Ojapali

Ojapali is one of the unique form of arts of Darrang, which involves three art forms - Song, Dance and Drama. It is performed by a group of four or five men of whom the chief performer is called *Oja* who is supported by 3 to 4 *Palis*, and hence the name *Ojapali*.. The only instrument played by *Ojapali* is *Khutitaal* (palm sized Cymbal). The performers wear long sleeved white gowns, silver jewelry etc. and *Nupur* (bundle of tiny metallic percussion played by body vibrations). As the history goes, there were two very talented singers named *Barbyahu & Sarubyahu* during *Koch* Kingdom. With time, their style got popular among people of the area and *slowly Ojapali* took into two forms, as *Byah* and *Sukananni* basing on the occasion and style. The central subject of this Byah Ojapali are the epics - Ramayana & Mahabharata. *Sukananni Ojapali* aims at presenting the tragic story of *Behulaa Lakhindar* from *Padma Purana* among the masses.

Annexure	IX	Distribution of Scheduld Castes and Scheduled Tribes in 1991 and 2001 Census	668

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

District Highlights – 2001 Census

1 In Darrang District, Dalgaon Revenue Circle/ Tahsil is most populous having 409,358 persons while Khoirabari Revenue Circle is the least populous circle having 84,731 persons.

2 Among the CD Blocks, Sipajhar CD Block has highest number of population with 200,663 whereas the lowest is found Rowta CD Block with 63,969

3 In the district there are 9 Revenue Circles and 11 CD Blocks which comprise 1,341 villages including 22 uninhabited villages.

4 The district comprises four towns. Mangaldoi MB is the most populous with 23,920 persons while Udalguri is the smallest in population with 14,897 souls.

5 While the highest number (248) inhabited villages is found in Udalguri CD Block and the lowest (49) inhabited villages is found in Khirabari CD Block.

6 The largest village by area is Mandalpara with 27,042 hectares of land under Dolgaon- Sialmari CD Block while in the district, the smallest village in the area is No.2 Rawta Station with 8 hectares of land under Rowta CD Block.

7 The largest village by population is Kira Kara NC with 7,596 souls which is situated at Sipajhar CD Block and the smallest village is Dakhin Kuruah with 2 persons only under Sipajhar CD Block.

8 The district is well known for her large number of Satras founded by Vaisnavitee reformer Shri Shri Sankar Dev and Shri Madhab Dev.

9 Khatra satra is a famous and an important religious place in the district

10 The District has 134 number of Char Villages.

The statement-9 gives the houseless and institutional population of Revenue Circles for rural and urban. The population and number of households of both houseless and institutional are more in rural than in urban. Among the Revenue Circles, Dolgaon Revenue Circle with 124 houseless population is the highest and the lowest is noticed in Khoirabari Revenue Circle with 2 persons. Harisinga Revenue Circle with 114 number of households having 2,338 persons stands in first position in the distribution of institutional population among all Revenue Circles and the lowest is noticed in Khoirabari Revenue Circle with 48 persons only.

ANALYTICAL NOTE

ANALYTICAL NOTE ON DARRANG DISTRICT

(i) History and scope of District Census Handbook

District Census Handbook is the most valuable publication brought out by the Census Organisation on behalf of each State Government. This provides information on some basic demographic and socio-economic characteristics and availability of important civic amenities in each Village and Town of the district.

The publication of District Census Handbook was first initiated during 1951 Census in collaboration with the respective State Governments. In 1951, only some demographic and socio-economic information at Village and Town level along with some Census tables were published in District Census Handbook. Since then, it has undergone radial changes during the subsequent decades and has been grown substantively both in its scope and content by incorporating more Census tables and also some basic statistics on land use pattern, agriculture, industry etc. The DCHB of 1961 was considered as a unique asset published by the Census organisation. In 1971 Census, further improvements were made by enlisting many more information on Villages and Towns in the form of Village and Town Directory. It had three parts. The Part-A related to Village and Town Directory, Part-B contained Village and Town-wise Primary Census Abstract and Part-C dealt with administrative aspect and Census Tables based on PCA etc. The 1981 Census again widened the scope of DCHB. to cover more data on literacy, health care etc., in addition to the information covered in 1971 DCHB. It was divided into two parts. The Part-A included data on Village and Town directory and Part-B was devoted for Village and Town-wise Primary Census Abstract. However, this part of the DC.B. was not brought to light in Assam as no Census was conducted due to prevalence of disturbed condition in the State. In 1991 Census, the DCHB was divided into two parts. The Part-A consisted the Village and Town directory data and Part-B presented the data of Primary Census Abstract.

As a tradition of the past, in the present DCHB also, some more information on availability of facilities, such as credit societies, banks, recreation and cultural institutions, news paper and magazines etc. are included. Further, information on income and expenditure, important commodities manufactured, exported and imported etc., are also included to give a fuller account to the scope of these directories. Similarly in Town directory also, few more information are included.

The process of collection and compilation of these data involved lot of exercises. At first, revenue circle-wise information on each village has been collected by revenue authorities at district level. These data are compared with 1991 figures at district level and after thorough scrutiny and cross-check, these records are submitted to the Census directorate. In case of Town Directory, data have been collected directly from the Commissioner of Municipal Corporation and Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 at Census directorate. Thereafter efforts are made to compare and cross-check with similar data made available from other sources especially data published by various Departments of State Government to verify the authenticity and correctness of figures received through Village and Town directory booklets. After that only, the compilation and computerization of these data have been made according to the instructions of the Registrar General and Census Commissioner, India. Therefore it is regarded that, because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication than compared to earlier publications brought out in this line.

(ii) Brief history of Darrang district

The name of the district appears to have originated from the term Darrang Raja, a branch of Koch Kings. Dharmanarayan was known as the founder of the dynasty of Darrang Rajas. The present Mangaldoi area was at that time known as Darrang Desh, even after annexation of Assam by the British in 1826. It is also believed that, the word Darrang might have been used by the aboriginals of this

district, who were of the Tibetan stock. This name may have been borrowed from the Daflas or the Bhutias, whose main duar or pass for coming to the plains from Himalayan ranges lay along the course of Barang river. They called it Duar-ganga, which after corruption to Duaranga may assume the present form of Darranga or Darrang. However, Lt. Mathic, in his report on Darrang district (1835), has observed that Darrang means land of flood and is derived from Dur and Rung possibly Ahom words.

This district, which once formed a part of the ancient Kamrupa was ruled by three dynasties viz., the Varmans, the Salastambhas and the Pals. Pushyavarman, who was the first important ruler of Varman dynasty, is quoted to be flourished in the middle of the fourth century A.D. and this dynasty ruled over Kamrupa for about three hundred years. Of this dynasty, Baskar Va rman (594-650 A.D.) was the greatest monarch even among the most remarkable rulers of ancient India.

The dynasty of Salastambha family is believed to have commenced after the end of Baskar Varman's rule. This family was called as Bhaumas of Haruppesvara, which is identified with Tezpur.

The kingdom of Kamrupa, after the death of the last king of Salastambha dynasty towards the end of the 10th century, passed into the hands of Brahmapala, the founder of the Pala family and this line of Pala Kings ruled for about one hundred fifty years. The last king of this dynasty was Jaya Pala, who expired in 1138 A.D. Darkness descends on the history of Kamrupa after the fall of the Pala dynasty and next successors.

According to records, the Ahom king Suhungmung alias Dihingiya Raja (1497-1539 A.D.), occupied the territories on the north bank of the Brahmaputra in 1505 A.D. when Bar-Bhuyan were ruling there in small principalities. They defeated the Chutiyas in 1523 A.D. The Ahom territory was soon exposed to the Koch and the Muslim invasions. The Muslims invaded the Ahom territory thrice and many decisive battles were fought in Darrang. Soon after this, Biswa Sinha, the first Koch king conquered Darrang and rose to power in about 1515 A.D., where the Bara-Bhuyan still had some semi-independent principalities in several parts of this district.

After Biswa Sinha's death in 1540 A.D, his eldest son Malladev, who assumed the name of Naranarayan, took the throne and his brother Chilarai was appointed as the commander-in-chief. The reign of Naranarayan represents the Zenith of Koch power. They invaded the Ahom territory in 1546 A.D. and rulers of Manipur, Jaintia, Tipperah, Shylet, Khynim and Dimarua, were all brought under subjugation, besides the Ahom king who was also subdued by the Koches. Thereafter, Suklenmung (1539-1552 A.D.) regained the lost territory in Darrang from Koch in a great victory. Naranarayan captured this territory again in 1563 A.D. The entire territory north of the Brahmaputra remained in the hands of Koches. The Ahom king Sukhampa (1552-1603 A.D.), the successor of Suklenmung made vigorous attempts to recover their lost territories. After his death in 1603 A.D, Pratap Sinha ascended the Ahom throne.

After Naranarayan's death in 1584 A.D., quarrel began between his son Laxminarayan and Chilarai's son Raghudev. Raghudev was succeeded by his son Parikshit, who soon became involved in hostilities. Laxminarayan sought the help of Nawab of Dacca to subdue Parikshit and Parikshit approached Ahom king Pratap Sinha for help but no avail. In 1619 AD., the Mughals defeated Parikshit and his kingdom was annexed to Mughal empire. Parikshit's brother Balinarayan sought shelter under Pratap Sinha. In 1616 A.D. Pratap Sinha inflicted a crushing defeat on the invading Muslims on the banks of Bharali and appointed Balinarayan as the protectorate king and the tributary Raja of Darrang in 1616 A.D. with a title Dharmanarayan.

The history of Darrang after Balinarayan, centers mainly round the Ahom kings, who began to strengthen their hold on the Darrang Rajas. The struggle between Muslims and Ahoms for capturing each other's territory started after 1617 A.D. But in 1637 A.D., the Muslims, who were advancing towards Kajali, defeated Ahoms. In the counter offensive, the war ended with a treaty between Muslims and Ahoms, specifying each other's boundaries.

Dharmanarayan succeeded by his son Mahendranarayan, and after his death in 1643, Chandranarayan succeeded him. Chandranarayan shifted his capital to Mangaldoi and successfully resisted the onslaughts of Bhutias. After his death in 1660 A.D., Suryanarayan became the Raja of Darrang under Ahom king Jayadhwaj Sinha, successor of Pratap Sinha.

Mir Jumla, the Governor of Bengal made an attack on Assam on 4th January 1662 and captured Gauhati. Jayadhwaj Sinha died in November 1663 and he was

succeeded by Chakradhvaj Sinha (1663-1669 A.D.). In 1667 A.D., he recaptured Gauhati and extended their territory to the Manas river and regained Darrang. On hearing this, Aurangzeb sent a big army against Ahom, which reached Rangamahi in February 1669 A.D. and advanced up to Tezpur. But Ahoms gained a decisive victory over Moghals in 1671 A.D. during the reign of Udayadithya, the successor of Chakradvaja Sinha. Mughals retreated to Rangamati. Udayadithya was succeeded by Gadadhar Sinha (1681-1695). The zenith of Ahom power was reached during the reign of Rudra Sinha (1695-1714), who succeeded Gadadhar Sinha. But his son Siva Sinha (1714-1744 A.D.) was a weak prince. Indranarayan was the king of Darrang during this period and Ahoms greatly curtailed his powers. Most of the area placed under the direct administration of Ahoms.

During the period of Kamaleswar Sinha (1795-1810), who succeeded the Ahom throne in 1795, there was a series of insurrections in several parts. The Daflas and Moamarias rose in rebellion. Burmese invaded Ahom and intruded upon British territory, which led to British intervention. Soon after a war between British and Burmese, the treaty of Yandaboo took place on February 24, 1826, which led to the eventual annexation of Assam to the East India Company and Darrang became part of it. This was tagged with Lower Assam and administered from Gauhati till 1833, when it was separated and erected into a district known as Darrang with head quarter at Mangaldoi. In 1835, the headquarter of the District was shifted to Tezpur. In 1983, when a new District of Sonitpur was created comprising the area of Tezpur Sub-Division, Tezpur became the District headquarter of Sonitpur district and Mangaldoi became the headquarter of Darrang district.

(iii) Administrative Set -up

District Administration :

The Deputy Commissioner of the District is the overall in charge of the administration of the entire district. He also acts as the Collector in case of Revenue matters, as a District Magistrate in case of maintenance of Law and Order and General Administration, as a District Election Officer in case of conduct of Election, as a Principal Census Officer while conducting Census, and so on. A number of Officers, like Additional Deputy Commissioners, Sub-divisional Officers, Extra Assistant Commissioners and others assist the Deputy Commissioner in looking after the administration of the district.

From the developmental angle, Darrang district is divided into 11 Development Blocks. Below the block level set-up, there are 155 Gaon Panchayats, each comprising a number of villages and governed by local-self bodies. From the angle of Police administration, the district area is divided among 10 Police stations.

(iv) Physical features

Location

The district of Darrang lies between 26° 11' 15" N and 26° 56' 15" latitutte and 91° 42' 00" and 92° 23' 30" longitude. The district lies between the Brahmaputra river on the south and the foot hills of Himalayas forming parts of Bhutan and Arunachal Pradesh on the north. To the east, it is bounded by the Sonitpur district and to the west by Kamrup district. This district covers a total area of 3481 hectares and a total population of 1,429,492. In terms of total area covered, this district occupies the 9th rank among the districts of the state.

Topography

The district intersected by numerous hill streams is almost quadrilateral block of alluvial plain, with an abrupt southward slope in the north and the level falls in the south, with a dip towards the south-west. The northern sub-mountain tract, which is about 19 to 22 kms in width is inhabited mainly by the Kacharis and Nepalis. This tract has a steep southward slope of 150 to 120 metres, in about four to six kilometres. The elevation, where this slope ends is 76 metres above the mean sea level and falls in the middle of the plains. The Khalingduar Reserved Forest and Bhairavkunda area is at the peak of 150 - 250 mtrs. height. This is touched by another thin belt of 100 to 150 mtrs. high, The central belt of the district is at 50 - 100 mtrs. and covers 40% of the district. To the south, this elevation gets further reduced. The Brahmaputra maintains a level of 10 to 50 mtrs.

The soil is composed of loose sandy texture with occasional sands and gravels. Water is scarce in the upland country, primarily because the turbulent hill rivers do not inundate large tracts for long and the rain water is quickly soaked in the sandy soil. The Northern part of this area is largely covered by tea

gardens fringed here and there by villages of ex-tea garden labourers.

The middle part of this district, forming the second natural division where the slope of the landscape is gentler than the northern sub-mountain tract is an alluvial plain.

The third division lying in the extreme south is the most populous part of the sub-division, where the flat alluvial plain is covered with stretches of rice lands interspersed with homesteads of Assamese Hindus and Muslims. The tract on the northern bank of the Brahmaputra is a low flat alluvial plain, covered with reeds or tall grasses. In the eastern part of this district on the plain situated on higher level and broken here and there by the old bed of the Dhansiri river.

Hill

The District comprises mainly of plain areas dotted by small hillocks. The northern part of the district is generally hilly areas and the southern part of the district is covered with forest and hillocks. There are no such high hills in the main land except a range of nine low hills in the south-western corner on the banks of the Brahmaputra. One of these hills is the Kurua, which is traditionally associated with Kauravas. On another hill, there is a shrine of Ganesh. Besides, there are few spurs on the northern sub-mountain tract, which are offshoots of the Bhutan hills.

Drainage and River system

The whole of the drainage of the district ultimately finds its way into the Brahmaputra, which flows along the southern boundary of this district. The river is wide and deep here, and remain navigable throughout the year.

Jia Dhansiri river is one of the important tributaries of the river Brahmaputra in Mangaldoi sub-division. It emanates from the Bhutan hills and has an approximate total length of about 80 kilometres from its source to out-fall. Another river is Noanadi, which also originates from the Bhutan hills, and collects some drainage from the hills before reaching the plains. After entering into the plains, it flows about 72 kilometres in Darrang district and ultimately joins the Brahmaputra. In its upper reach, the river is known as the rivers.

The river Nanai also has its origin in the Bhutan range of the Himalayas in the Tongsa province at an elevation of about 1220 meters above the mean sea level. After crossing the Bhutan boundary, the river enters the Darrang district and traverses through

khalingduar forest where it flows through gorges and rapids till it enters the plains near Bhutia chang village. After flowing about 19 kms from Bhutiachang, the river crosses the

North Frontier Railway line near Tangla Railway station. Further flowing towards south, in a curve for a distance of 69 kilometres, the Nanai joins the Brahmaputra at about 16kms up stream of North-Guhawati. The river Nanai is approximately 104 Kms in length and has its catchment area of 504 sq. kms.

Besides the above, there are some other important tributaries and numerous streams and streamlets, locally called Jan which carry off the drainage of the hills into the Brahmaputra. In addition there are some beels (ponds), marshes and tanks in the district, which are called as Pukhuris. Kowari Pukhuri, at a distance of 5 kms west from Biswanath Chariali, covers an area of 48 bighas or about 6.2 hectares. There is a big tank in Mangaldoi known as Town Pukhuri and two more at a distance of 29 kms west of Mangaldoi, which are known as Dologuri Pukhuri and Padum Pukhuri near Dologuri.

