Digboi Refinery at the initial stages

A century ago just before the World War I, history of another kind was in the making in a remote corner of Assam, by a band of intrepid pioneers searching for black gold. Italian Engineers, commissioned by the Assam Railways and Trading Company, to build a railway line from Dibrugarh to Margherita accidently discovered oil at Digboi. It was here in Digboi that the first commercially viable well in India, known locally as well No.1, was successfully drilled in September'1889 and first modern refinery in India was built and commissioned in December'1901 to supplant a small "batch-still" refinery in Margherita.

Annexure	VIII	Distribution of different mother tongues returned in 1991 and 2001 Census	574
Annexure	IX	Distribution of Scheduld Castes and Scheduled Tribes in 1991 Census	576

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

(P. Hazarika)
Director of Census Operations,
Assam, Guwahati.

District Highlights – 2001 Census

1 In Tisukia District, Tinsukia Revenue Circle/ Tahsil is most populous having 374,670 persons while Sadiya Revenue Circle is the least populous Revenue Circle having 92,012 persons.

2 Among the CD Blocks, Hapjan CD Block has highest number of population with 186,018 whereas the lowest is found Guijan CD Block with 87,256 persons.

3 In the district there are 4 Revenue Circles and 7 CD Blocks which comprise 1,146 villages including 39 uninhabited villages.

4 The district comprises ten towns. Tinsukia MB+OG is the most populous town.

5 While the highest number (249) inhabited villages is found in Kakapathar CD Block and the lowest (91) inhabited villages is found in Guijan CD Block.

6 The largest village by area is Powai T.E. with 1,670 hectares of land and situates in Margherita CD Block while in the district, Khatang Pani joyrampur NC is the smallest village in the area with one hectare of land . This village is under Margherita CD Block.

7 The largest village by population is Chapakhowa Town with 3,755 souls which is situated at Sadiya CD Block and the smallest village is Kukuramora Bananchal with two persons only and is under Sadiya CD Block.

8 The district is well known for her large number of Satras founded by Vaisnavitee reformer Shri Shri Sankar Dev and his followers time to time

9 Tilinga Temple is an important religious place for all Hindu people of the district.

10 Tinsukia is famous as an oil and tea producing district of Assam.

11 The old relics Tinisukia Tank and Bengmara Tank which were dug by the king Sarbananda Singh are still in the heart of the town , Tinsukia.

Analytical Note on Tinsukia District

(i) History and Scope of District Census Handbook

District Census Handbook is an important and valuable publication brought out by the Census organisation of each State after each decadal Census. This provides detailed information on basic demographic and socio-economic aspects and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being only informative source of every district of each State. It has thus, proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook was first initiated during 1951Census with the collaboration of respective State Governments. In 1951, only few demographic as well as some economic information in village and town level of the district along with some Census tables were published in District Census Hand Books. Since then, it had undergone radical changes during the subsequent decades. Incorporating more Census tables and also some basic statistics on land-use-pattern, agriculture, industry, administration, Public health and medical etc. enhanced the scope and content of the publication. The DCHB of 1961 was therefore, considered as a unique asset published by Census organization. In 1971 Census, further improvements were made in the DCHB by enlisting many more information on village and towns in the form of Village & Town Directory. It has three parts. The part-A relates to Village & Town Directory. Part-B contains Villages and Town wise Primary Census Abstract and Part-C deals with administrative aspect and Census tables based on PCA etc. The 1981 Census again widened the scope of DCHB to cover more data on literacy, health care etc. in addition to the information covered in 1971, DCHB. In 1981, the DCHB was divided into two parts. The part A included data on Village & Town Directory and Part B covered only the village and town-wise Primary Census Abstract. This part of the DCHB was not brought to light in Assam as no Census was conducted due to prevalence of disturb condition in the State. In 1991 Census, the DCHB was divided into two parts. The Part A divulged the Village and Town Directory and Part-B indicated the Primary Census Abstract. The Part-A had two sections. In section-I the alphabetical list of villages and note explaining the codes used in the Village Directory were presented. The Village Directory had four appendices. The section-II depicted note explaining the codes used in the Town Directory, the Town Directory statements (I to IV) and appendix to the Town Directory. The part-B revealed District Primary Census Abstract, circle-wise, CD Block wise, village and town wise Primary Census Abstract. In addition, the PCA had appendix as well as annexure. The District Primary Census Abstract to scheduled caste and scheduled tribe at circle and town level was also incorporated in this part of the DCHB.

However, as a tradition of the past in the present DCHB also some more information on availability of facilities, News Paper/Magazine are included for the first time. Further, information on income and expenditure, important commodities manufactured, exported and imported etc. are also included to give a fuller account to the scope of DCHB. Similarly, in Town Directory also few more information are included to increase its depth.

The process of collection and compilation of these data involved a lot of exercise. At first, revenue circle wise information on each village have been collected by revenue authorities at district level. These data are compared with 1991 Census data at district level and after their thorough scrutiny and cross check, these records are submitted to the Census Directorate. In case of Town Directory, data have been collected directly from the Commissioner of Municipal Corporation & Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 Census at Census Directorate. Thereafter, efforts are made to compare and cross check with similar data made available from other sources especially data published by different Departments of State Government to verify the authenticity and correctness of figures received through Village and

Town Directory booklets. Then compilation and computerization of these data have been made according to the instructions of the Registrar General and Census Commissioner, India. It is, therefore, regarded that because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication to that of many publications brought out earlier. It will be a more useful book for all concerns. This endeavour will perhaps, quince the thirst of data needy people.

(ii) Brief history of the district

In ancient days, there was no place in the name of Tinsukia, it was a part of Somarpith division of upper Assam or old Kamrupa kingdom as mentioned in Kalikapuran and Joginitrant. The Sonarpith Division of Kamrupa was the abode of Chutia, Barahi, Ahom, Kachari, Matak, Moran etc. and this division was ruled by different kings of different races probably from 12th century. In 13th century the Tai prince Chukapha after crossing Patkai mountain had first met Moran Barahi in this division. Once a time, Kunti of king Bhismak generation of Sadiya ruled Kuntirajya which was a part of Somar and it was near present Tinsukia town. Because of the fact that the place Kuntigohali or Khamti Gohali which is about 7 kms. from Tinsukia has acknowledged about existence of Kuntirajya near to Tinsukia. The last ruler of different races of king of this area of Somar division was from Matak/ Chutia.

In 1786 A.D. the Ahom king Swargdeu Gaurinath Singha was defeated by the people of Mawamoria caste and captured the kingdom from him by burning Shingari house at Garhgaon. Some of the leaders of different localities had established their kingdoms getting opportunity of weak conditions of Ahom king. Out of these leaders Mezera, son of Marutanandan of upper Assam was worth mentioning. He had established Matak kingdom at Somarpith by Christening Bengmara as the name of his kingdom. Later on Mezera had changed his name to Swargadeu Sarbananda Singha and declared himself as a King or Matak kingdom. His kingdom was extended was from Soukhowa to Khowang. The area of his kingdom was 1800 square miles and there were 96000 population. He ruled over 40 years in the kingdom.

There are different opinions about the name of Bengamara. Some are of opinion that it is a Tai word which means the original place of Moran. The king Sarbananda Singha had dug Bengmara pond at Bengmara to keep the symbol of Hatichungi Moran. The historians say that the king had dug the pond to save from drought that prevailed in his country. No water had come out in the pond. But, on the other hand, a large number of frogs died falling in the pond. Hence the pond was termed as Beng (frog) mara (die) phukhuri (pond) and from the name of the pond, the name of kingdom was ultimately changed to Bengmara. In 1791, the capital was transferred from Rangagarha to Bengmara and Godha Baruah has made the chief minister of the kingdom. The Bengmara pond is still in the heart of Tinsukia town. This pond was dug by the minister Godha Baruah in triangular size. From this triangular (Tinsukia) pond, the name of the district takes place as Tinsukia. The king Sarbananda Singh had done many social welfare works. He constructed Kamgarh, Kareng Ghar, Chara Ghar, Mela Ghar etc. in the surrounding areas of his capital. Besides, he dug Na-Pukhuri, Choulkhowa pukhuri, Mahdhowa pukhuri etc. by his labour force under his minister Godha Baruah.

After the death of the king Sarbananda Singha, the oldest son Matibor became the king in 1802 and he ruled the kingdom upto 1825. As per history, the title "Barsenapati (the chief general) was given by Purnanda Buragohain as a reward at the time of Kamaleswar Singha. In 1826 Matibor had signed in an agreement made with the Birtish. According to this Yabandoo agreement he was provided with 300 soldiers for the service of the state and he was made general of the Matak part by the British. In 1833, he rescued Moamoria Gohain Bhaktananda dev, Bhawanandadev and Jayanandadev from Mana at Jorhat and he constructed a Sattra at Rangagarha and kept them at this Sattra. Later on he shifted them near to Dinjan river of Chabua where he established the permanent Satra. At present, this Sattra is now called as renowned "Dijaya Mayamara Satta".

Matibor Barsenapati was died in 1839. Before his death he had shifted the responsibility of the kingdom to his second son Bhagirath Majiu Gohain in 1838 A.D. But after the death of Matibor, the British wanted to change the terms and conditions of agreement made with him and accordingly the Matak kingdom was divided into two parts by the British. Majiur Gohain and the people did not agree with new terms and conditions imposed on them by the British government. As a result in 1839, the generalship of Bhagirath Majiur Gohain was withdrawn from him by the Captain Bhetch Chahab and the whole Matak kingdom was annexed to East India Company.

In 1841 AD a rebellion against injustice was crept in to drive out the British. Majiur Gohain and his brother tried to rescue Rangagarha. But sons of the Barasenapati were arrested and put in prison at Biswanath. After few days later, they were set free. The residential places of Borsenapati such as Rangagarha, Bengmara etc. were exempted from paying taxes. Bhagirath was made Amin judge of subdivision and given the opportunity to judge minor cases. In 1842, the Matak kingdom was totally included in the British emperor's dominion by an act. After the death of Bhagirath, Bishaswar, the third son of Bhagirath and Lankeswar Gohain the sixth son of Bishaswar was the last and traditional person of Matak family who had received royal pension from the government.

Tinsukia district was originally a part of Lakhimpur district and thereafter it was a part of Dibrugarh district. Tinsukia was finally formed a separate district in 1989. The district is formed comprising the area of Tinsukia and Sadiya subdivisions of the erstwhile Dibrugarh district. It has another new subdivision named Margherita.

(iii) Administrative set - up

District Administration

The Deputy Commissioner of the district is the overall In-Charge of the administration of the entire district. He also acts as the collector in case of Revenue matters as a District Magistrate in case of maintenance of Law and Order and general administration as a District Election Officer in case of conduct of Election as a Principal Census Officer while conducting Census and so on. A number of officers like Additional Deputy Commissioners, Sub-divisional Officers, Extra-Assistant Commissioners and other assist the Deputy Commissioner is looking after the administration of the district.

From the developmental angle, Tinsukia district is divided into – Development Blocks. Below the block level set up, there are – Gaon Panchayats each comprising a number of villages and governed by local-self bodies. From the angle of Police administration, the district area is divided into – Police Stations.

(iv) Physical Features

Location

The district Tinsukia lies between approximately 27degree 14 inch and 28 degree 1 inch North latitude and 95 degree 14 inch and 96 degree 1 inch east longitude. The district is bounded on the north by Dhemaji district and Arunachal Pradesh, east and south by Arunachal Pradesh and west by Dibrugarh district. The district covers a total area of 3790 kms. of land . In terms of total area covered, the district occupies 6th rank among the districts of the state. The district of Tinsukia with its headquarters at Tinsukia is constituted by 4 Revenue Circles.

Topography

It is a broad plain and rises to the foothills of Arunachal Pradesh on the north. The district as a whole is a flat level plain and a few isolated hills in the Makum and Buridihing Mouzas, there is nothing to break even level of the plain. The district is situated on the head of Brahmaputra valley. The general physical feature of the district is both varied and picturesque in nature.

The soil is composed of loose sandy texture with occasional sands and gravels. The extensible plain of the district which is fairly high and fertile is covered with fields of waving rice which changes vivid green luster into a rich gold as harvest time draws near or with stiff bushy tea bushes that spread over like a dark green carpet. Water is scare in the upland of the district, primarily because the turbulent hill rivers do not inundate large tracts for long and the rain water is quickly soaked in the sandy soil. Acidity is the general characteristic of the soil of the district and more in case of older alluvium soil. The phosphoric content is found in the soil which are good for tea cultivation. Acidic alluvial soils are suitable for tea cultivation.

Hills

The district comprises mainly of plain areas dotted by small hillocks to the south of the district, the hills are only a few thousand feet above the level of the sea whereas the hills on the eastern end of the valley are considerably higher and on a clear day a view of continuous chain of snowy peaks can be seen. The view is bounded on the north by the bluest of the blue hills. The sides of hills are covered with dense evergreen forests from the base to the snow line. There are no such high hills in the main land of the district.

Drainage and River system

A large number of rivers and their tributaries, streams, jans and juris flew through the district and create havoc by inundating vast areas during rainy season. The whole of the drainage of the district

ultimately finds its path through above outlets into the mighty river Brahmaputra. The rivers are wide and deep here and remain navigable throughout the year. The Buridihing is one of the important tributaries of the river Brahmaputra. Dighai, Tingrai, Doomdooma, Laldukajan, Loohit are the important rivers of district which carry of the drainage of the hills into the Brahmaputra. Besides above, streams, streamlets, jan and juri also carry off the drainage into the rivers.

Climate and Rainfall

The climate of the district is characterised by the absence of a dry hot summer season, the highest temperatures being experienced during the monsoon season alongwith abundant rains and highly humid atmosphere throughout the year. Winter starts from December and end in February which is followed by a season or thunder storms from March to May. From June to the beginning of October is the season of south-west monsoon and October and November are marked as post monsoon season.

Rainfall

The annual rainfall varies marginally from one year to other. The average annual rainfall in the Tinsukia district is stated as 2026.0 mm in the year 1999. The highest rainfall occurred 460.0 mm in the month of June, 99. No rainfall was there in the month of November and December of the year. The season wise normal rainfall in the district was 103.8 mm in winter, 583.7 mm in summer, 1765.6mm in monsoon and 173.4mm in post monsoon season which comes to a total of 2626.5 against the state average of 2601.0 mm.

Source

Basic Agricultural Statistics, Assam, Govt. of Assam, Directorate of Agriculture.

Temperature

The temperature is a metrological observatory at Digboi in the district but records are meager.

The cold season starts towards the end of November when both day and night temperatures begin to decline. December and January are the coldest month of the year with the mean daily maximum temperature at about 24 degree centigrade and the mean daily minimum at 9 degree C to 11 degree C. In association with low pressure waves during the winter season, district experiences cold spells of a day or two when the minimum temperatures may fall below 5 degree centigrade. Temperature begins to rise from the beginning of March. The rise in temperature continues up to August. The highest mean daily values of temperature experienced in July and August when the mean daily maximum temperature goes upto 32 degree C and the mean daily minimum temperature remains at 25 degree centigrade or less. This together with high humidity makes the season rather unpleasant particularly due to non availability of rainfall. With the termination of the monsoon season the weather becomes gradually pleasant and cool. The air highly humid throughout the year except during the period of February to March when the relative humidity are comparatively less particularly in the afternoons. Skies appear heavily cloudiness to over east in the south-west monsoon seasons. There is a decrease in cloudiness after withdrawal of the monsoon and during the period December to April skies remain usually clear or lightly clouded. Winds are light throughout the year except for short spells of strong winds during thunder storms in the period March to May.

