ASSAM

LAKHIMPUR DISTRICT

LETEKU PUKHURI THAN

Shri Madhavadeva was born in 1411 Saka / May-June, 1489 A.D. at village Narayanpur of North Lakhimpur district, Assam on the bank of Leteku Pukhuri. Madhavadeva was the chief apostle and ardent follower of Vaisnavite poet-philosopher Mahapurush Srimanta Sankardeva . Madhavadeva was a prime spiritual successor of Sankaradeva. He preached monotheistic Vaisnavism.

The birth place of Madhavadeva 'Leteku Pukhuri' is a big tank of about one acre of land. It was perhaps digged by Harisinga Bora near his house who had given shelter to the parents of Madhavadeva. With the passage of time, the birth place of Madhavadeva converted into a famous Hindu religious place for its Namghar (prayer hall). It is situated at a distance of about 10 kms. from National Highway run through the district. The Than covers a big area where all sort of facilities are available for tourists. The pilgri mers visit the Than daily and bow down their heads with devotion before the Than. A journey to this Than is a holy pilgrimage.

Annexure	VII	Age, sex and education in the district, 1991 and 2001 Census	572
Annexure	VIII	Distribution of different mother tongues returned in 1991 and 2001 Census	576
Annexure	IX	Distribution of Scheduld Castes and Scheduled Tribes in 1991 Census	577

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

(P. Hazarika)
Director of Census Operations,
Assam, Guwahati.

District Highlights – 2001 Census

1 In Lakhimpur District, North Lakhimpur Revenue Circle/ Tahsil is most populous having 217,048 persons while Subansiri (part-1) Circle is the least populous Revenue Circle having 51,262 persons.

2 Among the CD Blocks, Narayanpur CD Block has the highest number of population with 122,853 whereas the lowest population is found in Bihpuria CD Block 35,721 persons

3 In the district there are 7 Revenue Circles and 9 CD Blocks which comprise 1,139 villages including 31 uninhabited villages.

4 The district comprises two towns only. North Lakhimpur MB is the most populous with 54,285 persons while Bihpuria TC is the smallest in population with 10,868 souls.

5 While the highest number 201 inhabited villages is found in Narayanpur CD Block followed by Dhakuakhana CD Block and the lowest 27 of number of inhabited villages is found in Bihpuria CD Block.

6 The largest village by area is Bangal Mara with 1,281 hectares land in Karunabari CD Block while in the district, Tintia is the smallest village in the area with 2 hectares of land which is under Narayanpur CD Block.

7 The largest village by population is Maghuli Bargola with 5,884 souls which is situated at Karunabari CD Block and the smallest village is No.4 Pichala with one person only under Narayanpur CD Block.

8 The district is well known for her large number of Satras.

9 Shri Shri Madhab Dev, a great Visnavitee reformer and a chief disciple of shri manta Sankardev was born at Letuki Pakhuri in Narayanpur CD Block of Lakhimpur District.

10 The District has 109 numbers of Char Villages.

The statement 9 gives the houseless and institutional population of Revenue Circles for rural and urban. Population and number of households for both houseless and institutional are more in rural than in urban. Among the Revenue Circles, North Lakhimpur Revenue Circle with 222 houseless population is the highest and the lowest is noticed in Subansiri (Part-1) Revenue Circle with 6 persons. North Lakhimpur Revenue Circle with 94 number of households having 1,691 persons stands in the top position in the distribution of institutional population among all Revenue Circles and the lowest is noticed in Subansiri (Part-1) Revenue Circle with 151persons.

ANALYTICAL NOTE

ANALYTICAL NOTE ON LAKHIMPUR DISTRICT

(i) History and scope of District Census Handbooks

District Census Hand Book is an important and valuable publication brought out by the census organization of each state after each decadal Censuses This provides detailed information on some basic demographic and socio-economic aspects and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being only informative source of every district of each state. It has, thus, proved to be of immense utility to the planners, academicians and researchers.

The District Census Hand Book was first initiated during 1951 Census with the collaboration of respective state Governments. In 1951, only few demographic as well as some economic information in village and town level of the district along with some census tables were published in District Census Hand Books. Since then, it had undergone radical changes during the subsequent decades. The scope and content of the publication were enhanced by incorporating more census tables and also some basic statistics on land-use-pattern, agriculture, industry, administration, public Health and medical etc. the DCHB of 1961was, therefore, considered as an unique asset published by census organization. In 1971 census, further improvements were made in the DCHB by enlisting many more information on villages and towns in the form of Village and Town Directory. It has three parts. The Part-A relates Village and town Directory. Part-B contains Villages and Town wise Primary Census Abstract Part-C deals with administrative aspect and Census tables based on PCA etc. The 1981 census again widened the scope of DCHB to cover more data on literacy, health care etc. in addition to the information covered in 1971, DCHB. In 1981, the DCHB was divided into two parts. The part-A included data on village & town directory and part-B covered only the Village and Town wise Primary Census Abstract. This part of the DCHB was not brought to light in Assam as no census was conducted due to prevalence of disturb condition in the state. In 1991 Census, the DCHB was divided in two parts. The part-A divulged the village and town directory and part-B indicated the Primary Census Abstract. The part-A had two sections. In section-1, the alphabetical list of villages and note explaining the codes used in the village directory were presented. The village directory had four appendices. The section-11 depicted note explaining the codes used in the town directory, the town directory statements (1 to 1V) and appendix to the town directory. The part-B revealed district Primary Census Abstract, Circle-wise, CD Block wise, village and town wise Primary Census Abstract. In addition, the PCA had an appendix as well as annexure to the appendix. The District Primary Census Abstract to scheduled caste and scheduled tribe at circle and town level was also incorporated in this part of the DCHB.

However, as traditional of the past in the present DCHB also some more information on availability of facilities such as, credit societies, banks, recreation and cultural facilities, News Paper/ Magazine are included for the first time. Further, information on income and expenditure, important commodities manufactured, exported and imported etc. are also included to give a fuller account to the scope of DCHB. Similarly, in town directory also few more information are included to increased its depth.

The process of collection and compilation of these data involved a lot of exercise. At first, revenue circle wise information on each village have been collected by the revenue authorities at district level. These data are compared with 1991 Census data at district level and after their through scrutiny and cross check , these records are submitted to the census Directorate. In case of town directory, data have been collected directly from the Commissioner of Municipal Corporation & Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figure of 1991 Census at Census directorate. Thereafter, efforts are made to compare and cross-check with

similar data made available from other source especially data published by different departments of state Government to verify the authenticity and correctness of figures received through village and town directory booklets. Then only compilation and computerization of these data have been made according to the instructions of the Registrar General and Census commissioner, India. It is, therefore regarded that because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication to that of many publications brought out earlier. It will be a more useful book for all concerns. This endeavor will perhaps, quince the thirst of needy people.

(ii) BRIEF HISTORY OF THE DISTRICT

The Lakhimpur district was a part of old Pragjyogtish during 7th and 8th centuries. Old Lakhimpur district covered the areas of the present Dhemaji, Dibrugarh and Tinsukia districts.

Lakhimpur district is bounded on the north by Subansiri and Siang district of Arunachal Pradesh, on the east by a portion of Lohit district of Arunachal Pradesh and a part of Dhemaji district, on the south by Dhemaji and Sibasagar and on the west by Darrang district.

ORIGIN OF THE NAME :

It is said that the name of district was closely associated with Lakshmi, daughter of Monohar who ruled over a part of north bank of the river Brahmaputra. Lakshmi appeased Sun God by whom she had two sons -Santanu and Samanta. Santanu became Vaisnava and migrated to Nagaon and Samanta, a staunch follower of Sakta panth remained there and the place was named after their grandmother Lakshmi. It came to be known as Lakhimpur. The present name of the district has been jutted with it.

The early history of the district can be traced only after 1228 A.D. Nothing definite is known prior to Ahom invasion. Our source of information confines to some dubious and fragmentary references in Mahabharata, the Puranas and the Tantras and other similar records.

The king Bhismaka, reigned supreme in ancient Kundilya (modern Sadiya in the present district of Tinsukia). This has been well supported by a mythological account which falls in the extreme North-East of Assam. The ruins of the forts and temples then existed in the districts bear well-testimony to confirm the views. The ruins found scattered near Sadiya throw a glimpse that a band of civilized prince (s) ruled over there in Assam. The presence of archeological remains in and around the area has been attributed to the king Bhismaka and Sisupala. Mention has been in the Bhagavata and the Vishnu Puran about the presence of the king Bhismaka and his daughter- Rukmini. Sri Sri Sankardeva, a Vaisnavite saint of North-East India, narrated the story of Rukmini as being eloped by Lord Sri Krishna. It was fully narrated in a dramatic art form known as 'Rukmini Haran'.

The aborigines of the region belonged to the Tibeto-Burman tribes. Of them Bodos figured prominently. The Chutias and Kacharis, these two appeared most significantly. A little earlier than 12th Century some 'Baro Bhuyas' established some principalities and they were the undisputed leaders there. Thus Chutiyas and the Baro Bhuyas dominated the early history of Lakhimpur district. According to the local legends "Baro" stands for twelve and these 'Baro Bhuyas' stated their claim to be the proud descendants of the king.

The boundaries between the Chutiyas and the 'Baro Bhuyas' according to Sarbananda Rajkumar, passed through the Lakhimpur town and the Dhemaji mouza. Therefore Lakhimpur, Bihpuria, Narayonpur, Dhalpur etc. were the important principalities of the Bhuyas of the North Lakhimpur area.

Sadiya was the old capital of Lakhimpur district and all the rulers were Hindus who hailed from Pal dynasty. The Pal rulers ruled there when the formidable Chutiyas belonging as they were to the Tibeto-Burman origin took over the rule from them in about 11th century. The Chutiyas entered into Assam from North-East corner and look possession of the upper Brahmaputra valley. But confrontations with the Ahom rulers were on the rampage and as a result of continuous bickering with the Ahoms, the Chutiyas were Crushed down after some centuries. The Ahom, a 'shan' tribe who had descent from the Patkai region entered Sibasagar at about 360 years before. Thus Sibsagar district and Lakhimpur district along with the rest of Assam formed a part of the territories of the Ahom rulers. The edifice of the Ahom kingdom was greatly shaken when the high priests of the Moamorias, a Vaisnavite sect, raised their ugly heads against the reigning Ahom kings.

