MOTIF

Nanak Matta Gurudwara

Nanak Matta is an important pilgrimage centre for the Sikhs situated at a distance of 56 km. from Rudrapur (district headquarter) on the Rudrapur-Tanakpur motor route. It is believed that the first Sikh Guru, Guru Nanak Dev had visited this place on his way to Kailash Parvat in 1515 A.D. Being a sacred place to the Sikh community this place is visited by thousands of pilgrims throughout the year. The town is also known for the huge Nanak Matta Dam built across river Saryu, which adds up to the beauty of Nanak Matta. This is in itself a beautiful picnic spot where one can enjoy boating and fishing. The serene air and still lake waters had made it a much sought after tourist spot. The nearest airport is located at Pant Nagar

Annexure I Number of villages under each Gram Panchayat 515
Annexure II Fertility and Mortality, 1991 Census 515
Annexure III Various measures of fertility and mean age at marriage, 1991 Census 516
Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991 and 2001 Census 517
Annexure V Brief account of main religions in the district/tahsil as per 1991 and 2001 Census 519
Annexure VI Marital status of Different Age-groups of Population as per 1991 and 2001 Census 521
Annexure VII Age, Sex and Education in the district, 1991 and 2001 Census 525
Annexure VIII Distribution of different mother tongues returned in 1991 and 2001 Census 527

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCBH was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of

all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated: 17.10.2006.

Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K, Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unfailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi. Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision of Shri Mohd. Ahmad, Assistant Director. I am also thankful to Shri Shailendra Singh Negi, S.I. Grade-I, Shri S.K. Banerjee, S.I. Gr. II and Shri U.G. Jhingran, S.I. Gr. III who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compilers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map)and Shri J.P. Purohit, Research Officer (Map) in bringing out various maps.

District Highlights - 2001 Census

1. Udham Singh Nagar district ranks 3rd in terms of population in the Uttaranchal state.
2. Udham Singh Nagar is one of the highest urbanised districts in the state having more than 32 per cent of the population in urban areas.
3. Udham Singh Nagar district has population density of 486 persons per sq.km. which is more than the state average (159 persons per sq.km.).
4. Udham Singh Nagar district ranks 11th in terms of sex ratio (902) which is lower than the state average of 962 females per one thousand males.
5. Udham Singh Nagar district ranks 12th in literacy with literacy rate of 64.9 per cent, which is below than the state average of 71.6 per cent.
6. There are only 14 uninhabited villages out of total 688 villages in the district.
7. Decadal growth rate of the district (33.6 per cent) is much higher than the state average of 20.4.
8. Kashipur tahsil has the highest number of inhabited villages (291) while Khatima tahsil has the lowest number (96).
9. The district has seventeen towns. Out of them, two are new census towns added after 1991 census.
0. There are 208,076 households in the district accounting for 12.98 per cent of the total households in the state.

Note: * These figures represent 'Geographical area' supplied by the Surveyor General of India. Figures for the urban areas are those supplied by the local bodies. Area figures for rural are derived by subtracting the urban area from the total area of the District. The total of the area figures of tahsils will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Board of Revenue.

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/ Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in two parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in two parts for each district. The Village and Town Directories comprised Part 'A' and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part 'B'. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the CD Block level presentation of data. The VD data was also made available through the magnetic tapes/ floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on CD-ROM, hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

District Udham Singh Nagar was created on 29th September 1997 by carving out tarai belt of district Nainital. It is named after the famous martyr Udham Singh. The extensive archaeological remains discovered in the vicinity of the village of Ujhain, about 1.6 km to the east of the town of Kashipur, indicate that this locality must have been an important and flourishing cultural as well as political centre during the first millennium prior to the Christian era. From the archaeological remains in Ujhain, it is evident that this place represents the site of an important city which was probably the capital of the country called Govishana visited by the Chinese pilgrim Hiuen Tsang, in the 7th century A.D. In Kashipur region, it is said on the basis of a tradition recorded in Chand Bardai's 'Prithviraj-raso', that about 714 A.D. Ram Parmar, the paramount sovereign and lord of Ujhain (near Kashipur) gave lands to the members of thirty six Rajput clans and Katechr (modern Rohilkhand) to one Kehar. It appears that during the confusion that prevailed after the death of Harsha, the Parmar ruler of Ujhain became independent and gradually acquired considerable power.

Until 1948 this region remained neglected due to dense forest and adverse climatic condition. Due to marshy land, severe hot climate, excessive rainfall, natural habitat of wild and ferocious animals, prevalence of diseases and lack of communication, this part had negligible human habitation by then.

Historians believe that centuries ago, a devotee of lord Rudra or some chieftain of a Hindu tribe established Rudrapur village, which with the passage of time has developed into a thriving town. During the reign of Mughal Emperor Akbar in 1588 this part of tarai was gifted as jaghir (hereditary assignment of land) to the Raja Rudra Chand of Chand dynasty. To bring in stability in the tarai region from regular attacks being perpetrated from plain area, Raja Rudra Chand established a permanent army camp at Rudrapur. This was the beginning of the rise of Rudrapur and prompted human habitation around Rudrapur. It is also said Rudrapur is named after Raja Rudra Chand. The early history of the district is little known. The ruined fort of Ujhain near the town of Kashipur is well known. A tank in the neighbourhood, known as Drona-Sagar, is popularly believed to have been made by the five Pandava brothers for their teacher, Drona. The tarai tract including the present tahsils of Kichha and Khatima of the district had sometimes been claimed by the rulers of the Kumaon hills in the north and some times by those of Rohilkhand in the south. The ancient sub-montane trade highway is also said to have passed through a part of the tarai in the district. Politically, this area has always, except for a couple of centuries in the later mediaeval period, formed part of the region known variously as North Panchala, Kalehar and Rohilkhand.

Tarai belt remained in the domain of Chand rajas of Kumaon. At the reign of Garur Gyan Chand (1374-1419), the plains including the tarai passed out of the possession of the Chand rajas. Garur Gyan Chand is said to have, proceeded to Delhi and petitioned the Sultan for the grant of the tract laying along the foot of the hills, that is, the bhabar and tarai areas. The Sultan was pleased with the skill of him shooting down a flying vulture on a hunting expedition and he bestowed upon the raja, the title of Garur and granted his prayer to hold and possess the land lying along the foot of the hills as far as Ganga, which thus included the entire bhabar and tarai tract. This Sultan may have been Mahmud Tughlaq who is known to have come to the tarai on a hunting expedition in 1410 or 1412 A.D.

During the reign of Rudra Chand who is traditionally assigned to 1565-1597 A.D., a contemporary of the great Mughal emperor Akbar (1556-1605 A.D.), the eastern parts of the bhabar and tarai tracts are said to have been temporarily occupied by the Muslims, probably under Husain Khan Tukariya. It is said that after the death of Husain Khan Tukariya, the raja himself marched to the tarai and expelled the Muslims from that region. The Mughal emperor gave tarai parganas to the raja at a grant. The portion of the tarai that came into the raja's direct and legal possession was called the Chaurasi Mal. The period thereafter is the history of upheaval, which saw the ownership of the tarai region changing from one hand to another. In the year 1815, this region along with Kumaon came under the British rule. After the creation of district Naini Tal in 1861, during 1864-65, entire tarai and bhabar areas were declared under the British Crown through the 'Tarai and Bhabar Government Act.' During the following decades of the 19th century the history of the area covered by the district is almost uneventful. With the beginning of the 20th century the people of the district began to be gradually conscious of their civic rights and of their exploitation by the colonial government. The growing dissatisfaction of the public began to find expression in different ways. The people of this district took active part in the freedom struggle. The sacrifice of freedom fighters did not go in vain. The country ultimately became independent in 1947. The development of tarai region began after 1948. After the partition of the country, grave problem of refugee settlement came before the government of India. Large number of displaced persons, from north-western and eastern side was rehabilitated in the vast area of this district under colonization plan. Individual were distributed land. Thus group of people from Kashmir, Punjab, Bengal, Kerala, Garhwal, Kumaon, Haryana, Rajasthan and Nepal were settled in this district with different languages, religions, occupations and cultures making it a 'mini Hindustan'.

(iii) Administrative Setup

The district of Udham Singh Nagar is situated in the south-eastern part of the state of Uttaranchal. The district has four tahsils namely Kashipur, Kichha, Sitarganj and Khatima, For development purposes the district is divided into seven community development blocks. They are located at Jaspur, Kashipur, Bazpur, Gadarpur, Rudrapur, Sitarganj and Khatima. Seven development blocks are further divided into 327 gram sabhas.

The district Udham Singh Nagar was created vide notification number 2511/1-5/95-100/89 dated 29.09.1997 by carving out four tahsils of District Nainital. The newly created state of Uttaranchal was created by carving out 13 districts of Uttar Pradesh, the district being one of them.

The district has 688 villages, out of which 674 villages are inhabited, 14 uninhabited and 16 forest villages. There are 17 towns in the district. Eight urban units (Jaspur, Kashipur, Bajpur, Gadarpur, Rudrapur, Kichha, Sitarganj and Khatima) have the status of Nagar Palika Parishad (M.B.) and 6 towns (Mahua Davra, Mahua Kheraganj, Kelakhera, Dineshpur, Sultanpur and Shaktigarh) have the status of Nagar Panchayat. Three towns are census towns. The onus of administration lies on the shoulders of district level officers such as District Magistrate in association with Additional District Magistrate, Sub-Divisional Magistrate inclusive of District Judge, Superintendent of Police, Chief Development Officer, District Development Officer, Assistant District Development Officer, Chief Medical Officer, Treasury Officer, District Rural Development Authority, District Inspector of Schools, Regional Tourist Officer, District Employment Officer, District Horticulture Officer, District Informatics Officer (NIC, Govt. of India), District Information Officer (State Govt.), General Manager (Distt. Industry Centre), District Election Officer, Distt. Public Relation Officer, Distt. Economic and Statistics Officer, Assistant Director, Small Industries, District Forest Officer, Distt. Forest Officer (Soil Conservation), DFO (Logging), Additional Forest Conservator (Forest Division), Commandant (Home Guards), Executive Engineer (Jal Nigam), Executive Engineer (Electricity Distribution Division), Superintending Engineer (Public Works Department), Executive Engineer(Public Works Department-Pauri division), Executive Engineer (Rural Engineering Services), Executive Engineer (Irrigation), Executive Engineer (Mandi Parishad), SPO (Power House) etc. The revenue hierarchy shows the engagement of Tahsildars, Naib-tahsildars, Supervisor Kanoongo, Registrar Kanoongo and Lekhpal/Patwari. District level officers are assisted by their deputies.

(iv) Physical Features

Location and Size :

District Udham Singh Nagar is situated in the south-east part of Kumaon Division of the state of Uttaranchal. It is situated between the latitudes 28° north and longitude 78° east. It is bounded in the north by the districts of Nainital and Champawat, Bijnor in the west, Moradabad in the south-west, Rampur and Bareilly in the south and Pilibhit in the south and south-east. The eastern boundary meets with Nepal. The entire north and eastern boundary of the district is crowned with the reserve forests of Nainital and Champawat. The geographical area of the district is 2542 sq kms. and acquires 9th place by area in the state of Uttaranchal.

Physiography :

The whole area of the district is tarai (low land). Topographically tarai region is akin to the plains and also has good forests. There are damp and marshy tracts in places. It is the zone of seepage where fine sand, silt and clay are deposited by the emerging streams. Almost level and fertile soil along with high water table has rendered the belt useful. Several rivers and stream cross the region transversely and leave their deposit making the land fertile. However, these also dissect the region which renders it unfit for agriculture. Kosi is the master stream flowing in the western part with its broad course from north to south. Overall, the region is much dissected by several streams. The region belongs to recent alluvium consisting of silt, clay, pebbles and boulders. The moist, water logged plain of the tarai, is built up of alluvial deposits comprising hard clays intercalated with beds of porous sands and gravels and frequently kankar (coarse lime stone, used as road metal).

Drainage :

There are a large number of streams which originate in the swamps of the tarai along its northern border. These streams are the tributaries of the Ramganga which joins the Ganga in district Hardoi. The drainage system of the tract resembles the reticulation of a leaf, the streamlets on the edge uniting to form large channels which in turn feeding the arterial lines of drainage, all eventually joining the great midrib stream, the Ramganga. Nearly all the tarai streams are subject to heavy floods during the rains and are utilized for irrigation purposes, none of them being navigable. Starting from the east the main rivers flowing through the tarai are the Sarda (Chauka), Khakra, Lohiya, Jagbura, Kamin Deoha, Kailas, Bahgul, Barar, Dhimri, Bhakra, Nihal, Dabka, Ghuga, Naiya, Kosi, Dhela Phika, Gola, Sukhi, Dhora and Kalaunia.

