MOTIF

KEDARNATH TEMPLE

The temple is built of grey stone standing at the feet of the peak of Mahapantha mountain. The present temple is adorned with images and earlier an old temple of Shiva (the third deity of the Hindu trinity, the other two being Brahma and Vishnu) also existed. The *lingam* (venerated image of Shiva) here is in pyramidal form and is regarded as one of the twelve celebrated Shiva temples in the country. The Rawal (priest) is a member of the Lingayat (Virashaiva) sect originating from Karnataka. Since 1948 a committee runs the temple management. The shrine is closed on the first day of Kartika (October-November) and is re-opened in Vaisakha (April – May). It is one of the famous sacred pilgrim centers in the state of Uttaranchal. The temple of Kedarnath is said to be more than thousand years old. The temple is magnificent in its style and architecture. The temple has a "*garbha griha*" (inner-most shrine of a Hindu temple) for worship and *mandapam* (temple-porch) for assemblies of pilgrims and visitors.

Annexure VII Age, Sex and Education in the District, 1991 and 2001 Census 354
Annexure VIII Distribution of Different Mother Tongues Returned in 1991 and 2001 Census 355

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision of Shri Mohd. Ahmad, Assistant Director. I am also thankful to Shri Shailendra Singh Negi, S.I. Grade-I, Shri S.K. Banerjee, S.I. Gr. II and Shri U.G. Jhingran, S.I. Gr. III who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map)and Shri J.P. Purohit, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. Rudraprayag district ranks 12 in terms of population in the Uttaranchal state.
2. Rudraprayag is the least urbanised district in the state with 1.2 percent of the population in urban areas.
3. Rudraprayag district has low population density of 115 persons per sq.km. which is less than the state average of 159 persons per sq. km.
4. Rudraprayag district ranks second in terms of sex ratio which is 1115 and is above than the state average of 962 females per one thousand males.
5. Rudraprayag district ranks 6th in literacy (73.7 per cent) above than the state average of 71.6 percent.
6. There are only 33 un-inhabited villages out of total 691 villages in the district.
7. Decadal growth rate of the district is 13.4 percent which is lower than the state average of 20.4 percent.
8. The district has only two tahsils namely, Rudraprayag and Ukhimath and two towns Kedarnath (NP) and Rudraprayag (NP). No new town has been added after 1991 census and none has been declassified.
9. Rudraprayag tahsil has the highest number of villages 443 and Ukhimath tahsil has the lowest number of villages 248.
10. There are 47,539 households in the district with an average household size of 4.8.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in two parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in two parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items was also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM; hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

Rudraprayag district came into existence on 18th September 1997. The district was carved out of Rudraprayag and Ukhimath tahsils of district Chamoli, sub-tahsil Jakholi of Tehri Garhwal district and some parts of district Pauri. Till 1997 the district was the part of districts Chamoli and Tehri.

The early history of the district may be traced out from the parent districts of Chamoli and Tehri Garhwal. According to legends, the Himalayan country is said to be constituted of five divisions, among which one is Kedar Khand specifically dealt with in the Kedar Khand section of Skand Puran; where it is said; "it surpasses all the Tirthas and it is a land where nature stands personified". The district lies within this division and the area covered formed the part what was known as Garhwal. Initially Bhils, Yaksh, Kinnar, Garh, Kol, Gandharv, Kirat and

Soka inhabited the area of the present district and thereafter by the Kolasur, Banasur, Mahisasur and Hiranakashyap. All of them hailed from the group Asur who succeeded wild tribes to flee away from this place. Consequently, Hiranakashyap conquered the throne at Pankhanda. His forefather, Banasur was the king of Pankhanda along with Mandakini valley. It is also believed that Ravana worshiped Shiva by offering ten heads in the Vairaskund of Dasholi; because of that the area was named Dasmauli and later on Dasholi. In the Brahmanism times, Rajrishi Brahman and priest emerged in the region but they were dominated by the Aryans like Tirthu, and Puru Varsh. Aryans were defeated by tribes in the epic times and they ruled the entire area known as Panchal. This place was known as Land of Gods in that era. Owing to battle of Kurukshetra Panchal was bifurcated and known as Northern and Southern regions of Ganga. After conquering the Northern region King Drupad included it in the Kaurvas kingdom while the southern part remained with King Drupad during 126B.C. The present area of the district was under the domination of Sak. Nag dynasty ruled the area of present district during 3rd century. Nag raja Ganpati of Vidisha constructed Gopeshwar temple. Chandra Gupta II ruled during 4th century A.D. and developed many pilgrim centres as well as temples. The folk song of the region envisages that it was under the domain of Hun during 5th century A.D. Khus represented the area from 7th to 11th century A.D.

The Katyuri dynasty ruled the area from 12th to 15th century, but onwards frequent dynastic changes took place. Each of the Chand dynasty of Kumaun and Pal dynasty of Garhwal had a long chain of kings nearly lasting till 12th century A.D. Anek of Halla dynasty of Nepal conquered the area (Kedar Bhumi). At the time of Ajai Pal, i.e.1358 A.D. the region appears to have enjoyed local freedom and every Chief had independent jurisdiction over his own territory. Ajai Pal (1358-70) consolidated the whole country under his sway and extended it from the Himalayas to Chandi near Hardwar and from Yamuna to Bandhan in the district Chamoli and the name of the country changed from Kedar Bhumi to Garhwal during his rule. The region appears to have enjoyed peace under the Raja of Garhwal till the time of Dula Ram Sah during whose reign Rudra Chandra (1565-1597), a Kumaun ruler advanced into this district through Katyuri valley which was held by Sukhal Deo.

Pawa dynasty ruled the present area of the district from 16th to 18th century A.D. After the death of Kanak Pal, Ajai Pal was bestowed the crown of Garhwal state. The post of chief priest at Joshimath was up-graded as kingship and the estates Chandpur, Deoalgarh and Shree Nagar were established. They ruled Shree Nagar till Gorkhas attacked the reign. Gorkhas ruled from the period 1804 to 1915 defeating Garhwali rulers and also they followed the policy of exploitation. The development of the area was ceased owing to this policy. In order to defeat Gorkhas, Garhwali rulers sought help from British Govternent. After their defeat the area of the present district was handed over to British to administer the area, who then included it into Almora. The British ruled the region from 1815 to 1947. Gair Sain was made tahsil headquarters but during 1944, tahsil headquarter was shifted to Chamoli. Civil disobedience movement was introduced against British Government in 1930.The Quit India Movement was also launched during 1942. In 1947, the area along with the country won independence from British rulers. The district was part of the district Chamoli from 1960 to 17 September, 1997.

(iii) Administrative Setup

The district lies in the north west of newly created state of Uttaranchal situated in the Himalayas. The headquarters of the district is at Rudraprayag existing at the confluence of the rivers Alaknanda and Mandakini. The district comprises of two tahsils namely Rudraprayag and Ukhimath and a sub tahsil Jakholi. There are three development blocks namely Ukhimath, Agastmuni and Jakholi. Rudraprayag and Kedarnath are Nagar Panchayats. There are 691villages of which 248 lie in Ukhimath and remaining 443 in tahsil Rudraprayag.

District level officers pertaining to various departments are District Magistrate, Additional District Magistrate, Sub-Divisional Magistrate , District Judge, Superintendent of Police, Chief Development Officer, District Development Officer, Assistant District Development Officer, Chief Medical Officer, Treasury Officer, District Rural Development Authority, District Inspector of Schools, Regional Tourist Officer, District Employment Officer, District Horticulture Officer, District Informatics Officer (NIC, Govt. of India), District Information Officer (State Govt.), General Manager (Distt. Industry), District Election Officer, Distt. Public Relation Officer, Distt. Economic and Statistics Officer, Assistant Director Small Scale Industries, District Forest Officer, Distt. Forest Officer (Soil Conservation), DFO (Logging), Additional Forest Conservator (Forest Division), Commandant (Home Guards), Executive Engineer, (Jal Nigam), Executive Engineer, (Electricity Distribution Division), Superintendent Engineer, (Public Works Department,) Executive Engineer, (Public Works Department-Pauri division), Executive Engineer (Rural Engineering Services), Executive Engineer (Irrigation), Executive Engineer (Mandi Parishad), SDO, (Power House) etc.The district is newly created after 1991 census. An area of 196.9 Sq Km from Ukhimath tahsil and 424.9 Sq Km from Rudraprayag tahsil of district Chamoli ,45.9 Sq Km i.e. 72 villages from tahsil Pauri of district Garhwal and 168 villages which means that 112.6 Sq Km from tahsil Deoprayag of district Tehri Garhwal form the new district. One town from the district Chamoli has also been transferred to this district.

JURISDICTIONAL CHANGE 1991-2001

Name of Dist./ Tahsil	Notification No./ Date	1991 Territorial	Area Added

			(ii) 72 Villages from Tah. Pauri Distt. Garhwal	45.9	10,994
	- do-		(iii) 168 villages transferred from tahsil Dev Prayag of District Tehri Garhwal	1,12.6	59,897

(iv) Physical Feature

Location & Size

District Rudraprayag is part of Kumaun Himalaya-North. It lies in the extreme north of newly created state of Uttaranchal covering an area of 1984 sq km, out of which 484 sq km is covered by forests.The district falls under the administrative jurisdiction of Garhwal division. It lies between the 29° 55' 37" to 31° 27' 3" north latitude and 78° 54' 3" to 80° 2' 3" east longitude. The minimum height from the mean sea level is 670 meters at Rudraprayag whereas maximum is 3886 m at Tungnath. In north, west, south and east sides of the district Rudraprayag, the districts Uttarkashi, Tehri Garhwal, Garhwal and Chamoli surround it respectively. The district is bifurcated into valleys and mountains.

Physiography

On the basis of geology, soil, topography climate and natural vegetation the district has been divided into following natural regions –

Greater Himalaya

The region of the greater Himalaya as delineated in the district is bounded by Mandakini and Kedarnath glaciers. It is a high altitude region having height between 4000 to 7817 meters from the mean sea level and is covered with snow cap. The region consists of series of glacier garlanded peaks namely Kedarnath, Mandakini and the utmost pious and religious place of worship for Hindu's, Kedarnath is situated in the region.

Mandakini Basin

The region is situated in the middle of the district

and covers the catchments of the river Mandakini. It is bounded by greater Himalaya in the north and Alaknanda Basin in the south east. The height of the hill range, ranges to 2000-4306 m. from the sea level. The hill ranges are covered by fairly dense forests mainly of oak and pine trees. Mandakini Ganga, Vasuki Ganga and Madhyamaheshwar Ganga are the main tributaries of Mandakini which flow in deep narrow gorges.

Alaknanda Basin

This region spreads over the southern part of the district bounded by the lesser Himalaya in East and Mandakini Basin in the North. Towards South of Alaknanda, a series of high hill ranges forms a mountainous topography that consists of crest of the ridges with steep and gentle slopes, falls and valley bottoms. Most of the area is covered with mixed jungle of pine and banj, having the height range 600-2200 meters from the sea level.

Drainage

Main rivers of the district are Alaknanda and Mandakini, flowing from north east to south. The other tributaries to Mandakini are Madhyamaheshwar, Magani etc. These rivers originate from glaciers thus the continuous flow remains through out the year. Deoria Tal is worth seeing place for pilgrims and tourists. It is 6 km away from Ukhinath and Nandi Kund is another place of tourist attraction with Gauri Kund having hot water sources.

Climate

The climate of the district is irregular in nature. It is very cold during winters and moderately hot, especially in valleys during summer but nights are always pleasant. The temperature in the valleys is relatively high. Maximum temperature in the district during 1998-99 touched 31.3° C while a minimum of 2.0°C was recorded. The actual average rain recorded in the above period was 1,427 mm. The intensity of rain is in July and August. Winter rains are very frequent in the district. Rain accompanied by northerly and westerly winds usually breaks earlier than in the plains and the heavy rains and showers damage soil and cause erosion. The relative humidity is high during the monsoon season generally exceeding above 70 percent on the average. After monsoon the humidity comes down to approximately 30 percent. Sky is generally clear except monsoon duration when it is heavily clouded. Wind characteristics depend on the nature of terrain in the district but there is a tendency for diurnal reversal of winds.

