RANGGHAR : (1746)

A little distance from the royal palaces of Joysagar and by the side of the Assam Trunk Road stands imposing two storied building known as Rangghar, which is considered as the first amphitheatre in Asia. This is the royal sports pavilion of Ahom Kings that was constructed during the region of King Pramatta Singha in 1746. The royal king, members of the Ahom royal family and his other officers witnessed several indigenous games like wrestling, dancing, birds flight, buffalo fight, elephant fight etc.

Annexure V	Brief account of main religions in the district / tehsil, 1991 and 2001 Census	503
Annexure VI	Marital status of population as per 1991 and 2001 Census	505
Annexure VII	Age, sex and education in the district, 1991 and 2001 Census	507
Annexure VIII	Distribution of different mother tongues returned in 1991 and 2001 Census	511
Annexure IX	Distribution of Scheduld Castes and Scheduled Tribes in 1991 Census	513

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

(P. Hazarika)
Director of Census Operations,
Assam, Guwahati.

ANALYTICAL NOTE

Analytical Note of Sibsagar District

(i) History and scope of District Census Handbook

District Census Handbook is the most valuable publication brought out by the Census Organisation on behalf of each State Government. This provides information on some basic demographic and socio-economic characteristics and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being the only informative source of every district of each state.

The publication of District Census Handbook was first initiated during 1951 Census with the collaboration of respective state Governments. In 1951, only some demographic and some socio-economic information at village and town level along with some Census tables were published in District Census Handbook. Since then, it had undergone radial changes during the subsequent decades and has been grown substantively both in its scope and content by incorporating more Census tables and also some basic statistics on land use pattern, agriculture, industry etc. The D.C.H.B. of 1961 was considered as a unique asset published by the Census Organisation. In 1971 Census, further improvements were made by enlisting many more information on villages and towns in the form of Village and Town Directory. It had three parts. The Part-A relates to Village and Town Directory, Part-B contained Village and Town-wise Primary Census Abstract and Part-C dealt with administrative aspect and Census Tables based on PCA etc. The 1981 Census again widened the scope of DCHB to cover more data on literacy, health care etc., in addition to the information covered in 1971 DCHB. It was divided into two parts. The Part-A included data on Village and Town directory and Part-B was devoted for Village and Town-wise primary Census Abstract. However, this part of the DCHB was not brought to light in Assam as no Census was conducted due to prevalence of disturbed condition in the State. In 1991 Census, the DCHB was divided into two parts. The Part – A consisted the Village and Town directory data and Part-B presented the data of Primary Census Abstract.

As a tradition of the past, in the present DCHB also, some more information on availability of facilities such as, credit societies, banks, recreation and cultural institutions, news paper/ magazines etc., are included. Further, information of income and expenditure, important commodities manufactured, exported and imported etc., are also included to give a fuller account to the scope of these directories. Similarly in town directory also, few more information are included.

The process of collection and compilation of these data involved lot of exercises. At first, revenue circle-wise information on each village has been collected by the revenue authorities at district level. These data are compared with that of 1991 at district level and after thorough scrutiny and cross-check, these records are submitted to the Census directorate. In case of town directory, data have been collected directly from the Commissioner of Municipal Corporation and Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 data at Census directorate. Thereafter efforts are made to compare and cross-check with similar data made available from other sources especially data published by various Departments of State Government to verify the authenticity and correctness of figures received through village and town directory booklets. After that only, compilation and computerisation of these data have been made according to the instructions of the Registrar General and Census Commissioner, India. It is therefore regarded that because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication than that of many publications brought out earlier in this line.

(ii) Brief history of the district

The origin of the name of the district Sivsagar is associated with the Siva temple on the bank of a tank in Shivapur the then Ahom capital Rangpur. Initially, the place came to be known as Sivapur being associated with the great Siva temple (Siva Dol) built on the bank of a big tank. Then with passage of time,

the name Sivsagar, alluding both to the tank and the town gained popularity.

The early history of Sibsagar district is connected with the Bodos and Shans. Scholars are of the opinion that the great Bodos tribe of Sino-Tibetan origin had established over the valley of the Brahmaputra fairly early in the second millenium B.C. and some Austric and possibly also Dravidian tribes have preceded the Mongoloid Bodos in the tract. The area of present Sibsagar district formed part of this tract and covered by tribal settlements of Bodo tribes. It is also believed that this area formed a part of the great Kingdom of Pragjyotish-Kamrupa whose eastern boundary extended up to the river Dikhou especially during the time of Varman rulers of Assam in the 7th and 8th century. This political status seems to have continued till the decline of Hindu dynasty and thereafter several small principalities were established by the Barabhuyans and the Bodos chiefs beginning from the 12th century AD or a little earlier. When the curtain lifts for modern history, and it does not lift straight way as its introductory scene of the rest of the Assam valley is to be seen where one finds a large part of the district was under the dominion of the Kachari King of Dimapur. These Kacharis belong to the great Bodo tribes and are thought to be a section of Indo – Chinese race. They were found not only in the valley of the Brahmaputra but also in the Garo Hills and in Hill Tippera far away to the south. However, the history of Kacharis in Sibsagar is but vague and fragmentary, as unlike the Ahoms, they have left no annals of their rule till we find them in collision with the Ahom. But it should be noted that prior to the advent of Sukapha, the founder of the Ahom dynasty the whole of Eastern Assam was under tribal rule. A powerful section of this race locally called Chutiya, established their capital at Sadiya probably early in the 13th century A.D. This tribe lived in large independent villages like the Abors and Miris of the present day. In course of time, about A.D. 1189, one Birpal or Birabar seems to have attained a certain measure of supremacy over the neighbouring villages, which continued by his son Gourinarayan who assumed the title of Lord of the Hills. He descended into the valley of Brahamputra and there he defeated a King called Bhadra Sen and founded a capital called Ratnapur. The Chutiya leader assumed the name of Ratnadhvaj Pal, contracted an alliance with a neighbouring Raja called Nyaya Pal. Ratnadvaj was succeeded by nine kings and Dhirnarayan alias Dharmadvaj Pal was the ninth king of the series. In the southern part the Hedambial Kachari of the Dhansri valley had their capital at Dimpur. The Dimasa King Bisarpatipha said to be a son of Mahadev was a contemporary of Sukapha.

Turning to the history of the Ahom, the fierce and warlike tribes of Shans, who call themselves Tai, were a branch of the great Tai race of East Asia. During the expansion of the Mao Shan empire under king Sukanpha and Swabwa or Sukhanpha of Mong-Mao in the third decade of the thirteenth century A.D. Samlongpha (Khun-san-Long) brother of Sukhanpha and Swabwa (Chaopa) of Mong-Kawung (Mgaung in upper Burma were said to be the greatest generals and conqueror in south-east Asia at that time. After having conquered the region of the Lusai Hills, Tripura and Manipur, the Ahom historian say that Sukapha the first Ahom king, the cousin of Sukhanpha entered Assam in 1228 A.D. crossing the high hills called Patkai.

Here he found Chutiyas ruling in the north and the Kacharis in the south, where the river Dilih was formed the boundary between the two. The Dimasa King Bisarpatipha was a contemporary of Sukapha. Sukapha wrested Mahang, the eastern part of the territory of this Kachari king driving him in to the hills.

The struggle between the Ahoms and the Chutiyas and Kacharis started during the gradual movement of expansion towards the east and west by the Ahoms. When the Chutiya feudatory Prince, Kossi Raja, revolted against the Mao-Shan authority, Chao Sukapha defeated the Chutiya Prince and forced his way across the Patkai Hills, after conquering the middle region. He then entered the Eastern Assam valley and took over the charge of all the territories including the Chutiya territories.

Hostilities broke out between the two powers towards the middle of the fourteenth century. In 1376 A.D., his hosts at a regatta to which the Chutiyas had invited him murdered the Ahom king. A major collision took place when the Dimasa (Timasa) Kacharis invaded the Ahom territory in 1490 A.D., where the force sent by the Ahom king Suhangpha (1488-1493) was defeated and driven across the Dikhou. The Ahom king made peace by offering a girl to the Kachari king and without further pressures, the Kacharis then returned home. The scene of the battle is in itself significant as it showed that the Kacharis could fight successfully, at a considerable distance from their capital and that they could make

their influence felt not only in the Mikir Hills and the forests of the Dhansiri but also in the fertile plains of Jorhat and Golaghat. But it was not for long that they were to enjoy the pleasant sense of victory. The reign of Suhungmung (1497-1539) who was known as Dihingia Raja witnessed a marked expansion of Ahom territories. He brought under his submission all Chutiyas living round Sadiya; the Bara-Bhuyans of the north bank of the Brahmaputra and their territories were annexed to the Ahom dominions.

The Muslims sent two expeditions up the Brahmaputra valley. Suhungmung killed a Pathan named Turbak, the leader of the second expedition on the banks of the Bharali in 1532 A.D. after three years of protracted war. He drove the scattered forces of the Turbak across Kamrup and Kamata, with the cooperation of the Kamatas. Being frightened, the Sultan of Gour negotiated for peace. In 1536 A.D., he advanced up the valley of Dhansiri, killed the Kachari Raja Detsung and sacked his capital Dimapur. Thus, under Suhungmung the Ahom kingdom reached its greatest expansion and Kamrup and Kamata were liberated from Muslim domination. Suhungmung, like so many of the Ahom kings met his end at the hands of assassin and was succeeded by Suklenmung (1539-1552). Sukhampha (1552-1603) better known as Khora-Raja was the successor of Suklenmung. During his reign of power, Koch king Naranarayan (1540-84) made two successive attacks on the Ahom kingdom in 1562 and 1563 A.D. The first advance of the Koch army under Chilarai was though not successful as the trick of *Brahmin* dressed army sent by Ahom king played well, but Chilarai was successful when he made a second advance against the Ahom capital. The well-known Deo-Raja Maidam in Charing at Sibsagar is the standing monument today in memory of Tipam Raja, called also as Deo-Raja who commanded the Ahom army in this second battle.

Suchengpha or Pratap Sinha (1603-1641) succeeded Sukhampha. In 1614 A.D., Bali Narayan the Grandson of Chilarai (Naranarayan's brother) asked Suchengpha for help against Muhammadans. But in 1637, as the Nawab of Dacca sent up an overwhelming force, the Ahoms were driven out of Kamrup and treaty was made in 1639 A.D. fixing the Barnadi as the frontier between Muhammadan and Ahom territory.

In 1648 Sutamla (Jaydhvaj Sinha) came to the throne. He drove the Musalmans out of Kamrup and Goalpara and for a short time the Ahoms were in possession of the whole of the valley of Brahmaputra. In 1662, Mir Jumla, the Nawab of Dacca started with a large force and occupied the forts of Jogighopa, Saraighat, Pandu, Guwahati and Kajali without any difficulty. Later on they occupied Simalugarh and Kaliabor. In March 17, 1662, the Nawab entered Gargaon without any opposition. However, later on the Muhammadans had to face many problems and Mir Jumla's health had become so bad and hence a peace was patched at Ghilajharighat in January 1663.

Jaydhvaj Sinha was succeeded by Chakradhvaj Sinha (1663-1670). He was a man of indomitable courage and wonderful farsighted and also a great warrior himself. Being unable to consume the humiliating defeat and the terms of treaty of Ghilajharighat in the hands of Mughals, he started a vast war preparation under his direct supervision. He attacked the Mughals and recovered Kamrup in 1667. When this news reached Aurangzeb, he sent a large Army against Ahoms, but the Ahom general Lachit Barphukan displayed consummate ability against great odds and inflicted a crushing defeat on Mughals in the historic battle of Saraighat in 1671. On the death of Chakradhvaj Sinha in 1670, Ahom history witnessed a reign of conspiracy till 1681. The Mughals took advantage of these disturbances to regain possession of Gauhati in 1679. But Gadadhar Sinha of the Tungkhungia dynasty who came to the throne in 1681 finally drove them out of the kingdom. Gauhati was recovered in 1682.

The Zenith of the Ahom power was reached in the reign of Rudra Sinha or Sukhrangpha (1696-1714). He founded new capital at Rangpur presently known as Sibsagar. During his reign subjugation of Cachar and Jaintia was completed in 1700 A.D., and Nagas were brought under the control of Ahom kingdom. He died at Gauhati in 1714 when he was engaged in large-scale plans for expedition against the Mughals in Bengal.

His son Pramatta Sinha in memory of that sad event erected the Rudreswar temple there. Rudra Sinha has been called the Sivaji of Eastern India. Certainly not Assam only, but the whole of India can feel proud of Rudra Sinha who formed the noble conception of organizing a confederacy of Hindu rulers to fight the Mughals. Unfortunately, his son Shiva Sinha (1714-44) was a weak Prince, much under the influence of his wives. His wife Phuleswari was a staunch devotee of Saktism. The name of his second

wife Ambika is remembered by posterity as the excavator of the great tank near which the present town Sibsagar (Shiva's tank) stands.

The reign of next prince Pramatta Sinha (1744-1751) was short and uneventful. Rajeswar Sinha (1751-1769) succeeded him. During his reign of power, the Raja of Manipur applied for aid. Rajeswar Sinha sent one expedition and it ended in failure while crossing Patkai. The second expedition was despatched in 1762 but that too was a less successful. However this helped good alliance between the Ahom and Manipuris, which led to religious and cultural contacts between the two countries.

The reign of Rejeswar Sinha's successor, Lakshmi Sinha (1769-1780) saw the outbreak of the Moamaria insurrection. The Moamarias were disciples of the May-Mara Satra and belong to the Vaisnavites of the orthodox School. The Ahom Moa-maria conflict was a socio-religious character in its origin, taking in course of time a political colour. This ultimately proved to be the most important factor in bringing about the downfall of the Ahoms. The Moa-maria rebels attacked Ahom capital; and Lakshmi Sinha was driven from his capital and captured. There was large-scale bloodshed, executions and a kind anarchism in the kingdom. The signal for the counter attack is said to have been given by one of the wives of Lakshmi Sinha, the Manipuri Princes Kuranganayani. She killed vary cleverly the Ragha who had forcibly taken her as wife after becoming the Barbarua and restored the thrown again to Lakshmi Sinha.