Climate :

The climate of the district is almost similar to the plains in the south. Basically there are four seasons. The summer season is from March to about the end of June. The south-west monsoon season starts thereafter and lasts till about the middle of September. The period mid September to November constitutes the post-monsoon or autumn season and that from December to February is the cold season.

The maximum and minimum temperature recorded in 1998-99 was 40.6°C and 1.7°C respectively. The period of the south-west monsoon from about the last week of June to mid September is the main rainy season. Some rainfall much less in amount, however, occurs in the cold season. The average annual rainfall in the district is 1520 millimeter. The actual rainfall recorded in 1998 was 1417 millimeter. In the district westerly to north-westerly winds are predominant in the post-monsoon, the winter and the early parts of summer season. In the latter part of the summer and monsoon seasons winds are mainly easterly and south-easterly. Humidity is high during the monsoon season and less in winter months. Being in the tarai region the humidity is generally high.

Natural Economic Resources

Forestry :

Reserved forest in the district is controlled by three forest ranges. According to the Samajik Samiksha 1999-2000 the forest area in the district cover 33 per cent of the total reported area. The forests are rich in trees of economic and industrial importance such as sal, sheesham (Dalbergia sissoo), khair, sagaun (teak) and eucalyptus. The other trees found in these forests are imli (Tamarind), bahera, bans, dhak (Butea monosperma), dhauri, domsal, jamun, kachnar, siris , phaltu, semul (Red silk cotton tree) etc. Commercially useful trees like eucalyptus and poplar are being planted by the farmers. Forestation schemes are being undertaken by the Forest Department to augment the forest cover of the district. These forests yield timber, resin, firewood, medicinal herbs, honey, wax etc.

The district had been habitat of a large variety of animals and various species of birds, reptiles and fish. Among the chief carnivore found in the district are the tiger, hyena, sloth bear, wolf and panther. The panther or leopard is found throughout the district. The sloth bear prefers swampy and marshy ground in the sal forests of the tarai. Jackals are commonly seen in the scrub forests. The other animals found in the district include monkey, wild pigs, the common Indian fox, the hare, antelope, rats, squirrels and mongooses. The district is particularly rich in birds including a large variety of non-migratory and many migratory birds which visit the district in different parts of the year. Many species of eagle, owl and vulture are found. Wood-peckers, king fishers, cuckoos, sparrow, bulbul and many species of the pigeon and the dove are commonly found.

Minerals and Mining :

Economic mineral deposits in the district are not available with the exception of some building materials such as kankar (coarse lime stone) and sand.

Soil :

The soil in the district is different from that found in the adjoining hilly areas. The soil is derived from the Siwalik range. The soil is younger in age. The soil types in the tarai area are clay loam, clay loam (non-calcareous), loam (highly calcareous), loam (slightly calcareous) and loam (non-calcareous) as well as sandy loam (predominantly sandy soil).

Land and land use pattern :

According to Samajik Samiksha 1999-2000, total reported area of the district was 278775 hectare, which consists of 33.4 per cent covered under forest, 8.7 per cent used for other than agriculture, 3.9 per cent barren, uncultivable and fallow land and 54.0 per cent land is net area sown. Out of the net sown area (150683 hectare), 66.3 per cent land is multiple cropped areas. Out of the total sown area 58.4 per cent is under kharif crops, 37.9 per cent under rabi crops and 3.7 per cent are is under zaid crops 90.5 per cent area of the actual sown area is irrigated.

Tenancy :

In the hill regions, the land tenures were different from those obtaining in the plains. The land in this region belonged either to the hissedars or puccka khaikars. After the enforcement of the Kumaon and Uttarakhand Zamindari Abolition and Land Reforms Act, 1960, the old land tenures were abolished. This Act replaced the multiplicity of tenures existing in the region by three types: the bhumidhar, sirdar and asami. The intermediaries became bhumidhars in respect of groves held by them. Those who were hissedars (shareholders) and khaikars became bhumidhars in respect of lands in their actual possession. A sirdar has a permanent and heritable interest in his land holdings but can use his land only for agriculture, horticulture and animal husbandry, although he can acquire bhumidhari rights under the provisions of the Act. An asami's right is heritable but not transferable or permanent and he can be ejected from his holdings. Tenancy rights are normally bestowed on tiller. However, practice of share cropping and sublet system are also prevalent.

Agriculture and cropping pattern :

The history of cultivation in the tarai is for practical purposes the history of the tarai reclamation

and colonization taken up since 1947-48. Prior to this the whole area was marshy, malarial, densely wooded and the haunt of wild animals and, therefore, cultivation was generally sparse. But now it has become agricultural bowl of Uttaranchal. As in the plains, this district has also have three harvests, kharif, rabi and zaid. In rabi, wheat, barley, masur, (lentil) and mustard are the chief crops grown. Generally the rabi crops are sown from October to November and the harvesting lasts from the end of April to the middle of May. In kharif, the main crops grown are paddy, urd, maize and potato. The farmers of this district are gradually taking up improved technique of agriculture and advanced implements for higher yield.

Agriculture provides mainstay to the economy in the district. Nearly 64 per cent main-workers were agriculture related workers at the 1991 census. This district has become one of the richest in the field of agriculture. Agricultural lands are generally fertile and with the usage of highly improved agricultural techniques, the district has become agriculturally most yielding one in the Uttaranchal state. There are three harvests in the district, kharif, rabi and zaid. Paddy is the main crop of the district occupying 57.83 per cent of the cultivable land followed by wheat which is sown in 25.52 per cent of the cultivable land. Sugarcane is the most important cash crop which is sown in 12.95 per cent of the cultivable land. Other crops grown in the district are maize, pulses, oilseeds and potato. Average yield per hectare according to Samajik Samiksha 1999-2000 was 30.75 quintals for paddy, 25.39 quintals for wheat, 16.01 quintals for maize, 7.38 quintals for pulses, 5.66 quintals for oil seeds, 623.52 quintals for cane and 136.73 quintals for potato during 1997-98. To improve the agricultural produce, the farmers of the district have the services of 8 seed go downs/fertilizer depots, one rural depot, 7 insecticide depots, 5 cold storages and 8 agriculture service centres during 1998-99. During the same period the district had 24 warehousing go downs of different agencies such as Food Corporation of India, Central Warehousing Corporation and State Warehousing Corporation of State Government. The Govind Ballabh Pant Agriculture and Technical University and U.P. Tarai Beej Evam Vikas Nigam are situated in the district and the farmers have immensely benefited from them. Besides, there are government officials providing information about agriculture and crop protection. There are laboratories for soil testing.

Irrigation :

Canals, tube wells, wells and ponds are the main sources of irrigation in the district. More than 90 per cent of the gross sown area in the district is irrigated. Maximum agricultural land (61.00 per cent) is irrigated through private tube wells, followed by 22.71 per cent through canals 13.00 per cent through wells, 9.54 per cent through government tube wells, and 2.53 per cent through other sources. According to Samajik Samiksha 1999-2000 the district had 1063 km long canal network, 249 government and 7058 private tube wells and 20656 pump sets. There is a big irrigation dam – Nanak Sagar at Nanakmata in the district.

Animal Husbandry :

Animal husbandry supplements the income of the farmers. Cows and she-buffaloes are reared for milk and oxen are used for plough the fields and also as pack animals. Sheep and goats are reared chiefly for their flesh, wool and skin. The improvement in the stock of cattle is an important concern in the agricultural economy of the district. The indigenous cattle of the district were weak and their yield of milk was low. The animal husbandry department has been taking steps to introduce improved cattle. According to Samajik Samiksha 1999-2000, the last cattle census conducted during 1993 states that total number of cattle in the undivided district of Naini Tal was 370076, among them cattle population was 132586 buffaloes 146388, sheep 2955, 43655 goats and pigs 37892. Poultry birds were 261632. To improve the livestock the district had the services of 23 veterinary dispensaries, 78 livestock development centres, 23 artificial insemination centres and 78 sub-centres and one pig development centre during 1999-2000. Up to March, 2000, there were 300 milk co-operatives in the district producing on average 22500 liters milk daily. Balanced fodder is being supplied to milk producers through these societies.

Fishery :

The lakes, rivers and streams of the district abound in various species of fish. The fish mostly found are the rohu, nain, catla, saul, parhan and tengan. They are generally used for the table throughout the district. The Tharus and Buksas of the district are chief fish-eating communities. There is enough scope for the development of fishery in the district. There are many small ponds under gram sabhas, revenue department and private owners.

Ponds controlled by gram sabha or revenue department are leased to fishermen for 10 years. There is a fish farm at Dhaura, under which there are 18 ponds. Most of the ponds are in dilapidated condition, which need renovation. During 1999-2000, 49.29 lakh fingerlings were distributed to the fishermen.

Industry :

Although the district of Udham Singh Nagar is predominantly agricultural, many industries have been established in the district. Being situated in the plain region of Uttaranchal, the district has benefited in industrial development. Up to March 2000, the district had 50 large and medium scale industries with the capital investment of Rs. 1040.83 crore. These industries included 6 sugar mills, 2 textile mills, 8 paper mills, 2 flour mills and 2 units of polyester fiber and chips. There were 2927 small scale industries. These small scale industries included 225 rice mills, 5 solvent plants, 11 flour mills, 20 processing units, 3 cement manufacturing units and 85 agricultural implements units. Other small scale units working in the district are in fields of stationery items, wood furniture, marble and tiles, tire rethreading, aluminum utensils, manufacturing of chips, stone rolling mills, manufacturing PVC pipe, mentha -oil, medicinal drugs, pulse mills and calendaring units. Among large and medium scale industries there are also units manufacturing generator set, T.V. picture tube, vegetable oil, heavy engineering equipment, disposable syringe, electric lamp, cotton and synthetic yarn, rice bran oil, straw board, tractor assembling and craft paper.

Trade and Commerce :

District Udham Singh Nagar has developed into a big trading centre of the region. Exports from the district include products of industries established in the district and agricultural products such as rice, wheat, maize, oilseeds and sugar cane. The pattern of imports indicates the predominance of consumer goods. Most of the imports consist of mechanical and electrical goods, drugs and chemicals, cotton and woolen clothes, soap, fruits and confectionery items. Rudrapur is a big trading centre and has trade links with adjoining districts of U.P. and Uttaranchal.

Transport :

Transport and communication are basic infrastructure which play important role in the social, economic and industrial development of any area. District Udham Singh Nagar is well connected by railways. There are 14 railway stations (including halt) in the district. The length of rail line in the district is 113 km of broad gauge and 48 km of meter gauge. The length of state highway passing through the district is 214 km. Total length of metalled road in the district during 1997-98 was 1837 km. The ratio of roads per lakh population is 131 km. The chief mode of transport is bus, jeep, car and trucks. According to Samajik Samiksha during 1999-2000 the number of bus stations/bus stops for state roadways was 144 in the district.

Electricity and Power :

All villages of the district are electrified. Only few hamlets in villages are still deprived of electricity. Efforts are being made to electrify these hamlets. Major consumer of the electricity is industrial sector which consumes 44 per cent of the total electricity closely followed by agriculture (34.4 per cent). Domestic light sector consumes 16 per cent electricity. Other sectors such as commercial (2.3 per cent), public lighting (0.3 per cent) and public utility (3 per cent) consume rest of electricity. To facilitate the uninterrupted supply of electricity there are 18 stations of 33 and 11 KVA in the district.

Gram Panchayats :

In order to strengthen Panchayati Raj system, Gram Panchayats have to play increased role in the development of village economy. A total of 327 Gram Sabhas exist in the district. The Gram Panchayat consists of Pradhan (President), Up-Pradhan (vice president) and members. Elections are held periodically to elect members and Pradhan of Gram Sabha. To ensure representation of all sections of the society, seats are reserved proportionately for scheduled castes, scheduled tribes and women. Tenure of the Panchayat is of five years or less if dissolved earlier. Village Panchayat meets once in a month, which is presided by Pradhan and all the decisions are taken by majority of votes.

Panchayat Adalats (now called Nyay Panchayats) were established in 1949 under the "U.P. Panchayat Raj Act 1947" to entrust the villages with the power to adjudicate petty offences and certain civil disputes locally. The jurisdiction of Nyay Panchayat usually extends over an area of five to 10 Gram Sabhas, depending upon the population of constituent villages. Almost one village was considered to be Gram Sabha but minimum population of 250 was fixed for Gram Sabha. The Gram Panchayats are authorized by the constitution for

receiving land revenue (taxes), punitive taxes, income on tenancy of public land, receipts from auction of public land, donations from different sources and loans in cash and kind. More than seventeen departments have been allotted to Gram Sabhas in order to ensure that the benefits of the government program may reach to the common people living in the villages. Under civic and welfare duties, it provides safe drinking water, better medical and health care, arranges primary and secondary education, maintains roads, drainage and other essential services required. Development functions include minor irrigation, agriculture plan, rural electrification, vocational education, rural housing and poverty alleviation program. Its duties include implementation of various development plans, introduced by central and state governments from time to time. The duties of Panchayats also include registration of births and deaths and marriages, regulating markets and fairs, repairs and maintenance of property of Gram Sabhas, public wells, tanks and ponds and other welfare activities in the interest of common man.

