JORHAT DISTRICT

BOUNDARY, STATE ... ...

Sinhasan

Majuli, the world's biggest riverine island and the Sub-division of Jorhat district is the house of all the important *Satras,* that were established during the propogation of Vaishnavisim in Assam by Shri Shri Sankar Dev and Shri Shri Madhadab Dev. Vaishnavites worship the Shrimat *Bhavgawat Sashtra,* which is placed by wrapping a sacred white cloth on the *Sinhasan* or *Guru-Asan*, a seven storied or *Sat-khalap* wooden structure with a lion over an elephant carved out in the four corners on each of the seven stories. The lion symbolises *Kirtana* or *Namprasanga* and the elephant symbolises *Papa* (sin) and these together means that the person who regularly perform *kirtana* will be free from all *Papas.*

Annexure IV	Percentage distribution of migrants by place of birth/place of last residence, 1991 and 2001Census	496
Annexure V	Brief account of main religions in the district / tehsil,1991 and 2001Census	501
Annexure VI	Marital status of population as per 1991 and 2001 Census	502
Annexure VII	Age, sex and education in the district, 1991 and 2001 Census	505
Annexure VIII	Distribution of different mother tongues returned in 1991 and 2001 Census	507
Annexure IX	Distribution of Scheduld Castes and Scheduled Tribes in 1991 Census	509

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government The financial aspects of its publication are being taken care of by the State Government This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality It depicts various amenities available in each village and town in the form of Village and Town Directory Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M Das, IAS, Ex-Director of Census Operations, Assam During my tenure, the Deputy Director, Shri Hiremath and Shri B M Talukdar, Asstt Director,Assam were looking after Village Directory and Town Directory work. Now Shri B L Sarmah DDCO and Shri N C Bhagabati, ADCO have been looking after all related works of DCHB and Shri B M Talukdar, Asstt Director,Assam has also provided his valuable work in publication of this book The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs P Bhattacharjee, Sr. Compiler, Mrs Khana Das, Asstt Compiler, Mrs P Sonowal, Asstt Compiler, Mrs D Sarmah, Asstt Compiler and Mrs D Doley, Asstt Compiler

The DCHB is drafted by Shri B M Talukdar, Asstt Director and all Computer works were done by Shri S Dutta Data Entry Operator , Smt Rupam Gupta Stenographer The map Section has provided maps which are included in this book I offer my thanks to all of the officials who are closely associated with this noble work

I am grateful to Shri J K Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance I much also record my gratitude to Dr. I C Aggarwal, Sr Research officer for his sociological advice and Mr S L Jain Deputy Director for his technical guidance

		Urban	-	-	-	-	-	-	-	-
12	Titabor	Total	15	67	42	25	247	2,991	2,342	649
		Rural	8	20	10	10	180	2,136	1,649	487
		Urban	7	47	32	15	67	855	693	162
13	Mariani (TC)	Urban	4	43	30	13	16	172	149	23
14	Titabor Town (CT)	Urban	3	4	2	2	51	683	544	139

The statement-9 gives the houseless and institutional population of Revenue Circles for rural and urban. The population and number of households of both houseless and institutional are more in rural than in urban. Among the Revenue Circles, Titabor Revenue Circle with 67 houseless population is the highest and the lowest is noticed in Teok Revenue Circle with 8 persons. Jorhat West Revenue Circle with 254 number of households having 3,676 persons stands in first position in the distribution of institutional population among all Revenue Circles and the lowest is noticed in Majuli Revenue Circle with 472 persons only.

ANALYTICAL NOTE

ANALYTICAL NOTE ON JORHAT DISTRICT

(i) History and scope of the District Census Handbook

District Census Handbook is the most valuable publication brought out by the Census Organisation on behalf of each State Government. This provides information on some basic demographic and socio-economic characteristics and availability of important civic amenities in each Village and Town of the district.

The publication of District Census Handbook was first initiated during 1951 Census in collaboration with the respective State Governments. In 1951, only some demographic and socio-economic information at Village and Town level along with some Census tables were published in District Census Handbook. Since then, it has undergone radial changes during the subsequent decades and has been grown substantively both in its scope and content by incorporating more Census tables and also some basic statistics on land use pattern, agriculture, industry etc. The DCHB of 1961 was considered as a unique asset published by the Census organisation. In 1971 Census, further improvements were made by enlisting many more information on Villages and Towns in the form of Village and Town Directory. It had three parts. The Part-A related to Village and Town Directory, Part-B contained Village and Town-wise Primary Census Abstract and Part-C dealt with administrative aspect and Census Tables based on PCA etc. The 1981 Census again widened the scope of DCHB. to cover more data on literacy, health care etc., in addition to the information covered in 1971 DCHB. It was divided into two parts. The Part-A included data on Village and Town directory and Part-B was devoted for Village and Town-wise Primary Census Abstract. However, this part of the DC.B. was not brought to light in Assam as no Census was conducted due to prevalence of disturbed condition in the State. In 1991 Census, the DCHB was divided into two parts. The Part-A consisted the Village and Town directory data and Part-B presented the data of Primary Census Abstract.

As a tradition of the past, in the present DCHB also, some more information on availability of facilities, such as credit societies, banks, recreation and cultural institutions, news paper and magazines etc. are included. Further, information on income and expenditure, important commodities manufactured, exported and imported etc., are also included to give a fuller account to the scope of these directories. Similarly in Town directory also, few more information are included.

The process of collection and compilation of these data involved lot of exercises. At first, revenue circle-wise information on each village has been collected by revenue authorities at district level. These data are compared with 1991 figures at district level and after thorough scrutiny and cross-check, these records are submitted to the Census directorate. In case of Town Directory, data have been collected directly from the Commissioner of Municipal Corporation and Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 at Census directorate. Thereafter efforts are made to compare and cross-check with similar data made available from other sources especially data published by various Departments of State Government to verify the authenticity and correctness of figures received through Village and Town directory booklets. After that only, the compilation and computerization of these data have been made according to the instructions of the Registrar General and Census Commissioner, India. Therefore it is regarded that, because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication than compared to earlier publications brought out in this line.

(ii) Brief history of Jorhat District

Jorhat was one of the three subdivisions of erstwhile Sibsagar district. The name – Jorhat has a special significance. The word has two syllables – 'Jor' means twin and 'hat' means markets. The 'hats' were Phukanor hat and Machar hat. These two hats were adjacent to Disai. The old name is changed and in its place the new name – Jorhat was given for the erstwhile subdivision of the Sibsagar district.

The early history of the district relates to the stories of Bodos and Shans. Scholars are of the opinion that the Bodo Tribes of Sino-Tibetan origin settled and established their settlements over the valley of Brahmaputra fairly early in the 2nd Millennium B.C. Some Austric and possibly Dravidian tribes produced the Mongoloid Bodos in the tract. The area of the Jorhat district along with Sibsagar district formed part of this tract and covered by tribal settlements of Bodo tribes.

It is believed that the area of Jorhat district, once upon a time, formed part of the great kingdom of Pragjyotish-Kamrupa whose eastern boundary extended up to the river Dikhow specially during the time of Varman rulers of Assam in 7th and 8th century. This political status seems to have continued till the decline of Hindu dynasty. Thereafter several small principalities sprang up under the Barabhuyans and the Bodo Chiefs at the advent of 12th century A.D

Turning the pages of the Modern history and the history of the Ahoms, we find that the fierce and war-like tribe of 'Shans' who passed themselves as 'TAI' were a branch of the Tai-race of East-Asia. Ahom historians propagate that 'Sukapha' – the first Ahom king, entered Assam in 1228 A.D. crossing the high hills called Patkai. At that time it appears, the area from Dimapur in the South to the Dili river on the north was under the occupation of Kacharis. They had their capital at Dimapur. According to one Dimasa Kachari King, Bisarapatipha was said to be the son of Mahadev. He was a contemporary of Sukapha. Sukapha put the eastern part of the territory of Kachari king under his occupation and drove away the Kachari king to the hills.

The Ahoms in a bid to expand their territory fought battles with the Chutiyas and Kacharis. They extended their territory to the east and the west. A major fierce battle took place between Kacharis and the Ahoms. Ahoms were defeated and driven away as far as Dikhow. But the Kacharis did not get to enjoy the pleasant sense of victory for long. Meanwhile, Suhungmung (1497-1539) popularly known as Dihingia Raja marched up the valley of Dhansiri in 1536 AD and killed the Kachari Raja and sacked the capital at Dimapur. The area of present Jorhat district became part of the Ahom territory since then. It was during the reign of Suhung, the Ahom kingdom reached its greatest expansion and Kamrup and Kamata were liberated from Muslim domination Suchengpha or Pratap Singha (1603-1641) succeeded Suklengmung constructed a 'Garh' on the north and south to protect the kingdom. One part of this Garh is called 'Mera garh' in Majuli and the other is 'Swatalat garh' in the north and the 'Ladoi garh' on the south.

Jayadhwaj Singha (1648-63) had to face Mirjumla's invasion in 1662. He was succeeded by Chakradhavaj Singha in 1663 who had valiantly earned the laurel of victory over the Mughals in the battle of Saraighat in 1671. On the death of Chakradhavaj Singha a period of turmoil intervened and as many as seven princes occupied the Ahom throne who were too weak to sustain and as a result the Ahom monarchy fell into untimely end. During the reign of Rajeswair Singha Ahom rule became too weak. He married Kuranganayani, a Manipuri Princess and elevated her to the rank of principal queen. The Mogolu Khat which is at a distance of 6 kms from Jorhat on the west was established by Rajeswar Singha.

In 1757 Jorhat was honoured by a visit from the Ahom king and he had a temporary royal residence. But the town enjoyed the status of Ahom capital when the Ahoms were driven out from Rongpur by Moamoria rules. The period of Laxmi Singha (1769-1780) was the signpost of Moamoria insurrection. The same broke out a new with more devastating form during his successor, Gaurinath Sinha (1780-95) Rongpur was divested by the Morans and the king had shifted the capital from Sibsagar to Jorhat in 1794 A.D. The state of normalcy dawned by the visit of the British at the request of the king. This proved short lived. Gaurinath Singha was succeeded by Kamleswar Singha (1795-1811) a state of great disorder persisted. After his death his brother Chandra Kanta Singha succeeded the throne. During his royal rule the Ahoms had lost the last vestige of vigour and validity as a powerful military race and the nobles frittered away their energies in unseemly feuds and skirmishing among themselves.

Soon the Burmese made it clear and contemplated that they should retain their hold upon Assam by even putting on the throne their own puppet which fomented a fresh spurf if violence and resulted in a reign of terror. Fortunately, Burmese were compelled to renounce all their claims on Assam by the British. As a result the treaty of Yandaboo of 24th Feb, 1825 came into being. Subsequently Assam was added to the dominions of East India Company. By a proclamation in 1839 two districts namely Lakhimpur and Sibsagar were formed with Jorhat as a sub-division. Present Jorhat district is formed with two sub-divisions – Majuli and Jorhat.

(iii) Administrative set up of the district :

The present Jorhat district came into being vide Govt. of Assam Notification No. GAG 214/83/1 dated 14.6.83 with Jorhat as head Quarter. Majuli is the only subdivision apart from Jorhat subdivision.

For administrative conveniences the districts is divided into two sub-division – Majuli and Jorhat. Again the subdivisions have been further subdivided into four revenue circles under Jorhat subdivision. They are Jorhat East; Jorhat West; Teok and Titabor. Majuli subdivision is formed with lone Majuli revenue circle. There are 2 Mahkuma Parishads and 111 Gaon Panchayats. Also the district is having two towns at Jorhat (MB) and the other at Mariani (TC). Besides these two towns the district has as many as 4 Census towns. Majuli subdivision has no town.

The administration of the district has been vested with the Deputy Commissioner at the HQ at Jorhat. He is the over all head in matters relating to revenue collection, maintaining Law and Order and general administration; conduct of Election, conduct of decennial Census as Principal Census Officer and so on. He is continually assisted by Addl. Deputy Commissioners, Sub-Divisional Officers, Extra Assistant Commissioners.

As sub-division level S.D.O. is the all in all under direct control of the Deputy Commissioner.

(iv) Physical features :

The district has between 26.20" and 27 10.30" north latitude and 93.39" and 94 36.30" east longitude. The district is bounded on the north by Sonitpur and Lakhimpur districts; on the south by the state of Nagaland; on the east by Dibrugarh and Sibsagar districts and on the west by Golaghat district.

The district has an area of 2851 sq. km. and occupies the 14th rank in Assam. It has a population of 871,206 persons in total. (Provisional figure, 1991).