Natural Economic Resources

Forestry

Rich forests are available in the district. It covers more than 20 percent of the geographical area of the district and this ratio is quite reasonable for eco balance. Mixed jungles along with Himalayan ranges comprise pine teak, sheesam, sal, tur, banj, burash, khair and ringal. Medicinal plants are also available in the district, efforts are on way to strengthen social forestry and development of plants having medicinal values. Mass plantation and soil conservation are the priority items in the district plan. Among animals lion, tiger, wild pig, black Himalayan bear, dears and wild dogs are most common. The other wild animals seen in the district are hyena, jungle cat, wolf, jackal and mountain fox.

Minerals and Mining

Except sandstone no other mineral deposits are available in the district.

Soil

The soil in the district may be divided into three categories. The red soil, found on the slopes and ridges of the hills and generally sandy is greyish when dry and reddish on getting moist. The brown soil found in the forests and in the fields near the forests, varies in colour from brown to dark brown depending on the quantity of organic matter contained therein. The podsol soil, clayey in texture is found generally in all the terraced fields.The nature of soil in the valley is alluvial and red in colour. At a particular height alluvial soil is found. Terrace farming is prevalent in the district because of sloping terrain. Soil erosion takes place perpetually because of steep hills.

The types of soils which are met with in the district are usually the same as are found in the hilly areas viz., the gravel sand, sandy loam, clayey loam, heavy clay and calcareous soils. The red, grey, brown and dark brown soils are also found in different parts of the district. The district being mostly hilly the altitudes vary from place to place. From the agricultural point of view regions with an altitude between 914m. and 2438m. are important.

Land and Land Use Pattern

Cultivated land is generally classified as talaon (irrigated), first class upraon (dry), second class upraon and ijran (inferior terraced land cultivated intermittently). Talaon is also divisible into two classes-sera, where the water–supply is perennial, fields are level, soil is alluvial and fertile and panchar where the water-supply is irregular and fields are not level being situated on a higher elevation and have less fertile soil than sera lands.

During the year 1998-99 out of the total area of 202682 hectares, 87314 hectares was under forest. Usar and area not cultivtable for cultivation 28.6 percent while the land utilized in other uses was 3.1 percent. Uncultivated land was 5.8 percent, orchards 3.8 percent, gardening 6.2 percent and net area sown was to the limit of 9.1 percent.

Tenancy

After the enforcement of the Kumaon and Uttarakhand Zamindari Abolition and Land Reforms Act, 1960, the old land tenures were abolished. This Act replaced the multiplicity of tenures existing in the region by three types: the bhumidhar, sirdar and asami. The intermediaries became bhumidhars in respect of groves held by them. Those who were hissedars (shareholders) and khaikars became bhumidhars in respect of lands in their actual possession. A sirdar has a permanent and heritable interest in his land holdings but can use his land only for agriculture, horticulture and animal husbandry, although he can acquire bhumidhari rights under the provisions of the Act. An asami's right is heritable but not transferable or permanent and he can be ejected from his holdings.

Agriculture and crop pattern

Level land being very scarce, cultivation is generally in terraced fields. Continuous plough over a number of years, hard and sustained labour and large investment are needed to construct and maintain the terraces. Boulders, stones and pebbles are built into a wall as the lower field becomes nearly level. This process takes a number of years, the land assuming the shape of a fine terraced field in course of times as a result of plough, diluvium and the action of weather. The least neglect in the proper maintenance of the field results in the overgrowth of thorny bushes, wild berries and other scrubby vegetation ruining the whole field. Cultivation on katil or khil land is done intermittently after burning the scrub jungle on steep hills. Generally the land is regularly cultivated but the period of fallow allowed between the harvests is so long that the land becomes almost as fertile as virgin land. This long gap between two harvests is necessary for the recuperation of the fertility of the land as the fields are untraced and suffer from the scouring action of rain, wind and floods, the manure being provided only by the ashes of the scrub burnt in the field before its preparation for the next sowing.

As in the plains, the hill areas also have three harvests, Kharif, Rabi and Zaid. But the climate being cooler in the hills the crops need a longer period to ripen. As a result they are sown somewhat earlier and reaped later than in the plains. In the Kharif, the main crops grown are paddy, mandua, kaundi, jhangora, maize and potato. Chuwa or phaphar (amaranth) is a common crop in the northern part of the district and it is the only Kharif crop grown at levels higher than 1,830 m. above the sea-level. In the lower regions tur (a kind of pulse) takes the place of arhar of the plains with which it resembles. It is sown in March and reaped with other Kharif crops. In the Rabi, wheat, barley, *masur*, mustard and rape-seed are the chief crops grown. Generally Rabi crops are sown from October to November and the harvesting lasts from the end of April to the middle of May or even later in the fields situated on higher altitudes. In the still higher snow-covered valleys which are close to the glaciers, a fine species of wheat, locally known as Napal, is grown as Kharif crop. The seed is sown when the snow begins to melt in May or early June and harvested in November.

Other important crops grown in the district are ugal (buckwheat) used by the Hindus on fast days, Turmeric, Cauliflowers, Pinalu, yams, brinjal, pumpkin, mint and water-cress. During the year 1998-99, out of the total area of 28017 Hectares paddy was practiced upon 31.7 percent, Sawan, 6.9 percent, Barley 3.8 percent, Mandua 22.7 percent and wheat 34.9 per cent. The Rabi crops have been practiced upon 38.2 percent of the total cultivable area and that of Kharif in 61.8 percent. Rajma, Soybean and

Ramdana have emerged as new crops and aspirant farmers in the district are practicing these crops. Among horticultural fruits, orchard belts of Rudraprayag and Joshimath comprise of apples, pears, peaches, cherries and some other fruits that are being developed on scientific lines in the district.

Irrigation

Irrigation is the key to agriculture development but owing to topography of the district, mostly peasants have to depend upon nature. The main sources of irrigation are tank, canal, high drums and guls. In the place near snow ranges and in the vicinity of the rivers, sufficient moisture is obtainable for the crops and along the river side also. Irrigation network covers 3984 hectares, out of which the net area irrigated in the district has been 1999 hectares. Out of this 995 hectares was irrigated through canals and irregation by other sources comprised of 1004 hectares. Among minor irrigation sources 9.21 km. long guls, 6 hauzes and 1 high drum have been constructed and further 66 hectares of land have been added in the irrigated area.

Animal Husbandry

The cattle census of 1993 establishes the number of bovine 37664, buffaloes 11695, sheep 36972, goats 11128, ponies 254, pigs 3016 and 15683 poultry birds and other animals accounted for 3016 heads. Ponies are good for riding and command high prices. Buffaloes are preferred to cows for milk production. Goats and sheep are reared for the table and wool. Now-a-days poultry farming has become important in the district with increasing demand for poultry products. The state government makes arrangement for supply of birds to those intended in poultry farming. One government poultry extension centre is operational at Ukhimath. In order to look after livestock there are 11 hospitals, 25 Cattle Development Centres, 2 artificial insemination centres and 10 artificial incrimination sub-centres in the district. Rudraprayag district is potentially poor in respect of fisheries. The nature of terrain is totally hilly. There are no ponds or lake, where this activity may be undertaken. Potentiality for the development of fisheries is on way. Fishes are fished by means of nets, baskets traps and wires.

Industry

Pace of industrialization in the district Rudraprayag is very slow. After the creation of new district in 1997 the District Industries centre is yet to be established in the district. However the entrepreneurs are being trained at District Industries centre, Chamoli. Small scale industries mainly pertain to production of wool, baskets, mats, logging, paddy husking and flour milling. Large number of persons is engaged in the single industry, i.e., up-rooting of trees and sawing sleepers to make them float down in the rivers up to Karnprayag during summer, and from there they are transported to Dehradun. Baskets of different types from ringal and some drugs from medicinal herbs, are also manufactured at small scale. The district is rich in different kinds of timber. More than 900 persons are employed in 421 small scale units in the district during the year 1999-2000.

Trade and Commerce

About a couple of decades ago the district was enjoying trade relations with Tibet. Bhotias carried out trade in order to meet out their livelihood. During the last 50 years trade relations have been restricted to neighbouring districts of the state and Himanchal Pradesh, Haryana and Delhi. Trading system is three tier i.e. from plains to district and then to nearby towns and villages. The important commodities imported are salt, sugar, food grains, medicines, cloths etc. while herbs, timber, resin, woolen goods, handicrafts, honey, basket and hemp are exported.

Transport

Being hilly district there is no railways. Rishikesh is the nearest railway station which is 142 km away from the district headquarters. Kedarnath and other ancient pilgrim centers are located in the district where huge number of pilgrims and visitors come to the district for the religious and tourism purposes. Public Works Department maintains 666.8 km of roads whereas 30 km in by Borders Road Organization.Goods transportation in bulk is undertaken by the motor vehicles, Garhwal Mandal Vikas Nigam buses, government buses, matadors, jeeps and cars which ply frequently and cater to the need of passenger traffic.

Electricity and Power

Electricity is the modern day requirement. It is used for agriculture, industry, irrigation and other purposes. During the year 1999-2000 the consumption of the electricity is worked out to 11969 thousand KWH in domestic use, 965 thousand KWH in commercial purposes, 152 thousand KWH in industrial utility, 16 thousand KWH for public light and 8 thousand KWH for agricultural purposs.

Gram Panchyats and Village Development

A Gram Sabha is constituted of elected adult members amongst the villagers of the village concerned. It's Pradhan and members are elected by the adult members for a period of five years. The Up-Pradhan is elected by the elected members of the Gram Sabha. The number of Gram Sabha in the development block Ukhimath during the year 1997-98 was 57 and 173 in Augast Muni and 96 in Jakholi. Thus a total of 326 Gram Sabhas in the district control and manage the activities in respect of the welfare of villagers and their communities. These also prepare priority development plans for the growth of the villages. Members of the Gram Sabha are responsible for day to day administration. The main duties of the Gram Sabha relate to construction, repairing, cleaning and lighting of public buildings, registration of births, deaths and marriages, regulation of markets and fairs, establishment and management of common land and grazing grounds, maintenance of schools etc besides keeping in mind the goodwill amongst the villagers along with promotion of social and communal harmony.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the

pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms

are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit

but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they

professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Majhwar
28 Mazhabi
29 Musahar
30 Nat
31 Pankha
32 Parahiya
33 Pasi, Tarmali
34 Patari
35 Rawat
36 Saharya
37 Dhangar
38 Dhanuk
39 Dharkar
40 Dhobi
41 Dom
42 Domar
43 Dusadh
44 Gharami
45 Ghasiya
46 Gond
47 Gual
48 Habura
49 Hari
50 Hela
51 Kalabaz
52 Kanjar
53 Kapariya
54 Karwal
55 Khairaha
56 Kharwar (excluding Banbasi)
57 Khatik
58 Khorot
59 Kol
60 Kori
61 Korwa
62 Lalbegi
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household

and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class

V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census Findings- Population, its distribution etc.

Population Distribution

The total population of the district is 227,439, in which 224,707 persons live in the rural areas and rest 2,732 and in urban areas .The total of male population in Rudraprayag is 107,535 out of which 105,643 live in rural areas and 1,892 in urban areas. Tahsil Ukhimath has a total of 80,185 persons in which 79,703 live in rural and 482 in urban areas. In the district urban population is 1.2 per cent. There are 691 villages in the district out of which 658 are inhabited. The area of the district is 1984 square kilometers and density is 115 persons per sq. km., which in lower than the state (159).

Size-class and status of Towns

There are two towns in the district. Both the town namely Rudraprayag and Kedarnath are class VI towns. Rudraprayag has a population of 2,250 and Kedarnath 482 persons. The town Rudraprayag is situated in Rudraprayag tahsil and Kedarnath in Ukhimath tahsil.

Population Growth

The population in the district increased by 13.4 percent during the decade 1991-2001, which is lower than the state (20.4 percent). The absolute growth during the decade has been of 26,924 persons. The proportion of male population in the district is 47.3 percent and female 52.7 per cent during 2001 census.

