Population	249,462
Number of Tahsils	2
Number of Vikas Khand...	3
Number of Town...	1
Number of Villages ...	957

Takula and Bhaisiya Chhana Vikas Khand are spread over in two districts namelyBageshwar and Almora.

MOTIF

Baghnath Temple

The temple of Bageshwar Mahadeva, locally known as Baghnath temple was erected by the Chand Raja (Hindu ruler) Lakshmi Chand (1597-1621) around 1602 AD. In close proximity is the old temple of Vaneshwar as well as the recently constructed Bhairava (As Bhairava, Shiva is the terrible destroyer, his consort is Durga) temple. It is said to derive its name from the local temple of Lord Shiva as Vyageshwar, the Lord Tiger. The various statues in the temple date back from 7th century AD to 16th century AD. The significance of the temple finds mention in Skand Purana (sacred legend of Hinduism) also. A large fair known as Uttraini is held every year on the eve of Makar Sankranti. People come to this pilgrim centre and take holy dip in the river Saryu. It is most important temple dedicated to Lord Shiva and his wife Parvati (the mountain-dwelling wife of Shiva) in the form of tiger and cow.

Annexure VII	Age, Sex and Education in the District, 1991 and 2001 Census	500
Annexure VIII	Distribution of Different Mother Tongues Returned in 1991 and 2001 Census	502

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. J.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision of Shri Mohd. Ahmad, Assistant Director. I am also thankful to Shri Shailendra Singh Negi, S.I. Grade-I, Shri S.K. Banerjee, S.I. Gr. II and Shri U.G. Jhingran, S.I. Gr. III who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map)and Shri J.P. Purohit, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. Bageshwar district ranks 11th in terms of population in the state.
2. Bageshwar is one of the least urbanised districts in the state having only 3.1 per cent of the population in urban areas which ranks 12th in the state.
3. Bageshwar district has population density of 111 persons per sq.km.which is less than the state average of 159 persons per sq. km.
4. Bageshwar district ranks 4th in terms of sex ratio (1,105) which is higher than the state average (962).
5. Bageshwar district ranks 8th in literacy (71.3 per cent) and is nearly equal to the state average (71.6).
6. There are only 74 uninhabited villages out of total 957 villages in the district.
7. Decadal growth rate of the district is 9.2 per cent, which is nearly half of the state average (20.4 per cent).
8. The district consists of only two tahsils namely Bageshwar and Kapkot and only one statutory town Bageshwar of NPP status.
9. Bageshwar tahsil has 679 inhabited villages, while Kapkot tahsil has only 204 inhabited villages.
10. There are 51,949 households in the district accounting for 3.26 per cent of the total households in the state.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in two parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in two parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the nine-fold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

The district of Bageshwar was established in the year 1997. Prior to this, Bageshwar was part of Almora district. The area covered by the district lies in the part of Central Himalayas. The region has been known by the names of Kiratamandala, Khasadesha, Kulindavishya, Kurmachala, Kurmavana, Kurmaprastha and Kunmaon; and has been traditionally described as the land of gods and demons, and a place of penance for the seers. Numerous legends are associated with different places, mountains, rivers and forests of the district. It is believed that in order to save the earth, Vishnu, in his second incarnation, assumed the form of a Kurma (tortoise) and remained standing for three years on a particular spot. The specific rock on which the god stood, came to be known as the Kurmshila, the entire hill as Kurmachala and the surrounding forest as the Kurmavana. The name Kumaon is supposed to be derived from these terms. The name, gradually came to denote, the entire region, extending from the snow ranges in north to the tarai in the south.

Bageshwar is said to derive its name from the local temple dedicated to Shiva as Vagishwar (the lord of speech) or Vyaghreshwar (the tiger lord). Vaidynatha (Baijnath) is said to be the place where Shiva had rested and Himachala (the Himalayas personified), father of goddess Parvati, came to invite Shiva to his palace to marry his daughter with him at the instance of Brahma. Bageshwar is assumed to be the place where, Shiva and Parvati rested after their marriage and were worshipped by the Gods who renamed Shiva as Vagishwara (lord of speech). Lord Shiva is said to have attained the form of a tiger (Vyaghra) in order to dupe the rishi Markandeya and made him swallow the Saryu (Sarju) to flow on. Therefore, Shiva is also called Vyaghreshwar whose corrupted name is now known as Bagheshwar.

The district seems to have been inhabited since pre-historic times, its early inhabitants being probably the Yakshas, Asuras, Rakshasas, Daityas or Danavas and Nagas, who appear to have been supplanted, in

the course of time, by the Kiratas, Khasas and Kunindas. There are still few villages in the district which bear the name Jakh (a corruption of Yaksh). It points to the association of the Yakshas with this district. The Asura (Daitya or Danava) king Hiranyakshipu and his successors down to Banasura are said to have ruled over these Himalayan regions in early times. One legend has it that the several heads of Kumbhakarna, the brother of Rakshasa king Ravana of Lanka, was thrown by Rama into Kurmachala because the Rakshasas already resided in these parts.

About the 2nd quarter of the 3rd century of the Christian era, the empire of Kushanas crumbled down and the beginning of the well known Katyuri dynasty of the district was assigned. Local traditions attribute to this dynasty a Saka or Kushana origin. The dynasty is said to have belonged to the solar race. It is very likely that the Katyuri dynasty had a Saka (or Kushana) cum Khasa (or kuninda) origin and was established about the end of the 3rd or the beginning of the 4th century A.D. Its capital, Katripura or Katyuripura, was also known as Kartikeyapura, probably after Kartikeya, the family deity, and was located near Baijnath in the Katyur Valley. About 350 A.D. the kingdom was conquered by the Gupta Emperor, Samudragupta. This put an end to the early Katyuri kingdom; the family probably dispersed and fled northwards into what is now the Chamoli and Pithoragarh districts and its territories passed under the sway of the Gupta emperors. But when, towards the end of the 5th century, the Gupta Empire began to decay, the district appears to have become independent under a new local dynasty and the kingdom is referred to as Parvatakara Rajya or Hill Kingdom. It was later on known as Paurava Kingdom of Brahmapura (Name of city), independent and fairly prosperous and it covered whole of the district.

By the end of 7th Century, the power of kings of Brahmapura declined and the Katyuris took advantage of the weakness of their erstwhile overlords and revived once more. The stone inscriptions, discovered at Bageshwar, contain a record of three royal grants, the first of which mentions one Basantdeva. Basantdeva's son and successor, according to the traditional lists, was Katarmal. Katarmal, who perhaps, lived about the beginning of the 8th century, is an important name in the history of the district. He seems to have been a powerful and independent monarch. Katarmal's successors Brahmadev and Viradeva governed the district from their seats at Vaidyanatha. Karttikeyapura that is Baijnath in the Katyur valley generally dates from 10th to 12th Century A.D.

The most important of the new dynasties, which saw their rise during the period of the decline of the Katyuris and at their expense, was that of the Chand Rajputs who were destined later to reunite the whole of Kumaon under one rule. When Som Chand came to the helm of affairs he found that the entire territory was divided into a number of small Pattis, each under a semi-independent ruler. In order to counterbalance the influence of the local lords he invited several families of Joshis, Pandeys and Bishts from the plains and appointed some of their members to important offices.

Deep Chand (1747-77) was the last important Chand raja of Kumaon. During the late 18th century Gorkha's of Nepal took control of the administration of the district. In 1815, Anglo-Gorkha war took place and the British issued a proclamation declaring the annexation of Kumaon to British India. The treaty by which Kumaon was ceded to the British was concluded on December 2, 1815 and ratified on March 4, 1816. The great upheaval of the Indian people against British domination in 1857 appears to have little impact in this district. About the beginning of the 20th century, the inhabitants of the district gradually became conscious of their civic rights and of their exploitation by the alien government. The people of this district took active part in the freedom movement. The Quit India Movement of 1942 evoked a zealous response in this district. The sacrifises of the fighters for freedom ultimately bore the desired fruit. And on August 15, 1947, the country was declared independent of British domination.

(iii) Administrative Setup

Bageshwar district lies in Kumaun region of Uttaranchal state. It appeared as new district out of Almora district on September 15, 1997. The usual administrative setup is district, tahsil, Community Development Block and Village Panchayat in the rural areas. The district has two tahsils – Bageshwar and Kapkot. Tahsil Kapkot has 102 Gram Sabhas and tahsil Bageshwar has 242 Gram Sabhas. The district has two tahsils or sub divisions are further divided into three complete C.D. blocks – Kapkot, Garud and Bageshwar and two partial C.D. blocks – Takula and Bhaisiya Chhana. These two partial C.D. blocks are also spread over Almora district. During 1991-2001 new tahsil Bageshwar was created vide G.O. number 2796/1-5-97-327/97-210-5 dated 15.09.1997. Another tahsil Kapkot was also newly created vide G.O. no. 2782/1-5/97-207/97-R-5 dated 12.09.1997 by transferring 214 villages of tahsil Bageshwar of district Almora. Thus with these two tahsils new district Bageshwar was created. There is only one town in the district i.e. Bageshwar(NPP).

Administrative setup of district is District Magistrate, Additional District Magistrate, Sub-Divisional Magistrate inclusive of District Judge,

Superintendent of Police, Chief Development Officer, District Development Officer, Assistant District Development Officer, Chief Medical Officer, Treasury Officer, District Rural Development Authority, District Inspector of Schools, Regional Tourist Officer, District Employment Officer, District Horticulture Officer, District Informatics Officer (NIC, Govt. of India), District Information Officer (State Govt.), General Manager (Distt. Industry Centre), District Election Officer, Distt. Public Relation Officer, Distt. Economic and Statistics Officer, Assistant Director Small Industries, District Forest Officer, Distt. Forest Officer Soil Conservation, DFO Logging, Additional Forest Conservator (Forest Division), Commandant (Home Guards), Executive Engineer, Jal Nigam, Executive Engineer, Electricity Distribution Division, Superintendent Engineer, Public Works Department, Executive Engineer, Public Works Department (Pauri Division), Executive Engineer Rural Engineering Services, Executive Engineer Irrigation, Executive Engineer Mandi Parishad, SDO, Power House etc.

(iv) Physical Features

Location and size

District Bageshwar is attributed as a pious land associated with Lord Shiva. It lies in the Himalayas and consists of a series of ridges and valleys spread over 2246 sq.km. To the north west and north is district Chamoli and Almora on the south, district Pithoragarh in east and south east boundaries. It lies between 30° north latitude and 80° east longitude. The average mean height from the sea level varies between 960 metre to 3920 metre. The district occupies 8 per cent of total geographical area of Uttaranchal.

Physiography

The snow-clad peaks and glaciers lie in the extreme north of the district and the ranges diverging from the Nanda Devi group of mountains extend to the southern parts of the district. The mountains and ridges are separated from one another by a large number of river valleys. The ridges, diverging southward from the mountain mass of Nanda Devi, extend in the north part of the district to the right of Pindar river. A ridge of Nanda Devi runs south westward along the northern boundary of the district to the Nanda Khat (6,611m), Panwali Doar (6,663m), Maiktoli (6,803m) and Mrigthuni (6,855m) peaks and goes on to the Trisul (7120m), a peak of the Nanda Devi group. A minor ridge, known as the Manglachaur Dhar, takes off from the Chovelia peak and runs to the right bank of the Pindar, separating this district from that of Chamoli. In the north-western part of the district the hills are, as a rule, low and the slopes easy, but chains of greater elevation mark the boundaries. All these ridges and spurs are well wooded, chiefly with the pine, oak and rhododendron. The rivers, along with their tributaries and sub tributaries, provide the district with numerous valleys which play an important role in separating the mountain masses from one another and in discharging the surplus moisture of the surrounding tracks. The valleys of the Pindar and its tributaries, the Kaphani, the Sundardhunga, the Sorag and the Baur are covered with forests of rhododendron varied by oak, cypress and fir trees. The tract occupied by these valleys is separated from the rest of the district by a ridge, 3048m. high. The valley of Gomti, also known as the Katyur Valley, opens into the valley of the Saryu near Bagheshwar and occupies the pattis of Katyur Malla and Katyur Talla. In the valley of Garur which opens into the Gomti valley, south of Baijnath, lies the Patti of Katyur Bichla.

On the basis of geology, soils, topography, climate and natural vegetation the district is divided into three sub-micro regions –

1. **Greater Himalayas** – The region extends in the extreme north of the district and bounded by Pindar and Saryu Basin in the south. It is a high mountainous zone of Himalaya and is covered with permanent snow. The southern parts of Nanda Devi and Trishul mountains are mainly covered under this mountainous zone. The region has the rocks of Martoli Series of upper pre-Cambrian period. Pindar and Saruya rivers originate from this region. There are no roads or infrastructural facilities in this region.

2. **Pindar Basin** - It lies in the middle part of the district falling to the south west of greater Himalaya region. It is bounded by Saryu basin in the south. Average height of the region varies from about 2000 to 4000 meters above the mean sea level. Crest of the ridges, falls with steep and gentle slopes at different places are the main characteristics of the region. Pindar and its tributaries flow in narrow, deep valleys with steep gradient. The region is composed of Jaunsar series and Shimla slates of upper Pre-Cambrian and lower Palepzoic periods. This region is covered with dense mixed jungles mainly of Banj.

3. **Saryu Basin** – It extends in the southern part of the district covering major part of Bageshwar tahsil. It is bounded by greater Himalayas and Pindar Basin, sub-micro regions in the south, lesser Himalaya region in the west and Pithoragarh district in the east. Gentle slope ridges and valleys characterize the topography of the region. Ridges are covered with dense mixed jungles, mainly of pine. Few places in the valley are flat near Garur and Baijnath and have good conditions for agriculture. Average height varies from 1000 meters to 2400 meters above the mean sea level. This region is composed of crystalline and metamorphic rocks of Triassic River Saryu flows in the south west direction till river Gomti joins it at

Bageshwar from western direction.

