,690	1,000
		Urban	0	0	0	0
2	Rajgarhi	Total	10,971	5,737	5,234	912
		Rural	10,106	5,248	4,858	926
		Urban	865	489	376	769
3	Dunda	Total	17,337	8,901	8,436	948
		Rural	17,337	8,901	8,436	948
		Urban	0	0	0	0
4	Bhatwari	Total	10,069	5,290	4,779	903
		Rural	8,193	4,242	3,951	931
		Urban	1,876	1,048	828	790
District Total		**Total**	**49,758**	**25,619**	**24,139**	**942**
		Rural	**47,017**	**24,082**	**22,935**	**952**
		Urban	**2,741**	**1,537**	**1,204**	**783**

Table 10 depicts sex ratio of population in the age-group 0-6 for tahsils of the district at the 2001 Census. As against the sex-ratio of general rural population at 961 it is 952 in the age-group 0-6 the rural population. As against this situation in the rural population, in the urban population it is somewhat better. As compared to a sex ratio of 726 in the towns of the district, it is 783 for the 0-6 age-group urban population in the district. The sex-ratio for 0-6 age-group population is lower in Rajgarhi and Bhatwari tahsils in comparison to the district level figure.

TABLE - 11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Mori	6,231	3,106	3,125	1,006
2	Puraula	4,707	2,362	2,345	993
3	Naugaon	10,438	5,407	5,031	930
4	Dunda	9,458	4,838	4,620	955
5	Chinyalisaur	7,822	4,042	3,780	935
6	Bhatwari	8,087	4,199	3,888	926
7	Forest Villages	274	128	146	1,141
District (Rural) Total:		**47,017**	**24,082**	**22,935**	**952**

The Table 11 presents sex ratio for 0-6 age group for CD Blocks. The sex ratio for the rural areas of the district for this age group is 952. Highest sex ratio of 1,006 lies in CD Block Mori and lowest of 926 in CD Block Bhatwari among all the CD Blocks. In comparison to the district level figure sex-ratio for 0-6 age group is lower in CD Blocks Bhatwari, Naugaon and Chinyalisaur.

TABLE - 12

SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	117	17.2	4,199	8.9
700-749	23	3.4	2,090	4.4
750-799	46	6.7	3,435	7.3
800-849	44	6.5	2,979	6.3
850-899	55	8.1	5,460	11.6
900-949	45	6.6	4,785	10.2
950-999	32	4.7	3,559	7.6
1000-1099	107	15.7	8,126	17.3
1100+	213	31.2	12,384	26.3
District (Rural) Total	**682**	**100.0**	**47,017**	**100.0**
Sex ratio (Rural) for District:		952		

Table 12 depicts sex ratio of rural population in the age group 0-6 by ranges. As much as 26.3 per cent of population pertain to the villages with sex ratio range of 1100+ and the lowest proportion of 4.4% of population pertains to the range 700-749. In highest percentage (31.2) of villages, the sex ratio range is 1100+.

TABLE - 13

SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS(INCLUDING CONSTITUENT UNIT)/ TOWNS, 2001

Serial number	Name of UA/ Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Barkot	NP	865	489	376	769
2	Gangotri	NP	2	1	1	1,000
3	Uttarkashi	NPP	1,874	1,047	827	790
	District(Urban) Total		**2,741**	**1,537**	**1,204**	**783**

Table 13 gives sex ratio of the population in the age-group 0-6 in the towns of district. The sex-ratio in two of the three towns is below 800. In Gangotri town, the population in the age-group 0-6 being only 2, one male and one female residing there, the sex ratio is exactly 1,000. The sex ratio of general urban population is 726 as against to 783 in the age group 0-6. But in case of Barkot, while general sex ratio is 775 it is only 769 for 0-6 age-group.

TABLE - 14

NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

Table 14 gives share of scheduled castes/tribes in tahsils of the district at the 2001 Census. About 23 per cent of the district population is composed of scheduled castes, while only about 1 per cent are scheduled tribes. In rural areas of the district about 23.6 per cent population is of scheduled castes community, which comes down to about 14.5 per cent in urban areas. The proportion of scheduled castes is lowest at 12 per cent in Bhatwari tahsil and highest at about 30 per cent in Puraula tahsil.

TABLE - 15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

District Total:		**272,095**	**64,148**	**2,449**	**23.6**	**0.9**

Table 15 presents number and percentage of scheduled castes and scheduled tribes population in CD Blocks. The percentage of scheduled castes population comes to 23.6 percent at the district level (rural). It is highest at 34.0 per cent in CD Block Puraula and lowest at 11.3 per cent in Bhatwari. In respect of scheduled tribes the highest is at 1.6 per cent in case of CD Block Bhatwari and nil proportion in Chinyalisaur among all the CD Blocks.

TABLE - 16
PROPORATION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5

District Total	**682**	**100.0**	**64,148**	**100.0**

Table 16 gives proportion of scheduled castes population to total population in the villages of the district at the 2001 Census. As high as 15 per cent villages in the district do not have scheduled caste community. But in about 13 per cent of villages the proportion of scheduled castes community is above 50 per cent. Such villages form about 23 per cent of the total scheduled castes population of the district. In maximum number of villages (19.2 per cent) the percentage range of Scheduled Castes population is from 11 to 20.

TABLE - 17
PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5

76 and above	1	0.1	502	20.5
District Total	**682**	**100.0**	**2,449**	**100.0**

Table 17 gives proportion of scheduled tribes population to total population in villages of the district at the Census 2001. Out of total inhabited 682 villages in the district in 619 villages there are no scheduled tribes population. There is one village in the district which has 30.1 per cent of the total scheduled tribes population.

TABLE - 18
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWN, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Barkot (NP)	6,095	937	19	15.4	0.3
2	Gangotri (NP)	605	5	0	0.8	0.0
3	Uttarkashi (NPP)	16,218	2,377	217	14.7	1.3
District (Urban) Total		**22,918**	**3,319**	**236**	**14.5**	**1.0**

Table 18 shows number and percentage of scheduled castes and scheduled tribes population recorded during 2001 census in district Uttarkashi. The table depicts that scheduled castes population in Barkot and Uttarkashi is around 15 per cent but very low (0.8 per cent) in Gangotri town. Scheduled tribes population is negligible in the urban areas of the district. There is no scheduled tribes population in Gangotri town. Highest percentage (1.3) of scheduled tribes population is recorded in Uttarkashi (NPP)

TABLE - 19
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C.D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Mori	931	500
2	Puraula	998	809
3	Naugaon	955	597
4	Dunda	996	1,048
5	Chinyalisaur	1,016	500
6	Bhatwari	917	1,022
7	Forest Villages	753	846
	District (Rural) Total	**972**	**907**

Table 19 gives the sex ratio among scheduled castes and scheduled tribes in CD Blocks at the 2001 census. The sex ratio among the scheduled castes is highest in Chinyalisaur CD Block, while it is lowest in Bhatwari. In respect of scheduled tribes sex ratio, it is highest in Dunda CD Block and lowest in Mori and Chinyalisaur CD Blocks. The scheduled castes sex ratio is lower than 972 in Bhatwari, Mori and Naugaon CD Blocks. Similarly, the scheduled tribes sex-ratio is lower than 907 in Mori, Chinyalisaur, Naugaon and Puraula CD Blocks.