Topography :

The district can be divided into three broad natural divisions.

The first one is a belt of flooded land. The expanse of flooded belt runs four to 12 kms in width on the southern bank of Brahmaputra. The area is covered with jungle reed interspersed. With some swamps and rich variety of fodder grass. Summer cultivation of rice is carried on and in winter rabi crops are grown. A few patches of dense forests serves as abode of wild animals.

Secondly a vast area plain area lies between Nagaland and the Brahmaputra. The area is thickly populated with enormous plain area for cultivation of any sort. On the high areas tea is grown exorbitantly and while the plain area is surfaced with rice cultivation and is, therefore, regarded as a surplus rice grown area in the district.

The third division embraces the entire Majuli subdivision. Majuli is a gift of nature. Majuli is the only riverine island in the world. Subansiri and Kherkatia Suti have separated Majuli from Lakhimpur district. Only transplanted rice is grown there during summer. Winter cultivation is carried out in plenty. The reeds when bloom in winter add a picturesque scenery on all sides when flood water recedes and a vast tract is visible where reeds naturally grow. 'Ahu', 'Bao', Mustard, Sali plant and other rabi crops are the principal items of cultivation.

Majuli has been maintaining the traditional culture and is a principal site of pilgrimage for the Vaisnavites of Assam. Many 'Satras' are there running their age-old cultures. Among the Satras mention may be made of Auniate, Kamalabari, Dakshinpat, Garhmur etc.

Topographically the whole of Jorhat district is a level plain. It has, therefore, no lake, beel and marshy land. A few of them are seen in Majuli. These are as a result of changes of course of the rivers.

The river 'Bhogdai' is the only major river in the district. The river rises from the high hills of Nagaland and passes through the district in north-westerly direction till it mingles with the water of Dhansiri. The entire course of the river is named as Disai for the upper course and the lower is known as Bhogdai. The river bed is full of silts and in winter all these are taken away as one building material. Due to enormity of silts on the riverbed ranging from 2 ft. and more navigation has become simply impossible. It has a total length of 160 km. and at places in Jorhat and Mariani two bridges have been constructed to facilitate connection and communication with places of the either banks. Mariani Railway Junction and a host of tea gardens are situated on the left hand side of the river bank. Climate of the district is quite akin to what it is enjoyed in the Brahmaputra valley. Mild winter and hot-wet summer during the year have been experienced so far. Generally, November to January is termed as period of winter while June to August and is the hottest summer.

Kakodonga is another important river bordering Golaghat district. It serves as a natural boundary. The river has become shallow and its meandering course during summer inundates large areas for breaching of embankments at several places. However, it serves the purpose of flushing out the excess water much to the relief of the inhabitants of both the districts.

Flora and Fauna :

As reported by the chief conservator of forests, Assam, Jorhat district has 282.35 sq. km. of forest reserve. The area constitutes 9.88% of the total area in the district. As the forest is less in comparison to total area, there is no such immediate plan to bring forests under reserved forest.

The forests of Jorhat district can be classed into two categories – Tropical evergreen forest and miscellaneous forest. The vegetation under the first category includes Hollong, Nahar, Sham, Amri, Makai, Chopa etc. In the remaining category those species have been included which are deciduous and the middle and lower canopies of evergreen in character.

The district economy plays an important role accrued out of forest wealth. A large chunk of rural inhabitants in the district depends upon forest resources. Forests serve as fuel supplier in the tune of fire-woods and bamboo, ekra, reed, thatch, cane, etc. are used for both house-building and making furniture.

It goes without saying that the forests of Assam are the principal source of medicinal plants. The same is equally applicable in case of forests of this district. Animals are there like elephants, tigers, hare etc. These forests are not important is respect of animal habitation as the dense Kaziranga Sanctuary in the district of Golaghat is adjacent to Jorhat forest and hills and the neighbouring state of Nagaland. Various migratory birds are seen in the Char forests of the Brahmaputra while one makes in road to Majuli during winter, fishes of all varieties are sufficiently found.

Climate and rainfall :

Like other parts of Assam and the adjoining districts of Golaghat and Sibsagar, Jorhat is also enjoying the same climate with a slight variation during winter. It is characterized by a highly humid atmosphere, abundant rainfall and coolness. In not too distance from the district HQ, a place Barbheta where the Agricultural Universty is located is known as the foggiest area in the district nay in the whole of Assam, cold season starts from November to January and summer starts from May to July every year. Heavy rainfall coupled with storms and thunderstorms is the result of south-west monsoon.

The average rainfall is stated to be around 1943.9 mm. Likewise 2244.5 mm. Rainfall is recorded as the normal rainfall.

Temperature :

As per recorded statements received from the meteorological observatory centre temperature starts falling from November and rises from the month of March every year. The highest maximum temperature in the district is 42 c and the lowest is 8 c.

Socio-cultural features :

Land and people : The population of the district is composed of three religions namely the Hinduism, Muslim (Islam) and the Christianity. Also the persons belonging to Buddhism, Sikh and Jainism are living in the district. Population of the district belongs to various castes and tribes. They identify themselves as Kalitas, Brahmins, Kayasthas, Baniya, Ahoms, Koch, Keot, Kaibarttas, Kumar, Naths, Suts etc. They all profess Hindu religion. People professing Muslim religion have their Chiya and Chunni only. Among tribal population there are Deoris, Garos, Kacharis, Mikirs (Karbi) etc. Bhumij, Garhs, Kurmi, Munda, Oriya, Rabidas, Santal, Telengana etc. are found mostly in tea-garden areas.

Hindus: Hindus can be divided into two – Sakti worshipper and Vaisnavites. Vaisnavite culture is predominantly practiced by people in the district. They are the followers of Shri Shri Sandardev (1449-1569 AD). Majuli is one of the pioneers of this Vaisnavite culture and religion.

Muslim: They constitute a small fraction of the population in the district. People professing Sunni Panth are found in large measure.

Chriastian : They, too constitute a small number to the total population in the district. They began their settlement when the East India Company came over to India. They are doing maximum social service by erecting medical institution and educational institutions.

Social System : The Hindus practise Patriarchal system in running their families. Male person becomes the Head of the family. Barring the exceptional cases the surviving son or daughter inherits the father's property in the event of his death.

Marriage of girls is celebrated in two forms. The first one is celebrated among the village people and the relatives when the girl attends puberty. The next

one is the celebration when the girl is given in marriage to someone in presence of well-wishers and she ceases all her claims in her paternal estates.

The houses comprise of rooms for us of the household for different purposes so it is common to see among the rural masses that they erect Choranghai (guest house), 'Gossain ghar' – a room for worship, 'Bharalghar' – a big room for storing corns, 'Suani ghar' – bed room, 'Radhani ghar' – a kitchen, 'Gohalighar' – a shed for cows and goats etc. Here 'Ghar' is represented by room be it small or big. Construction materials of the houses are bamboo wood and thatch. But modern available items have surfaced the construction of houses in rural and urban areas. Pucca RCC building or C.I. Sheet roofing and pucca walls and floors is the order of the day now.

Dresses : The Assamese ladies can be well identified by their dresses they wear. Riha, Mekhela, Chadar besides petticoat are worn by them. Now-a-days it appears very costly. So they take recourse to wearing Saris in general. Keru, Jangphai, Dugdugi, Neckless, Chair, ear-ring, Kharu made of gold are the ornaments of Assamese ladies. On festive occasion and other celebration they wear a composite dresses. Males generally wear dhuti, Banian, Kurta and gamosa. Old people are accustomed to these dresses. Young and old are seen wearing pants, coats etc.

Food : Rice is grown in abundance. Rice is the staple food of people living in Assam. Vegetables, dal, fish, eggs, meat, milk, curd, fruit and tea are used taken by them. People of Jorhat district are no exception to this habit of taking food.

Communal life : Communal life is enjoyed in gathering of people irrespective of rich or poor arranged in the tune of feasts, singing parties, performances of 'Bhaonas' and other theatres, Dol-Jatra or Holi, celebration of three Assamese Bihus, anniversary ceremonies of Shri Shri Sankardev and Madhabdev etc. In this connection mention may be made of 'Dhekiakhowa' namghar a centre of religious attraction established by Madhabdev, where irrespective of all visit during August every year and nam-prosong continues for the whole month of 'Bhadra'.

Resources of the district :

Toklai Tea Research Centre is the one and only institution of its kind in the State of Assam that came into being during the British Raj.

Regional Research Laboratory is also located in Jorhat not too far from district HQs. It has been discharging the bona fide services in this direction.

Kamar Silpa, Karanga : It is an industry run by the Government do make iron based instruments and apparatus for use in the household and other establishments. It promotes blacksmithy in a large and wider scale. The produces mainly cater the requirements of large scale tea industries. They are of high quantity and demand all over the State and beyond.

In respect of exploring oil and natural gas bases it is stated to have large reserve in areas bordering Nagaland.

Forests : Jorhat district has 28194.76 hectares of reserved forest. The district has an area of 2851 sq. km. and thus occupies the 14th rank in Assam. In view of the less area under forest no much proposal of forest division has been mooted so far.

Minerals and Mining : The district has not figured as predominant producer of mineral wealth so far still the district is having one Regional Coal Survey station to explore the possibilities of reserves in and around the district and in neighbouring areas.

Land and land-use pattern :

The land and land-use pattern of the district has been published by the Directorate of Economics and Statistics , the Government of Assam in its handbook, 2000. These are presented below for the year 1997-98:

Area in hectares

(1) Total geographical area :	285,100
(a) professional survey	285,100
(b) Reporting area	285,100
(2) Forest	282,03
(3) Not available for cultivation	103,911
(a) Land put to Non-Agricultural uses	828,51
(b) Barren and uncultivable land	210,60
(4) Other uncultivated land excluding follow land	20,456
(a)Pastures & Grazing land	4,406
(b)Land under miscellaneous tree crops and groves not included in the net area.	9,364
(C) Cultivable waste	6,686
(5)follow land:	18,605
(a) Fallow other than current fallow	7,643
(b) Current fallow	10,962
(6) Next area shown	113,925

(7) Area shown more than ones	152,379
(8) Total cropped area	38,454

Economic profile of the district :

Major characteristics of the district :

Agriculture and plantation :

The economy of the whole of Assam is agrarian in character and Jorhat district is no exception to this.

The arable soil of the district may be grouped into three. (1) old alluvial soil, (2) new alluvial soil of riverine tracts and (3) hilly soil. The vast area of soils falls in the category of alluvial soil.

So the growing of tea, paddy, sugarcane, vegetables and fruits etc. is found extensively carried out, crops like pulses, mustard seeds are grown in plenty. Rice growing is common in all the areas of the district. The hilly areas are suitably used for tea plantation. This is the largest industry. Based on the extensive production of these items three agricultural research centres namely (1) rice experimental station at Titabor, (2) Toklai experimental station of Jorhat and (3) Agro-economic research station at Jorhat have been established.

Crops : Rice is the principal food crop in the district. Tea, sugarcane, vegetables besides some fruits are grown and marketed in district. The district enjoys abundant old alluvial soil which is favourable for growing these crops. The following table has been presented to show the crops, area and yield received from the Director of Agriculture, Govt. of Assam for the year 1998-99.

