Jatinga Bird Mystery

Jatinga, famous for the phenomenon of birds "committing suicide", is located on a spur of the Haflong ridge, the head quarter of the district. Here the mist & fog lie like a veil around the beautiful face of the damsel from September to November. During these late monsoon months, mysterious behaviour of birds takes place. Curiously, most of the doomed birds do not attempt to fly away after they land near the lights. They look dazed and disheveled, perhaps due to the trauma of the whole shocking experience. Such birds fall easy pray to the villagers. However, contrary to the popular belief, birds do not commit suicide. Under circumstances not yet fully explained, these birds get caught in the fog and wind, get disoriented and seek solace of the light sources put out by the villagers. Various studies are going on to unravel the causes behind this phenomenon.

Annexure VI Marital status of population as per 1991 and 2001 Census 356
Annexure VII Age, sex and education in the district, 1991 and 2001 Census 358
Annexure VIII Distribution of different mother tongues returned in 1991 and 2001Census 361
Annexure IX Distribution of Scheduld Castes and Scheduled Tribes in 1991 Census 362

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

(P. Hazarika)
Director of Census Operations,
Assam, Guwahati.

District Highlights – 2001 Census

1. In NC Hills district, Maibong Revenue Circle/ Tahsil is most populous having 43,389 persons while Mahur Revenue Circle is the least populous circle having 21,884 persons.

2. Among the CD Blocks, Diyung Valley CD Block has the highest number of population with 43,389 whereas the lowest is found New Sangbar CD Block with 13,625 persons

3. In the district there are 4 Revenue Circles and 5 CD Blocks which comprise 645 villages including 40 uninhabited villages.

4. The district comprises seven 4 towns. Haflong TC is the most populous with 36,302 persons while Mahur TC is the smallest in population with 6,264 souls.

5. While the highest number (192) inhabited villages are found in Diyung Valley CD Block and the lowest (78) inhabited villages is found in New Sangbar CD Block.

6. The largest village by area is Hangrum with 3,336 hectares of land and situates in Jatinga Valley CD Block while in the district, there are 19 villages which are the smallest villages in the area with two hectares of land in each. Out of these villages, 14 villages are in Diyungbra CD Block, 4 villages in New Sangbar CD Block and one in Diyung CD Block
7. The largest village by population is Langting Rly Station with 2,156 souls which is situated at Diyung Valley CD Block and the smallest village is P.Geram with five persons is under Jatinga Valley CD Block.
8. The Hydro Electricity Project at Umranso is an important industry of the district

9. The district is well known for her forest with various wild animals and its forest products
10. In the district, there are a few beautiful spots for picnic.

11. Traditional tribes songs and dances are most attractive and famous all over the state.

Note: 1. Asterisk in column 2 denotes that the district / tahsil headquarters is a rail head.
2. Asterik in column 4 denotes that the district / tahsil headquarters is a statutoty town.

shows the information regarding the name of the headquarter of district/tahsil with their status and distance from Revenue Circle headquarter to district headquarter by road in kilometer. All Revenue Circles have urban status a Haflong Revenue Circle is recorded 0 kilometer distance from Revenue Circle headquarter to district headquarter. However, the farthest distance of 120 kms. is recorded in Umrangso Revenue Circle which is a distance to district headquarter by road. Mahur Revenue Circle is situated at a distance of 31 kilometers being nearest from Haflong.

STATEMENT-2
NAME OF THE HEADQUARTERS OF DISTRICT / CD BLOCK, THEIR RURAL- URBAN STATUS AND DISTANCE FROM DISTRICT HEADQUARTERS, 2001

Serial number	Name of District / C D Block	Name of District / GD Block headquarters	Whether Urban / Rural	Distance from CD Block headquarters to district headquarters by road (in km.)
1	2	3	4	5
1	Diyungbra	Diyungbra	Rural	55 kms.
2	New Sangbar	Umrangso	Urban	121 kms.
3	Harangajao	Harangajao	Rural	30 kms.
4	Jatinga Valley	Jatinga Valley	Rural	15 kms.
5	Diyung Valley	Haflong	Urban	0 kms.

Note: 1. Asterisk in column 2 denotes that the district / CD Block headquarters is a rail head.
2. Asterik in column 4 denotes that the district / tahsil headquarters is a statutoty town.

Gives the CD Block wise information and their status with distance from district headquarter. The headquarter of three CD Blocks are identified as rural and for two CD Blocks are urban and their location vary from a distance of 0 kilometer to 120 kilometers from district headquarter. New Sangbar CD Block is situated at the distance of 120 kilometers away from district headquarter and the nearest CD Block to the district headquarter is Jatinga Valley CD Block with a distance of 15 kilometers.

STATEMENT-3

POPULATION OF THE DISTRICT AT EACH CENSUS FROM 1901 TO 2001

. shows the area, number of villages/towns and population in district and Revenue Circle during 2001 Census. Total area of the district is 4888.0 sq kms. The density is 38 persons per square kilometer. However it is much more in urban areas with 2,730 persons. Out of total inhabited villages in the state, 645 villages are in NC Hills district. Among Revenue Circles, Umrangso Revenue Circle has the highest number 180 villages and the lowest is noticed in Mahur Revenue Circle with 109 villages. There are altogether 45 number of uninhabited villages in the district. The highest number of households is noticed in Haflong Revenue Circle with 13,003 households and has a total of 0.6 lakh population. Out of total number of 125 towns in the state, 4 towns are in NC Hills district and all towns are statutory towns. The total urban population in the district is 59,435 with a total of 12,402 number of households.