Sex-Ratio

The sex ratio in the district is 1,115 which is above to the state level. While in the rural areas of the district the sex-ratio is 1,127 as compared to 1,007 in the state, in urban areas it is only 444, which is quite below then the state (845). In total population of Rudraprayag tahsil, the sex-ratio is 1,140, but it is 1,071 in Ukhimath tahsil. In rural areas of the tahsils, the sex-ratio is 1,152 in Rudraprayag and 1,084 in Ukhimath. The urban area of Rudraprayag tahsil has a sex-ratio of 581 as compared to 28 in Ukhimath tahsil. The rural sex-ratio of 1,127 in the district is as low as 1,049 in Ukhimath CD Block and 1,147 in Augustmuni CD Block and 1,150 in Jakholi CD Block. About 58 percent of rural poplation in the district has a sex-ratio range of 1,100+. The urban sex-ratio in the district is 444 which is as low as 28 in Kedarnath (NP) and as high as 581 in Rudraprayag (NP). The sex-ratio of population of the age group 0-6 is 953.

Work Participation

A total of about 45.0 percent in total population of the district is workers. The proportion of males as workers is about 42.0 percent and about 47.0 percent in case of females . Among workers about 33.0 percent are main workers and about 11 percent marginal workers. In total workers of 102,033 in the district 77,411 (75.9 percent) are cultivators and 22,888 (22.4 percent) are other workers.

Literacy

In total population of 227,439 in the district 141,078 persons are literates, which comes to about 74 percent. In male population the proportion of literacy is about 90 percent while it is about 60 percent in females. The literacy rates in the district are slightly better than the state. The gap in male-female literacy in urban areas is only 2 points. The rural literacy in the district is 74 percent, it is highest at 77 percent in Ukhimath and lowest at about 68 percen in Jakholi CD Block. The Literacy rate is about 66 percent in Kedarnath (NP) as compared to about 86 percent in Rudraprayag (NP).

(viii) Brief Analysis of Primary Census Abstract Data

Primary Census Abstract gives data up to CD Block/UA/City/Town level for the country and state. It contains information regarding area (in sq km), number of occupied residential houses, number of households, total population, population in age-group 0-6, scheduled caste and scheduled tribe population with male-female break up along with main and marginal workers separately by sex. Both main and marginal workers have been further classified into four broad industrial categories viz., cultivators, agricultural laborers, household industry workers and other workers and presented along with non-workers by sex. For the first time during 2001 census the Primary Census Abstract will give number of illiterates, total workers and classification of marginal workers also into four broad industrial categories. This corresponds to Union/State PCA presented separately till 1991 except inclusion of some extra features as mentioned above. However, only four fold classification of main and marginal workers will now be presented instead of nine fold categories.

TABLE - 1

DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Ukhimath	70,218	69,917	301	80,185	79,703	482	14.2	14.0	60.1	0.4	0.6
2	Rudraprayag	130,297	128,755	1,542	147,254	145,004	2,250	13.1	12.6	46.0	1.2	1.5
	District Total:	**200,515**	**198,672**	**1,843**	**227,439**	**224,707**	**2,732**	**13.4**	**13.1**	**48.8**	**0.9**	**1.2**

Note: As the district Rudraprayag was carved out from the district Chamoli in the year 1997, therefore, recasted figures have been taken for the year 1991.

The growth rates of each tahsil in Rudraprayag district for total, rural and urban areas and percentage of urban population to total population are given in Table-1. The decadal growth rate of the district is 13.4 percent during 1991-2001. The growth rates for rural and urban areas of the district are 13.1 and 48.8 percent respectively. Out of the total population of the district 99.0 percent lives in rural areas while only 1.0 percent lives in urban areas of the district. The proportion of urban population has slightly increased during the decade from 0.9 percent in 1991 to 1.2 percent in 2001 in the district. The highest growth of urban population is recorded in Ukhimath (60.1 percent) tahsil followed by Rudraprayag (46.0 per cent) tahsil. Ukhimath (tahsil) has decadal growth rate of 14.2 percent, while Rudraprayag has shown the growth rate of 13.1 percent for the total population.

TABLE - 2

NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499		Number and percentage of villages
			Persons	Males	Females		Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Ukhimath	139	45,519	22,220	23,299	64 (46.0)	2,285	2,320	43 (30.9)	6,589	6,983	25 (18.0)

	35,810	**40,348**	**27 (4.1)**	**16,592**	**18,072**	**3 (0.5)**	**4,608**	**3,887**	**0 (0.0)**	**0**	**0**	**0 (0.0)**	**0**	**0**

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range in the District. Out of the 658 inhabited villages in the district, 280 (42.6 percent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 238 villages having 36.2 percent villages of the district while in the size class of 500-999 population claims110 villages with 16.7 percent of the total villages in the district. 27 villages (4.1 percent) are in the size class of 1,000-1,999 and 3 villages (0.5 percent) are in the size class of 2,000-4,999. None of villages in the district fall in the ranges of 5,000 and above population.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL
(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	6	0.9	77	0.0
11-20	3	0.5	72	0.0
21-50	10	1.5	1,423	0.6
51-100	41	6.2	4,811	2.1
101-200	107	16.3	20,447	9.1
201-300	103	15.7	27,096	12.1
301-500	207	31.5	80,651	35.9
501 +	181	27.5	90,130	40.1
Not known	0	0	0	0.0
District Total:	**658**	**100**	**224707**	**100**

The Table shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of village i.e. 207 accounting for 31.5 percent of the total inhabited villages of the district fall in the density range of 301-500 persons having 35.9 percent of total rural population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover only 6 (0.9 percent) and 3 (0.5 percent) villages. 181 villages (27.5 percent) have very high density with more than 501+ persons per sq. km. while the corresponding proportion in the lower range of 201 to 300 is 15.7 percent of the total inhabited villages having 12.1 percent rural population of the district. In the medium density ranges of 101 to 200 and 51-100 persons account for 16.3 and 6.2 percent of inhabited villages, respectively.

Table 5 Sex ratio of State and District, 1901-2001

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	918	943	668	1027	1027	-
1911	907	944	585	1033	1033	-
1921	915	902	547	1070	1070	-
1931	913	948	604	1054	1054	-
1941	907	953	570	1047	1047	-
1951	940	990	669	1146	1146	-
1961	947	995	695	1152	1152	-
1971	940	990	721	1173	1173	-
1981	939	987	767	1120	1129	423
1991	940	982	810	1094	1104	408
2001	962	1007	906	1115	1127	444

The above table shows that acorrding to 2001 Census sex ratio of 1115 females per 1000 males has been recorded in the district as against the state average of 962. The sex ratio of the district is higher as compared to the state average figures from 1901 to 2001. The lowest sex ratio of 1027 females per 1000 males was recorded in the district during 1901 against the state figure which came to 918 in the 1901 census. The sex ratio from 1901 to 2001 in the rural areas of the district has been higher than the correspponding state figures.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Ukhimath	1,071	1,084	28
2	Rudraprayag	1,140	1,152	581
	District Total:	**1,115**	**1,127**	**444**

Table 6 shows sex ratio for total rural and urban areas at tahsil level as per 2001 census. There are 1115 females for every thousand males in the district. It becomes clear from the table that sex ratio in rural areas is very much high as compared to that of urban areas. The sex ratio among rural and urban population is 1,127 and 444 respectively. The rural sex ratio in the tahsils varies between 1,071 (in Ukhimath) to 1,140 (in Rudraprayag) in two tahsils of the district. In urban areas, sex ratio of 581 females per thousand males is recorded in Rudraprayag tahsil and 28 females per thousand males in Ukhimath Tahsil.

TABLE 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Ukhimath	1,049
2	August Muni	1,147
3	Jakholi	1,150
	District (Rural) Total:	**1,127**

Table 7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 1,127 females per 1,000 males, as a whole. Among the three C.D. blocks the highest sex-ratio of 1,150 females is found in Jakholi C.D. block and is followed by 1,147 in August Muni while the lowest of 1049 is recorded in Ukhimath C.D. block. The sex-ratios of Jakholi and August Muni C.D. blocks are higher than the district rural average of 1,127 females and in Ukhimath C.D. block, this value is below than the district average.

TABLE - 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 7	16	2.4	1,122	0.5
700-749	4	0.6	2,076	0.9
750-799	5	0.8	3,527	1.6
800-849	10	1.5	3,186	1.4
850-899	10	1.5	4,843	2.2
900-949	19	2.9	8,374	3.7
950-999	38	5.8	17,861	7.9
1000-1099	150	22.8	52,495	23.4
1100+	406	61.7	131,223	58.4
District Total:	**658**	**100.0**	**224,707**	**100.0**
Sex ratio (Rural) for District:		**1127**		

The Table 8 presents the distribution of villages by Population and sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 406 accounting for 61.7 percent of the total villages having largest aggregate population of 58.4 percent in the district fall in the sex-ratio range of 1100+ females per 1,000 males. It is followed by the sex-ratio range of 1000-1099 which claims 150 villages (22.8 percent) and 23.4 percent population. In the sex-ratio range of 900-949, there are 19 villages (2.9 percent). In remaining sex-ratio ranges of 850-899,800-849, 750-799, 700-749 and less than 700, the number of villages are 10 (1.5 percent), 10 (1.5 percent), 5 (0.8 percent), 4 (0.6 percent) and 16 (2.4 percent) respectively. In these ranges, the percentage of population is comparatively low.

TABLE - 9
SEX RATIO OF URBAN AGGLOMERATIONS/ TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Kedarnath	NP	28
2	Rudraprayag	NP	581
Sex ratio (urban) for the district 444			

The Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 444 females per 1,000 males as a whole. There are only two towns in the district namely Kedarnath (NP) and Rudraprayag (NP) having sex ratio of 28 females and 581 females per thousand males, respectively.

TABLE 10
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Ukhimath	Total	12,759	6,519	6,240	957
		Rural	12,759	6,519	6,240	957
		Urban	0	0	0	
2	Rudraprayag	Total	23,117	11,849	11,268	951
		Rural	22,826	11,693	11,133	952
		Urban	291	156	135	865
	District Total:	**Total**	**35,876**	**18,368**	**17,508**	**953**
		Rural	**35,585**	**18,212**	**17,373**	**954**
		Urban	**291**	**156**	**135**	**865**

The Table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils of the district. Total population in age-group 0-6 is 35,876 persons comprising 18,368 males and 17,508 females. The total sex-ratio in this age-group works out to 953 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 954 and 865 females respectively is this age group. The rural sex-ratio in tahsils varies between 952 in Rudraprayag tahsil and 957 in Ukhimath tahsil. There is no urban population in Ukhimath tahsil.

TABLE - 11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Ukhimath	7,588	3,856	3,732	968
2	August Muni	18,059	9,329	8,730	936
3	Jakholi	9,938	5,027	4,911	977
	District (Rural) Total:	**35,585**	**18,212**	**17,373**	**954**

The Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 954 in this age-group for the district (rural). The sex-ratio of C.D. blocks varies between 936 to 977. It is highest in Jakholi C.D. block i.e. 977 followed by 968 in Ukhimath C.D. block and lowest 936 females is found in Augustmuni C.D. block. The sex-ratio of Jakholi and Ukhimath C.D. blocks are higher than the district rural (954) while in the remaining one block, it is below to the average of the district.

TABLE - 12
SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	130	19.8	3,027	8.5
700-749	31	4.7	1,688	4.7
750-799	41	6.2	2,326	6.5
800-849	48	7.3	3,548	10.0
850-899	32	4.9	3,123	8.8
900-949	41	6.2	3,403	9.6
950-999	27	4.1	2,981	8.4
1000-1099	101	15.3	6,742	18.9
1100+	207	31.5	8,747	24.6
Total (Rural)	**658**	**100.0**	**35,585**	**100.0**
Sex ratio (Rural) for age-group 0-6 years for District			**954**	

The Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

Out of total 658 inhabited villages, 207 villages (31.5 percent) are having the largest proportion of the population (24.6 percent) in the district (rural) fall in the sex-ratio range of 1100 and above females per 1,000 males in the age-group of 0-6 years. It is followed by the sex-ratio range of less than 700 which claims 130 villages (19.8 percent) and 8.5 percent population. Next to it, 101 villages (15.3 percent) are in the range of 1,000-1,099 with 18.9 percent population. As many as 32villages (4.9 percent) having 8.8 percent population fall in sex-ratio range of 850-899. Remaining sex-ratio ranges of 700-749, 750-799, 800-849, 900-949 and 950-999 claim less number of villages and these are distributed as 31 (4.7 percent), 41 (6.2 percent), 48 (7.3 percent), 41 (6.2 percent) and 27 (4.1 percent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty percent of villages i.e. 335 having population (51.9 percent) fall in the higher sex-ratio ranges of 950 and above.