Table-1

Sl. No.	Type of crop	Area	Production (in tones)	Average yield in kgs. per hectare.
1	2	3	4	5
(A)	Cereals			
1	Autumn rice	173,000	19 329	1 135
2	Winter "	89,200	186,236	2 120
3	Summer "	102	15 822	1 556
4	Total "			
5	Maize	43	22	503
6	Wheat	1,804	3 109	1 723
7	Other cereals and Small millets	10	5	525
(B)	Pulses			
1	Tur	20	13	650
2	Gram	7	3	400
3	Black gram	295	205	695
4	Green gram	135	65	480
5	Lentil	93	44	475
6	Peas	3,040	1,052	346
7	Other pulses	20	8	408
8	Total pulses			
(C)	Oil seeds			
1	Linseed	-	-	-
2	Castor	36	13	380
3	Sesamum	108	48	446
4	Roipe & Mustard	13,000	10,657	820
	Total	13,144	10,718	815
(D)	Fibre Crops			
1	Jute	185	1,672	1,632
2	Mesta	-	-	-
3	Cotton	5	2	67
(E)	Miscellaneous			
1	Sugarcane (in canes)	605	20,549	33,965
2	Topioca	5	20	4,091
3	Potato	2,438	15,880	6,514
4	Sweet Potato	105	28	2,815
5	Tobacco	36	23	640
(F)	Plantation Crops			
1	Banana	1,512	20,155*	13,330
2	Papaya	90	1,389	15,439
3	Orange	200	2,025	10,125
4	Pineapple	221	2,724	12,325
5	Areca nut	2,300	1,839	170
6	Coconut	251	2,169	77
(G)	Spices			
1	Chilly	150	80	533
2	Onion	230	492	2,140
3	Turmeric	155	97	626
	Total	535	669	1,250

History of Tea industry :

The history of the tea industry in Assam dates back to the year 1826, when indigenous tea plants growing in the plains of Assam came to the notice of the East India Company. The cultivation of this plant was first introduced 1830 by the East India Company. It is mentioned in the Economic Development of Assam by P.C. Goswami that a tea garden was started by the Govt. in 1833 in the Lakhimpur district. On 1835 a few indigenous plants were taken from the forest at "Ningroo" bordering the Singphoe country and grown at "Koondilmukh"at Sadiya. A company was found in 1939 known as the Assam Company. This was the first Company in India to undertake the commercial production of tea and was the direct successor of the East India Company. The headquarters of this company was formed at Nazira and remained till the shifting to Calcutta in 1956.The Government garden was carried from 1839 to 1849. But due to certain difficulties, the garden was sold to a China man named "Among". This Chinaman failed to improve the garden. In 1851, through the instrumentality of Colonel Hannay who contributed much to the development of tea cultivation in the part of upper Assam. The early sixties of 19th century i.e. from 1859 to 1860 was a period pf steady boom. After this period the tea industry received a great setback. But this trend was cheeked by 1878. In 1881, the North India Tea Estate Owners formed the Indian Tea Association. The industry grew continuously till 1890 and thereafter it underwent through a depreciation for a short period but soon recovered from this state of affairs. The major improvements have been made in the yield of tea, in the grouping of gardens under a limited number of companies, in the progressive mechanization and rationalization of production and in increasing their efficiency of productivity of labour.

The Tokolai Reserve Station was set up at Jorhat in 1911 with a view to carrying on research on cultivation and manufacture of tea in Assam. This has been very useful in increase of yield rate of tea. In the year 1932-33, it is again met with severe crisis due to depression and over production of tea. This condition was tackled by enacting the Indian Tea Control Act, 1933 and by 1952 it reached an unprecedented prosperity. Recently the Tokolai Experimental centre had developed a machine known as Rotorvane. It is a continuous processing machine for use in a continuous processing machine for use in a continuous system of manufacture.

The Guwahati Tea Auction Centre :

Marketing of tea has always been a great problem for the industrialists. Before opening of tea Auction Centre, at Guwahati, Tea Auction Centre, at Guwahati, Tea Auction Centre in Calcutta arranged for sale of Assam Tea Auction Centre, third of its kind in India started functioning at Guwahati from Sept. 1970.

Tea, which is subject to direct traction by way of excise duty, export duty and a user under tea Act, the industry makes substantial direct contribution to central Revenues. Besides, these taxes, tea industry is also subject to central income tax, supper tax (corporation) and agricultural income tax. Income tax along with sales tax levied upon it inflates the income of the state Gov3ernment to a great extent.

Tea is the mainstay of the plywood industry. Tea grown in different parts of Assam is packed in the garden factories in plywood chests for dispatch. Tea estates require huge quantity of fertilizers for healthy growth of tea. Thus it gives a strong support to fertilizer industry also.

The labour force that engaged in the industry is bought mainly from Bihar, Madhya Pradesh, Orissa and Madras. The industry provides ample scope for employment from higher grade to lower grade workers. The tea estate in Assam is in different geographical size. It varies from small garden to large tea estates. The administration is also generally same from each other. The cell responsibility of a tea estate is vested on the Manager. He is the head of the estate. He is assisted by 2/3 Assistant Manager. The Assistant Manager are given separate responsibility such as production and supervision of garden and labours, financial affairs, stock and factory etc. each garden has a office in which there is a head clerk called "Borobabu" and he is assisted by some clerks and peon. Social services provided to its employees by hospitals urn by qualified medical officer and staff. Most of gardens have their ambulances to carry serious patient to for better treatment outside the gardens.

A major part is playing in the economy of the district by tea. It provides ample employment to the people of the state

Now a day, many youths of the district have come forward to grow tea in their own lands. Which provide job and also earn income.

Tea Industry in Jorhat District : The cultivation of tea in extensive scale started in 1830 by the then East India Company. As a result Tokolai Tea Research station was established at Jorhat in 1911. The industry is running in full scale with modern machines and earning handsome revenue. With the establishment of the Guwahati Tea Auction Centre in 1970 the industry spreads to a great extent even to the rural areas all over the district. It employs a large number of workforce and also paves the way to the growth of many ancillary industries like plywood industry etc. Fertiliser industry is occupying a major hold in matters relating to the full growth of tea plants. The rampant growth of small tea growers in nook and corner of the district has led the young educated persons to eke out means to earn their livelihood. There are1,059 tea gardens in undivided Sibsagar district which comprised tea cultivation in 62,751 hectares of land having a total production of 118,548 thousand kgs in 1998 as per information given in Statistical Handbook, 2000. In Jorhat district, there are 64 small growers under whom 301.2 hectares land have been registered as on 1999.

Irrigation: The district enjoys heavy rainfall during the summer season every year. Almost a large chunk of cultivators in the district depends on rain-water upto 31.3.99 irrigation potential of 12151 hectares of land area in the district has been recorded. In 1997-98 irrigation potential utilized is 473.00 hectares for Kharif and 77.60 hectares for Rabi and pre-Kharif combined. In 1998-99 target of minor irrigation was 80 of which only 15 minor irrigation was achieved as per the statement of Chief Engineer Irrigation Department, Assam, Guwahati.

Animal Husbandry and Veterinary : As per Livestock Census 1997 the district has plenty of livestock. They are reared by the households. Cattle and goats are almost common to the household. Besides these two species buffaloes, sheep, pigs, horses, fowls and ducks are found in large numbers. Rice fields after harvesting serve as the common grazing ground for the domestic animals and they are properly kept during nighttime under sheds.

The following table gives the accurate figures of livestock in the district as per 1997 livestock Census conducted under the auspices of State Government, Assam.

Table-2

Sl. No.	Livestock & Poultry	Number
1	2	3
1	Cattle	452,182
2	Buffalo	46,138
3	Sheep	190
4	Goats	105,243
5	Pigs	81,361
6	Horses & Ponies	1,400
7	Fowls	588,451
8	Ducks	458,522

Fisheries : Pisciculture is becoming popular among all sections of the society. The demand of fishes has gone up with the increase of population. As a result cost price has becomc alarmingly high which gives a feel to promote pisciculture to a great extent. The general areas which are found to be favourable for fish are bed, river, swamp, forest direct, pond and tank etc. These are mostly found extensively on the southern bank of the river Brahmaputra and in Majuli. Fishes of bigger and smaller varieties are found. Catching and selling fish an commercial basis was confined to a particular class of people known as Namasudra or Kaibartta popularly called 'Dom' in local language. Fisheries exclusively belong to the Govt. as State property yield. Sizeable revenue per year by leasing in the highest bidder.

Government has been advancing a lucrative plan along with granting of loan from the chartered Banks to the educated unemployed youths. Also the Govt. is sponsoring an ambitious plan to supply fish seed. In 1998-99 the Govt. achievement in this direction rose to 9.98 millions against the target of 5.00 m.

Industries : Assam can boast of having the adequate resources of high potential for development of industries. But Assam is lagging far behind in matters of industrialization. Pace of development is very slow to augment the total resources. Jorhat district is no exception to it. The slow progress of industiralisation may be attributed to variety of factors. Inadequate economic and basic infrastructural facilities coupled with lack of entrepreneurial motivation, low level of Central sector investment, shyness in the flow of outside capital etc. are the factors that contribute to slow progress.

On the other hand various cottage industries run at the village level formed an inalienable part of Assamese culture. Jorhat district once happened to be the last capital of Ahom monarchy village indus-

tries flourished to a great extent. The names of certain villages bear ample testimony to the faculty pursued by people of village Kamar Gaon, Potia gaon, Kumar gaon, Japisajia, Sonari gaon, Konhar gaon are the names after the habitation of artisans such as black smith, mat makers, potters, Japi makers, goldsmith and bell-metal workers respectively. Unfortunately all these industries are facing extinction and as a result people keep on changing their age-old occupation.

To put a halt to this decay and discontinuation of these rich heritage one Industrial Estate has been opened to provide infrastructural facilities to the local people. The ambitious plan run at the behest of the State Govt. has proved to be more beneficial to the people to eke out their livelihood and sustain these industries.

Tea industry is one and only major and heavy industry of the district. The economy of the district has been determined by this ever growing tea industry. A large number of workers is getting employment in it. Side by side many ancillary industries such as plywood industry have sprung up in the vicinity of Mariani town about 20 kms from Jorhat town.

A close look at the following table will give the accurate industrial position run on registered basis in the district as medium scale as per the report of District Statistical Handbook, 2000.

Table-3

Sl No	Type of Industry	Number
1	2	3
1	Manufacture of food products	78
2	Manufacture of Beverage, Tobacco & Tobacco products	1
3	Manufacture of Textile products	1
4	Manufacture of wood and wood products, furniture & fixtures	29
5	Manufacture of Paper & Paper products, Printing, Publishing & allied products	6
6	Manufacture of Rubber, plastic, Petroleum and coal products	1
7	Manufacture of Chemical & Chemical products except Petroleum and Coal products	1
8	Manufacture of non-metallic Mineral products	73
9	Basic Metal of Alloy industries	3
10	Manufacture of Metal products and parts except machinery & transport equipments	3
11	Manufacture of Machinery, Machine tools and parts except electrical machinery	1
12	Electricity	2
13	Gas and Steam	1
14	Education of Scientific and Research services	2
15	Repair services	8

Tenancy : The relationship between the land-lord and the tenant was regulated under the provisions of the Tenancy Act since 1929. After abolition of Zamindary system few more acts were enacted. The Assam Tenancy Act, 1971 is now in force in the district. Summarily the salient features of the Act are as under.

1.Share croppers are treated as tenants.

2.Right of occupancy accrues on occupation of cropland for 3 years instead of 12 years.

3.The Govt. is the virtual towns of land.

4.Illegally ejected tenants are restored through Revenue Courts.

5.A limited right to mortgage has been given to non-occupancy tenants to obtain credit from the recognised financial institutions for agriculture whereas the occupancy tenants has been given permanent heritable and transferable right of use and occupancy in the land of his holiday.**Trade and Commerce :** The inter-dependence of countries, states and places leads to the growth of trade and commerce. No area is self sufficient. Jorhat being the Head quarter of the district has occupied the prime centre to carry out trade and commerce with the adjoining districts and beyond Assam. The district HQ is well-connected by air, rail and roadways. Also the Nimatighat on the river Brahmaputra at about 12 kms. away from the district HQ is an added facility enjoyed by the district. It has been observed that urban population takes the lead in trade and commerce. Another important thing noticed in the present day context is that all have shunned the old order. In the past the trade was carried out by a particular section of the society.

Economic infrastructure :

Banking and Finance : There was a time when private money lenders played an important role in lending credit to the needy people. In recent years Banks have come out valiantly with people-oriented plans and programmes to extend all financial help and co-operation in the tune of credit loans at a much cheaper rate of interest. The system gets overwhelming response from the traders and businessmen.

As on December 1999 there were 61 scheduled commercial Banks in the district with a total deposit of Rs. 45916 lakhs of deposit and Rs. 1,1483 lakhs of credits. There were 17 Scheduled Regional Banks with Rs. 2,906 lakhs of deposit and Rs. 692 lakhs of credit.

Transport and communication :

Transport and communication facilities are the prerequisite for development of a particular area economically, culturally and commercially. It is viewed with concern when the factors responsible for interdependence are taken into consideration. The pace of development in this direction has transformed the world into a global village. The old outdated slow moving means have been pushed to the corner and in its place rail, road and air services have brought in tremendous change by saving much of the time required to in olden days. The road transport facilities have been provided by both public and Private Sector organizations. The Assam State Road Transport Corporation is the only public Sector Transport in the district. This sector provides passenger and goods traffic services in some selected routes. The Private Sector transports are found in large number which touch every nook and corner of the district.

The railway transport run purely by the government at the Centre touches the main places in the tune of passenger and good traffic.

The navigational facility once existed in the district is now basically at its low, it is due probably to the rise of the river bed of the mighty Brahmaputra river. The Inland water transport Corporation presently operating between Neamatighat and Kamalabari connecting the one and only river island Majuli subdivision can do a lot of service by excavating the river bed for smooth sailing of ships as was once done earlier.

