MOTIF

Tea Garden

Assam produces the largest quantity of tea and has the largest area for the crop. In 1994, the State has 1012 tea gardens spread over 2,27,120 hectares and produced 4,00,732,000 kg of tea with an average yield of 1764kg/ha. In Assam, tea is grown both in the Brahmaputra and Barak plains. Tinsukia, Dibrugarh, Sibsagar, Jorhat, Golaghat, Nagaon and Sonitpur are the districts where tea gardens are frequently found. Among these the Dibrugarh is locally known as the Tea City.

Annexure	VII	Age, sex and education in the district, 1991 Census	694
Annexure	VIII	Distribution of different mother tongues returned in 1991 Census	697
Annexure	IX	Distribution of Scheduld Castes and Scheduled Tribes in 1991 Census	699

****

Forword

The District Census Handbook (DCHB) is brought out for each district since the first Census after Independence and is one of the most widely used publications compiled and prepared by the Census Organisation on behalf of the State Governments and the Union territory Administrations. This publication provides Primary Census Abstract (PCA) data up to village level for the rural areas and provides similar details ward-wise for each city or town, and also provides the present status on availability of important civic amenities/infra-structural facilities in villages and towns of the district concerned. This publication has proved to be of immense utility, as it is considered as an essential and basic document for the purpose of delimitation of constituencies, formulation of local level and regional plan and also as an aid to district administration.

The publication of District Census Handbook (DCHB) was first introduced during the 1951 Census which contained a few important Census tables and PCA for each village and town of the district. Thereafter, at each successive Censuses, the scope and coverage of this publication was enlarged. The DCHB published at the 1961 Census provided a comprehensive descriptive account of the district, administrative statistics, Census tables and a Village and Town Directory including PCA. The 1971 Census-DCHB series was planned in three parts. Part-A related to Village and Town Directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States, Part-C was confined to district Census tables and in a few cases altogether given up due to delay in compilation and printing. At the 1981 Census, new features along with the restructuring of the formats of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of village and town (ward-wise) including the Scheduled Castes and the Scheduled Tribes PCA up to tahsil/town level were provided in Part-B. In restructuring the format of Village Directory, all the amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as Adult Literacy Centres, Primary Health sub-Centres and Community Health Workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Similarly information on approach to the village was also provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, another statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and the Scheduled Tribes population and another on Adult Literacy classes/centres were added in the Statements IV and V respectively.

The manner of presentation of the DCHBs of the 1991 Census was by and large the same as followed in the 1981 Census. The format of PCA was, however restructured slightly in the 1991 Census. Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census. In addition, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. Another important addition in the DCHB of the 1991 Census was the Community Development Block level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA data at CD Block level will help the planners in formulation of micro level development plans, as the CD Block is the lowest administrative unit for developmental planning. Further, in order to facilitate the administrators, planners and researchers intending to use village directory and PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village were provided for the 1991 Census along with the corresponding codes of the 1981 Census.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of Village Directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of Primary and Middle school and College (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), Drinking water, Post Office and phone, communication, Bank, Credit Societies and Recreational facilities In Town Directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the village concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users.

This publication is a collaborative task of the State Government and the Census Organisation. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the direction of Shri Pradip Hazarika IAS ,Director of Census Operations, Assam on behalf of the State/Ut. Admn. At the same time, much effort has been made to ensure comparability with the corresponding 1991 Census data and also similar information brought out by the respective State Governments in annual reports and Statistical Handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft District Census Handbook manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all who have contributed in this project.

J.K. Banthia
Registrar General &
Census Commissioner, India

New Delhi
24th November, 2003

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

District Highlights – 2001 Census

1 In Dibrugarh District, Dirbrugarh East Revenue Circle/ Tahsil is most populous having 239,786 persons while Dibrugarh West Revenue Circle is the least Populous Revenue Circle having 135,179 persons.

2 Among the CD Blocks, Tengahhat CD Block has highest number of population with 163,063 whereas the lowest is found Panitola CD Block with 107,457 persons.

3 In the district there are 7 Revenue Circles and 7 CD Blocks which comprise 1,345 villages including 36 uninhabited villages.

4 The district comprises nine towns. Dibrugarh (MB+ OG) is the most populous with 133,571 persons while Duliajan No 1 CT is the smallest in population with 1,602 souls.

5 While the highest number (293) inhabited villages is found in Khowang CD Block and the lowest(90) inhabited villages is found in Panitola CD Block.

6 The largest village by area is Chrkhalia Chapori with 2,008 hectares of land and situates in Lahowal CD Block while in the district, Nowjan N.C. and Nalani No. 2 are the Smallest village in the area with 5 hectares of land each. These villages are under Khowang CD Block.

7 The largest village by population is Namrup Chah Bagicha with 8,242 souls which is situated at joypur CD Block and the Smallest village is No. Chukan Chapori with single person only and is under Lahowal CD Block.

8 The district is well known for her large number of Satras founded by Vaisnavitee reformer Shri Shri Sankar Dev and his followers time to time Mention may be made of Dinjan satra.

9 Kali Air Than is an important religious place for all Hindu people of the district.

10 Dibrugarh University and Assam Medical College are important development in line of literature as well as medical science

11 Establishment of Namrup Fertilizer and Assam Petro- Chemical Limited at Dibrugarh district are an approach towards industrial development of the region which will naturally provide employment to local people.

Note : NIL number of villages are fully covered as out growths (OGs) and therefore not included under the item. "Number of villages".

Definition of CensusTown :-

All places which satisfy or are expected to satisfy the following criteria are treated as Census Towns :-

i) A minimum population of 5,000
ii) At least 75 percent of the male working population engaged in non-agricultural pursuits, and
iii) A density of population of at least 400 per square kilometre (1,000 per square mile).

STATEMENT-1
NAME OF THE HEADQUARTERS OF DISTRICT / TAHSIL, THEIR RURAL-URBAN STATUS AND DISTANCE FROM DISTRICT HEADQUARTERS, 2001

Serial number	Name of District / Tahsil	Name of District / Tahsil headquarters	Whether Urban / Rural	Distance from tahsil headquarters to district headquarters by road (in km.)
1	2	3	4	5
1	Dibrugarh West	Dibrugarh	Urban	0 kms.
2	Dibrugarh East	Dibrugarh	Urban	0 kms.
3	Chabua	Chabua	Urban	24 kms.
4	Tengakhat	Tengakhat	Rural	28 kms.
5	Moran	Moran	Urban	35 kms.
6	Tingkhong	Tingkhong	Rural	55 kms.
7	Naharkatiya	Naharkatiya	Urban	48 kms.

Note: 1. Asterisk in column 2 denotes that the district / tahsil headquarters is a rail head.
2. Asterik in column 4 denotes that the district / tahsil headquarters is a statutoty town.

Statement-1 shows the information regarding the name of the headquarter of district/tahsil with their status and distance from Revenue Circle headquarter to district headquarter by road in kilometer. Except Tengakhat and Tingkhong Revenue Circles, all Revenue Circles are having the urban status. Both Dibrugarh West and Dibrugarh East Revenue Circles are recorded 0 kilometer distance from Revenue Circle headquarter to district headquarter. However, the farthest distance of 48 kms. is recorded in Naharkatiya Revenue Circle which is the distance to district headquarter by road.

STATEMENT-2
NAME OF THE HEADQUARTERS OF DISTRICT / CD BLOCK THEIR RURAL - URBAN STATUS AND DISTANCE FROM DISTRICT HEADQUARTERS, 2001

Serial number	Name of District / C D Block	Name of District / CD Block headquarters	Whether Urban / Rural	Distance from CD Block headquarters to district headquarters by road (in km.)

Statement- 6 gives the population of urban agglomerations (including constituent units)/towns during 2001 Census. The population of Dibrugarh MB+OG is 1.3 lakh which includes 11,678 population for out growth of town. Except the population of Dibrugarh MB+OG, the population of each remaining eight towns are recorded below 25 thousand of which Dibrugarh Oil Town CT falls under Tengakhat revenue circle recorded 23,763 persons. It is then followed by Namrup CT under Naharkatya with a total population of 19,021 and Chabua TC which falls under Chabua Revenue Circle recorded 17,433 persons. The less number of person is noticed in Duliajan No.1 CT which is under Tengakhat Revenue Circle with a total population of 1,602.

Statement- 7 shows the villages with population of 5,000 and above at CD Block level as per 2001 Census and amenities available therein. There are four villages with population of 5,000 thousand and above in the district. The village Namrup Chah Bagicha under Joypur CD Block is recorded the highest number of 8,242 population. Filnuguri Grant 4/155 under Lahwal CD Block recorded 5,594 persons, Balijan TE which is under Panitola CD Block recorded 5,124 persons and lastly, Wilton 22/157 which is under Tengakhat CD Block recorded 5,026 persons. In the availability of amenities in the village, it is noticed that no amenities like education, medical, drinking water, communication and banking are available in all the four villages. The Primary Health Sub-centre is available in Filnuguri Grant 4/155 and Wilton 22/157 villages.

Statement 9 indicates houseless and institutional population of Revenue Circles, 2001. In Dibrugarh district there are altogether 96 households for houseless population and 1,036 households for institutional population. The detail against each Revenue Circles of the district can be seen in the table itself.

****

ANALYTICAL NOTE

Analytical Note of Dibrugarh District

(i) History and scope of the District Census Handbook

District Census Handbook is the most valuable publication brought out by the Census organisation on behalf of each State Government. This provides information on some basic demographic and socio-economic characteristics and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being the only informative source of every district of each state.

The publication of District Census Handbook was first initiated during 1951 Census with the collaboration of respective state Governments. In 1951, only some demographic and some socio-economic information at village and town level along with some Census tables were published in District Census Handbook. Since then, it had undergone radial changes during the subsequent decades and has been grown substantively both in its scope and content by incorporating more Census tables and also some basic statistics on land use pattern, agriculture, industry etc. The D.C.H.B. of 1961 was considered as a unique asset published by the Census organisation. In 1971 Census, further improvements were made by enlisting many more information on villages and towns in the form of Village and Town Directory. It had three parts. The Part-A relates to Village and Town Directory, Part-B contained Village and Town-wise Primary Census Abstract and Part-C dealt with administrative aspect and Census Tables based on PCA etc. The 1981 Census again widened the scope of DCHB to cover more data on literacy, health care etc., in addition to the information covered in 1971 DCHB. It was divided into two parts. The Part-A included data on Village and Town directory and Part-B was devoted for Village and Town-wise primary Census Abstract. However, this part of the DCHB was not brought to light in Assam as no Census was conducted due to prevalence of disturbed condition in the State. In 1991 Census, the DCHB was divided into two parts. The Part – A consisted the Village and Town directory data and Part-B presented the data of Primary Census Abstract.

As a tradition of the past, in the present DCHB also, some more information on availability of facilities such as, credit societies, banks, recreation and cultural institutions, news paper/ magazines etc, are included. Further, information of income and expenditure, important commodities manufactured, exported and imported etc., are also included to give a fuller account to the scope of these directories. Similarly in town directory also, few more information are included.The process of collection and compilation of these data involved lot of exercises. At first, revenue circle-wise information on each village has been collected by the revenue authorities at district level. These data are compared with that of 1991 at district level and after thorough scrutiny and cross-check, these records are submitted to the Census directorate. In case of town directory, data have been collected directly from the Commissioner of Municipal Corporation and Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 data at Census directorate. Thereafter efforts are made to compare and cross-check with similar data made available from other sources especially data published by various departments of State Government to verify the authenticity and correctness of figures received through village and town directory booklets. After that only, compilation and computerization of these data have been made according to the instructions of the Registrar General and Census Commissioner, India. It is therefore regarded that because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication than that of many publications brought out earlier in this line.

(ii) Brief history of Dibrugarh district:-

Early History

The early history of the district can be traced only after invasion of the Ahom in 1228 A.D. However some scattered facts and accounts may be found from a few ancient inscriptions and the observation of a Chinese traveler.

The Chutiyas who are believed to be the members of the Bodo race had over thrown civilized prince of Lakhimpur and entered the plains from the north-east. Very little is known about the early history of the Chutiyas as they left no annals of their rules.

The source about their reign is only the history written by Ahoms. However, they are supposed to the first ruling tribe in Lakhimpur.

Brief History of the Chutiyas:-

Sonagiripal or Gauri Narayan, son of Birpal, founder of the Chutita Kingdom, brought under his yoke the Chutitas of the neighbouring hills and descended into the valley of Brahme putra and defeated Raja Bhadra Sen who ruled in plains. Subsequently he subdued another chief named Nyaya Pal and marched to Kamatapur and compelled the Raja of Kamatapur to present her daughter in marriage. He was known as the builder of Sadiya, the place where his son was left for education but unfortunately the dead body of his son was received by him from the King of Gaur. He was followed by nine kings of his line.

When the Ahom entered Assam in 1228, the Chutiyas were the ruler up to the Disam river. The two powers continued to live in a state of intermittent conflict. The Chutiyas at first met with a considerable measure of success but in 1523 A. D. Suhungmun who generally known as Dihingia Raja conquered the Chutiya kingdom and administration of Sadiya was entrusted to an Ahom noble called Sadiya Khowa Gohain and the leading Chutiya families were deported to places lower down the valley.

History of the Ahoms:-

The great Ahom who ruled over the Brahmaputra valley for about 600 years came to Assam in the early part of the thirteenth century. Various tribes that ruled the valley were defeated and formed a great Kingdom known as 'Asom' or 'Assam' after the name of Ahoms or unequaled. However there are different views as to the name Assam.

The Ahoms were a tribe of the Tai or Shan people. The prince Sukapha the founder of the Ahom kingdom of Assam was the brother of the king of Mantung which was a powerful kingdom in northern Burma. Sukapha a great conquer and an enterprising prince is said to have left Mantung in 1215 A.D. with a handful followers which consisted of two Counsillors called Borgohain and Bura Gohain eight nobles and nine thousand men, women and children. In 1228 A.D. he defeated the Nagas near non-guyang lake and placed a noble to rule the conquered territory of Patkai hills. Sukapha then entered the plains near Namrup and defeated the Morans and the Borahis and established his capital at the foot of Charaideo hills.

Swargadeo Sukapha died in 1268 A.D. He was succeeded by his son Sutenpha who during his reign conquered a part of the Kachari territory between the rivers Dikhow and Namdang. Sutenpha was succeeded by his son Subimpha 1281-1293 A.D. who during his rule introduced some administrative steps of great significance. By the time his son Sukhangpha ascended to the throne, the Ahoms were recognised as a great power in eastern Assam and gradually included whole of the Brahmaputra Valley under the Ahom kingdom. The first stage of growth of Brahmonical influences among the Ahoms can be seen during the reign of Sudangpha (1397-1407 A.D.) who was brought up in a Brahaman's house. Sudangpha was succeeded by his son Sujangpha (1407-1422 A.D.) and then by his grand son Suphakpha (1422-1439 A.D.). During these period no significant event occurred.

Susenpha, son of Suphakpha ascended the throne in 1439 and ruled for a period of fortynine years. Sir Edward Gait says, "The scanty references to his long reign in the Buranjis may be taken as proof that he was a good king and that under his rule the people were contended and prosperous".

Suhungmung, the great grand son of Susenpha ascended the throne in 1497. He was also known as Narayan Singha or Dihingia Raja, "the reign of the Monarch" says Dr. S.K. Bhuyan in his history of Assam – "witnessed the marked expansion of Ahom power accompanied by the establishment in some degree of its sphere of influence in Bengal and even in Orissa". In the Imperial Gazetteer of India page 1536, it is stated that "His reign is memorable not only for the entire portion of the Chutiyas and the Kacharis rule from the valley of the Brahmaputra and for the acknowledgement of his supremacy by the Koch king Biswa Singha but also for the replace of the Mohammadan expedition". The ruler of Gaur presented his two daughters, Marmati and Darmati in marriage to the Ahom king and handed over a number of pargonas. He reigned for forty two years (1497-1539 A.D.) with great success. The first population Census was carried out during his reign and adopted Saka era in place of old Ahom system of counting the years. He also introduced the use of five annas. Vaishnavism under Sri Sri Sankardev also spread during this period. In 1539 A.D. he was assassinated at the instance of his elder son Suklengmung who succeeded to the throne. He was also known as Garhgaya Raja as he made his capital at Garhgaon. His reign marked the beginning of a

series of conflict with the Koches. The important achievements were excavation of Garhgaon tank, the establishment of Garhgaon town and number of roads. He was also the first Ahom ruler to strike coins.

Sukhampha succeeded his father Suklengmung in 1552 and ruled for fifty one years. He was lame and so he was also known as Khura or Lame Raja. During his reign Koch General Chilarai invaded Ahom kingdom and captured Garhgaon, the capital of the Ahoms.

During this period Sri Sri Sankardev, Sri Sri Madhav Dev and Sri Sri Haridev founded 'Satras' and propagated Vaishnavism all over the country and contributed to the revolution of a liberal Assamese society.

During the reign of Sutamala (Hindu name Jayadhwaj Singh) Mirjumla Nawab of Dacca attacked Ahom kingdom and defeating the Ahoms entered Gargaon, the capital of Ahom kingdom, in 17th March, 1662. The king fled to Namrup. However, flood and fever made havoc and rendered further military operation impossible. Constant attack by the Ahom soldier on the crowded water logged camps of the Muslims forced Mirjumla to conclude a treaty with the Ahoms. However, it was during the reign of Sunyatpha (1670-1673 A.D.) the Ahom General Lachit Borphukan had the glorious victory at the battle of Saraighat against the Mughals led by Ram Singh which sealed the fate of Mughal expeditions.

The Zenith of Ahom power was reached during the reign of Rudra Singha (1695-1714) or Sukhungpha who succeeded his father Gadadhar Singha .During the reign of Lakshmi Singha (1769-1780 A.D.) the first Moamaria rebellion took place. Moamarias were disciples of the Maya-Mara satra founded by Anirudha Deva and mainly comprised of the sturdy Mataks, Morans, Kaibarttas and the Kacharis. They are Vaisnavites of the orthodox school. The king and a number of nobles were arrested and kept in confinement. However the victory lasted for a short time as their leader Ragha fell into a trap of the royalist leaders and was killed in April 1770 A.D. The Moamarias again revolted during the reign of Gaurinath Singha and captured Gargaon in 1786. Gaurinath Singha fled to Guwahati and re-captured his throne with the help of the British troops in 1794.

Power of the Ahoms gradually declined due to the infighting of the nobles and rebellion made by the Moamarias and the Dafalas. This led to three Burmese invasions. In 1819 A.D., the Burmese defeated Purandar Singha and reinstated Chandrakanta Singha on the throne. The main intention of the Burmese was to retain their hold in Upper Assam. So Chandrakanta Singha fled to Goalpara and sought the British Government's help. In 1825 the British troops drove the Burmese out of the country and in February 24, 1826, the treaty of Yandaboo was signed between the Burmese and the British. This eventually led to the annexation of Assam to the East India Company. Dibrugarh was the Headquarters of the Lakhimpur district. In 1971 Lakhimpur district was bifurcated into Dibrugarh and Lakhimpur districts. Dibrugarh district was further bifurcated into Dibrugarh and Tinsukia districts.