The best known trekking route in Kumaon, earlier located in Almora district now in Bageshwar district, the trail follows the Pindar river to its source on the glacier are Nandakot (6,860 m.) Chhanguch (6,322 m.) and Nandaghunti (6,310 m.). On the east and west of Pindari glacier are the Kaphni, at the foot of Nandakot and Sunderdhunga glaciers. Further west at the snout of the Namik glacier rises the Ramganga river. Among these Pindari glacier is 3 km. long and ¼ km. broad connected to the south-western slope of the outer walls of the Nanda Devi Sanctuary. Tents and mountain boots are necessary.

Drainage

Pindar, Saryu and Gomti are main rivers of the district. Pindar river rises from Pindari Glacier, lying between the Nanda Kot and Nanda Devi mountains, at an elevation of 3816m. above sea-level. It runs southward taking a westerly course near Letanli and is joined on the right by the Sorag Gad near the village of Sorag, and later by the Baur, also on the right, to the south-east of Kunwari, where it leaves the district to enter district Chamoli. Kaphni, a stream is a feeder of the Pindar, rises in the Kaphni Gal glacier and runs in a southerly direction. It takes a westerly direction to join the Pindar. During the rains the water of the united stream at the confluence is of milky colour. It is separated from the Pindar river by a ridge culminating in a peak 5,652 m. high. Other tributaries of Pindar are Sundardhunga, Sorag and Baur. Saryu running south-westward, receives water of numerous minor streams from either side. About 50 km. from it's source receives the Pungar from the left and a kilometer further downwards, the Lahor from the right. From this point it runs southward to Bageshwar where it is joined by the Gomti river from the right. Gomti is a stream which is an important tributary of the Saryu, rises on the northern boundary of the district. Reaching the neighborhood of Baijnath, it is joined by the Garur on its right bank. It flows through Katyur Talla, till its junction with the Saryu near Bageshwar. There is no lake of any considerable importance in the district except the Tarag Tal, surrounded on three sides by high mountains. It is a picturesque lake formed by a natural dam by big boulders, below which a stream gushes out. A rough path leads to this place from Ganai and continues over the Bhatkot ridge to Baijnath, but the route is very difficult.

Climate

This Himalayan district has a highly rugged terrain, marked with steep and high ridges and deep and narrow valleys. The elevation is high ranging from 960 m. to 1,850 in the valleys and 1850 m to 3,920 m above sea level towards the north. The climate, therefore, depends largely on elevation and exposure to the sun and winds. The chief climatic feature of the district is its severe winter which lasts from December to March, and during which considerable precipitation occurs, often as snowfall. The district, situated as it is on the southern slopes of the Himalayas, gets most of its rainfall from the monsoon current which penetrates through the valleys from June to September. Depending upon the altitude topography and location, temperature variations from place to place are considerable, ranging between the maximum of 34.2°C and minimum (-) 0.4°C. In the valleys, pools of cold stagnant air cause considerable variations in day temperatures. Average rainfall recorded in 1997 in undivided Almora was 1,192 mm.

The relative humidity increases rapidly with the outset of the monsoon. Hill fog is common during the monsoon. In the winter months morning fog is frequent in the valleys. There is a tendency for a diurnal reversal of winds blowing up the slopes during the day (Anabatic flow) and the down the slopes at night (Katabolic flow). Skies are heavily clouded during the monsoon months and for short spells when the region is affected by western disturbances.

Natural Economic Resources

Forestry

Total forest area recorded during 1996-97 in the district was 87942 hectares which was about 38.24 percent of the total area. Dhakuri, Sundardhunga and Lili are chief forest ranges. Ringal is the principal forest tree found in the district covering an area of 4320 hectare. It is a very useful tree for the local people for making mat, basket and for thatching the roof of their houses. Beside there are other forest trees such as Chir, Deodar, Tun and Bamboo. In these forests about 240 species of herbs are found which are useful for medicines as described in the Ayurvedic texts. Salam Pairja, Ratanjot, Pati Somlata, Sagina, Murilla, Gandhrayan, Jamboo, Jatamasi, Kirmaurha and Aonla are some of the Ayurvedic herbs found in the forests of the district. These herbs are collected by the trained collectors of cooperative societies and Kumaon Vikas Mandal, separately. These societies pay royalty to the forest department. Spices (Dal Chini and Tejpatta) are also important forest product found in these forests.

The wild life of the district has suffered greatly from reckless shooting, uncontrolled felling of trees, increase in the cultivated area and development of transport facilities. Still, there is to be found in the district large varieties of animals, birds, reptiles and fish. Sambur, barking deer and musk deer are found

in high altitude areas. The Neelgai is occasionally found at the foot of the hills. The goral or Himalayan Chamois may be found in places as high as 3350m. above sea level. The tiger is rarely seen. The Himalayan black bear is common throughout the district. The district is very rich in bird life. Birds of prey, eagles, hawks, falcons and vultures are very common. There are many species of birds peculiar to the colder regions among them many species of partridges, and pigeons are found. Among other birds found in the district are swifts, kingfishers, wood peckers, cuckoos, tree creepers, robins and warbles. In the district about 34 species of snakes, 26 being non poisonous are found, cobra and krait are very common in low hills. Among the non-venomous snake, the python is the most notable. The leech is active during the rains.

Minerals and Mining

Very rich deposit of high grade crystalline magnesite occur extensively. Magnesite is mainly used in making refractory bricks for the iron and steel industry and also in the preparation of sorrel cement and many magnesium salts of pharmaceutical value. Slate, limestone, sand, bajri and stone are other minerals found in the district.

Soil

The type of soil which are found in the district are the same as usually found in the hilly areas viz, the gravel sand, sandy loam, clayey loam, heavy clay and calcareous soil. They differ in colour and texture according to locality altitude and the composition of subsoil rocks. The major part of greater Himalayas is under snow. The udalfas is found in some southern part of region. The variety soil in Pindar basin is composed of Jaunsar series and Simla states of upper pre Cambrian and lower Paleozoic periods. It has high base of status soils including sub-orders Udalfs and Orchrepts – orthents – udalfs. Soils in the Saryu basin are Udalfs and orchrepts – orthents-udalfs. The ridges and valleys have terraced fields which are suitable for agriculture. The soils on slope and ridges are sandy and when dry, grayish, become reddish when moist. The brown forest soil is most extensively found in the district. It is sandy along sharp gradients and loamy or clay on middle slopes.

Land and Land use pattern

Land in the district is classified as talaon (irrigated), upraon (dry) and ijran (inferior terraced land, cultivated intermittently). The valleys of Gomti and Garur are the best type of talaon land. They are low lying, therefore, ensure a mild climate, suitable for growing many tropical crops. The soil consists of fine alluvium. The fields can be easily terraced on account of their soft and even surface. These low riparian lands are, therefore, very densely populated and agriculturally very highly developed. Upraon lands are usually those upland slopes which are situated at higher elevation than the talaon lands. They possess no means of irrigation except rainfall. According to statistics available from Statistical Patrika 1999-2000, out of the total land of 229,965 hectares, forest covered 87,942 hectares, cultivable waste land 25,587 hectare, present fallow 296 hectares, other fallow 3,440 hectares, barren and uncultivable land 17,649 hectares, non-agriculture use 4,518 hectares, meadows 32,003 hectares, orchards and shrubs 18,265 hectares and net area sown 40,265 hectares. Multi-cropped land was 23,870 hectares. Total number of land holdings in the district was 51,508. Land holdings in the district are small in size and numbers, small holdings are in large numbers. The number of land holdings with the size of less than 0.5 hectare is 29,863 (0.18 per cent), occupying land area of 5,352 hectares, whereas land holdings of the size of 1 to 2 hectares numbered 6,793 (1.38 per cent) with land area of 9,361 hectares. Large land holdings of the size 10 hectares and above are to the extent of 123 are very few in number.

Tenancy

After the enforcement of the Kumaon and Uttarakhand Zamindari Abolition and Land Reforms Act, 1960, the old land tenures were abolished. This Act replaced the multiplicity of tenures existing in the region by three types: the bhumidhar, sirdar and asami. The intermediaries became bhumidhars in respect of groves held by them. Those who were hissedars (shareholders) and khaikars became bhumidhars in respect of lands in their actual possession. A sirdar has a permanent and heritable interest in his land holdings but can use his land only for agriculture, horticulture and animal husbandry, although he can acquire bhumidhari rights under the provisions of the Act. An asami's right is heritable but not transferable or permanent and he can be ejected from his holdings.

Agriculture and Cropping pattern

Being situated in the Himalayas and forming part of Kumaun region, the method of agriculture practiced in talaon lands resembles more or less that prevail in the plain. These lands are always under cultivation and never allow to lie fallow, but in upraon lands, being upland, does not have irrigation facility. These are dependent on rains. Likewise, agriculture on ijran lands which are found on the slops of high hills, the soils being very poor, full of stones and pebbles. For larger period they are fallow. Kharif and rabi are the main crops of the district. The main crops of kharif are paddy, mandua, sawa, maize, pulses, groundnut, castor, til, mustard and linseed. Rabi crop is composed of wheat, barely, gram, pulses, tobacco and vegetables. Owing to small size of land holdings in larger number, the cultivation in the district is

uneconomical. The total area cultivated under wheat has been 13,606 hectares, paddy 10,297 hectares, barely 1,097 hectares, maize 386 hectares, mandua 8,520 hectares, oilseeds 977 hectares, potato 438 hectares, pulses 804 hectares and sawa 3,911 hectares. Crop density during the year 1999-2000 has been 159.9.

Irrigation

As in the plains, cultivation in the hills, also depends largely on the availability of irrigation facilities. Rainfall is one of the most important sources of water supply for the agriculturists. The traditional method of carrying water from the rivers to the field is through guls (channels); cut along the contour of the land. A small temporary dam is laid across the stream to divert the water into the gul. For a greater part of the irrigated area, the cultivators have themselves provided the sources of irrigation. The government have also helped them financially to construct individual or community guls (channels), hauz (tanks) and small reservoirs for irrigation. During 1997-98, the facilities of irrigation available in the district included 341 km. long canal, 1,428 hauzs and 659 km. long guls. The irrigated area is 8.7 per cent of the net area sown of the total area irrigated 39.3 per cent or 1,371 hectares has been reported to be irrigated by canals and 60.7 per cent or 2,118 hectares irrigated by other sources in the district.

Animal Husbandry

Cows and buffaloes are reared mainly for milk and male cattle are used for ploughing the fields. Sheep and goats are reared chiefly for wool, skin and flesh. The hill dog, specially the variety reared by Bhotias, is noted for its strength and faithfulness as a watch animal. At the time of livestock census 1993, the district had the bovine population of 124,023, buffaloes 46,973, sheep 23,950, goats 67,362, horses numbering 460, pigs 50 and other animals 7,464. Under the integrated rural development programme farmers are being provided high breed milching animals. There were 16 registered milk societies in the district, producing 112,785 liters milk. Few milk societies run by women folk of Bageshwar Garud are also functioning. For developing the progeny of the cattle and maintain the health of the animals the district had the services of 10 veterinary dispensaries, 18 animal development centers, 4 artificial insemination centers and 8 sub centers during 1997-98.

Fishery

Fishes abound in almost all the streams of the district. All variety of fishes abound in the rivers, streams, rivulets and nullahs of the district. Among the larger species, the commonest are the mahaseer, 'gulal' 'asla', and kalabans. The 'gunch' or fresh water shark usually inhabits the deeper pools of the Saryu. Fisheries has not been developed in this district. Government has initiated many schemes to promote fisheries in the district.

Industry

The economy of the district is based on mining of Lisa Kharia and money order, signifying the exodus of industrious people. It is, therefore, industrially very backward district. There are few medium size industries in the district. Almora Magnesite at Jhirauli, Mini Plant Cement at Jhirauli, Kumtron Ltd. Bageshwar, Navbharat Minerals manufacturing soap stone powder are few that can be mentioned. Small scale industries, manufacturing many useful items cater to the needs of local people. Artistic copper utensils are made in this district. Small scale and cottage industries of the district are carpet, aasan, thulma, chutka and shawl. It is traditionally produced by Bhutias. There are 519 registered small scale units and 1651 rural crafts units in the district during the year 1999-2000. These units deal with oil expellers, paddy dehusking, bakery, biscuit manufacturing, grinding masala, biroja varnish, resin turpentine, furniture, ringal industry, grill, channel and welding, motor repair, watch and radio repair, mini poultry homes, cement block, photography, tent house, tailoring, copper industry and woolen handicrafts etc.

Trade and Commerce

Bageshwar, being located on trade routes connecting it with the plains in the south and Tibet in the north, was an important mart in ancient and mediaeval times. Food grains, spices, cotton cloth, salt, sugar and jaggery were procured at Haldwani and Ramnagar. Part of the imported goods was exported to Nepal and Tibet. The main products of the district which find their way to Haldwani and Ramnagar are wool and forest products like timber, medicinal herbs, resin and wax. The other commercial crops are ginger, hemp, turmeric and chili. The extension and modernization of roads have accelerated the pace of trade. The trade with Tibet, however, ceased after 1962.

Transport

The region covered by the district has from early times, been connected with Tibet, Nepal and what are now districts of Garhwal, Chamoli, Almora, Pithoragarh and Nainital. The total network of roads in the district was 452 km. during 1996-97, out of which 404 km long road was maintained by Public Works Department. The length of pucca road per lakh of population is 197.8 km. and length of roads per thousand sq.kms. is 286.5 km. Road transport is the only way. Taxis, government and private buses and trucks are the main modes of transport in the district. Buses are plying under the aegis of state road transport corporation and Kumaon Motor Owners Ltd.

