BAGU – RUMBA DANCE

The Bagu-Rumba Dance is a mirthful dance of Bodo young girls with a national repute. This Dance reflects the universal primitive appeal of the maidens in general. This dance is generally performed under moonlight at the time of leisurely period when they become free from tensions of domestic duties.

The dance rhythms the song "Bagu – rumba Hai Bagurumba, Jat Nongabola Kull Nongabola, Thaburum Homnanoi Bamnanoi Bagowmonkha Hai Lagwmonkha ....."

The traditional musical instruments used in the performance are (1) Kham, (2) Shiphung, (3) Serja, (4) Jotha and (5) Jabsring.

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

(P. Hazarika)
Director of Census Operations,
Assam, Guwahati.

STATEMENT- 1

NAME OF THE HEADQUARTERS OF DISTRICT / TAHSIL, THEIR RURAL-URBAN STATUS AND DISTANCE FROM DISTRICT HEADQUARTERS, 2001

Serial number	Name of District / Tahsil	Name of District / Tahsil headquarters	Whether Urban / Rural	Distance from tahsil headquarters to district headquarters by road (in km.)
1	2	3	4	5
1	Gossaigaon	Gossaigaon	U	52 kms.
2	Bhowraguri	Bhowraguri	R	40 kms.
3	Dotoma	Dotoma	R	60 kms.
4	Kokrajhar	Kokrajhar	U	0 kms.
5	Sidli (Pt.-I)	Sidli (Pt.-I)	R	45 kms.

Statement 1 shows the information regarding the name of the headquarter of district/tahsil with their status and distance from Revenue Circle headquarter to district headquarter by road in kilometer. Two Revenue Circles have urban status and remaining three Revenue Circles are with rural status. Kokrajhar Revenue Circle is recorded 0 kilometer distance from Revenue Circle headquarter to district headquarter. However, the farthest distance of 60 kms. is recorded in Dotoma Revenue Circle which is a distance to district headquarter by road. Bhowraguri Revenue Circle is situated at a distance of 40 kilometers from Kokrajhar.

STATEMENT-2

NAME OF THE HEADQUARTERS OF DISTRICT / CD BLOCK THEIR RURAL- URBAN STATUS AND DISTANCE FROM DISTRICT HEADQUARTERS, 2001

Serial number	Name of District / C D Block	Name of District / CD Block headquarters	Whether Urban / Rural	Distance from CD Block headquarters to district headquarters by road (in km.)
1	2	3	4	5
1	Kachugaon	Kachugaon	R	65 kms.
2	Hatidhura	Hatidhura	R	48 kms.
3	Gossaigaon	Gossaigaon	U	52 kms.
4	Dotoma	Dotoma	R	60 kms.
5	Kokrajhar	Kokrajhar	U	.0 kms.
6	Sidli-Chirang Pt.	Sidli-Chirang Pt.	R	45 kms.

Statement 2 gives the CD Block wise information and their status with distance from district headquarter. All CD Blocks except two CD Blocks are identified as rural and their location vary from a distance of 0 kilometer to 65 kilometers from district headquarter. Kachugaon CD Block is situated at the distance of 65 kilometers away from district headquarter and the nearest CD Block to the district headquarter is Sidli Chirang Pt CD Block with a distance of 45 kilometers.

STATEMENT-3

POPULATION OF THE DISTRICT AT EACH CENSUS FROM 1901 TO 2001

Statement 9 indicates houseless and institutional population of Revenue Circles, 2001. In Kokrajhar district there are altogether 533 households for houseless population and 582 households for institutional population. The detail against each Revenue Circles of the district can be seen in the table itself. However, houseless population is more in Gossaigaon Revenue Circle while institutional population is more in Kokrajhar Revenue Circle.

****

ANALYTICAL NOTE

Analytical Note of Kokrajhar District

(i) History and Scope of District Census Handbooks

District Census Hand Book is an important and valuable publication brought out by the Census organization of each state after each decadal Census. This provides detailed information on some basic demographic and socio-economic aspects and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being only informative source of every district of each state. It has, thus, proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Hand Book was first initiated during 1951 Census with the collaboration of respective state Governments. In 1951, only few demographic as well as some economic information in village and town level of the district along with some Census tables were incorporated in the publication. Since then, it had undergone tremendous changes during the subsequent Censuses. The scope and content of District Census Handbooks were further widened by addition of more Census tables and also some basic statistics on land-use pattern, agriculture, industry, administration, public health and medical etc. The DCH of 1961 was, therefore, considered as unique asset of the Census organization. Again in 1971 Census further improvements were made by enlisting many more tables on village and towns in under the broad heads of Village and Town Directory. Thus DCHB is consisted of three parts. The part A relates to the Village And Town Directory. The part-B contains village & town-wise Primary Census Abstract and part C deals with administrative aspect and Census tables based on PCA. etc. The scope of DCHB got widened in 1981 with the inclusion of data on literacy, health care etc. The DCHB in 1981 was brought out in two part, the Part-A & B. As Census could not be done in Assam only Part-A portion was published. Again in 1991 DCHB made its appearance in two parts like the previous Census, Part-A is fed with Village & Town Directory and Part-B with PCA data. Again, the Part-A had two sections. In Section-I the alphabetical list of villages with notes on codes in the Village Directory have been shown. The Village Directory had four appendices. The Section-II depicted note explaining the codes used in the Town Directory, the Town Directory statements (i to iv) and appendix to the Town Directory. The Part-B revealed district PCA circle wise, CD Block-wise, village & town-wise PCA. The PCA had an appendix as well as annexure to the appendix. The District PCA to Scheduled Castes and Scheduled Tribes at circle and town-level was also incorporated in this part of the DCHB.

In the present DCHB some more information on availability of facilities such as Credit Societies, Banks, Recreation and Cultural facilities, Newspaper/ Magazine are included for the first time. Information on income and expenditure, important commodities manufactured, exported & imported items etc are also included to embolden the scope of DCHB. Similar additions are also carried out in Town Directory.

The process of collection and compilation of relevant data take time and is a voluminous one. The process starts with the village per revenue circle for the districts. Again the data so collected are compared with data of previous Census data. These are sent to the Directories of Census for further initiation. Likewise Town Directory data are collected directly from the Commissioner/Chairman of Municipal Corporation and the Town Committees as the case may be. In case of data relating to Town Directory security and cross checking are done as a routine work. The agencies publishing such data are consulted upon to verify the authenticity and correctness of data. According to the instructions received from the RGI the work of compilation and then computerization are carried out. The incorporation of new information in 2001, DCHB and external validation of data so collected will definitely give a new dimension and importance. This will be an illustrative one to the data-users and researchers.

(ii) Brief History of Kokrajhar district

The present Kokrajhar district as a geographical or Administrative unit finds little place in the mythological literatures. Hence it is a difficult for the

district in its historical perspective task to waive a picture so descent in chronological sequence through the historical times.

Legal from the Mahabharata and the Ramayan often depict in substance that Pragjyotishpur included the whole of the North Bengal including a large areas of the present Bangladesh and a grater area of the present Assam. History of the medieval period also describes that Goalpara and Kamrup districts' areas were ruled by a series of non-tribal as well as tribal rulers of Asura, Kirta, Palas and Barman dynasties in length and breath spreading are time. However, the mediaeval period often a better explanation of events that one can find in historical documents available.

In the early 15th century A.D. Goalpara was subdued in a princely state ruled by the Khen dynasty. This dynasty was founded by a king called Niladhwaj in the 14th century A.D by over-throwing the last ruler of the Pala Kingdoom who made his capital at Kamatapur, north of the Koch Behar. Nalambar was the last king of the dynasty who extended his kingdom eastward to the Barnadi river and upto Karatoya river in the west. He also marked his supremacy by annexing a territory from the Mahammed an ruler in the south but ultimately fell in to the hands of Hussain Shah, the Nawab of Gaud and lost his kingdom in 1498 A.D The fall of Nilambar resulted the break-up of Kamatapur kingdom into pretty principalities till new dynasty emerged in the scene. Biswa Singha, a pretty chieftain had by dint of his caliber subduing the regional force and established a new dynasty, called Koch Dynasty

Bishwa Singha was succeeded by his able son Narnarayan who with the help of the brother Chilarai, the general, expanded their kingdom eastward up to North Lakhimpur in Assam by defeating the mighty Ahoms. Chilari was an ambitious warrior as well as a strict administrator who constructed a road linking North Lakhimpur with his capital in order to maintain his authority over the annexed territory. The road called the Gohain Kamal Ali is still to be seen along the northern bank of the Brahmaputra and is the base of the present North trunk Road.

But with the death of Naranraayan, the Koch Kingdom as well as the Koch Dynasty divided into two part The river Sankosh became the line of the division. The eastern part of the river was made to Raghu Rai, son of the Chilari and the territory of the Sankosh was to Laksmi Narayan, son of Narnarayan.

Till Raghu Rai was alive the Kingdoms were running peacefully but with the death of Raghu Rai, dispute of supremacy over territory raised that led to war. Parikshit who succeeded Raghu Rai had defeated Lakshinarayan. The later took help of Mohammedans of Dhaka who in turn defeated Parikshit. He was sent to Mugal Emperor Jahangir as a prisoner. Jahangir restored his position on certain condition But he died on the way while he returned from the Emperor's court. His kingdom, then was annexed to the Mughal Empire in about 1614 A.D.

On the defeated of Parikshit, his brother Bali Narayan fled to the kingdom of Ahoms. With the help of the Ahom King Pratap Singha he fought the Mughals for a few years and ultimately succeeded in recovering some of his lost territories up to the Barnadi river. He was then installed as a vassal king by the Ahoms with his capital near Mangaldoi and was renamed as Dharma Narayan by the Ahoms.

The succeeding period witnessed a long conflict of the Ahoms with the Mughals resulting a strong hold of the Ahoms over the territories west of the Barnadi. The strong Ahom force not only deferred force of Mohammedans from these areas but also annexed in to their kingdom virtually ending up of authority of the Mughals and establishing Ahoms superiority over the entire western Assam from Barnadi to the Sankosh river. But this authority of the Ahoms remained short lived as the Mughals made a fresh invasion of the state in 1637. The Ahoms and their ally Bali Narayan were beaten back. Bali Narayan fled to Singri in Darrang and was killed thereafter in a hotly chased by the Mohammedans in 1637. The Ahoms could recover their areas after a treaty made with the Mohammedans where by the river Barnadi and the Asuran Ali became the western bounding of the Ahom kingdom on the north and south bank respectively.

After a lapse of 20 years taking the advantage of the confusion at Delhi rose among the sons of Sahjahan to occupy the throne immediately after the death of the later, Pran Narayan a Koch King attacked Goalpara which was governed by a representative of the Mughals from Dhaka. The Mughals Governor who took refuse at Guwahati was then driven away by the Ahoms from the east. The Ahoms again seized Goalpara. But no sooner the Ahoms made a foothold, Mirjumla from Dhaka started his invasion of Assam in 1661. His invasion culminated with the occupation of the Ahom capital

at Gargaon. On way he defeated the Koch king Pran Narayan who fled to Bhutan.Though after one year of his occupation of Gargaon, Mirjumalas left this country but had faced a humiliating treaty on the Ahoms and the later had to do away with the Lower Assam area once again to the Mughals until the Ahom King Gadadhar Singha partially recovered it up to the Manaha river. This western boundary of Assam had continued till the British occupation of Assam in 1826. Goalpara remained a part of the Bengal under the Mohammedans.

The ceases ion of Goalpara remained so till 1765 A.D when with the rest of the Bengal it passed in to the hand of the East India Company.

Goalpara has experienced a number of jurisdictional changes prior and during the British rule. At the early British period it was merged with the Rangpur district of the Bengal province. In 1822 it was carved out into a separate district known as North East Rangpur with three thans of Goalpara, Dhubri and Karaibari along with a large portion of Garo Hills and was placed under Mr. David Scott, the then Civil Commissioner to hold the first official charge. After the annexation of Assam to the British dominion, Goalpara by name became a separate district and was administrated as per with the other districts in the valley till 1866 with its headquarters at Goalpara. In 1867 the district was transferred to then newly created Koch Behar Commissionership but the following year it was placed under the Judicial Commissioner of Assam and was finally incorporated in to Assam in 1874. In 1879 the Headquarter of the district transferred to Dhubri from Goalpara and the later remained a sub-divisional Headquarters under the same district. Till 1958 the district was divided into two sub-divisions, namely Dhubri and Goalpara. In 1958 another sub-division called Kokrajher sub-division was carved out of the Dhubri sub-division and remained so until the district of Ggoalpara was parted into three independent districts upgrading each sub-division in 1983.

The geographical location of Kokrahjar has made it an unique landmass of homogenous character. Situated at the foot of the Himalayas it exhibits an uniform slope towards the south through which innumerable rivers and streams find their ways down to the Brahmaputra. Large quality of debris brought down by the streams and there levis deposition over time has resulted in creation of large fertile-land at its upper part while small fens is lying over the southern part. The upper region usually constituted of older alluvial land is the home of rich flora and fauns. These areas are usually evergreen, semi evergreen as well as green forests. These forest are very dense in character and usually the home of Sal, Teak, Bansom, Gomari, etc valuable forest which is a big earning source of the government exchange, The rivers are too swift flowing and usually perennial. The rivers and the fens are the common source for local fishing.

The soils ordinarily composed of red loamy in the upper part are very suitable for plantation crops like Tea, and paddy. But due to deep courage with forest these lands could not be available for such economically beneficial crops. But in the lower part a few tea gardens have been found where such forest have been cleared.

Small scattered village surrounded by lofty trees in deep green back ground, often dotted with wary paddy fields, decorated folk with traditional alter, culture and deep rooted musical vibration in the aim have to be the specialize identification to the district of Kokrahjar in the state.