In 1780, Lakshmi Sinha died and was succeeded by his son Gaurinath Sinha (1780-1795) in whose reign the Moa-maria broke out a new and with increased violence. In 1786 the Moa-maria rebels under Bharat Sinha inflicted a decisive defeat upon the royal troops and took Rangpur. The king fled to Guwahati. Bharat Sinha ruled at Rangpur for more than six years. Gourinath Sinha sought the help of British Governor General Lord Cornwallis at Calcutta and in 1792 a small British force was sent under the command of Captain Welsh to the assistance of Ahom king. In March 1794, Rangpur was re-occupied by Gaurinath Sinha. He died in 1795 and was succeeded by Kamaleswar Sinha (1795-1811). The country was still in a state of disorder and moreover dafals began attacks on royal troops. Kamaleswar Sinha was succeeded by his brother Chandra Kanta Sinha. During his period Burmese took the advantage of lost vigor of Ahoms as a military race and unseemly quarrels amongst themselves. Burmese army crossed the Patkai early in 1817 and interfered in Ahom power with an intention to retain their hold upon Assam. Though Chandra Kanta made a series of abortive attempts in 1821 to recover lost kingdom, Burmese succeeded in retaining their hold on Assam by putting their own puppets with a reign of terror. Fortunately this attracted British, who then declared war against Burmese in 1824. British occupied Rangpur in January 1825 and compelled Burmese to retire to their own territories. By the treaty of Yandaboo of February 24, 1826, the king of Ara renounced all claims on Assam and subsequently Assam was annexed to the dominions of the East India Company.

The East India Company entrusted Purandar Sinha in 1833 with the administration of upper Assam. Even this artificial ornamentation by a scion of the Ahom royal House was short lived for in the year 1838 A.D. the whole area was resumed by the authorities of the East India Company and annexed to British territory. By a proclamation in 1839 the area was divided into two districts of Sibsagar and Lakhimpur. Purandar Sinha shifted the headquarters of the newly formed Sibsagar district from Jorhat to Sibsagar. Again in 1913, the district headquarter was shifted to Jorhat and Sibsagar remained as a sub-divisional headquarter.

(iii) Administrative Set- up

For the administrative purposes, the entire district is divided into three sub-divisions viz., Sibsagar, Nazira and Charideo. Again each sub-division is divided into revenue circles and under revenue circles there are Mouzas comprising few revenue villages. There are total 9 revenue circles three each in every sub-division.

The Deputy Commissioner of the District is the overall in charge of the administration of the entire district. He also acts as the Collector in case of Revenue matters, as a District Magistrate in case of maintenance of Law and Order and General Administration, as a District Election Officer in case of conduct of Election, as a Principal Census Officer while conducting Census, and so on. A number of Officers, like Additional Deputy Commissioners, Sub-divisional Officers, Extra Assistant Commissioners and others assist the Deputy Commissioner is looking after the administration of the district.

At lower level each sub-division is headed by one Sub-Divisional Officer whereas under him there will be Revenue Circle Officers for each revenue circles

who are responsible for the entire administration of the area under their respective revenue circle.

(iv) Physical features

The district lies between 26°41' 00' and 27° 17' 00' latitude and 94°24' 00' and 95°29' 00' longitudes. On the north, it is bounded by the district of Dibrugarh and on the west and southwest, by the district of Jorhat and on the east by the State of Arunachal and Nagaland and on the southeast by the state of Nagaland. The district now covers an area of 2,668 square kms and has a population of (insert 2001 Population). The district occupies 16th rank in terms of area and (insert rank in terms of 2001 population) rank in terms of population in the State.

Topography:

The natural topography of the district of Sibsagar is a flooded tract is situated in the east of the Dhansiri which is a wide, healthy and homogeneous plain lying between the Naga hills and the low lying area along the Brahmaputra. It is the populous and important portion in which there is hardly any jungle to be seen and where cultivation brings in considerable prosperity and progress. On the lower land the staple crop is rice, which the higher levels have been planted out with tea. The landscape, as a rule, is one of rural plenty. On every side stretch fields of waving rice the view is bounded by groves of feathery bamboos and slender areca-nut trees in which the houses of the cultivators lie concealed. The tea gardens themselves have little to appeal to the lover of the picturesque. The rows of the bushes are permed down to one uniform level and the monotony of this expanse of green is only relieved by the labourer's lines, the factory and the manager's bungalows.

On the west of the Disai, the appearance of this plain is diversified by the protrusion of sub-soil and rice is often grown in curious depressions, called *holas*, which are three or four feet below the level of higher land. The ground between these *holas* is used for grazing or for the village site and is often planted out with sugar cane. The upper valley of the Dhansiri and of the Dayang is covered with dense tree-forest, which is almost entirely destitute of population. A wonderful view of this forest can be obtained from one of the outer ranges of the Naga Hills.

Hill

The whole of the district is a level plain. Two small hillocks call for special mention, but only on account of the associations with which they are connected and not form any instinctive importance of their own. The Charaideo hill in the Dhopabar Mauza was the site of the first Ahom capital and once a burial place of the Ahom kings and ruins of their tombs are still to be seen.

Drainage

On the east of the Sibsagar district flows the Disang river starting its maiden journey from the Patkai Bum which is situated at latitude 26°38′ and longitude 95°27′. The maximum altitude near about this origin is 8,511 feet. Then the river Tisa, as the Disang is known near about its origin, moves towards north and travels about 38 miles horizontally before it meets with its first tributary Towaijo, which originates in the Konyak Naga country at an attitude of 5,391 feet. The catchments area of the Disang is 1,599 sq. miles.

West of the Disang river is the Dikhou, which originates from a Sema Naga area whose latitude is 26 °5′ and longitude is 94 ° 33′. This place has an altitude of 5,981 feet. Near its origin this river is known as the Longa river, which moving north-west or about 12 miles, turns north-east and proceeds in this way about 16 miles and then meets its first tributary Chimel Nadi on the right bank. Its principal tributary in Sibsagar is the Darik, which flows a little northeast of Sibsagar town and falls into the Dikhou near its mouth.

To the west of the Dikhou it is the Jhanji, which originates near Mukokchung at an altitude of 4,644 feet, the latitude and longitude respectively being 26° 20′and 94°32′. At the initial stage the river is known as the Melek Nadi, which moves north-west and meets innumerable streams until it comes across its main tributary Muring Nadi of the right bank. The total length of the Jhanji is 67 miles and its area is 530 square miles.

The plains of Sibsagar district lying in the basin areas of river Disang, Dikhou and Jhanji suffer frequently from the floods. But the magnitude of the devastation and havoc caused by floods have increased after the great earthquake of 1950.

Flora and Fauna

Botanically the forest of Sibsagar can roughly be divided into two divisions: - the tropical and evergreen forests. The first category includes climatic climax vegetation such as Hollong, Nahor, Sam, Amri, Gunseroi, Makai, and Sopa etc. They are the best-stocked stand of the district.

The evergreen forests as the name suggests are evergreen in character and are generally found in Dilih Sapekhati, Geleki, Tiruhill, Disai and Disai valley reserves. In some reserves, Makai is also found associated with Hollong in this canopy.

In some parts of the western areas number of wild elephants, bear, jungle cats, crab-eating mongoose etc., are found.

Climate and Rainfall

In common with the rest of upper Assam, this district has a climate, which is characterised by a highly humid atmosphere, abundant rains and general coolness. The cold season from December to February is followed by the season of severe thunderstorms from March to May. The southwest monsoon season is from June to about the beginning of October. October and November constitute the post monsoon season.

The average rainfall in the district is stated to be 2,197.0 mm (85.49''). The rainfall generally increases from the southwest to the northeast. The actual total rainfall in this district during December 1998 to November 1999 was 1971.9 mm against a normal rainfall of 2244.5 mm.

Temperature

There is a meteorological observation at Sibsagar. The cold season starts about the end of November when both day and night temperatures begin to drop rapidly. January is the coldest month of the year with the mean daily minimum temperature at 9.8 °c (49.6 ° F) and the mean daily maximum at 21.6 °c (70.9° F). Temperatures begin to rise from about the beginning of March and by July they attain the highest point, the mean daily maximum temperature being 31.8° c (89.3° F)

The monsoon season is the period of the year with the highest temperatures. Being also the period with high moisture in the air, the weather is often unpleasant with the damp heat particularly in between the spells of rain.

The highest maximum temperature recorded at Sibsagar was 42.8° C (109.1° F) on May 23, 1945 and the lowest temperature was 2.8° C (37.0° F) on February 13th, 1905. The atmosphere is highly humid throughout the year.

Socio-Cultural Features

Land and People

The population of Sibsagar is composed mainly of three religions- Hindus, Muslims and Christians. In the order of importance, Buddhists, Jains and Sikhs are also there but they form only little drops in a vast Hindu ocean. Further divisions of castes and tribes of the population of the district can be made as 1) Indigenous 2) Plain tribal 3) Tea and ex-tea garden labourers and 4) Others. The indigenous population comprises the Brahmins, Kalitas, Kayasthas, Baniyas, Barias, Ahoms, Chutias, Daivjnas, Koches, Keots, Kaibartas, Kumars, Katonis, Mataks, Morans, Muslims, Naths, Suts, Savarnakars etc. The plain tribal population comprises the Deoris, Garos, Kacharis, Miris, Nagas etc. The tea garden and ex-tea garden population comprises the Bhumis, Garhs, Kurmis, Lohars, Mundas, Oriyas, Rohidases. Santals, Telengas etc. The other people comprise the Bengalis, Marwaris, Nepalis, Punjabis, Sikhs etc.

Hindus: Most of the Hindus are followers of Sakti or worshippers of the reproductive powers as manifested in the female. Tantric rituals in their debased forms are known to have been practised in Assam in the centuries preceding the Vaisnava revival. Ahom Monarchs, when they were at first initiated into Vaisnavism from Hindu which was the predominant faith in Assam at that time. However, successive rulers showed learning towards Saktism and from the end of 17th century that faith became the creed of the Ahom sovereign. Vaisnavism i.e. worship of Visnu is also prevalent in Assam from early times. However this faith slowly occupied a subordinate position in subsequent centuries. Decay and degeneration in the religious field led to revival of the Vaisnavite faith in the fifteenth century under the leadership of Sankardeva. (1449-1569).

There are number of Satras in Sibsagar scattered all over the district. These Satras are more or less religious Colleges of the Hindus resembling in some respects the medieval monasteries.

Muhammadans : Around 7.63% (1991) of the total population of the district are Muhammadans. The

great majority of these people are Sunnis. In Sibsagar the Dargah or grave of Komaldaya Khunkar Muhammad Gani, which is situated in Chakala village in the Barmukh Mauza is regarded as a place of particular sanctity and is visited by pilgrims every year. Muhammadans in Sibsagar district like other Assamese people, actively participate in the observance of the Bihu festivals in particular leading to harmony among different people.

Christians :

As per 1991 Census, Christians comprise only 2.32% of the district population who appears to be more native than any other district in the plains. There is a branch of American Baptist Mission in Sibsagar town and more than half of the native Christians profess themselves to be members of this mission.

Social System

The head of the family, who manages it as its custodians, generally holds property. Among the Hindus, after the death of the father his sons and daughter inherit the property. The Hindus in general perform a ceremony when girl attains puberty. The marriage ceremony is usually preceded by a ceremonious function known as 'Joran', which takes place two days before the appointed day of marriage.

Home life

In a rural family the following are the houses generally found. Charaghar (reception house), Barghar (living house), Gohaighar (house for worship), Bharalghar (store house) and Gohali ghar (cow shed).

Dresses

Female dress consists of *Riha, Mekhela, Chadar* and blouse and ornaments include *Keru, Mani, Kharu, Jhangphai Keru, Dugdugi bela*, Neckless, Chain, ear- ring, bala etc. Male dresses include Dhoti, Chadar, Shirt, rousers and the modern parts and coats.

Food

Rice is the main staple food of all people. Vegetables, dal, fish, egg, meat, tea, milk, curd, fruit etc. form the subsidiary items of food.

Communal life

Feasts, singing parties and bhaonas or simple theatrical performances are the principal amusements of the villagers. The 'dol jatra' or festival in honour of lord Krishna in February or March has also gained favour with the Assamese. The special festivals of the Assamese are the three Bihus and the death anniversary ceremonies of Shri Shri Shankardeva and Shri Shri Madhavadeva, the founders of the Mahapurusia sect of *Vaisnavism*. The Kartik Bihu is celebrated on the last day of Aswin (October) and is not an occasion of very much importance. The Magh Bihu or the Bhogali Bihu is the harvest home and begins on the last day of Pous (January 13th or 14th)

The Baisakh Bihu also called as the Rongali Bihu, which begins on the last day of *Chaitra* (April 13th or 14th) is in honour of the New Year. It is a spring festival and its origin is traced to the remote past. The Assamese people now observe this Bihu as national festival and it serves to promote unity among different creeds and communities.

Every Assames village of the district has a *Namghar* or community prayer hall, which also serves as a stage and auditorium. Assamese dramas are performed in the Namghar and in the satras at a regular interval twice or thrice every year. The Rasa Lila of Daksinpat and Garamur satra of Majuli are highly acclaimed by the people.

Resources of the District

Geology and Mineral wealth

The geology of almost the entire district is thus, concealed by alluvial deposits. Geological surveys, aided by drilling for oil have shown that under the recent deposits there are many thousands of feet of Tertiary sediments, which lie over on Arunachal basement complex. These Tertiary rocks represent the foreland facies and are distinguishable from the geosynclinal facies of Tertiary rocks which from the hills on the south and southeast of the district. Rocks of the latter facies are found out-cropping in a small area within the district. The thick Disang series (over 10,000 feet) of Naga Hills is composed mostly of shales; whereas the comparatively thinner Jaintia series (2000 ft.) is composed of fossiliferous limestones, sand stones and shales in the upper Assam Valley. The Barail series is of considerable economic importance as it contains oil and workable seams of coal. The series is about 10,000 ft. thick at the northeastern end of the Naga Hills and includes sand stones and shales. In this area the upper portion of the Barial series forms the coal measure sub-series.