The Ahom rulers managed to drive away the Moamorias by completely desolating them from the Lakhimpur district lying south of the Brahmaputra. A few years later a claimant of the Ahom throne invited the Barmans to fight against the Ahoms. But they were expelled from the district by the British in 1825 and the district wore a miserable look as a result.

During and at the time of gradual break up of the Ahom kingdom Moamorias established themselves in the Matak territory abounded on the east by Mac-Moh-On imaginary line drawn South from Sadiya. The chief of the Moamarias who bore a title of 'Bar Senapati' was acknowledged by the British when the latter took possession of the territory on condition of the formers agreeing to supply 300 men to the state service. This, arrangement did not last long and the British government imposed a revenue of Rs 1800 in lieu of supply of personages. The death of the 'Bar Senapati' in 1842 paved the way of the British rulers to annex the entire territory of Matak.

The Khamtis crossed the Brahmaputra in 1794 and forcibly ousted the Assamese governor of Sadiya. The British govt. accepted the Khamti chief as a feudatory ruler if Sadiya. In 1835 it was felt necessary to remove him in a bid to capture some territory claimed by the Matak chief. The Matak chief defied the orders of the British and as a result the territory was brought under the district administration . Four years later the Khamtis rose into revolt, attacked Sadiya, burnt the station and killed the political Agent, colonel White. The rising was put down at east and since then the tribe did nothing at all. In 1833 the Ahom king, Purandar Singh was settled as a feudatory prince to govern the entire Lakhimpur sub-division and thus he became feudatory prince in the two upper districts of Assam valley. Since the time of British administration the history of the district witnessed a history of development and increasing prosperity.

(iii) Administrative Set-up

The present Lakhimpur district was a part of undivided Lakhimpur district. The undivided Lakhimpur district was the creation of the British in the 19th century. For administrative convenience of the district head quarter was shifted to Dibrugarh by the British ruler and it continued till 1971.

In 1971 the undivided Lakhimpur district was bifurcated into two districts namely Lakhimpur and Dibrugarh districts. This was done by a govt. notification of the govt. of Assam. The areas lying in the southern bank of the river Brahmaputra formed the Dibrugarh district while the remaining areas on the northern bank formed the Lakhimpur district. It continued as it is till 1989, when the areas of the Lakhimpur district were again bifurcated into two districts. As a result Dhemaji district came into being vide Govt. Notification No GAG(B) 370/87/107 dated 29 September, 1989.

The present Lakhimpur district is comprised of two sub-divisions namely (1) Lakhimpur and (2) Dhakuakhana. Dhakuakhana sub-division started functioning with Dhakuakhana as the sub-divisional head quarter vide Notification No GAG(B) 370/87/107 dated 29th September, 1989 w. e. f. 1st of October, 1989.

(iv) Physical Features

The district is at the foothill of the Eastern Himalayas. The district is rich in the production of bamboos and reeds. The dense forests are found in a long stripe along the northern boundary.

The Subansiri is the main river of the district with shallow beds and meandering courses. The river originates high on the mountains of Tibet and enjoys the continuous flow of water. Besides 'Ranga Nadi' flows through the district rising from the Dafla Hills. Dikrong, Ganga, Charikoria etc. are the other important rivers of the district.

Drainage :

The purpose of the drainage is served by the principal rivers of the district. To name the principal river in the district Subansiri river figures prominent. The river Subansiri has direct link with the river Brahmaputra. It flows along with the vast waterbed of the Brahmaputra. Ghagar river is one of the tributaries of the river (1) Mor river, (2) Pichala river, (3) Dikrong, (4) Ranga, (3) Chila, (6) Koran, (7) Charikara, and (8) Dangahara river. All these rivers flow to the river Brahmaputra via Subansiri.

Flood :

Flood is a natural annual phenomenon in all the districts of Assam. Lakhimpur is not exception to this. Rivers flowing from high hills and mountains carry with it the silt and sand which deposit in the riverbed. As a result the riverbeds are becoming shallow and the rain water during summer overflows the river. The water, then, flows to the low-lying areas. Thus floods create a havoc in the district and damages the standing

crops including the animal wealth. Some become homeless and people suffer from malaria, fever and the like. Government machineries become active at the time to render help, assistance in the tune of flood relief and health materials.

Climate :

The absence of dry hot summer is the characteristic feature of the climate of Lakhimpur district. The prevalence of cold water, cold and pleasant spring is enjoyable. High humid temperature and exorbitant rains during summer, like the other districts of Assam, are experienced. The temperature rises high during South-West monsoon season which generally starts in the month of June and last till the beginning of the month of October every year. The cold season starts from the early part of December till late February. March to May is a period of thunderstorm and heavy rainfall.

Rainfall :

Rainfall occurs almost all the years round. The South-West monsoon arrives and blows over the district by about the beginning of June every year.

The district is consisted of alluvial soil The rivers have played a domineering role in respect of soil composition. The soil in most places is the mixture of sand and clay on a variegated proposition. The riverbeds are full of rocks and pebbles. The soils of the district, as classified by NBSS and ICAR are udalfo oe thins (23), udalfo ochrepls Aguts (25) fluents aquepts (47) and Aquets Aqukuts (55).

Forest :

The forest are found in a long stripe along the northern boundary of the district.

The forest may be sub-divided into two main classes :-1) reserved forests and 2) unclassed state forests. The Govt. waste lands fall under the category of unclassed state forest.

According to publication released by the Forest Department in 1990, total forest excluding the unclassed forests, stood at 936.00 sq.km against the total geographical area of 5646.40 of the district. Thus 16.59% of the total geographical area of the district covers the forest area of the district against the overall state percentage of 27.41.

The statistical Handbook (1994) shows that total forest area excluding the unclassed forests is 93677.00 hectares for the district.

The bountiful evergreen forest of the district caters the important source of revenue of the district. Of the valuable forests products mention may be made of the following.

1. Hallong (Depterocarpus Macrocarpus)
2. Hollock (Terminaba Myriocurpa)
3. Makai (Storea Assamica)
1. Nahar (Mesua Ferrea)
2. Ajhar (Largerstroemia flos Reginae)
3. Uralm (Biscotia Javanica)
4. Simul (Bombay Malbarieum)

Besides these the forests are full of varieties of wood and bamboo. Gamari, Jutuli, Chapa, Sissu, Silkha, Chom, Sualu, Neem etc.

There are five reserved forests. They are Ranga, Kakoi, Dulung, Pavo and Kadam. With the increase of population forest area has been gradually decreasing and the number of animal has lessened considerably. The char area of the Brahmaputra is rich in growing of thatch which is primarily used for roofing purpose. The district has adequate potential to run forest based industries.

Silk and Beeway Indian rubber form a bulk of main jungle products. Cane is found in unclassed forest areas in abundance.

The forest of Lakhimpur district are offering a much needed shelter to wild elephants, Rhinos, Tigers, Deer, Hogs, Sambhow Deer, Buffalo, Pigs, Methan etc. On the other hand Cobra , Lizard, Pythor are valuable reptiles found in the forest. Parrot with vivid colours, Queh Aorican, Blue coat pelician, Hornbill, Duck, Govse etc. are common in these forests. But sadpart of the things is that poachers are tormenting these assets leading to considerable decrease. Some are on the verge of the extinction. Government should devise ways and means to preserve and protect these precious wealth in not too distant future.

Mineral and Mining :

Although no mineral wealth has been discovered so far, there is possibility of mineral wealth reserved in the district. To confirm the belief mention may be made of Gold in the alluvial form found once in the sand of Subansiri and Dikrong river. Oil India Ltd., is searching for oil and natural Gas in few places of the district. It is expected that there are coal reserve underneath lying undiscovered.

Land and Land use pattern :

Lakhimpur is primarily important as a district of agriculture. Major area is under villages covering both the subdivision—North Lakhimpur and Dhakuakhana. There are 13 mouzas and 7 revenue circles. 92.68% of the total population of the district lives in villages. The remaining 7.32% live in towns.

Agriculture is the mainstay of the people of the district. Sail, Ahu, Bawdhan, Mustard, Wheat, Potato, Sugarcane are the principal production. Tea and Jute are grown extensively. Traditional method of cultivation is still in practice. Minor irrigation facilities have been extended in a few areas only. There are 9 tea gardens and 629 small scale industries. The prospect of building various industries is still bright having innumerable infrastructure.

The following table gives the detail of land use pattern in the district.

TABLE-A

LAND-USE-PATTERN IN LAKHIMPUR DISTRICT

(1997-98) (PROVISIONAL)

Sl. No.	Classification of land	Area in hectares
1	2	3
1	Total geographical area	227,700
2	Forest area	35,562
3	Land not available for cultivation	88,889
	a) Land put to non Agricultural use	51,298
	b) Barren and uncultured land	37,591
4	Other cultivated land excluding fallow land	10,357
	a) Permanent pastures and other grazing	3,707
	b) Land under misc trees groves etc (not including net area)	4,331
	c) Cultivable waste land	2,319
5	Fallow land	6,347
	a) Fallow other than current fallow	1,382
	b) Current fallow	4,965
6	Net area sown	93,869
7	Total cropped area	162,968
8	Area sown more than once	69,099

Agriculture :

Predominantly the district is the rich abode of the agricultures. Barring the urban areas, rural areas are full of agricultural lands only. Rice is the staple food of the inhabitants. The favorable climate, alluvial soil coupled with sufficient rain have helped the district to grow rice in plenty. Besides paddy, jute, wheat, sugarcane, pulses etc. are grown in abundance.

Crops :

Paddy cultivation is mostly carried out in the up soil of the district. Of all the cultivations, paddy cultivation covers the largest proportion.