STATEMENT-5

CD BLOCK WISE NUMBER OF VILLAGES AND RURAL POPULATION, 2001

Serial number	Name of CD Block	Number of villages		Rural population *		
		Total	Inhabited	Persons	Males	Females
1	2	3	4	5	6	7

Statement-9 indicates houseless and institutional population of Revenue Circles, 2001. In NC Hills district there are altogether 9 households for houseless population and 200 households with 2,898 persons of institutional population. The house less population in the district is very few. The detail against each Revenue Circles of the district can be seen in the table itself. However, institutional population are more in Haflong Revenue Circle than other Revenue Circles.

****

ANALYTICAL NOTE ON NORTH CACHAR HILLS DISTRICT

ANALYTICAL NOTE ON NORTH CACHAR HILLS DISTRICT

(i) History and scope of District Census Hand book:

District Census Hand Book is an important and valuable publication brought out by the census organization of each state after each decadal census. This provides detailed information on some basic demographic and socio-economic aspects and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being only informative source of every district of each state. It has, thus, proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Hand Book was first initiated during 1951 census with the collaboration of respective state Governments. In 1951, only few demographic as well as some economic information in village and town level of the district along with some census tables were published in District census Hand Books. Since then, it had undergone radical changes during the subsequent decades. Incorporating more census tables and also some basic statistics on land-use-pattern, agriculture, industry, administration, public Health and medical etc enhanced the scope and content of the publication. The DCHB of 1961 was, therefore, considered as an unique asset published by census organization. In 1971 Census, further improvements were made in the DCHB by enlisting many more information on village and towns in the from of Village and Town Directory. It has three parts. Part -A relates to village and Town Directory. Part-B contains Villages and Town wise Primary Census Abstract and Part-C deals with administrative aspect and Census tables based on PCA etc. The 1981 Census again widened the scope of DCHB to cover more data on literacy, health care etc. in addition to the information covered in 1971, DCHB. In 1981, the DCHB was divided into two parts. The part A included data on Village and Town Directory and part-B covered only the village and town-wise Primary Census Abstract. This part of the DCHB was not brought to light in Assam as no Census was conducted due to prevalence of disturb condition in the state. In 1991 Census, the DCHB was divided in two parts. The part-A divulged the Village and Town Directory and Part-B indicated the Primary Census Abstract. The Part-A had two sections. In section-I the alphabetical list of villages and note explaining the codes used in the Village Directory were presented. The Village Directory had four appendices. The section-II depicted note explaining the codes used in the Town Directory, the Town Directory statements (I to IV) and appendix to the Town Directory. The part-B revealed District Primary Census Abstract, circle-wise. CD Block wise, village and town wise Primary Census Abstract, Circle-wise, CD Block wise, village and town wise Primary Census Abstract. In addition, the PCA had and appendix as well as annexure to the appendix. The district primary census Abstract to Scheduled Caste and Scheduled Tribe at circle and town level was also incorporated in this part of the DCHB.

However, as a tradition of the past, in the present DCHB also some more information on availability of facilities, News Paper/Magazine are included for the first time. Further, information on income and expenditure, important commodities manufactured, exported etc. are also included to give a fuller account to the scope of DCHB. Similarly, in Town Directory also a few more information are included to increase its depth.

The process of collection and compilation of these data involved a lot of exercise. At first, Revenue Circle wise information on each village have been collected by revenue authorities at district level. These data are compared with 1991 Census data at district level and after their thorough scrutiny and cross check, these records are submitted to the Census Directorate. In case of Town Directory, data have been collected directly from the Commissioner of Municipal Corporation and Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 Census at Census directorate. Thereafter, efforts are made to compare and crosscheck with similar data made available from other sources especially data published by different departments of state

government to verify the authenticity and correctness of figures received through Village and Town Directory booklets. Then only compilation and computerization of these data have been made according to the instructions of the Registrar General and Census Commissioner, India. It is, therefore regarded that because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication to that of many publications brought out earlier. It will be a more useful book for all concerns. This endeavourer wills perhaps, quince the thirst of needy people.

(ii) Brief History of the District :-

The written records of the history of North Cachar Hills assumed to have stand around 1563 A. D. It was when Kachari Raj was removed from Dimapur, now in Nagaland, to Maibong Now Maibong is a subdivision of district of N C Hills. With the settlement of Kachari Raj at Maibong a wall was erected to fortify the area under occupation. Thus Maibong enjoyed the touch of the royal family since the time of resumption of Kachari Raj. A good number of temples were erected. The independent Nagas and Kukis settling in the high hills around the Mahur Valley surrendered to the Kachari Raj without a show of resistance rather agreed to pay a yearly revenue in the form of house-tax. But they were at liberty to retain their age-old customs especially in regard to dispensation of justice and settling of disputes, etc.

The year of resumption of the Raj was a hectic period for the Kacharis. There ensued a fight between the Kacharis of Darrang and Nagaon on one hand and Ahoms on the other. The Raja of Maibong sent armies under Tularam and other generals to fight the Ahoms in Nagaon.