(v) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom,

dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house.On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link

in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes. The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes :

1 Agariya
2 Badhik
3 Badi
4 Baheliya
5 Baiga
6 Baiswar
7 Bajaniya
8 Bajgi
9 Balahar
10 Balai
11 Balmiki
12 Bangali
13 Banmanus
14 Bansphor
15 Barwar
16 Basor
17 Bawariya
18 Beldar
19 Beriya
20 Bhantu
21 Bhuiya
22 Bhuyiar
23 Boria
24 Chamar, Dhusia, Jhusia, Jatawa
25 Chero
26 Dabgar
27 Majhwar
28 Mazhabi
29 Musahar
30 Nat
31 Pankha
32 Parahiya
33 Pasi, Tarmali
34 Patari
35 Rawat
36 Saharya
37 Dhangar
38 Dhanuk
39 Dharkar
40 Dhobi
41 Dom
42 Domar
43 Dusadh
44 Gharami
45 Ghasiya
46 Gond
47 Gual
48 Habura
49 Hari
50 Hela
51 Kalabaz
52 Kanjar
53 Kapariya
54 Karwal
55 Khairaha
56 Kharwar (excluding Banbasi)
57 Khorot
58 Kol
59 Khatik
60 Kori
61 Korwa
62 Lalbegi
63 Sanaurhiya
64 Sansiya
65 Shilpkar
66 Turaiha

Scheduled Tribes

1 Bhotia
2 Buksa
3 Jaunsari
4 Raji
5 Tharu

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the

mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even

if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1,000 males in a population.

(vi) Non Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

System of Sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii)sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live

births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$\frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the agegroup 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1,000 Population)

Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/ he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents / relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress

migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and Employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution :

The total population of the district is 1,235,614 in which 832,600 live in rural and rest 403,014 in urban parts. There are four tahsils in district namely Kashipur, Kichha, Sitarganj and Khatima. The most populous tahsil is Kashipur followed by Kichha. Sitarganj is least populated tahsil followed by Khatima. The urban population in the district is about 32.6 per ent The urban population is maximum at about 39.2 per ent in Kashipur tahsil. There are 688 revenue villages in the district out of which 674 are inhabited at the 2001 Census and remaining 14 are un-inhabited. The total rural population of 832,600 is spread over 7 CD Blocks and 16 inhabited forest villages. The most populous CD Block is Khatima with a population of 161,291 but the maximum number of inhabited villages (123) are in Sitarganj CD Block. About half of populated villages have a population less than 200 and such villages form as high as about 19.2 per cent of total populated villages in Bajpur CD Block. Although the population density in the rural district is about 366.4 highest proportion (29.2%) of villages are with a population density range of 500+ per square kilometer. Such villages contain as much as about 52.2 per cent of total rural population.

Size - Class and Status of Towns :

In the total urban population of 403,014 as much as 92,967 live in Kashipur town. The next big town is Rudrapur with a population of 88,676. The above two are class II towns having the civic status of Municipal Board (MB). Rest of 15 towns are MB Nagar Panchayats (NP) and Census Towns.

Population growth :

At the present territorial jurisdiction the population of the district was 924,856 at 1991 Census and growing by 33.6 per cent during the decade 1991-2001 it is 1,235,614 at 2001 Census. The decadal growth at 33.6 per cent in the district has been at higher level than in the state at 20.4 per cents.

Population Density :

The district has an area of 2,542 square kilometer. The population density in the district is 486. In the rural areas of the district the density is about 341.

Sex - Ratio :

The sex-ratio in the district at 902 is lower to 962 at the state level. Indeed the sex-ratio at the district has been all along lower in the district as against to the state since 1901. As against to urban areas of the district the sex-ratio is higher in rural areas. Among tahsils, highest sex-ratio is in Sitarganj and lowest in Khatima. Among CD Block the sex-ratio is highest in Khatima at 967 and lowest in Rudrapur at 883. Out of 674 inhabited villages in the district there are about 3.3 per cent villages (with 0.6 per cent of rural population) which are having a sex-ratio below 700. In the urban parts of the district the sex-ratio is 876 and highest of 926 in Dineshpur and lowest of 755 in Kachnal Gosain. The sex-ratio of population in the age-group 0-6 is 913 in the district which is higher than the state being only at 908. As against a sex-ratio of 923 in the age-group 0-6 of rural population of the district, it is highest at 960 in Sitarganj CD Block and lowest at 893 in Kashipur CD Block. It may be noted that out of 674 inhabited villages in the district in over 8.9 per cent of villages with about 2.1 per cent of rural population the sex-ratio in the age-group 0-6 is less than 700. As against the 0-6 age group sex-ratio of 923 in the rural area of the district it is only 891 in urban areas. Among towns this sex-ratio is highest at 973 in Banndia and lowest at 782 in Gadarpur.

Work Participation Rate :

In the total population of the district of 1,235,614 as much as 31.7 per cent are workers and rest of 68.3 per cent are non-worker. Among workers 76.5 per cent are main workers and rest of 23.5 per cent are marginal workers. In absolute terms females outnumber males as main worker but males outmatch greatly the females as marginal workers. The extent of main workers is highest at about 82.0 per cent in Kichha tahsil and lowest at about 66.3 per cent in Khatima tahsil. In case of marginal workers the proportion is highest in Khatima tahsil as 33.7 per cent in comparison to only about 17.9 per cent in Kichha tahsil. The extent of workers and non-workers in rural and urban parts is higher. In the district among workers about 30.3 per cent are cultivators and 41.4 per cent other workers. About 37.0 per cent of female workers are engaged as cultivators.

Literacy :

In the district about 64.9 per cent population is literate. The literacy is about 71 per cent in urban areas and about 61.8 per cent in rural areas. The males literacy is as higher as 75.2 per cent against about 53.4 per cent females literacy, and therefore the gap in male/female literacy rate is 21.8 per cent. In rural areas among 7 CD Blocks, the highest literacy is at 68.1 per cent in Khatima and lowest at about 54.3 per cent in Bajpur. The literacy among males in rural areas is about 73.4 per cent in comparison to about 49.2 per cent among females. The lowest female literacy of about 41.4 per cent is in Bajpur CD Block. Also the gap in male/female literacy rate is highest in Sitarganj CD Block which is about 26 per cent. In about 30.6 per cent of villages covering about 31.5 per cent of rural population the literacy range is 61 to 70. Among urbanites in the district, as much as about 78.9 per cent males are literates as against about 62 per cent females. The highest urban literacy is in Kachnal Gasain at 83.1 per cent and lowest in Bandia at 63.2 per cent. The maximum males literacy is also found in Kachnal Gasain at 90.5 per cent and lowest at about 54.7 per cent in Kela Khera. However, the highest females literacy is in Kashipur at 71.4 per cent and lowest at about 38.8 per cent in Mahua Kheraganj. Still, the maximum gap in male-female literacy rate at 31.1 per cent is found in Sultanpur. The literacy among scheduled castes is about 13.17 per cent, in the countriside it is about 55.3 per cent and about 56.4 per cent in towns.

(viii) Brief analysis of PCA data :

The district throws up a vivid picture of its population by varying parameters at the 2001 Census. Among few of the peculiar characteristics of the population is being highlighted here on the basis of the following inset tables.

TABLE - 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population 1991 Total	1991 Rural	1991 Urban	Population 2001 Total	2001 Rural	2001 Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kashipur	359,934	219,504	140,430	481,208	292,855	188,353	33.7	33.4	34.1	39.0	39.1
2	Kichha	297,029	176,960	120,069	395,908	222,385	173,523	33.3	25.7	44.5	40.4	43.8
3	Sitarganj	134,224	113,675	20,549	175,069	148,266	26,803	30.4	30.4	30.4	15.3	15.3
4	Khatima	133,669	122,424	11,245	183,429	169,094	14,335	37.2	38.1	27.5	8.4	7.8
District Total:		**924,856**	**632,563**	**292,293**	**1,235,614**	**832,600**	**403,014**	**33.6**	**31.6**	**37.9**	**31.6**	**32.6**

Note: As the district Udham Singh Nagar was carved out from the district Nainital in the year 1997, therefore, recasted figures have been taken for the year 1991.

The table depicts the decadal variation in population during 1991-2001 for the district and its tahsils. The percentage of urban population to total population is also given in above table. The decadal growth rate of the district is 33.6 per cent during 1991-2001. The growth rates for rural and urban areas of the district are 31.6 and 37.9 per cent respectively. Out of the total population of the district 67.4 per cent lives in rural areas while 32.6 per cent lives in urban areas of the district. The proportion of urban population has gone up during the decade from 31.6 per cent in 1991 to 32.6 per cent in 2001 in the district. The highest growth of urban population (44.5 per cent) is recorded in Kichha tahsil and lowest is registered in Khatima (27.5 per cent) tahsil. Khatima tahsil has highest decadal growth rate of 37.2 per cent, while Sitarganj has shown the lowest growth rate of 30.4 per cent for the total population.

TABLE - 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population Persons	Males	Females	Number and percentage of villages	Population less than 200 Males	Females	Number and percentage of villages	Population 200-499 Males	Females	Number and percentage of villages
1	2	3	4	5	6	7	8	9	10	11	12	13

Table-2 gives C.D. block-wise population, number and percentage of villages falling in each

range of population size of villages and number of males and females in each population range at C.D. block level in the district. Out of the 674 inhabited villages, 82 (12.2 per cent) are small sized villages with population below 200 persons. In the size of 200 to 499 persons there are 123 villages having 18.2. per cent villages of the district while the size class of 500-999 population claims 181 villages with 26.9 per cent of the total villages in the district. 171 villages (25.4 per cent) are in the size class of 1,000-1,999 and 105 villages (15.6 per cent) are in the size class of 2,000-4,999. 12 villages in the district fall in the ranges of 5,000 and above population.

TABLE - 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

(a) New
  (i) Statutory town – NIL
  (ii) Census town
    1 Kachnal Gosain
    2 Bandia
(b) Denotified
  (i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns - NIL
  (ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria - NIL
  (iii) Census towns of 1991 census are notified as statutory town in 2001 census - NIL
(c) Declassified - NIL
(d) Wholly merged with other town(s) - NIL

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria. After 1991 census, two census towns have been added but no town is denotified, declassified at merged with other in 2001 census.

TABLE - 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	18	2.7	21,606	2.6
11-20	4	0.6	507	0.1
21-50	22	3.3	1,791	0.2
51-100	39	5.8	12,058	1.4
101-200	101	15	54,269	6.5
201-300	97	14.4	78,687	9.5
301-500	196	29.1	228,730	27.5
501 +	197	29.2	434,952	52.2
Not known	0	0	0	0
District Total:	**674**	**100**	**832,600**	**100**

This table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 197 accounting for 29.2 per cent of the total inhabited villages of the district fall in the density range of 501+ having 52.2 per cent population of the district. The lowest range of 0-10 cover 18 villages (2.7 per cent).

TABLE - 5 : SEX RATIO OF STATE AND DISTRICT, 1991-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	918	943	668	796	779	909
1911	907	944	585	769	749	895
1921	915	902	547	722	697	875
1931	913	948	604	708	682	866
1941	907	953	570	705	658	850
1951	940	990	669	703	673	854
1961	947	995	695	683	664	806
1971	940	990	721	774	763	833
1981	939	987	767	839	838	843
1991	940	982	810	862	868	851
2001	964	1,007	850	902	916	876

The above table corroborates that sex ratio in the state lie in the range of 907 to 964 during the census year 1901 to 2001. Highest sex ratio of 964 is observed in the year 2001. The rural areas of the state accounted sex ratio of 902 in 1921 to 1007 in 2001 whereas in the urban areas, it ranged from 547 in the year 1921 to 850 in the year 2001. At the district level a favourable sex ratio was found from 1901 to 2001. However,the favourable sex ratio in the district is confined only in rural areas. In the urban areas sex ratio ranged between 806 in 1961 to 909 in 1901.

TABLE - 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kashipur	891	895	885
2	Kichha	884	900	864
3	Sitarganj	920	922	907
4	Khatima	957	967	846
	District Total:	**902**	**916**	**876**

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 902 females for every thousand males in Udham singh nagar district. It becomes clear from the table that sex-ratio in rural areas is higher than that in urban areas. The sex-ratio among rural and urban population is 916 and 876 females respectively. The rural sex-ratios in the tahsils vary between 967 in Khatima tahsil and 895 females per 1,000 males in Kashipur tahsil.