TABLE - 20
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Barkot (NP)	948	267
2	Gangotri (NP)	0	0
3	Uttarkashi (NPP)	873	887
Sex ratio (Urban) for the district:		**891**	**815**

Table 20 presents sex ratio among scheduled castes and scheduled tribes in the towns of district Uttarkashi. As per 2001 census sex-ratio of 891 females per 1000 males has been recorded in the district for scheduled castes and 815 for scheduled tribes. Among towns, sex-ratio for scheduled castes is reasonably good at 948 in Barkot town but low at 873 in Uttarkashi town. As against this, sex-ratio for scheduled tribes is higher (887) in Uttarkashi (NPP) and very low (267) in Barkot (NP).

TABLE - 21

Table 21 gives number and percentage of literates and illiterates by tahsils of the district at the 2001 Census. As much as about 66 per cent population in the district is literate while this proportion in urban areas is about 87 per cent. The gap in male-female literacy rate is higher in rural areas in contrast to urban areas. Only Bhatwari tahsil has literacy rate well above the district level. The female literacy is lowest at Puraula tahsil, while the gap in male-female literacy rate is highest in Dunda tahsil. The graph (6) shows percentage of literates in rural and urban areas by sex in the district.

TABLE - 22
NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of CD block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates

61-70	228	33.4	90,897	33.4
71-80	113	16.6	51,961	19.1
81-90	26	3.8	27,018	9.9
91-99	5	0.7	1,361	0.5
100	4	0.6	49	0.0
District Total:	582	100.0	272,095	100.0
Literacy rate for District:		65.7		

Table 23 gives distribution of villages in the district by literacy rate ranges at the 2001 Census. The villages with maximum proportion of population and number have literacy range from 61 to 70 percentages. The majority of villages have literacy ranges 51-60, 71-80, 41-50, 31-40 and 81-90 apart from 61-70 as indicated above.

TABLE - 24
NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Barkot (NP)	4,428	2,784	1,644	1,667	650	1,017	84.7	94.5	71.9	22.6
2	Gangotri (NP)	526	516	10	79	62	17	87.2	89.4	38.5	51.0
3	Uttarkashi (NPP)	12,522	7,641	4,881	3,696	1,626	2,070	87.3	93.0	79.7	13.3
District (Urban) Total		**17,476**	**10,941**	**6,535**	**5,442**	**2,338**	**3,104**	**86.6**	**93.2**	**77.5**	**15.7**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. In respect of absolute figures of literates, Uttarkashi town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (86.6 per cent). The literacy rate is quite high (above 90 per cent in two towns) among males. Female literacy rate is not far behind in the above two towns (above 70 per cent). However, literacy rate among females is very low (38.5 per cent) in Gangotri town, thus the gap in male-female literacy rate is also very high (51) in that town.

TABLE - 25
NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate

Table 25 gives number and percentage of scheduled castes literates and illiterates by sex in CD Blocks of the 2001 census. Among 6 CD Blocks in the district the number of literates is less than illiterates in 4 CD Blocks. About 56 per cent of the community is literate and there is a big gap of about 35 per cent in male and female literacy rates. The highest (69.3 per cent) literacy is in Bhatwari CD Block as against lowest (42.3 per cent) in Mori CD Block. The proportion of literate is below the district level in CD Blocks Mori, Naugaon and Chinyalisaur. The gap in male/female literacy rate is highest (39.7 per cent) in Chinyalisaur CD Block and it is over the district level in Naugaon as well.

TABLE - 26
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	7	1.2	56	0.1
1-10	7	1.2	468	0.7
11-20	8	1.4	416	0.6

District Total:	**579**	**100.0**	**64,148**	**100.0**
Literacy rate for District (Rural):			**55.8**	

Table 26 presents the distribution of villages by literacy rate ranges for scheduled castes population at the 2001 census. In majority of inhabited villages which form about 31 per cent of total rural scheduled castes population the literacy rate range is 51 to 60 percent. In the district there are 579 inhabited villages with scheduled castes population with about 56 per cent of literacy rate.

TABLE - 27
NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of UA/ Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Barkot (NP)	603	364	239	334	117	217	76.8	89.4	63.2	26.2
2	Gangotri (NP)	5	5	0	0	0	0	100.0	100.0	0.0	100.0
3	Uttarkashi (NPP)	1,647	987	660	730	282	448	80.6	89.3	70.3	19.0
District (Urban)		**2,255**	**1,356**	**899**	**1,064**	**399**	**665**	**79.6**	**89.4**	**68.3**	**21.1**

Table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns at the 2001 census. The number of illiterates is less than literates in the district (urban) and towns. The percentage of literates is least in Barkot among 3 towns. The males in all the 3 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Uttarkashi town and also the female literacy rate is highest in this town.

TABLE - 28

Table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is less than literates in the district and CD Blocks, with exception to Chinyalisaur CD Block. The literacy rate of the scheduled tribes population at about 77 per cent is higher than the corresponding rate of only about 56 per cent in case of scheduled castes community. The gap in male and female literacy rates at about 26 per cent is also lesser than what it is in case of the scheduled castes community (about 35 per cent). The literacy rate is highest in Naugaon CD Block and lowest in Chinyalisaur CD Block.

TABLE - 29
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	4	6.3	8	0.3
1-10	0	0.0	0	0.0
11-20	1	1.6	6	0.2
21-30	0	0.0	0	0.0
31-40	1	1.6	5	0.2
41-50	3	4.8	15	0.6
51-60	1	1.6	140	5.7
61-70	4	6.3	156	6.4
71-80	5	7.9	1,361	55.6
81-90	10	15.9	586	23.9
91-99	3	4.8	64	2.6
100	31	49.2	108	4.4
District Total:	**63**	**100.0**	**2,449**	**100.0**
Literacy rate for District (Rural):		77.4		

Table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 census. In the district the scheduled tribes population is found in 63 villages out of which in 31 villages the literacy range is 100 per cent. However, the maximum (about 56 per cent) of the scheduled tribes population (1,361) is found in only 5 villages with literacy range from 71 to 80 percentages.

TABLE - 30

NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWNS POPULATION, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Barkot (NP)	17	13	4	2	2	0	100.0	100.0	100.0	0.0
2	Uttarkashi (NPP)	155	90	65	62	25	37	83.8	94.7	72.2	22.5
	District (Urban)	**172**	**103**	**69**	**64**	**27**	**37**	**85.1**	**95.4**	**73.4**	**22.0**

Note: Gangotry (NP) has nil population of scheduled tribes.

Table 30 gives number and percentage of scheduled tribes literates and illiterates by sex in urban agglomerations/town population at the 2001 census.There is small scheduled tribes population in two towns of the district. In Gangotri town there is no scheduled tribes population.In between Barkot and Uttarkashi towns which have scheduled tribes population, the percentage of literates is 85.1, and 95.4 per cent of males and 73.4 per cent of females are literates.The gap in male/female literacy in Uttarkashi town is 22.5 per cent.

Table 31 gives number and percentage of main, marginal and non-workers by sex in tahsils of the district at the 2001 Census. In the district 46.1 per cent of the total population is total worker in which about 38.9 per cent are main workers and rest are marginal workers. Among main workers, majority is of males. Except in Bhatwari tahsil, in all tahsils of the district females outnumber males among the marginal workers.The maximum percentage of non-workers are in Bhatwari tahsil (57.9) while minimum in Puraula (50.9).