During the reign of Dharmadhwaj and his success on the Kachari Raj had to encounter Jaintia Raja from the west. As a result the Kachari had to move to Khaspur in the plains of Cachar in about 1750A.D. Thus Cachar was believed to be occupied and original settlers were forced to dwell in the areas bordering Sylhet against payment of revenue. But majority of the Kacharis stayed back in N C Hills which was under control of the Kachari Raj. Senapati or commanders were appointed to exercise their powers to control the tribute paying tribes. Even the Kacharis living in the plains were bound to resign to a number of officials in the hills. Majority of the followers of the Raja to plains were drawn from the aristocratic families and their immediate followers. The Raja, while at Khaspur, was converted to profess Hinduism who in turn publicly professed and owed allegiance to Brahmanism.

The Kacharis at Khaspur had to face a gruesome attack in the early part of the 19th Century. They became insecure due to the brutal Burmese invasion. They preferred shifting to a secure place. Accordingly they shifted their capital to Garbetta in the Bikrampur pargans. Still they were in a panicky. The last Kachari Raja, Gobind Chandra, had to flee and sought refuse in Sylhet. The year had dawned in 1826A.D. when the Burmese were driven out, the Raja Gobind Chandra was restored to the throne at the behest of the British. He could not complete four years of his reign when he was assassinated leaving no successor to the throne. As a result the then paramount Power, the British annexed Cachar to their areas according to the treaty of Yandaboo in 1826. With this annexation to the British territory, the Kachari Raj in the plains came to an end once for all.

But a considerable portion of the Barail range of the N.C. Hills under occupation of the Kacharis reigned sovereign and independent. The Raja by an order deputed Tularam as head of the army to lead an expedition to neighboring Nagaon and other areas of Assam. On his march down the hills he happened to run into a herd of wild elephants the leader of which saluted Tularam with its trunk. The news spread like wild fire and Gobind Chandra, the Rajas brother and who was the next heir to the throne became skeptical and jealous of Tularam. Fear gripped his mind because Tularam would aspire to the throne as he had been encouraged by the obeisance of ever a mute, wild pachyderm. So he asked the Raja to assassinate Tularam in order to pave his way to become undisputed King. Happily enough the Raja, Khetri Chandra, did not lend his ears to the uncouth proposal of Gobind Chandra. The Raja detained Tularam in N.C. Hills. Again the Raja cautioned Tularam that his successors had a hidden plan to put him to death. Having heard the evil designs against him, Tularam fled away to Sylhet through the Jaintia territory. He, as a retaliatory measure collected a large number of people and pursued them to return to N.C. Hills and establish him as Raja. He compelled the nearby villagers to pay him their allegiance. Gobind Chandra, then, deputed Karma Singh to suppress the uprising in the hills. The encounter that took place in Jatinga Valley remained indecisive following the withdrawal of Tularam. Kings army could not pursue

Tularam to make him captive. After this encounter Tularam began to reign undisturbed. Tularam made a treaty with the British in 1830 by which he because a sovereign ruler north of the Barail range. After his death in 1854 the territory was annexed to the district of Nagaon and a portion was given to the Naga Hills district. In the year 1880-81 N.C. Hills was made a subdivision of Cacher. After independence (on 17/11/1951) N.C. Hills was declared as a subdivision of the united Mikir and N C Hills district. By Feb 2,1970 it was separated from united Mikir and N C Hills district of was upgraded into a district with Haflong as a district headquarters'.

(iii) Administrative set up:-

North Cachar Hills district abbreviated as NC Hills lies in 24° 57¢/00²/ to 25° 43¢/00² north latitude and 92°32¢/00² to 93°28/00" east longitude with its headquarters at Haflong. The district has two subdivisions namely Halfong and Maibong subdivisions. Haflong sub division is formed with three Revenue Circles -(1) Umrangso (2) Haflong and (3) Mahur. Maibong subdivision is formed with Maibong Revenue Circle. Mahur Revenue Circle has been created after 1991 census. The Present Mahur Revenue Circle has been carved out with 91 Villages from Haflong Revenue Circle plus 23 Villages from Maibong Revenue Circle.

Under each Revenue Circle there is one town bearing the status of Town Committee. In 1991 Census there were three of towns as against four towns in 2001 Census. The district has an area of 4888.0 sq. kms.

The total number of villages that existed in 1991 was 581 as against 638 Villages in 2001 Census.

Haflong being the district hqs, the distances from the Revenue Circles to the district are as follow.

Table-I

Names of HQs their Civic Status and distance from District H.Qs.

Sl. No.	Name of the District/Sub-division/Revenue Circle	Name of H. Qs.	Town	Distance from district. H.Qs.	Remarks
1	2	3	4	5	6
	North Cachar Hills	Haflong		-	
1	Haflong Subdivision	Haflong		-	
	1)Umrangso RC	Haflong	Haflong TC	175 kms	
	2) Haflong RC	Haflong	Mahur TC	65 kms	
	3) Mahur RC	Haflong	Haflong TC	0 km	
2	Maibong Subdivision	Maibong			
	4) Maibong RC	Maibong	Maibong TC	45 kms	

In respect of area, the district occupies the third place among the districts of Assam. It has two subdivisions namely Haflong and Maibong. It has no Mahkuma Parishad and Gaon Panchayat in the district. There are total four towns and all have the status of Town Committee. Haflong subdivision has three towns and Maibong subdivision has one town.

