Buddha Stupas at Surya Pahar

The name Shri Surya Pahar came probably from the image of Surya, the God of Sun. Shri Surya Pahar just 13 kms. from Goalpara town is a rostalgic reminder of the misty past that witnessed the flourishing of divergent cultures with myriads of ancient relics like sculptures temple ruins caves votive Stupas, images of Brahmanical Buddhist and Jain affiliation, the Surya Pahar presents a magnificent spectacle. It is famous for its terracotta, wonderful and exquisite pieces of rock cut sculpture depicting deities of Hinduism, Budhism and Jainism. This combination is a rare site not seen elsewhere. Here no less than 25 votive Stupas of different shapes and sizes exquisitely cut out of granite boulders, dot a vast stretch right from the extreme north-western slope of the hill up to one km further south. Historians say the Buddhists possibly flourished here in the first century A.D. and left behind their legacy in the form of Stupas. The Jain and Hindu architecture were contemporary and throve during 8th to 10th century.

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, C.D. Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Shri J. Ghosh Junior Supervisor. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

(P. Hazarika)
Director of Census Operations,
Assam, Guwahati.

		1951	10,192	5,744	4,448	2,399	30.8
		1961	13,692	7,772	5,920	3,500	34.3
		1971	22,035	12,226	9,809	8,343	60.9
		1981	-	-	-	-	-
		1991	52,096	27,067	25,029	30,061	136.4
		2001	66,902	34,545	32,357	14,806	28.4

The Distict Goalpara had 90,482 persons in 1901 of which 84,195 was in rural areas and 6,287 in urban areas. It is seen that decade variation in 1951-61 was only 9.25% where as it jumped to 37.10% in 1951-61 and in the last decade it falls to 23.3%. Similar is the case in rural areas also. In urban the growth rate was very nominal up 1921-31 but after 1931 it had increased considerably. It had gone high to 135.84 in 1971-91 still it is more in 1991-2001 in urban than rural.

The table shows houseless and institutional population in total, rural and urban. In the district there are 38 houseless and 273 institutional households and these households cover 145 and 4,351 persons respectively. The number of the houseless households is nil in urban area and there are 214 institutional households in rural and 59 in urban. The highest number of houseless households is found in Lakhipur tahsil and highest number of institutional households is found in Balijana tahsil.

ANALYTICAL NOTE

ANALYTICAL NOTE ON GOALPARA DISTRICT

(i) History and scope of District Census Handbooks

District Census Handbook is the most valuable publication brought out by the Census organisation for each state. This provides information on some basic demographic and socio-economic characteristics and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being the only informatic source of every district of each state.

The publication of District C ensus Handbook was first initiated during 1951 Census in collaboration with the respective State Governments. In 1951, only few demographic and socio-economic information at village and town level were published in District Census Handbooks along with some Census tables. Since then, it had undergone radical changes during the subsequent decades and has been grown substantively both in its scope and content by incorporating more Census tables and also some basic statistics on land-use-pattern, agriculture, industry etc in 1961. The DCHB of 1961 was considered as unique asset published by the Census organisation. In 1971 Census, further improvements were made by enlisting many more information on villages and towns in the form of Village and Town Directory. It had three parts. The Part- A relates to Village and Town Directory, Part- B contains village and town – wise Primary Census Abstract and Part –C deals with administrative aspect and Census tables based on Pramary Census Abstract etc. The 1981 Census again widened the scope of DCHB to cover more data on literacy, health care etc. In addition to the information covered in 1971, DCHB. It was divided into two parts, the Part A include data on Village and Town Directory and Part B was for Village and Town wise Primary Census Abstract. However this part of the DCHB was not brought to light in Assam as no Census was conducted due to prevalence of disturbed condition in the State. In 1991 Census, the DCHB was divided into two parts. The Part- A divulged the Village and Town Directory data and Part- B presented the data of Primary Census Abstract.

As tradition of the past in the present DCHB also some more information on availability of facilities such as credit societies, banks recreation and cultural institutions, news paper /magazines etc are included Further information on income and expenditure, important commodities manufactured items,exported and imported etc are also included to give a fuller account to the scope of this Directory. Similarly, in Town Directory also, few more information is included.

The process of collection and compilation of these data involved a lot of exercise. At first, revenue circle wise information of each village have been collected by the revenue authorities at district level. These data are compared with 1991 Census figures at district level and after a thorough scrutiny and cross- check, these records are submitted to the Census Directorate. In case of Town Directory, data have been collected directly from the Commissioner of Municipal Corporation and Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 Census at Census Directorate. There after, efforts are made to compare and cross- check with similar data made available from other sources especially data published by various departments of State Government to verify the authenticity and correctness of figures received through Village and Town Directory booklets. Then compilation and computerization of these data have been made according to the instructions of the Registrar General and Census Commissioner India. It has been, therefore, regarded that because of inclusion of various new information and external validation of data so collected, the 2001,DCHB is naturally be a superior publication than that of many publications brought out earlier in this line.It will be a more useful book for all concerns. This endeavour will perhaps, quince the thirst of needy people.

(ii) Brief History of the District

Starting from the origin of the name Goalpara, which has been named after the present Goalpara town the district headquarters there are various versions about the origin of its name. Though these options differ in mere details, but all seems to unanimous to attach the term 'Gwali' or 'goal' to the name of this district. There is a belief that the name Goalpara is perhaps derived from Gwalitippika, which literally means Gwali village i.e., Milkmen's village. Another version is that near the conflunce of Manas river with the Brahmaputra there was an ideal place for grazing cattle. It is believed that many Goals (milkmen) settled on this land with the their cattle and a colony of milkmen popularly known as 'Goaltuli' sprang up. It is said that the name Goalpara is a correct form of the term 'Goaltuli'.

It is doubtful whether at any period of the past, before its annexation by the British the whole of the area now forming the Goalpara district was a separate polity under its own rulers .Its history has to be considered in connection with those of the various states of which from time to time it formed a part. It is believed that it was originally included in the ancient kingdom of Kamrupa mentioned in the Mahabharata and it is also said that it was first conquered by the Paul kings of Bengal. But there are practically no records of such even. It is said that this district subsequently formed a part of Kamata kingdom and in the 15th century it fell within the dominion of the 'Khen' Princess whose capital Kamatapur was over run by the Muslim in 1498 A.D. A few years later it passed into the hand of the Koch kings which in 1580 A.D were bifurcated.In this partition, the region east of the Sankosh river including Goalpara, Kamrup and Darrang was surrendered to RaghuRai, nephew of Naranarayan in the territory lying to west of the river was reserved for Naranarayan's sons. In dispute between their two families, the Mohammedans who had been called by Naranarayan's son for his help conquered Goalpara. For some years war dragged on between the Muslims and the Ahoms. Once Ahoms reoccupied Kajali, peace was concluded fixing the Barnadi on the north and the Asurar Ali on the south of the Brahmaputra as boundary between the Ahoms and Mohammedans. In 1658 A.D Prananarayan, Raja of Koch Behar attacked Goalpara and occupied it. The Mughal Governor retreated to Guwahati. As the Ahoms were advancing to Guwahati he fled by boat to Dhaka. The Ahoms continued their advance to Goalpara and drove back Prananarayan across the Sankosh. Thus Goalpara was seized by the Ahoms who retained it under their control for three years till 1661 A.D. when Mir Jumla, Governor of Bengal invaded Assam. From then onwards Goalpara formed part of the Muslim dominion till it was with rest of Bengal ceded to the British in 1765 A.D. and passed into the possession of the East India company.

(iii) Administrative Set-up

The district underwent several changes in jurisdiction under the British. Initially this was formed a part of the permanently settled district of theRangpur in Bengal. In 1822, this area was separated from Rangpur and along with Garo Hills formed the district of the North and East Rangpur when Assam was ceded to the British in 1826, Goalpara was annexed to the Assam valley division. But, in 1866,Goalpara was separated from the province of Assam and placed under the commissioner of Koch Behar division. In 1869 the Garo hills was formed in to a separate district. Goalpara was finally incorporated in the new province when Assam was created in to a separate administration in 1874. During post– independence period, the jurisdiction of the district has undergone a great change. Two of the Sub- Divisions namely Kokrajhar and Dhubri of the district were taken away from this district in 1983. Thereafter in 1989 her area was again reduced when she lost her North Salmara Sub-division to the newly formed district of Bongaigaon.

Presently the district is bounded on the east by Kamrup, on the north by the district Dhubri, Bongaigaon and Barpeta, on the west by Dhubri and on the South by Meghalaya state.The mighty river Brahmaputra flows across the district.

The Goalpara district has comprised with only sadar sub-division. Goalpara with its headquarters at Goalpara. The district possesses five Revenue Circles with eight Community Development Blocks comprising a total of 837 villagers in all Revenue Circles. The Revenue Circles are 1. Lakhipur, 2. Balijana, 3. Matia, 4. Dudhnoi and 5. Rongjuli. The district occupies three towns i.e.,a town having Municipal Board, a town with Town Committee and a Census town. These are Goalpara, Lakhipur and Kharijapikon respectively.

The district has not gone any change in its jurisdiction during 1991-2001. Neither any area has

carved out from this district nor any area has included in this district from other district.

(iv) Physical Features

The district of Goalpara, with head quarters at Goalpara is established by five revenue circles. It is located in a narrow elongated strip lying between the Brahmaputra and Meghalaya plateau extending longitudinally from 90°07 E to 91°6 E and attitudinally from 25°53 N to 26°13 N (Approx.). The total area of district is 3307.30 Sq.Kms. The rank of district in comparison to other district in term of area in the state is 20.

Topographical, it is a combination of plain and hills while the eastern part of the district is comparatively a virtual plain, the western part is interspersed by number of out flanking spurs of the Meghalaya plateau while conspicuously appears in the form of isolated hills right up to the bank of Brahmaputra. These hills and uplands averaging around 500ft in altitude are the virtual source of forest wealth of the district. The highest point in the district is only 1029 ft located near Andharmua of the Pancharatna hills.

Soil

The soils are composed of recent alluvium overlying the Archaean rock of the plateau. The land near the Brahmputra is subject to floods and is covered by dense grass and reeds. Away from the river the level of the land rises and swamps give way to rice fields .The homesteads of the cultivators are surrounded by dense grass, areaca palms, plantains and bamboos. A good number of beels and submerge areas are seen in the district. The beels are main fishing grounds for the rural population and is source of income too.

Drainage

The whole drainage of the district ultimately finds its way to the Brahmaputra. The Brahmaputra river was also known as Lauhita in the ancient days. The word Lauhita means in Sanskrit "pertaining to red" but it is in all likelihood, just a Sanskritzation of pre Aryan, Sino-Tibetan name.Mythology connects to the origin of the river with sins of Parshuram who washed to his bloody stains of matricide and regained his sainthood.

A few perennial and semi perennial river flow from the southern hills to the Brahmaputra through the district drain out the water to the Brahmaputra.The main tributaries of the river Brahmaputra in Goalpara district are the Manas, Champawati, Saralbhanga, Sankosh, Gadadhar, Dudhkumar in north bank and in south bank its tributaries are the Jinjiram, Kaladari, Dudhnoi, Krishnai and Jinari or Balbola. Among the important rivers of the district, on the south bank of the Brahmaputra, which carry the drainage of the Garo Hills to the mighty river, mention may be made of the Karnai, Phulnai, Kalpani, Dudhnai with its tributary the Krishnai and Jinary.

Lakes,Beels & Tanks

There are a large number of beels in the district. During the rainy season beels spreads to such an extent that they merge in to each other and form a vast picturesque sheet of water.These are the storage houses of fishes

Climate & Rainfall

The highest maximum temperature recorded in the district was 41°4 C and the lowest minimum temperature was 6°1C in the district.The day temperatures in April and May are nearly the same as in the monsoon months. The year may be divided in to four seasons. The cold season is for December to January. The next three months may be termed the season of thunderstorms .The southwest monsoon season is from June to September, October and November constitute the post monsoon season. The average annual rainfall in the district is 1591.5 mm. The rainfall in May to August constitutes 69% of the annual rainfall. The average monthly rainfall was highest in May 1998 being 373.4 mm. In the district followed by July having 348.4 mm. The area is highly humid through out the year. During the months January to April, the relative humidity is comparatively less. Skies are heavily clouded in the monsoon season. Winds are generally light. Some of cyclonic storms and depressions from the Bay of Bengal in the monsoon and post monsoon seasons that move towards North Bengal affect the district. Fog occurs in the winter months on a few days.

Mineral wealth

A few occurrences have been reported from various parts of the district. Most of them however, appear to be of little economic importance and in respect of some, their potentiality remains to be fully assessed.The various rocks gneisses, granites, amphibolites etc.of the Archaean complex can be used as building stones and road material. Building materials are also available from the piedment

deposits and river beds near the foot hills. Cement mortal sand of good quality is found in all the river channels. Alluvial clays occur as extensive deposits in area in the older and newer alluvial and is suitable for manufacture of bricks and tiles. The clays are generally greyish in colour and quite plastic in nature. Pegmatite veins containing feldspar occur in biotitic gneiss near Pancharatna. Sulphide minerals occur near Pancharatna also.

Flora and Fauna

Evergreen and semi evergreen forests are found in the district which consist of several types of trees. These are mainly Sal, Kydia, Calycina, Udal, Sida, Bombax, Bahèra. The common herbs and shrubs are ageratun conyzoides, species of curcuma, carex beacrispa etc. Besides, there are grasslands having some kinds of grasses. The grassland is subjected to fire in the summer season.

Wild animals mostly represented by elephants, rhinoceros, bisons, buffaloes, tigers, leopards, bears, wild pigs and deer in the past. But at present most of above varities of animal are disappeared from the district. B.C. Allen remark – "wild animals used at one time to the numerous, but they are rapidly decreasing in numbers". Various winds of colorful land birds, water birds and marsh birds are seen in this district. Birds include wild geese, duck, snipe, jungle fowl, peafowl, pelicans, various kinds of cranes, paddy birds etc. Among various birds which are associated in our daily life are crows, jungle crows (Dhora kauri), sparrows, salika, balimahi, etc. Water birds of various kinds of both indigenous and migratory habits are also seen in beels. The Storks or Bortokolas and Bogali are seen in plenty in all beels. Tortoises of different kinds are found in the beels and rivers of the district. They come to the sandy shore to lay eggs. Some kinds of snakes are also found in the district. Frogs and toads are found equally at home in both land and water is found in every part of the district. Fishes of different kind big and small are generally found in beels and rivers of the district .The bigger fishes are Rou, Barali, Cheetal, Bahu, Kaliajara, Bhakua, etc. The small fishes are Puthi, Singara, garoi, Khaliha, etc.

Floods and Famines

As in other plains districts of Assam, floods are almost an annual phenomenon in Goalpara district. The principal cause of floods is the rising of the Brahmaputra assisted by the contributions of its tributaries and heavy rainfall over low-lying tracts. The incidence of floods and erosion is rooted in the typical physiographical feature and meteorological conditions obtainining in this part. The river Brahmaputra dissects the valley and receives water from the tributaries. The heavy water and silt discharges occurring in the hilly region during the peak monsoon period find their way through streams and rivuletes in excessive spilling on the bank of the rivers and their tributaries and consequent water logging in the hill areas gives further momentum to the peak discharges and contributes toward aggravation of the flood situation. The devastation caused in Goalpara district by the floods of 1954 and 1962 in which thousands of villages were inundated, crop fields spoiled and low lying areas of Goalpara town submerged was beyond imagination. Erosion resulted loss of land and houses to several families of the district. Five successive waves of floods in 1974 brought untold misery over an extensive areas of the district. Although floods affected all the plains districts of Assam, its impact was more severe in the district of Goalpara and Kamrup. A major portion of crop was destroyed, thousands of houses damaged and several domestic animals were wasted away.