TABLE - 13
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS/ TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Kedarnath	NP	0	0	0	0
2	Rudraprayag	NP	291	156	135	865
District(Urban) Total			**291**	**156**	**135**	**865**

The Table 13 shows that there is no 0-6 age group population in Kedarnath town. In Rudraprayag town sex-ratio in the age group 0-6 is 865, which also represents the sex-ratio for the urban part of the district for the age-group 0-6 years.

TABLE - 14
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Ukhimath	Total	80,185	14,543	90	18.1	0.1
		Rural	79,703	14,521	81	18.2	0.1
		Urban	482	22	9	4.6	1.9
2	Rudraprayag	Total	147,254	25,768	96	17.5	0.1
		Rural	145,004	25,494	76	17.6	0.1
		Urban	2,250	274	20	12.2	0.9
	District Total:	**Total**	**227,439**	**40,311**	**186**	**17.7**	**0.1**
		Rural	**224,707**	**40,015**	**157**	**17.8**	**0.1**
		Urban	**2,732**	**296**	**29**	**10.8**	**1.1**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 227439 total population of the district, 17.7 percent of the total population belong to the Scheduled Castes and 0.1 percent to Scheduled Tribes. The proportion of Scheduled Castes population is 17.8 percent in rural population and 10.8 percent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Ukhimath tahsil (18.1) while the lowest is found in Rudraprayag tahsil (17.5). The proportion of Scheduled Tribes population is 0.1 and 1.1 percent in rural and urban areas, respectively.

TABLE - 15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION CD BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Ukhimath	45,519	6,182	33	13.6	0.1
2	August Muni	120,411	23,043	100	19.1	0.1
3	Jakholi	58,777	10,790	24	18.4	0.0
	District (Rural) Total:	**224,707**	**40,015**	**157**	**17.8**	**0.1**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 17.8 percent of the rural population of the district belongs to Scheduled Castes and 0.1 percent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 13.6 percent in Ukhimath and 19.1 percent in Augustmuni C.D. block. The other C.D. block containing the high percentage of Scheduled Castes is Jakholi (18.4) There are only 157 persons of Scheduled Tribe in the district.

TABLE - 16
PROPORATION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	290	44.1	0	0.0
Less than 5	61	9.3	524	1.3
5-10	45	6.8	1,312	3.3
11-20	87	13.2	6,940	17.3
21-30	72	10.9	11,547	29.9
31-40	46	7.0	7,700	19.2
41-50	25	3.8	5,150	13.9
51-75	26	4.0	5,696	14.2
76 and above	6	0.9	1,146	3.0
District Total	**658**	**100.0**	**40,015**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage. Out of 658 inhabited villages 290 villages have no Scheduled Caste population constituting 44.1 percent of total villages. The proportion of Scheduled Castes population is less than 5.0 percent in 61 villages. Only 6 villages (0.9 percent) villages are such where the proportion of Scheduled Castes is more than 75 percent. These villages contain 3.0 percent Scheduled Castes population of the district. The maximum of the 29.9 percent of the total Scheduled Castes population of the district is covered by range of 21-30 percent.

TABLE - 17
PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	634	96.4	0	0.0
Less than 5	23	3.5	118	75.2
5-10	0	0.0	0	0.0
11-20	1	0.2	39	24.8
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	**658**	**100.0**	**157**	**100.0**

The Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. Less than 0.1 percent of rural population of the district belong to Scheduled Tribes population. There are 634 (96.4 percent) villages where none of Scheduled Tribes have been recorded in the district. Out of 658 villages of the district only 24 villages have Scheduled Tribe Population. Out of these 24 villages, 23 have proportion of Scheduled Tribes population up to 75.0 percent and remaining 1 village has 25.0 percent Scheduled Tribes population of the district.

TABLE - 18
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS/TOWN, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Kedarnath (NP)	482	22	9	4.6	1.9
2	Rudraprayag (NP)	2,250	274	20	12.2	0.9
District(Urban) Total		**2,732**	**296**	**29**	**10.8**	**1.1**

The Table 18 shows that in town of the district about 11 percent of the Scheduled Castes and Scheduled Tribe population in urban agglomeration/Town in 2001. In urban area of the district Scheduled Caste and Scheduled Tribe population proportions are 10.8 percent and 1.1 per cent respectively. In two towns of the district, Kedarnath (NP) has only 9 ST population while Rudraprayag (NP) has 20 ST population. Thus, urban areas of the district has only 29 ST population which contributes 1 percent of the urban population. Rudraprayag (NP) has about 12 percent Scheduled Castes population.

TABLE - 19
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C.D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Ukhimath	1,017	435
2	August Muni	1,029	818
3	Jakholi	1,014	1,667
	District (Rural) Total	**1,023**	**805**

The Table 19 indicates Sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. Sex-Ratio among SC and ST population in the district rural are 1023 and 805, respectively. CD block Augustmuni has highest SC sex-ratio (1029) but CD block Jakholi has the lowest SC sex ratio (1014). On the other hand CD block Ukhimath has the lowest ST sex ratio (435) but CD block Jakholi has the highest ST sex ratio of 1667.

TABLE - 20

SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Kedarnath (NP)	0	0
2	Rudrapray ag (NP)	641	1,000
Sex ratio (Urban) for the district:		**566**	**526**

The Table 20 gives Sex-ratio among Scheduled Castes and Scheduled Tribes in urban agglomerations/towns of 2001 Census. There are only 22 SC and 9 ST persons in Kedarnath town and all of them are male, which means that the female population under SC and ST is zero in the town. As a result, Sex ratio of SC and ST in Kedarnath (NP) is zero. In Rudraprayag (NP) sex ratio of SC and ST are 641 and 1000, respectively. While in district (urban) sex ratio of SC and ST are 566 and 526 respectively. The main reson for smaller sex ratio of SC and ST in urban area of the district in comparison to the Rudraprayag (NP) is that in Kedarnath (NP) female population is zero but male population is not zero.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
			Number of literates			Number of illiterates						
			Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

		Urban	320	313	7	162	156	6	66.4	66.7	53.9	12.8
2	Rudraprayag	Total	89,987	50,665	39,322	57,267	18,152	39,115	72.5	88.9	58.5	30.4
		Rural	88,296	49,538	38,758	56,708	17,856	38,852	72.3	88.9	58.3	30.6
		Urban	1,691	1,127	564	559	296	263	86.3	89.0	81.5	7.5
	District Total:	**Total**	**141,078**	**80,080**	**60,998**	**86,361**	**27,455**	**58,906**	**73.7**	**89.8**	**59.6**	**30.2**
		Rural	**139,067**	**78,640**	**60,427**	**85,640**	**27,003**	**58,637**	**73.5**	**90.0**	**59.4**	**30.5**
		Urban	**2,011**	**1,440**	**571**	**721**	**452**	**269**	**82.4**	**83.0**	**81.0**	**2.0**

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 73.7 percent in the district. The proportion in rural area is 73.5 percent against 82.4 percent in urban areas. In the district the literacy rates of males (89.8 percent) is much higher than that of females (59.6 percent). Tahsil, Uhkimath has the highest literacyrates of 75.8 percent followed by Rudraprayag tahsil with 72.5 percent. It is observed that in tahsil Rudraprayag, the literacy rate in urban areas is higher than rural areas, however, in Uhkimath the position is just opposite.

The gap between male and female literacy rates in district Rudraprayag, tahsil Uhkimath and tahsil Rudraprayag are 30.2, 29.8 and 30.4 respectively This gap is lesser in urban areas of district.

TABLE - 22

NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

	District (Rural) Total	**139,067**	**78,640**	**60,427**	**85,640**	**27,003**	**58,637**	**73.5**	**89.9**	**59.4**	**31**

The table 22 shows number and percentage of literates and illiterates by sex in CD blocks and difference in male/female literacy rate in rural areas at C.D. block level in the district. More than 73.5 percent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 89.9 and 59.4 percent respectively.The table shows a wide gap of 31.0 points in male and female literacy in rural areas. At C.D. block level, Ukhimath C.D. block has the highest rural literacy rate of 77.0 percent while 92.6 percent males and 62.4 percent females are literates in this block. The lowest literacy rate in rural areas is noted in Jakholi C.D. block (67.9 percent).There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 34 points is found in Jakholi C.D. block.

TABLE - 23
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	0	0.0	0	0.0
11-20	1	0.2	8	0.0
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0

81-90	22	6.0	2,168	5.4
91-99	7	1.9	612	1.5
100	*21*	*5.7*	*94*	*0.2*
District Total:	**368**	**100.0**	**40,015.0**	**100.0**
Literacy rate for District (Rural):		**65.1**		

Table 26 gives distribution of villages by the literacy rate range for Scheduled Castes population of the 2001 Census. Out of 40,015 Scheduled Castes population in the villages of the district, 46.2 percent Scheduled Caste population live in 131 villages of the district and falls in the literacy rate range of 61-70. It is observed from the table that there are 14 SC persons distributed among 6 villages and are illeterates.

TABLE - 27
NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Kedarnath (NP)	8	8	0	14	14	0	36.4	36.4	0.0	36.4
2	Rudraprayag (NP)	200	135	65	74	32	42	87.0	93.8	75.6	18.2
	District (Urban)	**208**	**143**	**65**	**88**	**46**	**42**	**82.5**	**86.1**	**75.6**	**10.6**

The table 27 gives number and percentage of Scheduled Castes literates and illiterates by sex in town at the 2001 Census. The literacy rate in town Kedarnath is very low as compared to Rudraprayag town. In Kedarnath (NP) female SC population is zero and male literacy rate is only 36.4 percent, thus difference in male and female litracy rate in Kedarnath (NP) is 36.4. On the other hand in Rudraprayag (NP) male and female literacy rates are 93.8 and 75.6, respectively and gap in male and feamle literacy rate is 18.2. As whole the literacy rate of the district (urban) among Sc population is 82.5 (86.1 for males and 75.6 for females).

TABLE - 28
NUMBER AND PERCENTAGE OF SCHEDULEDTRIBES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS,2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Ukhimath	25	20	5	8	3	5	86.2	95.2	62.5	32.7
2	August Muni	54	35	19	46	20	26	69.2	85.4	51.4	34.0
3	Jakholi	16	6	10	8	3	5	88.9	75	100	-25.0
	District (Rural) Total	**95**	**61**	**34**	**62**	**26**	**36**	**76**	**87.1**	**61.8**	**25.3**

The table 28 gives number and percentage of Scheduled Tribes literates and illiterates by sex in CD Blocks of the district at the 2001 Census. The Community is most literate in Jakholi CD Block and least in August Muni. The gap in male and female literacy rate is highest (34.0 percent) in August Muni CD Block. On the other hand this gap in Jakholi CD block in negative (i.e. -25.0), which meansthat in Jakholi CD block male literacy rate is lower than the female literacy rate.

TABLE - 29
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	1	4.2	1	0.6
1-10	0	0.0	0	0.0
11-20	0	0.0	0	0.0
21-30	0	0.0	0	0.0
31-40	1	4.2	5	3.2
41-50	2	8.3	10	6.4
51-60	1	4.2	39	24.8
61-70	2	8.3	13	8.3
71-80	2	8.3	11	7.0
81-90	5	20.8	47	29.9
91-99	0	0.0	0	0.0
100	10	41.7	31	19.7
District Total:	**24**	**100.0**	**157**	**100.0**
Literacy rate for District (Rural)		**76.0**		

The table 29 gives distribution of villages by literacy rate range for Scheduled Tribe population at the 2001 Census. Out of 24 villages with Scheduled Tribe population, 10 villages (41.7 per cent) have 100.0 per cent literacy. However, 29.9 percent of total Scheduled Tribe population of the district (rural) live in 5 villages which have 81-90, range of literacy rate.