The total population in 1991 Census registered to be 751,517 of which 1,64,645 persons were cultivators and 14,908 persons were agricultural labors. They, thus, constitute 5.1% and 4.6% of the total workers of the district.

TABLE-B

AREA, PRODUCTION, AND AVERAGE YIELD OF IMPORTANT CROPS IN LAKHIMPUR DISTRICT FOR THE YEAR 1998-99(AS PER FINAL FORECAST)

SL No	Type of crop	Area under cultivation (Hectares)	Production (Tonnes)	Average yield kg per hectares
1	2	3	4	5
A. Cereals				
1	Autumn Rice	8,400	5,844	328
2	Winter Rice	22,200	88,195	1,208
3	Summer Rice	5,870	7,094	804
4	Total Rice	36,470	101,133	1,015
5	Maize	120	160	598
6	Wheat	1,500	507	507
7	Other (cereals and small millets)	2	29	537
B. Pulses				
1	Tur	6	54	700
2	Gram	3	3	410
3	Black gram	175	633	464
4	Green gram	30	176	450
5	Lentil	550	213	460
6	Peas	210	295	415
7	Other pulses	30	85	470
8	Total pulses	1,004	1,459	457
C. Oil seeds				
1	Lin seed	—	6	349
2	Castor	140	99	450
3	Niger	5	14	510
4	Sesamum	110	124	342
5	Rape and Mustard	6,400	5,470	312
6	Total	6,655	5,713	315
D. Fibre Crops				
1	Jute	140	4,617	1,341
2	Mesta	5	79	710
3	Cotton	6	20	73
E. Miscellaneous				
1	Sugar cane	39	9,200	37,548
2	Tapioca	4	115	4,250
3	Potato	865	18,954	5,156
4	Sweet potato	130	1,110	3,100

Horticultural crops :

The district produces varieties of garden crops. The table below shows the production and average yield in kgs. Among them Banana is produced in large numbers followed by Pineapple, Areca nut, Papaya, Coconut and orange. Banana is planted by every household. Besides these mango, Jack fruit, Lemon are common to every household.

Table - 3
Area, Production and Average yield ofHorticultural Crops in Lakhimpur district
(1998 – 1999)

Sl No	Type of Crops	Area under cultivation (Hectares)	Production (Tonnes)	Average yield (kg)
1	2	3	4	5
1	Banana	1,110	14,430	13,000
2	Papaya	148	2,228	15,050
3	Orange	62	626	10,100
4	Pine apple	315	4,340	13,780
5	Areca-nut	2,242	2,767	193
6	Coconut	167	937	51

Source : Directorate of Agriculture, Govt of Assam

Irrigation :

South-West monsoon is the chief carrier of rainfall in almost all the parts of Assam. It visits in the month May and continues upto August every year. These months account for more than 60.0% of the total annual rainfall. So the cultivators depend on the Rain God for their cultivation primarily during summer season. Agriculture suffers heavy damage due to excessive rainfall. Flood water is an annual feature and brings untold miseries to people. On the contrary some areas experience draught for want of water even during summer season. Irrigation facilities are yet to cover large areas. All 102.30 hectares have been enjoying the facility which is very meagre in terms of total area.

Table - 4
Irrigation potential utilized and targets or additional potential created in Lakhimpur District (97-98)

Sl No	Particular	Land area in hectares
1	2	3
1	Irrigation Potential Utilized during (1997-98)	102
1	During khariff season	92
2	During Rabi & pre khariff	10
2	Irrigation Potential Created upto 31 3 99	10,357
1	Minor	10,357
2	Major and Medium	Nil
3	Targets and for additional potential created during 1998-99	50
1	Minor	50
2	Major and Medium	Nil

Animal Husbandry :

Various types of livestock are found rearing by the household. Cattle, buffalo, ducks and goats are common to every household. The rearing of all sorts is not permissible to all. Sheep, pigs, horses, fowls are also reared mostly by all rural families.

People generally graze their animals in rice fields after harvest. During night animals and poultry are kept in sheltered sheds constricted for the purpose. Straw paddy is generally served to the animals.

Emphasis has been laid on giving nutritious food to the animals So cultivation of improved variety of fodder crops has been augmented by distributing free seeds and roots to the prospective farmers by the Government. The department of Animal Husbandry and Veterinary is taking keen interest in bolstering the rearing of animals by people in a big way. Preventive measures against common animal diseases have been extended by the govt machinery.

Table - 5

Live stock and poultry in Lakhimpur district as on 1997

Sl. No.	Livestock and Poultry	Numbers
1	2	3
1	Cattle	445,835
2	Buffalo	17,956
3	Sheep	285
4	Goat	106,694
5	Pig	88,482
6	Horses and Ponies	1,706
7	Fowls	387,210
8	Duck	204,166

Source : Statistical Handbook, Assam, 2000.

Fisheries :

Rearing of fish known as Pisciculture is becoming popular now-a-days. Formerly it was a profession of a particular caste. It was a taboo for people beyond this community. Now people belonging to all caste are seen carrying out this as a profession. Occupational shift has taken place in a large measure. Generally beel, river, swamp, forest district, pond and tanks are extensively used as fisheries, some of them are registered and others not.

Various kinds of fish are found. The river and beels contain varieties of breeds. The 11 Nos of registered beel fisheries and 8 Nos of registered river fisheries produced large quantity of fish and they are sent to other districts as well. As per report published by the department of economics and statistics Lakhimpur crosses the target mark in 1998-99. The target was set for production of 80 million numbers which was, however, baffled by producing 87 million in number. It was targeted for 6150 Metric tones but the achievement remained a little less than it was expected 6,086 metric tones

The types of fish found in the district are Rohu, Barali, Chital, Kaliajhora, Sol Kawai, Magur, Pavo, Puthi, Mowa etc.

Industries :

Tea industry :

The history of the tea industry in Assam dates back to the year 1826 when indigenous tea plants growing in the plains of Assam came to the notice of the East India Company. The cultivation of this plant was first introduced 1830 by the East India Company. It is mentioned in the Economic Development of Assam by P.C. Goswami that a tea garden was started by the Govt. in 1833 in the Lakhimpur district. On 1835 a few indigenous plants were taken from the forest at "Ningroo" bordering the Singphoe country and grown at "Koondilmukh"at Sadiya. A company was found in 1839 known as the Assam Company. This was the first Company in India to undertake the commercial production of tea and was the direct successor of the East India Company. The headquarters of this company was formed at Nazira and remained till the shifting to Calcutta in 1956.The Government garden was carried from 1840 to 1849. But due to certain difficulties, the garden was sold to a China man named "Among". This Chinaman failed to improve the garden. In 1851, through the instrumentality of Colonel Hannay who contributed much to the development of tea cultivation in the part of upper Assam. The early sixties of 19th century i.e. from 1859 to 1860 was a period pf steady boom. After this period the tea industry received a great setback. But this trend was checked by 1878. In 1881, the North India Tea Estate Owners formed the Indian Tea Association. The industry grew continuously till 1890 and thereafter it underwent through a depreciation for a short period but soon recovered from this state of affairs. The major improvements have been made in the yield of tea, in the grouping of gardens under a limited number of companies, in the progressive mechanization and rationalization of production and in increasing their efficiency of productivity of labour.

The Tokolai Reserve Station was set up at Jorhat in 1911 with a view to carrying on research on cultivation and manufacture of tea in Assam. This has been very useful in increase of yield rate of tea. In the year 1932-33, it is again met with severe crisis due to depression and over production of tea. This condition was tackled by enacting the Indian Tea Control Act, 1933 and by 1952 it reached an unprecedented prosperity. Recently the Tokolai Experimental centre had developed a machine

known as Rotorvane. It is a continuous processing machine for use in a continuous processing machine for use in a continuous system of manufacture.

The Guwahati Tea Auction Centre :

Marketing of tea has always been a great problem for the industrialists. Before opening of tea Auction Centre, at Guwahati, Tea Auction Centre, at Guwahati, Tea Auction Centre in Calcutta arranged for sale of Assam Tea Auction Centre, third of its kind in India started functioning at Guwahati from Sept. 1970.

Tea, which is subject to direct traction by way of excise duty, export duty and a user under tea Act, the industry makes substantial direct contribution to central Revenues. Besides, these taxes, tea industry is also subject to central income tax, sup

per tax (corporation) and agricultural income tax. Income tax along with sales tax levied upon it inflates the income of the state Government to a great extent.

Tea is the mainstay of the plywood industry. Tea grown in different parts of Assam is packed in the garden factories in plywood chests for dispatch. Tea estates require huge quantity of fertilizers for healthy growth of tea. Thus it gives a strong support to fertilizer industry also.

The labour force that engaged in the industry is bought mainly from Bihar, Madhya Pradesh, Orissa and Madras. The industry provides ample scope for employment from higher grade to lower grade workers. The tea estate in Assam is in different geographical size. It varies from small garden to large tea estates. The administration is also generally same from each other. The cell responsibility of a tea estate is vested on the Manager. He is the head of the estate. He is assisted by 2/3 Assistant Manager. The Assistant Manager are given separate responsibility such as production and supervision of garden and labours, financial affairs, stock and factory etc. each garden has a office in which there is a head clerk called "Borobabu" and he is assisted by some clerks and peon. Social services provided to its employees by hospitals urn by qualified medical officer and staff. Most of gardens have their ambulances to carry serious patient for better treatment outside the gardens.

A major part is playing in the economy of the district by tea. It provides ample employment to the people of the state. Lakhimpur district has 25 large size tea gardens with their factories. These gardens cover a total area of 4362 hectares land having production of 9131 thousand kgs in 1998. In addition to large gardens, there are 8 small growers with a registered area of about 32.6 hectares as on 31.10.1999.

Now a day, many youths of the district have come forward to grow tea in their own lands. Which provide job and also earn incomc.