History of name of Dibrugarh :

During the period of Ahom rule (1228-1826 A.D.), Dibrugarh town alongwith its neighbouring areas was known as Diburu, Dibaru, Dibarua or Dibrumukh. The name 'Dibrugarh' was the creation of the Ahom but it was not widely used at that time. From the Ahom history it is known that in 1523 A.D. the Ahom had constructed a garh (Fort) in the mouth of river Dibaru to prevent the soldiers of Chutia king and it was known as a Dibrumukhar garh. This garh of Ahom days is no more to see at present as it was completely eroded due to erosion of the rivers Brahmaputra and Dibru. But according to some historians of modern days, the origin of name Dibrugarh is said to be days of British rule in the middle of eighteenth century. The garh which was constructed near Dibrugarh town in the mouth of Dibru river by the British was termed as Dibrumukhargarh. It is fact that the garhs which were constructed by the Ahom and the British at different time were for defence purposes. The garh which was established by the British is also no more now due to the same reason by which the garh of Ahom period was guled by the river Brahmaputra. The name 'Dibrugarh' might has come up from the word "DibrumukharGarh" and its wide use has naturally come up from modern days. However, it can not be denied that the origin of this name was in Ahom period.

(iii) Administrative set-up :

District Administration :

The Deputy Commissioner of the district is the overall in charge of the administration of the entire district. He also acts as a Collector in case of the revenue matters as a District Magistrate in case of maintenance of law and order and General Administration, as a District Election Officer in case of conduct of Election, as a Principal Census officer while conducting Census and so on. A number of

officers like Additional Deputy Commissioners, Sub-Divisional Officers, Extra Assistant Commissioners and others assist the Deputy Commissioner in looking after the administration of the district.

From the developmental angle, the district is divided into 7 Development Blocks. Below the block level set up, there are 93 Gaon Panchayats each comprising with a number of villages and govern by local self bodies. In order to maintain law and order by the Police, the district is divided into 14 Police stations and 19 out posts with 1,218 officials.

Revenue Administration :

Revenue Administration has historically been the primary responsibility of the District Administration. This involves collection and fixing of land revenue, registration, mutation and over all management in regard to land both private and Government. Besides the Revenue Branch of the Deputy Commissioner's Office which is looked after by the Additional Deputy Commissioner (Revenue) there are seven Revenue Circles in the district under the supervision of the Circle Officers. The Mouzadars under the Circle Officers are responsible for collecting land revenue (Khazana) from the land owners (Pattadars). All the Circle Officers are required to submit about (demand of revenue) to the Deputy Commissioner and after his approval, Mouzadars are to collect revenue as per the demand. In the year 1995-96, the total collection of land revenue in the district was Rs3,730,000 against the total demand both current and arrears of Rs. 13,462,000 which comes to about 27.7%.

Source : Revenue (L.R.) Development, Assam, Guwahati.

Development :

Apart from Revenue matters, District Development is one of the very important objective of the District Administration. As the head of the district administration, the Deputy Commissioner (DC) is responsible for all round developmental activities in the district under the various programmes such as MP's Local Area Fund (MPLAD), MLA's Fund, Untied Fund, Sub-divisional Plan Scheme Fund, Border Area Development Fund etc. For these work the Deputy Commissioner assigns one Additional Deputy Commissioner (Development). The specific task of looking after and coordinating the various developmental activities undergoing in various sectors ADC (Development0 is aided in this matter by the decentralized Planning Cell of DC's Office. All developments involved in the developmental activities in the district like PWD, Irrigation, Health, Education and many others work in co-ordination and a District Development Committee (DDC) headed by the Deputy Commissioner has been in place to ensure this co-ordination. Under the Government policy of rapid upliftment of rural population, a District Rural Development Agency (DRDA) is functioning in the district which has the Deputy Commissioner as the Chairman and one Project Director as its functional head. All schemes for Rural Development are implemented by agencies in co-ordination with the 7 Development Blocks situated in outlying rural areas of the district. These Development Blocks are supervised by the Block Development Officers (BDOs) and Senior Block Development Officers (Sr. BDOs).

System of Local Self Government

The Assam Panchayat Act 1959 which came into effect in 1960 abolished the Local Boards which were constituted in 1882. The three tier Panchayat Raj System was replaced by a two tier system by the Panchayat Act 1972 which came into operation from 5th May, 1973. Urban units are categorized as Municipal Corporation, Municipal Board and Town Committee. There will be one Chairman and a Vice-Chairman in Municipality and the Chairman is the head of the administration. He presides over meetings of the Municipality. He is entrusted with the implementation of the schemes taken by the Municipality. He is also invested with the financial powers to manage the affairs of the Municipality. The Municipality regularly receives annual grants from the Government and also earn revenues from levies, taxes on holdings, rickshaws, carts, bicycles, stalls, open space markets, cinema houses etc.

Some important duties of the Municipalities and Town Committees are to maintain roads and bridges under their jurisdiction and to look after the sanitation of public health, laying out of parks, establishment of Veterinary dispensaries, libraries, fire brigades, supply of drinking water etc.

Local Administration :

For management and implementation of various developmental schemes, elected bodies are constituted at the level of Corporation, Municipality and Town Committees for Urban Areas and Panchayat Bodies for rural areas. The district has 3 urban local administrative bodies which are as follows:-

1.Dibrugarh Municipal Board.

2.Chabua Town Committee.

3.Naharkatiya Town Committee.

As the rural areas, a hierarchy of local administrative bodies is in place with Zila Parishad at the top (Sub-Division level) followed by Anchalik and Gaon Panchayat which cover a total number of 1,348 villages in the district.

Autonomous District Council :

In case of districts which have Autonomous District Councils, most of the powers and functions of the Deputy Commissioners are transferred to the Autonomous District Councils. Such district councils have both executive and legislative powers especially in the matters of administration of land, management of unreserved forests, utilization of water for the purpose of agriculture, regulation of 'Jhum' or shifting cultivation. The Councils are also empowered to take decision on matters relating to establishment of village and town council/committees, matters relating to town and village administration, health and sanitation, appointment or succession of village Chief or Headman, inheritance of property, social customs etc.

The District Council has the powers to construct, establish and manage primary schools, dispensary, market, road, bridge etc. They are empowered to collect revenue by way of royalty, levy taxes etc. from various sections of the societies and the people.

However, Dibrugarh district is not fallen in the preview of the District Council.

(iv) Physical features :

The District lies between 27 C and 27.42 North latitude and 94.34 and 95.31 east longitude. The district lies in the eastern corner of the state and boundary on the north by the river Brahmaputra. The eastern side is bounded by Tinsukia district and the west is by Sibsagar district. The southern side of the district is Arunachal Pradesh and Sibsagar district. The district covers a total area of 3381 sq. kms.. In terms of area, the district occupies the 10th rank among the districts of the State.

Topography :

It is a broad plain and rises to the foothills of the Arunachal Pradesh on the south. Apart from an outlying spur of the Naga Hills stretches from the Disang river through the south of the Joypur and the Tipling ranges and a few isolated hills in the Buri Dihing mauzas, there is nothing to break the even level of the plain. The extensible plain of the district which is fairly high and fertile is covered with fields of waving paddy which changes from vivid green luster into a rich gold as the harvest time draws near or with stiff bushy tea bushes that spread over like a dark green carpet. Villages are encircled by groves of slender palms, broad leaved plantains, feathery bamboos and juicy fruit trees.

Hill:

The district comprise mainly of plain areas dotted by small hillocks in the extreme southern end. There is no such high hill in the main land of the district.

Drainage and River System :

The whole of the drainage of the district ultimately finds its way into the Brahmaputra which flows along the northern boundary of the district. The river is very wide and remain navigable through out the year. A large number of rivers and their tributaries, streams and streamlets locally called Jans flow through the district. During the rainy season, the vast areas of the district are inundated by rivers and its tributaries mainly by the Brahmaputra and the Buridihing. The Brahmaputra, Buridihing, Disang with its tributaries Sessa and Dimna are the important rivers of the district. In addition there are some beels, marshes and stream of dead rivers.

Flora and Fauna :

Forests in the district may be divided into two classes viz. Unclassed State Forest and Reserved Forest and are scattered all over the district. The major portion of the forest area after bifurcation of the district in 1989 fall under Tinsukia district. As on March, 99, the area under Reserved Forest under Dibrugarh Forest Division is only 20,912.57 hectares. There is no Proposed Reserved Forest in the Division as per the report published by the Principal Chief Conservator of Forest. The main marketable species found in these forests are Hollong, Hollock, Makai, Nahor, Ajhar etc. Less valuable species are outenga, uriam, Hillikha, Morhal, Jululi etc. The open areas of these forests are generally covered with grasses, weeds, sorat, digholoti etc. and low-lying areas are full of patidoi, reeds, nal, cane etc.

The forests of the district once very rich in wild animals now have greatly reduced due to wanton destruction of the forest and poaching of the animals. The numerous wild animals found in the district are elephants, tigers, buffaloes, leopards, wild hogs , pigs and different species of deer, fishing cat, wild dog, monkey , porcupine, hares and lizards, squirrel, mongoose, civet cat etc. Various reptiles are found in the district including king cobra and python. Some of the birds found in these forest are pelican, wild fowl,

wild goose, wild duck, blue coot, green pigeon, parrot, patridge, quail, florican, pleasant scarlet, hornbill etc.

Climate and Rainfall :

The climate of the district is characterised by the absence of a dry hot summer season and experience abundant rains and highly humid atmosphere through out the year. Rainfall starts normally in the month of April and continues upto the month of October. Scattered rainfall also occur in the remaining month of the year. As per the data published by the Directorate of Agriculture for the month of December, 98 to November, 99, it is seen that total rainfall is recorded as 2056.1 mm as against the state total rainfall of 2659.8mm.The highest rainfall 411.7 mm recorded in July, 99 in the district. The district is so far bcen not cffectcd by a long spcll of dry season.

Soil :

The general characteristic of land of the district is acidic. New alluvial soils form on inundation of land by river contain more percentage of fine sand and silt and are less acidic. Such soils are often neutral and even alkaline. Acidic alluvial soil with good content of phosphorous are good for tea cultivation. On the other hand heavy clays with high percentage of nitrogen in low lying areas of the district give better yield of rice. Abundant rainfall and high humidity through out the year favour cultivation of tea and rice in the district.

Land and People :

With an area of 3381.00 sq. kms. the district has about 11.9 lakh population of which 6.1 lakh are male and 5.7 lakh females. The district stands on the same rank 8th as it was in 1991. The density of population is 351 Km. About 80.7% of population lives in rural areas and the remaining 19.3 % lives in urban area. The percentage of urban population is more than the State average of 12.72.The rate of literacy in the district is 69.0% which is more than the state average of 63.2%. The percentage of urban growth (+19.3) of population is however much less composed to state average of + 38.2%

Language and Dialect:

Assamcse is thc main languagc spokcn in thc district. There are seventeen Scheduled languages recorded in the district as mother language in 1991 Census which can be seen in Annexure. Out of the seventeen mother languages recorded. Assamese with 859,031 persons stood on the top followed by Hindi 57,897 and Bengali 57,886. Nepali with 16,020 persons stood in the 4th position. A sizeable section of population with Hindi as mother tongue may be due to the tea estates where the labourers employed were brought by the British from outside the state mostly from Hindi speaking areas. There are also 17,827 persons who recorded non-scheduled languages/dialects as their mother tongue. Assamese constitutes 82.4%, Hindi 5.6%, Bengali 5.6% and Nepali 1.5% as being prominent mother tongues of the district.

Religion:

Hindu

Hindu constituting 91.3% of the total population is the major religion in the district in 1991. It is followed by Muslim 4.5% and Christian 3.4%. The population of Budhist 4,152,Sikh 638 and Jain 877are very negligible in 2001 Census.

The most of the Hindus are either Vaishnavites or followers of Sakti..Vaishnavites again may be divided into the Mahapurishia and Bamunia or other Vaishnavas as they have been called in the Census tables of Assam Census Report for 1901. The former will accept a Sudra as a religious guide (Gossain) and against worshiping of any forms of idols; but the latter recognises only Brahmans as their Gossain and not averse to place idols in their religious place, the Namghar. Normally each village has a Namghar in which people assemble for prayer. Namghars are also meeting place to decide various other matters relating to the people and the village.

Islam :

Muslims who formed one-twentieth of total population in 1901 now consists roughly about one third 30.9% in 2001 in the state, a biggest community next to Hindus. It is believed that in the seventeenth century A.D. some Muslims expeditions made influence on some poor people in the district but after the expulsion of the Muslims from Kamrup in 1681 A.D. the villagers who had been converted to the faith of Islam began to return to Hinduism. This process continued till1880. But later on Muhammadan faith was started influence the people and gradually the population started increasing with the influx of Muslims from neighbouring country like Bangladesh .Muslims constitute 4.5% of the total population of the district in 2001.

Social life :

The social life of the people are mainly influenced by the three principal religions viz., Hinduism, Islam and Christianity. The joint family

system which was very much prevalent in the past is fast disappearing from the present system. However, the property is generally held by the head of the household and manages it as its custodian.

Marriage :

Generally most of the Hindus follows the rites as prescribed by Hindu custom like lighting of a sacred fire (Hom) and other rituals by engaging a priest during the marriage. However, some of the Vaishnavites opposes engagement of a Brahman priest in their marriage ceremony. Brahmins, Kayasthas and well to do Kalitas invariably perform 'Hompura' ceremony.

The Ahoms are often married by the "Chaklong" rite in which the priest light 101 nos. of earthen lamps and bride and bridegroom exchange 'temi' (small box) unknown to the Assamese society. Here the caste distinction is not very rigid which is mainly due to the influence of Vaishnavism propagated by Shri Shri Sankardeva and Shri Shri Madhav Deva. Inter caste marriages are not very frequent among them and widow remarriage was also found prior to the enactment of the law.

Dress :

Male dresses which include Dhoti, Panjabi and Chadar are now gradually replaced by modern Shirt, Pants, Trousers and Coats. Female dress consists of 'Riha', 'Mekhela' , 'Chadar' & blouse. Saree and Salour are also very common in urban areas now-a-days. Their ornaments include 'Keru', 'Mani', 'Kharu', 'Dugdugi', 'Bena', 'Dhol', 'Necklace', Chain, Earring, Bala, etc.

House :

In rural areas the housing pattern mainly consists of 'Charaghar' (receiption house), 'Barghar' (living house), 'Bhoralghar', (store house for paddy), 'Goshainghar' (House of worship) and 'Gohalighar' (cowshed). Generally, the most of the houses have thatched roof, ekra or bamboo walls with or without mud plaster and bamboo or wooden posts. Floor is normally 'kutcha'. At present many people have constructed their houses with 'pucca' plinth and C.I. sheet roofing and brick wall.

Festival

The 'Bihu' is the main festival observed by all the communities of the district and celebrated in the three different parts of the year associating with cultivation and harvesting of paddy. "Rangali Bihu" or "Bahag Bihu" is the festival of merry making where the groups of people dance and sing together 'Bihugeet' or song. Girls dance in openfield with the tune of 'Pepa' (flute) and the beating of 'Dhool' (drums) by the boys. 'Taka' and 'Gagana' other two locally made instruments are also used in the Bihu dance. 'Bahag Bihu' is celebrated from the last day of the Assamese year and the day is mainly devoted to the cattle and this day is called Garu Bihu. The next day is the 1st day of Assamese New Year (15th April) and elders offer prayer in 'Namghar' and is called "Manuh" or "Gossain Bihu". 'Magh Bihu' or 'Bhogali Bihu' starts on the day of 'Makara Sankranti' when the harvesting is completed and is famous for preparation of various food items (pithas,cakes etc.). Boys and girls make 'Bhelaghar or Majhi" and have feast in the night and burnt the 'Bhelaghar or Majhi' in the early morning of 1st Magh (i.e. 14th and 15th January) Kati or Kangali Bihu is celebrated by lighting earthen lamps in the paddy field with prayers. Significance of this Bihu is to save the paddy from pest and insects. As the cultivators remain busy in the paddy field they have no time for merry making or to prepare various food items as prepared in the 'Magh Bihu'.

Other important religious festivals that observed in the district are –Durga puja, Lakshmi puja, Kali puja, Doljatra, Deepawali and Shivratri, Saraswati puja and Biswakarma puja are performed almost in all the schools and workshops respectively. Madam – me – Fee' is also celebrated by the Ahom community.

Natural calamities – Earthquake and Flood.

Like the rest of Assam, Dibrugarh is a seismic area and is liable to earthquake. The great earthquake of 1897 was felt over an area of 1,750,000 square miles from Rangoon in the east to Kangra in the north-west and serious damage was done to masonry buildings over an area of 1,45,000 square miles. The effects of the shock in Dibrugarh were serious. The residential houses of the people were wrecked, the walls of the buildings collapsed and serious damages were done to the raised roads.

The earthquake of August 15, 1950 with the epic centre about 200 miles north of Sadiya, has practically left no sign of damage in the district. Since then as many as 50 earthquakes shocks were experienced in the district but there was no loss of life or property.

Flood and Famine :

Famines and droughts are little known in the district while widespread flood has become a regular phenomenon here. The incidence of flood and erosion is rooted in the typical physiographical features and meteorological conditions obtaining in this part of the

State. The heavy water and silt discharge occurring in the upper region during the peak and rivulets resulting in excessive spilling on the banks of the rivers and their tributaries and consequently results water logging in extensive areas on the plain areas. Some times, the flood level rises very rapidly and the swirling currents make it extremely risky to move from one place to another. Very often, the villages appear to be isolated islands could be reached only by boats. In some Char areas, the roofs of houses are swift away and only the tree-tops remain visible above the water.

It is also believed that the great earthquake of 1950 causing extensive hill slides in the catchment of the Brahmaputra is also one of the reasons for floods in this district.

The following table shows the area hit by flood and extent of damages during the period 1997 to 1999.

Table-1
Area affected by flood and extent of damages in Dibrugarh district.

Year	Area affected (hectares)		Total value of damages (Rs. Lakhs)			
	Dibrugarh	Assam	Dibrugarh	Rs. p/h	Assam	Rs. p/h
1	2	3	4	5	6	7
1997	23,159 -6.8	753,409 -9.6	20.1	86	2944.1	390
1998	14,400 -4.3	1,323,751 -16.9	201.8	1402	4970	3754
1999	-	223,107 -2.8	-	-	5195	2328

Note : 1. Figures in parenthesis below the area indicate the percentage of area to total Geographical area of the district/state.