Since the north is at high level and hilly, and southern part is low and plain, the district can be clearly divided into 3 belts regarding Ground Water Potential. The thin north belt has a potential of 5 to 10 ltrs. /sec., while the major central belt maintains a range of 10 to 25 ltrs. /sec. The south belt enjoys a generous 25 to 40 liters/sec.

Flora and fauna

Evergreen and semi evergreen forests flourish in alluvial soft, having capacity to retain much water throughout the district. The main species found in these forests are: Sam, Guserai, Titasapa, Makai, Nahar, Khair, Ajhar, Kathal, Sanalu, Gumari and Uriam. These are used for posts, planks, scantling and sleepers.

In addition enough bamboos, canes etc. are also found in the forest areas. In thick forests, there are herds of elephants and bison and numerous deer. Buffaloes, tigers, leopards, mithun and various kinds reptiles and amphibians are found in the district.

Climate and Rainfall

The climate of the district is characterised by the absence of a dry hot summer season, the highest

temperatures being experienced during the south-west monsoon season along with abundant rains and highly humid atmosphere throughout the year. Winter starts from December and ends in February, which is followed by a season of thunder storms, from March to May. Next from June and up to the beginning of October is the season of south-west monsoon and October and November are marked as post-monsoon season.

Rainfall

The annual rainfall varies from 1500 mm. to 2600 mm. The average annual rainfall in the Darrang district which included Sonitpur district also prior to the formation of Sonitpur district is stated as 2182 mm. Actual rainfall in the district after creation of Sonitpur as a separate district was 2965 mm during December 1988 to November 1999. The Orang N.P. and Kalingduar R.F. come under the lowest rainfall zone. The highest rainfall occurs at a small western part including Tangla & Kalaigaon. The district receives maximum rainfall during the months May to September.

Rainfall increases from the Brahmaputra in the southern boarder of the district to the hills of the outer Himalayas on the north. Rainfall, mostly as thundershowers, amounting to about a fifth of the annual rainfall is received in the pre-monsoon months of April and May. The southwest monsoons, arrives over the district by about the beginning of June. The rainfall in the period June to September accounts for about two-thirds of the annual rainfall.

The drainage system is inadequate in the monsoon. Recurrence of flood during monsoon due to heavy rainfalls in the district and neighboring Arunachal Pradesh and Bhutan causes loss of crops and other properties almost every year. In recent years the District experienced heavy floods, to be precise, flash floods, due to heavy deforestation towards northern part. The people of the district, who mainly depend on rain water for their cultivation are often badly affected on one hand by floods and on the other hand by occasional dry spell.

Temperature:

The cold season starts towards the end of November when both day and night temperatures begin to decline. January is the coldest month of the year with the mean daily maximum temperature at about 24° C and the mean daily minimum at 9° C to 11°C. In association with low pressure waves passing eastwards during the winter season, the district experiences cold spells of a day or two when the minimum temperatures may fall below 5°c. Temperature begins to rise from the beginning of March. The rise in temperature continues well into the south-west monsoon season, when temperatures are higher than even in the period March to May. The highest mean daily values of temperatures experienced in July and August when the mean daily maximum temperature is about 32°'c and the mean daily minimum is 25°'c. This together with high humidity (highest during the year) makes the south-west monsoon season rather unpleasant particularly when not raining. With the termination of the monsoon season the weather becomes gradually cooler.

The air is highly humid throughout the year, except during the period February to April when the relative humidity are comparatively less(less than 70 percent), particularly in the afternoons. Skies appear heavily clouded to over east in the south-west monsoon seasons. There is a decrease in cloudiness after the withdrawal of the monsoon and during the period December to April, skies remain usually clear or lightly clouded. Winds are light throughout the year except for short spells of strong winds during thunderstorms in the period March to May.

On the basis of temperature, again the district is divided into two belts in East-West direction. The middle belts are the hottest, where temperature goes up to 36° C and the northern belt is the coolest, the temperature goes below 10° C here. Other parts experience temperature ranges around 22°. The mean relative humidity here is around 82%.

Soil:

Acidity is the general characteristic of the soil of the district and more so in the order alluvium soil. New alluvial soils representing the lands of the river banks are less acidic. These are often neutral and even alkaline. The phosphoric content is good in the river side of the Brahmaputra where tea is grown. Acidic alluvial soils are suitable for cultivation of tea.

The northern part of the District consists of the vast tracts of marshy Tarai-land of Bhutan hills filled up by alluvial and colluvial deposits, forming light textured soils with a loose stratum. Major part of the district, mainly southern part, is Younger alluvial entisols. The central portion is covered by older alluvial alfisols. The northern part, is brown red and

yellow allfisols, tarai mollisols and small amount of bhabar.

Heavy clay with high percentage of nitrogen in low land areas give a good return of rice, while sandy looms above inundation level give a good yield of crops. Overflowing of the rivers replenishes the soil every year by depositing silt. The potash (k20) content is low in some soils and moderate in others.

Socio-cultural features

Land and People

With an area of 3481 Sq Kms Darrang district has about 14.29[1] lakh population with a density of 373 persons per Sq.Kms. Out of total population, 7.33 lakhs are males and 6.95 lakhs are females. About 95 % of the population are in rural and remaining 5 % are in urban. Literacy rate for population above 6 years is recorded as 63.9 for males and 46.4 for females in 2001.

Language & Dialect

Assamese, Bengali and Boro are the important languages spoken by the people of the Darrang District. About 67% of total population returned Assamese as their Mother tongue in 1991, whereas Bengali and Boro are returned as 14% and 10% respectively. Except Rabha, which is the mother tongue of 1.1% population, remaining percentages of population returned other languages as mother tongue is less than 1%.

Religion

The Hindu, forming 60.54 % of the total population is the major religion, then followed by 31.98% Muslims. Except Christians, who makes about 6.31% all the remaining religions do not even comprise one percent of the total population.

Saktism : Hindus consist most of followers of Sakti or worshippers of reproductive powers as manifested in the female. The two manifestations of Sakti are namely Durga & Kali. Kali is worshipped on the night of Shyama Puja by the deout saktas. Maroi Puja, which is a form of worship of Sakti or Kali is observed by the Saktas on special occasion.

Goddess Padmavati, who is regarded to be the daughter of Lord Mahadeva, is widely worshiped, particularly by the Saktas of Darrang district. This Pooja is associated with a dance known as "Deodhani" dance and singing of a popular Ballad by "Oja Pali".

Vaishnavism : Most of the Hindus here are Vaishnavites. Every Vaishnavite is the disciple of some particular Gosain or priest. In fact Vaishnavites of the Assam valley can be divided into the Maha Purushia and Bamunia or other Vaishnavas as they have been called in the Census tables of Assam Census Report for 1901. The former will accept even a Sudra as a religious guide; worship no God but Krishna and are uncompromising in their hostility to idols, but the latter will recognise only Brahmans as their Gosains, permit the adoration of other deities such as Siva and Kali in addition to that of Krishna and allow sacrifices to be offered in their honour. The Bamunians are also more liberal in their diet and can eat goats, pigeons and ducks a form of food that is not allowed to orthodox Vaishnavites in Bengal[2]. In Mangaldoi, the great Gosains of the Majuli, claim many followers, but a certain number of the people are the disciples of the petty Gosains whose Sattras are situated in Darrang district. In each village there is a Namghar or large barn like structure in which the people assemble for prayer.

Islam : As already mentioned, Muslims who formed one-twentieth of total population in 1901 now consists roughly about one third (32%) in 1991, a biggest group next to Hindus. It is believed that, in the seventeenth century A.D., some Muslim expeditions though made some influence on some poor people in the district, but after the expulsion of the Muslims from Kamrup in 1681 A.D., the simple villagers who had been converted to the faith of Islam began to return to Hinduism. B.C. Allen states as follows:

" They (Converts) practised circumcision and offered prayers after Muhammadan fashion it is true, but they could not read the Koran. They dressed, shaved and worshipped idols like Hindus, they eschewed beef and declined to kill a cow and in times of sickness and trouble endeavoured to obtain relief by reciting mantras and singing hymns."[3]

This continued till 1880, but when a revival of true Muhammadan faith was started by a preacher called Zalkad Ali or Safi Saheb who spent some years in Mangaldoi. Influenced by his faith, Muhammadans abandoned their Hindu superstitions, allowed their beards to grow and took to eat beef. However, they have not succeeded in entirely freeing themselves of the ideals they borrowed from the Hindus.

Social life

Socio-cultural life of the people has been moulded mainly by three principal religions namely Hinduism, Islam and Christianity. In the families of Hindus, the property is generally held by the head of the family who manages it as its custodian. The joint family system which was common in the past, is disappearing now-a-days.

Marriage:

The forms of marriage among Hindus in vogue are the 'Hompura' or full Hindu rite, when the sacred fire is lighted and a priest is engaged to perform the ceremony. Brahmins, Kayasthas and well-to-do Kalithas invariably perform 'Hompura' ceremony.

But Ahoms are often married by the Chaklong rite, in which the box (temi) in which betel nut is carried and the knife (Katari) with which betel nut is cut are exchanged and the nuptial knot is tied.

Here infant marriage is practically unknown. Among the Assamese Hindus, marriage by negotiation is common. Here the caste distinction is not rigid as it was a few decades ago; nevertheless the inter-caste marriages are not very frequent among them. Although permitted by law, remarriage of widow is not looked upon with favour by the high caste Hindus.

Drinking is common among the tea garden labourers and tribal people. And also, religious taboos, scarcely deter the non-tribals from drinking which they take in a moderate scale

Home Stead.

In rural families, the following are the houses generally found. Choraghar (Receiption house), Barghar (living house), Bhoralghar (Store house), Gohainghar (House of worship) and Gohalighar (Cowshed). These houses in most cases have thatched roofs, mud plastered ekra (reed) walls and bamboo or wooden posts. At present many people have constructed their houses with pucca plinth and C.I. sheet roofing with up to date fittings.

Dresses

Male dress includes dhoti, chadar, shirt, trouser and modern pants and coats. Female dress consists of riha, mekhela, chadar, blouse and their ornaments include keru, mani, kharu, jhangphai-keru, dugdugi, bena, necklace, chain, earring bala etc

Festival

Colourful festivals observed in the district enliven the lives of the people. Important festivals of the year are Durga Puja, Sivaratri, the Dol-jatra and important pujas are Viswakarma puja, Sarswati puja, Lakshmi puja and Kali puja.

The special festivals of the Assamese of the district are the three Bihus:– the Rangali Bihu (April 14), Bhogali Bihu (Jan. 13 or 14) and Kati Bihu (Oct. 14th) which are associated with the cycles of cultivation. Rangali Bihu is the festival, where groups of Assamese people dance and sing the Bihugit. As the girls dance, the boys play on flute and beat drums and blow the pepa, made of buffalo-horn and taka.

The Namghar is the community prayer hall of the villagers, who held prayer services known as nam-kirtan during religious festivals. Exquisite folk songs and Ballads such as Biya-nam (marriage songs), Tokari git (songs of the mendicants), Ai-nam (songs in praise of Goddess) etc., are sung in the district.

Songs and Dances in Darrang

Darrang has a population representing diverse ethnic, religious and linguistic communities, which have rich cultural heritage and social customs. Some of the prominent art forms of the Darrang are as follows:

Bardhuliya: This art form is performed by men (Dhuliyas), in a group of 10 or more. Dhuliyas play Bardhol, which is a cylindrical percussion instrument measuring about one meter in length and half meter in diameter. The Bardhuliyas are speciallised in exhibition of rhythmic somersaults, while playing the Bardhol. Bardhuliyas perform in religious occasions such as Deul in spring, the Mothenee in Kati (Nov. in Julian calendar) month, Durga festival (middle of Oct.) or other ceremonies.

Ojapali: Ojapali is one of the unique art form of Darrang, which involves three art forms - Song, Dance and Drama. It is performed by a group of four or five men of whom the chief performer is called Oja who is supported by three to four Palis, and hence the name Ojapali. The only instrument played by Ojapali is Khutitaal (palm sized Cymbal). The performers wear long sleeved white gowns, silver jewelry etc., and Nupur (bundle of tiny metallic percussions played by body vibrations).

Ojapali can be divided into two forms basing on the occasion and style: Byah and Sukananni. As the history goes, there were two very talented singers

named Barbyahu and Sarubyahu during Koch Kingdom. They were often invited by Kings to sing various mythological and religious rhymes. With time, their style got popular among people of the area.

Byah Ojapali: The central subject of this Byah Ojapali are the epics - Ramayana and Mahabharata. Unlike other Ojapali forms, the story is sung in pure classical style involving Ragas. A noticeable element of this form is the different Mudras (Gestures of hands & fingers). Dance is another key part of the performance. To make the presentation interesting and make people understand, they perform humorous dialogues & narrations in between.

Sukananni Ojapali aims at presenting the tragic story of Behulaa-Lakhindar from Padma Purana among the masses. The easy yet high standard rhyme is accompanied by pleasant rhythm, tune and dance. Different Mudras are remarkable part of this form also. The team dances here too. This art is performed normally during Manasa Puja (Worship of Goddess of Serpents). The Ojapalis first praise various gods and goddesses and then gradually move to the epic of Behula-Lakhindar. Though, the presentation is targeted for the mass, it maintains high dignity and standard.

Lalit Oja of Sipajhar area of the district has been awarded the prestigious Sangeet Natak Academy award for his expertise in Sukananni Ojapali and for contribution in popularising this traditional folk art form.

Deodhani Dance: Deodhani dance is performed solo or in a group of three or four females essentially on the occasion of worship of Devi Manasa (or Maroi). As per mythology, Behulaa had to dance before the goddess Manasa to get back her husband's (Lakhindar) life. The dancer, wear Mekhela in Muga, red blouse, different traditional jewelry and leave their hair open. The dance to the tune of Jaidhol (specific cylindrical percussion instrument) and Khutitaal, played by Palis. This dance form depicts the process of worship of Devi Manasa. A striking moment of this dance is dancing with Daa (sharp weapon used for sacrifice), and the rotating of dancers' head in rapid circular motion, with open tresses. It is believed that Deodhanis get possessed by the Goddess in course of the dance.

Dhepa Dhuliya: This is another unique traditional folk art of Darrang. Here, two to four performers play the Dhepadhol, which is specially made so as to generate a unique thud, and accompanied by four to six persons playing Taals (Cymbal). The team dances while playing the instruments. Dhepadhol is a cylindrical drum of 1.5 meter in length with a tapered left end. The Dhol is covered at both ends with animal skins like Jaidhol and Bardhol but what makes the Dhepadhol different is that the covering of the right end is double layered and has a small whole on the outer layer. Water is put into the gap between the layers so as to get the thud, and hence the name. Another unique feature of Dhepa Dhuliyas is their vibrant & colourful shirt and gown having prominence of red, green and blue colour. Dhepadhuliyas perform in wedding ceremony or other such social occasions

Kaleeya: This ancient music form is at the verge of extinction. Similar to Shahnai of West-India, the Kaali is a beautiful bronze instrument and about 1'6" long. It is wide towards one end and the musician puts a mouthpiece on the other, narrower end to okay it. It was very popular in local wedding ceremonies.

Nangelee Songs: Nangelee songs are unique to Darrang, which are couplets of very informal colloquial words, sung by Garakhiyaas (cowboys). While singing Nangelee songs, the cowboys get divided into two groups and enact a conflict between them over silly issues which soon reaches climax leading to physical assault, intervention/ negotiation by the senior cowboy.

Bodos Dances: Bodos are scattered in the northern part of the district. Hence, best place for viewing their arts could be Niz-udalguri, Chandana Badi Village, Bagari Guri, Golamatha, Balisita Harishinga, Khairabari, Bhergaon etc. Khudiram Basumatary is one prominent Bodo folk artist in Darrang. Among the new generation, Binay Daimary, Naren Bodo, Kulen Bodo etc. are worth mentioning.

Resources in the District-

Geology and Mining

The entire district is covered by alluvial deposits of Recent and sub-Recent origin. The Archaean gneisses represent a complex group of biotite and hornblende gneisses with occasional small granitic and pragmatitic bodies intrusive into them. The terrace deposit, also known as the older or high level alluvium, consists of a thick accumulation of unassorted, sub-rounded to rounded boulders, pebbles and cobbles of quartzite, sandstone, shale, slate and gneisses embedded in a course sandy clay matrix.

Sufficient alluvial clays, sands, gravels and boulders and the gneissic rocks in the isolated hillocks provide suitable materials for construction. These are suitable for roads and construction materials, railway ballasts and in embankments. The gneisses exposed in low hillocks in the southern part of the district make excellent building stones.

Thin bands of dark gray and reddish brown somewhat streaky clays, occurring in small pockets along the courses of some of the rivers, may be suitable for brick making and potteries.

Forests

About 28,358 hectares of land is under forests in Darrang district, which comes to around 8.15 % of its total geographical area. Forestry occupies a significant place in the economy of the district. A considerable section of the people of the district depends upon forests for fire-wood, timber, bamboo, ekra, reed, thatch, tokopat, cane, gravel etc., for building of houses. A number of forest based industries such as saw mill, plywood factories, match industry, furniture workshop, bamboo and cane industries etc., have been opened in the district.