TABLE - 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Jaspur	891
2	Kashipur	893
3	Bazpur	900
4	Gadarpur	918
5	Rudrapur	883
6	Sitarganj	922
7	Khatima	967
8	Forest Villages	931
	District (Rural) Total:	**916**

The table-7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes 916 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 967. females is found in Khatima C.D. block and is followed by 922 in Sitarganj while the lowest of 883, is recorded in Rudrapur C.D.block.The sex-ratios of Sitarganj, Gadarpur and Khatima C.D. block are higher than the district rural average of 916 females and in remaining blocks, this is below the district average.

TABLE - 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	22	3.3	4,677	0.6
700-749	11	1.6	3,118	0.4
750-799	36	5.3	22,060	2.6
800-849	66	9.8	58,724	7.1
850-899	151	22.4	205,748	24.7
900-949	202	30.0	326,460	39.2
950-999	105	15.6	132,056	15.9
1000-1099	65	9.6	73,874	8.9
1100+	16	2.4	5,883	0.7
District Total:	**674**	**100.0**	**832,600**	**100.0**
Sex ratio (Rural) for District:			**916**	

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e.202 accounting for 30.0 per cent of the total villages having largest population of 39.2 per cent in the district fall in the sex-ratio range of 900-949 females per 1,000 males. It is followed by the sex-ratio range of 850-899 which

claims 151 villages (22.4 per cent) and 24.7 per cent population. The highest range of 1,100 & above claims 16 villages (2.4 per cent). This range shares 0.7 per cent rural population of the district while in the sex-ratio range of 950-999, there are 105 villages (15.6 per cent). In remaining sex-ratio ranges of 800-849, 1000-1099, 750-799 less than 700 and 700-749 the number of villages are 66 (9.8 per cent), 65 (9.6 per cent), 36 (5.3 per cent), 22 (3.3 per cent) and 11 (1.6 per cent) respectively.

TABLE - 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Bandia	(CT)	783
2	Bazpur	(NPP)	826
3	Dineshpur	(NP)	926
4	Gadarpur	(NPP)	866

District Total:		**Total**	**219,291**	**114,607**	**104,684**	**913**
		Rural	**152,742**	**79,416**	**73,326**	**923**
		Urban	**66,549**	**35,191**	**31,358**	**891**

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group is 219291 persons comprising 114607 males and 104684 females. The total sex-ratio in this age-group works out 913 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes 923 and 891 females in this age-group respectively. The rural sex-ratio in tahsil varies between 961 in Sitarganj tahsil and 901 in Kashipur tahsil. The sex-ratio of Sitarganj, Khatima, and Kichha are higher than district rural average (923.). In urban areas, the highest sex-ratio is recorded in Khatima. urban (917) and the lowest is found in Sitarganj urban (882).

TABLE - 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

District (R) Total	674	**100.0**	**152,742**	**100.0**
Sex ratio (Rural) for District:			**923**	

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district.

The maximum number of villages i.e.113 (16.8 per cent) having largest population (19.5 per cent) in the district (rural) fall in the sex-ratio range of 1000-1099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 1100+ which claims 94 villages (13.9 per cent) and 7.6 per cent population. Next to it, 92 villages (13.6 per cent) are in the range of 900-949 with 18.0 per cent population. 87villages (12.9 per cent) having 18.2 per cent population fall in sex-ratio range of 850-899. In remaining sex-ratio ranges of 800-849, 950-999, less than 700, and 750-799, 700-749 claim less number of villages and these are distributed as 78 (11.6 per cent), 65 (9.6 per cent), 60 (8.9 per cent), 48 (7.1 per cent and 37 (5.5 per cent) respectively. In these ranges, the percentage of population is also low.

Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentages to total population at tahsil level in rural and urban areas of the district. Of the 1,235,614 total population of the district, 13.2 per cent of the total population belong to the Scheduled Castes and 8.9 per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 14.3 per

cent in rural population and 10.8 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Kashipur tahsil (16) while the lowest is found in Sitarganj tahsil (8.1). The proportion of Scheduled Tribes population is 13.1 and 0.4 per cent in rural and urban areas respectively. Scheduled Tribes population in the district is mainly concentrated in tahsil of Khatima (26.8 per cent), Sitarganj (18.9.) The lowest percentage of Scheduled Tribes is recorded in Kichha tahsil (3.1) followed by Kashipur tahsil (3.2).

TABLE - 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

	District (Rural) Total:	**832,600**	**119,066**	**108,808**	**14.3**	**13.1**

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 14.3 per cent of rural population of the district belongs to Scheduled Castes and 13.1 per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 29.2 per cent in Kashipur. and 7.8 per cent in Gadarpur C.D. block.. The other C.D. block containing the highest percentage of Scheduled Castes are Kashipur (29.2), followed by Jaspur. (20.1) and Rudrapur (15.4) The highest proportion of 30.3. per cent Scheduled Tribes population is counted in Khatima C.D. block and is followed by Sitarganj C.D. (22.1) block. The lowest percentage of Scheduled Tribes is recorded in jaspur (0) followed by Rudrapur (0.1.) C.D. block. The Scheduled Tribes population in the district is mainly concentrated in Khatima and Sitarganj C.D. blocks.

TABLE - 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Scheduled Castes		
		Percentage	Population	Percentage
1	2	3	4	5
Nil	121	18.0	0	0.0

District Total	**674**	**100.0**	**119,066**	**100.0**

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 121 villages accounting for 18.0 per cent of total 674 inhabited villages in the district do not have any Scheduled castes population. The proportion of Scheduled Castes population is less than 5.0 per cent in 160.villages (23.7 per cent). In 100 villages (14.8 percen) it varies between 5-10 while the next range 11-20 per cent accounts for 117 villages constituting 17.4 per cent of the total villages. The range of 21-30 and 31- 40 per cent

contains 61and 55 villages respectively. Both these ranges together account for 9.1 and 8.2 per cent villages of the district. 60 villages fall in the range of 41-50 and above per cent. Nine villages are such where the proportion of Scheduled Castes is more than 75 per cent. These villages contain 3.8 per cent Scheduled Castes population of the district. The maximum of the 22.1 per cent of the Scheduled Castes population is covered by range of 31-40 per cent.

TABLE-17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages.13.1per cent of rural population of the district belong to Scheduled Tribes population. There are 417 (61.9 per cent) villages where none of Scheduled Tribes have been recorded in the district. Sixty six (9.8 per cent) villages have proportion of Scheduled Tribes population less than 5 per cent and 30 (4.5 per cent) villages have between 11-20 percent Scheduled Tribes population. Twenty four villages each are such where proportion of Scheduled Tribes population is between 21to30 and 31-40 per cent. In 51 villages the proportion of Scheduled Tribes population ranges between 51-75 per cent accounting for 7.6 per cent of the total population of the district.

Table 18 shows number and percentage of scheduled caste and scheduled tribes population recorded during 2001 census in districtUdham Singh Nagar. The table depicts that scheduled caste

population in Mahua Kheraganj was around 31.2 per cent but very low in Dineshpur NP (3.4 per cent). Scheduled tribe population is negligible in the urban areas of the district. There is no scheduled tribe population in Mahua Dabra Haripura (NP), Jaspur NPP, Mahua Kheraganj NP, Sultanpur NP and Bandia CT. Highest percentage (2.8) of scheduled tribe population was recorded in Khatima NPP.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of CD block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Jaspur	883	538
2	Kashipur	870	993
3	Bazpur	873	969
4	Gadarpur	866	955

District (Rural) Total		**886**	**975**

Table 19 indicates sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 886 for district (rural). Among the C.D.blocks, the highest sex ratio of 937 females is found in Khatima C.D. block and lowest of 866 females is recorded in Gadarpur C.D. block. The Scheduled Tribes sex ratio is 975 for district (rural). Among CD blocks, the highest sex ratio of 993 females is found in Kashipur CD block and lowest of 538 females is recorded in Jaspur CD block.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Scheduled Castes	Scheduled Tribes sex ratio
1	2	3	4
1	Bandia (CT)	773	0
2	Bazpur (NPP)	862	625
3	Dineshpur (NP)	860	500
4	Gadarpur (NPP)	870	750
5	Jaspur (NPP)	852	0
6	Kachnal Gosain (CT)	938	333
7	Kashipur (NPP)	881	897
8	Kela Khera (NP)	786	1,250
9	Khatima (NPP)	901	178
10	Kichha (NPP)	888	714
11	Mahua Dabra Haripura (NP)	876	0
12	Mahua Kheraganj (NP)	855	0
13	Nagla (CT)	844	600
14	Rudrapur (NPP)	850	1,010
15	Shaktigarh (NP)	890	286
16	Sitarganj (NPP)	919	1,036
17	Sultanpur (NP)	834	0
Sex ratio (Urban) for the district:		**860**	**642**

Table 20 shows sex-ratio of Scheduled castes and Scheduled Tribes population in towns of the district varies from 773 to 938 and 0 to 1250, respectively. Sex-ratio (urban) for district of scheduled caste and scheduled tribe are 860 and 642 respectively. Kachnal Gosain (CT) and Kela Khera (NP) have highest SC&ST sex ratio 938 and 1250 respectively. While Bandia (CT) has lowest SC sex-ratio 773, on the other hand Mahua Dabra Haripura (NP), Jaspur (NPP), Mahua Kheraganj (NP), Sultanpur (NP) and Bandia (CT) have zero ST sex ratio.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and

urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 64.9 per cent in the district. This proportion in rural area is 61.8 per cent against 71 per cent in urban areas. In the district the literacy rates of males (75.2 per cent) is much higher than that of females (53.4 per cent). Among the tahsils, Khatima. tahsil tops with 68.7 per cent literates followed by Kashipur tahsil (65.2 per cent).Sitarganj tahsil with 61.1 per cent literates stands at the bottam in the district. Out of 4tahsils, the literacy rates of 2 tahsils are higher than that of district average(64.9). It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which comes to 21.9 per cent in the district, as a whole. The situation at tahsil level is not much different. However this gap in urban literacy is low which comes to 16.9 points against the rural areas where the gap between male and female literacy is 24.2 points.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Jaspur	51,429	32,052	19,377	48,825	20,953	27,872	63.3	74.5	50.7	23.8

District (Rural) Total:		**420,267**	**260,647**	**159,620**	**412,333**	**174,007**	**238,326**	**61.8**	**73.4**	**49.2**	**24.2**

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district.61.8 per cent of the total rural population excluding the age-group of 0-6 years is literate in the district. The corresponding proportion of male and female literates comes to 73.4 and 49.2.per cent respectively which shows very wide gap of 24.2 per cent in male and female literacy. At CD block level, Khatima CD block has the highest rural literacy rate of 68.1 per cent while 79.9 per cent males and 56 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in Bazpur CD block (54.3 per cent).There are wide variations in male and female literacy in all the CD blocks of the district. The maximum difference of 26.5 points is found in Sitarganj CD block.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	0	0.0	0	0.0
11-20	0	0.0	0	0.0

District Total:	**674**	**100.0**	**832,600**	**100.0**
Literacy rate for District:		**64.9**		

Table 23 gives the distribution of villages by literacy rate ranges in the district. There are two

villages (0.3 per cent)having the least literate population. 179 villages accounting for 26.6 per cent of the total villages are in the literacy range of 51-60 per cent and 206 villages (30.6per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed in 101 villages (15per ent) of the district. The higher literacy ranges of 71 to 100 per cent covers 188villages (27.9per cent). The range of 51-70 have the maximum number of 385 villages forming 57.2 per cent of the total inhabited villages.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates Kashipur NPP town is way ahead of other towns. The table reveals that literacy rate is pretty high in the urban areas of the district (71.0). The literacy rate is quite high (above 85 per cent in three towns) among males. Female literacy rate is not for behind in three towns (above 69 per cent). However, literacy rate among females is very low (31.6 per cent) in Kela Khera town.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

	District (Urban)	**20,044**	**12,989**	**7,055**	**23,672**	**10,510**	**13,162**	**56.4**	**67.7**	**43.2**	**24.4**

The table 27 brings out the number and percentage of scheduled castes literates and illiterates by sex in urban agglomerations/towns population at the 2001 census. The number of illiterates is higher than literates in the district (urban) and towns.The percentage of literates is least in Kichha NPP among 17 towns but the gap in male/female literate rate is highest in case of Mahua Kheraganj NP (40.1). The males in all the 17 towns enjoy higher literacy rate than females. The gap in male/female literacy rate is least in case of Kashipur NPP.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

8	Forest Villages	472	310	162	709	282	427	47.1	61.5	32.5	29
District (Rural) Total:		**57,971**	**36,011**	**21,960**	**50,837**	**19,070**	**31,767**	**63.7**	**78.3**	**48.8**	**29.5**

The table 28 brings out the number and percentage of scheduled tribes literates and illiterates by sex in CD Blocks at the 2001 census. The number of illiterates is less than literates in the district and CD Blocks, with exception to Bazpur, Gadarpur, and Rudrapur CD Blocks. The literacy rate of the scheduled tribes population at about 63.7 per cent is higher than the corresponding rate of about 55.3 per cent in case of scheduled castes community. The gap in male and female literacy rates at about 29.5 per cent is also higher than what it is in case of the scheduled castes community (about 29.1per cent). The literacy rate is highest in Jaspur CD Block (90 per cent) and lowest in Gadarpur (52.6 per cent).