A concerted afford is made by the district and sub-divisional authorities in conjunction with several departments to mitigate the miseries of the flood affected people as and when the flood occurs. Most of the main departments of the Government get involved in combating floods and their after-math. Prompt relief measures afforded by the Government now a days to mitigate the hardships of the flood affected people. The relief personals visit the flood affected villages and distributed medicine, food grains, cloth, pulses, salt, mustard oil and also fodder for the cattle.

The Agriculture Department distributes seeds or seedlings to the affected farmers and also provides agricultural loans. The Government has made the affected farmers free from payment of land revenue and also issues various grants for repairing of educational institutions, roads and bridges.

Char Area

The Char lands are those lands, which are generally formed during the flood by the might river Brahmaputra by depositing sand in the riverside areas and in the bank of the river itself. The land of these areas become high and makes suitable for habitation. People coming from different places start to reside in these areas and formed the villages in Char. But still these villages are not free from flood and its menace. During the flood people of these

areas are shifted to some other areas and after flood they come back to their occupied lands.

Goalpara district has as many as 144 Char villages. The people of Muslim community mostly occupy these villages. 153,408 souls are residing the above villages. The people are mostly illiterates. Only 9.2% people are literates. About 55% people are living below poverty line in these villages. Total 11623.5 hectares areas are covered by 144 villagees in Goalpara district. Out of these areas 8131.4 hectares are cultivable land. The economic activities of the people are generally cultivation and fishing. The people of all villages are using river water as their drinking water during flood season. But some of the villages have hand-pump tube wells. from. The villages are not connected by roadway. The country boats are used as their only means of communication. During winter season they travel on foot and come to nearest towns. The medical Sub-Centres are in some villages. There are lower primary schools and M.E School in a few villages. Only one village has a High School in the entire char villages of the district.

Tenancy

The Goalpara Tenancy Act, 1929 is the landmark in the history of land reform in Assam. It governed the relations between the landlord and tenant in the district This Act was in force even after abolition of the Zamindary system in 1956-57 and was amended in 1970 to include new development in the concept of tenancy and was finally repeated in 1974 when the Assam (Temporarily Settled Areas) Tenancy Act, 1971 was extended to the acquired Zamindary estate of the district by the Assam Land Holdings (Adoption of Relationship under the Assam Land and Revenue Regulation Act 1886 in the Acquired Permanently Settled Estate) Act,1971.The Assam Temporarily Settled Areas Tenancy Act,1971 is now in force in Goalpara. The main provisions act is as follows:

1. Share Croppers are treated as tenants.
2. Right of occupancy accures on occupation for three years as against twelve years prescribed in the earlier Act.
3. The Government has been given the power to acquire the right of ownership and the intermediary rights in favour of occupancy and non-occupancy tenants. Till the government do so, a right has been offered to the tenants cultivating their own lands to acquire, such right by paying the compensation.
4. Illegally ejected tenants will be restored possession through the revenue officers.
5. A limited rights to mortgage the land by non-occupancy tenants to obtain agricultural loan from financial institutions is also provided. The occupancy tenants have been allowed permanent heritable and transferable right of the land of his holding.

To implement the provisions of this act a crash programme for preparation of tenants records-of-rights has been taken up in Assam including Goalpara.

Since independence, the State Government of Assam has enacted several land reform legislations, which are now in force. These are:

a) The Assam Land (Requisitions and Acquisition) Act, 1948(Assam) Act xxv of 1948.

b) The Assam Assessment of Revenue Free Waste Land-Grant Act, 1948 (Assam Act XXIV of 1948, and amended in 1949).

c) The Assam Management of Estates Act, 1949 (Assam Act XVII of 1949).

d) The Assam State Acquisition of Zamindaries Act, 1951(Assam Act XVII of 1951) and its amendment in 1953, 1954 and 1955.

e) The Assam Fixation of Ceiling on Land Holding Act, 1956(Assam Act I of 1957)

f) The Assam State Acquisition of Lands belonging to Religious or Charitable Institution of Public Nature Act, 1959 (Assam Act IX OF 1961)

g) The Assam Gramdan Act, 1961 (Assam Act of 1962).

The Ceiling Act, 1956 was amended again in 1970 where by the celing limit of land of a person was further reduced from 150 bighas to 75 bighas and also specifically mentioned the celing limit of land for tea gardens. Moreover, the Assam fixation of Celing on Land Holdings (Amendment) Ordinance, 1976 (Ordinance/ of 1976) was promulgated and came in force from May 3, 1976.

Land and Land use pattern

Agriculture is the main occupation of the people of the district. The area of the Government waste land was very large but with the inflow of immigrants, a large area of the virgin soil has been upturned. At the same time a large area of waste land such as char area has been taken up for habitation.

TABLE-A
LAND-USE-PATTERN IN GOALPARA DISTRICT
(1997-98) (PROVISIONAL)

Sl. No.	Classification of land	Area in hectares
1	2	3
1	Total geographical area	182,400
2	Forest area	36,602
3	Land not available for cultivation	54,595
	a) Land put to non Agricultural use	21,776
	b) Barren and uncultured land	32,819
4	Other cultivated land excluding fallow land	11,734
	a) Permanent pastures and other grazing	3,576
	b) Land under misc trees groves etc (not including net area)	7,156
	c) Cultivable waste land	1,002
5	Fallow land	1,771
	a) Fallow other than current fallow	910
	b) Current fallow	861
6	Net area sown	79,560
7	Total cropped area	79,560
8	Area sown more than once	28,967

MAJOR CHARACTERISTICS OF THE DISTRICT

AGRICULTURE AND PLANTATION

Soil:

The soil of Goalpara district is of alluvial origin. The soils vary from sands to loams .It consists of sand and clay in varying propositions ranging from poor sand near the Brahmaputra to stif clay which is unfit for cultivation. The agriculture is the chief occupation of the people of the district.

Crops:

The staple food of this district is rice. The other important crops are mustard, pulse, and wheat. Jute is largely grown for exports. Sugarcane is not much in favour and area under tea is insignificant compared to districts in Upper Assam. A little cotton is also grown on the hill areas.

Rice:

Lahi rice is grown in higher fields which is an important production of the district. The Joha rice is the finest variety of rice commonly grown in the district. Baradhan is also grown particularly to make chira & pitha (cake). Ahu is another variety of rice grown in the district. This type of rice is harvested in the middle of July and hence it is liable to be destroyed by flood water.

Wheat:

Wheat is also gaining population and is supplementing rice in diet. Wheat is mostly cultivated as a Rabi crop. The varieties are Sonalika and Kalyan Sona.

Rape and Mustard:

Mustard is often grown along with Ahu rice. Sowing is done about the end of October and the plant is ready to be pulled from field in mid January.

Pulses:

Mati kalai is the chief variety of pulses grown in the district. Masur, Matar and Mug are also grown in the area. Arhar is also another pulse grown in the district.

TABLE-B
AREA, PRODUCTION, AND AVERAGE YIELD OF IMPORTANT CROPS IN GOALPARA DISTRICT FOR THE YEAR 1998-99 (AS PER FINAL FORECAST)

Sl No	Type of crop	Area under cultivation (Hectares)	Production (Tonnes)	Average yield kg per hectares
1	2	3	4	5
A.	Cereals

Directorate of Agriculture, Govt. of Assam.

Flood, rainfall, textural peculiarities or the soil etc. are the factors upon which production of crops largely depends in the district.

IRRIGATION

In Goalpara the month May, June and July are the wettest period of the year and these account for more than 60% of the total annual rainfall. The cultivators depend largely on rainwater. Agriculture suffers loss in year of excessive rains due to floods and fails in years of drought. In times of drought people are compelled to irrigate their fields by digging canals from various streams. Indigenous way of irrigation is still prevailing in the district. The channels and ponds are constructed to water the fields. Some minor irrigation projects are installed in the district by constructing bunds across the streams and rivulets, drainage channels and slit channels to obtain slit deposits in low lying areas. Lift irrigation with electric pump has also been used in some parts of the district .The riverine areas of the district are subjected to flood. Embankments have been constructed on an extensive scale only from the late fifties, by the Government. The Department of Irrigation has also undertaken some irrigation works to provide water.

TABLE-C
IRRIGATION POTENTIAL UTILIZED AND TARGETS AND ACHIEVEMENTS OF ADDITIONAL POTENTIAL CREATED IN GOALPARA DISTRICT.

Sl. No.	Particular	Land area in hectares
1	2	3
1	Irrigation potential utilized during 1997-78	1,327
	a) During kharif	1,009
	b) During Rabi and pre kharif	318
2	Irrigation potential created upto 31/3/99	11,474
	a) Minor	11,474
	b) Major and Medium	0
3	Targets and for additional irrigation potential created During 1998-99	90
	a) Minor irrigation	90
	b) Major and medium irrigation	0

Horticultural crops:

An important garden crop of the district is the plantain known as 'Kal' in Assam. Various types of bananas are also grown in the district. These are Cheni Champa, Mallbhog, Athia, Purakal, Monohar, Jahji, etc. Purakal is used as vegetables. It is used in curry. The banana tree is most important because the whole plant from leaf to root is used for different purposes. Mangoes, jackfruits, lemons, arecanut and coconuts are also very common production of the district. Various types of vegetables are grown in the entire district. Sugarcane also grown in certain parts of the district. The Agriculture Department and various other agencies have constantly helping all farmers of the district by producing necessary improved inputs, finance, technical-now-how, medicine etc. in time for the development of agriculture. The Agricultural Farming Corporation was also set up in the district to ensure management of land and its proper use by the farmers.

TABLE-D
AREA, PRODUCTION AND AVERAGE YIELD OF HORTICULTURAL CROPS IN GOALPARA DISTRICT (1998-99) (FINAL FOR CAST)

Sl.No	Type of Crops	Area under cultivation (Hectares)	Production (Tonnes)	Average yield (kg)
1	2	3	4	5
1	Banana	1,585	24,515	15,467
2	Papaya	150	2,295	15,300
3	Orange	320	3,170	9,905
4	Pine apple	265	2,900	10,944
5	Areca nut	2,598	1422*	175(a)
6	Coconut	390	3362**	55(a)

Note. -
* Production of Areca nut in terms of dry cured nuts
** Production of coconuts is in thousand and numbers, but not in tonnes

a) Average yield of Arecanut and coconut in nuts per bearing trees.

ANIMAL HUSBANDRY AND VETERINARY

Livestock abound in Goalpara. Cattle and goats are the main animals for the most of the households, of the district. Moreover buffalos, sheep, horses, pig and ducks are found in the district. People generally graze their animals on the rice fields after harvest of crops. In the night, the cattle are kept in sheds by the owners and give them paddy straw for food which are kept in stock in the courtyard. Besides, there are village grazing reserves where the villagers can graze their animals.

For all round development of livestock, emphasis has been given on the cultivation of fodder crops to provide them with nutritious diet. Roots and seeds of improved grasses are freely distributed to the farmers from the Government farms. The Department of Animal Husbandry and Veterinary has been constantly helping the farmers for their animals. In order to improve the breed cattle, measures have been adopted by the above department. There is a poultry farm at Goalpara town established in 1965-66. Contagious and infectious diseases are also prevalent in the district. To protect animals from various diseases preventive measures are taken by the department. In Goalpara district, there are one district level Veterinary hospital, 14 dispensaries, one mobile dispensary, 8 block dispensaries, one rural artificial insemination centre, 15 stockman centres, 2 key village centres, one linestock farm and one poultry and duck farm in 1996-97.

TABLE-E
LIVESTOCK AND POULTRY IN GOALPARA DISTRICT ON 1997

Sl. No.	Livestock and poultry	Nos
1	2	3
1	Cattle	254,665
2	Buffaloes	8,183
3	Sheep	2,444
4	Goats	79,337
5	Pigs	18,369
6	Horses	468
7	Fowls	466,648
8	Ducks	149,179

FISHERIES

Pisciculture is becoming popular among all section of the people day by day irrespective of cast and creed. Fisheries in Goalpara are of various types. These are River, Beel, Swamp, Forest derelict and semi Derelict, Pond and Tank fisheries. Beel and River fisheries can be either registered or unregistered.

To develop fisheries in the district a Fish Seed and Farming Centre was set up. Different measures have been adopted to increase production of fish. Assistance to pisciculturists for reclamation and inputs, assistance to riverine tribal people and assistance for fish culture and reclamation of dereliet water bodies were provided. Training in fisheries was also organised in different places of the district.

In the district, there are 17 and 13 registered beels and registered river fisheries respectively. As recorded in the Statistical Hand book Assam, 2000, in Goalpara, the target of fish seed production was 5.00 million nos. in 1998-99 but the same was achieved 4.48 million nos. Again 5900 matric tonnes fish was targetted to produce but it was achieved 5635.25 matric tonnes in the same period.

FORESTRY

Forestry plays a significant role in the economy of the district. A large position of the people of the district depends on forest for firewood to cook their day-to-day meals and timber, bamboo, ekra, thatch etc. to build their dwelling houses. The forests of the district are the chief raw materials supplier in saw mills, plywood and match factories .The forests are used for making rail sleeper, carriage construction, boat making, packing boxes, electric boxes etc. The district has abundant raw material for Paper Pulp, Ray on Pulp and Paper Board Industries.

In Goalpara district, there are 24255.3 hectares reserved forest and 1259.9 hectares proper reserved forest. Hence the total forest comes to 36915.3 hectares in 31.03.1999 as recorded in the Statistical Handbook, Assam, 2000.

INDUSTRIES

Principal manufactures of Goalpara District prevalent during early British period were brass and iron utensils and instruments, gold, silver and copper ornaments, knitting, sewing, cloth wearing, oil pressing, carpentry and pottery.

No large scale of heavy industry has so far been set up in Goalpara district. There are 1314 small-scale registered industries in Goalpara district in 1998.

TEA INDUSTRY :

The history of the tea industry in Assam dates back to the year 1826, when indigenous tea plants growing in the plains of Assam came to the notice of the East India Company. The cultivation of this plant was first introduced in 1830 by the East India Company. It is mentioned in the Economic Development of Assam by P.C. Goswami that a tea garden was started by the Govt. in 1833 in the Lakhimpur district. On 1835 a few indigenous plants were taken from the forest at "Ningroo" bordering the Singphoe country and grown at "Koondilmukh" at Sadiya. A company was found in 1839 known as the Assam Company. This was the first Company in India to undertake the commercial production of tea and was the direct successor of the East India Company. The headquarters of this Company was formed at Nazira and remained till the shifting to Calcutta in 1956. The Government garden was carried from 1840 to 1849. But due to certain difficulties, the garden was sold to a China man named "Among". This China man failed to improve the garden. In 1851, through the instrumentality of Colonel Hannay,he contributed much to the development of tea cultivation in the part of Upper Assam. The early sixties of 19th century i.e. from 1859 to 1860 was a period of steady boom. After this period the tea industry received a great setback. But this trend was checked by 1878. In 1881, the North India Tea Estate Owners formed the Indian Tea Association. The industry grew continuously till 1890 and thereafter it underwent through a depreciation for a short period but soon recovered from this state of affairs. The major improvements have been made in the yield of tea, in the grouping of gardens under a limited number of Companies, in the progressive mechanization and rationalization of production and in increasing their efficiency of productivity of labour.

