THE DOOR FRAME OF *DA-PARBITIA*

The remains of *Parbatia* provide one of the earliest specimen of architecture and stone carving in Assam bearing artistic style of Gupta period (600AD). The Door Frame here belongs to the Pataliputra School of Art. The nature of the remains indicates that the temples were dedicated to both Lord *Siva* and *Vishnu*. There are two figures of Goddesses *Ganga* and *Yamuna* on the jambs of the frame. On the right of *Ganga* there are again two figures one of them is standing with a dancing pose while the other is kneeling. The divine character of the Goddesses are indicated by the holes behind their heads. To the left of the holes there is a *Nagi* while to the right are seen two geese indicating a sign of Gupta Art. At the bottom of the lintel in the centre of the inner band of the jamb, there is a beautiful flying figure holding a garland in his hand representing *Jasuda*. There is another band containing *Chitra* Window patterns and showing figures of Lord *Siva, Krishna and Surya*.

Annexures: 834 - 851

Annexure I	Number of villages under each Gram Panchayat	835
Annexure II	Fertility and Mortality 1991 Census	835
Annexure III	Various measures of fertility and mean age at marriage,1991 Census	835
Annexure IV	Percentage distribution of migrants by place of birth/place of last residence, 1991 Census	837
Annexure V	Brief account of main religions in the district / tehsil,1991 Census	842
Annexure VI	Marital status of population as per 1991 Census	844
Annexure VII	Age, sex and education in the district, 1991 Census	846
Annexure VIII	Distribution of different mother tongues returned in 1991 Census	849
Annexure IX	Distribution of Scheduld Castes and Scheduled Tribes in 1991 Census	850

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

(P. Hazarika)
Director of Census Operations,
Assam, Guwahati.

Statement 9 gives the houseless and institutional population of Revenue Circles for rural and urban. The population and number of households of houseless are more in rural than in urban but institutional population are more in urban than rural. Among the revenue circles, Dhekiajuli Revenue Circle with 434 households covering 1,930 houseless population is the highest and the lowest is noticed in Helem Revenue Circle with 23 persons. Gohpur Revenue Circle there is no houseless population. Tezpur Revenue Circle with 413 number of households having 14,555 persons stand in the highest position in the distribution of institutional population among all Revenue Circles and the lowest is noticed in Gohpur Revenue Circle with 237 persons.

****

ANALYTICAL NOTE

ANALYTICAL NOTE ON SONITPUR DISTRICT

(i)History and scope of District Census Handbooks

District Census Handbook is the most valuable publication brought out by the Census organisation on behalf of each State Government. This provides information on some basic demographic and socio-economic characteristics and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being the only informative source of every district of each state.

The publication of District Census Handbook was first initiated during 1951 Census with the collaboration of respective state Governments. In 1951, only some demographic and some socio-economic information at village and town level along with some Census tables were published in District Census Handbook. Since then, it had undergone radial changes during the subsequent decades and has been grown substantively both in its scope and content by incorporating more Census tables and also some basic statistics on land use pattern, agriculture, industry etc. The D.C.H.B. of 1961 was considered as a unique asset published by the Census organisation. In 1971 Census, further improvements were made by enlisting many more information on villages and towns in the form of Village and Town Directory. It had three parts. The Part-A relates to Village and Town Directory, Part-B contained Village and Town-wise Primary Census Abstract and Part-C dealt with administrative aspect and Census Tables based on PCA etc. The 1981 Census again widened the scope of DCHB to cover more data on literacy, health care etc, in addition to the information covered in 1971 DCHB. It was divided into two parts. The Part-A included data on Village and Town directory and Part-B was devoted for Village and Town-wise primary Census Abstract. However, this part of the DCHB was not brought to light in Assam as no Census was conducted due to prevalence of disturbed condition in the State. In 1991 Census, the D.C.H.B. was divided into two parts. The Part – A consisted the Village and Town directory data and Part-B presented the data of Primary Census Abstract.

As a tradition of the past, in the present DCHB also, some more information on availability of facilities such as, credit societies, banks, recreation and cultural institutions, news paper/ magazines etc, are included. Further, information of income and expenditure, important commodities manufactured, exported and imported etc., are also included to give a fuller account to the scope of these directories. Similarly in town directory also, few more information are included.

The process of collection and compilation of these data involved lot of exercises. At first, revenue circle-wise information on each village has been collected by the revenue authorities at district level. These data are compared with that of 1991 at district level and after thorough scrutiny and cross-check, these records are submitted to the Census directorate. In case of town directory, data have been collected directly from the Commissioner of Municipal Corporation and Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 data at Census directorate. Thereafter efforts are made to compare and cross-check with similar data made available from other sources especially data published by various Departments of State Government to verify the authenticity and correctness of figures received through village and town directory booklets. After that only, compilation and computerization of these data have been made according to the instructions of the Registrar General and Census Commissioner, India. It is therefore regarded that because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication than that of many publications brought out earlier in this line.

(ii)Brief history of the district

Mythologically, the present districts of Sonitpur and Darrang along with their surrounding territories were known as Sonitpur. The name of Sonitpur is related to the bloody battle between King Bana and Lord Krishna. As the story goes, the love episode of Bana's beautiful daughter Usha and Anirudha, the grandson of Lord Krishna dragged Bana into a bloody war with Lord Krishna of Dwaraka. In this battle Bana suffered a crushing defeat. The profusion of blood that spilled in this war is the reason for calling

this place Sonitpur (*Sonit* means blood and *pur* means city). Subsequently it is believed that the name of town Tezpur is the Assamese translation of Sonitpur (*Tez* means blood and *Pur* means city).

The district of Sonitpur was originally included in the ancient Hindu kingdom of Kamarupa of the *Mahabharatha* fame. The history of the Kingdom, which went back to the twelveth century before Christ, is however of doubtful tradition fragmented here and there. The history of the district can be properly traced only from the beginning of the sixteenth century after Christ, when it was incorporated in the territories of the Koch Kings. In this period, whole the eastern portion of the district seemed to have been under the *Ahom* influence, the portion west of the *Bharali* river was under the Koch dominance.

The whole district of Sonitpur, once formed a part of the ancient *Kamrupa*, was ruled by three dynasties viz., the *Varmans*, the *Salastambhas* and the *Palas*. *Pushyvarman*, who was the first important ruler of *Varman* dynasty is quoted to be flourished in the middle of the fourth century A.D. and this dynasty ruled over *Kamrupa* for about three hundred years. Among the class of this dynasty *Bhaskarvarman* (594-650 A.D.) was the greatest monarch among the most remarkable rulers of ancient India. Hiuen-Tsang, the Chinese pilgrim who visited *Kamrupa* during the reign of Baskar Varman recorded that the king was found of learning and man of high talents.

The dynasty of *Salastambha* family is believed to have commenced after the end of Baskar Varman's rule. This family was called as *Bhaumas* of *Haruppesvara*, which is identified with Tezpur. Salashtamba was powerful and described as a "tiger like king". The remarks on the stone building excavated at Tezpur court compound is believed to belong to the place of Vanamala who ruled during 835-865 A.D. The kingdom of *Kamrupa* passed in to the hands of Brahmapala, the founder of the *Pala* family after the death of the last king of *Salastambha* dynasty towards the end of the 10th century and this line of *Pala* kings ruled for about one hundred fifty years. The last king of this dynasty was Jayapala who expired in 1138 A.D. Darkness descends on the history of Kamrupa after the fall of the *Pala* dynasty and next successors. However, the Tezpur grant of Vallabhdev (1185 A.D.) records the names of Rayarideva, Uday Karma and Vallabhadeva as successors in the Tezpur reign of *Kamrupa*.

According to the historical events, Biswa Sinha the first Koch King conquered Darrang including the present Sonitpur, which was part of the then Darrang district. Biswa Sinha rose to power in about 1515 A.D when the Bara Bhuyans were ruling the small principalities in several parts of the then Darrang district. The Koch expedition is believed to have taken place in 1546 A.D. The reign of Naranarayan, the eldest son of Biswa Sinha represents the zenith of Koch power. He died in 1584 A.D. After his death, quarrel began between the Lakshminarayan, the son of Naranarayan and Parikshit, the successor of Raghudev. Laxminarayan sought the help of Nawab of Dacca to subdue Parikshit, and the other side, Parikshit sought the help of Ahom king Pratap Sinha. In 1614 A.D., Moguls defeated Parikshit and he was taken to Delhi as a prisoner, and his kingdom was annexed to Mugal empire. In 1616, the Ahom king, Pratap Sinha inflicted a crushing defeat on the invading Muslims on the bank of Bharali. But in 1637 A.D., the Muslims who were advancing towards Kajali at the mouth of Kallong, again defeated Ahoms. In the counter offensive, the war ended with a treaty between Muslims and Ahoms. Under this treaty the Barnadi on the northern bank of the Brahmaputra and the Asurar Ali on the south bank were accepted as the boundary between them.

Mir Jumla, the governor of Bengal made an attack on Assam on 4th January 1662, and captured Gauhati. But in 1667 A.D., the Ahoms again captured Guahati from the Muhammadans and extended their territory up to the Manas river. On hearing this, Aurangazeb sent a big army against Ahom, which reached Rangamati in February 1669 A.D. and advanced up to Tezpur. However, in 1671, Ahom gained a decisive victory over Mughals at Saraighat and Mughals retreated to Rangamati. The zenith of Ahom power was reached during the reign of Rudra Sinha (1695-1714 A.D.)

During the period of Kamaleshwar Sinha, who succeeded to the Ahom throne in 1795, there was a series of insurrections in several parts of the Ahom territory. The Daflas and Moa-morias rose in rebellion. The darkness period of the history of Assam is from 1818-1824 A.D., when the Burmese invaded Assam and let loose a reign of terror. After conquering Assam, the Burmese intruded upon British territory, which led to British intervention. Soon after a war between British and Burmese, the treaty of Yandabo took place on February 24, 1826, which led to the eventual annexation of Assam to the East India

Company. Since then Sonitpur remained part of the Darrang district until 1983 when this area was upgraded as independent district.

(iii)Administrative set-up

In Sonitpur district, no jurisdictional change has taken place during 1991-2001 but a new sub-division viz. Gohpur has been created comprising two Revenue Circles out of the earlier Bishwanath sub-division. Helem and Gohpur are the two Revenue Circles of the present Gohpur sub-division. Hence, there are three sub-divisions in the Sonitpur district 1) Tezpur, 2) Bishwanath and 3) Gohpur with seven Revenue Circles as shown in table-1. No jurisdictional changes are taken place in the areas of Revenue Circles after 1991 Census. The number of villages in the district has gone up to 1874 in 2001 from 1757 in 1991 Census.

District Administration :

The Deputy Commissioner of the District is the overall in charge of the administration of the entire district. He also acts as the Collector in case of Revenue matters, as a District Magistrate in case of maintenance of Law and Order and General Administration, as a District Election Officer in case of conduct of Election, as a Principal Census Officer while conducting Census, and so on. A number of Officers, like Additional Deputy Commissioners, Sub-divisional Officers, Extra Assistant Commissioners and others assist the Deputy Commissioner in looking after the administration of the district.

From the developmental angle, Sonitpur district is divided into 14 Development Blocks. Below the block level set-up, there are Gaon Panchayats, each comprising a number of villages and governed by local-self bodies.

(IV) Physical features

Location

The Sonitpur district lies between 26° 28' 00" and 27° 02' 15" N latitude and 92° 19' 00"and 93°47' 15" E longitude and covers an alluvial tract between Brahmaputra river on the south and the foot hills of the eastern Himalayas forming parts of Bhutan; Kemeng and Subansiri districts of Arunachal Pradesh on the north. To the east, it is bounded by Lakhimpur district and to the west by Darrang district. The district of Sonitpur covered a total area of 5,32,400 hectares and a population of about 1424287 in 1991. In terms of total area covered, this district occupies the second rank in Assam State, next to Karbi Anglong, which has an area about 10,43,400 hectares.

Topography

Physiographically, the district is mainly a flat alluvial tract; in its southern part, a few scattered 'inselbergs' of gneissic rocks not exceeding 90 to 140 m., high above mean sea level, lie along the north bank of the Brahmaputra. In the northern front along the base of the foot-hills of the eastern Himalayas, from where the alluvial plain gradually slopes down to the Brahmaputra, there are several low-lying mounds made up of unsorted river terraces. Some parts of the district are hills, covered long grass jungle interspersed here and there with patches of rice fields.