TABLE - 30
NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS/TOWN POPULATION, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Kedarnath (NP)	4	4	0	5	5	0	44.4	44.4	0.0	44.4
2	Rudraprayag (NP)	16	10	6	4	0	4	88.9	100	75.0	25.0
District (Urban)		**20**	**14**	**6**	**9**	**5**	**4**	**74.1**	**73.7**	**75.0**	**-1.3**

The table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in towns of the district at the 2001 Census. The Community living in town has literacy rate of about 74 percent. The town of Rudraprayag has rate about 88.9 percent in comparison to 44.4 percent in Kedarnath. In Rudraprayag (NP) male literacy rate is 100 percent while female literacy is 75.0 percent. In Kedarnath (NP) female population is zero. So female literacy rate is also zero. In urban area of the district female rate is higher than male literacy.

TABLE - 31

NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN TAHSILS, 2001

Serial number	Name of Tahsil	Persons / Males / Females	Total population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers

The Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out to be 44.9 percent of the total population in the district. The total workers are comprised of 33.4 percent of main workers and 11.4 percent of marginal workers and the remaining 55.1 percent are non-workers.

Among the main workers, males participation rate in the district is 33.5 percent and 33.4 percent of females. Male and female marginal workers account for 8.8 and 13.8 percent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 46 percent in Ukhimath tahsil to 44.2 percent in Rudraprayag tahsil.

TABLE - 32

NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Persons/ Males/ Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers

The Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 224707 total rural population of the district, 33.3 percent has been categorized as main workers and the marginal workers constitute 11.5 percent and the remaining 55.2 percent fall in the category of non-workers. The sex-wise break up at the district level shows that 32.9 percent males and 33.6 percent females are in the category of main workers. Male and female marginal workers account for 8.9 and 13.9 percent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 44.8 percent. At the C.D. block level, Ukhimath has highest proportion of total workers forming 45.4 percent of the total population. It is closely followed by Jakholi (45.3 percent). The lowest percentage of 44.3 percent is recorded in Augustmuni C.D. block.

TABLE - 33
NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name and urban status of UA / Town	Persons / Males / Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers

				(47.1)	**(95.0)**	**(0.6)**	**(0.5)**	**(4.0)**

Note: Percent of Worker to total worker are given in brackets for category of workers

It can be seen from the Table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators and agricultural labourers constitute 76.5 percent of the total workers (main + marginal) and remaining 23.5 percent of total workers belongs to household industry workers (1.1 percent) and other workers (22.4 precent) in this district.

The distribution of workers by four categories of economic activity at tahsil shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 75.8 percent in Rudraprayag tahsil and 75.9 percent in Ukhimath tahsil. The percentage of female cultivators is 95.0

percent which is very high as compared to 52.2 percent of male cultivators in the district. The percentage of agricultural laborers and household industry workers is very low in the district. The workers in other activities occupy the second position next to agriculture in the district as well as in each tahsil. The proportion of 22.6 percent of other workers is recorded in Ukhmath tahsil while it is 22.4 percent is found in Rudraprayag tahsil.

TABLE - 35
DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C D BLOCK, 2001

Serial number	Name of C. D. block	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

Note: Percent of Worker to total worker are given in brackets for category of workers

The Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main + marginal) are 44.8 percent of total population. Among these workers, cultivators constitute 76.9 percent, 0.6 percent agricultural laborers, 1.1 percent household industry workers and 21.4 percent other workers. Among cultivators, the percentage of females (95.1 percent) is higher than male (53.7 percent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators varies between

73.5 percent in Ukhimath C.D. block to 81.2 percent in Jakholi C.D. block. Similarly for other workers, the lowest proportion is 17.2 percent in Jakholi C.D. block while 25.6 percent is the highest in Ukhimath C.D. block. The percentage of agricultural laborers and household industry workers together is quite low i.e. only 1.7 percent in the district. The percentage of agricultural labourers is highest in Jakholi (0.8) block and is followed by August Muni (0.7). In Ukhimath C.D. blocks, this proportion is quite insignificant. Similarly, household industry workers varies in C.D. blocks between 0.7 percent in Ukhimath and 1.3 percent in August Muni.

TABLE - 36
DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

				(8.0)	**(0.0)**	**(0.0)**	**(1.5)**	**(98.5)**

Note: Percent of Worker to total worker are given in brackets for category of workers

The Table 36 gives distribution of workers by sex in four category of economic activities of towns at the 2001 Census. In urban area of the district percentage of total workers is 51.7 percent, which is distributed in four categories of workers i.e. cultivaters agricultural labours, house hold industry workers and other workers. In urban area of the district 98.9 percent workers belongs to the class of other workers, thus in urban area of the district, proportion of cultivaltors agricultural labourers and house hold industry workers are very insignificiant. This trend is followed in both the towns Kedarnath (NP) and Rudraprayag (NP).

(ix) Brief analysis of the Village Directory and Town Directory data :

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE - 37

DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

			Type of amenity available					Type of amenity available

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside thepremises it isconsidered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

Transport communication includes bus service, rail facility and navigable waterways.

The Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 658 inhabited villages in the district 478 villages or 72.6 percent have been provided with the educational facilities of one or other type. Similarly 143 villages in the district constituting 21.7 percent have medical facilities of one type or the other. Improved drinking water facility is available in 646 or 98.2 percent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph,116 villages constituting 17.6 percent of villages have been provided with post office facility within the village. 195 or 29.6 percent villages have been provided with the telephone facility, 242 or 36.8 percent with transport facility, 25 or 3.8 percent villages have bank facility and 25 or 3.8 percent have agricultural credit societies. Similarly there are 206 or 31.3 percent villages which have beer

linked with the pucca road. Total 593 or 90.1 percent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Jakholi C.D. block has the highest 83.2 percent villages where educational facility is available and lowest 66.9 percent is found in Ukhimath. Medical facility is highest in Jakholi (40.1 percent) and lowest (12.9 percent) in Ukhimath C.D. block. Improved drinking water is available to 99.3 percent villages in Jakholi and while in other blocks, it is above 95 percent. Telephone facility is highest in August Muni C.D. block (37.2 percent) Transport and communications is less developed in Jakholi where only 31.4 percent villages are covered by this facility whereas 41.0 percent villages of Ukhimath C.D. block are availing this facility. In the field of power supply about 90 percent villages have been covered.

TABLE - 38
NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 224,707 persons in the district 203,386 or 90.5 percent have educational facility of one or the other type. Similarly 80446 or 35.8 percent population has medical facilities while 222,295 or 98.9 percent have got improved drinking water facility. Post office facilities are available to 73,615 or 32.8 percent population. Telephone facility is available to 89,493 or 39.8 percent. Transport communications facility is available to 100,086 or 44.5 percent. Bank facility is available to 24,361 or 10.8 percent. 19,394 or 8.6 percent have been provided with the facility of agricultural credit societies 82338 or 36.6 percent have been provided with the facility of approach by pucca road. Power supply is available to 204,208 or 90.9 percent rural population in the district.

TABLE - 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	138	50	2	190
(b) Middle School	290	173	6	469
(c) Degree College	12	64	579	655
2. Medical:-				
(a) Hospital	162	227	245	634
(b) PHC	42	114	497	653
3. Post Office	290	208	44	542
4. Telephone	137	146	180	463
5. Bus Service	175	198	54	427
6. Banks				
(a) Commercial Bank	155	235	246	636
(b) Cooperative Bank	62	164	426	652
7. Agricultural Credit Societies	236	196	201	633

The Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 190 villages do not have primary school in their villages and out of these villages, children of 138 villages have to travel less than 5 km. for schooling. Out of 658 inhabited villages as many as 469 are deprived of middle school and 655 of degree college. Of these 290 avail the facility of middle school at a distance of less than 5 km., 173 at a distance between 5-10 km. and the remaining 6 at a distance of 10+ km. In respect of degree college 12 avail this facility at a distance of less than 5 km., 64 between 5 to 10 km. and rest 579 villages at a distance of 10+ km.

Similarly there are 634 villages in the district which have been devoid of Hospital facility and 653 villages which are deprived of PHC facilities. Of these 162 villages have the facility of Hospital available within 5 kms. while in respect of 227 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 245 villages have this facility at a distance of 10+ kms. As regards PHC 42 villages avail this facility at a distance of less than 5 kms.,114 at a distanee of 5-10 km. and the remaining 497 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 542 villages do not have this facility in the village itself. Of these majority i.e. 290 have this facility at a distance of less than 5 kms., another 208 villages avail it at a distance of 5-10 kms. In the remaining 44 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 463 villages in the district which are without telephone facilitiy. Of these 137 avail this facility at a distance of less than 5 kms., 146 at a distance of 5-10 kms. and remaining 180 have to traverse a distance of 10+ kms.

For Bus service out of 427 villages which do not have facility, 175 villages avail this facility at a distance of less than 5 kms., 198 at a distance between 5-10 kms. and 54 at a distance of 10+ kms.

In the entire district 636 villages are deprived of Commercial Bank & 652 of Co-operative Bank. Of these 636 villages which are deprived of Commercial Banks, 155 villages avail this facility at a distance of less than 5 kms., 235 between 5-10 kms. & the remaining 246 at a distance of 10+ kms. Regarding Co-operative Banks out of 652 villages 62 villages avail this facility at a distance of less than 5 kms., 164 at a distance of 5-10 kms. and remaining 426 at a distance of 10+ kms. 633 villages do not have agricultural credit societies. This facility to 236 villages is available at a distance of less than 5 kms., 196 at a distance of 5-10 kms. and the remaining 201 at a distance of 10+ kms.

TABLE - 40
DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note: Percentages are given in brackets.
Post office includes Post office, telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

The Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 658 inhabited villages in the district, there are 20 villages which have nearest towns upto a distance of 5 kms. Of these only 16 villages forming 80.0 percent of these total villages, are having the educational facilities of one type or the other and 4 villages constituting 20.0 percent, have the medical facilities within the village, 5 villages forming 25.0 percent have the facility of post office within the village and 7 or 35.0 percent have the facility of telephone. 8 villages constituting 40.0 percent have been linked by transport service. One villages comprising 5.0 percent has been provided bank facilities, while no village has been provided by agricultural credit societies. 6 villages comprising 30.0 percent have been provided with pucca road.

There are 180 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 126 villages constituting 70.0 percent have been provided with the educational facilities. 40 villages comprising 22.2 percent have been provided with medical facilities.24 villages constituting 13.3 percent enjoy the post office facility.74 villages comprising 41.1 percent have been provided the telephone facility. 80 villages constituting 44.4 percent have been linked with transport communications. 8 villages comprising 4.4 percent have bank facility. 8 villages constituting 4.4 percent are having agricultural credit societies, while 67 villages or 37.2 percent are approachable by pucca road. 368 villages fall in the distance range of 16-50 kms. Of these, 272 (73.9 percent) villages have educational facility, 83 villages 22.6 percent) with medical, 71 villages (19.3 percent) with post office, 27.7 percent with telephone and transport & communications available to 33.4 percent villages. Banks and agricultural credit societies facilities are available to 3.0 and 3.5 percent of villages, 28.0 percent are approchable by pucca road.

There are 90 villages in the district which are situated beyond 50 kms.from the nearest town and out of these 64 or 71.1 percent enjoy the education facility in the village itself whereas 16 villages comprising 17.8 percent have been provided with medical facility of one type or the other, 16 such villages comprising 17.8 percent have the post office facility. 12 villages comprising 13.3 percent have been provided with telephone facility. 31 villages constituting 34.4 percent have been linked by Transport service whereas 5 villages comprising 5.6 percent have been provided with the bank facilities. Only 4 villages comprising 4.4 percent are having agricultural credit societies while 30 villages comprising 33.3 percent have been linked by pucca roads.

TABLE - 41
DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

\# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Rudraprayag district out of a total 658 inhabited villages, overwhelming 518 have a population of less than 500 persons. Of these 339 villages (65.4 percent) have educational facility, 79 (15.3 percent) have medical facility, 507 (97.9 percent) have improved drinking water facility.61 villages (11.8 percent) have post office facility. 133 (25.7 percent) have telephone facility. 177 (34.2 percent) have been linked by transport service. 10 (1.9 percent) have Bank facility. 12 villages (2.3 percent) have been provided with the agricultural credit societies, 152 villages (29.3 percent) have been linked with pucca road. 468 villages (90.3 percent) have been provided with electricity.