(iv) Physical Feature :-

The North Cachar Hills of 1991 in the same as that of 1971 or 1981. The district has not undergone any change in its jurisdiction. It used to be the abode of the Dimasa Kacharis whose origin still remains in obscurity. Migration of other tribes has made it now the homeland of a mosaic of tribes and races who maintained their own distinct character. The district comprised 2 subdivisions, Haflong and Maibong. It has 4 police stations and 4 C.D. Blocks. It is bounded on the east by Manipur and Nagaland, on the north, by the Karbi Anglong and Nagaon districts, on the west, by Meghalaya and on the south, by the Cachar district.

Topographically, the district forms a rugged hilly country constituting the eastern flanks of the Jaintia Hill of Meghalaya and the northern flanks of the Borail range. Trending east-west, sount and west of Haflong, it continues so to Nagaland. It forms a water divide between the Dhansiri in the north and the Surma in the south. The elevation of the range varies from 1000 metres to 1200 metres above mean sea level. The highest peak along the range are Jhingtubum (1867m) Nairakula (1422m), Hemerlowa (1376m) Kolombot (1316m), Sherpai (1656m), Kalangtom (1322m), Mahadeo Kaukaha (1460m), Laikarang Daojali Parbat and Sarkahading and other NE-SW trending low

ranges flanking the northern slopes of the Borail range constituting the Langting-Mupa reserve forests. The eastern flanks of the Jaintia Hills consist of Saipung and Kurunming reserved forests, hills along the Kapili Valley and Sunngut, Bura Ingti and hills on the north-west side of the Kapili river. The general elevation of these hills varies from 600 to 900 metres and the chief peaks are Kalimkhu (965m), Khorungima (961m), Marpung (965m), Thangnanship (995m), Konglong (559m), Sunngyt (716m), Rongkhong (656m) and Tirkim (686m).

Near Haflong, the junction of the Shillong Plateau and the hill country is very sharply marked, but in the northern part of the North-East Frontier Railway Hill Section, the transition is more gradual. Towards the north east, ancient rocks sink below the Brahmaputra alluvium. The district has several rivers, the most prominent is the Diyung. It has two tributaries, the Zangyan and the Langlat.Kapili is the biggest river, but flows along the border of the district with the Jaintia Hills district of Meghalaya and HamrenSub-division of karbi-Anglong district. Langri, one of the river of the district, is its tributary. The Kapili has been during the seventiesand eighties dammed near Garampani which provides a road bridge over the river in the Jowai-Haflong road, besides generating hydro-electric.

Geo-physically, the Archaean gneisses complex is the oldest rocks that occur in the north-western fringe of the district. The Archaeans are unconformably overlain by the Shillong series consisting of quartzites, quarty-biotites schists, quartz-sericite-schists, slates and phyllites.

The Jaintia series unconformably overlie the earlier formation at different places. The lowermost Therria stage rocks of the series are well developed along the Kapili Valley on the western part of the district. The Sylhet limestone stage, the next higher one, is more widespread and thick. The main exposures more or less continue along the kapili and Umrang Valley in the district. The Borail series overlies the Jaintia and occupy large area north of haflong. The Surma series overlies the Borails with an unconformity and is best developed south of the Borails in the Surma Valley. It mainly occupies an east-west belt south of the Haflong-Disang thrust boundary. Rocks belonging to the series are exposed in the Karem Maibong-Mupa tracts area. The Tipam series overlying the Surmas occupies a wide area on the north-western flanks,of the Borails.

Drainage;-

The rivers in the district serve the purpose of draining. Unlike other districts of the Plains, heavy flood is not the common occurrence because of the hilly terrain of the region. Although the rivers flush out the water it Causes flood in the plains f the neighboring districts. Moreover the damage as a result of flood is compensated for the fertility of the exhausted soil being resorted by this natural process of measuring.

Flood :-

Flood is quite foreign to the district. The district is about 1000 to 1200 metre above the sea-level. The physical condition of the district, hilly as it is, does not permit to cause flood.

Climate :-

The Climate of the district is characterized by coolness, generally high humidity nearly all the year round and abundant rainfall. The cold season from December to February is followed by the season of thunderstorms from March to May. The southwest monsoon season is from June to about the first Week of October every year. October and November constitute the post monsoon season.

There is a meteorological observatory centre in Haflong. From the middle of November the day and the night temperature begin to decrease, the drop being more rapid in the case of night temperature. January is the coldest month. Temperatures begin to rise from March onward. The overall weather condition is found to be pleasant. The highest temperature recorded at Haflong was 34.7° on 1960 (May) and the lowest minimum temperature was 54 C on 1959 February according to the District Gazetteer, Govt of Assam.

Rainfall:-

Skies are heavily clouded to overcast in the south-West monsoon season. Moderately heavily clouded skies are common during the period from March to May. Cyclonic storms and depressions from the Bay of Bengal seldom reach the district. Thunderstorms are frequent during the period from March to September. The thunderstorms from March to May are sometimes accompanied with squalls. The average

monthly rainfall in the district is 2083.0 in May 1999 __ 2409.5 in August, 2070.5 in July and 1074.0 in June 1999. The annual rainfall in the district registered to be 8409.0 during 1999. Annual rainfall unto June, 1999 registered to be 8409.0 mm.