Tea Industry in Lakhimpur district

Like other districts of Assam, Lakhimpur district is industrially backward. Public sector industry in the district is nil. However, the district is rich in the production of tea and this industry has been playing a vital role in determining the economy of the district. This is the oldest industry in the district. A substantial amount of the district economy is earned by exporting tea to foreign countries. The credit goes to the British who established this industry in the district in 1840. Now-a-days most of the tea industries are owned by native Indians. The undivided Lakhimpur district was fortunate to have as many as 25 tea gardens. After bifurcation the district, there are only a few tea gardens which play

a major role in respect of gaining economy and

employment

Collage Industry

Next to tea industry comes the cottage industry which is also playing a vital role from very old times. Pottery, black smithy, bamboo and cane works carpentry, weaving etc. are worth mention. Some of these industries are facing extinctions due mostly for want sufficient market and non-introduction of modern technical know-how. The government of Assam has been initiating for improvement of these moribund industries by way of extending all possible help and financial assistance. Assam small scale development corporation has taken up bold steps to revamp the sick and poor industries.

Trade and Commerce :

In the remote past there were no trade and commerce. Barter systems was the rule. Gradually departure of Barter systems was taken over by trade and commerce. This has evinced interest in the minds of people and become financially gainful. Although external trade was at the minimum, this system captured one and all. This was comparatively eased to a considerable extent with the availability of rail and road communication. Dhakuakhana sub-division of the district was, at one time, treated as a place of exile popularly known as 'Koliapani'. Now the face of the sub-division has undergone massive change and was upgraded to a civil sub-division.

Many local markets at center places have sprung up to carry on retail business of local product. Road communication has offered a fair chance to carry on. Paddy, rice, wheat, maize and tur, gram, lentil, peas, other rabi pulses are generally dealt in. Hats and Markets on daily or weekly basis are the main centers of trade. The presence of middlemen and tradesman from nearby district is significant in purchase and sell of products.

Banking :

There was a time when there were no banks yet it runs in a peculiar form. Village people used to deposit their cash with the moneyed trades men. Those people who were in need of hard cash to buy some essential, celebrate religions functions and marriages could procure loan from the rich tradesmen who, in turn, compensated the amount of loan by collecting the products produced by the household at the time of harvest. With the passage of time banking system has replaced the old order. All Nationalized banks have opened their branches in all vulnerable places and people keep cooperating with the systems. Moreover cooperative societies have come up in a big way to meet credit requirement n rural areas. Although the banks have prospective schemes and projects to render bank loans, the presence of moneylenders who charge exorbitant rate of interest is conspicuous predominantly in rural areas.

Table - 6

Position of Deposits & Credits of scheduled commercial Banks and Regional Rural Banks on *1999* December in Lakhimpur district.

Sl. No	Category of Bank	No of offices	Rs in lakhs Deposits	Credit
1	2	3	4	5
1	Scheduled commercial Banks	46	12,5,71	6,029
2	Regional Rural Banks	17	2,067	648
	Total =	63	14,638	6,677

Source : Statistical Handbook of Assam,2000.

Transport and Communication :

Not to speak of Lakhimpur district alone the entire North Eastern states experienced transport bottleneck in the past. Among the erstwhile districts of Assam, Lakhimpur district was lagging behind in respect of transport and communication. One had to make plans well ahead of time to visit a place within the district itself and that too during dry season only. During summer season it was unconceivable because of flood. But the district at par with the rest of the district of the State has seen the fair weather in respect of communication. Now the National Highways have touched each and every district which are again jutted with a network of pucca and gravel roads. As per statistics available for 1997-98 surfaced length of roads is 239 km and un-surfaced length is 783 km. Of these National Highways covers 98 km; state Highway 71 kms and other PWD Road 853 kms. Thus a direct link with the state head quarters has been established satisfactorily. All sorts of vehicular traffic are plying day and night.

In Lakhimpur district there are 199 Trucks, 173 Buses, 15 Taxis, 100 Auto rickshaws, 7458 Two Wheelers, 241 Cars, 9 Jeeps, 70 Tractors, 25 Govt. vehicles as per report published by district trade Statistics and Economics Govt. of Assam during the year 1998-99.

Electricity and Power :

These two words are synonymous. Both are inter-related. Generally by electricity we mean residential connections and by power we mean electric power supplied to Hydro power projects etc.

The development of agriculture as well as industry can not be accelerated without the availability of power. The use of electricity has become a part and parcel of modern life.

The district is achieving satisfactory progress in the attainment of electricity facilities. Out of total 1,166 numbers of villages 854 villages have electricity facility which registers more than 73% as on 31st March 1999.

The proposed Subansiri Power Project in collaboration with Arunachal Predesh is a happy augury for the entire North Eastern States.

Local Self-government :-

The origin of the Local self-government in the present context can be traced back to the British Administration then existed. The principle of local taxation as per regulation 13 of 1813 was the basic motive behind. During pre-British period some form of Local Self-government did exist. It, then, functioned in Namghars where all the disputes were settled.

The abolition of Local Boards was the result of promulgation of the Assam Panchayat Act. 1959

which came in to force from 1960. As a result the three tier Panchayat Raj was introduced. Eventually the three tier system was reduced to two tier system from 5th May,1973.

There are 81 Panchayats in the district as per statistical Handbook , Assam,2000. There are two Mahkuma Parishads in two sub-divisions. Both are functioning in urban areas only. The urban areas are again classified as Municipal Board and Town committee. With the exception of Guwahati being identified as Municipal corporations, all the towns in Assam fall either of the two classifications— Municipal Board and Town Committee. In Lakhimpur district there is one Municipal Board and one Town committee. North Lakhimpur town fulfills the criteria as Municipal Board and Bihpuria as Town committee. Municipal Board is headed by the chairman who is entrusted with the responsibility of implementation of schemes taken up the Board. Besides collection of revenue it levies taxes on holdings, rickshaws, cycles, carts, stalls markets etc

Social life:

The population of the district is consisted of all the major religions. The percentage of Hindus with 79.7% of the total population of the district according to 1991 census occupies the top position. The second place has been occupied by the Muslim 14.5%, followed by christians6.0%, Buddhist 0.2%, Janis 0.1%, Sikhs 0.1%, others 0.1% and religions not stated 0.03% people of the district, although profess different religions, practice patriarchal type of family. The departure of joint family system even in rural areas is common now-a-days. People celebrate their festivals at their own. There is harmony among the people. The caste distinction has been losing its earlier rigidity. Intercaste marriage is socially practiced. Widow remarriage is permissible under law but not socially practiced.

Structures and buildings are almost common to all. One could identify the family and its religion looking at the structure of the dwelling house, but such a scenario is never to be seen anywhere now. Majority of the dwelling houses was of temporary nature built of bamboo and thatch. This place has now been replaced by 'Assam Type Houses' and RCC buildings.

Dress habits cannot distinction among the population. One can be identified looking at the garments worn. Male dress and female dress are completely different. Males belonging to Assamese and Bengali community wear dhuti, kurta, shirt, kamij, trousers and coats. Muslim males generally wear lungi and Punjabi shirt. Females wear sari and blouse irrespective of all. But Assamese females wear Mekhela, Riha and Chadar. These are all traditional. But now-a-days wearing of shari and churiddar is seen in common.

Males generally do not wear ornaments except on special occasion and the ring is the only ornament. But females wear ornaments from head to foot by Bengali and Muslims Assamese ladies and young girls like neckless, bracelets, kharu, chain etc. exclusively made of gold.

Among the Hindus Durga Puja is observed colorfully. This is very much expensive. Hindus generally celebrate many pujas during the year. Mention may be made of 'Siva Ratri' , Douljatra and Bihus. Muslims observe Id-Ul-Zaha, Muharram, Fatiha-I-Duazdaham and Id-Ul-Fitre.

The Namghar is completely an Assamese prayer hall. Namkirtan is perfumed on selected occasion apart from lighting of earthen lamp daily. Morning and evening prayer is done with utmost solemnity and due credence to the lone Vaishnavite saint Sri Sri Sankardeva.

The local and mostly indigenous games and pastimes of the Assamese have been replaced by the western games and sports. Football and volleyball are now nowhere to be seen even in rural areas. In its place cricket is seen in common everywhere. Indoor games such as carom, cards, chess, ludo etc. have been a household one.

****

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a houschold industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the

servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites: (a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing

so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo

7 Mech

8 Miri

9 Rabha

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such

professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work; priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR):

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (USMR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too

were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with

10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 889,010 in 2001 Census. Male comprises 455,691 while female consists of 433,319. Out of the total population of the district, 823,857 fall under rural and 65,153 are under urban areas of the district. In rural areas 421,021 and 402,836 are males and female respectively. Accordingly 34,670 and 30,483 are males and females respectively in urban of the district. The percentage of urban population in the disrict Lakhimpur is only 7.32 . The district is a rural base place in which 93 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +18.3 which is lower than the state rate. In the district, there are only 2 towns . North Lakhimpur Town is only town with Municipal Board and one town is with Town Committee status. The density of the district is 390 persons per sq. kms. which is higher than the state density (340). The sex ratio in the district is 951 as against 935 in the State. Out of total population of the district, 56 % is total workers of which 61.8 % and 49.9 % are male and female respectively. The percentage of non- workers is 44.0% in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 43.0 %, 22.5 %, 3.6 % and 30.9 % respectively.