Flora and Fauna

Evergreen and semi evergreen forests flourish in alluvial soft, having capacity to retain much water throughout the district. The main species found in the forests of the district are sam, Gonsoroi, Pama Sopa, Titasapa, Maleai, Nahar, Khair, Ajhar, Kathal, Sanalu, Gumari, Amari, Uriam etc. These are used for various purposes. In addition to above species, bamboos, canes, Ekara, Thatch etc. are also available in the forests of the district.

In the forests of the district various kinds of birds and animals can be seen. There are herds of elephants and bison. There are various types of deer in the forests. Buffaloes, tigers, leopards, mithuns, monkeys are available in the forest. Various kinds of birds domestic as well as wild birds are found in the district. The reptiles can also be seen in the forests of the district.

Natural calamities: Earthquake and Flood.

Earthquake

Like the rest of Assam, Tinsukia is a seismic area and is liable to earthquake. The great earthquake of 1897 was felt all over the district. It damaged many houses and buildings of the people as well as of the government. Heavy damage was done to the raised roads.

The earthquake of August 15, 1950 has

particularly damaged houses and buildings. But the gravity of this earthquake was less than the earlier one. The quantity of damage was less than that of 1897. Many houses and edifices in Tinsukia town collapsed. The Saikhowa ghat and Sadiya Town were either submerged or eroded by the Brahmaputra. The after-effect of the earthquake brought a vast change to the topography of the district and the river Brahmaputra became the agent or destruction. The economy of the state was badly affected by natural calamities occurred time to time. Since then many earthquake shocks are experienced in the district but there was no loss of life and property.

Flood and Famine

Famines and drought are little unknown in the district. The flood in this district is less than the flood of lower Assam. But the district is not free from the incidence of flood and erosion. The Sadiya subdivision of the district is the flood effected area. The Buridihing rises in the Patkai and flows a tortuous course with a westerly direction till it falls into the Brahmaputra after mean during for about 240 kms. which creates flood in vast areas of the district more particularly in Sadiya and Doomdooma.

The heavy water and silt discharges occurring in the hilly region during the peak monsoon period find their way through streams and rivulets in exercise spilling on the bale of the rivers and their tributaries and consequent water logging in the hill areas gives further momentum to peak discharges and contributes toward aggravation of the flood situation. The flood brings untold miseries to the people of the district. All the past floods that occurred in Assam alongwith Tinsukia, destroyed crop in many areas, damaged thousands of houses and lost life of several domestic animals and also damaged communications.

The following table shows the area hit by flood and extent of damages during the period 1997 to 1999.

Table – 1
Area affected by Flood and extent of damages in Tinsukia district.

Year	Area affected (hectares)		Total value of damages (Rs. in Lakhs)			
	Tinsukia	Assam	Tinsukia	Rs. P/a	Assam	Rs. P/a
1	2	3	4	5	6	7
1997	6,574 (1 7)	753,409 (9 60)	26 4	401	2,944 10	390
1998	12,633 (3 3)	1,323,751 (16 9)	376 9	2,984	49695	3,754 00
1999	10 (0 002)	223107 ((2 8)	2	20,000	5195	2,328 00

Note -1 Figures in parenthesis below the area indicate the percentage of area to total geographical area of the district / State

Source Prepared on the basis of Table 32 11 and 3 05 of Statistical Handbook of Assam, 2000 Director of Economics and Statistics, Govt of Assam

The figures in the above table clearly show that the gravity of flood in terms of both incidence and impact is relatively less in Tinsukia district that Assam as a whole. The percentage area of land affected by flood is less than the state average whereas the value of damages per hectares of flood affected land is high in 1997 and 1999 in the district.

Flood control and relief measures

As the floods are unavoidable in the district, sufficient precautionary measures are necessary to be taken to minimise the gravity of the flood. It is with this end in view the district authorities are all alert during such time to save from the menace or flood.

As soon as the flood submerges the low-lying areas, the relief operation starts with full vigour. Evacuation of people and cattle to safer places, providing food and shelter till flood recedes, distribution of gratuitous relief in areas where evacuation is not necessary are the important relief measures. Most of the principal departments of the government, in some way or other have got something to do in respect of the flood. In steering relief operation, the secure complete co-operation from other departments of the government as well as from the public.

Socio-Cultural Features

Land and People

With an area of 3790 sq. kms., Tinsukia district has a total of 11,50,146 population with a density of 303 persons per sq. kms. Out of total population, 925972 and 224174 are rural and urban population respectively. In the district 602515 are males and 547631 are females. Literacy rate for population above 6 years is recorded as 72.16 for males and 53.40 for females.

Language and Dialect

Assamese, Bengali, Hindi, Nepali and Oriya are the important languages spoken by the people of the district. About 58.4% of the people returned Assamese as their mother tongue in 1991 whereas 10.7%, 9.8% and 7.9% are returned as mother tongue by Bengali, Hindi and Nepali respectively. 3.8% is returned by Oriya. The remaining percentages of population returned other languages as their respective mother tongue is less than 2.0%.

Religion

The hindu forming 90.2% of the total pulation of the district in 1991 is the major religion. The Muslims and Christians occupy only 4.9% and 3.1% respectively in the district. All the remaining three religions consist of less than 2.0% only.

Saktism

Hindus consist most of followers of Sakti or worshippers of reproductive powers as manifested in the female. The two manifestations of Sakti are namely Durga and Kali. Kali is worshipped on the might of Shyama Puja by the deout Saktas. Maroi Puja which is a form of worship of sakti or kali is observed by the Saktas. Goddess Padmavati who is regarded to be the daughter of Lord Mahadeva is widely worshipped particularly by the Saktas. The saktism are mostly followed by the tea plantation labourers of the district. If considerable number of those living in the villages are ex-tea-garden labourers who are no doubt so styled because they eat meat and drink liquor and believe in Tantrikism.

Vaishnavism

Most of the Hindus are Vaishnavites in the district. Every Vaishnavite is the disciple of some particular Gosain or priest. In fact, Vaishnavites of the Assam Valley can be divided into the Mahapurushia and Bamunia or other Vaishnavites as they have been called in the Census tables of Assam Census Report for 1901. The former will accept even a Sudra as a religious guide, worship no God but Krishna or Bishnu but the later recognizes only Brahmins as their Gosains, permit other deities such as Siva and Kali in addition to that or Krishna and allow sacrifices to be offered in their honour. Decay and degeneration in the religious field led to a revival of the Vaishnavite in the fifteenth century. The harbinger of the Vaishnavite Renaissance in Assam was Sankaradeva who was ably assisted by several disciple chief among them whom was Madhavadeva. Sankaradeva was the founder or Meo-vaishnavism in Assam. He did away with the worship of images. His creed is known as the Eka-Sarana-Nama Dharma or the religion of the worship of only one God Vishnu through recitation of his name, in rhymes and prayers. His teaching were based on the Bhagavata Purana, it is called as the Bhagawati Dharma.

There are a number of Satras in Tinsukia district. These Satras are more less religious colleges of the Hindu. Sankaradeva was the founder of the Satras in Assam. He brought about a religious, social and cultural revolution in Assam.

Islam

In 1872 there were only 3,826 Muhammadans in the undivided Lakhimpur district, but by 1901 their number had risen to 11,925 forming 3.0% of the total population. In 1991, there was 4.9% Muslims population in the district.

It is believed that the first batch of Muhammadan immigrants in the district is said to have settled at Jaipur. With the advent of the British, Muhammadan sepoys were brought and stationed at Dibrugarh. These sepoys in due course entered into marital alliances with local people and settled themselves in the cantonment areas. There are other Muslim migrant such as boatmen, traders and tea garden employees. Gradually the number of Muslims are increased in the district.

Christianity

Undivided Lakhimpur district contained a large number of converted Christians as in other districts of Assam. There were 30,095 christians in 1991 in the district and most of these Christians are members of American Baptist Mission. A number of Churches were established throughout the district and some of these are Saint Margaret Church at Margherita, Saint Theresa of the child of Jesus Church at Digboi,

Roman Catholic Saint Franchis Church at Naharkatiya and Roman Catholic Saint Joseph's Church at Doomdooma.

Social life

Socio-cultural life of the people has been moulded mainly by three principal religious namely Hinduism, Islam and Christianity. In the families of Hindus, the property is generally held by the head of the family who manages it as its custodian. The joint family system which was common in the past, is disappearing gradually now-a-days.

Marriage

The forms of marriage among Hindus in vogue are the Humpura or full Hindu life when the sacred fire is lighted and a priest is engaged to perform the ceremony. Brahmins, Kayasthas and well-to-do Kalitas and Keot invariably perform Humpura marriage ceremony. Now-a-days a different kind of marriage ceremony is being performed by the Sanbari pantha. The group of people does not allow Humpura but they perform the ceremony by Nama-kirtan. The bride and bridegroom exchange the garland each other in front of the gathering.

Ahoms are often married by the Chaklong rite in which the box (Temi) in which betel-nut is carried and the knife (Katari) with which it is cut are exchanged and the nuptial knot is tied.

In the district infant marriage is practically unknown. Among the Hindus marriage by negotiation is common. The caste distinction is not rigid as it was a few decades ago, never-the-less, the inter caste marriage is not very frequent among the people. The remarriage of widow among Hindus is not looked upon.

Drinking is common among the tea garden labourers and tribal people. And also, religious taboos, scarcely deter the non-tribal from drinking which they take in a moderate rate.

Home stead

In rural families, the following are the houses generally found. Charaghar (reception house), Barghar (living house), Bharalghar (store house), Gohalighar (cowshed). These houses in most cases have thatched roofs, mud plastered ekra (reed) walls and bamboo or wooden posts. At present many people have constructed their houses with pucca plinth and C.I. sheet roofing with upto-date fittings.

Dresses

Male dresses include dhoti, chadar, shirt, trousers and modern pants and coats. Female dress consists of riha, mekhela, chaddar, blouse and their ornaments include keru, moni, kharu, jhangphai-keru, dugdugi, bena, necklace, chain, earring, bala etc.

Festival

Colourful festivals observed in the district enliven the lines of the people. Important festivals of the year are Durga puja, Sivaratri, Dol-jatra and important pujas are Viswakarma puja, Saraswati puja, Lakshmi puja and Kali puja,

The special festivals of the Assamese of the district are the three Bihus – the Rangali Bihu, Bhogali Bihu and Kati Bihu which are associated with the cycles of cultivation, Rangali Bihu is the festival where groups of Assamese people dance and sing the Bihugeet. As the girls dance the boys play on flute and beat drums and below the pepa made of buffalo's horn and taka.

The Namghar is the communities prayer hall of the villagers who held prayer service unknown as Nam-kirtan during religious festivals. Exquisite folk songs and Ballads such as Biya-nam Tokarigeet, Ainam are sung in the district in some of the district functions.

Other important festivals observed in the district are the birth and death anniversaries of the Vaishnava prechers, Sankaradeva, Madhavadeva and Mathuradas Bura-ata. The tithi of Shri Damodaradeva is also similarly observed by his followers in the district.

The Muslims observe the Muhrram, Id-uz-Zuha, Idul Fitre in the traditional manner. The Christians observe the Christmas, the new Year Day, Good Friday. The Republic Day and Independence day are observed in the district with much festive manner.

Resources in the district :-

Geology and Mining

The entire district is covered by alluvial deposits of recent and sub-recent origin. In many places of the district, there are terrace deposits. These are known as the older or high level alluvium consists of boulders, pebbles and cobbles or quartzite, sand stone, shale, slate and gneisses embedded in a course sandy clay matrix.

The district is very rich in mineral deposits and

has huge deposit of coal, petroleum and natural gas which play an important role in the economy and industrial development of the country since long back. Besides, clays for brick making and pottery and gravels for road melting and other useful purposes are abundantly found in Tinsukia.

Huge deposits of bituminous coal exist in two different fields lying along the south part of the district. The well developed and most important one is the Makum coal field near Margherita, the field of which is kms. long and about 5 kms. wide between Dirak and Tirap river. Good exposures of coal are also found in Namdang and Ledo coal field areas of the district.

Oil and gas seepage are very common in the district. A big oil seepage was discovered in Digboi which led to the discovery of Digboi oil field. Until discovery of other oil fields Digboi was the only oil producing area in the country. The Assam Railway and Trading Company started exploration of oil in Digboi area from 1888 and 1899 the Assam Oil Company was formed to take over the management. In 1921 the Burma Oil Company took over the management to gear up the production of oil, through some new and developed techniques. The Naharkatiya Oil field was also discovered by the Assam Oil Company during 1925 & 1938 and came out as a good producer of oil in 1953. The Oil India Limited took over the management of Naharkatiya Oil Field in 1961.

A large reserves of natural gas are found in association with Oil in Naharkatiya. For utilization of this gas a Thermal Power Project has been completed by the Assam State Electricity Board and a Fertilizer Factory has been constructed by the Fertilizer Corporation of India.

Some quantities of alluvial gold were recovered from Buri-Dihing river during the period of Ahom kings. The mode of collection of gold was by washing river sands and gravels and alluvial terraces. But the practice of collection of gold has been abandoned for economic reason.

Forest :

The hills of the district are encircled by dense and evergreen forests. These forests are rich in bamboo, plantains, palm trees and many big and most valuable trees.

The forest of the district can be divided into two board heads viz-the Reserve Forest and unclassed State Forest. However, management of the unclassed State Forest is regulated by the Assam Forest Regulation VII, 1891. The class of forests are primarily government waste land. The reserve forests have been constituted under provisions of Assam Forest Regulation VII, 1891 which prohibits a number of activities in the forests. The main objective of the management of forest is to conserve forest for the maintenance of climate balance and to provide protection from erosion.

As per record published in the Statistical Handbook, Assam, 2000 by the Government of Assam, there are 132438 hectares of land covered by the forest of Tinsukia district.

There are 33 reserved forest areas in the district. In addition, an area of 16015 hectares is covered by 15 proposed reserved forests. The forest is one of the important source of revenue of the State Government.

The forests are scattered all over the district but the most valuable forests are concentrated on the south and the east of Railway line from Naharkatiya to Saikhowaghat. The main marketable species of these forest are Hollong (Diperocar pus macrocarpass) Hollock (terminalia myrolarpa), Makai (Strorea anamica), Nahar (Mesua fuel), Uriam (Bischoffa Javanica) and Outenga (Dollenia indica).

The other resources of revenue earned from the forests are cane, thatch, bamboo, ekra, elephant mahal, fisheries etc. The government earns land revenue from the forest villages. The out turn of timber from the saw mills in the district is quite considerable. The district has a numbers of forest based industries. The animals and birds are also another source of income of the government.

Major characteristics of the district:-

Land and land-use pattern:

Out of total geographical area of 379,000 hectares of land in Tinsukia district, about 29.9% of the land is not available for cultivation and 9.4% is categorised as other non-cultivated land. Further, about 34.9% is under forests. The net area shown in the district is about 24.3% of the total geographical area. The following table shows the area of land put to different uses and their percentages to the total areas.