Coal is the only mineral, which has so far been commercially exploited in the district. It is mined in Nazira and Jaipur coalfields. Coal is also found on the Jhanji and Disai rivers. The Jhanji area is only three miles long and stretches into the Nagaland. It lies fifteen miles southeast of Amguri railway station.

The coals have 3.4 to 6.8 percent moisture, 4.8 to 6.5 percent ash, 33.8 to 36.9 percent volatile matter and 52.9 and 54.9 percent fixed carbon.

Oil is another mineral of considerable economic importance, which has recently been discovered in Sibsagar. The Oil and Natural Gas Commission undertook exploration in Sibsagar and neighbouring areas for oil and natural gas early in 1957, when a seismic survey was initiated and continued later till today. Now the Sivasagar figured in the industrial map of India with the establishment of O.N.G.C. regional Head quarter at Nazira with the exploration of huge stock of Oil in Galeky and Lakwa Oil fields.

So far as clay is concerned, ordinary clay for pottery and brick making is found almost everywhere in the district. Fire clays have been found to occur with the coal seams.

Forests

Out of 2,60,290 hectares reported area in the district, about 33,981 hectares is under forests, which comes to about 13.05 % of the total area.

There are two types of forests in the district, tropical evergreen forests and miscellaneous forests. Forestry has played an important role in the economy of the district. A vast majority of the people of the district depends upon forests for firewood for domestic consumption and for timber, bamboo, ekra, reed, thatch, jengu, tokopat, cane etc for house building purposes.

Land and land use pattern

The land put to different uses in the district may be classified as forests, agriculture, wasteland etc. The following table gives the clear picture of the area of land put to different uses in the district.

Table-I
Land use pattern in Sibsagar district (1997 – 1998) (Provisional)

Sl. No.	Land put to different uses	Area in hectares	Percentage to total geographical area
1	2	3	4
1	Total geographical area	260,290*	100.0
2	Forest area	33,981	13.1
3	Land not available for cultivation	50,329	19.3
	(a) Land put to non-agl. uses	39,882	15.3
	(b) Barren and uncultured land	10,447	4.0
4	Other non-cultivated land excluding fallow lands	30,317	11.7
	(a) Permanent pastures and other grazing land	7,330	2.8
	(b) Land under misc. trees, groves etc. not included in net area	21,167	8.1

6	Net area sown	138,700	53.3
7	Total cropped area	158,138	60.8
8	Area sown more than once	19,438	7.5

Source : Directorate of Agriculture "Basic Agricultural statistics Assam 1998 – 99".
Note : 1.* Area figures in respect of forest, which includes area under reserve forest and revenue forest relates to the year 1996 – 97.
2. The figures of total geographical area are as per village papers. However according to professional survey, it is 266800 hectares.

From the above table it is clear that the net area sown in the district constitutes about 53.3 % and forests about 13.1 %. About 19.3 % of land is not available for cultivation. Most of this is put to non-agricultural uses.

Economic Profile of the District :-

Agriculture and Plantation

According to 2001 Census population about 42.0 % of population is engaged in agriculture. The detail break-up of population under different activities is given in the relevant tables.

Soil

The arable soils of the Sibsagar district may broadly be grouped into (1) Old alluvial soils, (2) New alluvial soils of riparian tracts and (3) Hilly soils. The major portions of the arable soils of the district are however, alluvial soils.

The textures of soils of the district vary from sandy loams to sands. There are also some clayey loams or clayed soils. Both old alluvial soils and hills are acid in reaction and deficient in calcium. They are usually deficient in "available" phosphate and potash also. As regards to total nitrogen, it varies from high to low in the case of old alluvial soils, it is medium in most of new alluvial soils. While hill soils are usually comparatively rich in nitrogen apparently due to the virgin nature of the soils.

Crops

Tea, Paddy, Sugar cane, vegetables and to some extent fruits are the main crops, grown in old alluvial soils of the district as the soil conditions being suitable for these crops. Rice is the principal food crop of the district.

The following table presents data on different types of crops grown, area, yield etc. in the district during 1999 (final forecast).

Table - II

Area, Production and Average yield of important crops-Sibsagar 1998-99 (final forecast)

From above table it is clear that rice is the staple food in this district and in addition crops of pulses and oilseeds are grown.

Horticultural crops :-

Banana, Papaya, Pineapple etc are important horticultural crops of the district. The following table gives a brief account of the horticultural crops grown during 1998-99 in the district.

Table-III
Area, Production and Average yield of horticultural crops in Sibsagar district (1998-99 final forecast)

Sl.No	Type of crops	Are under cultivation (hector)	Production	Average yield kg. hectare
1	2	3	4	5
1	Banana	1,920	27,412	14,277
2	Papaya	142	2,158	15,200
3	Orange	80	800	10,000
4	Pine-apple	213	2,769	13,000
5	Areca-nut*	6,020	4,597	108@
6	Coconut**	565	4,186	79@

Note * Production of Areca-nut in terms of dry cured nuts

**Production of coconut is in thousand numbers, but not in tones

@ Average Yield of Areca nut & coconut in nuts per bearing trees

The common vegetables grown in the district are spinach, lai, radish, lafa, suka, cabbage, cauliflower, tomato, onion and different kinds of brinjal, potatoes etc.

History of Tea industry :

The history of the tea industry in Assam dates back to the year 1826, when indigenous tea plants growing in the plains of Assam came to the notice of the East India Company. The cultivation of this plant was first introduced 1830 by the East India Company. It is mentioned in the Economic Development of Assam by P.C. Goswami that a tea garden was started by the Govt. in 1833 in the Lakhimpur district. On 1835 a few indigenous plants were taken from the forest at "Ningroo" bordering the Singphoe country and grown at "Koondilmukh"at Sadiya. A company was found in 1939 known as the Assam Company. This was the first Company in India to undertake the commercial production of tea and was the direct successor of the East India Company. The headquarters of this company was formed at Nazira and remained till the shifting to Calcutta in 1956.The Government garden was carried from 1840 to 1849. But due to certain difficulties, the garden was sold to a China man named "Among". This Chinaman failed to improve the garden. In 1851, through the instrumentality of Colonel Hannay who contributed much to the development of tea cultivation in the part of upper Assam. The early sixties of 19th century i.e. from 1859 to 1860 was a period pf steady boom. After this period the tea industry received a great setback. But this trend was cheeked by 1878. In 1881, the North India Tea Estate Owners formed the Indian Tea Association. The industry grew continuously till 1890 and thereafter it underwent through a depreciation for a short period but soon recovered from this state of affairs. The major improvements have been made in the yield of tea, in the grouping of gardens under a limited number of companies, in the progressive mechanization and rationalization of production and in increasing their efficiency of productivity of labour.

The Tokolai Reserve Station was set up at Jorhat in 1911 with a view to carrying on research on cultivation and manufacture of tea in Assam. This has been very useful in increase of yield rate of tea. In the year 1932-33, it is again met with severe crisis due to depression and over production of tea. This condition was tackled by enacting the Indian Tea Control Act, 1933 and by 1952 it reached an unprecedented prosperity. Recently the Tokolai Experimental centre had developed a machine known as Rotorvane. It is a continuous processing machine for use in a continuous processing machine for use in a continuous system of manufacture.

The Guwahati Tea Auction Centre :

Marketing of tea has always been a great problem for the industrialists. Before opening of tea Auction Centre, at Guwahati, Tea Auction Centre, at Guwahati, Tea Auction Centre in Calcutta arranged for sale of Assam Tea Auction Centre, third of its kind in India started functioning at Guwahati from Sept. 1970.

Tea, which is subject to direct traction by way of excise duty, export duty and a user under tea Act, the industry makes substantial direct contribution to central Revenues. Besides, these taxes, tea industry is also subject to central income tax, supper tax (corporation) and agricultural income tax. Income tax along with sales tax levied upon it inflates the income of the state Government to a great extent.

Tea is the mainstay of the plywood industry. Tea grown in different parts of Assam is packed in the garden factories in plywood chests for dispatch. Tea estates require huge quantity of fertilizers for healthy growth of tea. Thus it gives a strong support to fertilizer industry also.

The labour force that engaged in the industry is bought mainly from Bihar, Madhya Pradesh, Orissa and Madras. The industry provides ample scope for employment from higher grade to lower grade workers. The tea estate in Assam is in different geographical size. It varies from small garden to large tea estates. The administration is also generally same from each other. The cell responsibility of a tea estate is vested on the Manager. He is the head of the estate. He is assisted by 2/3 Assistant Manager. The Assistant Manager are given separate responsibility such as production and supervision of garden and labours, financial affairs, stock and factory etc. each garden has a office in which there is a head clerk called "Borobabu" and he is assisted by some clerks and peon. Social services provided to its employees by hospitals urn by qualified medical officer and staff. Most of gardens have their ambulances to carry serious patient to for better treatment outside the gardens.

A major part is playing in the economy of the district by tea. It provides ample employment to the people of the district

Now a day, many youths of the district have come forward to grow tea in their own lands. Which provide job and also earn income.

Tea garden in Sibsagar district:

In Sibsagar district, there are 1,059 tea gardens covering an area about 62,751 hectares as on 31.12.1998. The estimated total tea production in 1998 was 118,548 thousand kgs and the average yield per hectare is about 1,889 kgs. In addition, there are about 75 small tea growers with a registered area of about 219.0 hectares as on 31.10.1999.

Irrigation

Cultivators of the district are mainly dependent on rainfall. But rainfall being unevenly distributed, they also resort to indigenous methods of irrigation such as lifting of water by means of *lahoni* (swing bucket). To meet the demands of the agriculturists for a regular supply of water some irrigation schemes are undertaken by the government since beginning.

The following table shows the data on irrigation potential utilised during different seasons, additional potential created and targets and achievements, additional irrigation potential etc.

Table IV

Irrigation potential utilised and targets and achievements of additional potential created in Sibsagar district

Sl. No.	Particulars	Land area in hectares
1	2	3
1	Irrigation Potential Utilised during 1997-98	460.3
	i. During Kharif	433.3
	ii During Rabi & pre Kharif	27
2	Irrigation potential created up to 31.3.1999	1565
	i. Minor	1565
	ii. Major and Medium	-
3	Targets for additional irrigation Potential created during 1998-99	75
	i. Minor irrigation	75
	ii. Major and Medium irrigation	-

Source: Chief Engineer Irrigation Deptt. Assam quoted in " Statistical Handbook Assam 2000" by Director of economics & Statistics, government of Assam.

Animal husbandry and Fisheries

As per the quin-quennial livestock Census in Assam during 1997, it is found that there are 293,959 cattle, 21,590 buffalos, 688 sheeps and 61,570 goats in Sibsagar district. In addition, 404 horses and ponies, 35,182 pigs, 21,736 dogs and 12 elephants are also enumerated during census in this district. As regards to poultry records, 404,030 fowls 316,132 ducks are found during 1997.

Fishing is a growing industry in this district where both public and private enterprises participate irrespective of any class, creed or caste. There are 23 registered beel fisheries and a registered river fishery in the district.

For the entire district, total requirement of fish is estimated to be 10,891 MT keeping the monthly per capita consumption of fish at 11 kg for the year 2000–01. Against this requirement the total production of fish during the same year was 5,510 MT and rest of the requirement is met by import from some other parts outside the district. There is one fishing training centre and 8 fish farms in the district.

Industries

The district of Sibsagar being the seat of the Ahom Government that ruled in medieval Assam was naturally the place where Assam's industries along with her culture developed to a high degree of perfection. Assam has a high reputation and early traditions in manufacturing cotton cloths required, jewelries, wood and bamboo products, pottery etc. As on 1998, there are 117 registered factories in Sibsagar of which 84 are in the category of food products 11 are in non-metallic mineral products. As regards to small-scale industries, there are 1948 SSI units registered with the Director of industries in this district.

Trade and commerce

Sibsagar being the capital of the Ahom rules calls for special mention of the commercial policy of the Ahom kings by which they sought to create an atmosphere of peace and harmony among the surrounding tribes and the neighbouring countries. The main items of imports to the district are pulses, mustard oil, tobacco, cement, and all kinds of textile goods; building materials, chemical manures, drugs and all kinds of consumer goods. The items of exports are tea, jute forest produces, oil cake etc. There are some regulated markets in the districts. But a great deal of business is transacted at the local markets on hats, which for the convenience of both the buyers and the sellers are held mostly on Sundays. There is a warehousing centre in Sibsagar with an occupancy capacity of 1,664 metric tones.

Economic Infrastructure

Banking and Finance

The most important source from which credit could be obtained in the district is the private moneylenders. However in recent years the modern banking system is gaining popularity between businessmen and traders. Various government schemes and programmes are also benefited the people at a large scale.. As on December 1999, there were 56 scheduled commercial banks in the district with Rs.36,595 lakhs of deposits and Rs.8,413 lakhs of credits. In addition, as on December 1999, there are 20 scheduled regional rural banks with Rs.4,007 lakhs of deposits and Rs.522 lakhs of credits.

Transports and Communication

The main conveyances used on land in olden times were horses, elephants and palanquins. When the British first came into possession of the province the difficulty of communications, however proved a most serious obstacle to its development. However, road transport is now playing a vital part in moulding the economic structure of the country. There are a National Highway and Assam Trunk Road which run through the district. There are bus services on important roads for passengers and also private and public vehicles for carrying goods, Taxis and tourist are available at reasonable rates.

The following table shows the length of different types of roads in Sibsagar district.