Land and land-use pattern

Out of total geographical area of 3,48,100 hectares of the Darrang district, about 18.9 % of the land is not available for cultivation and 8.8% is categorised as other non-cultivated land. Further, about 8.15% is under forests. The net area sown in the district is about 58.5% of the total geographical area. The following table shows the area of land put to different uses and their percentages to the total area.**(Footnotes)**

[12] Report on Census of Assam, 1901 p.41

Note: Area figures in respect of forest which includes area under reserve forest and revenue forest relates to the year 1996-97.

areas on the plain areas. Some times, the flood level rises very rapidly and the swirling currents make it extremely risky to move from one place to another. Very often, the villages appear to be isolated islands could be reached only by boats. In some Char areas, the roofs of houses are swept away and only the tree-tops remain visible above the water.

Natural Calamities- Earthquakes and Floods

Earthquakes:

Like the rest of Assam, Darrang is a seismic area and is liable to earthquake. The great earthquake of 1897 was felt over an area of 1,750,000 square miles from Rangoon in the east to Kangra in the north-west and serious damage was done to masonry buildings over an area of 145,000 square miles. The effect of the shock in Mangaldoi were serious. The Dak-Bungalow and the residence of the Sub-Divisional officer were wrecked, the walls of the court

building collapsed and serious damage was done to the raised roads.

The earthquake of August 15,1950 with the epic centre about 200 miles North of Sadiya, has practically left no sign of damage in the district. Since then as many as 50 earthquake shocks are experienced in the district but there was no loss of life or property.

Floods and Famines:

Famines and droughts are little known in the district while widespread flood has become a regular phenomenon here. The incidence of flood and erosion is rooted in the typical physiographical features and meteorological conditions obtaining in this part of the State. The heavy water and slit discharges occurring in the upper region during the peak and rivulets resulting in excessive spilling on the banks of the rivers and their tributaries and consequent water logging in extensive

It is also believed that the great earthquake of 1950 causing extensive hill slides in the catchment of the Brahmaputra is also one of the reasons for floods in this district.

The following table shows the area hit by flood and extent of damages during the period 1997 to 1999

TABLE - 2
AREA AFFECTED BY FLOOD AND EXTENT OF DAMAGES IN DARRANG DISTRICT

	Area affected (hectares)		Total value of damages (Rs Lakhs)			
Year	Darrang	Assam	Darrang	Rs.p/h	Assam	Rs. P/h
1	2	3	4	5	6	7
1997	6,612 (1.90)	753,409 (9.60)	30.0	1356	2944.07	390
1998	20,302 (5.83)	1,323,751 (16.88)	1135.68	55,939	49694.98	3754
1999	1,715 (0:49)	223,107 (2.84)	58.95	3437	5195.00	2328

Note: 1. Figures in parenthesis below the area indicate the percentage of area to total Geographical area of the district/state.
Source: Prepared on the basis of Tables 32.11 and 3.05 of Statistical Handbook of Assam-2000, Directorate of Economics and Statistics, Govt of Assam.

The figures in the above table clearly show that the gravity of flood in terms of both incidence and impact is relatively more in Darrang district. The percentage area of land affected by flood is more and in addition, the value of damages per hectare of flood affected land is also abnormally high as Rs.55939 in 1998 against Rs.3754 at State level.

Flood control and relief measures

Considering the physiographical features of the district, the floods are unavoidable, but if sufficient precautions are taken, the extent of damages can be minimized. It is for this reason the district authorities are all alert during such time to ensure no more damages are caused. As a measure of precaution, flood warning signals are transmitted to the Deputy Commissioner of Lakhimpur district from some stations at upper reaches of the Brahmaputra. The Deputy Commissioner, Lakhimpur on his turn informs other Deputy Commissioners and Sub-Divisional Officers of the Brahmaputra valley to take all precautionary measures.

As soon as the flood submerges the low-lying areas, the relief operation starts with full vigour. Evacuation of people and cattle to safer places, providing food and shelter till flood recedes, distribution of gratuitous relief in areas where evacuation is not necessary etc. are the important relief measures Most of the principal departments of the Government, in some way or other, have got something to do in respect of the flood. In steering relief operation, the district and the Sub-Divisional authorities secure complete co-operation from other departments from the public.

Economic Profile of the district

Agriculture and Plantation :

Crops: Paddy, jute, sugar-cane, tea, pulses and mustard are the major crops and tobacco, potato, vegetable and fruits like mangoes, orange, banana,

pine-apple etc., are subsidiary crops of the district. Rice is the staple food.

TABLE-3

AREA, PRODUCTION AND AVERAGE YIELD OFIMPORTANT CROPS IN DARRANG DISTRICT FOR THE YEAR 1998-99 (AS PER FINAL FORECASTS)

Sl. No.	Type of crop	Area under cultivation (hectare)	Production	Average yield kg. Per hectare
1	2	3	4	5
A.	**Cereals**			
1	Autumn Rice	68,800	59,143	874

Horticultural crops

Banana, Papaya, Orange, Pine-apple, areca nut and coconut are the important horticultural crops of the district. The following table gives a brief account of the horticultural crops grown during 1998-99 in this district.

The following table presents data on different types of crops grown in the district, area under cultivation, yield etc. during 1999 (final forecast)

TABLE-4

AREA, PRODUCTION AND AVERAGE YIELD OF HORTICULTURAL CROPS IN DARRANG DISTRICT, 1998-99 (FINAL FORECAST)

Sl. No	Type of crops	Are under cultivation (hectare)	Production (MT)	Average yield kg. hectare
1	2	3	4	5
1	Banana	1,810	23,479	12,972
2	Papaya	495	6,233	12,592
3	Orange	305	3,249	10,650
4	Pine-apple	346	5,249	15,170
5	Arecanut	4,580	2,050	106
6	Coconut	865	4,899	48

Note : * Production of Areca nut in terms of dry curednuts.
**Production of coconuts is in thousand numbers, but not in tones.
@Avg. Yield of Areca nut & coconut in nuts per bearing trees.

Source- Same as Table-1

.There are some vegetables grown in the district and the common among these are spinach, *lai*, radish, lafa, suka, cabbage, cauliflower, tomato, onion etc. Further Darrang is one of the important tea growing districts of Assam, and there has been a gradual expansion of the area under tea since 1921.

History of Tea industry :

The history of the tea industry in Assam dates back to the year 1826, when indigenous tea plants growing in the plains of Assam came to the notice of the East India Company. The cultivation of this plant was first introduced 1830 by the East India Company. It is mentioned in the Economic Development of Assam by P.C. Goswami that a tea garden was started by the Govt. in 1833 in the Lakhimpur district. On 1835 a few indigenous plants were taken from the forest at "Ningroo" bordering the Singphoe country and grown at "Koondilmukh"at Sadiya. A company was found in 1939 known as the Assam Company. This was the first Company in India to undertake the commercial production of tea and was the direct successor of the East India Company. The headquarters of this company was formed at Nazira and remained till the shifting to Calcutta in 1956.The Government garden was carried from 1840 to 1849. But due to certain difficulties, the garden was sold to a China man named "Among". This Chinaman failed

to improve the garden. In 1851, through the instrumentality of Colonel Hannay who contributed much to the development of tea cultivation in the part of upper Assam. The early sixties of 19th century i.e. from 1859 to 1860 was a period pf steady boom. After this period the tea industry received a great setback. But this trend was cheeked by 1878. In 1881, the North India Tea Estate Owners formed the Indian Tea Association. The industry grew continuously till 1890 and thereafter it underwent through a depreciation for a short period but soon recovered from this state of affairs. The major improvements have been made in the yield of tea, in the grouping of gardens under a limited number of companies, in the progressive mechanization and rationalization of production and in increasing their efficiency of productivity of labour.

The Tokolai Reserve Station was set up at Jorhat in 1911 with a view to carrying on research on cultivation and manufacture of tea in Assam. This has been very useful in increase of yield rate of tea. In the year 1932-33, it is again met with severe crisis due to depression and over production of tea. This condition was tackled by enacting the Indian Tea Control Act, 1933 and by 1952 it reached an unprecedented prosperity. Recently the Tokolai Experimental centre had developed a machine known as Rotorvane. It is a continuous processing machine for use in a continuous processing machine for use in a continuous system of manufacture.

The Guwahati Tea Auction Centre :

Marketing of tea has always been a great problem for the industrialists. Before opening of tea Auction Centre, at Guwahati, Tea Auction Centre, at Guwahati, Tea Auction Centre in Calcutta arranged for sale of Assam Tea Auction Centre, third of its kind in India started functioning at Guwahati from Sept. 1970.

Tea, which is subject to direct traction by way of excise duty, export duty and a user under tea Act, the industry makes substantial direct contribution to central Revenues. Besides, these taxes, tea industry is also subject to central income tax, supper tax (corporation) and agricultural income tax. Income tax along with sales tax levied upon it inflates the income of the state Govt, to a great extent.

Tea is the mainstay of the plywood industry. Tea grown in different parts of Assam is packed in the garden factories in plywood chests for dispatch. Tea estates require huge quantity of fertilizers for healthy growth of tea. Thus it gives a strong support to fertilizer industry also.

The labour force that engaged in the industry is bought mainly from Bihar, Madhya Pradesh, Orissa and Madras. The industry provides ample scope for employment from higher grade to lower grade workers. The tea estate in Assam is in different geographical size. It varies from small garden to large tea estates. The administration is also generally same from each other. The cell responsibility of a tea estate is vested on the Manager. He is the head of the estate. He is assisted by 2/3 Assistant Manager. The Assistant Manager are given separate responsibility such as production and supervision of garden and labours, financial affairs, stock and factory etc. each garden has a office in which there is a head clerk called "Borobabu" and he is assisted by some clerks and peon. Social services provided to its employees by hospitals urn by qualified medical officer and staff. Most of gardens have their ambulances to carry serious patient to for better treatment outside the gardens.

A major part is playing in the economy of the district by tea. It provides ample employment to the people of the district.

Now a day, many youths of the district have come forward to grow tea in their own lands. Which provide job and also earn income.

Tea Garden in Darrang District:

Tea is also considered one of the most important items of State's economy and provides employment to a number of people. The process of cultivation and manufacturing of tea are the same as practised in the other districts of Assam. Out of 2472 Tea Gardens in Assam, 116 are in Darrang district (1996) and about 41800 (estimated) hectares of land in Darrang district is under tea cultivation as on December 1998 which comes to about 18.0% of the total area under tea cultivation in Assam. In 1998 these gardens procuced tea 89,483 thousand kgs There are 11 small tea growers with an area of total 68.0 hectares of registered land with Tea Board of India upto 31.10. 1999

Source: Statistical Handbook, 2000

Irrigation :

Though the district receives sufficient rain during monsoon season, but major crops like paddy, jute etc.,

have to depend on some other sources of water during the major part of the year. The system of Jan or dong to irrigate paddy fields by constructing small canals is still in practice in some northern part of the district. Some minor irrigation projects like construction of bunds across the streams and rivulets, drainage channels and slit channels etc., are implemented in the district by the government. Lift irrigation with electric pump-sets has also been operated in some parts of the district.

The following table explains the irrigation potential created and the targets and achievements etc., in the Darrang district

TABLE-5

IRRIGATION POTENTIAL UTILISED, TARGETS AND ACHIEVEMENTS OF POTENTIAL CREATED, 1997-98

Sl. No	Particulars	Land area in hectares
1	2	3
1	Irrigation potential utilised during 1997-98	14,554
	i. During *Kharif*	13,699
	ii. During *Rabi* & Pre-*Kharif*	855
2	Irrigation potential created up to 31.3.1999	50,319
	i. Minor	71,720
	ii. Major and Medium	18,599
3	Targets and for additional irrigation potential created during 1998-99	165
	i. Minor irrigation	65
	ii. Major and Medium irrigation	100

Sericulture

Rearing of Eri Silk worm, spinning of cocoons and weaving of silk cloth is one of the oldest industries in Assam. Darrang is famous for Eri & Mulberry silk worm rearing. The Eri worm (alfacus ricini) derives its name from the Eri or caster oil plant (ricinus comminis) on which it is usually fed.

The following table presents area under silk worm food plants, yield of cocoons and sericultural activities in Assam

TABLE - 6

SERICULTURE ACTIVITIES IN DARRANG DISTRICT 1998-99

Animal Husbandry and Fishery

As per the quin-quennial livestock Census in Assam during 1997, it is found that there are 429,686 cattles; 38,766 Buffaloes; 7,032 sheep and 160,851 goats in Darrang district. In addition, 549 horses & ponies, and 45,453 pigs, are also enumerated during livestock census in this district. As regards to poultry records, about 619,419 fowls and 259,760 ducks are found during 1997.

The bulk of the fish sold in the market comes from the larger fisheries. Fishing is however not confined only to such fisheries. Large number of people irrespective of caste and creed collect fish from rivulets and other waterlogged areas.

For the entire district, total requirement of fish is estimated to be 15,580 MT, keeping the monthly per capita consumption of fish at 11 kg. Against this requirement, the total production of fish during the year 2000-2001 was 6,854 MT and the rest of the requirement is met by import of fish from other parts. There is one fishing training centre and 7 fish farms in this district.

Industry

The fineness and exquisite workmanship of a wide variety of industrial products of ancient Assam earned universal acclamation. As it is evident from many literary and historical records; weaving, sericulture, pottery, brass and bell metal industry, black smithy, gold smithy etc., are the very ancient industries of Darrang district but lost much of their past glory and are now confined only to a limited extent. Although the cottage industries still play a vital role in the economy of the district, some of the old time industries have suffered stagnation, while some others are now buried under oblivion during British regime who dumped local markets with cheaper machine made goods imported from outside. However, after independence, new industries have come up with the support and assistance under various programme of industrialisation policies. During 1998, there were about 76 registered factories in this district. Out of these, 54 are in the category of food products, 15 are in manufacturing of non-metalic mineral products etc. Further, as on 31.12.1998, there are about 987 Small Scale Industrial (SSI) units registered with the Industries Department in the district. There are no industrial estates in this district.

Handloom

Handloom weaving is a popular and age old industry of almost all the tribes and many non-tribal people in the district, and seen as a monopoly of women folk. However, the quantum of handloom products are very much less than could be expected. Increasing competition from mill made textile products finally labelled the weaving as an industry of 'commercially failure', as the price obtained for the finished products being out of proportion to the time expended on its production. Weaving only occupies the leisure moments of the women. They generally produce cloths like Chaddar, Mekhela, Gamcha etc. However, in the recent past the government is striving hard not only to save and preserve the weaving industry but also to develop this sector through several schemes and programmes. For skill development and to assist and promote the existing weaving units the government has opened several centres in the district.

There are 6 Handloom training Centres, 5 Weavers Extension Service Units and 2 Handloom Production Centres in the district. During 1998-99, there were about 100 candidates in these centres as trainees.[1]

Trade and Commerce

In early days, a good overland communication systems was not developed and this affected the scope of external trade. However, now the position has vastly improved during the last few decades. There has been enormous expansion of road communication and extension of the railway line from Rangapara to Morkongselek in Lakhimpur district, which runs through the district. The number of shops and business establishments has been steadily increasing all over the district.

Tea, rice, jute, oil-cake etc., are the most important items of export from the district whereas- cloth, sugar, oil products, tobacco products are imported from outside the district. Mangaldoi, the district headquarter is the important centre of wholesale business. Hats are important rural marketing centres, where a great deal of retail business is transacted. Many fairs are held in different parts of the district, most of which go on for days and are attended by a large concourse of people.

Warehousing

There are 4 warehousing centres in Darrang district located in Tangla, Udalguri, Kharupetia and Mangaldoi with a total capacity of 3500, 3100, 5625 and 200 MT respectively

Economic Infrastructure

Power and Electricity

The development of agriculture as well as industry of any area can not be thought of without the availability of power. In addition to it, the use of electricity has become indispensable part in modern days. It is an essential civic amenity for the development of the societies. Darrang district does not possess any power plant for generation of electricity. It has to depend entirely on supply from outside the district. The responsibility of coordinates development and distribution of power ibn the district vests with the Assam State Electricity Board.

In Darrang district, the Statistical Handbook Assam, 2000 recorded the number of villages electrified upto March, 1999 as 1,218 out of 1,341 total villages in 2001. Altogether 123 villages have to be electrified so far. However, 91 percent of total villages have been provided with electricity facility and are enjoying the benefit of power

Banking and Finance

As observed by the Assam Provincial Banking Enquiry Committee in 1929, the history of indigenous banks in Assam is shrouded in obscurity. However, with the expansion of the tea industry, the credit structure of the district took a concrete shape. Several banks have been set up in various parts of the district. In addition, co-operative credit societies are also in operation. However, even now also, the moneylender continues to be an important source of rural credit.