Source: Prepared on the basis of Tables 32.11 and 3.05 of Statistical Handbook of Assam-2000, Directorate of Economics and Statistics, Govt. of Assam.

The figures in the above table clearly show that the gravity of flood in terms of both incidence and impact is relatively low in Dibrugarh district. The percentage area of land affected by flood is not so high and in addition, the value of damages per hectare of flood affected land is also abnormally high as *Rs.1402 in 1998 than in 1997.*

Flood control and relief measures

Considering the physiographical features of the district, the floods are unavoidable but if sufficient precautions taken in time the extent of damages can be minimized. It is for this reason the district authorities remain all alert during such time to ensure that no more damages can cause. As a measure of precaution, flood warning signals are transmitted to the Deputy Commissioner of Lakhimpur district from some stations at upper reaches of the Brahmaputra. The Deputy Commissioner, Lakhimpur in his turn informs other Deputy Commissioners and Sub-Divisional Officers of the Brahmaputra valley to take all precautionary measures.

As soon as the flood submerges the low-lying areas, the relief operation starts with full vigour. Evacuation of people and cattle to safer places, providing food and shelter till flood recedes, distribution of gratuitous relief in areas where evacuation is not necessary etc. are the important relief measures. Most of the principal Departments of the Government, in some way or other, have provided helping hands in respect of the flood. In steering relief operation, the District and the Sub-Divisional authorities secure complete co-operation also from other Departments of the Government as well as from the public.

Resources of the district :

Geology and Mining

The district consists of a wide alluvial plain composed of a mixture of sand and clay in varying proportions and southern boundary of the district with the hills is very rich in mineral deposits. The district has huge deposits of natural gas and oils which consequently play an important role in the economy

and industrial development of the district. A brief account of various mineral deposits of the district is given below :

Crude oil

Oil was first discovered in the undivided Dibrugarh district in 1882 when the construction of Dibrugarh – Ledo Railway line was in progress. It was discovered in Digboi jungle which is now under the jurisdiction of Tinsukia district. The first Oil Refinery was established by the British at Digboi. But two oil fields one in Naharkatiya and the other in Moran of Dibrugarh district were discovered much later. First Naharkatiya oil field was discovered and production of crude oil from Naharkatiya oil field in the district was started in 1954. In the other oil field near Moran the 1st test well was drilled only in 1956. The crude obtained from these oil fields yield excellent paraffin wax, lubricating oil and bitumen besides various other by products and are the most important oil field for supplying crude to the refineries within the state and outside. Oil India Limited, a Public sector undertaking of the district produced 5,460 tones and 325,768 tones of LPG and crude oil respectively in 1998-99.

Natural Gas

Huge reserves of Natural Gas are associated with oil in Naharkatia and Moran Oil fields. The Assam State Electricity Board and the Fertilizer Corporation of India use the gas to generate electricity and to produce fertilizer respectively in the district. The Assam Gas Company Ltd through a pipe line distributes the gas to tea gardens and the residential areas covering a large section of the population and the tea gardens within the district. The Oil India Ltd produced 1,539,326 MMSCUM and 1,568,422 MMSCUM natural gas during 1998-99 and 1999-2000 respectively.

Clay

Kaolin or China clay and the clay for brick manufacturing are abundantly found in the district. A blackish variety of clay suitable for use in oil drilling is also found in the district. The Oil India Limited and the Oil Natural Gas Commission have been successfully utilizing it as Oil-Well-drilling mud.

Forest

Most of the areas of the reserved forests of the undivided Dibrugarh district are now fall under Tinsukia district. The district as recorded in 1999-2000 has now 21,795 hectares of Reserved Forests covered by valuable trees bamboo cane reeds and grasses and there is also a proposed to cover another 182 hectares under Joypur F.R.and 1,529 hectares under the Brahmaputra char areas. The Reserved Forests are constituted and the unclassed State forest which are simply Government waste lands like a sandy char or a huge expense of low lying land covered with high grasses and reeds and trees or a tree forest are regulated under the Assam Forest Registration VII 1891.

The district earns a major share of income from the forests and a considerable position of population of the district is also earned their livelihood from the forest and its products.

Land and land-use pattern

The district, though has a large number of tea gardens with flourishing business and a number of industries based on its rich natural resources the economy of the people is mainly dependent on agriculture. The land which was very much abundant once now shrinking with the increase of population. Out of the total area of 338,100 hectares of the district, 28,442 hectares are under forest and 136,268 hectares are unavailable for cultivation

Table-2
Land use pattern in Dibrugarh district, 1998-99 (Provisional).

Sl. No.	Land put to different uses	Area in hectares	Percentage to total geographical area.
1	2	3	4
1	Total geographical area		
	(a) Professional survey	338,100	-
	(b) Village papers	338,782	100
2	Forest area	28,442	8.4
3	Area not available for cultivation	136,268	40.2
	(a) Land put to non-agricultural uses	122,700	90
	(b) Barren and un-culturable land	13,568	10

Table-2

Land use pattern in Dibrugarh district, 1998-99 (Provisional).

Sl. No.	Land put to different uses	Area in hectares	Percentage to total geographical area.
1	2	3	4

Note: Area figures in respect of forest which includes area under reserved forest and revenue forest relate to the year 1996-97.

Char area :

The Char areas are those lands which are generally formed near the banks of big rivers. In Assam, such areas are usually found in low lying flood-prone zone from Sadiya to Dhubri inside of the mighty Brahmaputra river. The river Brahmaputra carries sand annually during flood and gets deposited in its nearby areas in the both sides of banks when the floods recede. The height of low lying plain areas near to the banks of the Brahmaputra raises by depositing sandy loan or silty loam in texture. As a result of deposition of enormous load of sediments in the middle of the river course, a large number almound-shaped river island called Chaparis or Chars are formed in Assam. The soil of these areas are of new alluvial nature. These are less acidic and are moderately rich in plant nutrients. A particular section of people begins to reside in these areas and starts cultivation too. But even though, these areas are not free from the menace of flood after their settlement also. During flood, the settlers of these areas have shifted to some other high lands to spend the period of flood and come back to their original place of abode after flood recedes. But sometimes, due to tremendous changes of river course, many chars remain free from the flood.

Administration of Char Areas:

These areas are looked after under some special provisions under the administration of the revenue circle. They are to abide by rules and regulations of the State Government like general people. However, they have some kind of their own Local Self Government also. In each Char village, a person is selected by the villagers as the head of the village, called as 'Matbor' (Headman) in the Muslim dominated Char areas. As a custom each and every person of the Char are to follow his instructions, guidance or orders on the matters relating to the community affairs and routine life of the area and people. In turn, the Matabor is guided by the elder people of his locality on all collective issues before any important decision is taken. However, the opinion or decision given by Matbor in respect of common issues such as casting of vote to a particular candidate during election, dispute regarding any matter relating to land, religion or social has to be obeyed by all.

Profile of Char Area:

In Assam, there are as many as 2,235 Chars of varying sizes during 1993-94 in 14 districts. The highest number of Chars are found in Dhubri district (480), followed by Barpeta district (310) and then Jorhat district (293). The lowest number of Chars are found in Marigaon district (39). There is no Char area in the remaining 9 districts of Assam. The Chars of Dhubri district cover an area of 86,925 hectares followed by 27,892 hectares in Barpeta district.

Socio-economic status of Char population :

The socio-economic status of the people of the Char areas are in fact miserable. The populace are mostly illiterates where only about 13 to 15 percent

of the total population of entire Char areas are literate. The standard of attainment of education is mostly not above primary level where one may hardly find any matriculate. Nearly 55 percent are living below poverty line in all Char areas. Out of total 2,39,000 hectares of Char areas of Assam, only 1,67,300 hectares are cultivable land. There are altogether 2,66,707 farming families in Char areas of Assam. The economic activities of the inhabitants of Chars are generally cultivation and fishing. The low-lying Char areas are favourable for growing Ahu, Bao and Boro, rice and also jute .The settlers of Char areas are generally grow rice and potato in large quantity. They grow various types of vegetable for sale. Whatever the amount of crops grown here are not enough to meet even their basic necessities.

The type of houses in the Char areas are mostly kutcha structure made of thatch bamboo, reed and mud. These houses are mostly huts and a very few families have their houses with C.I. sheets in roof. Houses in pucca structure with brick and cement is a very rare sight there.

The people of all Char villages are mostly used river water as their drinking water during rainy season. However, a very few villages have their hand pump / tube wells as a source of drinking water. The Char villages are not connected by road way. The country boats are used as a means of communication during flood season. During winter season, the villagers come to nearest town by travelling on foot or bicycle.

Developmental programme for Char areas

Some Developmental programmes have been undertaken by the State Government for the welfare of the people of these areas. The facilities like safe drinking water, medical sub-centres etc., are provided by the Government in some areas of different districts. Schools up to the level of primary and middle are also established in some Char areas. For higher education, the children have to go to nearby towns. The Assam Government has set-up a Char Development Authority at Guwahati for overall Development of Char people. At the district level, Offices of the Project Officers are established to look into the projects undertaken for these areas. Various kinds of loans and grant-in-aids are also provided to the villages by this Department.

In any case, the people of Char areas are maintaining a poor standard of living from all aspects. Though they are hard workers still they are unable to overcome their poverty at any cost.

However, there is no such Char villages in the district, Dibrugarh. But there are some Chaparis in the district near to the river Brahmaputra.

Agriculture :

Paddy is the staple food crop of the district and is grown extensively all over the plain areas of the district. Sali, Ahu and Bao are the three varieties of rice grown commonly in the district. Other crops grown in the district are wheat, Maize, rape and mustard seeds, pulses etc. But total production of these items is much less than the requirements of the district. Pulses are mainly grown in alluvial flat lands on the river banks and commonly grown pulses are Mati mah (Phaseolus mungo), Magu Mah (Phaseolus aureus), Arahar (Cajanus Cajan), Masur Mah (Lens esenlenta) and Motor Mah (Pisum Sativum). Cultivation of fibre crops is very limited only jute and cotton are grown in the district that is in very small quantity. The area, production and average yield of different crops during the year 1998-99 is given below as per Basic Agricultural Statistics for the year 1998-99 brought out by the Directorate of Agricultural Assam. The following table shows the production of cereals in the district during 1998-99.

Table-3

Area, production and Average Yield of crops in the district – 1998-99.

	Area (in hectare.)	Production (in tones)	Average Yield (in kg./hectare.)
1. Autumn Rice	8,820	15,544	1,791
2. Winter Rice	75,380	113,898	1,534
3. Maize	472	253	535
4. Summer Rice	428	1,534	1,992
5. Wheat	1,916	1,487	776
6. Other cereals & small millets	66	32	484
7. Tur	75	56	750
8. Gram	175	83	472

Table-3

Area, production and Average Yield of crops in the district – 1998-99.

	Area (in hectare.)	Production (in tones)	Average Yield (in kg./hectare.)
9.Black gram	1,049	709	676
10. Green gram	229	105	460
11. Lentil	286	127	445
12. Peas	1,787	611	342
13. Other Rabi pulses	256	115	450
14. Lin seed	15	6	400
15. Castor	34	11	333
16. Sesamum	304	165	543
17. Rape & Mustard	12,250	7,620	622

Fishery :

Beels and rivers are the main source of fish in the district. Various kinds of fish are found in the beels and rivers. The most popular among the large variety of fish available are Rahu, Bahu, Mirika, Pithia, Kurhi, Bhangon, Barali etc. Among the smaller variety Kaoi, Magur, Singee, Pabha, Eleng, Bariala are very common.

There are five fish farms in the district where there is 51 tanks for seedlings with an area of 1.8 hectares, 9 tanks with an area of 64 hectares for taking care of fishes and 7 tanks with area of 7.3 hectare for rearing of fish. The district collects fish eggs 163.0 Lac, Seedlings 43.4 Lac, and produce 7403.0 metric tones of fish.

The development of fisheries in the district was undertaken by the Government after independence and a number of scheme for (i) seed collection and distribution (ii) survey of fisheries and reclamation thereof (iii) renovation of ancient tanks (iv) fish farming and (v) providing loans and subsidies for promotion of pisciculture. The Department of Fisheries has one natural seed collection centre at Kotoha near Dihing river. During the rainy season fingerlings of major crops are collected from the adjoining areas inundated by the Dihing river. There is a departmental commercial cum demonstration fish farm at Sukanpukhuri in the district. There are 8 registered beel fisheries and 9 registered river fisheries in the district. The right to fish in fisheries is put to auction and the highest bidder gets the lease for one year. Forest fisheries in the district play a significant role in meeting the local demand for fish.

Note : Data collected from the District Fish Development Authority 1999-00, Dibrugarh District.

Animal Husbandry:

Livestock is considered to be the most cherished and valuable asset of a farmer. The cattle, buffaloes, sheep and goats of the district mostly live on grass and green leaves of some trees. During rainy season villagers find it difficult to gather fodder for their livestock which are mainly dependent on straw already stored. Large herds of buffaloes along with some cattle are also reared in the 'Chaparis'.

As per Statistical Handbook Assam 2002, the livestock Census recorded 283,056 cattle, 22,813 buffaloes, 789 sheep, 124,911 goats, 870 horses and ponies, 40,335 pigs, 412,315 fowls and 261,844 ducks in the district of Dibrugarh.

To improve the health and quality of these livestock, different veterinary facilities are available in the district. As per Statistical Handbook of Assam, 2002 the district possesses 4 Hospitals, 18 Dispensaries, 3 Mobile dispensaries, 11 Block dispensaries, 18 Stock men centres, 1 Livestock farm, 1 Pig farm/unit and 1 Gosadhan.

Industry :

The district of Dibrugarh is rich in natural resources. It is one of the highly industrialized district in the State of Assam. Some of the most important industries of the district are mainly based on Petroleum, crude oil, tea and forest.

Petroleum Industry

The oil found in this area led to installation of 5(five) refineries at Digboi, Guwahati, Bongaigaon all in Assam and at Barauni in Bihar and another refinery at Numaligarh which is installed newly. First oil at Digboi drilled in 1889-90 marked the birth of Oil 1835

Industry in India. The most important oil fields in the district are the Naharkatiya and Moran.

The Assam Gas Company

The Assam Gas Company is located at Duliajan. It distributes natural gas to various users and provide base for petro-chemical industry. The Thermal Power Project at Namrup utilizes gas supplied by it as fuel. The Fertilizer Corporation of India is also fed by this company. A good number of tea gardens also are benefited by the gas supplied by this company for running their factories.

The Assam Petro-Chemical Limited

The Assam Petro-Chemical Limited is located at Namrup. The main raw materials required for the project are natural gas, urea and carbondioxide and produces Methanol, Formalin and Petrol. It receives natural gas from Assam gas Company, Urea and Carbondioxide are received from Namrup fertilizer Factory.

The Namrup Fertilizer Factory

The fertilizer factory at Namrup produces aluminium sulphate, urea and sulphuric acid. The raw material required for the plant is natural gas which is received from Assam Gas Company and the other raw material like sulphur is imported from outside. During 1998-99, it has produced 110450 M. tones of urea.

Coal Industry

A sizeable quantity of coal is quarried in the district. The major coal producing area falls now in the newly formed Tinsukia district.

History of Tea industry :

The history of the tea industry in Assam dates back to the year 1826 when indigenous tea plants growing in the plains of Assam came to the notice of the East India Company. The cultivation of this plant was first introduced 1830 by the East India Company. It is mentioned in the Economic Development of Assam by P.C. Goswami that a tea garden was started by the Govt. in 1833 in the Lakhimpur district. On

1835 a few indigenous plants were taken from the forest at "Ningroo" bordering the Singphoe country and grown at "Koondilmukh"at Sadiya. A company was found in 1939 known as the Assam Company. This was the first Company in India to undertake the commercial production of tea and was the direct successor of the East India Company. The headquarters of this company was formed at Nazira and remained till the shifting to Calcutta in 1956.The Government garden was carried from 1840 to 1849. But due to certain difficulties, the garden was sold to a China man named "Among". This Chinaman failed to improve the garden. In 1851, through the instrumentality of Colonel Hannay who contributed much to the development of tea cultivation in the part of upper Assam. The early sixties of 19th century i.e. from 1859 to 1860 was a period pf steady boom. After this period the tea industry received a great setback. But this trend was cheeked by 1878. In 1881, the North India Tea Estate Owners formed the Indian Tea Association. The industry grew continuously till 1890 and thereafter it underwent through a depreciation for a short period but soon recovered from this state of affairs. The major improvements have been made in the yield of tea, in the grouping of gardens under a limited number of companies, in the progressive mechanization and rationalization of production and in increasing their efficiency of productivity of labour.

The Tokolai Reserve Station was set up at Jorhat in 1911 with a view to carrying on research on cultivation and manufacture of tea in Assam. This has been very useful in increase of yield rate of tea. In the year 1932-33, it is again met with severe crisis due to depression and over production of tea. This condition was tackled by enacting the Indian Tea Control Act, 1933 and by 1952 it reached an unprecedented prosperity. Recently the Tokolai Experimental centre had developed a machine known as Rotorvane. It is a continuous processing machine for use in a continuous processing machine for use in a continuous system of manufacture.

The Guwahati Tea Auction Centre :

Marketing of tea has always been a great problem for the industrialists. Before opening of tea Auction Centre, at Guwahati, Tea Auction Centre, at Guwahati, Tea Auction Centre in Calcutta arranged for sale of Assam Tea Auction Centre, third of its kind in India started functioning at Guwahati from Sept. 1970.

Tea, which is subject to direct traction by way of excise duty, export duty and a user under tea Act, the industry makes substantial direct contribution to central Revenues. Besides, these taxes, tea industry is also subject to central income tax, supper tax (corporation) and agricultural income tax. Income tax

Table-3

Area, production and Average Yield of crops in the district – 1998-99.

	Area (in hectare.)	Production (in tones)	Average Yield (in kg./hectare.)
9.Black gram	1,049	709	676
10. Green gram	229	105	460
11. Lentil	286	127	445
12. Peas	1,787	611	342
13. Other Rabi pulses	256	115	450
14. Lin seed	15	6	400
15. Castor	34	11	333
16. Sesamum	304	165	543
17. Rape & Mustard	12,250	7,620	622

Fishery :

Beels and rivers are the main source of fish in the district. Various kinds of fish are found in the beels and rivers. The most popular among the large variety of fish available are Rahu, Bahu, Mirika, Pithia, Kurhi, Bhangon, Barali etc. Among the smaller variety Kaoi, Magur, Singee, Pabha, Eleng, Bariala are very common.

There are five fish farms in the district where there is 51 tanks for seedlings with an area of 1.8 hectares, 9 tanks with an area of 64 hectares for taking care of fishes and 7 tanks with area of 7.3 hectare for rearing of fish. The district collects fish eggs 163.0 Lac, Seedlings 43.4 Lac, and produce 7403.0 metric tones of fish.