Soil :-

The most important characteristics of the soil is its acidity. Generally on the hills, which are slowly undergoing a withering process and are constantly washed down by rain, the soil is more acidic than the soil of the low lying areas. The soil in the hilly tracts has high contents of organic matter and nitrogen. It is because of the virgin nature of the soil. Particular types of soil are not known but it is supposed to be fairly a clay loam with high percentage of organic matter and nitrogen. A red laterite soil is also not uncommon. As the soil is acidic and contains high percentage of organic matter and nitrogen, a variety of crops are grown. But for want of adequate irrigation facilities all crops cannot be grown successfully.

Forest:-

The district is rich in forest wealth. Hill economy greatly depends on forest. The hill people practise shifting cultivation. They procure from forests all the materials required for construction of houses like timber, bamboo reed, cane etc. They use wood as fuel to cook their food and to warm themselves during winter. Timber is exported to other parts. The district feeds the sawmills and the plywood factories located elsewhere. Teak, Hollocks, Gamari, Shome, Sonaru, Ajhar, Poma, Bheleu, Titachapa, Bonsom, Koroi etc. are the important forest product. Bamboo resources of the district are rich enough to support a paper mill. The district supplies large quantities of bamboo raw materials to the Bengal paper Mill, the Hindustan paper Mill at Jagiroad. The district has their reserved forests. The district earns a handsome revenue from forest and forest related materials.

Mineral and mining:-

Deposits of coal, limestone and litho-orphic clay had been reported since long in the district. Coal is at present being extracted in the Kapili valley near Garampani. Garampani Coal Extraction Project has been executing the extraction work. This is run under Assam Mineral Development Corporation LTD. Quality of limestone in the district is the best one. Limestone reserve had been estimated at 703 million tones. The limestone reserve in the district has been consumed by Cement plants namely Cement Corporation of India at Bokajan and Vinay Cement plant at Umrangso.

The District Council

The North Cachar Hills district is a tribal areas under para-20 of the sixth schedule to the Constitution of India. It is an autonomous district under para-1 of the same Schedule and is being administered by the N.C. Hills Autonomous District Council under para-2 of the same Schedule which was formally inaugurated on 29.4.1952 by the Chief Minister of Assam, (Late Bishnuram Medhi). At that time the Council consisted of 16 members out of whom, 12 were elected on the basis of adult franchise and 4 were nominated by the Governor. At present the Council consisted of 27 members out of whom, 23 are elected on the basis of adult suffrage and 4 are nominated by the Governor. The District Council had both executive and legislative powers with respect to (1) administration of land (2) the management of unreserved forests (3) the use of any canal or water course for the purpose of agriculture (4) the regulation or practice of jhum or other form of shifting cultivation (5) The establishment of village or town committees or councils or their power stations including village or town police and public health and sanitation (7) the appointment of succession of chief or headmen (8) inheritance of property (9) marriage and (10) social customs.

The District Council was further empowered to establish, construct or manage primary schools, dispensaries , markets, cattle pounds, ferries, fisheries, roads and waterways and to prescribe the language and the manner in which primary education should be imparted in the primary schools of the district. The council could as well levy and collect revenue and taxes such as taxes on profession, trade, callings and employment, taxes on animals and boats, taxes on vehicles including motor vehicles, tolls on passengers and goods carried on ferries, taxes for the maintenance of schools, dispensaries and roads. The District Council was also entitled to a share of the royalties on minerals occurred within the district.

With the erstwhile United Khasi & Jaiantia Hills and the Garo Hills districts being instituted as an autonomous state within the state Assam from 2nd April,1970 and the people of the Mikir Hills districts, now the Karbi Anglong district, and the North Cachar Hill district having opted out of the Autonomous state, the Government of Assam, presumably, as a gesture

of gratitude to the people of these two districts who had expressed their wish to continue with the state granted more power to the District Councils of these two districts w.e.f 1/6/70 to accelerate development of these backward districts. The departments that were entrusted to the Karbi Anglong and N.C.Hills Autonomous District Councils are :-

1. Cottage Industry
2. Animal Husbandry & Veterinary
3. Forests
4. Agriculture
5. P.W.D.
6. Sericulture
7. Education
   (a)Primary education upto the level of Higher Secondary Education
   (b) Adult education
8. Cultural Affairs
9. Soil Conservation
10. Co-operation
11. Fisheries
12. Panchayat and Rural Development
13. Handloom & Textiles
14. Health & Family Welfare
15. Public Health Engineer
16. Minor Irrigation
17. Social Welfare
18. Flood control scheme for protection of village and paddy fields, Marketing, Towns etc. (Not of technical nature).
19. Sports and Youth Welfare
20. Weights and Measures
21. Food and Civil supplies
22. Finance including sales tax on purchase of goods other than Newspapers, Excise & Professional Tax.
23. Urban Development – Town & Country Planning
24. Tribal Research Institute
25. College Education (General) including Library Services
26. Land Reforms
27. Publicity/Public Relations
28. Printing & Stationery
29. Tourism
30. Transport

The revised terms and conditions of the transfer of the above departments to the district councils containing in O.M. dated 14.11.79 is reproduced below :No. TAD. 218/77/155 : WHEREAS in pursuance of sub para (2) of paragraph 6 of the Sixth Schedule to the constitution of India, the State Government of Assam entrusted to the Karbi Anglong District Council and the North Cachar Hills District Council certain functions in relation to Agriculture, Minor Irrigation, Soil conservation, Animal Husbandry, Dairying and Milk supply, Forests, Fisheries, Roads and Building, General Education including cultural programme, water supply, Health and Family Planning, Social Welfare, Cottage Industries and Community Development Programme including Panchayat, with certain conditions as conveyed through Office Memorandum No. TAD/R/153/70 dated 1.6.70.