The literacy rate is 68.6 % in the district of which 77.1 % is for males and 59.6 % is for females. The district literacy rate is above the state literacy rate (63.3)%.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

District Total:		**751,517**	**702,387**	**49,130**	**889,010**	**823,857**	**65,153**	**18.3**	**17.3**	**32.6**	**6.5**	**7.3**

INSET TABLES

As per Census of India 2001, the total population of Lakhimpur District is 889,010 with 65,153 in urban and 823,857 in rural area. North Lakhimpur Revenue Circle is the biggest Circle with 217,048 population and Subansiri (Part-I) Revenue Circle with 51,262 population is at the bottom of the list of Revenue Circles. Decadal variation of population in 1991-2001 in the district is 18.3 which is lower than the state rate of 18.9 .The growth rate of Bihpuria, Kadam and North Lakhimpur Revenue Circles are higher than that of the state growth rate. The growth rate of urban area is higher than the rural areas.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / CD Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

Out of 1,170 villages of the district, the number of inhabited villages is 1,139 which are located in 9 CD Blocks. In the District, Karunabari CD Block has the highest population 137,409 persons. On population basis; Bihpuria CD Block with 35,721 population is the smallest CD Block in the district .The highest numbers of villages 201 are under Narayanpur CD Block. Bihpuria CD Block records of having the lowest number 61 inhabited villages. The highest number of inhabited villages 358 or 31.4 is noticed in the population range of 500-999 followed by 354 or 31.1 % in the population range of 200-499. However, there is no village having more than 10,000 population

TABLE : 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town
1
(a) New
(i) Statutory town
1
2 NIL
3
(ii) Census town
1 NIL
2
3
(b) Denotified
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns
1
2 NIL
3
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria
1
2 NIL
3
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census
1
2 NIL
3
(c) Declassified
1
2 NIL
3
(d) Wholly merged with other town(s)
1
2 NIL
3

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

No any case of above-mentioned categories is existed in the district.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	11	1.0	142	0.0
11-20	9	0.8	253	0.0
21-50	18	1.6	782	0.1
51-100	61	5.4	9,998	1.2
101-200	143	12.6	47,162	5.7
201-300	204	17.9	114,055	13.8
301-500	284	24.9	203,940	24.8
501 +	409	35.9	447,525	54.3
Not known	0	0.0	0	0.0
District Total:	**1,139**	**100.0**	**823,857**	**100.0**
Population Density (Rural) of the district:		**412.2**		

INSET TABLES

Out of 823,857 rural population of the district, 447,525 population or 54% hailing from 409 villages live in these villages where population density is 501+ per square kilometer. In the range of population density 0-10 (per sq. km), there is 11 villages having 142 population only. 9 villages with 253 population have density in the range of 11-20. Detail can be seen in the table itself.

TABLE- 5 : SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			Sibsagar		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	863	863	-

1981	—	—	—	—	—	—
1991	923	934	838	931	941	801
2001	935	944	872	951	957	879

Sex ratio in the State has improved both in rural and urban areas during the last decade. It increases from 923 in 1991 to 935 in 2001. The sex ratio in the district during the Census of India 2001 follows the same trend and sa a result it increases from 931 in 1991 to 951 in 2001. At rural level the sex ratio is noticed that it increases to 957 in 2001 from 941 in 1991 and similarly in urban also sex ratio has gone up from 801 in 1991 to 879 in 2001 in the district.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Narayanpur	949	949	
2	Bihpuria	950	955	887
3	Naobaicha	958	958	
4	Kadam	956	956	
5	North Lakhimpur	930	948	878
6	Dhakuakhana (Part-I)	978	978	
7	Subansiri (Part-I)	968	968	
District Total:		**951**	**957**	**879**

Out of 7 revenue circles of the district these are two urban units located in Bihpuria and North Lakhimpur Revenue Circles respectively. Among 7 revenue circles, sex ratio of Naobaicha, Kadam, North Lakhimpur, Dhakuakhana (Part-1) and Subansiri (Part-1) revenue circles are higher than the sex ratio of the District. Dhakuakhana (Part-1) with 978 female per 1000 males is top in the list of circles in sex ratio while Narayanpur Circle shows the lowest sex ratio of 949. Urban sex ratio in Bihpuria Revenue Circle is the highest with 887 among two urban areas.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D Block	Sex ratio
1	2	3
1	Narayanpur	949
2	Karunabari	954
3	Bihpuria	955
4	Nowboicha	959
5	Boginodi	955
6	Ghilamora	967
7	Lakhimpur	937
8	Telahi	963
9	Dhakuakhana	978
District (Rural) Total:		**957**

At CD Block level, Dnakuakhana (Part-1) CD Block has the highest sex ratio of 978 among the C D Blocks of the district. It is higher than the district rural sex ratio of 957. BLakhimpur C D Block has recorded the lowest 937 females against 1000 males among all C D Blocks of the distric. Sex ratio in 4 CD Blocks are higher than the district sex ratio while the sex ratio of the other 5 CD Blocks are lower than the district level rural sex ratio.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	20	1.8	2,829	0.3
700-749	5	0.4	1,358	0.2
750-799	13	1.1	4,123	0.5
800-849	52	4.6	22,172	2.7
850-899	140	12.3	102,059	12.4
900-949	265	23.3	217,182	26.4
950-999	307	27.0	284,059	34.5
1000-1099	270	23.7	171,596	20.8
1100+	67	5.9	18,479	2.2
District Total:	**1,139**	**100.0**	**823,857**	**100.0**
Sex ratio (Rural) for District:			**957**	

The sex ratio at village level by range, it is found that most of the villages are having sex ratio of 900+. Out of 1,139 inhabited villages in the district, 909 villages come under the sex ratio range of 900+, 20 village records sex ratio below 700 while 5 villages come under sex ratio range of 700-749. In 67 villages, females are found more than males.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Bihpuria (TC)		887
2	North Lakhimpur (MB)		878
Sex ratio (Urban) for the district:			**879**

Urban sex ratio of the district as per Census of India 2001 is 879. Out of two towns of the district, North Lakhimpur MB has shown the lowest 8978 sex ratio in the district. The other town has been recorded sex ratio little higher than that of the district sex ratio.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Total workers which include Main workers and Marginal workers in the District are 56.0 percent of the total population. The percentage of male workers, however are higher in category of Main workers whose percentage is 44.9 percent. The female non-workers dominate the non-worker males with a record 50.1 percent. Marginal workers are more in the district numbers approximately 2 lakh with a percentage of 23.6 percent. Among the tahsils, Narayan Revenue Circle records the highest percentage of Main workers with 37.7 percent and Subansiri (Part-1) Revenue Circle records the lowest proportion with 21.4 percent. In the category of non-workers, however Dhakuakhana (Part-1) Revenue Circle shows the highest percentage with 56.8 percent and Narayanpur Revenue Circle shows the lowest with 30 9 percent. The female Marginal workers in Kadam Revenue Circle shows the highest proportion of 41.4 percent and Dhakuakhana (Part-1) Revenue Circle shows the lowest with 20.6 percent among the tahsils.

District (Rural) Total:		**Persons**	**823,857**	**266,378**	**32.3**	**207,479**	**25.2**	**473,857**	**57.5**	**350,000**	**42.5**
		Males	**421,021**	**186,758**	**44.4**	**75,842**	**18**	**262,600**	**62.4**	**158,421**	**37.6**
		Females	**402,836**	**79,620**	**19.8**	**131,637**	**32.7**	**211,257**	**52.4**	**191,579**	**47.6**

Out of total 823,857 rural population of the District, 57.5 percent are found to be Total workers. In further breakup of workers 32.3 percent are Main workers and 25.2 percent are Marginal workers. Here the male workers numbering about 262,600 persons or 62.4 percent is higher than the female workers whereas the female non-workers dominate the non-workers section with 47.6 percent. Among the CD Blocks, in case of percentage of the Main workers, Bihpuria CD Block stands in the highest position with 45.0 percent and Ghilamora CD Block has the lowest 23.8 percent. However in non-workers, Dhakuakhana CD Block is recorded the highest percentage of non-workers with 56.8 percent and Bihpuria CD Block has the lowest position with 27.9 percent among all the CD Blocks.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Note: Percent of Worker to total worker are given in brackets

Out of 497,745 total numbers of workers in the District, four category of workers are categorized as (a) Other Workers having 22.6 percent, (b) Cultivators with 68.0 percent, (c) Agricultural laborers with 7.0 percent and (d) Household Industry Workers with 2.4 percent. In male-female breakup it is noticed that in Other worker's categories, male workers are more than female workers in terms of numbers of persons and percentage. In case of Cultivators though females workers are less than males workers in number but the percentage is more than males. Again in respect of female Agricultural labourers and Household Industry workers are more in number and percentage than males workers.

				(52.4)	**(77.3)**	**(8.5)**	**(3.6)**	**(10.7)**

Note Percent of Worker to total worker are given in brackets

Economic activity of the rural people of Lakhimpur district is shown in the table in four different categories of workers. Out of 473,857 total numbers of workers in the rural of the District, a large number of persons take cultivation as Main work and thus constitutes 71.3 percent followed by other works with 19.2 percent. The other category of workers, Agricultural labourers record 7.2 percent. There are few people in the district who took household Industry either as Main work or as Marginal work and the percentage of such workers shows 2.2 percent. The male workers in Cultivators and Other worker's categories are more than the female workers in terms of absolute figures and percentage. In all 9 CD Blocks of the District, people are found to be engaged in all four categories of work and largely in Cultivation.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Serial number	Name and urban status of UA^ / Town*+	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

In rural of District, the types of amenities available in the village are mostly Education, Improved Drinking Water and Power supply. Out of 1,139 inhabited villages in the District, 91.8 percent or 1.046 villages are having access to education and 95.7 percent or 1.090 villages in the District are having access to Improved Drinking Water. Power supply to 59.7 percent or 680 villages are available. However, percent of villages having access to other facilities are low in the District. Only 18.5 percent villages are having access to medical amenity. Very few villages are having Telephone facilities with only 3.9 percent. The other amenities like Banks and Agricultural Credit Societies are not available in most of the villages. The percentage of villages recorded as 3.6 percent against having access to Banks. Whereas the percent of villages having access to Agricultural Credit Societies is more than some amenities. Amenities like Telephone; Agricultural Credit Societies are not available in villages of some CD Blocks of the District. Detail in respect of amenities in CD Blocks can be seen in the table itself.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The rural population in District by and large are having access to Education, Improved Drinking Water and Power supply. The percentage distribution of the people having access to Education records 96.4 percent. Those having access to Improved Drinking water records 96.8 percent and those having access to power supply is 69.2 percent. The number of people having access to Medical Amenities are very few, Out of 823,857 population in the District, 226,433 persons or 27.5 percent are having access to Medical amenities. However, 36.2 percent population are having acccss to Transport Communication and 66.9 percent are having access to approach by Pucca Road. People having access to Post office forms only 28.4 percent and those having access to Telephone forms only 6.2 percent from the total rural population. Most of the rural people in the District do not have access to Banks and Agricultural Credit Societies amenities. Some CD Blocks in the District are not having amenities like Telephone and Agricultural Credit Societies.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	89	2	2	93
(b) Middle School	378	33	31	442