The development of fisheries in the district was undertaken by the Government after independence and a number of scheme for (i) seed collection and distribution (ii) survey of fisheries and reclamation thereof (iii) renovation of ancient tanks (iv) fish farming and (v) providing loans and subsidies for promotion of pisciculture. The Department of Fisheries has one natural seed collection centre at Kotoha near Dihing river. During the rainy season fingerlings of major crops are collected from the adjoining areas inundated by the Dihing river. There is a departmental commercial cum demonstration fish farm at Sukanpukhuri in the district. There are 8 registered beel fisheries and 9 registered river fisheries in the district. The right to fish in fisheries is put to auction and the highest bidder gets the lease for one year. Forest fisheries in the district play a significant role in meeting the local demand for fish.

Note : Data collected from the District Fish Development Authority 1999-00, Dibrugarh District.

Animal Husbandry:

Livestock is considered to be the most cherished and valuable asset of a farmer. The cattle, buffaloes, sheep and goats of the district mostly live on grass and green leaves of some trees. During rainy season villagers find it difficult to gather fodder for their livestock which are mainly dependent on straw already stored. Large herds of buffaloes along with some cattle are also reared in the 'Chaparis'.

As per Statistical Handbook Assam 2002, the livestock Census recorded 283,056 cattle, 22,813 buffaloes, 789 sheep, 124,911 goats, 870 horses and ponies, 40,335 pigs, 412,315 fowls and 261,844 ducks in the district of Dibrugarh.

To improve the health and quality of these livestock, different veterinary facilities are available in the district. As per Statistical Handbook of Assam, 2002 the district possesses 4 Hospitals, 18 Dispensaries, 3 Mobile dispensaries, 11 Block dispensaries, 18 Stock men centres,1 Livestock farm, 1 Pig farm/unit and 1 Gosadhan.

Industry :

The district of Dibrugarh is rich in natural resources. It is one of the highly industrialized district in the State of Assam. Some of the most important industries of the district are mainly based on Petroleum, crude oil, tea and forest.

Petroleum Industry

The oil found in this area led to installation of 5(five) refineries at Digboi, Guwahati, Bongaigaon all in Assam and at Barauni in Bihar and another refinery at Numaligarh which is installed newly. First oil at Digboi drilled in 1889-90 marked the birth of Oil 1835

Industry in India. The most important oil fields in the district are the Naharkatiya and Moran.

The Assam Gas Company

The Assam Gas Company is located at Duliajan. It distributes natural gas to various users and provide base for petro-chemical industry. The Thermal Power Project at Namrup utilizes gas supplied by it as fuel. The Fertilizer Corporation of India is also fed by this company. A good number of tea gardens also are benefited by the gas supplied by this company for running their factories.

The Assam Petro-Chemical Limited

The Assam Petro-Chemical Limited is located at Namrup. The main raw materials required for the project are natural gas, urea and carbondioxide and produces Methanol, Formalin and Petrol. It receives natural gas from Assam gas Company, Urea and Carbondioxide are received from Namrup fertilizer Factory.

The Namrup Fertilizer Factory

The fertilizer factory at Namrup produces aluminium sulphate, urea and sulphuric acid. The raw material required for the plant is natural gas which is received from Assam Gas Company and the other raw material like sulphur is imported from outside. During 1998-99, it has produced 110450 M. tones of urea.

Coal Industry

A sizeable quantity of coal is quarried in the district. The major coal producing area falls now in the newly formed Tinsukia district.

History of Tea industry :

The history of the tea industry in Assam dates back to the year 1826 when indigenous tea plants growing in the plains of Assam came to the notice of the East India Company. The cultivation of this plant was first introduced 1830 by the East India Company. It is mentioned in the Economic Development of Assam by P.C. Goswami that a tea garden was started by the Govt. in 1833 in the Lakhimpur district. On

1835 a few indigenous plants were taken from the forest at "Ningroo" bordering the Singphoe country and grown at "Koondilmukh"at Sadiya. A company was found in 1939 known as the Assam Company. This was the first Company in India to undertake the commercial production of tea and was the direct successor of the East India Company. The headquarters of this company was formed at Nazira and remained till the shifting to Calcutta in 1956.The Government garden was carried from 1840 to 1849. But due to certain difficulties, the garden was sold to a China man named "Among". This Chinaman failed to improve the garden. In 1851, through the instrumentality of Colonel Hannay who contributed much to the development of tea cultivation in the part of upper Assam. The early sixties of 19th century i.e. from 1859 to 1860 was a period pf steady boom. After this period the tea industry received a great setback. But this trend was cheeked by 1878. In 1881, the North India Tea Estate Owners formed the Indian Tea Association. The industry grew continuously till 1890 and thereafter it underwent through a depreciation for a short period but soon recovered from this state of affairs. The major improvements have been made in the yield of tea, in the grouping of gardens under a limited number of companies, in the progressive mechanization and rationalization of production and in increasing their efficiency of productivity of labour.

The Tokolai Reserve Station was set up at Jorhat in 1911 with a view to carrying on research on cultivation and manufacture of tea in Assam. This has been very useful in increase of yield rate of tea. In the year 1932-33, it is again met with severe crisis due to depression and over production of tea. This condition was tackled by enacting the Indian Tea Control Act, 1933 and by 1952 it reached an unprecedented prosperity. Recently the Tokolai Experimental centre had developed a machine known as Rotorvane. It is a continuous processing machine for use in a continuous processing machine for use in a continuous system of manufacture.

The Guwahati Tea Auction Centre :

Marketing of tea has always been a great problem for the industrialists. Before opening of tea Auction Centre, at Guwahati, Tea Auction Centre, at Guwahati, Tea Auction Centre in Calcutta arranged for sale of Assam Tea Auction Centre, third of its kind in India started functioning at Guwahati from Sept. 1970.

Tea, which is subject to direct traction by way of excise duty, export duty and a user under tea Act, the industry makes substantial direct contribution to central Revenues. Besides, these taxes, tea industry is also subject to central income tax, supper tax (corporation) and agricultural income tax. Income tax

along with sales tax levied upon it inflates the income of the state Govt, to a great extent.

Tea is the mainstay of the plywood industry. Tea grown in different parts of Assam is packed in the garden factories in plywood chests for dispatch. Tea estates require huge quantity of fertilizers for healthy growth of tea. Thus it gives a strong support to fertilizer industry also.

The labour force that engaged in the industry is bought mainly from Bihar, Madhya Pradesh, Orissa and Madras. The industry provides ample scope for employment from higher grade to lower grade workers. The tea estate in Assam is in different geographical size. It varies from small garden to large tea estates. The administration is also generally same from each other. The cell responsibility of a tea estate is vested on the Manager. He is the head of the estate. He is assisted by 2/3 Assistant Manager. The Assistant Manager are given separate responsibility such as production and supervision of garden and labours, financial affairs, stock and factory etc. each garden has a office in which there is a head clerk called "Borobabu" and he is assisted by some clerks and peon. Social services provided to its employees by hospitals urn by qualified medical officer and staff. Most of gardens have their ambulances to carry serious patient to for better treatment outside the gardens.

A major part is playing in the economy of the district by tea. It provides ample employment to the people of the district.

Now a day, many youths of the district have come forward to grow tea in their own lands. Which provide job and also earn income.

Tea-Industry in Dibrugarh district : -

Tea is a major foreign exchange earner industry in the country. Dibrugarh district has the proud privilege of having the single majority of tea gardens(1,065) which produced 15,738 thousand kgs.of tea in the year 1998. These gardens cover an area of 72000 hectares of land. The district registers an area of 328.7 hectares of land in the same year under 100 small tea growers.

Table-4

A table showing the nos. of tea gardens, area under tea cultivation and production from 1996 to 1998 is placed below:

Year	No. of gardens	Area under tea cultivation	Production in '000 kg
1	2	3	4
1996	1,065	70,022	146,433
1997	1,065	71,000	145,668
1998	1,065	72,000	157,380

Plywood Industry :

A good number of plywood factories are located in Dibrugarh district. This industry occupies an important place in the economy of the district. The items of products include commercial ply black board, flush door, marine plywood, tea chest and allied products.

Railway Workshop :

The railway workshop located at Dibrugarh is one of the largest workshop in the North-East India. It undertakes overhauling works, repairing of locomotive and coaches. Various components required for these area are also manufactured here.

A number of industries engaged in manufacture of machinery, machine tools and parts, steel furniture, steel structure and other material products are established in the district. The district has also a large number of saw mills and bricks making industries besides other various small scale industries.

Sericulture :

Sericulture is one of the age old part time occupation of the rural people during their off agricultural season. To promote this industry among the rural folk the Government had established 2(two) Muga sub-stations at Garpara and Mahamara in the district besides an Eri-seed Grainage centre at Rangsali and one Eri Seed Concentration centre at Pramita and 4(four) Mulbery Gardens were also opened in the district at Chiring Ghola, Rang Sali, Tin-thengia and Chiringhola and an Eri Spinning centre at Garpara.

The total no. of seri villages in the district are 418 out of which 274 are eri, 115 are Muga and 247 are Mulbery. The number of families engaged in

sericulture are 21,768 out of which 1,481 are engaged in Eri, 2,733 in Muga abd 4,854 are in Mulbery.

Handloom and Textile

Weaving is one of the most important traditional occupation of the women folk of Assam. Their artistic products have good demand in the market and they are cherished by the tourists from other parts of the country as well as those from abroad. The products on their traditional loom are low besides time consuming. To train the weavers on modernized looms, 3 weaving centres are available in the district. During the year 1999-00 there were 60 trainees in these training centres. Besides 3 weaving centres the district is having 1(one) weavers extension unit.

The production achieved during 1999-00 was 1306.04 meters. During this period 135 looms of the district were modernized and 66 work-shed were constructed. To help individual weavers 90 co-operative societies were started with 7,630 members.

Registered factory

The Table indicates the number and employees of registered factories in the district.

Table-5
Registered factories under factory act.

Sl. No.	Nature of factory	Nos.	Average Daily employees
1	2	3	4
1	Ata Mill	17	8
2	Rice Mill	17	8
3	Saw Mill	16	6
4	Printing	4	5
5	Electricity Supply	1	30-40
6	Automobile Factory	3	8
7	Craft Industry	8	10-Dec

9	Petrol Chemical	1	150-200
10	Ply wood	4	-
11	Brick Industry	50	30

Source : District Industry.

Health and Family welfare

Literary works of the mediaeval period refer to Kavirajas and Ojhas who attended to the ailments of the people and they were popular even during the early part of the British rule. But preventive side did not receive much attention at that time.

Fever and bowel complaints used to take heavy tolls of life. Cholera, Small-Pox and Kalazar were other deadly killer diseases. However due to modern scientific medical facilities in recent times, there is lot of improvement in the health conditions of people. At present Dysentery, Diarrhea, Influenza, Tuberculosis, Rheumatism, Typhoid, Bronchitis, Measles etc., are continued to be the most common diseases in the district but loss of life due to these diseases are kept minimum with a lot of precautionary measures.

Family Planning

Good progress has been noticed in family planning in the district. During 1998-99, about 789 women have undergone Tubectomy operation. Further 994 women have adopted Copper 'T' besides 9,733 and 378,024 are using Oral Pill and Condom respectively in the district in the same year.

Vital Statistics

In the past vital statistics were compiled from the Hat-Chitas maintained by Gaonburas or village head men. The Hat-Chitas were submitted monthly to the Mauzadars who in turn compiling these data on a monthly statement and submitting to the district Medical Officer.

With the enactment of Assam Panchayat Act. 1959, the collection of vital statistics was entrusted to the Secretary of the Gaon Panchayat. He has to submit monthly return to the Block Development Officer who in turn submits a consolidated return to the District Medical Officer and Civil Surgeon at that time. In the urban areas, vital statistics were received from the Chairman, Municipal Board or Town Committees. In the Tea Gardens, where registration of vital statistics was compulsory even prior to the above referred Act, Garden Managers maintained a

register of births & deaths and bound to submit a report monthly to the District Health Officer. The District Health Officers submitted returns of the whole district to the Director of Health Services of the State. In case of areas of Railway Stations, the Station Masters were keeping registers of births & deaths within their jurisdictions and were reporting to the Chief Medical Officers, North East Frontier Railway who in turn was submitting the returns to the Director of Health Services. Before implementation of RBD Act 1969 in the State, the Registration of Births & Deaths was not compulsory except in Tea Estates. Only after 1978, the registration of births & deaths became compulsory under the RBD Act 1969, that came into force by Assam registration of births & deaths rules 1978. Again in 1999, the Govt. of Assam framed Registration of Births & Deaths rules 1999 under the revamped system of civil registration that initiated by the Central Govt., which is now in operation.

In the districts at present all the Primary Health Centres are Registration Centres of births & deaths for rural areas and the Municipal Board or Town Committees are Registration Centres for births and deaths in the respective urban areas. The Registrar of births and deaths register all the events of births and deaths occurred in their presence or notified by the individuals/agencies nominated for that purpose by the Government. They compile all the events and submit monthly reports to the Joint Director of Health Services of the district who is designated as District Registrar of Births and Deaths. The District Registrar in turn compile all the events for the entire district and submit the returns to the Director of Health Services who is the Chief Register of births & deaths for Assam State. The Chief Register of Births & Deaths compile the figures for State as a whole and sends reports to the Registrar General India, New Delhi periodically.

In Tea Estates, events of births & deaths are collected by the Officers In-Charge of Tea Estates and these are reported to their respective Registration Centre.

The data on Registration of births & deaths available during 1957 to 1971 reveal that the Registration of births was not given much importance compared to death registration, However, the level of registration for both births & deaths was very low.

Health :

In the district there are 7 Hospitals, 37Primary Health Centres, 11 Dispensaries, 1,395 beds, 3 Rural Family Welfare Planning Centres, 275 Sub Centres.

The most significant establishment in the district is Assam Medical College (AMC) at Borbari Dibrugarh where 416,594 patients were registered and 27,464 people were registered as indoor patient during the year 1999-2000.

Education :

As per opinion of A.J.M. Mills in Dibrugarh it was difficult to find a literate person even in from very rich families before 1840 A.D. The English medium school was established first in Dibrugarh town in 1840 A.D. The first girl's school was established in Dibrugarh town in 1885 A.D. and thereafter various schools and colleges were set up in the district. The Dibrugarh University which was second in entire North East Region of India was established in 1965 A.D. in Dibrugarh. The first Medical College in Assam was set up in Dibrugarh in 1947. It was a medical school before the establishment of the college.

The history regarding the establishment of this medical school goes that the founder or father of this school was Dr. John Berry White Dr. White came to Assam to join as Assistant Surgeon in 42 Assam Native Infantry Battalion in 1858. In 1870 he was promoted to the post of Brigadier and under went retirement. Thereafter he became Civil Surgeon in Lakhimpur district and he offered medical service to the people of that areas. Again in 1882 he had taken retirement from Civil Surgeon post. At the time people including labourers of Tea Estates were died of malaria, Pat-chala (diarrhoea), kalahjar etc. To save the lives of people, Dr. White alongwith other physicians helped the people with their best efforts. After retirement Dr. White came to Dibrugarh town and he offered his medical service to the people of the town as well as its neighbouring areas. In Dibrugarh town, near the resident of Grahma Chahab there were some small hats. Grahma Chahab had demolished these hats and later on this place was known as Grahma Bazar. Dr. Berry White had started to offer medical service near this place. He had planned to establish a medical school in this place (Grahma Bazar area). He wanted to deliver training to some local youths but the required equipments for training was very limited. He had in stock only two

stethoscope, one blood pressure measuring instrument, six thermometers. But during training out of six thermometers, three had broken. Still he had not dishearted. The school was established by a donation of Rs. 50,000/- given by Dr. Jhon Berry White before 1896. Berry White Medical School was set up with the help of the Chief Commissioner of Assam, Sir Henry Cotton. But in systematic way of training was started from 1900 A.D. At the beginning, the school had to face various problems in admitting student due to their educational attainment. The youths were not ready to touch dead body, stool and urine of the patients. After making the students understand from all corners, the youths with VII and VIII class passed were admitted in school for training. Later on, gradually the number of students increased and for the admission of the student's minimum educational qualification was fixed at Matriculation in 1917. In 1910, X-ray machinery was placed in the school. In 1938, the Chief Minister of Assam Lt. Gopinath Bordoloi had raised his voice before Nikhil Bharat Association of license holders physicians to transfer the Berry White medical school to a full-fledged college. Immediately in 1934, the Second World War was started for which the process of development of this school was blocked.

The place where present Assam Medical College is located was a place for horse race competition. In the time of Second World War, this kind of horse race was stopped and this place was captured by the military and established 56 No. Indian General Hospital for military at 109 acres land in 1943. After the end of the war, the military had left the place leaving various medical equipments. In 1946 the Assam Government had taken ownership of land and equipments of the hospital.

In 1946, the Vor Committee had abolished all medical schools of the country and granted approval to set up Medical College. As per decision of the president Dr. Bidhan Roy of the Committee formed by Assam Government, the Assam Medical College was established in Borbari of Dibrugarh on 3rd November, 1947.

The great physician Dr. John Berry White was died in 19th November, 1896 giving his noble service to the people of Assam and for this act of his kindness, the people of Assam will remember him all the days to come.

Trade and commerce :

The district of Dibrugarh is rich in natural wealth. The important industries like petroleum, tea and plywood are established in the district. Large quantities of the products are exported from the district to the various parts of the country and some even to the international markets. Tea is the most important commodity of export and earns considerable amount of foreign exchange.

Crude oil is another principal commodity of export. The discovery of new oil fields at Naharkatiya, Hugrijan and Moran raises hope for the country to earn a considerable amount of foreign exchange.

Plywood is very important commodity of export and plays a significant role in the economy of the country. Urea, Amonium sulphate produced in the district find their way into other parts of the country. The other products exported from the district consists of timber products, cane and cane products, tea chests and other miscellaneous products of small scale industries established in recent years in the district. The main items of imported articles into the district are rice, wheat, pulses, grain, peas, groundnuts, spices, all kinds of edible oils, onion, garlic, sugar, other chemical fertilizers, cement, C.I. sheet, iron materials, paints, tube-well pumps and pipes, cycles, motor cars machineries required for major and small scale industries, clothes and garments. The important trade centres of the district are Dibrugarh, Moran, Naharkatiya, Bordubi, Panitola, Chabua. Both the wholesale and retail trade go side by side in almost all the trade centres. However, bulk of wholesale trade is concentrated in the town of Dibrugarh. The products dealt with are consumers goods and food stuff.

Banking and Finance

As observed by the Assam Provincial Banking Enquiry Committee in 1929, the history of indigenous banks in Assam is shrouded in obscurity. However, with the expansion of the tea industry and oil industry, the credit structure of the district took a concrete shape. Several banks have been set up in various parts of the district. In addition, co-operative credit societies are also in operation. However, even now also, the money-lender continues to be an important source of rural credit.

The following table explains the number of banks in the districts and the position of deposits and credits.