(iii) Administrative Set-up of the district

For the administrative purposes, the entire district is divided into two sub-division viz Gossaigaon and Kokrajhar. Again each sub-division is divided into revenue circle and under revenue circles, there are Mouzas comprising few revenue villages. There are five revenue circles in the district.(2 revenue circles in Gossaigaon and 3 in Kokrajhar sub-division).

The deputy commissioner of the district is the over all charges of the administration of the entire district. He also acts as the collection in case of revenue matters, as a district Magistrate in case of law and order and General

Administration, as a District Election Officer in case of conduct of Election, as a principal Census Officer while conducting Census, and soon. A number of officers like Additional Deputy Commissioner, Sub-divisional officer, Extra Assistant Commissioners and others assist the Deputy Commissioner in looking after administration of the district.

At lower level each sub-division is headed by one Sub-divisional officer where as under him there will be Revenue circle officers for each revenue circles also are responsible for the administration of the area under their respective revenue circle.

(iv) Physical features

The district lies between 26'18 N to 26'54 N latitudes and 89'46 E to 90'58 E longitudes. The district is bounded by Royal Government of Bhutan in the north, Dhubri district in the south and Bongaigaon district in the east and state of west Bengal in the west. The district now covers an area of 3538'00 sq. kms and has a total of 905,764 population. The district occupies 13th rank in terms of area and 15th rank in terms of population in the state.

Topography

The entire district is located on a flat alluvial plain, occasionally interspersed by small highlands and low-lying areas which formed by the soils carried down by innumerable rivers and streams from the Bhutan Himalaya. It is one of the most fertile zones of the state with luxurious vegetation growth. Except a few small hillocks in the south, the entire district exhibits an even topography with a gradual till towards the valley down to south where Bau-Kumari Chura (458m) the highest point in the district located.

Flora and Fauna

Contrary to the other district of the valley major part of the district is covered by forests both reserved, unreserved and Ripu R.F. The Chirang R.F, the Manas R. F, the Panbari R.F, the Bengtol R.F and the Kachugaon R.F. are worth mentioning. These are covered by evergreen and semi evergreen types of forest are usually dense-mixed jungles. Sal wood of this district are famous all over the country. Besides Sal, many valuable woods like Khair, Akoi, Send etc. are abundantly grown.

A large part of the forest areas, mostly low-lying ones scattered among the small highlands are covered with tall grasses at places up to 15 feet high .These are the ideal homesteads for large number of herbivores and carnivorous animals as well. The physical setting of the region coupled with excellent climate conditions prompt the Government to set up Game Sanctuaries in the district one near Saralapara on the north east, famous for wild animas particularly one hand Rhino and other animals are Elephants, tiger, Bears, wild Buffalos, Deer, Mongoose and birds like Peacocks, Cranes etc.

Drainage system

The district has no drainage system to flush out the water. The river acts as drainage. So during rainy season the river beds rise to an optimum level causing stagnancy in low-lying areas for months together. With the coming down of water in river the stagnant water is swept away by the rivers.

Many important south flowing tributaries of the Brahmaputra are flowing down this district. Among them the Sankosh, Hel, Saralbhanga, Bhur, Ai, Kanamakra and Manas deserve to mention. All these rivers except the Manas are originating from the Bhutan Himalayas white the later five are from the Himalayan river in this part of the state.

The Sankosh emerging into plain at Jamduar from the Bhutan foot hills is known as the Gangadhar in its lower course. It also demarcates the boundary between west Bengal and Assam for a considerable part. The Hel is known as Gangia in its lower part. The Gaurang originating in the foot hills of the Chirang R.F meets the Saralbhanga near Titaguri and flows in to the Brahmaputra as Gaurang. Originating from the Bhutan foot hills, the Bhur, Dholpani and Lopani meet each other near Simlaguri and flow as the Champamati in the lower course. The Manas flows into flat alluvial plain of Assam at Mathanguri near the international boarder and immediately divided into two branches, the Manas and Mora Manos or Beki. The later one possibly the abandoned course of the main channel, still maintains its perennially.

All this rivers are fairly wide and enormously braided in its upper course at times forming large soil and sand island on its beds by deposition of silts and debris's carried along from the hills. They loss their torrential speed due to loss of inclination on the ground and flow as ordinary river cutting sharp meanders along their lower courses. But during rainy season, rude by incessant rains on the hills, these rivers causing havoc in its upper as well as lower course by sudden flood causing breach of embankment and loss of life and property of the dwellers. Innumerable rivers and streams also join these rivers from the north, only few of whom remain perennial action or those rivers from a fertile plain along the entire foot hills of the Bhutan boundary providing excellent base of luxurious and evergreen vegetation growth in all through the district.

Climate and rainfall

The district experiences a hot and humid climate with short but strong spell of cold winter. Rainfall in abundance continues for more than six months in a year with occasional shower if rain in midwinter which

prompts to continue the effect of lush greenery on its vegetation throughout the year. The maximum humidity lies from June to October while the percentage is normally in December and from January to May in the year. The actual total rainfall in the district during the year 2001 was 3,217.2 M.M. against the average rainfall of the state was 1962.0 mm.

Temperature

In the district cold season starts about the November when both day and night temperatures begin to drop rapidly. January is the coldest month of the year with the mean daily minimum temperature at 9.8 Degree Celsius (49.6 degree F) and the mean daily maximum at 21.6 Degree Celsius (70.9D.F) .Temperature begins to rise from about the beginning of March and July. It attains the highest point. The mean daily maximum temperature becomes 31.8 Degree Celsius (89.30 D.F).

The monsoon season is the period of the year with the highest temperature. Being also period with high moistures in the air, the weather is often unpleasant with the damp heat particularly in between the spells of rain.

Socio-cultural Features

Land and people

Population of Kokrajhar is composed mainly of the three religions Hindus, Muslims and Christians. In order of importance Buddhists, Jains, and Sikhs are also there but they form only little portion of the population. Further divisions of population by castes and tribes of the district can be made as

1. Indigenous
2. Plain tribal.
3. Tea and ex-tea garden labourers
4. others

The indigenous general population comprises the Brahmins, Kalita, Baniyas, Koch, Keot, Kaibartas, Kumars, Muslimes, Naths etc. The plain tribal population comprises the Kacharies , Ravas, Boros etc. The tea garden and ex-tea garden population comprise the Santals, Mundas, Orias, Garhs, Bhumis etc. The other people comprises the Bengalis, Marwaris, Nepaleses, Sikhs etc.

Hindus

Most of the Hindus are followers of sakti or worshippers of the reproductive powers as manifested in the female. Tantric rituals in their debased forms are known to have been practiced in Assam in the centuries preceding the Vaisnava revival. Vaisnavism i.e worship of Visnu or Krishna is also prevalent in Assam from early times. However this slowly occupied subordinate position in subsequent centuries. Decay and degeneration in the religions field to revival of the Vaisnavite faith in the fifteen century under the leadership of Sankardeva (1449-1569). As per 1991 Census Hindu population comprises 66.4 percent of the total population of the district. In 2001 Census report the population of Hindu population stands at 65.6 percent. This is due to the large scale conversion of Hindu population into Christianity. The Christian occupies 13.7 percent in 2001 which is third largest community in the entire district as well as in the state.

Though the Boros are the followers Hinduism . Still they have their own ways of religious life is known as Bathow and Brahma Samaj. The word bears "Bathow" a distinct meaning. Here "Ba" means five and "thow" deep seated. These five deep seated meaning usually convey the concept of "panchabhuta" of Hindus. The flowers of this concept are known as Garja Samajis. "Bathow religion involves five kinds of pujas which are known to them as Kherai. According to them Lord Vishnu is the end of all and all of the universe, so 'Kherai ' literally means propitiation of Lord Vishnu. In ancient time fruits, flowers, rice, etc. were the pre-requisite of every puja. Gradually at the instance of "Sairvaism" they started sacrificing duck, hen, pigeon, goat and buffalo. This system of beheading these animals to propitiate Lord Siva is still in vogue.

A reformist cull is of comparatively recent origin is known as "Brahma Samaj". This is a detached branch of the "Bathow" pantha. According to Brahma Samaj "Brahma" is the architect of universe. They propitiate "Brahma" by observing "Hoom Janjya". For the "Brahma Samaj" Mahalaya which heralds the coming of Durga into earth is also sole religious festival .

Muhammadans

As per 1991 Census, Muhammadans form 19.3 percent of the total population of the district. Majority of them are living in rural and char areas and their livelihood is agriculture. They cultivate rice, jute, mustard seed and all types of vegetable.

Christians

Christians comprise 9.8 percent of the total population of the district as per 1991 Census.

Majority of ex-tea garden labourers adopted Christianity. There are churches in almost every villages inhabited by Santhals and local Boro people. A large number of Boros and Boro-Kacharies are also adopted Christianity.

Social System

The head of the family who manages it as its custodians, generally holds property. Among the Hindus after the death of the father his sons and daughters inherit the property. The eldest son is empowered to look after the property and the family. Among the Hindus there are two system of marriages prevailing under Brahma Samaj and Gayra Samaj. However a noticeable difference is that while the Brahma samaj arrange a "Brahma Janjya" where the priest chants mantras as bride and bride-groom go round the sacred fire till the chanting of Vedic mantras is over. But "Gayra Samaj" do not follow any such practice. The "Deori" or "Ojah" is paid for his onerous duty both in cash and kind because of essential services towards accomplishment of the marriage ceremony.

Home life

In a rural family the different type of homes are found. The guest house is constructed just at the entrance of the courtyard. But those who cannot as ford to construct separate guest house they use the same structure for guest as well as dwelling purpose. But their kitchen is constructed separately just near the granary and is a common sight with every household. Cattle shed also construct just at the entrance a few yards apart from the main house. This type of houses are also common in a vast majority of rural Assamese villages.

Dresses

The dresses of the Boro community has a distinct significance. Women folk till to-day use Mekhela (Dokhna) and Chadar (chadow) of various designs. However, young males mostly were pant and shirt purchased from the market. Generally, dresses of woman including young girls are of mixed colour and design. Mixed colour cloth is of red, yellow and dark green. For male a special kind of towel (Fali) is wave by inserting various floral designs. dhuti and kurta are also used by the males.

Food

Rice is the main staple food of all people. Vegetable, wheat, dal (pulse), fish, meat, egg, milk, tea, fruits etc. form the subsidiary items of food.

Communal life

There are some festivals which are observed mostly by the villagers e.g. Bihu, Ojapali and Deodhani Nritya. Three Bihus are observed in a year that fall on the last day of month of Chot, Ashin and Puh. Bohag Bihu can be considered the greatest of all festivals when the population joint in all prevailing air of joy and merriment. Songs and dances are performed in a grand manner. The festival lasts for about a month beginning from the month of April.

Kati Bihu is celebrated by lighting earthen lamps beneath the Tulsi tree and also by placing earthen lamps in the midst of field full of paddy ripe and ready for harvest to get blessing from Almighty God for healthy crop. This is a one day affair.

Magh Bihu, the harvest festival is observed on the "Sankranti" day. It is performed once the harvesting is over. Bhelaghar" with dried banana leaves and green bamboos is constructed on the previous night and the same is burnt at dawn of "Sankranti" day. Participation in community feast on the previous night is also common feature.

Ojapali

The word "Ojah" means head and "Pali" means assistant. The songs are sung by a groups of people with the usual accompaniment of musical instruments to praise Almighty. It is not confined to in any particular season of the year.

Deodhani Nritya

Deodhani Nritya is one of the folk-dances which is traditionally in vogue in Assam since time immemorial. This form of dance has been prevalent amongst the tribal like Garo, Mikir and Deori who practice it on special religions occasions with special significance of religions beliefs and practices. This dance is performed with rhyme of beating of drums and flutes. The dance having 13 different poses requires great technical skill in its hindering Dresses and ornaments worn by the dances are conspicuous for their very special designs

Boro Dance

Kokrajhar, the Boro dominated district in Assam is rice in culture. The dances like Bagrumba, Kherai and Bordoi Chila have been extensively popular all over India. The dress as per customs worn by the dancers synchronized the rich heritage of Boro culture in the cultural map of India.

Resources of the district

The district does not posses any mineral of much economic value. However the alluvial clays, sands, gravel, bounders, and gneissic rocks in the hills provide suitable construction materials. They clay is used for manufacture of bricks and roofing tiles.

Forest

Forestry has played a very important role in the district economy. It is one of the major revenue earners in the district. A large number of villages depend upon these forest and the forest product for their livelihood, There are number of saw mills fed by the forest of the district and these mills used to engage local people in great numbers. But due to the recent supreme Court ban on cutting trees, some saw mills have closed down for want of sufficient supply of forest product.

There are hundred of valuable species of plants abundantly found in both the reserved and proposed reserved forest. The forest of the district abound in valuable trees like Sal (Shera robusta), Poma (Cedrelatura), Outenga (Dillents), Simalu (Bombax Malabari), Kori (H. lebeck), Azar (Floreginse), Bhomora (Terimintia belevioal) etc.

Kokrahjar district is covered by a big area of the forest. The district has a largest area of the forest than that of the other districts of Assam. The percentage of forest area to the geographical area of the district is 52.3 as against the state percentage 27.4 percent According to the Forest Department , the total forest area excluding the un-classed forest area in the district is 217,164 sq. km. There are 13 reserved forest in the district. Besides the reserved forest, there are also proposed reserved forest in the district

A large part of the forest areas, mostly low lying area scattered among the small high lands are covered with tall grasses. These areas are ideal homesteads for large number of wild animals. The physical setting of the region coupled with excellent climatic condition makes the district as a habitation of many wild animals and birds.