Out of 110 villages, which fall in the population range of 500-999 persons, 109 villages (99.1 percent) have been provided with the educational facility as well as improved drinking water facility, 46 (41.8 percent) with medical facility. 38 villages (34.5 percent) have been provided with post office facilities, 45 villages (40.9 percent) with telephone facility, 47 villages (42.7 percent) with transport facilities, 7 villages (6.4 percent) with bank facility, 8 villages (7.3 percent) with agricultural credit societies & 41 villages (37.3 percent) have approach by pucca road. Only 96 villages (87.3 percent) in this range have electricity.

27 villages fall in population range of 1,000-1,999 persons. All of these villages have education and improved drinking water facilities. Whereas 15 villages (55.6 percent) enjoy the medical facility, 14 villages (51.9 percent) have post office facility, 14 villages (51.9 percent) have telephone facility, 15 villages (55.6 percent) have transport communications facilities, 5 villages (18.5 percent) have bank facilities, 3 villages (11.1 percent) have agricultural credit societies and 10 villages (37.0 percent) have approach by pucca road. All but one villages have power supply.

There are 3 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of education, medical improved drinking water, post office, telephone, transport communications, bank approach by pucca road and power supply. There is only one village in this range which does not enjoy the facility of agricultural credit society. There is no village in the district having a population of 5,000 persons or above.

TABLE - 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Ukhimath	139	17,319	21.0	1.0
2	August Muni	382	36,194	40.9	20.8
3	Jakholi	137	16,300	30.9	23.8
4	Forest Villages	0	0	0.0	0.0
	District Total:	**658**	**69,814**	**33.6**	**18.4**

Note: Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D block wise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 658 inhabited villages in the district having a total area of 69,814 hectares. Of this, 33.6 percent is cultivable and 18.4 percent of total cultivable area has got the irrigation facility.

A look at the land use pattern at C.D. block level shows that Ukhimath block with 139 villages have a total area of 17,319 hectares, of this 21 percent of land is cultivable and of this cultivatable area 1.0 percent is irrigated. In August Muni block, all the 382 villages have a total land area of 36,194 hectares, of this 40.9 percent of land is cultivable and of the aforesaid area 20.8 percent is irrigated. In Jakholi block, all the 137 villages have a total area of 16,300 hectares, of this cultivable area is 30.9 percent and 23.8 percent is irrigated of cultivable area.

TABLE - 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

		Per capita receipt (Rs.)			Per capita expenditure (Rs.)					
Serial number	Class, name & urban status of the Town	Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other (s)
1	2	3	4	5	6	7	8	9	10	11
1	VI Kedarnath (NP)	2,002	259	1,743	1,867	622	0	0	0	1,245
2	VI Rudraprayag (NP)	1,047	79	968	659	133	118	398	0	9
District Average		**1,215**	**111**	**1,104**	**872**	**220**	**97**	**328**	**0**	**227**

Table 43 gives the per capita receipts and expenditure in the towns and in the district. The average per capita receipt works out to be Rs. 1215 and the expenditure Rs. 872 in urban area of the district. It shows that per capita receipt in more than per capita expenditure in the district (urban). In the town Kedarnath per capita receipt is almost twice and per capita expenditure is almost thrice than that of in town Rudraprayag.

TABLE - 44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

		Type of educational institution				
Serial number	Name and urban status of Town	Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Kedarnath (NP)	0	0	0	0	0
2	Rudraprayag (NP)	18	9	9	9	0
District Average		**15**	7	7	7	**0**

Table 44 shows the position of school/college per 10,000 population in statutory towns of the district of 2001 Census. In urban areas the average number of primary schools per 10,000 population comes to 15 and in junior secondary/middle, secondary /matriculation and senior secondary schools the average is seven whereas the ratio of colleges is zero. It is observed from the table that in the town Kedarnath, there is no school/college is avilable.

TABLE -45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Kedarnath (NP)	208
2	Rudraprayag (NP)	156
	Distrct Average	**165**

The table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Rudraprayag district. On an average there are 165 beds per 10,000 population in urban areas of the district. Whereas it is 208 in Kedarnath Nagar Panchayat while 111 beds is recorded in Rudraprayag Nagar Panchyat.

TABLE - 46
PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
Not applicable as there are no slums in the towns of the district				

TABLE - 47
MOST IMPORTANT COMMODITY EXPORTED AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Kedarnath (NP)	-	-
2	Rudraprayag (NP)	Carpet	Potato
		Shawl	Carpet
		-	Raw Leather

The Table 47 indicates most important articles manufactured and exported from Rudraprayag town in the district. The chief export items of the district are potato, carpet and raw leather and the main items which are manufactured in Rudraprayg town are carpets and shawls.

(x) Brief Analysis of the Data on Houses and Household Amenities, Houselisting Operations, Census of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each census.Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE - 48

HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure Status	Number of dwelling households	Number of households								
		Total			Scheduled Cast			Scheduled Tribe		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11

	One room	3,328	3,513	15	1,348	1,340	8	6	6	0
	Two rooms	13,722	13,669	53	3,480	3,472	8	20	20	0
	Three rooms	6,355	6,304	51	1,245	1,243	2	16	16	0
	3+ rooms	21,477	21,448	29	2,325	2,324	1	44	44	0
	Median number of rooms	3	3	2	2	2	1	3	3	0
Rented	No exclusive room	50	36	14	13	3	10	0	0	0
	One room	1,150	1,007	143	142	133	9	24	22	2
	Two rooms	1,603	1,440	163	182	171	11	25	24	1
	Three rooms	300	279	21	18	17	1	1	1	0
	3+ rooms	195	191	4	10	10	0	4	4	0
	Median number of rooms	2	2	2	2	2	1	2	2	1
Others	No exclusive room	13	13	0	6	6	0	0	0	0
	One room	167	154	13	48	38	10	1	1	0
	Two rooms	243	217	26	51	45	6	2	2	0
	Three rooms	70	68	2	14	14	0	3	3	0
	3+ rooms	85	85	0	7	7	0	1	1	0
	Median number of rooms	2	2	2	2	2	1	3	3	0

Data source: Census of India 2001, H-series: "Tables on Houses, Household Amenities and Assets."

The Table 48 depicts that under owned tenure status maximum number of dwelling households 21,477 has more than three rooms, followed by 13,722 households having possessed two rooms, 6,355 households with three rooms and 536 households are without any exclusive room. In respect of rented maximum number of households 1,603 have two rooms, followed by 1,150 households with one room, 300 households with 3 rooms, 195 households with more than 3 room and 50 households without any exclusive room. Amongst household with tenure status other than owned and rented, 243 households have two rooms, followed by 167 households with one room, 85 households with more than three rooms, 70 households with three rooms and 13 households are without any exclusive room. The median number of rooms are 3 in case of owned and two for rented and other categories.

TABLE - 49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/Tahsil	Totoal			Rural			Urban		
		Permanent	Semi permanent	Temporary	Permanent	Semi permanent	Temporary	Permanent	Semi permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
	District Rudraprayag	97.4	2.4	0.02	97.4	2.4	0.2	98.6	1.4	0
1	Tahsil Ukhimath	96.9	2.7	0.04	96.9	2.7	2.7	100	0.0	0
2	Tahsil Rudraprayag	97.7	2.2	2.2	97.7	2.2	2.2	98.5	1.5	0

Data source: Census of India 2001, H-series: "Tables on Houses, Household Amenities and Assets."

Note: Permanent : Permanent houses refer to those houses whose walls & roof are made of permanent materials i.e. where burnt bricks, G.I. sheets or other metal sheets, asbestos sheets, stone or concrete is used for wall and tiles slate, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks lime and stone and RBC/RCC concreate are used for roof.

Temporary : Temporary houses refer to those houses whose walls and roof are made of temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood.

Semi Permanent : Semi permanent houses refer to those houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

The percentage distribution of households as shown in the above table reveals that more than 97.4 per cent of the households in the district had permanent houses. The trend is almost similar in the rural (97.4 per cent) and urban area (98.6 per cent). Among tahsils, highest proportion of permanent houses were accounted in tahsil Rudraprayag (97.7 percent) followed by 96.9 per cent in tahsil Ukhimath. In respect of semi-permanent houses, the returns were 2.4 per cent at district level whereas among tahsils, in Ukhimath it was 2.7 per cent and 2.2 per cent in Rudraprayag. Rural areas represented a similar ratio at district and tahsil level but semi-permanent houses in the urban areas were in the proportion range of 1.4 and 1.5 per cent. Temporary houses in the district lie at insignificant proportion in the district and tahsil.

TABLE - 50

PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

				(71.3)	**(93.0)**	**(80.5)**	**(87.5)**	**(84.1)**

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means colsed and open drainage

The above table states that improved drinking water facility was available in 15.3 per cent of the households (14.7 rural and 71.3 per cent urban households). The rural and urban areas of tahsils showed similar pattern. The network of electricity comprised among 46.7 per cent of the households. The urban household had nearly double proportion. Bathroom, toilet and drainage were reported in 21.1, 26.3 and 26.1 per cent of the households. The pattern of access of these amenities continued in higher proportion from the rural households.

During 1991 census among 95,155 households 9,715 households could avail electricity and 9,95 households had access to improved drinking wate

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note : - Percentages are given in brackets.

It is observed from the above table that 68.2 percent of households in the district use firewood as fuel for cooking, the proportion in the rural area is 68.9 per cent and in urban area it comes to 8.1 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food is 27.4 per cent of the households. The composition of rural and urban comes to 27.0 and 70.5 per cent respectively. Kerosene is used for cooking in as many as 2.0 per cent of the households 2.0 per cent rural and 11.5 per cent urban households. The other methods like crop residue, cow dung cake, coa lignite, charcoal, electricity and bio-gas etc. ranges between 1.4 to 0.0 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood except in tahsil Rudraprayag where 28.7 per cent of households use LPG and 66.8 per cent use firewood. The table shows that firewood, LPG (cooking gas) and kerosene are the predominant fuel for cooking in the district.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Note : - Percentages are given in brackets.

The above table reveals that out of total number of 553 urban households in the district only 27 urban households were in tahsil Ukhimath. It was accounted that 56.5 per cent of the households in the district availed banking facilities. The availability of household assets like radio/transistor comprised among 60.4 per cent of household, television 23.8 per cent, telephone 4.0 per cent, bicycle 0.8, scooter/ motor cycle/moped 1.0 and car/jeep/van etc. 1.0 per cent. Out of the total, 36.3 per cent households have non of the specific assets in the district.

(xi) Major Social and Cultural Events, Natural and Administrative Developments and Significant Activities during the Decade

The outbreak of the earthquake on 28 - 29 March, 1999 jeopardized the living of common man. In the aftermath of this earthquake, light earthquakes were observed a number of times within a period of two onths. Many families became homeless on account of the havoc. It took months to normalize the situation.

The district with its headquarters at Rudraprayag has been newly created from the districts of Chamoli, Tehri Garhwal and Garhwal. The district is likely to grow because of this administrative change.

(xii) Brief Description of Places of Religious, Historical or Archeological Importance in Villages and Places of Tourist interest in the Towns of the District

Gauri Kund

It is situated on the right bank of Mandakini River and on the road leading to Kedarnath. It has derived its name from the celebrated pond of the same name where it is said that Gauri alias Parvati had a bath there before her marriage with Lord Shiva. A temple dedicated to Parvati is also situated here.

Gupt Kashi

It lies between Ukhimath and Kedarnath on Mandakini River. As per the religious custom, it is visited by the pilgrims on the return journey from Kedarnath.

Kali Math

It lies 5 km away from Gupt Kashi and stand on the left bank of Kali river. The principal objects of veneration are the images of Mahakali, Mahalaxmi and Gauri Shankar. Goats and buffalos are sacrificed here in the honour of goddesses.