Table - V
Road length in Sibsagar district (1997-98)

Sl. No.	Category	Road length (Kms)
1	2	3
1	National High way	67
2	State High way	114
3	Other P.W.D. Roads	1,668
	Total Road length	1,849
4	Road length per lakh or population*	204
5	Road length per "100"sq km. of geographical area	69.3

Note. * Road length per lakh of population calculated on the basis of 1991 census population
Source Chief Engineer, P W D (Roads), Government of Assam

In the Sibsagar district, there are about 27,978 motor vehicles on the road during 1998-99 of which 2,540 are registered in 1998-99 only. Out of 27,978 motor vehicles on the road, 2,102 were two wheelers, 3,220 were cars, 701 Auto rickshaws, 812 light commercial vehicles, 544 trucks and 368 were tractors. The road distance from Sibsagar to Guwahati is 363 kms, to Jorhat is 55 kms and between Dibrugarh and Sibsagar it is 120 kms.

Rails

The main line of the railways comes from Mariani and reaches Amguri in the Sibsagar district and goes through Simlaguri and Bhojo and then to Tinsukia. At Simlaguri junction, in this district, one branch line goes to Naginimora in Nagaland and another goes to Moranhat through Sibsagar and Sepon. There are about 153 Kms. of BG rail lines in the district.

Water- ways/ Ferry services

The great river Brahmaputra, which forms the northern boundary of the district, together with its tributaries has offered ample scope for development of inland waterways transport. There are several ferry-ghats throughout the district with facilities for crossing the river at important road points. Mar boats of six tones capacity are generally used for conveyance of passengers, goods and even vehicles from one bank to the other. Important ferry-ghats in the district are Desangmukh-Matmora (25kms) and Dikhowmukh-Sikarighat via Mamul (28 kms) and

Dikhowmukh-Phulani-Salmora (20 kms). On all these routes single boats with 10 tones capacity are operating.

Air transport

In the district of Sibsagar, there is no civil Aerodromes. The Indian Airlines Corporation is using the Indian Air Force's Air yield at Rowriah, 4 miles from the Jorhat town. These services are thus helping the people of this district.

Power and Electricity

The State Electricity Board has in recent years undertaken supply and distribution of power in the district. About 817 (see amenity data also) villages are electrified in the district as on 31st March 1999.

Economic development

From various accounts of information it is evident that the Sibsagar district is mainly an agricultural one and the impact of an agricultural economy is explicitly revealed in all directions. As per the Census Report 1991, about 33.7% of males and 23.7% females are engaged in primary sector as main workers where as the same in secondary sector is 2.2% and 26.0% and in tertiary 11.0% 1.4% respectively for males and females.

The following table shows the district wise percentage of main workers for both males and females in different sectors of the economy.

Table - VI

Source Census of India 1991, Primary Census Abstract

The Gross domestic product at factory cost during the year 1994-95 for the district is estimated about Rs. 97,568 lakhs in which the share of primary sector is 68.4% and of secondary is 8.9% and the rest from tertiary sector. The data on GDP from different sectors of all districts and estimates of per capita GDP for males and females are presented in the following table.

Table - VII

District-wise Gross Domestic Product at factory cost and Per Capita GDP by Sex- 1994-95

Note: * Col No 7and 8 are calculated on the basis sector-wise GDP in 1994-95 and sex-wise no. of persons employed in each sector in 1991. Total GDP for males and females are estimated first on the basis of no. of males and females employed in each sector and this total GDP is distributed among all males and females to arrive at per capita GDP.

Source: 1. Directorate of Economics and Statistics, Government of Assam,
2. Census of India PCA 1991 Assam

As can be seen in the above table it appears that Sibsagar is in a better position in terms of per capita GDP as compared to other districts. The per capita GDP in Sibsagar district is Rs. 9,940.00 which is higher than the state average Rs. 6816.00.

However gender disparity is also visible where one can see the large gap between per capita GDP between males and females which is Rs. 14416.00 for males and Rs. 6700.00 females.

Char Areas

The Char Areas are those lands which are generally formed in the banks of big rivers. In Asam, such areas are usually found in low lying flood-prone zone from Sadiya to Dhubri inside the mighty Brahmaputra river. The river Brahmaputra carry sand during rainy season annually and get it deposited and settled in the middle or on the corner of the main stream, which makes an Island inside the river bed once the water level recedes. As a result of deposition of enormous load of sediments in the middle of the river course, a large number of almound-shaped river Islands, called as Chaparis or Chars are formed. In the making of a Char or Chapari the river takes five to six years. The soils of these areas are of new alluvial nature. These are less acidic and are moderately rich in plant nutrients. A particular section of people begins to reside in these areas and starts cultivation too. But even though, these areas are not free from the menace of flood. During flood, when the water flows through the Chars, the settlers of these areas used to shift themselves to some other high lands on the banks to spend the period of flood and come back to their original place of abode after flood recedes. But some times, due to tremendous changes of river course and heavy erosion, some Chars are vanished while some may remain free from the flood. But this phenomenon can not be treated as a permanent nature.

Administration of Char Areas:

These areas are looked after under some special provisions under the administration of the revenue circle. They are to abide by rules and regulations of the State government like general people. However, they have some kind of their own local self government also. In each Char village, a person is selected by the villagers as the head of the village, called as 'Matbor' (Headman) in the Muslim dominated Char areas. As a custom each and every person of the Char are to follow his instructions, guidance or orders on the matters relating to the community affairs and routine life of the area and people. In turn, the Matabor is guided by the elder people of his locality on all collective issues before any important decisions are taken. However, the opinion or decision given by Matbor in respect of common issues such as casting of vote to a particular candidate during election, dispute regarding any matter relating to land, religion or social has to be obeyed by all.

Profile of Char Areas:

In Assam, there are as many as 2,235 Chars of varying sizes during 1993-94 in 14 districts. The highest number of Chars are found in Dhubri district (480), followed by Barpeta district (310) and Jorhat district (293). The lowest number of Chars are found in Morigaon district (39). There is no Char area in the remaining 9 districts of Assam. The Chars of Dhubri district cover an area of 86,925 hectares followed by 27,892 hectares in Barpeta district.

Socio-economic status of Char are Population:

The socio-economic status of the people of the Char areas are in fact miserable. They are mostly illiterates where just about 13 to 15 percent of the total population of entire Char areas are literate. The standard of attainment of education is mostly not above primary level, where one may hardly find any matriculate. Nearly 55 percent are living below poverty line in all Char areas. Out of total 2,39,000 hectares of Char areas of Assam, only 1,67,300 hectares are cultivable land. There are altogether 2,66,707 farming families in Char areas of Assam. The economic activities of the inhabitants of Chars are generally cultivation and fishing. The low-lying Char areas are favourable for growing Ahu, Bao and Boro, rice and also jute .The settlers of Char areas are generally grow rice and potato in large quantity. They grow various types of vegetables for sale. Whatever the amount of crops grown here are not enough to meet even their basic necessities.

The type of houses in the Char areas are mostly katcha structure, made of thatch bamboo, reed and mud. These houses are mostly huts, and a very few families have their houses with C.I. sheets for roof. Houses in pucca structure with brick and cement are very rare sight there.

The people of all Char villages are mostly use river water as the source of drinking water during rainy season. However, a very few villages have their hand pump / tube wells as a source of drinking water. The Char villages are not connected by road. The country boats are used as a means of communication during flood season. During winter season, the villagers come to nearest town by traveling on foot or bicycle.

Developmental programme for Char Areas

Some Developmental programmes have been undertaken by the State government for the welfare

of the people of these areas. The facilities like safe drinking water, medical sub-centres etc., are provided by the government in some areas of different districts. Schools, up to the level primary and middle are also established in some Char areas. For higher education, the children have to go to nearby towns. The Assam Government has set-up a Char Development Authority at Guwahati for overall Development of Char people. At the district level, Offices of the Project Officers are established to look into the projects undertaken for these areas. Various kinds of loans and grant-in-aids are also provided to the villages by this department.

In any case, the people of Char areas are maintaining a poor standard of living from all aspects. Though they are hard workers still they are unable to overcome their poverty at any cost.

Char area Development in Sibsagar district:

Sibsagar district is free from Char/ Chapari. Though the river Brahmaputra is flowing through the northern boundary of the district, no char settlement has been come up till date.

General Administration :-

Revenue Administration

Revenue administration has historically been the primary responsibility of the District Administration. This involves collection and fixing of land revenue, registration, mutation and overall management in regard to land, both private and public. Besides the Revenue Branch of the Deputy Commissioners Office, which is looked after by the Additional Deputy Commissioner (Revenue), there are 9 outlying Revenue Circles in the district, supervised by Circle Officers. The Mouzadars under the Circle Officers are responsible for collecting land revenue (*Khazna*) from land owners (*Pattadars*). All the Circle Officers are required to submit '*doul*' (demand of revenue) to the Deputy Commissioner, and after his approval, *Mouzadars* are to collect revenue as per the demand. In the year 1995-96, the total collection of land revenue in the district was Rs.30,02,000 against the total demand both current and arrears of Rs. 97,56,000 which comes to about 30.8%.

Development

From the developmental angle, Sibsagar district is divided into 9 Development Blocks. Below the block level set-up, there are 118 Gaon Panchayats, each comprising a number of villages and governed by local-self bodies. From the angle of Police administration, the district area is divided among 16 Police stations and 8 Police out-posts.

Apart from Revenue matters, District Development is one of the very important objective of the District Administration. As head of the District Administration, the Deputy Commissioner is responsible for all round developmental activities in the district under various programmes such as MP's Local Area Fund (MPLAD), MLA's fund, Untied Fund, Sub-divisional Plan Scheme Fund, Border Area Development Fund etc. For these works, the Deputy Commissioner assigns one A.D.C. (Development) the specific task of looking after and coordinating various developmental activities undergoing in various sectors. The ADC (Development) is aided in this matter by the decentralized Planning Cell of the DC's office. All departments, involved in the developmental activities of the district, like PWD, Irrigation, Health, Education and many others work in coordination and a District Development Committee (DDC) headed by the Deputy Commissioner has been in place to ensure this coordination. Under the Government policy of rapid upliftment of rural population, a District Rural Development Agency (DRDA) is functioning in the district, which has the Deputy Commissioner as the Chairman and one Project Director as its functional head. All schemes for Rural Development are implemented by agencies in coordination with 11 Development Blocks situated in outlying rural areas of the district. These Development Blocks are supervised by Block Development Officers and Senior BDOs.

Local self Government:

The present system of local self-government is a legally of the British administration. However, some forms of local self government were in existence ever during the pre – British days, like the institution of Namghar. Initially these Panchyats were constituted as local Boards in 1882. The Assam Panchayat Act 1959 which came in to force in 1960, abolished the local Boards and under this Act a three-tier Panchayat Raj System was introduced in Assam. However, the Panchayat Act 1972, which came into operation from 5th May, 1973 changed over to two-tier system of Panchayats instead of the three-tier system and the intermediary Anchalik Panchayat having been abolished.

As on 31.3.2000, there were 111 Gaon Panchayats and 3 Mahkuma Parishads in Sibsagar district in rural areas.

For management and implementation of various developmental schemes, elected bodies are constituted at the level of Corporation, Municipality and Town Committees for Urban Areas and Panchayat Bodies for the rural areas. Sibsagar district has four urban local administration bodies as follows :

1) Sibsagar Municipal Board

2) Amguri Town Committee

3) Nazira Municipal Board

4) Moranhat Town Committee

5) Sonari Municipal Board

There will be one Chairman and vice-Chairman in Municipality and the Chairman is the head of the administration. He presides over meetings of the Municipality. He is entrusted with the implementation of the schemes taken up by the Municipality. He is also invested with the financial Powers to manage the affairs of the Municipality. The Municipality has various sources of revenue; it regularly receives annual grants from the government. Besides, levies taxes on holdings, rickshaws, carts, cycle, stalls, open space markets, cinema houses etc.

Some important duties of the Municipalities/Town committees are to maintain roads and bridges under their jurisdiction and to look after the sanitation of Public Health, laying out of parks, establishment of Veterinary Dispensaries, libraries, fire brigades, supply of protected water etc.

Autonomous District Council

In case of Districts, which have Autonomous District Councils, most of the powers and functions of the Deputy Commissioners are transferred to the Autonomous Districts Councils. Such District Councils have both executive and legislative powers, especially on the matters of administration of land, management of unreserved forests, utilization of water for the purpose of agriculture, regulation of Jhum or shifting cultivation. And also, they are empowered to take decision on matters relating to establishment of village or town Committees or councils, matters relating to village and town administration, health & sanitation, appointment or succession of Village Chief or Headman, inheritance of property, marriage, social customs etc.

The District councils also have the powers to establish, construct or manage primary schools, dispensaries, markets, roads and bridges etc. They are empowered to collect revenues by way of levies, taxes and royalty etc., from various sections of societies and population.

Sibsagar district does not come under purview of Autonomous District Council.

Law and Order

Severe of penalties kept the incidence of crimes very low during the Ahom rule and until end of British regime also. Migration of people especially of those with doubtful antecedents and introduction of an element of heterogeneity and increase in population slowly caused in the incidence of crimes. It may be remembered that Sibsagar was the vertex of serious communistic agitation during the decade after independence that called for strong police action to press it.

Maintenance of Law & Order is another important aspect of district administration and the Deputy Commissioner also being the District Magistrate is responsible for proper maintenance of the same. The Deputy Commissioner is aided by the Additional District Magistrate and Sub-divisional Magistrates. The Circle Officers of the Circles also function as Executive Magistrates and are responsible for maintenance of Law & Order in their respective circle areas. The District Magistrate and other magistrates take the necessary assistance from the police department for any necessity. Police Administration of the district is headed by the Superintendent of Police. The police department has an infra-structure of 16 Police Stations, 8 out-posts and other auxiliary establishments in the district.

The incidence of crime in the district is not less compared to other parts of the State. The number of different cases of crimes reported are presented in the following table.

Table-VIII
Cases of crime reported in Assam and Sibsagar district-1998

Cases of crime	No. of cases reported		Percentage to total crimes in state
	Assam Sibsagar	state district	
1	2	3	4
1. Murder	1,665	89	5.3
2. Rape	744	39	5.2
3. Kidnapping	1,471	79	5.4
4. Docaity	928	17	1.8
5. Robbery	1,082	46	4.3
6. Burglary	3,696	89	2.4
7. Riots	3,548	62	1.8

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the

Source : Additional Director General of Police (CID) Govt. of Assam.