The eastern part of the district is intersected by numerous rivers and streams divided it into several tracts of varying characteristics. The area, especially in Gohpur Sub-Division is practically one unbroken plain sloping gently towards the south. There is however, a belt of high land under low grass jungle along the banks of Burai River. To the west of Behali, the Vishwanath plain lies in between Bargang river on the east and the Ghiladhari river on the west. It is an elevated region stretching to the bank of Brahmaputra river and is of older geological formation than other parts of the district. The jungle at the foot of the hills has been cleared and the region is now dotted with tea gardens and the plain is covered with fields of waving rice.

The area west of Chutia falling in between the Ghiladhari river and the Bharali river, gently slopes down towards the Brahmaputra. Rice is grown in great stretches having villages in the background. Feathery bamboo, slender palms and broad-leafed plantations add to the wealth of the greenery of the country.

The area of the west of the Mara Bharali contains the most populous Assamese villages up to some distance from Brahmaputra. Here the Tezpur town, the district Headquartes is situated on an elevated tract of about 78 meters above mean sea level and in and around which are situated a few low hills along the bank of the Brahmaputra. To the north of Tezpur, the landscape is generally high and uneven. The best tea gardens in the district are situated in this region within a big block, which is fringed by villages of ex-tea garden labourers on the east and west of it.

The tract between the Gabharu river and Pachnai river is one continuous high plain, rising slowly towards the west. The northern region at the foot of the hills is covered with wide stretches of forests and the southern region along the Brahmaputra by high reeds

and elephant grass jungles. In general, the district has much appeal to the lovers of scenic beauty. A few kilometres to the north of the mountains, rise like a wall from the dead level of the plain and throughout the year, the eternal snow line of the great Himalayan range can be viewed from the district in clear weather. The snow-clad peaks of the Arunachal Pradesh glitter under the winter sun.

Hill:

There are no mountains in this district. The elevated tracts consists of a range of low hills about sixty to one hundred fifty meters high, covered with jungle and sweep outwards in a crescent shape from the Bhairavi to the Brahmaputra. Some ruins found at Bhalukpong are associated with the capital of the mythological King Bhaluka, the grandson of Banasur. Along the river-front near Tezpur there is a range of low hills, whose summits are 90 to 135 metres above the mean sea level. Traditionally famous *Agnigarh* hills are situated at Tezpur town. To a little east of this hillock, there is the Bamuni hill. Further east of the Bamuni hill is the *Bhairavi* hill, where there is a small shrine of Goddess Bhairavi and close to this hill is the Maukata hillock and a little to the east are the Bhomoraguri hills. There are some other hills viz. Auguri Parbat, Singri etc., around Tezpur town.

Drainage and River system:

The whole of the drainage of the district ultimately find its way into the Brahmaputra, which flows along the southern boundary of this district. The river here is wide and deep and remains navigable throughout the year. Its main tributaries in the district are the Burai, Bargang, Bharali, Gabharu, Dhansiri, Nanai, Noanadi and the Barnadi. Rising in the glaciers, this mighty river Brahmaputra has a total length of about 2,900 kms. and a drainage area of about 9,35,500 square kms., flows for about half its length in a trough, north of the Himalayas running parallel to the main Himalayan range. Then it swings northeast, runs through many gorges in a series of cascades and rapids; makes a hairpin bend, turns south and southwest taking the name Dihang. After receiving the waters of the Dibang and the Luit, the united stream from this point, assumes the name Brahmaputra and flows for about 725 kms.

The floods, which are so frequent in the Brahmaputra cause tremendous changes in the river course, as well as raise the riverbed by depositing the detritus carried from the upper reaches. Villages that are situated on the riverbanks are submerged and paddy fields are turned into vast sheets of water during floods. The standing crops are destroyed; cattle are swept away and hundreds of cultivators, fishermen and other people living in these areas are rendered homeless. The largest tributary of the Brahmaputra is the *Bharali*, which originates in Aka hills and flows about 193 kilometres in the hills and 56 kms. on the plains after entering the district at Bhalukpong. The gorge, through which the river makes its way is of great natural beauty. The Bharali river is fed by the discharge from large catchments through its innumerable tributaries. Among them, the *BordiKarai* is the major one. Next to *Bharali*, other tributaries to the Brahmaputra are *Burai*, *Bargang*, *Ghiladhari*, *Gabharu*, *Belsiri* and *Nanai* rivers are the major tributaries.

Flora and Fauna

Evergreen and semi-evergreen forests are found in the district, which consist of several types of species of wood, bamboos and canes. In some thick forests, there are herds of elephants and bison and some rhinos, tigers leopards mithuns, bears, wild pigs, monkey, parkapiens, common langur, hares and different kinds of deer etc. Birds like Peacocks, pelican, hornbill, jungle-owl, quails partridge, parrot, wood-pecker, kingfisher etc., are also found in the district forests.

Climate and Rain fall

The climate of the district is similar to that in the neighbouring districts of upper Assam and is characterized by the absence of a dry hot summer season. The highest temperatures being experienced during the south-west monsoon season, along with abundant rains and a highly humid atmosphere throughout the year.

The cold season is from December to February. This is followed by a season of thunderstorms from March to May. The southwest monsoon season is from June to about the beginning of October. October and November constitute the post-monsoon season.

Rain fall :

The average annual rainfall in the Darrang district, which included Sonitpur also prior to the formation of Sonitpur district, is stated as 2181.7 mm. Actual rainfall in the newly formed Sonitpur district during December 1988 to November 1999 was 2231.2 mm. Rainfall increases from the Brahmaputra in the southern boarder of the district to the hills of the outer Himalayas on the north. Rainfall mostly as

thundershowers, amounting to about a fifth of the annual rainfall is received in the pre-monsoon months of April and May. The southwest monsoon arrives over the district by about the beginning of June. The rainfall during the period from June to September accounts about two-thirds of the annual rainfall.

Temperature :

The cold season starts towards the end of November when both day and night temperatures begin to decline. January is the coldest month of the year with the mean daily maximum temperature at about 24°c and the mean daily minimum at 9°c to 11°c. In association with low-pressure waves passing eastwards during the winter season, the district experiences cold spells of a day or two when the minimum temperatures may fall below 5° c. Temperatures begin to rise from the beginning of March. The rise in temperatures continues well into the southwest monsoon season when temperatures are higher than even in the period March to May. The highest mean daily values of temperatures experienced in July and August when the mean daily maximum temperature is about 32° c and the mean daily minimum is 25° c. This together with high humidity (highest during the year) makes the southwest monsoon season rather unpleasant, particularly when not raining. With the termination of the monsoon season the weather becomes gradually cooler.

The air is highly humid throughout the year, except during the period February to April when the relative humidity is comparatively less particularly in the afternoons (less than 70 percent). Skies are heavily clouded to over cast in the southwest monsoon seasons. There is a decrease in cloudiness after the withdrawal of the monsoon; and in the period December to April, skies are usually clear or lightly clouded. Winds are light throughout the year except for short spells of strong winds during thunderstorms in the period March to May.

Socio-cultural Features

Social life

Socio-cultural life of the people has been moulded by three principal religions mainly Hinduism, Islam and Christianity. In the families of Hindus, the property is generally held by the head of the family who manages it as its custodian. The joint family system, which was common in the past, is disappearing now-a-days.

Here infant marriage is practically unknown. Among the Assamese Hindus, marriage by negotiation is common. Here the caste distinction is not rigid as it was a few decades ago; nevertheless the inter-caste marriages are not very frequent among them. Although permitted by law, remarriage of widow is not looked upon with favour by the high caste Hindus.

Drinking is common among the tea garden labourers and tribal people. And also, religious taboos scarcely deter the non-tribal from drinking which they take in a moderate scale.

In rural family the following are the houses generally found. *Choraghar* (receiption house), *Barghar* (living house), *Bhoralghar* (Store house), *Gohainghar* (House of worship) and *Gohali*ghar (Cowshed). These houses in most cases have thatched roofs, mud plastered ikra (reed) walls and bamboo or wooden posts. At present many people have constructed their houses with *pucca* plinth and C.I. sheet roofing with up to date fittings.

Male dress includes dhoti, chadar, shirt, trouser and modern pants and coats. Female dress consists of *riha, mekhela, chadar*, blouse and their ornaments include *keru, mani, kharu, jhangphai-keru, dugdugi, bena,* necklace, chain, earring bala etc.

Colourful festivals observed in the district enliven the lives of the people. Important festivals of the year are *Durga Puja, Sivaratri*, the *Dol-jatra* and important pujas are *Viswakarma* puja, *Sarswati* puja, *Lakshmi* puja and *Kali* puja.

The special festivals of the Assamese of the district are the three Bihus:– the *Rangali Bihu* (April 14), *Bhogali Bihu* (Jan. 13 or 14) and *Kati Bihu* (Oct.14th) which are associated with the cycles of cultivation. *Rangali Bihu* is the festival, where groups of Assamese people dance and sing the *Bihueeit(dancing girls)*, the boys play on flute and beat drums and blow the *pepa,* made of buffalo-horn and *taka.*

The *Namghar* is the community prayer hall of the villagers, who held prayer services known as *nom-kirtan* during religious festivals. Exquisite folk songs and Ballads such as *Biya-nam* (marriage songs), *Tokari geet (songs* of the mendicants), *Ai-nam* (songs in praise of Goddess etc., are sung in the district.

Resources in the District

Geology and Mining

Baring the isolated hillocks that are exposing the Archaean gneisses in the southern part and occasional

out crops of the upper tertiary sand-stones at places over the northern boundary, the entire district is covered by alluvial deposits of recent and sub-recent origin. Archaean gneisses represents a complex group of biotitic and hornblende gneisses with occasional small granitic and pegmatic bodies intrusive into them. The upper tertiary sandstones, mainly covering the foothills across the northern boundary consists of fine to medium grained bluish to greenish grey ferruginous sandstones with partings of dark gray splintery shells and occasional lumps, streaks and fragments of lignite.

The terrace deposit, also known as the older or high level alluvium, consists of a thick accumulation of unasserted sub-rounded to rounded boulders, pebbles and cobbles of quartzite, sandstone, shale slate and gneisses embedded in a coarse sandy clay matrix. At places, the deposits extend over the outer flanks of the foothills up to a considerable height.

It is interesting to note that the red bank lands are invariably characterized by ground water of good quality as compared to other parts of the district where water contains relatively large amount of iron in solution.

Being almost entirely covered by a vast alluvial tract, the district does not possess any mineral of much economic value except for the alluvial clays sands, gravels and boulders and the gneissic rocks in the isolated hillocks, which provide suitable construction materials. Thin bands of dark gray and reddish brown somewhat streaky clays, occurring in small pockets along the courses of the rivers are suitable for brick making and potteries.

Forestry

About 154,563 hectares of land is under forests in Sonitpur district, which comes to around 29.0% of its total geographical area. Forestry occupies a significant place in the accounting of the district. A considerable section of the people of the district are depending upon forests for fire-wood, timber, bamboo, ekra, reed, thatch tokopat, cane, gravels etc., for building of houses. A number of forest-based industries such as saw plywood factories, match industry, furniture workshop, bamboo and cane industries etc., have been opened in the district.

Land and land use pattern

Agriculture is the chief occupation of (As per 2001 Census) a major percentage of population of the district. The area of the government wasteland was very large till the later part of the 19th century but with waves of influx of immigrants, a large chunk of the virgin soil has been upturned. At the same time, large tracts of wasteland have also been taken up for tea cultivation. However, an analysis of the land use pattern shows that the area of land not available for cultivation is still quite considerable. The following table shows the salient features of land put to different uses and cultivation in the district.