Electricity and Power

By 31.3.2000, 664 villages have been electrified, and total consumption in the said period was 74,128 thousand kwh. Nearly 74% villages have been electrified and 198 villages are yet to be electrified as per socio-economic statistics 1999-2000.

Gram Panchayats and Village Development

In the strengthened Panchayati Raj system, Gram Panchayat play a pivotal role in the development of the village economy. A total of 35 Nyay Panchayats and 344 Gram Sabhas exist in the district. Gram Sabha prepares plan and developmental activities are carried out from the funds made available by government. The jurisdiction of Gram Sabha is mainly concentrated within the village. Election are periodically held to elect members and Pradhan of Gram Sabha. As many as 17 departments have been attached to Gram Sabha in order to ensure that the benefits of government programmes may reach to the common people. Gram Sabha in the district controls and manages all the activities concerned with the welfare of village community. They also prepare priority development plans for the overall growth of the village dwellers. Members of the Gram Sabha are responsible for day to day administration. The main duties of the Gram Sabha relate to construction, repair of village property, cleaning and lighting of fairs, establishment and management of common land and grazing grounds, maintenance of schools etc. and promotion of social and communal harmony and goodwill amongst the villagers.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second

household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) a minimum population of 5,000;
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from

the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Majhwar
28 Mazhabi
29 Musahar
30 Nat
31 Pankha
32 Parahiya
33 Pasi, Tarmali
34 Patari
35 Rawat
36 Saharya
37 Dhangar
38 Dhanuk
39 Dharkar
40 Dhobi
41 Dom
42 Domar
43. Dusadh
44 Gharami
45 Ghasiya
46 Gond
47 Gual
48 Habura
49 Hari
50 Hela
51 Kalabaz
52 Kanjar
53 Kapariya
54 Karwal
55 Khairaha
56 Kharwar (excluding Banbasi)
57 Khatik
58 Khorot
59 Kol
60 Kori
61 Korwa
62 Lalbegi
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not

necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of

'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the .}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence

migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

The total population of the district is 249,462 in which 241,659 live in rural and rest 7,803 in urban parts. There are two tahsils in district namely Kapkot and Bageshwar. The most populous tahsil is Bageshwar followed by Kapkot. The urban population in the distrit is about 3.1 percent The urban population is 4.52 per cent in Bageshwar tahsil. There are 957 revenue villages in the district out of which 883 are inhabited at the 2001 Census and remaining 74 are un-inhabited. The total rural population of 241,659 is spread over 5 CD Blocks and 17 inhabited forest villages. The most populous CD Block is Kapkot with a population of 77,031, but the maximum number of inhabited villages (371) are in Bageshwar CD Block. More than half of populated villages have a population of less than 200 and such villages form as high as about 66.3 per cent of total populated villages in Bageshwar CD Block. Although the population density in the rural part of the district is about 10.8. Highest proportion (32.3 per cent) of villages are in the population density range of 501+ per square kilometer. Such villages contain as much as about 39.7 per cent of total rural population.

Size - Class and Status of Towns :

The total urban population of 7,803 persons live in Bageshwar only in the district town. The town is

class V towns having the civic status of Nagar Palika Parishad (NPP). Bageshwar tahsil contains Bageshwar town only.

Population growth :

At the present territorial jurisdiction, the population of the district was 228,407 at 1991 Census and growing by 9.2 per cent during the decade 1991-2001, it is 249,462 at 2001 Census. The decadal growth at 9.2 per cent in the district has been at lower level than the state at 20.4 per cent.

Population Density :

The district has an area of 2,246 square kilometer. The population density in the district is 111. In the rural areas of the district the density is about 108.

Sex - Ratio :

The sex-ratio in the district at 1,105 is way ahead to 962 at the state level. Indeed the sex-ratio at the district has been all along higher in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is higher in rural areas. Among tahsils, highest sex-ratio is in Kapkot and lowest in Bageshwar. Among CD Block the sex-ratio is highest in Garud at 1,155and lowest in Takula at 1,060. Out of 883 inhabited villages in the district there are about 5.9 per cent villages (with 1.2 per cent of rural population) which are having a sex-ratio below 700. In the urban parts of the district the sex-ratio is 810 in Bageshwar. The sex-ratio of population on the age-group 0-6 is 930 in the district which is lower than the state being only at 908. As against a sex-ratio of 932 in the age-group 0-6 of rural population of the district, it is highest at 964 in Takula CD Block and lowest at 883 in Bhaisiya Chhana CD Block. It may be noted that out of 883 inhabited villages in the district, in more than 27.5 per cent of villages with about 10.3 per cent of rural population, the sex-ratio in the age-group 0-6 is less than 700. As against the 0-6 age group sex-ratio of 932 in the rural area of the district it is only 838 in urban area. In the only town of this district, sex ratio is at 838 in Bageshwar.

Work Participation Rate :

In the total population of the district of 249,462 as much as 47.6 per cent are workers and rest of 52.4 per cent are non-workers. Among workers 34.3 per cent are main workers and rest of 13.3 per cent are marginal workers of the total population. In absolute terms, females outnumber males as main and marginal workers. The extent of main workers is highest, at about 41.2 per cent, in Kapkot tahsil and lowest at about 31.3 per cent in Bageshwar tahsil. In case of marginal workers, the population is highest in Bageshwar tahsil at 15 per cent in comparison to only about 9.6 percent in Kapkot tahsil. The extent of workers in rural parts and non-workers in urban parts are at higher side. In the district among workers about 74.5 per cent are cultivators and 20.3 per cent other workers.Over 90 per cent of female workers are engaged as cultivators.

Literacy :

In the district about 71.3 per cent population is literate. The literacy is about 86.7 per cent in urban areas and about 70.8 per cent in rural areas. The males literacy is as high as 87.7 per cent as against about 57.0 per cent females literacy, and, therefore, the gap in male/female literacy rate is 30.7 per cent. In rural areas among all CD Blocks, the highest literacy is at 78.7 per cent in Takula and lowest at about 65.6 per cent in Kapkot. The literacy among males in rural areas is about 87.5 per cent in comparison to about 56.3 per cent among females. The lowest female literacy of about 49.4 per cent is in Kapkot CD Block. Also the gap in male/female literacy rate is highest in this CD Block which is about 34.9per cent. In about 36.5per cent of villages covering also about 38.3 per cent of rural population the literacy range is 71 to 80. As far as the urbanities in the district are concerned, there is only one town exists in the district i.e., Bageshwar (NPP) and the literacy rate of the town is 86.7 percent, which also represents the urban literacy rate of the district. Similarly, the male and female literacy rate in Bageshwar (NPP) i.e., urban part of the district is about 90.8 percent and 81.6 percent, respectively, which is quite high. Still the gap in male-female literacy rate comes at 9.2 percent. The literacy among scheduled castes in the countryside is about 64.5 per cent and about 76.0 per cent in the town. The literacy rate for scheduled tribes is about 78.9 per cent in rural areas and 87.8 per cent in the urban area.

(viii) Brief Analysis of PCA Data

At the 2001 Census Bageshwar district presents a vivid picture of its population by varying parameters. A few of the peculiar characteristics of the population is being highlighted through the following inset tables.

TABLE 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001			Total	Rural	Urban	1991	2001
		Total	Rural	Urban	Total	Rural	Urban					
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kapkot	70,407	70,407	0	77,031	77,031	0	9.4	9.4	0	0	0
2	Bageshwar	158,000	152,228	5,772	172,431	164,628	7,803	9.1	8.1	35.2	3.7	4.5
	District	**228,407**	**222,635**	**5,772**	**249,462**	**241,659**	**7,803**	**9.2**	**8.5**	**35.2**	**2.5**	**3.1**

Note: As the district Bageshwar was carved out from the district Almora in the year 1997, therefore, recasted figures have been taken for the year 1991.

The growth rates of each tahsil in the Bageshwar district for total, rural and urban areas and percentage of urban population to total population is given in table1. The decadal growth rate of the district is 9.2 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 8.5 and 35.2 per cent, respectively. Out of the total population of the district 96.9 per cent lives in rural areas while 3.1 per cent lives in urban areas of the district. The highest growth of urban population is recorded in Bageshwar tahsil (35.2 per cent) and nil is registered in Kapkot tahsil since this tahsil is entirely rural. Urban population is concentrated only in Bageshwar tehsil. Kapkot (tahsil) has the decadal growth rate of 9.4 per cent, while Bageshwar (tahsil) has the growth rate of 9.1 per cent for the total population.

TABLE 2:
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499	
			Persons	Males	Females		Males	Females		Males	Females

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 883 inhabited villages, 474 (53.7 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 285 villages having 32.3 per cent villages of the district while in the size class of 500-999 population claims 96 villages with 10.9 per cent of the total villages. In the district 23 villages (2.6 per cent) are in the size class of 1,000-1,999 and 5 villages (0.6 per cent) are in the size class of 2,000-4,999. None of villages in the district fall in the ranges of 5,000 and above population.

TABLE - 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town - NIL
(b) Denotified - NIL
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4

DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	25	2.8	1,691	0.7
11-20	10	1.1	512	0.2
21-50	37	4.2	4,409	1.8
51-100	55	6.2	11,048	4.6
101-200	131	14.8	37,748	15.6
201-300	161	18.2	36,602	15.1
301-500	179	20.3	53,626	22.2
501 +	285	32.3	96,023	39.7
Not known	0	0.0	0	0.0
District Total:	**883**	**100.0**	**241,659**	**100.0**

Table 4 shows the distribution of villages by opulation density ranges. The inhabited villages of ıe district have been grouped under eight different ınges of density. The maximum number of village e 285 accounting for 32.3 per cent of the total ıhabited villages of the district fall in the density ınge of 501+ persons having 39.7 per cent population. The lowest ranges of 11-20 & 0-10 persons per sq. km. cover 10 villages (1.1 per cent) and 25 villages (2.8 per cent) respectively. In the medium density ranges of 21 to 50 and 51-100 persons per sq. km. account for 4.2 and 6.2 per cent of inhabited villages respectively. Both these ranges claim 6.4 per cent rural population.

TABLE 5
SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	918	943	668	944	944	-
1911	907	944	585	939	939	-
1921	915	902	547	960	960	-
1931	913	948	604	959	959	-
1941	907	953	570	973	973	-
1951	940	990	669	955	955	-
1961	947	995	695	937	937	-
1971	940	990	721	955	975	648
1981	939	987	767	1,041	1,048	788
1991	940	982	810	1,055	1,062	812
2001	962	1,007	845	1,105	1,116	810

Note: Sex ratio has been defined here as the number of females per 1000 males.

The above table shows that sex ratio in the state lie in the range of 907 to 962 during the census year 1901 to 2001. Highest sex ratio of 962 is observed in the year 2001. The rural areas of the state accounted sex ratio of 902 in 1921 to 1007 in 2001 whereas in the urban areas it ranged from 547 in the year 1921 to 845 in the year 2001. The sex ratio in the state did not follow a definite trend.

At the district level there is a favourable sex ratio since 1981 to 2001 as whole. Since 1901, sex ratio declined slightly in the years 1911, 1931, 1951, and 1961. The rural part of the district follow the total trends up to the census year 1961 as there were no urban units in the district. The urban sex ratio lie in the range of 648 to 810 during 1971 to 2001.

TABLE 6
SEX RATIO BY TAHSILS, 2001

Serial Number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kapkot	1,108	1,108	-
2	Bageshwar	1,104	1,120	810
	District Total:	**1,105**	**1,116**	**810**

Table 6 gives sex-ratios for total, rural and urban areas at tehsil level as per 2001 census. There are 1105 females for every thousand males in Bageshwar district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas. The sex-ratio among rural and urban population is 1116 and 810, respectively.

TABLE 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Takula	1,060
2	Bhaisiya Chhana	1,152
3	Kapkot	1,108
4	Garud	1,155
5	Bageshwar	1,100
6	Forest Villages	204
	District (Rural) Total:	**1,116**

The table 7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 1116 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 1155 females is found in Garud C.D. block and is followed by 1152 (Bhaisiya Chhana), while the lowest of 1060 is recorded in Takula C.D. block. The sex-ratios of Bhaisiya Chhana and Garud C.D. blocks are higher than the district rural average of 1116 females and in remaining blocks, this value is below the district average.

TABLE 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	52	5.9	2,846	1.2
700-749	5	0.6	3,171	1.3
750-799	16	1.8	4,886	2.0
800-849	27	3.1	4,125	1.7
850-899	17	1.9	4,527	1.9
900-949	49	5.5	8,939	3.7
950-999	51	5.8	18,147	7.5
1000-1099	151	17.1	48,988	20.3
1100+	515	58.3	146,030	60.4
District Total:	**883**	**100.0**	**241,659**	**100.0**
Sex ratio (Rural) for District:		**1116**		

Table 8 presents the distribution of villages by nine sex-ratio ranges based on 2001 Census. The maximum number of villages i.e 515 accounting for 58.3 per cent of the total villages having largest population of 60.4 per cent in the district fall in the sex-ratio range of 1,100+. It is preceded by the sex-ratio range of 1000-1099 which claims 151 villages (17.1 per cent) and 20.3 per cent population. The range of 950-999 claims 51 villages (5.8 per cent). This range shares 7.5 per cent rural population of the district while in the sex-ratio range of 900-949, there are 49 villages (5.5 per cent). In remaining sex-ratio ranges of 850-899,800-849, 750-799, 700-749 and less than 700, the number of villages are 17 (1.9 per cent), 27 (3.1 per cent), 16 (1.8 per cent), 5 (0.6 per cent) and 52 (5.9 per cent), respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e., 515 having maximum population (60.4 per cent) fall in the highest sex-ratio ranges of 1,100+ females and above showing that in majority of villages the sex-ratio is significantly higher.