Jorhat is fortunate to have an aerodrome at Rowriah not too far from the district HQ town. Regular air services are run by the Indian Airlines Authority under the Ministry of Civil Aviation.

The absolute numbers of means of road transport operating in the district are obtained from the District Statistical Handbook, 2000 for the period 1998-99.

Table-4

Trucks	Light commercial vehicle (goods)	Bus	Omni Bus	Taxis	Auto Rickshaw	Two wheeler	Car	Jeep	Tractor	Trailor	Crane
1	2	3	4	5	6	7	8	9	10	11	12
2,642	812	505	11	639	822	24,060	9101	2,407	1,644	2,126	3

The trend of possessing vehicles above has been increasing day by day. People keep marketing vehicles operated by motors in lieu of vehicles operated by man. Jorhat was once famous for having the largest number of Bi-cycles in India. It has changed a lot and shifted to motor vehicles.

The road length existed as in 1997-98 is shown below in a tabular form.

Table-5

Sl. No.	Category	Road length (in km.)
1	National Highway	58
2	State Highway	151
3	PWD Roads	1,509
4	Road length per lakh of population	197
5	Road length per sq. km. of geographical area	60.2

Water ways : The mighty river Brahmaputra has divided the two sub-divisions of the district – Majuli and Jorhat sub-divisions. The other rivers in the district are the tributaries of the Brahmaputra. These rivers provided ample facility of navigation. The old facility of regularly running of steamers has become impossible due to the heavy deposit of stills on the riverbed. Now-a-days ferry services are there to cross the river. There is scope for revival of the old water ways on the river which will go a long way to economize transshipment of goods from far off lands.

Power and Electricity : It is no denying a fact that in today's world of advanced science and technology the development of agriculture and industry without power and electricity is quite unconceivable. In the particular reference to agriculture Jorhat district is occupying an enviable position as being the surplus rice growing district in Assam. To boost up the production of agricultural products the supply of power and electricity is to be made sufficiently available which will augment mechanized farming with positive results. This will improve and bring high level of

result-oriented industries culminating employment of a large number unemployed promising youths in the district. Jorhat, as on 2001 Census, has 787 villages of which 66 are no population villages. As many as 53 population villages have been registered in the Majuli subdivision alone As per report of the Assam State Electricity Board, Assam, 615 villages are electrified as on 31st March, 99

Economic Development

From various accounts of information it is evident that the Jorhat district is mainly an agricultural one and the impact of an agricultural economy is explicitly revealed in all directions. As per the Census Report 1991, about 28.3% of males and 19.0% females are engaged in primary sector as main workers where as the same in secondary sector is 3 6% and 0.6% and in tertiary 14.2% and 1.9% respectively for males and females.

The following table shows the district wise percentage of main workers for both males and females in different sectors of the economy.

Table-6

Source Census of India 1991 Primary Census Abstract

The Gross Domestic Product at factory cost during the year 1994-95 for the district is estimated about Rs. 65,503 lakhs in which the share of primary sector is 37.6% and of secondary is 19.3% and 43 1 from tertiary sector.

The per capita income (GDP)is recorded at Rs 6955 per annum. The data on GDP from different sectors of all districts and estimates of per capita GDP for males and females are presented in the following table.

Table-7

District-wise Gross Domestic Product at factory cost and Per Capita GDP by Sex- 1994-95

Note· * Col No 7and 8 are calculated on the basis sector-wise GDP in 1994-95 and sex-wise no of persons employed in each sector in 1991 Total GDP for males and females are estimated first on the basis of no of males and females employed in each sector and this total GDP is distributed among all males and females to arrive at per capita GDP

Source 1 Directorate of Economics and Statistics, Government of Assam,
2. Census of India PCA 1991 Assam

As can be seen in the above table that Jorhat is not in a better position in terms of per capita GDP as compared to some other districts like Sibsagar, Dibrugarh etc. The per capita GDP in Jorhat district is Rs. 6955.00 which is slightly higher than the state average Rs. 6816.00. However gender disparity is also visible where one can see the large gap between per capita GDP between males and females which is Rs. 11314.00 for males and Rs. 3359.00 for females.

Char Areas: Char areas are formed by the rivers either at the heart of the river or on its edges. Sedimentation of stills carried by the river on its course which gets deposited carving as highland on the heart of the river creates a vast landmass is called 'Char'. In Majuli sub-division alone can be seen huge number of Chars in the district. The Char areas are most fertile to carry out agriculture particularly in winter season when the flood water recedes. The river changes its course creating Char areas. So the Char areas become a hunting ground of those who have lost their heaths and hearths owing to erosion and pave ways for permanent settlement.

In view of the large settlements in Chars areas from Sadiya to Dhubri the Govt. of Assam has created a new Department as Directorate of Char development to look into the Welfare of such people residing in Char Areas.

General Administration

The administration of the district lies solely with the Deputy Commissioner. The sub divisional officer although heading the subdivision is subjected to discharge duties under the direct control of the Deputy Commissioner. The Deputy Commissioner is to regulate all the activities of the district including the Revenue. He is generally assisted by a band of officers called as, in order of preference. Addl. Deputy Commissioners, Sub-divisional Officers, Circle officers, Mauzadars etc. The district has two sub-divisions, five revenue circles.

Development : Development in all respects and cohesive efforts of all concerned. It is a myth in the truest sense of the term. Viewed from that angle Jorhat district has decentralized the development works by creating 2 Mohkuma Parishads, 5 revenue circles, 8 Development Blocks and under it III Gaon Panchayats at the grass-root level. Besides these there are one Municipal Board, two Town Committees to manage the Developmental works in the urban areas. Moreover, to render safety and security of life and property there are 10 full-fledged Police Stations with equal number of Police Outposts to address the situations speedily. The Government is flouting necessary funds to the district besides the Local Area Funds earmarked to each of the MPs and MLAs various departments such as PWD, irrigation, Health, Education, Supply, Transport and Communication etc. are rendering their services to keep the free-flow of developmental activities under their purview.

Local self-Government : The tidbits of the ongoing present system of Local self-government are borrowed from the British Administration which may be traced in the principle of local taxation embodied in Regulation 13 of 1813. Namghar served the purpose of local self-government in the village from the days of yore. Panchayats made its appearance as Local Boards in 1882. The abolition of Local Boards is the result of introduction of the Assam Panchayat Raj System starts functioning in Assam. Again in 1972 the three-tier system has been squeezed to two-tier system. As on 31.3.2000 there are III Gaon Panchayats and 2 Mahkuma Parishads in rural areas.

The management and implementation of various development schemes has become the business of the elected bodies. Generally Municipal Board and the Town Committee have to look after urban areas and its components while the Gaon Panchayat for the rural areas. In case of MB and TC one Chairman one Vice-Chairman each is heading the administration. The Principal sources of revenue in both the cases are tax on holidays, rickshaws, Bi-cycle, stalls, Open space, markets, Cinema houses, etc. Also they receive grants from the government. The specified areas of their expenditures relate to construction and repairing of roads and bridges, sanitation, fire brigade, supply of potable water, lighting of roads and parks etc.

Autonomous District Council : Such councils are conspicuous by its absence in Jorhat district.

Law and Order : The maintenance of law and order is the principal duty of the District Administration. The Deputy Commissioner is the sole authority in the district. He is being assisted by his subordinate civil officers and police officers.

The root cause of unlawful activities that are increasing everyday is the poor level of economic condition and high level of affluent financial standing to enjoy everything out of the ways. Summarily the reasons may be attributed to the following situations.

1.Urbanization and industrialization

2.Rising of standard of living.

3.Growing unemployment and frustration

4.Selfish and ego-centric attitude.

The days are fast changing compared to the remote past and is fomenting feeling of insecurity and fear in every walks of life. The incidence of unlawful activities are on the rise in such a pace that the time is not far when there remains none to be frustrated upon. The days of the Ahom Rule remind us of the way as to how they had handled the cases with a firm hand with the result that no one could venture to do servile deeds.

Table below gives the picture of cases of crimes in the district in 1998 vis-à-vis conviction against each type of crime.

Table – 9

Cases of crime and conviction in Jorhat – 1998.

Sl. No.	Cases of crime	Cases of crime reported	Cases convicted	Remarks
1	2	3	4	5
1	Murder	49	9	
2	Rape	26	2	
3	Kidnapping	63	15	
4	Dacoity	5	-	
5	Robbery	54	2	
6	Burglary	97	2	
7	Riot	55	3	
8	Cheating	17	1	
9	Thief	276	10	
	Total	622	44	

Source Addl Director of Police (CID), Govt of Assam

But the juvenile delinquency in Jorhat district as per report, 1998, is negligible. The cases of kidnapping registered to be three which vied with the state total.

Accidents : Road accidents as reported by Police authority for the year 1999 in case of Jorhat district rose to 60 on the National Highway. Figures of accidents an other roads are reported nil for 1999. Of the accidents 30 numbers succumbed to death and 66 were injured.

Health and Family Welfare : In the remote past Ayurvedic treatment was practiced extensively. A few cases of vedic mantras and tantras were in Operation for treatment of patient. Now-a-days Ayurvedic treatment has been gaining much popular acceptance. Govt. has recognised such treatment and is running Ayurvedic Colleges in the State. A good number of physicians under Ayurvedic discipline has come out completing their education.

In the field of modern medical sciences, there are 8 Hospitals, 24 Primary Health Centres, 10 Dispensaries and 6 Rural Family Planning Centres covering the entire Jorhat district. These are run by the State Govt. of Assam under the management of the Department. of Health and Family Welfare. Besides these managements of the tea gardens are running hospitals facilities to treat their tea garden families.

The important diseases of the district are dysentery, diarrhea, cholera, pulmonic, affection, rheumatism, malaria, cancer, tuberculosis, kalazar which claimed a heavy toll of lives mostly in the rural areas has been totally brought under control.

In Family Welfare front the district is not lagging behind other districts in the state. As per report published in 1998-99 the district has carried out 6 vasectomy, 775 tubectomy, 2,579 copper 'T', 141,168 condoms among people who volunteered to accept such methods. People are now aware of the small family norm.

Registration of births and deaths becomes compulsory and the govt. at the centre is handling the same under broad heading of Civil Registration. The publicity in this respect has been vigorously carried out. Viewed from the low turn out of registration it can well be attributed that the rural areas are not much concerned about it.

****

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household

then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the houscholds.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household

Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing

so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc.; are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo
9 Kaibartta
10 Lalbagi
11 Mahara
12 Methar,Bhangi
13 Muchi, Rishi
14 Namasudra
15 Patni
16 Sutradhar

Scheduled Tribes :

4 Hojai

5 Kachari, Sonwal

6 Lalung

7 Mech

8 Miri

9 Rabha

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic

characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the In-

dian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a

measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course

that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally

Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 999,221 in 2001 Census. Male comprises 517,015 while female consists of 482,206. Out of the total population of the district, 827,901fall under rural and 171,320 are under urban areas of the district. In rural areas 425,830 and 402,071 are males and female respectively. Accordingly 91,185 and 80,135 are males and females respectively in urban of the district. The percentage of urban population in the district Jorhat is only 17.15. The district is a rural base place in which 83 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +19.4 which is higher than the state rate. In the district, there are only 7 towns . Jorhat town is only town with Municipal Board and one town is with Town Committee status and Five Census Town. The density of the district is 350 persons per sq. kms. which is higher than the state density (340). The sex ratio in the district is 933 as against 935 in the State. Out of total population of the district, 41.5% is total workers of which 52.6% and 29.5 % are male and female respectively. The percentage of non- workers is 58.5% in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 37.8 %, 7.8%, 4.2% and 50.1% respectively.

The literacy rate is 76.3% in the district of which 83.6% is for males and 68.5% is for females. The district literacy rate is above the state literacy rate (63.3)%.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

****

Inset Tables Based on Primary Census Abstract :-

TABLE : 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

5	Titabor	231,590	210,588	21,002	260,738	232196	28542	12 6	10 3	35 9	9 1	10 9
District Total:		**871,206**	**738,174**	**133,032**	**999,221**	**827,901**	**171,320**	**14.7**	**12.2**	**28.8**	**15.3**	**17.1**

As per Census of India 2001, the total population of Jorhat District is 999,221 with 171,320 in urban 827,901 in rural area. Titabor Revenue Circle is the biggest Circle with 260,738 population and Majuli Revenue Circle with 153,400 population is at the bottom of the list of Revenue Circle. Decadal variation of population in 1991-2001 in the district is 14 7 which is much lower than the state rate of 18 9 The growth rate of population among Revenue Circles is higher in Jorhat West Revenue Circle but it is seen that the growth rate is found lowest in Titabor and Majuli Revenue Circles with 12.6 and 13.3 respectively

Out of total villages of the district, the number of inhabited villages is 787 which are located in 8 CD Blocks. In the District, Titabar CD Block has the highest 151,535 population. On population basis; Jorhat East CD Block with 48,735 population is the smallest CD Block in the district The highest numbers of inhabited villages 149 are under Titabar CD Block. Jorhat East CD Block records the lowest number 35 inhabited villages. The highest number of inhabited villages 236 or 30.0 percent is noticed in the population range of 1,000-1,999 followed by 227 or 28.8 percent in the population range of 500-999. However there are 5villages having population in the range of 5,000-9999. In the district there is no large village having 10,000 + population.