And Where as the Karbi Anglong District Council and North Cachar Hills District Council in a joint meeting held at Diphu on 15.11.77 suggested the revision of the terms and conditions of the entrusted functions :

And Where as a Committee was set up by the State Government wherein the representatives of the District Councils were also present to examine the suggestions made in the joint meeting as mentioned above :

Now having considered the suggestions made in the joint meeting and the recommendation given by the aforesaid committee set up by the Government, the State Government hereby revise the terms and conditions as described below :

(a)vouchers are submitted to the Accountant General regularly.

(ii) The State Government will pay to the District Councils as administrative charge a fixed amount for meeting (i) It shall be the duty of the District Councils to ensure that monthly accounts with supporting the expenditure incurred by the District Councils for implementation of the entrusted functions. The exact quantum will be fixed by the State Government separately for each of the District Councils on the basis of actual expenditure incurred by the two District Councils for the past years on a year-wise basis on administering the entrusted functions. Further the District Councils shall not create any new posts, emoluments of which are liable to be met out of the administrative charges to be paid by Government without prior approval of Government.

The procedure for making such payment shall be determined by the Government.

(b)It shall be the responsibility of the District Councils to see that the existing rules and instructions

governing implementation of the schemes are followed strictly and are not deviated from without prior approval of the State Government.

(c)The District Councils shall not be competent to transfer funds sanctioned under one major head of development for scheme under another major head of development without prior concurrence of the state Government as this would requires formal approval of the legislature. They shall, however, be fully competent to sanction re-appropriation for one scheme to another within the same major head. They shall also have full powers for issue of financial sanctions, administrative approval, etc. in respect of the schemes transferred to them subject to availability of budget provision. In the matter of scrutiny and acceptance of tenders, etc. of a technical nature, which are at present submitted by the District level officers to their superior officers for decision, the present procedures and rules prescribed in the Departmental Manual will continue to be followed. In the matter of allotment of work acceptance of tenders of any nature at the district level, the existing instructions of the State Government regarding preference to local industries, local people, etc. will be followed till the District Councils frame their own in this regard.

(d)The District Councils shall be fully responsible to the State Legislature in all matters relating to the funds transferred to them and for this purpose the Principal Secretary and the other Secretaries to the Executive Committee should be made available for examination by the public Accounts Committee and other Committees of the Legislature. The District Councils shall appoint a Principal Secretary and not less than three Secretaries to the Executive Committee. The Principal Secretary and the Secretaries shall be officers of the State Government. The present non-official Secretary may, however, continue to hold the position of Secretary.

(e)Any plan funds left unutilised at the close of the financial year should be refunded to the Treasury by the 15th of March of every year with intimation to the State Finance Department and cannot be carried over to the next financial year.

(f)The District Councils shall not entertain new staff out of the funds placed at their disposal without specific prior approval of the State Government. Whenever appointments are made after such approval in regard to posts carrying a salary upto Rs. 800/- per month, preference will be given to candidates who are registered in the local Employment Exchange.

(g)All the District Level Officers of the Development Departments enumerated in the annexure and their subordinate officers and staff will be placed under the administrative control of the District Councils with effect from 1.6.70. These officers and staff will not cases to be Government Servants but will function primarily as officers and staff of the District Councils and the District Councils will be associated in the preparation of their Annual Confidential Report in accordance with detailed procedure to be prescribed by the State Government.

Under Such procedure the Annual Confidential Reports of the District Level Officers are prepared. The Executive members of the District Council in-charge of the respective entrusted functions shall review the Annual Confidential Reports initiated by the said Secretary-in-Charge and this will be accepted by the respective Heads of Government Departments. These officers and staff will continue to be responsible to the State Government for implementing schemes which have not been transferred to the District Councils and administrative charge shall be admissible to the District Councils for such implementation. While the administrative control of the District Councils over the officers and staff placed at their disposal will be complete in the matter of intra-district transfer, inter-district transfer shall be within the executive jurisdiction of the State Government.

The Heads of Departments will continue to exercise full power and responsibility in the matter of technical control and supervision over the officers placed at the disposal of the District Councils even in respect of schemes transferred to the District Councils. The Heads of Departments will also be available to the District Councils for any assistance or guidance they may desire. It will be the responsibility of the Heads of Departments and regional Officers to bring to the notice of the Executive member-in-charge the defects they may have noticed in the implementation of the transferred schemes by the officers of their department. Copies of inspection notes by the Heads of Departments and Regional Officers will also be sent invariably to the Executive member-in-charge for all the information.

The services of subject matter specialists or other officers whose jurisdiction is not confined solely to one district will not be placed at the disposal of the District Councils, it will, however, be open to the District Councils to seek assistance and guidance from such officers.