TABLE 9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Bageshwar	NPP	810
Sex ratio (Urban) for the district:			**810**

Table 9 gives the sex-ratio of towns. The sex-ratio in urban areas of the district comes to 810 females per 1,000 males as a whole. There is only one town in the district, therefore, the sex-ratio is the same.

TABLE 10
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serianl Number	Name of Tahsil	Total/ Rural/ Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Male	Female	
1	2	3	4	5	6	7
1	Kapkot	Total	13,780	7,045	6,735	956
		Rural	13,780	7,045	6,735	956
		Urban	0	0	0	-
2	Bageshwar	Total	27,426	14,307	13,119	917
		Rural	26,349	13,721	12,628	920
		Urban	1,077	586	491	838
	District Total:	**Total**	**41,206**	**21,352**	**19,854**	**930**
		Rural	**40,129**	**20,766**	**19,363**	**932**
		Urban	**1,077**	**586**	**491**	**838**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsils/sub-tahsils of the district. Total population in age-group 0-6 is 41260 persons comprising 21352 males and 19854 females. The total sex-ratio in this age-group works out to be 930 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 932 and 838 females in this age-group respectively. The rural sex-ratio in tahsil varies between 920 in Bageshwar tehsil and 956 in Kapkot tahsil. The sex-ratio of 956 are higher than district rural average (932).

TABLE 11

SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Takula	2,296	1,169	1,127	964
2	Bhaisiya Chhana	2,164	1,149	1,015	883
3	Kapkot	13,778	7,045	6,733	956
4	Garud	10,516	5,407	5,109	945
5	Bageshwar	11,372	5,996	5,376	897
6	Forest Villages	3	0	3	
	District (Rural) Total:	**40,129**	**20,766**	**19,363**	**932**

Table 11 gives C.D. block-wise sex-ratio of rural child population in the age-group 0-6 years in the district. The sex-ratio is 932 for the district (rural). The sex-ratio of C.D. block varies between 883 to 964. It is highest in Takula C.D. block i.e. 964 followed by 956 in Kapkot C.D. block and lowest 883 females is found in Bhaisiya Chhana C.D. block. The sex-ratio of Takula, Kapkot and Garud C.D. blocks are higher than the district rural (932) and in C.D blocks Bageshwar and Bhaisiya Chhana the sex ratio is lower to the average of the district rural.

TABLE 12

SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	243	27.5	4,144	10.3
700-749	55	6.2	3,103	7.7
750-799	47	5.3	2,928	7.3
800-849	51	5.8	2,624	6.5
850-899	43	4.9	4,030	10.0
900-949	55	6.2	3,957	9.9
950-999	26	2.9	2,458	6.1
1000-1099	122	13.8	7,135	17.8
1100+	241	27.3	9,750	24.3
District (Rural) Total	**883**	**100.0**	**40,129**	**100.0**

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e 243 (27.5 per cent) having a population of 10.3 per cent in the district (rural) fall in the sex-ratio range of less than 700 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of less than 1100+ which claims 241 villages (27.3 per cent) and 24.3 per cent population. Next to it, 122 villages (13.8 per cent) are in the range of 1,000-1,099 with 17.8 per cent population. 43 villages (4.9 per cent)

having 10.0 per cent population fall in sex-ratio range of 850-899. In remaining sex-ratio ranges of 700-749, 750-799, 800-849, 900-949 and 950-999 claim less number of villages and these are distributed as 55 (6.2 per cent), 47 (5.3 per cent), 51 (5.8 per cent), 55 (6.2 per cent and 26 (2.9 per cent), respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that nearly fifty per cent of villages i.e. 44.0 having population (48.2 per cent) fall in the higher sex-ratio ranges of 950 to 999 and above.

TABLE13
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA/ Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bageshwar	NPP	1,077	586	491	838
District(Urban) Total			**1,077**	**586**	**491**	**838**

Table 13 shows that Bageshwar (NPP) is the only town in the district in which sex ratio for 0-6 age group is recorded as 838, which also represents the sex-ratio for 0-6 age group for the district (urban).

TABLE 14
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total/ Rural/ Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Kapkot	Total	77,031	16,702	1,269	21.7	1.6
		Rural	77,031	16,702	1,269	21.7	1.6
		Urban	0	0	0	0	0
2	Bageshwar	Total	172,431	47,822	674	27.7	0.4
		Rural	164,628	46,223	350	28.1	0.2
		Urban	7,803	1,599	324	20.5	4.2
District Total:		**Total**	**249,462**	**64,524**	**1,943**	**25.9**	**0.8**
		Rural	**241,659**	**62,925**	**1,619**	**26**	**0.7**
		Urban	**7,803**	**1,599**	**324**	**20.5**	**4.2**

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 249,462 total population of the district, 25.9 per cent of the total population belong to the Scheduled Castes and 0.8 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 26 per cent in rural population and 20.5 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Bageshwar tahsil (27.7) while the lowest is found in Kapkot. tahsil (21.7). The proportion of Scheduled Tribes population is 0.7 and 4.2 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in tahsil of Kapkot (1.6 per cent), Bageshwar (0.4) and the lowest percentage of Scheduled Tribes is recorded in Bageshwar tahsil (0.4).

TABLE 15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Takula	16,044	6,346	3	39.6	0
2	Bhaisiya Chhana	12,361	3,460	0	28.0	0
3	Kapkot	77,018	16,696	1,269	21.7	1.6
4	Garud	63,241	16,386	84	25.9	0.1
5	Bageshwar	72,930	20,013	263	27.4	0.4
6	Forest Villages	65	24	0	36.9	0
	District (Rural)	**241,659**	**62,925**	**1,619**	**26.0**	**0.7**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 26.0 per cent of rural population of the district belongs to Scheduled Castes and 0.7 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 39.6 per cent in Takula and 21.7 per cent in Kapkot C.D. block.. The other C.D. block containing the highest percentage of Scheduled Castes are 28 (Bhaisiya Chhana), 27.4 (Bageshwar) and 25.9 (Garud).The highest proportion of 1.6 per cent Scheduled Tribes population is counted in Kapkot C.D. block and is followed by 0.4 (Bageshwar) C.D. block. The lowest percentage of Scheduled Tribes is recorded in Garud (0.1), however, the percentage of ST population in Bhaisiya Chhana CD Block is nil. The Scheduled Tribe population in the district is mainly concentrated in Kapkot and Bageshwar.

TABLE 16
PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	340	38.5	0	0.0
Less than 5	49	5.5	366	0.6
5-10	52	5.9	1,631	2.6
11-20	104	11.8	7,580	12.0
21-30	76	8.6	8,122	12.9
31-40	74	8.4	12,897	20.5
41-50	40	4.5	6,276	10.0
51-75	71	8.0	12,110	19.2
76 and above	77	8.7	13,943	22.2
District Total	**883**	**100.0**	**62,925**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 340 villages accounting for 38.5 per cent of total 883 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 49 villages (5.5 per cent). In 52 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 104 villages constituting 11.8 per cent of the total villages. The range of 21-30 and 31-40 per cent contains 76 and 74 villages respectively. Both these ranges together account for 17 per cent villages of the district. 40 villages fall in the range of 41-50 per cent. 77 villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 22.2 per cent Scheduled Castes population of the district. The maximum of the 22.2 per cent of the Scheduled Castes population is covered by range of 76 and above.

TABLE 17

PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages		Scheduled Tribes Population	Percentage
1	2	3	4	5

31-40	4	0.5	418	25.8
41-50	0	0.0	0	0.0
51-75	2	0.2	148	9.1
76 and above	0	0.0	0	0.0
District Total	**883**	**100.0**	**1,619**	**100.0**

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. 0.7 per cent of rural population of the district belong to Scheduled Tribes population. There are 828 (93.8 per cent) villages where none of Scheduled Tribes have been recorded in the district. 36 (4.1 per cent) villages have proportion of Scheduled Tribes population up to less than 5 per cent and 8 (0.9 per cent) villages have above 11-20 percent Scheduled Tribes population. Besides these, 11 villages are such where proportion of Scheduled Tribes population lie between 2.3 to 10.0 per cent of the total Scheduled tribes population of the district.

TABLE 18

NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bageshwar (NPP)	7,803	1,599	324	20.5	4.2
District(Urban) Total		**7,803**	**1,599**	**324**	**20.5**	**4.2**

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded during 2001 census in urban area of district Bageshwar. The table depicts that scheduled caste population in Bageshwar NPP is around 20.5 per cent. Scheduled tribe population is 4.2 percent in the urban area of the district.

TABLE 19

SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Takula	1,023	2,000
2	Bhaisiya Chhana	1,026	0
3	Kapkot	1,014	1,199
4	Garud	1,111	1,000
5	Bageshwar	987	1,087
6	Forest Villages	600	0
	District (Rural) Total	**1,031**	**1,170**

Table 19 indicates sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 1031 for district (rural). Among the C.D.blocks, the highest sex ratio of 1,111 is found in Garud C.D. block and lowest of 987 is recorded in Bageshwar C.D. block. Among scheduled Tribes the sex ratio for the district (Rural) is 1,170. The highest sex ratio among scheduled tribe is in Takula C.D block (2,000) while the lowest is 1000 in Garud C.D block.

TABLE 20
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bageshwar (NPP)	938	1,118
Sex ratio (Urban) for the district:		**938**	**1,118**

Table 20 shows sex-ratio of Scheduled Caste population in urban area of the district as 938 while for scheduled tribe population it is 1,118. Bageshwar (NPP) is the only town of the district.

TABLE 21
NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

		Rural	**142,634**	**81,779**	**60,855**	**99,025**	**32,420**	**66,605**	**70.8**	**87.5**	**56.3**	**31.2**
		Urban	**5,830**	**3,381**	**2,449**	**1,973**	**930**	**1,043**	**86.7**	**90.8**	**81.6**	**9.2**

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 71.3 per cent in the district. This proportion in rural area is 70.8 per cent against 86.7 per cent in urban areas. In the district the literacy rates of males (87.7 per cent) is much higher than that of females (57.0 per cent). Among the tahsils, Bageshwar tahsil tops with 73.8 per cent literates followed by Kapkot tahsil (65.6 per cent). Kapkot tahsil with 65.6 per cent literates stands at the bottom in the district. Out of two tahsils, the literacy rates of Bageshwar tahsil is higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 30.7 per cent in the district, as a whole. The situation at tahsil level is not much different. However, this gap in urban literacy is low which comes to 9.2 points against the rural areas, where the gap between male and female literacy is 31.2 points.

TABLE 22

NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of CD block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

6	Forest Villages	60	54	6	5	0	5	96.8	100	75	25
District (Rural) Total:		**142,634**	**81,779**	**60,855**	**99,025**	**32,420**	**66,605**	**70.8**	**87.5**	**56.3**	**31.2**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 70.8 per cent of the total rural population excluding the age-group of 0-6 years literates in the district. The corresponding proportion of male and female literates comes to 87.5 and 56.3 per cent respectively which shows very wide gap of 31.2 per cent in male and female literacy. At C.D. block level, Takula C.D. block has the highest rural literacy rate of 78.7 per cent comprising 92.8 per cent males and 65.6 per cent females. The lowest literacy rate in rural areas is noted in Kapkot C.D. block (65.6 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 34.9 points is found in Kapkot C.D. block.

TABLE 23

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	2	0.0
1-10	0	0.0	0	0.0
11-20	1	0.1	7	0.0

41-50	21	2.4	5,880	2.4
51-60	73	8.3	26,016	10.8
61-70	248	28.1	80,567	33.3
71-80	322	36.5	92,474	38.3
81-90	159	18.0	30,710	12.7
91-99	30	3.4	3,773	1.6
100	21	2.4	102	0.0
District Total:	**883**	**100.0**	**241,659**	**100.0**

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate in one village (0.1 per cent) of the district and population of this village is only 2 persons. 21 villages (2.4 per cent) have all the literate population. 73 villages accounting for 8.3 per cent of the total villages are in the literacy range of 51-60 per cent and 248 villages (28.1 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 29 villages (3.3 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 532 villages (60.3 per cent). The range of 71-80 have the maximum number of 322 villages forming 36.5 per cent of the total inhabited villages.

TABLE 24
NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District(Urban) Total		**5,830**	**3,381**	**2,449**	**1,973**	**930**	**1,043**	**86.7**	**90.8**	**81.6**	**9.2**

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. The table reveals that literacy rate is pretty high in the urban area of the district (86.7 per cent). The literacy rate is quite high (above 90 per cent) among males, while female literacy rate is not far behind in the towns (above 81 per cent).

TABLE 25
NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Table 25 shows number and percentage of scheduled caste literacy/illiteracy in rural areas of the district. The literacy rate among schedulded caste in rural areas is 64.5 percent (81.4 percent male and 48.4 percent females). In the C.D blocks, highest percentage of litracy is in Takula C.D blocks (76 percent) and lowest in Kapkot C.D block (59.1 percent). Only, C.D. Block Takula has the literacy rate above than the corresponding district figure (64.5).

TABLE 26
BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5

District Total:	**543**	**100.0**	**62,925**	**100.0**

The table 26 presents the distribution of villages literacy rate range for scheduled castes population at the 2001 census. In majority of inhabited villages which forms about 31.5 per cent and 37.3 of rural scheduled castes population are in the literacy range of 61-70 per centages. In the district there are 3 inhabited villages with scheduled castes population without literacy.

TABLE 27
NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

District (Rural) Total:		**1,100**	**587**	**513**	**519**	**159**	**360**	**78.9**	**92**	**67.9**	**24.1**

The table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is less than literates in the district and CD Blocks. The literacy rate of the scheduled tribes population at about 78.9 per cent is higher than the

corresponding rate of about 64.5 per cent in case of scheduled castes community. The gap in male and female literacy rates at about 24.1 per cent is also lesser than what it is in case of the scheduled castes community (about 33 per cent). The literacy rate is highest in Takula CD Block and lowest in Kapkot CD Block. There are no ST population in Bhaisiya Chhana C.D. Block and Forest villages.