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The table indicates that out of 517 villages having population in the range of 1-499, 444 villages have educational facility. It means that 73 villages have no educational facility. Hence it can be said that educational facility generally is not available in more villages where inhabitants are less. The villages having population in the range 1000- 1999 have enjoyed educational facility by all villages except one village. The medical facility is availed by 47.4% villages having 2000-4999 population. In respect of all other facilities availed by the villages also except Telephone, Bank and Agricultural Credit Societies facilities, more villages have population in the same range.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Narayanpur	201	31,538.7	70.6	3.4
2	Karunabari	106	22,390	70.5	0
3	Bihpuria	61	11,377.66	55.7	2.1
4	Nowboicha	134	22,660	79.3	0.9
5	Boginodi	153	22,794	82.6	0.3
6	Ghilamora	103	21,919	69.3	0.2
7	Lakhimpur	118	19,077	82.8	5.5
8	Telahi	106	14,743	78.8	12
9	Dhakuakhana	157	33,348	59.5	0
District Total:		**1,139**	**199,847.36**	**71.9**	**2.4**

Note : - Cultivable area = irrigated area + unirrigated area

The distribution of number of villages, total area, percentage of cultivable area and percentage of irrigated area among CD Blocks are shown in the table. Out of total area of district Lakhampur, 199,847 hectares are in rural areas of the district and 71.9 percent is cultivable area to the total land of which 2.4 percent is irrigated land. Among the CD Blocks 82.8 percent cultivable land being the highest is noticed in Lakhimpur CD Block. The highest 12.0 percent-irrigated area is in Telahi CD Block followed by Lakhimpur CD Block with 5.5 percent in the District.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Bihpuria (TC)	6.6	0.4	6.3	8.5	5.9	0.1	2.3	0	0.2
2	II North Lakhimpur (MB)	7	1.3	5.7	14	3.7	3.1	0.7	0	6.5
District Total		**6.9**	**1.2**	**5.8**	**13.1**	**4**	**2.6**	**1**	**0**	**5.4**

The Municipality Finance of the town shows that per capita receipt is Rs 6.9 for urban area of the District while per capita expenditure is Rs 13.1 which is higher than per capita income. Per capita income and expenditure are higher in North Lakhimpur MB than Bihpuria TC .

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bihpuria (TC)	5.5	7.4	4.6	1.8	1.8
2	North Lakhimpur (MB)	3.1	2	1.3	0.4	0.6
District Total		**3.5**	**2.9**	**1.8**	**0.6**	**0.8**

In average the number of Primary institution is 3.5 per 10,000 population and 2.9 is Junior Secondary/Middle school. Only 1.8 number Secondary/Matriculation schools per 10,000 population is in the district. The Senior Secondary and Colleges are recorded 0.6 and 0.8 number respectively in the district per 10,000 population. Only junior secondary/middle school is more in Bihpuria TC than other amenities.

INSET TABLES

TABLE : 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bihpuria(TC)	18
2	North Lakhimpur(MB)	105
	District Total	91

In average the number of beds in the urban areas of the district is 91 per 10,000 population. North Lakhimpur MB with 105 beds is higher in number to Bihpuria TC with 18 beds only per 10,000 population.

TABLE : 46
PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Bihpuria T.C.	10,868	0	0
2	North Lakhimpur M.B.	54,285	13,567	25
	District Total	**65,153**	**13,567**	**20.8**

The table 46 gives the proportion of slum population in towns. Out of the total district urban population of 65,153 persons, 20.8 percent people live in slum area. Between the two towns in the district, North Lakhimpur MB constitutes slum population with 25.0 percent and the other town has no slum population..

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bihpuria (TC)	Handloom	Rice
		Bamboo Products	Mustard Oil
		Cloth	Muga
2	North Lakhimpur (MB)	Nil	Rice
		Nil	Paddy
		Nil	Jute

The most important commodity exported out of and manufactured in towns are shown in the table along with the name of commodities. Bihpuria town manufactures Handloom, Bamboo Products and cloth and other Town has not produced any product. Similarly Bihpuria TC exports rice, mustard oil and muga and Noryh Lakhimpur MB also exports rice, paddy and jute.

TABLE : 48 HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table indicates the number of households who have availed banking services and the number of households having some specified assets that shown in the table. Out of the total 157,752 households of the district, 30,402 households have availed banking service. The banking service availed by the households in the district is more in rural areas. It is only 6,713 households in urban areas of the district. In Revenue circle level, the banking services availed by the households are found more in North Lakhimpur Revenue Circle than other Revenue Circles.

Availability of all assets as mentioned in the table are found more for the households of North Lakhimpur Revenue Circle.

(ix) Major social and cultural events, natural aqnd administration developments and significant activities during the decade.

The Festivals both religious festivals and special festivals are celebrated in Lakhimpur district with great enthusiasm and high spirit. The people irrespective of sects and beliefs exchange greeting to one another. Puja feast, Bhaons and singing parties are the principal theme and amusement of the people both in uraban and rural. All festivals are celebrated in high esteem in all pandals throughout the district

The puja once celebrated by Hindu by followers of particular sect is now a festival of all Hindu in the district It is usually observed in the month of September or October every year and lasted for four days. Durga puja is not just religious festival but also an occasion to foster the spirit of togetherness and peace among people. A week before the starting of puja, a religious ceremony is performed which is known as Mahalaya and since this day all other preparation of the puja starts vigorously. Puja pandals are crected in various centers in the district by different puja committees. The image of Goddess Dugra is installed ceremoniously on the puja pandal so that faithfuls can easily adore and worship the Goddess Durga. In these four days, people throng the puja pandals to invoke the bliss of Goddess Durga. Finally the festival comes to end and the image of Goddess Durga is ceremoniously immersed into pool or river. Other religious festivals in the district like Sivratri, Doljatra, Kalipuja etc are also performed in several places of the district with great joy and fervour.

The major social and cultural events of Assam is Bihu festival. The origin of Bihu festivities, dance and music is shrouded in mystery. It is opined that the se festivities are a popular relic of the distant Austro Asiatic civilization. They gave primary importance to agriculture. The Austro- Asiatic dance festival connected with the harvest season is a popular social event. They were the inhabitants of the Brahmaputra valley before they come into contact with the Aryan civilization. There had been natural fusion of Austro- Asiatic with the Arayan and Dravidian civilization. Assam's society did retain strong influence of the Austro- Asiatic civilization. A very rice folk music has developed through the centuries around the Bihu festivities. These songs are the most cherished heritage of the Assamese people. The theme of songs is love and nature. They are mostly in couplets. Bihu is celebrated by the people of Assam from the days of yore. The Ahom kings during their rule, they enjoyed Bihu and patronized it for its development and got it prevalent shape and form.

Bihus are of three kinds. These are Magh or Bhogali Bihu, Bohag or Bhogali Bihu and Kati or Kangali Bihu. Magh Bihu is observed to celebrate the harvesting of grain. It is usually performed on the 14th and 15th January of each year. It is called Bhogali Bihu because the granary of each cultivators are full with rice and out of which various kinds of food items are prepared by the housewives. These food items like chira, pith(cake) are taken at the day of Bihu and also offer to the relatives and guest. The first day of Magha Bihu is called Uruka, on this day various ritualistic procedures are observed by the people. Bohag Bihu is observed from the last day in the last month of Assamese calendar Chaitra and continue for few days from 1st day of Bohag. The first day of this Bihu is meant for cows and it is called Garu Bihu. The cows are made a good wash in rivers or ponds and they are put garland made of brinjal and water gourd. New pagha (rope for tying cow) are used replacing old one. The shed is given with smoke to prevent evils. The cows are treated as Lakshmi for cultivation. The next day is called Manuh Bihu(mankind). This Bihu is also performed with various ritual way. The preparation of various food items is an important part of the Bihu. Bohag Bihu augurs the wish for a good harvest because this is the time when cultivators start sowing. The Rangali Bihu is a spring festival of dance and music. It is celebrated at a time when nature opens out in tight, beauty and colour. Bihu dance are a superb expression of a vigorous art. Dhol, Gogona, Pepa and Toka are the main instruments used in dance and music. Bihu festivities and dance are the expression of genuine folk joy. As a spring festival it devotes mostly to the advent of the agricultural season. In this season monsoon brings the earth to a state of fertility. The Bihu dances are a kind of fertility ritual having emotional instincts of the heart. The dances depict the exuberance of youth. It is the preponderance of romance and sex. Bihu is a popular social event which closely associated with dance and song. Kati or Kangali Bihu is celebrated to welcome Lakshmi (the Goddess of wealth and

prosperity). This Bihu is observed when the granary of each farmers is empty and hence it is called Kangali Bihu. All these three Bihus are observed in Lakhimpur District from ancient days. Now it has gained much importance and observed with much pomp and grandeur. Bihu is not only ban annual festival among Assamese people but it is a festival to promote unity and love among different castes and creeds. Bihu is now regarded as National festival.

During the rule of Ahom kings, wrestling of Buffaloes, Cock Hen, Bulbuli birds etc. are organized and enjoyed these by sitting in the corridor of Rangghar. The Buffaloes wrestling is sill prevalent in this district. This wrestling performs in Magh Bihu. It is very interesting to observe in open field, the wrestling of Buffaloes is conducted and it continues about half an hour. The defeated Buffalo has immediately fled way from the field and winning Buffalo has been rewarded with cash or kind. The wrestling of birds is almost disappeared from the region due to lack of trained birds.

The Muslims observe their own festivals. The Christians also celebrate their related festivals. The tribal people of the district perform their all traditional functions. The major and cultural events observed by Miris are Ali-ai-ligang, Porag and Dabur. These are connected with sowing and harvesting of crops observed with their dance and music annually with much pomp and joy.