(h)The salary and allowances of the Principal Secretary and other Secretaries to the Executive Committee as well as the officers and staff of the different Departments placed at the District Councils' disposal will be paid by the District Councils for this purpose. In respect of Provident Fund,/Leave, Increment and other related matters, however, these officers and staff will continue to be controlled by the Administrative Departments concerned.

(i)In order to enable the District Councils to finance the expenditure on the schemes transferred to them without difficulty, it is proposed to make adequate funds available every six months as advance under the Head T-Deposits & Advances-Pt.III-Advances not bearing interest-Departmental Advances-Special Advance. It shall be the duty of the District Councils to submit separate detailed accounts every month to the Accountant General in adjustment of the advance so drawn to enable the Accountant General to make necessary adjustment by debit to the appropriate head of account in the state budget.

(j)The District Councils shall not in any circumstances utilise funds sanctioned for Agricultural and Allied programme, Primary Education or Rural Water Supply for schemes under other sectors, nor shall they divert plan fund for non-plan purposes.

(k)The Management of Reserved Forests will be entrusted to the District Council subject to the following conditions :-

(i)The State Government will retain the powers regarding reservation and settlement of forest villages.

(ii)Forest Resources Survey and Forest Research will continue to be the responsibility of the State Forest Department.

(iii)The working plan will be prescribed by the State Forest Department.

(iv)Long-term leases for more than 3 years for industrial, semi-industrial or other purposes can be granted by the District Councils only with the prior approval of the State Government.

Subject to the above conditions, the District Councils will be entitled to constitute Mahals, coupes, etc. settle them and derive revenue there from; all expenditure relating to the management of the Reserved Forests which are financed from the normal budget should be borne by the District Councils themselves. The District Councils will have full jurisdiction over wild life preservation excepting the sanctuaries, if any.

(l)The District Councils shall not be liable to pay any leave salary or pensionery contribution in respect of any Government Officer placed at their disposal for implementing the Scheme.

Land and land use Pattern :-

The proper and progressive use of land by people change the economic condition of a particular place. Land is a bountiful natural gift to carry on agriculture. These two words are interrelated. NC Hills is a hilly place. It is not so commodious as the plains to use effectively. The following table gives a clear picture of land use pattern in the district.

Table-II
Land –use- pattern in N C Hills district (1997 –1998 Provisional)

Sl. No.	Classification of Land	Area in hectares
1	2	3
1	Total geographical area	48,800
2	Forest area	67,487
3	Land not available for cultivation -	B
	a) Land pat to non-agriculture uses	-
	b) Barren an uncultured land	393,125
4	Other non-cultivated land excluding follow land -	B
	a) Permanent pastas & grazing land	B
	b) Land under mise, trees, groves etc. not included in net area	B
	c) Cultivable waste land	B
5	Fallow land -	B
	a) Fallow other than Current fallow	B
	b) Current fallow	B
6	Net area shown	28,188
7	Total Cropped area	36,797
8	Area shown more than once	8,609

Source :- Basic Agricultural Statistics, Assam, 1998 – 1999, Directorate of Agriculture, Govt. of Assam.
N. B. :-'B' – No classification for hill area. All included under barren & uncultivable land.

Agriculture and Plantation:-

The economy of the district is dependent on purely and primarily on agriculture. Vast Chunk of the total landmass in the district wears a rural look and agriculture, therefore, is the only means to increase the economy.

Crop:-

Rice is the staple food of people in the district. They produce rice in three seasons of the year. They cultivate during Autumn, Winter and Summer season. But the area of cultivation varies from season to season. As per reports available in the Statistical Handbook of

Assam, 2002, Govt. of Assam, an area of 5,886 hectares was Cultivated during Autumn; 5,938 Hectares. in winter and 36 Hectares. in summer for Production of rice during 1998-99 Which produced 8091 tones, 11,546 tones and 72 tones respectively.

The following table shows the crops grown and amount produced in the district during 1998-1999.

Table-III
Area, Production, and Average yield of important crops in N C Hills district for the year 1998 – 1999

Sl. No.	Type of Crops	Area under cultivation (hectare)	Production (tones)	Average yield kg. Per hectare
1	2	3	4	5
A.	Cereals			
1	Autumn Rice	5,886	8,091	1,397
2	Winter Rice	5,938	11,546	1,974
3	Summer Rice	36	72	1,992
4	Maize	1,428	1,071	750
5	Wheat	50	51	1,010
6	Others cereals	9	7	3
B.	Pulses			
1	Tur	123	89	720
2	Gram	16	5	300
3	Black-gram	200	101	503
4	Lentil	7	3	393
5	Peas	132	66	502
6	Other pulses	32	16	506
C.	Oilseeds			
1	Linseed	7	4	500
2	Castor	86	39	450
3	Sesamum	518	328	633
4	Rape & Mustard	2,094	712	340
D.	Fibre crops			
1	Jute	138	1,205	1,572
2	Mesta	3	13	800
3	Cotton	348	164	80
E.	Miscellaneous			
1	Sugarcane	1,293	42,002	32,484

3	Tobacco	29	23	780
F.	Spices			
1	Chille	286	164	572
2	Onion	14	20	1,400
3	Turmeric	215	110	510

Source:- Basic Agricultural statistics, Assam.

Horticultural crop :-

Among the important garden crops of the district Papaya , Pineapple and Banana are grown in plenty. Besides these the district produces Mangoes, Jack-fruit, Lemons etc. The following table exhibits the production of horticultural Crops in the district.