As may be seen in the above table, the incidence of murder and Burglary are relatively more compared to other types of crimes, whereas very few cases of riots are found reported. However, the rates of conviction are very less both in the district as well as in the State as a whole.

Accidents

In the year 1999, about 63 accidents on National highways 24 on other ways are reported, in which 44 persons are killed and 53 are injured.

Health and Family welfare

Though noting much is known about the public health in

Sibsagar district, but there are evidence to show that during Ahom rule there were separate departments for public health and practice of Ayurvedic treatment. The Ayurvedic system, though based on the ancient system of the Hindus, developed along its lines in ancient Kamrupa with the result that many expert Ayurvedic physicians in Assam added some thing to it from their own knowledge and experience.

Important diseases prevalent in Sibsagar are fevers, dysentery, diarrhoea, pulmonic affection, reheumantism etc. Among these Diarrhoea and dysentery, intestinal diseases and hookworms are generally common in the riverin areas. Influenza generally flares up after continuous rains and floods. Malaria was also most common in the southern mountainous regions bordering on the Nagaland and now with intensive activities of the National Malaria Eradication project in the district this terrific courage has also been brought under control. Kala-azar, which used to claim heavy toll of lives in the past has been brought under control.

The Directorate of Health Services is the main department, which is responsible to took after the health of the public. Under this Directorate, Public Health Centres are established in important places and in addition to these there are some separate institutions like Maternity Homes, Family Planning Centres, Dispensary, Nursing Homes etc. There is a civil Hospital in the Sibsagar town.

Vital Statistics

In the past, the vital statistics at the lower level in the rural areas were submitted by the village headman to the Mauzadar, who in turn complies his Mauza figures and submit them to the Civil Surgen or the Sub-Divisional Medical Officer as the case may be. Before implementation of RBD Act 1969 in the State, the Registration of Births & Deaths was not compulsory except in Tea Estates. Only after 1978, the registration of births & deaths became compulsory under the RBD Act 1969, that came into force by Assam registration of births & deaths rules 1978. Again in 1999, the Govt. of Assam framed Registration of Births & Deaths rules 1999 under the revamped system of civil registration that initiated by the Central Govt., which is now in operation.

In Sibsagar district at present all the Primary Health Centres are Registration Centres of births & deaths for rural areas and the Municipal Board or Town Committees are Registration Centres for births & deaths in the respective urban areas. The Registrar of births & deaths, register all the events of births & deaths occurred in their presence or notified by the individuals/agencies nominated for that purpose by the govt. They compile all the events and submit monthly reports to the Joint Director of Health Services of the district, who is designated as District Registrar of Births and Deaths. The District Registrar in turn compile all the events for the entire district and submit the returns to the Director of Health Services, who is the Chief Register of births & deaths for Assam State. The Chief Register of births & deaths compile the figures for State as a whole and sends reports to the Registrar General India, New Delhi periodically.

In Tea Estates, events of births & deaths are collected by the officers In-Charge of Tea Estates and these are reported to their respective Registration Centre.

The data on Registration of births & deaths available during 1957 to 1971 reveal that the Registration of births was not given much importance compared to death registration, However, the level of registration is for both births & deaths was very low.

servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing

so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo
9 Kaibartta
10 Lalbagi
11 Mahara
12 Methar,Bhangi
13 Muchi, Rishi
14 Namasudra
15 Patni
16 Sutradhar

Scheduled Tribes :

I. In the autonomous district :
1 Chakma
2 Dimasa,Kachari

3 Garo

4 Hajong

5 Hmar

6 Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam

7 Any Kuki Tribes Including:

(i) Biate,Biet

(ii) Changsan

(iii) Chongloi

(iv) Doungel

(v) Gamalhou

(vi) Gangte

(vii) Guite

(viii) Hanneng

(ix) Haokip, Haupit

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such

professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR):

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR) ·

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for *attending short term vocational or educational course*

that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991

Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 1051,736 in 2001 Census. Male comprises 545,476 while female consists of 506,260. Out of the total population of the district, 954,557 fall under rural and 97,179 are under urban areas of the district. In rural areas 492,049 and 462,508 are males and female respectively. Accordingly 53,427 and 43,752 are males and females respectively in urban of the district. The percentage of urban population in the disrict Bongaigaon is only 9.2 . The district is a rural base place in which 91 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +15.8% which is lower than the state rate. In the district, there are only 5 towns . Sibsagar,Nazira,and Sonari Town is only town with Municipal Board and one town is with Town Committee status. The density of the district is 394 persons per sq. kms. which is higher than the state density (340). The sex ratio in the district is 928 as against 935 in the State. Out of total population of the district, 40.9% is total workers of which 51.3% and 29.7 % are male and female respectively. The percentage of non- workers is 59.1 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 35.4 %, 6.9%, 3.0% and 54.6% respectively.

The literacy rate is 74.5% in the district of which 81.5% is for males and 66.8% is for females. The district literacy rate is above the state literacy rate (63.3)%.

The district has no any kind of University in its place. The nearest University from the district is Guwahati University. The district has no any kind of technical college such as Engineering, Medical, Agricultural etc. After getting graduation in the district's colleges students have to go outside the district for higher education.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13

2	Sibsagar	152,755	115,429	37,326	181,050	127,196	53,854	18.5	10.2	44.3	24.4	29.7
3	Amguri	118,179	114,596	3,583	134,588	127,591	6,997	13.9	11.3	95.3	3.0	5.2
4	Nazira	141,237	132,842	8,395	181,445	168,398	13,047	28.5	26.8	55.4	5.9	7.2
5	Sonari	311,450	299,052	12,398	294,478	276,976	17,502	-5.4	-7.4	41.2	4.0	5.9
6	Mahmora	-	-	-	120,453	114,674	5,779	0.0	0.0	0.0	0.0	4.8
District Total:		**891,782**	**826,093**	**65,689**	**1,051,736**	**954,557**	**97,179**	**17.9**	**15.6**	**47.9**	**7.4**	**9.2**

As per Census of India 2001, the total population of Sibsagar District is 1,051,736 with 97,179 in urban 954,557 in rural area. Sonari Revenue Circle is the biggest Circle with 4294,478 population and Mahmora Revenue Circle with 120,453 population is at the bottom of the list of RC. Decadal variation of population in 1991-2001 in the district is 17.9 which is lower than the state rate of 18.9 .The growth rate of

population among Revenue Circles is higher in Nazira Revenue Circle but it is seen that the growth rate is found minus in Dimow and Sonari Revenue Circles.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / CD Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages
			Persons	Males	Females		Males	Females

101-200	86	9.9	44,199	4.6
201-300	139	16.1	97,326	10.2
301-500	327	37.8	355,334	37.2
501 +	265	30.6	444,758	46.6
Not known	0	0.0	0	0.0
District Total:	**866**	**100.0**	**954,557**	**100.0**
Population Density (Rural) of the district:		**411.6**		

Out of 954,557 rural population of the district, 444,758 or 46.6 percent population hailing from 265 villages live in these villages where population density is 501+ per square kilometer. In the range of population density 0-10 (per sq. km), there is 24 villages having 8,290 population. 3 villages with 336 population have density in the range of 11-20. Detail can be seen in the table itself.

TABLE- 5

SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census	Assam			Sibsagar		
Year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	887	894	670
1911	915	923	626	895	900	765
1921	895	906	613	900	904	755
1931	874	885	574	892	899	694
1941	875	886	605	891	896	728
1951	868	878	663	875	883	686
1961	869	887	661	868	876	659
1971	896	912	744	887	901	697
1981	—	—	—	-	-	-
1991	923	934	838	907	916	802
2001	935	944	872	928	940	819

Note : Sex ratio has been defined here as the number of females per 1000 males.

Sex ratio in the State has improved both in rural and urban areas during the last decade. It increases from 923 in 1991 to 935 in 2001. The sex ratio in the district during the Census of India 2001 follows the same trend and as a result it increases from 907 in 1991 to 928 in 2001. At rural level the sex ratio is noticed that it increases to 940 in 2001 from 916 in 1991 and similarly in urban it increases from 802 in 1991 to 819 in 2001 in the district respectively.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Dimow	932	932	
2	Sibsagar	908	950	816
3	Amguri	943	954	773
4	Nazira	925	931	842
5	Sonari	930	937	825
6	Mahmora	939	945	837
District Total:		**928**	**940**	**819**

Out of 6 Revenue Circles of the district these are five urban units located in Sibsagar, Amguri, Nazira, Sonari and Mahmora Revenue Circle respectively. Among 6 Revenue Circles, sex ratio of two Revenue Circles are lower than the sex ratio of the District. Amguri Revenue Circle with 943 females per 1000 males is top in the list of circles in sex ratio while Sibsagar Revenue Circle shows the lowest sex ratio of 908. Urban wise sex ratio in Nazira Revenue Circle is the highest with 842.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D Block	Sex ratio
1	2	3
1	Demow	937
2	Sibsagar	929
3	Gourisagar	952
4	Amguri	951
5	Nazira	945
6	Sonari	945
7	Lakwa	929
8	Pachim Abhoypur	938
9	Sapekhati	938
District (Rural) Total:		**940**

At CD Block level, Gourisagar CD Block has the highest sex ratio of 952 among the CD Blocks of the district. It is higher than the district rural sex ratio of 940. Sibsagar CD Block has recorded the lowest 929 females against 1000 males among all C D Blocks of the district. Sex ratio in four CD Blocks are higher than the district sex ratio while the sex ratio of the other CD Blocks are lower than the district level rural sex ratio.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	11	1.3	1,837	0.2
700-749	6	0.7	3,753	0.4
750-799	19	2.2	21,143	2.2
800-849	37	4.3	17,985	1.9
850-899	113	13.0	107,726	11.3
900-949	283	32.7	394,116	41.3
950-999	223	25.8	274,435	28.7
1000-1099	148	17.1	125,767	13.2
1100+	26	3.0	7,795	0.8
District Total:	**866**	**100.0**	**954,557**	**100.0**
Sex ratio (Rural) for District:			**940**	

The sex ratio at village level by range, it is found that most of the villages are having sex ratio of 900+. Out of 866 inhabited villages in the district, 680 villages come under the sex ratio range of 900+, 11 villages record sex ratio below 700 while 6 villages come under sex ratio range of 700-749. In about 174 villages, females are found more than males.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town+*	Urban status of	Sex ratio
1	2	3	4
1	Sibsagar (MB)		816
2	Amguri (TC)		773
3	Nazira (MB)		842
4	Sonari (MB)		825
5	Moranhat (TC)		837
Sex ratio (Urban) for the district:			**819**

Urban sex ratio of the district as per Census of India 2001 is 819. Out of five towns of the district, Nazira MB has shown the highest 842 sex ratio in the district. The other towns have been recorded different sex ratio where there is no any similarity at all. .

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	595	68.7	0	0.0
Less than 5	153	17.7	2,564	6.4
5-10	28	3.2	2,292	5.7
11-20	21	2.4	3,130	7.8
21-30	13	1.5	2,919	7.3
31-40	8	0.9	2,215	5.5
41-50	12	1.4	5,033	12.5
51-75	9	1.0	3,601	9.0
76 and above	27	3.1	18,389	45.8
District Total	**866**	**100.0**	**40,143**	**100.0**

It is observed from the table above that the numbers of villages are more where there is no Scheduled Castes population. This type of villages is numbered 613. 159 villages have less than 5.0% Scheduled Castes population. In 27 and 25 villages have 5-10% and 11-20% Scheduled Castes population respectively. More the percentages of Scheduled Castes population, less is the number of villages.

Out of total inhabited villages in the district Sibsagar, 595 villages are having no Scheduled Tribes population. As such, 40,143 persons belonging to Scheduled Tribes are found in 271 villages of the District. The Scheduled Tribes population with 9.0 % occupying in 9 villages in the District fall under the percentage range between 51-75. However, the percentage range of Scheduled Tribe population of 153 villages are found in the range of less than 5.0%.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town*+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Sibsagar (MB)	53,854	3,003	814	5.6	1.5
2	Amguri (TC)	6,997	747	15	10.7	0.2
3	Nazira (MB)	13,047	2,103	335	16.1	2.6
4	Sonari (MB)	17,502	576	149	3.3	0.9
5	Moranhat (TC)	5,779	134	77	2.3	1.3
District(Urban) Total		**97,179**	**6,563**	**1,390**	**6.8**	**1.4**

The number of Scheduled Castes and Scheduled Tribes population in the urban of Sibsagar District is very small. It is 6.8% for Scheduled Castes and 1.4% for Scheduled Tribes. Between five towns in the District, Nazira MB shows the highest percentage with 16.1 % Scheduled Castes and the same town has the highest percent 2.6 of Scheduled Tribes population.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C D BLOCKS, 2001

Serial number	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Demow	973	989
2	Sibsagar	939	1007
3	Gourisagar	973	954
4	Amguri	1,000	1008
5	Nazira	817	929
6	Sonari	997	967
7	Lakwa	901	1059
8	Pachim Abhoypur	981	949
9	Sapekhati	951	954
District (Rural) Total		**961**	**979**

The table indicates sex ratio of castes and tribes population in each CD Block. The sex ratio of Scheduled Castes in all CD Blocks are above 900 except for Nazira CD Block where it is 817 only. But it is 1,000 in Amguri CD Block. It is seen that the sex ratios for five CD Blocks are above district rural sex ratio. In case of Scheduled Tribes, the sex ratio is more than sex ratio of Scheduled Castes. It is 979 in the district. The sex ratio of 929 for Scheduled Tribes population in Nazira CD Block is much lower than sex ratios of other CD Blocks but sex ratio in Sibsagar, Amguri and Lakwa CD Blocks for Scheduled Tribes population are above 1,000 females against 1,000 males.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Sibsagar (MB)	919	766
2	Amguri (TC)	976	875
3	Nazira (MB)	1032	791
4	Sonari (MB)	914	862
5	Moranhat (TC)	861	711
Sex ratio (Urban) for the district:		**959**	**780**

Sex ratio of Scheduled Castes and Scheduled Tribes in urban areas of the District is 959 and 780. Out of the five towns in the District, Nazira MB records the highest sex ratio with 1,032 for Scheduled Castes population and 875 for Scheduled Tribes population in Amguri TC while lower number of sex ratio with 914 females for Scheduled Castes is seen in Sonari MB and 711 females per 1,000 males for Scheduled Tribes is seen in Moranhat TC.