Table–II
Land- use- pattern in Tinsukia district 1997-98 (provisional)

Sl No	Land put to different uses	Area in hectares	Percentage to total geographical area
1	2	3	4
1	Total geographical area	379,000	100
2	Forest area	132,438	34 9
3	Land not available for cultivation	113,341	29 9
	(a) Land put to non-agricultural uses	73,751	19 5
	(b) Barren and uncultured land	39,590	10 4
4	Other non-cultivated land excluding fallow lands	35,531	9 4
	(a) Permanent pastures and other grazing land	3,560	0 9
	(b) Land under Misc trees, groves etc not included in net area	28,019	7 4

Economic Profile of the district:

Agriculture and plantation:

Crops: Paddy, jute, sugar-cane, tea, pulses and mustard are the major crops of the district. Tobacco, potato, vegetable and various fruits are found in the district as subsidiary crops. Rice is the staple food.

The following table presents data on different types of crops grown in the district, area under cultivation, yield etc. during 1999 (final forecast).

Table–III
Area, Production and Average yield of important crops in Tinsukia district for the year 1998-99 (as per final forecast).

Sl No	Type of crops	Area under cultivation (hectare)	Production (tonnes)	Average Yield kg (per hectare)
1	2	3	4	5

Source : Directorate of Agriculture of Assam, Basic Agricultural Statistics-

There are some vegetables grown in the district and common among these are spinch, lai, radish lafa, sulea, cabbage, cauliflower, tomato, onion, palang, lady's finger etc. Further, Tinsukia district is one of the important tea growing districts of Assam and there has been a gradual expansion of the area under tea since 1921 A.D.

Tea Industry

The history of the tea industry in Assam dates back of the year 1826, when indigenous tea plants growing in the plain of Assam came to the notice of the East India Company. The cultivation of this plant was first introduced in 1830 by the East India Company. It is mentioned in the Economic Development of Assam by P.C. Goswami that a tea garden was started by the Government in 1833 in the Lakhimpur district. On 1835 a few indigenous plants were taken from the forest at 'Nimgroo' bordering the Singphoe country and grown at Koondilmukh at Sadiya. A Company was found in 1939 known as the Assam company. This was the first Company in India to undertake the commercial production of tea and was the district successor of the East India Company. The headquarters of this Company was formed at Nazira of present Sibsagar district and remained till the shifting to Calcutta in 1956. The Government garden was carried from 1840 to 1849. But due to certain difficulties the garden was sold to a Chinaman named 'Among'. This Chinaman failed to improve the garden. In 1851, through the instrumentality of Colonel Hannay who contributed much to the development of tea cultivation in the part of Upper Assam. The early sixties of 19th century i.e. from 1859 to 1860 was a period of steady boom. After this period the tea industry received a great setback. But this trend was checked by 1878. In 1881, the North India Tea Estate owners formed the Indian Tea Association. The industry grew continuously till 1890 and thereafter it under went through a depreciation for a short period but soon recovered from this State of affairs. The major improvements have been made in the field of tea in the grouping gardens under a limited number of Companies in the progressive mechanization and rationalization of production and in increasing their efficiency of productivity of labour.

The Tokolai Reserve Station was set up at Jorhat in 1911 with a view to carrying on research on cultivation and manufacture of tea in Assam. This has been very useful in increase of yield rate of tea. In the year 1932-33, it is again met with severe crisis due to depression and over production of tea. This condition was tackled by enacting the Indian tea control Act, 1933 and by 1952 it reached an unprecedented prosperity. Recently, the Tokolai Experimental centre had developed a machine known as Rotorvane. It is a continuous processing machine for use in a continuous system of manufacture.

The Guwahati Tea Auction centre

Marketing of Tea has always been a great problem for the industrialists. Before opening of Tea Auction Centre at Guwahati Tea Auction Centre in Calcutta arranged for sale of Assam Tea. Tea Auction Centre, third of its kind in India started functioning at Guwahati from Sept., 1970.

Tea which is subject to direct taxation by way of excise duty, export duty and a user under Tea Act, the industry makes substantial direct contribution to central Revenues. Besides, these taxes tea industry is also subject to central income tax, supper tax (corporation) and agricultural income tax. Income tax alongwith sales tax leased upon it inflates the income of the State Government to a great extent.

Tea is the mainstay of the plywood industry. Tea grown in different parts of Assam is packed in the garden factories in plywood chests for dispatch. Tea

estates require huge quantity of fertilizers for healthy growth of tea. Thus it gives a strong support to fertilizer industry also.

The labour force that engaged in the industry is brought mainly from Bihar, Madhya Pradesh, Orissa and Madras. The industry provides ample scope for employment from higher to lower grade workers. The tea estate in Assam is in different geographical size. It varies from small garden to large tea estate. The administration is also generally same from each other. The sole responsibility of a tea estate is vested on the Manager of the estate. He is the head of the estate. He is assisted by 2/3 Assistant Managers. The Assistant Managers are given separate responsibility such as production, supervision of garden and labours, financial affairs, stock/store and factory etc. Each garden has a office in which there is a head clerk called 'Borobabu' and he is assisted by some clerks and peon. Social service provided to its employees by hospitals run by qualified medical officer and staff. Most of the gardens have their ambulances to carry serious patient for better treatment to outside the gardens.

Tea Garden in Tinsukia

In Lakhimpur district including Tinsukia there are 25 tea gardens covering an area about 4362 hectares as on Dec.,1998. The estimated total tea production in 1998 was 9131 tones and the average yield per hectare was about 2003 kgs. (No separate data for Tinsukia is available). In addition, there are 78 small tea growers with a registered area of 301.18 hectares as on 31.10.99 in Tinsukia district.

Irrigation

The district receives sufficient amount of rain during monsoon season but the major crops like paddy, jute, sugarcane etc. have to depend on some other sources of water during the major part of the year. The system of jan or dong (a canal) to irrigate paddy field by constructing small canals is still in practice in some part of the district. Some minor irrigation project like construction of bunds across the streams and rivulets, drainage channels and silt channels etc. are implemented in the district by the Government. Lift irrigation with electric pump-sets has also been operated in some parts of the district. The dies generators are also used to lift water and water the paddy field.

The following table indicates the irrigation potential created and the targets and achievements etc. in Tinsukia district.

Table – V
Irrigation potential utilized targets and achievements

Sl. No.	Particulars	Land area in hectares
1	2	3
1	Irrigation potential utilized during 1997-98	404
	1. During Kharif	379
	2. During Rabi and pre-Kharif	25

	2. Major and medium irrigation	-

Source: Statistical Handbook Assam, 2000 Cottage Industries:

Sericulture

Silk industry in Assam has flourished since time immemorial. The art of sericulture and rearing of cocoons for manufacture of various silk cloths were unknown to the Assamese as early as the Ramayan and the Arthasastra.

Three principal varieties of silk called Pat, Eri and Muga are still produced in Assam. These varieties are producing in Tinsukia also. The first variety is the finest and costliest. Eri is of coarser quality and is generally used by common people. Muga is stouter and mora durable than any other cloths.

The pat, Muga and Eri are being produced by the people of Tinsukia district. The State government and the Central silk Board have taken various measures for the development of sericulture in Assam to increase the production of seed cocoons as well as the quality of yarn. There are 292 sericultural villages in Tinsukia district. 107,129 and 74 hectares of lands are used under Eri, Muga and Mulberry respectively. Having a yield of 17000 kgs. Of cocoons of Eri 674 lakhs of Muga and 3000 kgs. Of Mulberry respectively cocoons. In Tinsukia, there are 10 Handloom demonstration circles.

Weaving

It is most important cottage industry that run in Assam from the days of zone. In the past there was hardly an Assamese family without a loom. Normally

the handloom cloths were not produced on a commercial scale and as such every family had to attain self-sufficiency in respect of cloths.

During the British rule, the weaving industry faced a keen completion from the mill made goods which dominated the markets situated even in the interior areas also. However, the weaving industry did not lose its population among the people of Assam. Mahatma Gandhi ably remarked that the Assamese women could weave fairy tales in their cloths. The Chaddar, Mekhela and Gamocha are the most important products of handloom weaving. Weaving only occupies the leisure moments of the women.

The Government of Assam has opened several centres in the district for skill development and to assist and promote the existing weaving units. It also helps the weavers by ways of giving training, aid, assistant etc. for improvement of products.

There are 5 Handloom Training Centres and 3 Weavers Extension service units in the district. During 1998-99 there were about 80 candidates in these Centres as trainees.

Bamboo and Cane work

It is also another type of cottage industry in the district. The cane mats produced by the people were generally used by all section of the Assamese people. The products made of bamboo and cane are used in every households which are most essential for day to day life. Fishing implements made of bamboo used in the district from the days of old are Jakai, Khalai, Chepa etc. which are still using by the people of the district.

Saw mill

The small scale saw mills are playing an important role in the exploitation of the forest wealth of the district. The products of the saw mills mainly go to meet the demands of local constructional work such building, house, bridge, furniture etc. Railway sleepers and various other industrial uses outside the State. To meet the ever increasing demand for seasoned timber, a timber treatment and seasoning plant has been established by the forest department at Makum. To utilize the waste from the local saw mill and plywood factories a factory at Makum has also been established product hard board and chip-board.

Besides above industries, there are some more industries which are traditionally associated with the village economy are – (1) rice mill/rice pounding (II) Ghani (III)Blacksmith (IV) Pottery (V) Goldsmith (VI) Bakery (VII) Printing Press etc.

Large Scale Industry

The district is very rich in natural resources and consequently is a highly industrialized district in the entire state. The industries in the district are mainly leased on petroleum, coal, tea and forest.

Petroleum Industry

Assam, more particularly Upper Assam is well known as an oil area. The oil found in Tinsukia district had led to the installation of oil refinery at Digboi. The existence of Petroleum in this area was first discovered in 1828 by Wileox and Mr. C.A. Brace. The first successful oil strike in the country took place at Makum on March, 1867. This was the first successful mechanically drilled oil well in Asia. In 1882 which constructing the railway line from Dibrugarh to Ledo, Petroleum was discovered at Digboi and the exploitation of field was started by the Assam Railway and Trading Company in 1889. After passing various phases, Oil Refinery at Digboi started functioning in December, 1901. By 1916 more than a million tones of crude oil has been supplied by the Digboi oil fields and current production stands between 170000 to 180000 tones a year.

Naharkatiya Oil Field

The next and the important oil field in the district has been discovered at Naharkatiya. It opened up a new era of oil exploration in the alluvial area within the country. This oil field meets about 50% of India's requirement of Petroleum. The preparation for exploration of oil at Naharkatiya wade made in 1951. Gradually, the number of wells drilled in Naharkatiya area has gone upto 144 in 1964.

Oil India Pipe line Project

To transport crude oil, the Oil India has constructed a 1152 kms. long pipeline from Naharkatiya to Barauni. The pipe line is capable of carrying 2.75 million tones of crude a year upto Guwahati & 2.00 million tones a year thereafter to Barauni. Now it can carry upto 4.00 million tones of crude oil per year.

Natural Gas

The Assam Gas Company located at Duliajan which is a State Government undertaking has started functioning on April 2, 1971. It undertook the distribution of the Gas to various users. To utilize this Gas, a thermal power station has been established at

Namrup in Dibrugarh district. The company also supply gas to a number of tea gardens for running factories and other allied works.

Coal Industry

The coal industry in Assam is more than one hundred year old. The existence of coal deposits in Upper Assam had been known from early days of the British Rule. As early as in 1828 a good quantity of coal is dug in this district. The Makum coal field near Margherita is 30 kms. long and 5 kms. wide. The working collieries found in the district are at Borgolai, Ledo, Namdang and Tipong. Assam produces about 1.3% of the total Indian output of coal of which about 85% comes from Makum coal fields. Due to its inferior quality of Assam coal, it becomes less attractive for the markets elsewhere in India. But whole of it goes to tea gardens and railways.

Medium size industry

Plywood factory

Plywood industry occupies an important place in the economy of the district. Tea is the mainstay of this industry. Plywood is manufactured by combining several piles or veneers. In 1924 the Assam Railways and Trading Company started their plywood factory at Margherita. Gradually, the numbers of Plywood Factory has gone up in the district. There were nine such factories in 1968 in the undivided Lakhimpur district and all these were located in then Dibrugarh sub-division. Simul, Hollock, Hollong and Mango are the species which are used in manufacture of plywood. The district is rich in these spices and hence such factories are established time to time.

The nos. of registered industries in the district as on 1998 are indicated below:

Table- VI
Number of registered Factories in the district 1998

Sl No.	Type of industry	Number
1	2	3
1	Manufacture of food products	118
2	Manufacture of wood & wood products furniture and fixtures	91
3	Manufacture of non-metallic mineral products	31
4	Manufacture of metal products and parts (except Machinery & Transport Equipments	18
5	Basic Metal and Alloy Industry	14
6	Manufacture of Machinery Machine Tools and parts (except electrical)	11 4
7	Manufacture of chemical and chemical products	4
8	Other manufacturing industries	

There are some other registered industries whose number varies from 1 to 3 only.

Animal Husbandry and Fishery

As per the quin-quential livestock Census Undertaken in Assam during 1997 it is found that there are 455242 Cattle, 30805 Buffaloes, 943 Sheep and 93975 Goats in Tinsukia district. In addition, 47285 pigs and 279 horses and ponies are also enumerated during the same Census. As regard to poultry, there are 688440 fowls and 93841 ducks in the district as enumerated in the Census.

To improve the health and quality of livestock various veterinary facilities are made available in the district. The Statistical Handbook of Assam, 2000 published by the Director of Economics and Statistics Department of Assam have shown the following hospitals, dispensaries etc. of Dibrugarh district jointly with the figure of Tinsukia district. There are altogether 4 hospitals and 18 dispensaries. In addition to these facilities, there are 18 stockmen centres, 11 Block Dispensaries, 4 Rural Artificial Incriminations centres, 3 Mobile Dispensaries, one livestock Farm, one poultry and Duck Farm and one Pig Farm.

Fisheries

Large number of people from all castes and creeds collect fish by catching or buying from the market and use as a balanced nutritional their diet. The main sources of fishes are beels, rivers, ponds, rivulets and other water logged areas. The big and small varieties of fishes are available in the rivers and beels of the district.

The development of Agriculture in the district was initiated by the Government after independence and a number of schemes were started for promotion of fisheries. These are (1) seed collection and distribution (II) Survey of fisheries and reclamation (III) Renovation of ancient and inferior quality of Tanks (IV) Fish farming (V) Providing loans and subsidies.

The Department of Fisheries has established the commercial-cum-Demonstration Fish Farm at Na-Pukhuri consisting of stocking, rearing and nursery of tanks. The department also renovated a number old and ancient tanks. Besides, the community Development Blocks have undertaken schemes for development of fisheries in their representative areas. Forest fishing in the district plays a significant role in meeting the local demand of fish.

In the district there are 5 registered Beel Fisheries and 10 registered river fisheries as on 1998-99. The target and achievement of fish seed and fish as recorded in the Statistical Handbook, Assam, 2000 are 1000 and 8.10 million nos. and 7520 and 7824.80 metric tones respectively.

Power and Electricity

The development of agriculture as well as industry is largely depended upon availability of electricity. The use of electricity becomes an essential part of the modern society. The district has high power potential based on natural gas. The large part of demand for electricity in the district meets up from the thermal project at Namrup in Dibrugarh district.