Kedarnath

A famous Hindu pilgrim, where Shivaling (venerated image of Shiva) is worshipped here by people. It is one of the twelve 'Jyotirlings' in the country. Inside the temple there are images of Krishna, Ganesh, Parvati and Pandavas along with their mother, Kunti and co-wife Draupadi. Priest is a member of Lingayat sect from the state of Karnataka who resides permanently at Ukhimath while his deputy performs the religious duties at Kedarnath. The importance of this place appears to have been emphasized by the Shankaracharyaa, who according to tradition, passed his last days here. The name of the district is also associated with Shiva i.e. Rudra the destroyer and His concert is Kali.

The other places of tourist and pilgrim importance are the confluence of Alaknanda and Mandakini at Rudraprayag, Syal Saind, Deoria Tal, Dhopi Tal and Dogal Vitta. Beautification of tourist places is underway to attract more tourists and pilgrims.

(xiii) Major Characteristics and Contribution of the District.

The district is having one Jyotirlingam temple (Kedarnath) among the twelve in country. Hindu devotees visit the temple every year despite rugged terrain. The entire region is blessed with immense natural beauty, places of religious importance, lakes and glaciers.

(xiv) Scope of Village Directory and Town Directory

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities namely Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/ Magazine etc.. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a 'village' is taken as a statutorily recognised unit of an area having definite and recognised boundary and separate land records. Thus in Census the basic unit of rural areas is taken as a revenue village which has definite surveyed boundaries. A revenue village may comprise of several hamlets but the entire village is treated as one Unit for presentation of data: In Mizoram, however, the concept of village is different from what have been mentioned above since there is no surveyed village in the State. Therefore an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The un-inhabited villages i.e., the villages where no population was found during Census Operations have also be included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included :

1. Appendix I	Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II	Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III	Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV	C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility is available.
5. Appendix V	Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI	Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII	List of villages according to the proportion of the Scheduled Caste and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII	Number of villages under each Gram Panchayat (C.D. Block wise)
9. Appendix IX	Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detail and explanatory notes on each of these abbreviations has also been incorporated for easy clarification of the subject concerned.

PART A
VILLAGE AND TOWN DIRECTORY
(section I and II)

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

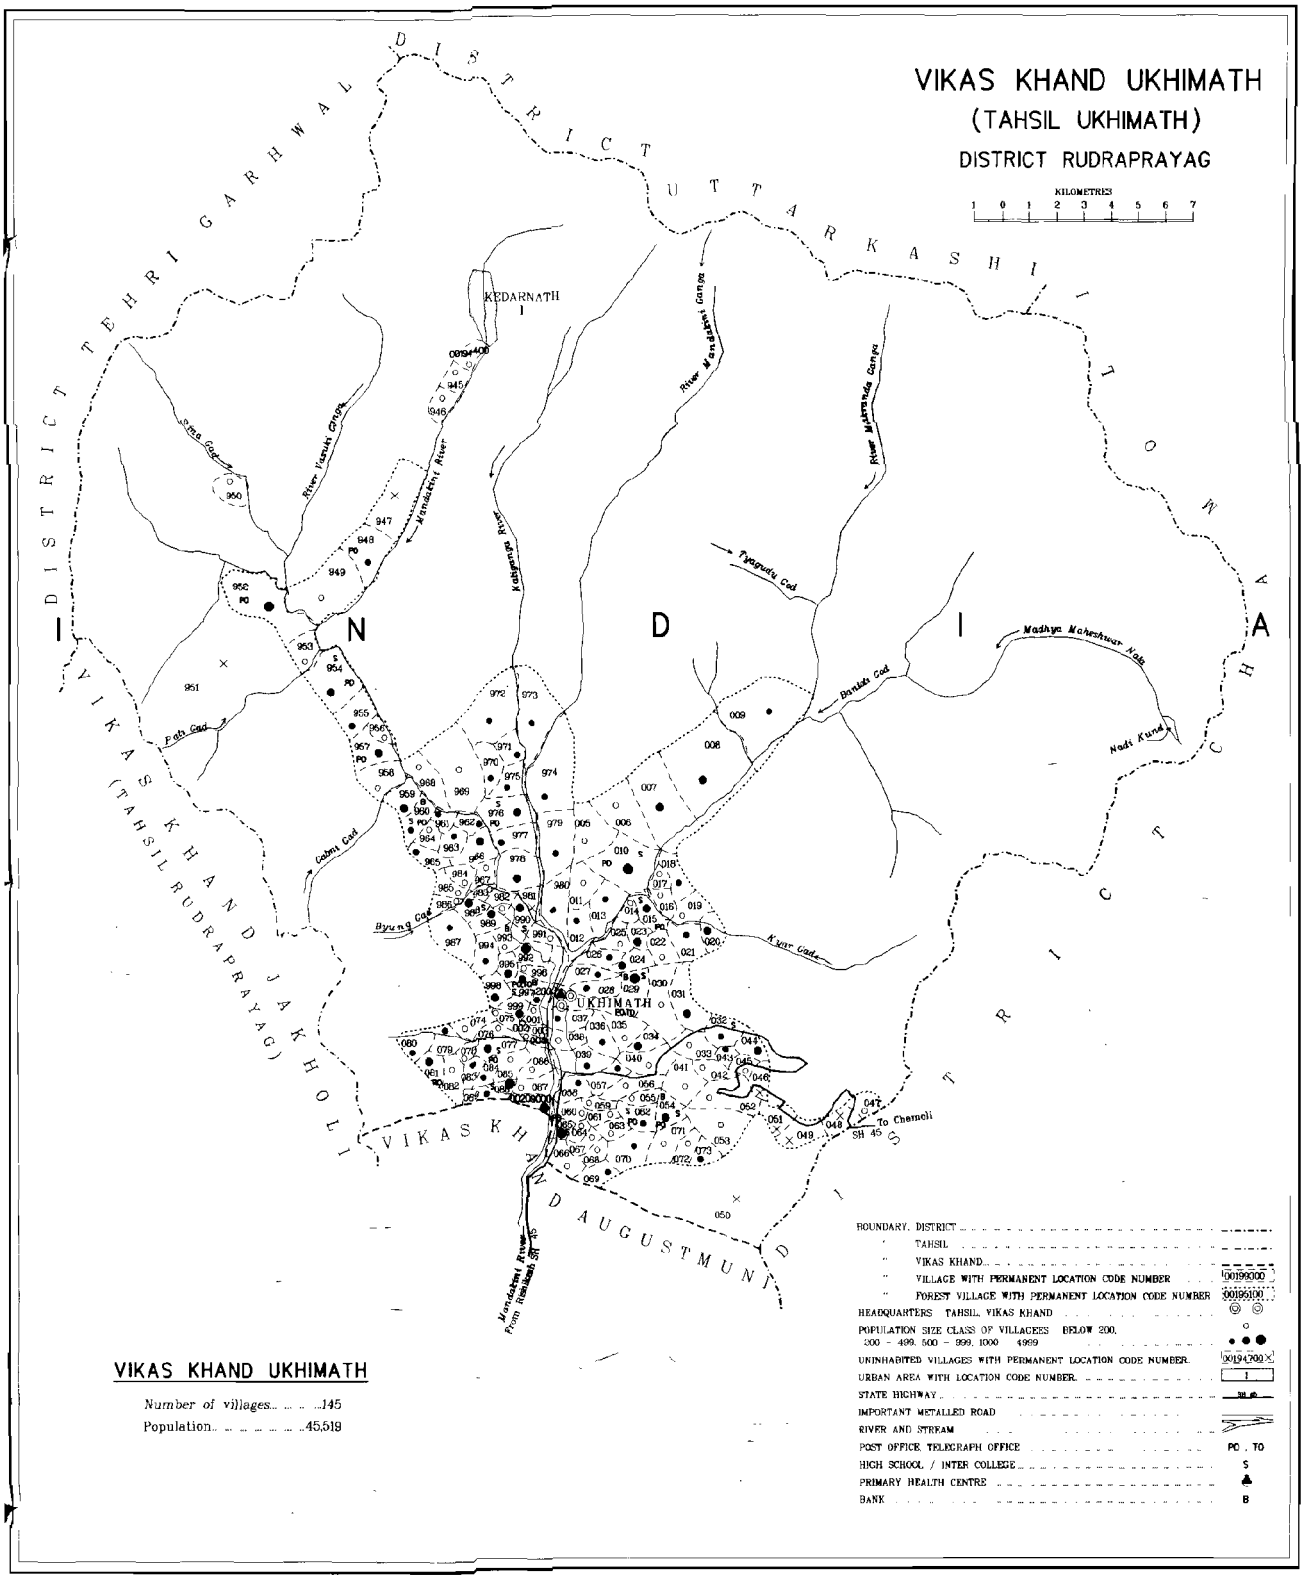

STATEMENT

LIST OF VILLAGES FULLY MERGED IN TOWNS AND OUTGROWTH AT 2001 CENSUS

Serial. Number	Name of the Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4

Not applicable as there is no village merged in towns and any outgrowths in the district at 2001-Census.

APPENDIX VIII

NUMBER OF VILLAGES UNDER EACH GRAM PANCHYAT (C.D. BLOCK WISE)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttaranchal due to certain reasons.

APPENDIX - IX

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Name of District	Name of C.D. Block	Location Code Number	Name of Village	No. of Girls School
1	2	3	4	5

Information not available for this district

SECTION II
TOWN DIRECTORY

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation /Nagan Nigam	M. Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board /Nagar Palika Parishad	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Other columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded, respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9& 10 :

Name of the nearest city with one lakh and more and-five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14;

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has benn recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv).	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings, etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available, has been mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town, the name of nearest place with distance where the facility is available, has been recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee, etc.

TOWN DIRECTORY
STATEMENTS (I TO VII)

STATEMENT - I
STATUS AND GROWTH HISTORY

Serial number	Class, name and civic status of town	Location code number	Name of Taluk/Tahsil/ Police Station/Island etc.	Name of C.D. block	Area (in sq. km.) APPENDIX TO TOWN DIRECTORY
TOWNS SHOWING THEIR OUTGROWTH WITH POPULATION

As no Town having any outgrowth in the District was found, relevant information could not be compiled and therefore may be treated as 'NIL'.

DISTRICT
PRIMARY CENSUS ABSTRACT
(GENERAL)

Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the

quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census

Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

The abbreviations used in Primary Census Abstract are same as used in Town Directory.

ANNEXURES
I TO VIII

ANNEXURE-I

Number of Villages under each Gram Panchayat

Not provided for this district due to certain reasons.

ANNEXURE-II

Fertility and Mortality, 1991 Census

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the heading Census and Non- Census Concepts and Definitions in the Analytical Note portion. The fertility is defined by various measures of fertility and mean-age at marriage and also by marital status of population. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which is in north - central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Chamoli^
q1	Persons	99	65.0
	Males	98	71.0
	Females	104	61.0
q2	Persons	117	74.0
	Males	117	76.0
	Females	118	64.0
q5	Persons	134	82.0
	Males	135	84.0
	Females	132	80.0

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Rudraprayag was carved out from the district Chamoli and some part fo Tehri in the year 1997, i.e., after 1991 Census. The data are not available separately for Rudraprayag for the year 1991. Hence, the data of undivided Chamoli have been taken, assuming that the trends and pattern of districts are same.*

The child mortality by ages 1, 2 and 5 years, as shown by the indicators q1, q2 and q5, respectively, was lower in the district as against the State, which suggests that the children upto 5 years of age in the district were in the improved condition as compared to the State.

ANNEXURE–III

Various Measures of Fertilty and Mean Age at Marriage, 1991 Census

Serial Number	Fertility Measures	Uttar Pradesh*	Chamoli
1	2	3	4
1	CBR	37.2	30.0
2	TFR	5.6	4.1
3	TMFR	6.3	5.0
4	GFR	172.0	127.0
5	GMFR	200.0	162.0
6	Mean age at marriage (1981-91)	17.3	17.2
7	Number of children ever born per ever married woman aged 45-49 years	4.6	3.9
8	Child woman ratio 0-4 years	631.0	536.0
	-do- 5-9 years	752.0	633.0

Source: (i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Rudraprayag was carved out from the district Chamoli and some part fo Tehri in the year 1997, i.e., after 1991 Census. The data are not available separately for Rudraprayag for the year 1991. Hence, the data of undivided Chamoli have been taken, assuming that the trends and pattern of districts are same.*

The above annexure reveals that the Crude Birth Rate (CBR) (which is the ratio of the number of live births in a year to the mid year population), was lower in the district as compared to the State ratio. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR), the district presented all along lower rates than the state. The inference is that fertility was lower in the district as compared to the state. The mean age at marriage during the period 1981-91 had been 17.3 years for the state whereas it was 17.2 years for the district. Similar trend was observed in the number of children born per ever married woman aged 45-49, the state and the district figures were 4.6 and 3.9, respectively. As per 1991 census, Child Woman ration in the age group of 0-4 and 5-9 years was 536 and 633 for the district while in case of the state the corresponding figures were 631 and 752. The different fertility measures indicate that fertility levels in the district lie below to the state average.