The Toklai Reserve Station was set up at Jorhat in 1911 with a view to carrying on research on cultivation and manufacture of tea in Assam. This has been very useful in increase of yield rate of tea. In the year 1932-33, it is again met with severe crisis due to depression and over production of tea. This condition was tackled by enacting the Indian Tea Control Act, 1933 and by 1952 it reached unprecedented prosperity. Recently the Tokolai Experimental centre had developed a machine known as Rotorvane. It is a continuous processing machine for use in a continuous system of manufacture.

The Guwahati Tea Auction Centre :

Marketing of tea has always been a great problem for the industrialists. Before opening of tea Auction Centre, at Guwahati, Tea Auction Centre in Calcutta arranged for sale of Assam Tea. Tea Auction Centre, third of its kind in India started functioning at Guwahati from Sept., 1970.

Tea which is subject to direct taxation by way of excise duty, export duty and a user under Tea Act, the industry makes substantial direct contribution to Central Revenues. Besides these taxes, tea industry is also subject to central income tax, supper tax (corporation) and Agricultural income tax. Income tax along with sales tax levied upon it inflates the income of the State Goverment to a great extent.

Tea is the mainstay of the plywood industry. Tea grown in different parts of Assam is packed in the garden factories in plywood chests for dispatch. Tea estates require huge quantity of fertilizers for healthy growth of tea. Thus it gives a strong support to fertilizer industry also.

The labour force that engaged in the industry is bought mainly from Bihar, Madhya Pradesh, Orissa and Madras. The industry provides ample scope for employment from higher grade to lower grade workers. The tea estate in Assam is in different geographical size. It varies from small gardens to large tea estates. The administration is also generally same from each other. The responsibility of tea estate is vested on the Manager. He is the head of the estate. He is assisted by 2/3 Assistant Manager. The Assistant Managers are given separate responsibility such as production and supervision of garden and labourers, financial affairs, stock and factory etc. Each garden has a office in which there is a head clerk called "Borobabu" and he is assisted by some clerks and peon. Social services provided to its employees by qualified Medical Officer and staff of the hospital. Most of gardens have their ambulances to carry serious patient for better treatment to outside the gardens.

A major part is playing in the economy of the State by tea. It provides ample employment to the people of the State. The State has as many as 2,472 tea gardens with their factories. In addition to large gardens, there are 659 small growers with a registered area of about 2281.63 hectares as on 31.10.1999.

Tea is also considered one of the most important items of economy of Goalpara district and it provides employment and livelihood to a considerable number of the people of the district. The process of cultivation and manufacturing of tea in Goalpara district is the same as practiced in other districts of Assam. Out of 2,472 tea gardens in Assam 13 are in Goalpara district as on 1996. A total of 3,112 hectares of land are under tea cultivation in the district in 1998. In the same year 6046 thousand kgs of tea were produced in the district at an average yield of 1,943 kgs per hectares land. There are also a few number of small tea gardens in the district.

HANDLOOM AND TEXTILE

Cloth was woven from the muga, eri and silk but the cloth woven in Goalpara was coarser in texture. Most of the coarser cloth was manufactured from eri. Handloom is an important cottage industry that flourished in the district from ancient times. Till to-day, it continues to be an important occupation, especially of the women folk. Raw materials used by weavers are mainly cotton and eri threads. The yarn used is mostly purchased from local markets. Their artistic products have a good demand in and outside the state .To train the weavers on modernized looms, 4 Weavers Training Centres were set up in the district. Besides, 3 Weavers Extension Units and one Handloom Production Centre were set up. To help individual weavers, 93 Co-operative Societies were started with more than 5 thousand members.

SERICULTURE

Sericulture is another cottage industry of the district. It is used during the agricultural off-season as a subsidiary occupation. Silk industry had its period of crisis during the British rule. But after independence, the Department of Sericulture and Weaving came into operation and provided a fresh lease of life to this industry. The Central Silk Board of India has also been of great assistance to the state by providing finance for development of sericulture.

POTTERY

Pottery has lost much of its past glory and is now confined only to making common earthen wares such as jar and pitchers. To encourage the village potters, the State Khadi and Village Industries Board, Assam has provided various assistances. The potters have switched over the production of glazed pottery wares, and bricks and tiles. Brass and bell-metal industry, blacksmithy, gold and silver smithy, cane and bamboo works are some other important industries of the district. Various schemes have been taken up by the State Khadi and Village Industries Board Assam to switch over from the traditional items to modern pottery by the potters.

TRADE AND COMMERCE

In ancient time good overland communication system was not developed and the scope for external trade was very much limited. But after lapse of time, the situation has gradually improved. There has been expansion of road communication and a new railway line is also started from Guwahati to Goalpara town.

A considerable amount of retail business was done in the local market. The greater part of the total trade still enters and leaves by waterway. Jute, paddy, rice, timber, oilseeds, cotton, vegetables are the important products dealt in and exported in and outside the district. The hats are important centres where a great deal of retail business is transacted. These hats are held either weekly or biweekly on particular day/days. Middle-men and business-men purchase the village products and sell to the wholesale merchants. Goalpara town is the principal centre of trade and commerce in the district.

BANKING

In 1879, W.W. Hunter observed, "There are no banking establishments in Goalpara, loans are conducted by shopkeepers who combine their regular trade with money lending and also by the wealthy land holder": But with the change of time the relative position of the credit sources changed to a great extent. The Co-Operative Societies have come in a big way to meet credit requirement in rural sector. Some of the Commercial Banks after bank nationalization have opened their branches in the rural areas of Goalpara. There is no Join Stock Commercial Bank incorporated in Goalpara. There are some branch offices of Commercial Scheduled Banks in Goalpara. The State Bank of India opened its banking office at Goalpara on 29.08.56. The functioning of various banks in Goalpara district has improved rapidly now-a-days. However, even now the money-lenders play a vital role as a source of credit for rural people.Unless a liberal credit and loan system is introduced, the possobility to wipe out these money lenders appears to be very much hazy.

TABLE-F

Position of Deposits and Credits of scheduled Commercial Banks and Regional Rural Banks on December 1999 in Goalpara district.

Sl.No.	Type of Bank	No of offices	(Rs.in lakhs) Deposit	(Rs. in lakhs) Credit
1	2	3	4	5
1	Scheduled Commercial Banks	35	1,086	4,157
2	Regional Rural Banks	12	2,693	871
	Total	47	13,560	5,028

TRANSPORT AND COMMUNICATION

The transport system of the district is quite poor in the past. It is connected by railway very recently. Its only communication with the outside was road and river. Two National Highways originated from the district are the N.H-37 and the N.H-51. The N.H-37 starts from Pancharatna and connects Goalpara, the district headquarters with Guwahati, the capital of the state. But now it is connected by rail also. A State Highway runs from Dudhnai to Lakhipur via Matia and Goalpara, the district headquarters. According to the Statistical Hand book, Assam, 2000 the district has a total road length 1,034 kilometres out of which 250 kms is surfaced and 784 kms is unsurfaced in 1998-99. Out of total road length of 1034kms, 92kms is National Highway, 94kms is State Highway and 848 kms is other P.W.D roads.

TABLE-G

Length of P.W.D. Roads per lakh of population and per thousand km of Geographical area in Goalpara for the year 1997-98

District	Road length per lakh of population (in km)	Road length per '00' square. Km
1	2	3
Goalpara	155	57

Source: Statistical Hand book, Assam, 2000

There are two important ferry services in the Brahmputra between Pancharatna and Jogighopa and between Baghbar of Barpeta district and Goalpara. In 1998-99 there were 297 buses, 551 trucks, 54 mini buses, 159 auto rickshaws, 3,559 two wheelers, 435 cars, 53 jeeps and 69 Government vehicles. The number of vehicles registered in the district during the year is 25 trucks, 8 buses and 15 minibuses only.

The first route on which state transport buses enrouted in Goalpara was the South Trunk Road from Guwahati to Goalpara over a distance of 150kms. Operation of State buses was gradually extended to other routes of the district. The State Transport Organization was converted to Corporation and it has provided good service to travelling public. But now the plying of Corporation buses become very limited and in its place private buses run from Guwahati to Goalpara off and on. The numbers of person injured and killed in road accident in 1999 in Goalpara as recorded in the Statistical Hand book, Assam, 2000 were 31 and 20 respectively and number of road accident registered by the police in the same year was 47 only.

ELECTRICITY AND POWER

The development of agriculture as well as industry cannot be thought of without the availability of power. In addition to it, the use of electricity has become indispensable in the modern times. The State Electricity Board took over power supply in Goalpara district since 1957 by phases. A beginning was made by starting Thermal Station in Goalpara town. In 1971 another station with a 25k.w diesel set was set up at Mankachar. At present Board supplies power from Chandrapur umium-umtra station.

The Statistical Hand book, Assam, 2000 records the numbers of villages electrified in Goalpara district out of its total villages 837 as 706 up to March 1998 and after lapse of one year its number has not increased ever in March 1999. However, 84 % villages of the district have been provided with electricity facilities.

LOCAL SELF GOVERNMENT

The present system of local self-government is a legacy of the British Administration and its origin may be traced to the principle of local taxation embodied in Regulation 13 of 1813. However, some form of local self-government were in existence like Namghar in pre- British period. It was a village court, trials of crimes and disputes were held in.

The Assam Panchayat Act 1959 which came into force in 1960, abolished the local Boards and

under this Act a three-tier Panchayat Raj system was introduced in Assam. But the Panchayat Act 1972 which was operated in May, 1973 changed over to two tier system of panchayat and the intermediary Anchalik Panchayat have been abolished.

As mentioned in the Statistical Handbook, Assam, 2000, there are 81 Gaon Panchayats and one Mahkuma Parishad in urban area of Goalpara up to 31st March 2000. The urban areas are classified as Municipal Board, Town committee and Municipal Corporation. In Goalpara district, there is one Municipal Board at Goalpara town itself and one Town Committee for Lakhipur town. There is one Chairman and Vice Chairman in Municipality Board and the Chairman is the head of administration. He is entrusted with implementation of the schemes taken up by the Board. It has various sources of revenue. It levies various taxes on holdings, rickshaws, carts, cycle, stalls, market etc.

SOCIAL LIFE

People:

The majority of the people by religion are Hindu. The Hindus are divided into three principal sects viz, Saktism, Saivism and Vaishnavism. The saktos are followers of sakti or worshippers of the reproductive power as manifested in the female.The saktism was wide spread in this district, is evidence by the existence of many Sakti temples of the Durga. Saivism is the counter part of Saktism and is concerned with the worship of the procreative energy as manifested in the male that is Siva. There are Siva temples in the district and festivals connected with Siva are observed by Saivaites. However, the people of other sects also observe Siva connected festivals in the district.

The majority of the people of the district are Vaisnavitees. Vaisnavism relates to the worship of Vishnu. The worship of Vishnu was prevalent in Assam from early times. The leader of the Vaisnava renaissance in Assam was Sankardeva who was assisted by many renowned disciples, the chief among whom was Madhavdeva. Sankardeva was the founder of Neo-Vaisnavism in Assam. He did away the Worship of images. His main dharm is "Eka-Sara Nama-Dharma" or the religion of the worship of only one god Vishnu through recitation of his name, in hymns and prayers. His teachings were based mainly on the Bhagvata-Purana, it is therefore known as the Bhagavatia Dharma.

The Muslim Community occupies a major share in the total population of the district. There has been a large influx of Bangladeshi Muslims to this district for which the Muslims population in the district increases rapidly during last few decades. Almost all the Muslims in Goalpara district are of the Sunni sect.

The Christians occupies only a very small share in the total population of the district in the past. However their number grows considerably during last few decades due to conversion of the local tribal people through the efforts of Christian Missionaries. The other religious people of the district possesses a negligible place in the district by population.

The different castes which are strongly represented in the Goalpara district are Brahmins, Ganaks or Graha-Bipras, Kayasthas, kalitas, Rajbangshis or Koches, Kacharis, Meches, Rabhas, Jugis, Katanis etc. The fishermen known as Nadiyals or Kaibartta have a sufficient number in the district. There are various professional castes. These are Sonaris (goldsmith), Bania (traders), Tantis (weavers), Dhobas (washermen), Napits (barbers), Kumars (potters), Sutradhars or Sutars (carpenters) etc.

Among the Hindus, the property is generally held by the head of the family who manages it as its custodian. After the death of the father, the sons and daughters inherit the property. The join family system was common in the past. But now-a-days, it is loosing it hold. Among the Assamese Hindus, marriage by negotiation is common. The caste distinction is not rigid as it was a few decades ago, nevertheless the inter caste marriage is not very frequent among them. Although permitted by law remarriage of widow is not looked upon.

Total prohibition of opium, ganja and bhang(hemp) for oral use has been in force in the district. Prohibition of liquor was also in force in this district from 1960. Drinking was very common among tribal people. The labourers, tribal people and other used to drink country made liquor.

In rural family, every household has Charaghar (Reception house) Barghar (living house), Bharal ghar (store house), Gohain ghar (worship house), Gohali ghar (cow shed). These houses were made of thatch, bamboo and mud. At present who can afford have constructed their houses on modern line using C.I sheet, brick and cement.

Male dress includes Dhoti, Chadar, Shirts, Kamij, Trousers and Coats. Female dress consists of Riha, Mekhela, Chadder, Sari and Blouse and ornaments include Necklace, Earings, Bracelets, Keru, Mani, Kharu, Dugdugi, Benu, Chain, Bala etc.

Colorful festivals observed in the district enliven the lives of the people. The biggest festival of the year is the Durga puja. Sivaratri is another festival of the district. Doljatra (Holi / phakuwa) is also observed in the district. Special festivals of the Assamese are the three Bihus - Rongali Bihu, Bhogali Bihu and Kangali Bihu (Kati Bihu) which are performed in the district with great merriment.

Muslims are also observed Id-Uz- zuha, Muharram, Fatiha-i-duazdaham and Id-ul-fiter. The Religious festivals of the Kacharis are different from festivals of Hindus. Kherai puja, Habajandi, Natpuja, Bagrumba etc are some of their traditional festivals. Deodhani dance is the common feature of the Kherai puja.

The Namghar is the community prayer hall of the villagers. In each Namghar daily prayer called Nam Kirtan is held in the morning and evening.

Most of the indigenous games played in the district in the past have now been replaced by western games and sports. Football competitions are arranged in the town and semi-urban centre. Cricket and football are very popular among the youths of the district. Indoor games like carroms, cards, chess and table tennis are played in the clubs of the district.

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room

available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a

building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the

exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below:

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo
9 Kaibartta
10 Lalbagi
11 Mahara
12 Methar,Bhangi
13 Muchi, Rishi
14 Namasudra
15 Patni
16 Sutradhar

Scheduled Tribes :

I. In the autonomous district :

1 Chakma
2 Dimasa,Kachari
3 Garo

4 Hajong

5 Hmar

6 Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam

7 Any Kuki Tribes Including:

(i) Biate,Biet

(ii) Changsan

(iii) Chongloi

(iv) Doungel

(v) Gamalhou

(vi) Gangte

(vii) Guite

(viii) Hanneng

(ix) Haokip, Haupit

(x) Haolai

(xi) Hengna

(xii) Hongsungh

(xiii) Hrangkhwal, Rangkhol

(xiv) Jongbe

(xv) Khawchung

(xvi) Khawathlang, Khotalong

(xvii) Khelma

(xviii) Kholhou

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both

read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by

members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are men-

tioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 100000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants.

Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/ employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a

place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 822,035 in 2001 Census. Male comprises 420,251 while female consists of 401,784. Out of the total population of the district, 755,133 fall under rural and 66,902 are under urban areas of the district. In rural areas , 385,706 and 369,427 are males and female respectively. Accordingly34,545 and 32,357are male and female respectively in urban of the district. The percentage of urban population in the district Goalpara is 8.1of which Male is 8.2 and female is 8.1. The district is a rural base place of which 92 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +23.0 which is higher than the state rate. In the district, there are as many as 3 towns of which 1 town is Census Town.Goalpara town is only town with Municipal Board and one is of Town Committee status. The density of the district is 451 persons per sq. kms. which is much higher than the state density (340). The sex ratio in the district is 956 as against 935 in the State. Out of total population of the district, 33.3% is total workers of which 48.2% and 17.7% are male and female respectively. The percentage of non-workers is 66.7 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categorised are 36.9 %, 18.3%, 4.7% and 40.1% respectively.

The literacy rate is 58.0% in the district of which 64.9% is for males and 50.9% is for females. The district literacy rate is below the state literacy rate 63.3%.

The district has no any kind of University in its place. The nearest University from the district is Guwahati University. The district has no any kind of technical college such as Engineering, Medical, Agricultural etc. After getting graduation in the district's colleges students have to go outside the district for post graduation degree.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of total Inset Tables are prepared from data which are incorporated in primary Census Abstract in 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume , from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenties of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step given in 2001 Census, DCHB by all states and union teritories.

Inset Tables Based on Primary Census Abstract :-

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Lakhipur	184,712	175,693	9,019	226,112	213,565	12,547	22.4	21.6	39.1	4.9	5.5
2	Balijana	190,049	146,972	43,077	234,552	185,515	49,037	23.4	26.2	13.8	22.7	20.9
3	Matia	154,592	154,592	-	196,874	191,556	5,318	27.4	23.9	-	-	2.7
4	Dudhnai	60,370	60,370	-	71,850	71,850	-	19.0	19.0	-	-	-
5	Rangjuli	78,415	78,415	-	92,647	92,647	-	18.1	18.1	-	-	-
District Total:		**668,138**	**616,042**	**52,096**	**822,035**	**755,133**	**66,902**	**23.0**	**22.6**	**28.4**	**7.8**	**8.1**

Table 1 shows the decadal change in population Goalpara district during 1991 -2001 Census. . The district growth rate during 1991-2001 is 23.0 percent, In rural, the growth rate is recorded 22.6 percent and in the urban, it is recorded 28.4 percent respectively. During Census of India- 2001, it is noticed that the district rural growth rate of 22.6 percent is higher than the state rural growth rate, which is recorded 16.5 percent whereas the district urban growth rate of 28.4 percent is lower than the state urban growth rate.

Among the Revenue Circles, Matia Revenue Circle shows the highest rate with 27.4 percent followed by Balijana RC with 23.4 percent and the lowest is Rangjuli Revenue Circle with 18.1 percent. Out of five Revenue Circles in the district, two Revenue Circles are recorded the rate of increase of population above the district average.

In the distribution of rural population in the district, as in the previous Census, Census 2001 too, shows the highest rural population in Lakhipur R.C. with 213,565 and the lowest is Dudhnai R. C with 71,850. However in term of proportion, the highest rate is in Balijana RC with 26.2 percent and the lowest in Rangjuli RC with 18.1 percent.

In urban population in the district, it is noticed that Balijana Revenue Circle is recorded the urban population of 22.7 percent in 1991 Census which has come down to 20.9 percent in 2001 Census. In Lakhipur RC the urban population is increased from 4.9 percent in 1991 to 5.5 percent in 2001 Census. Kharijapikon town which is the Census town under Matia Revenue Circle is recorded 2.7 percent

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / CD Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females	
1	2	3	4	5	6	7	8	9	10
1	Jaleswar	91	123,350	63,368	59,982	11 (12.1)	534	516	14 (15.4)
2	Lakhipur	106	90,215	46,133	44,082	20 (18.9)	1,113	1,062	33 (31.1)
3	Kharmuja	84	84,357	43,383	40,974	17 (20.2)	805	814	22 (26.2)
4	Balijana	101	84,551	43,095	41,456	9 (8.9)	660	641	40 (39.6)

2	NIL
3	

Note :Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

In Goalpara district, no statutory town has come up newly in 2001 Census. One Census Town namely Kharijapikon is formed in the district in 2001 Census. No other change has made in remaining categories in the district during 1991-01 period.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	7	0.9	524	0.1
11-20	5	0.7	117	0.0
21-50	16	2.1	1,814	0.2
51-100	31	4.1	6,799	0.9
101-200	113	14.8	50,707	6.7
201-300	127	16.7	82,817	11.0
301-500	174	22.9	147,198	19.5
501 +	288	37.8	465,157	61.6
Not known	0	0.0	0	0.0
District Total:	**761**	**100.0**	**755,133**	**100.0**
Population Density (Rural) of the district:		**437.7**		

Table-4 shows the distribution of villages by population density during the Census of India, 2001. It is observed from the table that the total number of villages in each density range is increased with the rise in the range of population density (per square kilometers). Out of 761 inhabited villages in the district, it is noticed that 7 numbers of villages are in the population density ranging of 0-10 and in the next population density ranging 11-20, the number of villages are only 5. The number of village keeps on increasing,when the range of population density increases. There are 16 villages in the population density range of 21-50.It is increasing to 31 in the range between 51-100. It goes on increasing in all the remaining ranges. The highest number of villages with 288 in number is noticed in the population density of 501 + range and it constitutes a proportion of 37.8 percent of the total villages in the district.

In the distribution of population too the highest number of persons with 465,157, is noticed in the population density of 501 + range and it shows the proportion of 61.6 percent of the total rural population.

INSET TABLE

TABLE- 5

SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			Sibsagar		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	577	904	943	498
1911	915	923	627	886	907	569
1921	896	906	614	875	886	652
1931	874	886	575	877	881	658
1941	875	887	606	880	887	725
1951	868	879	664	907	914	774
1961	869	888	662	918	927	762
1971	896	913	745	939	947	802
1981	-	-	-	-	-	-
1991	923	934	838	947	949	925
2001	935	944	872	957	958	937

In the state the average sex ratio was 919 and 929 for rural and 577 for urban in 1901. The sex ratio had come down to 896 in 1921 and thereafter a gradual downward trend is seen upto 1961 and again it goes up from 1991 and it reaches to 935 in 2001 in the state. Similarly in Goalpara district, it was 904 in 1901 and after different kind of up and down trend it reaches to 957 in 2001 which is above the state ratio. It is 958 for rural and 937 for urban which are also higher then the state averages

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Lakhipur	951	950	963
2	Balijana	950	955	932
3	Matia	947	948	915
4	Dudhnai	989	989	-
5	Rangjuli	978	978	-
	District Total:	**956**	**958**	937

Table 6 shows the sex ratio by Revenue Circles. Sex ratio is the number of female population per 1000 male population. During the Census of India, 2001 the district sex ratio which recorded 956, is higher than the state ratio 935. This observation is noticed both in rural and urban of the district.

Among the Revenue Circles, Dudhnai RC is recorded the highest sex ratio with 989 and the lowest is Matia RC with 947. The sex ratio in Dudhnai and Rangjuli RC are lower than the state sex ratio.

In urban of Lakhipur RC, the sex ratio is 963, in Balijana RC it is 932 and in the Matia RC .it is 915. Lakhipur RC having urban population shows the sex ratio above the district sex ratio.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of CD Block	Sex ratio
1	2	3
1	Jaleswar	947
2	Lakhipur	956
3	Kharmuja	944
4	Balijana	962
5	Krishnai	964
6	Matia	935
7	Kushdhawa	987
8	Dudhnai	978
District (Rural) Total:		**958**

In CD Block level, the sex ratio is highest in Kushdhawa CD Block fallowed by Dudhnai CD Block. The lowest is in Matia CD Block. Out of 8 CD Blocks, 4 CD Blocks cross rural sex ratio of district.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	8	1.1	3,631	0.5
700-749	2	0.3	1,313	0.2
750-799	8	1.1	1,076	0.1
800-849	19	2.5	6,103	0.8
850-899	91	12.0	62,794	8.3
900-949	172	22.6	219,204	29.0
950-999	234	30.7	321,423	42.6
1000-1099	182	23.9	122,893	16.3
1100+	45	5.9	16,696	2.2
District Total:	**761**	**100.0**	**755,133**	**100.0**
Sex ratio (Rural) for District:			**958**	

Table -8 shows the sex ratio of rural population by ranges. The district rural population according to the Census of India, 2001 is 755,133 with 385,706,

males and 369,427 females and the sex ratio is 958. From the table, it is noticed that the least number of villages is found in the range of sex ratio between 700-749 which is recorded only 2 number of villages, whereas, in the range of sex ratio between 950-999 the highest 234 number of villages are seen. Further, it is observed that the range of sex ratio, between 900-949 is having 172 number of villages and range between 1000-1099 is having 182 number of villages. The remaining ranges of sex ratio i.e. ranges between less than 700,700-749, 750-799, 800-849 and 1100+ are having less than 20 number of villages, with the exception of range between 850-899 which shows 91 villages.

Out of 755,133 rural population in the district, the highest distribution of population is noticed in the range of sex ratio between 950-999 which is recorded 321,423 or approximately 43 percent. It is followed by the range between 900-949 which is recorded the population of 219,204 or 29 percent. The least number of population distribution is noticed in the range of sex ratio between 750-799 with the population of 1076 or 0.1 percent.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town+*	Urban status of	Sex ratio
1	2	3	4
1	Lakhipur (TC)		963
2	Goalpara (MB)		932
3	Kharijapikon (CT)		915
Sex ratio (Urban) for the district:			**937**

Table-9 presents the sex ratio of Agglomeration/ towns in Goalpara district. In Census of India, 2001, there is an addition of one Census town, namely, Kharijapikon CT and the total number of towns in the district raises to three. The other towns of the district, are Goalpara MB and Lakhipur TC The sex ratio of Lakhipur town is 963 which is the highest among the three towns, followed by Goalpara town with 932 and lastly Kharijapikon town with 915 females per one thousands males. The sex ratio of lakhipur town is above the district average which is 937.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Lakhipur	Total	50,094	25,212	24,882	987
		Rural	48,030	24,213	23,817	984
		Urban	2,064	999	1,065	1,066
2	Balijana	Total	43,220	22,090	21,130	957
		Rural	36,966	18,887	18,079	957
		Urban	6,254	3,203	3,051	953
3	Matia	Total	38,883	19,690	19,193	975
		Rural	38,117	19,305	18,812	974
		Urban	766	385	381	990
4	Dudhnai	Total	11,187	5,654	5,533	979
		Rural	11,187	5,654	5,533	979
		Urban	0	0	0	
5	Rangjuli	Total	15,749	7,962	7,787	978
		Rural	15,749	7,962	7,787	978
		Urban	0	0	0	-
District Total:		**Total**	**159,133**	**80,608**	**78,525**	**974**
		Rural	**150,049**	**76,021**	**74,028**	**974**
		Urban	**9,084**	**4,587**	**4,497**	**980**

Table-10 shows the sex ratio of population in the age group 0-6 by revenue circles with the break-up in persons, males and females for total, rural and urban. The population in the age-group 0-6 in the district is 159,133 which constitutes a little above 19 percent of the district total population. The sex ratio for 0-6 age group in the district as a whole is 974 and in rural it shows 974 and in urban it records 980.

Among the Revenue Circles, the rural sex ratio for 0-6 age group is noticed higher sex ratio in Rangjuli, Dudhnai, Matia and Lakhipur than the district. Balijana RC for which it is recorded 957, is below the district sex ratio. Lakhipur RC is recorded 984 which is the highest sex ratio for 0-6 age group among the revenue circles. It is followed by Dudhnai RC with 979, Rangjuli RC with 978, Matia RC with 974.

In urban, except in Balijana RC where sex ratio records 953 is below the district sex ratio for 0-6 age group and the other two revenue circles have the sex ratio much higher than the district sex ratio. Lakhipur RC is recorded 1066, indicating that the number of female children are more than the male children in the age group 0-6. In Matia RC the sex ratio for 0-6 age group is 990.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Sl. No.	Name of CD Block	Total population in 0-6 age group			Sex ratio for 0-6 age
		Persons	Males	Females	
1	2	3	4	5	6
1	Jaleswar	28,858	14,599	14,259	977
2	Lakhipur	19,172	9,614	9,558	994
3	Kharmuja	18,125	9,260	8,865	957
4	Balijana	15,767	8,043	7,724	960
5	Krishnai	17,243	8,757	8,486	969
6	Matia	22,185	11,240	10,945	974
7	Kushdhawa	11,955	6,037	5,918	980
8	Dudhnai	16,744	8,471	8,273	977
District (Rural) Total:		**150,049**	**76,021**	**74,028**	**974**

In CD Block level, the highest sex ratio for the children of 0-6 age group is seen in Lakhipur CD Block with 994 followed by Kushdhawa with 980. The lowest sex ratio is found in Kharmuja CD.block with 957.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	60	8	3,174	2
700-749	24	3	2,092	1
750-799	31	4	3,478	2
800-849	52	7	7,094	5
850-899	86	11	19,007	13
900-949	94	12	22,694	15
950-999	96	13	33,815	23
1000-1099	151	20	39,361	26
1100+	167	22	19,334	13
District Total (Rural)	**761**	**100**	**150,049**	**100**
Sex ratio (Rural) for District:			**974**	

In 167 villages the sex ratio is found 1100+ which means females exceeded males followed by 151 villages having highest population sex ration of 1000-1099 .The lowest number of village (24]) have the sex ratio of 700-749. The district rural sex ratio (974) for 0-6 age group children exceeds by about 414 villages.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl No	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Sibsagar (MB)	MB	5,674	2,944	2,730	927
2	Amguri (TC)	TC	822	441	381	864
3	Nazira (MB)	MB	1,432	755	677	897
4	Sonari (MB)	MB	2,130	1,078	1,052	976
5	Moranhat (TC)	TC	648	336	312	929
District(Urban) Total			**10,706**	**5,554**	**5,152**	**928**

Table -13 gives the town wise sex ratio of population in the age group 0-6 with the break-up in males and females. The district urban sex ratio of population in the age group 0-6 is 980. Lakhipur town which has the town committee status, shows the highest sex ratio for 0-6 age group among the three towns and it records 1066. This is followed by the new Census town Kharijapikon town with 990. Lastly, the Goalpara town which has the Municipal Board as the status of town, records 953 sex ratio for 0-6 age group and becomes the only town that records sex ratio below the district average.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

		Urban	0	0	0	0	0
District Total:		**Total**	**822,035**	**39,462**	**131,800**	**4.8**	**16**
		Rural	**755,133**	**32,287**	**130,075**	**4.3**	**17.2**
		Urban	**66,902**	**7,175**	**1,725**	**10.7**	**2.6**

Table 14 presents the number and percentage of Scheduled Castes and Scheduled Tribes population in Revenue Circles with the break up into total, rural and urban. The population of Goalpara District by and large belongs to the General Category, i.e they constitute approximately 79 percent to the total population. The Scheduled Castes population in the District forms only a little above 4 percent to the total population and are concentrated more in rural with 32,287 in number. But in term of proportion, the population of Scheduled Castes in Urban indicates 10.7 percent and that of rural 4.3 percent to total population. Scheduled Tribes population in the District is 131,800 and constitutes 16 percent to the total population and are mostly concentrated in rural areas and forms, approximately a little above 17 percent. In Urban, they form only 2.6 percent to the total population.