TABLE : 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of town
(a) New	
(i) Statutory town	Nil
1	
2	
3	
(ii) Census town	
1 Titabar Town	
2	
3	
4	
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	
1	Nil
2	
3	
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	
1	Nil
2	
3	
(iii) Census towns of 1991 census are notified as statutory town in 2001 census	
1	Nil
2	
3	
(c) Declassified	Nil
1	
2	
3	
(d) Wholly merged with other town(s)	Nil
1	
2	
3	

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

In the district there is no any change in categories mentioned in the table during 2001 Census

TABLE : 4
DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	20	2 5	7,230	0 9
11-20	13	1 7	1,218	0 1
21-50	31	3 9	3,336	0 4
51-100	33	4 2	7,851	0 9
101-200	76	9 7	41,675	5 0
201-300	119	15.1	91,801	11 1
301-500	245	31.1	263,744	31 9
501 +	250	31 8	411,046	49 6
Not known	0	0 0	0	0 0
District Total:	**787**	**100.0**	**827,901**	**100.0**

Population Density (Rural) of the district: 376.1

Out of 827,901 rural population of the district, 411,046 or 49.6 percent population hailing from 250 villages live in these villages where population density is 501+ per square kilometer. In the range of population density 0-10 (per sq. km), there is 20 villages having 7,230 population. 13 villages with 1,218 population have density in the range of 11-20. Detail can be seen in the table itself.

TABLE : 5
SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			Jorhat		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	888	893	568
1911	915	923	626	889	896	622
1921	895	906	613	891	898	618
1931	874	885	574	875	884	592
1941	875	886	605	876	887	589
1951	868	878	663	870	880	637
1961	869	887	661	859	878	605
1971	896	912	744	886	910	739
1981	—	—	—	-	-	-
1991	923	934	838	913	928	829
2001	935	944	872	933	944	879

Note Sex ratio has been defined here as the number of females per 1000 males

Sex ratio in the State has improved both in rural and urban areas during the last decade. It increases from 923 in 1991 to 935 in 2001. The sex ratio in the district during the Census of India 2001 follows the same trend and as a result it increases from 913 in 1991 to 933 in 2001. At rural level the sex ratio is noticed that it increases to 944 in 2001 from 928 in 1991 and similarly in urban it increases from 829 in 1991 to 879 in 2001 in the district respectively.

TABLE : 6
SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Majuli	930	930	
2	Jorhat West	927	928	925
3	Jorhat East	899	943	874
4	Teok	954	954	
5	Titabor	944	957	850
	District Total:	**933**	**944**	**879**

Out of 5 Revenue Circles of the district these are three urban units located in Jorhat West, Jorhat East and Titabor Revenue Circle respectively. Among 5 Revenue Circles, sex ratio of three Revenue Circles are lower than the sex ratio of the District. Teok Revenue Circle with 954 females per 1000 males is top in the list of circles in sex ratio while Jorhat East Revenue Circle shows the lowest sex ratio of 899. Urban wise sex ratio in Jorhat East Revenue Circle is the highest with 925

TABLE 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D Block	Sex ratio
1	2	3
1	Majuli	918
2	Ujani Majuli	949
3	Jorhat North West	952
4	Jorhat	934
5	Kalapani	958
6	Jorhat Central	960
7	Jorhat East	932
8	Titabar	947
	District (Rural) Total:	**944**

At CD Block level, Jorhat Central CD Block has the highest sex ratio of 960 among the CD Blocks of the district. It is higher than the district rural sex ratio of 944. Majuli CD Block has recorded the lowest 918 females against 1000 males among all C D Blocks of the district. Sex ratio in five CD Blocks are higher than the district sex ratio while the sex ratio of the other CD Blocks are lower than the district level rural sex ratio

TABLE : 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	37	4.7	15,910	1.9
700-749	12	1.5	5,433	0.7
750-799	13	1.7	3,670	0.4
800-849	32	4.1	31,560	3.8
850-899	87	11.1	69,624	8.4
900-949	202	25.7	269,431	32.5
950-999	214	27.2	273,238	33.0
1000-1099	172	21.9	154,509	18.7
1100+	18	2.3	4,526	0.5
District Total:	**787**	**100.0**	**827,901**	**100.0**
Sex ratio (Rural) for District:			**944**	

The sex ratio at village level by range, it is found that most of the villages are having sex ratio of 900+. Out of 787 inhabited villages in the district, 602 villages come under the sex ratio range of 900+, 37 villages record sex ratio below 700 while 12 villages come under sex ratio range of 700-749. In about 190 villages, females are found more than males.

TABLE: 9
SEX RATIO OF URBAN AGGLOMERATIONS/ TOWNS, 2001

Serial number	Name of U.A / Town	Urban status of town	Sex ratio
1	2	3	4
1	(a) Jorhat (MB+OG)		873
2	Naubaisa Gaon (CT)	CT	948
3	(d) Senchoa Gaon (CT)	CT	962
4	(i) Jorhat (MB)	MB	852
5	(b) Kumar Kaibarta Gaon (CT)	CT	908
6	(c) Chekonidhara (CT)	CT	987
7	Mariani (TC)	TC	865
8	Titabor Town (CT)	CT	812
	Sex ratio (Urban) for the district:		**879**

Urban sex ratio of the district as per Census of India 2001 is 879. Out of 8 towns of the district Jorhat MB and Jorhat MB+ OG are shown separately. Chekonidhara. CT has shown the highest 987 sex ratio in the district. The other towns have been recorded different sex ratio where there is no any similarity at all which can be seen in the table

TABLE :10

Out of the district total population, there are 660,591 literate persons which constitute 76.3 percent. Male literacy rate is 83.6 percent which is found to be higher than female literacy of 68.5 percent. This same trend is noticed both in rural and urban areas of the district for males and females. The rural literates population of the district is 527,679 and the percentage of literates is 74.1 percent. However, in urban area the total literate population is 132,912 and the literacy rate is recorded 86.9 percent. Among the Revenue Circles in the District, Jorhat East Revenue Circle records higher literacy rate with 86.9 percent and the lowest among the Revenue Circle is in Titabor Revenue Circle with 71.5 percent.

In case of urban area, however, literacy rate is the highest in urban locality of Jorhat West Revenue Circle with 89.0. The distribution of number of literates and illiterates by sex in all Revenue Circles are shown in the table along with percentage of literates and gap in male /female literacy rate which can be seen in the table.

Note Percent of Worker to total worker are given in brackets

Economic activity of the rural people of Jorhat district is shown in the table in four different categories of workers. Out of 354,952 total number of workers in the rural of the District, large number of persons take Cultivation as Main work and thus constitutes 42.9 percent followed by Other workers with 42.5. The percentage workers in these two categories of workers are almost equal. The other category of workers, Agricultural labourers record 9.0 percent. There are few people in the district who took Household Industry either as Main work or as Marginal work and the percentage of such workers shows 4.6 percent. The male workers in cultivation are more than the female workers in terms of absolute figures and but in case of percentage, the female worker's percentage are more than males in Cultivation, Agricultural Labourers and Household Industry. In all 8 CD Blocks of the District, people are found to be engaged in all four categories of work but largely in Cultivation and Other works

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outsidthe premises it is considered as having access to 'Improved drinking water source However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

In rural of Jorhat District, the types of amenities available in the village are mostly Education, Improved Drinking water and power supply. The other amenities availed by villages are less in comparison to these three amenities. Out of 787 inhabited villages in the District, 91.1 percent or 717 villages are having access to education and 94.2 percent or 741 villages in the District are having access to Improved Drinking Water. 82.6 percent or 650 villages are having access to electricity. However, 56.3 percent of villages are having access to approach by Pucca Road facilities and 52.6 percent of villages are having access to Transport Communication facilities in the District. Most of the villages are not having access to Medical facilities, out of 787 villages only 215 villages or 27.3 percent recorded as having access to Medical amenities. Very few villages are having Post Office and Telephone facilities with only 28.7 percent and 17.5 percent respectively. The other amenities like Banks and Agricultural Credit Societies are available only in few villages of the district. The percentage of villages recorded as 5.5 percent against having access to Banks and 9.3 villages are having access to Agricultural Credit Societies. Some amenities like Agricultural Credit Societies is not available in villages of some CD Blocks of the District.

District Total		787	220,122	73 2	1 6

Note Cultivable area = irrigated area + unirrigated area

The distribution of number of villages, total area, percentage of cultivable area and percentage of irrigated area among CD Blocks are shown in the table Out of total rural area of 220,122 hectares, 70 0 percent land is cultivable land and 1 6 percent is irrigated land Among the CD Blocks 80 4 percent cultivable land being the highest is noticed in Titabor CD Block The highest 5 4 percent irrigated area is in Ujani Majuli CD Block followed by Majuli CD Block with 3 8 percent in the District

TABLE : 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. no.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Jorhat (MB+OG)	3 2	0	3 2	10 4	2 2	5 2	2 1	0	0.8
2	III Mariani (TC)	8 4	3 1	5 3	0	0	0	0	0	0
District Total		**4**	**0.5**	**3.5**	**8.9**	**1.9**	**4.5**	**1.8**	**0**	**0.7**

The Municipality Finance of the statutory town shows that per capita receipt is Rs 4.0 for urban area of the District while per capita expenditure is Rs 8.9 which is lower than per capita income. Per capita income is higher in proportion in Mariani TC than Jorhat MB+OG and per capita expenditure is not shown against Mariani TC

TABLE : 44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Jorhat (MB+OG)	2 2	0.9	0 9	0 2	0.7
2	Mariani (TC)	1	0.5	0	0	0
District Total		**2**	**0.8**	**0.8**	**0.1**	**0.4**

In average the number of Primary school in towns of the district is 2.0 per 10,000 population and 0.8 is Junior Secondary/Middle school. Only 0.8 number Secondary/Matriculation schools per 10,000 population are in the district. The Senior Secondary and Colleges are recorded 0.1 and 0.4 number respectively in urban areas in the district per 10,000 population. However, the number of primary school is more in Jorhat than other town of the district

TABLE : 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl.no.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Chekonidhara(CT)	0
2	Jorhat(MB+OG)	49
3	Kumar Kaibarta Gaon(CT)	0
4	Mariani(TC)	48
5	Naubaisa Goan(CT)	0
6	Senchoa Gaon(CT)	628
7	Titabor Town(CT)	24
District Total		**55**

In average the number of beds in medical institutions in the urban areas of the district is 55 per 10,000 population. Senchoa Gaon CT with 628 beds is higher in number to other towns followed by Jorhat (MB+OG) with 49 beds per 10,000 population. In Senchoa Gaon CT, the Civil Hospital of Jorhat is located and hence the number of beds per 10,000 population in this CT becomes more.

TABLE : 46
PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Sl no	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	JORHAT M B	67,588	2820	4 2
2	MARIANI T C	20,997	785	3.7
District Total		**88,585**	**3605**	**4.1**

The table 46 gives the proportion of slum population in statutory towns. Out of the total district urban population of statutory towns, 3,605 persons live in slum area. In Jorhat MB there is 2,820 slum population while 785 slum persons is found in Mariani TC.

TABLE : 47
MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl no	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Chekonidhara (CT)	Nil	Nil
		Nil	Nil
		Nil	Nil
2	Jorhat (MB+OG)	Tea	Tea
		Cable	Candle
		Rice Product	Biscuits
3	Kumar Kaibarta Gaon (CT)	Nil	Nil
		Nil	Nil
		Nil	Nil
4	Mariani (TC)	Nil	Tea
		Nil	Nil
		Nil	Nil
5	Naubaisa Goan (CT)	Nil	Nil
		Nil	Nil
		Nil	Nil
6	Senchoa Gaon (CT)	Nil	Nil
		Nil	Nil
		Nil	Nil
7	Titabor Town (CT)	Cable	Betelnut
		Atta	Wire
		Biscuits	Rice

The most important commodity exported out of and manufactured in towns are shown in the table along with the name of commodities No item is manufactured by five towns. The items manufactured by two towns are namely Tea, Cable wire, Rice product, Atta and Biscuit Same towns export some commodities name of which can seen in the table

The table indicates the number of households who have availed banking services and the number of households having some specified assets that shown in the table. Out of the total households of the district, 68,287 households have availed banking service. The banking service availed by the households in the district is more in rural areas. It is only 23,778 households in urban areas of the district who availed banking facility.. In Revenue Circle level, the banking services availed by the households are found more in Jorhat East Revenue Circle than other Revenue Circles. More households in Jorhat East Revenue Circle have assets like Television, Telephone and car, Jeep etc. Radio and Bicycle. The highest number of households having Radio and Bicycle are found in Titabor Revenue Circle.