In Tinsukia district, the Statistical Handbook Assam, 2000 recorded the number of villages electrified upto 1999 as 1142. Out of 1151 total villages in 2001. Only 9 villages have left out to be electrified so far.

Trade and Commerce

The district is rich in natural wealth. The important industries like petroleum, Gas, Tea and Plywood are established in the district. The Petroleum and other products of Digboi are exported from the district to various parts of the country and even to the international markets. Tea is the most important commodity of export and earns a great amount of foreign exchange. The crude oil is another most important items of export.

Coal is another important item of export from the district. About 85% of coal in Assam comes from the Makum coal field of the district. Makum coal is costlier than other coal produced in India. Plywood is a very important commodity of export and plays a good role in the economy of the State. The Urea, Ammonium sulphate are also sent to other parts of the country from the district.

In addition to above items of the district timber and timber products, cane and cane products, bamboo and bamboo products, tea chests, jute, paddy and some other products of small scale industries of the district are exported outside the district.

The principal items of import to the district are various raw-materials and machineries, wheat, pulses, gram, peas, rice, grain, peas, ground nut, species, oil, sugar, cement, C.I. Sheets, fertilizers, iron, paints, all kinds of vehicles, garments cloth etc. The stationery articles also come from outside Assam.

Tinsukia town is the main trade centre of the district. Both the wholesale and retail sale business are transacted in Tinsukia town. Tinsukia has now achieved prominence as an industrial town of the state. The importance of Tinsukia has increased recently because of establishment and expansion of steel processing and light engineering industries and various fabrication workshops.

Other important trade centres of the district are Digboi, Doomdooma, Margherita, Chapakhowa, Makum and Naharkatiya where both the types of trades are carried considerably. Never-the-less, the majority of trade is transacted in Tinsukia town.

However, agent deal of business is operated at the local markets or hats. The villagers and tea garden labourers are mainly depended on these markets/hats. The villagers sell their products at the hats and the wholesalers coming from towns purchase the products of the villagers. The petty traders also come to these hats and sell various items to the buyers.

Banking and Finance

As observed by the Assam provincial Banking Enquiry Committee in 1929, the history of indigenous banks in the district is shrouded in obscurity. Upto 1929-30 there were no co-operative or joint stock banks in the district. The moneylender played an important role in the rural credit system in the past. However, with the expansion of the tea industry and exploration of oil and coal, the credit structure of the district took a concrete shape. Several banks have been set up in various parts of the district. In addition, co-operative credit societies are also in operation. However, even now, the moneylender continues to be an important source of rural credit.

The following table explains the number of banks in the district and the position of deposits and credits.

Table–VII
Position of Deposits and Credits in Banks as on December 31, 1999

Sl. No	Type of Bank	No of offices	Deposits (Rs lakhs)	Credit (Rs lakhs)
1	2	3	4	5
1	Scheduled Commercial Bank	69	51,258	16,266
2	Regional Rural Banks	8	1,143	132
3	Total	77	52,401	16,398

Source : Statistical Handbook Assam, 2000.

Transport and Communication

In ancient days overland trade routes of the district is very meager. The old accounts of Assam witnesses that the most of the travelers used horses, elephants, ponies, bullock carts, palanquins, country boats and rafts to travel our place to other However, with the passage of time, the situation has changed considerably. With the advent of the British and after independence tremendous improvement in road and other communication facilities are taken place.

Road

The road transport makes a headway in Ahom rule. Some important roads were constructed by the Ahom which are unknown as Dhodar Ali and Gohain Kamala Ali linking many places of undivided Lakhimpur district. Similarly the British also constructed some roads in the district.

The following table indicate the present position of the length of roads of different types in the district.

Table–VIII
Road length in Tinsukia district (1997-98)

Sl No	Category of Roads	Road length (Kms)
1	2	3
1	National Highway	145
2	State Highway	
3	Other P W D Roads	1,201
	Total road length	1,340
4	P W D Road length per lakh population*	140
5	Road length per 100 Sq km of total geographical area	356

*Note : As per 1991 Census population
Source : Statistical Handbook Assam, 2000

Vehicles

In the entire district there are 19706 motor vehicles on the road during 1998-99, out of which 3567 vehicles are registered during 1998.99. Out of 3567 vehicles 1955 are two wheelers, 744 are cars, 83 are tractors and 131 are trucks, 146 are buses, 84 light commercial vehicles, 78 jeeps, 9 minibuses, 10 omnibuses, 21 taxis, 131 auto-rickshaws, 144 trailors, 15 are Government vehicles. The road distance from Tinsukia town to Guwahati is about 491 kms.

Rails

The development of rail communication in the district can be attributed to the tea industry which was heavily concentrated in the Tinsukia district. In 1881, the Assam railway and Trading Company took up the construction of Dibru-Sadiya Railway line. The first railway line in Upper Assam from Dibrugarh to Jaipur was opened in 1882 which was connected with the coal fields. In 1904, through rail communication was established between Chittagong and Dibrugarh. The Dibrugarh-Sadiya Railway line was extended by another line from Talap to Saikhowaghat. Gradually, the rail lines were extended touching different places and various Railway stations were opened in different places of the district.

Waterways-Ferry service

The Government of Assam run thirteen ferries along the Brahmaputra including ferry plying in the Tinsukia district. The main ferry ghat of the district is Sadiya Saikhowaghat. The ferry is auctioned out by the government of Assam private contractors. The general maintenance and supervision of the ghat are done by the public works department.

In 1997-98, about 224785 passengers at Sadiya-Saikhowaghat are handed by ferries. Further, cangos weighing about 163024 quintals at this ghat are operated by these ferries. 1617 Nos. or vehicles, 1041 bicycles and 292 animals are also handled in this ghat during about period. Through this ghat Rs.578000 was collected as revenue of the govt.

Economic Development

During the British period, the district had not paid more attention for the development of the entire state. As a result, this district was also suffering from lack of attention in regard of her development in pre-independence days. It was after the independence the district received lower level of development of the initial stages of the start of planning process and after the exploration oil and coal in the district, the

development of the district has started in a highway

The role and share of different sectors of the economy of Tinsukia district show that agriculture plays an important role both in terms or contribution to the total GOP of the district and the percentage share of total population engaged in agriculture The following table gives the number of persons employed in the different sectors of the economy or Assam as well as in Tinsukia district

Table—IX

Percentage of Main Workers in different sectors of the economy, 1991Census

Note *Col No 7 and 8 are calculated on the basis sector – wise GDP in 1994-95 and sex-wise no of persons employed in each sector in 1991 Total GDP for males and females are estimated first on the basis of no of males and females employed in each sector and this total GDP is distributed among all males and females to arrive at per capita GDP

Source 1 Directorate of Economics and Statistics, Govt of Assam,
2 Census of India PCA 1991 Assa

The gross domestic product at factory cost during the year 1994-95 for the district is 104,007 lakhs in which the share of Primary sector is 62.2% and of secondary is 12.4% and the rest 25.5 is from the territory sector. The per capita income (GDP) is recorded at Rs. 9,998 per annum which is higher from all districts of Assam. The data on GDP from different sectors of all district and estimates of per capital GDP for males and females are presented in the above table.

About 29.0% of the total population of the district live below poverty line. As a part of welfare programmes under public distribution schemes, several food and other essential items are supplied to the people as per the norms of the government through various fair price shops in the district.

Char area

Introduction: The Char areas are those lands which are generally formed near the banks of big rivers. In Assam, such areas are usually found in low lying flood-prone zone from Sadiya to Dhubri inside of the mighty Brahmaputra river. The river Brahmaputra carries sand annually during flood and gets deposited in its nearby areas in the both sides of banks when the floods recede. The height of low lying plain areas near to the banks of the Brahmaputra raises by depositing sandy loam or silt loam in texture. As a result of deposition of enormous load of sediments in the middle of the river course, a large number almound-shaped river island called Chaparis or Chars are formed in Assam. The soil of these areas are of new alluvial nature. These are less acidic and are moderately rich in plant nutrients. A particular section of people begins to reside in these areas and starts cultivation too. But even though, these areas are not free from the menace of flood after their settlement also. During flood, the settlers of these areas have shifted to some other high lands to spend the period of flood and come back to their original place of abode after flood recedes. But sometimes, due to tremendous changes of river course, many chars remain free from the flood.

Administration

These areas are look after by the administration of Assam Government. They are to abide by rules and regulations or the State Govt. like general people. But they have some sorts of local self-Government of their own . In each Char village, a person is selected by the villagers as the head of the village whom is called 'Matbor' (Headman) in Muslim dominated Char areas. As a custom each and every persons are to follow his instruction, guidance or order. He has guided the people of his locality in their any collective issues. The opinion or decision given by Matbor in respect of common issues such as casting of vote to a particular candidate during election, dispute regarding any matter relating to land, religious or social has to be obeyed by all.

Profile of Char areas

In Assam, there are as many as 2235 Chars of varying sizes as on 1993-94 in the districts. The highest numbers of Chars are found in Dhubri district (480) followed by Barpeta district (310) and then Jorhat district (293). The lowest numbers of chars are found in Marigaon district (39). There is no char area in 9 districts of Assam. The Chars of Dhubri district cover an area of 86925.2 hectares followed by 27892.4 hectares at Barpeta district.

Socio-economic status

The socio-economic status of the people of the char areas are in fact said to be deplorable. The populace are mostly illiterates only about 13 to 15 percent of the total population of entire char areas are literate. The standard of attainment of education is mostly primary level only a few percent has attained high school level. Nearly 55 percent souls are living below poverty line in all char areas of Assam. Out of total 239,000 hectares char areas of Assam only. 167300 hectares are cultivable land. There are altogether 266707 farming families in char areas of Assam. The economic activities of the inhabitants of chars are generally cultivation and fishing. The low-lying char areas are favourable for growing Ahu and Bao rice and also jute. The settlers of char areas are generally grown these kinds of rice and potato in large quantity. They grow various types of vegetable for sale. Whatever the amount of crops they grown are unable to meet their both ends mouth. The house types of the char areas are mostly katchha made of thatch, bamboo, reed and mud. These houses are mostly huts. A very few families have their houses with C.I. sheets in roof. It will be a rare sight of pacca house with brick and cement.

The people of all Char villages are mostly used river water as their drinking water during rainy season. However, a very few villages have their hand-pump tube wells from where they collect their drinking water also. The villages are not connected by any roadway. The country boats are used for their communication during flood season. During winter season, the villagers come to nearest town by travelling on foot or bicycle.

Developmental Programme undertaken

Some developmental programmes have been undertaken by the State Government for the development of the people of these areas. The save drinking water source, medical sub-centres were provided by the government in some areas of different district. The school upto the level of lower primary schools, Middle schools are also established in some char areas. For higher education, the children have to go to nearby towns. The Assam Government has set up a Char Development Authority at Guwahati for all round development of Char people. In the district level, office of the Project Officers are established to look into projects undertaken for these areas. Various kinds of loans and grant-in-aids are also provided to the villagers by this department.

Never-the-less, the people of Char areas are maintaining a wretch lives from all aspects. Though they are hard workers still then they are unable to overcome their poverty at any cost.

Source Statistical figures quoted are supplied by the Director Char Areas Development, Assam, Dispur

Char Area Development in Tinsukia District

Out of 2,235 Char villages in 14 districts of Assam, 79 Char villages are in Tinsukia district. The total population of these 7.9 Chars is about 38,980 who are spread on the total area of 10,324 hectares of land. There are altogether 5,506 families in all Chars of the district.

The socio economic condition of Char dwellers as already explained above is very poor in the district in a sense that their earnings are very limited. They have no sufficient cultivable lands and whatever lands that have possessed are not fertile and moreover subject to flood. Generally all lands in Char areas are sandy. Only a few verifies of crops can be grown on such lands. Fish and other river products though available in rivers each and every household cannot exploit such river potentials because of lack of tools and equipments. However, some are engaged in fishing but not on commercial line but for their own consumption.

The Char dwellers are maintaining a very low standard of living with minimum amenities of civic life in this district as well. In all the 79 Char villages only a few lower primary schools, middle schools and High Schools are in existence. 85.8% population of Chars of Tinsukia district are illiterate. The children of Chars have to go to near by towns for their higher education. There is no communication facility. The inhabitants of the Chars have to travel through small country boats or raft during flood season and on other occasion they move on foots from residences to the

nearest place where road communication is available. No health centre is available in the Chars except in a few villages. The people of Chars do not have any facility of post office. Very often, they use river water for drinking and cooking purpose.

Prices and price Indices

Records on economy of the district mention that in the past, the base necessities were locally produced except salt which was obtained from Bhutias in exchange of rice through barter system. However, many of the items of daily necessities as well as food stuff are brought from outside the district. "It is therefore the price situation in Assam is though essentially a manifestation of all India phenomenon of rising prices, but the uprising of the price level here has been more pronounced due to certain factors like rapid growth of population, transport bottlenecks and virtual dependence on outside supply for essential consumer goods 1.

The figures of price indices of different categories can be seen in the following table.

Table-XI
Consumer Price Index in Assam (Base 1982 = 100)

Year	CPI for working class		CPI for Industrial workers		
	Guwahati	Assam	Guwahati	Assam	All India
1	2	3	4	5	6
1997	357	333	357	335	350
1998	405 (13 40)	374 (12 30)	405 (13.40)	380 (13.40)	405 (15.71)

Note : 1 Figures in brackets show percentage increase during 1997-98

Source Labour Bureau, Govt of India and Directorate of Economics and Statistics, Govt of Assam

As can be seen in the above table the price indices for Guwahati Centre which is the representatives of Tinsukia district is slightly more compared to Assam as a whole and equivalent with the all India level figures. However, the present increase in case of Industrial workers is less than in all India level.

No.1 Economic Survey of Assam, 1970 Department of Economics and Statistics, Government of Assam P., 70.

Cross-sectional comparison of CPI between food and non-food items (wholesale prices) in Assam show that the prices of non-food items are increasing more faster than food items. The situation is almost same between agricultural and non-agricultural commodities which indicate that the farmers and poor people are in a disadvantage position than other classes of population in the district.

VIII General Administration

Tenancy

The two acts namely the Assam Temporarily Settled Districts Tenancy Act, 1935 and the Assam Adhiar Protection and Regulation Act 1948, prevailing earlier are now replaced by the Assam (Temporarily Settled Areas) Tenancy Act 1971 which is in force in Tinsukia district alongwith all plain districts of Assam.

The broad features of the Act are –

(I) Share coppers are treated as tenants.

(II) Right to occupancy acquire on occupation for 3 years against 12 years prescribed earlier.

(III) The Govt. is empowered to acquire the right of ownership and the intermediary right of ownership and the intermediary rights in favour of occupancy and non-occupancy tenants. Till the Government do so, a right is given to the tenant cultivating their own land to acquire such right by payment of compensation.

(IV) Illegally ejected tenants are restored possession of the land through circle court.

(V) A limited right to mortgage by non-occupancy tenants to obtain credit from financial institutions is provided. The occupancy tenants are given permanent heritable and transferable right of the land of his holding.

The Assam Urban Area Rent Control Act 1972 was enacted to regulate relation between the landlord and the tenant in so far as the tenancy relates to a house in urban areas i.e. areas covered by municipality and small towns constituted under the Municipal Act, 1956. The Act has two fold objectives.