The highest number of Scheduled Castes in rural is noticed in Rangjuli R C with 11,217 persons and forms 12.1 percent to total population. The second highest is in Matia R C with 10,474.The other remaining three Revenue Circles, however, indicates very low percentage. Dudhnai RC records 3.4 percent, Balijana RC works out 2.6 percent and Lakhipur RC records 1.5 percent.The distribution of Scheduled Castes population in the town under Balijana RC which is indicated as the highest with 5,375 number and the lowest is in Lakhipur RC with 1,722. But in term of proportion, Lakhipur RC records 13.7 percent while Balijana RC records only 11 percent.

Balijana RC records the highest number of Scheduled Tribes with 34,454 in number. It is followed by Dudhnai RC with 30,720, Rangjuli RC with 29,183 and Matia R.C records 20,977. The least number of Scheduled Tribes population is noticed in Lakhipur R C. Dudhnai RC is the highest with 42.8 percent and lowest is Lakhipur RC with 6.9 percent. The distribution of Scheduled Tribes population in the towns of the district is very nominal. In urban of Balijana RC, there are 1,241 or 2.5 percent Scheduled Tribes and in Lakhipur RC there are 468 Scheduled Tribes and form only 3.7 percent to the total population..

INSET TABLE

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of CD Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Jaleswar	123,350	1,071	1,058	0.9	0.9
2	Lakhipur	90,215	2,203	13,683	2.4	15.2
3	Kharmuja	84,357	219	4,826	0.3	5.7
4	Balijana	84,551	4,625	24,189	5.5	28.6
5	Krishnai	92,195	2,772	21,567	3	23.4
6	Matia	105,612	7,002	1,860	6.6	1.8
7	Kushdhawa	78,469	3,178	33,709	4.1	43
8	Dudhnai	96,384	11,217	29,183	11.6	30.3
District (Rural) Total:		**755,133**	**32,287**	**130,075**	**4.3**	**17.2**

In CD Blocks of the district the highest percentage of Scheduled Castes and Tribes population are found in the same CD Block Dudhnai. Matia has second higher percentage of Scheduled Tribes population and Balijanea in case of Scheduled Tribes population. Jaleswar CD Block has less percantage of population for both categories.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	553	72.7	0	0.0
Less than 5	105	13.8	2,512	7.8
5-10	39	5.1	5,428	16.8
11-20	23	3.0	3,993	12.4
21-30	15	2.0	5,255	16.3
31-40	4	0.5	1,007	3.1
41-50	7	0.9	2,376	7.4
51-75	8	1.1	5,947	18.4
76 and above	7	0.9	5,769	17.9
District Total	**761**	**100.0**	**32,287**	**100.0**

Table-16 presents the proportion of Scheduled Castes population to total population in villages. As mentioned earlier, the Scheduled Castes population in the district, constitutes a little above 4 percent to the total population and are spreading more in rural, with a total population of 32,287. It is observed from the Table, out of 761 villages in the district, 553 villages have no Scheduled Castes, and it forms the highest proportion of 72.7 percent of villages. The next percentage range of Scheduled Castes population to total population which is less than 5 records 2,512 and can be found in 105 villages spreading all over the district. In the percentage range between 5-10, there are 5,428 Scheduled Castes or 16.8 percent to the total district Scheduled Castes and are being distributed among the 39 villages. It is observed that the higher the percentage range of Scheduled Castes population to total population, the lower is the number of villages available in each range. In the percentage range between 11-20, there are 23, number of villages, it goes down to 15 villages in the percentage range between 21-30. It further goes down drastrically to 4 number of villages in the percentage range between 31-40. However, the remaining percentage range between 41-50, 51-75 and 76 and above, the number of villages, is 7, 8 and 7 respectively. The highest percentage of Scheduled Castes population, is of course, noticed in the last two ranges i.e. percentage range between 51-75 and 76 and above, which are recorded 18.4 percent and 17.9 percent respectively.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	385	50.6	0	0.0
Less than 5	44	5.8	719	0.6
5-10	25	3.3	3,753	2.9
11-20	22	2.9	4,219	3.2
21-30	26	3.4	6,719	5.2
31-40	23	3.0	8,240	6.3
41-50	31	4.1	13,177	10.1
51-75	60	7.9	26,657	20.5
76 and above	145	19.1	66,591	51.2
District Total	**761**	**100.0**	**130,075**	**100.0**

Table -17 shows Scheduled Tribes population to total population in villages. In the rural of the district, Scheduled Tribes forms a little above 17 percent to the rural population and is concentrated in 376 number of villages. The remaining 385 number of villages or 50.6 percent of the total number of villages are not having a single Scheduled Tribes people.

In the distribution of villages, it is observed from the table that the highest number of villages is noticed in the percentage range of Scheduled Tribes population to total population between 76 and above, where it recorded 145 number of villages or 19.1 percent and constitutes about 51.2 percent of Scheduled Tribes population.

The second highest is noticed in the percentage range between 51-75 with 60 number of villages or 7.9 percent to the total number of villages and with a population of 20.5 percent of the rural Scheduled Tribes.

Further analyses of the percentage range of Scheduled Tribes population to total population, it is noticed that in the range less than 5, the number of villages are 44 or 5.8 percent having the Scheduled Tribes population of 719 or below one percent. However, in the percentage range between 5-10 the number of villages has come down to 25 or 3.3 percent, but in term of number of Scheduled Tribes population, the number is increasing from 719 to 3,753 persons. Thus, it is noticed that with the increase in percentage range of Scheduled Tribes population to total population the number of Scheduled Tribes population is increasing steadily in each ranges. But it is not so in the distribution of villages, it is noticed that the number of villages in each percentage range is fluctuating.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Lakhipur (TC)	12,547	1,722	468	13.7	3.7
2	Goalpara (MB)	49,037	5,375	1,241	11	2.5
3	Kharijapikon (CT)	5,318	78	16	1.5	0.3
District(Urban) Total		**66,902**	**7,175**	**1,725**	**10.7**	**2.6**

Table-18 shows the distribution of Scheduled Castes and Scheduled Tribes population in absolute number and percentage in urban of Goalpara district. From the table, it is observed that the Scheduled Castes population in the urban of the district is very low with 10.7 percent and that of Scheduled Tribes is only 2.6 percent.

Among the three towns in the district, Goalpara town records the highest number of Scheduled Castes and Scheduled Tribes with 5,375 and 1,241 persons respectively. It is followed by Lakhipur town with 1,722 Scheduled Castes and 468 Scheduled Tribes. Kharijapikon town, however records, very few, with only 78 Scheduled Castes and 16 Scheduled Tribes. But in terms of proportion to the total population. Lakhipur town shows 13.7 percent Scheduled Castes and 3-7 percent Scheduled Tribes and is noticed that it is higher in percentage to that of Goalpara town which records 11 percent Scheduled Castes and 2.5 percent Scheduled Tribes.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C D BLOCKS, 2001

Sl. No.	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Jaleswar	933	974
2	Lakhipur	861	982
3	Kharmuja	1,028	943
4	Balijana	941	975
5	Krishnai	890	993
6	Matia	965	975
7	Kushdhawa	962	1,028
8	Dudhnai	996	987
District (Rural) Total		**957**	**994**

The sex ratio among CD Blocks for Scheduled castes is highest in Kharmuja (1,028) followed by Dudhnai CD Block with 996. Similarly, the same is highest in Kharmuja CD Block (1,028) for Scheduled Tribe followed by Krishnai (993). The sex ratio of Scheduled Tribe is lower than District rural sex ratio in two CD Blocks whereas same for Scheduled Tribes is lower than district in 6 CD Blocks.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Lakhipur (TC)	1,028	1,118
2	Goalpara (MB)	978	918
3	Kharijapikon (CT)	1,167	1,667
Sex ratio (Urban) for the district:		**991**	**974**

Table - 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in the towns of Goalpara district. The sex ratio among the Scheduled Castes in the district is 991 and that of Scheduled Tribes is 974.

Among the towns, it is noticed from the table that Kharijapikon town which is the Census town, records the highest sex ratio among the Scheduled Castes with 1,167, followed by Lakhipur town with 1,028 and Goalpara town with 978. Among the Scheduled Tribes, the highest sex ratio is noticed in Kharijapikon town 1,667 followed by Lakhipur town 1,118 and Goalpara town is recorded 918 females per one thousands males respectively. The sex ratio is below the district for Goalpara town average both for the Scheduled Castes and Scheduled Tribes.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN TAHSILS, 2001

		Urban	44,317	24,697	19,620	22,585	9,848	12,737	76.7	82.4	70.4	12

Table - 21 shows the number and percentage of literates and illiterates by Revenue Circles in total, rural and urban. The number of literates and illiterates are given in absolute number for persons, males and females. The table also presents the percentage of literate in persons, males and females and it also shows the

gap in male/female literate rate. The number of literates in the district is 384,670 with male literates 220,277 and female literates 164,393 respectively. The proportion of literates in the district stands at 58 percent. It is further noticed, that the male literacy rate is higher than the female literacy rate which stands at 64.9 percent against 50.9 percent for female. This trend in the literacy rate is observed both in rural and urban. However, the gap in male/female literacy rate in rural has come down from 18.0 in 1991 Census to 14.1 percent in 2001 Census. Likewise in urban, the rate has come down from 15.6 percent in 1991 Census to 12 percent in 2001 Census. This shows that the number of literates among the female population are increasing both in rural and urban of the district.

Among the Revenue Circle, the highest rate in population of literates is noticed in Dudhnai R C with 75.4 percent followed by Rangjuli RC where it is records 65.6 percent. Balijana RC shows 63.4 percent, Matia RC shows 56.6 percent and the lowest is noticed in Lakhipur RC which records 44.2 percent respectively. Dudhnai RC which is recorded 45,755 number of literates is the lowest among the Revenue Circles. Balijana RC with 121,368 number of literates, stand first among the revenue circles. The second highest is Matia RC with 89,359 number of literates, followed by Lakhipur RC and Rangjuli RC with 77,768 and 50,420 number of literates respectively. Further, as it is observed in the literacy of the district, the male literacy rate in all the revenue circles, is in higher proportion to that of the female literacy rate.

Dudhnai RC is the highest in proportion of literate with 75.4 percent and the lowest is Lakhipur RC with 42.5 percent. In urban, the literacy rate of town under Matia RC with 80.7 percent stands first followed by Balijana RC with 77.8 percent and Lakhipur RC with 70.1 percent.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C D BLOCKS, 2001

Serial number	Name of CD Block	Number of literates and illiterates						Percentage of literates			
		Number of literates			Number of illiterates						Gap-in

In CD Block wise, the table shows that Kushdhawa CD Block stands in Ist position with 76.3% literates followed by Baliajana CD Block. The lowest is in Jaleswar CD Blocks (47.7). The male literacy rates in all CD Blocks are higher than female literacy rate. The female literacy rate is found high among all CD Blocks and lower in Jaleswar(31.3). The gap between the two sexes is ranged from 12.4 to 16.4 from one CD Block to other.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

INSET TABLE

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of	Population	Percentage distribution of population
1	2	3	4	5
71-80	162	21.3	119,359	15.8
81-90	114	15.0	79,355	10.5
91-99	26	3.4	14,316	1.9
100	0	0.0	0	0.0
District Total:	**761**	**100.0**	**755,133**	**100.0**
Literacy rate for District:		**58**		

Table - 23 gives the distribution of villages by literacy rate range. From the table, it is observed that the number of inhabited villages are increasing with the increase in the range of literacy rate. For instance, the range of literacy rate between 1-10 is 13 number of villages, it keeps increasing to 30 villages in the range between 11-20 and in the range between 21-30, there are 53 villages, in the range 31-40 and. 41-50 it increases gradually. However, after this range the number of villages distributed between the remaining ranges are fluctuated with great margin.

In the distribution of population by range of literacy rate, same phenomenon as in distribution of villages is observed. There is an increasing trend of number of population with the increase in the range of literacy rate. There are 3,243 persons or 0.43 percent in the range between 1-10. In the range between 11-20 there are 15,025 persons or 1.99 percent. It goes up to 56715 person or 7.51 percent in the next range between 21-30. And further goes up to 144,548 and constitute approximately a little above 19 percent in the range between 31-40. It is noticed from the table that in the range 31-40, the population increases more than two times to the previous range. However, in the next three subsequent ranges 41-50, 51-60 and 61-70, the percentage distribution of population has come down to 15.6 percent, 13.9 percent and 13.3 percent respectively. But in the range between 71-80, it goes up again to 15.8 percent and in the subsequent range between 81-90 it rolls back to 10.5 percent. It drops down drastically in the range between 91-99.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial	Name and urban status of	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table - 24 shows the town wise distribution of literate and illiterate by sex. The table presents the number of literate and illiterate in absolute number for person, male and female. It also shows the proportion of literate and gap in the male / female literacy rate. The percentage of literate in the urban of the district is 76.6 percent with male literates 82.4 percent and female literate 70.4 percent respectively. The gap in the male / female literacy is 12 which has come down from 15.6 percent in 1991 Census.

Among the towns, the highest number of literate is noticed in Goalpara town with 33,301, followed by Lakhipur town with 7,344 and Kharijapikon with only 3,672 number of literates. The highest proportion of literacy is noticed in Kharijapikon town with a record of 80.7 percent and followed by Goalpara town with a record of 77.8 percent and Lakhipur town with 70.1 percent.

The gap in male/female literacy rate is noticed higher than the district rate and in Lakhipur town as 15.4 percent. Kharijapikon town, however, recorded 12.9 percent which is a little above the district rate. But Goalpara town shows the gap of male/female literacy rate is 11 percent which is below the district rate.

District (Rural) Total:		**16,845**	**9,891**	**6,954**	**15,442**	**6,608**	**8,834**	**62.7**	**71.8**	**53.1**	**18.7**

Table 25 gives the number and percentage of Scheduled Castes literates and illiterates by sex in CD Blocks. The district literary rate is recorded at 62.7 percent. Among the literate male/ female Scheduled Castes population, the gap in literacy rate is 18:7 percent. In terms of absolute number, the highest number of literates is noticed in Dudhnoi CD Block with 6,086 persons and the lowest is in Kharmuja CDBlock with 105 persons. However, in terms of percentage, Balijana CD Block recorded the highest proportion of 70.1 percent and the lowest proportion is in Jaleswar CD Block with 38.1 percent respectively

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	6	2.9	17	0.1
1-10	2	1.0	30	0.1
11-20	5	2.4	236	0.7
21-30	8	3.8	1,814	5.6
31-40	15	7.2	2,626	8.1
41-50	17	8.2	2,589	8.0
51-60	27	13.0	5,055	15.7
61-70	36	17.3	7,362	22.8
71-80	45	21.6	10,011	31.0
81-90	24	11.5	1,719	5.3
91-99	8	3.8	760	2.4
100	15	7.2	68	0.2
District Total:	**208**	**100.0**	**32,287**	**100.0**
Literacy rate for District (Rural):		**62.7**		

As seen in the table, there are six villages where there is no literate Scheduled Castes population. 100% literacy can be seen among Scheduled Caste population in 15 villages. The highest number of villages (45) or 21.6% has literacy in range of 71-80 among Scheduled Tribes persons. 74 villages record literacy rate in the range from 1-60 which is below the district rural average.