Table-I

Land use pattern in Sonitpur District (1997-98, povisional)

Sl.No	Land put to different uses	Area in hectares	Percentage to total geographical area
1	2	3	4
1	**Total geographical area**	**532,400**	**100.0**
2	Forest area	154,563	29.0
3	Land not available for cultivation	185,214	35.0
	(a) Land put to non-agricultural uses	164,322	30.9
	(b) Barren and uncultured land	21,892	4.1
4	Other non-cultivated land excluding fallow land	20,669	3.9
	(a) permanent pastures and other grazing land	11,902	2.2
5	(b) Land under misc. trees, groves etc. not included in net area	8,540	1.6
6	(c) Cultivable waste land	227	0.0
7	Fallow land	5,080	1.0
	(a) Fallow other than current fallow	987	0.2
	(b) Current fallow	4,093	0.8
8	Net area shown	165,874	31.2
9	Total cropped area	246,061	46.2
10	Area shown more than once	80,187	15.1

Source: Directorate of Agriculture, Govt. of Assam, *Basic Agricultural Statistics-1998-99.*
Note: Area figures in respect of forests, which includes area under reserve forest and revenue forest relates to the year 1996-97.

The above table shows that the total cropped area of the district is about 46.22 %. About 35.0 % of the total land is not available for cultivation, as such land is used for homesteads, roads, factories, rivers, ponds, towns, villages etc. About 29.3 % of the total area is under forests.

Economic Profile of the District

Agriculture and Plantation

Soil

Acidity is a general characteristics of the soil of the district and more so in the older alluvial soil. New alluvial soils representing the lands of the river banks are less acidic. There are often neutral and even alkaline. The phosphoric content is good in the river side of the Brahmaputra where tea is grown. Acidic alluvial soils are suitable for cultivation of tea.

Heavy clay with high percentage of nitrogen in low land areas give a good return of rice, while sand looms above inundation level give a good yield of crops. Overflowing of the rivers replenishes the soil every year by depositing silt. The potash (k20) content is low in some soils and moderate in others.

Crop

Paddy, jute, sugarcane, tea, pulses and mustard are the major crops and tobacco, potato, vegetable and fruit like mango, orange, banana, pineapple, etc are subsidiary crops of the district. Rice is the stable food.

The following table presents data on different types of crops grown in the district, area, yield etc during 1999.

Table-II

Area, Production and Average Yield of important crops (1998-99)

Sl. No.	Name of crop	Area under cultivation (hectare)	Production (tones)	Average yield (kg. Per hectare)
1	2	3	4	5
	Cereals			
1	Autumn Rice	31,657	34,097	1,095
2	Winter Rice	104,814	146,465	1,419
3	Summer Rice	2,035	7,511	1,068

Source: Same as for table -

Note * Figures are final forecast for 1998-99

Flood, rainfall, textural peculiarities of the soil, and above all, the farming practices are the factors upon which cultivation of the crops largely depends. During the rainy season all the arable lands are covered with crops. Besides providing water, the drains and canals around the farms from natural enclosures, which protects the crops from stray cattle. In the winter season, however, when the fields become dry; cattle, goats and baffaloes are allowed to graze in the fields most of which are without any permanent enclosures. As a result *rabi* crops are grown only in small fields which are properly fenced.

The dry season sets in from October and lasts till April. During this period, most of the tributaries of the Brahmaputra either go dry or become absolutely shallow. From time to time, draught has seriously affected the western part of the district and the crop cycle of the district still depends so much so on rain water that most of the fields practically lie fallow from December to early April.

Horticultural crop:

Banana, papaya, orange, pineapple, areca nut and coconut are the important horticultural crops of the district. The following table gives a brief account of the horticultural crops grown during 1998-99 in this district.

Table-III

Area, Production and Average Yield of Horticultural crops (1998-99*)

Sl. No.	Type of crops	Area under cultivation (hectare)	Production (Tones)	Average yield @ (kg. per hectare)
1	2	3	4	5
1	Banana	2,580	32,947	12,770
2	Papaya	324	4,016	12,395
3	Orange	90	941	10,460
4	Pineapple	465	7,068	15,200
5	Arecanut*	4,158	2,616	166
6	Coconut**	1,255	11,966	95

Source: Same as for Table-1
Note: 1 Figures are final forecast for 1998-99
2 * Production of arecanut in terms of dry cured nuts.
3 **Production of coconuts is in thousand numbers, but not in tones.
4 @ Average Yield of Arecanut & coconut in nuts per bearing trees.

There are some vegetables grown in the district and the common among them are; spinach, lai, radish, lafa, suka, cabbage, cauliflower, tomato, onion etc.,

Further Sonitpur is one of principal tea growing districts of Assam, and there has been a gradual expansion of the area under tea since 1921. There are 58 small tea growers with an area of total 155.27 hectares registered with Tea Board of India upto 31.10.1999.

Irrigation :

Sonitpur district receives heavy rainfall during the monsoon and even during the post-monsoon, there occurs some rain from the northeast. More than 70 % of the annual rainfall is received during May to September. Rice, jute and tea, which are the three principal crops of the district, require sufficient water. Some minor irrigation projects are implemented in the districts by construction of bunds across the streams and rivulets, drainage channels and silt channels to obtain silt deposits in low lying areas, Lift irrigation with electric pump sets has also been in operation in some parts of the district.

The irrigation potential utilized during different seasons, additional potential created and targets and achievements for additional irrigation potential etc., are explained in the following table.

Table-IV

Irrigation Potential Utilized, Targets and Achievements of Potential created

Sl. No.	Particulars	Land area in hectares
1	2	3
1	Irrigation potential utilized during 1997-98	20,087
	i. During *Kharif*	19,825
	ii. During *Rabi* & Pre-*Kharif*	262
2	Irrigation potential created up to 31.3.1999	51,119
	i. Minor	25,667
	ii. Major and Medium	25,452
3	Targets and for additional irrigation potential created during 1998-99	65
	i. Minor irrigation	65
	ii. Major and Medium irrigation	—

Animal Husbandry and Fishery

As per the quin-quennial livestock Census in Assam during 1997, it is found that there are 4,31,441 cattles, 31,733, buffaloes, 4,394 sheep and 2,40,025

goats in Sonitpur district. In addition, 503 horses and ponies, 74,957 pigs, 43,938 dogs and 35 elephants are also enumerated during livestock census in this district. As regards to poultry records, there are about 5,33,002 fowls and 1,03,811 ducks are found during 1997.

The bulk of the fish sold in the market comes from the larger fisheries. Fishing is however not confined only to such fisheries. Large number of people irrespective of caste and creed collect fish from rivulets and other waterlogged areas.

For the entire district, total requirement of fish is estimated to be 17,085 MT, keeping the monthly per capita consumption of fish at 11 kg. Against this requirement, the total production of fish during the year 2000-2001 was 5500 MT and the rest of the requirement is met by import of fish from other parts. There is one fishing training centre and 6 fish farms in this district.

Industry

The fineness and exquisite workmanship of a wide variety of industrial products of ancient Assam earned universal acclamation. As it is evident from many literary and historical records; weaving, sericulture, pottery, brass and bell metal industry, black smithy, gold smithy etc., are the very ancient industries of Sonitpur district but lost much of their past glory and are now confined only to a limited extent. Although the cottage industries still play a vital role in the economy of the district, some of the old time industries have suffered stagnation, while some others are now buried under oblivion during British regime who dumped local markets with cheaper machine made goods imported from outside. However, after independence, new industries have come up with the support and assistance under various programs of industrialisation policies. During 1998, there were about 187 registered factories in this district. Out of these, 80 are in the category of food products, 72 are in manufacturing of non-metallic mineral products and 15 are in wood & wood products and furniture. Further, as on 31.12.1998, there were about 2092 small scale industrial (SSI) units registered with the Industries Department in the district.

Trade and Commerce

In early times, a good overland communication system was not developed and this affected the scope of external trade. However, now the position has vastly improved during the last few decades. There has been enormous expansion of road communication and extension of the railway line from Rangapara to Morkongselek in Lakhimpur district. The number of shops has been steadily increasing all over the district

Tea, rice, jute, oilcake etc., are the most important items of export from the district whereas- cloth, sugar, oil products, tobacco products are imported from outside the districts. Tezpur, the district headquarter is the important centre of wholesale business. Hats are important rural marketing centres where a great deal of retail business is transacted. Many fairs are held in different parts of the district, most of which go on for days and are attended by a large concourse of people.

Economic Infrastructure

Banking

As observed by the Assam provisional banking enquiry committee in 1929, the history of indigenous banks in Assam is shrouded in obscurity. However, with the expansion of the tea industry, the credit structure of the district took a concrete shape. Several banks have been set up in various parts of the district. In addition, co-operative credit societies are also in operation. However, even now also, the moneylender continues to be an important source of rural credit.

The following table explains the number of banks in the districts and the position of deposits and credits.

Table-V

Position of Deposits and credits by type of Banks as on December 31, 1999-Sonitpur district

Sl. No.	Type of bank	No. of Offices	Deposits (Rs.lakhs)	Credit (Rs.lakhs)
1	2	3	4	5
1	Scheduled Comm. Banks.	80	35,994	10,102
2	Regional Rural Banks.	31	6,221	2,622
3	Total	111	42,215	12,724

Source : Quarterly Handout of RBI, quoted in Statistical Handbook, Assam, 2000.

Transport and Communication

The old accounts of Assam suggest that most of the travelers used horses, ponies, elephants, bullock-drawn carts, palanquins country-boat and rafts for their cross-country sojourns. However, during the time, especially when the British came into occupation and thereafter independence, there is a tremendous improvement in road and other communication facilities.

Roads:

The following table indicates the length of roads in Sonitpur district during 1997-98.

Table-VI
Road length in Sonitpur district (1997-98)

Sl.	Category of Roads	Road length (KMs)
1	2	3
1	National High way	211
2	State High way	68
3	Other P.W.D. Roads	1,798
	Total Road length	**2,077**
4	PWD Road length per lakh of population*	146
5	Road length per 100 Sq. km.of total geographical area	39.0

Source : Chief Engineer, P.W.D. (Roads) Assam.
Note *.As per 1991 Census population.

In the entire district, there are about 21,708 motor vehicles on the road during 1998-99 out of which, 2,277 vehicles are registered during 1998-99 only. Out of 21,708 vehicles, 14,314 are two wheelers, 1,768 cars, 1,541 tractors and 1,301 are trucks. The road distance from Tezpur to Baihata is 146 kms and Baihata to Guwahati is 35 kms. The road distance between Tezpur to Lakhimpur is 215 kms and Tezpur to Bomdila (Arunachal Prodesh) is 160 kms.

Rail:

The district headquarter Tezpur is connected by rail service and rail runs from Rangia to Tezpur through Rangapara and then it goes to Lakhimpur.

Air transport:

The only airfield of this district is at Saloni, which is about 11 kms. north of Tezpur. The Indian Airlines Corporation maintain the flight connection of this aerodrome with other stations.

Power and Electricity:

The development agriculture as well as industry is largely depended upon availability of electricity. The use of electricity becomes an essential part of the moder society/ the district has high power potential based odn natural gas. The large part of demand for electricity in the district meets up from the thermal project at Namrup in Dibrughar district of Assam.

Out of 1,870 villages of the district about 1.426 villages are electrified as on 31.3.1999. So far as the percentage is concerned, about 76.3 percent of total villages of the district is electrified.

Economic Development

The role and share of different sectors of the economy of Sonitpur district shows that agriculture plays an important role both in terms of contribution to the total GDP of the district and the percentage share of total population engaged in agriculture. The following table gives the number of persons employed in the different sectors of the economy of Assam as well as in Sonitpur District.

Table-VII
Percentage Main workers in Different sectors of the Economy-1991

Sl. No	District	Males % to total males			Females % to total females		
		Primary	Secondary	Tertiary	Primary	Secondary	Tertiary
	1	2	3	4	5	6	7

Note: * Col No 7and 8 are calculated on the basis sector-wise GDP in 1994-95 and sex-wise no. of persons employed in each sector in 1991. Total GDP for males and females are estimated first on the basis of no. of males and females employed in each sector and this total GDP is distributed among all males and females to arrive at per capita GDP.
Source: 1. Directorate of Economics and Statistics, Govt of Assam,
2. Census of India PCA 1991 Assam.

The Gross domestic product at factory cost during the year 1994-95 for the district is estimated about Rs. 92,861 lakhs in which the share of primary sector is 53.5% and of secondary is 12.3% and the rest from tertiary sector. The per capita income (GDP) is recorded at Rs. 6,031 per annum.