(1)To give the tenant a security of tenure at a fair rent and

(2) To prevent the landlord from evicting the tenant except on specified grounds. 'Fair rent'

mentioned in the Act is the amount not exceeding the figure of "standard rent" which is calculated under the procedure specified in the Act. The civil court will decide any dispute between the land-lord and the tenant in respect of the rent payable by the tenant to the land-lord and ejectment of the tenant by land-lord under certain circumstance.

Revenue Administration

The revenue administration has historically been the primary responsibility of the District Administration. This involves collection and fixing of land revenue registration, mutation and overall management in regard to land, both private and public. The Revenue Branch of the Deputy Commissioner's office is looked after by the Additional Deputy Commissioner (Revenue). Besides, there are outlying Revenue Circles in the district supervised by Circle Officers. The Mauzadars under the Circle Officers are responsible for collecting land revenue (Khazana) from land owners (Pattadars). All the Circle Officers are required to submit 'Doul' (demand of revenue) to the Deputy Commissioner and after his approval, Mauzadars are to collect revenue as per the demand. In the year 1995-96, the total collection of land revenue in the district was Rs. 3157,000 against the total demand both current and arrears of Rs. 22950,000 which comes to about 13.8%.

Development

The district development is one of the important objectives of the District Administration. The Deputy Commissioner being the head of the district is mainly responsible to look after over all developmental activities in the district undertaken on various schemes such as MP's Local Area Fund (MPLAD), MLA's Fund, United Fund, Sub-Divisional Plan Scheme Fund, Border Area Development Fund and etc. For these activities, the Deputy Commissioner assigns one Additional Deputy Commissioner (Development) the specific task or looking after and coordinating various developmental activities under going in various sectors. The additional Deputy Commissioner (Development) is aided in this matter by the decentralized Planning Cell of the Deputy Commissioner's office. All departments involved in the developmental activities of the district, like PWD, Irrigation, Health, Education and many others work in co-ordination and a District Development Committee (DDC) headed by the Deputy Commissioner has been in place to ensure this co-ordination. Under the Government Policy of rapid upliftment of rural population, a District Rural Development Agency (DRDA) is functioning in the district which has the Deputy Commissioner as the Chairman and one Project Director as its functional head. All schemes for Rural Development are implemented by agencies in co-ordination with some Development Blocks situated in outlying rural areas of the district. These Development Blocks are supervised by Block Development Officers and Senior Block Development Officers.

Local Administration

The elected bodies of Corporation, Municipality and Town Committee are responsible for management and implementation of various developmental programmes of urban areas and Panchayat Bodies for the rural areas. Tinsukia district has four urban local administration bodies as follows:-

1. Tinsukia Municipal Board.
2. Doom Dooma Town Committee.
3. Makum Town Committee.
4. Digboi Town Committee.

As for the rural areas in Tinsukia district, a hierarchy or local administrative bodies is in place with Zila Parishad at the top (Sub-division level) followed by Anchalik and Gaon Panchayats which cover a total number of 1151 villages in the district.

System of Local Self Government :

The present system of local self government is a legacy of the British administration. However, some forms of local self government were in existence even during the pre-British days such as institution like Namghar etc. Initially these Panchayats were constituted as Local Boards in 1882. The Assam Panchayats Act, 1959, which came into force in 1960, abolished the Local Boards and under this Act a three-tier Panchayat Raj System was introduced in Assam. However, the Panchayat Act 1972, which came into operation from 5th May 1973, changed over the system to two-tier system of Panchayats instead of the three-tier system and the intermediary Anchalik Panchayat having been abolished.

The urban units are categorized as Municipal Board, Town Committee and Municipal Corporation. In Tinsukia district, there is one Municipal Board and three Town Committees. There will be one Chairman and Vice-Chairman in Municipality and the Chairman is the head of the administration. He presides over meetings of the Municipality. He is entrusted with the implementation of the schemes taken up by the Municipality. He is also invested with the financial

powers to manage the affairs of the Municipality. The Municipality has various sources of revenue, and in addition, regularly receives annual grants from the government. Besides government grants, they earn revenues from levies, taxes on holdings, rickshaws, carts, bicycles, stalls, open space markets, cinema houses etc.

Some important duties of the Municipalities and Town Committees are to maintain road and bridge under their jurisdiction and to look after the sanitation of public health, laying out of parks, establishment of veterinary of dispensaries, libraries, fire brigades, supply of protected water, street lighting etc.

Autonomous District Council

In case of districts which have Autonomous District Councils most of the powers and function of Deputy Commissioners are transferred to Autonomous District Council. Such District Council have both Executive and Legislative powers. The Committees are empowered to take decision to establishment of village, town committee and council. District council have also the powers to establish, construct or manage primary school, dispensaries, markets, roads, bridge, etc.

In Tinsukia district there is not Autonomous District Council.

Law and Order

Maintenance of Law and Order is another important aspect of the district administration and the Deputy Commissioner also being the District Magistrate is responsible for proper maintenance of the same. The Deputy Commissioner is aided by the Additional District Magistrate and Sub-divisional Magistrate. The Circle Officers of the Circles also function as Executive Magistrate and are responsible for maintenance of Law and Order in their respective circle areas. The District Magistrate and other magistrate take the necessary assistant from the police department for any necessity. Police administration of the district is headed by the Superintendent of Police. The Police department has an infrastructure of some police station and some out post with other auxiliary establishment in the district. The incident of crime in the district is not less compare to the other parts of the State. The number of different cases of the crimes reported are presented in the following table.

Table–XII
Cases of crime in Tinsukia district – 1998.

Cases of crime	No of cases reported		Percentage to total crimes in State
1	2	3	4
1. Murder	1,665	115	6.9
2. Rape	744	41	5.5
3. Kidnipping	1,471	43	2.9
4. Dociaty	928	36	3.9
5 Robbery	1,082	71	6.6
6. Burglary	3,696	185	5
7. Riots	3,548	15	0

Source Additional Director General of Police (CID) Government of Assam

As may be seen in the above table, the incidents of murder and robbery are relatively more compared to the other type of crimes where as very few case of riots are found reported. However, the rates of conviction are very less in the district as well as in the State as a whole.

Accidents : In year 1999 about 100 accidents on National Highway and 12 on other roads are reported. Out of total accidents occurred in the State only 4.94 percent accounts in Tinsukia district. In terms of accidents among all districts of Assam Tinsukia stands in 6th place.

Health and Family Welfare

Literary works of the mediaeval period referred to Kaviraja and *Ojhas* who attended to the ailments of the people and they were popular even during the early part of the British Rule. But preventive side did not receive much attention at that time.

Fever and bowel complaints used to take heavy tolls of life. Cholera, small-pox and Kalazar were other deadly killer diseases. However due to modern scientific medical facilities in recent times, there is lot of improvement in the health conditions of people. At present Dysentery, Diarrhea, Influenza, Tuberculosis, Rheumatism, Typhoid, Bronchitis, Measles etc., are continued to be the most common diseases in the district but loss of life due to these diseases are kept minimum with a lot of precautionary measures. Number of Hospitals, Dispensaries, etc., are available in the district are shown under relevant section.

Family Planning

Good progress has been noticed in family planning in the district. During 1998-99, about 1596

women have undergone Tubectomy operation. Further 558 women have adopted Copper 'T' besides 16636 and 1653 are using condom and Oral Pills in the district respectively in the same year.

Vital Statistics

In the past vital statistics were compiled from the Hat-Chitas maintained by Gaonburas or village headmen. The Hat-Chitas were submitted monthly to the Mauzadars who in turn compiling these data on a monthly statement and submitting to the district Medical Officer.

With the enactment of Assam Panchayat Act, 1959, the collection of vital statistics was entrusted to the Secretary of the Gaon Panchayat. He has to submit monthly return to the Block Development Officer, who in turn submits a consolidated return to the district medical officer and Civil Surgeon at that time. In the urban areas, the vital statistics were received from the Chairman, Municipal Board or Town Committee. In the tea Gardens where registration of vital statistics was compulsory prior to the above referred Act, Tea Garden managers maintained a register of birth and deaths and bound to submit a report monthly to the District health Officer. The District Health Officer submitted returns of the whole district to the Director of Health Service of the State. In case of areas of railway stations, the Station Masters were keeping register of births & deaths within their jurisdictions and were reporting to the Chief Medical Officer, North-East Frontier Railway who in turn was submitting the returns to the Director of Health Services. Before implementation of RBD Act, 1969 in the State the registration of births and deaths was not compulsory except in Teas Estates. Only after 1978, the registration of births & deaths became compulsory under the RBD Act, 1969, that came into force by Assam Registration of Births & Deaths Rules, 1978. Again in 1999, the Government of Assam framed Registration of Births & Deaths Rules, 1999 under the revamped system of Civil Registration that initiated by the Central Government which is now in operation. In Tinsukia district, at present all Primary Health centres are registration centres of births & deaths for rural areas and the Municipal Board and Town Committees are registration centre for urban areas. Moreover, some other medical and non-medical institutions are also made as registration centres. The Registrars of birth and death register all the events of births and deaths occurred in their jurisdictions. They compiled all the events and submit monthly reports to the Joint Director of Health Services who is designated as District Registrar of Births & Deaths. The district register in turn compiled all the events for the entire district and submitted the returns to the Director of Health Services who is the Chief Registrar of Births & Deaths for Assam. The Chief Registrar of Birth & Deaths compiles the figure for State as a whole and sends report to the Registrar General of India periodically.

In Tea Estates the events of births & deaths are collected by the In-Charge of the Tea Estates and these are reported to their respective registration centre.

****

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the

servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the

exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo
9 Kaibartta
10 Lalbagi
11 Mahara
12 Methar,Bhangi
13 Muchi, Rishi
14 Namasudra
15 Patni
16 Sutradhar

Scheduled Tribes :

I. In the autonomous district :

1 Chakma

2 Dimasa,Kachari

3 Garo

4 Hajong

5 Hmar

6 Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam

7 Any Kuki Tribes Including:

II. In the State of Assam excluding the Autonomous District

1 Barmans in Cacher

2 Boro, Borokachari

3 Deori

4 Hojai

5 Kachari, Sonwal

6 Lalung

7 Mech

8 Miri

9 Rabha

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such

professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the

terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5.

This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course

that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment,

Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 1,150,062 in 2001 Census. Male comprises 601,099 while female consists of 548,963 Out of the total population of the district, 926,105 fall under rural and 223,957 are under urban areas of the district. In rural areas 479,853 and 446,252 are males and female respectively. Accordingly 121,246 and 102,711 are males and females respectively in urban of the district. The percentage of urban population in the disrict Tinsukia is only 19.47. The district is a rural base place in which 81 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +19.5 which is higher than the state rate. In the district, there are only 4 towns . Tinsukia Town is only town with Municipal Board and three town is with Town Committee status and six census town. The density of the district is 303 persons per sq. kms. which is lower than the state density (340). The sex ratio in the district is 913 as against 935 in the State. Out of total population of the district, 40.6% is total workers of which 50.7% and 29.5 % are male and female respectively. The percentage of non- workers is 59.4 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 31.2 %, 6.2%, 1.8% and 60.8% respectively.

The literacy rate is 61.0% in the district of which 70.2% is for males and 50.8% is for females. The district literacy rate is above the state literacy rate (63.3)%.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

TABLE-1

DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial No	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Sadiya	77,111	77,111	-	92,012	92,012	-	19 3	19 3	-	0 0	0 0
2	Doom Dooma	299,592	272,478	27,114	363,495	328,571	34,924	21 3	20 6	28 8	9 1	9 6
3	Tinsukia	308,947	235,029	73,918	374,670	266,547	108,123	21 3	13 4	46 3	23 9	28 9
4	Margherita	276,648	219,006	57,642	319,885	238,975	80,910	15 6	9 1	40 4	20 8	25 3
District Total:		**962,298**	**803,624**	**158,674**	**1,150,062**	**926,105**	**223,957**	**19.5**	**15.2**	**41.1**	**16.5**	**19.5**

Table 1 presents the decadal change in population of Revenue Circle by resident during 1991-2001 Census. It is noticed from the table that population of the district is 1,150,062 in 2001 Census which forms only 4 3 percent of the total population of the state The rural population of the district comprises 80.5 percent and urban population 19.5 percent. The decadal variation in then district during 1991-2001 is 19.5 percent of which it is 15 2 percent for rural and 41 1 percent in urban.

Among Revenue Circles, it is noticed that the highest number of population is in Tinsukia Revenue Circle with 374,670 or 32.6 percent of the district total population. It is thereafter, followed closely by Doom Dooma Revenue Circle with 31.6 percent. The lowest population 92,012 0r 8.0 percent of the district total population is noticed in Sadiya Revenue Circle. The equal growth rate 21.3 percent is seen in Doom Dooma and Tinsukia Revenue Circles. The lowest growth rate of 15.6 percent is found in Margherita Revenue Circle. The growth rate in urban areas of Tinsukia Revenue Circle is more than other Revenue Circles in the district.

7	Margherita	27,899	24,290	2 (0 9)	7,480	7,310	0 (0 0)	0	0
Districts (Rural) Total:		**116,882**	**106,344**	**5 (0.5)**	**18,122**	**16,849**	**0 (0.0)**	**0**	**0**

The highest number of inhabited villages falls under Kakapathar CD Block followed by Margherita CD Block (233) whereas the highest number of persons lives in 178 villages of Hapjan CD Block. In 155 villages, population in the range of 1--200 persons live in each villages, similarly, in 306 villages 200-499 persons, 500-999 persons in 217 villages 1000-1999 persons and in 80 villages 2000-4999 persons live in each village. There is only 5 villages where 5000-9999 persons reside in each villages. No village is in existence with 10,000 and above persons in the district.

TABLE - 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of town
	1
(a) New	
(i) Statutory town	Nil
1	
2	
3	
(ii) Census town	
1 Lodo Town	
2 Lido Tikok	
3	
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	
1	Nil
2	
3	
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	
1	Nil
2	
3	
(iii) Census towns of 1991 census are notified as statutory town in 2001 census	
1	Nil
2	
3	
(c) Declassified	Nil
1	
2	
3	
(d) Wholly merged with other town(s)	Nil
1	
2	
3	

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

The table shows that there is no new statutory town comes up in 2001 Census but four new Census Towns have formed in this Census. No other change has taken place during 2001 Census.

TABLE-4
DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	19	1 7	5,376	0 6
11-20	4	0 4	110	0 0
21-50	22	2 0	1,648	0 2
51-100	46	4 2	8,191	0 9
101-200	135	12 2	45,840	4 9
201-300	170	15 4	85,919	9 3
301-500	280	25 3	245,092	26 5
501 +	431	38 9	533,929	57 7
Not known	0	0 0	0	0 0
District Total: 1,107		**100.0**	**926,105**	**100.0**

Population Density (Rural) of the district: 455

The table above gives the distribution of villages by population density. The population density of rural in the district is 455 persons. Out of 1,107 total number of inhabited villages in the district, 431 villages are in the range of population density 501+ and forms the high proportion of 38.9 percent villages. The lowest is noticed in the range between 11-20 with only 4 number of villages. Except for the ranges between 0-10 and 11-20, where the population distribution is fluctuating, the population in the other ranges keeps increasing with the higher in the range of population density. The population density range between 501+ is recorded the highest population with 533,929 or 57.7 percent and the range follows it between 301-500 persons with 245,092 or 26.5 percent. The lowest, is in the range between 11-20 which is recorded negligible in proportion of population.