TABLE 29
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers works out 47.6 per cent of the total population in the district, in which 34.3 per cent are main workers and 13.3 per cent are marginal workers. The percentage of the non-workers out of the total population is 52.4. Out of the total male population of the district, 34.0 percent males work as main workers, while 34.6 percent females work as main workers out of the total female population in the district. Male and female marginal workers account for 11.2 and 15.3 per cent, respectively, which clearly shows that the percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tehsils are distributed as 46.3 per cent in Bageshwar tehsil to 50.7 per cent in Kapkot tahsil.

District (Rural) Total:		**Persons**	**241,659**	**83,368**	**34.5**	**33,010**	**13.7**	**116,378**	**48.2**	**125,281**	**51.8**
		Males	**114,199**	**38,376**	**33.6**	**13,076**	**11.5**	**51,452**	**45.1**	**62,747**	**54.9**
		Females	**127,460**	**44,992**	**35.3**	**19,934**	**15.6**	**64,926**	**50.9**	**62,534**	**49.1**

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 241,659 total rural population of the district, 34.5 per cent has been categorised as main workers and the marginal workers constitute 13.7 per cent and

the remaining 51.8 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 33.6 per cent males and 35.3 per cent females are in the category of main workers. Male and female marginal workers account for 11.5 and 15.6 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level.

The percentage of total rural workers of the district comes to 48.2 per cent. At the C.D. block level, Kapkot and Garud has highest proportion of total workers forming 50.7 per cent each of the total population. It is closely followed by Bhaisiyachhana (46.2per cent), Bageshwar (45.4 per cent), and Takula (39.9) percent. The lowest percentage of 39.9 per cent is recorded in Takula C.D. block.

TABLE 33

NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/ Town	Persons/ Males/ Females	Total Population	Main workers		Marginal workers		Total workers (Main & marginal workers)		Non workers	
				Number	Percent-age	Number	Percent-age	Number	Percent-age	Number	Percent-age
1	2	3	4	5	6	7	8	9	10	11	12
1	Bageshwar (NPP)	Persons	7,803	2,245	28.8	221	2.8	2,466	31.6	5,337	68.4
		Males	4,311	1,892	43.9	155	3.6	2,047	47.5	2,264	52.5
		Females	3,492	353	10.1	66	1.9	419	12	3,073	88
	District (Urban) Total:	**Persons**	**7,803**	**2,245**	**28.8**	**221**	**2.8**	**2,466**	**31.6**	**5,337**	**68.4**
		Males	**4,311**	**1,892**	**43.9**	**155**	**3.6**	**2,047**	**47.5**	**2,264**	**52.5**
		Females	**3,492**	**353**	**10.1**	**66**	**1.9**	**419**	**12**	**3,073**	**88**

The table 33 indicates that as against 28.8 per cent of main workers in the urban area of the district, marginal workers are 2.8 percent and non-workers are 68.4 percent. Female main workers and marginal workers are very low in comparision to male.

TABLE 34

				(49.9)	**(90.8)**	**(3.1)**	**(1.5)**	**(4.7)**

Note: Percent of workers to total workers are given in brackets for the category of workers

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 74.5 per cent of the total workers (main + marginal) and remaining

25.5 per cent of total workers are engaged as agricultural labourers (3.0per cent), Household industry workers (2.1 per cent) and other workers (20.3 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 70.7 per cent in Bageshwar tahsil and 82.3 per cent in Kapkot tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 90.8 per cent which is very high as compared to 54.7 per cent of male cultivators in the district. The percentage of agricultural labourers and household industry workers is very low in the district as stated above. The workers in other activities occupy the second position next to agriculture in the district as well as in each tahsil. The highest proportion of 24.2 per cent of other workers is recorded in Bageshwar tahsil while the lowest proportion of 12.4 per cent is found in Kapkot. tahsil.

Note: Percentage of worker to total worker are given in brackets for the category of workers

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 48.2 per centof total population. Among these workers, cultivators constitute 76.1 per cent, 3.1 per cent agricultural labourers, 2.1 per cent household industry workers and 18.8 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercialy viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.1 per cent workers of the total working force. Therefore, surplus working force has to depend on primary activities. Among cultivators, the percentage of females (91.3 per cent) is higher than males (56.9 per cent) in the rural areas of the district. The females play a main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 62.8 per cent in Takula C.D. block to 82.7 per cent in Bhaisiyachhana C.D. block. For other workers, the lowest proportion is 12.4 per cent in Kapkot C.D. block while 32.6 per cent is the highest in Takula C.D. block. The percentage of agricultural labourers and household industry workers together is quite low i.e. only 5.2 per cent in the district. The percentage of agricultural labourers is highest in 4.6 (Garud) block and is followed by 3.7 (Takula). In other C.D. blocks, this proportion is quite insignificant. Similarly, household industry workers varies in C.D. blocks between 0.9 per cent in Takula and 3.4 per cent in Kapkot.

TABLE 36

DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA / Town	Persons / Males / Females	Total population	No. and percentage of total workers (Main + Marginal)	Category of workers

				(47.5)	**(0.6)**	**(0.1)**	**(1.3)**	**(98.0)**
		Females	**3,492**	**419**	**48**	**9**	**37**	**325**
				(12.0)	**(11.5)**	**(2.1)**	**(8.8)**	**(77.6)**

Note: Percentage of worker to total worker are given in brackets for the category of workers

Table 36 presents distribution of workers by sex in four categegories of economic activity in the only urban area of the district, Bageshwar. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban area recorded highest percentage of other workers (94.5), followed by household industry worker with 2.6 per cent. If we observe the table it reveals that percentage of cultivators (2.4) as recorded is very low in Bageshwar town. In the agriculture labourers category 0.4 per cent as recorded is very low.

(ix) Brief Analysis of the Village Directory and Town Directory Data :

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37

DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or qutside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 883 inhabited villages in the district 492 villages (55.7 per cent) have been provided with the education facilities of one type or the other. Similarly, 100 villages in the district constituting 11.4 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 733 or 83.00 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 145 villages constituting 16.4 per cent of villages have been provided with post office facility within the village. 73 or 8.3 per cent villages have been provided with the telephone facility, 111 or 12.6 per cent with transport facility, 31 or 3.5 per cent villages with bank facility and 20 or 2.3 per cent with agricultural credit societies. Similarly, there are 143 or 16.2 per cent villages which have been linked with the pucca road. Total 627 or 71.0 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Takula C.D. block has the highest 61.8 per cent villages where educational facility is available and lowest 48.8 per cent is found in Bageshwar. Medical facility is highest in Garud (15.7 per cent) and lowest (8.9 per cent) in Bageshwar C.D. block. Improved drinking water is available to above 75 per cent villages in all the C.D. blocks. Telephone facility is highest in Garud (25.9 per cent) while a single village of Bhaisiya Chhana C.D. block enjoy this facility.Transport and communications is less developed in Bhaisiya Chhana where only 10.00 per cent villages are covered by this facility whereas 22.1 per cent villages of Takula C.D. block are availing this facility.

TABLE 38

NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C D block	Total population of inhabited villages	Type of amenity available

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 241,659 persons in the district, 192,684 or 79.7 per cent have educational facility of one or the other type. Similarly 56,416 or 23.3 per cent population has medical facilities while 216,693 or 89.7 per cent have got improved drinking water facility. Post office facilities are available to 84,926 or 35.1 per cent population. Telephone facility is available to 43,793 or 18.1 per cent. Transport communications facility is available to 44,831 or 18.6 per cent. Bank facility is available to 17,122. or 7.1 per cent. 11,009 or 4.6 per cent have been provided with the facility of agricultural credit societies. 56,827 or 23.5 per cent have been provided with the facility of approach by pucca road. Power supply is available to 188,789 or 78.1 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. In Bhaisiya Chhana C.D. block, bank and agriculture credit societies are not available in any village.

TABLE 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 to 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	333	53	14	400
(b) Middle School	569	157	29	755
(c) Degree College	59	67	756	882
2. Medical:-

(b) PHC	172	163	541	876
3. Post Office	572	132	34	738
4. Telephone	192	96	522	810
5. Bus Service	320	228	241	789
6. Banks				
(a) Commercial Bank	296	223	337	856
(b) Cooperative Bank	173	188	514	875
7. Agricultural Credit Societies	209	194	460	863

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 400 villages do not have primary school in their villages and out of these villages, children of 333 villages have to travel less than 5 kms. for schooling Out of 883 inhabited villages as many as 755 are deprived of middle school and 882 of degree college. Of these 569 avail the facility of middle school at a distance of less than 5 kms., 157 at a distance 5-10 kms. and the remaining 29 at a distance of 10+ kms. In respect of degree college 59 avail this facility at a distance of less than 5 kms., 67 between 5 to 10 kms. and rest 756 villages at a distance of 10+ kms.

Similarly there are 864 villages in the district which have been devoid of Hospital facility and 876 villages which are deprived of PHC facilities. Of these 320 villages have the facility of Hospital available within 5 kms. while in respect of 199 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 345 villages have this facility at a distance of 10+ kms. As regards PHC 172 avail this facility at a distance of less than 5 kms., 163 at a distance of 5-10 kms. and the remaining 541 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 738 villages do not have this facility in the village itself. Of these majority i.e. 572 have this facility at a distance of less than 5 kms., another 132 villages avail it at a distance of 5-10 kms. In the remaining 34 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 810 villages in the district which are without telephone facilitiy. Of these 192 avail this facility at a distance of less than 5 kms., 96 at a distance of 5-10 kms. and remaining 522 have to traverse a distance of 10+ kms.

For Bus service out of 789 villages which do not have facility, 320 villages avail this facility at a distance of less than 5 kms., 228 at a distance between 5-10 kms. and 241 at a distance of 10+ kms.

In the entire district 856 villages are deprived of Commercial Bank and 875 of Co-operative Bank. Of these 856 villages which are deprived of Commercial Banks 296 villages avail this facility at a distance of less than 5 kms., 223 between 5-10 kms. & the remaining 337 at a distance of 10+ kms. Regarding Co-operative Banks out of 875 villages 173 villages avail this facility at a distance of less than 5 kms., 188 at a distance of 5-10 kms., and remaining 514 at a distance of 10+ kms. 863 villages do not have agricultural credit societies. This facility to 209 villages is available at a distance of less than 5 kms., 194 at a distance of 5-10 kms. and the remaining 460 at a distance of 10+ kms.

TABLE 40

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

$ Transport communication includes bus service, rail facility and navigable waterways.

Note: Percentages are given in brackets.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities. Out of total 883 inhabited villages in the district, there are 32 villages which have nearest towns upto a distance of 5 kms. Of these only 9 villages forming 28.1 per cent of these total villages, are having the educational facilities of one type or the other and 1 village constituting 3.1 per cent, have the medical facilities within the village, 6 villages forming 18.8 per cent have the facility of post office within the village and 4 or 12.5 per cent have the facility of telephone. 6 villages constituting 18.8 per cent have been linked by transport service. 1 village constituting only 3.1 per cent have been provided by agricultural credit societies. 18 villages comprising 56.3 per cent have been provided with pucca road.

There are 224 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 126 villages constituting 56.3 per cent have been provided with the educational facilities. 23 villages comprising 10.3 per cent have been provided with medical facilities. 33 villages constituting 14.7 per cent enjoy the post office facility. 6 villages comprising 27 per cent have been provided the telephone facility. 30 villages constituting 13.4 per cent have been linked with transport communications. 6 villages comprising 2.7 per cent have bank facility. 2 villages constituting 0.9 per cent are having agricultural credit societies, while 46 villages or 20.5 per cent are approachable by pucca road. 507 villages fall in the distance range of 16-50 kms. Of these, 56.4 per cent villages have benn provided with educational facility, 12.4 per cent with medical, 16.6 per cent with post office, 12.2 per cent with telephone and transport & communications available to 12.6 per cent villages. Banks and agricultural credit societies facilities are available to 4.1 and 2.6 per cent of villages, respectively.

There are 120 villages in the district which are situated beyond 50 kms.from the nearest town and out of these 71 or 59.2 per cent enjoy the education facility in the village itself whereas 14 villages comprising 11.7 per cent have been provided with medical facility of one type or the other. 22 such villages comprising 18.3 per cent have the post office facility. 1 village comprising 0.8 per cent have been provided with telephone facility. 11 villages constituting 9.2 per cent have been linked by bus service whereas 4 villages comprising 3.3 per cent have been provided with the bank and agricultural credit societies facilities while 2 villages comprising 1.7 per cent have been linked by pucca roads.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Bageshwar district out of a total 883 inhabited villages, overwhelming 759 have a population of less than 500 persons. Of these, 376 villages (49.5 per cent) have education facility, 62 (8.2 per cent) have medical facility, 621 (81.8 per cent) have improved drinking water facility, 87 villages (11.5 per cent) have post office facility, 40 (5.3 per cent) have telephone facility, 80 (10.5 per cent) have been linked by bus service, 19 (2.5 per cent) have Bank facility, 13 villages (1.7 per cent) have been provided with the agricultural credit societies, 108 villages (14.2 per cent) have been linked with pucca road and 521 villages (68.6 per cent) have been provided with electricity.

Out of 96 villages, which fall in the population range of 500-999 persons, 88 villages (91.7 per cent) have been provided with the educational facility, 24 (25.0 per cent) with medical facility, 87 villages have improved drinking water facility. 36 villages (37.5 per cent) have been provided with post office facilities, 24 villages (25.0 per cent) with telephone facility, 25 villages (26.0 per cent) with transport facilities, 6 villages (6.3 per cent) with bank facility, 3 villages (3.1 per cent) with agricultural credit societies and 27 villages (28.1 per cent) have approach by pucca road. 85 villages in this range have electricity.