				(45.7)	**(91.7)**	**(2.1)**	**(1.5)**	**(4.7)**

Note: Percent of workers to total workers are given in brackets for category of workers

Table 35 gives distribution of workers by sex in four categories of economic activity in CD Blocks of the district at the 2001 Census. Total workers in the rural areas of the district form 47.1 per cent of the population, but Cultivators are 78.8 per cent and Other Workers 17.6 per cent. The proportion of female population returned as Cultivator is as high as 91.7 per cent. As against this the proportion of female population returned as Other Workers is only 4.7 per cent as compared to 29.2 per cent in the case of male population. The proportion of Workers in Mori and Naugaon CD Blocks is well above the proportion

prevailing at the district level. The proportion of Cultivator is highest in Naugaon CD Block and least in Bhatwari CD Block. On the other hand, the proportion of Other Workers is highest in Bhatwari CD Block and lowest in Naugaon CD Block.

TABLE - 36
DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA / Town	Persons / Males / Females	Total population	No. and percentage of total workers (Main +	Category of workers

Note : Percent of workers to total workers are given in brackets for category of workers

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district Uttarkashi. Figures in the table has been given for total number of workers including Main and Marginal Workers. At the district level, urban areas recorded highest percentage of Other Workers (90.1%), followed by Cultivators with 8.6 per cent (4.0 per cent males and 26.2 per cent females). If we observe each town, the table reveals that highest percentage of Cultivators (22.9) is recorded in Barkot (NP). In the Agricultural Labourers category Barkot and Uttarkashi recorded very low percentages (0.2 each) while Gangotri town has no Agricultural Labourers. Household Industry Workers are also very low (0.9 per cent in Barkot, 1.3 per cent in Uttarkashi and 0.3 per cent in Gangotri). As the usual trend recorded in the urban areas, Other Workers are in high percentages (99.7 per

cent in Gangotri, 94.3 per cent in Uttarkashi and 75.9 per cent in Barkot).

(ix) Brief analysis of the Village Directory and Town Directory data :

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE - 37
DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of CD block	Number of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 gives distribution of villages according to availability of different amenities. The table indicates that about 96 per cent villages have access to improved drinking water, about 84 per cent villages have power supply and about 28 per cent villages can be approched through pucca road. About 82 per cent villages have some type of educational facility. Puraula CD Block is lagging behind others in respect of availability of different amenities in the district.

TABLE - 38

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 gives number and percent of rural population served by different amenities. The power supply is available to about 90 cer cent of population, improved drinking water supply facility to about 98 per cent of population and approach by pucca road to about 39 per cent population. Some sort of educational facility is available to about 93 per cent of population. The educational facility is least available in Puraula among the CD Blocks, while power supply in Mori CD Block.

TABLE - 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1 Education :				
(a) Primary School	103	21	1	125
(b) Middle School	352	85	7	444
(c) Degree College	43	58	578	679
2 Medical:				
(a) Hospital	221	217	203	641
(b) PHC	77	124	473	674
3 Post Office	366	157	32	555
4 Telephone	81	101	392	574
5 Bus Service	230	208	56	494
6 Banks				
(a) Commercial Bank	185	207	261	653
(b) Cooperative Bank	101	143	428	672
7 Agricultural Credit Societies	258	235	140	633

The Table 39 gives distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available. Out of 125 villages not having primary schools only 1 village avails this facility beyond 10+ kilometres and 21 villages from 5-10 kilometres as against 103 villages availing within 5 kilometres. Among the most lacking amenities in villages are degree colleges, PHCs, co-operative banks, commercial banks, hospitals and agricultural credit societies. Amenities which are enjoyed by majority of villages, in majority within 5 kilometres are primary school, middle school, hospital, post office, bus service and agricultural credit societies. Amenities in respect of which majority of villages avail from beyond 10 kilometres are degree colleges, PHCs, telephone, commercial banks and co-operative banks.

TABLE - 40
DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

Note: percentages are given in brackets

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 gives distribution of villages according to population range and amenities available. The above table clearly shows that more the population of a village, more are the amenities there.

TABLE - 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Mori	91	32480.5	18.7	9.9
2	Puraula	77	9516.6	28.4	39.4
3	Naugaon	184	27955.7	31.9	9.2
4	Dunda	119	18775.0	28.8	28.1
5	Chinyalisaur	101	13496.5	40.2	15.1
6	Bhatwari	93	14049.4	33.1	13.4
7	Forest Villages	17	42183.0	0.0	0.0
	District Total:	**682**	**158456.7**	**20.9**	**16.5**

Table 42 gives distribution of villages according to land use. Only 20.9 per cent of total area is cultivable in the district. The extent of cultivable area is highest (40.2 per cent) in Chinyalisaur CD Block and least (18.7 per cent) in Mori CD Block among all the CD Blocks of the district. Only 16.5 per cent of cultivable area is irrigated in the district. The proportion of irrigated area in the district is highest (39.4 per cent) in Puraula CD Block and lowest (9.2 per cent) in Naugaon CD Block among all the CD Blocks.

TABLE - 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt (Rs.)			Per capita expenditure (Rs.)					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	V Barkot (NP)	222	45	177	126	98	8	8	0	12
2	VI Gangotri (NP)	473	8	465	950	109	50	707	0	84
3	IV Uttarkashi (NPP)	471	67	404	453	29	77	335	0	12
District Average		404	59	345	379	50	58	257	0	14

Table 43 presents per capita receipt and expenditure in statutory towns as well as for the district. It can be seen that at district level per capita receipt (Rs. 404) is slightly more than per capita expenditurte (Rs. 394). The pattern is almost same in all the towns except gangotri (NP) where per capita receipt (Rs. 473) is almost half of per capita expenditure (Rs. 950). It is evident that receipt from taxes is less than that of from all other sources in the towns als well as in the district. The maximum expenditure is observed on public works.

TABLE - 44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Barkot (NP)	16.4	8.2	1.6	4.9	1.6
2	Gangotri (NP)	0.0	0.0	0.0	0.0	0.0
3	Uttarkashi (NPP)	4.3	1.8	1.2	1.2	0.6
District Average		7.4	3.5	1.3	2.2	0.9

Table 44 states the availability of different type of educational institutions in the statutory towns per 10,000 population. It is observed that at district level there are 7.4 primary, 3.5 Junior Secondary/middle, 1.3 Secondary/matriculation, 2.2 Senior Secondary schools and 0.9 colleges are vailable for per 10,000 population. Availability of primary schools is 7.4 per 10,000 population. As far as the towns are concerned all the towns have eductaional institutions of one or other type except Gangotri (NP), where neither type of educational institute is available.

TABLE -45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Barkot (NP)	16
2	Gangotri (NP)	0
3	Uttarkashi (NPP)	121
	Distrct Average	90

Table 45 states number of beds in medical institutions per 10,000 population. This returns 90 beds in case of the district. But above statement does not suggest that the bed facility is quite good in the towns too because in Gangotri (NP) there in no bed in the medical institutions.

TABLE - 46
PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
Not Applicable as there are no slums in the towns of the district				

TABLE - 47
MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Barkot (NP)	NA	Apple, Potato, Peas
2	Gangotri (NP)	NA	Food grains, Cloths, Utensils
3	Uttarkashi (NPP)	Woollen clothes	Potato, Apple, Wool

Table 47 shows that the most important commodity manufactured in Uttarkashi (NPP) is woollen clothes while commodities exported out of towns are apple, potato, peas, wool, food grains and utensils.