TABLE-5
SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			Tinsukia		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	863	863	—
1911	915	923	626	883	883	—
1921	895	906	613	870	886	549
1931	874	885	574	818	839	475
1941	875	886	605	847	865	491
1951	868	878	663	814	832	558
1961	869	887	661	809	845	621
1971	896	912	744	855	889	709
1981	—	—	—	—	—	—
1991	923	934	838	891	912	788
2001	935	944	872	914	931	848

Note Sex ratio has been defined here as the number of females per 1000 males

As against 919 sex ratio in the state in 1901, the sex ratio in Tinsukia district was 863 which was much lower. There was no urban area in Tinsukia district upto 1911. The sex ratio in Tinsukia district was below 900 in all decades except 2001. It is 914 females in 2001 as against 935 in the state. The sex ratio for rural and urban in the district is lower than the state in 2001. The urban sex ratio is much lower than the state in all decades.

TABLE-6
SEX RATIO BY TAHSILS, 2001

Sl No	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Sadiya	931	931	-
2	Doom Dooma	925	933	852
3	Tinsukia	899	935	815
4	Margherita	912	919	889
District Total:		**913**	**930**	**847**

The table-6 presents the sex ratio by Revenue Circle. The district sex ratio is 913 and it is below the state sex ratio of 935. The rural sex ratio is recorded 930 and it is higher than the sex ratio of urban which is recorded 847 females per one thousand males. Among Revenue Circles, Sadiya Revenue Circle. records the highest sex ratio with 931 and the lowest is in Tinsukia Revenue Circle with 899 females per 1000 males.

TABLE-7
SEX RATIO BY CD BLOCKS, 2001

Serial No	Name of C D Block	Sex ratio
1	2	3
1	Sadiya	931
2	Saikhowa	931
3	Hapjan	936
4	Kakapathar	941
5	Guijan	929
6	Itakhuli	940
7	Margherita	907
District (Rural) Total:		**930**

The sex ratio in district Tinsukia is 930 per 1,000 males The sex ratio is highest in Kakapathar CD Block followed by Itakhuli. The sex ratio is less than district sex ratio in two CD Blocks. In the rest Revenue Circles, it is higher than the district sex ratio.

TABLE-8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	37	3 3	17,251	1 9
700-749	21	1 9	7,281	0 8
750-799	24	2 2	12,937	1 4
800-849	81	7 3	54,894	5 9
850-899	161	14 5	146,245	15 8
900-949	283	25 6	260,335	28 1
950-999	252	22 8	274,952	29 7
1000-1099	201	18 2	139,773	15 1
1100+	47	4 2	12,437	1 3
District Total:	**1,107**	**100.0**	**926,105**	**100.0**

Sex ratio (Rural) for District: 930

The table shows the sex ratio of rural population by ranges. From the table it is observed that the distribution of the highest number of villages is noticed in the range between 900-949 with 283 villages or 25.6 percent with the population of 260,335. The lowest is noticed in the range 700-749 with 21 villages with 7,281 population. However, there are 201 villages and 47 villages in the ranges between 1000-1099 and 1100+ respectively which indicate number of females are more than males

TABLE-9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No	Name of U A / Town	Urban status of town	Sex ratio
1	2	3	4
1	Doom Dooma (TC)	TC	820
2	Makum (TC)	TC	894
3	Tinsukia UA		815
4	(a) Tinsukia (MB+OG)		812
5	(i) Tinsukia (MB)	MB	801

		Rural	**159,657**	**81,312**	**78,345**	**964**
		Urban	**25,188**	**13,100**	**12,088**	**923**

The sex ratio for 0-6 age group children in the district is 958 and 964 for rural and 923 for urban areas. Margherita Revenue Circle has the highest 963 sex ratio followed by Tinsukia. It is below the district sex ratio in two Revenue Circles namely Sadiya and Doom Dooma. The sex ratio in rural is more than urban.

TABLE-11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Sl. No.	Name of CD Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Sadiya	16,543	8,476	8,067	952
2	Saikhowa	17,535	8,929	8,606	964
3	Hapjan	32,405	16,538	15,867	959
4	Kakapathar	32,716	16,596	16,120	971
5	Guijan	14,385	7,315	7,070	967
6	Itakhuli	16,145	8,116	8,029	989
7	Margherita	29,928	15,342	14,586	951
District (Rural) Total:		**159,657**	**81,312**	**78,345**	**964**

In CD Blocks, the sex ratio for 0-6 age group children is 989 in Hakhuli CD Bolck followed by Kakapathar CD Block. The sex ratio is lower than the district sex ratio in 3 CD Blocks.

TABLE- 12
SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	104	9	4,924	3
700-749	48	4	5,421	3
750-799	63	6	7,010	4

District Total:		**Total**	**1,150,062**	**31,315**	**67,234**	**2.7**	**5.8**
		Rural	**926,105**	**20,194**	**64,538**	**2.2**	**7.0**
		Urban	**223,957**	**11,121**	**2,696**	**5.0**	**1.2**

The table presents the number and percentage of Scheduled Castes and Scheduled Tribes population in Revenue Circles with the break up into totals, rural and urban. The Scheduled Castes population of the district is 31,315 and Scheduled Tribes population is 67,234 and form a proportion 2.7 percent and 5.8 percent of the total population by both communities respectively. Both the percentage of Scheduled Castes and Scheduled Tribes fall short to the percentage of the state which is recorded 6.9 percent for Scheduled Castes and 12.4 percent in Scheduled Tribes. Among the Revenue Circles in the district, the highest proportion of Scheduled Castes is recorded in Tinsukia Revenue Circle with 3.3 percent and the highest proportion of Scheduled Tribes is noticed in Sadiya Revenue Circle which is recorded 23.8 percent of the total population.

TABLE-15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial No.	Name of CD Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Sadiya	92,012	2,669	21,889	3	24
2	Saikhowa	95,113	2,361	13,509	3	14
3	Hapjan	186,018	1,919	3,124	1	2
4	Kakapathar	183,961	1,772	11,531	1	6
5	Guijan	87,256	4,737	4,245	5	5
6	Itakhuli	100,459	1,414	1,307	1	1
7	Margherita	181,286	5,322	8,933	3	5
District (Rural) Total:		**926,105**	**20,194**	**64,538**	**2**	**7**

The CD Block wise distribution of population shows that in Sadiya CD Block has the highest number of population for Scheduled Tribes having 23.6% followed by Saikhowa CD Block. Margherita CD Block has the credit of having highest number of Scheduled Castes population with 5,322. But in term of percentage, it is the highest in Guijan with 5.4%.

TABLE-16
PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	831	75.1	0	0.0
Less than 5	197	17.8	4,437	22.0
5-10	36	3.3	2,440	12.1
11-20	17	1.5	2,033	10.1
21-30	11	1.0	2,279	11.3
31-40	6	0.5	5,349	26.5
41-50	0	0.0	0	0.0
51-75	3	0.3	1,061	5.3
76 and above	6	0.5	2,595	12.9
District Total :	**1,107**	**100.0**	**20,194**	**100.0**

The table shows the proportion of Scheduled Castes population to total population in villages. Out of 1,107 total number of inhabited villages in the district, 831 or 75.1 percent villages have not a single Scheduled Caste in the village. However 197 or 17.8 percent villages are recorded Scheduled Castes population less than 5 percent. It is observed that with the higher the percentage range of Scheduled Casts population, less number of villages are recorded in each range. In the range 31-40, there are 6 villages with a population of 5,349 or 26.5 percent of the total population and it is followed by the range which is less than 5 villages with Scheduled Castes population of 4,437 or 22.0 percent of the total population.

TABLE-17
PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	603	54.5	0	0.0
Less than 5	271	24.5	3,787	5.9
5-10	61	5.5	6,051	9.4
11-20	49	4.4	7,383	11.4
21-30	19	1.7	3,494	5.4
31-40	16	1.4	3,218	5.0
41-50	11	1.0	2,601	4.0
51-75	25	2.3	10,992	17.0
76 and above	52	4.7	27,012	41.9
District Total:	**1,107**	**100.0**	**64,538**	**100.0**

The table presents the population of Scheduled Tribes population to total population in villages. As discussed earlier, the number of Scheduled Tribes population is very few. In the percentage range where there is a nil population of Scheduled Castes, the number of villages in this range is 603 or 54.5 percent of the total number of villages. In the range of less than 5, there are 271 or 24.5 percent villages and suddenly it dropped down to 61 villages in the next higher range i.e. in the range 5-10. It is noticed from the table that with the higher the percentage range of Scheduled Tribes , less the number of villages are recorded in each range. The highest number of Scheduled Tribes population is in the range between 76 and above which is recorded 27,012 and followed by the range between 51-75 where the number of Scheduled Tribes are 10,992. The least number of villages with 11 in number is noticed in the range between 41-50 with the population of 2,601.

TABLE-18
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial No.	Name of UA ^ / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

District (Urban) Total		**223,957**	**11,121**	**2,696**	**5**	**1**

The table shows that the percentage of Scheduled Castes and Scheduled Tribes population in urban of the district is very less. The percentages are 5.0 percent and 1.2 percent for Scheduled Castes and Scheduled Tribes respectively. However, the percentage of Scheduled Castes population is seen high in LidoTown CT than other towns. Similarly, the percentage of Scheduled Tribes population is found more in Bahbari Gaon CT. It is also observed that there is Scheduled Tribes population in Borgolai Grant No. 11 CT.

TABLE - 19
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C D BLOCKS, 2001

Sl. No.	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Sadiya	913	939
2	Saikhowa	912	981
3	Hapjan	929	962
4	Kakapathar	827	967
5	Guijan	933	901
6	Itakhuli	815	846
7	Margherita	875	895
District (Rural) Total :		**894**	**943**

The sex ratio in CD Blocks of Tinsukia district for Scheduled Castes and Scheduled Tribes shows that the sex ratio for Scheduled Castes. is seen higher in Guijan CD Block followed by Hapjan CD Block. Similarly in case of Scheduled Tribes it is the highest in Kakapathar CD Block followed by Hapjan CD Block. However it is less than the district sex ratio for Scheduled Castes in three CD Blocks and for Scheduled Tribes it is less in 4 CD Blocks.

TABLE - 20
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A.^ / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

The table shows number and percentage of literates and illiterates by Revenue Circles in total, rural and urban. The number of literates and illiterates are given in absolute numbers for person, male and female. It also presents the percentage of literates and the gap in male /female literary rate. The percentage of literates in the district stands at 61.0 percent which is a little less than state literary of 63.2 percent. It is observed from the table that the male literates which constitutes 70.2 percent of the male population stands higher than the female literates which form 50.8 percent of the total female population. This same phenomenon of male literates stand higher than female literates which is noticed both in rural and urban of the district. However, the gap in male/ female literary rate is noticed higher in rural than in urban with a record of 21.3 in rural as against 19.4 percent in urban. Among the Revenue Circles, the highest percentage of literates is noticed in Sadiya Revenue Circle with 67.2 percent and the lowest is in Doom Dooma Revenue Circle which is recorded 53.6 percent. It is also observed that male literary rate in all Revenue Circles is higher to that of the female literary rate.

TABLE-22

NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C D BLOCKS, 2001

Sl No	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-femal literacy rate

District Total	1,107	100	926,105	100 0

Literacy rate for District: 61.0

The table gives the distribution of villages by literacy rate range. It is observed from the figures in the table that in distribution of villages, the number of which keeps increasing with the rise in the range of literacy rate. This increasing trend is noticed, starting from the range 1-10 with 13 total number of villages till it reach the range between 71-80 where it is recorded 229 villages. However, in the subsequent ranges the number of villages starts decreasing. In distribution of population by range of literary rate, it is observed that in the first four ranges of literary rate, there is an increasing trend of population with the rise in the ranges of literacy rate. But from the range between 41-50 population distribution in each range is fluctuating. The highest population distribution is noticed in the range between 71-80 which is recorded 179,752, and the lowest is in the range between 100+ which is recorded 5 villages with a population of 49 only

The table presents number and percentage of Main workers, Marginal workers and Non-workers by sex in Revenue Circles. The district rate of total workers (Main and Marginal workers) is 40.6 percent which is higher than the state total workers rate of 35.7%. However, in the break up of total workers into Main workers and Marginal workers, the percentage recorded in the state level with 74.6 percent and 25.4 percent respectively, are higher than that recorded in the district level with 30.4 percent and 10.1 percent respectively. Same phenomenon is noticed in non-workers where the state percentage with 64.3 percent is higher than that of the district which is recorded 59.4 percent. In the distribution of workers and non-workers by sex, it is noticed that the male workers which constitutes 50.7 percent, predominate the female workers which is only 29.5 percent of the total female population. In case of non-workers, however, it is vice-versa. It is observed that as usual, the female marginal workers predominate the male marginal workers. Among the Revenue Circles, it is noticed that Sadiya Revenue Circle stands the highest in the proportion of workers with 49.6 percent and the lowest is Tinsukia Revenue Circle with 38.7 percent.

District (Rural) Total:		**Persons**	**926,105**	**281,234**	**30.4**	**111,435**	**12.0**	**392,669**	**42.4**	**533,436**	**57.6**
		Males	**479,853**	**191,314**	**39.9**	**47,524**	**9.9**	**238,838**	**49.8**	**241,015**	**50.2**
		Females	**446,252**	**89,920**	**20.2**	**63,911**	**14.3**	**153,831**	**34.5**	**292,421**	**65.5**

The percentage of total workers in the district is 42.4 percent of which 42.8 percent for males and 34.5 percent for females. The highest percentage of total workers is seen in Sadiya CD Block and the lowest is in Saikhowa CD Block. The main worker being 30.4 percent, 39.9 percent goes to male and 20.2 percent to female in the district In the district 12.0 percent is the marginal workers. In this case, female exceeds the males in percent as wellas in number . Similarly, female non-worker exceeds male's non-worker percentage.

Note: Percent of Worker to total worker are given in brackets

The table presents the distribution of workers by sex in four categories of economic activity in Revenue Circles. Out of the total workers of 466,351 in the district distributed into four categories of which the Other workers form the biggest share with 60.8 percent followed by the categories of cultivators with 31.2 percent. Thirdly, the Agricultural labourers form 6.2% percent of the total workers and lastly, the Household Industry workers are very few in number and in percentage it is 1.8 percent of the total workers. In the male-female break up of total workers, it is observed that except in the category of other workers, the female workers predominate the male workers in all three remaining categories, i.e. Cultivators, Agricultural Labourers and Household Industry workers.

Among the Revenue Circles, it is noticed, that in the category of cultivators, Sadiya Revenue Circle recorded the highest proportion with 81.6 percent and the lowest is in Tinsukia Revenue Circle with 14.1 percent. In Agricultural Labourers, it is noticed that except in Sadiya Revenue Circle which is recorded 3.8 percent, all the remaining Revenue Circles recorded the proportion of workers a little above 6.0 percent. The Household Industry workers are very nominal which is in between 1-2 percent. The other workers, however, form the biggest group of workers from among four categories. Tinsukia Revenue Circle stands the highest among Revenue Circles which constitutes 77.3 percent followed by Doom Dooma Revenue Circle with 62.8 percent. The lowest is noticed in Sadiya Revenue Circle with 12.7 percent.