Mineral and Mining

The district has no known source of mineral or mine of much economic value. However, the alluvial clay, sand gravel, boulder and gneissic in the hills provide suitable construction materials. The clay is used for manufacture of brick and roofing tiles.

Land and Land-use Pattern

The land put to different uses in the district may be classified as forest, sgriculture, west-land etc. The following table gives the clear picture of the area of land put to different uses in the district.

Table—I

Land use Pattern in Kokrajhar district (1997-1998) (Provisional).

Sl. No.	Land put to different uses	Area in hectare.	Percentage of total Geographical area.
1	2	3	4
1	Total Geographical area.	312,900	100
2	Forest area	163,626	52.3
3	Land not available for cultivation	39,597	12.7
	(a). Land put to non-agricultural uses.	19,405	6.2
	(b). Barren and un-cultural land	20,192	6.5
4	Other non-cultivated land excluding fallow land	21,078	6.7
	(a). Permanent pastures and other grazing land.	15,031	4.8
	(b). Land under misc. trees, groves etc. not included in net area.	3,982	1.3
	(c). Cultivable waste land.	2,065	0.7
5	Fallow land.	2,961	1
	(a). Fallow other than current fallow.	1,720	0.6
	(b). Current fallow	1,241	0.4
6	Net area sown.	85,638	27.4
7	Total cropped area	136,805	43.7
8	Area sown more than one	51,167	16.4

Agricultural and plantation

Agriculture is found to be the chief occupation of the people of the district.The soils of the district are soft and sandy and the climate characterized by humid atmosphere and abundant rain accelerated the growth of agricultural crops.

Crops

Rice is the staple food of dwellers in the district and hence paddy is the principal; crops in the district. The district produces paddy in the seasons namely winter, autumn and summer. In winter, the district produces winter paddy to the tune of 18,219 tones. In autumn 12,248 tones and in summer 2,950 tones during 1998-99. The district produces a large variety of cereals. These are Maize, Wheat, other cereals, Tur, Gram, Lentil pea, Rabi pulses, Linseed, Castor, Seamum, Rape and Mustard. In addition to these a few non food crops like jute and mesta are also cultivated in the district.

Table-II

Production of cereals in the district, 1998-1999

Sl No.	Principal crop	Area in hectares	Production in tones	Average yield in tones
1	2	3	4	5
1	Autumn Rice	20,102	18,376	929
2	Winter Rice	35,726	42,334	1,203
3	Maize	760	395	520
4	Summer Rice	2,592	2,219	856
5	Other Cereals	130	78	600
6	Tur	135	646	95
7	Gram	19	10	507
8	Black Gram	395	199	503
9	Green Gram	31	18	592
10	Lentil	275	130	472
11	Pea	150	73	486
12	Other Rabi Pulses	100	49	491
13	Linseed	170	81	477
14	Castor	35	19	538
15	Sesamum	325	210	647
16	Rape and Mustard	8,880	5,266	593

Horticultural Crops

All the varieties of banana are abundantly found in the district. The production of banana is common to all households. Besides banana, mangoes, jack fruit, papaya, orange, pineapple, areca nut, coconut etc. are also available in the district. All these fruits are seasonal but banana is found throughout the year.

Irrigation

Though there is irrigation system in the district yet the cultivators are mostly depended upon rain water for cultivation. A very small portion of the total cultivable land comes under irrigation system. Only 17,510 hectares are brought under minor irrigation scheme and 5,360 hectares under major and medium irrigation scheme. During the year 1998-99, there was a target for 40 minor irrigation projects but not a single project has been achieved. The following table presents a clear coverage of irrigation potential in the district.

Table- III

Irrigation potential utilities and target and additional potential created in Kokrajhar district during 1998-99

Sl. No.	Particulars	Area in hectares
1	2	3
1	Irrigation potential utilized during 1997-98	4,251
	(i) During Kharif	4,186
	(ii) During Rabi and pre Kharif	65
2	Irrigation potential created upto 31.3.99	22,870
	(i) Minor	17,510
	(ii) Major and medium	5,360
3	Target and addition irrigation potential created during 1998-99	40
	(i) Minor	-
	(ii) Major Medium	-

Animal Husbandry and Veterinary

The Department of Animal Husbandry and Veterinary was started in the district in the year 1953. Since its inception it has taken up various development programmes in the district more particularly in rural areas. In recent year in the sphere of livestock development, various efforts concerning breeding, feeding ,disease control and diary development have been taken up with utmost importance. Besides various development projects have been implemented by the department in the recent year.

In the field of animal health care, the Department of Animal Husbandry and Veterinary has been given utmost importance by setting up hospitals and veterinary dispensaries in the district. Most of

veterinary dispensaries are found in rural areas under Block Development and Gaon Panchayat areas per report received from the Director of Animal Husbandry and Veterinary, Assam, there is one veterinary hospital, twenty one dispensaries, one mobile dispensary, seven block dispensaries, one rural artificial in semination centers and two pig farms. The district is infested with varieties of livestock species. Besides pigs, cattle, sheep, goat, fowl, duck, pigeon etc are found in almost every households in rural areas

The following table gives a clear picture of abundant rearing of livestock in the district.

Table-IV
Livestock and poultry in Kokrajhar district as on 1997

Sl. No	Particulars	Numbers
1	2	3
1	Cattle	315,427
2	Buffaloes	37,862
3	Sheep	7,825
4	Goats	66,199
5	Pigs	94,055
6	Horn and Pancis	66
7	Fowls	273,289
8	Ducks	130,536

Fishery

The district has got sufficient scope for the development of fishery because it has a large number of natural fisheries like beels, ponds, tanks, rivers etc. But in spite of having those natural fisheries, the district is not at all self sufficient in fish production.

In the past fishing for commercial purpose was mainly confined to certain section of the people. But in the passage of time commercial fishing has been taken up by the local people irrespective of castes and tribes. Pisciculture has now become popular among of all section of people. It is also a source of good revenue earner. Hence, people belong to different castes and tribes are found taking keen interest in rearing fishes on commercial purposes.

The most popular varieties of fish generally found in the natural fisheries like beels and ponds are Rou, Bahu, Barali, Chital, Ari, Haliajora etc. Among the smaller varieties Singra, Magur, Puthi, Goroi, Daricana etc are very common in the district.

For the Development of fisheries, various schemes are now undertaken by t5he Government. The Government has encouraged fish farming by providing loans and subsides to fishermen. As a result, it is observed that there has been considerable increased in the fish production in the district recently.

In Kokrajhar district, there are only two registered beel fisheries and three registered river fisheries. During 1998-99 a target was set for one million number of fish seed, 5,200 metric tones of fish production but the fish seed production target has not at all achieved. In case of fish, the total production is 4,117 metric tones which is less by 1,083 metric tones from the targeted amount.

Industry

The district is industrially backward in comparison to some other districts of Assam. But it is encouraging to observe that of late, efforts are being made to create a favourable industrial climate in the district by providing augmentation of basic infrastructure facilities, subsidiary and other incentives etc by the Government of Assam. The Government has also been encouraging local unemployed youths to set up small scale industry by providing all possible help and cooperation. The district has no medium industry but there are some small scale industries. Cottage industries like pottery, blacksmith, gold and silversmith, cane and bamboo, bidi factory, sericulture and weaving industries are found all over the district. As on 31.12.98 there are 11 food manufacturing industries, industry each for manufacture of beverage, tobacco product, 17 for manufacture of wood and wood products, furniture and fixtures, 1 for manufacture of non metallic mineral products and 1 each for repairing of capital goods etc.

Tea Industry

Though the tea industry plays a major role in the state it has not contributed much to the economy of Kokrajhar district due to a small number of her tea gardens. There is only one small tea grower in the district registered with Tea Board of India up to 31.10.1999. The data for number of tea garden is not available separately for the district.

Trade and Commerce

Once Kokrajhar district was a prominent and importance centre of trade. Kachugaon was the nerve3 centre of timber trade in entire Assam. Timber was exported to all over India from there. Now, all activities have stopped in Kachugaon due to the

scarcity of timber. The most importance items imported are pulses, onion, potato, garments and other cloths, hardware, consumer goods, electronic equipments, wheat, edible oil, rice, medicine, foot wear, plastic goods, machineries, petroleum etc. Jute, mustard, ginger, vegetable etc are the main export items in the district.

The most important trade centers are Kokrajhar, Gossigaon, Kachugaon, Basugaon, Dotoma, Safaguri etc.

Banking

Banking facilities are limited to urban and semi urban areas only. Most of the rural areas are not covered by the banking facility. Now, there are some co-operative societies from where the villagers obtain loans for agricultural purposes. Before the formation of such societies, villagers use to take loan from business men or wealthy farmers against their yearly harvest. At present some commercial banks have opened their branches in some important places throughout the district including State Bank of India. The functioning of this banks has improved a lot. However, the presence of local money lenders cannot be ignored particularly in rural areas. They lend money at an exorbitant rate of interest, Unless the banking facility is not available to all persons of the district such unscrupulous money lenders cannot be wiped out.

Transport and Communication

During pre-independent period the district has a considerable improvement in rail and road transport communication, All the rural areas except some remote areas, mow converged byb motor able road. Rail communication has improved and touches all important places in the district. Vehicles of all sorts are plying on the roads in the district. Kokrajhar Railway Station is one of the busiest station of North Eastern Fortier Railways. There is a stoppage for all important trains except Rajdhani Express. People can go anywhere in India from Kokrajhar Railway Station.

In Kokrajhar district, the vehicles that seen in the year 1998-99 are 580 trucks, 66 light commercial vehicles, 336 buses, 109 Government vehicles, 30 auto rickshaws, 4,819 two wheelers, 632 cars, 190 jeeps etc.

Electricity and power

Electricity of the district is being supplied by the State Electricity Board. A Thermal Project was established by the State Electricity Board ai Salakati about 16 kms away from Kokrajhar town. Electricity was produced and supplied from the bproject all over the district and portion of Lower Assam also but at present out of three units, only one unity is working and the other two units have closed down due to the heavy cost of power production

With the introduction of rural electrification scheme most of the villages of the district are electrified. In the year 1989-90, the State Electricity Board electrified 55 villages and in the year 1990-91, only 5 villages are electrified. Up to 31st March, 1999a total of 839 villages are electrified. Electricity supplied by the Electricity Board is being used for domestic, industrial and commercial purposes.

Health and Family welfare

Though noting much is known about the public health in Kamrup district, but there are evidence to show that during Ahom rule there were separate departments for public health and practice of Ayurvedic treatment. The Ayurvedic system, though based on the ancient system of the Hindus, developed along its lines in ancient Kamrupa with the result that many expert Ayurvedic physicians in Assam added some thing to it from their own knowledge and experience.

Important diseases prevalent in Kokrajhar are fevers, dysentery, diarrhea, pulmonic affection, reheumantism etc. Among these Diarrhea and dysentery, intestinal diseases and hookworms are generally common in the riverin areas. Influenza generally flares up after continuous rains and floods. Malaria was also most common in the southern mountainous regions bordering on the Nagaland and now with intensive activities of the National Malaria Eradication project in the district this terrific courage has also been brought under control. Kala-azar, which used to claim heavy toll of lives in the past has been brought under control.

The Directorate of Health Services is the main department which is responsible to took after the health of the public. Under this Directorate, Public Health Centres are established in important places of each districts of Assam and in addition to these there are some separate institutions like Maternity Homes, Family Planning Centres, Dispensary, Nursing Homes etc in the district. The Guahati Medical College in Guwahati city is an important medical institution in the entire N.E. region for better treatment. There is a Civil Hospital in Kokrajhar town and have a few number of nursing homes.

Vital Statistics

In the past, the vital statistics at the lower level in the rural areas were submitted by the village headman to the Mauzadar, who in turn complies his Mauza figures and submit them to the Civil Surgen or the Sub-Divisional Medical Officer as the case may be. Before implementation of RBD Act 1969 in the State, the Registration of Births & Deaths was not compulsory except in Tea Estates. Only after 1978, the registration of births & deaths became compulsory under the RBD Act 1969, that came into force by Assam registration of births & deaths rules 1978. Again in 1999, the Govt. of Assam framed Registration of Births & Deaths rules 1999 under the revamped system of civil registration that initiated by the Central Govt., which is now in operation.

In Kokrajhar district at present all the Primary Health Centres are Registration Centres of births & deaths for rural areas and the Municipal Board or Town Committees are Registration Centres for births & deaths in the respective urban areas. The Registrar of births & deaths, register all the events of births & deaths occurred in their presence or notified by the individuals/agencies nominated for that purpose by the govt. They compile all the events and submit monthly reports to the Joint Director of Health Services of the district, who is designated as District Registrar of Births and Deaths. The District Registrar in turn compile all the events for the entire district and submit the returns to the Director of Health Services, who is the Chief Register of births & deaths for Assam State. The Chief Register of births & deaths compile the figures for State as a whole and sends reports to the Registrar General India, New Delhi periodically.

In Tea Estates, events of births & deaths are collected by the officers In-Charge of Tea Estates and these are reported to their respective Registration Centre.

The data on Registration of births & deaths available during 1957 to 1971 reveal that the Registration of births was not given much importance compared to death registration and as a result, the level of registration for both births & deaths was very low in the district.

General Administration :-

Revenue Administration

Revenue administration being a part of general administration has historically been the primary responsibility of the District Administration. This involves collection and fixing of land revenue, registration, mutation and overall management in regard to land, both private and public. Besides the Revenue Branch of the Deputy Commissioners Office, which is looked after by the Additional Deputy Commissioner (Revenue), there are 14 outlying Revenue Circles in the district, supervised by Circle Officers. The Mouzadars under the Circle Officers are responsible for collecting land revenue (*Khazna*) from land owners (*Pattadars*). All the Circle Officers are required to submit '*doul*' (demand of revenue) to the Deputy Commissioner, and after his approval, *Mouzadars* are to collect revenue as per the demand. In the year 1995-96, the total collection of land revenue in the district was Rs.441,000 against the total demand both current and arrears of Rs. 1,877,000 which comes to about 23.5 %.