****

(ix) Major social and cultural events, natural and administrative developments and significant activities during the decades.

The old records reveals that Jorhat district was one of the most advance place in culture from the days of yore. Seeing the importance of place in the year 1794, the Ahom King had shifted its capital from Gargaon to Jorhat. As a result of shifting of capital to Jorhat, the Ahom administration had developed the area from all aspects. The Ahom king had started performing Bihu festivals in large manner and was enjoyed by the king and from that time Bihus are observing with much enthusiasm in all over Assam more particularly in Upper Assam. These Bihus are performed in the fields of the villages in the past but now it has started to perform in the common stage of towns/villages with much pomp and rejoicing. The Bihu are of three kinds-these are (i) Magh or Bhogali Bihu, (ii) Bohag or Rongali Bihu and (iii) Kati or Kangali Bihu.

The Magh Bihu is performed to celebrate the harvesting of grain. It is usually observed on the 14th and 15th of January of every year. It is called Bhogali as the people after collection of their products, become rich in grains and can prepare various kinds of traditional dishes. The Rongali Bihu is a spring festival of dance and music. It is held at a time when nature blossoms in light, beauty and green colour. Bihu festival provide for looking after the domestic cattle. Cows and bulls are taken to river and they are given a good wash and put garlands made of brinjal and others and pray for their good health. Kati or Kangali Bihu is not very much important festival. It is a festival of welcoming Lakshmi, the Goddess of wealth and prosperity. This Bihu is in the time when granary is empty of each farmers hence it is called Kangali Bihu.

Bihu songs and dances are the expression of genuine folk joy. Being spring festival rains bring the earth to a state of fertility. In this season earth is ready to take seeds. sown for cultivation. The Bihu dances are a kind of fertility ritual having emotional instincts of the heart. The dances depict the exuberance of youth. The songs and dances are the expressions of amorous feelings. Hence these are a way of expressing preponderance of romance and sex. Bihu festivals which performing in Jorhat district are getting more importance year after year.

In addition of Bihu festivals there are various other socially important functions which are performed by the people of Jorhat district. Bhaona which was introduced by Shri Shri Sankardeva founder of Vaisnavite religion has very much prevalence in Jorhat district. It is performed in Namghar of the villages/towns. The chief character in a Bhaona is the Sutradhar. The acts as the narrator and the director. The Bhaona is a media used by Sankardev for propagation of his Bhakti movement among the people. Rash Utsav of Majuli is famous which is performed in all Satras of Majuli. This Utsav crosses 104 year from its very beginning. The other festivals which are observed all over Jorhat district with much joy and enthusiasm are Durga Puja, Dol Jatra, Janmastami, Biswa Karma Puja, Sarswati Puja, Lakshmi Puja etc. Muslims also celebrate their own festivals in various places of district.

The Regional Research Laboratory, the Tea Research Centre, the Engineering College, the Assam Agricultural University, the Central Office of the Asom Sahitya Sabha and some other cultural organizations have made Jorhat as an educational as well as cultural centre.

The administrative development has come up in big way after the creation of Jorhat as a separate district from old Sivsagar district. Being a district all administrative offices are established in the district at the time of its creation. No such important development has taken place during the last decade. A few new buildings for administrative purpose are constructed during the decade. The significant activities can be mentioned about the development of roads in Jorhat town and its neighboring areas and plying of new trains from Guwahati to Jorhat town.

(x) Brief description of places of religious, historical or archaeological importance and places of tourist interest in the district :

Jorhat was once the capital of the chequered Ahom rule that enjoyed uninterrupted 600 years of Ahom kingdom. It is to be widely accepted that where there were kingly estates, the presence of religious, historical and archaeological monuments found their existence. It is a concomitant variation. From that point of view Jorhat district is no exception. As a result Ahom rules took keen interest in building temples and monasteries decorated with time tested beautiful sculptural workmanships and they dug several tanks at strategic

places keeping in mind the sustainable cool environment to preserve and protect the eco-friendly environment as well as the architectural grandeurs.

Bongalpukhuri :The tank called Pukhuri in Assamese vernacular is located on the southern fringe of the main Jorhat town. The tank can be easily traced only by the side of Na-ali which runs to Borholla via Titabor. In 1739, Bodon Borphookan, a compatriot but a rival to the Ahom monarchy, was murdered by Rupsing Bongal, an ally and royal to the Ahom king. According to one source Bodon Borphukan was taking his bath in the said take when Rupsing hurled on him and killed him. Yet another source opined that Rupsing had washed his blood stained hands and sword at the tank water dug by himself. So the tank came to be known as Bongalpukhuri.

Borpukhuri : Bor means big and 'Pukhuri' means tank. A big tank was dug during the Ahom Rule at a place near Tarajan about 3 kms. away from Jorhat town. There is a controversy over naming of the tank. Some quarter still hold the niew that the name of the tank should be Buragohain Pukhuri because the tank was dug there at his instance. Whatever it should have been passed into oblivion but caters the requirements of people living around it to a great measure.

Burhi Gosani Devalaya : In a close fight with the Jayantia king, the Ahom king made a colourful victory by defeating the former. The Ahom king brought with him the image of Burhigosani and established at Rongpur in present Sibsagar district. When the then Ahom regime was frequently perturbed with the internecine warfare, they shifted their capital to Jorhat, so they felt it imperative to shift the idol of Burhigosani to Jorhat and established in the heart of the town. The idol is believed to be the stony incarnation of Mother Goddess – Durga. The temple is still a place of devotion to people belonging to Sakti Cult.

Raja Maidam : The word 'maidam' connotes a significant meaning which explains the burial of ashes of king. So it is still to be seen on the South bank of Toklai river on the northern side of Jorhat town. It relates to the king Purandar Singha who breathed his last on 1st Oct., 1864.

Another maidam located on the bank of Toklai river near main fish market (Macharhat) of Jorhat town is seen with royal grandeur to commemorate the name of Purnananda Buragohain – the principal minister to the king. The maidam was constructed by Ruchinath Buragohain, the worthy son of late Purnananda Buragohain, in the year 1815.

Garh Ali : The word 'Garh' signifies the erection of high barricade made by pihing up of earth to block the foreign enemies to make easy entry. 'Ali' means road. Here 'Garh Ali' has historical significance. This fort-like embankment was basically erected to prevent the Moamoriahs to make easy inroads to Jorhat. This runs from Seuni ali to Nagaland hills. Moamoriahs were flabbergasted at having seen such a long barricade and make to retreat. This is, therefore, named as 'Bibudhi' (confounding) garh. Now it has become a main thoroughfare (Garh Ali) connecting Jorhat town with the easternmost part of the district.

Bilveswar Siva Temple : The name is self explanatory. It is situated at 5 kms. away towards South of Jorhat town directly on the Grand Trunk Road. The ruins of the old temple along with a tank remain to stand the strain and vagaries of nature. The erection of the temple is closely associated with the name of late Ruchinath Buragohain.

America Baptist Foreign Mission Church : Rev. S.A.D. Boggs, a Christian Baptist Missionary opened an institution for study of the Bible in 1903. The Church was located in the Rajabari Area adjacent to Jorhat town. Subsequently this institution emerged as a common prayer Hall. Besides being solely a Prayer Hall it caters study of different disciplines such as Primary, M.V. and High Schools of the tribal students. It undertook studies on art and crafts. As soon as the second world war was over it has been transformed into a full fledged Theological College.

Baduli Pukhuri : It was when the Ahom king, Jaydhwaj Singha, reigned supreme a tank was dug by one late Baduli Borphookan at a place near Teak. The tank is still there jush beside the Rurnk Road. The tank was named after Baduli Borphookan.

Borbheti : 'Borbheti' literally means big high plinth by piling up of earth similar in size to the heaps and mounds of earth. Ahom chronicles supports that during the reign of Jayadhwaj Singha the Moamaria Mahanta, Chaturbhing, ordered his disciples to bring a certain amount of earth suited to one's strength and deposit in the assigned spot to create mound (bheti) to conduct a namghar His disciples, completed with the order and made a 'bheti' which came to be known as 'Borbheti'. Main 'Namghar' was constructed on the Borbheti and side by side two small mounds lesser in height to the Borbheti were constructed to erect the residential houses of the 'Gosain' (head priest) and his brother. This is still standing on the Malow Pather on

the west of Jorhat town which dates back to the later part of 17th Century.

Dhekiakhowa Namghar : This is located not too far from the Jorhat town. Sri Sri Madhabdev after traversing the Upper Assam reign in a bid to preach Vaisnavite religion propelled by Sri Sri Sankardev as the Chief anchor happened to halt at the site of the Namghar for a couple of days. Later on a Namghar was constructed at the site to commemorate the visit of Shri Madhabdev. The Namghar now-a-days becomes a Chief attraction of the Vaisnavite disciples. It is now achieving universal patronage as a sacred place.

All Saints Church of Cinnamara : This was constructed in the year 1895 in a plot of land donated by Jorhat Tea Co. Ltd. Bishop of Calcutta took the lead in this endeavour. As ill luck would have it, the original construction got damaged accidentally on fire. In 1911 the Church was build on the same site.

Shri Shri Bor Alengi Bagi Ai Satra:

After the death of Shri Krishna Deva, Bapu Ram Deva established Letugram Satra at Kodobahi in Majuli in about 1615 A.D. But after a period of time Bhakati Bhuyan had donated a plot of land in end of the Alengi Beel to Bapuram Deva where he established the satra for which the name of the satra is called Bor Alengi Satra. Putamcharan was given the charge of the satra after the death of his father Bapuram Deva. But later on , the satra was burnt in fire and it was established newly for which it was called as Purabheti Alengi Satra. Putamcharan again shifted this satra near to the bank of Sarobar beel, the land was donated by Bhakati Bhuyan. Putamcharan was attacked by small pox and the charge of the satra was given to Krishnananda.There after, Dafalas destroyed the satra but the Ahom King Rudra Singha had defeated Dafalas and constructd the satra. But in the meantime , Krishnananda died and his adopted son , Padmapani Deva was made the incharge of the satra. Padmapani Deva married Sashi Pradha who was white and beautiful for which she was known as Bagi Ai. Bagi Ai was given birth of two sons-Ramkrishna and Param Bapu. Padmapani at his old age came to Kamjan beel of Majuli Mouza Salmara with his two sons and established Bor Alengi Bagi Ai Satra in 1735 A.D. after a few days he came back to Bora Alengi Satra and he died there. The legend says that the place where he was cremated ,was floating on water when the river Brahmaputra eroded the place Later on the place was drown at junction place of the Ganga and the Brahmaputra. After the death of the votary , many other redigious disciples were elected as Satra Adhikars and spent about two hundred years with name and fame. In 1965, due to erosion of the Brahmaputra, the satra was totally eroded into the river and this satra was transferred to Titabor of Jorhat district. At the time of transter of the satra a golden cobra was seen under the Ashana in Manikut .When the building of satra was started to demolish then the snake proceeded to Namghar But when the people tried to kill the snake it was disappeared immediately and there after it was seen at the house of Bej (Professional physician). He shoned his angry and seeking this the Satra Adhikar had prayed the snake to leave the place and immediately he disappered from the sight. At the time of loading of all belonging of temple in boat, the cobra again was seen in boat and after crossing of the Brahmaputra the cobra was seen at Nimatighat . Still to-day , the snake has been seen by the Bhaktas of the satra off and on.

At the present sight, the first Satra Adhikar was Biswa Deva and after his death, some other Adhikars took the charge of the satra. The present Adhikar is now Shri Indrakanta.

Rash Utsav festivals is elebrated in the satra with great pomp and grandeur. The craftman of making mask is still alive in the hands of few artists of the Satra.