ANNEXURE - IV

The annexure-IV shows percentage distribution of migrants as per 1991 (Annexure IV (a)) and 2001 Census (Annexure IV (b)) among total migrants in the state and district. For both the Censuses, the district figures are presented in comparison to state figures. The table is given in two parts. One is in-migrants by place of birth (in which a person is enumerated during the Census in other than the place of birth) and the other part is related to in-migrants by place of last residence (in which a person is enumerated during the Census in place other than the place of his immediate last residence). Since the state of Uttaranchal was created in 2000, the state figures for 1991 are given for Uttar Pradesh, whereas the state figures of Uttaranchal are given for 2001.

ANNEXURE - IV (a)

Percentage Distribution of Migrants, 2001 Census

In-migrants by Place of Birth

State/ District	Total Migrants			From other districts of the state			From other States / UT's			From other Countries

	(100.0)	(100.0)	(100.0)	(77.5)	(71.6)	(86.1)	(11.1)	(11.8)	(10.1)	(11.4)	(16.6)	(3.8)

Note : - Percentages are given in brackets..

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Rudraprayag was carved out from the district Chamoli and some part fo Tehri in the year 1997, i.e., after 1991 Census. The data are not available separately for Rudraprayag for the year 1991. Hence, the data of undivided Chamoli have been taken, assuming that the trends and pattern of districts are same.*

Regarding in-migration by place of birth, it is evident from the tables that percentage of in-migrants from other districts of the state was much lower for the state of Uttaranchal (35.4 per cent) in Census 2001 as compared to state of Uttar Pradesh (81.3 per cent) during 1991. For the district Rudraprayag the percentages declined in 2001 (70.6 per cent) as compared to 1991 Census (80.5 per cent) for the district Chamoli. The proportion of in-migration from other states increased and recorded 57.8 per cent which was 16.2 per cent during 1991 Census at state level. Similar trends are visible at district level where a figure for 2001 is 20.1 per cent (for Rudraprayag) which was 9.5 per cent (for Chamoli) during 1991. In-migrants from other countries in the district were 9.9 per cent during 1991 which is 9.2 per cent in 2001.

Regarding in-migration by place of last residence for in-migration from other districts, again the figures are much lower for the state of Uttaranchal (34.9 per cent) in 2001 against 79.6 per cent for the state of Uttar Pradesh during 1991. Comparatively, the figures for the district in Census 2001 recorded 60.6 per cent while it was 77.5 per cent in 1991 Census for Chamoli. The volume of migration from other states was 18.9 per cent in 1991 Census at the state level, which increased and recorded 60.1 per cent in 2001 Census. Figures for the district Chamoli worked out to be 11.1 per cent in 1991 and 25.2 per cent for district Rudraprayag, in 2001 Census. The movement of population from other countries to the district was 11.4 per cent in the district Chamoli, whereas the figure for the state Uttar Pradesh was 1.5 per cent during 1991. The corresponding figures recorded for the state Uttaranchal and district Rudraprayag, during 2001 are 5.0 per cent and 14.2 per cent, respectively.

ANNEXURE – V

Annexure – V presents the distribution of basic cultural characteristic of the population "Religion" at state, district and tahsil level. Six major religions have been dealt with separately. These are Buddhist, Christian, Hindu, Jain, Muslim and Sikh. Rest of the religions have been presented in the column titled 'other religions'. Distribution for 2001 and 1991 Censuses are presented in Annexure V (a) and Annexure V (b), respectively.

ANNEXURE - V (a)

Brief Account of Main Religions in the State/ Distt./ Tahsil as per 2001 Census

State/ Distt/ Tah	Total Population	Religion (Percent to total population)

Source : Religion table (C-9)

Note : - Percentages are given in brackets.

** Undivided Uttar Pradesh at 1991 Census.*

^ District Rudraprayag was carved out from the district Chamoli and some part fo Tehri in the year 1997, i.e., after 1991 Census. The data are not available separately for Rudraprayag for the year 1991. Hence, the data of undivided Chamoli have been taken, assuming that the trends and pattern of districts are same.

A brief account of the main religions as stated in the Annexure-V (a) for 2001 reveals that 85.0-percent population is Hindu in the state followed by 11.9 percent population of Muslims while the followers of other religions are negligible. At district level, the pattern is almost same, but the followers of Muslim religion are very low i.e. only 0.6 percent while under remaining four religions, the population is negligible. Almost similar trend is observed from Annexure V(b) based on 1991 Census with a slight variation. In the district Chamoli, 256 persons were reported in the category of "Religion Not Stated" in 1991 while only 90 persons were reported under this category in 2001 in Rudraprayag.

ANNEXURE - VI

Annexure-VI presents the classification of population according to marital status of different age groups for the state and district. Marital status has been classified as never married, married, widowed, divorced and separated and unspecified status. For comparative study, the figures of 2001 and 1991 Census have been shown in Annexure VI(a) and VI(b), respectively.

ANNEXURE - VI (a)

Marital Status of Different Age Groups of Population as per 2001 Census

Uttranchal

Age Group	Total Population			Marital Status									
				Never Married		Married		Widowed		Divorced & Separated		Unspecified Status

Source : Part - IV (a) table No. - C (I)

Note : - Percentages are given in brackets.

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Rudraprayag was carved out from the district Chamoli and some part fo Tehri in the year 1997, i.e., after 1991 Census. The data are not available separately for Rudraprayag for the year 1991. Hence, the data of undivided Chamoli have been taken, assuming that the trends and pattern of districts are same.*

On perusal of Annexure VI (a), it is observed that male population in the category of never married is 57.9 per cent for state and 58.3 per cent for the district Rudraprayag, while female population in the category of never married is 48.3 for state and 45.9 per cent for the district in 2001 Census. Married population in the district is 39.7 per cent for males and 44.7 per cent for females as against 39.9 per cent for males and 44.5 per cent for females in the state. Widowed population is 2.0 per cent for males and 9.2 per cent for females at district level as against 2.0 per cent males and 7.0 females at state level. Population of Divorced, Separated and Unspecified status are negligible at state level as well as at district level. Age group wise study of marital status reveals that population and percentage of never married decreases with the increase in population while pyramidal shape is observed for married population. In the district, percentage of married population is highest (97.3 per cent) for males in the age-group 35-39 years and 95.8 per cent for females in the age-group 25-29 years, while widowed population is highest in age group of 70 years and above (22.0 per cent for males and 74.7 per cent for females). Almost similar trend can be seen for the state.

It is observed on perusal of Annexure VI (b) that the scenario has not changed much since 1991 as far as the district figures are concerned, however, the district figures of 1991 covered undivided district Chamoli, which included present district of Rudraprayag. Percentages of never married in 1991 was 54.8 per cent for males and 46.9 per cent for females. Similarly, married population constituted 42.4 per cent for males and 45.2 per cent for females in 1991. Widowed population was 2.7 per cent in case of males and 7.8 per cent in case of females. No person was reported in the category "Unspecified Status" in the state as well as in the district in 2001. However, during 1991, some persons were reported under this category. State figures of 1991 Census reveal identical trend with slight variation in percentage although state figures of 1991 Census covered undivided Uttar Pradesh which included present state of Uttaranchal.

ANNEXURE - VII

Age and sex wise education in the state and district for 2001 and 1991 censuses have been presented in the Annexure – VII (a) and (b), respectively.

** Undivided Uttar Pradesh at 1991 Census.*

^ District Rudraprayag was carved out from the district Chamoli and some part fo Tehri in the year 1997, i.e., after 1991 Census. The data are not available separately for Rudraprayag for the year 1991. Hence, the data of undivided Chamoli have been taken, assuming that the trends and pattern of districts are same.

Above annexures show that percentage of illiterates has declined from 55.3 per cent for males and 80.0 per cent for females in 1991 to 30.4 per cent for males and 49.6 per cent for females in 2001, respectively at the state level. Consequently, percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 per cent among males and 0.7 per cent among females in 1991 at state level, which is 1.4 per cent and 1.2 per cent in case of males and females, respectively in 2001. Similarly primary level education was 10.7 per cent for males and 6.0 per cent for females in 1991 which rose to 16.1 and 13.9 for males and females, respectively in 2001. Middle level education was 9.7 per cent in case of males and 3.7 per cent in case of females in 1991 which increased to 14.2 per cent for males and 8.8 percent for females in 2001. Matriculation and above level was 13.5 per cent for males and 4.4 per cent for females in 1991 which rose to 23.4 percent for males and 13.8 per cent for females in 2001.

Similar trend can be observed in the district also, however, the district figures of 1991 covered undivided district Chamoli, which included present district of Rudraprayag. In 1991, 33.8 percent males and 67.1 per cent females were recorded as illiterates in the district Chamoli, which declined to 25.5 per cent males and 49.1 per cent females in 2001 in district Rudraprayag. Primary level education was 19.4 per cent in case of males and 11.6 per cent in case of females in 1991, which remained almost same in case of males and increased upto 16.2 per cent in case of females in 2001. Middle level educated males and females were 14.0 per cent and 4.8 per cent, respectively in 1991 while 17.0 per cent males and 10.9 per cent females were recorded in this category in 2001. Matriculation and above level of education was achieved by 15.8 per cent males and 4.1 per cent females in 1991 which is observed 21.2 per cent for males and 9.3 per cent for females in 2001. Primary level of education is found highest in the age-group of 7-14 years in 2001, while middle level education was the highest in age group 15-19 years and the age group that had highest percentage of matriculation and above level of education was 20-24 years, in respect of both the sexes.

ANNEXURE – VIII

Distribution of different mother tongues according to population with percentage as returned in 2001 and 1991 for the state of Uttaranchal and district Rudraprayag has been depicted through Annexure-VIII (a) and (b), respectively.

** Undivided Uttar Pradesh at 1991 Census.*

^ District Rudraprayag was carved out from the district Chamoli and some part fo Tehri in the year 1997, i.e., after 1991 Census. The data are not available separately for Rudraprayag for the year 1991. Hence, the data of undivided Chamoli have been taken, assuming that the trends and pattern of districts are same.

It shows from Annexure-VIII (a) that mother tongue for largest population in the district is Garhwali with 97.0 per cent which is 24.8 per cent for the state in 2001. Annexure VIII (b) shows that during 1991 also, Garhwali was the mother tongue spoken by the largest portion (89.1 per cent) of the district. Hindi as mother tongue is reported by just 1.7 per cent population in the district in 2001 Census followed by Nepali with 0.9 per cent. Other mother languages such as Bengali, Pahari, Punjabi, Bhojpuri, Kumauni, Urdu etc. are spoken by less than one percent each in the district. On the other hand, at the state level during 2001 besides Hindi and Garhwali, other important languages adopted as mother tongue are Kumauni (22.9 per cent), Urdu (5.9 per cent), Punjabi (2.8 per cent), Bengali (1.5 per cent), Jaunsari (1.3 per cent) and Nepali (1.1 per cent). Rest of the languages such as Bhojpuri, Pahari, Tibetan, Bhotia, Sindhi, etc., mother tongues are of less than one percent. Since state of Uttaranchal was not separated from Uttar Pradesh in 1991, distribution of mother tongues are entirely different in comparison to 2001, where dominant mother tongue was Hindi with 82.1 percent population followed by Urdu with 9.0 per cent, Bhojpuri 5.0 per cent, Garhwali 1.3 per cent and Kumauni 1.2 per cent. Similarly, at district level, the distribution of mother tongues has shown variation upto some extent since the district figures of 1991 covered undivided district Chamoli, which included present district of Rudraprayag. Other languages had very low percentage as compared to the population of Uttar Pradesh.