23 villages fall in population range of 1,000-1,999 persons. All of these villages have education, 13 villages (56.5 per cent) have medical, 20 (87.0 percent) have improved dirinking water facility, 18 villages (78.3 per cent) have post office, 6 villages (26.1 per cent) have telephone facility, 5 villages (21.7 per cent) each have transport communications and bank facilities, 3 villages (13.0 per cent) have agricultural credit societies and 5 villages (21.7 per cent) have approach by pucca road and 17 villages (73.9) with power supply.

There are 5 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of education and improved drinking water facility. 2 villages (40.0 per cent) have medical, 4 villages (80.0 per cent) have post office, 3 villages (60.00 per cent)have telephone, and one village each (20.00 per cent) enjoy transport, Banks and Agricultrual Credit Societies. 3 Villages (60 per cent) have approach by pucca road and 4 villages (80.00 per cent) have power supply.

TABLE 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of CD block	Number of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Takula	68	5,691.88	51.6	5.1
2	Bhaisiya Chhana	40	4,069.94	40.4	7.1
3	Kapkot	202	75,988.13	17.6	13.8
4	Garud	185	15,982.63	36.9	31.7
5	Bageshwar	371	18,046.12	45.8	20.1
6	Forest Villages	17	8,177.40	0	0
	District Total:	**883**	**127,956.09**	**25.1**	**17.6**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivable area includes irrigated as well as unirrigated area. The table further elaborates that what is the extent of cultivable area under irrigation. There are total 883 inhabited villages in the district having a total area of 127,956.09 hectares. Of this, 25.1 per cent is cultivable and 17.6 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that Takula block with 68 villages have a total area of 5,691.8 hectares, of this 51.6 per cent of land is cultivable and of the aforesaid area 5.1 per cent is irrigated. In Bhaisiyachhanna block, all the 40 villages have a total land area of 4,069.9 hectares, of this 40.4 per cent of land is cultivable and of the aforesaid area 7.1 per cent is irrigated. In Kapkot block, all the 202 villages have a total area of 75,988.128 hectares, of this cultivable area is 17.6 per cent and of this area, 13.8 per cent is irrigated. In Garud block, all the 185 villages have a total area of 15,982.62 hectares, out of which, cultivable area is 36.9 per cent. Of cultivable area, 31.7 per cent is irrigated. Bageshwar block with 371 villages have a total land area of 18,046.1 hectares, of this 45.8 per cent is cultivable area and out of this cultivable area 20.1 per cent is irrigated.

TABLE 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt (in Rs.)			Per capita expenditure (in Rs.)					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	V Bageshwar (NPP)	1,111	0	0	650	0	0	0	0	0
	District Average	**1,111**	**0**	**0**	**650**	**0**	**0**	**0**	**0**	**0**

Note: Break up figures are not available.

The table 43 gives the per capita receipts and expenditure (in rupees) for the town as well as for the district. The average per capita receipts for the Bageshwar town of the district works out to Rs. 1,111. The average of total expenditure incurred per head is Rs. 650.

TABLE 44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bageshwar (NPP)	10.3	7.7	1.3	2.6	1.3
	District Average	**10.3**	**7.7**	**1.3**	**2.6**	**1.3**

Table 44 shows the average number of primary school per 10,000 population in urban areas of Bageshwar district i.e. in Bageshwar town, which comes to 10.3 primary schools, 7.7 junior secondary/ middle, 1.3 secondary/matriculation, 2.6 senior secondary schools and the ratio of colleges is only 1.3 college per 10,000 population.

TABLE 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bageshwar (NPP)	38
	District Average	**38**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in the town of the district. On an average there are 38 beds per 10,000 population in the urban areas of the district.

TABLE 46
PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
There is no slum in the district

MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bageshwar (NPP)	Carpet	Fruits
		Shawl	Magnetite
		Copper Utensils	Resin

Table 47 indicates most important articles manufactured and exported out of the town in the district. The main items which are manufactured in the town of the district are carpet, shawl and copper utencils and the commodities exported to other places are fruits, magnetite and resin.

(x) Brief Analysis of the Data on Houses and Household Amenities, Houselisting Operations, Census of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared.In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/ transistor, television, telephone, cycle, scooter/ motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. The following is the distribution of households by number of rooms occupied.

TABLE 48

HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure Status	Number of dwelling households	Number of households								
		Total			Scheduled Caste			Scheduled Tribe		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11
Owned	No exclusive room	339	336	3	92	91	1	7	7	0
	One room	6,563	6,451	112	2,727	2,671	56	58	51	7
	Two rooms	16,669	16,372	297	5,378	5,271	107	131	114	17
	Three rooms	5,872	5,714	158	1,390	1,364	26	65	54	11
	3+ rooms	19,356	19,004	352	3,355	3,316	39	223	215	8
	Median number of rooms	3	3	3	2	2	2	3	3	2
Rented	No exclusive room	33	29	4	5	5	0	0	0	0
	One room	857	697	160	167	133	34	17	15	2
	Two rooms	1,263	971	292	214	174	40	32	28	4
	Three rooms	229	157	72	28	24	4	10	2	8
	3+ rooms	147	133	14	11	9	2	5	5	0
	Median number of rooms	2	2	2	2	2	2	2	2	3
Others	No exclusive room	9	8	1	5	4	1	0	0	0
	One room	201	171	30	54	41	13	1	1	0
	Two rooms	238	183	55	65	45	20	2	1	1
	Three rooms	51	40	11	13	13	0	1	0	1
	3+ rooms	87	84	3	16	15	1	2	2	0
	Median number of rooms	2	2	2	1	2	2	3	3+	3

Data source: Census of India 2001, H-series: "Tables on Houses, Household Amenities and Assets."

The above table shows that households having owned tenure status occupy highest place among the total households. The number of households with one room accounted to 6,563 out of the total 51,914 households in the district, followed by 16,669 households with two rooms, 5,872 households with three rooms and 19,356 households with three and more rooms. More than 93 per cent of the households have had owned tenure states. Among scheduled caste one room and two rooms dwelling households figures 2,727 and 5,378. Similarly scheduled tribes households number 58 and 131. The median number of rooms for the total households come to 3 whereas for scheduled caste and scheduled tribe it was calculated to 2 and 3 respectively.

In case of tenure status rented the number of one room, two rooms and three rooms figure 857, 1,263 and 229 households in the district whereas the corresponding figures for scheduled caste and scheduled tribe came to 167, 214, 28 and 17, 32, 10, respectively. However the median number of rooms per household was 2.

In case of tenure status others, one room comprised 201, two rooms 238, three rooms 51 households. But among scheduled caste households the corresponding figures comprised 54, 65 and 13 households. For scheduled tribe households the number of dwelling households for one, two and three room were 1,2 and 1 households. Number of dwelling households with no exclusive room share very little proportion.

During 1991 census 94.4 per cent of households were living in their own houses, 4.8 per cent in rented and 0.8 per cent in other houses. Among scheduled caste the owned status was in 97.0 per cent of households, rented 2.0 per cent and other 1.0 per cent. More than 53.9 per cent of scheduled tribes had own houses, 21.4 per cent on rent and 24.8 per cent by other status.

TABLE 49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial Number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanent	Tempo-rary	Permanent	Semi-permanen	Tempo-rary
1	2	3	4	5	6	7	8	9	10	11
	District Bageshwar	97.9	2.0	0.1	97.9	2.0	0.1	98.8	1.2	0.0
1	Kapkot	97.6	2.3	0.1	97.6	2.3	0.1	0.0	0.0	0.0
2	Bageshwar	98.0	1.9	0.1	98.0	1.9	0.1	98.8	1.2	0.0

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note: **Permanent** : Permanent houses refer to those houses whose walls & roof are made of permanent materials i.e. where burnt bricks, G.I. sheets or other metal sheets, asbestos sheets, stone or concrete is used for wall and tiles slate, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks lime and stone and RBC/RCC concreate are used for roof.

Temporary : Temporary houses refer to those houses whose walls and roof are made of temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood.

Semi Permanent : Semi permanent houses refer to those houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

The percentage distribution of households as shown in the above table reveals that more than 97.9 per cent of the households in the district had permanent houses. The trend is almost similar in the rural (97.9 per cent) and urban areas (98.8 per cent). Among tahsils, highest proportion of permanent houses were accounted in tahsil Bageshwar (98.0 per cent) followed by Kapkot (97.6 per cent). In respect of semi-permanent houses, the returns were 2.0 per cent at district level whereas among tahsil, in Kapkot it was 2.3 per cent and 1.9 per cent in Bageshwar. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas was 1.2 per cent in tahsil Bageshwar. Temporary houses in the district lie at insignificant proportion in district and tahsils.

TABLE 50

NUMBER AND PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Serial number	Tahsil	Total/ Rural/ Urban	Number of households	Number and percentage of households having

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Bathroom means bathroom within the house

$ Toilet means toilet within the house

@ Drainage means colsed and open drainage

The above table 50 shows facility of improved drinking water i.e. through tap, hand pump and tube well was reported to be available in 12.6 per cent of the households at district level (11.3 per cent in rural and 54.7 per cent in urban). Tahsil Bageshwar was served with drinking water facility for 13.3 per cent of the households whereas the other tahsil Kapkot had only 10.9 per cent of the households. Similarly in respect of electricity 43.4 per cent of the households in the district availed electricity. The breakup for rural and urban areas remain to be 41.9 per cent and 93.2 per cent. Tahsil Bageshwar also had approximately similar proportion of households availing this facility. Tahsil Kapkot was served with electricity facility in 30.0 per cent of the households. More than 12 per cent of the households in the district had bathrooms, the urban households was better served as compared to the rural. Households having toilet facility accounted to 24.2 per cent at district level, the urban households exceeded rural households in many folds who had this facility. The drainage facility was reported in 18.9 per cent of the households in the district (17.2 per cent in rural, 74.4 per cent urban), the similar observation had emerged in tahsil Bageshwar and the other tahsil Kapkot had only 18.3 per cent of the households who had drainage facility.

TABLE - 51

NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001.

Serial No.	Tehsil	Total/ Rural/ Urban	Total house-holds	Firewood	Crop residue	Cow-dung cake	Coal, Lignite, Charcoal	Kerosene	LPG (Cooking Gas)	Electri-city	Bio-gas	Others	No coo-king

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note : - Percentages are given in brackets.

It is observed from the above table 51 that 78.8 per cent of household in the district use firewood as fuel for cooking. The proportion in the rural area is 81.0 and in urban area it comes to 8.6 per cent of households.LPG (cooking gas) has been reported as one of the fuel for cooking in 17.9 per cent of the households, the composition of rural and urban area comes to 16.1 and 75.0 per cent respectively. Kerosene is used for cooking in as many as 2.0 per cent of the households (1.6 per cent rural and 13.6 per cent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and bio-gas etc. ranges between 0.0 to 0.9 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, LPG (cooking gas) and kerosene are the predominant fuel for cooking in the district. The predominant material for cooking during 1991 census was wood, LPG & kerosene oil respectively.

TABLE 52
NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Note : - Percentages are given in brackets.

Table 52 reveals that 57.9 per cent of the households in the district avail banking facility, whereas proportion of households in tahsil Bageshwar and Kapkot calculated to 59.3 and 54.8 per cent, respectively. Radio and transistor was possessed by 59.4 per cent of the households in the district. Kapkot tahsil had an edge over Bageshwar tahsil as the proportion of households in this segment come to 65.4 and 56.7 per cent for the respective tahsils. The network of television was available amongst 20.7 per cent of the households (26.9 per cent in Bageshwar tahsil and 6.5 per cent in Kapkot tahsil). As much as 1.9 per cent of the households in the district had telephone connections. Availability of other assets like bicycle, scooter/motorcycle/ moped, and car/jeep/van came to proportion of 1.1, 1.1 and 0.8 per cent in rural and urban areas, respectively. More than 35.0 per cent of the households in the district did not have any of these specified assets. The proportion among tahsils accounted to 36.5 per cent in tahsil Bageshwar and 33.8 per cent in tahsil Kapkot. The percentage of households in all the segments in urban parts of the district is relatively higher as compared to rural parts except the households possessing radio/ transistor.

(xi) Major Social and Cultural Events, Natural and Administrative Developments and Significant Activities during the Decade

In Uttaranchal, average population size of households in district is six and half. This district has population of about two and half lakhs and thus is one of the smaller districts in the state population-wise. About seventy two per cent of population is literate at 2001. The most significant event is the creation of a separate district Bageshwar and above all, the creation of separate state of Uttaranchal. People of this part, struggled hard for creation of separate hill state to fulfill the aspirations of the native people.

One of the largest fair of Kumaun region, the Uttaraini festival of Bageshwer, is organized in the month of January for a period of one week and is frequented by Almora traders, on barter or money lending intent, and by the Bhotiyas from the snows, as well as by a great multitude of people from the surrounding villages. The town of Bageshwer, 90 km from Almora town, is a junction of two rivers, namely Saryu and Gomti. At the junction of these rivers stands a large temple with it's conical tower. Here is the shrine of Bageswar or Vyagreswar, the,

"Tiger Lord", an incarnation of Lord Siva. This temple was erected by the Kumaun king, Laxmi Chand, about 1450 A.D., but there is an interesting Sanskrit inscription which is of a far earlier date. The chief articles of merchandise are : ponies, goats, sheep, furs, yak tails, musk pods, borax, salt, horns, books, shoes, fruit (dried and fresh). The Bhotiyas bring down excellent ponies, which breed in a wild or semi-wild state over the Tibetan border.