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	12	4.7	33	0.0
1-10	2	0.8	57	0.1
11-20	4	1.6	144	0.1
21-30	4	1.6	417	0.4
31-40	6	2.3	327	0.3
41-50	27	10.5	9,023	8.3
51-60	44	17.1	21,693	19.9
61-70	93	36.2	58,725	54.0
71-80	35	13.6	17,029	15.7
81-90	7	2.7	1,061	1.0
91-99	2	0.8	22	0.0
100	21	8.2	277	0.3
District Total:	**257**	**100.0**	**108,808**	**100.0**
Literacy rate for District (Rural):		**63.7**		

The table 29 gives the distribution of villages by literacy rate range for the scheduled tribes population at the 2001 census. In the district the scheduled tribes population is found in 257 villages out of which in 21villages the literacy range is 100 per cent. However, the maximum (54.0 per cent) of the scheduled tribes population (58,725.) is found in only 93 villages with literacy range from 61 to 70 percentages.

TABLE30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

	District (Urban)	**1,037**	**708**	**329**	**375**	**152**	**223**	**83.6**	**92.9**	**68.8**	**24.1**

Table 30 gives number and percentage of scheduled tribes literates and illiterates by sex in urban agglomerations/town population at the 2001 census. Twelve towns out of 17 have scheduled tribes population in the district. In Mahua Dabra Hamirpur NP, Jaspur MPP, Mahua Kheraganj NP, Sultanpur NP and Bandia CT towns there is no scheduled tribe population. The percentage of literates for urban is 83.6 (92.9 per cent males and 68.8 per cent female). The maximum gap in male/ female literacy is in Dineshpur NP (83.3 per cent) but there is no literate ST female in this town.

TABLE31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN TAHSILS, 2001

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsils/sub-tahsil level in the district as per 2001 Census. The proportion of the total workers works out 31.7 per cent of the total population in the district. The total workers are comprised of 24.3 per cent of main workers and 7.4 per cent of marginal workers and the remaining 68.3 per cent are non-workers.

Among the main workers, males participation rate in the district is 40.6 per cent and 6.2 per cent of females. Male and female marginal workers account for 7.4 and 7.5 per cent respectively. The percentage of females marginal workers is higher than males. Total workers (main and marginal workers) among tahsils varies from 28.5 per cent in Kashipur tahsil to 39.2 per cent in Khatima tahsil.

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 832,600 total rural population of the district 24.3 per cent has been categorised as main workers and the marginal workers constitute 9.5 per cent and the remaining 66.2. per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 40.1 per cent males and 7.1 per cent females are in the category of main workers. Male and female marginal workers account for 8.9 and 10.2 per cent respectively. The percentage of female marginal workers is higher than male marginal workers.

The percentage of total rural workers of the district comes to 33.8 per cent. At the C.D. block level, Khatima has highest proportion of total workers forming 39.9 per cent of the total population. It is closely followed by Sitarganj (36.3 per cent), Gadarpur (32.9 percent), Bazpur, (31.3 per cent), Rudrapur (30.8 per cent) and Kashipur (30.3 per cent). The lowest percentage of 27.5 per cent is recorded in Jaspur C.D. block.

				(13.7)	**(37.0)**	**(32.8)**	**(5.5)**	**(24.7)**

Note: Percentages of workers to total worker are given in brackets for category of workers.

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 30.3 per cent of the total workers (main + marginal) and remaining 69.7 per cent of total workers are engaged as agricultural labourers (25.9 per cent), Household industry workers (2.5. per cent) and other workers (41.4 per cent) in this district.

The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 18.0 per cent in Kichha tahsil and 54.7 per cent in Khatima tahsil. These variations within the district may be due to cropping and land holding patterns. The percentage of females cultivators is 37.0 per cent which is high as compared to 28.5 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above..

The highest proportion of 51.8. per cent of other workers is recorded in Kichha tahsil while the lowest proportion of 26.1 per cent is found in Khatima tahsil.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D. BLOCKS, 2001

Note: Percentage of workers to total workers are given in brackets for category of workers

Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district total workers (main+marginal) are 33.8 per cent of total population. Among these workers, cultivators constitute 40.5 per cent, 32.7.per cent are agricultural labourers, 2.5 per cent household industry workers and 24.3 per cent other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercially viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 2.5 per cent workers of the total working force. Therefore surplus working force has to depend on primary activities. Among cultivators, the percentage of females (42.5 per cent) is higher than males (39.9 per cent) in the rural areas of the district. The females play main role in rural economy of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 26.6. per cent in Rudrapur C.D. block to 57.4 per cent in Khatima C.D. block. Similarly for other workers, the lowest proportion is 19.2 per cent in Gadarpur. C.D. block while 35.4 per cent is the highest in Rudrapur C.D. block.. The percentage of agricultural labourers is highest in Gadarpur (47.9) block and is followed by Bajpur (44.2). Similarly, household industry workers varies in C.D. blocks between 1.1 per cent in Gadarpur and 4.6 per cent in Sitarganj.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Note: Percentage of workers to total workers are given in brackets for category of workers

Table 36 presents distribution of workers by sex in four categegories of economic activity in urban areas of the district Udham Singh Nagar. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table has been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (85.0) followed by agricultural labourers with 8.4 per cent (7.8 per cent male and 13.6 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (29.0) is recorded in Mahua Dabra Haripura (NP) In the agriculture labourers category Khatima (NPP) recorded very low percentage (0.8)

Household industry workers are also very low (0.9 per cent) in Kela Khera NP and Nagla CT each and preceded by 1.1 per cent in Sultanpur NP. As the usual trend recorded in the urban areas, other workers are in high percentage (96.2 per cent in Khatima NPP, 96.0 per cent in Nagla CT and 94.6 per cent in Kashipur NPP.

(ix) Brief analysis of the Village Directory and Town Directory data :

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of CD Block	Number of inhabited villages	Type of amenity available

Note : - Percentages are given in brackets.

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

#Post office includes Post office, telegraph office and Post and telegraph office.

$Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 674 inhabited villages in the district 490 villages or 72.7 per cent have been provided with the education facilities of one type or the other. Similarly 186 villages in the district constituting 27.6 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 658 or 97.6 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 82 villages constituting 12.2 per cent of villages have been provided with post office facility within the village.489 or 72.6 per cent villages have been provided with the telephone facility,

197 or 29.2 per cent with transport facility, 30 or 4.5 per cent villages with bank facility and 24 or 3.6 per cent with agricultural credit societies. Similarly there are 595 or 88.3 per cent villages which have been linked with the pucca road. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Gadarpur C.D. block has the highest 88.4 per cent villages where educational facility is available and lowest 12.5 per cent is found in forest village. Medical facility is highest in Khatima (40.4 per cent) and lowest (6.3 per cent) in forest villages. Improved drinking water is available to cent-percent villages in Jaspur, Kashipur, Gadarpur and Khatima blocks while in other blocks, it is below 100 per cent. Telephone facility is highest in Bajpur (92.9 per cent) while a single village of forest villages C.D. block enjoy this facility. Transport and communications is less developed in forest villages where only 0 per cent villages are covered by this facility whereas 74.7 per cent villages of Bajpur C.D. block are availing this facility. In the field of power supply all villages have been covered except 28 villages in the district.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of CD Block	Number of inhabited villages	Type of amenity available								
			Education	Medical	Improved drinking water*	Post Office#	Telephone	Transport communi-cations$	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways

Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 832,600 persons in the district, 744,264 or 89.4 per cent have educationa

facility of one or the other type. Similarly 379,174 or 45.5 per cent population has medical facilities while 811,852 or 97.5 per cent have got improved drinking water facility. Post office facilities are available to 172,576 or 20.7 per cent population. Telephone facility is available to 605,135 or 72.7 per cent. Transport communications facility is available to 290,978 or 34.9 per cent. Bank facility is available to 81,195 or 9.8 per cent.45,583 or 5.5 per cent have been provided with the facility of agricultural credit societies. 768,878 or 92.3 per cent have been provided with the facility of approach by pucca road. Power supply is available to 804,100 or 96.6 per cent rural population in the district. However, in Gadarpur C.D. block facilities of education, medical and improved drinking water are available to larger proportion of population

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED B DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kms.	5-10 kms	10+ kms	Total (Col.2-4)
1	2	3	4	5
1. Education :-

7. Agricultural Credit Societies	235	298	117	650

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 189 villages do not have primary school in their villages and out of these villages, children of 168 villages have to travel less than 5 kms. for schooling Out of 674 inhabited villages as many as 398 are deprived of middle school and 155 of degree college. Of these 398 avail the facility of middle school at a distance of less than 5 kms., 76 at a distance 5-10 kms. and the remaining 17 at a distance of 10+ kms. In respect of degree college 155 avail this facility at a distance of less than 5 kms., 201 between 5 to 10 kms. and rest 312 villages at a distance of 10+ kms.

Similarly there are 645 villages in the district which have been devoid of Hospital facility and 656 villages which are deprived of PHC facilities. Of these 230 villages have the facility of Hospital available within 5 kms. while in respect of 260 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 155 villages have this facility at a distance of 10+ kms. As regards PHC 222 avail this facility at a distance of less than 5 kms., 272 at a distance of 5-10 kms. and the remaining 162 have to travel a distance of more than 10 kms. to avail this facility.

Regarding Post Office, 592 villages do not have this facility in the village itself. Of these majority i.e.434 have this facility at a distance of less than 5 kms., another 132 villages avail it at a distance of 5-10 kms. In the remaining 26 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 185 villages in the district which are without telephone facilitiy. Of these 87 avail this facility at a distance of less than 5 kms., 68 at a distance of 5-10 kms. and remaining

30 have to traverse a distance of 10+ kms. For Bus service out of 494 villages which do not have facility, 225 villages avail this facility at a distance of less than 5 kms., 199 at a distance between 5-10 kms. and 70 at a distance of 10+ kms.

In the entire district 647 villages are deprived of Commercial Bank and 667 of Co-operative Bank. Of these 647 villages which are deprived of Commercial Banks 302 villages avail this facility at a distance of less than 5 kms., 246 between 5-10 kms. and the remaining 99 at a distance of 10+ kms. Regarding Co-operative Banks out of 667 villages 208 villages avail this facility at a distance of less than 5 kms., 316 at a distance of 5-10 kms. and remaining 143 at a distance of 10+ kms.650 villages do not have agricultural credit societies. This facility to 235 villages is available at a distance of less than 5 kms., 298 at a distance of 5-10 kms. and the remaining 117 at a distance of 10+ kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Note: Percentages are given in brackets.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 674 inhabited villages in the district, there are 156 villages which have nearest towns upto a distance of 5 kms. Of these only 113 villages forming 72.4 per cent of these total villages, are having the educational facilities of one type or the other and 43 villages constituting 27.6 per cent, have the medical facilities within the village, 10 villages forming 6.4 per cent have the facility of post office within the village and 116 or 74.4 per cent have the facility of telephone. 48 villages constituting 30.8 per cent have been linked by transport service. 3 villages comprising 1.9 per cent have been provided bank facilities, while 5 villages constituting only 3.2 per cent have been provided by agricultural credit societies. 143 villages comprising 91.7 per cent have been provided with pucca road.

There are 464 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these 338 villages constituting 72.8 per cent have been provided with the educational facilities. 130 villages comprising 28.0 cent have been provided with medical facilities. 68 villages constituting 14.7 per cent enjoy the post office facility. 344.villages comprising 74.1 per cent have been provided the telephone facility. 140 villages constituting 30.2 per cent have been linked with transport communications. 27 villages comprising 5.8 per cent have bank facility. 18 villages constituting 3.9 per cent are having agricultural credit societies, while 411 villages or 88.6 per cent are approachable by pucca road. 44 villages fall in the distance range of 16-50 kms. Of these, 75 per cent villages have educational facility, 29.5 per cent with medical, 9.1 per cent with post office, 54.5 per cent with telephone and transport & communications available to 15.9 per cent villages. Banks and agricultural credit societies facilities are available to 0 and 0 per cent of villages.