Char Area

The Char Areas are those lands which are generally formed in the banks of big rivers. In Assam, such areas are usually found in low lying flood-prone zone from Sadiya to Dhubri inside the mighty Brahmaputra river. The river Brahmaputra carry sand during rainy season annually and get it deposited and settled in the middle or on the corner of the main stream, which makes an Island inside the river bed once the water level recedes. As a result of deposition of enormous load of sediments in the middle of the river course, a large number of almond-shaped river Islands, called as Chaparis or Chars are formed. In the making of a Char or Chaparis the river takes five to six years. The soils of these areas are of new alluvial nature. These are less acidic and are moderately rich in plant nutrients. A particular section of people begins to reside in these areas and starts cultivation too. But even though, these areas are not free from the menace of flood after the re-settlement. During flood, when the water flows through the Chars, the settlers of these areas used shift themselves to some other high lands on the banks to spend the period of flood and come back to their original place of abode after flood recedes. But some times, due to tremendous changes of river course and heavy erosion, some Chars are vanished while some may remain free from the flood. But this phenomenon can not be treated as a permanent nature.

Administration of Char Area:

These areas are looked after under some special provisions under the administration of the revenue circle. They are to abide by rules and regulations of the State government like general people. However, they have some kind of their own local self government also. In each Char village, a person is selected by the villagers as the head of the village, called as 'Matbor' (Headman) in the Muslim dominated Char areas. As a custom each and every person of the Char are to follow his instructions, guidance or orders on the matters relating to the community affairs and routine life of the area and people. In turn, the Matabor is guided by the elder people of his locality on all collective issues before any important decisions are taken. However, the opinion or decision given by Matbor in respect of common issues such as casting of vote to a particular candidate during election, dispute regarding any matter relating to land, religion or social has to be obeyed by all.

Profile of Char Area:

In Assam, there are as many as 2,235 Chars of varying sizes during 1993-94 in 14 districts. The highest number of Chars are found in Dhubri district (480), followed by Barpeta district (310) and then Jorhat district (293). The lowest number of Chars are found in Marigaon district (39). There is no Char area in the remaining 9 districts of Assam. The Chars of Dhubri district cover an area of 86,925 hectares followed by 27,892 hectares in Barpeta district.

Socio-economic status of Char are population:

The socio-economic status of the people of the Char areas are in fact miserable. They are mostly illiterates where just about 13 to 15 percent of the total population of entire Char areas are literate. The standard of attainment of education is mostly not above primary level, where one may hardly find any matriculate. Nearly 55 percent are living below poverty line in all Char areas. Out of total 2,39,000 hectares of Char areas of Assam, only 1,67,300 hectares are cultivable land. There are altogether 266,707 farming families in Char areas of Assam. The economic activities of the inhabitants of Chars are generally cultivation and fishing. The low-lying Char areas are favourable for growing Ahu, Bao and Boro, rice and also jute .The settlers of Char areas are generally grow rice and potato in large quantity. They grow various types of vegetables for sale. Whatever the amount of crops grown here are not enough to meet even their basic necessities.

The type of houses in the Char areas are mostly katcha structure, made of thatch bamboo, reed and mud. These houses are mostly huts, and a very few families have their houses with C.I. sheets for roof. Houses in pucca structure with brick and cement are very rare sight there.

The people of all Char villages are mostly use river water as the source of drinking water during rainy season. However, a very few villages have their hand pump / tube wells as a source of drinking water. The Char villages are not connected by road. The country boats are used as a means of communication during flood season. During winter season, the villagers come to nearest town by traveling on foot or bicycle.

Developmental programme for Char Area

Some Developmental programmes have been undertaken by the State government for the welfare of the people of these areas. The facilities like safe drinking water, medical sub-centres etc., are provided by the government in some areas of different districts. Schools, up to the level primary and middle are also established in some Char areas. For higher education, the children have to go to nearby towns. The Assam government has set-up a Char Development Authority at Guwahati for overall Development of Char people. At the district level, Offices of the Project Officers are established to look into the projects undertaken for these areas. Various kinds of loans and grant-in-aids are also provided to the villages by this department.

In any case, the people of Char areas are maintaining a poor standard of living from all aspects. Though they are hard workers still they are unable to overcome their poverty at any cost.

Char area Development in Sonitpur District

Out of 2,235 Char villages in 14 districts of Assam, 145 char villages are in Sonitpur district. Almost all villagers are Muslim population. Altogether there are 108,631 population in above villages. Only 14.0 percent population are literates and hence 86.0 percent population are illiterates. Out of above total population, 39,586 live under below poverty line. These 145 char villages comprise 29,068.1 hectares of land, of which 20,309.8 are cultivable land there are 15,344 farming families in all char villages.(source- Director of Char Areas Development, Assam, Dispur)

The socio economic condition of Char dwellers in the district as already explained above is very poor in the district in a sense that their earning are very limited. They have no sufficient cultivable land and whatever lands they have possesses is not fertile and moreover subject to flood. Generally, all lands in Char areas are sandy. Only a few varieties of crops can be grown on such lands. Fish and other river products t5hough available in rivers each and every households can not exploit such river potentials because of lack of tools and equipments. However, some are engaged in fishing but not on commercial line but for their own consumption.

The Char dwellers are maintained a very low standard of living with minimum amenities of civic life in this district as well. In all 145 char villages , only a few lower Primary schools, Middle schools *and High schools are in existence. The children of* Chars villages have to go nearby towns for their higher education. There is no communication facility. The inhabitants of the Chars have to travel through small country boats of raft during flood season and on other occasion they mo0ve on foots from residences to the nearest place where road communication is available. No health centre is available in the Chars except in a few villages. The people of Chars do not have any facility of post office, Very often, they use river water for drinking and cooking purposes. population

General Administration

Revenue Administration:

Revenue administration has historically been the primary responsibility of the District Administration. This involves collection and fixing of land revenue, registration, mutation and overall management in regard to land, both private and public. Besides the Revenue Branch of the Deputy Commissioner's Office which is looked after by the Additional Deputy Commissioner (Revenue).

There are outlying 5 Revenue Circles in the district which are supervised by Circle Officers. The Mouzadars under the Circle Officers are responsible for collecting land revenue (Khazna) from land owners (Pattadars). All the Circle Officers are required to submit 'doul' (demand of revenue) to the Deputy Commissioner, and after his approval, Mouzadars are to collect revenue as per the demand. In the year 1995-96, the total collection of land revenue in the district was Rs.14,330 ,000 against the total demand both current and arrears of Rs. 1,1317,000 which comes to about 38.3%.

Development

Apart from Revenue matters, District Development is one of the very important objective of the District Administration. As head of the District Administration, the Deputy Commissioner is responsible for all round developmental activities in the district under various programmes such as MP's Local Area Fund (MPLAD), MLA's fund, Untied Fund, Sub-divisional Plan Scheme Fund, Border Area Development Fund and etc. For these works, the Deputy Commissioner assigns one A.D.C. (Development) the specific task of looking after and coordinating various developmental activities undergoing in various sectors. The ADC (Development) is aided in this matter by the *Decentralised Planning Cell of the DC's office. All* departments, involved in the developmental activities

of the district, like PWD, Irrigation, Health, Education and many others work in coordination and a District Development Committee (DDC) headed by the Deputy Commissioner has been in place to ensure this coordination. Under the Government policy of rapid upliftment of rural population, a District Rural Development Agency (DRDA) is functioning in the district, which has the Deputy Commissioner as the Chairman and one Project Director as its functional head. All schemes for Rural Development are implemented by agencies in coordination with 11 Development Blocks situated in outlying rural areas of the district. These Development Blocks are supervised by Block Development Officers (BDOs) and Senior BDOs.

Local Administration

For management and implementation of various developmental schemes, elected bodies are constituted at the level of Corporation, Municipality and Town Committees for Urban Areas and Panchayat Bodies for the rural areas. Sonitpur district has four urban local administration bodies as follows :

1) Tezpur Municipal Board

2) Rangapara Town Committee

3) Biswanath Town Committee

4) Gohpur Town Committee

As for the rural areas in Sonitpur district, a hierarchy of local administrative bodies is in place with Zila Parishad at the top (Sub-division level) followed by Anchalik and Gaon Panchayats which cover a total number of (1,870) villages in the district.

System of Local self Government

The present system of local self-government is a legacy of the British administration. However, some forms of local self-government were in existence even during the pre-British days such as institution like Namghar etc. Initially these Panchayats were constituted as Local Boards in 1882. The Assam Panchayat Act 1959, which came into force in 1960, abolished the local Boards and under this Act a three-tier Panchayat Raj System was introduced in Assam. However, the Panchayat Act 1972, which came into operation from 5th May, 1973, changed over the system to two-tier system of Panchayats instead of the three-tier system and the intermediary Anchalik Panchayat having been abolished.

As on 31.3.2000, there were 159 Gaon Panchayats and 2 Mahkuma Parishads in Sonitpur district in rural areas. The urban units are categorized as Municipal Board, Town Committee and Municipal Corporations. In Sonitpur district, there are two Municipal boards one each at Tezpur and Dekiajuli and two Town Committees: one in Bishwanath and another at Gohpur. There will be one Chairman and vice-Chairman in Municipality and the Chairman is the head of the administration. He presides over meetings of the Municipality. He is entrusted with the implementation of the schemes taken up by the Municipality. He is also invested with the financial powers to manage the affairs of the Municipality. The Municipality has various sources of revenue. It regularly receives annual grants from the government. Besides government grants they earns revenues from levies, taxes on holdings, rickshaws, carts, bicycles, stalls, open space markets, cinema houses etc.

Some important duties of the Municipalities and Town Committees are to maintain roads & bridges under their jurisdiction and to look after the sanitation of public health, laying out of parks, establishment of veterinary dispensaries, libraries, fire brigades, supply of protected water etc.

****

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the

servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing

so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo
9 Kaibartta
10 Lalbagi
11 Mahara
12 Methar,Bhangi
13 Muchi, Rishi
14 Namasudra
15 Patni
16 Sutradhar

1 Barmans in Cacher

2 Boro, Borokachari

3 Deori

4 Hojai

5 Kachari, Sonwal

6 Lalung

7 Mech

8 Miri

9 Rabha

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such

professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i). underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for

attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the

criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 1681,513 in 2001 Census. Male comprises 871,568 while female consists of 809,945. Out of the total population of the district, 1505,719 fall under rural and 175,794 are under urban areas of the district. In rural areas 773,389 and 732,330 are males and female respectively. Accordingly 98,179 and 77,615 are males and females respectively in urban of the district. The percentage of urban population in the disrict Sonitpur is only 10.45 . The district is a rural base place in which 90 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +18.1 which is lower than the state rate. In the district, there are only 6 towns . Tezpur Town is only town with Municipal Board and three towns is with Town Committee status. The density of the district is 316 persons per sq. kms. which is higher than the state density (340). The sex ratio in the district is 929 as against 935 in the State. Out of total population of the district, 37.7% is total workers of which 50.4% and 24.2 % are male and female respectively. The percentage of non- workers is 62.3 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 33.8 %, 12.9%, 2.9% and 50.4% respectively.

The literacy rate is 69.0% in the district of which 67.5% is for males and 49.7% is for females. The district literacy rate is above the state literacy rate (63.3)%.The Gender gap in literacy is 17.8.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

TABLE : 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE,1991-2001

Sl. No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13

7	Gohpur	102,661	102,661	-	111,337	101,918	9,419	8.5	-0.7	-	-	8.5
District Total:		**1,424,287**	**1,320,379**	**103,908**	**1,681,513**	**1,505,719**	**175,794**	**18.1**	**14.0**	**69.2**	**7.3**	**10.5**

As per Census of India 2001, the total Population of Sonitpur District is 1,681,513 with 175,794 in urban 1,505,719 in rural area. Dhekiajuli Revenue Circle is the biggest Circle with 394,054 population and Gohpur Revenue Circle with 111,337 population is at the bottom of the list of Revenue Circle.Decadal variation of population in 1991-2001 in the district is 18.1 which is a little lower to the state rate of 18.9 .The growth rate of Dhekiajuli and Tezpur are higher than state growth rate. Naduar and Helem Revenue Circles have no urban population.

Out of 1,874 villages of the district, the number of inhabited villages is 1,784 which are located in 14 CD Blocks. In the District, Dhekiajuli CD Block has the highest population 192,127.On population basis; Bishawnath CD Block with 54,519 population is the smallest CD Block in the district .The highest numbers of villages 232 are under Dhekiajuli CD Block. Bishawnath CD Block records lowest number 51 inhabited villages. The highest number of inhabited villages 561or 31.4% is noticed in the population range of 500-999 followed by 470(26.3 %)in the population range of 200-499. However, there are 2 villages having more than 10,000 population.