The following table explains the number of banks in the district and the position of deposits and credits(Footnotes)

TABLE-7
POSITION OF DEPOSITS AND CREDITS IN BANKS AS ON DECEMBER 31, 1999-DARRANG DISTRICT

Sl. No.	Type of bank	No. of Offices	Deposits (Rs.lakhs)	Credit (Rs.lakhs)
1	*2*	*3*	*4*	*5*
1	Scheduled Comm. Banks.	49	14,295	6,868
2	Regional Rural Banks.	24	4,525	2,156
3	Total	73	18,820	9,024

Source : Quarterly Handout of RBI, quoted inStatisticalHandbook, Assam, 2000.

Transport and Communication

The old accounts of Assam suggest that most of the travellers used horses, ponies, elephants, bullock-drawn carts, palanquins country-boat and rafts for their cross country sojourns. However, during the time, especially when the British came into occupation and thereafter independence, there is a tremendous improvement in road and other communication facilities.

Roads:

The following table indicates the length of roads of different types in the district during 1997-98.

TABLE-8
ROAD LENGTH IN DARRANG DISTRICT (1997-98)

Sl. No	Category of Roads	Road length (Kms)
1	*2*	*3*
1	National High way	79
2	State High way	72
3	Other P.W.D. Roads	1,508
	Total Road length	1,659
4	PWD Road length per lakh of population	128
5	Road length per 100 Sq. km.of total geographical area	47.6

Source : Chief Engineer, P.W.D. (Roads) Assam.
Note * As per 1991 Census population.

In the entire district, there are about 6,913 motor vehicles on the road during 1998-99 out of which, 489 vehicles are registered during 1998-99 only. Out of 6,913 vehicles, 4,233 are two wheelers, 412 are cars, 390 are tractors and 421 are public carriers, 21 are buses, 171 private carriers, 124 jeeps, 20 mini buses and 78 are government vehicles. The road distance from Tezpur to Baihata is 146 kms and Baihata to Guwahati is 35 kms. The road distance from Mangaldoi to Guwahati is 68 kms.

Rail:

The rail line from Rangia to Rangapara passes through Darrang district and Khoirabari, Tangla, Harisingha, Udalguri, Rowta Bagan and Majbat are the railway stations in the district falling on this railway line.

Waterways-Ferry Service

The southern part of the district is bordered by the Brahmaputra, and there are some ferryghats connecting to Guwahati by water ways. Kirakara and Kuruwa are the important ferryghats which have regular service from Guwahati.

In 1997-98, about 87,594 passengers at Kuruwa ferry ghat and 38,325 passengers at Kirakara ferry ghat are handled by ferries. Further, cargos weighing about 2,188 quintals at kuruwa and 1,512 quintals at Kirakara are handled by these ferries excluding the weights of vehicles and animals[1]

Economic development :

The district had not received due attention in regard to the development during British period. The partition that led to the disruption of the normal channels of trade had put a further strain on the economy of the district. The lower level of development of the initial stages of the start of the planning process has been one of the reasons for accentuation of the difference in the level of development.

The role and share of different sectors of the economy of Darrang district shows that agriculture plays an important role both in terms of contribution to the total GDP of the district and the percentage share of total population engaged in agriculture. The following table gives the number of persons employed in the different sectors of the economy of Assam as well as in Darrang District.

TABLE-9

PERCENTAGE MAIN WORKERS IN DIFFERENT SECTORS OF THE ECONOMY-1991

Source: Census of India 1991, Primary Census Abstract.

The Gross domestic product at factory cost during the year 1994-95 for the district is estimated about Rs. 66555 lakhs in which the share of primary sector is 55.5% and of secondary is 30.16% and the rest from tertiary sector. The per capita income (GDP) is recorded at Rs. 4740 per annum. The data on GDP from different sectors of all districts and estimates of per capita GDP for males and females are presented in the following table

TABLE- 10

Note: Col No 7and 8 are calculated on the basis sector-wise GDP in 1994-95 and sex-wise no. of persons employed in each sector in 1991. Total GDP for males and females are estimated first on the basis of no. of males and females employed in each sector and this total GDP is distributed among all males and females to arrive at per capita GDP.

Source: 1. Directorate of Economics and Statistics, Govt of Assam, 2. Census of India PCA 1991 Assam.

free from the flood. But this phenomenon About 38.6% of the total population of the district live below poverty line. As a part of welfare programmes under public distribution schemes, several food and other essential items are supplied to the people as per the norms of the government through 1954 fair price shops in the district.

Char Areas

The Char Areas are those lands which are generally formed in the banks of big rivers. In Asam, such areas are usually found in low lying flood-prone zone from Sadiya to Dhubri inside the mighty Brahmaputra river. The river Brahmaputra carries sand during rainy season annually and get it deposited and settled in the middle or on the corner of the main stream, which makes an Island inside the river bed once the water level recedes. As a result of deposition of enormous load of sediments in the middle of the river course, a large number of almound-shaped river Islands, called as Chaparis or Chars are formed. In making of a Char or Chapari the river takes five to six years. The soils of these areas are of new alluvial nature. These are less acidic and are moderately rich in plant nutrients. A particular section of people begins to reside in these areas and starts cultivation too. But even though, these areas are not free from the menace of flood . During flood, when the water flows through the Chars, the settlers of these areas used to shift themselves to some other high lands to spend the period of flood and come back to their original place of abode after flood recedes. But some times, due to tremendous changes of river course and heavy erosion, some Chars are vanished while some may remain can not be treated as a permanent nature.

Administration of Char Areas:

These areas are looked after under some special provisions under the administration of the revenue circle. They are to abide by rules and regulations of the State government like general people. However, they have some kind of their own local self government also. In each Char village, a person is

selected by the villagers as the head of the village, called as 'Matbor' (Headman) in the Muslim dominated Char areas. As a custom each and every person of the Char are to follow his instructions, guidance or orders on the matters relating to the community affairs and routine life of the area and people. In turn, the Matabor is guided by the elderly people of his locality on all collective issues before any important decision is taken. However, the opinion or decision given by Matbor in respect of common issues such as casting of vote to a particular candidate during election, dispute regarding any matter relating to land, religion or social has to be obeyed by all.

Profile of Char Areas:

In Assam, there are as many as 2,235 Chars of varying sizes during 1993-94 in 14 districts. The highest number of Chars are found in Dhubri district (480), followed by Barpeta district (310) and then Jorhat district (293). The lowest number of Chars are found in Morigaon district (39). There is no Char area in the remaining 9 districts of Assam. The Chars of Dhubri district cover an area of 86,925 hectares followed by 27,892 hectares in Barpeta district.

Socio-economic status of CharPopulation:

The socio-economic status of the people of the Char areas are in fact miserable. They are mostly illiterates where just about 13 to 15 percent of the total population of entire Char areas are literate. The standard of attainment of education is mostly not above primary level, where one may hardly find any matriculate. Nearly 55 percent are living below poverty line in all Char areas. Out of total 2,39,000 hectares of Char areas of Assam, only 1,67,300 hectares are cultivable land. There are altogether 2,66,707 farming families in Char areas of Assam. The economic activities of the inhabitants of Chars are generally cultivation and fishing. The low-lying Char areas are favourable for growing Ahu, Bao and Boro rice and also jute .The settlers of Char areas are generally grow rice and potato in large quantity. They grow various types of vegetables for sale. Whatever the amount of crops grown here are not enough to meet even their basic necessities.

The type of houses in the Char areas are mostly katcha structure, made of thatch bamboo, reed and mud. These houses are mostly huts, and a very few families have their houses with C.I. sheets in roof. Houses in pucca structure with brick and cement are very rare sight there.

The people of all Char villages are mostly use river water as the source of drinking water during rainy season. However, a very few villages have their hand pump / tube wells as a source of drinking water. The Char villages are not connected by road. The country boats are used as a means of communication during flood season. During winter season, the villagers come to nearest town by travelling on foot or bicycle.

Developmental programme for Char Areas

Some Developmental programmes have been undertaken by the State government for the welfare of the people of these areas. The facilities like safe drinking water, medical sub-centres etc., are provided by the government in some areas of different districts. Schools, up to the level of primary and middle are also established in some Char areas. For higher education, the children have to go to nearby towns. The Assam Government has set-up a Char Development Authority at Guwahati for overall Development of Char people. At the district level, Offices of the Project Officers are established to look into the projects undertaken for these areas. Various kinds of loans and grant-in-aids are also provided to the villages by this department.

In any case, the people of Char areas are maintaining a poor standard of living from all aspects. Though they are hard workers still they are unable to overcome their poverty at any cost.

Char area Development in Darrang district

Out of 2,235 Char villages in 14 districts, 124 Char villages are in Darrang district. The total population of these 124 Chars is about 1,08,158 who are spread on the total area of 1,48,443 hectares. There are altogether 14,652 families in all Chars of the district.

The socio-economic condition of Char dwellers as already explained is very poor, in a sense that their earnings are very limited. They have no sufficient cultivable lands, and whatever lands they have possessed is not fertile and moreover subject to flood. Generally all lands in Char areas are sandy. Only a few varieties of crops can be grown on such lands. Fishes and other river products though available in rivers, each and every household can not exploit such river potentials because of lack of tools and equipments. However, some are engaged in fishing but not on commercial line but for their own consumption.

The Char dwellers are maintaining a very low standard of living with minimum amenities of civic life in the Darrang district as well. In all the 124 Char villages, only 99 Lower Primary schools, 12 Middle schools and 4 High schools are in existence. The children of Chars have to go to near by towns for their higher education. There is no communication facility. The inhabitants of the Chars have to travel through small country boats during flood season and on other occasion they move on foots from their residences to the nearest place where road communication is available. No health Centre is available in the Chars of district except 3 (three) villages. The people of Chars so not have any facility of post office. Only one sub-post office is in existence in one Char village of the district.

The name of the Char village, which has covered the largest area of 508 hectares is N.C. Bairali under Sialmari Char development Block. The smallest two Char villages are Ganakmati and Ojhagaon having 6 hectares and 5 hectares respectively under Pachim Mangaldoi Development Block. The No.1 Magurmari Char village under Pachim Mangaldoi Development Block has the largest number of population with 2,378 persons and the smallest in population is Ojhagaon with only 72 persons in the same block.

The following table shows Development Block-wise various amenities available to Char villages of Darrang district

TABLE- 11

Prices and Price Indices

Records on economy of the district mention that in the past, the bare necessities were locally produced except salt, which was obtained from *Butias* in exchange of rice through barter system. However, at present due to change in consumption pattern including food items, many of the items are brought from outside the district. It is therefore the price situation in Assam is, though essentially a manifestation of all India phenomenon of rising prices, but the uprising of the price level here has been more pronounced due to certain factors like rapid growth of population, transport bottlenecks and virtual dependence on outside supply for essential consumer goods[1].

The figures of price indices of different categories can be seen in the following table

(Footnotes)

[1] Economic Survey of Assam, 1970, Department of Ecinomics and Statistics, Government of Assam , p.70

TABLE- 12

CONSUMER PRICE INDEX IN ASSAM(BASE 1982=100)

Year	CPI for Working Class		CPI for Industrial Workers		
	Guwahati	Assam	Guwahati	Assam	All India
1	2	3	4	5	6
1997	357	333	357	335	350
1998	405	374	405	380	405
	-13.4	-12.3	-13.4	-13.4	-15.71

Note: 1 Figures in brackets show percentage increase during 1997-98

Source. Labour Bureau, Government of India and Directorate of Economics and Statistics, government of Assam.

abolishedAs can be seen in the above table the price indices for Guwahati centre which is the representative of Darrang district is slightly more compared to Assam as a whole and equivalent with the all India level figures. However, the percent increase in case of industrial workers is less than the all India level.

Cross-sectional comparison of CPI between food and non-food items (wholesale prices) in Assam show that the prices of non-food items are increasing more faster than food items. Same is the situation between agricultural & non-agricultural commodities which indicate that the farmers and poor people are at more disadvantage than other population in the district.

General Administration

Revenue Administration:

Revenue administration has historically been the primary responsibility of the District Administration. This involves collection and fixing of land revenue, registration, mutation and overall management in regard to land, both private and public. Besides the Revenue Branch of the Deputy Commissioner's Office, which is looked after by the Additional Deputy Commissioner (Revenue), there are 10 outlying Revenue Circles in the district, supervised by Circle Officers. The Mouzadars under the Circle Officers are responsible for collecting land revenue (Khazna) from land owners (Pattadars). All the Circle Officers are required to submit 'doul' (demand of revenue) to the Deputy Commissioner, and after his approval, Mouzadars are to collect revenue as per the demand. In the year 1995-96, the total collection of land revenue in the district was Rs.19,47,000 against the total demand both current and arrears of Rs. 1,81,75,000 which comes to about 10.71%.

Development

Apart from Revenue matters, District Development is one of the very important objective of the District Administration. As head of the District Administration, the Deputy Commissioner is responsible for all round developmental activities in the district under various programmes such as MP's Local Area Fund (MPLAD), MLA's fund, Untied Fund, Sub-divisional Plan Scheme Fund, Border Area Development Fund and etc. For these works, the Deputy Commissioner assigns one A.D.C. (Development) the specific task of looking after and coordinating various developmental activities undergoing in various sectors. The ADC (Development) is aided in this matter by the Decentralised Planning Cell of the DC's office. All departments, involved in the developmental activities of the district, like PWD, Irrigation, Health, Education and many others work in coordination and a District Development Committee (DDC) headed by the Deputy Commissioner has been in place to ensure this coordination. Under the Government policy of rapid upliftment of rural population, a District Rural Development Agency (DRDA) is functioning in the district, which has the Deputy Commissioner as the Chairman and one Project Director as its functional head. All schemes for Rural Development are implemented by agencies in coordination with 11 Development Blocks situated in outlying rural areas of the district. These Development Blocks are supervised by Block Development Officers (BDOs) and Senior BDOs.

Local Administration

For management and implementation of various developmental schemes, elected bodies are constituted at the level of Corporation, Municipality and Town Committees for Urban Areas and Panchayat Bodies for the rural areas. Darrang district has four urban local administration bodies as follows :

1) Mangaldoi Municipal Board

2) Tangla Town Committee

3) Kharupetia Town Committee

4) Udalguri Town Committee

As for the rural areas in Darang district, a hierarchy of local administrative bodies is in place with Zila Parishad at the top (Sub-division level) followed by Anchalik and Gaon Panchayats, which cover a total number of (1325) villages in the district.

System of Local self Government

The present system of local self government is a legacy of the British administration. However, some forms of local self government were in existence even during the pre-British days such as institution like Namghar etc. Initially these Panchayats were constituted as Local Boards in 1882. The Assam Panchayat Act 1959, which came into force in 1960, abolished the Local Boards and under this Act a three-tier Panchayat Raj System was introduced in Assam. However, the Panchayt Act 1972, which came into operation from 5th May, 1973, changed over the system to two.

The urban units are categorized as Municipal Board, Town Committee and Municipal Corporation. In Darrang district, there is one Municipal board and three Town Committees. There will be one Chairman and Vice-Chairman in Municipality and the Chairman is the head of the administration. He presides over meetings of the Municipality. He is entrusted with the implementation of the schemes taken up by the Municipality. He is also invested with the financial powers to manage the affairs of the Municipality. The Municipality has various sources of revenue, and in addition, regularly receives annual grants from the government. Besides government grants, they earn revenues from levies, taxes on holdings, rickshaws, carts, bicycles, stalls, open space markets, cinema houses etc.

Some important duties of the Municipalities and Town Committees are to maintain roads and bridges under their jurisdiction and to look after the sanitation of public health, laying out of parks, establishment of veterinary dispensaries, libraries, fire brigades, supply of protected water etc.

Autonomous District Council

In case of Districts, which have Autonomous District Councils, most of the powers and functions of the Deputy Commissioners are transferred to the Autonomous Districts Councils. Such District Councils have both executive and legislative powers, especially on the matters of administration of land, management of unreserved forests, utilization of water for the purpose of agriculture, regulation of Jhum or shifting cultivation. And also, they are empowered to take decision on matters relating to establishment of village or town Committees or councils, matters relating to village and town administration, health & sanitation, appointment or succession of Village Chief or Headman, inheritance of property, marriage, social customs etc.

The District councils also have the powers to establish, construct or manage primary schools, dispensaries, markets, roads and bridges etc. They are empowered to collect revenues by way of levies, taxes and royalty etc., from various sections of societies and population.

Darrang District is fallen under the per view of Autonomous District Council.

Law and Order

Maintenance of Law and Order is another important aspect of district administration and the Deputy Commissioner also being the District Magistrate is responsible for proper maintenance of the same. The Deputy Commissioner is aided by the Additional District Magistrate and Sub-divisional Magistrates. The Circle Officers of the Circles also function as Executive Magistrates and are responsible for maintenance of Law & Order in their respective circle areas. The District Magistrate and other magistrates take the necessary assistance from the police department for any necessity. Police Administration of the district is headed by the Superintendent of Police. The police department has an infra-structure of 10 Police Stations, 7 out-posts and other auxiliary establishments in the district.

The incidence of crime in the district is not less compared to other parts of the State. The number of different cases of crimes reported are presented in the following table .