Table-6
Position of Deposits and Credits in Banks as on December 31, 1999-Dibrugarh district

Sl. No.	Type of bank	No. of offices	Deposits (Rs.lakhs)	Credit (Rs.lakhs
1	2	3	4	5
1	Scheduled Comm. Banks.	68	623,70	173,36
2	Regional Rural Banks.	12	2,331	353
3	Total	80	64,701	17,689

Source : Quarterly Handout of RBI, quoted in Statistical Handbook, Assam, 2000.

Transport :

The district of Dibrugarh is connected by road, railway, river and air. The national highway No. 37 forms the artery of roads communication in the district. A number of earthen, graveled and black topped roads are available to this highway. The National Highway No. 37 which was known earlier as Assam South Trunk Road enters Dibrugarh from Sibsagar and runs from Moran in north eastern direction upto Dibrugarh and stretches alongwith railway line upto Doom Dooma and extends upto Saikhowaghat which stands on the bank of river Luhit. The Makum Lekhapani Road known as national highway No. 38, now in Tinsukia district is off from Makum and reaches Ledu, through Margherita. The road length during 1997-98 in Dibrugarh district in the category of National Highway was 74 kms. in state highway it was 132 kms. and other PWD roads it was 1,140 kms. Thus in total there was 1,346 kms. road under PWD in the district of Dibrugarh. By the types of roads, surfaced road was 308 kms. and unsurfaced gravelled is 1,038 kms.

The number of motor vehicles in the Dibrugarh district in 1998-99 was 12,346 and comes next to Kamrup district having the highest number of motor vehicles on the road in the state with nos. 145,234.

The total number of motor vehicles on the road in the district during 1998-99 as mentioned in the Statistical Handbook Assam, 2000 were buses 458, trucks 1,119, two wheelers 8,389, motor cars 1,433, jeeps 182, tractors 219, government vehicles 8, auto rickshaws 410 and any others 9.

The rail communication is established with the rest of the country by single tracked Broad Gauge line. Almost all the places of commercial and industrial importance are connected by the railway. The line runs from Dibrugarh through tea producing areas like Lahoal, Dikom, Chabua.

The Indian Water Transport an undertaking of the State Government runs ferry services along the Brahmaputra to link the north bank with south bank. These are Dibru-Sonari-Borsuti, Dibru-Kachari-Orium ghat and Dibru-Sissi-Machkhowa. There are some other ferry services in different rivers in the district that are auctioned by the Government to the private contractors.

Air transport is very recent in the district. Regular civilian air services was introduced only in the middle of the present century. The district has one Airport at Mohanbari which is at present known as Mohanbari Aerodrum. It has got the facility of loading of Boeing 737. It is about 16 kms. from Dibrugarh town and is located at a distance of 2 kms. from the Dibrugarh-Tinsukia road.

Employment

The number of unemployed youths in the district, as registered in the Employment Exchange in 1999-2000 was 41,659. There is 14,408 employees in the districts during 1999. However, the problem of unemployment is quite large among educated use of the district

****

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room

available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classificd as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy thc demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the

exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo
9 Kaibartta
10 Lalbagi
11 Mahara
12 Methar,Bhangi
13 Muchi, Rishi
14 Namasudra
15 Patni
16 Sutradhar

Scheduled Tribes :

I. In the autonomous district :
1 Chakma

2 Dimasa,Kachari

3 Garo

4 Hajong

5 Hmar

6 Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam

7 Any Kuki Tribes Including:

(i) Biate,Biet
(ii) Changsan
(iii) Chongloi
(iv) Doungel
(v) Gamalhou
(vi) Gangte
(vii) Guite
(viii) Hanneng
(ix) Haokip, Haupit
(x) Haolai
(xi) Hengna
(xii) Hongsungh
(xiii) Hrangkhwal, Rangkhol
(xiv) Jongbe
(xv) Khawchung
(xvi) Khawathlang, Khotalong
(xvii) Khelma
(xviii) Kholhou
(xix) Kipgen
(xx) Kuki
(xxi) Lengthang
(xxii) Lhangum
(xxiii) Lhoujem
(xxiv) Lhouvun
(xxv) Lupheng
(xxvi) Mangiel
(xxvii) Misao
(xxviii) Ring
(xxix) Sairhem
(xxx) Selnam
(xxxi) Singson
(xxxii) Sitlhou
(xxxiii) Sukte
(xxxiv) Thado
(xxxv) Thangngeu
(xxxvi) Uibuh
(xxxvii) Vaiphei

8 Lakher

9 Man(Tai Speaking)

10 Any Mizo(Lushi)Tribes

11 Mikir

12 Any Naga Tribes

13 Pawi

14 Syntheng

II. In the State of Assam excluding the Autonomous District

1 Barmans in Cacher

2 Boro, Borokachari

3 Deori

4 Hojai

5 Kachari, Sonwal

6 Lalung

7 Mech

8 Miri

9 Rabha

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

CONCEPTS

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such

professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the

CONCEPTS

terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5.

This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course

that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment,

Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a). The total population of the district comes to 1,185,072 in 2001 Census. Male comprises 613,555 while female consists of 571,517. Out of the total population of the district, 956,634 fall under rural and 228,438 are under urban areas of the district. In rural areas 490,118 and 466516 are males and female respectively. Accordingly 123,437 and 105,001 are males and females respectively in urban of the district. The percentage of urban population in the disrict Dibrugarh is only 19.28 . The district is a rural base place in which 80.7 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +13.7 which is lower than the state rate. Dibrugarh district there are 9 towns , out of which 3 numbers of town with Statutory town status and 3 towns with Census Town Status.Dibrugarh town is the only town with Municipal Board and Chabua and Naharkatiya town with Town Committee status. The density of the district is 351 persons per sq. kms. which is higher than the state density (340). The sex ratio in the district is 931 as against 935 in the State. Out of total population of the district, 39.9% is total workers of which 50.1% and 28.9 % are male and female respectively.The percentage of non- workers is 60.1 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 29.0 %, 7.6%, 2.3% and 61.2% respectively.

The literacy rate is 69.0% in the district of which 77.3% is for males and 60.0% is for females. The district literacy rate is above the state literacy rate (63.3)%.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

INSET TABLES

TABLE : 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

5	Moran	132,347	132,347	-	150,471	143,645	6,826	13.7	8.5	100.0	-	4.5
6	Tingkhong	122,759	122,759	-	142,637	142,637	0	16.2	16.2	-	-	0
7	Naharkatiya	160,134	125,342	34,792	174,590	140,046	34,544	9.0	11.7	-0.7	21.7	19.8
District Total:		**1,042,457**	**858,877**	**183,580**	**1,185,072**	**956,634**	**228,438**	**13.7**	**11.4**	**24.4**	**17.6**	**19.3**

The table-1 shows the decadal change in population of Revenue Circles by residence in rural and urban of Dibrugarh district during 1991 and 2001 Censuses. It is noticed from the table that the total population of the district is 1,185,072, out of which 956,634 are in rural and 228438 are in urban and the growth rate during 1991-2001 is recorded 11.4 percent in rural and 24.4 percent in urban. The percentage of urban population to total population is little less than 20 percent. Among the Tahsils or Revenue Circles, Chabua Revenue Circle recorded the highest growth rate of 23.0 percent followed by Tengakhat with 22.1 percent and the lowest is noticed in Dibrugarh East Revenue Circle with 2.2 percent. In the distribution of population among the Revenue Circle in rural of the district, it is noticed that the growth rate during 1991-2001 is 16.2 percent in Tingkhong Revenue Circle which is the highest followed by Chabua Revenue Circle and Tengakhat Revenue Circle with 14.2 percent each. In terms of numerical figures, Dibrugarh Revenue Circle is recorded the highest number with 239,786 persons but in the proportion of growth rate during 1991-2001it is recorded very low especially in rural. However, in term of number of urban population, Dibrugarh East Revenue Circle has recorded 129,720 persons which is more than population in rural.

The table- 2 gives the CD Block wise distribution of number and percentage of inhabited villages in specified population size ranges with the related population. Out of 1,309 total number of inhabited villages in the district, 33.3 percent are in the population size ranges between 200-499, constituting the population of approximately 16 percent of the total population. It is followed by 29.3 percent of villages in the population size ranges between 500-999 population range with the population of 28 percent of the total population of the district and in the population range between 1000-1999, the percentage of villages is 17.0 percent and constituted approximately 31 percent of the total population of the district. However, the number and percentage of villages in the population range of 2000-4999 is 67 villages and 5 percent respectively and in the population range between 5000-9999 the number of villages are very few with 4 villages and constituted 2.5 percent of the total population of the district. There is no village in the district with the population range of 10,000 and above. Among the CD Blocks in the district, Khowang CD Block has the highest number of inhabited villages with 293 of which 118 villages are noticed in the population size range between 200-499. The smallest number of inhabited village is noticed in Panitola CD Block with 90 villages of which 32 villages are found in the population size range between 1000-1999.

INSET TABLES

TABLE : 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of town
(a) New	
(i) Statutory town	Nil
1	
2	
3	
(ii) Census town	
1	
2	
3	
(b) Denotified	Nil
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	
1	Nil
2	
3	
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	
1	Nil
2	
3	
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census	
1	Nil
2	
3	
(c) Declassified	
1	Nil
2	
3	
(d) Wholly merged with other town(s)	Nil
1	
2	
3	

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

The table-3 shows that Dibrugarh district consists of 3 statutory towns and 6 Census towns in 2001 Census. Out of 6 Census towns, 3 Census towns viz Duliajan No1, Sarupathar Bengali and Moran town have been formed during 2001 Census. No new statutory town comes up in 2001 Census. No town of 1991 Census has been de-notified or declassified or wholly merged with other town during 2001 Census in Dibrugarh district.

TABLE : 4

DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	8	0.6	2,734	0.3
11-20	8	0.6	922	0.1
21-50	25	1.9	2,258	0.2
51-100	47	3.6	9,008	0.9
101-200	136	10.4	36,305	3.8
201-300	206	15.7	99,758	10.4
301-500	446	34.1	327,970	34.3
501 +	433	33.1	477,679	49.9
Not known	0	0.0	0	0.0
District Total:	**1,309**	**100.0**	**956,634**	**100.0**

Population Density (Rural) of the district: 421.1

The table-4 indicates the distribution of villages by population density. Out of total number of 1,309 villages in the district, the highest number of villages are noticed in the density range of 301-500 per square kilometer. It constitutes approximately 34.0 percent of the total villages and the proportion of distribution of population is 34.3 percent of the total population in the district. In the next range of population density 501 +, the percentage of villages is 33.1 percent and the percentage distribution of population is 49.9 percent. From the above table, it is noticed that the higher is the range of population density per square kilometer, more is the number of villages in each population density. There is no village in the range of population density "Not Known".

TABLE : 5
SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			Jorhat		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	863	889	583
1911	915	923	626	883	906	637
1921	895	906	613	870	890	608
1931	874	885	574	818	839	538
1941	875	886	605	847	866	580
1951	868	878	663	829	851	611
1961	869	887	661	835	862	648
1971	896	912	744	863	894	705
1981	—	—	—	—	—	—
1991	923	934	838	905	923	826
2001	935	944	872	931	952	851

Note :Sex ratio has been defined here as the number of females per 1000 males.

The table- 5 gives the sex ratio of state and district from 1901 to 2001 Censuses. During this historical Census that conducted after 110 years, the sex ratio in the state and the district has shown an increasing trend. The sex ratio recorded 919 and 915 in 1901 and 1911 Censuses in the state, has gone up to 935 in 2001. In the district, from 863 recorded in 1901, it has gone up to 931 in 2001 Census. The increase is noticed both in rural and urban of the state and district.

TABLE : 6
SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Dibrugarh West	948	951	908
2	Dibrugarh East	909	949	876
3	Chabua	900	950	595
4	Tengakhat	928	940	868
5	Moran	955	958	877
6	Tingkhong	964	964	
7	Naharkatiya	936	952	873
District Total:		**931**	**952**	**851**

The table-6 gives the sex ratio by Revenue Circles. The district sex ratio of 931 is fallen short of the state sex ratio of 935 but in rural, the district sex ratio of 952 is more than the state rural sex ratio of 944. Among the Tahsils/Revenue Circles, Tingkhong Revenue ircle recorded the highest sex ratio of 964 and the lowest is noticed in Chabua Revenue Circle with 900 sex ratio. The sex ratio in urban of Dibrugarh West Revenue Circle recorded 908 which is more than the district urban sex ratio of 851 whereas Chabua Revenue Circle recorded the lowest sex ratio 595 in urban.

TABLE 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D Block	Sex ratio
1	2	3
1	Barbarua	950
2	Lahowal	951
3	Panitola	949
4	Tengakhat	940
5	Khowang	958
6	Tingkhong	964
7	Joypur	952
District (Rural) Total:		**952**

The table-7 gives the CD Block-wise sex ratio in the district. Out of seven CD Blocks in the district, two CD Blocks, viz. Tingkhong CD Block and Khowang CD Block recorded the sex ratio of 964 and 958 respectively which are higher than the district rural sex ratio. The lowest sex ratio is noticed in Tengakhat CD Block with 940.

INSET TABLES

TABLE : 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	16	1.2	3,631	0.4
700-749	12	0.9	5,577	0.6
750-799	31	2.4	13,576	1.4
800-849	78	6.0	31,398	3.3
850-899	168	12.8	103,222	10.8
900-949	325	24.8	284,199	29.7
950-999	339	25.9	311,431	32.6
1000-1099	292	22.3	189,853	19.8
1100+	48	3.7	13,747	1.4
District Total:	**1,309**	**100.0**	**956,634**	**100.0**

Sex ratio (Rural) for District: 952

The table–8 gives the sex ratio of rural population by ranges. Out of the total number of 1,309 inhabited villages, 25.9 percent villages have the sex ratio between 950-999 and 24.8 percent villages occupy the sex ratio in the range between 900-949. The percentage distribution of population in these two ranges of sex ratio constituted approximately 63.0 percent of the total population. In the range of sex ratio for villages between 1000-1099, the percentage of villages is little above 22.0 percent with the percentage distribution of population of 19.8 percent and in the range of sex ratio of 850-899, the percentage of villages is 12.8 percent and the percentage of population of 10.8 percent. It is seen from the table the approximately 46.0 percent of the villages have the sex ratio which is below the range of the district sex ratio.

TABLE: 9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A / Town	Urban status of town	Sex ratio
1	2	3	4
1	(a) Dibrugarh (MB+OG)	-	877
2	(i) Dibrugarh (MB)	-	872
3	(b) Barbari (AMC AREA) (CT)	-	920
4	Chabua (TC)	-	595
5	Duliajan Oil Town (CT)	-	892
6	Duliajan No.1 (CT)	-	808
7	Sarupathar Bengali (CT)	-	802
8	Moran Town (CT)	-	877
9	Naharkatiya (TC)	-	879
10	Namrup (CT)	-	867
Sex ratio (Urban) for the district:			**851**

The table-9 shows the sex ratio of urban agglomeration and towns in the district. Out of nine towns in the district, six towns recorded the sex ratio above the sex ratio of the district. The lowest sex ratio 595 is noticed in Chabua TC and the highest sex ratio is found in Barbari AMC Area CT with 920 which is much higher than the state urban sex ratio of 872.

TABLE :10
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

		Urban	**23365**	**12181**	**11184**	**918**

The table-10 gives the sex ratio of population in the age-group 0-6 for Revenue Circles. The sex ratio for 0-6 age group is 962. Among the Revenue Circles, Dibrugarh West RC recorded the highest sex ratio for 0-6 age group with 982 females per one thousand males and the lowest ratio 941 is noticed in Moran RC. In urban of Tengakhat RC, 938 sex ratio for 0-6 age group is recorded which is the highest among all RCs. The sex ratio for 0-6 age-group for the district is higher than the sex ratio for total population of the district.

TABLE :11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Sl. no	Name of CD Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Barbarua	18883	9502	9381	987

District (Rural) Total:		**149266**	**75804**	**73462**	**969**

The table-11 shows the sex ratio of population in the age group 0-6 for CD Blocks. Among the CD Blocks, Barbarua CD Block with the sex ratio of 987 is the highest and Panitola CD Block is the lowest sex ratio with 931 females per one thousand males. Out of the seven CD Blocks in the district five CD Blocks recorded higher the sex ratio for 0-6 age group than the district ratio.

TABLE : 12
SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	146	11.2	6527	4.4
700-749	64	4.9	6266	4.2
750-799	71	5.4	6769	4.5
800-849	109	8.3	11884	8.0

900-949	102	7.8	14542	9.7
950-999	101	7.7	20462	13.7
1000-1099	247	18.9	34677	23.2
1100+	375	28.6	32303	21.6
District (Rural) Total	**1309**	**100.0**	**149266**	**100.0**
Sex ratio (Rural) for District:			**969**	

The table-12 shows the sex ratio of rural population in the age group 0-6 by ranges. From the table, it is noticed that out of 1,309 total number of villages, 375 villages have the sex ratio between the range 1100 + followed by sex ratio range between 1000-1099 with 247 villages and the percentage distribution of population in the above mentioned ranges is 21.6 percent and 23.2 percent respectively. The sex ratio for 146 villages is less than 700 females per 1000 males. Approximately 44.8 percent of the villages in the district has the sex ratio which is below the sex ratio for the district.

TABLE :13
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS /TOWNS, 2001

Sl. no.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

District(Urban) Total			**23,365**	**12,181**	**11,184**	**918**

The table-13 shows the sex ratio of population in the age-group 0-6 of urban agglomeration and towns in the district. Among the towns, Sarupathar Bengali CT is recorded the highest sex ratio of 943 for 0-6 age-group and the lowest is noticed in Moran Town CT with 817 sex ratio. Out of nine towns in the district, five towns recorded the sex ratio for 0-6 age-group below the district urban sex ratio for same age-group.

The table-14 gives the number and percentage of Scheduled Castes and Scheduled Tribes population in Revenue Circles in the district. Out of 11.9 lakh total population in the district, 4.1 percent is Scheduled Castes and 7.5 percent is Scheduled Tribes population. In rural-urban break up, Scheduled Castes constituted 3.5 percent in rural and 6.4 percent in urban while Scheduled Tribes constituted 8.2 percent in rural and 4.2 percent in urban. Among the Revenue Circles, Dibrugarh West Revenue Circle recorded the highest percentage of Scheduled Castes with 6.6 percent and Tingkhong Revenue Circle recorded the lowest percentage of 0.9 percent. In case of Scheduled Tribes, Dibrugarh West Revenue Circle recorded the highest 17.9 percent and the lowest percentage is noticed in Dibrugarh East Revenue Circle with 2.5 percent.