Development

From the developmental angle, Kokrajhar district is divided into 6 Development Blocks. Below the block level set-up, there are 88 Gaon Panchayats, each comprising a number of villages and governed by local-self bodies. From the angle of Police administration, the district area is divided among 6 Police stations and 15 Police out-posts.

Apart from Revenue matters, District Development is one of the very important objective of the District Administration. As head of the District Administration, the Deputy Commissioner is responsible for all round developmental activities in the district under various programmes such as MP's Local Area Fund (MPLAD), MLA's fund, Untied Fund, Sub-divisional Plan Scheme Fund, Border Area Development Fund etc. For these works, the Deputy Commissioner assigns one A.D.C. (Development) the specific task of looking after and coordinating various developmental activities undergoing in various sectors. The ADC (Development) is aided in this matter by the decentralized Planning Cell of the DC's office. All departments, involved in the developmental activities of the district, like PWD, Irrigation, Health, Education and many others work in coordination and a District Development Committee (DDC) headed by the Deputy Commissioner has been in place to ensure this coordination. Under the Government policy of rapid upliftment of rural population, a District Rural Development Agency (DRDA) is functioning in the district, which has the Deputy Commissioner as the Chairman and one Project Director as its functional

head. All schemes for Rural Development are implemented by agencies in coordination with 6 Development Blocks situated in outlying rural areas of the district. These Development Blocks are supervised by Block Development Officers and Senior BDOs.

Law and Order

Severe of penalties kept the incidence of crimes very low during the Ahom rule and until end of British regime also. Migration of people especially of those with doubtful antecedents and introduction of an element of heterogeneity and increase in population slowly caused in the incidence of crimes.

Maintenance of Law and Order is another important aspect of district administration and the Deputy Commissioner also being the District Magistrate is responsible for proper maintenance of the same. The Deputy Commissioner is aided by the Additional District Magistrate and Sub-divisional Magistrates. The Circle Officers of the Circles also function as Executive Magistrates and are responsible for maintenance of Law and Order in their respective circle areas. The District Magistrate and other magistrates take the necessary assistance from the police department for any necessity. Police Administration of the district is headed by the Superintendent of Police. The police department has an infra-structure of Police Stations, out-posts and other auxiliary establishments in the district.

The incidence of crime in the district is not less compared to other parts of the State. The number of different cases of crimes reported are presented in the following table .

Table-V

Cases of crime reported in Assam and Kokrajhar

Sl. No	Cases of crime	No. of cases reported		Percentage to total crimes in state
		Assam state	Kokrajhar district	
1	2	3	4	5
1	Murder	1,665	146	8.8
2	Rape	744	16	2.2
3	Kidnapping	1,471	50	3.4
4	Dacoity	928	38	4.1
5	Robbery	1,082	36	3 3
6	Burglary	3,696	95	2 6
7	Riot	3,548	106	3 0

Source . Additional Director General of Police (CID) Govt of Assam.

As may be seen in the above table, the incidence of Murder and Dacoity are relatively more compared to other types of crimes whereas cases of other crime are not less in comparison to other districts of Assam. However, the rates of conviction are very less both in the district as well as in the State as a whole

Accident

In the year 1999, about 58 accidents on National highways are reported in which 19 persons are killed and 86 persons are injured.

Tenancy

From ancient days various Tenancy Acts were passed in Assam time to time. In 1929 the relation between them landlords and tenants was regulated under this Tenancy Act. This Act was enforced in old Goalpara district to improve the relationship between the Zimindars and tenants. Kokrajhar district was under the purview of this Act. This Act improved the condition of the tenants. This Act was in forced even after abolition of Zamindary system in 1956-57. This Act was amended in 1970 to include some new development in the concept of tenancy. In 1974, Assam Adhars Protection and Regulation Act, 1948 was finally repealed. Assam Temporarily Settled Tenancy Act,1971 was extended to the acquired Zamindary estates of the district by the Act, the Assam Land Holdings (Adoption of Relationship) under the Assam Land and Revenue Regulation,1886 in the Acquired permanently Settled Estates Act, 1974.

The Assam Non- Agricultural Urban Tenancy Act, 1955 was passed to regulate relation between landlords and tenants of non agricultural land in urban areas. The Assam Urban Areas Act Rent Control Act, 1961 as amended time to time was also passed to control the fixation of fair rent of houses in urban.

The Assam (Temporarily Settled Areas) Tenancy Act, 1970 is now in forced in the district. The main features of the Act are furnished below-

1 Share- croppers will be treated as tenants.

2. Right of occupancy will accrue on occupation of 3 years as against 12 years, prescribed in the earliest Act.

3. The Government has been given the power to acquire the rights of ownership and intermediary r5ights on favour of occupancy and non occupancy tenants. Till the government acquired these rights an enabling right has been given to the tenants cultivating their own lands to acquire such rights by depositing compensation

4. Illegally ejected tenants are restored through Revenue courts. A limited right to mortgage has been given to non occupancy tenants for agriculture whereas occupancy tenant has been given permanent heritable and transferable right of use and occupancy in the land of his holding.

Local self Government

The concept of local self Government originated with the British Administration with a view to collect tax as embodied in Regulation 13 of 1813. Still local self Government did exit during pre-British period. Namghar, Mandir and Masjid where all assembled to celebrate religious functions maintained a co-incidence like modern courts to settle disputes and crimes. It assumed as village court.

The promulgation of Assam Panchayat Act in 1959 which come into force in 1960abolished such local institution and made its appearance as three tier Panchayat Raj. But by legislation which termed as Act in 1972 operative from 5th May 1973, earlier three tier system was reduced to two tier system

The district has two sub divisions 1. Kokrajhar and 2. Gossigaon. These areas are administered by Sub Divisional Officers under direct control of Deputy Commissioner.

There are Gaon Panchayats for rural and Mahkuma Parishad for urban Areas. There are as many as 5 Revenue Circles. Kokrajhar is having three revenue Circles and Gossigaon Sub Division has two Revenue Circles. The total number of 975 villages fall under six Community Development Blocks. In urban sector, the district has three statutory towns of these Kokrajhar town falls under Municipal board and the rest under Town Committee Also there is one Census town namely Salakati. Levying of taxes on holdings , rickshaw, carts, cycles, stalls and markets is the sources of revenue in the towns.

****

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the

servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated

persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes

1	Bansphor
2	Bhuinmali,Mail
3	Brittial Bania,Bania
4	Dhupi,Dhobi
5	Dugla,Dholi
6	Hira
7	Jalkeot
8	Jhalo, Malo,Jalo-Malo
9	Kaibartta
10	Lalbagi
11	Mahara
12	Methar,Bhangi
13	Muchi, Rishi
14	Namasudra
15	Patni
16	Sutradhar

Scheduled Tribes :

1. In the autonomous district :

1 Chakma

2 Dimasa,Kachari

3 Garo

4 Hajong

5 Hmar

6 Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam

7 Any Kuki Tribes Including:

(i) Biate,Biet
(ii) Changsan
(iii) Chongloi
(iv) Doungel
(v) Gamalhou
(vi) Gangte
(vii) Guite
(viii) Hanneng
(ix) Haokip, Haupit
(x) Haolai
(xi) Hengna
(xii). Hongsungh
(xiii) Hrangkhwal, Rangkhol
(xiv) Jongbe
(xv) Khawchung
(xvi) Khawathlang, Khotalong

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have

a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian

Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years

Sex -ratio

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and

normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course

that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban

Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 905,764 in 2001 Census. Male comprises 466,191 while female consists of 439,573. Out of the total population of the district, 841,823 fall under rural and 63,941 are under urban areas of the district. In rural areas 432,465 and 409,358 are males and female respectively. Accordingly 33,726 and 30,215 are males and females respectively in urban of the district. The percentage of urban population in the disrict Kokrajhar is only 7.06 . The district is a rural base place in which 93 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +12.0 which is lower than the state rate. In the district, there are only 4 towns . Kokrajhar Town is only town with Municipal Board and Two towns is with Town Committee status and One Census Town. The density of the district is 256 persons per sq. kms. which is lower than the state density (340). The sex ratio in the district is 943 as against 935 in the State. Out of total population of the district, 37 % is total workers of which 48 % and 25.2 % are male and female respectively. The percentage of non- workers is 63.0 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 43.0 %, 22.5 %, 3.6 % and 30.9 % respectively.

The literacy rate is 51.6% in the district of which 60.3% is for males and 42.4 % is for females. The district literacy rate is below the state literacy rate (63.3)%.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

TABLE-1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban	
		1991			2001						1991	2001

5	Sidli (Pt.-I)	105,840	105,840	-	113,975	113,975	-	7.7	7.7	-	-	-
District Total:		**800,659**	**749,935**	**50,724**	**905,764**	**841,823**	**63,941**	**13.1**	**12.3**	**26.1**	**6.3**	**7.1**

The table 1 shows the Revenue Circle-wise decadal change in population by residence in total, rural and urban. During Census 2001, the population of the district is 905,764 of which 841,823 are in rural and 63,941 are in urban.The percentage decadal variation during 1991-2001 is 13.1 percent in the district as against 18.9 percent in the state. The urban population growth rate in the district in 1991-2001 is 7.1 as shown above

Among five Revenue Circles in the district, Gossaigaon Revenue Circle has recorded 257,815 population in 2001 Census which is the biggest in term of population. The lowest is Bhowraguri Revenue Circle with 58,254 persons. In urban side, Datama Revenue Circle has a negative urban growth rate with –8.0 percent.

TABLE-2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Sl. No.	District / CD Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females

Districts (Rural) Total:		**87,977**	**83,330**	**4 (0.4)**	**13,009**	**11,853**	**5 (0.5)**	**45,345**	**41,572**

The table-2 gives the number and percentage of inhabited villages in specified population size ranges with the related population. Out of 975 villages of the district, number of inhabited villages are 951 in 6 CD Blocks. In the district, Kachugaon CD Block has the highest with 216,622 population. Halidhura CD Block with 85,037 population is the smallest CD Block in the district. It is noticed that the highest number of villages with 237 villages of the total villages of the district are under Kokrajhar CD Block. Hatidhura CD Block records the lowest number 78 inhabited villages. The highest number of inhabited villages 161or 16.9 percent are in population the range of 1000-1999 followed by 318 or 33.4 percent villages having the population in the range of 500-999 and the least 4 number of villages are noticed in the population range of 5000-9999. There are 60 villages in population range of 2000-4999 and 5 villages having population in the range of 10,000 and above. Detail in respect of other population ranges and number of villages can be seen in the table.

TABLE : 3
NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town		Name of town	
(a) New		(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	
(i) Statutory town	Nil	1	Nil
1		2	
2		3	
3		(iii)Census towns of 1991 census are notiified as statutory town in 2001 census	
(ii) Census town		1	Nil
1 Salakati C T		2	
2		3	
3		(c) Declassified	
(b) Denotified	Nil	1	Nil
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns		2	
		3	
1	Nil	(d) Wholly merged with other town(s)	Nil
2		1	
3		2	
		3	

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

The table -3 shows that during 2001 Census no new statutory town has come up. Only a new Census Town has existed in the district. The name of town is Salakati. No town from the district has been de-notified or declassified in 2001. In other categories no change has taken place.

TABLE-4
DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	8	0.8	1,467	0.2
11-20	7	0.7	1,076	0.1
21-50	25	2.6	4,060	0.5
51-100	48	5.0	8,744	1.0
101-200	149	15.7	60,902	7.2
201-300	162	17.0	82,297	9.8
301-500	230	24.2	165,489	19.7
501 +	322	33.9	517,788	61.5
Not known	0	0.0	0	0.0
District Total:	**951**	**100.0**	**841,823**	**100.0**

Population Density (Rural) of the district: 369.2

The table-4 presents the distribution of villages by population density in the district. Out of 905,764 population of the district, 841,823 population or 92.9 percent are hailed from 951 villages. The density of population of these villages is 369 persons per sq. km. From the table, it is observed that in the range of population density 0-10 per sq. km. there are 8 villages covering 1,467 population. Similarly, in other ranges of population density per sq. km, the number of villages along with percentage of village and population with percentage can be seen in the table.

TABLE- 5
SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			Kokrajhar		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	904	904	-
1911	915	923	626	886	886	-
1921	895	906	613	875	875	-
1931	874	885	574	877	877	-
1941	875	886	605	880	880	-
1951	868	878	663	870	870	-
1961	869	887	661	892	901	664
1971	896	912	744	913	921	747
1981	--	--	--	-	-	-
1991	923	934	838	941	944	889
2001	935	944	872	943	947	896

Note : Sex ratio has been defined here as the number of females per 1000 males.

The table 5 indicates sex ratio of the state as well as of the district from 1901 to 2001. The district sex ratio is found higher than the state in all decades except 1911 and 1921. The district rural sex ratio is 944 in 2001 as against 934 in the state. The urban sex ratio is 889 in the district which is higher than the state in 2001. The sex ratio of the district has increased gradually in last three decades which can be said as an encouraging feature.

TABLE- 6
SEX RATIO BY TAHSILS, 2001

Serial No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Gossaigaon	940	942	882
2	Bhowraguri	951	951	-
3	Dotoma	954	954	-
4	Kokrajhar	941	952	900
5	Sidli (Pt -I)	937	937	-
District Total:		**943**	**947**	**896**

The table 6 gives the Revenue Circle- wise sex ratio with a break up of total, rural and urban. Of 5 Revenue Circles of the district, there are no urban area in Bhowraguri, Dotoma and Sidli Part-I Revenue Circles. From the table, it is noticed that the district, according to 2001 Census is recorded sex ratio 943 females per 1,000 males where in rural it is recorded 947 females and in urban it is 896 females.