TABLE- 13

CASES OF CRIME REPORTED IN DARRANG DISTRICT-1998

Cases of crime	No. of cases reported		Percentage to total crimes in state
	Assam	Darrang	
1	2	3	4
1. Murder	1,665	119	7.15
2. Rape	744	33	4.43
3. Kidnapping	1,471	76	5.17
4. Dacoity	928	56	6.03
5. Robbery	1,082	52	4.8
6. Burglary	3,696	154	4.17
7. Riots	3,548	70	1.97

Source · Additional Director General of Police (CID) Govt. of Assam

As may be seen in the above table, the incidence of murder and dacoity are relatively more compared to other types of crimes, whereas very few cases of riots are found reported. However, the rates of conviction are very less both in the district as well as in the State as a whole.

Accidents :

In the year 1999, about 50 accidents on National highways are reported, in which 35 persons are killed and 100 are injured. In terms of length of National highways in the district, it comes to 0.63 accidents per km. of National highway as against 0.86 at State average. No other accidents are reported on State highways & PWD roads in the district.

Health and Family welfare :

Literary works of the mediaeval period refer to Kavirajas and Ojhas who attended to the ailments of the people, and they were popular even during the early part of the British rule. But preventive side did not receive much attention at that time.

Fever and bowel complaints used to take heavy tolls of life. Cholera, Small-Pox and *Kalazar* were other deadly killer diseases. However due to modern scientific medical facilities in recent times, there is lot of improvement in the health conditions of people. At present Dysentery, Diarrhea, Influenza, Tuberculosis, Rheumatism, Typhoid, Bronchitis, Measles etc., are continued to be the most common diseases in the district but loss of life due to these diseases are kept minimum with a lot of precautionary measures. Number of Hospitals, Dispensaries etc., are available in the district are shown under relevant section.

Family Planning : Good progress has been noticed in family planning in the district. During 1998-99, about 711 women have undergone Tubectomy operation. Further 1632 women have adopted Copper 'T' besides 11250 using Oral Pills in the district in the same year.

Vital Statistics :

In the past vital statistics were compiled from the Hat-Chitas maintained by Gaonburas or village head men. The Hat-Chitas were submitted monthly to the Mauzadars who in turn compiling these data on a monthly statement and submitting to the district Medical Officer.

With the enactment of Assam Panchayat Act. 1959, the collection of vital statistics was entrusted to the Secretary of the Gaon Panchayat. He has to submit monthly return to the Block development Officer, who in turn submits a consolidated return to the district Medical Officer and Civil Surgen at that time. In the urban areas, vital statistics were received from the Chairman, Municipal Board or Town Committees. In the Tea Gardens, where registration of vital statistics was compulsory even prior to the above referred Act, Garden Managers maintained a register of births & deaths and bound to submit a report monthly to the District Health Officer. The District Health Officers submitted returns of the whole district to the Director of Health Services of the State. In case of areas of Railway Stations, the Station Masters were keeping registers of births & deaths within their jurisdictions and were reporting to the Chief Medical Officers, North East Frontier Railway, who in turn was submitting the returns to the Director of Health Services. Before implementation of RBD Act 1969 in the State, the Registration of Births & Deaths was not compulsory except in Tea Estates. Only after 1978, the registration of births & deaths became compulsory under the RBD Act 1969, that came into force by Assam registration of births & deaths rules 1978. Again in 1999, the Govt. of Assam framed Registration of Births & Deaths rules 1999 under the revamped system of civil registration that initiated by the Central Govt., which is now in operation.

In Darrang district at present all the Primary Health Centres are Registration Centres of births & deaths for rural areas and the Municipal Board or Town Committees are Registration centres for births & deaths in the respective urban areas. The Registrar of births & deaths, register all the events of births & deaths occurred in their presence or notified by the individuals/agencies nominated for that purpose by the govt. They compile all the events and submit monthly reports to the Joint Director of Health Services of the district, who is designated as District Registrar of Births and Deaths. The District Registrar in turn compile all the events for the entire district and submit the returns to the Director of Health Services, who is the Chief Register of births & deaths for Assam State. The Chief Register of births & deaths compile the figures for State as a whole and sends reports to the Registrar General India, New Delhi periodically.

In Tea Estates, events of births & deaths are collected by the officers In-Charge of Tea Estates and these are reported to their respective Registration Centre.

The data on Registration of births & deaths available during 1957 to 1971 reveal that the Registration of births was not given much importance compared to death registration, However, the level of registration for both births & deaths was very low.

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room

available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the

exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot

9 Rabha

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such

professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here, the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the

terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5

This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course

that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment,

Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 1,504,320 in 2001 Census. Male comprises 773,861 while female consists of 730,459. Out of the total population of the district, 1,429,492 fall under rural and 74,828 are under urban areas of the district. In rural areas 733,887 and 695,605 are males and female respectively. Accordingly 39,974 and 34,854 are males and females respectively in urban of the district. The percentage of urban population in the disrict Darrang is only 4.97 . The district is a rural base place in which 95.0 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +15.8 which is lower than the state rate. In the district, there are only 4 towns . MangaldoiTown is only town with Municipal Board and 3 towns are with Town Committee status. The density of the district is 432 persons per sq. kms. which is higher than the state density (340). The sex ratio in the district is 944 as against 935 in the State. Out of total population of the district, 35.1% is total workers of which 49.9% and 19.4 % are male and female respectively. The percentage of non- workers is 64.9 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 25.0 %, 15.1%, 4.5% and 55.4% respectively.

The literacy rate is 66.2% in the district of which 74.7% is for males and 57.3% is for females. The district literacy rate is above the state literacy rate (63.3)%.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

TABLE 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
			1991			2001					1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Harisinga	214,930	199,121	15,809	231,255	213,027	18,228	7.6	7.0	15.3	7.4	7.9
2	Khoirabari	80,834	80,834	-	84,731	84,731	-	4.8	4.8	-	-	-
3	Pathorighat	81,679	81,679	-	91,745	91,745	-	12.3	12.3	-	-	-

5	Mangaldoi	148,302	127,555	20,747	173,837	149,917	23,920	17.2	17.5	15.3	14.0	13.8
6	Kalaigaon	92,598	92,598	0	102,824	102,824	-	11.0	11.0	-	-	-
7	Dalgaon	318,462	303,120	15,342	409,358	391,575	17,783	28.5	29.2	15.9	4.8	4.3
8	Udalguri	176,551	164,465	12,086	192,924	178,027	14,897	9.3	8.2	23.3	6.8	7.7
9	Majbat	97,772	97,772	-	109,917	109,917	-	12.4	12.4	-	-	-
District Total:		**1,298,860**	**1,234,876**	**63,984**	**1,504,320**	**1,429,492**	**74,828**	**15.8**	**15.8**	**16.9**	**4.9**	**5**

As per Census of India 2001, the total population of Darrang district is 1,504,320 with 74,828 in urban 1,429,492 in rural area. Dalgaon Revenue Circle is the biggest Circle with 409,358 population and Khoirabari Revenue Circle with 84,731 population is at the bottom of the list of RC. Decadal variation of population in 1991-2001 in the district is 15.8 which is lower than the state rate of 18.9 percent. The growth rate of population among Revenue Circles is higher in Dalgaon Revenue Circle but it is seen that the growth rate is very low in Khoirabari Revenue Circle.

TABLE 2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / CD Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

Out of total villages of the district, the number of inhabited villages is 1,319 which are located in 11 CD Blocks. In the District, Udalguri CD Block has the highest 205,555 population. On population basis; Khairabari CD Block with 48,009 population is the smallest CD Block in the district .The highest numbers of villages 246 are under Udalguri CD Block. Khairabari CD Block records the lowest number 49 inhabited villages. The highest number of inhabited villages 485 or 36.8 percent is noticed in the population range of 500-999 followed by 382 or 29.0 percent in the population range of 1000-1999. However there are 11 villages having population in the range of 5,000-9999. In the district there is no large village having 10,000 + population.

Note :Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

In the district there is no any change in categories mentioned in the table during 2001 Census.

TABLE 4

DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	10	0.8	4,927	0.3
11-20	9	0.7	13,934	1.0
21-50	15	1.1	12,361	0.9
51-100	38	2.9	8,055	0.6
101-200	107	8.1	48,523	3.4
201-300	194	14.7	117,244	8.2
301-500	439	33.3	408,370	28.6
501 +	507	38.4	816,078	57.1
Not known	0	0.0	0	0.0
District Total:	**1,319**	**100.0**	**1,429,492**	**100.0**

Population Density (Rural) of the district: **269.1**

Out of 1,429,492 rural population of the district, 816,078 or 57.1 percent population hailing from 507 villages live in these villages where population density is 501+ per square kilometer. In the range of population density 0-10 (per sq. km), there is 10 villages having 4,927 population. 9 villages with 13,934 population have density in the range of 11-20. Detail can be seen in the table itself.

TABLE: 5
SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			Darrang		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	916	916	-
1911	915	923	626	947	947	-
1921	895	906	613	920	924	388
1931	874	885	574	861	866	333
1941	875	886	605	880	884	452
1951	868	878	663	861	864	551
1961	869	887	661	874	883	660
1971	896	912	744	907	915	718
1981	-	-	-	-	-	-
1991	923	934	838	938	942	854
2001	935	944	872	944	948	872

Note : Sex ratio has been defined here as the number of females per 1000 males.

Sex ratio in the State has improved both in rural and urban areas during the last decade. It increases from 923 in 1991 to 935 in 2001. The sex ratio in the district during the Census of India 2001 follows the same trend and it increases from 938 in 1991 to 944 in 2001. At rural level the sex ratio is noticed that from 942 in 1991 it increases to 948 in 2001 and similarly in urban it increases from 854 in 1991 to 872 in 2001 in the district

TABLE: 6
SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Harisinga	944	960	774
2	Khoirabari	963	963	-
3	Pathorighat	938	938	-
4	Sipajhar	945	945	-
5	Mangaldoi	922	925	906
6	Kalaigaon	957	957	-
7	Dalgaon	942	944	890
8	Udalguri	948	950	925
9	Majbat	957	957	-
District Total:		**944**	**948**	**872**

Out of 9 Revenue Circles of the district these are four urban units located in Harisinga, Mangaldoi, Dalgaon and Udalguri Revenue Circle respectively. Among 9 revenue circles, sex ratio of three Revenue Circles are lower than the sex ratio of the district. Khoirabari Revenue Circle with 963 femals per 1000 males is top in the list of circles in sex ratio while Mangaldoi Revenue Circle shows the lowest sex ratio of 922. Urban wise sex ratio in Udalguri Revenue Circle is the highest with 925.

TABLE : 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D Block	Sex ratio
1	2	3
1	Bhergaon	965
2	Udalguri	953
3	Khirabari	960
4	Sipajhar	941
5	Pachim-Mangaldai	927
6	Pub-Mangaldai	932
7	Kalaigaon	951
8	Bechimari	949
9	Dolgaon-Sialmari	945
10	Mazbat	958
11	Rowta	949
District (Rural) Total:		**948**

At CD Block level, Bhergaon CD Block has the highest sex ratio of 965 among the CD Blocks of the district. It is higher than the district rural sex ratio of 948. Pachim Mangaldoi CD Block has recorded the lowest 927 females against 1000 males among all C D Blocks of the district. Sex ratio in seven CD Blocks are higher than the district sex ratio while the sex ratio of the other four CD Blocks are lower than the district level rural sex ratio.

TABLE : 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	20	1.5	6,744	0.5
700-749	9	0.7	1,420	0.1
750-799	10	0.8	3,658	0.3
800-849	49	3.7	35,976	2.5
850-899	159	12.1	170,699	11.9
900-949	380	28.8	484,816	33.9
950-999	379	28.7	466,597	32.6
1000-1099	279	21.2	245,208	17.2
1100+34	2.6	14,374	1.0	
District Total:	1,319	100.0	1,429,492	100.0

The sex ratio at village level by range, it is found that most of the villages are having sex ratio of 900+. Out of 1,319 inhabited villages in the district, 1,072 villages come under the sex ratio range of 900+, 20 villages record sex ratio below 700 while 9 villages come under sex ratio range of 700-749. In about 313 villages, females are found more than males.

TABLE: 9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Tangla (TC)	TC	774
2	Mangaldoi (MB)	MB	906
3	Kharupatia (TC)	TC	890
4	Udalguri (TC)	TC	925
	Sex ratio (Urban) for the district:		**872**

Urban sex ratio in the district as per Census of India 2001 is 872. Out of four towns of the district, Udalguri TC has shown the highest 925 sex ratio in the district. The other towns have been recorded different sex ratio where there is no any similarity at all.

TABLE : 10

District Total	**1,319**	**100.0**	**245,689**	**100.0**

Out of total inhabited villages in the district Darrang, 598 villages are having no Scheduled Tribes population. As such, 245,689 persons belonging to Scheduled Tribes are found in 721 villages of the district. The Scheduled Tribes population with 24.0 percent occupying in 112 villages in the district fall under the percentage range between 51-75. However, the Scheduled Tribe population of 119 villages are having the lowest number of Scheduled Tribes population in the range of less than 5.0 percent only.

TABLE: 18
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Tangla (TC)	18228	1401	1522	7.7	8.3
2	Mangaldoi (MB)	23920	3633	194	15.2	0.8
3	Kharupatia (TC)	17783	1991	25	11.2	0.1
4	Udalguri (TC)	14897	1342	2431	9	16.3
District(Urban) Total		**74828**	**8367**	**4172**	**11.2**	**5.6**

The number of Scheduled Castes and Scheduled Tribes population in the urban of Darrang district is very small. It is 11.2 percent for Scheduled Castes and 5.6 percent for Scheduled Tribes. Between four towns in the District, Mangaldoi MB shows the highest percentage with 15.2 percent Scheduled Castes and Udalguri Town has the highest 16.3 percent of Scheduled Tribes population.

TABLE : 19
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C D BLOCKS, 2001

Sl. No.	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bhergaon	936	994
2	Udalguri	967	977
3	Khirabari	937	985
4	Sipajhar	967	929
5	Pachim-Mangaldai	981	996
6	Pub-Mangaldai	918	1011
7	Kalaigaon	924	989
8	Bechimari	886	966
9	Dolgaon-Sialmari	932	736
10	Mazbat	936	993
11	Rowta	994	983
District (Rural) Total		**938**	**984**

The table indicates sex ratio of castes and tribes population in each CD Block. The sex ratio of Scheduled Castes in all CD Blocks are above 900 except Bechimari where it is 886. It is seen that the sex ratios for seven CD Blocks are below district rural sex ratio. In case of Scheduled Tribes, the sex ratio is more than sex ratio of Scheduled Castes. It is 984 in the district. The sex ratio of 736 for Scheduled Tribes population in Dolgaon Sialmari CD Block is much lower than the district sex ratio but sex ratio in Pub Mangaldoi CD Block for Scheduled Tribes population is 1,011 females against 1,000 males.

TABLE: 20
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Sl.No.	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4

The distribution of number of literates and illiterates by sex among CD Blocks are shown in the table along with percentage of literates and gap in male-female literacy rate. Out of the total 11 CD Blocks in the district, there are six CD Blocks where the literacy rate is below the district rural literacy rate of 53.8 percent. Among the CD Blocks, the highest literacy rate is noticed in Pachim Mangaldoi CD Block with 75.1 percent and the lowest is in Dolgaon Sialmari CD Block. The gap in male female literacy rate is between 14.4 percent to 22.3 percent range in all CD Blocks.

TABLE : 23
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	22	1.7	22,277	1.6
11-20	65	4.9	73,430	5.1
21-30	116	8.8	173,405	12.1
31-40	153	11.6	221,575	15.5
41-50	166	12.6	179,985	12.6
51-60	177	13.4	155,876	10.9
61-70	244	18.5	214,906	15.0
71-80	244	18.5	244,526	17.1
81-90	124	9.4	138,464	9.7
91-99	8	0.6	5,048	0.4
100	0	0.0	0	0.0
District Total:	**1319**	**100.0**	**1,429,492**	**100.0**
Literacy rate for District:		**55.4**		

It is se en from the table that out of 1319 inhabited villages, the highest 244 or 15.0 percent villages having literacy rate between 61 to 70 percent is above the district literacy rate Similarly again 244 villages have literacy rate in the range of 71-80. Besides there are 132 villages which occupy literacy rate in the range of 81-99. It is also noticed that the literacy rate between 91-99 percent are having less number of villages compared to the literacy rate between other ranges. Further there are 22 villages with 1-10 percent literacy rate. There is no village having 100 percent literacy rate.

Note: Percent of Worker to total worker are given in brackets

Out of 527,993 total numbers of workers in the district, four category of workers are categorized as (a) Other Workers having 36.0 percent, (b) Cultivators with 45.4 percent, (c) Agricultural Laborers with 15.4 percent and (d) Household Industry Workers with 3.3 percent. In male-female breakup it is noticed that in all categories of workers except Household Industry Workers, male workers are more than female workers in terms of absolute number of persons. The percentage of male workers are also more in cultivation and Other Workers but low in Agricultural Labourers and Household Industry workers. The detail data in respect of Revenue Circles can be seen in the table itself.