Shri Shri Kamalabari Satra:

Kamalakanta, a great votary of Vaishnavism religion was born in 1468 saka or 1546 A.D.at a village Shakrahi of Narayanpur in Lakhimpur district . The name of his parents were Tita Chomdar and Satya Devi. He was very beautiful and possessed a great personality from his very childhood. He was known by ten different names. Among these the most popular names were Padma Kanta, Kamala Kanta, Rupdhar etc. He married Rupawati daughter of Sujya Barai Bhuyan. Before coming the bride in to the house of bridegroom, a battle was started between Chungi soldiers of hill and Ahom King. In this battle , almost all soldiers of Ahom king were killed except Padma Kanta. He by the dint of his divine power defeated the Chungi army. Seeing dead bodies of both sides he felt sad and threw all his weapons in the water of Gang Bihali river and bathed in the river . He became asceticism and he started a celibate life . Padma Kanta met the chife disciple of Shri Shri Sankar Deva, Madhab Deva . Madhab Deva took him to Madhupur of Koch Behar and was taught and given all religious philosophy to him and sent to Upper Assam for spread of Vaisnavite

religion. As Shri Madhab Deva transferred every thing to him from his heart so he was known by Badala Ata. In 1595 Saka or 1673 A.D. Ata had established Kamalabari Satra at the bank of river Chuni of Majuli island . After few years Ata had left the earth for eternal peace in 1598 Saka or 1676 A.D.

There are different opinion about the name of Satra. The satra was established in the land of Purushattam Baruah. Near to his land there was an honest man named Kamala Mudoi.Once before the start of the satra, both Mahapurushs Sankar Deva and Madhab Deva stayed about seven days at Mudoi's land. The name 'Kamalabari Satra' might had derived from the name of Kamala Mudoi. Secondly, some are of opinion that there was a garden of orange tree of Ahom king in which Kamala Mudoi was an employee. From this garden , the name of satra took place. Thirdly, while Shri Krishna robbed Rukmini, a lotus flower of Lord Krishna was fell from the above. Lotus in Assamese means Kamala and accordingly it is Kamalabari . The main reason for selecting the name 'Kamalabari' is because of Kamala Kanta who was the founder of the satra.

Uttar Kamalabari Satra, Natun Kamalabari Satra,Madhya Majuli Satra are some of the satras which are set up at Majuli from the main Kamalabari Satra. Due to erosion of the Brahmaputra, the Kamalabari Satra was shifted to Mahimabari near Titabor of Jorhat district in 1975. The present Satra Adhikar Shri Bhaba Kanta Dev Goswami is continuing as a Satra Adhikar from 1964. In the name of satra,100 bighas land has given by then Chief Minister of Assam Shri Sarat Sinha.

There are four statues of God at Kritanghar of Mahimabari which are brought from Majuli.These are (I) Bindaban Chanda (II) Chaturbhuja (III) Banshibadan and (IV) Kalia Thakur which are donated by different Ahom kings . Dasham Kritan, Mala of Tulshi (black basil), Mandiya Tal, Ghosha Ratnabali and Nam Malika given by Shri Shri Sankardeva are still in the satra. In addition to above , there are some scarce properties namely Bhagjara tray (Sarai) made of Silver, big tray of bell metal, land donated by the Ahom king (written in copper plate),etc .

From cultural side, the Kamalabari Satra is famous for its Sankari cultural. It is a main center of Satriya Nritya. Maniram Dutta Mukttar has received President Award in 1936. There are some other artists who are famous for Nat , Nritya, Bayan, etc and are awarded state level awards. In the satra, festivals such as Rash Utsav, Tithis (death anniversary) of Sankardeva, Madhabdeva and Badala Ata etc are celebrated with much joy and pomp.

Once the Ahom king has donated a colourful boat like colour and shape of peacock which can equally move in water and ground . The name of the boat is called "Mayur Pakshi"(peacock) . Now, one can see this boat at the Museum of Guwahati.

(xi) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Jorhat is very rich in agriculture and plantation of tea which are said to be the major characteristics of the district. About 70% population of the district are cultivators and live in cultivation of rice. Titabor and Borholla are two main places of the district which are well known as rice granary of Jorhat district. The first Assamese tea planter Maniram Dewan has established Cinamara as a first tea garden in Upper Assam. Jorhat district has a large number of tea gardens with factories for tea processing. A major portion of production of tea in Assam produces in Jorhat district. It is not only a source of income but also it gives ample opportunity for employment. Fish is also abundant in Jorhat district more particularly in Majuli Subdivision. Majuli Subdivision is located on the north of the river Brahmaputra. Majuli is a river island which is the largest all over world. Originally the subdivision had an areas of 1325 kms in 1901 but its comes to 880 kms in 1999. A major portion of it has lost due erosion caused by the Brahmaputra yearly. Majuli is the nerve centre of Assamese Vaisnavite religion and culture with 62 satras operating from it since long past. The most important satras among satras of Majuli are Auniati, Kamalbari, Dakshinpat, Garmua, Samaguri, Bengnati, and Alengi Satra. The other Satras of Jorhat district are Dhekiakhowa, Athakhelia, Auniati Satra of Teok, Kamalabari Satra of Mahima etc.

Jorhat the capital of Ahom Kingdom still witnesses the remains of few old relies like Raja Maidum, which was the vault of the last Ahom king Purandar Singh expired on 1st October, 1864 maidam of Kameswar Singha, the Rajmao Pukhuri, Bengal Phukhuri ect.

Jorhat district has produced many authors, scientists, saints, freedom fighters, sportsmen, artists and

social workers to the state as well as to the nation. Maniram Dewan was one of the Assamese nobleman who fought against the consolidation of British rule. Dewan planned an armed uprising in 1857. The British got scent of the preparation and hanged Maniram Dewan at a public place of Jorhat. Many people of Jorhat courted arrest and suffered humiliation during the struggle for independence. The contributions and sacrifices that offered by sons of soil of Jorhat district can never forget by the people of the district in days to come.

(xii) Scope of Village Directory and Town Directory - Column heading wise explaination and cover age of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market / hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of espective jurisdiction.

****

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B

The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.

Appendix-VIII Indicates CD Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

APPENDIX 1B - Village Directory
Villages by Primary, Middle and Secondary Schools

Serial number	Name of C D Block	Total number of inhabited villages	Type of educational institutions available			
			No School	At least one primary school and no middle school	At least one primary school and one middle school	At least one middle school and one secondary school
1	2	3	4	5	6	7
1	Majuli	114	26	25	63	26
2	Ujani Majuli	81	7	20	54	35
3	Jorhat North West	106	8	40	58	39
4	Jorhat	110	5	56	49	32
5	Kaliapani	119	3	42	74	46
6	Jorhat Central	73	8	28	37	13
7	Jorhat East	35	6	11	18	5
8	Titabar	149	7	74	68	45
Total:		**787**	**70**	**296**	**421**	**241**

APPENDIX 1C - Village Directory
Villages with different sources of drinking water facilities available

Serial number	Name of C D Block	Number of villages with different sources of drinking water available				
		Only tap	Only well	Only tube well	Only handpump	More than one source only from tap, well, tube well, handpump
1	2	3	4	5	6	7
1	Majuli	0	0	68	0	15
2	Ujani Majuli	0	0	51	0	5
3	Jorhat North West	0	0	3	1	57
4	Jorhat	0	2	1	0	64
5	Kaliapani	0	0	3	0	54
6	Jorhat Central	1	1	2	0	40
7	Jorhat East	0	1	2	0	22
8	Titabar	0	0	4	0	102
District Total:		**1**	**4**	**134**	**1**	**359**

APPENDIX II - Village Directory
Villages with 5,000 and above population which do not have one or more amenities

Sl. no.	Name of village	Location code number	Name of C D block	Popula-tion	Amenities not available (indicate N. A. where amenity not available)						
					Senior Secondary School	College	Primary Health Sub Centre	Tap drinking water	Bus facility	Approach by Pucca road	Commercial Bank
1	2	3	4	5	6	7	8	9	10	11	12
1	Nowsolia Gaon	01881400	Jorhat	5683	N.A.	N.A.	N.A.	Available	N.A.	Available	N.A.
2	Dholajan Grant	01911700	Jorhat	5343	N.A.	N.A.	N.A.	N.A.	Available	Available	N.A.
3	Moriani Grant	01916500	Jorhat	5595	N.A.	Available	N.A.	N.A.	Available	N.A.	N.A.
4	Meleng Grant Gaon	01909300	Jorhat Central	6906	N.A.	Available	Available	N.A.	N.A.	N.A.	N.A.
5	No.160 Grant	01911200	Jorhat Central	6225	N.A.	N.A.	N.A.	N.A.	N.A.	Available	N.A.

APPENDIX II - A Census Town
Census Towns which do not have one or more amenities

Sl. no.	Name of census town	Location code number	Name of C D Block	Popula-tion	Amenities not available (indicate N. A. where amenity not available)						
					Senior Secondary School	College	Health Centre	Tap drinking water	Bus facility	Approach by Pucca road	Banks
1	2	3	4	5	6	7	8	9	10	11	12
1	Chekonidhara			7355	N.A.	N.A.	Available	Available	Available	Available	N.A.
2	Naubaisa Goan			4964	N.A.	N.A.	Available		Available	Available	N.A.
3	Kumar Kaibarta Gaon			6347	N.A.	N.A.	Available	Available	Available	Available	N.A.
4	Senchoa Gaon			3697	N.A.	Available	N.A.		Available	Available	Available
5	Titabor Town			7545	Available	Available	N.A.	Available	Available	Available	Available

APPENDIX III - Village Directory
Land utilisation data in respect of Census Towns / non-municipal towns

Serial number	Name of Census town and CD Block within brackets	Land use (i.e., area under different types of land use in hectare)					
		Total area	Forest	Irrigated by source	Unirrigated	Culturable waste(including gauchar & groves)	Area not available for cultivation
1	2	3	4	5	6	7	8
1	Chekonidhara						
2	Naubaisa Goan						
3	Kumar Kaibarta Gaon	Data Not Available for this Appendix					
4	Senchoa Gaon						
5	Titabor Town						

APPENDIX IV - Village Directory
CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Serial number	Location code number	Name of village
1	2	3
Name of CD Block: Majuli		
1	01848400	Jamuguri
2	01848500	Kashikata Gaon
3	01848700	Salmari
4	01849200	Borphakua
5	01849400	Saru Phakua
6	01849500	Gotonga
7	01849600	Na-Mati
8	01849700	Huttar
9	01849800	Phalengi
10	01850000	Chayani
11	01850200	Chayong Chapori N. C.
12	01850300	Chayang Miri
13	01850400	Tenga Chapori
14	01850700	Garu Chapori
15	01851400	Burha Chapori N. C.
16	01853100	Bebezia
17	01853500	Kumolia Chapori N.C.
18	01854500	Karati Pathar
19	01854900	Borduar Chapori
20	01855500	Singaria Beel
21	01856100	Kartik Chapori
22	01856500	Bor Alengi Satra
23	01856900	Kaibortta Gaon
24	01864300	Keturi Bil Khat Pam
25	01864400	Manik Bill
Name of CD Block: Ujani Majuli		
26	01866700	Namoni Serepai No.3
27	01868100	Phuloni Chapori
28	01870500	Ratanpur Miri Pam
29	01871500	Anai Chuk No.1
30	01872100	Dabli Chapori N C
31	01872400	Natun Bonoria Chapori N C
Name of CD Block: Jorhat North West		
32	01873400	Kumar Bheta
Name of CD Block: Jorhat		
	Nil	
Name of CD Block: Kaliapani		
33	01885800	Nemati Chapori
34	01885900	Toramari Chapori
35	01893700	Khatowal Pathar Gaon
Name of CD Block: Jorhat Central		
36	01886500	Mohkhuti Pathar
37	01886600	Alichiga Pathar
38	01887300	Khata Pathar

APPENDIX IV - Village Directory

CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Serial number	Location code number	Name of village
1	2	3
39	01889300	Borborura Koroka
40	01889400	Hijalo Guri
41	01911100	Holongpar Forest Reserve
Name of CD Block: Jorhat East		
42	01903700	Tirutilip Forest
43	01904500	Bongeyan Gaon
44	01906400	Mogroi Grant
45	01906500	Mogroi N.C.
Name of CD Block: Titabar		
46	01932700	Motamiyam Village

APPENDIX V - Village Directory

Summary showing number of villages not having Scheduled Castes population

Serial number	Name of CD Block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Castes population
1	2	3	4	5	6
1	Majuli	156	42	114	63
2	Ujani Majuli	92	11	81	52
3	Jorhat North West	107	1	106	42
4	Jorhat	110	0	110	65
5	Kaliapani	123	4	119	76
6	Jorhat Central	77	4	73	48
7	Jorhat East	36	1	35	28
8	Titabar	152	3	149	86
District Total:		**853**	**66**	**787**	**460**

APPENDIX VI - Village Directory

Summary showing number of villages not having Scheduled Tribes population

Serial number	Name of C D Block	Total villages	Uninhabited villages	Inhabited villages	Number of inhabited villages having no Scheduled Tribes population
1	2	3	4	5	6
1	Majuli	156	42	114	38
2	Ujani Majuli	92	11	81	20
3	Jorhat North West	107	1	106	62
4	Jorhat	110	0	110	70
5	Kaliapani	123	4	119	82
6	Jorhat Central	77	4	73	61
7	Jorhat East	36	1	35	25
8	Titabar	152	3	149	54
District Total:		**853**	**66**	**787**	**412**

APPENDIX VII A - Village Directory

List of villages according to the proportion of the Scheduled Castes to the total population by ranges

Section II - Town Directory

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyanee of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type,it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/ Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

* If a medical or educational facility is not available in the town, mention the name of the nearest place and its distance in kilometer(s) from the town where facility is available

Four towns namely Senchoa CT, Jorhat MB, Mariani TC and Titabor CT have Hospital, Dispensary and Family Welfare Centre having beds. Some towns have availed the benefit of TB clinic at Jorhat MB and one in Dibrugarh MB. Jorhat MB has all types of college facilities. The University is in Senchoa Gaon CT. Other towns also have colleges The Medical College facility is availed by all towns in Dibrugarh MB, Engineering College facility in Jorhat and Polytechnics facility are availed by all towns at Jorhat. The other facilities mentioned in col. 10 to 20 are enjoyed by towns and their numbers are indicated in the statement. The facilities which are not available is indicated by putting dash.