TABLE: 15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Serial number	Name of CD Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Barbarua	130,313	8,565	22,400	6.6	17.2
2	Lahowal	129,473	5,191	2,123	4	1.6

4	Tengakhat	163,063	6,491	13,285	4	8.1
5	Khowang	143,645	1,802	17,568	1.3	12.2
6	Tingkhong	142,637	1,345	5,795	0.9	4.1
7	Joypur	140,046	3,551	12,792	2.5	9.1
District (Rural) Total:		**956,634**	**33,491**	**78,830**	**3.5**	**8.2**

The table-15 shows the number and percentage of Scheduled Castes and Scheduled Tribes population in CD Blocks. Out of 9.6 lakh total rural district population, 3.5 percent are Scheduled Castes and 8.2 percent are Scheduled Tribes which are both below the state level percentage rate. Among the CD Blocks the highest concentration of Scheduled Castes and Scheduled Tribes are noticed in Barbarua CD Block with 6.6 percent and 17.2 percent respectively. Tingkhong CD Block recorded the lowest percentage of Scheduled Castes with 0.9 percent and Lahowal CD Block recorded the lowest percentage of Scheduled Tribes with 1.6 percent.

TABLE : 16
PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	994	75.9	0	0.0
Less than 5	191	14.6	4,032	12.0
5-10	46	3.5	3,696	11.0
11-20	21	1.6	3,026	9.0
21-30	9	0.7	1,723	5.1
31-40	9	0.7	2,779	8.3
41-50	3	0.2	840	2.5
51-75	12	0.9	3,553	10.6
76 and above	24	1.8	13,842	41.3
District Total	**1,309**	**100.0**	**33,491**	**100.0**

The table-16 gives the proportion of Scheduled Castes population to total population in the village during 2001 Census. It is observed from the table that out of 1,309 number of total inhabited villages in the district, 994 or 75.9 percent villages have not a single Scheduled Castes person in the village. In less than 5 percentage range of Scheduled Castes population to total population, there are 191 or 14.6 percent villages with the Scheduled Castes population of 4,032 or 12 percent of the total Scheduled Castes population. The highest number of Scheduled Castes population is noticed in the percentage range 76 and above with the population of 13,842 or 41.3 percent in 24 number of villages. The lowest is noticed in percentage range 41-50 with only 3 number of villages having 840 Scheduled Castes population.

INSET TABLES

TABLE : 17

PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	788	60.2	0	0.0
Less than 5	217	16.6	3,186	4.0
5-10	62	4.7	3,932	5.0
11-20	47	3.6	5,022	6.4
21-30	40	3.1	6,887	8.7
31-40	26	2.0	5,922	7.5
41-50	13	1.0	3,443	4.4
51-75	43	3.3	19,444	24.7
76 and above	73	5.6	30,994	39.3
District Total	**1,309**	**100.0**	**78,830**	**100.0**

The table-17 shows the proportion of Scheduled Tribes population to total population in villages. Out of 1,309 total number of inhabited villages in the district, 788 villages or 60.2 percent have no Scheduled Tribes population. In 217 villages, the Scheduled Tribes population are in the range of less than 5 percent. The lowest number of villages is noticed in the percentage range 41-50 with 13 villages. In the distribution of Scheduled Tribes population in the district, it is observed that the highest concentration of Scheduled Tribes population is in the range 76 and above with 30,994 or 39.3 percent.

TABLE : 18

NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	(a) Dibrugarh (MB+OG)	133,571	10,013	5,652	7.5	4.2
2	(i) Dibrugarh (MB)	121,893	8,073	3,710	6.6	3
3	(b) Barhari (AMC AREA) (CT)	4,090	858	180	21	4.4
4	Chabua (TC)	17,433	475	93	2.7	0.5
5	Duliajan Oil Town (CT)	23,763	1,087	814	4.6	3.4
6	Duliajan No.1 (CT)	1,602	110	32	6.9	2

9	Naharkatiya (TC)	15,523	770	1,168	5	7.5
10	Namrup (CT)	19,021	735	1,206	3.9	6.3
District(Urban) Total		**228,438**	**14,533**	**9,507**	**6.4**	**4.2**

The table-18 gives the town-wise distribution of number and percentage of Scheduled Castes and Scheduled Tribes population in the district. It is observed that out of 2.3 lakh population in the urban of the district, 6.4 percent are Scheduled Castes and 4.2 percent are Scheduled Tribes. Among the towns, Dibrugarh MB+OG shows the highest number of both Scheduled Castes and Scheduled Tribes population with 10,013 and 5,652 persons respectively. The lowest Scheduled Castes population is noticed in Moran Town CT with 55 persons and in case of lowest Scheduled Tribes population it is noticed in Duliajan No.1 CT with 32 persons.

TABLE : 19
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C D BLOCKS, 2001

Sl.no.	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Barbarua	928	975
2	Lahowal	948	1010
3	Panitola	924	947
4	Tengakhat	900	974
5	Khowang	961	976
6	Tingkhong	902	998
7	Joypur	919	1000
District (Rural) Total		**924**	**980**

The table-19 depicts CD Block wise sex ratio among Scheduled Castes and Scheduled Tribes. The district rural sex ratio of 924 for Scheduled Castes is less than the district rural total population sex ratio of 956. Among the CD Blocks, the highest sex ratio of Scheduled Castes is noticed in Khowang CD Block with 961 and in Scheduled Tribes it is in Lahowal CD Block with 1,010 which is followed by Joypur CD Block with 1,000 sex ratio. The lowest sex ratio of Scheduled Castes population among CD Blocks is found in Tengakhat CD Block with 900 and in Scheduled Tribes, the lowest sex ratio is noticed in Panitola CD Block with 947 females per 1,000 males.

TABLE : 20
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Sl. no.	Name of U.A / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	(a) Dibrugarh (MB+OG)	932	968
2	(i) Dibrugarh (MB)	934	983
3	(b) Barbari (AMC AREA) (CT)	869	1022
4	Chabua (TC)	786	979
5	Duliajan Oil Town (CT)	864	902
6	Duliajan No.1 (CT)	594	1133
7	Sarupathar Bengali (CT)	762	862
8	Moran Town (CT)	833	969
9	Naharkatiya (TC)	787	1014
10	Namrup (CT)	775	902
Sex ratio (Urban) for the district:		**893**	**959**

The table-20 shows town-wise sex ratio among Scheduled Castes and Scheduled Tribes during 2001 Census. Both the sex ratio of Scheduled Castes and Scheduled Tribes in urban of the district recorded 893 and 959 are higher than the district urban total population sex ratio of 851. Among the towns, Dibrugarh MB recorded the highest sex ratio of 934 in Scheduled Castes and Duliajan No 1 CT recorded the highest sex ratio of 1,133 in Scheduled Tribes which is followed by Barbari (AMC Area, CT) with 1,022 and Naharkatia TC with 1,014 females per 1,000 males. The lowest sex ratio in Scheduled Castes is noticed in Duliajan N0 1 CT with 594 and the lowest sex ratio of 862 in Scheduled Tribes is found in Sarupathar Bengal CT.

The tables-21 gives the number and percentage of literates and illiterates by sex in tahsils of the district. The proportion of literates in the district is 69.0 percent of which 64.0 percent literates are in rural and 88.5 percent are urban. The male literates which recorded 77.3 percent predominates the female literates which recorded 60.0 percent and this phenomenon is observed both in rural and urban of the district. The state literacy rate is 63.3 percent of which male literacy rate is 71.3 percent and female literacy rate is 54.6 percent. These rates are lower than the district rate. The gap in male-female literacy rate is 19.5 percent in rural and 6.4 percent in urban. Among the Revenue Circles, four Revenue Circles namely, Dibrugarh East, Naharkatia Revenue Circle, Moran Revenue Circle and Dibrugarh West Revenue Circle recorded the literacy rate of 72.7 percent, 72.1 percent, 72.0 percent and 70.0 percent respectively which are little above the district literacy rate. The lowest literacy rate is noticed in Chabua Revenue Circle with 60.5 percent. In rural Mora Revenue Circle recorded the highest literacy rate of 71.1 percent and the lowest is recorded in Dibrugarh East Revenue Circle with 54.5 percent . However, in urban, the highest literacy rate is noticed in Chabua Revenue Circle and Tengakhat Revenue Circle followed by Naharkatia Revenue Circle with 90.7percent . The lowest is noticed in Dibrugarh East Revenue Circle with 87.2 percent.

TABLE:22

NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN CD BLOCK, 2001

Sl. no.	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

District (Rural) Total:		**51,6707**	**304,559**	**212,148**	**439,927**	**185,559**	**254,368**	**64**	**73.5**	**54**	**19.5**

The table-22 shows the CD Block wise of number and percentage of literates and illiterates by sex. The district rural literacy rate is 64.0 percent and male literates predominate the female literates by 73.5 percent to 54.0 percent. Among the CD Blocks, Khowang CD Block registered the highest literacy rate with 71.1 percent and the lowest is noticed in Lahowal CD Block with 53.7 percent. In all CD Blocks, the male literates are more than female literates and the highest gap in male-female literacy rate is noticed in Panitola CD Block with 21.6 percent which is also higher than the district gap rate.

TABLE : 23
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.2	19	0.0
1-10	1	0.1	265	0.0
11-20	20	1.5	13,094	1.4
21-30	51	3.9	45,965	4.8
31-40	83	6.3	92,658	9.7
41-50	125	9.5	134,832	14.1
51-60	167	12.8	112,859	11.8
61-70	195	14.9	136,138	14.2
71-80	243	18.6	164,910	17.2
81-90	325	24.8	214,141	22.4
91-99	94	7.2	41,688	4.4
100	3	0.2	65	0.0
District Total:	**1,309**	**100.0**	**956,634**	**100.0**
Literacy rate for District:		**69**		

The table-23 gives the distribution of villages by literacy rate range. More than 51.0 percent of the total inhabited villages have literacy rate above the literacy rate of the district. It is also observed that more is the number of inhabited villages more is the range of literacy rate for villages. There are 2 villages with 19 population where there is no literate person and there is one village which falls under literacy range of 1-10 percent. However, there are 3 villages with 100 percent range of literacy rate. The highest number of inhabited villages 325 in number are noticed in the range of literacy rate between 81-90 percent with the total population of 22.4 percent of the district population.

The table-31 depicts the Revenue Circle wise number and percentage of Main workers, Marginal workers and Non-workers by sex. The total workers in the district which include Main and Marginal workers constitute nearly 40 percent and Non-workers constitute 60 percent. In the break up of male workers and female workers, the proportion of total male workers formed 50 percent while female total workers percentage is approximately 29 percent. The percentage of Main workers is 28.9 percent and Marginal workers is 10.9 percent respectively. It is observed that the male workers is predominated the female workers in the Main workers while it is vice versa in case of Marginal workers.

Among Revenue Circles, the highest percentage of total workers is noticed in Tingkhong Revenue Circle with 43.8 percent and the highest proportion of Non-workers is noticed in Dibrugarh East Revenue Circle with 64.5 percent. The highest percentage of Main workers is noticed in Dibrugarh East Revenue Circle and Tengakhat Revenue Circle with 30.1 percent each. Dibrugarh West Revenue Circle recorded the highest percentage of Marginal workers with 16.2 percent

The table-32 indicates the CD Block wise distribution of number and percentage of Main workers, Marginal workers and Non- workers by sex. The percentage of total workers in rural of the district is 41.4 percent of which 28.3 percent are Main workers and 13.2 percent are Marginal workers. In the break up of male/female workers, male Main workers with 38.6 percent predominate the female workers. However, in Marginal workers, female Marginal workers with 15.7 percent is more than the male Marginal workers of 10.7 percent. Among the CD Blocks, Tengakhat CD Block with 30.1 percent is the highest recorded in Main workers and in Marginal workers, Barbarua CD Block recorded the highest percentage of 16.8 percent. Further, the highest percentage of Non-workers is noticed in Panitola CD Block with 65.5 percent and the lowest proportion is noticed in Tingkhong CD Block and Joypur CD Block with 56.2 percent each.

The table-33 shows the town wise distribution of number and percentage of Main workers, Marginal workers and Non-workers by sex. The proportion of total workers in the urban of the district is 33.4 percent of which male workers are 53.3 percent and female workers are 9.9 percent. The percentage of male Main workers in urban of the district recorded 51.2 percent. But very low percentage is recorded against female Main workers. Both male and female Marginal workers recorded very low percentage in towns of the district. The highest 90.1 percentage of female non-workers is noticed in the district. Among the towns, the highest distribution of number of male Main workers is noticed in Dibrugarh MB+OG with 35,657 workers and the lowest number of male Main workers is noticed in Duliajan No.1 CT with 427 workers. In case of non-workers, the female non-workers are more than male non-workers in all the towns of the district. The highest female non-workers among the towns is noticed in Dibrugarh MB+OG with 55,834 and the lowest is noticed in Duliajan No.1 CT with 626 females.

Note: Percent of Worker to total worker are given in brackets

The table-34 betokens the category wise distribution of workers by sex among the tahsils in the district. Out of 4.7 lakh total number of workers in the district 2.9 lakh or approximately 61.0 percent are Other workers, 29.0 percent are Cultivators, 7.6 percent are Agricultural Labourers and 2.3 percent are Household Industry workers. It is seen from the table that the number of male workers are more than female workers in all the categories of economic activity except in the category of Household Industry workers where number of female workers are more than male workers. In term of percentage, the female Cultivators and female Agricultural labourers are recorded a higher percentage than male Cultivators and male Agricultural labourers. Among Revenue Circles, the highest number of male Cultivators is noticed in Tingkhong Revenue Circle with 16,848 and female Cultivators is observed in Moran Revenue Circle with the total number of 11,935. In the

category of Other workers, both for male and female, it is recorded the highest number in Dibrugarh East Revenue Circle. In Agricultural Labourers, Tinghong RC recorded the highest number for both males and females. Very few number of Household Industry workers are found in every Revenue Circles in the district.

INSET TABLES

The table- 35 shows the CD Block wise distribution of workers by sex in four categories of economic activity. Out of 3.9 lakh number of rural workers in the district, 2.2 lakh are engaged themselves as Other workers and 1.4 lakh are engaged as Cultivators and the rest are as Agricultural Labourers and Household Industry workers. In the sex wise distribution of the four categories of workers in the district, the male workers are predominated the female workers except in Household Industry workers where female workers are more than male workers.Among the CD Blocks, the highest male workers participated in Other works is noticed in Tengakhat CD Block with 27,964 workers and the highest female Other workers is noticed in Lahowal CD Block with 13,570. The highest number of male cultivators is noticed in Tingkhong CD Block with 16,848 and followed by Khowang CD Block with 16,306 persons. In case of female workers engaged as cultivators is the highest in Khowang CD Block with 11,927 followed by Tingkhong CD Block with 11,206 number. Agricultural Labourers and Household Industry workers are very low in number in all CD Blocks of the district

				(9.9)	(1.2)	(1.4)	(7.1)	(90.3)

The table-36 indicates the town wise distribution of workers by sex in four categories. Out of 76,212 total urban workers in the district, 73,871 workers or approximately 97.0 percent are engaged as Other Workers of which male workers constitute 98.0 percent and female workers from 90.3 percent. A small number of workers are engaged in Household Industry, Agricultural Labourers and Cultivators. Among towns, Dibrugarh MB+OG constitutes the highest number of male and female workers engaged as Other Workers. Out of 37,315 total male workers in the town, 36,499 are found as Other Workers and out of 6560 total female workers in the town, 6069 or 32.5 percent are engaged as Other Workers. However, the lowest number of Other Workers is noticed in Duliajan No. 1 CT with 412 males and 89 females.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If hehousehold has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table-37 shows CD Block wise distribution of villages according to availability of different amenities during 2001 Census. Most of the villages in the district are having access to improved drinking water and power supply with a record of 97.7 percent and 91.3 percent respectively. It is followed by education in which out of total number of inhabited villages of 1,309 in the district 1,169 or approximately 89.3 percent villages are served by educational facility.. Other amenities like medical, transport communications, approach by pucca road, post office and telephone are available only in few villages and very few villages have banks and agricultural credit societies facility.Among the CD Blocks, the proportion of villages having access to improved drinking water is noticed very high percentage in all CD Blocks. Panitola and Tengakhat CD Blocks recorded 100 percent each. The highest number of villages having power supply is noticed in Khowang CD Block with 274 villages or 93.25 percent. Panitola and Joypur CD Blocks recorded little above 95.0 percent of villages having educational facilities. The percentage of villages having medical and other specified amenities are very low in all the CD Blocks in the district.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table-38 shows the CD Block wise distribution of number and percentage of rural population served by different amenities. Out of 9.6 lakh total rural population in the district, 9.4 lakh population are access to improved drinking water and approximately 9.1 lakh population are covered under power supply. It is followed by 8.9 lakhs population having educational amenity in different educational standard. Approximately 4.3lakh population are served by transport communications, 3.9 lakh population by approach by pucca road, 2.8 lakh and 2.4 lakh population by amenities like Medical and Post Office respectively. More than one lakh population are served by telephone facility. Very less population are served by banks and agricultural credit societies. Among the CD Blocks, the cent percent population of Panitola CD Block and Tengakhat CD Block are access to improved drinking water and in Tingkhong CD Block 99 percent population are served by power supply. The lowest proportion is noticed in Barbarua CD Block with 91.8 percent of the total population who are access to improved drinking water and 89.8 percent of the total population are served by power supply.

TABLE : 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	120	14	6	140
(b) Middle School	567	252	108	927
(c) Degree College	189	472	639	1300

(b) Cooperative Bank	98	386	823	1307
7. Agricultural Credit Societies	51	97	1131	1279

The table-39 shows the distribution of villages not having certain amenities and are arranged by distance ranges from the places where these are available. It is observed from the table that 140 villages are not having primary school in the village itself but 120 villages get the facility within the distance range of less than 5 kilometers, 14 villages in the distance range of 5-10 kilometers and 6 villages in the distance of 10+ kilometers. Similarly, in other educational institutions, the picture can be seen in the table itself. Large number of villages which have no amenity of medical hospitals and PHC are availed these amenities at places at a distance range of less than 5 kilometers, 5-10 kilometers and 10+ kilometers. The similar phenomenon is observed in the distribution of villages not having rest amenities like Post Office, telephone, bus service, banks and agricultural credit societies but can be seen in the table about the number of villages and the distance range at where from amenities are availed.

TABLE : 40

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

The table -40 shows the distribution of villages according to the distance from the nearest statutory town and availability of amenity. Out of 1,309 total number of inhabited villages in the district, 1,169 villages are having access to education of which the highest number of 595 villages is noticed in the distance range of 5-15 kilometers from the nearest statutory town. It is followed by 460 villages in the distance range in 16-50 kilometers. In less than 5 kilometers distance range from the nearest statutory town, there are 113 number of villages. The amenity of education is available for a village in a distance of 51+ kilometers. In the amenity of Transport Communications, the highest number of villages is noticed 262 and 186 villages in distance ranges of 5-15 kilometers and 16-50 kilometers respectively. In the unspecified distance range, no villages have been recorded in all the eight prescribed amenities.