Among the Revenue Circles, the highest rural sex ratio of 954 is noticed in Dotoma Revenue Circle followed by Kokrajhar Revenue Circle which recorded 952 females and the lowest is noticed in Sidli Pt-I Revenue Circle with 937 females. In urban, the highest sex ratio of 900 is noticed in Kokrajhar Revenue Circle and the lowest sex ratio of 882 females is in Gossaigaon Revenue Circle

TABLE-7
SEX RATIO BY CD BLOCKS, 2001

Serial No.	Name of C D Block	Sex ratio
1	2	3
1	Kachugaon	940
2	Hatidhura	948
3	Gossaigaon	950
4	Dotoma	954
5	Kokrajhar	952
6	Sidli-Chirang Pt.	937
District (Rural) Total:		**947**

The table-7 presents CD Block wise sex ratio in the district. At CD Block level, Dotoma CD Blocks has the highest sex ratio of 954 among all CD Blocks which is higher than the district rural sex ratio. The lowest sex ratio is noticed in Sidli Chirang CD Block with 937 females per 1,000 males. The sex ratio in four CD Blocks is seen higher than the district sex ratio while sex ratio of other CD Blocks are lower than the district level rural sex ratio

TABLE-8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	14	1.5	5,328	0.6
700-749	6	0.6	2,840	0.3
750-799	28	2.9	13,669	1.6
800-849	42	4.4	22,702	2.7
850-899	117	12.3	123,882	14.7
900-949	209	22.0	267,049	31.7
950-999	243	25.6	244,880	29.1
1000-1099	239	25.1	147,183	17.5
1100+	53	5.6	14,290	1.7
District Total:	**951**	**100.0**	**841,823**	**100.0**

Sex ratio (Rural) for District: 947

The table 8 shows sex ratio of rural population by ranges. When the sex ratio at village level is concerned, it is found that most of the villages have sex ratio 0f 900+ females per 1,000 males. Out of 951 inhabited villages in the district, 209 villages come under sex ratio range of 900-949 while in 207 villages, sex ratio is below 900 females. For 14 villages , sex ratio is recorded below 700 females while 6 villages have come under sex ratio range of 700-749 females per 1,000 males.

TABLE-9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Gossaigaon (TC)	TC	882
2	Kokrajhar (MB)	MB	906
3	Basugaon (TC)	TC	935
4	Salakati (CT)	CT	813

Sex ratio (Urban) for the district: 896

The table-9 gives the town wise sex ratio in the district. Urban sex ratio of the district as per Census 2001 is 896 females. It is noticed from the table that out of 4 towns of the district, Salakati CT has shown the lowest 813 sex ratio among all towns. In other town whose sex ratio is below the district urban sex ratio 896 is Gossaigaon TC with 882 females. However, two towns in the district, show the sex ratio above the district urban sex ratio.

TABLE-10
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial No.	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Gossaigaon	Total	63,366	32,617	30,749	943
		Rural	61,636	31,692	29,944	945
		Urban	1,730	925	805	870
2	Bhowraguri	Total	13,194	6,762	6,432	951
		Rural	13,194	6,762	6,432	951
		Urban	0	0	0	-
3	Dotoma	Total	22,046	11,242	10,804	961
		Rural	22,046	11,242	10,804	961
		Urban	0	0	0	-
4	Kokrajhar	Total	41,945	21,338	20,607	966
		Rural	36,424	18,504	17,920	968
		Urban	5,521	2,834	2,687	948
5	Sidli (Pt.-I)	Total	22,290	11,635	10,655	916
		Rural	22,290	11,635	10,655	916
		Urban	0	0	0	-
District Total:		**Total**	**162,841**	**83,594**	**79,247**	**948**
		Rural	**155,590**	**79,835**	**75,755**	**949**
		Urban	**7,251**	**3,759**	**3,492**	**929**

The table-10 gives sex ratio of population in the age-group 0-6 for Revenue Circles in total, rural and urban with a break up in persons, males and females. From table, it is noticed that sex ratio for 0-6 age group is 948 in total, 949 in rural and 929 in urban. It may be mentioned that the district sex ratio of population in the age-group 0-6 are higher than the district sex ratio of the total population which are recorded as 943 in total, 947 in rural and 896 in urban.

Among the Revenue Circles, the rural highest sex ratio for 0-6 age group children is noticed in Kokrajhar Revenue Circle which is recorded 966 females and the lowest is 916 females in Sidli Pt-I Revenue Circle. The urban sex ratio of population in the age-group 0-6 is noticed the highest in Kokrajhar Revenue Circle with 966 females 1,012 and the lowest is found in Gossaigaon Revenue Circle with 943 females.

TABLE-11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Serial No.	Name of CD Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Kachugaon	40,816	21,060	19,756	938
2	Hatidhura	16,399	8,411	7,988	950
3	Gossaigaon	17,615	8,983	8,632	961
4	Dotoma	22,046	11,242	10,804	961
5	Kokrajhar	36,424	18,504	17,920	968
6	Sidli-Chirang Pt.	22,290	11,635	10,655	916
District (Rural) Total:		**155,590**	**79,835**	**75,755**	**949**

The table 11 shows sex ratio of population in the age-group 0-6 for CD Blocks. The district rural sex ratio in the age-group 0-6 is 949 females at CD Block level; it is seen that Kokrajhar CD Block has the highest sex ratio of 968 females followed by 961 females at Gossaigaon and Dotoma CD Blocks with same number of females. Among the CD Blocks, three CD Blocks have been recorded sex ratio below the district sex ratio in the age group 0-6 children. Sidli - Chirang Pt has recorded the lowest sex ratio of 916 females among 1,000 males.

TABLE-12
SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	90	9.5	5,332	3.4
700-749	42	4 4	3,988	2.6
750-799	64	6.7	11,258	7.2
800-849	69	7.3	11,302	7.3
850-899	84	8.8	19,759	12.7
900-949	96	10.1	27,017	17.4
950-999	69	7.3	19,303	12.4
1000-1099	207	21.8	34,682	22.3
1100+	230	24.2	22,949	14.7
District(Rural)Total:	**951**	**100.0**	**155,590**	**100.0**
Sex ratio (Rural) for District:		**949**		

The table12 gives sex ratio of rural population in the age group 0-6 by ranges. If village wise sex ratio in the age group 0-6 is observed it is seen that out of 951 inhabited villages of the district, 230 villages have recorded 1100+ sex ratio and 207 villages have shown sex ratio in the range 1000-1099females. In the lower side, it can be seen that sex ratio in 90 villages is lower than 700 females, altogether 349 villages have shown sex ratio below 900.

TABLE-13
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Gossaigaon (TC)	TC	1,730	925	805	870
2	Kokrajhar (MB)	MB	3,228	1,672	1,556	931
3	Basugaon (TC)	TC	1,389	697	692	993
4	Salakati (CT)	CT	904	465	439	944
District(Urban) Total			**7,251**	**3,759**	**3,492**	**929**

The table 13 gives the sex ratio of population in the age group 0-6 of urban agglomerations/towns. The district urban sex ratio of population in the age-group 0-6 is 938 females. The highest sex ratio for 0-6 age group among the towns is noticed in Basugaon CT with 993 females per 1,000 males. On the other hand the lowest sex ratio of 870 females has been returned by Gossaigaon CT. However, in term of total population in 0-6 age group, Kokrajhar MB has the highest number of children with 3,228 and record the sex ratio of 931 females.

SEX RATIO OF POPULATION IN THE AGE GROUP GROUP 0-6 OF TOWNS, KOKRAJHAR, 2001

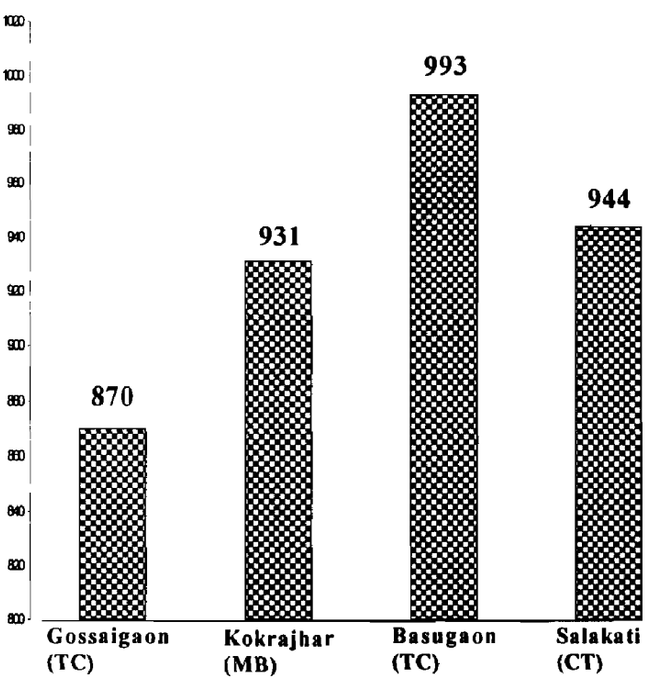

TABLE-14

The table 14 presents the number and percentage of Scheduled Castes and Scheduled Tribes population in Revenue Circle wise in the district. The proportion of Scheduled Castes population to the total population is 3.4 percent and that of Scheduled Tribes population is 33.7 percent. The percentage of Scheduled Castes is less than that of the state percentage of 6.9 and the percentage of Scheduled Tribes population in the district is most more than that of the state 12.4 percent. In rural, the distribution of Scheduled Castes population is 2.9 percent and Scheduled Tribes population is 34.8 percent of the total population where as in urban the Scheduled Castes population forms 10.9 percent and Scheduled Tribes forms 18.6 percent. The highest concentration of Scheduled Castes population at Revenue Circle is found in Kokrajhar with 11.1 percent in urban and for Scheduled Tribes at rural of Dotoma Revenue Circle.

TABLE-15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial No.	Name of CD Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Kachugaon	216,622	4,330	69,492	2	32
2	Hatidhura	85,037	3,349	579	4	1
3	Gossaigaon	89,313	3,741	12,463	4	14
4	Dotoma	133,650	4,878	56,897	4	43
5	Kokrajhar	203,226	4,702	85,327	2	42
6	Sidli-Chirang Pt.	113,975	3,190	68,344	3	60
District (Rural) Total:		**841,823**	**24,190**	**293,102**	**3**	**35**

The table 15 presents the number and percentage of Scheduled Castes and Scheduled Tribes population in CD Blocks. The district rural percentage of Scheduled Castes is 2.9 percent and Scheduled Tribes

is 34.8 percent. Among the CD Blocks, the highest Scheduled Castes population is noticed in Gossaigaon CD Block with 4.2 percent and the lowest is found in Kachugaon CD Block with 2.0 percent. In distribution of Scheduled Tribes population among the CD Blocks, Sidli Chirang Pt CD Block with 60.0 percent stands in the highest position among all CD Blocks whereas Hatidhura CD Block which recorded 0.7 percent is the lowest among all CD Blocks. However, in term of absolute number in the case of Scheduled Castes, the highest number of Scheduled Castes population is noticed in Dotoma CD Block with 4,878 persons and the highest number of Scheduled Tribes population is seen in Kokrajhar CD Block having 85,327 persons.

TABLE-16
PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	732	77.0	0	0.0
Less than 5	108	11.4	2,715	11.2
5-10	43	4.5	4,419	18.3
11-20	29	3.0	5,479	22.6
21-30	15	1.6	3,567	14.7
31-40	5	0.5	1,564	6.5
41-50	8	0.8	2,588	10.7
51-75	9	0.9	3,450	14.3
76 and above	2	0.2	408	1.7
District Total	**951**	**100.0**	**24,190**	**100.0**

The table-16 indicates proportion of Scheduled Castes population in villages. It is observed from the table above that number of villages are more where there is no Scheduled Castes population. This type of village is numbered as 732. The villages numbered 108 have less than 5.0 percent Scheduled Castes population. In 43 and 29 villages the percentage of Scheduled Castes population are in the ranges of 5-10 and 11-20 respectively. .

TABLE-17
PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	306	32.2	0	0.0
Less than 5	52	5.5	1,794	0.6
5-10	29	3.0	2,865	1.0
11-20	25	2.6	4,759	1.6
21-30	42	4.4	10,867	3.7
31-40	31	3.3	9,679	3.3
41-50	35	3.7	21,382	7.3
51-75	70	7.4	36,442	12.4
76 and above	361	38.0	205,314	70.0
District Total	**951**	**100.0**	**293,102**	**100.0**

The table 17 shows the proportion of Scheduled Tribes population to total population in villages. Out of 951 total number of inhabited villages in the district, 306 villages have no Scheduled Tribes population. As such 293,102 persons belonging to Scheduled Tribes are found in 645 villages spreading out in the district. The Scheduled Tribes population of 70.0 percent are occupied in 361 villages in the district which fall under the percentage range in 76 and above. However, the percentage range of Scheduled Tribes population to total population comprising of 29 villages have the lowest number of Scheduled Tribes population in the range of 5-10 percent.