STATEMENT-VI
Trade, Commerce, Industry and Banking, 1999

Sl no.	Class, name and civic status of town	Name of three most important commodities exported			Name of three most important commodities manufactured			Number of banks	Number of agricultural credit societies	Number of non-agricultural credit societies
		1st	2nd	3rd	1st	2nd	3rd			
1	2	3	4	5	6	7	8	9	10	11
1	VI Senchoa Gaon (CT)	Nil	Nil	Nil	Nil	Nil	Nil	2	-	-

6	III Mariani (TC)	Tea	Nil	Nil	Nil	Nil	Nil	3	-	-
7	V Titabor Town (CT)	Betelnut	Wire	Rice	Cable Wire		Atta Biscuits	2	-	-

The statement indicates three most important commodities exported and manufactured in towns which can be seen in the statement. There are banks in four towns and their number can be seen in the statement itself. The agricultural credit societies is available in only in Jorhat MB. But the facility of non agricultural credit societies is not available in all towns.

STATEMENT-VII
Civic and other amenities in Slums, 1999

Serial number	Class and name of town	Name of the slum	Is it notified	No. of households (approximate)	Population of the Slum (approximate)	Paved roads (in kilometers)	System of sewerage
1	2	3	4	5	6	7	8
1	II Jorhat M.B.	No Pocket'S Name	No	545	2,820	5	OSD
2	III Mariani T.C.	No Pocket'S Name	No	155	785	Nil	OSD

Serial number	Class and name of town	Number of latrines				Method of disposal of night soil	No. of tap points/public hydrants installed for supply of protected water	Electricity connections		
		Private			Community			Domestic	Road lighting (points)	Others
		water borne	service	others						
1	2	9	10	11	12	13	14	15	16	17
1	II Jorhat M.B.	70	35	334	2	Pt	5	120	45	-
2	III Mariani T.C.	28	62	42	-	ST, Pt	-	42	8	2

There are slum population in both the statutory towns. The slum areas of both towns are not notified. The pocket name of slum has not been given by respective authorities. The paved road is available in Jorhat MB only. The system of sewerage OSD in slum areas are seen common in both towns. The slum dwellers have all types of latrines. The use of water borne and service latrines are more in all slum areas. The method of disposal of night soil in slum areas of Jorhat MB is Pt whereas St and Pt are found in Mariani TC. There is community latrine in Jorhat MB also. There are tap points for supply of protected water in slum area of Jorhat MB only. There is electricity connections in both towns and the number of connections in towns for different purposes can be seen in the statement.

APPENDIX TO TOWN DIRECTORY

Towns showing their outgrowths with population

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth

Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

DISTRICT PRIMARY CENSUS ABSTRACT

ANNEXURE

Annexure – I Number of villages under each Gram Panchayat

(Data not collected on panchayat level)

Annexure- II Note on Fertility, Mortality and Migration

Fertility : In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age The definitions of the terminology used in computing different fertility rates are explained in earlier chapter in non Census concepts heading

Annexure – III Various measures of Fertility and Mean Age at Marriage, 1991 Census

Fertility :

As seen through various indicators of fertility in the district it may be seen that GFR of 133 GMFR of 193 TFR of 4 4 and TMFR 6 1 against respective figures at State level are at 135, 190, 4 2 and 6.0. Various measures of fertility and other fertility related data are presented in the following table

TABLE -I

Various Measures of Fertility and Mean age at Marriage – 1991 Census

	Fertility Measures	Jorhat District	Assam State
	1	2	3
1	GFR	133	135
2	GMFR	193	190
3	TFR	4 4	4 1
4	TMFR	6 1	6
5	Crude Birth Rate	31 5	31 5
6	Mean age at Marriage	19	18 3
7	No children ever born per woman (in age group 45-49)	4 5	5 2
8	Child-woman ratio (0-4)	437	575
9	Child-woman ratio (5-9)	609	735

The level of fertility measures are found higher in GMFR, TFR and TMFR in the district than the State. The fertility related at measures are also high in crude birth rate and mean age at marriage in the district whereas no of children ever born per woman is low in the district. Likewise child woman ratios are also low in the district than the State.

TABLE-II

Wise various measures of Fertility and Mean Age at Marriage, 1991 Census

State/District		GFR	GMFR	TFR	TMFR	CBR	No of children even born per ever married woman in age-group45-49	Mean Age at Marriage of currently married women

TABLE-III

Age Specific Marital Fertility levels in Assam State and Jorhat district- 1991 Census

Age group	Jorhat District			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0.142	0.144	0 124	0.151	0.152	0.133
20-24	0 195	0.212	0 096	0 214	0.219	0.165
25-29	0 156	0 169	0 091	0 183	0.192	0.12
30-34	0 102	0.115	0 047	0.134	0.14	0.093
35-39	0.059	0.071	0 009	0.087	0.094	0.042
40-44	0 031	0.035	0 015	0.049	0.052	0.022
45-49	0.17	0.019	0	0 033	0.034	0.025

The Age Specific Marital Fertility levels are found low in all age groups in the district than the State levels in case of total, rural and urban

Mortality :

The mortality figures in the district confirm to the general theory of relation between fertility and mortality. The mortality rates are shown in the following table.

TABLE-IV

Estimate of Child Mortality in Assam and Jorhat district, 1991 Census

Mortality Measure	Jorhat District	Assam State	Mortality Measure	Jorhat District	Assam State
1	2	3	1	2	3
Q (1)			Q (3)		
P	47	92	P	66	104
M	47	96	M	67	106
F	48	87	F	66	101
Q (2)			Q (5)		
P	49	101	P	77	116
M	48	104	M	78	118
F	58	98	F	76	115

Q (1) of the above table shows the infant mortality rate whereas Q(2), (3) and (5) indicates the size of child mortality in age group below 2, 3 and 5 years respectively. It is seen in the above table that the mortality rates in Jorhat district are much lower than that of the state. It can, therefore, be said that the health status in the district is far better than the State as a whole.

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence 1991& 2001 Census.

Migration:

The detail data may be seen below in the following table

Table-I

Percentage distribution of migrants by place of birth – 1991 Census, Assam

State/ District	Total migrants			From other districts			From other States			From other countries

Compared to the State level totals, the share of migrants from other districts of the State in the total migrant is relatively higher whereas the share of migrants from other countries is 3.59 percent in the district against 14.56 percent in case of over all State. Migration from other district reveals that the female inmigration is more than male inmigration from the other districts but it is more for males incase of inmigration from outside district.

Similar data on migration in respect of migrants classified by their place last residence are presented in the following table.

Table-II

	4 1	7 7	2 8	2 0	3 8	1 4

From the above table it is seen that migrants from elsewhere in the district out side the place of enumeration consists of 81 0 %, from other district it is 12.2 %, from other state it is 6.5 % and from other countries it is 0.4 % of the total migrants.

Annexure – V : Brief account of main religions in the district/tahsil as per 1991 & 2001 Census

Religion

A brief account of religious composition of the population in the district alongwith the State is presented in the following table.

Table-I

Main religions in the Jorhat district and Assam state - 1991 Census

District/State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Assam	Total population	22,414,322	100	88 9	11 1
	Hindu	15,047,293	67 1	86 2	13 8
	Muslim	6,373,204	28 4	94 7	5 3
	Christian	744,367	3 3	96.0	4 0
	Buddhist	64,008	0 3	93.0	7.0
	Jain	20,645	0 1	21 9	78.1
	Sikh	16,492	0 1	31.3	68 8
Jorhat	Total population	871,206	100	84 7	15 3
	Hindu	815,320	93 6	85 6	14 4
	Muslim	37,651	4 3	70 3	29.7

Table-I

Main religions in the Jorhat district and Assam state - 1991 Census

District/State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Jorhat	Christian	13,287	1.5	90.2	9.8
	Budhist	2,070	0.2	69.5	30.5
	Jain	519	0.1	47.8	52.2
	Sikh	1,305	0.2	12.1	87.9

The figures in the above annexure show that compared to the state as a whole the proportion of Hindu is more in the district. Hindus occupy a major share of 93.59% in the District. The Muslims who constitute about 28.4% of total population at State level but in the district their percentage is only 4.32%. Christian consists 1.5% as against 3.3% at State level, which is also on lower side. In case of Jains in the District is less than the state averages. However, percentage of Sikhs population is higher in the district than the State.

Table-II

Main Religions In The Jorhat District And Assam State - 2001 Census

District/State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%
1	2	3	4		5		6
Assam	All Religions	26,655,528	100	23,216,288	87	3,439,240	13
	Hindus	17,296,455	65	14,477,966	84	2,818,489	16
	Muslims	8,240,611	31	7,714,619	94	525,992	6
	Christians	986,589	4	936,008	95	50,581	5
	Sikhs	22,519	0	7,634	34	14,885	66
	Buddhists	51,029	0	44,546	87	6,483	13
	Jains	23,957	0	3,603	15	20,354	85
	Others	22,999	0	21,608	94	1,391	6
	Religion not stated	11,369	0	10,304	91	1,065	9
Jorhat	All Religions	999,221	100	827,901	83	171,320	17
	Hindus	927,858	93	777,789	84	150,069	16
	Muslims	47,658	5	30,730	64	16,928	36
	Christians	18,610	2	16,953	91	1,657	9
	Sikhs	1,562	0	269	17	1,293	83
	Buddhists	2,385	0	1,604	67	781	33
	Jains	675	0	162	24	513	76
	Others	87	0	63	72	24	28
	Religion not stated	386	0	331	86	55	14

The figure in the above table shows that compared to state as a whole the proportion of Hindu is more in the district. The hindus which constitute 64.9 percent of the total population at the state level is 92.9 percent in the district, followed by Muslims 4.8 percent, Christians 1.9 percent, Shikhs and Buddhists 0.2 percent each and Jains 0.1 percent..

Annexure – VI : Marital status of population as per 1991& 2001 Census

Marital Status :

The data on marital status of population Assam as well as in Jorhat District for each age-group for males and females are presented below in the following table.

Table-I

Age, Sex and Marital Status of population in Assam - 1991 Census

Age group	Total population		Percentage of population in each age-group

A comparison of the district level figures of marital status with that of the State averages reveals that the percentage of never married males and females is lower than the state average. In case of married males and females the percentage is higher than the state average. In case of widowed males percentage is higher and female percentage is the same with the state percentage. Again in case of Divorced / Separated males and females the percentage is lower than the percentage..

The highest percentage of married males and females are recorded in the age group of 45-49 and

35-39 in the district being 92 6 percent and 88 6 percent respectively The corresponding figures in the State level for males and females are recorded in the same age group Never married males and females being 25.7 percent and 9.5 percent respectively in the district which is higher than the State percentage of 22.1 and 6.3 percent respectively.

Annexure – VII Age, Sex and Education in the district, 1991 & 2001 Census.

Education and Literacy rate :

Age group wise literacy rate for male and female in respect of both at State and District levels are presented below in the following table.