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Censys of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each Census.Based upon data collected in the Houselist, a few tables on the use of census houses, materials of wall, floor and roof etc. are prepared.In 1991 census, the Houselist was considerably expanded with 22 items of information. Again in 2001 Census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by households etc., have been added in the Schedule. The district-wise tables have been prepared and some of these are described below. The following is the distribution of households by number of rooms occupied.

TABLE - 48

HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure Status	Number of dwelling households	Number of households								
		Total			Scheduled Caste			Scheduled Tribe		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11
Owned	No exclusive room	440	403	37	139	125	14	36	35	1
	One room	9,431	9,108	323	3,534	3,394	140	160	158	2
	Two rooms	16,889	16,166	723	5,298	5,123	175	238	235	3
	Three rooms	7,416	7,075	341	1,578	1,523	55	118	118	0
	3+ rooms	13,419	12,927	492	2,101	2,051	50	188	173	15
	Median number of rooms	2	2	2	2	2	2	2	2	4
Rented	No exclusive room	105	81	24	31	24	7	23	23	0
	One room	3,059	2,029	1,030	576	418	158	110	94	16
	Two rooms	2,762	1,573	1,189	352	206	146	62	49	13
	Three rooms	352	198	154	36	21	15	13	11	2
	3+ rooms	167	98	69	23	19	4	7	7	0
	Median number of rooms	2	1	2	1	1	2	1	1	2
Others	No exclusive room	83	71	12	25	21	4	3	3	0
	One room	1,248	980	268	274	220	54	13	12	1
	Two rooms	1,427	1,229	198	207	192	15	16	16	0
	Three rooms	447	389	58	60	51	9	9	8	1
	3+ rooms	123	96	27	16	15	1	5	4	1
	Median number of rooms	2	2	2	1	2	1	2	2	4
	District Total	**57,368**	**52,423**	**4,945**	**14,250**	**13,403**	**847**	**1,001**	**946**	**55**

Data source: Census of India 2001, H-series: "Tables on Houses, Household Amenities and Assets."

Table 48 shows that households having owned tenure status occupy highest place among the total households. The number of households with one room accounted to 13,738 (23.9 per cent) out of the total 57,368 households in the district as compared to 39.0 per cent at all India level. The households with two rooms form 36.7 per cent whereas households with three rooms are 14.3 per cent and 23.9 per cent households are with more than 3 rooms. About 83 per cent of the households have own dwellings and only about 11.0 per cent households live in rented houses.

In the district during 1991 census among total households of 46,995 in the district 83.3 per cent had owned houses. 13.2 per cent lived in rented houses and 2.6 per cent were other than owned or rented as compared to 83.0 per cent, 11.2 per cent and 5.8 per cent respectively at the 2001 Census. Among scheduled castes and scheduled tribes the owned tenure constituted 88.8 per cent and 73.9 per cent of households respectively at 2001 Census. The proportion of households living in rented dwellings is 49.9 per cent in urban areas as against only 7.6 in rural areas. In contrast to this owning households are only 38.7 per cent in urban areas as against 87.1 per cent in rural areas. The proportion of other tenures are proportionately about twice (11.4 per cent) as much in urban areas as compared to rural areas (5.3 per cent).The proportion of households living in one room in urban areas is 32.8 per cent as against 23.1 per cent in rural areas.

TABLE - 49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary
1	2	3	4	5	6	7	8	9	10	11
	Uttarkashi	**90.9**	**7.5**	**1.6**	**90.5**	**7.9**	**1.6**	**94.8**	**3.9**	**0.0**
1	Puraula	67.5	26.0	6.5	67.5	26.2	6.3	0.0	0.0	0.0
2	Rajgari	95.0	4.2	0.8	94.8	4.4	0.8	96.7	2.5	0.0
3	Dunda	98.6	1.4	0.0	98.6	1.4	0.0	0.0	0.0	0.0
4	Bhatwari	95.4	3.9	0.7	95.8	3.7	0.5	94.2	4.3	1.5

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note: Permanent : Permanent houses refer to those houses whose walls & roof are made of permanent materials i.e. where burnt bricks, G.I. sheets or other metal sheets, asbestos sheets, stone or concrete is used for wall and tiles slate, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks lime and stone and RBC/RCC concreate are used for roof.

Temporary : Temporary houses refer to those houses whose walls and roof are made of temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood.

Semi Permanent : Semi permanent houses refer to those houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

The percentage distribution of households as shown in Table 49 reveals that more than 90.0 per cent of the households in the district have permanent houses. The trend is almost similar in the rural (90.5 per cent) and urban areas (94.8 per cent) of the district. Among tahsils, highest proportion of permanent houses is in tahsil Dunda (98.6 per cent), followed by in Bhatwari (95.4 per cent) and Rajgarhi (95.0 per cent) and lowest in Puraula (67.5 per cent). In respect of semi-permanent houses, the proportion is 7.5 per cent at district level whereas among tahsils, in Puraula it is 26.0 per cent and lowest being at 1.4 per cent in Dunda tahsil. Rural areas represented a similar ratio at district and tahsil level but semi-permanent houses in the urban areas are in the proportion range of 2.5 to 4.3 per cent and temporary houses in the district lie at insignificant proportion in the district and tahsil.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Bathroom means bathroom within the house

$ Toilet means toilet within the house

@ Drainage means colsed and open drainage

Table 50 shows that out of total households of the district about 29 per cent of the households have improved drinking water.The proportion of households with improved drinking water in rural and urban area is about 24 and 82 percent, respectively. Tahsil Bhatwari has highest proportion of households in respect of improved drinking water in rural (49.6%) as well as in urban areas (84.0 %). Electricity is available to 48.9 per cent households (44.9 per cent rural and 91.1 per cent urban) at district level. Bhatwari tahsil has better access to electricity facility (81.3 per cent). Bathroom and toilet facilities are available to 28.7 per cent and 32.8 per cent households. Tahsil Puraula is poorly served in respect of these facilities. Drainage facility is available to 32.3 per cent households at district level. Tahsil Bhatwari topped all tahsils in matter of all facilities.

TABLE - 51

NUMBER AND PERCENTAGE OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note : - Percentages are given in brackets.

It is observed from Table 51 that 69.7 per cent of households in the district use firewood as fuel for cooking the proportion in the rural as well as in urban areas is 75.8 and 5.4 respectively. LPG (cooking gas) has been reported as fuel for cooking in 24.2 per cent of the households, the composition of rural and urban comes to 18.6 per cent and 83.4 per cent, respectively. The use of Kerosene is negligible in the district. The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas, etc., ranges between 0.0 to 3.7 per cent of the consuming households in the district. The pattern of fuel used for cooking follows the same trend in tahsil (rural areas) where predominant fuel is firewood. The table shows that firewood, LPG (cooking gas) and kerosene are the predominant fuels for cooking in the district.

At the 1991 census predominant type of fuel used for cooking was firewood. Among 47,085 households, 36,665 households used firewood, 4,615 households used kerosene and 3,805 households used LPG.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Note : - Percentages are given in brackets.

It is revealed from Table 52 that out of the total 57,368 households in the district Uttarkashi at the time of Houselisting, only 61.4 per cent households enjoyed banking services while the percentages of those having availability of specified household assets such as radio and transistor, television, telephone, bicycle, scooter/motor cycle/moped and car/jeep/van are 47.8, 25.8, 5.3, 2.7, 3.2 and 1.4 respectively.