District Total:	**271**	**100.0**	**40,143**	**100.0**
Literacy rate for District (Rural):		**73.1**		

In urban area of the District, the percentage of literate persons of Scheduled Tribes population is 94.2 percent. The male literates show a higher rate of percentage than the female literates with a gap in literacy rate of 5.2 percent only. Sonari MB shows the highest percentage of literates with 96.4 percent followed by Moranhat TC with 95.9 percent. It is seen that the percentage of literacy rate is seen more for female than male literacy rate The gap of male/ female in towns is between –1.5 to 8.7 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Note: Percent of Worker to total worker are given in brackets

Out of 430,523 total numbers of workers in the District, four category of workers are categorized as (a) Other Workers having 54.6 percent, (b) Cultivators with 40.9 percent, (c) Agricultural Laborers with 6.9 percent and (d) Household Industry Workers with 3.0 percent. In male-female breakup it is noticed that in all categories of workers except Household Industry Workers, male workers are more than female workers in terms of absolute number of persons. But the percentage of female workers are more in all categories except Other Workers. The detail data in respect of Revenue Circles can be seen in the table itself.

Note: Percent of Worker to total worker are given in brackets

Economic activity of the rural people of Sibsagar district is shown in the table in four different categories of workers. Out of 395,909 total number of workers in the rural of the District, large number of persons take Other works as Main work and thus constitutes 50.9 percent followed by Cultivation with 38.4 percent. The other category of workers, Agricultural labourers record 7.5 percent. There are few people in the district who took Household Industry either as Main work or as Marginal work and the percentage of such workers shows 3.2 percent. The male workers in cultivation are more than the female workers in terms of absolute figures and but in case of percentage, the female workers are more than males in Cultivation, Agricultural Labourers and Household Industry. In all 9 CD Blocks of the District, people are found to be engaged in all four categories of work but largely in Cultivation and Other works

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

In rural of Sibsagar District, the types of amenities available in the village are mostly Education and Improved Drinking water. The other amenities availed by villages are less in comparison to these two amenities. Out of 866 inhabited villages in the District, 95.3 percent or 825 villages are having access to education and 95.8 percent or 830 villages in the District are having access to Improved Drinking Water. 89.1 percent or 772 villages are having access to electricity. However, 50.9 percent of villages are having access to approach by Pucca Road facilities and 51.4 percent of villages are having access to Transport Communication facilities in the District. Most of the villages are not having access to Medical facilities, out of 866 villages only 317 villages or 36.6 percent recorded as having access to Medical amenities. Very few villages are having Post Office and Telephone facilities with only 34.5 percent and 2.1 percent respectively. The other amenities like Banks and Agricultural Credit Societies are not available in almost all villages of the district. The percentage of villages recorded as 5.1 percent against having access to Banks and 3.3 villages are having access to Agricultural Credit Societies. Some amenities like Bank, Telephone etc are not available in villages of some CD Blocks of the District.

Note : - Percentages are given in brackets.

*** Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.**

 # Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The rural population in Sibsagar District by and large are having access to Education, Improved Drinking Water and Power supply. The percentage distribution of the people having access to Education records 98.1 percent. People having access to Improved Drinking water records 97.1 percent and those having access to power supply is 84.2 percent. The number of people having access to Medical amenities are not much, Out of 954,557 rural population in the District, 425,924 persons or 44.6 percent are having access to Medical amenities. However, 59.2 percent are having access to Transport Communication and 57.5 percent are having access to approach by Pucca Road. People having access to Post office forms 44.4 percent and those having access to Telephone forms only 2.9 percent from the total rural population. Most of the rural people in the District do not have access to Banks and Agricultural Credit Societies amenities. Some CD Blocks in the District are not having amenities like Banks , Agricultural Credit Societies cte.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The table indicates that out of 223 villages having population in the range of 1-499, 193 villages have educational facility. It means that 53 villages have no educational facility. Hence it can be said that educational facility generally is not available in more villages where inhabitants are less. The villages having population in the range 5000- 9999 have enjoyed educational facility by all. Similarly out of 272 villages having population in the population in the range of 500-999, 268 villages have enjoyed education facility. The medical facility enjoyed by 108 villages out of 278 villages are in population range of 1,000-1,999. In respect of all other facilities availed like Bank, Agricultural Credit Societies facilities etc. more villages have population in the range of 2000-4999.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Demow	173	39,583.0	70.5	0.9
2	Sibsagar	139	37,639.5	65.4	1.2
3	Gourisagar	127	31,967.7	73.1	1.1
4	Amguri	34	9,044.0	74.6	0
5	Nazira	67	21,988.0	57.9	2.9
6	Sonari	119	26,818.0	71.2	5.1
7	Lakwa	27	7,178.1	74	0
8	Pachim Abhoypur	45	21,902.5	77.9	0.6
9	Sapekhati	135	35,799.9	71.4	1.1
District Total:		**866**	**231,920.8**	**70**	**1.6**

The distribution of number of villages, total area, percentage of cultivable area and percentage of irrigated area among CD Blocks are shown in the table. Out of total rural area of 231,920 hectares, 70.0 percent is cultivable area and 1.6 percent is irrigated land. Among the CD Blocks 77.9 percent cultivable land being the highest is noticed in Pachim Abhoypur CD Block. The highest 5.1 percent-irrigated area is in Sonari CD Block followed by Nazira CD Block with 2.9 percent in the District.

TABLE 43: PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	V Amguri (TC)	21.2	4.8	16.3	16.7	9.1	2.3	2.5	0	2.8
2	V Moranhat (TC)	8.3	3.8	4.5	8.0	3.6	0.2	3.3	0	0 9
3	IV Nazira (MB)	22.0	10.8	11.3	9.1	2.4	1.6	1.5	0	3 6
4	II Sibsagar (MB)	16.2	5.5	10.8	16.6	5.3	0.3	3.4	0	7 5
5	IV Sonari (MB)	12.5	2.4	10.1	12.2	6.1	0	4.6	0	1 6
District Total		**16.2**	**5.5**	**10.7**	**14.3**	**5.2**	**0.6**	**3.3**	**0**	**5.2**

The Municipality Finance of the town shows that per capita receipt is Rs 16.2 for urban area of the District while per capita expenditure is Rs 14.3 which is lower than per capita income. Per capita income is higher in proportion in Amguri TC than other towns and per capita expenditure is also more in same town.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Amguri (TC)	8.6	1.4	1.4	1.4	1.4
2	Moranhat (TC)	6.9	3.5	3.5	1.7	3.5
3	Nazira (MB)	6.1	0.8	0	2.3	0.8
4	Sibsagar (MB)	2.4	1.5	1.3	1.5	0.6
5	Sonari (MB)	5.7	3.4	2.3	1.1	1.1
District Total		**4.2**	**1.9**	**1.4**	**1.5**	**0.9**

In average the number of Primary school in towns of the district is 4.2 per 10,000 population and 1.9 is Junior Secondary/Middle school. Only 1.4 number Secondary/Matriculation schools per 10,000 population are in the district. The Senior Secondary and Colleges are recorded 1.5 and 0.9 number respectively in urban areas in the district per 10,000 population. However, the number of primary school is more in Amguri TC than other towns of the district It is seen that there is no Secondary School in Nazira town..

TABLE 46 : PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Amguri T.C	6,997	860	12.3
2	Moranhat T.C.	5,779	0	0.0
3	Nazira M.B.	13,047	6,338	48.6
4	Sibsagar M.B.	53,854	4,035	7.5
5	Sonaril M.B.	17,502	10,890	62.2
District Total		**97,179**	**22,123**	**22.8**

The table 46 gives the proportion of slum population in statutory towns. Out of the total district urban population of statutory towns 97,179 persons or 22'8 percent people live in slum area. Moranhat TC constitutes no slum population while Sonari MB with 10,890 slum population being highest forms 62.2 percent of total population of this town. Similarly, in Nazira MB there are 6,338 slum persons which constitutes 48.6 of total population of the town.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Amguri(TC)	43
2	Moranhat(TC)	52
3	Nazira(MB)	77
4	Sibsagar(MB)	74
5	Sonari(MB)	4
District Total		**58**

In average the number of beds in medical institutions in the urban areas of the district is 58 per 10,000 population. Nazira MB with 77 beds is higher in number to other towns followed by Sibsagar MB with 52 beds per 10,000 population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial numbe	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Amguri (TC)	Nil	Rice
		Nil	Nil
		Nil	Nil
2	Moranhat (TC)	Nil	Mustard Oil
		Nil	Nil
		Nil	Nil
3	Nazira (MB)	Nil	Rice
		Nil	Nil
		Nil	Nil
4	Sibsagar (MB)	Mustard Oil	Kerosene
		Rice Product	Tea
		Ice	Nil
5	Sonari (MB)	Tea	Rice
		Nil	Dal
		Nil	Nil

The most important commodity exported out of and manufactured in towns are shown in the table along with the name of commodities. No item is manufactured by three towns. The items manufactured by two towns are namely Mustard oil, Rice product, Ice and Tea.. All towns export some commodities by each towns name of which can seen in the table.

Data source Census of India 2001, H- series "Tables on Houses, Household amenities and Assets "

The table indicates households by tenure status and number of rooms occupied in the district by Scheduled Castes and Scheduled Tribes as well as for the district. The owned houses of Scheduled Castes households are more having three and more rooms in both rural and urban and it is same for Scheduled Tribes also. In case of rented houses, Scheduled Castes households have more houses with two rooms in rural and in urban it is more with one room and Scheduled Tribes households have more houses with two rooms in rural areas but in urban locality more households have houses with three rooms room. In case of Schedules Tribes households, they have more houses with two rooms in rural but the number of households is more having houses with three rooms in urban. In case of other houses, it is depicted that total households of Scheduled Castes is more having houses with two rooms but in case of Scheduled Tribes households having 3+ rooms houses are more in both areas.

TABLE 49

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households .
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage means closed and open drainage

The table indicates that the percentage of households having the facility of toilet is more in the district as well as in all Revenue Circles than all other facilities availed by households and it is followed by improved drinking water. The percentage of households for all facilities availed are seen more in urban areas than the rural areas. The number and percentage of households having bathroom facility is seen less in the district. Only 15.1% households have availed bathroom facility in the district.

The table indicates number and percentage of households by type of fuel used for cooking in Revenue Circles. The percentages are shown out of the district total. It is seen that a big share of the households of the district as well as in Revenue Circles use firewood for cooking followed by LPG then by crop residue The use of electricity, biogas and coal/char coal are very limited. Altogether 389 households of the district have no cooking arrangement in their houses. Detail in respect Revenue Circles can be seen in the table.

TABLE 52 :

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table indicates the number of households who have availed banking services and the number of households having some specified assets that shown in the table. Out of the total households of the district, 56,932 households have availed banking service. The banking service availed by the households in the district is more in rural areas. It is only 13,145 households in urban areas of the district. In Revenue Circle level, the banking services availed by the households are found more in Sonari Revenue Circle than other Revenue Circles. More households in Sibsagar Revenue Circle have all assets except Radio and Bicycle. The highest number of households having Radio and Bicycle are found in Sonari Revenue Circle.

(ix) Major social and cultural events, natural and administrative developments and significant activities during the decade.

The festivals both religious festivals and special festivals are celebrated in the Sibsagar district with great enthusiasm and high spirit. The people irrespective of sects and beliefs exchange greetings to one another. Puja feast, Bhaonas and singing parties are the principal theme and amusement of the people both in urban and rural. All festivals are with celebrated in of high esteem in all pandals throughout the district.

The Durga puja once celebrated by Hindu followers of particular sect is now a festival of Hindu in the district. It is usually observed in the month of September or October every year and lasted for four days. Durga puja is not just religious festivals but also an occasion to foster the spirit of togetherness and peace among people. A week before the starting of main puja starts, a religious ceremony is performed which is known as Mahalaya and since this day all other preparation of the Puja starts vigorously. Puja pandals are erecting in various centres in the district by different Puja Committees. The image of Goddess Durga is installed ceremoniously on the Puja pandal so that faithfuls can easily adore and worship the Goddess. In these four festive days, people throng the puja pandals to invoke the blessing of Goddess Durga. Finally the festival come to an end, and the image of Goddess Durga is ceremoniously immersed into pool or river. Other religious festivals in the district like Sivaratri, Doljatra, Kalipuja etc. are also performed in several places of the district with great joy and fervour.

The major social and cultural events of Assam is Bihu festival. The origin of Bihu festivities, dance and music is shrouded in mystery. It is opined that these festivities are a popular relic of the distant Austro-Asiatic civilization. They give primary importance to agriculture. The Austro-Asiatic dance festival connected with the harvest season is a popular social event. They were the inhabitants of the Brahmaputra valley before they come into contact with the Aryan civilization. There had been natural fusion of Austro-Asiatics with the Aryan and Dravidian civilization. Assam's society did retain certain strong influences of the Austro-Asiatic civilization. A very rich folk music has developed through the centuries around the Bihu festivities. These songs are the most cherished heritage of the Assamese people. The theme of songs is love and nature. They are mostly in couplets. Bihus are celebrated by the people of Assam from the days of yore. The Ahom kings during the their rule, they enjoyed Bihu and patronized these for its development and got it prevalent shape and form.