TABLE: 41

DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the houschold has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The table-41 indicates distribution of villages according to population range and amenities available,2001. Out of total villages of the district, 1,169 villages have educational amenity and of these 539 villages have population in population range of 1-499, 353 villages in population range of 500-999, 209 villages in 1000-1999 and so on. Similarly, 263 villages enjoy the benefit of medical in the periphery of each villages and of which 82 villages have population in the range of 1-499, 79 villages in the range of 500-999, 65 villages in the range of 1000-1999 population and so on. For other amenities the number of villages along with population range can be seen in the table itself.

TABLE: 42

DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Barbarua	180	30231	63.3	2.5
2	Lahowal	123	29885	58.9	11.9
3	Panitola	90	22465	59	0
4	Tengakhat	222	34370	83.4	0.1
5	Khowang	293	36291	65.1	0.4
6	Tingkhong	217	38521.15	60.2	0
7	Joypur	184	35437	63.2	0.1
District Total:		**1309**	**227200.15**	**65.1**	**1.9**

Note : - Cultivable area = irrigated area + unirrigated area

The table-42 depicts total areas of CD Blocks along with the district and also use of land. The district acquires 227,200 hectares of land in rural areas. Tingkhong CD Block possesses high amount of land followed by Khowang CD Block. The district has 65.1% cultivable land and the highest percentage goes to Tengakhat CD Block. The irrigated areas in the district are very limited with 1.9% only. However, Lahowal CD Block has 11.9% irrigated land out of its total cultivable land. The CD Block namely Panitola and Tingkhong have no irrigated land.

TABLE : 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. no.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Chabua (TC)	3.7	0.4	3.2	3.7	3.6	0	0.1	0	0
2	I Dibrugarh (MB+OG)	126.1	27.3	98.8	130.4	55.2	3.7	50	6.4	15
3	IV Naharkatiya (TC)	11.3	5.6	5.7	9.8	2.6	0	2.1	0.1	4.9
District Total		**30.3**	**7.6**	**22.7**	**30.6**	**13.2**	**0.7**	**10.6**	**1.3**	**4.8**

The table-43 shows per capita receipt and expenditure of statutory towns of the district. It is seen that per capita expenditure is marginally high than per capita income of the district. The per capita receipt comes more from all other sources of the district. The per capita expenditure is more in general administration. In case of town, the per capita receipt Rs.11.3 is more in Naharkatiya TC among all other towns followed by Dibrugarh MB+OG. Similarly, in respect of expenditure it is Rs. 3.6 for Chabua TC which is higher than other two towns.

TABLE : 44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Chabua (TC)	2.3	1.7	1.7	0.6	0.6
2	Dibrugarh (MB+OG)	65.5	22.7	15.1	27.7	20.1
3	Naharkatiya (TC)	4.5	4.5	3.9	0.6	0.6
District Total		**15.4**	**6.8**	**5.1**	**5.9**	**4.2**

The table-44 displays the number of educational institutions per ten thousand population in statutory towns of the district. The Primary School is 3.8 numbers in per ten thousand population of the district whereas it is 4.5 number in Naharkatiya TC. The Junior Secondary/ Middle and Secondary/ Matriculation School are also more in the same town with 4.5 and 3.9 number among per ten thousand population respectively. The Senior Secondary School and College are more in Dibrugarh MB+OG with 1.6 and 1.2 number per ten thousand souls respectively.

TABLE : 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Barbari (Amc Area)(CT)	4,474
2	Chabua(TC)	138
3	Dibrugarh(MB+OG)	2,789
4	Duliajan No. 1(CT)	0
5	Duliajan Oil Town(CT)	84
6	Moran Town(CT)	88
7	Naharkatiya(TC)	19
8	Namrup(CT)	42
9	Sarupathar Bengali(CT)	0
	Distrct Total	453

The table-45 indicates number of beds in medical institutions in towns. The number of beds among every ten thousand persons is 204 in the district. In Barbari (AMC Area) CT, the number of beds is 4,474 because of the fact that in this CT, the Assam Medical College, Dibrugarh is located. The next higher number of beds is found in Dibrugarh (MB+OG) with 166. There are two towns where there is no facility of bed.

TABLE: 46
PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	CHABUA T.C.	17,433	0	0
2	DIBRUGARH M.B.	7,941	21,652	272.7
3	NAHARKATIYA T.C.	15,523	0	0
District Total		**40,897**	**21,652**	**52.9**

The table-46 indicates that in Dibrugarh district there is only one town having slum population and in other two towns there is no slum population. Out of total population of Dibrugarh MB, 21,652 are slum population. The town has a major share of slum population with 16.2 percent. In the district, the percentage of slum population is 13.0%.

TABLE : 47
MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl.no.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Barbari (Amc Area) (CT)	Nil	Tea
		Nil	Nil
		Nil	Nil
2	Chabua (TC)	Nil	Betel-Nut
		Nil	Bamboo
		Nil	Tea
3	Dibrugarh (MB+OG)	Petroleum Products	Tea
		Coal	Crude Oil
		Timber	Jute
4	Duliajan No. 1 (CT)	Nil	Rice
		Nil	Nil
		Nil	Nil
5	Duliajan Oil Town (CT)	Tea	Tea
		Oil	Oil
		Nil	Nil
6	Moran Town (CT)	Nil	Rice
		Nil	Nil
		Nil	Nil
7	Naharkatiya (TC)	Nil	Tea Leaf
		Nil	Crude Oil
		Nil	Timber
8	Namrup (CT)	Fertilizer	Fertilizer
		Petroleum Product	Petroleum Product
		Nil	Nil
9	Sarupathar Bengali (CT)	Nil	Rice
		Nil	Nil
		Nil	Nil

The table-47 indicates most important commodity exported out of towns and manufactured in the towns. Out of 9 towns, only 3 towns have manufactured a few items while all towns have exported out few commodities from each town. The name of items can be seen in the table itself.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table shows the number of households by tenure status and number of rooms occupied in the district. The number of households among the Scheduled Castes who have own houses are more with 4+ rooms both in rural and urban. It is followed by three rooms and two rooms respectively. Similar phenomenon is also noticed in respect of Scheduled Tribes. In the remaining tenure status, i.e. rented and others, the households of both Scheduled Castes and Scheduled Tribes occupied two and three rooms houses but number of such households are very few.

TABLE 49
PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES , 2001

Serial No.	District/Tahsil	Total			Rural			Urban

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."
Note:-
Permanent:-1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The table gives the percentage distribution of households living in permanent, semi permanent and temporary houses in Revenue Circle. The district has 225,720 total number of households out of which 80.0 percent are in rural and 20 percent are in urban. Among the Revenue Circles of rural area, Chabua RC shows the highest proportion of households lived in permanent houses and the lowest is in Tingkhong Revenue Circle with 9.7 percent. In semi permanent type of houses, the highest proportion is in Tengakhat Revenue Circle with 19.1 percent households and the lowest is noticed in Naharkatiya Revenue Circle with 7.2 percent households respectively. In temporary type of houses, Naharkatiya Revenue Circle recorded the highest proportion of households with 21.7 percent and Dibrugarh East Revenue Circle recorded the lowest proportion of 7.2 percent households. In urban area of the district, Dibrugarh East Revenue Circle recorded the highest proportion of households with 53.8 percent who lived in permanent houses, 68.5 percent in semi permanent houses and 59.2 percent of households lived in temporary houses.

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house
Drainage means closed and open drainage

The table shows the percentage of households having improved drinking water source electricity, bathroom, toilet and drainage facility. Out of 182,232 number of households in rural in the district, 83.7 percent households are having access to improved drinking water and 73.0 percent households are having toilet services whereas the availability of electricity, drainage and bathroom are very less in proportion of the households in rural of the district. However, urban of the district have recorded a higher percentage of households in each specified amenity except in the availability of bathroom where it recorded 64.4 percent households

In Revenue Circle level, the percentage of households having improved drinking water source shows that all the seven revenue circles are having high percentage of this facility where Dibrugarh East Revenue Circle recorded 93.5 percent households being highest for having improved drinking water and the lowest 76.9 percent households is noticed in Dibrugarh West Revenue Circle. Among the revenue circles, Tengakhat Revenue Circle recorded the highest proportion of 84.4 percent households having toilet facility and the lowest is in Dibrugarh West Revenue Circle with 67.8 percent households. The availability of other specified amenity are however, comparatively low in all the revenue circles of the district.

The table-52 indicates the number of households availing banking services and number of households having each of the specified assets shown in the table. Out of 228,127 total number of households, 68,648 are availing banking services. 38,044 and 30,604 number of households in rural and urban are availing banking services respectively in the district. Among the revenue circles, in Dibrugarh East Revenue Circle the highest number 20,030 households availed the banking services. Availability of all assets mentioned in the table among the households of revenue circles is noticed more in Dibrugarh East Revenue Circle. The highest number of households who have none of the specified assets is noticed in Naharkatiya Revenue Circle with 9,894 households. The availability of Car, Jeep and Van is more in urban of Dibrugarh than in any other area in the district.

(ix) Major social and cultural events, natural and administrative developments and significant activities during the decade.

The past history of Kamarupa reveals that Lakhimpur including Dibrugarh have formed part of the old Kingdom of Pragjyotish/Kamrupa durihg the time of the Varman rules of Assam. This political status seems to have continued till the Hindu dynasty declined. During the Chutiyas rule, they established their capital at Sadiya in 13th century A.D. The Chutiyas and Sadiyal Kacharis worshipped Kecaikhati. Goddess with rites and sacrifices in great enthusiasm in the temple situated near Sadiya of present. Dibrugarh district. After down fall of Chutiyas it is time to turn to the history of the Ahoms. They patronage to celebrate social and cultural events in Assam with great pomp and spirit. The kings took various steps to develop the Assamese culture of holding Bihus. They enjoyed these festivals and for the purpose of enjoying various festivals, dances, wrestling, the king Parmatta Singh constructed Rangghar at Sibsagar. The Bara Bhuyans were also held in high esteem in 15th and 16th century A.D. Shri Shri Sankardeva was a member of Bara Bhuyans family. Shri Sankardeva, the great saint poet of Assam who stepped up the epoch making Neo-Vaisnavism movement in Assam was the main reformer of Assam culture. His doctrine of only God (Krishna) was established before the masses through his various writing of religious epics, per-formation of Nat/Bhaona, and establishment of Satra. He and his followers established many satras at Dibrugarh through the which the satria the culture has been developed in Dibrugarh. Socially, Dibrugarh becomes a cultural centre of Assam.

Festivities are part of the social life of the people of Assam in general and Dibrugarh district in particular. Many festivals are observed in this district with variying degree of enthusiasm by the people of different faiths at different time of a year. The Hindus observe many festival ritualistic and religious festivals. Durga Puja which has of lesser importance in the district in the part has assumed increasing popularity and celebrates throughout the district with great rejoicing. The cultural programs and theatrical performation are held to depict the Sakti (strength) of mother Durga. Doljatra is another religious festival which are celebrated with great joy in honour of Lord Krishna. The Pakhowa/Holi is a most attractive function of Doljatra. In addition of the above religious festivals Hindus observe few other religious festivals annually like Sivaratri, Janmastrami, Biswakarma, Lakshmi Puja and Kali puja.

Bihu festivals are celebrated all over Dibrugarh district. The Assamese observe three Bihu festivals during the year. Bred in the ancient peasant tradition, the people of Assam observe a sort of pagan devotion to nature. The Rangali/Bohag Bihu is a spring festival of dance and music. It is celebrated at a time when nature come out in light, beauty and green colour. Bihu dances are a superb expression of a great art. Some traditional musical instruments used by the youths while sing and dances are performed in gay abandon. Bihu festivals being agricultural in nature, domestic cattle treating as Lakshmi (Goddess of wealth) of the households are look after by performing some rites and pray for their good health. It is a part of Bhogali/ Magh Bihu. Bihu festivities and dances are the expression of genuine folk joy. It is spring festival devoted mostly to the advent of the agricultural season Torrential rain caused by monsoon brings to a state of fertility to the earth. In this season, earth is ready to receive seeds sown for cultivation. The Bihu dances are therefore, a kind of fertility ritual having as main import amorous and emotional instincts of the heart of youth. The dances express mostly the exuberance of youths. Many of the songs associated with the dances are the expressions of amorous feelings. The dances depict the preponderance of romance and sex of the youths. Kati Bihu is in the time when the granary of farmers are left empty hence it is called Kangali Bihu. The farmers welcome Lakshmi, the Goddess of wealth and prosperity and pray for good quality and quantity of products from their agricultural fields by lighting earthen lamps in the fields and under Tulsi (Black Basil) plant.

The tribes of Dibrugarh district are also celebrated some of their traditional festivals. Sonowal Kachari of the district perform Baith Puja. This festival observes in Chat month. The Hagra dance is an important and famous dance of Sonowal Kachari. They also perform Swardeu Puja, Lakshmi Sabah, Baghdeu Puja, Garkhiya Sabha, Ganjai/ Manai Puja etc. The Sonowal Kachari of Dibrugarh district has enriched the culture of Assam. Their contribution in this line is on immense value in formation of Assamese culture. The tribes like Mishing, Deuri, Tea garden workers have their own festivals which enrich the cultural granary of Assam.

In respect of administrative development in the district a new revenue circle namely Chabua has been created during the decade. The district Dibrugarh is well developed and all administrative offices are established in the district. Most of office buildings are constructed in modern line. The process of construction of a bridge at Bogibil is already started which will provide a direct link with Lakhimpur district. From the natural development point of view nothing has been noticed in the district during the decade.

(x) Historical and archaeological importance and place of tourist in the district :

The number of places of religious or historical importance in the undivided Lakhimpur district is small. It is not unnatural in a frontier district which was too remote from court and too much exposed to raiders from the south and east to offer many attractions to the ruling or the priestly caste. So the district has only a few places of religious, historical and archaeological importance. A brief description of religious, historical or archaeological importance of Dibrugarh district is given below.

Dinjan Moamaria Satra :

Anirudha, disciple of Gopal Dev and founder of Moamaria sect established the first Moamaria Satra in 1615 A.D. atBishnu Balikunchi village in Naravanpur Mauza of the present Lakhimpur district but it was too close to the village of Dafalas and other, low caste people, it was removed by the Gossain to the Nahorati village on the bank of the Lohit. From there it was again moved to Jorhat and then back to Majuli and again transferred to Jorhat and finally in 1837 A.D. it was shifted near to Chabua, on the bank of the Dinjan by Bhatananda Gohain. It is principal Satra of Moamaria sect.

Ghaguwa Dol :

Ghaguwa Dol is a small brick temple near the Hahkhowa road. According to the Settlement Group Report, the India (1780-95) as a mark of respect to the contemporary ruler of Manipur. According to another version it was the temple of Manipuri Devi of Manipuri Than, located on the northern side of Ghaguwa Dol.

Kali Air Than :

It is situated on the bank of the Brahmaputra at a distance of about 11 kms. to the west of Dibrugarh town in the Jamiral Mouza. According to the Mahanta of the 'Than' Krishnadevi with the consent of her father Sudarisan, the Satradhikar of Budbari Satra, courted voluntary death at this place to save herself from dishonour during a political revolution which took place 200 to 500 years ago. According to some she disappeared in the womb of earth at this place on being insulted by her suitor because of her dark complexion. The place has since been known as Kali Air Than and many people visit the 'Than' to pay their respectful homage and perform 'Namkirtan'.

Employment Exchange in 1999-2000 was 41,659. There is 14,408 employees in the districts during 1999.

Other Satras

In Dibrugarh district, there are various Satras. The names of these Satras are ..... Moiramara Satra, Sessamukh Satra, Katani par Satras, Dihing Satra, Dihing Namati Satra, Madarkhat Satra, Bagari taliya Satra, Marchi Satra, Chabua Madarkhat Satra etc.

The most important among above Satras are Moiramara Satras, Sessamukh. It was established by Ramananda on the bank of Dihing river at Moiramara of Dibrugarh. The son of Satra Adhikar Krishnadev, Jagat Mohan move to Sessamukh and established Sessamukh Satra. Dihingia king Arjun and Minister Atan Bura Gohain had constructed Dols and Tanks and donated to both the Satra. Both of them proselytized Vaishnavite religion. The Dol of the Satra was rolled down on the bank of Dihing river due to great earthquake and broken into pieces. It was a temple of Bishnu. Various kind of relics of the Dol are still lying there.

Tanks :

In Dibrugarh district, there are a number of tanks which were dug during days of Ahom Swargadeus. Some of important tanks are Nahar pukhuri, Sensowa ,Bejar etc.

(xi) Major characteristics of the district, contribution of the district in the form any historical figure associated with the district.

Dibrugarh district is very rich in tea. It is main tea producing centre of Assam. This district provides major portion to the total production of tea in Assam which helps the state in earning foreign exchange. It gives an ample opportunity to the local people for getting job in this industry. Now-a-days many small tea growers have come forward to cultivate tea in their own lands. So it helps in getting self employment. Dibrugarh district is also an agricultural zone. It sustains a large population of the district. Important products of agriculture in Dibrugarh are rice, various kinds of pulses, jute, vegetable etc. The town Dibrugarh is an important nerve centre of coal and oil industries. The Natural Gas is a valuable source of power and various other chemical by products. Naharkatia and Moran contain 'associated natural gas'. The important industry so far built up on the basis of the natural gas of Assam are Namrup Fertilizer Factory, Namrup Thermal Power Project of Dibrugarh district.

A Gas based project being set up in Assam is a Gass-cracker plant near Tengakhat in Dibrugarh district as per accord made between Assam Student's Union and the Central Government of India.

Dibrugarh district has produced many authors, scientists, saints, freedom fighters, scholars, sportsmen, and social workers. The contributions given by the most renowned people of the district in literature of whom mention can be made of (1) Mafijuddin Ahmed Hazarika books written by him are Giyan Malini, Malinir Bin, Tatta Parijat etc, (2) Punnya Kanta Sarmah (Madhu malati, Hardhanu Bhanga, Harighchandra Hit Kath etc, (3) Nilmani Phukan (Chintamoni Sahitya Kala, Manashi, Gutimali etc, (4) Jatindra Nath Duwarah (Omar Tirtha, Banphul, Apon Sur, Kath Kabita etc, (5) Shailyadhar Rajkhowa Nijara, Bidyabati etc, (6) Benndhar Rajkhowa (Dashgeet, Asomiya Bhai, Bahi etc, (7) Jgoti Prasad Agarwala (Karengar Ligiri, Labhita, Rupalim, Nimati Kainya etc, (8) Lita Gogoi (Beli Mar Gol, Asomar Sansuriti, Maniram Dewanar Geet, Tai Sanskriti etc, (9) Nagen Saikia (Mitbhasa) and many more persons. Dibrugarh district has also given birth of many eminent persons who are well known in different aspects of sports.