The proportion of households availing banking services at tahsil level, is highest in tahsil Bhatwari (74.9 per cent) and the lowest in tahsil Puraula (41.3 per cent). Among the household assets, radio and transistor's availability is in range of 42.3 to 50.4 per cent of households in tahsils against television being with 50.1 per cent (highest) of households in tahsil Bhatwari and 10.4 per cent (lowest) of households in tahsil Puraula.

(xi) Major Social and Cultural Events, Natural and Administrative Developments and significant activities during the decade

The district is endowed with forests, pine, deodar, fir, spruce, kharshu, birch, junipers as well Alpine forests enrich the economy of the district. Extension of television network with approximately 1800 sets is a cultural event during the last ten years. Three relay towers have been stationed at Uttarkashi, Gangotri and Bhatwari. A major earthquake occurred in the district on 20th October 1991 at 1.57 A.M. in which nearly 1.53 lacks of population suffered in one or other way. About 653 person and 1386 animals were killed and about 5663 persons were seriously injured during this natural calamity. Houses of 14544 families were completely and of 21221 partially damaged. Various festivals are celebrated by all the communities with great enthusiasm irrespective of their religions such as Diwali, Dashehra, Maha Shivratri, Ram Navami, Janmastami, Basant Panchmi, Makar Sankranti, Holi etc., mainly by Hindus and Id-ul-fitar, Idul-ul-juha, Shab-e-baraat, etc., by Muslims. Christmas, Easter and Good Friday is celebrated by Christians. Besides above, important fairs held at various places from time to time are enjoyed by people irrespective of caste, creed or community.

(xii) Brief description of Places of Religious, Historical or Archaeological importance in Villages and Places of Tourist Interest in the Towns of the District

Bhaironghati :

It is about 80 km away from district headquarters, falling in Bhatwari tahsil at the confluence of the two streams of Ganga and Bhaironghati. Tradition has it that after leaving the matted hair of 'Lord Shiva' the Ganga followed King Bhagirath and came to this place but disturbed the sage Jahnu, in the middle of a sacrifice. Incensed at this Jahnu drank up the whole current of water but when propitiated by Bhagirath, allowed it to emerge through his ears and to continue on its course. The small temple of Bhairon and Shakti is at this place. Pilgrims take rest enroute to Gangotri.

Dharti :

This place lies in Bhatwari tahsil. It is said that Bhagirath did penance here. During winter, the image of Goddess Ganga is brought down from Gangotri to this village for worship. It is situated on the banks of the Bhagirathi about 63 km. from district headquarters.

Gangari :

It is a place of pilgrimage on way to Gangotri and Yamunotri. There are hot springs and tanks believed to receive their supply of water through an underground channel from the outer side of the mountain. Tradition has it that when the sage Yamun, who used to take a bath in both Ganga and Yamuna became too weak due to old age to walk to river for his bath prayed to Ganga. The river appeared near his hermitage from the tank to enable him to perform his ablutions. There is a temple which has idols of both Goddesses Ganga and Yamuna.

Gangani :

Gangani lies in Bhatwari tahsil and the temple here is dedicated to sage Jamdagni near which, there is a hot water spring. Pilgrims going to Gangotri take bath in this tank.

Gangotri :

It is one of the great centers of Hindu pilgrimage and stands on the bank of the river Bhagirathi known as Ganga. It is said that it was first place where Ganga came down to the earth. The source of the river is at Gaumukh, 18 km away from Gangotri. According to tradition Shankaracharya installed the idol of Bhagirathi, Yamuna and Laxmi here. There is a great slab of stone in the bed of the river which is dedicated to Bhagirath whose efforts are said to have brought the Ganga down from the heaven. The place is held in great reverence by Hindus. The temple dedicated to Bhagirath is small one and opens for pilgrims after first week of May and shuts down by middle of November. Near Gangotri is Kedar Prayag, the confluence of Bhagirathi and Kedar Ganga. A short distance down stream, the former falls into Gauri *Kund*. It is believed that there is a *lingam* in the *Kund*. The holy water of the river is collected before it falls into the Kund for the use at the worship of Shiva at Rameshwaram located in South India.

Gaumukh :

This place is 109 km. from district headquarters and one of the sources of the Bhagirathi. It is also the name given to a cave formed by junction of 15 glaciers which has appearance of a cow. The terrain of Gaumukh from Gangotri is very difficult but it is considered as one of the most important center of pilgrimage in India. It is visited by many pilgrims, *jogis* and *sanyasis*. The natural scenery of the place is magnificent.

Nakuri :

It is a small village situated on the right bank of Bhagirathi. It is the junction of the routes to Yamunotri and Gangotri. Temple of Renuka Devi, the mother of Parsuram is widely worshiped in this part of Himalayas.

Uttarkashi :

It lies on the right bank of Bhagirathi. It is also known as Soumya (modest) Kashi or Soumya Varanasi. It is a place where Duryodhan planned to kill the five Pandavas by housing them in a house of lac and then setting fire to it but they managed to escape. The place is the northern most of the five Kashis in India. Like Varanasi, it is also a town of temples, dedicated to Shiva under the name of Vishwanath and is visited by pilgrims every year. The town has a number of *ashrams* and *dharmshalas*.

Yamunotri :

It is a famous pilgrim center on the banks of Yamuna which lies at 131 km. from the district headquarters. Here the current of the river turns to northwards giving it the name Yamunotri or Yamnotri. The special feature of Yamunotri is its numerous hot springs of varying temperatures where pilgrims take bath. In some of the springs the water is so hot that rice and potatoes are cooked by pilgrims in the spring water. These springs are associated with twelve *rishis* who followed Mahadeo (Shiva) from Lanka to Yamnotri. The Yamnotri temple is dedicated to Goddess Yamuna.

(xiii) Major Characteristics and Contribution of the District

Uttarkashi district sprawls in the extreme north-west corner of the state over an area of 8,016 sq. kms. in the rugged terrain of the mystic Himalayas. On its north lie Himachal Pradesh State and the territory of Tibet and the district of Chamoli in the east. The district is named after its headquarters town Uttarkashi, an ancient place with rich cultural heritage and as the name suggests is the Kashi of north (Uttara) held almost as high a veneration as Kashi

of the plain (Varanasi). One of the holiest Ghats in Uttarkashi is Manikarnika so is the one by the same name in Varanasi (U.P.). The terrain and climate of Uttarkashi district provide uncongenial physical environment for human settlement.

The land of Uttarkashi has been held sacred by Indians since ages: this is where the seers and sages found solace and performed penance. The Vedic language was better known and spoken here than elsewhere, and people came here to learn the language and speech. Spirituality and religion is deeply rooted in Uttarkashi and the people of the area are generally orthodox in their religious practices, which embrace the entire gamut of religious experiences. Worship of Shiv and Parvati is common and they have a number of temples dedicated to the divine couple.