(xii) Brief Description of Places of Religious, Historical or Archaeological Importance in Villages and Places of Tourist Interest in the Towns of the District

Places of religious and tourist interest in the district are in abundance. Some of these are as below:

Bageshwar

The town of Bageshwar lies on both banks of the Saryu near the confluence with the Gomti at an altitude of about 975m. above sea level. It is the headquarters of the district. The temple of Bageshwar Mahadeo is an important temple of this region. A large fair known as Uttarayini is held here in January attended by huge number of persons. Two other fairs are held on the occasions of Shivratri and Dussehra.

Baijnath

The village of Baijnath lies at an elevation of about 1127m. above sea level. It is situated on the left bank of the Gomti about 70 km. from Almora. Its name is corrupted form of Vaidyanath, a name under which Shiva is worshipped here. There is a large temple dedicated to goddess Kali in the Old Ranchula fort. The ruins of a number of old temples are seen scattered over the place. There are several temples and tombs of the Gosains who buried their dead, around their temples.

Nilaparvat

Nila Parvat is situated between river Saryu and Gomti. It is inhabited by 33 crore God's of Hindu pantheon, the celestial being like Siddha, Gandharv, Vidyadhar Urvasi etc, and Manu sages. It is said that Nilaparvat is held to be more important than Vindhyachal. The persons who desire to embrace death at place between Surya Kund and Agni Kund, they become equivalent to Gods by attaining salvation at the feet of Lord Shiva himself.

Kapkot

Kapkot village which served as a halting place on the route to the Pindari glacier, lies on the right bank of the Saryu. Besides these places Pindari, Kafri and Sundardunga are famous places for trekking. Vijaipur, Kanda are important tourist places.

(xiii) Major Characteristics and Contribution of the District

The holy township of Bageshwar lies at the confluence of Saryu, Gomti and latent Bhagrathi. It is revered as the pious land associated with Lord Sadashiv, the redeemer of all sins. This place is undoubtedly capable of liberating one from the eternal bondage of birth and death. With the east and west flanked by Bhileshwar and Neeleshwar mountains and surrounded by Suraj Kund in the north and Agni Kund on the south, this land of Lord Shankar is great religious, historic and of political significance. The place is attributed to faith for entire Uttaranchal region and because of this, it has attracted many saintly men and patriots. The economy of the district is based upon lisa production; clay and money orders from outside.

During the reign of Chands, Shiv Temple was constructed at Bageshwar. As per the traditions, when repeated attempts to install a 'Shiv Linga' proved fertile, it was Shri Manorth Pandey who succeeded in installing the idol after performing penance on Shivratri. Having hilly terrain, the district presents a beautiful look with green vegetation, trees, herbs with many springs. Healthy climate prevails throughout the year. Agriculture is the mainstay of the inhabitants, land is fertile and yields per capita is higher as compared to neighbouring districts of the region. Sal, Chir and Oak forest add the economic value. The wild life of the district has suffered greatly during the last two decades. The economic motive inspires the people to move outside hill area in the absence of proper employment opportunity. Educational facilities in the district are available at full length. The number of illiterate is marginal. The sex ratio in the district is favourable to females as males generally goes out of the district because of employment. The composition of urban population is negligible i.e. 3.1 percent which is least in the state. The language structure is composed of Kumaoni, Hindi, Garhwali, Nepali, Gorakhi, Marathi and Maura Hindi. The bulk of the total population of the district consists of Hindus. The Khasas are the ancient people who are mentioned in Mahabharata. The percentage share of Scheduled Castes equal to more than twenty five percent and Scheduled Tribes to 0.8 percent. Brahmans constitute around forty percent of total population. A few Vaish families in the district are

engaged in trade and commerce and money lending activities. Village and cottage industries still hold a reasonable place in the district. Besides the distinct is proud of producing freedom fighters, writers, poets and bureaucrats. Religious and tourism attraction add significance to the district.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note Explaining the Abbreviations used in the Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	HHom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

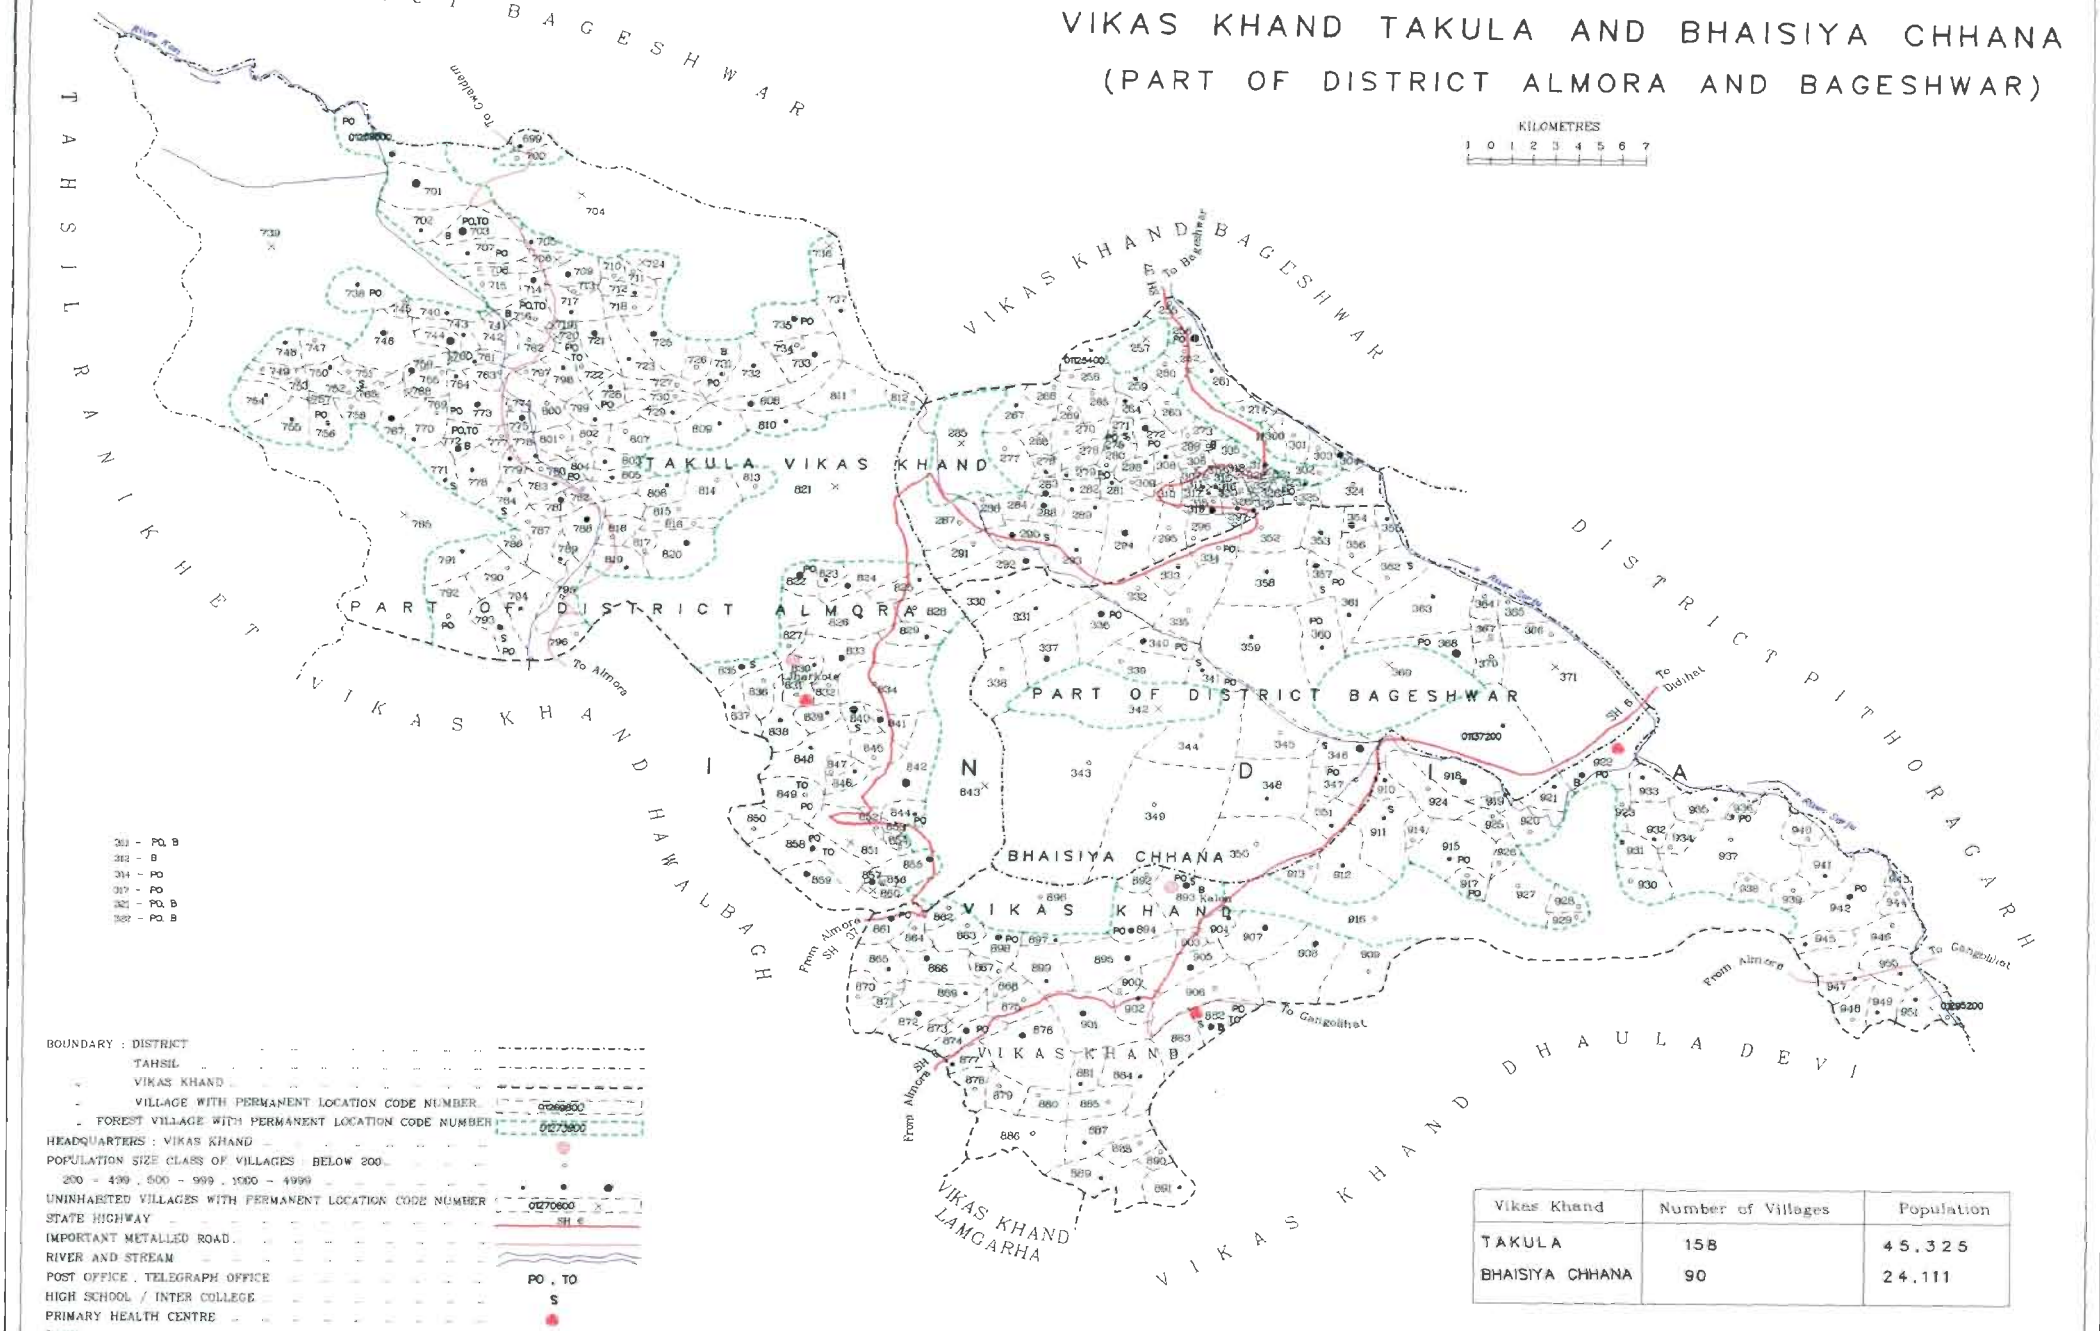

Appendix-I-B	Indicates number of villages C D Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages C D Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VII A	List of villages according to proportion of Scheduled Castes to the total population by ranges.
Appendix-VII B	List of villages according to proportion of Scheduled Tribes to the total population by ranges.
Appendix-VIII	Indicates C D Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village.

STATEMENT
LIST OF VILLAGES MERGED IN TOWNS AND OUT-GROWTH AT 2001 CENSUS

Serial Number	Name of Village	Location Code number	Merged in Town and Outgrowth
1	2	3	4
Not applicable as there is no village merged in towns and any outgrowths in the district at 2001 census.

APPENDIX VIII

Number of villages under each Gram Panchyat (C.D. block wise)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11
The information is not being provided for districts of Uttaranchal due to certain reasons.										

APPENDIX IX

Statement showing number of girls schools in the villages

Name of District	Name of C.D. Block	Location Code	Name of Village Number	No. of Girls School
1	2	3	4	5
Information not available for this district				

SECTION II
TOWN DIRECTORY

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation /Nagan Nigam	M. Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board /Nagar Palika Parishad	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Other columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded, respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has benn recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings, etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available, has been mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town, the name of nearest place with distance where the facility is available, has been recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 :: Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee, etc.