TABLE-18
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Gossaigaon (TC)	13,508	1,356	2,629	10	20
2	Kokrajhar (MB)	31,164	3,246	7,398	10	24
3	Basugaon (TC)	12,440	2,159	360	17	3
4	Salakati (CT)	6,829	216	1,496	3	22
District (Urban) Total		**63,941**	**6,977**	**11,883**	**11**	**19**

The table 18 presents town wise number and percentage of Scheduled Castes and Scheduled Tribes population. The district urban proportion of Scheduled Castes population to total population is 10.9 percent and the proportion of Scheduled tribes is 18.6 percent respectively. The highest proportion of Scheduled Castes population is noticed in Basugaon TC town with 17.4 percent and the lowest is in Salakati CT with 3.2 percent. However, 23.7 percent of Scheduled Tribes population is noticed in Kokrajhar MB which is the highest among all towns and 2.9 percent is noticed in Basugaon TC as the lowest proportion of Scheduled Tribes population among the towns

TABLE-19
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C D BLOCKS, 2001

Serial No.	Name of C D Block	Scheduled Castes sex	Scheduled Tribes sex
1	2	3	4
1	Kachugaon	848	978
2	Hatidhura	928	905
3	Gossaigaon	917	1,007
4	Dotoma	930	989
5	Kokrajhar	925	980
6	Sidli-Chirang Pt.	907	962
District (Rural) Total		**909**	**978**

The table 19 shows the CD Block-wise in sex ratio of Scheduled Castes and Scheduled Tribes. The district rural sex ratio 947 of the total population is higher than the district rural sex ratio of 909 females for Scheduled Castes and for Scheduled Tribes it is 978 females per 1,000 males Among the CD Blocks, Dotoma CD Block with 930 females recorded the highest sex ratio in Scheduled Castes population and the lowest is in Kachugaon CD Block with 848 females. However, in Scheduled Tribes, Gossaigaon CD Block recorded sex ratio of 1,007 females which indicates that the number of females Scheduled Tribes population is more than male Scheduled Tribes population. The lowest Scheduled Tribes sex ratio of 905 females is noticed in Hatidhura CD Block

TABLE-20
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name of U.A / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Gossaigaon (TC)	897	918
2	Kokrajhar (MB)	940	1,005
3	Basugaon (TC)	924	1,045
4	Salakati (CT)	846	981
Sex ratio (Urban) for the district:		**924**	**983**

The table-20 gives town-wise sex ratio among Scheduled Castes and Scheduled Tribes. The district urban sex ratio of total population is 896 females which is lower than the district urban sex ratio of 924 females for Scheduled Castes population and for Scheduled Tribes it has been recorded 983 females. Among the towns, the highest sex ratio in Scheduled Castes is found in Kokrajhar MB having 940 females. The lowest sex ratio among all towns is noticed in Salakati CT with 846 females. Basugaon TC is recorded the highest sex ratio for Scheduled Tribes population with 1,045 females per 1,000 males followed by Kokrajhar MB with 1,005 females per 1,000 males. In these two towns females are more than males. Gossaigaon TC has been recorded the lowest Scheduled Tribes sex ratio of 918 females per 1,000 males.

The table presents number and percentage of Main workers, Marginal workers and Non-workers by sex in Revenue Circles. In the district, percentage of total workers (Main and Marginal workers) is 37.0 percent which is higher than the state total workers rate of 35.7 percent. However, in the break up of total workers into Main workers and Marginal workers, the percentages are recorded in the district with 25.9 percent and 11.0 percent respectively. It is noticed in non-workers that the state percentage with 64.3 percent is higher than that of 63.0 percent in the district.

In the distribution of workers and non-workers by sex, it is noticed that the male total workers which constitutes 48.0 percent predominate the female workers which is only 25.2 percent. In case of non-workers, however, it is vice-versa. It is observed that as usual, the female marginal workers predominate the male marginal workers.

Among the Revenue Circles, it is noticed that Dotoma Revenue Circle recorded the highest proportion of total workers with 40.0 percent and the lowest is in Gossaigaon Revenue Circle with 34.5 percent.

The percentage of total rural workers in the district is 37.3 percent of which 47.7 percent for males and 26.3 percent for females. The highest percentage of total workers is seen in Dotoma CD Block and the lowest is found in Hatidhura CD Block. The main worker being 25.6 percent, 38.8 goes to male and 11.8 percent to female. In the district, 11.7 percent is the marginal workers. In this case percentage and number of female exceeds males. Similarly female non-workers exceed male's non-workers' percentage and in absolute number.

TABLE-33
NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Note. Percent of Worker to total worker are given in brackets

The table presents the distribution of workers by sex in four categories of economic activity in Revenue Circles. Out of the total workers of 334,849 in the district, Cultivators form the biggest share with 43.0 percent, followed by the category of Other workers with 30.9 percent. Agricultural Labourers form 22.5 percent of the total workers and lastly, Household Industry workers are very few in number and in percentage it is 3.6 percent of the total workers. In the male-female break up of total workers, it is observed that the female workers predominate the male workers in category of Agricultural Labourers and Household Industry.

Among the Revenue Circles, it is noticed that in the category of cultivators, Sidli Pt-I Revenue Circle recorded the highest proportion with 61.5 percent and the lowest is in Kokrajhar Revenue Circle with 38.0 percent followed by Gossaigaon Revenue Circle. In Agricultural labourers, it is noticed that Bhowraguri Revenue Circle recorded the highest 27.9 percent and the lowest is in Sidli Pt- I Revenue Circle. The Household Industry workers are very nominal till then the percentage of this category of workers is more in Dotoma Revenue Circle. The other workers, however, form the second biggest group of workers among all categories. Kokrajhar Revenue Circle stands in the highest position among all Revenue Circles which constitutes 40.6 percent followed by Dotoma Revenue Circle with 32.8 percent. The lowest is noticed in Sidli Pt-I Revenue Circle with 17.6 percent.

Note Percent of Worker to total worker are given in brackets

The table shows category with number of workers by sex and their percentage in each CD Blocks. Out of 314,081 total number of workers in rural of the district, a large number of persons take cultivation as their main work The other categories of workers viz, Other workers and Agricultural Labourers record 28.8and 23.4 percent respectively. There are a few people in the district who took household industry either as main work or as marginal work and the percentage of workers shows only 3.6 percent. As discussed in the previous table, male workers in all four categories of workers are more than females workers in terms of absolute figure. In all six CD Blocks in the district, people are found to be engaged in all four categories of works and largely in cultivation.

TABLE-36
DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Serial No.	Name and urban status of UA / Town	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table shows the different amenities that are enjoyed by villages with its total number. Out of 951 inhabited villages in the district 95.4 percent villages are having access to education and 84.6 percent in the district are having access to improved drinking water. Power supply to the villages has tremendously improved with 74.0 percent of the villages having electricity. However, 30.1 percent of villages are having access to transport communication facility and 58.6 percent of villages are having access to approach by pucca road. Most of the villages are not having access to medical facility. Out of 951 villages only 211 or 22.2 percent villages recorded as having access to medical amenity. Very few villages are having access to facility of post office and telephone with 11.9 and 5.6 percent respectively. The other facilities like bank and agricultural credit societies are not available in most of the villages. During Census 2001, number of villages recorded 2.1 percent as having access to bank and less than 1.0 percent are access to agricultural credit societies.

Note . - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

\# Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

In the table it is seen that the highest 97.2 percent population of all CD Blocks received the benefit of education. The second highest 87.2 percentage of people of the district gets amenity of improved drinking water and the third highest 78.6 percent population of the district receive power supply. The number of people having access to medical facility are very few. Out of 841,823 population in the district , 278,228 or 33.1 percent persons are having access to medical amenity. However, 41.4 percent population are having access to transport communication facility and 69.0 percent are having access to approach by pucca road. People having access to post offices form only 20.4 percent and those having access to telephone form only 7.9 percent from the total population. Most of rural people in the district do not have access to bank and agricultural credit societies. Agricultural credit societies are not found in most of CD Blocks.

TABLE-39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col 2 - 4)
1	2	3	4	5
1. Education .-				
(a) Primary School	37	4	4	45
(b) Middle School	462	118	17	597
(c) Degree College	269	300	372	941
2. Medical:-				
(a) Hospital	173	260	507	940

Post office includes Post office, Telegraph office and Post and telegraph office
$ Transport communication includes bus service, rail facility and navigable waterways
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

The table indicates that availability of educational facility is found less in villages where less number of people resided. Population of villages having in the range 5000-9999 and 10,000+ have enjoyed educational facility by all villages. The medical facility is availed by more villages having 10,000+ population. Improved drinking water facility is recorded available in all villages having population in the range of 5,000-9,999. In case of other facilities, less number of villages in each population ranges have availed Post Office Telephone, Bank and Agriculture Credit Societies facilities. There is no Telephone and bank facilities in villages having 10,000+ population

TABLE-42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No.	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Kachugaon	220	47,222	52	1
2	Hatidhura	78	14,504	75	0
3	Gossaigaon	110	18.060	57	0
4	Dotoma	172	33.601	82	5
5	Kokrajhar	237	74,175	36	63
6	Sidli-Chirang Pt.	134	40,469	39	7
	District Total:	**951**	**228,031**	**51**	**17**

Note - Cultivable area = irrigated area + unirrigated area

The table indicates that total areas of the district as per Village Directory is 228,031 hectares of which 50.6 percent land is cultivable land and 16.8 percent is irrigated land. A big area is covered by Dotoma CD Block having 81.6 percent cultivable and Kokrajhar CD Block has the lowest 35.7 percent of cultivable land out of its total area. However, the highest percentage of irrigated area to total cultivable area is seen in Kokrajhar CD Block.

TABLE-43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial No	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Basugaon (TC)	11.3	0 7	10.6	11.5	4 6	1	4.6	0.3	1.1
2	IV Gossaigaon (TC)	12.1	2 4	9.7	12.4	4 3	0.9	5 4	0	1.8
3	III Kokrajhar (MB)	12.5	3 7	8 8	11 8	3 2	1	5.7	0	1 9
District Total		**12.1**	**2.7**	**9.4**	**11.9**	**3.8**	**1**	**5.4**	**0.1**	**1.7**

Per capita receipt in statutory towns of the district is Rs 12.1 for urban areas of the district while per capita expenditure is Rs 11.9 which is less than per capita income. All towns have more or less similar per capita income as well as expenditure. The detail per capita income and expenditure head wise can be seen in the table.

TABLE-44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Basugaon (TC)	7.2	1.6	1.6	1.6	0.8
2	Gossaigaon (TC)	5.2	5.9	3.7	0.7	0.7
3	Kokrajhar (MB)	4.5	4.2	1.6	1.3	1
District Total:		**5.3**	**4.0**	**2.1**	**1.2**	**0.9**

In statutory towns of the district, there are 1.5 number of primary school per 10,000 population in average and 0.9 number for Junior Secondary/ Middle, 0.7 number for Secondary / Matriculation. The Secondary School is more than 1 number and College is less than 1 number per 10,000 thousand population of the town areas.

TABLE-45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Basugaon (TC)	48
2	Gossaigaon (TC)	74
3	Kokrajhar (MB)	83
4	Salakati (CT)	81
	Distrct Total:	**74**

As per table it is seen that number of beds in hospitals are quite a few in towns of Kokrajhar district. Among four towns, Kokrajhar MB recorded the highest number of beds with 83 for each ten thousand population and the lowest number of beds in Basugaon TC with 48 per ten thousand population. In other towns, there are 74 beds in Gossaigaon TC and 81 beds in Salakati CT per 10,000 population. Average number of beds in the district is 74 per ten thousand population.

TABLE-46
PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	BASUGAON TC	12,440	0	0
2	GOSSAIGAON TC	13,508	1,130	8.4
3	KOKRAJHAR MB	31,164	1,335	4.3
District Total:		**57,112**	**2,465**	**4.3**

In the district, out of three statutory towns of the district, slum population is found in Kokrajhar MB and Gossaigaon TC. Total slum population of the district is 2,465 which is less number in comparison to the total urban.

TABLE-47
MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl.No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Basugaon (TC)	Mustard Oil	Jute
		Atta	Paddy
		Rice Product	Bamboo
2	Gossaigaon (TC)	Nil	Jute
		Nil	Timber
		Nil	Nil
3	Kokrajhar (MB)	Wood Product	Timber
		Tea	Jute
		Handloom	Mustard Oil
4	Salakati (CT)	Cloth	Bamboo
		Furniture	Jute
		Nil	Mustard Oil

Most important commodities exported out and manufactured in towns are presented in the table. In Basugaon TC, important commodities manufactured are mustard oil, att and rice product and exported commodities are jute, paddy and bamboo. In Gossaigaon TC, no important commodity is manufactured and exported commodities are timber and jute. In Kokrajhar MB, wood products, tea and handloom are manufactured and exported commodities are timber, jute and mustard oil. In Salakati CT most important commodities manufactured are cloth and furniture and bamboo, jute and mustard oil are exported out from the town

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table indicates households by tenure status and number of room occupied in the district by Scheduled Castes and Scheduled Tribes as well as for the district. The households having owned houses with one room are more for both communities followed by two rooms houses. Same is the case in rural areas also for both communities. But in urban areas households of both castes and tribes are more having house with two rooms. In case of rented houses, Scheduled Castes and Scheduled Tribes households have more houses with one room both in rural and urban areas. In case of others houses, Scheduled Castes and Scheduled Tribes households are more having houses with one room in rural areas and households of Scheduled Castes are more with two rooms houses in urban areas. But for Scheduled Tribes, the households are more having three rooms houses both urban.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note:-

Permanent:-1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

In Kokrajhar district, the percentage of households having permanent houses is more in Kokrajhar Revenue Circle followed by households having semi permanent houses. The percentage of households with temporary houses is more in Gossaigaon Revenue Circle than households having permanent and semi permanent houses. In case of rural areas, the percentage of households having permanent houses is found more in Gossaigaon Revenue Circle. Similarly the percentage of households with semi permanent houses is seen more in Kokrajhar Revenue Circle in rural and households for temporary houses is more in Gossaigaon Revenue Circle. In urban areas however, the percentage of households having all type of houses are found more in Kokrajhar Revenue Circle.