There is 1 village in the district which is situated beyond 50 kms.from the nearest town and out of

these 1.or 100 per cent enjoy the education facility in the village itself whereas no village has been provided with medical facility or the post office facility. One village comprising 100 per cent has been provided with telephone facility. 1 village constituting 100 per cent has been linked by bus service whereas no village has been provided with the bank facilities or agricultural credit societies while 1 village comprising 100 per cent has been linked by pucca roads. There are 9 villages whose distance ranges from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 5 or 55.6 per cent villages have the educational facility of one or other type. 4 villages have the telephone one village has banks and agricultural credit society facilities in the village. 8 village have also been connected by pucca road.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages	Type of amenity available

Note: Percentages are given in brackets.

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Udham Singh Nagar district out of a total 674 inhabited villages, overwhelming 205 have a population of less than 500 persons. Of these, 74 villages (36.1 per cent) have education facility, 14 (6.8 per cent) have medical facility, 196.(95.6 per cent) have improved drinking water facility. 4 villages (2.0 per cent) have post office facility. 136 (66.3 per cent) have telephone facility. 39 (19.0 per cent) have been linked by bus service. 0. (0 per cent) have Bank facility. 2 villages (1.0 per cent) have been provided with the agricultural credit societies, 160 villages (78.0per cent) have been linked with pucca road. 188 villages (97.7 per cent) have been provided with electricity.

Out of 181 villages, which fall in the population range of 500-999 persons, 145 villages (80.1 per cent) have been provided with the education facility, 35 (19.3 per cent) with medical facility, 180 villages 99.4 percent have improved drinking water facility. 19 villages (10.5 per cent) have been provided with post office facilities, 138villages (76.2 per cent) with telephone facility, 64 villages (35.4 per cent) with transport facilities, 5 villages (2.8 per cent) with bank facility, 7 villages (3.9 per cent) with agricultural credit

societies & 166villages (91.7 per cent) have approach by pucca road. 177 villages 97.8 percent in this range have electricity.

171 villages fall in population range of 1,000-1,999 persons. 158 villages 92.4 percentr have education, Whereas 63 villages (36.8 per cent) enjoy the medical facility, 25 villages (14.6 per cent) have post office facility, 129 villages (75.4 per cent) have telephone facility, 48 villages (28.1 per cent) have transport communications facilities, 4 villages (2.3 per cent) have bank facilities, 6 villages (3.5 per cent) have agricultural credit societies and 159 villages (93.0 per cent) have approach by pucca road.

There are 105 villages in the district which are covered under 2,000-4,999 population range. In this range, all the villages enjoy the facility of education, improved drinking water, telephone, transport communications, approach by pucca road and power supply. 65 villages (61.9 per cent) have medical facility. 30 villages (28.6 per cent) have post office facility, 20.villages (19.0 per cent) have bank facility, 8 village (7.6 per cent) is having agricultural credit societies. There is 12 village in the district having a population of 5,000 persons or above.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Jaspur	104	21,750.2	86.9	95.2
2	Kashipur	85	29,155.2	82.2	96.6
3	Bajpur	99	25,597.8	78.2	96.9
4	Gadarpur	69	23,509.1	77.5	98.1
5	Rudrapur	89	30,896.6	73.2	92.1
6	Sitarganj	123	35,504.1	72.3	91.4
7	Khatima	89	34,176.0	18.8	89.9
8	Forest Villages	16	26,672.0	0.0	0.0
	District Total:	**674**	**227,261.0**	**59.8**	**94.6**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available of inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 674 inhabited villages in the district having a total area of 227,261 hectares. Of this, 59.8 per cent is cultivable and 94.6.per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

A look at the land use pattern at C.D. block level shows that 8block with 674.villages have a total area of 227,261 hectares, of this 59.8 per cent of land is cultivable and of the aforesaid area 94.6 per cent is irrigated. In Jaspur block, all the 104 villages have a total land area of 21,750.2.hectares, of this 86.9 per cent of land is cultivable and of the aforesaid area 95.2 per cent is irrigated. In Kashipur block, all the 85.villages have a total area of 29,155.2 hectares, of this cultivable area is 82.2 per cent and 96.6 per cent is irrigated. In Bajpur block, all the 99 villages have a total area of 25,597.83 hectares. Of this, cultivable area is 78.2 per cent. Of cultivable area 96.9 per cent is irrigated. Gadarpur block with 69 villages have a total land area of 23,509.1 hectares, of this 77.5 per cent is cultivable area and out of this cultivable area 98.1per cent is irrigated. Rudrapur block with 89.villages has a total land area of 30,896.6 hectares. Of this 73.2 per cent is cultivated area, out of which 92.1.per cent is irrigated. Sitarganj block with a total 123 villages have an area of 35,504.1 hectares. Of this 72.3 per cent is cultivable area. There is no irrigation facility in the forest villages block hence area shown under irrigation is zero.

	District Average	**195.2**	**27.0**	**159.2**	**177.5**	**37.7**	**29.6**	**37.0**	**1.7**	**64.1**

Note: 1. The town for which the corresponding figure is not available has not been taken into account while calculating Distt. average.
2. Expenditure and receipt break ups are not available for Dineshpur (NP), Khatima (NPP), Mahua Kheraganj (NP) and Sitarganj (NPP), while for town Mahua Dabra Haripura (NP) figure of expenditure is not available. .

Table 43 gives the per capita receipts and expenditure (in rupees) for each town in the district. The average per capita receipts for towns of the district Udham Singh Nagar works out to Rs. 195.2. The per capita receipt among the towns is highest in Kahtima (NPP) at Rs. 380.4 followed by the town Gadarpur (NPP). The average of total expenditure incurred per head is Rs 177.5 in the district, while it is highest (Rs. 322.0) in town Khatima (NPP).

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bazpur (NPP)	5.5	1.4	0.9	0.9	0.0
2	Dineshpur (NP)	13.6	2.3	1.1	1.1	0.0
3	Gadarpur (NPP)	1.5	1.5	1.5	1.5	0.0
4	Jaspur (NPP)	1.5	0.5	0.3	0.8	0.0
5	Kashipur (NPP)	9.8	1.7	0.3	0.5	0.2
6	Kela Khera (NP)	1.3	1.3	1.3	1.3	1.3

14	Sultanpur (NP)	3.9	0.0	1.3	2.6	0.0
	District Average	**5.4**	**1.7**	**0.9**	**0.9**	**0.1**

Table 44 shows in urban areas of Udham Singh Nagar district the average number of schools per

10,000 population comes to 5.4 primary, 1.7 junior secondary/middle, 0.9 secondary/matriculation, 0.9 senior secondary schools and the ratio of colleges is only 0.1 college per 10,000 population. Among the towns, the ratio of primary and junior secondary/ middle is highest in Dineshpur NP and Shaktigarh NP respectively. Sitarganj NPP has highest ratio of secondary/ matriculation schools while in case of senior secondary school this position is claimed by Sultanpur NP (2.6). College education is available only in Kelakhera NP, Kashipur NPP and Rudrapur NPP.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bandia (CT)	9
2	Bazpur (NPP)	16
3	Dineshpur (NP)	8
4	Gadarpur (NPP)	3
5	Jaspur (NPP)	10
6	Kachnal Gosain (CT)	0
7	Kashipur (NPP)	9
8	Kela Khera (NP)	5
9	Khatima (NPP)	50
10	Kichha (NPP)	16
11	Mahua Dabra Haripura (NP)	3
12	Mahua Kheraganj (NP)	5
13	Nagla (CT)	17
14	Rudrapur (NPP)	6
15	Shaktigarh (NP)	8
16	Sitarganj (NPP)	6
17	Sultanpur (NP)	34
	District Average	**11**

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Udhamsingh Nagar district. On an average there are 11 beds per 10,000 population in urban areas of the district. Whereas it is the highest 50 in Khatima NPP, lowest value of 0 beds is recorded in Kachnal Gosain CT closely followed by Gadarpur NPP and Mahua Dabra Haripura NP.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population

			Garlic
			Coriander

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for a sugar town's main exports The chief export items of the district are sugar and rice which are manufactured in Bazpur, Bandia, Kichha and Nagla town and these are mainly exported to other places.

(x) Brief Analysis of the Data on Houses and Household Amenities, Houselisting Operations, Census of India 2001 :

Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the houselist, a few tables on the use of census house, *materials of wall, floor and roof etc. are prepared.In* 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule. The district wise tables have been prepared and these are placed in the subsequent tables. *The following is the distribution of households by* number of rooms occupied.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure Status	Number of dwelling households	Number of households								
		Total			Scheduled Caste			Scheduled Tribe		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11

	One room	13,417	5,483	7,934	3,640	1,284	2,356	354	239	115
	Two rooms	6,700	2,252	4,448	1,596	549	1,047	124	96	28
	Three rooms	2,047	775	1,272	425	167	258	29	20	9
	3+ rooms	938	381	557	201	94	107	17	16	1
	Median number of rooms	1	1	1	1	1	1	1	1	1

Data source: Census of India 2001, H-series: "Tables on Houses, Household Amenities and Assets."

The above table shows that households having owned tenure status occupy highest place among the total households. The number of households with one room accounted to 62,395 out of total 201,882 households in the district followed by 51,346 households with two rooms, 22,878 households with three rooms and 23,222 households with three and more rooms. More than 79 per cent of the households have had owned tenure status. Among scheduled caste one room and two rooms dwelling households figure 14,034 and 8,109. Similarly scheduled tribe households number 5,740 and 5,963. The median number of rooms of the total households, scheduled caste and scheduled tribe was calculated to 2, 1 and 2 respectively. In case of tenure status rented the number of one room, two rooms and three rooms figure 10,141, 5,371 and 1,071 households in the district whereas the corresponding figure for scheduled caste and scheduled tribe came to 1,300, 431, 53 and 161, 62, 16 respectively. However, the median number of rooms per households in total households, scheduled caste and scheduled tribe was calculated to 1.

In case of tenure status others, one room, comprised 13,417, two rooms 6,700, three rooms 2,047 and three and more rooms 938. But among scheduled caste households the corresponding figures comprised 3,640, 1,596, 425 and 201. For scheduled tribe households the number of dwelling households for one, two, three and three and more rooms was 354, 124, 29 and 17 households respectively. No of dwelling households with no exclusive room share very little proportion.

During 1991 census 79.4 per cent of the households were living in their own houses, 15.7 per cent in rented and 4.9 per cent in other. Among scheduled caste the owned status was in 87.3 per cent of households, rented 8.1 per cent and others 4.7 per cent. More than 93.6 per cent of scheduled tribe had own houses, 4.7 per cent on rent and 1.7 per cent by other status.

		(65.3)	(14.7)	(20.0)	(63.1)	(15.7)	(21.3)	(89.2)	(5.7)	(5.1)

Data source: Census of India 2001, H-series: "Tables on Houses, Household Amenities and Assets."
Note : - Percentages are given in brackets.

Permanent : Permanent houses refer to those houses whose walls & roof are made of permanent materials i.e. where burnt bricks, G.I. sheets or other metal sheets, asbestos sheets, stone or concrete is used for wall and tiles slate, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks lime and stone and RBC/RCC concreate are used for roof.

Temporary : Temporary houses refer to those houses whose walls and roof are made of temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood.

Semi Permanent : Semi permanent houses refer to those houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

The percentage distribution of households as shown in the above table reveals that 64.3 per cent of the households in the district had permanent houses. The trend is almost similar in the rural (56.1 per cent) and urban area (79.5 per cent). Among tahsils, highest proportion of permanent houses were accounted in tahsil Kashipur (72.7 per cent), followed by Khatima and Kichha each 65.3 and 62.0 per cent respectively and lowest in Sitarganj tahsil (45.4 per cent). In respect of the semi-permanent houses, the returns were 12.0 per cent at district level where as among tahsils, in Sitarganj it was 16.7 per cent and lowest was 10.1 per cent in tahsil Kichha. Rural areas represented a similar ratio at district and tahsil level but semi-permanent houses in the urban areas were in the proportion range of 5.7 to 10.1 per cent. In respect of temporary houses, the returns were 23.7 per cent at district level whereas among tahsils, it was 37.8 per cent in Sitarganj tahsil and lowest 16.3 per cent in Kashipur tahsil. In rural areas returns were 30.0 per cent at district level and highest 41.3 per cent in Sitarganj tahsil. Temporary houses in urban areas were in percentage range of 4.9 to 20.3 per cent.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Bathroom means bathroom within the house

$ Toilet means toilet within the house

@ Drainage means colsed and open drainage

Facility of improved drinking water i.e. through tap, hand pump and tube well was reported to be available in 75.8 per cent of households at district level (71.4 per cent in rural and 84.6 per cent in urban). Tahsil Kashipur was served with drinking water facility in 79.4 per cent of household followed by Kichha, Sitarganj each 75.7 per cent and 74.4 per cent respectively and the lowest in tahsil Khatima with 68.0 per cent of the households. Similarly, in respect of electricity 67.5 per cent of the households in the district availed this facility, the composition of rural and urban areas comes to 59.5 and 83.6 per cent of the households. The highest percentage of household availing this facility in tahsils was Kashipur with 71.9 per cent and the lowest in tahsil Sitarganj with 50.5 per cent. More than 41.5 per cent of the households in the district had bathroom facility and the urban households (65.6 per cent) were better served as compared to rural areas (29.5 per cent). Toilet facility accounted for 53.4 per cent of households in the district and in rural and urban areas it was 39.3 and 81.8 per cent respectively. The drainage facility was reported in 64.8 per cent of the households in the district (52.8 per cent rural and 89.1 per cent urban). In tahsil Kashipur it was 78.4 per cent of the households availing drainage facility followed by Kichha and Khatima each 67.3 and 47.1 per cent respectively and lowest in tahsil Sitarganj 39.7 per cent of the households.