INSET TABLE

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Sl No	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates

Table – 28 presents the CD Blockwise number and percentage of Scheduled Tribes literates and illiterates by sex. Out of 1,30,075 Scheduled Tribes population, 73.1 percent are literates and it is noticed that the male literates with 81.6 percent are predominant the female literates with 64.7 percent. The gaps in male / female literacy rate is 17 percent which is lower from that of the gap noticed in male / female Scheduled Castes literates. Out of eight number of CD Blocks in the district only one CD Block viz. Jaleswar CD Block which is recorded very low percentage of literates with 57.1 percent. The remaining CDBlocks, however, are recorded the literacy rate between 70.4 percent to 76.9 percent and Kushdhawa CD Block is the highest in literacy rate.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of
1	2	3	4	5

District Total:	**376**	**100.0**	**130,075**	**100.0**
Literacy rate for District (Rural):		**73.1**		

In 5 villages there is no literate person of Scheduled Tribes. 2 villages have literacy rate in the range of 1-20 for Scheduled Tribe people. Similarly no village has literacy rate of 21-30 for Scheduled Tribes. The highest number 138 or 36.7% villages have literacy rate in between 71-80 for Scheduled Tribes 100% literacy for Scheduled Tribes population is found in 17 or 4.5% village where number of Scheduled Tribes population is only 108.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Lakhipur (TC)	242	140	102	226	81	145	63.9	80.9	49.5	31.4
2	Goalpara (MB)	977	536	441	264	111	153	88.9	93.4	84	9.4
3	Kharijapikon (CT)	11	4	7	5	2	3	84.6	100	77.8	22.2
Goalpara (Urban)		**1,230**	**680**	**550**	**495**	**194**	**301**	**82.5**	**90.5**	**74.3**	**16.2**

In towns of the district, the highest number of Scheduled Tribes population lived in Goalpara town followed by Lakhipur TC. There are only 16 tribes persons in Kharijapikon CT The percentage of literacy is 82.5% for the Scheduled Tribes population in urban. It is 90.5% for male and 74.3 % is for females having a gap of 16.2 % between tha two sexes. The literacy rate is higher in Goalpara MB for Scheduled Tribes population than any other town of the district. The female literacy for tribes in Lakhipur TC is very low in comparison to other towns.Goalpara town indicates a small gap between two sexes in case of literacy of Scheduled Tribes.

Table -31 shows the number and percentage of Main Workers, Marginal Workers and Non-workers by sex in Revenue Circles. From the table it is observed that out of 822,035 total population of the district, 33.3 percent are workers and 66.7 percent are Non-workers. The male workers which form 48.2 percent of the total male population, are however predominated the female total number of workers which is recorded as 17.7 percent only. In the case of Non-workers, the female Non-workers with a proportion of 82.3 percent of the total female population, predominates the male Non-worker, which forms 51.8 percent.

Further break-up of workers into Main-workers and Marginal workers, it is observed that male Main Workers which constitute 42.4 percent of the total male population is predominated the female Main Workers recorded only 7.9 percent. The female Marginal Workers with 9.9 percent of total female population predominated the male Marginal Workers which form only 5.8 percent of the total male population.

Among the Revenue Circles it is noticed that Balijana RC records the highest number of Main Workers with 59,176 and the lowest is Dudhnai RC with 19,505. But in term of proportion, the highest proportion of Main Workers is noticed in Matia RC with 27.2 percent and the lowest proportion is in Lakhipur RC with 24 percent.

In case of Marginal workers, it is observed that among the Revenue Circles, Matia Revenue Circle records the highest number of Marginal Workers with 21,476 and the lowest is Rangjuli RC with 7,233. The proportion distribution of Marginal Workers among the RC, however, noticed high in Matia RC with 10.9 and the lowest is Lakhipur RC with 5.7 percent.

The highest number of Non-Workers among the Revenue Circles, is noticed in Balijana RCwith 160,517 person and the lowest in Dudhnai RC with 44,723. However, in proportion distribution of Non-Worker, it is observed that the Lakhipur RC with 70.3 percent is the highest and the lowest is Matia RC with 61.9 percent.

INSET TABLE

Table-33 gives the number and percentage of Main Workers, Marginal Workers, and Non-Workers by sex in urban of the Goalpara district. Out of 66,902 total urban population of the district 19,875 or 29.7 percent are workers (Main and Marginal Workers). In the break up of male and female workers, male workers 49 percent predominates the female workers which forms only 9.1 percent of the total population. The female Non-Workers 90.9 percent of the total female population predominates over male Non workers of 51 percent to the total male population.

Among the towns in the district, Goalpara town is the first in having the highest number of Main Workers with 13,242 persons. It is followed by Lakhipur town with 3,389 and Kharijapikon town with 1,539 number of Main Workers. But in term of proportion of Main Workers to total population, it is noticed that Kharijapikon town is the highest with 28.9 percent than that of Goalpara town and Lakhipur town with 27 percent each. In the distribution of Marginal Workers among the towns it is noticed that these are very few in number. Goalpara town records the highest both in number and in proportion of Marginal Workers with 1,262 or 2.6 percent of total population. It is followed by Lakhipur town with 226 and Kharijapikon town with 217 and the proportion of Marginal Workers to total population is 1.8 and 1.7 percent respectively. The proportion of the Non-Workers is 70.3 percent, male 51 percent and female 90.9 percent. Goalpara town records the highest number of Non-Workers with 34,533 or 70.4 percent to the total population. Lakhipur town records second position with 8,932 and forms the proportion of 71.2 percent and Kharijapikon town with 3,562 forms the proportion of 67 percent to the total population.

Note: Percent of Worker to total worker are given in brackets

Table-34 presents distribution of workers by sex in four categories of economic activity in Revenue Circles. Out of the district rural population of 822,035, the workers (ie, Main and Marginal Workers) are 273,925 or 33.3 percent. Further male workers constitute 202,612 or 48.2 percent to the total male population and female workers constitute 71,313 or 17.7 percent to the total female population. Workers are categorised into four categories namely, Cultivators, Agricultural Labourers, Household Industry Workers, and Other Workers. Out of the four categories, the proportion of Other Workers is the highest with 40.1 percent followed by category of Cultivators with 36.9 percent, Agricultural Labourers with 18.3 percent and the lowest is in the category of Household Industry Workers with 4.7 percent to the total workers.

Among the Revenue Circles, Matia Revenue Circle records the highest proportion of Total Workers with 38.1 percent and the lowest is Lakhipur RC with 29.7 percent. In the category of Cultivators, it is noticed that Lakhipur RC is the highest in proportion with 45.1 percent and the lowest is Matia RC with 32.1 percent. In the next category of workers ie-Agricultural Labourer, Lakhipur RC is recorded the highest proportion with 24.5 percent and the lowest is Balijana RC with 13.8 percent. Household Industry Workers are very few in number. The highest proportion of Household Industry Workers is noticed in Matia R C with 7.7 percent and the lowest is in Dudhnai R.C with 3 percent.The distribution of large number of workers in the rural of the district is seen in the category of Other Workers with a proportion of 40.1 percent to the total workers. Among the RCs it is noticed thatDudhnai RC Constitutes the highest proportion of Other Workers with 48.1 percent and the lowest is noticed in Lakhipur R. C. with 27.3 percent.

As per CD Blocks level, the position of total workers is highest in Krishnai and lowest in Jaleswar C.D. block. The male worker is however higher than female in all .C Blocks. The percentage of cultivators is found high in Lakhipur and lowest in Matia CD Block. In case of Lakhipur CD Block, the percentage of female cultivators is seen higher than male cultivators. In case of Agricultural Labourers, the percentage of female workers is observed high in all CD Blocks. In district level, it is 25.8% as against 17.3% for males. In respect of Household Industry workers also, the percentage of female workers have out numbered the male percentage in all CD Blocks. In case of Other Workers the percentage of male workers is higher than females. It is seen highest in Matia and lowest in Lakhipur CD Block.

Table-36 gives the distribution of workers by sex in four categories of economic activity in towns in the district of Goalpara. . The total number of workers in the urban of the district is 19,875 or 29.7 percent to the total population. The male workers are more in number than the female workers with 16,936 male workers as against 2,939 female workers. The distribution of workers in the urban of the district as observed from the table it is seen that the maximum number of people are engaged themselves in the category of the Other Workers which constitutes 94.7 percent to the total number of workers.

Household Industry Workers form only 2.6 percent, Agricultural labourer forms 1.4 percent and cultivators record only 1.3 percent of the total number of workers.

Goalpara town has the largest number of Other Workers with 14,037 and forms the highest proportion with 96.8 percent. The lowest among the three towns of the district is Lakhipur town with 86.8 percent. However, in term of absolute number, Kharijapikon town is considered as the lowest with 1,654 total number of the Other Workers as against the Lakhipur town which has 3,137 number of the Other Workers. In the other three remaining categories , the distribution of workers is very nominal. In the category of cultivators, Lakhipur town has 161 cultivators and kharijapikon town has only one cultivator. In the category of Agricultural Labourers, Goalpara town record 142 and shows as the highest in this town whereas the lowest is noticed in Kharijapikon with 12 number of Agricultural Labourers. In Goalpara town very few people engaged themselves in the Household industry work and they form only 1.6 percent to the total number of workers. But in term of absolute number, Goalpara MB has the highest number of Household Industry workers with 228. It is followed by Lakhipur town with 198 and Kharijapikon town with 89 workers who participate in Household Industry work.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

In district, educational facilities are available to 723 villages. Similarly, 243, 683 and 134 villagas availed facilities of medical, improved drinking water and post office respectively in the district. 100% facilities of any type have been availed by none of the CD Blocks. However, education and improved drinking water facilities are getting by villages of all CD Blocks at a higher rate than medical and post office facilities. It is seen that telephone facilities is almost nil in all CD Blocks ewcept in two CD Blocks one in each CD Block. Similarly banking facilities is available to 23 villages only from all CD Blocks. 689 villages received Power Supply facility in the district.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

In CD Block level , out of 755,133 population 742,338 or98.3% people have received education facility which is highest among all facility availed by villagers. Krishnai CD Block avails 100% facility of education whereas lowest by Lakhipur 96%. Medical facility is availed by 41.2% people of all CD Blocks. The improved drinking water facility is achieved by higher percentage of the people except Krishnai. The percentage of other facility availed by the villagers in all CD Blocks is more or less equal.A greater portion of people gets power supply facility.

INSET TABLE

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	18	13	7	38
(b) Middle School	196	220	34	450

$ Transport communication includes bus service, rail facility and navigable waterways.
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.
However, the concept of improved drinking water is state specific and this is to be considered accordingly.

As can be seen in the above that out of 723 villages those who availed education facility, 270 villages have population in the range of 1-499and 199 in the range of 500-999 and so on. Similarly it can be seen in the table for villages with population by range along with facilities availed which are self explanatory.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Jaleswar	91	17,482.0	66.5	5.4
2	Lakhipur	106	20,280.0	52.4	3
3	Kharmuja	84	17,571.0	19.7	1.4
4	Balijana	101	19,835.0	40.1	0
5	Krishnai	88	26,294.4	43.5	15.9
6	Matia	84	19,719.0	58.3	17
7	Kushdhawa	81	23,212.0	47.2	13.6
8	Dudhnai	126	28,117.0	55.8	44.2
District Total:		**761**	**172,510.4**	**48.3**	**15.8**

INSET TABLE

*Note * Areas covered by villages only excluding, River, Forest, Beel, Road etc. Fallen with in the village.*

Out of the total areas of the district (Rural) 48.3% is cultivable land and 15.8% is irrigated land. Jaleswar has highest position of cultivable land (66.7%). In terms of rural areas, Krishnai has more cultivable land. 44.2% land is irrigated at Dudhnai CD block, which is highest among all CD blocks. Baliajana has no irrigated land within its areas.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No	Class,- name & urban status of the Town	Per capita receipt–			Per-capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Goalpara (MB)	4.3	1.2	3.1	3.9	2.2	0.8	0.7	0	0.2
2	IV Lakhipur (TC)	6.2	1.1	5.1	6	4	0.2	1.2	0.2	0.4
District Total		**4.7**	**1.2**	**3.5**	**4.3**	**2.6**	**0.7**	**0.8**	**0**	**0.2**

The total per capita receipt in urban areas of the district is Rs. 4.7 of which Rs.4.3 and Rs.6.2 are in Goalpara MB and Lakhipur TC respectively. Similarly in expenditure side it is Rs. 4.3 of which Rs. 3.9 and Rs. 6.0 are in Goalpara and Lakhipur TC respectively.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Goalpara (MB)	3.3	1.4	1.2	0.4	0.4
2	Lakhipur (TC)	5.6	4	2.4	1.6	0.8
District Total		**3.7**	**1.9**	**1.5**	**0.6**	**0.5**

In the district (urban), there are 3.7 number of primary educational facility per 10,000 population of which 3.3 and 5.6 number in Goalpara MB and Lakhipur TC respectively. In all other educational institutions, number per 10,000 population is less than primary school facility

TABLE45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Goalpara(MB)	57
2	Kharijapikon(CT)	0
3	Lakhipur(TC)	29
District Total		**47**

Number of beds in medical in stitution of urban areas of the district per 10,000 population being 47 is very nominal. It is highest in Goalpara M.B. with 57 beds for 10,000 population whereas it is 29 beds at Lakhipur TC There is no bed facility in Kharijapikon CT

TABLE 46 : PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Sl No	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	GOALPARA MB	49,037	1,500	3.1
2	LAKHIPUR TC	12,547	0	0
District Total		**61,584**	**1,500**	**2.4**

In the district, out of two statutory towns, only Goalpara MB has a total of 1500 slum population. It covers 3.1 percent of the total population of the town.

Inset Tables based on Household amenities Data : -

Inset Tables based on Household amenities Data : -

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Goalpara (MB)	Nil	Nil
		Nil	Nil
		Nil	Nil
2	Kharijapikon (CT)	Nil	Betel-Nut
		Nil	Nil
		Nil	Nil
3	Lakhipur (TC)	Nil	Paddy
		Nil	Jute
		Nil	Mustard Seeds

There is no manufactured item in towns of the district except mustard oil in Kharijapikon CT. There is no exported item in Goalpara MB. However, Paddy, Jute and Mustard seeds are exported by Lakhipur TC and Betel nut by Kharijapikon CT.

District Total :		**147,512**	**134,173**	**13,339**	**11,983**	**9,929**	**2,054**	**31,747**	**30,946**	**801**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table indicates households by tenure status and number of rooms occupied in the district by Scheduled Castes and Scheduled Tribes as well as total for the district. The owned houses of Scheduled Castes households are more having one room, two rooms and three rooms respectively. But in the case of Scheduled Tribes household, the owned houses having two rooms and one room are more. In case of rural and urban areas, Scheduled Caste s have households having one room houses and it is more for the households of Scheduled Tribe having two rooms houses. In case of rented houses, both the communities have more households having houses of one room. The same picture is observed in case of others houses also.