Many people of Dibrugarh district courted arrest and suffered humiliation during the struggle for independence. The 1942 Movement had widespread effects in the Dibrugarh district. The people who have taken part in the Quit India Movement were torture by the police of the British Government. Alongwith males, ladies from Dibrugarh had also joined in this movements and faced humiliation. however, Dibrugarh district was at the forefront of the Quit India movement. At last, nation achieved Independence in 15th August, 1947. The sacrifice that offered by the sons and daughters of the soil of Dibrugarh district for nation can never forget by the people for time to come.

(xii) Scope of Village Directory and Town Directory - Column heading wise explaination and coverage of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18

14. Land-use pattern of village 19-23
15. Name and Serial number of village 24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market / hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of respective jurisdiction.

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix-I-A	Indicates number of villages CD Block wise having one or more primary schools.
Appendix-I-B	Indicates number of villages CD Block wise having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages CD Block wise with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.
Appendix-III	It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.
Appendix-IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix-V	Summary showing number of villages not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages not having Scheduled Tribes population.
Appendix-VII A, VII B	The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.
Appendix-VIII	Indicates CD Block wise number of villages under each Gram Panchayat.
Appendix-IX	Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

List of villages merged in towns and outgrowths at 2001 Census

There is no above case in Dibrugarh district.

TOWN DIRECTORY

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

IStatement-I gives the town wise by class, name, civic status with area in square kilometer, population and growth rate of each Census from 1901 to 2001. Density and sex ratio are indicated in each town. Dibrugarh MB+OG is the only Class I town in the district with the total population of 1.3 lakh and the decadal growth rate is 11.2 percent.

There is no class II town in the district however, there is one class III town, three class IV towns and two towns each in class V and class VI status respectively. Dibrugarh MB+OG is the oldest town in the district which has registered 11,227 population in 1901 Census and has increased to 1.3 lakh in 2001 Census having an area of 15.5 sq. km. Chabua TC has shown the highest density with 18.546 persons per sq km. In this respect Duliajan Oil Town CT takes second place. Dibrugarh MB+OG recorded the third highest rate in density with 8616 persons. The decadal growth rate is highest in Duilajan Oil Town CT with +194.6 followed by Chabua TC. The high sex ration is seen in Barbari (AMC Area) CT with 920 females. The sex ratio in Dibrughar MB has increased from 824 in 1991 to 877 in 2001 Census.

Statement- II indicates the physical aspects and location of towns as on 1999. Prior to Census of India, 2001 data of physical aspects like rainfall, temperature are collected from different offices in the district. From the statement, it is observed that uniform rainfall of 2711 mm is received in all the nine towns in the district. In the measurement of temperature in the towns of the district, it is noticed

that out of nine towns in the district, six towns recorded the maximum temperature of 37.0 centigrade and minimum of 6.0 centigrade and three towns, namely, Duliajan No.1 CT recorded 30.0 centigrade in maximum, Sarupathar Bengali CT and Moran Town CT both recorded the maximum temperature of 31.0 centigrade each and the minimum of 17.0 centigrade in all the three towns respectively. The farthest town from the state headquarter is Naharkatiya TC with distance of 576 kilometers and the nearest town to the state headquarter is Moran town CT with 403 kilometers. The distance range from district headquarter to all the towns within the district varies from 0 kilometer to 80 kilometers respectively. All towns have Bus facilities connected which make easier for transport.

Statement -VII shows the civic and other amenities in slums as on 1999. Out of 9 towns in the district, Dibrugarh MB which is class 1 town have a number of ten slum areas which comprise of approximately 3338 number of households and approximately total population of 21,652 persons. All the slum areas in the town, have the system of sewerage OSD and the method of disposal of night soil is of St and Pt. The highest number of private latrines available is noticed in Graham bazaar slum area with 140 number which are of water borne, 160 service private latrines and 270 others. All slum areas within the town have electric connections for domestic purposes and the number of which are shown against each pockets in the statement and altogether there are 115 road lighting points in these areas.

APPENDIX TO TOWN DIRECTORY
Towns showing their outgrowths with population

District : Dibrugarh

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
1	Dibrugarh (MB) - 41501000	121,893		
			Mahpowalimara Gohain Gaon (OG) - Ward No.23 41501000	986
			Niz- Mankata (OG) Ward No.25 41501000	6,955

Part B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES

Annexure – I Number of villages under each Gram Panchayat (Data not collected on Panchayat level)

Annexure- II Note on Fertility, Mortality and Migration.

Fertility :

Fertility, mortality, and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question was to only currently married women. The measures of fertility worked out are based on the F – Series. Tables of 1991 Census pertaining to the Assam State and details of concepts and definitions are explained in the earlier chapter heading non Census concepts.

Annexure – III Various measures of Fertility and Mean Age at Marriage, 1991 Census.

Fertility :

As seen through various indicators of fertility in the district, it may be seen that GFR of 110 GMFR of 213 TFR 3.4 and TMFR 6.8 against the respective figures at state level are at 135,190, 4.2 and 6.0. Various measures of fertility and other fertility related data are presented in the following table.

Table - I

Various Measures of Fertility and Mean age at Marriage – 1991 Census.

Fertility Measures	Dibrugarh district	Assam State
1	2	3
1. G. F. R.	110	135
2. G. M. F. R.	213	190
3. T. F. R.	3.4	4.2
4. T. M. F. R.	6.8	6.0
5. Crude Birth Rate	24.4	31.5
6. No. of Children ever born two women in age Group 45 – 49	4.6	575
7. Mean age at Marriage	19.1	735
8. Child – Woman Ratio (0 – 4)	488	575
9. Child – Woman Ratio (5 – 9)	634	735

The level of fertility for GFR and TFR are found low in Dibrugarh district than that of the state whereas GMFR and TMFR are higher to the state. The fertility related measures are found except Mean Age at Marriage in the district. The child woman ratio for 0-4 and 5-9 are seen as 488 and 645 as against 575 and 735 in the state.

Table-II

District-Wise various Measures of Fertility and Mean Age at Marriage, 1991

State/District	GFR	GMFR	TFR	TMFR	CBR	No. of children even born per ever married woman in age-group 45-49	Mean Age at Marriage of currently married women
1	2	3	4	5	6	7	8

10.Lakhimpur	149	211	4.7	6.8	34.1	5.1	18.2
11.Dhemaji	104	157	3.3	5.3	25.9	6.2	18.5
12.Marigaon	128	183	4	6.1	30.5	5.9	18.0
13.Nagaon	152	215	4.8	6.9	33.2	5.6	17.9
14.Golaghat	138	196	4.4	6.3	32.1	4.8	18.8
15.Jorhat	133	193	4.4	6.1	31.5	4.5	19.0
16.Sibsagar	136	196	4.3	6.3	31.1	4.5	19.0
17.Dibrugarh	**110**	**213**	**3.4**	**6.9**	**24.4**	**4.6**	**19.1**
18.Tinsukia	165	225	5.1	6.9	37.5	4.7	18.6
19.Karbi Anglong	140	207	4.4	6.8	33.1	5.2	18.8
20.North Cachar Hills	127	187	3.8	6.4	29.7	5.5	19.2
21.Karimganj	196	391	7.1	9.3	48.5	4.8	18.2
22.Hailakandi	136	196	4.2	6.4	32.1	5	18.2
23.Cachar	137	190	4.1	6.1	32.6	4.5	18.5

Mortality :

The mortality figures in the district confirm to the general theory of relation between fertility and mortality. The mortality rates are shown in the following table.

Table-III

Age Specific Marital Fertility Levels in Assam State and Tinsukia District- 1991 Census

Age group	Dibrugarh District			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15 - 19	0.122	0.125	0.093	0.151	0.152	0.133
20 – 24	0.156	0.158	0.15	0 214	0.219	0.165
25 – 29	0.135	0.144	0.095	0.183	0.192	0.12
30 – 34	0.084	0.094	0.047	0.134	0.14	0.093
35 – 39	0 039	0.047	0.009	0 087	0.094	0.042
40 – 44	0.024	0.028	0.005	0.049	0.052	0.022
45 – 49	0.017	0.014	0.036	0.033	0.034	0.025

The Age Specific Marital Fertility levels are found much low in all age groups in respect of total, rural and urban in the district from the state levels. In case of urban a marginal high rate is seen in age-group 45-49 in the district than that of the state.

Table-IV

Estimate of Child Mortality in Assam and Tinsukia district, 1991 Census

Mortality Measure	Dibrugarh district	Assam State	Mortality Measure	Dibrugarh district	Assam State
1	2	3	1	2	3
Q. 1			Q. 3		
Person	51	92	Person	69	104
Male	56	96	Male	74	106
Female	45	87	Female	66	101
Q. 2			Q. 5		
Person	59	101	Person	77	116
Male	60	104	Male	76	118
Female	58	98	Female	78	115

Q. (1) of the above annexure shows the infant mortality rates and Q(2), (3) and (5) indicate the size of child mortality in age group below 2,3,and 5 years respectively. It is seen in the Annexure that the mortality rate in Dibrugarh district are lower in all ages than that of the state averages. It can, therefore, be said that the health status in the district is quite satisfactory in comparison to the state.

Annexure IV : Percentage distribution of migrants by place of birth / place or last residence 1991 and 2001 Census.

Migration:

The detail data may be seen below in the following table.

Table-I

Percentage distribution of migrants by place of birth – 1991 Census, Assam.

State/ District	Total migrants			From other districts			From other States			From other countries		
	Person	Male	Female	Person	Male	Female	Person	Male	Female	Person	Male	Female

In the above table, it is clear that out of total population born out side the District 59.7% are migrated from other Districts of the State and 34.6% are from other states out side of Assam and 5.7% are from other countries of the world. The data also shows that portion of females are higher than males in the category of migrants born from other districts of Assam and other State of India. But in case of persons born in other countries, the males migrant of this class is higher than females migrants.

Similar data on migration in respect of migrants classified by their place of last residence are presented in the following table.

	4.3	8.2	2.9	2.6	5.0	1.8

In the above table it is seen that out of the total migrants in the district of Dibrugarh ,65.4% are from elsewhere in the district outside the place of enumeration,22.8 % are from other district of the state,10.7.% are from other state of the country and 1.1 % are from other countries.

The data also shows that females are higher in the category from elsewhere in the district of enumeration and from the other districts . In the other two categories male migrants are higher.Similar data on migrants classified by their place of last residence are presented in table-III and Table IV.

	4.1	7.7	2.8	2.0	3.8	1.4

From the above table it is seen that migrants from elsewhere in the district out side the place of enumeration consists of 75.8%, 15.8% from other districts, from other state it is 7.7 % and from other countries it is 0.7 % of the total migrants .

Annexure – V : Brief account of main religions in the district/Tahsil as per 1991 and 2001 Census.

Religion

A brief account of religious composition of the population in the district alongwith the State is presented in the following table.

Table-I

Main religions in the Tinsukia district and Assam state - 1991 Census

District/State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Assam	Total population	22,414,322	100.0	88.9	11.1
	Hindu	15,047,293	67.1	86.2	13.8
	Muslim	6,373,204	28.4	94.7	5.3
	Christian	744,367	3.3	96.0	4.0
	Buddhist	64,008	0.3	93.0	7.0

Table-I

Main religions in the Tinsukia district and Assam state - 1991 Census

District/State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
	Jain	20,645	0.1	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8
Dibrugarh	Total population	1,042,457	100	82.4	17.6
	Hindu	951,763	91.3	83.7	16.3
	Muslim	46,814	4.5	50.6	49.4
	Christian	35,682	3.5	94.4	5.6
	Buddist	3,622	0.5	80.3	19.7
	Jain	2,012	0.3	35.5	64.5
	Sikh	810	0.1	24.1	75.9

The figures in the above table shows that compared to the state as a whole the proportion of Hindu is more in the district. The Muslims who constitute about 28.4% of total population at State level but in the district their percentage is much low with 4.5%. Christian consists 3.5% as against 3.3% at State level which is also on lower side. However, in case of Jains, Buddist and Sikhs in the District are almost same to the state averages.

Table-II

Main religions in the Tinsukia district and Assam state - 2001 Census

District :-Dibrugarh (15)

District/State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%
1	2	3	4	5	6	7	8
Assam	All Religions	26,655,528	100.0	23,216,288	87.1	3,439,240	12.9
	Hindus	17,296,455	64.9	14,477,966	83.7	2,818,489	16.3
	Muslims	8,240,611	30.9	7,714,619	93.6	525,992	6.4
	Christians	986,589	3.7	936,008	94.9	50,581	5.1
	Sikhs	22,519	0.1	7,634	33.9	14,885	66.1
	Buddhists	51,029	0.2	44,546	87.3	6,483	12.7
	Jains	23,957	0.1	3,603	15.0	20,354	85.0
	Others	22,999	0.1	21,608	94.0	1,391	6.0
	Religion not stated	11,369	0.0	10,304	90.6	1,065	9.4
Dibrugarh	All Religions	1,185,072	100.0	956,634	80.7	228,438	19.3
	Hindus	1,075,878	90.8	879,827	81.8	196,051	18.2
	Muslims	53,306	4.5	26,780	50.2	26,526	49.8
	Christians	45,040	3.8	42,661	94.7	2,379	5.3
	Sikhs	2,638	0.2	773	29.3	1,865	70.7
	Buddhists	4,152	0.4	3,331	80.2	821	19.8
	Jains	877	0.1	150	17.1	727	82.9
	Others	2,436	0.2	2,425	99.5	11	0.5
	Religion not stated	745	0.1	687	92.2	58	7.8

The figure in the above table shows that compared to the state as a whole the proportion of Hindu is more in the district. The Hindus which constitute 64.9 percent of the total population at State level is 90.8 percent in the district, followed by Muslims 4.5 percent ,Christians 3.8 percent , Buddhist 0.4 percent , Sikhs 0.2 percent and Jain and others 0.1 and 0.2 percent percent respectively.

Annexure – VI : Marital status of population as per 1991 and 2001 Census

Marital Status :

The data on marital status of population Assam as well as in Dibrugarh District for each age-group for males and females are presented below in the following table:

Table-I

Age, Sex and Marital Status of population in Assam - 1991 Census

Age group	Total population		Percentage of population in each age-group							
			Never Married		Married		Widowed		Divorced/Separated

Note : Data on unspecified marital status are not taken into account but these are included in the figures shown in Col No. 2 and 3.

A comparison of the District level figures of marital status with that of the state averages reveals that the percentages of male for categories of married, widowed and divorced/ separated are high than the State averages and only the percentage of married female is higher than the state percentage. In all other case, the percentages for male and female are lower in the district from that of the State. The higher percentage of married male and female are seen in age-group 45-49 and 35-39 respectively in the district as against the respective figure in the State

A comparison of the district level figures of marital status with that of the State averages reveals that the percentage of never married males and females is lower than the state average. In case of

married males and females the percentage is higher than the state average. In case of widowed males percentage is higher than and females percentage is lower than the State percentage. Again in case of Divorced/ Separated males percentage is same and females percentage is lower than the state percentage. The highest percentage of married males are recorded in the age group of 40-44 and females in the age group of 35-39 in the district being 91.5 percent and 89.8 percent respectively. The corresponding figures in the State level for males and females are recorded in the age 45-49 and 35-39 age group.

Annexure VII :- Age, Sex and Education in the district, 1991 and 2001 Census

Education and Literacy rate :

Age group wise literacy rate for male and female in respect of both at State and District levels are presented below in the following table: :

30	Sema	10,346	0.0	2	0.0
31	Total of Other Mother Tongues	1,032,125	3.9	47,774	4.0

It can be seen from the above table, the number of persons speaking Assamese consist of the major portion (74.1%) ,of total population in the district ,followed by Bengali with (6.9%),Hindi (6.8%), Nepali (2.4%) ,Sadam / Sadri (1.6%, Oriya(1.5%),Bhojpuri (.7%) and Missing(.5%).The population with all the other mother tongues each constitute a negligible percentage.

Annexure-IX: Scheduled Castes and Scheduled Tribes Population, 1991 Census.

Scheduled Castes :

Out of 1042,457 total population of the district 41,927 are Scheduled Castes population. The caste wise population of some prominent castes are presented below:

Table-I

Distribution of Scheduled Castes population among some prominent Scheduled Castes, Dibrugarh District

Name of Scheduled Castes	Scheduled Castes total Population	Percentage	
		Percentage to total Scheduled Castes population	Percentage to total population of the district.
1	2	3	4
1. Kaibarta or jaliya	23,602	56.3	2.3
2. Namasudra	3,432	8.2	0.3
3. Mehtar, Bhangi	2,785	6.7	0.3
4. Dhupi, Dhobi	2,496	6	0.3
5. Patni	2,196	5.2	0.2
6. Brittial-Bania, Banik	1,487	3.5	0.1
7 Mehtar,Bhangi	1,416	3.4	0.1
8. Others	4,513	10.7	0.4
9. All Scheduled Castes	41,927	100.0	4.0
			(1,042,457)

N.B. 1. Others include Bansphor, Bhuirmali/Mali, Dagla/Dholi, Hira, Jalkeot, Jhalo/Malo or Jhalo, Lalbegi/Mahara, Patni, Sutradhar and unclassified castes.

2. Bracketed figure is the total population of the district.

It is observed in the above table that Kaibarta or Jaliya is the prominent caste of the district with a share of 56.3% out of total Scheduled Castes population followed by Namasudra 8.2%. The remaining castes have a share within the range of 6.7% to 3.4%.The other castes consist of a share of 10.7%.

Out of the total population of the district 4.0% is the Scheduled Castes population of which Kaibarta or Jaliya is 2.3% where as other castes occupy less than 1.0% by each.

Scheduled Tribes :

The Scheduled Tribes constitute 8.0% of the total population of the district. The data relating to some major Scheduled Tribes population are presented below in the table-

Table-II

Distribution of Scheduled Tribes population among some prominent Scheduled Tribes Tinsukia district – 1991 Census

Name of Scheduled Tribe	Scheduled Tribes total population	Percentage	
		Percentage to total Scheduled Castes population	Percentage to total population of the district.
1	2	3	4
1. Kachari, Sonowal	64,432	77.7	6.2
2. Miri	7,254	8.7	0.7
3. Boro,Boro Kachari	4,855	5.9	0.5
4. Mech	2,291	2.8	0.2
5. Deori	2,168	2.6	0.2
6. Others	1,920	2.3	0.2
All Scheduled Tribes	82,920	100	8
			(1,042,457)

Note: 1. Others include Hojai, Lalung, Rabha and unclassified tribes.
2. Bracketed figure is the total population of the district.

In the above annexure it is observed that the concentration of Scheduled Tribes population is not high. The Kachari/Sonowal constitutes a share of 77.7% and Miri with 8.7% of the total Scheduled Tribes population in the district. The remaining tribes consist of less than 6.0% by each.

Out of the total population of the district only Kachari, Sonowal occupies 6.2% whereas other tribes consist of less than 1.0% only by each.