Data source Census of India 2001, H- series "Tables on Houses, Household amenities and Assets "

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the remises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note Percentage is to be given in brackets after the number of households

Bathroom means bathroom within the house
Toilet mean toilet within the house
Drainage means closed and open drainage

The table indicates number and percentage of households of each Revenue Circle having enjoyed certain amenities. It can be seen that the percentage of households which have enjoyed improved drinking water facility is more in all Revenue Circles except Sidli Pt-I where it is considerably low with 9.5 percent In case of electricity facility, the highest 24.2 percent households have this facility in Kokrajhar Revenue Circle and the lowest percentage of households which enjoyed electricity facility is in Sidli Pt-I Revenue Circle with 5.3 percent. The percentage of households having bathroom facility in comparison to other facilities is less in all Revenue Circles. The households of Kokrajhar Revenue have enjoyed bathroom facility by the highest 12.9 percent. The percentage of households having toilet facility is the highest in Kokrajhar Revenue Circle with 35.4 percent. Incase of drainage facility also, it is the highest in Kokrajhar Revenue Circle with 14.1 percent. All facilities enjoyed by households in urban is more in all Revenue Circles

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table indicate the number and percentage of households of each Revenue Circles by type of fuel used for cooking. The table depicts that the majority of households in the district use fire wood for cooking followed by LPG. The use of LPG by households are more in urban areas. It is more in Kokrajhar Revenue Circle. The use of crop residue and cow dung cake are very limited. However in Bhowraguri Revenue Circles use of crop residue take a major part in cooking where 10.8 percent households use crop residue for cooking. The electricity is also not used by almost all households as a source of cooking in the district only 936 households use electricity in cooking in entire district. The number and percentage of households which used different cooking fuels can be seen in the table itself. There is 1,240 households in the district which have no any cooking arrangement in their houses.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table shows the number of households who have availed banking services and the number of households having some specified assts as shown in the table. Out of total households of the district, a total of 22,170 households have availed banking services. The banking services availed by the households are more in rural areas than that of urban areas. In Revenue Circle level, the banking services availed by the households are more in Kokrajhar Revenue Circle followed by Gossaigaon Revenue Circle.

Availability of all assets mentioned in the table is more for the households of Kokrajhar Revenue Circle followed by Gossaigaon Revenue Circle. However, availability of bicycle is slightly more in Gossaigaon Revenue Circle than Kokrajhar Revenue Circle. The households without having none of specified assets are more in Gossaigaon Revenue Circle.

****

(IX) Major social and cultural events, natural and administrative developments and significant activities during the decade.

As the spring comes, the nature begins to change its colour into green. It also brings joy and delight in the minds of the people. The people of Assam mostly in Upper Assam have celebrated three Bihus festival. The people of Kokrajhar have performed Bihu festival. The beginning of this festival was made during rule of Ahom. Bahag Bihu/ Rangali Bihu is a spring festival in which dance and music predominate. Huchari parties sing hymns and pastoral songs. Bihu geets constitute a prolific variety of songs in Assamese literature. The central theme of these songs is love in its different mood.

Boros are the followers of Hinduism and their religion is known as Bathow. The word bears a distinct meaning. 'Ba' means five and 'thow' deep seated meaning. These five deep seated meaning generally convey the concept of Panchabhuta of Hindus. Bathow religion involves five kinds of pujas which are known to them as 'Kherai'. This puja is performed in great manner by Boros.

'Siju' plant is regarded as a sacred tree by the Boro community The annual puja and festivals are performed by all Bodo people with much grandeur and rejoicing. The puja is very interesting to observe in all directions.

The other festivals popular in the district are Namkirtan recitation and Bhaona performances. The Biswakarma puja, Saraswati and Lakshmi puja, Diwali, Manasa puja etc are also becoming gradually more and more popular. Bodo and Kacharis observe their own traditional festivals. Similarly Muslims also perform their own festivals.

No any administrative development and significant activity have been taken place in the district during the decade

(x) Brief description of places of religious, historical or archaeological importance and places of tourist interest in the district.

Kokrajhar district is not a very important place from tourist point of view. The district is predominantly inhabited by Bodos and Kacharis.

No important historical relics are found except the places called Sikrajhar a racial of Bodo kingdom of ancient times which is situated near Ultapani about 45 kms north of Kokrajhar town.

Jamaduar is a very natural and beautiful picnic spot situated at the extreme north west corner and on the left bank of the Sankosh river in Ripu reserved forest. The literal meaning Jamduar is door 6t5o the God of death. From the Jamduar one can enjoy the natural beauty of the Bhutan hills and Sankosh river. It is also a good fishing spot.

Gossaigaon town lies on the right bank of the Madati river and is an important station on the broad gauge line of N.F. Railway. It is an important trade centre of the district since long time.

Paglababa Than one of the oldest holy place of the district situated 3 kms away from north of Kokrajhar town. The deity of this temple is Lord Siva. During holi and Sivaratri festivals , people come from distance places to offer their puja

(XI) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

The major characteristic of the district can be pointed to agriculture. The district produces a considerable amount out of total production of rice in Assam. It is a big source of income for people of Kokrajhar as well as the government of Assam. The villager of the district solely depend on agricultural products. Rice is the major product of the villagers. It is followed by tea. The district being a place of lower Assam has a good number of tea gardens in its jurisdiction Jute is also produced in low lying areas of the district. Vegetables are largely produced and sold in bulk at different local markets and also to other districts of Assam.

Kokrajhar was once a very small town which at present grows to a big town having various amenities. It becomes the headquarter of the district. The town comprises all administrative offices for administration. The schools and colleges have increased alongwith other social service institutions. It is a major trade and commercial centre of the district.

Gossaigaon is the next biggest town of the district which is a centre of trade and commerce. All people of that locality come to this town to purchase their day to day needs. Basugaon town is also a centre of trade and commerce for the district.

The silk industry of Assam is a traditional industry which is flourished in Assam from the days of Ahom. Pat (Bombex mori), Eri (Philosamia ricini) and Muga (Antheraea Assama) are three kind of silks. Pat and Muga silk of Assam is called rich man's silk. The Eri is called poor man's silk. It is because of the fact that Pat and Muga are used to make the dresses of rich families. Eri is used to make the clothes for poor families. In Assam the Swargadeu of Ahom at extended helping hand for production of these type of silks. In the days of the king they established an administrative unit for development of Silk Industry and the first officer of this unit was Momai Tamuly Borbaruah. The tax was not imposed on land in which silk warm were reared. Due to the king's help and assistant this Golden industry of Assam has developed from their days. The British government has not taken any proper scheme for development of these industry. But later on some Britishians took some positive steps for its all round development. Mention may be made of Shri Buchanan, Hemilton, John Kinsh, Hagan, Helpher, Lefar etc. A part of production of Eri was exported to Nepal, Bhutan, Tibet etc. through Hadirachaki. At the beginning of 1900 century the production of Eri was 4,250 kgs. In Kokrajhar, out of these amount one third was for export and remaining portion was kept for the use of households and this portion was used mostly to produce *"Borkapur"*. This industry is remained alive due to sincere activities of the villager of the district.

The Government of Assam has taken a number of projects/ schemes to develop this industry time to time. Various farms are established almost in all districts of Assam. Some Sericulture Farms were set up for its development in the district. The production of Eri is done mostly by Kachari tribe people. Sericulture is a household industry and rearing of worms is done by the female in their idle time. The clothes are mainly for domestic use but now it develops for commercial purposes.

Forest provides a great contribution in the economy of the district.. The valuable species are found in the forest which are used in various purposes and provide income to the government.

(xii) Scope of Village Directory and Town Directory - Column heading wise explaination and coverage of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data

presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market / hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of respective jurisdiction.

****

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B

The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.

Appendix-VIII Indicates CD Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

List of villages merged in towns and outgrowths at 2001 Census

Town Directory

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type,it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

STATEMENT - I
Status and Growth History

Sl. No.	Class, name and civic status of town	Location code number	Name of Taluk/ Tahsil/ Police Station/Island etc.	Name of CD Block	Area (in sq. km.)	Number of households incl. houseless households (2001 Census)	Population and growth rate (in brackets) of the town at the census				
							1901	1911	1921	1931	1941
1	2	3	4	5	6	7	8	9	10	11	12
1	IV Gossaigaon (TC)	40101000	Gossaigaon	-	4.0	2,784	-	-	-	-	-
2	III Kokrajhar (MB)	40102000	Kokrajhar	-	8.2	6,233	-	-	-	-	-
3	IV Basugaon (TC)	40103000	Kokrajhar	-	4.9	2,456	-	-	-	-	-
4	V Salakati (CT)	40104000	Kokrajhar	0005	1.1	1,435	-	-	-	-	-

Sl. No.	Class, name and civic status of town	Population and growth rate (in brackets) of the town at the census of						Density (2001 Census)	Sex ratio		
		1951	1961	1971	1981	1991	2001		1981	1991	2001
1	2	13	14	15	16	17	18	19	20	21	22
1	IV Gossaigaon (TC)	-	-	-	-	11,319	13,508 (+19.3)	3,377.0	-	842	882
2	III Kokrajhar (MB)	-	9,489	17,060 (+79.8)	-	(+65.7)	31,164	3,782.0	-	891	906
3	IV Basugaon (TC)	-	-	-	-	11,138	12,440 (+11.7)	2,549.2	-	933	935
4	V Salakati (CT)	-	-	-	-		6,829	5,990.4	-	-	813

In area, Kokrajhar MB is the biggest among all towns. The household in this town is also more than remaining towns in the district.

Kokrajhar district comprises four towns having Municipal Board in one town, Town Committee in two towns and one Census Town. Kokrajhar town came into force in 1961 with 9,489 souls and other two towns formed in 1991 and remaining town is a Census town which is qualified in 2001. The highest decadal growth rate in 1991-2001 is +19.3 in Gossaigaon TC. Kokrajhar MB being an old town the growth rate is 10.3 only. The density in per km is high in Salakati Census town than other three towns. The sex ratio is the high in Basugaon TC town than other towns.

STATEMENT-II
Physical Aspects and Location of Towns, 1999

Sl. No.	Class, name and civic status of town	Physical aspects			Name of and road distance in kilometer(s)		Name of and road distance in kilometer(s) from		
		Rainfall (in mm)	Temperature (in centigrade)		State HQ.	District HQ.	Sub-division /Taluk/ Tahsil / Police station/ Development Block/ Island HQ.	Nearest city with population of one lakh and more	Nearest city with population of five lakh and more
			Max.	Min.					
1	2	3	4	5	6	7	8	9	10
1	IV Gossaigaon (TC)	3,335	37	6	Guwahati (302)	Kokrajhar (69)	Gossaigaon (0)	Guwahati (302)	Guwahati (302)
2	III Kokrajhar (MB)	3,335	37	6	Guwahati (236)	Kokrajhar (0)	Kokrajhar (0)	Guwahati (236)	Guwahati (236)
3	IV Basugaon (TC)	3,335	37	6	Guwahati (189)	Kokrajhar (23)	Kokrajhar (23)	Guwahati (189)	Guwahati (189)
4	V Salakati (CT)	3,335	38	12	Guwahati (224)	Kokrajhar (12)	Kokrajhar (12)	Guwahati (224)	Guwahati (224)

STATEMENT-II
Physical Aspects and Location of Towns, 1999

Sl. No.	Class, name and civic status of town	Railway station	Bus facility	Navigable river/ canal (if within ten kilometers)
1	2	11	12	13
1	IV Gossaigaon (TC)	Gossaigaon (0)	Yes (0)	-
2	III Kokrajhar (MB)	Kokrajhar (0)	Yes (0)	Gauranga (R) (7)
3	IV Basugaon (TC)	Basugaon (0)	Yes (0)	-
4	V Salakati (CT)	Salakati (0)	Yes (0)	-

The rainfall in all towns is same.The temperature both maximum and minimum are almost same in all towns but in case of Salakati CT minimum temperature is significantly differentfrom other towns. The state headquarters is far away from Gossaigaon TC than the other towns.The district headquarter is also far from this town. Guwahati is the nearest city having five lakh and more population for all towns and same city is the nearest city having one lakh and more population for all towns. All towns have railway station and bus facility in its jurisdiction. Navigable river is available in Kokrajhar MB within ten kms.

STATEMENT - III
Municipal Finance, 1998-99

Sl. No.	Class, name and civic status of town	Receipt (in Rs.'000)						
		Receipt through taxes, etc.	Revenue derived from municipal properties and power apart from taxation	Government grant	Loan	Advance	Other sources (specify)	Total receipt
1	2	3	4	5	6	7	8	9
1	IV Gossaigaon (TC)	325	174	961	-	-	172	1,632
2	III Kokrajhar (MB)	1,147	-	2,739	-	-	-	3,886
3	IV Basugaon (TC)	88	428	853	-	-	36	1,405
4	V Salakati (CT)	-	-	-	-	-	-	-

Sl. No.	Class, name and civic status of town	Expenditure (in Rs.'000)						
		General administration	Public safety	Public health and conveniences	Public works	Public institutions	Others (specify)	Total expenditure
1	2	10	11	12	13	14	15	16
1	IV Gossaigaon (TC)	583	-	126	727	4	240	1,680
2	III Kokrajhar (MB)	994	605	308	1,767	-	-	3,674
3	IV Basugaon (TC)	569	108	125	571	37	23	1,434
4	V Salakati (CT)	-	-	-	-	-	-	-

Total receipt of the Municipal Finance during, 1998-99 is more in Kokrajhar MB with Rs 3,886 thousand whereas the expenditure is Rs.3,674 thousand. In Gossaigaon TC these are Rs.1,632 and Rs.1,680 thousand respectively. Details head-wise receipt and expenditure of each town can be seen in the statement itself.