No such remarkable natural and administrative development has been taken place in the district in the district for which mention can be made. Some significant activities have been undertaken by the government of Assam at a moderate scale during the decade in the district for its all round developments.

(x) Brief description of place of religious, historical and archaeological importance and places of tourist interest in the district

The erstwhile Lakhimpur district has a good number of religious institutions which date back to the remote past. The very name of the district, as has been told earlier is associated with Lakshmi.

Badula Atar Than: It is a sacred 'Than' built in memory of Badula Ata, a propagator of sankari vaishnavism. It is situated at Narayonpur. People propagating Mahapurushia sect are the regular visitors.

Basudeve Than: Naruwa Satra popularly known as Basudeve Than is situated near the Champara river in Gohaingaon mauza. The big image of Basudeve is significant. It is carved in Black stone. The king Jayadhawaj installed this image bringing it from Kundil (Sadiya).

Bathowati Dol: The Devalaya is situated at a distance of about two kms South-East of North Lakhimpur town. The idol of Devi in the temple is the chief attraction. The temple is in a dilapidated condition and will lost its existence if the work of repair to preserve it is not taken without loss of time.

Bormahara Satra: It is situated at about 3 kms to the west of North Lakhimpur town.

Buddha Bapuchang: This is located at Gosaibari in Narayanpur Kherajkhat Mauza. Buddhist pilgrims visit it from even Burma and Ceylon.

Deka Than: It is a sacred place and is visited by both Hindus and Muslims. It is situated at Dhakuakhana village.

There are no places and monuments of historical and archaeological importance in the present district of Lakhimpur.

xi) Major characteristics of the district contribution of the district in the form of any historical figure associated with the district.

The undivided Lakhimpur district had comprised present Lakhimpur and Dibrugarh District of Assam. The undivided Lakhimpur district was very important from point of history. It is evident that the undivided district of Lakhimpur had been a doorway to the plains of Assam in early times when the tribes of the Mongoloid stock migrated through the steep hills of Arunachal Pradesh.

The district of Lakhimpur must has formed a part of the old kingdom of Pragjyotishpur during the time of the Varman rules of Assam. Various accounts say that the Bhuyans had only a few kingdoms in North Lakhimpur area, such as Lakhimpur, Bihpur, Narayanpur, Dhalpur etc.

In Moamaria rebellion a person from Lakhimpur who is said to have raised a standard of revolt styled himself as Gobha Raja. A person named Jabar from Lakhimpur was the originator of Panimua Conspiracy in 1802 A.D. Lakhminarayan ruled over the eastern part of Lakhimpur. It is believed that the name of the district christens after him. It was after the annexation of the Matak country and Sadiya by the British in 1842 and addition of the territories to the Lakhimpur district that its headquarters were transferred from Lakhimpur to Dibrugarh in the Matak country. From that year Dibrugarh continued as the district headquarters of Lakhimpur district till its bifurcation in October, 1971.

During the time of the Burmese invasion, Burmese soldiers camped in Maghnowa temple and used to slaughter cattle inside the temple. They demolished the Dol. In order to save the image, the priests of the Dol had thrown it into a beel. Under the British rule, the dol was reconstructed and placed a new Dol. But after same year, the original image was recovered by the fishery men in the beel of Narayanpur of Lakhimpur. As the Burmese had made the old temple impure so the priests established the image at Kalabari. The people call it Barkalika than.

Lakhimpur district is famous for satras established by Vaishnava saints. Satras are the major characteristic of the district and it provides a well known contribution of the district which form as historical figure. The Vaisnvitee saints Mahapurush Madhab Deva was born in Lateku pukuri a place between Kasikata and Rangajan 10kms from Narayanpur. North Lakhimpur, the district headquarters is also an important historical place. It was named Lakhimpur after Lakhmi the daughter of Arimatta. Harmati nagar of Lakhimpur district is believed to the wife Harmati of the Raja of Pratappur in Darrang district and in whose memory, the son Arimatta built this place giving the name as such.

Naharani than, Gharmara Satra, Bormahara Satra etc. are other Satras which make the history for the district as a religious place as a whole.

The district produces many authors, artists, scholars, sportsmen, freedom fighters, social workers etc. The contributions given by them in different fields have immense value in each field and the people of this district can not forget them in days to come.

(xii) Scope of Village Directory and Town Directory - Column heading wise explaination and coverage of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census

Village Directory However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market / hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational *and cultural facilities, 1999.*

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of respective jurisdiction.

Part A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendixes.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.
Appendix-III	It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

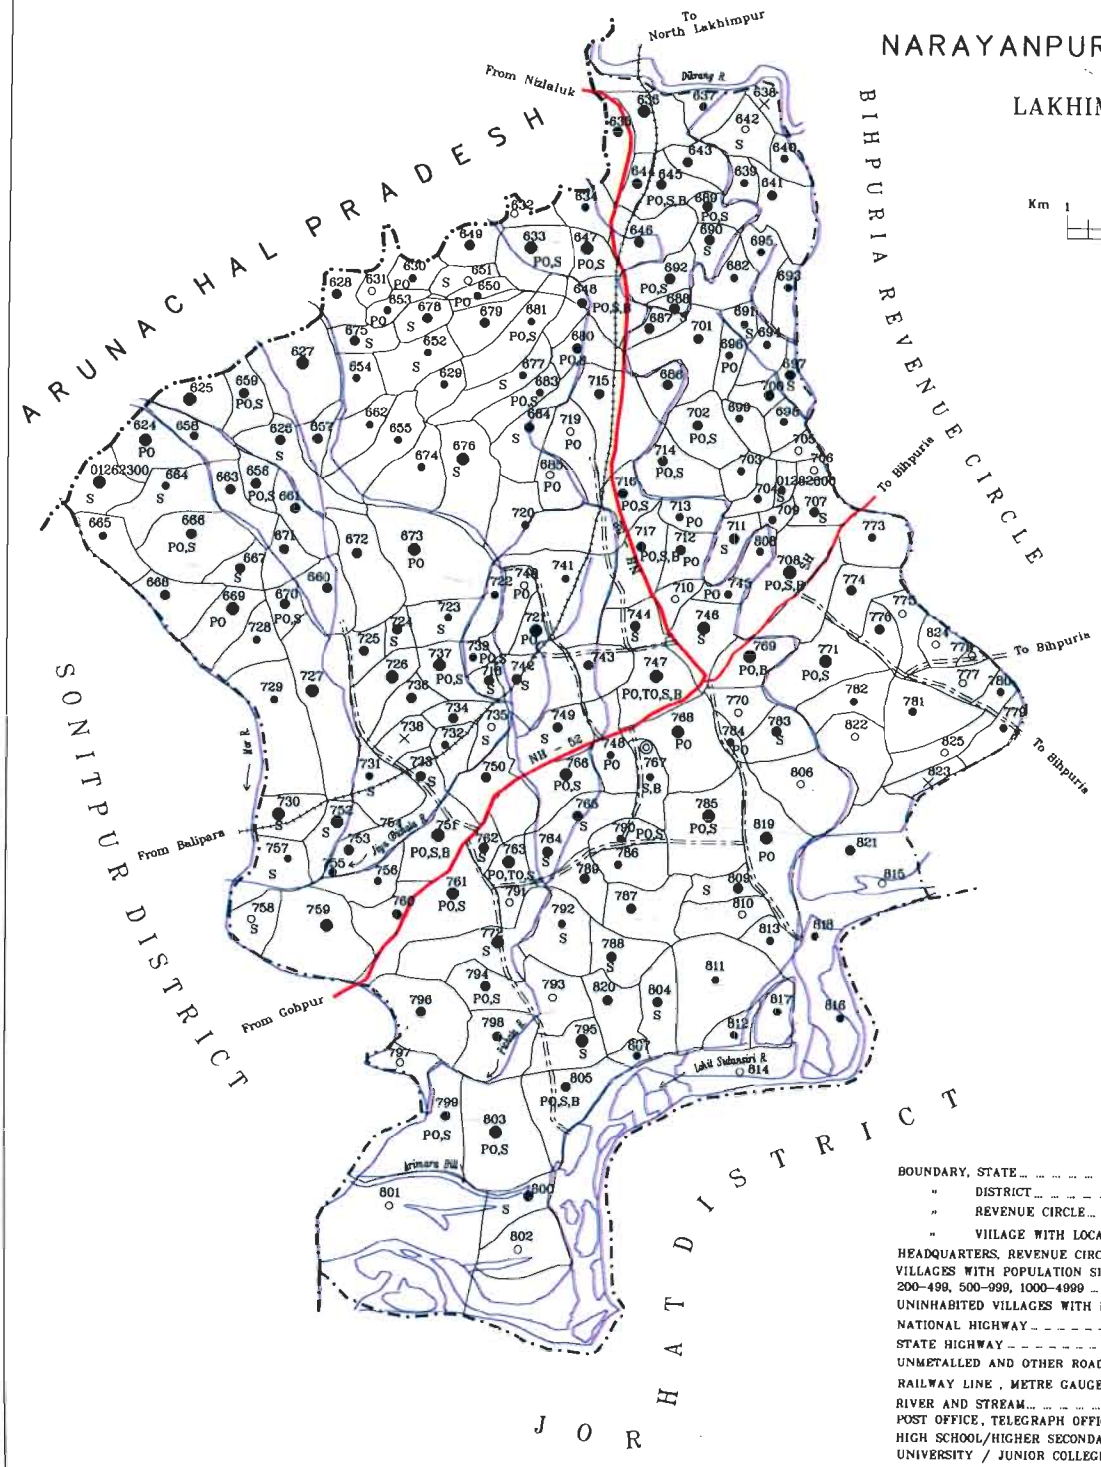

List of villages merged in towns and outgrowths at 2001 Census

There is no above case in Lakhimpur district.