The district is quite prone to earthquakes. Keeping this area's proneness to earthquakes, the government is also making efforts to train local masons in earthquake resistant construction and enforce guidelines on such construction.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 censuses has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or town is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufactured	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufacture and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note Explaining the Abbreviations used in the Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	*Indicates list of Census Towns* which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to *proportion of Scheduled Tribes to* the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

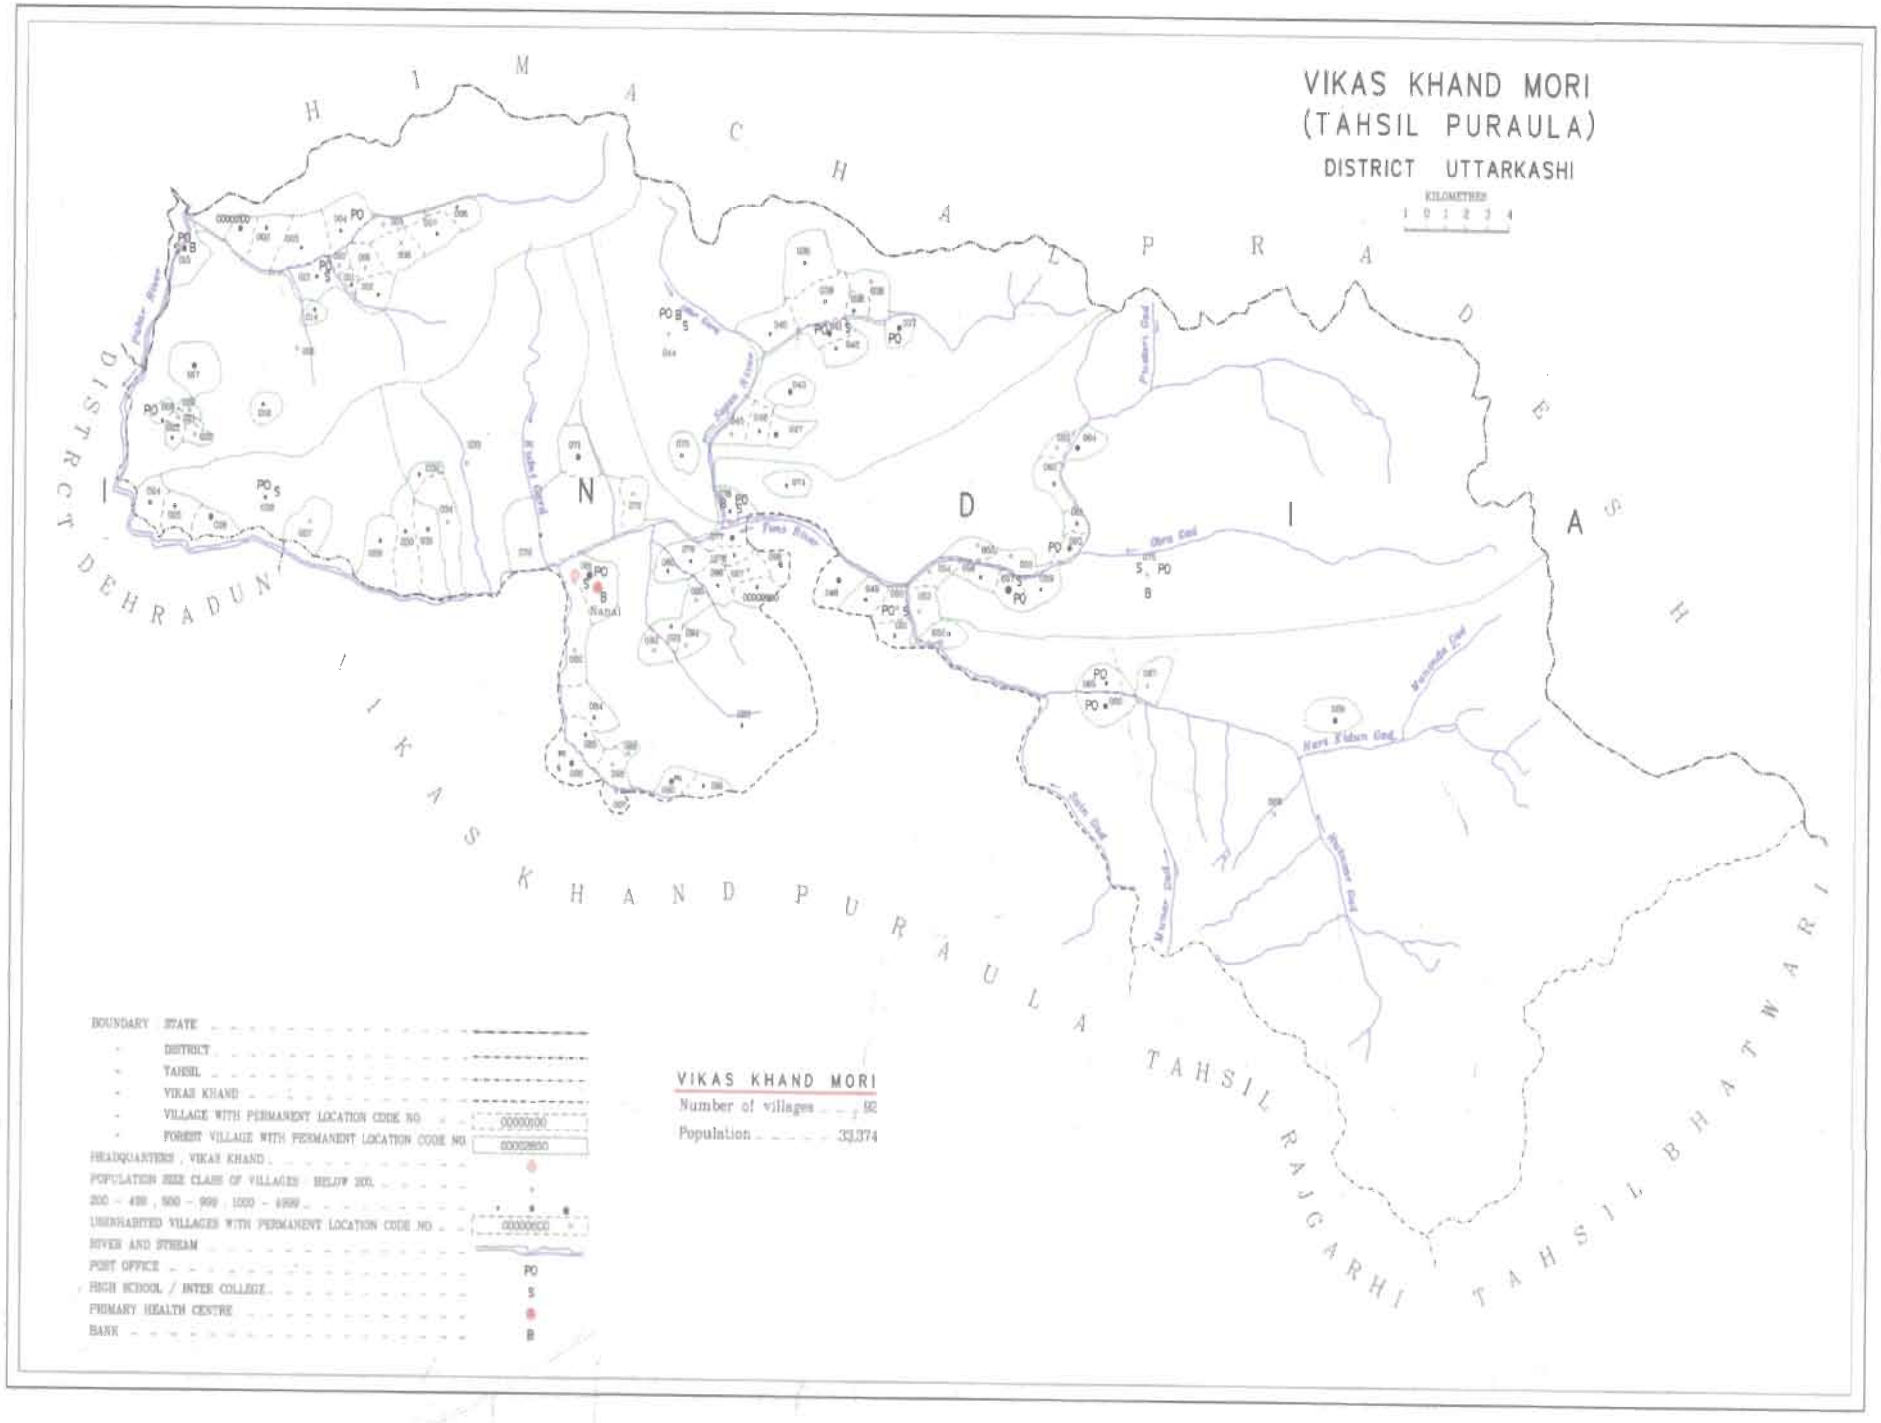

STATEMENT

LIST OF VILLAGES FULLY MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 Census.

APPENDIX VIII

NUMBER OF VILLAGES UNDER EACH GRAM PANCHYAT (C.D. BLOCK WISE)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code number		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Numbers	Location code numbers					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttaranchal due to certain reasons.

APPENDIX IX

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Name of District	Name of C.D. Block	Location Code Number	Name of Village	No. of Girls School
1	2	3	4	5

Information not available for this district

SECTION II
TOWN DIRECTORY

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation /Nagan Nigam	M. Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board /Nagar Palika Parishad	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Other columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded, respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has benn recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings, etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available, has been mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town, the name of nearest place with distance where the facility is available, has been recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee, etc.

TOWN DIRECTORY STATEMENTS (I TO VII)

STATEMENT VII

CIVIC AND OTHER AMENITIES IN SLUMS

Serial number	Class and name of town	Name of the slum	Is it notified	No. of households (approximate)	Population of the Slum (approximate)	Paved roads (in kilometers)	System of sewerage
1	2	3	4	5	6	7	8

Number of latrines				Method of disposal of night soil	No. of tap points/ public hydrants installed for supply of protected water	Electricity connections		
Private			Community			Domestic	Road lighting (points)	Others
water borne	service	others						
9	10	11	12	13	14	15	16	17

There is no slums in towns of Uttarkashi district.

APPENDIX TO TOWN DIRECTORY
TOWNS SHOWING THEIR OUTGROWTHS WITH POPULATION

Serial Number	Name of the town with location code	Population of core town	Outgrowth	Population of outgrowth
1	2	3	4	5

As no Towns having any outgrowth in the District are there, therefore the information is 'NIL'.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary

Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

The abbreviations used in the Primary Census Abstract are same as used for Town Directory.

DISTRICT
PRIMARY CENSUS ABSTRACT
(GENERAL)

ANNEXURES
I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean- age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Uttarkashi
q1	Persons	99	92
	Males	98	94
	Females	104	86
q2	Persons	117	98
	Males	117	98
	Females	118	98
q5	Persons	134	142
	Males	135	142
	Females	132	142

*(*Undivided Uttar Pradesh at 1991 Census)*

The child mortality by ages 1 and 2 years, as shown by the indicators q1 and q2, respectively, was lower in the district as against the State, but it was higher in the district by the age 5 (shown by indicator q5). The child mortality indicators in the district for females were in the improved condition as compared to the State by ages 1 and 2 years.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991

Serial number	Fertility Measures	Uttar Pradesh*	Uttarkashi