INSET TABLE

TABLE 49
PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

5	Rongjuli	11.6	10.9	12.5	16.1	12.1	12.9	-	-	-
District total		**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."
Note:-
Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I.Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.
Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials
Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

In Goalprra district, the percentage of permanent houses is more in Balijana tahsil followed by Matia tahsil. The percentage of semi permanent houses is also more in Balijana tahsil followed by Lakhipur tahsil. But in case of percentage of temporary houses it is more in Lakhipur tahsil followed by Matia tahsil. In respect of rural, more percentage goes to Matia tahsil for permanent houses and for semi permanent and temporary houses, the percentage is more in Lakhipur in both cases. Again in case of urban percentage is more for all categories of houses in Balijana tahsil.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table above indicates that the firewood is the main cooking fuel in all tahsils of the district. The second and third position go to crop residue and LPG which are used by a good number of the households after firewood by all tahsils. The number and percentages of households which used different cooking fuels can be seen in the table itself. There is 457 households in the district which have no any arrangement for cooking.

TABLE : 52

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table indicates the number of households who have availed banking services alongwith the households having some specified assets as shown in the table. Out of total households of the district, a total of 23,793 households have availed banking services. The banking services availed in urban areas of the district by the households is only 6,036 whereas it is 17,757 in rural areas of the district.In tahsil level, the number of households who have availed banking services is more in Balijana tahsil followed by Matia tahsil. This service for rural areas is more in all tahsils than urban areas of all tahsils. Availability of all assets mentioned in the table is more for the households of Balijana tahsil followed by Matia tahsil. But in case of telephone, it is more in Dudhnai tahsil. The highest number of households who have none of the specified assets is found in Lakhipur tahsil. It is seen that tha number of households having car, jeep and van are less in all tahsils of the district.

IX Major social and cultural events, natural and administrative developmentsand significant activities during the decade.

The Hindus observe many festivals, ritualistic and others of local nature. The biggest festival of the year is the Durga Puja. The towns, tea gardens even thickly populated villages become agog with the Puja festivities day. The great preparation are made for days in all puja-centres to invoke the Mother-Goddess. The puja and the immersion ceremony attract all people.

Special festivals of the Assamese are the three Bihus and tithes or death anniversaries of the Vaisnavitee leaders which are performed in Goalpara district. The Assamese people observe three Bihus which are called Rongali Bihu, Bhogali Bihu and Kati Bihu. These Bihus are associated with the cycles of cultivation. The Kati Bihu is celebrated on the last day of Ahin (October) and is not an occasion of much importance. The Bhogali Bihu begins with the last day of the month of Puh (January). This Bihu is to some extent a youth's and children's festival and most of the merriment is confined to the youth and smaller boys and girls who sing and dance. The Rongali Bihu begins on the last day of Chaitra and the first day of Bohag which is the Assamese New Year<s day. It is a spring festival where dance and music are predominant. The Bihu is now observed as a national festival and serves to promote unity among different communities. The Bihu Geets constitute a prolific variety of songs in Assamese literature. The main idea of these songs is love in its different moods. Social visits are the main features of the Bihus.

The death anniversaries of Sankardev, Madhabdev and Mathuradas Bura Atta are celebrated in the district. Over and above ,Sivaratri is observed with much joy and rejoicing and hemp is offered to Lord Siva. Doljatra is also celebrated in some places of the district. Kali puja, Dewali, Biswakarma puja and Laksmipuja etc. are observed in the district. The Kachari tribe people observes their own traditional festivals. Kheriapuja, Habajandi, Natpuja, Bagirimba and Maigainai are some of these traditional festivals. The Deodhani dance is a common feature of the Kherai Puja. The Satriya dances introduced by Vaisnavite leaders are performed in the district. The tea garden labourers have their traditional Jhumur dance which are also performed in their functions.

Throughout the district, there are a number of cultural institutions. The main aim and objectives of the institutions are to promote cultural aspects in the district. The Assam Sahitya Sabha, the premier literary association of the state was established in 1917. The flag of Sabha bears the line "Chira Cenehi Mor Bhasha Janani". The principal aspect of the Sabha is to promote unity among all sections of people of Assam. It is a non-political organization of Assam. The first president of the Sabha was Padmanath Gohain Baruah. The annual function of the Sabha is being organized in every year in places selected for the purpose. Goalpara is not left out from this side. This Sabha is working hard for development of languages, literature and culture of Assam.

During the decade no such remarkable cultural and social activities were performed in Goalpara. In respect of natural and administrative development of the district no such important development has been undertaken for which mention can be made herein.

X. Brief description of places of religious historical and archaeological importance

The Surrya Than' is situated at a distance of about 14kms from Goalpara town near Marnoi. It is filled with Sivalingas. The Surrya Mandir has hundreds of images, a few of which are believed to be those of Tirthankar Jain probably belonging to the eight century A.D. There are also images of Lord Buddha, Dashbhuja Durga, Surrya and Chandra. It is opined that the Saint Vyas tried to build another 'Kashi' here by engraving 99999 Sivalingas.

About 3kms south of Krishnai on the National Highway No. 37 on Tukreswari hill, stands the Tukreswari Devalay. The Tukreswari is another name of goddess Parbati, consort of Lord Siva. It is said that while Lord Siva was jaunting on earth with the death body of Sati on his shoulder, a limb of her fell on the spot where the temple is established .The famous Tukreswari temple situated on top of a hill is dedicted to goddess Durga. The architecture and engineering skill of this temple are admirable. Pilgrims from all parts of India specially Sanyasis (devotees) or religious mendicants are drawn here for pilgrimage.This Tukreswari hill is infested by monkeys which provides an added attraction. Durga puja is being celebrated every year in this place. A big fair is held annually during Durga puja.

The original temple is almost destroyed due to the effect of great earthquake of 1897 but it was reconstructed in 1905. Every day, a large number of devotees coming from all corners visit the place and worship Lord Siva and Sati. The ruins provide ample scope for excavation and research into the antiquity of the district.

XI. Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

The major characteristics of the district can be cited to its agricultural aspect. The district is primarily an agricultural place. The people forming a major share from the rural have earned their livelihood from agricultural products. The forest is also a source of income both for villagers as well as the Government. Various valuable species are available in the forests of Goalpara district. Tea is also equally important in the district. A section of people meet their needs from working in tea gardens. Vegetables grow abundantly in the different places of the district which are marketed in and outside the district. Fruits of different kinds are also grown and exported to the markets for sale.

The historical figures associated with the district is its Shri Shri Surjya Pahar located at a distance of 13 kms from Goalpara town. The hill "Surjya Pahar" is situated at Dubapara which covers an area of 1400 acres land. In the surface of the hill, there are various statues of Gods & Goddesses alongwith serpents, birds, golden monkey and deer. The number of Shiva lingas lying in the hill is one-short from one lakh. It is a religious place not only for Hindus but for Buddhist and Jain for their religious relies found in the hill. Some are of the opinion that on the bank of Akashi Ganga, located near the hill, Biyashdev had written the great epic 'Mahabharata'. Seeing the relies found in the hill some opined that the king Dharmapal of Pal dynasty had started to establish capital of his kingdom. The archaeologists express their view that the king Kumar Bhaskar Barman wanted to set up his second capital in this hill. It is also opined that Satali hill which mentioned in the 'Ramayana' is said to be this hill and Hanuman had collected Bishaslya Karani to save the life of Lakshman, the brother of Ram. There are various other opinions about the Surjya Pahar. However, Goalpara bears a great historical testimony which forms a contribution in the form of historical figures toward the district.

XII Scope of Village Directory and Town Directory – column heading wise explanation and coverage of data

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code in col.No. 1. The name of village comes in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1. Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data

presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory. However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market/hat are deleted. Never the less, the innovation introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement – I: Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement – II: Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lacks and also 5 lacks, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement - III: Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement – IV: Civic and other Amenities, 1991.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, five fighting service, electrification etc. are presented in its respective columns.

Statement – V: Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement –VI: Trade, Commerce, Industry and Banking, 1999.

The statement consists of 11 columns and gives for each town information on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 shows the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement – VII: Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in limes), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Corporation, Municipal Board, and Town Committee in respect of statutory towns and for census towns from the revenue authorities of respective jurisdiction.

****

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

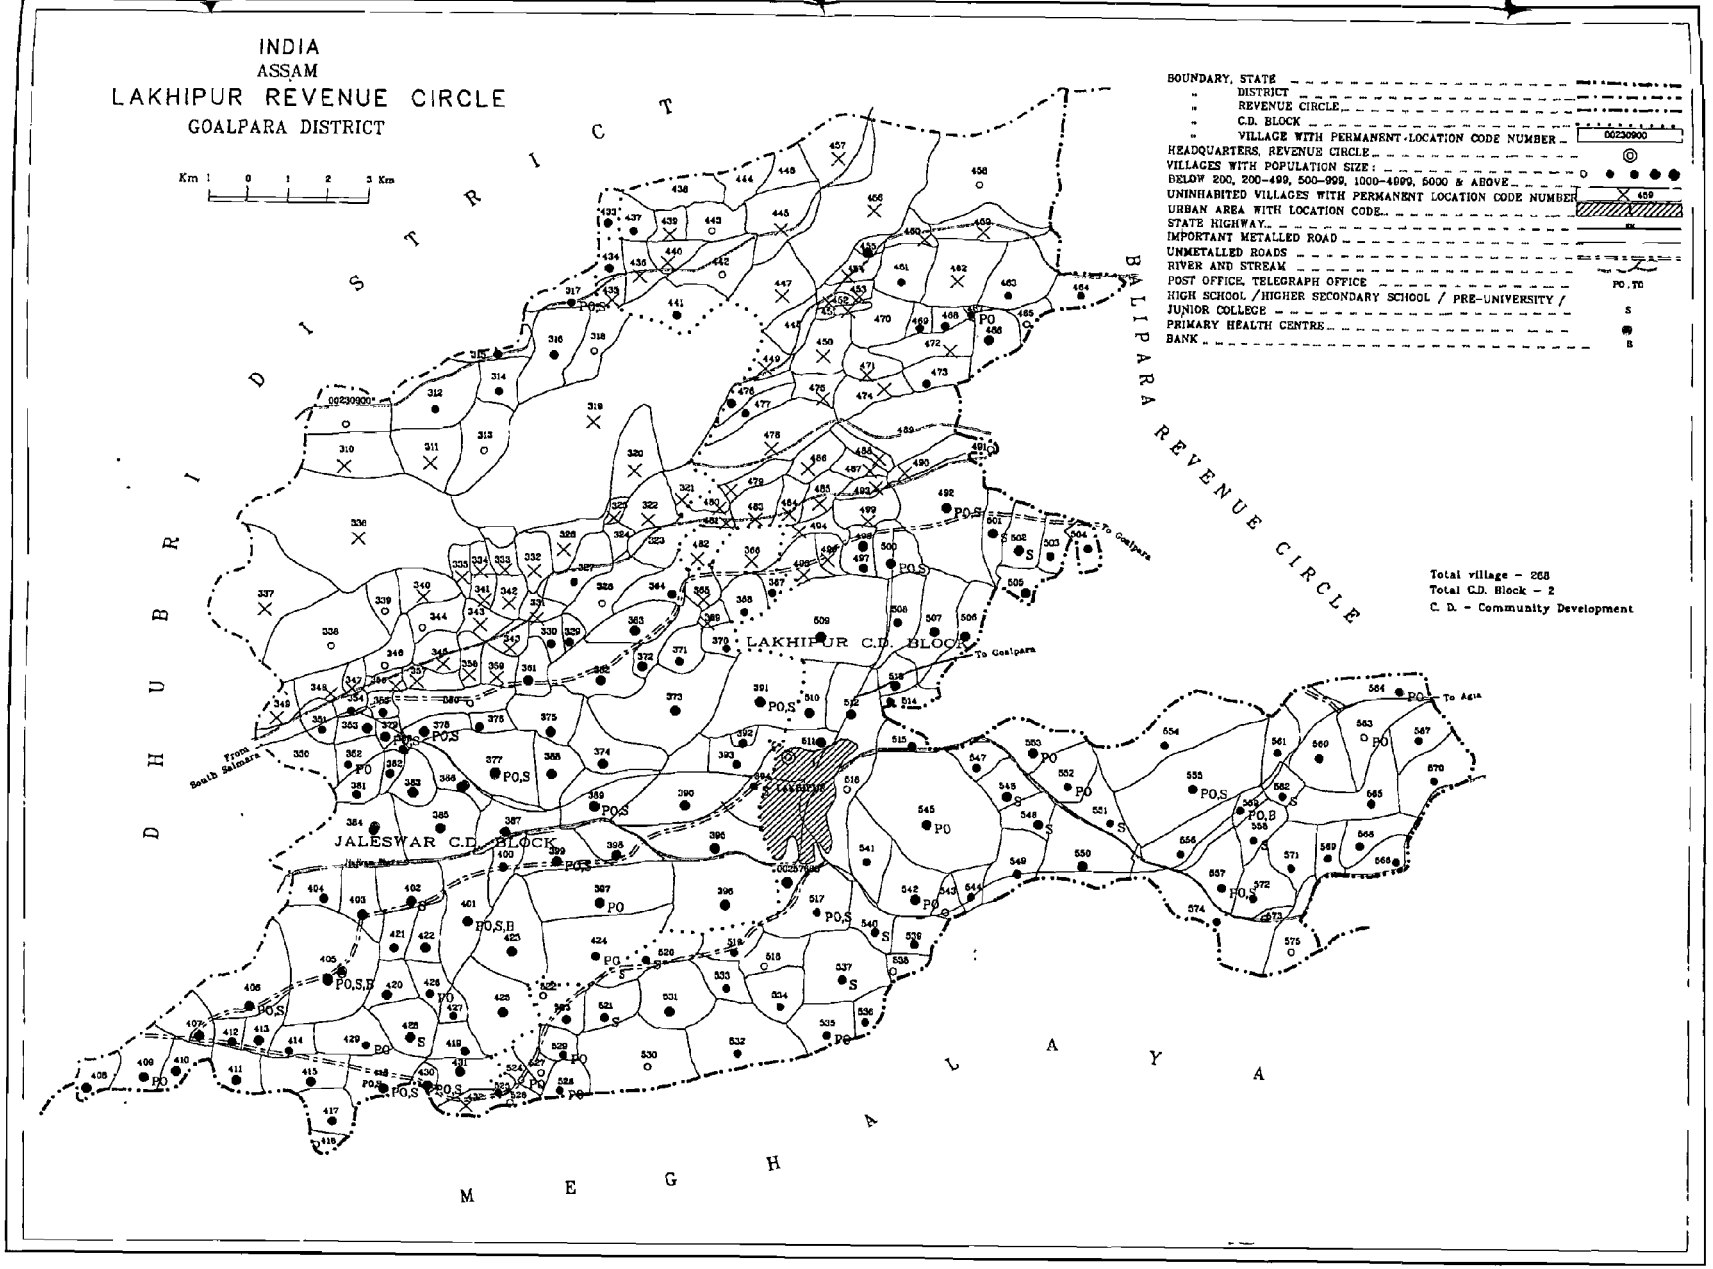

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.
Appendix-III	It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

Section II - Town Directory

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River-Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

STATEMENT - I

Status and Growth History

Sl. No.	Class, name and civic status of town	Location code number	Name of Taluk/ Tahsil/ Police Station/Island etc.	Name of CD Block	Area (in sq. km.)	Number of households incl. houseless households (2001 Census)	Population and growth rate (in brackets) of the town at the census

****

Part B - Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure I:- Number of villages under each Gram Panchayat

(Data is not available)

Annexure II:-Notes on fertility, mortality and migration, 1991 Census

Fertility, mortality, and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.