(Data is not available for this apendix)

Section II - TOWN DIRECTORY

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	*Hospital*	*H*
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type,it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, *Teacher's Training Institute, Music/Dance School,* Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

STATEMENT - I
Status and Growth History

Part B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES

Annexure I:- Number of villages under each Gram Panchayat

(Data is not available)

Annexure II:-Notes on fertility, mortality and migration, 1991 Census

Fertility, Mortality and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.

In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever married women and the last question was to only currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining of the Assam State and are defined as below.

Age specific Marital Fertility Rate (ASMFR)

This is the average number of children born alive during the last year per married women of a particular age group.

Age specific Fertility Rate (ASFR)

It is the average number of children born alive during the last year per woman of a particular age group.

General fertility rate (GFR)

GFR is the number of children born alive during the last year per 1000 women in the age-group 15-49.

General Marital Fertility Rate (GMFR)

This is the number of children born alive during the last per 1000 married women in the age-group 15-49.

Total Fertility Rate (TFR)

It is the total number of children that would have born alive per women, had the current schedule of age specific fertility rates been applicable for the enter reproductive period.

Total Marital fertility Rate (TMFR)

This is total number of children that would have been born alive per married women, had the current schedule of age specific marital fertility rate been applicable for the entire reproductive period.

Child- Women Ratio

It is the number of children in the age-group 0-4 years per 100 women in the age group15-49 (Detail on various measures are included in non Census concepts)

Annexure – III : Various measure of fertility and mean age at Marriage, 1991 Census

Fertility:

As seen through various indicators of fertility in the district, Lakhimpur, it may be seen that the GER of 149, GMER of 211 TRR 4.7 and TMFR, 6.8 against the respective figures at stat level are at 135, 190 4.2 and 6.0. Various measures of fertility and other fertility related data are presented in the following Annexure.

TABLE–I

Various measures of fertility in Assam State and Goalpara district-199 Census

	Fertility Measure	Goalpara district	Assam state
	1	2	5
1.	G.F.R.	149	135
2.	G.M.F.R.	211	190
3.	T.F.R.	4.7	4.2
4.	T.M.F.R.	6.8	6.0
5.	Crude Birth Rate	34.1	31.5
6.	No. children ever born per woman in age group 45-49	5.1	5.2
7.	Mean age at marriage	18.0	18.3
8.	Child-woman ratio(0-4)	584	575
9.	Child-woman ratio(5-9)	798	735

The level of fertility for all measures are found high except measures mentioned in serial number 6 and 7 in the district than that of the state. As the higher crude birth rate means less conscious about family planning in the district.

TABLE - II

Distric wise various measures of fertility and mean age at marriage, 1991 Census

State/District	GFR	GMFR	TFR	TMFR	CBR	No. of children ever born per ever married woman in age-group 45-49	Mean Age at Marriage of currently married women
1	2	3	4	5	6	7	8

22.Hailakandi	136	196	4.2	6.4	32.1	5	18.2
23.Cachar	137	190	4.1	6.1	32.6	4.5	18.5

Mortality:

The mortality figures in the district confirms to the general theory of relation between fertility and mortality. The mortality data are shown in the following Annexure.

TABLE – III

Age Specific Marital Fertility levels in Assam State and Lakhimpur district – 1991 Census

Age Group	Lahimpur district			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0.173	0.173	0.178	0.151	0.152	0.133
20-24	0.239	0.245	0.174	0.214	0.219	0.165
25-29	0.203	0.206	0.164	0.183	0.192	0.12
30-34	0.149	0.15	0.133	0.134	0.14	0.093
35-39	0.09	0.09	0.083	0.087	0.094	0.042
40-44	0.041	0.04	0.064	0.049	0.052	0.022
45-49	0.043	0.046	0	0.033	0.034	0.025

The Age Specific Martial Fertility rates are found higher in all age groups except in 40-44 in the district total them the state levels similarly in rural areas, it is higher in all age groups except in 35-39 and 40-44 in the district like wise in urban also it is high in all age groups in the district than the state.

TABLE– IV
Estimates of Child Morality in Assam and Lakhimpur district, 1991

Mortality measure	Lakhimpur district	Assam State
1	2	5
Q(1)		
Persons	112	92
Male	138	96
Female	104	87
Q (2)		
Persons	114	101
Male	114	104
Female	116	98
Q (3)		
Persons	115	104
Male	114	106
Female	110	101
Q (5)		
Persons	125	116
Male	120	118
Female	130	115

Q (1) of the above table shows the infant mortality rates and Q (2) , (3) and (5) indicate the size of child mortality in age group 2,3,and 5 years respectively. It is seen in the above Annexure that the mortality rates in Lakhimpur district are higher in the district than that of the state averages. It can therefore be said that the health state in the district is not data factory.

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 and 2001 Census.

The detailed data may be seen below in the following table V and VI.

TABLE-I
Percentage Distribution of migrants by place of birth- 1991 Census, Assam

	Total Migrants			From other Districts			From other States			From other countries		
State/District	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

	4.1	7.7	2.8	2.0	3.8	1.4

From the above table it is seen that migrants from elsewhere in the district out side the place of enumeration consists of 71.8%, from the other district it is 22.1%, from state it is 5.3% and from other countries it is 0.8% of the total migrants.

Annexure V : Brief account of main religions in the district/ tahsil as per 1991 and 2001 Census.

Religion:

A brief account of religious composition of the population in the district along with state is presented in the following table.

TABLE - I

Main Religions in the Lakhimpur district and Assam state 1991 Census

District/State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Assam	Total population	22,414,322	100	88.9	11.1
	Hindu	15,047,293	67.1	86.2	13.8
	Muslim	6,373,204	28.4	94.7	5.3
	Christian	744,367	3.3	96	4
	Buddhist	64,008	0.3	93	7
	Jain	20,645	0.1	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8
Lakhimpur	Total population	751,517	100	93.5	6.5
	Hindu	598,946	79.7	94	6
	Muslim	109,010	14.5	82.7	11.3
	Christian	30,401	4.1	98.3	1.7
	Buddhist	12,264	1.6	99.7	0.3
	Join	404	0	80.4	19.6
	Sikh	412	0.1	25.7	74.3

The figures in the above table show that compared to the state as whole the proportion of Hindus is more in the district. The Muslims who constitute about 28.4% of total population at State level but in the district their percentage is only 14.5% Christians consists 4.1% as against 3.3% at State level, which is also on lower side. However Buddhists and Sikhs though are negligible in number but in the district Buddhist share is relatively more compared to the state averages.

TABLE-II

Main Religions in the Lakhimpur district and Assam state - 2001 Census

District/State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%
1	2	3	4		5		6
Assam	All Religions	26,655,528	100	23,216,288	87	3,439,240	13
	Hindus	17,296,455	65	14,477,966	84	2,818,489	16
	Muslims	8,240,611	31	7,714,619	94	525,992	6
	Christians	986,589	4	936,008	95	50,581	5
	Sikhs	22,519	0	7,634	34	14,885	66
	Buddhists	51,029	0	44,546	87	6,483	13
	Jains	23,957	0	3,603	15	20,354	85
	Others	22,999	0	21,608	94	1,391	6
	Religion not stated	11,369	0	10,304	91	1,065	9
Lakhimpur	All Religions	889010	100.0	823857	92.7	65153	7.3
	Hindus	702881	79.1	655968	93.3	46913	6.7
	Muslims	143505	16.1	126109	87.9	17396	12.1
	Christians	36667	4.1	36280	98.9	387	1.1
	Sikhs	680	0.1	330	48.5	350	51.5
	Buddhists	1362	0.2	1327	97.4	35	2.6
	Jains	148	0.0	86	58.1	62	41.9
	Others	3371	0 4	3364	99.8	7	0.2
	Religion not stated	396	0.0	393	99.2	3	0.8

The figure in the above table shows that compared to the state as a whole the proportion of Hindu is more in the district. The Hindus which constitute 64.9 percent in the total population at State level is 79.1 percent in the district, followed by Muslims16.1 percent, Christians 4.1 percent, others 0.4 percent, Buddhists 0.2 percent and Shikh 0.1 percent.

Annexure VI : Marital status of population as per 1991 and 2001 Census.

Marital Status:

The data on marital status of population age group for males and females are presented below in the following table.

TABLE-I

Age Sex and Marital Status of population in Assam- 1991 Census

Age group	Total Population		Percentage of Population in each age-group							
			Never Married		Married		Widowed		Divorced/Separated	
	Males	Females	Male	Female	Male	Female	Male	Female	Male	Female

Note: Data on unspecified marital status are not taken into account but they are included in the figures shown in Col No 2 and 3

A comparison of the district level figures of marital status with that of the state averages shows that the percentage of never married both for meals and females are found higher then the state rates. But in case of other categories the percentages both for meals and females in the district one lower then the state.

As in the state, the highest percentage of males and female married are found in age groups 45-49 and 35-39 respectively.

A comparison of the district level figure of marital status with that of the State averages reveals that the percentage of never married males and females is higher than the state average. In case of married males and females the percentage is lower than the state average. In case of widowed males percentage is higher and females percentage is lower than the state percentage. Again in case of Divorced/ Separated males percentage is same with the state percentage while the females is lower.

The highest percentage of married males and females are recorded in the age group of 45-49 and 35-39 in the district being 95.2 percent and 90.7 percent respectively. The corresponding figures in the State level for males and females are recorded in the same age group. Never married males and females being 21.0 percent and 7.3 percent respectively in the district. Never married males percentage is lower and females percentage is higher than the State percentage of 22.1 and 6.3 percent respectively.

Annexure VII : Age, sex and Education in the district, 1991 and 2001 Census.

Education and Literacy rate:

Age-group wise Literacy rates for male and female in respect of both at state and district levels are presented below in the following table.

Note:
1. Percentage of literates is to total population.
2. All other percentage are proportion of literate population

The literacy rates both for males and females in all age-groups except females for age-groups 50-59 and 60+ in the district are higher then that of the state rates. It is seen that the literacy is high for males in age groups 15-19 and females in 7-14 age-groups. Literacy rates are seen high up to metric/ secondary level, In case of Graduate and above rates in all age-groups are lower in the district than the state.