TOWN DIRECTORY STATEMENTS (I TO VII)

There are no outgrowths in this district, hence the information is nil

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in

respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled

Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

The abbreviations used in the Primary Census Abstract are same as used in Town Directory.

ANNEXURES
I TO VIII

ANNEXURE-I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

ded for this district due to certain reasons.

ANNEXURE-II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting population size of the district are fertility, mortality and migration. These concepts are explained in the heading Census and Non- Census and Definitions in the Analytical Note portion. Fertility is defined by various measures of fertility, mean-age at marriage and also by marital status of population. One major aspect of considerations in mortality is infant and child mortality. Migration is perceived as percentage distribution of population by place of birth and/or place of last residence. 1991 Census the district was part of Uttar Pradesh, which is in north - central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000. The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Almora^
q1	P	99	65.0
	M	98	71.6
	F	104	61.0
q2	P	117	74.0
	M	117	76.0
	F	118	64.0
q5	P	134	82.0
	M	135	84.0
	F	132	80.0

* *Undivided Uttar Pradesh Census.*

^ *District Bageshwar was formed from the district Almora in the year 1997, i.e., after 1991 Census. The data are not available separately for Bageshwar for the year 1991. Hence, the data of undivided Almora have been taken, assuming that the trends in both districts are same.*

The child mortality between birth and 5 years, as shown by the indicators q1 and q5, respectively, was lower in the district than in the State, which suggest that the children upto 5 years of age in the district were in the improved condition as compared to the State.

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991 CENSUS

Serial Number	Fertility Measures	Uttar Pradesh*	Almora^
1	2	3	4
1	CBR	37.2	33.4
2	TFR	5.6	4.5
3	TMFR	6.3	5.6
4	GFR	172.0	138
5	GMFR	200.0	177
6	Mean age at marriage (1981-91)	17.3	17.1
7	Number of children ever born per ever married woman aged 45-49 years	4.6	4.5
8	Child woman ratio 0-4	631.0	528
	,, 5-9	752.0	620

Source:(i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Bageshwar was carved out from the district Almora in the year 1997, i.e., after 1991 Census. The data is not available separately for Bageshwar for the year 1991. Hence, the data of undivided Almora have been taken, assuming that the trends and pattern of districts are same.*

The annexure III reveals that the Crude Birth Rate (CBR) which is the ratio of the number of live births in a year to the mid year population is below i.e. 33.4 per cent to the state of Uttar Pradesh ratio of 37.2. In respect of Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) the district presents all along a below rates than the state. The inference is that fertility is lower in the district as compared to the state. The mean age at marriage during the period 1981-91 had been 17.3 years for the state where as 17.1 years had been observed for the district. The conclusion to establish that relationship between lower age at marriage leads to lower rate of fertility may be validated. Similar trend was observed in the number of children born per ever married women aged 45-49. The state and the district figures were 4.6 and 4.5, respectively. As per 1991 census, Child Woman ratio in the age group of 0-4 and 5-9 years was 528 and 620 for the district while in case of the state the corresponding figures were 631 and 752. The different fertility measures indicate that fertility levels in the district below to the state average.

ANNEXURE - IV

The annexure-IV shows percentage distribution of migrants as per 1991 (Annexure IV (a)) and 2001 Census (Annexure IV (b)) among total migrants in the state and district. For both the Censuses, the district figures are presented in comparison to state figures. The table is given in two parts. One is in-migrants by place of birth (in which a person is enumerated during the Census in other than the place of birth) and the other part is related to in-migrants by place of last residence (in which a person is enumerated during the Census in place other than the place of his immediate last residence). Since the state of Uttaranchal was created in 2000, the state figures for 1991 are given for Uttar Pradesh, whereas the state figures of Uttaranchal are given for 2001.

** Undivided Uttar Pradesh at 1991 Census.*

^ District Bageshwar was carved out from the district Almora in the year 1997, i.e., after 1991 Census. The data are not available separately for Bageshwar for the year 1991. Hence, the data of undivided Almora have been taken, assuming that the trends and pattern of districts are same.

Regarding in-migration by place of birth, it is evident from the tables that percentage of in-migrants from other districts of the state was much lower for the state of Uttaranchal (35.4 per cent) in Census 2001 as compared to state of Uttar Pradesh (81.3 per cent) during 1991. For the district Bageshwar the percentages declined in 2001 (76.5 per cent) as compared to 1991 Census (79.6 per cent) for the district Almora. The proportion of in-migration from other states to the state increased and recorded 57.8 per cent which was 16.2 per cent during 1991 Census. A slight increment is observed in 2001 as the figure for the district raised to 12.6 per cent from 11.6 per cent during 1991. In-migrants from other countries in the district were 8.8 per cent during 1991 which is 10.8 per cent in 2001. Regarding in-migration by place of last residence for in-migration from other districts, again the figures are much lower for the state of Uttaranchal (34.9 per cent) in 2001 against 79.6 per cent for the state of Uttar Pradesh during 1991. Comparatively ,the figures for the district in Census 2001 recorded 63.8 per cent while it was 71.2 per cent in 1991 Census. The volume of migration from other states was 18.9 per cent in 1991 Census at the state level, which increased and recorded 60.1 per cent in 2001 Census. Figures for the district worked out to be 16.8 per cent in 1991 and 19.4 per cent in 2001 Census. The movement of population from other countries to the district was 12.0 per cent in the district whereas the state figure was 1.5 per cent during 1991. The corresponding figures recorded for the state and district during 2001 are 5.0 per cent and 16.8 per cent, respectively.

ANNEXURE – V

Annexure – V presents the distribution of basic cultural characteristic of the population "Religion" at state, district and tahsil level. Six major religions have been dealt with separately. These are Buddhist, Christian, Hindu, Jain, Muslim and Sikh. Rest of the religions have been presented in the column titled 'other religions'. Distribution for 2001 and 1991 Censuses are presented in Annexure V (a) and Annexure V (b), respectively.

Annexure - V (a)

Brief account of main religions in the State/ Distt./ Tahsil as per 2001 Census

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Bageshwar was carved out from the district Almora in the year 1997, i.e., after 1991 Census. The data are not available separately for Bageshwar for the year 1991. Hence, the data of undivided Almora have been taken, assuming that the trends and pattern of districts are same.*

A brief account of the main religions as stated in the Annexure-V (a) for 2001 reveals that 85.0 per cent population is Hindu in the state followed by 11.9 per cent population of Muslims while the followers of other religions are negligible. At district level the pattern is almost same, but the followers of Buddhist and Christian religions are very low i.e. only 0.1 per cent each while Muslims constitute 0.5 per cent. Population under the religions Jain and Sikh are negligible. Almost similar trend is observed from Annexure V(b) based on 1991 Census with a slight variation. In the district only 6 persons were reported in the category of "Religion Not Stated" in 1991 while 122 persons were reported under this category in 2001.

ANNEXURE - VI

Annexure-VI presents the classification of population according to marital status of different age groups for the state and district. Marital status has been classified as never married, married, widowed, divorced and separated and unspecified status. For comparative study, the figures of 2001 and 1991 Census have been shown in Annexure VI(a) and VI(b), respectively.

Source: Part - IV (a) table No. - C (I)

Note : - Percentages are given in brackets.

** Undivided Uttar Pradesh at 1991 Census.*

^ District Bageshwar was carved out from the district Almora in the year 1997, i.e., after 1991 Census. The data is not available separately for Bageshwar for the year 1991. Hence, the data of undivided Almora have been taken, assuming that the trends and pattern of districts are same.

On perusal of Annexure VI (a), it is observed that male population in the category of never married is 57.9 per cent for state and 56.1 per cent for the district Bageshwar, while female population in the category of never married constitutes 48.3 for state and 44.0 per cent for the district in 2001 Census. Married population in the district is 41.3 percent for males and 46.9 per cent for females as against 39.9 per cent for males and 44.5 per cent for females in the state. Widowed population is 2.4 per cent for males and 8.5 per cent for females at district level as against 2.0 per cent males and 7.0 females at state level. Population of Divorced, Separated and Unspecified status are negligible at state level as well as at district level. Age group wise study of marital status reveals that population and percentage of never married decreases with the increase in population while pyramidal shape is observed for married population. In the district, percentage of married population is highest (96.0 per cent) for males in the age-group 40-44 and 93.7 per cent for females in the age-group 25-29 years and 30-34 years while widowed population is highest in age group of 70 years and above (24.6 per cent for males and 69.3 per cent for females). Almost similar trend can be seen for the state. It is observed that the scenario has not changed much since 1991 as far as the district figures are concerned, however, the district figures of 1991 covered undivided district Almora, which included present district of Bageshwar. Percentages of never married in 1991 was 57.4 percent for males and 45.3 per cent for females. Similarly, married population constituted 40.1 per cent for males and 45.7 per cent for females in 1991 in district Almora. Widowed population was 2.4 per cent in case of males and 8.6 percent in case of females. No person was reported in the category "Unspecified Status" in the state as well as in the district in 2001. However, during 1991, some persons were reported under this category. State figures of 1991 Census reveal identical trend with slight variation in percentage although state figures of 1991 Census covered undivided Uttar Pradesh which included present state of Uttaranchal.

ANNEXURE - VII

Age and sex wise education in the state and district for 2001 and 1991 censuses have been presented in the Annexure – VII (a) and (b), respectively.

Annexure-VII (a)

Age, Sex and Education in the State/District, 2001 Census

Source : Social & Cultural Table Pt IV A (Table # C-2)

^ *Undivided Uttar Pradesh at 1991 Census.*

· *District Bageshwar was carved out from the district Almora in the year 1997, i.e., after 1991 Census. The data are not available separately for Bageshwar for the year 1991. Hence, the data of undivided Almora have been taken, assuming that the trends and pattern of districts are same.*

It can be observed that percentage of illiterates has declined from 55.3 per cent for males and 80.0 percent for females in 1991 to 30.4 percent for males and 49.6 per cent for females in 2001, respectively at the state level. Consequently, percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 per cent among males and 0.7 per cent among females in 1991 at state level, which is 1.4 per cent and 1.2 per cent in case of males and females, respectively in 2001. Similarly primary level education was 10.7 percent for males and 6.0 per cent for females in 1991 which rose to 16.1 and 13.9 for males and females, respectively in 2001. Middle level education was 9.7 per cent in case of males and 3.7 per cent in case of females in 1991 which increased to 14.2 per cent for males and 8.8 per cent for females in 2001. Matriculation and above level was 13.5 per cent for males and 4.4 per cent for females in 1991 which rose to 23.4 per cent for males and 13.8 per cent for females in 2001.

Similar trend can be observed in the district also. In 1991, 35.8 per cent males and 67.3 per cent females were recorded as Illiterates which declined to 28.1 percent males and 51.7 per cent females in 2001. Primary level education was 17.6 per cent in case of males and 11.9 per cent in case of females in 1991, which rose upto 19.2 per cent in case of males and 15.7 per cent in case of females in 2001. Middle level educated males and females were 14.5 per cent and 5.4 per cent, respectively in 1991 while 17.5 per cent males and 9.5 per cent females were recorded in this category in 2001. Matriculation and above level of education was achieved by 16.6 per cent males and 4.3 per cent females in 1991 which is observed 17.8 per cent for males and 7.5 per cent for females in 2001. Primary level of education is found highest in the age-group of 7-14 years in 2001, while middle level education was the highest in age group 15-19 years and the age group that had highest percentage of matriculation and above level of education was 25-29 years for males and 20-24 for females.

ANNEXURE – VIII

Distribution of different mother tongues according to population with percentage as returned in 2001 and 1991 for the state of Uttaranchal and district Bageshwar has been depicted through Annexure-VIII (a) and (b), respectively.

ource: District Profile Uttar Pradesh - 1991

te : - Percentages are given in brackets.

Undivided Uttar Pradesh at 1991 Census.

District Bageshwar was carved out from the district Almora in the year 1997, i.e., after 1991 Census. The data is not available separately for Bageshwar for the year 1991. Hence, the data of undivided Almora have been taken, assuming that the trends and pattern of districts are same..

It shows from Annexure-VIII (a) that mother ..ngue for largest population in the district is Kumauni with 96.3 per cent which is 22.9 per cent for the state, while Annexure VIII (b) shows that during 1991, Garhwali with 91.3 percent was the mother tongue spoken by the largest portion of the district. Hindi as mother tongue is reported by 2.1 per cent population in the district in 2001 Census followed by Nepali with 0.9 per cent. Other mother languages such as Bengali, unjabi, Bhotia, Bhojpuri, Urdu etc. are spoken by ess than one percent each in the district. On the other and, at the state level during 2001 besides Hindi and Garhwali, other important languages adopted as mother ongue are Kumauni (22.9 per cent), Urdu (5.9 per ent), Punjabi (2.8 per cent), Bengali (1.5 per cent), aunsari (1.3 per cent) and Nepali (1.1 per cent). Rest of the languages such as Bhojpuri, Pahari, Tibetan, Bhotia, Sindhi and Dogri, etc., mother tongues are of less than one percent. Since state of Uttaranchal was not separated from Uttar Pradesh in 1991, distribution of mother tongues are entirely different in comparison to 2001, where dominant mother tongue was Hindi with 82.1 per cent population followed by Urdu with 9.0 per cent, Bhojpuri 5.0 per cent, Garhwali 1.3 per cent and Kumauni 1.2 per cent. Similarly, at district level, the distribution of mother tongues has shown variation upto some extent since the district figures of 1991 covered undivided district Almora, which included present district of Bageshwar. Other languages had very low percentage as compared to the population of Uttar Pradesh.