The District urban population is 175,794 where Total Workers constitute 37.1percent and Non-Workers constitutes 62.9 percent. Further in breaking up of the Total Workers to Main Workers and Marginal Workers, it is noticed that out of 65,301 total urban workers in the District, 35.0 percent are Main Workers and 2.2 percent are Marginal Workers. The male Main Workers with 56.2 percent are more than the female Main Workers which form only 8.2 percent. But in non-workers, the female Non-Workers with 90.1 percent are much higher to the percentage of male Non-Workers. In case of Marginal Workers, female Marginal Workers with1.8 percent are less than male Marginal Workers with 2.4 percent.

Note: Percent of Worker to total worker are given in brackets.

Out of 634,723 total number of workers in the District, four category of workers are categorized as Other Workers having 50.4 percent, Cultivators with 33.8 percent, Agricultural Labourers with 12.9 percent and Household Industry Workers with 2.9 percent. In male-female breakup it is noticed that male workers as Cultivators and Other Workers are more than female workers in term of number of persons and percentage but in Agricultural Labourers females are less than males in number whereas the percentage of female is more than male's percentage. Again in category of Household Industry, the number and percentage of females are higher than that of males The percentage of cultivators is more in Gohpur tahsil whereas it is high in Na-Duar Revenue Circle for Agricultural Labourers. The percentage of Household Industry workers is generally low in all Revenue Circles. Tezpur Revenue Circle has the highest percentage of Other workers among all Revenue Circles.

Note: Percent of Worker to total worker are given in brackets

Economic activity of the rural people of Cachar district is shown in the table in four different categories of workers. Out of 569,422 total numbers of workers in the rural of the District, large number of persons take Other Works as the main work and thus constitutes 45.1 percent followed by cultivators with 37.5 percent. In other category of workers, Agricultural Labourers record 14.3 percent. There are few people in the district who took Household Industry either as Main work or as Marginal work and the percentage of such workers shows 3.1 percent only. As in above table the male workers in Cultivator and Other Workers male workers are more than the female workers in terms of absolute figures and percentage. Females are found more both in number and percentage in Household Industry work. In all 14 CD Blocks of the District, people are found to be engaged in all four categories of works and largely in other works and cultivation.

The table depicts the number and percentages of workers in different categories for all urban centers along with the district

Almost all urban people of the District are engaged as other workers. This category constitutes approximately 96.0 percent of the total urban workers. The Household Industry Workers constitutes less than 2.0 percent and in other two categories the percentage of workers are also less than 2.0 percent. As in the case of rural, the male workers as Cultivators and Other Workers are found more than that of females in urban and the female workers in terms of absolute figures and percentage are found more in Agricultural Labourer and Household Industry work. The percentages of cultivators in Lakhipur CT is also higher than all other urban centers.

Note : -Percentages are given in brackets.

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

In rural of Sonitpur District, the types of amenities available in the village are mostly Education, Improved Drinking Water and Power supply. Out of 1,784 inhabited villages in the District, 77.0 percent or 1,374 villages are having access to education and 86.2 percent or 1,538 villages in the District are having access to Improved Drinking Water. Power supply to the villages has tremendously improved as 74.6 percent or 1,331 villages are having electricity. However 59.8 percent or 1,067 villages are having access to approach Pucca road facility and 31.9 percent of villages are having access to Transport Communication facility in the District. Most of the villages are not having access to Medical facility, out of 1,784 villages only 235 or 13.2 percent villages recorded as having access to Medical amenity. 234 or 13.1 percent villages are having Post Office and Telephone facility with 14.2 percent only. The other amenities like Banks and Agricultural Credit Societies are not available almost in all villages. The number of villages recorded 73 as having access to Banks and 9 villages have the facility of Agricultural Credit Societies. Some amenities like Telephone; Agricultural Credit Societies are not available at all in villages of some CD Blocks in the District.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube wellsituated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The rural population in Sonitpur District by and large are having access to Education and Power supply. The percentage distribution of the people having access to Education 84.5 percent. Those persons having access to Improved Drinking water record 89.7 percent and those having access to power supply with 80.6 percent. The numbers of people having access to Medical Amenity are very few. Out of 1,505,719 rural population in the District, 298,904 persons or 19.9 percent are having access to Medical amenities. However 38.4 percent are having access to Transport Communication and 67.9 percent are having access to approach by Pucca Road. People having access to Post office forms only 17.3 percent and those having access to Telephone form only 21.9 percent from the total rural population. Most of the rural people in the District do not have access to Banks and Agricultural Credit Societies amenities. In Rangapara, Sakomatha, Bisnawnath, Behali and Chariduar CD Blocks of the District, people are not having the Amenities like Banks and in most of CD Blocks, people have not getting the facility of Agricultural Credit Societies.

TABLE: 39
DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	291	73	48	412
(b) Middle School	878	285	216	1,379
(c) Degree College	238	498	1,035	1,771
2. Medical:-				
(a) Hospital	550	442	746	1,738
(b) PHC	446	588	710	1,744
3. Post Office	1,044	300	206	1,550
4. Telephone	425	510	595	1,530
5. Bus Service	736	272	237	1,245
6. Banks				
(a) Commercial Bank	309	481	931	1,721
(b) Cooperative Bank	269	467	1,027	1,763
7. Agricultural Credit Societies	150	455	1,170	1,775

The villages not having certain amenities but availed such amenities at different distances have been shown in the table.

Altogether 411 villages have no Primary School educational facility and of these villages 291 villages are taken the facility of education at a distance of less than 5 kms.,73 villages at 5-10 kms and 47 villages at 10+ Kms distance. Middle school facility is availed by 877, 285 and 216 villages at a distance range of less than 5 kms, 5-10 kms and 10+ kms respectively. Similarly Degree College facility is availed by the villages at places having college at different distances. Medical, Post office, Telephone, Bus service, Bank and Agricultural Credit Societies facilities which are not availed by the villages, are enjoyed at different distances as indicated in table.

TABLE: 40

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The table indicates that out of 1,374 villages which have educational facility, 458 villages have population in the range of 1-499 and 466 villages have population in the range of 500-999 and so on. The number of villages having population in the range 5000- 9999 and 10000+ are 4 and 2 respectively. Out of 4 villages having population in the range 5000-9999, Education, Medical, Transport, Approach by Pucca road and Power supply are enjoyed by 3 villages.

TABLE: 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Sl.No.	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable
1	2	3	4	5	6
1	Dhekiajuli	232	41,135.59	76.7	16.2
2	Gabharu	76	14842	79.0	4.7
3	Barchala	131	24,639.16	79.3	9.3
4	Balipara	175	33,148.63	77.5	21.7
5	Rangapara	77	18,663.56	84.0	24.3
6	Bihaguri	131	16,455.11	71.9	17.8
7	Naduar	84	20739	68.3	15.8
8	Chatia	108	21,938.09	81.7	14.9
9	Sakomatha	87	13,613	84.7	0
10	Biswanath	51	9,643	75.0	0
11	Baghmara	95	22,932	61.8	0
12	Behali	109	17,555	82.8	18.4
13	Chaiduar	211	31,437	65.2	1.2
14	Pub-Chaiduar	217	24,129	81.2	1.5
District Total:		**1784**	**310870.14**	**75.8**	**11.5**

Note : - Cultivable area = irrigated area + unirrigated area.

The distribution of number of villages, total area, percentage of cultivable area and percentage of irrigated areas among CD Blocks are shown in the table. Out of total area of District Sonitpur, 310,870.1 hectares are in rural areas of the district. 75.8 percent is cultivable area to the total land and of which 11.5 percent is irrigated land. Among CD Blocks, 84.7 percent cultivable land being the highest is noticed in Sakomatha CD Block.24.3 percent-irrigated area being the highest is in Rangapara CD Block followed by Balipara CD Block with 21.7 percent in the District.

TABLE : 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Biswanath Chariali(TC)	9.4	3.1	6.3	9.6	7.5	0.2	1.9	0	0
2	III Dhekiajuli (MB)	14.2	2.7	11.4	13.4	3.1	2.3	3.9	0	4.1
3	V Gohpur (TC)	11.2	0	11.2	3.5	0.4	0	2.5	0.1	0.6
4	IV Rangapara (TC)	11.6	3.8	7.8	35.6	5.4	1.1	7.8	0	21.3
5	II Tezpur (MB+OG)	4.4	1.4	2.9	4.5	1.7	1.6	1	0	0.2
	District Total	**7.5**	**2**	**5.5**	**9.8**	**2.8**	**1.5**	**2.4**	**0**	**3.1**

The Municipality Finance of the town shows that per capita receipt is Rs 7.5 for urban area of the District while per capita expenditure is Rs 9.8 which is higher than per capita income. Per capita income and expenditure is higher in proportion in Dhekiajuli TC and Rangapara TC respectively. The Municipality finance of the towns shows that money is mainly collected through taxes and sources.

TABLE : 44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl.No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Biswanath Chariali (TC)	4.8	4.2	3.6	0.6	1.2
2	Dhekiajuli (MB)	3.2	2.4	1.6	0.4	0.4
3	Gohpur (TC)	2.1	13.8	6.4	4.2	1.1
4	Rangapara (TC)	4.2	3.2	2.1	0.5	0.5
5	Tezpur (MB+OG)	1.6	1.3	1	0.4	0.3
	District Total	**2.5**	**2.7**	**1.8**	**0.7**	**0.4**

In average, the number of Primary institution is 2.5 per 10,000 population, 2.7 is Junior Secondary/ Middle school and 1.8 is Secondary/Matriculation school in the District. The Senior Secondary and Colleges are recorded 0.7 and 0.4 number respectively in the District per 10,000 population Bishawnath TC has more Primary institutions than other towns per 10 thousand population.. Similarly Gohpur TC possesses more Middle schools per 1,000 population than all other towns. The Secondary school is found more in Gohpur TC in comparison to other towns.

TABLE : 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Biswanath Chariali(TC)	59
2	Dhekiajuli(MB)	51
3	Gohpur(TC)	64
4	Majgaon(CT)	0
5	Rangapara(TC)	42
6	Tezpur(MB+OG)	72
	Distrct Total	61

In average the number of beds in the urban areas of the district is 61 per 10,000 population. There is no facility of bed in the proximity of Majgaon town. The more number of beds per 10 thousand population is found 64 beds in Gohpur TC whereas the lowest 42 beds is seen in Rangapara TC.

TABLE : 46
PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Biswanath Chariali T.C.	16,825	0	0
2	Dhekiajuli M.B.	25,349	3,008	12
3	Gohpur T.C.	9,419	0	0
4	Rangapara T.C.	18,824	1,130	6
5	Tezpur M.B.	98,550	3,000	3
	District Total	**168,967**	**7,138**	**4**

Table 46 gives the proportion of slum population in towns. Out of the total district urban population, 7,134 persons or 4.7 percent people live in slum area. Between three towns having slum population in the district, Dhekiajuli TC constitutes the higher proportion of slum population with 11.9 percent followed by Rangapara TC with 6.0 percent and the lowest by Tezpur with 3.7 percent.

TABLE : 47

MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl.No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Biswanath Chariali (TC)	Mustard Oil	Mustard Oil
		Nil	Nil
		Nil	Nil
2	Dhekiajuli (MB)	Nil	Tea
		Nil	Nil
		Nil	Nil
3	Gohpur (TC)	Mustard Oil	Mustard Oil
		Nil	Nil
		Nil	Nil
4	Majgaon (CT)	Mustard Oil	Mustard Oil
		Atta	Pineapple
		Steel	Atta
5	Rangapara (TC)	Nil	Tea
		Nil	Nil
		Nil	Nil
6	Tezpur (MB+OG)	Soap	Mustard Oil
		Candle	Biscuits
		Biscuits	Candle

The most important commodity exported out of and Manufactured in towns are shown in the table along with the name of commodities. Majgaon CT manufactured Mustard oil, Atta and Steel and exported Mustard oil, Pineapple and Atta from the town. Similarly Tezpur town hav manufactured Soap, Candle and Biscuits and exported a few items of commodities which are shown against town and all other towns have no any manufactured item. However, all towns have exported a few items of commodities.