				(34.5)	**(39.8)**	**(8.9)**	**(2.6)**	**(48.7)**

Note: Percent of Worker to total worker are given in brackets

The table shows category wise number of workers and their percentage in each CD Blocks. The percentage of total workers is 42.4 percent and of these total workers, cultivator is 36.9 percent. Agricultural Labourers 7.2 percent, Household Industry workers 1.9 percent and other worker 54.0 percent It is found that other workers percentage is more than cultivator's percentage. The percentage of cultivators is the highest 81.6 percent in Sadiya CD Block whereas it is the lowest in Itakhuli CD Block. The percentages of Agriculture Labourers and Household Industry workers are very low in all CD Blocks. Male and female workers of these two categories are almost equal. The gap between the two is nominal. In Itakhuli CD Block, the percentage of other workers is higher than all other CD Blocks. People in this CD Block mostly confine to non-Agricultural job.

Note - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

\# Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table shows the different amenities that are enjoyed by villages with its total number. Out of 1,107 villages the people of 936 villages get education facility in their villages. 97.1 percent villages have improved drinking water facility. The medical is available for the people of 198 villages. The facility of Post-Office, Telephone, Bank and Agricultural Credit Societies are availed by people of less number of villages. The power supply is getting by 871 or 78.7 percent of the villages. In 694 villages and 405 villages are obtained facilities of approved by Pucca Road and transport communication respectively. Similar is the case in respect of CD Blocks also.

\# Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or utside the premises it is considered as having access to 'Improved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

The table indicates that out of 461 villages having population in the range of 1-499, 369 villages get education facility. Out of 344 villages having population in the range of 500-990, 296 villages get education and so on. Out of 461 villages having population in the range of 1-449, only 51 villages have medical facility. Similarly 65 villages with population in the range of 500-999 have medical facility and so on. Likewise in other facility also different villages with different population ranges enjoy other amenities.

TABLE- 42

DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial No	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Sadiya	145	25,688	70 2	2 6
2	Saikhowa	130	23,206	71 2	1 0
3	Hapjan	178	35,945	85 4	0 0
4	Kakapathar	243	44,821	79 9	0 8
5	Gurjan	90	15,893	76 9	0 0
6	Itakhuli	98	19,623	81 8	2 4
7	Margherita	223	38,426	73 3	0 9
District Total:		**1,107**	**203,602**	**77.4**	**1.0**

Note : - Cultivable area = irrigated area + unirrigated area

Out of the total areas of the district as per Village Directory, 77.4 percent is cultivable land and only 1.0 percent is irrigated. A big area is covered by Kakapathar CD Block having 79.9

percent cultivable land. But Margherita CD Block has occupied the second highest areas of the district and 73.3 percent is cultivable land out its total area. Hapjan CD Block has the highest percentage of cultivable land out of its total area but no land in this CD Block is found irrigated. Guijan CD Block is the smallest among all CD Blocks in term of area.

TABLE-43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl No	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Digboi (TC)	7 5	3 2	4 3	6 9	3 5	0 5	2 6	0	0 3
2	IV Doom Dooma (TC)	10 8	2 1	8 7	13 7	4 2	4 8	3 5	0	1 1
3	IV Makum (TC)	5 8	0 8	5 0	12 6	4	0	2 5	0	6 1
4	II Tinsukia (MB+OG)	15.1	1.9	13 3	11 5	3 8	0	5.0	0	2 6
	District Total	**12.7**	**2.0**	**10.7**	**11.3**	**3.8**	**0.7**	**4.3**	**0**	**2.5**

Per capita receipt in statutory towns of the district is Rs.12.7. It is highest in Tinsukia MB with Rs15.1. The receipt through taxes in the district is only Rs.2 but it is Rs. 10.7 from all other sources. The expenditure side of the urban areas of the district shows that it is Rs.11.3 which means a surplus of income. The greater amount of expenditure has been incurred in public works.

TABLE-44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Digboi (TC)	6.8	3.9	3.4	2.4	1
2	Doom Dooma (TC)	5.0	3.0	2.0	0 5	0 5
3	Makum (TC)	6.0	3.3	3 3	1 3	0
4	Tinsukia (MB+OG)	1.2	2 4	2 0	0 6	0 6
	District Total:	**2.9**	**2.7**	**2.3**	**0.9**	**0.6**

In urban of the district, there is 2.9 primary school per 10,000 population and 2.7 Junior Secondary/ Middle, 2.3 Secondary / Matriculation and so on. Digboi TC has more primary schools 6.8 number per 10,000 population followed by Makum TC. But in case of other categories of education institutions per 10,000 population is covered by less number of institutions.

TABLE-45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial No	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bahbari Gaon(CT)	0
2	Borgolai Grant No.11(CT)	0
3	Digboi(TC)	109
4	Digboi Oil Town(CT)	121
5	Doom Dooma(TC)	50
6	Lido Tikok(CT)	52
7	Lido Town(CT)	41
8	Makum(TC)	20
9	Margherita(CT)	56
10	Tinsukia(MB+OG)	31
Distrct Total:		**48**

As per table 48 beds are fallen per 10,000 population of the district. In Digboi TC, it is 109 beds for 10,000 population but it is 121 beds in Digboi Oil Town CT. There is no beds facility in Bahbarigoan CT and Borgolaigrant no.1 C.T. In Makum TC it is the lowest 20 beds per 10,000 population.

TABLE 46
PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	DIGBOI T.C.	20,553	0	0
2	DOOM DOOMA T.C.	19,806	1,525	7.70

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households .
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

In the District, Doom Dooma Revenue Circle has occupied the highest percentage of households which have enjoyed the benefit of having improved drinking water and in this respect. Tinsukia Revenue Circle processes the second position. The facility of electricity is availed by the highest percentage of households from Sadiya Revenue Circle 86.2 percent followed by Tinsukia 44.7 percent. The first position goes to Sadiya Revenue Circle in which the highest percentage of household enjoys the facility of bathroom. The facility of toilet is availed by the highest percentage of households in Tinsukia Revenue Circle and drainage facility also by same Revenue Circle. Generally, the existence of all facilities in the households is high in urban areas of all Revenue Circles expert low for improved drinking water facility in Doom Dooma Revenue Circle by a slight margin in decimal point and also low in case of bathroom of same Revenue Circle.

The table indicates the number and percentage of households of each Revenue Circles by type of fuel used for cooking. The table depicts that the majority of households in the district use fire wood for cooking followed by LPG. The use of LPG by households are more in urban areas. It is more in Tinsukia Revenue Circle whereas it is more in urban areas of Margherita Revenue Circle. The use of cow dung cake is very limited. The electricity is also not used by almost all households as a source of cooking in the district only 148 households use electricity in cooking in entire district. The number and percentage of households which used different cooking fuels can be seen in the table itself. There is 672 households in the district which have no any cooking arrangement in their houses.

The table shows the number of households who have availed banking services and the number of households having some specified assets as shown in the table. Out of total households of the district, a total of 61,313 households have availed banking services. The banking services availed by the households are more in rural areas than that of urban areas. In Revenue Circle level, the banking services availed by the households are more in Tinsukia Revenue Circle. This service is more in urban areas of Tinsukia Revenue Circle whereas it is more in rural areas of the other Revenue Circles.

Availability of all assets mentioned in the table is more for the households of Tinsukia Revenue Circle followed by Doom Dooma Revenue Circle in case of radio and bicycle and Margherita Revenue Circle for television and telephone. The households without having none of specified assets is more in Tinsukia Revenue Circle and Doom Dooma Revenue Circle.

* * * * * * *

(ix) Major social and cultural events, natural and administrative developments and significant activities during the decade.

The past history of Kamrupa depicts that Lakhimpur including Tinsukia had formed a part of the old kingdom of Pragjyotish/ Kamrupa during the time of Varman rule in Assam. This political status seems to have been continued till the Hindu dynasty declined. During the Chutiyas rule, they established their capital at Sadiya of Tinsukia district in 13th century AD. The Chutiyas and Sadiyal Kacharis worshipped Kechiakhiati Goddess with rites and sacrifices in the temple situated near Sadiya. After the down fall of Chutias, the Ahoms started their rule in Assam. They patron aged to celebrate social and cultural events in Assam with great spriti and gradeuer. The Ahom kings took various measures to develop and flourish the Assamese culture of holding Bihus. The Bara- Bhuyans were also held in high esteem in 15th and 16th century AD. Shri Shri Sankar deva being a member of Bara Bhuyans' family stepped up the epoch making Neo- Vaisnavism movement in Assam. The great saint poet of Assam was the main reformer of Assam culture. His doctrine of only God (Krishna or Bishnu) was established before the masses through his various writings of religious epics, performation of Nat/ Bhaona and establishment of satra. He and his followers set up many satras at Tinsukia through which the satria culture has been developed in Tinsukia. Socially, Tinsukia, as a result, becomes a cultural centre of Assam at present.

Festivities are a part of the social life of the people of Assam in general and Tinsukia district in particular. Many festivals are observed in this district with varying degree of enthusiasm by the people of different faiths at different time of a year. The Hindus observe many festivals ritualistic and religious festivals. Durga Puja which has of lesser importance in the district in the past has assumed increasing popularity and celebrates throughout the district with great rejoicing. The cultural programs and theatrical performation are held to depict the Sakti (strength) of mother Durga. Doljatra is anther religious festival which is celebrated with much joy in honour of Lord Krishna. The Phakuwa/ Holi is a most attractive function of Doljatra. In addition of the above religious festivals Hindus observe few other religious festivals annually like Sivaratri, Janma strami, Biswakarma Puja, Lakshmi Puja,and Kali Puja.

Bihu festivals are celebrated all over Tinsukia district. The Assamese observe three Bihu festivals during every year. Bred in the ancient peasant tradition, the people of Assam observe a sort of pagan devotion to nature. The Rangali/Bohag Bihu is a spring festival of dance and music. It is celebrated at a time when nature comes out in light, beauty and green colour. Bihu dances are a superb expression of a great art. Some traditional musical instruments used by the youths while sing and dances are performed in gay abandon. Bihu festivals being agricultural in nature, domestic cattle treating as Lakshmi (Goddess of wealth) of the households are look after by performing some rites in Bihu and pray for their good health in first day of Bhogali/Magh Bihu. Bihu festivities and dance are the expression of genuine folk joy. It is spring festival devoted mostly to the advent of the agricultural season. Torrential rain caused by monsoon brings a state of fertility to the earth. In this season, earth is ready to receive seeds sown for cultivation. The Bihu dances are therefore, a kind of fertility ritual having as main import amorous and emotional instincts of the heart of youths. The dances express mostly the exuberance of youths. Many of the songs associated with the dances are the expression of amorous feeling. The dances depict the prel onderance of romance and sex of the youths. Kati Bihu is performed in the time when granaries of farmers are left empty and hence it is c called Kangali Bihu. The farmers welcome Lakshmi, the goddess of wealth and prosperity and pray for good quality and quantity of products from their agricultural fields by lighting earthen lamps in the fields and under Tulsi (Black Basil) plant.

The tribes of Tinsukia district are also celebrated some of their traditional festivals. The sonowal Kacharis of the district perform Baith Puja. This festival observes in 'Chat'month (March). The Hagra dance is an important and famous dance of Sonowal Kachari. They also perform Swardeu Puja, Lakshmi Sabah, Baghdeu Puja, Garkhiiya Sabha, Ganjai/ Manai Puja etc. The Sonowal Kachari of Tinsukia district has enriched the culture of Assam. Their contribution in this line is on immense value in formation of Assamese culture which enrich the cultural granary of Assam

The district Tinsusia is well developed and all administrative offices are located in Tinsukia town and in the district. Most of offices buildings are constructed in modern line. From the natural development point of view, nothing has been observed in the district during the decade.

(x) Brief description of places of religious, historical or archaeological importance and places of tourist interest in the district

The most of places of religious, historical and archaeological importance of the undivided Lakhimpur district fall under the present Lakhimpur district along with Dibrugarh district. Only a few of these kinds are remained in Tinsukia district, the account of which are described below :-

Digboi

The word "Digboi" is derived from two words 'Dig' and 'boy' used by the British. Once upon a time when the British workers traveled various places of Joypur the old name of Digboi area for search of suitable field for tea cultivation, they used elephants as a means of travel. This area was swampy and full of forest. While traveling in swamp area by the elephant, a major portion of the elephant were entered in swamp. When the elephants came out from swamp, a kind of stain of oil had been seen in the belly of the elephants. The British immediately called for oil experts from British. The oil experts traveled these areas by the elephant to enquire about oil. Some illiterate labourers with some tools such as spade, dibble etc. for digging land were taken to these places and where they found probability of oil they ridding on the elephant gave order to the labourers by said 'dig boy dig'. The villages dug by labourers were later on termed these areas as 'Digboy'. With the passage of time, the Digboy word changed into 'Digboi' and the place is known as 'Digboi'.

This Digboi is the site of the oldest Oil Refinery in India. In 1889, the Assam Oil Company built a Refinery at Digboi. It is a neat and clean town under the management of the Assam Oil Company. Near this Census town, there is a town known as Digboi Town with Town Committee. The entire areas or both the towns are picturesque. It is more interesting from the tourists point of view.

Margherita

It is an industrial town situated on the bank of Dihing river. This hilly area was known as Joypur in ancient days. In 1885, the Assam Railway Trading Company had constructed a rail line from Dibrugarh to Makum. A bridge was also built on Dihing river near Makum and for the first time constructed the office of Coal Company on the bank of river Dihing.

The tea estates of Assam used Coal importing from Raniganj. The cost of Coal due to transportation had increased by 10 times to actual price. After finding the exploration of coal on the east side of the river Dihing, the experts were brought from Egypt and started digging of coal in this area. The name of this area was declared in opening ceremony of coal industry as Margherita after the name of queen Margarette for her honour by the Engineer of Egypt who established first coal industry here. After lapse of years this Margheratte Town has been changed into Margherita Town.

Now it is famous town for her coal and timber. The use or trained elephants for lifting and carrying heavy logs is an interesting sight to see.

Naharkatiya

Naharkatiya is located on the bank of the Buri Dihing river about 40 kms. from Digboi. Naharkatiya is rather flat and less densely forested. The road from Digboi to Naharkatiya runs through picturesque place dotted with village huts and paddy fields. The Buri Dihing passes in a zigzag way through the oil fields.

After the discovery of oil and natural gas the township at Naharkatiya has been developing rapidly. It is a very beautiful scenery to observe the township during night for its light.

Sadiya

Sadiya was the headquarters of the Sadiya Frontier Tract. Sadiya can be reached from Saikhowaghat, the last North East Frontier railway terminus.

Sadiya was known as Kundilnagar in the Epic Era. The love episode of Rukmini of Kundilnagar and Lord Krishna of Dwarka is well known in India mythology. The relies found near Sadiya represent the Epic era. The ruins are the two forts located on the gorges of the Dikrong and Dibong and are assigned by tradition one to Bhismaka and the other to Sisupala.

Sadiya is a flood affected area and erosion caused havoc to this area annually.

Tinsukia

Tinsukia is a commercially important town of upper Assam. The word "Tinsukia" has been derived from the Tinsukia Pukhuri (Triangular tank) excavated by the Matak kings, Sarbananda Singh. As mentioned in history portion of this DCHB, Bengmora is its old name.