STATEMENT - IV

Civic and other Amenities, 1999

* In case this service is not available in the town mention the name of the nearest place where available along with distance in kilometer(s) from the town.

The Scheduled Caste and Scheduled Tribes population are found more in Kokrajhar MB. The road length of kuchha is more in Kokrajhar MB and pukka in Gossaigaon TC than other towns. The sewerage OSD system is common for all towns and BSD is also in Kokrajhar MB. The type and number of latrines for all towns can be seen in the table. The method of disposal of night soil, ST is common for all towns. The different water sources for towns can be seen in the statement.. The storage system of OHT/ RIG is available in Salakati CT. Two towns have the facility of fire fighting service but other towns have no such facility. The electrification is also available in all towns and the number of connections for domestic purpose are more in Kokrajhar MB. The number of connections for different purposes in all towns can be seen in the statement.

STATEMENT - V

Medical, Educational, Recreational and Cultural Facilities, 1999

* If a medical or educational facility is not available in the town, mention the name of the nearest place and its distance in Kilometer(s) from the town where facility is available.

All towns have Hospital, Dispensary having beds facility. All towns have availed the benefit of TB clinic at Goalpara. Salakati CT has no any type of college. The Medical College, Engineering College and Polytechnics facilities are availed by all towns in Guwahati. The other facilities mentioned in col. 10 to 20 are enjoyed by towns and their numbers are indicated in the statement. The facilities which are not available are indicated by putting dash.

STATEMENT - VI
Trade, Commerce, Industry and Banking, 1999

Sl. No.	Class, name and civic status of town	Name of three most important commodities exported			Name of three most important commodities manufactured			Number of banks	Number of agricultural credit societies	Number of non-agricultural credit societies
		1st	2nd	3rd	1st	2nd	3rd			
1	2	3	4	5	6	7	8	9	10	11
1	IV Gossaigaon (TC)	Jute	Timber	Nil	Nil	Nil	Nil	4	-	-
2	III Kokrajhar (MB)	Timber	Jute	Mustard Oil	Wood Product	Tea	Handloom	5	12	15
3	IV Basugaon (TC)	Jute	Paddy	Bamboo	Mustard Oil	Atta	Rice Product	2	-	-
4	V Salakati (CT)	Bamboo	Jute	Mustard Oil	Cloth	Furniture	Nil	3	1	-

The statement indicates three most important commodities exported and manufactured in towns. Names of commodities against each towns may be seen in the statement. There are 4, 5, 2 and 3 banks in Gossaigaon, Kokrajhar, Basugaon and Salakati towns respectively. There are 12 agricultural credit societies and 15 non agricultural credit societies in Kokrajhar MB. There is one agricultural credit societies in Salakati CT. But there is no such facility in other two towns

STATEMENT - VII
Civic and other amenities in Slums, 1999

Sl. No.	Class and name of town	Name of the slum	Is it notified	No. of households (approximate)	Population of the Slum (approximate)	Paved roads (in kilometers)	System of sewerage
1	2	3	4	5	6	7	8
1	IV Gossaigaon TC	No Pocket'S Name	No	160	1,130	NIL	OSD
2	III Kokrajhar MB	Harijan Basti	No	260	1,335	NIL	OSD
3	IV Basugaon TC	No Slum	No	-	-	-	NIL

Sl. No.	Class and name of town	Number of latrines				Method of disposal of night soil	No. of tap points/public hydrants installed for supply of protected water	Electricity connections		
		Private			Commu-nity			Domestic	Road lighting (points)	Others
		water borne	service	others						
1	2	9	10	11	12	13	14	15	16	17
1	IV Gossaigaon TC	16	100	15	2	O	-	24	12	-
2	III Kokrajhar MB	33	170	40	-	Pt, ST	-	52	18	10
3	IV Basugaon TC	-	-	-	-	-	-	-	-	-

There are slum population in Gossaigaon TC and Kokrajhar MB whereas no slum population is available in Basugaon TC. Towns have no pocket of slum population The slum areas of towns are not notified. The system of sewerage in slum areas is seen in two towns having ODS. The slum dwellers have different types of latrines but use of service latrines is more in all slum areas. The method of disposal of night soil in slum areas of Gossaigaon town is O and in Kokrajhar MB is Pt and St. There is community latrine in slum areas of Gossaigaon town. There is no tap points for supply of protected water in slum area. In slum areas of two towns, there are electricity connections and the number connections for different purposes can be seen in the statement.

APPENDIX TO TOWN DIRECTORY
Towns showing their outgrowths with population

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
1	Gossaigaon (TC)	13,508	-	-
2	Kokrajhar (MB)	31,164	-	-
3	Basugaon (TC)	12,440	-	-
4	Salakati (CT)	6,829	-	-

There is no Out Growth in Kokrajhar District.

Part B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

DISTRICT PRIMARY CENSUS ABSTRACT (GENERAL)

ANNEXURE

Annexure-I number of villages under each Gram Panchayat

(Data has not been collected in this Census)

Annexure – II Note on Fertility and Morality

Fertility, mortality, and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question was to only currently married women. The measures of fertility worked out are based on the F – Series. Tables of 1991 Census pertaining to the Assam State and details of concepts and definitions are explained in the earlier chapter heading non Census concepts.

Annexure – III: Various measures of fertility and mean age at marriage, 1991 Census

Fertility:

As seen through various indicators of fertility in the district it may be seen that the GFR of 172, GMFR of 241, TFR of 5.3 and TMFR of 7.5 against respective figures at state level are at 135, 190, 4.2 and 6.0. Various fertility measures and fertility related data are presented in the following table.

Table- I

Various measures of Fertility and Mean age at marriage, 1991 Census.

Sl. No.	Fertility measure	Kokrajhar district	Assam state
1	2	3	4
1	GFR	172	135
2	GMFR	241	190
3	TFR	5.3	4.2
4	TMFR	7.5	6
5	Crude Birth Rate	39.7	31.5
6	No. of children ever born per woman in age group(45 - 49)	7.8	5.2
7	Mean age at marriage	18.2	18.3
8	Child-Woman Ratio(0 -4)	565	575
9	Child-Woman Ratio(5 - 9)	754	735

The level of fertility measures in the district is very high than that of the state. The other fertility related data such as Crude Birth rate and no. of children even born per woman are also high than the state. The CBR 39.7 in the district against the state 31.5 is found very high whereas mean age at marriage is found low in the district than the state and child woman ratio in both age groups are found higher than that of the state than that of the state.

Table - II

District–wise various measures of Fertility and Mean are at marriage, 1991.

Sl. No.	State District	GFR	GMFR	TFR	TMFR	CBR	No. children ever born per ever married woman in age-group 45-49	Mean Age at Marriage of currently married women
1	2	3	4	5	6	7	8	9

21	Karimganj	196	291	7.1	9.3	48.5	4.8	18.2
22	Hailakandi	136	196	4.2	6.4	32.1	5	18.2
23	Cachar	137	190	4.1	6.1	32.6	4.5	18.5

Table-III

Age Specific Marital Fertility level in Assam and Kokrajhar district, 1991 Census

Age group	District : Kokrajhar			State: Assam		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15 – 19	0.108	0.106	0.156	0.151	0.152	0.133
20 – 24	0.156	0.153	0.208	0.214	0.219	0.165
25 – 29	0.146	0.146	0.145	0.183	0.192	0.12
30 – 34	0.109	0.107	0.132	0.143	0.14	0.093
35 – 39	0.095	0.098	0.055	0.087	0.94	0.042
40 – 44	0.059	0.062	0.01	0.049	0.052	0.022
45 – 49	0.044	0.046	0	0.033	0.034	0.025

The Age Specific Marital Fertility levels are found low in the district from 15-19 age group to 30-34 in total and rural whereas it is found higher in all remaining age groups from 35-39 in total. It is exceptionally low in age group 20-24 and 25-29 in the district with a level of 0.156 and 0.146 as against 0.214 and 0.183 respectively in the district but in urban it is high in age group from 15 –19 upto 35-39.

Morality

The morality figures in the district confirm to the general theory of relation between fertility and morality. The morality rates are shown in the following table.

Table-IV
Estimates of Child Morality, 1991 Census

Morality Measures	Kokrajhar district	Assam state
1	2	3
Q. 1. Person	78	92
Male	56	96
Female	75	87
Q. 2. Person	85	101
Male	78	104
Female	93	98

Table-IV
Estimates of Child Morality, 1991 Census

Morality Measures	Kokrajhar district	Assam state
1	2	3
Q. 3. Person	108	104
Male	95	106
Female	120	101
Q. 5. Person	110	116
Male	96	118
Female	114	115

Q. 1. of the above annexure shows the infant morality rate whereas Q. 2, Q. 3 and Q. 5 indicate the size of child morality in age groups below 2, 3 and 5 years respectively. It is seen that the morality rates for infant in Kokrajhar district are found low than the state except in case of female of 3 years. It can therefore, be said that the healthy status in the district is moderately satisfactory.

Annexure-IV : Percentage distribution of migrants by place of birth place of last residence, 1991 and 2001 Census

Migration:

The detail data may be seen below in the following table.

Table - I
Percentage distribution of migrants by place of birth – 1991 Census

State / District	Total migrants			From other districts			From other states			From other country

Compared to the state level totals, the share of migrants from other districts of the state in the total migrants is relatively higher whereas the share of migrants from other countries is 14.6 percent in the district against 15.7 percent in case of all state. Migration from other district reveal that the female immigration is more than male inmigration from other districts but it is more for males in case of inmigration from outside the state.

Table-II

Percentage distribution of migrants by place of birth- 2001 Assam

State/ District	Total migrants			From elsewhere in the district outside the place of enumeration

	4.1	7.7	2.8	2.0	3.8	1.4

From the above table it is seen that migrants from elsewhere in the district out side the place of enumeration consists of 74.9%, of the total migrants. The migrants from other district are 17.1%, 6.0% are from other state and from other countries it is 1.9 percent.

Annexure-V: Brief account of main religions in the district / tahsil as per 1991 and 2001 Census

Religion:

A brief account of religious composition of the population in the district alongwith the state is presented in the following table -

ANNEXURE

Table-I

Main religions in the Kokrajhar district and Assam State – 1991 Census

District / State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
Assam	Total population	22,414,322	100	88.9	11.1
	Hindu	15,047,293	67.1	86.2	13.8
	Muslim	6,373,204	28.4	94.7	5.3
	Christian	744,367	3.3	96	4
	Buddhist	64,008	0.3	93	7
	Jain	20,645	0.1	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8
	Total population	800,659	100	93.7	9.3
Kokrajhar	Hindu	531,477	66.38	91.1	8.9
	Muslim	154,801	19.33	98.4	1.6
	Christian	78,586	9.82	99.5	0.5
	Buddhist	769	0.1	99.9	5.1
	Jain	754	0.09	19.0.	81
	Sikh(Boro)	216	0.03	94.4	5.6

The figures in the above table shows that compared to the state as whole the proportion of Hindus is more in the district. The Muslims who constitute about 28.4 percent of total population at State level but in the district their percentage is 19.9 percent. Christian consists 9.8 percent as against 3.3 percent at State level which is also on lower side. However, Jain, Buddhist and Sikh are negligible in number in the district.

Table-II

Main Religions in the Kokrajhar district and Assam State - 2001 Census

District :-Kokrajhar

District/State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%
1	2	3	4	5	6	7	8
	All Religions	26,655,528	100	23,216,288	87	3,439,240	13

Age not stated	2,150	1,730	7.8	8.4	16.7	15	1.4	0.6	1.4	0

A comparison of the district level figures of marital statusin 1991, with that of the state averages reveals that the percentages of never married male and female and widowed female are higher in the district than the

state averages whereas the percentages for male and female in all other categories are lower in the district than that of the state. The highest percentage of married male and female are seen in the annexure in same age groups in the district as in age group 45-49 and 35-39 of the state respectively.

Table-III

Age, Sex and Marital Status of population in Assam - 2001 Census

A comparison of the district level figures of marital status with that of the state averages reveals that the percentage of never married males and females is slightly higher than the state average. In case of married males and females the percentage is slightly lower than the state average. In case of widowed males and females the percentage is slightly lower than the state percentage. Again in case of divorced /separated males percentage is lower and females is the same with the state percentage. The highest percentage of married males are recorded in the age group of 45-49 and females in the age group of 35-39 in the district being 96.0 percent and 89.6 percent respectively. The corresponding figures in the state level for males and females are recorded in the same age group. Never married males and females being 15.5 and 6.2 percent respectively in the district which is lower than the state percentage of 22.1 and 6.3 percentage respectively.

Annexure- VII - Age, Sex and Education in the district, 1991 and 2001 Census

Education and Literacy rate:

Age-group wise literacy rates for male and female in respect of both at state and district level are presented below in the following table.

Table-1
Age, Sex and Education in Assam, 1991 Census

Education Level	Percentage of Population by age – group and sex

Note:
1. Percentage of literates are to total population.
2. All other percentages are proportion of literate population.

The literacy rates both for male and female in all age groups in the district are found very lower than that of the state. It is seen that the literacy rate is the highest for male and female in the age groups 15-19 and 7-14 respectively. Literacy rate is seen high upto middle level. In other educational levels, literacy rates are found very low in the district.

	0.1	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0

In the above table it is seen that the literacy rates for males and females in all age group are low as compared to the state rates. It is also seen the percentage of male literates in all age group are high as compared to the female rates. Percentage of literates in the age group 15-19 is higher than in all other age groups both for male and female, though it is lower than the state rate. Middle level literacy rate is high in all age group excepting in the age group of 20-49. In the higher educational level it is found to be low excepting graduate and above in the age group 20-49.