Note: Percent of Worker to total worker are given in brackets

Economic activity of the rural people of Darrang district is shown in the table in four different categories of workers. Out of 502,838 total number of workers in the rural of the District, large number of persons take cultivation as Main work and thus constitutes 47.6 percent followed by other workers with 33.0 percent. The other category of workers, Agricultural labourers record 16.1 percent. There are few people in the district who took Household Industry either as Main work or as Marginal work and the percentage

of such workers shows 3.4 percent. The male workers in cultivation are more than the female workers in terms of absolute figures and percentage but in case of Agriculture Labourers and Household Industry, the female workers in percentage are more than males. In all 9 CD Blocks of the district, people are found to be engaged in all four categories of work and largely in Cultivation and Other works

	District Total:	**1319**	**531,282.07**	**75.2**	**14.6**

Note : - Cultivable area = irrigated area + unirrigated area

The distribution of number of villages, total area, percentage of cultivable area and percentage of irrigated area among CD Blocks are shown in the table. Out of total rural area of 531,282 hectares, 75.2 percent is cultivable area and 14.6 percent is irrigated land. Among the CD Blocks 81.7 percent cultivable land being the highest is noticed in Khirabari CD Block. The highest 30.3 percent-irrigated area is in Udaguri CD Block followed by Mazbat CD Block with 27.6 percent in the district

TABLE: 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Kharupatia (TC)	5.4	1.3	4.2	5.6	2.3	0.2	2.1	0	1
2	III Mangaldoi (MB)	16.1	9	7.1	15.7	5.2	0	6.2	0	4.3
3	IV Tangla (TC)	9.5	2.4	7.1	21.1	15	0	1.7	0	4.4
4	IV Udalguri (TC)	39.4	1.2	38.2	11.4	5.9	0.6	3.9	0	1.1
District Total		**16.6**	**4**	**12.6**	**13.8**	**7**	**0.2**	**3.7**	**0**	**2.9**

The Municipality Finance of the town shows that per capita receipt is Rs 16.6 for urban area of the district while per capita expenditure is Rs 13.8 which is lower than per capita income. Per capita income is higher in proportion in Udalguri TC than other towns and per capita expenditure is more in Tangla TC.

TABLE : 44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Kharupatia (TC)	7.3	3.4	2.2	0.6	1.1
2	Mangaldoi (MB)	6.7	4.6	2.5	0.8	2.5
3	Tangla (TC)	6.6	4.9	1.6	1.1	0.5
4	Udalguri (TC)	7.4	3.4	3.4	1.3	0.7
District Total		**6.9**	**4.1**	**2.4**	**0.9**	**1.2**

In average the number of Primary school in towns of the district is 6.9 per 10,000 population and 4.1 number is Junior Secondary/Middle school. Only 2.4 number Secondary/Matriculation schools per 10,000 population are in the district. The Senior Secondary and Colleges are recorded 0.9 and 1.2 number respectively in urban areas in the district per 10,000 population.

TABLE : 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Kharupatia(TC)	22
2	Mangaldoi(MB)	59
3	Tangla(TC)	16
4	Udalguri(TC)	20
Distrct Total		32

In average the number of beds in the urban areas of the district is 34 per 10,000 population. Mangaldoi MB with 59 beds is higher in number to other two towns followed by Kharupatia TC with 22 beds per 10,000 population.

TABLE: 46
PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Sl.No.	Name of the Town	Total population	Slum population	Percentage of slum population to total
1	2	3	4	5
1	KHARUPATIA T.C.	17783.0	554.0	3.1
2	MANGALDOI MB	23920.0	5050.0	21.1
3	TANGLA TC	18228.0	520.0	2.9
4	UDALGURI T.C.	14897.0	0.0	0.0
District Total		**74828.0**	**6124.0**	**8.2**

The table 46 gives the proportion of slum population in statutory towns. Out of the total district urban population of statutory towns 6,124 persons or 2.4 percent people live in slum area. Udalguri TC constitutes no slum population while Mangaldoi MB has 5,050 slum population which forms 21.1 percent of total population of this town.

MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl. No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Kharupatia (TC)	Mustard Oil	Jute
		Rice Product	Mustard Seeds
		Rope	Betel-Nut
2	Mangaldoi (MB)	Furniture	Cane Furniture
		Handloom	Wooden Furniture
		Nil	Vegetables
3	Tangla (TC)	Rice Product	Rice
		Soap	Ginger
		Flour	Mustard Oil
4	Udalguri (TC)	Mustard Oil	Jute
		Atta	Rice
		Nil	Cocconut

The most important commodity exported out of and manufactured in towns are shown in the table along with the name of commodities. Two to three items are manufactured by all towns. These are namely Mustard oil, Rice product, Rope, Soap, Flour etc. All towns export commodities, name of which can seen in the table.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table indicates households by tenure status and number of rooms occupied in the district by Scheduled Castes and Scheduled Tribes as well as for the district. The owned houses of Scheduled Castes households are more having one room in rural and two rooms houses in urban but it is more for Scheduled Tribes with two rooms houses in rural as well as in urban areas also. In case of rented houses, Scheduled Castes households have more houses with one room both in rural and urban and the same is the case for households of Scheduled Tribes. In case of other houses, it is depicted that the households of Scheduled Castes as well as Scheduled Tribes are more having houses with one room both in rural and urban areas

Data source: Census of India 2001, H- series. "Tables on Houses, Household amenities and Assets."

Note:-

Permanent:-1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugatediron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreateare used for roof

Semi permanent-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The table 49 gives the percentage distribution of households living in permanent, semi-permanent and temporary houses. Out of 36,970 total number of households in the district, 28.7 percent households being the highest in Harisinga Revenue Circle live in permanent houses and 29.8 and 25.9 percent households of Dalgaon Revenue Circle live in semi permanent and temporary houses respectively which are the highest proportion among all Revenue Circle. The detail in respect Revenue Circles rural and urban wise can be seen in table.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note. Percentage is to be given in brackets after the number of households .Bathroom means bathroom within the houseToilet means toilet within the houseDrainage means closed and open drainage

The table indicates that the percentage of households having the facility of improved drinking water is more in the district as well as in all Revenue Circles than all other facilities availed and thereafter it is followed by toilet. The toilet facility is seen more in urban areas than the rural areas which is double in percentage. The electricity facility is much more n urban areas than rural in the district also. The bathroom facility is seen less in the district but found more in urban. Only 9.1 percent households have availed bathroom facility in the district. The drainage facility is also not very much encouraging in the district

The table indicates number and percentage of households by type of fuel used for cooking in Revenue Circles. The percentages are shown out of the district total. It is seen that a big share of the households of the district as well as in Revenue Circles use firewood for cooking followed by crop residue and thereafter by LPG. The use of electricity, biogas and coal/char coal are very limited. Altogether 310 households of the district have no cooking arrangement in their houses. Detail in respect Revenue Circles can be seen in the table

The table indicates the number of households who have availed banking services and the number of households having some specified assets that shown in the table. Out of the total households of the district, 273,560 households have availed banking service. The banking service availed by the households in the district is more in rural areas. It is only 14,563 households in urban areas of the district. In Revenue Circle level, the banking services availed by the households are found more in Dalgaon Revenue Circle than other Revenue Circles. More households in Mangaldoi Revenue Circle have availed all assets except Radio, Television and Bicycle. The highest number of households having Radio, Television and Bicycle are found in Dalgaon, Harisinga and Dalgaon Revenue Circles respectively.

(IX) Major social and cultural events, natural and administrative developments and significant activities during the decade.

Doul of Darrang : (a festival of rejoicing)

One of the major social and cultural events associates among the people of Darrang is Doul. The month of Bahag (April) is a period of joy and pleasure. As the spring comes, the nature begins to change its colour into green. It also brings joy and delight in the minds of the people. The people of Assam mostly in Upper Assam have celebrated Bihu festival. The people of Darrang have performed Doul festival providing much important on it than any other festival. The word Doul is derived from Sanskrit word Devkul (Temple). The Doul is a Vaisnavitee festival. The beginning of this festival was made during rule of Bhuyan. Dharmadutta, a Bhuyan king had celebrated this festival during his rule in 15th century.

The capital of the king was at Rawtiya which is at present known as Rowta. With the passage of time, the Doul or Bor Bihu celebrated by the king is known as Bor Doul and the place where the festival was performed is known as Bordoulguri. It is situated at a distance of 10 kms. from west of Mangaldoi town.

The history goes that once queen Phuleswari of Ahom (1722-1731) wanted to visit to enjoy this festival of Darrang. But due to her menstrual she was unable to visit the place. The Pandit (scholar) has studied the holy books and put their argument for favour of holding Doul festival in the month of Bahag in place of Phagun (March) so that the queen can see the festival and for the reason as mentioned above, the festival has started to perform by the Bhuyan king during Bahag (April). Hence it is also called Bahagi festival. Doul is a temple of 20 to 35 fts. height with a few steps made of earth. Now off course, the material of structure has changed to concert in all places. The statue of Bishnu or 'Ghat' (a earthen pot) is placed at the top of the Doul. Doul is generally performed in 3 to 4 days. But in Darrang at present it is limited to one day only due to various reasons. One of the important aspect of Doul festival is the Mela which is held on the same day. The people from different place sin and outside the district have come with their goods and products for sale. The people enjoy the mela by purchasing their needs.

The Doul festival is also celebrated in various places of Darrang at different dates. Mention may be made of Namkhal, Puniya, Mangaldoi, Sipajhar, Tangla etc.

The other festivals popular in the district are Ojapali, Namkirtan recitation and Bhaona performances. The Biswakarma puja, Saraswati and Lakshmi puja, Diwali, Manasa puja etc are also becoming gradually more and more popular. Three Bihus are performed by the people of Darrang. Bahag Bihu/Rangali Bihu is a spring festival in which dance and music predominate. Huchari parties sing hymns and pastoral songs. The Bihu geets constitute a prolific variety of songs in Assamese literature. The central theme of these songs is love in its different mood. The death anniversaries of Vaisnavitee leaders are also celebrated in the district. Kacharis observe their own traditional festivals. Similarly Muslims also perform their own festivals.

(X) Brief description of places of religious, historical or archaeological importance and significant activities during the decade.

Bairavkund: This famous pilgrim centre of Mangaldoi sub-division lies by the side of the historic Gohain Kamala Ali and is only about 14 kms. from Udalguri Railway Station. Bhairabkund is a natural pond at the confluence of the Dhansiri and Rowta and is surrounded by the Amarigiri hills. Tradition associates Bhairavkund with the Pandavas who are believed to have bathed in this pool en-route to heaven. Koch

king Naranarayan built a moth on its bank. It is regarded as sacred by the Bhutias as well as by the Hindus. This holy and picturesque placé attracts tourists and picnic parties.

Harisinga: Harisinga (26° 44¢ N, 92° E) is a Railway Station situated at a distance of about 45 kms. north of Mangaldoi town. Tradition associates the place with Lord Krishna who sounded the war note to his followers at this place to fight with king Bana.

Kalaigaon : Kalaigaon (26° 34¢ N, 91° 59¢ E) is the head quarter of the local Revenue Circle and is situated on the Mangaldoi-Bhutiachang road at a distance of 17 kms. to the north of Mangaldoi town. It was named after the leading priest Kendukalia who worshipped at the shrine of Goddess Kamakhya. He was the royal priest of the king.

Mangaldoi : The district head quarters of Mangaldoi is located at Mangaldoi town. It lies at Lat. 26° 26¢ N. and Long. 92° 2¢ E.. Tangla is the nearest railway station situated at a distance of about 25 kms. to the north of the Mangaldoi town and is linked up by a regular bus service.

Tradition associates Mangaldoi with Mangala Devi, the daughter of Darranga Raja Parikshit Narayan, who was married to Ahom king Pratap Sinha. The ancient capital of Darrang Raja was located at Hauli Mohanpur about five kilometres north of Mangaldoi town. Immediately after the British occupation of the kingdom of Darrang, the district headquarters of the newly formed Darrang district were established at Mangaldoi but were shifted to Tezpur in 1835 relegating it to subdivisional headquarters.

Rowta : Rowta is situated about 43 kms. east of the Mangaldoi town on the North Trunk Road. Rowta Bagan is its railhead. It is said that some 550 years ago the forefathers of Shri Sankardeva established their capital here. Shri Sankardeva, the great saint-poet of Assam also stayed here for six months for propagating Neo-Vaishnavism. In early times, it was a centre of oriental learning.

Khatara Satra : At the request of Mahapurush Madhabdev, Lechamiya Gobindo Atoi came to Darrang with three other disciples by boat to establish some satras at different places of Darrang. While coming to Darrang Atoi saw a strange scene of engulfing a serpent by a frog. Observing this unbelievable event he thought it to be a good sign and accordingly he selected this place to be fit for establishing a satra. Atoi then set up a satra in 1568 A.D. which was known as Khatara Satra. The name of this place was not Khatara before establishment of the Satra. There were four people who objected for establishment of the satra. They were like Asur (demon/moster) Atoi had termed them 'Khat' (notorious). Later on, Atoi had brought four statues of Ram, Lakshman, Sita and Hanuman one for each to Satra and started to recite Bhagawat, Prasanga, Kritan and also played various musical instruments associated with Satriya dance before the statues. Govinda Atoi was successful in bringing these four Khats under him and initiated them into the Vaisnava religious. Accordingly to the charge of nature of four notorious people, the name of the place became 'Hara' means defeat. Khat – Hara has changed into Khatara.

Pacheti is one of the most important folk festivals of Darrang celebrated at Khatara Satra. On the fifth day after birth of Lord Krishna at house of father Nanada all Gokul inhabitant of Gokul performed Pacheti festival with joy. Accordingly, the people of Khatara celebrated this festival on this day at Satra. But due to some unavoidable circumstances, the people of Khatara has differed the date of observation of this festival. They began to observe this festival in between the month of Bhadra and Ahin (August and September) for four days. One of most attractive features of the festival is "Dadhi Mathan Dance". People from various walks of life come to enjoy this famous festival and also give a religious visit in the satra and bow down their heads with much devotion before the Satra.

Patherighat : This village is about 15 kms. west of Mangaldoi town. Under the British administration Patherighat was a tahsil upto 1903–04. In December, 1894, the local cultivators put up a demonstration before the Deputy Commissioner to protest against increase of land revenue and imposition of local rate. Instead of putting audience to the grievances of the cultivators, the British officer displayed and ordered the armed police to open fire. According to the old District Gazetteer of Darrang (1902) fifteen persons were killed and thirty seven were wounded. This figure is however doubtful. Some are of opinion that about 140 cultivators were killed by police in firing and several other were wounded. This popular revolt was the climax of a no-tax agitation launched by the peasants for quite sometime.

(XI) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

The major characteristic of the district can be pointed to its tea gardens. The district being a place of lower Assam has a good number of tea gardens in its jurisdiction. It produces a considerable amount out of whole production of tea in Assam. It is a big source of income for people of Darrang as well as for the Government. It is followed by Agriculture. The villager of the district solely depend on agricultural products. Rice is the major product of the villagers. Jute is also produced in low lying areas of the district. Vegetables are largely produced and sold in bulk at different local markets and also to other districts of Assam.

Mangaldoi was once a very small town which at present grows to a big town having various amenities. It becomes the headquarter of the district. The town comprises all administrative offices for administration. The schools and colleges have increased alongwith other social service institutions. It is a major trade and commercial centre of the district.

Tangla is the next biggest town of the district which is a centre of trade and commerce. The town is surrounded by a number of tea gardens. Tea garden labourers come to this town to purchase their day to day needs. Kharupetia town is also a centre of trade and commerce for the district.

The silk industry of Assam is a traditional industry which is flourished in Assam from the days of Ahom. Pat (Bombex mori), Eri (Philosamia ricini) and Muga (Antheraea Assama) are three kind of silks. Pat and Muga silk of Assam is called rich man's silk. The Eri is called poor man's silk. It is because of the fact that Pat and Muga are used to make the dresses of rich families. Eri is used to make the clothes for poor families. In Assam the Swargadeu of Ahom at extended helping hand for production of these type of silks. In the days of the king they established an administrative unit for development of Silk Industry and the first officer of this unit was Momai Tamuly Borbaruah. The tax was not imposed on land in which silk warm were reared. Due to the king's help and assistant this Golden industry of Assam has developed from their days. The British government has not taken any proper scheme for development of these industry. But later on some Britishians took some positive steps for its all round development. Mention may be made of Shri Buchanan, Hemilton, John Kinsh, Hagan, Helpher, Lefar etc. A part of production of Eri was exported to Nepal, Bhutan, Tibet etc. through Hadirachaki. At the beginning of 1900 century the production of Eri was 4,250 kgs. In Darrang, out of these amount one third was for export and remaining portion was kept for the use of households and this portion was used mostly to produce "Borkapur". This industry is remained alive due to sincere activities of the villager of the district.

The Government of Assam has taken a number of projects/ schemes to develop this industry time to time. Various farms are established almost in all districts of Assam. One Sericulture Farm was set up Bangala garh in Mangaldoi in 1948. In 1958 one Chouki Rearing Centre was established in Udalguri to rear Mulberry silk worms on Japanese system of rearing. By then, a number of projects started by the Government for its development in the district. The production of Eri is done mostly by Kachari tribe people. Sericulture is a household industry and rearing of worms is done by the female in their idle time. The clothes are mainly for domestic use but now it develops for commercial purposes.