The development of tea, coal, oil and natural gas in its neighbouring areas led to its growth as a centre of trade and commercial place. Tinsukia and its vicinity may be regarded as the industrial belt of Assam. Tinsukia is a centre place from where Digboi, Margherita, Doomdooma, Naharkatiya and other important places are well connected. Tinsukia is a picturesque place which delights tourists.

Boragi Than

This than is located near Sadiya on the bank of the river Kundil and on the road of the State Arunachal Pradesh. The king Gadadhar Singh put the second Satradhikar, Keshabdev of Auniati Satra in a forest as a punishment. During his exile he imparted religious guidance to the Sonowal Kacharis and as a result the place was treated as a Than by the people of that area. Another branch was established at Mankatta near Dibrugarh town but due to various difficulties in running the Than it was reverted to the original Than. The Tribal people pay homage at the Boragi Than on every important occasion.

(xi) Major characteristics of the district, contribution in the form of any historical figure associated with the district

The district Tinsukia is very rich in natural mineral deposits and has a large quantity of deposit of Coal, Petroleum and Natural Gas which play an immense role in the economy and industrial development of the country since two decades back. The Makum Coal field near Margherita is one of the important field of the district . Namdang and Ledo Coal field are also good exposures of coal in the district. Oil and Gas seepage are most mineral of the district. Digboi Oil field is one of the biggest oil producing field of Assam.

Tinsukia district is equally very rich in tea alongwith oil. It is a main tea producing centre of Assam. This district provides major portion to the total production of tea in Assam which helps the state in earning foreign exchange. It gives an ample opportunity to local people for getting job in this industry. Now-a-days many small tea growers have come forward to cultivate tea in their own land. So it helps in getting self employment. Tinsukia district is also an agricultural zone. It sustains a large population of the district. Important products of agriculture in the district are rice, jute, vegetable, fruits etc. the forest is also play an creditable role in the economy of the district. The forest industry provides valuable earning to a section of village people of the district.

Tinsukia district has produced many authors, writers, scientists, saints, freedom fighters, scholars, sportsmen, politicians, poet and social workers. The contributions given by the most renowned people of the district in literature are many, the name of which are not mentioned here. Any people of Tinsukia district courted arrest and suffered humiliation during the struggle for independence. The 1942 Movement had widespread effects in the district The people who have taken part in the Quit India Movement were tortured by the police of the British Government. Along with males, ladies from the district had also joined in this movements and faced humiliation. Tinsukia district was at the forefront of the Quit India Movement. At last nation achieved independence in 15th August, 1947. The sacrifices that offered by the sons and daughters of the soil of Tinsukia district for nation can never forget by the people for time to come.

(xii) Scope of Village Directory and Town Directory - Column heading wise explaination and coverage of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9

AMENITIES AND FACILITIES	COLUMN
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market / hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of respective jurisdiction.

****

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory bu shown along with the urban component. The villages w ich are consider as a Census Town , the amenities dat are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B

The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.

Appendix-VIII Indicates CD Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

List of villages merged in towns and outgrowths at 2001 Census

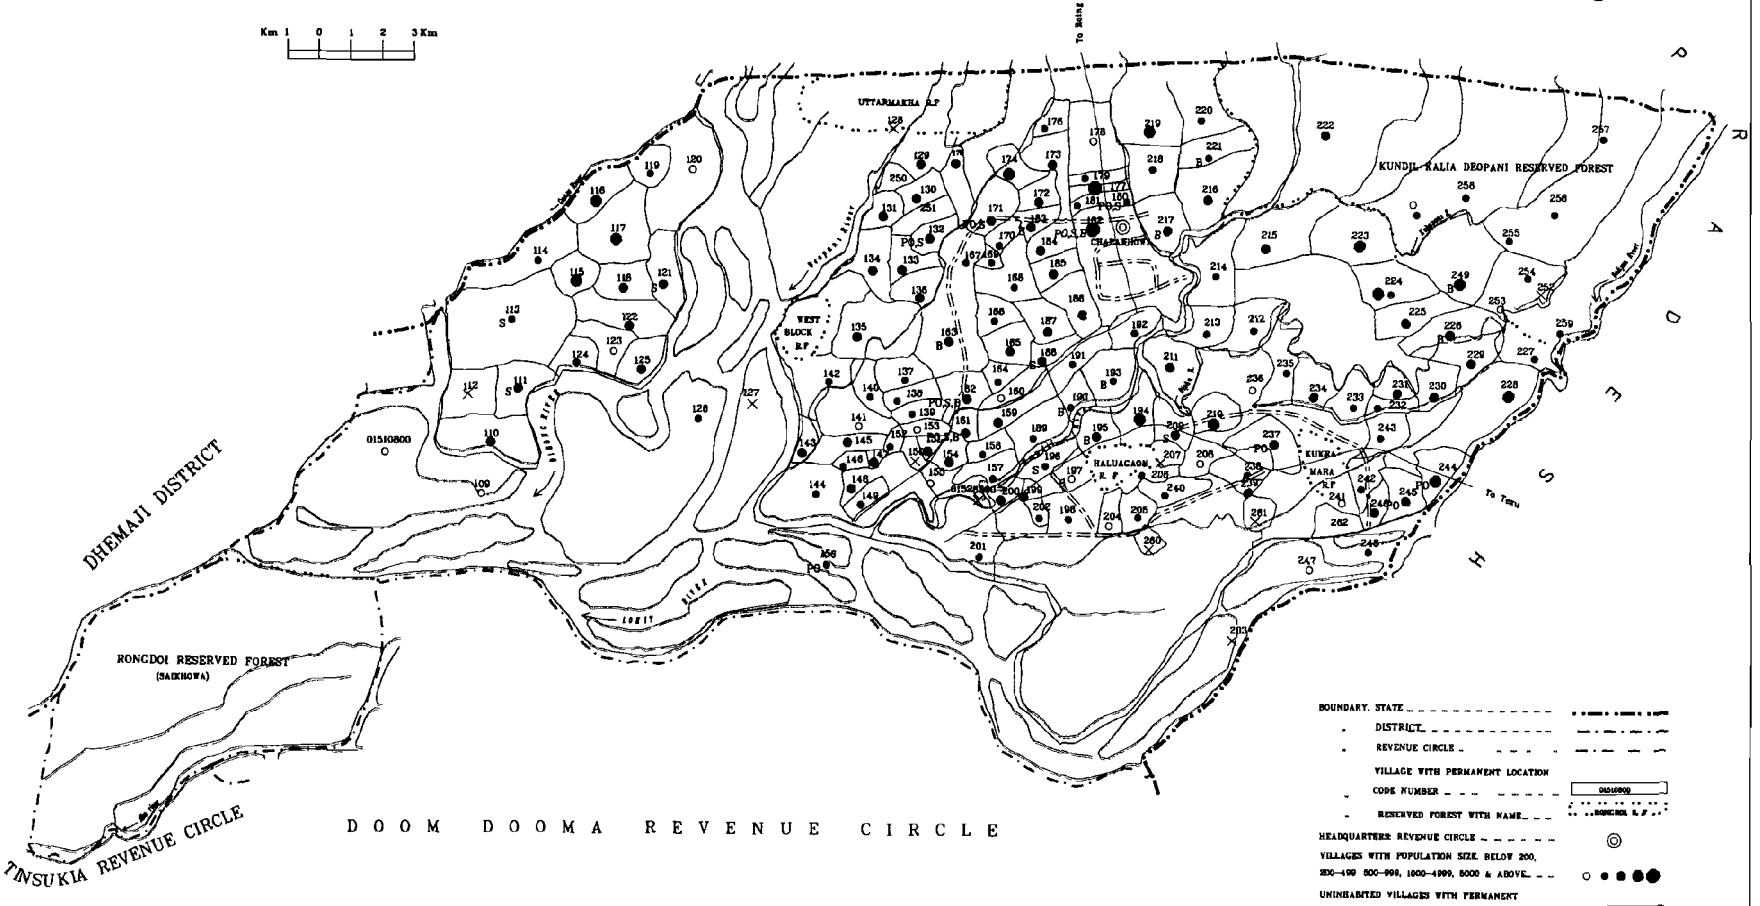

1.	Lahari Kachari Gaon	OG
2.	Kachujan Gaon	OG
3.	Hengaluguri Gaon	OG
4.	Bajatoli Gaon	OG
5.	Hijuguri Gaon	OG
6.	Lido Town	CT
7.	Lido Tikok	CT

All the Outgrowth are in Tinsukia MB of Tinsukia Revenue Circle and Lido Town and Lido Tikok both the Census Town newly formed in Margherita Revenue Circle.

(Data is not availlable for this apendix)

Section -II- Town Directory

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institu ions of any type,it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

The rainfall of all towns is almost same in all towns except Bahbarigoan CT and Borgolaigrant No I CT The maximum and minimum temperature is same for all towns The distance of all towns from state head quarters is above 500 kms for 8 towns and for two towns it is less than 500 kms Towns are at different distances from district head quarters 6 towns in the serial 6 to 10 are under Margherita sub-division, serial no 1 to 5 are at Tinsukia sub-division At Sadiya sub-division there is no town The nearest city with one lakh population was Dibrughar for all towns in 1999.

Now after 2001 Census Tinsukia becomes a city with more than one lakh population. Guwahati is only city of Assam where there are more than 5 lakh population, hence all towns of Tinsukia is situated at a distance shown in column 10 from Guwahati city. All towns have railway station within their jurisdiction. Three towns have navigable road within 10 kms.

PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES

Annexure – I Number of villages under each Gram Panchayat (Data not collected on Panchayat level)

Annexure- II Note on Fertility, Mortality and Migration.

Fertility :

Fertility, mortality, and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question was to only currently married women. The measures of fertility worked out are based on the F – Series. Tables of 1991 Census pertaining to the Assam State and details of concepts and definitions are explained in the earlier chapter heading non Census concepts.

Annexure – III Various measures of Fertility and Mean Age at Marriage, 1991 Census.

Fertility :

As seen through various indicators of fertility in the district it may be seen that GFR of 165 GMFR of 225 TFR of 5.1 and TMFR 6.9 against respective figures at State level are at 135, 190, 4.2 and 6.0. Various measures of fertility and other fertility related data are presented in the following table.

Table-I
Various Measures of Fertility and Mean age at Marriage – 1991 Census.

Fertility Measures	Tinsukia district	Assam State
1	2	3
1. G.F.R.	165	135
2. G.M.F.R.	225	190
3. T.F.R.	5.05	4.1
4. T.M.F.R.	6.93	6
5. Crude Birth Rate	37.53	31.5
6. Mean age at Marriage	18.62	18.3
7. No. children ever born per woman (in age group 45-49)	4.69	5.2
8. Child-woman ratio (0-4)	557	575
9. Child-woman ratio (5-9)	705	735

The level of fertility for all measures in the district is higher than the State. But the fertility related data such as crude Birth rate is much higher in the district than the State rate. The child woman ratios for both age groups are also slightly higher in the district. Similarly Mean age at marriage is also high.

Table-II
District-Wise various Measures of Fertility and Mean Age at Marriage, 1991

State/District	GFR	GMFR	TFR	TMFR	CBR	No of children even born per ever married woman in age-group 45-49	Mean Age at Marriage of currently married women

Table-III
Age Specific Marital Fertility Levels in Assam State and Tinsukia District- 1991 Census

Age group	Tinsukia District			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0 158	0 166	0 081	0 151	0 152	0 133
20-24	0 242	0 262	0 119	0 214	0 219	0 165
25-29	0 186	0 202	0 111	0 183	0 192	0.12
30-34	0 128	0 139	0 071	0 134	0 14	0 093
35-39	0 076	0 088	0 024	0 087	0 094	0 042
40-44	0 033	0 037	0 017	0 049	0 052	0 022
45-49	0 031	0 035	0 015	0 033	0 034	0 025

The Age Specific Marital Fertility levels are found high in total in age groups 15-19 to 25-29 and low from age groups 30-34 to 45-49 in the district than that of the State. But in urban the rates are lower in the district than the State rates. In rural the rates follow a same trend as found in total.

Mortality :

The mortality figures in the district confirm to the general theory of relation between fertility and mortality. The mortality rates are shown in the following table

Table-IV

Estimate of Child Mortality in Assam and Tinsukia district, 1991 Census

Mortality Measure	Tinsukia district	Assam State	Mortality Measure	Tinsukia district	Assam State
1	2	3	1	2	3
Q (1)			Q (3)		
P	73	92	P	73	104
M	82	96	M	75	106
F	63	87	F	71	101
Q (2)			Q (5)		
P	72	101	P	85	116
M	70	104	M	90	118
F	76	98	F	80	115

Q (1) of the above annexure shows the infant mortality rate whereas Q(2), (3) and (5) indicate the size of child mortality in age group below 2 3 and 5 years respectively It is seen in the table that the mortality rates in Tinsukia district are much lower than that of the state It can, therefore, be said that the health status in the district is far better than the State as a whole

Annexure IV : Percentage distribution of migrants by place of birth / place or last residence 1991 and 2001 Census.

Migration:

The detail data may be seen below in the following table

Table-I

Percentage distribution of migrants by place of birth – 1991 Census, Assam

State/ District	Total migrants			From other districts			From other States			From other countries

Compared to the State level totals, the share of migrants from other districts of the State in the total migrant is relatively higher whereas the share of migrants from other countries is 8.46 percent in the district against 14.56 percent in case of over all State Migration from other district reveals that the female inmigration is more than male inmigration from the other districts but it is more for males incase of inmigration from outside district.

Similar data on migration in respect of migrants classified by their place last residence are presented in the following annexure.

Table-II

	4 1	7 7	2 8	2 0	3 8	1 4

From the above table it is seen that migrants from elsewhere in the district out side the place of enumeration consists of 64 6%, 20 8% from other districts, from other state it is 12.9% and from other countries it is 1.8% of the total migrants

Annexure – V : Brief account of main religions in the district/Tahsil as per 1991 and 2001 Census.

Religion

A brief account of religious composition of the population in the district alongwith the State is presented in the following table.

Table-I

Main religions in the Tinsukia district and Assam state - 1991 Census

District/State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Assam	Total population	22,414,322	100 0	88 9	11 1
	Hindu	15,047,293	67 1	86 2	13 8
	Muslim	6 373,204	28 4	94 7	5 3
	Christian	744,367	3 3	96.0	4 0
	Buddhist	64,008	0 3	93 0	7 0

Table-I

Main religions in the Tinsukia district and Assam state - 1991 Census

District/State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
	Jain	20,645	0.1	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8
Tinsukia	Total population	962,298	1000 0	83.5	16.5
	Hindu	867,825	90.2	83.7	16.3
	Muslim	47,526	4.9	98.0	2.0
	Christian	30,095	3.1	55.1	44.9
	Buddhist	12,590	1.3	94.1	5.9
	Jain	1,910	0.2	35.3	64.7
	Sikh	747	0.1	28.3	71.8

The figures in the above table show that compared to the state as a whole the proportion of Hindu is more in the district. Hindus occupy a major share of 90.2% in the District. The Muslims who constitute about 28.4% of total population at State level but in the district their percentage is only 4.9%. Christian consists 3.1% as against 3.3% at State level, which is also on lower side. However, in case of Jains, and Sikhs in the District are less than the state averages.

Table-II

Main religions in the Tinsukia district and Assam state - 2001 Census

District :-Tinsukia (14)

District/State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%