1	2	3	4
1	CBR	37.2	33.8
2	TFR	5.6	4.7
3	TMFR	6.3	5.6
4	GFR	172	152
5	GMFR	200	187
6	Mean age at Marriage (1981-91)	17.3	17.8
7	Number of Children ever born per ever married woman aged (45-49)	4.6	3.8
8	Child woman ratio 0-4 years	631	549
	-do- 5-9 years	752	654

(*Undivided Uttar Pradesh at 1991 Census)

Source: (i) Estimates of Fertility Indicators, Uttar Pradesh; Table # 2.23.
(ii) District Profile, Uttar Pradesh; 1991.

Measures of fertility are important components to describe fertility of any area. The Annexure-III reveals that the Crude Birth Rate (CBR), which is the ratio of the number of live births in a year to the mid year population, is 33.8 in the district. It is below than the state of undivided Uttar Pradesh at 37.2. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presents all along a lower rate from the state figures. The mean age at marriage during the period 1981-91 had been 17.3 years for the state whereas 17.8 years had been observed for the district. It may be observed that higher age at marriage leads to low rate of fertility. Similar trend is observed in the number of children born per ever married woman in the age group 45-49. The state and the district figures are 4.6 and 3.8 respectively. As per 1991 census, Child Woman ratio in the age group of 0-4 and 5-9 years was 549 and 654 for the district while in case of the state the corresponding figures were 631 and 752, respectively. The various measures of fertility as such were below than the state indicators.

ANNEXURE - IV

The annexure-IV shows percentage distribution of migrants as per 1991 (Annexure IV (a)) and 2001 Census (Annexure IV (b)) among total migrants in the state and district. For both the Censuses, the district figures are presented in comparison to state figures. The table is given in two parts. One is in-migrants by place of birth (in which a person is enumerated during the Census in other than the place of birth) and the other part is related to in-migrants by place of last residence (in which a person is enumerated during the Census in place other than the place of his immediate last residence). Since the state of Uttaranchal was created in 2000, the state figures for 1991 are given for Uttar Pradesh, whereas the state figures of Uttaranchal are given for 2001.

ANNEXURE - IV (a)

Percentage distribution of Migrants 2001 Census

In-migrants by Place of Birth

(*Undivided Uttar Pradesh at 1991 Census)

Note : - Percentages are given in brackets.

It is evident from the tables that percentage of in-migrants from other districts of the state was much lower for the state of Uttaranchal (35.4 per cent) in Census 2001 as compared to state of Uttar Pradesh (81.3 per cent) during 1991. However, for Uttarkashi the percentages declined slightly in 2001 (63.5 per cent) in comparison to 1991 Census (79.3 per cent). The proportion of in-migration from other states increased and recorded 57.8 per cent which was 16.2 per cent during 1991 Census, at state level. Similar trends are visible for the district where a figure for 2001 is 28.3 percent which was 10.0 percent during 1991. In-migrants from other countries in the district were 10.6 per cent during 1991 which decreased to 8.1per cent in2001.

Regarding in-migration by place of last residence for in-migration from other districts, again the figures are much lower for the state of Uttaranchal (34.9 per cent) in 2001 against 79.6 per cent for the state of Uttar Pradesh during 1991. Comparatively the figures for the district in Census 2001 recorded 57.7 per cent while it was 79.4 per cent in 1991 Census. The volume of migration from other states was 18.9 per cent in 1991 Census at the state level, which is recorded with the increased figure of 60.1 per cent in 2001 Census. Figures for the district worked out to be 10.7 per cent in 1991 and 33.9 per cent in 2001 Census. The movement of population from other countries to the district was 9.8 per cent in the district whereas the state figure was 1.5 per cent during 1991. The corresponding figures recorded for the state and district during 2001 are 5.0 per cent and 8.3 per cent, respectively.