The table indicates that the percentage of households having the facility of toilet is more in the district as well as in all tahsils than all other facilities availed and it is followed by improved drinking water. The number of households who have toilet facility are seen more in urban areas than the rural areas. The same is the case in electricity facility also. It is seen that the number of households are more having all facilities in urban. The bathroom facility for households is seen less in the district. Only 16.0% households have availed bathroom facility in the district.

The table indicates number and percentage of households by type of fuel used for cooking in the district as well as in the tahsils. It is seen in the table that the number and percentage of households those which used firewood for cooking is more in the district. However, it is more only in rural area of the district. In urban areas, more households use gas for cooking. The use of other fuels is less both in rural and urban area.

In the tahsil level, the firewood for cooking is used by a large chunk of total households of each tahsil followed by gas. In Revenue Circle, the highest percentage of rural households use fire wood in Helem Revenue Circle with little more than 91.0% households. Only 9.0% households use other type of fuels in this Revenue Circle. In urban area of Tezpur Revenue Ci9rcle 65.7% households being the highest percentage have made use of gas for cooking followed by firewood with 19.7%. As a whole it can be said that majority of households use firewood for cooking in rural areas and gas in urban areas. The use of electricity, biogas and coal/char coal is very limited. 954 households of the district have no cooking arrangement in their houses.

Table indicates the number of households who have availed banking services and the number of households having each of specified assets shown in the table. Out of the total households of the district, 65,679 households have availed banking service. The banking service availed by the households in the district is more in rural areas. It is 46,798 households in rural areas of the district. In tahsil level, the banking services availed by the households are found more in Tezpur Revenue Circle than other Revenue Circles.

Availability of all assets except Bicycle as mentioned in the table is more for the households of Tezpur Revenue Circle. The number of households having none of the specified assets is more in Dhekiajuli Revenue Circle with 23,836 households. The number of households having car, jeep and van is less in all Revenue Circles.

(ix) Major social and cultural events, natural and administrative developments and significant activities during the decade.

The past history of Kamarupa reveals that Sonitpur of undivided Darrang has formed part of the old Kingdom of Pragjyotish/Kamrupa during the time of the Varman rules of Assam. This political status seems to have continued till the Hindu dynasty declined. During the Koch rule, Biswa Sinha , the Koch king conquered Darrang including Sonitpur. After the down fall of various dynasts it is time to turn to the history of the Ahoms. They patronage to celebrate social and cultural events in Assam with great pomp and spirit. The kings took various steps to develop the Assamese culture of holding Bihus. They enjoyed these festivals and for the purpose of enjoying various festivals, dances, wrestling, the king Parmatta Singh constructed Rangghar at Sibsagar. The Bara Bhuyans were also held in high esteem in 15th and 16th century A.D. Shri Shri Sankardeva was a member of Bara Bhuyans family. Shri Sankardeva, the great saint poet of Assam who stepped up the epoch making Neo-Vaisnavism movement in Assam was the main reformer of Assam culture. His doctrine of only God (Krishna) was established before the masses through his various writing of religious epics, per-formation of Nat/Bhaona, and establishment of Satra. He and his followers established many satras at Darrang (Sonitpur) through the which the satria the culture has been developed in Darrang. Socially, Sonitpur becomes a cultural centre of Assam.

Festivities are part of the social life of the people of Assam in general and Sonitpur district in particular. Many festivals are observed in this district with varying degree of enthusiasm by the people of different faiths at different time of a year. The Hindus observe many festival ritualistic and religious festivals. Durga Puja which has of lesser importance in the district in the part has assumed increasing popularity and celebrates throughout the district with great rejoicing. The cultural programs and theatrical performation are held to depict the Sakti (strength) of mother Durga. Doljatra is another religious festival which are celebrated with great joy in honour of Lord Krishna. The Pakhowa/Holi is a most attractive function of Doljatra. In addition of the above religious festivals Hindus observe few other religious festivals annually like Sivaratri, Janmastrami, Biswakarma, Lakshmi Puja and Kali puja.

Bihu festivals are celebrated all over Sonitpur district. The Assamese observe three Bihu festivals during the year. Bred in the ancient peasant tradition, the people of Assam observe a sort of pagan devotion to nature. The Rangali/Bohag Bihu is a spring festival of dance and music. It is celebrated at a time when nature come out in light, beauty and green colour. Bihu dances are a superb expression of a great art. Some traditional musical instruments used by the youths while sing and dances are performed in gay abandon. Bihu festivals being agricultural in nature, domestic cattle treating as Lakshmi (Goddess of wealth) of the households are look after by performing some rites and pray for their good health. It is a part of Bhogali/Magh Bihu. Bihu festivities and dances are the expression of genuine folk joy. It is spring festival devoted mostly to the advent of the agricultural season Torrential rain caused by monsoon brings to a state of fertility to the earth. In this season, earth is ready to receive seeds sown for cultivation. The Bihu dances are therefore, a kind of fertility ritual having as main import amorous and emotional instincts of the heart of youth. The dances express mostly the exuberance of youths. Many of the songs associated with the dances are the expressions of amorous feelings. The dances depict the preponderance of romance and sex of the youths. Kati Bihu is in the time when the granary of farmers are left empty hence it is called Kangali Bihu. The farmers welcome Lakshmi, the Goddess of wealth and prosperity and pray for good quality and quantity of products from their agricultural fields by lighting earthen lamps in the fields and under Tulsi (Black Basil) plant.

The tribes of Sonitpur district are also celebrated some of their traditional festivals. Sonowal Kachari of the district perform Baith Puja. This festival observes in Chat month. The Hagra dance is an important and famous dance of Sonowal Kachari. They also perform Swardeu Puja, Lakshmi Sabah, Baghdeu Puja, Garkhiya Sabha, Ganjai/Manai Puja etc. Boro/ Kachari of Sonitpur district with their traditional culture has enriched the culture of Assam. Their contribution in this line is on immense value in formation of Assamese culture. The tribes like Mishing, Deuri, Tea garden workers have their own festivals which enrich the cultural granary of Assam. In respect of administrative development in the district, a statutory town namely Gohpur TC has been created during the decade and also a new Census Town come up during 2001 Census. The district Sonitpur is well

developed and all administrative offices are established in the district. Most of office buildings are constructed in modern line. The construction of a bridge at Bhomoraguri provide a direct link with Guwahati . From the natural development point of view nothing has been noticed in the district during the decade.

(x) Brief description of places of religious, historical or archaeological importance and places of tourist interest in the district

Tezpur:

Tezpur town is the head quarters of the Sonitpur district, which is situated on the right bank of the river Brahmaputra. The town is fringed by picturesque low hills along the riverbank. This place is also identified with the Harruppeswar, the capital of the rulers of Salastanbha dynasty.

Architectural remains, which are found lying in and around Tezpur are associated with the names of *Bana* and his daughter *Usha*. The archaeological remains found on this hill are believed to be a group of seven temples belonging to 8th to 10th century A.D. Some of the beautiful specimens are preserved in the 'Cole Park' in the western vicinity of the Deputy Commissioner's Court.

Vishwanath Charali:

Bishwanath Charali is a town on the north Trunk Road, about 76 kms east of Tezpur and 240 kms west of Guwahati. About 9 kilometers to the south of the town lies Bishwanath, a pilgrim centre with a rich tradition and glorious history. Tradition has it, that the breast of Sati, the wife of Lord Siva fell here when her dead body was hewn into pieces by Vishnu. An annual mela (fair) with a large gathering is held here on the third day of the Assamese New Year.

Bishwanath has steamer-ghat on the Brahmaputra. Visitors can be accommodated at the Burigaon Inspection Bungalow and hotels in the town.

Gohpur:

Gohpur is a railway station situated at a distance at about 134 Kms. east of Tezpur town. This is the place of martyrdom of Kanaklata Baruah, who was killed by police firing while attempting to hoist the national flag at Gohpur police station on 20th September1942. Gohpur is a part of glorious struggle of the people of Gohpur for the freedom of the country.

Kalabari :

Kalabari is situated by the north Trunk Road at a distance at about 145 kms. to east of Tezpur. There is a large temple dedicated to Basudev. The image of the God head in the temple is of a typical late mediaeval architectural piece.

(xi) Major characteristics of the district, contribution of the district in the form any historical figure associated with the district.

Sonitpur district is rich in tea. It is also a tea producing centre of Assam. This district provides a portion to the total production of tea in Assam which helps the state in earning foreign exchange. It gives an ample opportunity to the local people for getting job in this industry. Now-a-days many small tea growers have come forward to cultivate tea in their own lands. So it helps in getting self employment. Sonitpur district is also an agricultural zone. It sustains a large population of the district. Important products of agriculture in Sonitpur are rice, various kinds of pulses, jute, vegetable etc. Town Tezpur is an important nerve centre of trade and commerce.

Sonitpur district has produced many authors, scientists, saints, freedom fighters, scholars, sportsmen, and social workers. The contributions given by the most renowned people of the district in literature and culture of whom mention can be made of (1) Joyti prasad Agrawala (2) Bishnu Rabha (3) Hem Baruah (4) Dandaswar Gogoi (5) Phani Sarmah (6) Bipinpal Das and many more persons. Sonitpur district has also given birth of many eminent persons who are well known in different aspects of sports.

Many people of Sonitpur district courted arrest and suffered humiliation during the struggle for independence. The 1942 Movement had widespread effects in the Sonitpur district. The people who have taken part in the Quit India Movement were torture by the police of the British Government. At Gohpur firing Kanaklata was killed along with Mukund Kakati. Alongwith the males, ladies from Sonitpur had also joined in this movement and faced humiliation. However, Sonitpur district was at the forefront of the Quit India movement. At last, nation achieved Independence in 15th August, 1947. The sacrifice that offered by the sons and daughters of the soil of Sonitpur district for nation can never forget by the people for time to come.

(xii) Scope of Village Directory and Town Directory - Column heading wise explaination and coverage of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market / hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of respective jurisdiction.