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Note : - Percentages are given in brackets.

It is observed from the above table that 57.0 percent of households in the district use firewood as fuel for cooking, the proportion in the rural area is 69.3 per cent and in urban area it comes to 32.0 per cent of households. LPG (cooking gas) has been reported as one of the fuel for cooking of food in 27.5 per cent of the households. The composition of rural and urban comes to 15.2 and 52.3 per cent respectively. Kerosene is used for cooking in as many as 4.1 per cent of the households (1.8 per cent rural and 8.7 per cent urban households). The other methods like crop residue, cow dung cake, coal, lignite, charcoal, electricity and biogas etc. ranges from 5.5 to 0.0 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, LPG (cooking gas) and kerosene on the predominant fuel for cooking. The predominant material for cooking food during 1991 was wood, LPG and kerosene oil respectively.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: "Tables on Houses, Household amenities and Assets."
Note : - Percentages are given in brackets.

The above table reveals that 53.8 per cent of the households in the district avail banking facility in the district whereas in tahsils 62.4 per cent in Khatima, 55.1 per cent in Kashipur, 53.5 per cent in Kichha and 42.0 per cent in Sitarganj avail this facility. Radio and transistor was possessed by 35.9 per cent of the households in the district. The trend is almost similar in tahsil except in tahsil Khatima where it was 43.8 per cent. The network of television was available to 49.9 per cent of households in the district and in tahsils it was 53.2 per cent in Kashipur, 51.2 per cent in Kichha, 50.5 per cent in Khatima and lowest in tahsil Sitarganj 36.9 per cent. As much a 10.7 per cent of the households in the district ha telephone connections. Availability of other asset like bicycle, scooter/motor cycle/moped and car/jeep van came to a proportion of 69.8, 14.9 and 2.7 pe cent respectively. More than 15 per cent of th households in the district did not have any of thes specified assets. The proportion among tahsil accounted to 17.3 per cent in Kichha, 16.4 per cen in Sitarganj 14.3 per cent in Kashipur and 12.6 pe cent in Khatima.

(xi) Major Social, and Cultural Events, Natural and Administrative Developments and Significant Activities during the Decade :

Socially the district Udhamsingh Nagar represents whole of India, as people from all corners of India co-habit in this district. Hard working people from Punjab and other region virtually changed this place from malarial hell to agricultural heaven. Settlers struggled against inhospitable conditions and made this district food bowl of this region. Under the Government of India's colonization plan of displaced persons after the partition of the country, first batch of refugees came here in 1948. Forest lands were cleared and reclaimed for agricultural purposes. Prevalence of malaria was controlled through malaria eradication scheme undertaken by the health department. Taking advantage of the fertile land, the settlers putting on their hard labour made this region prosperous and in the process they themselves became rich and prosperous. Most of the people involved themselves in agriculture, but a large number of people branched out to trade and industry. As a result the district has not only become rich in agriculture sector but developed in the industrial sector as well. The pace of growth has become rapid after it gained the status of a separate district.

Culturally this district now represents the picture of diversity of India. People from all parts of the country live here happily as a close knit family. Although all ethnic groups maintain their own culture but there is no cultural barriers among them. They celebrate all Indian festivals together in the broad perspective of Indian culture. No untoward event has been reported from this part of the country until now. Some resenting voices were heard at the time of the merger of this district with the newly created state of Uttaranchal. But now they have accepted the new administrative change.

No mentionable social, cultural or natural development has taken place during the last decade. However a major administrative change has taken place during the last decade. The most significant jurisdictional change that took place during the last decade was the creation of this district itself by carving out tarai tract from erstwhile district of Nainital. By honouring the sentiments of the dominant ethnic group of Sikhs, this district was named after the great martyr Udham Singh. Another jurisdictional change was the creation of Uttaranchal state with District Udhamsingh Nagar being part of the new state. Being part of the plain region of the Himalayan state of Uttaranchal, this district is at an advantageous position and is bound to progress and create a milestone in prosperity.

(xii) Places of Religious, Historical or Archaeological importance in Villages and Places of Tourist Interest in the Towns of the District :

District Udhamsingh Nagar is the gateway of the hilly region of the Kumaon Division. Any tourist entering from the plain areas of the Kumaon Division into the hill areas has to cross this district. Therefore, this district is important from the point of view of tourism. There is enough scope for the promotion of tourism in the district. Some of the places of religious or tourist interest are described below.

Rudrapur – Rudrapur is the headquarters of Udhamsingh Nagar. It was founded by the king Rudra Chand (1565-97 A.D.) of the Chand dynasty. Many industries are growing around the town. The G.B. Pant University of Agriculture and Technology is in close proximity to Rudrapur. There is a temple of goddess Ataria at a distance of 2 km. from Rudrapur. A ten days fair is organized every year during the Navratris in the month of Chaitra. Thousands of devotees visit this temple on that occasion.

Kashipur – Kashipur, named after its founder Kashi Nath Adhikari, a governor of the Chand rulers of Kumaon, is an ancient town. Girital and Dronsagar are the main tourist spots in Kashipur. The Chaiti Mela is the best known fair of Kashipur, which is held around an old temple of Chaiti Devi. 2.5 km from Kashipur city. Kashipur is an important educational and industrial town around which are situated satellite townships of Jaspur, Bajpur and Gadarpur.

Nanakmata – As far among as 56 km from Rudrapur, it is a great pilgrimage centre for the followers of the Sikh religion. Guru Nanak visited this place and as per tradition had spiritual discussions with Guru Gorakh Nath. One can feel a great spiritual aura in this area.

Nanak Sagar – In close proximity to the Nanakmata Gurudwara a big dam has been constructed on Saryu river. Nanak Sagar Dam is the best tourist spot in the region and provides excellent opportunities for water sports.

(xiii) Major Characteristics and Contribution of the District :

This district is a bright example of peaceful co-existence of people of different caste and creed at one place. This is a big colony of people from all over India. As has been mentioned earlier, displaced persons settled here under the scheme of Government of India's settlement plan. At the time

of partition of India hordes of refugees came to India from West Punjab and East Bengal which had become part of Pakistan. These displaced persons were rehabilitated in tarai tract under rehabilitation plan of Government of India. Prior to this, the region was sparsely populated and almost unfit for habitation. Gradually people from Kashmir, Punjab, Kerala, eastern Uttar Pradesh, Garhwal, Kumaon, West Bengal, Haryana, Rajasthan, Nepal, Tamil Nadu and Burmese citizen of Indian origin came and settled here. With collective efforts and hard labour of the settlers of this district the district has become rich and prosperous.

This district came into existence in 1997 and later on included in the state of Uttaranchal. Major parts of Uttaranchal consist of hilly tracts and hill tracts are not ideal for agricultural production. Being agriculturally advanced, Udhamsingh Nagar has become granary of Uttaranchal state. High quality of rice is produced here which is supplied to all over India and even exported to foreign countries. The growth of industry in this district has been satisfactory. The hardy people of Punjab particularly turned this district into an industrial hub. Rudrapur is an industrial town, where various industries have been established. The district Udhamsingh Nagar is also a centre of learning. A major event in the development of tarai was the establishment of the G.B. Pant University of Agriculture and Technology. It was the first university in India on the pattern of land grant universities of the U.S.A. and was established in collaboration with the University of Illinois. It provides higher education in agriculture and allied subjects as well in engineering subjects. This university is famous in whole of Asia for the pioneering researches made in high yielding wheat seeds which heralded the green revolution in India.

(xiv) Scope of Village Directory & Town Directory

Village Directory :

The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/ village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1.	Population and households	Cols.4 & 5
2.	Amenities.	Cols.6 to 13
3.	Other infrastructural facilities etc.	Cols.14 to 16
4.	Availability of news paper/ magazine	Column 17
5.	Commodities manufacture	Column 18
6.	Total area of village and land use pattern	Column 3 & 19-23

Town Directory :

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:-

(i) All the towns having statutory status which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.

(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc. and number of banks as well as commodities of manufactured and exports are enumerated vividly in various statements relating to the town directories of the districts.

PART A
VILLAGE AND TOWN DIRECTORY
(section I and II)

SECTION I
VILLAGE DIRECTORY

Section - I : Village Directory

Note Explaining the Abbreviations used in the Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital Ayurvedic Hospital Unani Hospital Homeopathic Hospital	H HA HU HHom
(ii)	Allopathic Dispensary Ayurvedic Dispensary Unani Dispensary Homeopathic Dispensary	D DA DU DHom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WWE
(v)	Tubewell (with electricity)	TW
(vi)	Tubewell(without electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.
Appendix-I-A	Indicates number of villages C D Block wise having one or more primary schools.

APPENDIX VIII

NUMBER OF VILLAGES UNDER EACH GRAM PANCHYAT (C.D. BLOCK WISE)

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total SC population	Total ST population	Income and expenditure of Gram panchayat (in Rs.'000)	
			Number of villages with location code numbers	Location code					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

The information is not being provided for districts of Uttaranchal due to certain reasons.

APPENDIX IX

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Name of District	Name of C.D. Block	Location Code Number	Name of Village	No. of Girls School
1	2	3	4	5

Information not available for this district

SECTION II
TOWN DIRECTORY

Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation /Nagan Nigam	M. Corp./NN
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board /Nagar Palika Parishad	MB/NPP
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Other columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded, respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as zero (0).

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns :

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has benn recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings, etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available, has been mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town, the name of nearest place with distance where the facility is available, has been recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee, etc.

APPENDIX TO TOWN DIRECTORY
TOWNS SHOWING THEIR OUTGROWTH WITH POPULATION

As no Towns having any outgrowth in the District was found, relevant information could not be compiled and therefore may be treated as 'NIL'.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important population of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were

made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

The abbreviations used in Primary Census Abstract are same as used in Town Directory.

ANNEXURES
I TO VIII

ANNEXURE - I

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT

Not provided for this district due to certain reasons.

ANNEXURE - II

FERTILITY AND MORTALITY 1991 CENSUS

The three factors affecting the population size of the district are fertility, mortality and migration. These concepts are explained in detail under the caption Census and Non- Census Concepts and Definitions in the Analytical Note portion. One major aspect of consideration under mortality is infant and child mortality. Migration may be perceived as percentage distribution of migrants by place of birth and/or place of last residence. At the 1991 Census the district was part of Uttar Pradesh, which in north –central India, is still the country's most populous state even after carving out of Uttaranchal in year 2000.The population of the UP state was 139 million at the 1991 Census, which accounted for 16 % of India's total population. It grew by 25% between 1981 and 1991 largely as a result of high fertility, the highest of any Indian state.

The child mortality indicators at the 1991 Census in the district and the State was as following:

Child Mortality Indicators in the State and the District

Indicator	Persons/Males/Females	UP*	Nainital^
q1	Persons	99	65.0
	Males	98	71.6
	Females	104	61.0
q2	Persons	117	74.0
	Males	117	76.0
	Females	118	64.0
q5	Persons	134	82.0
	Males	135	84.0
	Females	132	80.0

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Udham Singh Nagar was carved out from the district Nainital in the year 1997, i.e., after 1991 Census. The data are not available separately for Udham Singh Nagar for the year 1991. Hence, the data of undivided Nainital have been taken, assuming that the trends and pattern of districts are same.*

The child mortality by ages 1, 2 and 5 years, as shown by the indicators q1, q2 and q5, respectively, was lower in the district as against the State, which suggests that the children upto 5 years of age in the district were in the improved condition as compared to the State.