In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question was to only currently married women. The measures of fertility worked out are based on the F – Series Tables of 1991 Census pertaining to the Assam State and are defined as below.

Age Specific Marital Fertility Rate (ASMFR)

This is the average number of children born alive during the last year per married women of a particular age group.

Age Specific Fertility Rate (ASFR)

It is the average number of children born during the last year per women of a particular age group.

General Fertility Rate (GFR)

GFR is the number of children born alive during the last year per 1000 women in the age group 15 – 49.

General Marital Fertility (GMFR)

This is the number of children born alive during the last year per 1000 married women in the age group 15 – 49.

Total Fertility Rate (TFR)

It is the total number of children that would have born alive per women, has the current schedule of age specific fertility rates been applicable for the entire reproductive period.

Total Marital Fertility Rate (TMFR)

This is the total number of children that would have been alive per married women, has the current schedule of age specific marital fertility rate been applicable for the entire reproductive period.

Child Women Ratio (CWR)

It is the number of children in the age group 0 – 4 years per 100 women in the age group 15 – 49.

Annexure – III : Various measure of fertility and mean age at Marriage, 1991 Census

Fertility:

As seen through various indicator of fertility in the district, it may be seen that the TMFR of 149, GMFR of 213 TFR 4.5 and TMFR 6.63against the respective figures at state level are at 135,190,4.2 and 6.0 Various measures of fertility and other fertility related data are presented between in the following tables.

TABLE–I

Various measures of fertility in Assam State and Goalpara district-1991 Census

	Fertility Measure	Goalpara district	Assam state
	1	2	3
1.	G.F.R.	149	135
2.	G.M.F.R.	213	190
3.	T.F.R.	4.52	4.16
4.	T.M.F.R.	6.63	6.01
5.	Crude Birth Rate	35.21	31.47
6.	No. children ever born per woman in age group 45-49	5.87	5.19
7.	Mean age at marriage	117.50	18.39
8.	Child-woman ratio(0-4)	684	575
9.	Child-woman ratio(5-9)	854	737

In all fertility measures, the levels are found high in the district than that of the State levels. But the Mean Age at Marriage in Goalpara district is somewhat lower than the State average It, thus, indicates that the marriage takes place in the district at lower ages. The sizes of child woman ratio in both age groups are very high in the district than the State levels.

TABLE - II

District wise various measures of fertility and mean age at marriage, 1991 Census

State/District	GFR	GMFR	TFR	TMFR	CBR	No. of children ever born per ever married woman in age-group 45-49	Mean Age at Marriage of currently married women
1	2	3	4	5	6	7	8
Assam	135	190	4.2	6	31.47	5.2	18.3

8. Darrang	185	246	5.5	7.3	42	5.5	18
9.Sonitpur	141	201	4.4	6.5	34	5	18.6
10.Lakhimpur	149	211	4.7	6.8	34.1	5.1	18.2
11. Dhemaji	104	157	3.3	5.3	25.9	6.2	18.5
12.Marigaon	128	183	4	6.1	30.5	5.9	18
13.Nagaon	152	215	4.8	6.9	33.2	5.6	17.9
14.Golaghat	138	196	4.4	6.3	32.1	4.8	18.8
15.Jorhat	133	193	4.4	6.1	31.5	4.5	19
16.Sibsagar	136	196	4.3	6.3	31.1	4.5	19
17. Dibrugarh	110	213	3.4	6.8	24.4	4.6	19.1
18.Tinsukia	165	225	5.1	6.9	37.5	4.7	18.6
19.Karbi Anglong	140	207	4.4	6.8	33.1	5.1	18.8
20 NorthCacharHills	127	187	3.8	6.4	29.7	5.5	19.2
21.Karimganj	196	291	7.1	9.3	48.5	4.8	18.2
22.Hailakandi	136	196	4.2	6.4	32.1	5	18.2
23.Cachar	137	190	4.1	6.1	32.6	4.5	18.5

Mortality:

The Mortality figure in the district confirms the general theory of relation between fertility and mortality .The mortality rates are shown in the following table.

TABLE–III

Age Specific Marital Fertility levels in Assam State and Goalpara district–1991 Census

Age Group	Goalpara district			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0.161	0.157	0.216	0.151	0.152	0.133
20-24	0.236	0.238	0.212	0.214	0.219	0.165
25-29	0.196	0.199	0.162	0.183	0.192	0.12
30-34	0.174	0.175	0.161	0.134	0.14	0.093
35-39	0.097	0.102	0.032	0.087	0.094	0.042
40-44	0.044	0.046	0.016	0.049	0.052	0.022
45-49	0.026	0.027	0.000	0.033	0.034	0.025

The Age Specific Marital Fertility Levels are found higher in age- groups from 15-19 to 35-39 in the district than that from the state levels. Only in age- groups 40-44 and 45- 49 the ASMF levels are found low in case of total, rural and urban of the district than that of the state.

TABLE – IV

Estimates of Child Morality in Assam and Goalpara district, 1991

Mortality measure	Goalpara district	Assam State
1	2	5
Q(1)		
Persons	106	92
Male	109	96
Female	103	87
Q (2)		
Persons	111	101
Male	112	104
Female	110	98
Q (3)		
Persons	113	104
Male	119	106
Female	117	101
Q (5)		
Persons	133	116
Male	138	118
Female	127	115

Q. 1 of the above table shows the infant mortality rates for persons, males and females and Q. 2, Q. 3 and Q. 4 reveal the size of Child Mortality in age group below 2,3and 5 years respectively. It is seen in the table that the mortality age in Goalpara district are much higher than that of the state rates both for males and females. It can be therefore said that the status of health in the district is not satisfactory.

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 and 2001 Census.

The detailed data may be seen below in the following table .

Table - I

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH- 1991 ASSAM

	4.1	7.7	2.8	2.0	3.8	1.4

From the above table it is seen that migrants from elsewhere in the district outside the place of enumeration consists 74.6 percent of the total migrants of 20.1, from other state it is 3.3% and from other countries it is 2.1 percent of the total migrants.

Annexure V : Brief account of main religions in the district/ tahsil as per 1991 and 2001 Census.

Religion:

A brief account of religious composition of the population in the district along with state is presented in the following table.

TABLE - I

Main Religions in the Goalpara district and Assam state 1991 Census

District/State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Assam	Total population	22,414,322	100.00	88.90	11.10
	Hindu	15,047,293	67.13	86.18	13.82
	Muslim	6,373,204	28.43	94.71	5.29
	Christian	744,367	3.32	96.02	3.98
	Buddhist	64,008	0.29	93.00	7.00
	Jain	20,645	0.09	21.86	78.14
	Sikh	16,492	0.07	31.25	68.75
Goalpara	Total population	668,138	100.00	92.20	7.80
	Hindu	266,499	39.89	90.13	9.87
	Muslim	335,275	50.18	92.51	7.49
	Christian	52,745	7.89	99.58	0.42
	Sangsarek	627	0.09	100.00	Nil
	Jain	488	0.07	32.99	67.01
	Sikh	59	0.01	64.41	35.59

The figures in the above table show that compared to the state as whole the proportion of Muslims is more in the district. The Muslims who constitute about 28.43% of total population at State level but in the district their percentage is 50.18% Hindu consists 39.89% as against 67.13 at State level, which is also on lower side. However Christian have a share of 7.89% in the district. Sikhs and Jain though are negligible in number, their share is relatively less compared to the state averages. The Sangsarek is a new religion found in the district with a share of 0.09% population.

TABLE-II

Main Religions in the Goalpara district and Assam State - 2001 Census

District/State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%
1	2	3	4	5			6
Assam	All Religions	26,655,528	100.0	23216,288	87.1	3439,240	12.9
	Hindus	17,296,455	64.9	14477,966	83.7	2818,489	16.3
	Muslims	8,240,611	30.9	7714,619	93.6	525,992	6.4
	Christians	986,589	3.7	936,008	94.9	50,581	5.1
	Sikhs	22,519	0.1	7,634	33.9	14,885	66.1
	Buddhists	51,029	0.2	44,546	87.3	6,483	12.7
	Jains	23,957	0.1	3,603	15.0	20,354	85.0
	Others	22,999	0.1	21,608	94.0	1,391	6.0
	Religion not stated	11,369	0.0	10,304	90.6	1,065	9.4
Goalpara	All Religions	822,035	100.0	755,133	91.9	66,902	8.1
	Hindus	314,157	38.2	281,134	89.5	33,023	10.5
	Muslims	441,516	53.7	408,319	92.5	33,197	7.5
	Christians	64,662	7.9	64,423	99.6	239	0.4
	Sikhs	108	0.0	67	62.0	41	38.0
	Buddhists	178	0.0	160	89.9	18	10.1
	Jains	434	0.1	69	15.9	365	84.1
	Others	390	0.0	390	100.0	0	0.0
	Religion not stated	590	0.1	571	96.8	19	3.2

The figures in the above table shows that compared to the state as a whole the percentage of Muslim is more in the district. The Muslims which constitute 30.9 percent of the total population of state level is 53.7 percent in the district followed by Hindus 38.2 percent, Christians 7.9 percent Jains 0.1 percent and religion not stated 0.1 percent.

Annexure VI : Marital status of population as per 1991 and 2001 Census.

Marital Status:

The data on marital status of population Assam as well as in Goalpara District for each age group for males and females are presented below in the following table.

Table - I

AGE, SEX AND MARITAL STATUS OF POPULATION IN ASSAM – 1991 CENSUS

Age group	Total population		Percentage of population in each age-group							
			Never married		Married		Widowed		Divorced/ Separated	
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female

Note: Data on unspecified marital status are not taken into account but they are included in the figures shown in Col. No. 2 and 3.

A comparison of the District level figures of marital status with that of the state average reveals that the percentages of all class are almost equal to the state average. But never married males and widowed females are slightly higher than that of the state percentages.

The highest percentage of males and females married are found in age- groups 45-49 and 25-29 in the district respectively and the respective figures in the state are found in the age groups 45-49 for males and 35-39 for females.

A Comparison of the district level figures of martial status with that of the state averages reveals that the percentage of never married males and females is slightly higher than the state averages reveals that the percentage of never married males and females is lightly higher than the state average. In case of married males and females the percentage is lightly lower than the state average. In case of widowed males percentage is lower and females percentage is higher than the state percentage. Again in case of divorced/ separated males percentage is lower and females percentage is higher than the state percentage.

The highest percentage of merried males are recorded in the age group of 30-44 in the district being 96.7 percent and 90.3 percent respectively. The corresponding figures in the state level is recorded against males in the same age group and females in the age group of 35-39. Never married males and females being 15.7 and 5.0 respectively in the district which is lower than the state percentage of 22.1 and 6.3 percent respectively.

Annexure VII : Age, sex and Education in the district, 1991 and 2001 Census.

Education and Literacy rate:

Age-group wise Literacy rates for male and female in respect of both at state and district levels are presented below in the following table.

In the district, the literacy rates for males and females in all age groups are lower than that of the state except males in 60+ ages. It is seen that literacy rates age-group 15-19 is higher than that of all other age-groups both for males and females. However, it is lower than the state averages. Literacy rates are found high up to middle level. In the higher educational levels the literacy rates are found poor in the district than the state rates.

In the district, the literacy rate for males and females in all age group are very low as compared to the state, rates. It is also seen that percentage of literates is high in the age group 15-19 than in all other age group both male and female though it is lower than the state percentage. The table also shows that literate population are seen high up to middle level in all age group excepting in the age group 20-49. In the higher educational level it is found to be low excepting graduate and above in the age group 20-49.

Annexure: VIII: Distribution of different mother tongues returned in 1991 and 2001 Census.

Languages and Dialect:

The details information on number of population and their languages are presented below in the following table.

30	Sema	10,346	0.0	0	0.0
31	Total of Other Mother Tongues	1,032,125	3.9	12,513	1.5

As can be seen from the above table , the number of persons speaking Assamese consists of the major portion (45.5%) of total population in the district, followed by Bengal with (32.0 %), Garo (7.8%), Rabha (6.8%) and Bodo/Boro (4.1%). The population with all the other mother tongues each constitutes a negligible percentage.

Annexure - IX: Schedule castes and Schedule Tribes population, 1991 Census.

Scheduled Castes:

Out of total 668,138 population of the district 36,746 are S.C population. The caste wise population of some prominent castes are presented below in the table of S.C population among some prominent Scheduled Castes.

Table - I

DISTRIBUTION OF SCHEDULED CASTES POPULATION AMONG SOME PROMINENT SCHEDULED CASTES OF BONGAIGAON DISTRICT, 1991 CENSUS

Name of Scheduled Castes	Total Scheduled Castes population	Percentage	
		% to Total Scheduled Castes population	% to Total Scheduled Castes population of the District
1	2	3	4
1. Namasudra	11,163	30.38	1.67
2. Kaibartta or Jaliya	10,095	27.47	1.51
3. Sutradhar	5,379	14.64	0.81
4. Jhalo,Malo or Jhalo Malo	3,888	10.58	0.58
5. Hira	2,934	7.98	0.44
6. Brittâl-Bania, Bania	624	1.7	0.09
7. Muchi,Rishi	572	1.56	0.09
8. Others	2,091	5.69	0.31
All Schedule Castes	36,746	100	5.50
			(668,138)

N.B. 1. Others include Banphor, Bhuinmali/Mali, Dhupi/Dhubi, Dugla/Dholi, Jalkeot, Lalbegi, Mahara, Mehtar/ Bhangi, Patni and unclassified castes.
2. Bracketed figure is the total population of the district.

In the above table it is depicted that the Namasudra is the prominent caste of the district having a share of 30.38% of total S.C population followed by Kaibartta or Jaliya with 27.47%. The Sutradhar occupies the 3rd place with 14.64% followed by Jhalo, Malo with 10.58%. The remaining castes consists of less than 8% by each. Out of the total population of the district, the Namasudra consists of 1.67% followed by Kaibartta with 1.51% whereas the remaining castes occupy less than 1% each.

Scheduled Tribe:

The Scheduled Tribes constitute 1,723 of the total population of the district. The data relating to some prominent tribes population are presenting below in the following table of Scheduled Tribe population among some prominent Scheduled Tribes.

Table - II

DISTRIBUTION OF SCHEDULED TRIBES POPULATION AMONG SOME PROMINENT SCHEDULED TRIBES OF BONGAIGAON DISTRICT, 1991 CENSUS

Name of Scheduled Tribes	Total Scheduled Tribe population	Percentage	
		% to Total Scheduled Tribes population	% to Total Scheduled Tribes population of the District
1	2	3	4
1. Boro Rabha	80,694	70.11	12.08
2. Boro Kachari	31,048	26.97	4.65
3. Kachari Sonowal	2,657	2.31	0.40
4. Mech	244	0.21	0.04
5. Hojai	154	0.13	0.02
6. Others	302	0.28	0.04
Total S.T s	115,099	100.00	17.23
			(668,138)

Note: 1. Others include Deori, Lalung Miri, and unclassified tribes.
2. Bracketed figure is the total population of the district.

In the above table it is seen that the Rabha tribe is the prominent tribe in the district having a share of 70.11% of the total tribe population. The second largest tribe is Bodo/Boro, Kachari with share of 26.97% amongst the tribe followed by Kachari, Sonowal (2.31%). The remaining tribes have their meager percentage in the district. Out of 17.23% total tribe population of the district, 12.08% is the Rabha population.