Bihus are of three kinds. These are Magh or Bhogali Bihu, Bohag or Bhogali Bihu and Kati or Kangali Bihu. Magh Bihu is observed to celebrate the harvesting of grain. It is usually performed on the 14th and 15th of January of each year. It is called Bhogali Bihu because the granary of each cultivators are full with rice and out of which various kinds of food items are prepared by the housewives. These food items like Chira, Pitha(cake) are taken at day of Bihu and also offer to the relatives and guest. The first day of Magh Bihu is called Uruka. On this day various ritualistic procedures are observed by the people. Bohag Bihu is observed from the last day in the last month of Assamese calendar Chaitra and continue for few days from 1st day of Bohag. The first day of this Bihu is meant for the cows and its is called Garu Bihu. The cows are made a good wash in rivers or ponds and they are put garland made of brinjal and water gourd. New pagha (rope for tying cow) are used replacing old one. The shed is given with smoke to prevent evils. The cows are treated as Lakshmi for cultivation. The next day is called Manuh Bihu (mankind). This Bihu is also performed with various ritual way. The preparation of various food items is an important part of the Bihu. Bohag Bihu augurs the wish for a good harvest because this is the time when cultivators start sowing. Kati or Kangali Bihu is celebrated to welcome Lakshmi (the Goddess of wealth and prosperity.). This Bihu is observed when the granary of each farmers is empty and hence it is called Kangali Bihu. All these three Bihus are observed in Sibsagar district from ancient days. Now it has gained much importance and observed with much pomp and grandeur. Bihu is not only an annual festival among Assamese people but it is a festival to promote unity and love among different castes and creeds. Bihu is now regarded as National festival. During the rule of Ahom Kings, wrestling of Buffaloes, Cock, Hen, Bul Buli birds etc are organized and enjoyed these by sitting in the Rangghar. The buffaloes wrestling is prevalent in Sibsagar. This wrestling performs in Magh Bihu. It is very interesting to observe. In open field, the wrestling of Buffaloes is conducted and it continues about half an hour. The defeated buffalo has immediately fled way from the field and winning buffaloes has been rewarded with cash or kind. The

wrestling of birds is almost disappeared from the region due to lack of trained birds.

Various other religious as well as traditional festivals are observed in Sibsagar district. The tribal people and tea gardenians have a large number of festivals which are performed in Sibsagar district.

The Bhaona which is observed in all Namaghar of Sibsagar from the days of Shri Sankardev is still continuing and performed with much enthusiasm. It is staged by the saint to propagate his Bhakti movement among the masses and to bring faith of the people to one God (Krishna or Bishnu). The Satras are the main platforms for Bhaona.

Major administrative change is the reorganization of Sibsagar district which resulted in creation of a new Subdivision – Charideo. A new Revenue Circle namely, Mahmora is come up before 2001 Census. Mahmora Revenue Circle is formed by 32 and 84 villages taking from Dimow and Sonari Revenue Circles and urban portion of Dimow Revenue Circle. In this process, the district boundaries have however, not changed. No such significant activity has taken place during the decade in the district.

(x) Brief description of places of religious, historical or archaeological importance and places of tourist interest in the district

Before the annexation of Assam by the British, the centre of theadministration of Assam was Sibsagar where Ahoms ruled nearly six hundred years. They took special care to build numerous temples, dedicated to different deities and dig large tanks which till today stand out as memorials to their glory. From the point of view of architectural grandeur and beauty, most temples in their designs and finish may be well compared with any contemporary architecture found in other parts of India and some of them have received high commendation from expert observers. Again, most of the monumental tanks have no parallel elsewhere.

Sibsagar is hallowed by antiquity and it abounds in countless monuments of national importance and of sculptural excellence, which bear eloquent testimonies to the glory that was Assam. This place Sibsagar better known as Rangpur was the capital of the Mighty Ahom king till 1826. The name Sibsagar originates from the name of the tank Siva Sagar.

This tank along with the three temples standing on the south bank of the tank was constructed by queen Ambika Devi, wife of king Siva Sinha in 1733 A.D., to commemorate the name of her husband. The area of the tank with its bank is 257 acres, the area of the tank under water is 129 acres; present water depth of the tank is 20 cubits; and the total length of the banks by road is 2 miles, 4 furlongs and 64 yards. On the bank of the tank there stand three temples, viz., Siva Dol, Vishnu Dol and Devi Dol and also a collection of different sizes of cannon used during the reign of Ahom kings.

Shiva Dol is the tallest temple in Assam, the total height including the golden Dome, (which is 7 and half feet long) is 132 feet 9 inches. One of the greatest festivals of this part of the country, Sivaratri with mela is duly performed at this Dol every year. Vishnu Dol, Devi Dol is situated in line with and to the west of Siva Dol Durga Puja is celebrated here.

The palace known as Talatal Ghar or Kareng Ghar was the capital and military station of Ahom kings first constructed by king Rudra Sinha in the year 1200 A.D. The building is of seven stories, four above and three below the ground and said to contain two tunnels: one from Kareng to Dikhow River and the other from Kareng to Gargaon palace. The entire plan of both the Kareng Ghar and the Talatal Ghar speaks of the excellent workmanship of the architects.Rang Ghar is the amphitheatre of the Ahom kings situated by the side of the National Highway No.37 opposite to Kareng Ghar, constructed in 1745 A.D, for the purpose of witnessing games, sports, animal fights etc by the members of the royal family. The site is of great historical and archeological importance.

There is a tank known as Joysagar tank which is situated 3 kms south of Sibsagar town. This is the biggest tank in India and was constructed within 45 days by king Rudra Sinha in memory of his mother Sati Jotmoti Kunwaree. The area of the tank with its bank is 318 acres; the area under water is 155 acres and the depth of water of the tank is 20 cubits. The total length of the banks by road is 2 miles, 4 furlongs and 96 yards (about 5 kms). To the southwest of this tank there is a Ghanasyam Temple which is dedicated to the memory of Ghanasyam, the architect who built the Kareng Ghar.About 8 kms southwest of Sibsagar town, there are four tanks viz. Napukhuri and Puranipukhuri and beyond these tanks there is a stone bridge over the river Namdang.

About mile12 kms southwest of Sibsagar town by the side of the south trunk road, there is a Gaurisagar tank which was built by queen Phuleswari in between 1715 and 1717 A.D. The area of the tank with its bank is 293 acres, the area under water is 150 acres and the depth of the tank is 20 cubits. About 12 kms east of Sibsagar town there is a Gargaon palace in between Nazira and Simaluguri railway junction that is considered as the site of great archaeological interest. Again 28 kms east of Sibsagar town at the foot of Naga Hills, there is a place known as Charaideo which was the first capital of the Ahom kings established by king Sukapha.

Maidam:

The meaning of Maidam is raised bed of earth where death body is buried. There are various maidams in different places of Sibsagar district. Charaideo was a capital of Kingdom of Ahom king Sukapha in 1253 A.D. The Ahom called it as 'Che-rai-dai'. Che means town, Rai means glittering and dai means hill/mountain. It means a glittering hilly town. The Maidams are of two kinds- kutch-made of earth and pucca made of brick. Katch maidams are 21 to 24 feet in length and 9 to 12 feet in breadth and height is about 21 to 27 feet. After construction of Maidam, the earth had been given in upper portion of it. Some maidams are found in two to three stories. There are some small maidams near the main maidam. It is called 'Pat' maidam. The beloved sons and daughters of the kings are kept in these 'Pat' maidams. Maidams are hemispherical mounds with funerary affiliation. Ahom placed their departed souls of family at Charaideo maidams where Sukapha was buried for eternal rest. The history reveals that wives, servants (attendants), domestic animals and huge quantity of valuable articles were also buried alive with departed kings. This practice of burial for living souls was stopped by the king Rudra Singha. Before conversion into Hindu by king Rudra Singh, the dead body of king were buried in the maidam. But after his conversion to Hindu, the death body of the king was cremated and ashes were kept in maidam. There was a system of offering various valuable things along with dead body of ashes in the maidam. During Mahamadans invasion, all valuable treasures were taken away by the Mahamadam including Mirjumala by digging all maidams.

(xi) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Industry is the back bone of the economy of the country. Assam is having the high potentiality for development of resource based and demand based industries. However, due to various factors, the pace of industrialization of Assam during the past decades was not satisfactory. Whatever progress is made till now, is confined to a few selected sectors like petroleum, coal, tea and forest etc. Some of the old time industries still flourished in the state. Various cottage industries and small industries formed an important part of Assam's culture and occupies a place of pride in every Assamese households. Reference of historical and other literature of Assam are quite sufficient to point to a high standard of industrially efficiency that the people of Assam obtained in early times.

The district of Sibsagar being the seat of Ahom Government was naturally the place where Assam's industries along with her culture developed to a high degree of perfection. Among the old industries that had been in existence in the district of Sibsagar mention can be made of weaving, metal industries, wood and bamboo works, pottery, brick making, stone carving and masonry.

Tea industry can be considered as the barometer of economic development in Assam and a good foreign exchange earner to the country. The district Sibsagar has 1,059 total number of tea gardens with an area of 62,751 hectare and it is the second highest number under tea in Assam. The production of tea in the district is 118,548 kg with an average yield of 1,889 kg per hectares. The drilling of oil around Sibsagar town constitutes one of the important and profitable industries of the district.

Another characteristic of the district is that rice has been grown in the district since time immemorial. This district is mainly an agricultural one. The land of Sibsagar district is highly suitable for the cultivation of paddy, tea, sugarcane, vegetable and fruits. The people of the district are now using modern tools and machineries for improvement of products. They are using improved varieties of seed for more production.

The contributions that given by the Ahom in all fields are still flourished in the district. During Ahom period, the seat of learning were also shifted to eastern Assam more particularly to Sibsagar district and began to thrive there under royal patronage. The Gurukula

system of education that existed in the past gradually assumed popular forms. In the wake of the neo-Vaisnavite movement Satras served as the centres of learning and culture. The leaders of Vaisnavite religion gave an impetus to study of the vernacular language and for the benefit of the people they rendered the religious scriptures into Assamese. Hence both Assamese became a popular medium of expression and instruction. The Buranjis compiled under the royal patronage of the Ahoms are invaluable contribution to Assamese literature. Many Sanskrit books were translated into Assamese under the royal patronage. Some remarkable contributions were put forwarded by the British in the field of literature. Thereafter many sons of the soil contributed in the field of education.

Sibsagar district has given birth of many authors, scientists, saints, freedom fighters, sportsmen, artists and social workers. The people of the district took part in the 1942 movement and had wide spread effects in the district. The police made lathi charge on percussionists in Joysagar and Sibsagar during Quit India Movement. Many persons were arrested and imprisoned as a result of this movement. The district of Sibsagar which had made immense sacrifices at the altar of freedom proudly participated in the jubilations performed for achieving independent. The people of the district are indebted to them forever.

(xii) Scope of Village Directory and Town Directory - Column heading wise explaination and coverage of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market / hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of respective jurisdiction.

****

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B

The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.

Appendix-VIII Indicates CD Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

List of villages merged in towns and outgrowths at 2001 Census

There is no above case in Sibsagar district

APPENDIX VIII - VILLAGE DIRECTORY

Number of villages under each Gram Panchayat (CD block wise)

Name of the District:Sibsagar

Serial number	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Income and expenditure of panchayat/Gram	
			Number	Location code numbers					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

(Data is not available for this apendix) .

APPENDIX IX - VILLAGE DIRECTORY

Statement showing number of girls schools in the villages

Name of the District Sibsagar

Serial number	Name of CD block	Village location code number	Name of village	Number of girls school			
				Primary School	Middle School	Matriculation / Secondary School	Higher Secondary / PUC / Intermediate / Junior college
1	2	3	4	5	6	7	8

(Data is not available for this apendix)

Section II - Town Directory

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type,it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library PL
(ii) Reading room RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT - I

Status and Growth History

Srl No	Class, name and civic status of town	Location code number	Name of Taluk/ Tahsil/ Police Station/Island etc	Name of CD Block	Area (in sq km)	Number of households incl houseless households (2001 Census)	Population and growth rate (in brackets) of the town at the Censuses of

5	IV Sonari (MB)	-	-	-	-	2,438	-	12,398 (+408 5)	17,502 (+41 2)	2,187 8	-	765	825

In area, Sibsagar MB is the biggest among all towns. The household is also more in this town than remaining towns in the district.

Sibsagar district comprises five towns having Municipal Board by three towns and Town Committee by two towns. Sibsagar MB came into force in 1901 with 5,712 souls and Nagira MB by 1911 and remaining three TC formed in 1971.The decadal growth rate is almost same in three towns but the same is very high in Moranhat TC with+227.2 The density in per km is high in Moranhat TC than other four towns. The sex ratio is also high in Nazira MB and Moranhat TC having 842 females in each town than other three towns in 2001.