Forest provides a great contribution in the economy of the district. The Noanadi, Orang, Singri, Bengabari etc. are forest reserves in the district. The valuable species are found in the forest which are used in various purposes and provide income to the government. The Orang Game Sanctuary lies on the bank of the Brahmaputra between Tezpur and Mangaldoi. This Game Sanctuary is name after Rajib Gandhi and it is called Rajib Gandhi Abhayaranya. The species found in this sanctuary are one horn rhinos, wild elephants, buffaloes, tigers, mithun, bison, deer, bear etc. along with various kind of birds and reptiles.

xii) Scope of Village Directory and Town Directory - Column heading wise explaination and coverage of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block

with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent.total population of2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market / hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6

to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of espective jurisdiction.

****

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per

codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B

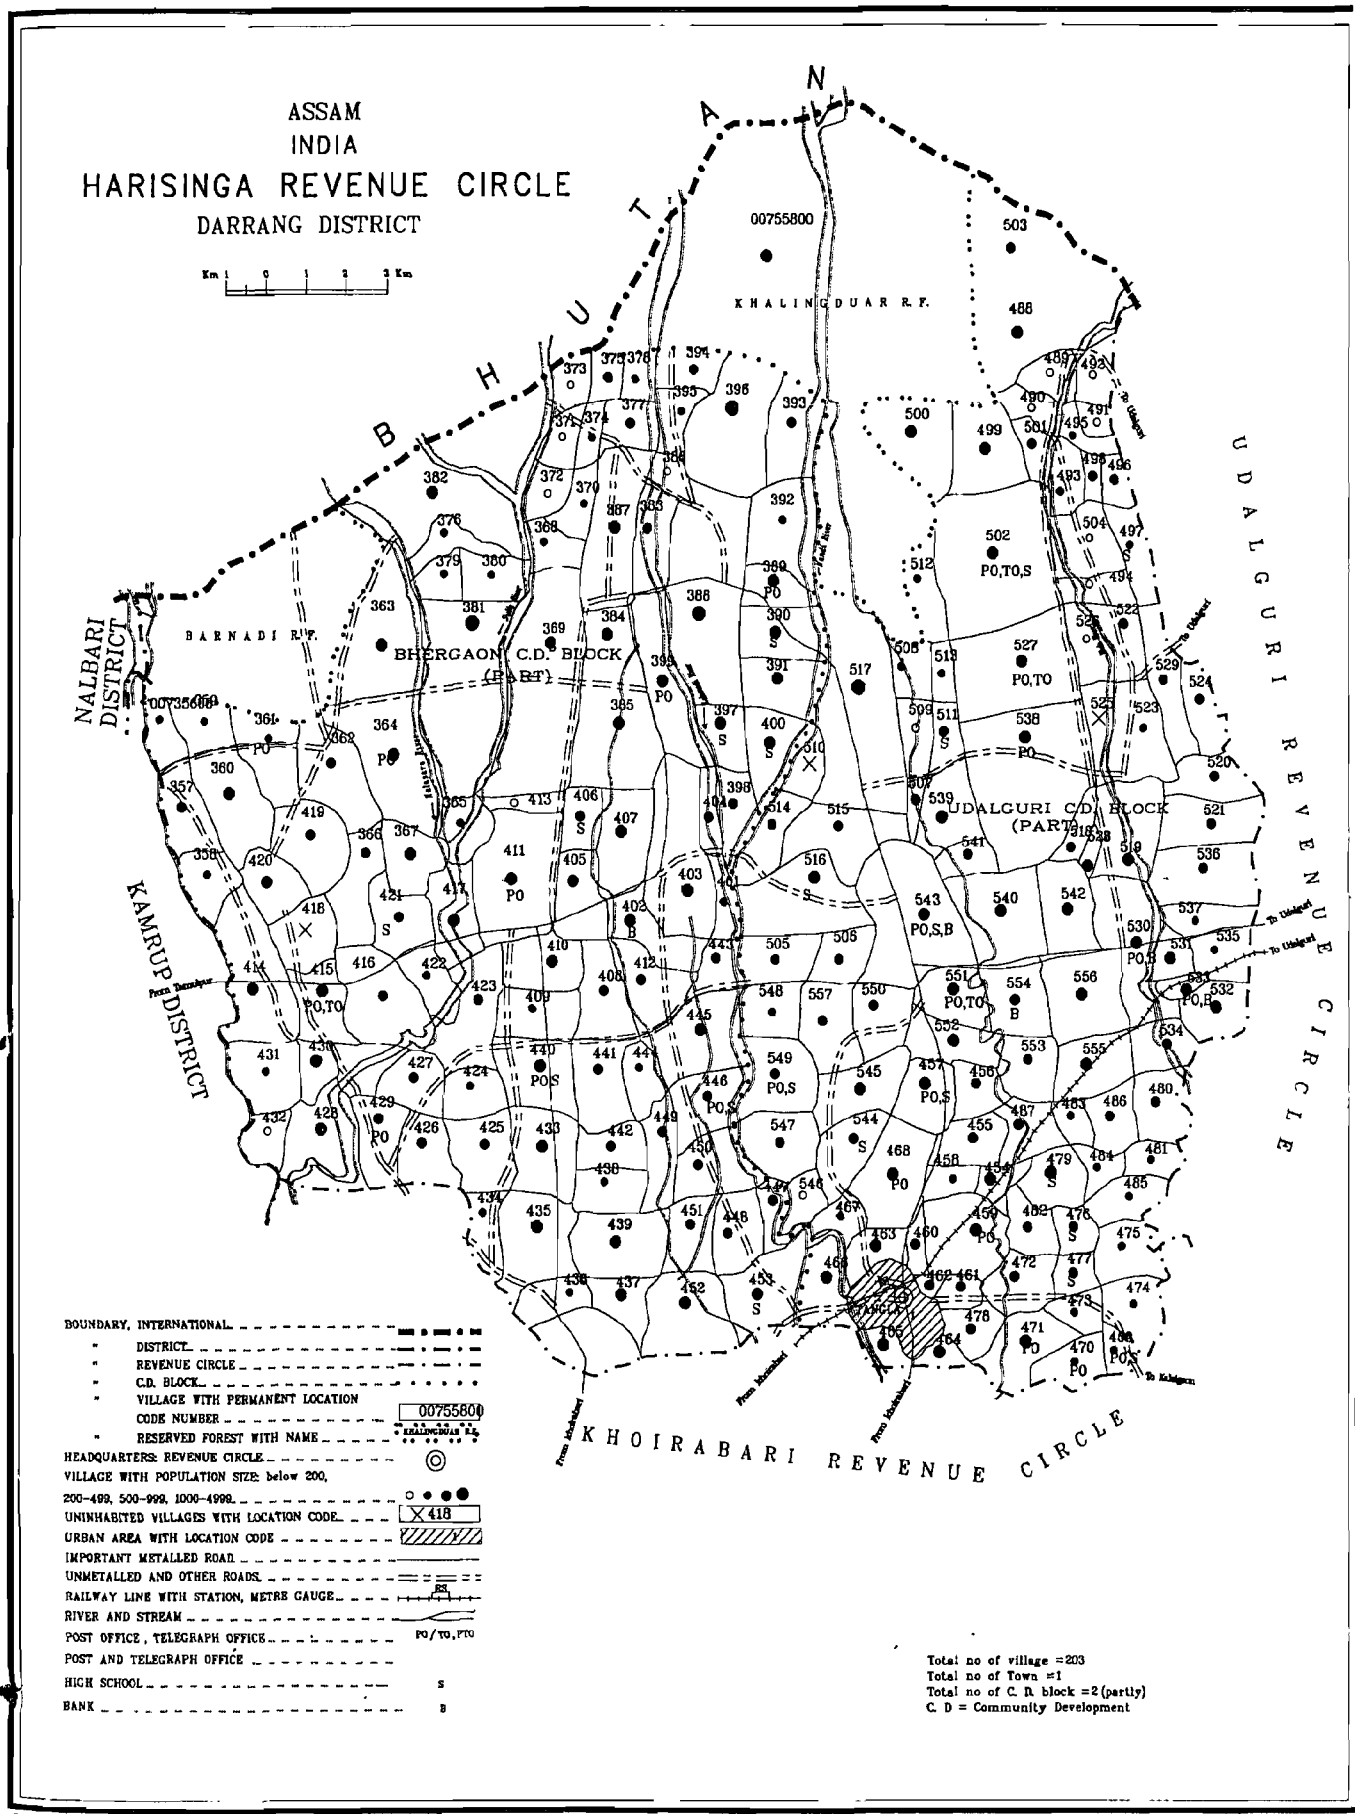

The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.

Appendix-VIII Indicates CD Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

List of villages merged in towns and outgrowths at 2001 Census

There is no above case in Darrang district

TOWN DIRECTORY

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i) Pucca Road	PR
(ii) Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i) Sewer	S
(ii) Open Surface Drains	OSD
(iii) Box Surface Drains	BSD
(iv) Sylk Drains	SD
(v) Cesspool method	CP
(vi) Pit System	Pt
(vii) Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i) Tap water	T
(ii) Tube-well water	TW
(iii) Tank Water	TK
(iv) Well water	W

Column 14 :

(v) Over Head Tank	OHT
(vi) Service Reservoir	SR
(vii) River Infiltration Gallery	RIG
(viii) Bore Well Pumping System	BWP
(ix) Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i) Hospital	H
(ii) Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type,it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

Status and Growth History

Srl. No.	Class, name and civic status of town	Location code number	Name of Taluk/ Tahsil/ Police Station/Island etc.	Name of CD Block	Area (in sq. km.)	Number of households incl. houseless households (2001 Census)	Population and growth rate (in brackets) of the town at the Censuses of		
							1901	1911	1921
1	2	3	4	5	6	7	8	9	10
1	IV Tangla (TC)	40801000	Harisinga	-	3.2	3,576	-	-	-
2	III Mangaldoi (MB)	40802000	Mangaldoi	-	4.6	4,775	-	-	1,023
3	IV Kharupatia (TC)	40803000	Dalgaon	-	2.4	3,128	-	-	-
4	IV Udalguri (TC)	40804000	Udalguri	-	4.7	2,852	-	-	-

Srl. No.	Class, name and civic status of town	Population and growth rate (in brackets) of the town at the Censuses of								Density (2001 Census)	Sex ratio		
		1931	1941	1951	1961	1971	1981	1991	2001		1981	1991	2001
1	2	11	12	13	14	15	16	17	18	19	20	21	22
1	IV Tangla (TC)				4,319	9,572 (+121.6)	- -	15,809 (+65.2)	18,228 (+15.3)	5,714.1		821	774
2	III Mangaldoi (MB	1,696 (+65.8)	2,093 (+23.4)	3,571 (+70.6)	8,547 (+139.3)	12,150 (+42.2)	-	20,747 (+70.8)	23,920 (+15.3)	5,177.5		859	906
3	IV Kharupatia (TC)				6,906	10,448 (+51.3)		15,342 (+46.8)	17,783 (+15.9)	7,535.2		886	890
4	IV Udalguri (TC)							12,086	14,897 (+23.3)	3,176.3		849	925

In area, Magaldoi MB is the biggest among all towns. The household is also more in this town than remaining towns in the district.

Darrang district comprises four towns having Municipal Board by one town and Town Committee by three towns. Mangaloi MB came into force in 1921 with 1,023 souls and Harisinga TC and Kharupatia TC formed in 1961 and Udalguri TC in 1991. The decadal growth rate is almost same in three towns but in Udalguri TC it is 23.3. The density in per km is high in Kharupatia TC than other three towns. The sex ratio is also high in Mangaldoi MB than other three towns in 2001.

STATEMENT-II

Physical Aspects and Location of Towns, 1999

Serial No.	Class, name and civic status of town	Physical aspects			Name of and road distance in kilometer(s) from		Sub-division /Taluk/ Tahsil / Police station/ Development Block/ Island HQ.
		Rainfall (in mm)	Temperature (in centigrade) Maximum	Minimum	State HQ.	District HQ.	
1	2	3	4	5	6	7	8
1	IV Tangla (TC)	2057.12	36.5	8.1	Guwahati (101)	Mangaldoi (25)	Tangla (0)
2	III Mangaldoi (MB)	2180.6	36.5	8.1	Guwahati (68)	Mangaldoi (0)	Mangaldoi (0)
3	IV Kharupatia (TC)	2181.7	36.5	8.1	Guwahati (84)	Mangaldoi (16)	Dalgaon Pt-li (8)
4	IV Udalguri (TC)	2165.35	36.5	8.1	Guwahati (126)	Mangaldoi (58)	Udalguri (0)

STATEMENT-II
PHYSICAL ASPECTS AND LOCATION OF TOWNS, 1999

Serial No.	Class, name and civic status of town	Nearest city with population of one lakh and more	Name of and road distance in kilometer(s) from			
			Nearest city with population of five lakh and more	Railway station	Bus facility	Navigable river/ canal (if within ten kilometers)
1	2	9	10	11	12	13
1	IV Tangla (TC)	Guwahati (101)	Guwahati (101)	Tangla (0)	Yes (0)	-
2	III Mangaldoi (MB)	Guwahati (68)	Guwahati (68)	Tangla (32)	Yes (0)	Brahmaputra (R) (5)
3	IV Kharupatia (TC)	Guwahati (84)	Guwahati (84)	Rowta (26)	Yes (0)	Brahmaputra (R) (8)
4	IV.Udalguri (TC)	Guwahati (126)	Guwahati (126)	Udalguri (0)	Yes (0)	-

The rainfall in Tangla TC is less than other three towns and it is almost same in other towns. The temperature both maximum and minimum are same in all towns. The state headquarters is far away from Udalguri TC than the other towns. The district headquarter is also far from this town. Guwahati is the nearest city having five lakh and more population for all towns and also for one lakh and more population for all towns. Two towns have railway station in its jurisdiction. No navigable river is available in Tangla and Udalguri TCs within ten kms..

STATEMENT - III
MUNICIPAL FINANCE, 1998-99

Serial number	Class, name and civic status of town	Receipt (in Rs.'000)						
		Receipt through taxes, etc.	Revenue derived from municipal properties and power apart from taxation	Government grant	Loan	Advance	Other sources (specify)	Total receipt
1	2	3	4	5	6	7	8	9
1	IV Tangla (TC)	436	738	549	-	-	-	1,723
2	III Mangaldoi (MB)	2,150	518	947	-	-	241	3,856
3	IV Kharupatia (TC)	222	744	-	-	-	-	966
4	IV Udalguri (TC)	181	4,790	695	200	-	-	5,866

Serial number	Class, name and civic status of town	Expenditure (in Rs.'000)						
		General administration	Public safety	Public health and conveniences	Public works	Public institutions	Others (specify)	Total expenditure
1	2	10	11	12	13	14	15	16
1	IV Tangla (TC)	2,741	217	-	310	-	581	3,850

4	IV Udalguri (TC)	Jute	Rice	Cocconut	Mustard Oil	Atta	Nil	5	1	5

The statement indicates three most important commodities exported and manufactured in towns which can be seen in the statement. There are 5,6, 4, and 5 banks in Tangla TC, Mangaldoi MB, Kharupatia TC and Udalguri TC respectively. There are no agricultural credit societies and non-agricultural credit societies in Mangaldoi MB. But these facilities are available in all other towns.

STATEMENT - VII

CIVIC AND OTHER AMENITIES IN SLUMS, 1999

Sl no.	Class and name of town	Name of the slum	Is it notified	No. of households (approximate)	Population of the Slum (approximate)	Paved roads (in kilometers)	System of sewerage

4	Udalguri TC	No Slum	-	-	-	-	-	-	-	-	-

There are slum population in Tangla TC, Mangaldoi MB and Kharupatia TC whereas no slum population is available in Udalguri TC. Mangaldoi MB has 13 pockets of slum population The slum areas of all towns are not notified. No paved road is available in all towns The system of sewerage OSD and BSD in slum areas are seen common in all pockets of the towns. The slum dwellers have mostly two types of latrines. The use of water borne and service latrines are more in all pockets. The method of disposal of night soil in all pockets of towns for slum is 'St. There are tap points for supply of protected water in slum area of Tangla and Kharupatia TCs. In slum areas of Tangla TC, there are electricity connections and the number connections for different purposes can be seen in the statement .

APPENDIX TO TOWN DIRECTORY

Towns showing their outgrowths with population

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
1	Tangla (TC)	18,228	-	-
2	Mangaldoi (MB)	23,920	-	-
3	Kharupatia (TC)	17,783	-	-
4	Udalguri (TC)	14,897	-	-

There are no outgrowths in any towns of Darrang District

****

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE

Annexure – I : Number of villages under each Gram Panchayat

(Data has not been collected in 2001 Census)

Annexure-II: Note on Fertility-Mortality and Migration

Fertility, Mortality and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.

In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever married women and the last question was to only currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to the Assam State and are defined as below.