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

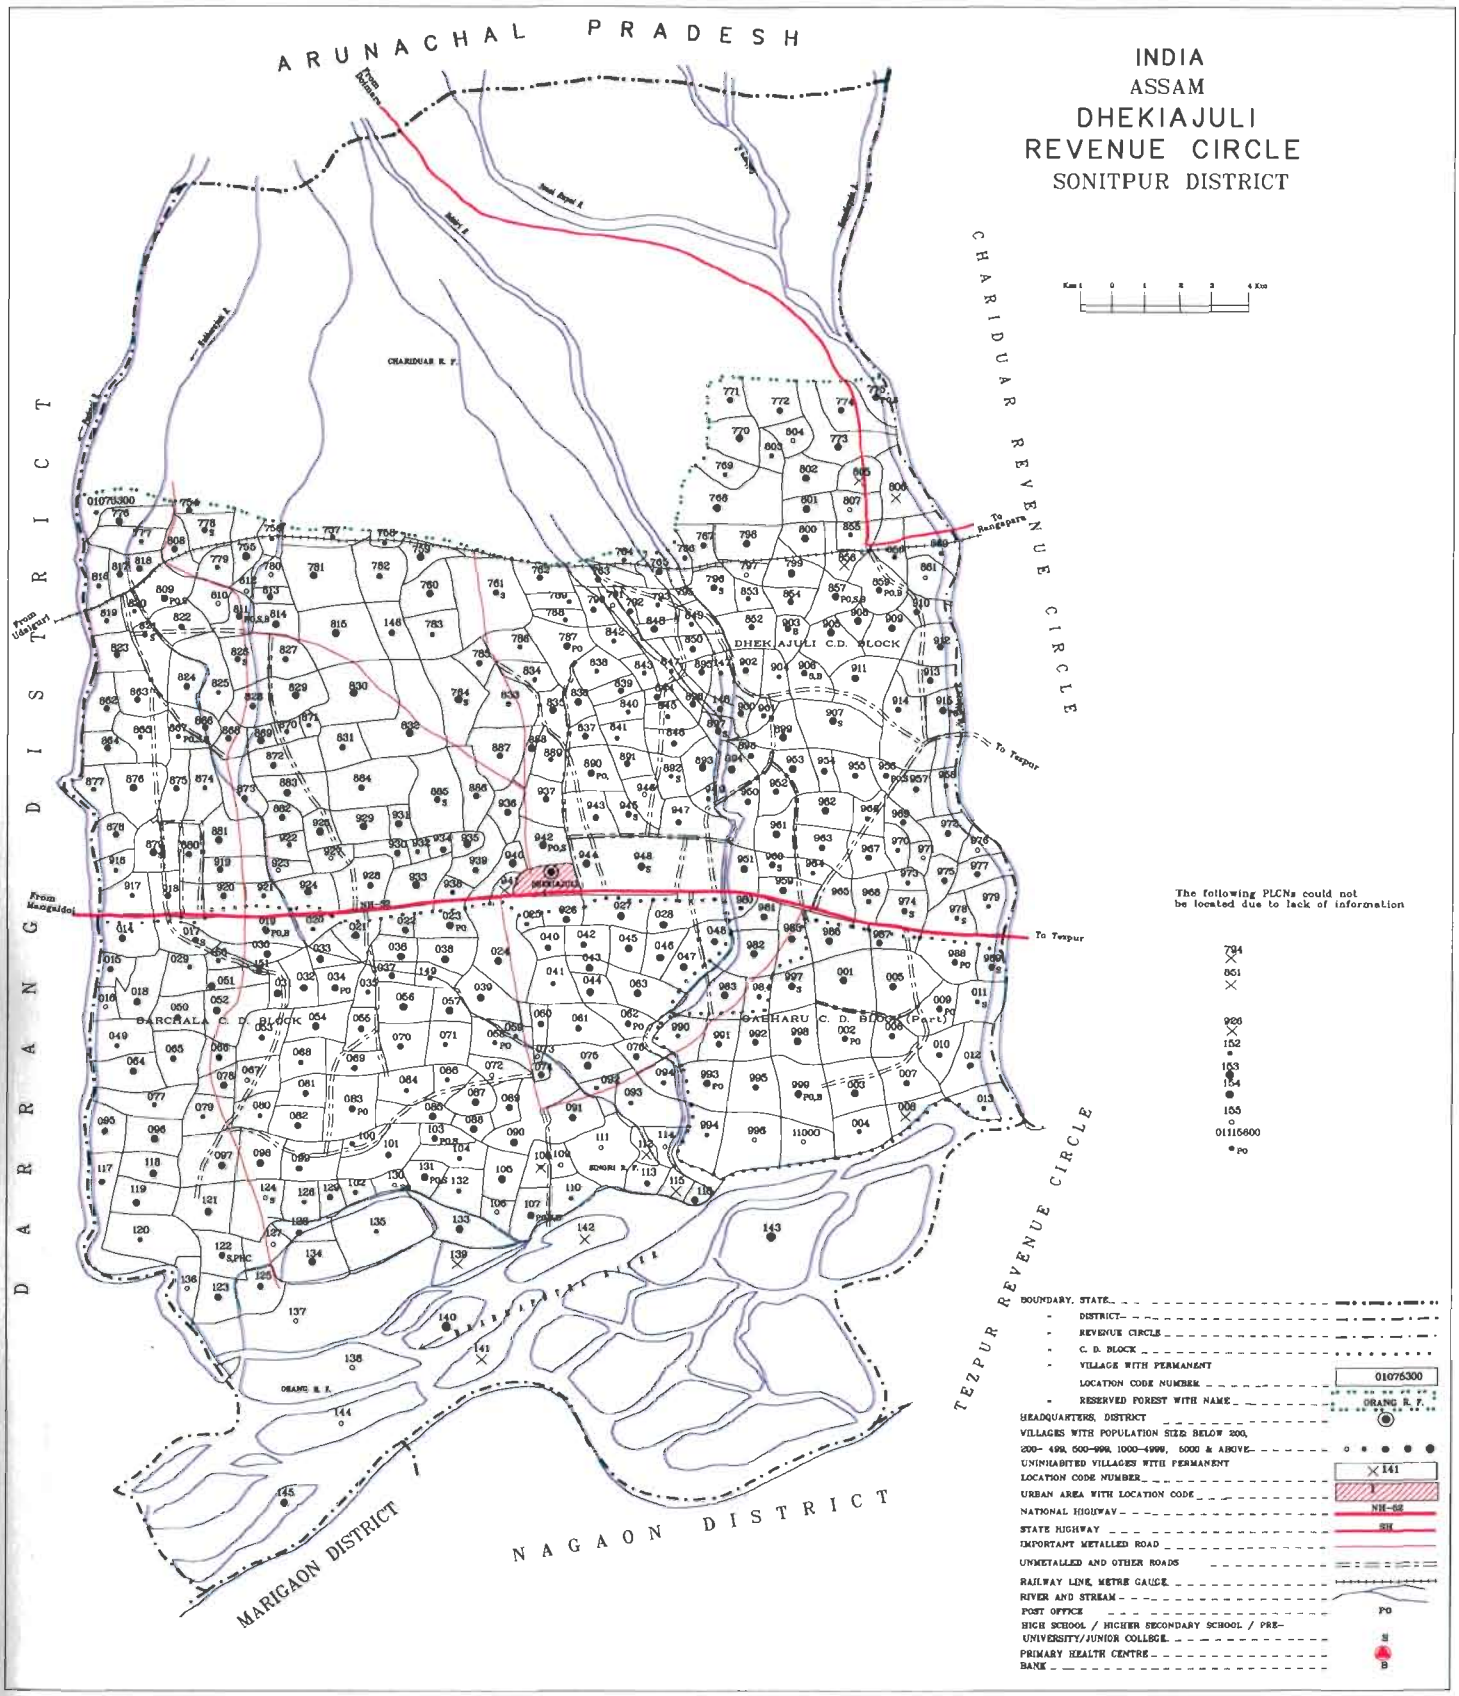

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.
Appendix-III	It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

List of villages merged in towns and outgrowths at 2001 Census

1.	Barika Chuburi	OG
2.	Bamun Chuburi	OG
3.	Dekar gaon	OG
4.	Parbatia Gaon	OG
5.	Hazarpar Dekar Gaon	OG
6.	Deori Gaon	OG

TOWN DIRECTORY

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as indcpcndcnt units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

STATEMENT-I
STATUS AND GROWTH HISTORY

Sl. No.	Class, name and civic status of town	Location code number	Name of Taluk/ Tahsil/ Police Station/Island etc.	Name of CD Block	Area (in sq. km.)	Number of households incl. Houseless households(2001 Census)	Population and growth rate (in brackets) of the town at the Censuses of

The medical facility available in all towns can be seen in the col. No-4 of the statement. All towns have Hospital and Dispensary except Majhgaon CT. TB clinic is not available in all towns except Tezpur town. The beds in medical institutions for all towns are available except Majgaon CT. The college is also available in each town. The Medical College and Engineering College facilities are availed by towns of Sonitpur district at Guwahati. The polytechnics institution is in existence in Nagaon town which is nearest for all towns of Sonitpur district. The other facilities mentioned in col. 10 to 20 against each towns can be seen are in the statement itself.

STATEMENT-VI
TRADE, COMMERCE, INDUSTRY AND BANKING, 1999

Sl. No.	Class, name and civic status of town	Name of three most important commodities exported			Name of three most important commodities manufactured			Number of banks	Number of agricultural credit societies	Number of non-agricultural credit societies
		1st	2nd	3rd	1st	2nd	3rd			
1	2	3	4	5	6	7	8	9	10	11

6	V Gohpur (TC)	Mustard Oil	Nil	Nil	Mustard Oil	Nil	Nil	3	-	-

The statement indicates three most important commodities exported and manufactured in towns. Mustard oil is exported by four towns which are shown in sl no. 3 to 6. Tea is exported by Dhekiajuli MB and Rangapara TC. Biscuits and Candle are also exported from Tezpur MB and Pineapple and Atta from Majgaon CT. Soap, Mustard oil, Candle, Atta, Biscuits and Steel are also manufactured in above two towns. The number of banks are more in Tezpur MB and Dhekiajulim MB but in other towns its number is less. The agricultural credit societies are available in Dhekiajuli MB and Biswanath Chariali TC. The non-agricultural credit societies are available.

STATEMENT-VII

Out of 5 statutory towns there are slum population in three towns but the number of population is more in Dhekiajuli town and Tezpur town .The slum areas are not notified by the government. There is no paved road in all slum areas of towns. There is OSD system of sewerage in slum areas of two towns and in other towns there is no such system of sewerage. The slum dwellers have mostly water borne and others type of latrines but in Tezpur service latrines are also available in slum areas. The Pt and St method of disposal of night soil in slum are available in towns. The tap points for supply of protected water in slum area is present in two towns. In slum areas of towns, there are electricity connections and the number can be seen in the statement. The lighting is also available in three towns.

APPENDIX TO TOWN DIRECTORY
Towns showing their outgrowths with population

PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to

that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

DISTRICT PRIMARY

ANNEXURE

Annexure

Annexure–I : Number of villages under each GramPanchayat.

(Data has not been collected in Census)

Annexure-II: Note on Fertility-Mortality

Fertility, Mortality and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.

In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever married women and the last question was to only currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Cenus pertaining to the Assam State and are defined in earlier chapter on non Census concepts.

Annexure- III : Various measures of fertility and mean age at marriage, 1991 Census.

Table-1
Age Specific Marital Fertility levels –1991 Census

Age Group	Sonitpur District			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0.138	0.139	0.115	0.151	0.152	0.133
20-24	0.155	0.155	0.162	0.214	0.219	0.165
25-29	0.137	0.138	0.125	0.183	0.192	0.120
30-34	0.099	0.102	0.063	0.134	0.140	0.093
35-39	0.064	0.068	0.022	0.087	0.094	0.042
40-44	0.041	0.043	0.010	0.049	0.052	0.022
45-49	0.026	0.027	0.007	0.033	0.034	0.025

As may be seen in the table above, the ASMFR is highest in the age-group 20-24 in both rural as well as in urban, followed by the age-group 25-29. There is a decreasing trend in all other subsequent age-groups in the district as well as in the State in both the areas. However, the rates of ASMFR are lower in the district in all age groups (except age-group 25-29 in urban) as compared to the State level rates of ASMFR. This difference between the State and district is much higher in case of rural area compared to the difference in urban areas.

Other measures of fertility such as GFR, TFR, birth rates and Child-Women ratio etc., are presented in the following table.

Table-II
Various measures of Fertility and Mean age at marriage, 1991 Census

Fertility Measure	Sonitpur District	Assam state
1	2	5
1. G.F.R.	141	135
2. G.M.F.R.	201	190
3. T.F.R.	4.4	4.2
4. T.M.F.R.	6.5	6.0
5. Crude Birth Rate	34.0	31.5
6. No. children ever born per woman in age group 45-49	5.0	5.2
7. Mean age at marriage	18.6	18.3
8. Child-woman ratio (0-4)	560	575
9. Child-woman ratio (5-9)	710	737

From the above table it is clear that though the ASMFR for all age-groups in the district is lower than the state levels, but the general fertility levels are higher in the district compared to the state levels. The GFR and GMFR in Sonitpur are 141 and 201 respectively against the respective rates at 135 and 190 at the state level. Even TFR and TMFR are also higher in the district than at state averages. However, the figures such as the number of children ever born per married woman and child woman ratios are less than the state averages.

The data relating to mortality rates for children for different age groups are presented in the following table.

Table-III

Estimates of Child Morality, 1991 Census

Mortality Measure	Sonitpur District	Assam State
1	2	5
Q (2)		
Persons	83	101
Male	81	104
Female	84	98
Q (3)		
Persons	97	104
Male	103	106
Female	92	101
Q (5)		
Persons	108	116
Male	115	118
Female	101	115

It may be seen in the annexure above that rates of mortality for all categories viz., Q2, Q3 and Q5 are far less than the state level rates. It may be also seen that these rates are in all categories are higher for males than for females both in district and state level except for Q1 in case of the Sonitpur district.

For comparison of various fertility indicators of the district with other districts of the state, an attempt has been made here to present these indicators for all the districts as shown in the following table.

Table-IV

District-wise various measures of Fertility and Mean Age at marriage, 1991 Census

State/District	GFR	GMFR	TFR	TMFR	CBR	No. of children ever born per ever married woman in age-group 45-49	Mean Age at Marriageof currently married women

Compared to the state level totals, the share of migrants from other districts of the state in the total migrants is relatively higher whereas the share of migrants from other countries is 11.22% in the district against 14.56% in case of over all State. Migration from other district reveal that the female inmigration is more than male inmigration from other districts but it is more for males in case of inmigration from outside the State.