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE - 1991

Serial Number	Fertility Measures	Uttar Pradesh*	Naintal^
1	2	3	4
1	CBR	37.2	38.0
2	TFR	5.6	5.4
3	TMFR	6.3	7.0
4	GFR	172	171
5	GMFR	200	219
6	Mean age at Marriage (1981-91)	17.3	18.0
7	Number of Children ever born per ever married woman aged 45-49 years.	4.6	5.1
8	Child woman ratio 0-4	631	600
	" 5-9	752	706

Source:(i) Estimates of fertility indicators Uttar Pradesh Table # 2.23
(ii) District Profile Uttar Pradesh 1991.

* *Undivided Uttar Pradesh at 1991 Census.*

^ *Districs Udham Singh Nagar was carved out from the district Nainital in the year 1997, i.e., after 1991 Census. The data are not available separately for Udham Singh Nagar for the year 1991. Hence, the data of undivided Nainital have been taken, assuming that the trends and pattern of districts are same.*

The above annexure III reveals that the Crude Birth Rate (CBR) which is the ratio of the number of live births in a year to the mid year population is 38.0 per cent in the district as against the state of Uttar Pradesh ratio of 37.2. Total Fertility Rate (TFR) and General Fertility Rate (GFR) in the district follow behind the state but Total Marital Fertility Rate (TMFR) and General Marital Fertility Rate (GMFR) of the district present a little upward picture. The mean age at marriage during the period 1981-91 had been 17.3 years for the state whereas it was 18.0 for the district. As per 1991 census, Child - Woman ratio in the age group of 0-4 and 5-9 years was 600 and 706 for the district while in case of the state the corresponding figures were 631 and 752 respectively.

ANNEXURE - IV

The annexure-IV shows percentage distribution of migrants as per 1991 (Annexure IV (a)) and 2001 Census (Annexure IV (b)) among total migrants in the state and district. For both the Censuses, the district figures are presented in comparison to state figures. The table is given in two parts. One is in-migrants by place of birth (in which a person is enumerated during the Census in other than the place of birth) and the other part is related to in-migrants by place of last residence (in which a person is enumerated during the Census in place other than the place of his immediate last residence). Since the state of Uttaranchal was created in 2000, the state figures for 1991 are given for Uttar Pradesh, whereas the state figures of Uttaranchal are given for 2001.

ANNEXURE - IV (a)

Note : - Percentages are given in brackets.

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Udham Singh Nagar was carved out from the district Nainital in the year 1997, i.e., after 1991 Census. The data are not available separately for Udham Singh Nagar for the year 1991. Hence, the data of undivided Nainital have been taken, assuming that the trends and pattern of districts are same.*

Regarding in-migration by place of birth, it is evident from the tables that percentage of in-migrants from other districts of the state was much lower for the state of Uttaranchal (35.4 per cent) in Census 2001 as compared to state of Uttar Pradesh (81.3 per cent) during 1991. For the district Udham Singh Nagar, the percentages declined in 2001 (18.5 per cent) as compared to 1991 Census (74.7 per cent) for the district Nainital. The proportion of in-migration from other states increased and recorded 57.8 per cent which was 16.2 per cent during 1991 Census at state level. Similar trends are visible at district level where a figure for 2001 is 71.5 per cent (for Udham Singh Nagar) which was 14.0 per cent (for Nainital) during 1991. In-migrants from other countries in the district were 11.3 per cent during 1991 which is 10.1 per cent in 2001.

Regarding in-migration by place of last residence for in-migration from other districts, again the figures are much lower for the state of Uttaranchal (34.9 per cent) in 2001 against 79.6 per cent for the state of Uttar Pradesh during 1991. Comparatively, the figures for the district in Census 2001 recorded 20.1 per cent while it was 82.0 per cent in 1991 Census for Nainital. The volume of migration from other states was 18.9 per cent in 1991 Census at the state level, which increased and recorded 60.1 per cent in 2001 Census. Figures for the district Nainital worked out to be 13.9 per cent in 1991 and 78.0 per cent for district Udham Singh Nagar, in 2001 Census. The movement of population from other countries to the district was 4.1 per cent in the district Nainital, whereas the figure for the state Uttar Pradesh was 1.5 per cent during 1991. The corresponding figures recorded for the state Uttaranchal and district Udham Singh Nagar, during 2001 are 5.0 per cent and 1.9 per cent, respectively.

ANNEXURE – V

Annexure – V presents the distribution of basic cultural characteristic of the population "Religion" at state, district and tahsil level. Six major religions have been dealt with separately. These are Buddhist, Christian, Hindu, Jain, Muslim and Sikh. Rest of the religions have been presented in the column titled 'other religions'. Distribution for 2001 and 1991 Censuses are presented in Annexure V (a) and Annexure V (b), respectively.

ANNEXURE - V (a)

Brief account of main religions in the State/ Distt./ Tahsil as per 2001 Census

^ *District Udham Singh Nagar was carved out from the district Nainital in the year 1997, i.e., after 1991 Census. The data are not available separately for Udham Singh Nagar for the year 1991. Hence, the data of undivided Nainital have been taken, assuming that the trends and pattern of districts are same.*

A brief account of the main religions as stated in the Annexure-V (a) for 2001 reveals that 85.0 per cent population is Hindu in the state followed by 11.9 per cent population of Muslims and 2.5 per cent of Sikhs while the followers of other religions are negligible. At district level, the followers of Muslim and Sikhs are slightlt high i.e. 20.6 and 11.4 per cent respectively as compared to state, while population under remaining three religions, is almost negligible. Almost similar trend is observed from Annexure V(b) based on 1991 Census with a slight variation in percentages. In the district Nainital, 41 persons were reported in the category of "Religion Not Stated" in 1991 whereas 469 persons were reported under this category in 2001 in Udham Singh Nagar district.

ANNEXURE - VI

Annexure-VI presents the classification of population according to marital status of different age groups for the state and district. Marital status has been classified as never married, married, widowed, divorced and separated and unspecified status. For comparative study, the figures of 2001 and 1991 Census have been shown in Annexure VI(a) and VI(b), respectively.

ANNEXURE - VI (a)
Marital Status Of Different Age Groups Of Population As Per 2001 Census

Source : Part - IV (a) table No. - C (I)

Note : - Percentages are given in brackets.

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Udham Singh Nagar was carved out from the district Nainital in the year 1997, i.e., after 1991 Census. The data are not available separately for Udham Singh Nagar for the year 1991. Hence, the data of undivided Nainital have been taken, assuming that the trends and pattern of districts are same.*

On perusal of Annexure VI (a), it is observed that male population in the category of never married is 57.9 percent for the state and 59.0 per cent for the district Udham Singh Nagar, while female population in the category of never married constitutes 48.3 for state and 51.5 per cent for the district in 2001 Census. Married population in the district is 39.2 per cent for males and 43.2 per cent for females as against 39.9 per cent for males and 44.5 per cent for females in the state. Widowed population is 1.7 per cent for males and 5.1 per cent for females at district level as against 2.0 per cent males and 7.0 females at state level. Population of Divorced, Separated and Unspecified status are negligible at state level as well as at district level. Age group wise study of marital status reveals that population and percentage of never married decreases with the increase in population while pyramidal shape is observed for married population. In the district, percentage of married population is highest (95.7 per cent) for males in the age-group 35-39 years and 40-44 years and 96.5 per cent for females in the age-group 30-34 years, while widowed population is highest in age group of 70 years and above (24.0 per cent for males and 59.5 per cent for females). Almost similar trend can be seen for the state.

It is observed on perusal of Annexure VI (b) that the scenario has not changed much since 1991 as far as the district figures are concerned, however, the district figures of 1991 covered undivided district Nainital, which included present district of Udham Singh Nagar. Percentages of never married in 1991 was 57.5 per cent for males and 50.7 per cent for females. Similarly, married population constituted 40.3 percent for males and 44.3 per cent for females in 1991. Widowed population was 2.0 per cent in case of males and 4.8 per cent in case of females. No person was reported in the category "Unspecified Status" in the state as well as in the district in 2001. However, during 1991, some persons were reported under this category. State figures of 1991 Census reveals identical trend with slight variation in percentage although state figures of 1991 Census covered undivided Uttar Pradesh which included present state of Uttaranchal.

ANNEXURE - VII

Age and sex wise education in the state and district for 2001 and 1991 censuses have been presented in the Annexure – VII (a) and (b), respectively.

ANNEXURE-VII (a)

* *Undivided Uttar Pradesh at 1991 Census.*

^ *District Udham Singh Nagar was carved out from the district Nainital in the year 1997, i.e., after 1991 Census. The data are not available separately for Udham Singh Nagar for the year 1991. Hence, the data of undivided Nainital have been taken, assuming that the trends and pattern of districts are same.*

Above annexures show that percentage of illiterates has declined from 55.3 per cent for males and 80.0 per cent for females in 1991 to 30.4 per cent for males and 49.6 per cent for females in 2001, respectively at the state level. Consequently, percentage of literates has increased in all educational levels. Percentage of literates without educational level was 2.0 per cent among males and 0.7 per cent among females in 1991 at state level, which is 1.4 percent and 1.2 per cent in case of males and females, respectively in 2001. Similarly, primary level education was 10.7 per cent for males and 6.0 per cent for females in 1991 which rose to 16.1 and 13.9 for males and females, respectively in 2001. Middle level education was 9.7 per cent in case of males and 3.7 per cent in case of females in 1991 which increased to 14.2 per cent for males and 8.8 per cent for females in 2001. Matriculation and above level was 13.5 per cent for males and 4.4 per cent for females in 1991 which rose to 23.4 per cent for males and 13.8 per cent for females in 2001.

Similar trend can be observed in the district also, however, the district figures of 1991 covered undivided district Nainital, which included present district of Udham Singh Nagar. In 1991, 44.6 per cent males and 65.4 per cent females were recorded as illiterates in the district Nainital, which declined to 38.1 per cent males and 56.2 per cent females in 2001 in the district Udham Singh Nagar. Primary level education was 13.8 per cent in case of males and 10.3 per cent in case of females in 1991, which is increased upto 15.2 per cent in case of males and 11.9 per cent in case of females in 2001. Middle level educated males and females were 11.8 per cent and 6.3 per cent, respectively in 1991 while 11.7 per cent males and 6.8 per cent females were recorded in this category in 2001. Matriculation and above level of education was achieved by 17.5 per cent males and 8.6 per cent females in 1991 which is observed 18.0 per cent for males and 10.7 per cent for females in 2001. Primary level of education is found highest in the age-group of 7-14 years in 2001, while middle level education was the highest in age group 15-19 years and the age group that had highest percentage of matriculation and above level of education was 20-24 years, in respect of both the sexes.

ANNEXURE – VIII

Distribution of different mother tongues according to population with percentage as returned in 2001 and 1991 for the state of Uttaranchal and district Udham Singh Nagar has been depicted through Annexure-VIII (a) and (b), respectively.

** Undivided Uttar Pradesh at 1991 Census.*

^ District Udham Singh Nagar was carved out from the district Nainital in the year 1997, i.e., after 1991 Census. The data are not available separately for Udham Singh Nagar for the year 1991. Hence, the data of undivided Nainital have been taken, assuming that the trends and pattern of districts are same.

It shows from Annexure-VIII (a) that mother tongue for largest population in the district as well as in the state is Hindi with 55.4 per cent and 37.5 per cent respectively in 2001. Annexure VIII (b) shows that during 1991 also, Hindi was the mother tongue spoken by the largest portion (47.2 per cent) of the district Nainital. Next to Hindi, Punjabi as mother tongue is reported by just 12.4 percent population in the district in 2001 Census followed by Urdu with 11.4 per cent. Other mother tounges such as Nepali, Sindhi, Garhwali, Pahari, Dogri, etc., are spoken by less than one percent each in the district except Bengali (8.6 per cent), Kumauni (5.9 per cent) and Bhojpuri (3.4 per cent). On the other hand, at the state level during 2001 besides Hindi and Garhwali, other important languages adopted as mother tongue are Kumauni (22.9 per cent), Urdu (5.9 per cent), Punjabi (2.8 per cent), Bengali (1.5 per cent), Jaunsari (1.3 per cent) and Nepali (1.1 per cent). Rest of the languages such as Bhojpuri, Pahari, Tibetan, Bhotia, Sindhi etc. mothes tongues are of less than one percent. Since state of Uttaranchal was not separated from Uttar Pradesh in 1991, distribution of mother tongues are entirely different in comparison to 2001, where dominant mother tongue was Hindi with 82.1 per cent population followed by Urdu with 9.0 per cent, Bhojpuri 5.0 per cent, Garhwali 1.3 per cent and Kumauni 1.2 per cent. Similarly, at district level, the distribution of mother tongues has shown variation upto some extent since the district figures of 1991 covered undivided district Naintal, which included present district of Udham Singh Nagar. Other languages had very low percentage as compared to the population of Uttar Pradesh.