Age Specific Marital Fertility Rate (ASMFR)

This is the average number of children born alive during the last year per married women of a particular age group.

Age Specific Fertility Rate (ASFR)

It is the average number of children born alive during the last year per woman of a particular age group.

General Fertility Rate (GFR)

GFR is the number of children born alive during the last year per 1000 women in the age-group 15-49.

General Marital Fertility Rate (GMFR)

This is the number of children born alive during the last year per 1000 married women in the age-group 15-49.

Total Fertility Rate (TFR)

It is the total number of children that would have born alive per women, had the current schedule of age specific fertility rates been applicable for the entire reproductive period.

Total Marital Fertility Rate (TMFR)

This is the total number of children that would have been born alive per married women, had the current schedule of age specific marital fertility rate been applicable for the entire reproductive period.

Child-Women Ratio

It is the number of children in the age-group 0-4 years per 100 women in the age group 15-49.

(Detail note on various measures are explained in non Census concepts in earlier chapter)

Annexure-III Various measures of fertility and mean age at marriage, 1991 Census

Fertility:

As seen through various indicators of fertility in the district, it is quite clear that the district fall under the category of high fertility zone with GFR of 185, GMFR of 246 and TFR 7.3 against the respective figures at state level at 135, 190 and 6.0. Various measures of fertility and other fertility related data are presented in the following table.

Table I
Various Measures of Fertility in Assam State and Darrang district-1991

Fertility Measure	Darrang district	Assam
1	2	3
1. G.F.R.	185	135
2. G.M.F.R.	246	190
3. T.F.R.	5.5	4.2
4. T.M.F.R.	7.3	6
5. Crude Birth Rate	42	31.5
6. No. children ever born per woman in age group 45-49	5.5	5.2
7. Mean age at marriage	18	18.3
8. Child-woman ratio(0-4)	572	575
9. Child-woman ratio(5-9)	765	737

The above table reveals that the fertility rates are very high in Darrang compared to the state level averages. The crude birth rate is recorded at 42.0 against 31.5 at state level. Mean age at marriage being lower, the size of the child woman ratio (5-9 years) is very high as 765 in the district against 737 at state level.

To be more specific about fertility indicators, age-group wise fertility (ASMFR) levels for married women are shown in the following table.

Table II
Age Specific Marital Fertility Levels in Assam State and Darrang district -1991

Age Group	Darrang District			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0.18	0.16	0.22	0.15	0.15	0.13
0.165	20-2	0.21	0.21	0.26	0.21	0.22
25-29	0.19	0.19	0.18	0.18	0.19	0.12
30-34	0.13	0.13	0.11	0.13	0.14	0.09
35-39	0.08	0.08	0.03	0.09	0.10	0.04
40-44	0.05	0.05	0.04	0.05	0.05	0.02
45-49	0.03	0.03	0.02	0.03	0.03	0.03

It can be seen in the above table, that compared to State level averages, the ASMFR in the age group 15-19 & 25 -29 is more in both rural and urban, whereas in the age group 20-24, 30-34 and 40-44 it is higher than the respective rates of urban area in Assam. More surprisingly the ASMFR rates (15-19 and 20-24) of urban area in Darrang district are normally higher than the rural areas of the district.

For comparison of fertility rates with State level as well as with all other districts of the states, the data on other measures of fertility such as GFR, TFR, birth rates and Child-Women ratio etc., are presented in the following Annexure for Darrang district as well as for the other districts of Assam State.

Table III
District-wise various measures of Fertility and Mean Age at Marriage Assam-1991

State/District	GFR	GMFR	TFR	TMFR	CBR	No. of children ever born per ever married woman in age-group 45-49	Mean Age at Marriageof currently married women
1	2	3	4	5	6	7	8
Assam	135	190	4.2	6	31.5	5.2	18.3

19. Karbi Anglong	140	207	4.4	6.8	33.1	5.2	18.8
20. NorthCacharHills	127	187	3.8	6.4	29.7	5.5	19.2
21. Karimganj	196	291	7.1	9.3	48.5	4.8	18.2
22. Hailakandi	136	196	4.2	6.4	32.1	5	18.2
23. Cachar	137	190	4.1	6.1	32.6	4.5	18.5

Mortality:

The Mortality figures in the district, confirm to the general theory of relation between fertility & mortality. The mortality rates are very high in the district, which convinces the belief that less survival rates prompts people to go for more number of children to compensate for the non-survived children to ensure a desired number of children as planned. The data on mortality are presented in the following table.

Table IV

Estimates of Child Morality in Assam and Darrang district, 1991

Mortality Measure	Darrang District	Assam State
1	2	3
Q(1)		
Persons	111	92
Male	118	96
Female	86	87
Q (2)		
Persons	83	101
Male	81	104
Female	84	98
Q (3)		
Persons	97	104
Male	103	106
Female	92	101
Q (5)		
Persons	108	116
Male	115	118
Female	101	115

The above table Q(1)shows the infant mortality rates and, Q(2), Q(3) and Q(5) indicate the size of child mortality in the age group below 2 years, below 3 years and below 5 years respectively. As can be seen, all these rates are high in Darrang compared to the state level rates, for both males and females.

Annexure – IV: Percentage distribution of migrants by place of birth/place of last resident, 1991 and 2001 Census.

Migration:

Out of 1,298,860 persons in the district 121,789 are born outside the district in which makes about 9.4% of total population. The details data may be seen in the following table.

Table I

Percentage Distribution of migrants by place of birth- 1991 Assam

21. Karimganj	68,166	28,507	39,659	35.39	25.93	42.19	21.44	20.59	22.05	43.17	53.48	35.76
22. Hailakandi	32,821	12,802	20,019	61.99	49.88	69.73	18.74	24.61	14.99	19.27	25.51	15.29
23. Cachar	96,379	43,036	53,343	42.36	34.15	48.99	20.07	22.68	17.96	37.57	43.17	33.05

In the above table, it is clear that out of total population born outside the district, 62.3% are from other districts of the state, 21.3% are from other states outside Assam and 16.4% are from other countries, outside India. The data also show that proportion of males are higher than females in all the categories of migrants born outside the State.

The other measure to find migrant population is by place of last residence. Out of total population about 30932 (2.4%) persons are reported as came to this district from some other places out side the district. The data on migrants by place of last residence are presented in the following table.

Table-II

Percentage distribution of migrants by place of birth- 2001 Assam

State/ District	Total migrants			From elsewhere in the district outside the place of enumeration

In the above table it is seen that out of the total migrants in the district of Darrang 72.8 percent are from elsewhere in the district outside the place of enumeration, 19.2percent are from other state and 2.8 are from other countries.

The data also shows that females are higher in the category from elsewhere in the district of enumeration. In the other three categories male migrants are higher.

Similar data on migrants classified by their place of last residence are presented below in table –IV

The above table on migrants by place of last residence shows that the place of last residence of 82.56% migrants was some other districts of the State, of 15.23% migrants it is outside the state but within India and about 2.21% migrants are from outside the country. Here too the share of males is higher in case of migrants whose last place of residence is outside the State.

	17.2	16.6	17.5	4.1	7.7	2.8	2.0	3.8	1.4

From the above table it is seen that migrants of elsewhere in the district outside the place of enumeration consists of 80.0 percent, from other district it is 14.4 percent, from other state it is 3.8 percent and from other countries it is 1.8 percent of the total migrants.

Annexure – V Brief account of main religions in the district/tahsil, 1991 and 2001 Census

Religion:

A brief account of religious composition of the population in the district is presented in the following table.

Table- I

Main religions in the Darrang district and Assam state –1991

District/State	Religion	Number of Followers	Percentage to total Population	Percentage Rural	Urban
1	2	3	4	5	6
Assam	Total population	22,414,322	100	88.9	11.1
	Hindu	15,047,293	67.1	86.2	13.8
	Muslim	6,373,204	28.4	94.7	5.3
	Christian	744,367	3.3	96	4
	Buddist	64,008	0.3	93	7
	Jain	20,645	0.11	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8
Darrang	Total population	1,298,860	100	95.1	4.9
	Hindu	786,332	60.5	93.1	6.9
	Muslim	415,323	32	98.2	1.8
	Christian	81,952	6.3	98.8	1.2
	Buddist	1,277	0.1	97.4	2.6
	Jain	686	0.1	5.8	94.2
	Sikh	227	0	45.4	54.6

The figures in the above table show that compared to the state as whole the proportion of Muslims and Christians is more in the district. However, Hindus have the major share in the district followed by Muslims and next Christians.

Table-II

Main Religions In The Darrang District And Assam State - 2001 Census

District/State	Religion	Number of followers	Percent to total population	Percentage Rural	Rural_%	Urban	Urban_%
1	2	3	4		5		6
Assam	All Religions	26655528	100.0	23216288	87.1	3439240	12.9
	Hindus	17296455	64.9	14477966	83.7	2818489	16.3
	Muslims	8240611	30.9	7714619	93.6	525992	6.4
	Christians	986589	3.7	936008	94.9	50581	5.1

Less than 18	339435	320960	99.6	98.0	0.4	1.9	0.0	0.1	0.0	0.0
Less than 21	390334	370632	98.5	92.0	1.4	7.8	0.0	0.2	0.0	0.1

A comparison of the district level figures of martial status with that of the state averages reveals that the percentage of never married males and females slightly higher than the state average.In case of married males and females the percentage is slightly lower than the state average. In case of widowed males and females the percentage is slightly lower than the state percentage. Again in case of divorced /separated males and females the percentage is the same with that of the state percentage.

The highest percentage of married males and females are recorded in the age group of 45-49 and35-39 in the district being 95.4 percent and 88.2 percent respectively.The corresponding figures in the state level for males and females being 22.2 and 8.3 percent respectively in the district which is higher than the state percentage of 22.1 and 6.3 percent respectively.

Annexure – VII

Age, sex and education in the district, 1991 and 2001 CensusEducation and Literacy rate:

Age-group wise literacy rates for males and females in respect of both at State and district level are presented in the following table.

Table-I

Age-group wise Literates by Educational level in Assam, 1991 Census

Educational Level	Percentage of population by age-group and sex									
	7—14		15-19		20-49		50-59		60+

10. Graduate & above	0	0	0.4	0.43	8.34	5.36	6.66	1.89	3.08	1.04

Note: 1. Percentage of literates is to the total population.
2. All other percentages (Sl.No 2 to 10) are percentages to literate population only.

As it can be seen that the literacy level of population of Darrang district is low compared to the state level averages. Highest percentage of literates among males and females are found as 70.8% and 58.7% respectively in the age-group 15-19 years at State level, whereas, in the district these respective figures are 61.70% and 48.3% in the same age-group.

Table-II

Agegroup-wise literates by educational level in Darrang district- 1991

Educational Level	Percentage of population by age-group and sex

In the district, the literacy rate for males and females in all age group are very low as compared to the state rates. It is also show seen that percentage of literate is high in the age group of 15-19 than in all other age group both male and female, though it is lower than the state percentage. Literate population are seen high up to middle level in all age group excepting the age group 20-49.In the higher educational level it is found to be low as compared to the state literacy.

Annexure- VIII Distribution of different mother tongues returned in 1991 and 2001 Census

Languages and Dialects:

As regards to the first five ranks of languages in terms of number of persons speaking, these are same as at the State as a whole except the Nepali and Hindi where Nepali has fifth rank next to Hindi at state level but in Darrang district it has the forth rank leaving Hindi the 5th rank. Further Rabha is another language spoken in the district by above 1.0% of population.

The detail information on number of population and their percentages speaking different languages are presented in the following table.

Table-I

Distribution of population by different Mother Tongues- 1991 Census

Mother tongue	No. of persons classified by their tongue			
	Assam State		Darrang district	
	Total No.	Percentage to total	Total No.	Percentage to total
1	2	3	4	5
1. Assamese	12,841,744	57.29	779,521	54.73

14	Rabha	130,875	0.5	0	0.0
15	Dimasa	107,070	0.4	528	0.1
16	Munda	92,942	0.3	0	0.0
17	Kurukh/Oraon	72,304	0.3	36	0.0
18	Rajbangsi	51,225	0.2	0	0.0
19	Khasi	29,292	0.1	3103	0.6
20	Telugu	27,354	0.1	692	0.1
21	Lalung	26,480	0.1	0	0.0
22	Haijong/Hajong	25,177	0.1	0	0.0
23	Hmar	24,866	0.1	5	0.0
24	Deori	23,366	0.1	0	0.0
25	Punjabi	21,292	0.1	21	0.0
26	Mundari	20,045	0.1	0	0.0
27	Zemi	15,514	0.1	0	0.0
28	Kuki	15,423	0.1	115	0.0
29	Mura	12,673	0.0	0	0.0
30	Sema	10,346	0.0	0	0.0
31	Total of Other Mother Tongues	1,032,125	3.9	18,011	3.3

As can be seen from the above table the number of persons speaking Assamese consists of the major portion (39.7 percent) of total population in the district, followed by Bengali with (30.7percent), Bodo /Boro (13.2percent), Sadan / Sadri (3.4percent) and Nepali (3.1percent). The population with all the other Mother Tongues each constitute a negligible percentage.

Annexure- IX Distribution of scheduled Castes and Scheduled Tribes in 1991 Census

Scheduled Castes and Scheduled Tribe Population

Scheduled Castes:

Out of 1,298,860 total population of the district in 1991, there are 64,350 Scheduled Castes population 5.0% and the remaining are in the category of other than Scheduled Caste. Caste-wise number of persons under five prominent scheduled castes in the district are presented in the following table.

Table-I

Distribution of Scheduled Castes population among five prominent Scheduled Castes 1991 Census

Sl.No	Name Scheduled Castes	No. of persons			percentage to a	percentage Distribution	
		Total	Rural	Urban	population	Rural	Urban
1	2	3	4	5	6	7	8
1	Namsudra	23,125	20,817	2,308	35.94	90.02	9.98
2	Kaibartta or Jalia	15,410	13,718	1,692	23.95	89.02	10.98
3	Jhalo, Malo or Jhalo-Malo	6,580	5,618	962	10.23	85.38	14.62
4	Brittial- Bania	5,729	4,955	774	8.9	86.49	13.51
5	Hira	4,019	3,924	95	6.25	97.64	2.36
6	Others	9,487	7,463	2,024	14.74	78.67	21.33
	All Scheduled Castes	64,350	56,495	7,855	100	87.79	12.21

Note: Other include Bansphor, Bhuimali/ Mali, Dugla/ Dholi, Jal keot, Lalbegi, Mahara, Mehtar/Bhangi, Patni, Sutradhar, Dhupi/ Dhobi, Muchi/Rishi and unclassified castes.

The table above may be seen where the Namsudra is the prominent Scheduled Castes in the District, which constitutes more than one third 35.9% of all Scheduled Castes population of the district. The next prominent Caste is Kaibartta or Jalia with 24.0%, followed by Jhalo, Malo or Jhalo-malo, which has a share of 10.2% of the total SC population. All the remaining castes have a share less than 10.0%.

Rural-Urban distribution of Scheduled Castes population as shown in the table (Col. 8 and 9), reveal that, though there are some differences among different castes in respect of percentage distribution between rural and urban, but major portion of the all Scheduled astes population are in rural area only. More than 90.0% of population of Namsudra and Hira Castes are found in rural area only whereas in case of remaining three castes, the percentage share of rural is less than 90%. As seen for all castes that indicates 87.8% are in rural and 12.2% are in urban area.

Scheduled Tribes:

The Scheduled Tribes constitute about 17.3% of the total population of the district. The data relating to five prominent Scheduled Tribe population are presented in the following table.

Table-II

Distribution of Scheduled Tribes population among five prominent Scheduled Tribes 1991 Census

Sl.No	Name Scheduled Tribes	No. of persons			percentage to all Scheduled Tribes	percentage Distribution	
		Total	Rural	Urban		Rural	Urban
1	2	3			6	7	8
1	Boro,Borokachari	189,962	188,314	1,648	84.44	99.13	0.87
2	Kachari,Sonwal	5,549	5,444	105	2.47	98.11	1.89
3	Rabha	29,010	28,606	404	12.9	98.61	1.39
4	Hojai	77	72	5	0.03	93.51	6.49
5	Miri	56	45	11	0.02	80.36	19.64
6	Others	303	272	31	0.13	89.77	10.23
	All Scheduled Tribes	224,957	222,753	2,204	100	99.02	0.98

Note: Other include Deori, Lalung, Mech and unclassified tribes.

It may be seen in the above annexure that Boro or Boro Kachari is the prominent tribe in the district having a share of 84.4% of the total Scheduled Tribes population. Next to this is the Rabha tribe which has a share of 12.9% followed by Kachari, Sonwal (2.5%). Remaining tribes constitute less than one percent of all Scheduled Tribes population.

Rural-urban distribution reveal that all the prominent tribes having major share are mostly concentrated in rural area only, whereas other tribes which do not constitute even one percent of all Scheduled Tribes population are to some extent found in urban areas. These are Hojai, Miri, and other minor tribes whose percentage in urban areas is 6.5%, 19.6%, and 10.2% respectively. However, altogether, their concentration in urban area is less than one percent