STATEMENT-II

Physical Aspects and Location of Towns, 1999

Sl. No.	Class, name and 'civic status ' of town	Physical aspects			Name of and road distance in kilometer(s) from		Name of and road distance in kilometer(s) from 'Sub-division /Taluk/	
		Rainfall (in mm)	Temperature (in centigrade)				Tahsil / Police station/Development Block/ Island HQ.	Nearest city with population of one lakh and more
			Maximum	Minimum	State HQ.	District HQ.		
1	2	3	4	5	6	7	8	9
1	II Sibsagar (MB)	2142.2	36.8	5.5 (360)	Guwahati (0)	Sibsagar (0)	Sibsagar (55)	Jorhat
2	V Amguri (TC)	2142.2	36.8	5.5 (342)	Guwahati (31)	Sibsagar (0)	Amguri Pt. I (30)	Jorhat
3	IV Nazira (MB)	2142.2	36.8	5.5 (377)	Guwahati (16)	Sibsagar (0)	Nazira Pt. I (60)	Jorhat
4	V Moranhat (TC)	2142.2	36.8	5.5 (403)	Guwahati (40)	Sibsagar (1)	Mahmora (39)	Dibrugarh
5	IV Sonari (MB)	2142.2	36.8	5.5 (406)	Guwahati (45)	Sibsagar (0)	Sonari Pt. Ii (102)	Jorhat

Sl.No.	Class, name and 'civic status ' of town	Name of and road distance in kilometer(s) from			
		Nearest city with population of five lakh and more	Railway station	Bus facility	Navigable river/canal (if within ten kilometers)
1	2	10	11	12	13
1	II Sibsagar (MB) (360)	Guwahati (0)	Sibsagar (0)	Yes (5)	Dhikow (R)
2	V Amguri (TC) (342)	Guwahati (0)	Amguri (0)	Yes	-
3	IV Nazira (MB) (377)	Guwahati (0)	Nazira (0)	Yes	-
4	V Moranhat (TC) (403)	Guwahati (0)	Moranhat (0)	Yes	-
5	IV Sonari (MB) (406)	Guwahati (5)	Bhojo (0)	Yes	-

The rainfall in all towns in the district is same with 2142.2 mm. The temperature both maximum and minimum are also same in all towns. The state headquarters is far away from Sonari MB than the other towns. The district headquarter is also far from this town. Guwahati is the nearest city having five lakh and more population for all towns and Jorhat city is the nearest city for all towns except Moranhat TC. Four towns have railway station in its jurisdiction. No navigable river is available in all towns and within ten kms except Sibsagar MB

STATEMENT - III
Municipal Finance, 1998-99

4	V Moranhat T.C.	-	-	-	-	-	-	-	-	-
5	IV Sonari M.B.	-	-	-	-	Pt	-	-	100	-

There are slum population in all towns except Moranhat TC. The slum areas of all towns are not notified. The pocket name of slum has not been given by respective authorities. The paved road is available in four towns. The system of sewerage OSD in slum areas are seen common in three towns. The slum dwellers have mostly two types of latrines. The use of water borne and service latrines are more in all slum areas. The method of disposal of night soil in slum areas of towns is mostly 'St. There are tap points for supply of protected water in slum area of Sibsagar MB, Amguri TC and Nazira MB. In slum areas of Nazira MB TC, there is no electricity connections and where there is electricity connections in towns, the number of connections for different purposes can be seen in the statement.

APPENDIX TO TOWN DIRECTORY
Towns showing their outgrowths with population

District : Sibsagar

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
1	Sibsagar (MB) 41601000	53,854	-	-
2	Amguri (TC) 41602000	6,997	-	-
3	Nazira (MB) 41603000	13,047	-	-
4	Sonari (MB) 41605000	17,502	-	-
5	Moranhat (TC) 41604000	5,779	-	-

There is no Out Growth in Sibsagar District.

PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES

Annexure

Annexure – I : Number of villages under each Gram Panchayat

(Data has not been collected)

Annexure-II: Note on Fertility-Mortality and Migration,1991

Fertility, Mortality and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.

In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever married women and the last question was to only currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining to the Assam State and.are defined as below.

Age Specific Marital Fertility Rate (ASMFR)

This is the average number of children born alive during the last year per married women of a particular age group.

Age Specific Fertility Rate (ASFR)

It is the average number of children born alive during the last year per woman of a particular age group.

General Fertility Rate (GFR)

GFR is the number of children born alive during the last year per 1000 women in the age-group 15-49.

General Marital Fertility Rate (GMFR)

This is the number of children born alive during the last year per 1000 married women in the age-group 15-49.

Total Fertility Rate (TFR)

It is the total number of children that would have born alive per women, had the current schedule of age specific fertility rates been applicable for the entire reproductive period.

Total Marital Fertility Rate (TMFR)

This is the total number of children that would have been born alive per married women, had the current schedule of age specific marital fertility rate been applicable for the entire reproductive period.

Child-Women Ratio

It is the number of children in the age-group 0-4 years per 100 women in the age group 15-49.

(Detail on non Census concepts relating to various measures are furnished in earlier chapter.)

Annexure – III Various measures of fertility and mean age at marriage,1991 Census.

Fertility:

As seen through various indicators of fertility in the district, it may be seen that the GFR of 136, GMFR of 196 and TFR 4.3 against the respective figures at state level at 135, 190 and 6.0. Various measures of fertility and other fertility related data are presented in the table.

Table -I: Various measures of fertility in Assam State and Sibsagar district-1991 Census

	Fertility Measure	Sibsagar district	Assam state
	1	2	5
1.	G.F.R.	136	135
2.	G.M.F.R.	196	190
3.	T.F.R.	4.3	4.16
4.	T.M.F.R.	6.3	6
5.	Crude Birth Rate	31.1	31.5
6.	No. children ever born per woman in age group 45-49	4.5	5.2
7.	Mean age at marriage	19	18.3
8.	Child-woman ratio(0-4)	462	575
9.	Child-woman ratio(5-9)	620	737

The above table reveals that the fertility rates are relatively high in Sibsagar district compared to the state level averages. However crude birth rate appears to be more or less same which is 31.14 in the district against State level average of 31.47. Mean age at marriage slightly higher as 19.02 years, the size of child woman ratio (0-4 years) is very low as 462 in the district against 575 at state level.

To be more specific about fertility indicators, age-group wise fertility (ASMFR) levels for married women are shown in table table.

Table-II: Age Specific Marital Fertility levels in Assam State and Sibsagar district-1991 Census

Age Group	Sibsagar district			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0.152	0.154	0.116	0.151	0.152	0.133
20-24	0.195	0.199	0.136	0.214	0.219	0.165
25-29	0.151	0.156	0.097	0.183	0.192	0.12
30-34	0.107	0.11	0.07	0.134	0.14	0.093
35-39	0.056	0.058	0.031	0.087	0.094	0.042
40-44	0.025	0.026	0	0.049	0.052	0.022
45-49	0.01	0.022	0	0.033	0.034	0.025

It can be seen in the above table, that compared to state level averages, the ASMFR in almost all the age groups is lower in both rural and urban, except in rural for age group 15-19. Not only this, there is a vast difference in the levels of ASMFR especially in the age-groups 20-24, 25-29 and 30-34, which are far less than the state averages.

For comparison of fertility rates with state level as well as with all other districts of the State, the data of other measures of fertility such as GFR, TFR, birth rates and Child-Women ratio etc., are presented in the following table for Sibsagar district as well as for the other districts of Assam State.

Table-III: District-Wise various measures of Fertility and Mean Age at Marriage Assam-1991 Census

State/District	GFR	GMFR	TFR	TMFR	CBR	No. of children ever born per ever married woman in age-group 45-49	Mean Age at Marriage of currently married women
1	2	3	4	5	6	7	8
Assam	135	190	4.2	6.0	31.47	5.2	18.3

19.Karbi Anglong	140	207	4.4	6.8	33.1	5.1	18.8
20 NorthCacharHills	127	187	3.8	6.4	29.7	5.5	19.2
21.Karimganj	196	291	7.1	9.3	48.5	4.8	18.2
22.Hailakandi	136	196	4.2	6.4	32.1	5.0	18.2
23.Cachar	137	190	4.1	6.1	32.6	4.5	18.5

Mortality:

The Mortality figures in the district, confirms to the general theory of relation between fertility & Mortality. The mortality rates are very high in the district, which convinces the belief that less survival rates prompts people to go for more number of children to compensate for the non-survived children to ensure a desired number of children as planned. So it is seen here that like fertility rates, the child mortality rates are also lower in the district. The data on mortality are presented in the following table

Table - IV
Estimates of Child Morality in Assam and Sibsagar district, 1991

Mortality Measure	Sibsagar District	Assam State
1	2	5
Q (1)		
Persons	75	92
Male	81	96
Female	68	87
Q (2)		
Persons	76	101
Male	83	104
Female	75	98
Q (3)		
Persons	83	104
Male	84	106
Female	86	101
Q (5)		
Persons	89	116
Male	85	118
Female	92	115

The abovetable Q(1)shows the infant mortality rates and, Q(2), Q(3) and Q(5) indicate the size of child mortality in the age group, below 2 years, below 3 years and below 5 years respectively. As can be seen, the district is in a better position in respect mortality rates as all these rates are very low in Sibsagar district compared to the state level rates, for both males And females. This indicates the good health status of the district.

Annexure –IV Percentage distribution of migrants by place of birth/ place of last resident, 1991and 2001 Census

Migration:

Out of 907,983 persons in the district, 60,201 are born outside the district which makes about 6.6% of total population. The detail data may be seen in the following table.

Table - I

Percentage Distribution of migrants by place of birth- 1991 Census, Assam

State/District	Total Migrants			From other Districts			From other States			From other countries		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

18 Tinsukia	140,479	76,794	63,685	54 20	48 61	60 95	37 34	42 49	31 14	8 46	8 91	7 91
19 Karbi Anglong	104,789	57,106	47,683	60 12	57 38	63 40	29 96	32 09	27 40	9 92	10 52	9 21
20 N C Hills	30,346	18,762	11,584	73 31	72 98	73 84	20 07	19 67	20 72	6 62	7 36	5 44
21 Karimganj	68,166	28,507	39,659	35 39	25 93	42 19	21 44	20 59	22 05	43 17	53 48	35 76
22 Hailakandi	32,821	12,802	20,019	61 99	49 88	69 73	18 74	24 61	14 99	19 27	25 51	15 29
23 Cachar	96,379	43,036	53,343	42 36	34 15	48 99	20 07	22 68	17 96	37 57	43 17	33 05

In the above table, it is clear that out of total population born outside the district, 68 4% are from other districts of the state, 28 3% are from other states outside Assam and 3.3% are from other countries, outside India. The data also show that proportion of males are higher than females in the category of migrants born outside the State However, in case of migrants whose place of birth is outside the district but within the State, the female share is more than the male

The other measure to find migrant population is by place of last residence Out of total population about 22,020 (32 24%) persons are reported as came to this district from some other place out side the district. The data on migrants by place of last residence are presented in the following table

Table-II

Percentage distribution of migrants by place of birth- 2001 Census, Assam

State/ District	Total migrants			From elsewhere in the district outside the place of enumeration			From other districts

	4.3	8.2	2.9	2.6	5.0	1.8

from the above table it is clear that out of the total mirants the percentage of migrantion within the the district is highest with 64.7%, where again the percentage of female migrants with 67.4%is more than the male with 60.1%. Again, if we see the percentage of population born outside the district, 25.1% are from other districts of the state, 9.6% are from other states and only 0.5% are from other countries. The data also shows that the proportion of males are higher than females in the category of migrants born outside the state and country . However, in case of migrants whose place of birth is outside the district, but within the state, the female share is more than the male.

	4.1	7.7	2.8	2.0	3.8	1.4

The above table on migrants by place of last residence shows that 75.6 %of the population are from within the district but outside the place of enumeration, 17.1% are from other districts of the state, 7.0% are from other states of India and 0.3% are from other countries outside India.

Annexure –V Brief account of main religions in the district/ tahsil, 1991 and 2001 Census

Religion:

A brief account of religious composition of the population in the district is presented in the following table.

Table - I

Main religions in the Sibsagar district and Assam state –1991 Census

District/State	Religion	Number of Followers	Percentage to total Population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Assam	Total population	2,24,14,322	100	88.9	11.1
	Hindu	1,50,47,293	67.1	86.2	13.8
	Muslim	63,73,204	28.4	94.7	5.3
	Christian	744,367	3.3	96	4
	Buddist	64,008	0.3	93	7
	Jain	20,645	0.1	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8
Sibsagar	Total population	9,07,983	100	92.8	7.2
	Hindu	8,10,445	89.3	93.6	6.5
	Muslim	69,260	7.6	83.3	16.7
	Christian	21,180	2.3	97.7	2.3
	Buddhist	2,985	0.3	96.2	3.9
	Jain	447	0.1	55.3	44.7
	Sikh	1,266	0.1	39.7	60.4

The figures in the above table show that compared to the state as whole the proportion of Hindus is more in the district. The Muslims who constitute about 28.4 % of total population at State level but in the district their percentage is only 7.6. Christian consists 2.3% as against 3.3 at State level, which is also on lower side. However Buddhists and Sikhs though are negligible in number but in the district their share is relatively more compared to the state averages.

Table - II

Main religions in the sibsagar district and Assam state 2001 Census

District / State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%
1	2	3	4	5			6
Assam	All Religions	26655528	100.0	87.1			12.9
	Hindus	17296455	64.9	83.7			16.3
	Muslims	8240611	30.9	93.6			6.4
	Christians	986589	3.7	94.9			5.1
	Sikhs	22519	0.1	33.9			66.1
	Buddhists	51029	0.2	87.3			12.7
	Jains	23957	0.1	15.0			85.0
	Others	22999	0.1	94.0			6.0
	Religion not stated	11369	0.0	90.6			9.4
Sibsagar	All Religions	1051736	100.0	90.8			9.2
	Hindus	927706	88.2	91.9			8.1
	Muslims	85761	8.2	76.5			23.5
	Christians	28488	2.7	97.1			2.9
	Sikhs	1563	0.1	61.3			38.7
	Buddhists	4020	0.4	94.8			5.2
	Jains	267	0.0	55.4			44.6
	Others	3576	0.3	99.6			0.4
	Religion not stated	355	0.0	95.2			4.8

The above table gives a comparative statement regarding the proportion of population practicing the Main Religions in the District with the corresponding percentage for the state as a whole.

It is evident from the table that the percentage of Hindues in the district exceeds the Hindu population of the state as a whole . The percentage of Muslim is 30.9% for the state but only 8.2% in the district. Christians consists 2.7% as against 3.7% at state level. The percentage of Buddhists and other religions though are negligible, in number their share in the district are relatively more compared to the state averaes.

Annexure – VI Marital status of population as per 1991 and 2001 Census

Marital Status:

The data on marital status of population in Assam State as well as in Sibsagar district for each age group for males and females are presented in the following table.

Table-I: Agegroup-wise, Marital Status of population in Assam- 1991 Census

Age group	Total Population		Percentage of Population in each age-group							
			Never Married		Married		Widowed		Divorced/Separated	
	Males	Females	Male	Female	Male	Female	Male	Female	Male	Female