ANNEXURE – V

Annexure – V presents the distribution of basic cultural characteristic of the population "Religion" at state, district and tahsil level. Six major religions have been dealt with separately. These are Buddhist, Christian, Hindu, Jain, Muslim and Sikh. Rests of the religions have been presented in the column titled 'other religions'. Distribution for 2001 and 1991 Censuses are presented in Annexure V (a) and Annexure V (b), respectively.

Annexure - V (a)

Brief account of main religions in the State/ Distt./ Tahsil as per 2001 Census

Source: Religion table (C-9)

(*Undivided Uttar Pradesh at 1991 Census)

Note : - Percentages are given in brackets.

A brief account of the main religions as stated in the Annexure-V (a) for 2001 census reveals that 85.0 per cent population is Hindu in the state followed by 11.9 per cent population of Muslims while the followers of other religions are negligible. At district level the pattern is almost same, but the followers of Muslim religion are very low i.e. only 1.0 per cent while under remaining four religions, the population is negligible. Almost similar trend is observed from Annexure V(b) based on 1991 Census with a slight variation. In the district only 2 persons were reported in the category of "Religion Not Stated" in 1991 while in 2001, 77 persons came under this category .

ANNEXURE - VI

Annexure-VI presents the classification of population according to marital status of different age groups for the state and district. Marital status has been classified as never married, married, widowed, divorced and separated and unspecified status. For comparative study, the figures of 2001 and 1991 Census have been shown in Annexure VI(a) and VI(b), respectively.

Source: Part - IV (a) Table No. C(I)

(* Undivided Uttar Pradesh at 1991 Census)

Note : - Percentages are given in brackets.

On perusal of Annexure VI (a), it is observed that male population in the category of never married constitutes 57.9 per cent for state and 55.5 per cent for the district Uttarkashi, while female population in the category of never married constitutes 48.3 for state and almost equal i.e., 48.4 percent for the district in 2001 Census. Married population in the district is 42.3 per cent for males and 45.3 per cent for females as against 39.9 per cent for males and 44.5 per cent for females in the state. Population under the category "Widowed" is 2.0 per cent for males and 8.3 per cent for females at state level. Population of Divorced, Separated and Unspecified status are negligible at state level as well as at district level. Age group wise study of marital status reveals that population and percentage of never married decreases with the increase in population while pyramidal shape is observed for married population. In the district, percentage of married population is highest (95.4 per cent) for males in the age-group 35-39 years and 96.9 per cent for females in the age-group 30-34 years while widowed population is highest in age group of 70 years and above (24.7 per cent for males and 65.4 per cent for females). Almost similar trend can be seen for the state.

It is observed that the scenario has not changed much since 1991 as far as the district figures are concerned. Percentages of never married in 1991 was 53.1 per cent for males and 45.9 per cent for females. Similarly, married population constituted 44.3 per cent for males and 48.3 per cent for females in 1991. Widowed population constituted 2.4 per cent of male and 5.8 per cent of female population in 1991. No person was reported in the category "Unspecified Status" in the state as well as in the district in 2001. However, during 1991, some persons were reported under this category. State figures of 1991 Census reveals identical trend with slight variation in percentage although state figures of 1991 Census covered undivided Uttar Pradesh which included present state of Uttaranchal.

ANNEXURE - VII

Age and sex wise education in the state and district for 2001 and 1991 censuses have been presented in the Annexure – VII (a) and (b), respectively.

Annexure-VII (a)

Note : Educational status below primary is excluded.
Source : Social & Cultural Table Pt IV A (Table # C-2)

It can be observed that percentage of illiterates has declined from 55.3 per cent for males and 80.0 percent for female in 1991 to 30.4 per cent for males and 49.6 per cent for females in 2001, respectively at the state level. Consequently, percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 per cent among males and 0.7 per cent among females in 1991 at state level, which is 1.4 per cent and 1.2 per cent in case of males and females, respectively in 2001. Similarly, primary level education was 10.7 per cent for males and 6.0 per cent for females in 1991 which rose to 16.1 and 13.9 for males and females, respectively in 2001. Middle level education was 9.7 percent in case of males and 3.7 per cent in case of females in 1991 which increased to 14.2 per cent for males and 8.8 per cent for females in 2001. Matriculation and above level was 13.5 per cent for males and 4.4 per cent for females in 1991 which rose to 23.4 per cent for males and 13.8 per cent for females in 2001.

Similar trend can be observed in the district also. In 1991, 43.9 per cent males and 80.9 per cent females were recorded as Illiterates which declined to 30.5 per cent males and 61.2 per cent females in 2001. Primary level education was 16.5 per cent in case of males and 6.1 per cent in case of females in 1991, which remained almost same i.e. 16.8 per cent in case of males and increased upto 10.3 per cent in case of females in 2001. Middle level educated males and females were 12.1 per cent and 3.1 per cent, respectively in 1991 while 15.6 per cent males and 6.6 per cent females were recorded in this category in 2001. Matriculation and above level of education was achieved by 16.0 per cent males and 3.6 per cent females in 1991 which is observed 20.4 per cent for males and 8.3 per cent for females in 2001. Primary level of education is found highest in the age-group of 7-14 years in 2001, while middle level education is highest in age group 15-19 years and the age group that has the highest percentage of matriculation and above level of education 1s 20-24 years for both the sexes.

ANNEXURE – VIII

Distribution of different mother tongues according to population with percentage as returned in 2001 and 1991 for the state of Uttaranchal and district Uttarkashi has been depicted through Annexure-VIII (a) and (b), respectively.

ANNEXURE - VIII (a)

Distribution of different mother tongues returned in 2001 Census

Source: District Profile Uttar Pradesh - 1991

(*Undivided Uttar Pradesh at 1991 Census)

Note : - Percentages are given in brackets.

It shows from Annexure-VIII (a) that mother tongue for largest population in the district is Garhwali with 82.2 pe rcent which is 24.8 per cent for the state during 2001. Annexure VIII (b) shows that during 1991 also, Garhwali was the mother tongue spoken by the largest portion (85.2 percent) of the district. Hindi as mother tongue is reported by 11.1 percent population in the district in 2001 Census followed by Nepali with 1.6 per cent. Other mother languages such as Bengali, Pahari, Punjabi, Bhotia, Bhojpuri, Kumauni, Jaunsari, Urdu, etc. are spoken by less than one percent each in the district. On the other hand, at the state level during 2001 besides Hindi and Garhwali, other important languages adopted as mother tongue are Kumauni (22.9 per cent), Urdu (5.9 per cent), Punjabi (2.8 per cent), Bengali (1.5 percent), Jaunsari (1.3 per cent) and Nepali (1.1 per cent). Rests of the languages such as Bhojpuri, Pahari, Tibetan, Bhotia, Sindhi, etc., mother tongues are of less than one percent. Since state of Uttaranchal was not separated from Uttar Pradesh in 1991, distribution of mother tongues are entirely different in comparison to 2001, where dominant mother tongue was Hindi with 82.1 per cent population followed by Urdu with 9.0 percent, Bhojpuri 5.0 per cent, Garhwali 1.3 per cent and Kumauni 1.2 per cent. However, in the district the distribution of mother tongues is almost identical with slight variations, during both the censuses i.e. during 1991 and 2001. Other languages had very low percentage as compared to the population of Uttar Pradesh.