Similar data on migration in respect of migrants classified by their place of last residence are presented in the following table.

	4.1	7.7	2.8	2.0	3.8	1.4

From the above table it is seen that migrants from elsewhere in the district outside the place of enumeration consists of 70.7%, from other district it is 21.0% , from other state 6.7% and from other countries it is 1.7% of the total migrants.

Annexure - V : Brief account of main religions in the district/ Revenue Circles 1991 and 2001 Census,Assam.

The data on religion of the population in the Sonitpur district as per 1991 Census are presented in the following table.

Table- I

Main religions in the Sonitpur district and Assam state –1991 Census

District/State	Religion	Number of Followers	Percentage to total Population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Assam	Total population	22,414,322	100.0	88.9	11.1
	Hindu	15,047,293	67.1	86.2	13.8
	Muslim	6,373,204	28.0	94.7	5.3
	Christian	744,367	3.3	96.0	4.0
	Buddist	64,008	0.3	93.0	7.0
	Jain	20,645	0.1	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8

Table-I

Main religions in the Sonitpur district and Assam state –1991 Census

District/State	Religion	Number of Followers	Percentage to total Population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Sonitpur	Total population	1,424,287	100.0	92.7	7.3
	Hindu	1,142,228	80.2	92.1	7.9
	Muslim	189,859	13.3	94.9	5.1
	Christian	85,427	6.0	98.1	1.9
	Buddist	3,199	0.2	94.6	5.4
	Jain	1,212	0.1	14.1	85.9
	Sikh	1,046	0.1	61.4	38.6

Out of 22,414,322 total population 15,047,293 are Hindus in Assam who constitute 67.1 percent of the total population. The share of Hindus in the district is 80.2%, which is more than the state level. Next to Hindus there are Muslims and Christians in the district who constitute 13.3% and 6.0% respectively. The size of population, who follow other religions is negligible and constitute less than one percent in the total population of the district.

Table - II

Main religions in the Sonitpur district and Assam state –2001 Census

District / State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%
1	2	3	4	5			6
Assam	All Religions	26,655,528	100.0	23,216,288	87.1	3,439,240	12.9
	Hindus	17,296,455	64.9	14,477,966	83.7	2,818,489	16.3
	Muslims	8,240,611	30.9	7,714,619	93.6	525,992	6.4
	Christians	986,589	3.7	936,008	94.9	50,581	5.1
	Sikhs	22,519	0.1	7,634	33.9	14,885	66.1
	Buddhists	51,029	0.2	44,546	87.3	6,483	12.7
	Jains	23,957	0.1	3,603	15.0	20,354	85.0
	Others	22,999	0.1	21,608	94.0	1,391	6.0
	Religion not stated	11,369	0.0	10,304	90.6	1,065	9.4
Sonitpur	All Religions	1,681,513	100.0	1,505,719	89.5	175,794	10.5
	Hindus	1,287,646	76.6	1,131,537	87.9	156,109	12.1
	Muslims	268,078	15.9	254,412	94.9	13,666	5.1
	Christians	115,623	6.9	112,091	96.9	3,532	3.1
	Sikhs	1,451	0.1	428	29.5	1,023	70.5
	Buddhists	3,864	0.2	3,498	90.5	366	9.5
	Jains	1,210	0.1	186	15.4	1,024	84.6
	Others	3,037	0.2	2,995	98.6	42	1.4
	Religion not stated	604	0.0	572	94.7	32	5.3

The figures in the above table shows that compared to the state as a whole the proportion of Hindu is more in the district. The Hindus which constitute 64.9 percent of the total population at state level is 76.6 percent in the district, followed by Muslims 15.9 percent, Christians 6.9 percent, Buddhists and others 0.2 percent and Sikhs and Jains 0.1 percent each.

Annexure- VI : Marital status of population as per 1991 and 2001 Census.

Note: Data on unspecified marital status are not taken into account but they are included in the figures shown in col No 2 and 3.

The marital status of the population in the district as presented in the above table reveal that the share of never married in the total population is 61.2 for males and 54.2 for females. But in case of share of married population it is more for females (40.2%) than males (36.6%). The highest percentage of married is found in the age-group 45-49 in case of males and 35-39 in case of females. The percentage of married in the age group 10-14 though appears negligible, but this reveals the prevalence of child marriages in the district.

A comparison of the district level figures of marital status with that of the state averages reveals that the percentage of never married males is lower than the state average while the females is higher. In case of married males and females the percentages are almost the same with that of the state average. In case of widowed males percentage is higher and females percentage is lower than the state percentage. Again in case of Divorced / Separated both the males and females percentages are the same with the state percentage.

The highest percentage of married males and females are recorded in the age group of 45-49 and 35-39 in the district being 95.7 percent and 89.3 percent respectively. The corresponding figures in the state level for males and females are recorded in the same age group. Never married males and females being 21.8 and 7.3 percent respectively in the district. Never married males percentage is lower and females percentage is higher than the state percentage of 22.1 and 6.3 percent respectively.

Note: 1. Percentage of literates is to total population.
2. All other percentages are proportion of literate population

The percentage of literate males and females in the age group are 62.8 and 52.3 in the district as against 66.8 and 58.2 in the state respectively. The highest literacy rate for males is seen in the age group 15-19 as in the case of state but it is the highest for females in age group 7-14 in the district and 15-19 in the state .The percentage is seen more for below primary level in 7-14 age group. The higher is the age group lower is the percentage of literacy rate. It is seen that literacy rate is more for primary and middle level. In higher level of education the percentage is low.

In the district, the literacy rates for males and females in all the age group are very low as compared to the state rates. It is also seen that percentage of literate is high in the age group 15-19 than in all other age group both male and female though it is lower than the state percentage. Literate populations are seen high up to middle level in all age group excepting in the age group 20-49. In the higher educational level it is found to be low excepting graduate and above in the age group 20-49.

Annexure- VIII : Distribution of different Mother Tongues returned in 1991 and 2001 Census.

The data on mother tongue of population of the district as well as the state are presented in the following tables.

Table -I
Distribution of different mother tongues returned in 1991 Census

Mother tongue	No. of persons classified by their tongue			
	Assam State		Sonitpur district	
	Total No.	percentage to total	Total No.	percentage to total
1	2	3	4	5
1. Assamese	12,841,744	57.3	779,521	54.7
2. Bengali	4,820,573	21.5	186,220	13.1
3. Bodo/Boro	1,176,635	5.3	100,498	7.1
4. Hindi	769,076	3.4	35,793	2.5
5. Nepali	432,351	1.9	91,631	6.4
6. Miri/mising	381,562	1.7	31,051	2.2
7. Karbi / Mikir	354,781	1.6	10,511	0.7
8. Oriya	136,201	0.1	37,015	2.6
9. Santali	134,663	0.6	6,424	0.5
10. Bhojpuri	115,918	0.5	6,196	0.4
11. Garo	113,408	0.5	2,070	0.2
12. Sadan /sadi	104,567	0.5	50,225	3.5
13. Monda	75,324	0.4	39,247	2.8
14. Kurukh / Oran	54,202	0.2	9,571	0.7
15. Proja	-	-	3,088	0.2
16. Mundari	-	-	1,965	0.1
17. Other mother toungues	903,317	4	33,261	2.3

Note: Mother tongues from Sl. No. 27 to 30 are not shown at State level as these are not considered as numerically biggest language at State level.

As shown in the above table Assamese is the mother tongue of more than half of the population and Bengali constitutes 13.1% followed by Bodo/ Boro around 7.1% and Nepali 6.4%. The other languages are Hindi, Miri/Mishing, Oriya Sadan/Sadi, Monda etc.

Table - II
Distribution of population by different Mother Tongue -2001 Census

Sl. No.	Mother Tongue	Assam		Total Sonitpur	
		Total No.	% to Total	Total No.	% to Total

17	Kurukh / Oraon	72,304	0.3	9,779	0.6

Table -II
Distribution of population by different Mother Tongue -2001 Census

Sl. No.	Mother Tongue	Assam		Total Sonitpur	
		Total No.	% to Total	Total No.	% to Total
	1	2	3	4	5
18	Rajbangsi	51,225	0.2	62	0.0
19	Khasi	29,292	0.1	81	0.0
20	Telegu	27,354	0.1	1,684	0.1
21	Lalung	26,480	0.1	8	0.0
22	Haijong / Hajong	25,177	0.1	248	0.0
23	Hmar	24,866	0.1	12	0.0
24	Deori	23,366	0.1	774	0.0
25	Punjabi	21,292	0.1	1,694	0.1
26	Mundari	20,045	0.1	5,806	0.3
27	Zemi	15,514	0.1	0	0.0
28	Kuki	15,423	0.1	34	0.0
29	Mura	12,673	0.0	4,218	0.3
30	Sema	10,346	0.0	9	0.0
31	Total of Other Mother Tongues	1,032,125	3.9	91,210	5.4

As can be seen from the above table, the number of persons speaking Assamese consists of the major portion (33.4%), of total population in the district followed by Bengali (18.7%), Sadan / Sadri (9.5%), Nepali (7.8%), Bodo / Boro (7.7%), Oriya (4.2%), and Hindi (3.6%). Speakers of other languages each constitute a negligible percentage.

Annexure –IX : Distribution of Scheduled Castes and Scheduled Tribes in 1991 Census.

Scheduled Castes :

Out of 1,424,287 total population of the district 81,000 are Scheduled Castes population. The caste wise population of some prominent castes are presented below:

Table - I
Distribution of Scheduled Castes population among some prominent Scheduled Castes, Sonitpur district, 1991 Census

Name of Scheduled Castes	Scheduled Castes total population	Percentage	
		Percentage to total Scheduled Castes population	Percentage to total population of the district.
1	2	3	4
1. Kaibarta or jaliya	39,231	48.3	2.8
2. Namasudra	16,412	20.3	1.2
3. Jhalo, Malo or Jhalo Malo	8,231	10.2	0.6
4. Muchi, Rishi	3,483	4.3	0.2
5. Jalkeot	3,229	4	0.2
6. Others	10,414	12.9	0.7
7. All Scheduled Castes	81,000	100	5.7 (1,424,287)

N B.– 1. Others include Bansphor, Bhuirmali/Mali, Dugla/Dholi, Hira, Lalbegi/Mahara, Sutradhar etc and unclassified castes.
2 Bracketed figure is the total population of the district.

It is observed in the above annexure that Kaibarta or Jaliya is the prominent caste of the district with a share of 48.3% out of total Scheduled Castes population followed by Namasudra 20.3%. The remaining castes have a share within the range of a little above 4.0 percent and other castes consist of a share of 12.9 %.

Out of the total population of the district 5.7% is the Scheduled Castes population of which Kaibarta or Jaliya is 2.8% and Namasudra with 1.2 whereas other castes occupy less than 1.0% by each.

Scheduled Tribes :

The Scheduled Tribes constitute10.7% of the total population of the district. The data relating to some major Scheduled Tribes population are presented below in the table.

Table - II
Distribution of Scheduled Tribes population among some prominent Scheduled Tribes Sonitpur district – 1991 Census

Name of Scheduled Tribes	Scheduled Tribes total population	Percentage	
		Percentage to total Scheduled Tribes. population	Percentage to total population of the district.
1	2	3	4
1. Boro, Boro Kachari	102,369	67.1	7.2
2. Miri	34,868	22.9	2.5
3. Kachari, Sonowal	7,638	5	0.5
4. Rabha	3,970	2.6	0.3
5. Deori	1,333	0.9	0.1
6. Others	2,3 20	1.5	0.2
All Scheduled Tribes	152,498	100	10.7 (1,424,287)

Note: 1. Others include Hojai, Lalung, Mech and unclassified tribes.
2.Bracketed figure is the total population of the district.

In the above table it is observed that the concentration of Scheduled Tribes population is not high. The Boro, Boro Kachari constitutes a share of 67.1%, Miri with 22.9 and Kachari, Sonowal with 5.0% of the total Scheduled Tribes population in the district. The remaining tribes consist of less than 2..0% by each.

Out of the total population of the district only Boro, Boro Kachari, occupies7.2% whereas other tribes consist of less than 3.0% only by each.