Table—IV
Area, Production and Average yield of horticultural crops in N C Hills district (1998—1999)

Sl. No	Type of Crops	Area under cultivation (Hectare)	Production (toner)	Average yield in kg. Per hectare
1	2	3	4	5
1	Papaya	295	4,498	15,246
2	Pineapple	1,700	25,296	14,880
3	Banana	500	7,250	14,500
4	Orange	1;392	13,468	9,675
5	Areca nut	335	226*	131*
6	Coconut	40	305**	69*

Note :- * Production of Areca nut in terms of dry cured nuts.
** Production of Coconuts is in thousand numbers, but not in tones.
* Average yield of Areca nut & coconut in nuts per bearing trees.

Source :- Basic Agricultural Statistics, Assam, Directorate of Agriculture, Govt. of Assam.

Irrigation:-

The district receives heavy rainfall during summer. The rainwater is preserved in artificial ponds and tanks. The irrigation facilities are nominal compared to the Cultivable land.

The following table shows the extent of irrigation facilities in the district.

Table-V
Irrigation Potential Utilized and targets or additional potential Created in N. C. Hills district.

Sl. No	Particulars	Land area in hectors
1	2	3
1	Irrigation Potential Utilized during 1997-98	2,858.00
	i. During Kharif	2,858.00
	ii. During Rabit & pre-kharif	-
2	Irrigation potential Created up to 31.03.99	5,119.00
	i. Minor	5,119.00
	ii. Major and Medium	-
3	Targets and for additional irrigation Potential Created during 1998-99	90
	(a) Minor irrigation	90
	(b) Major and Medium irrigation	-

Soure :- Chief Engineer Irrigation Department. Assam in Statistical Handbook Assam,2000 published by Director of Economics and Statistics, Assam.

Animal Husbandry

Rearing of livestock in the rural areas forms a part of the household. cattle, buffalo and pigs are the common animals reared in almost all the households. There are plenty of grassy hillocks where the animals can be grazed in open space.

The Government initiative for the development of livestock is encouraging and people are aware of the facilities. There are 7 dispensaries, 1 mobile dispensary and Block dispensaries. Also improved Cattle breed has been advanced by the department of Animal Husbandry and Veterinary. Preventive measures to save the lives of animals from diseases have been taken by the veterinary department.

Table – VI
Livestock and poultry in N C Hills district as on 1997

Sl. No.	Livestock & poultry	Number
1	2	3
1	Cattle	51,253
2	Buffaloes	24,266
3	Sheep	186
4	Goats	19,503
5	Pigs	24,068
6	Fowls	141,894
7	Ducks	11,371

Soure :- Statistical Handbook, Assam,2000.

Fishery:-

Fish is a common dish to all living in the district. Now- a days the number of fish eaters has increased many fold. As a result the prices have gone up unbelievably. So pisciculture is becoming increasingly popular among all section of people. The concerned Govt. department has evolved some lucrative project among people to ton up the economic conditions of people particularly in the rural sector. Although there is no registered Beel or River fisheries in the district, the district has crossed the target of fish production. The target was set for 700 metric tones during the year 1998-99 and as against the target the district achieved 798.12 m. tones in the same year. The variety of fish found in the district is almost common with the rests of the district of Assam.

Industry :-

The north-eastern region is entirely industrially backward compared to the other parts of the country. N C Hills district is far more backward industrially compared to the other districts of Assam. There are a few industries namely manufacture of food products (2 nos); manufacture of wood products, furniture and fixture (10 nos), manufacture of Non-metallic mineral products (4 nos), other manufacturing industries and (3 nos) and manufacture of Transport equipments and parts (1 nos). There are 474 nos of Registered small-scale industries as on 31/12/98. There are again 9 Tea gardens with a total area of 4700 hectares (1998) NC Hills district occupies an enviable position, in respect of supply of bamboo, as a feeder district to the major Paper Mills.

The district has high potential to run medium sized industries if not of the order of Major industries. Figures furnished in the para refer to the Statistical Handbook Assam, 2000.

Trade and Commerce:-

The communication facilities to carry on trade and commerce progressively are the main criteria of a particular place. Although rail and road Communication facilities have been extended to the major towns of the district, large chunk of rural areas still remain non-existent of the motor able roads.

Whatever is produced mostly in the rural areas is disposed in retail in the neighboring local markets at the cheapest rate. As a result the Cultivators become the worst sufferer both in buying and selling products. There are a good number of hats either Weekly or bi-weekly. The middlemen and beparis play an important role in dealing in local products.

Banking :-

There was no banking facilities in the district in ancient days. It has been attributed to the fact that the district was constituted with the backward areas and hilly tracts after independence. These simple and unsophisticated tribal people had to live in Wanton misery without the touch of modern life and civilization. Such an economy perhaps did not foster the growth of banking system in the district. Unlike other districts the Marwari or other business farms were not attracted to the district. They did not have savings but professional money-lenders from neighboring districts did visit there to meet the needs for credit. The cooperative credit society was started during the Second Plan period and one branch of State Bank of India to enjoy cheap Credit facilities. Gradually all the Banks made its appearance in the district. Now the functioning of different banks in the district has improved considerably. The following table shows the present scenario of the functioning of the banks in the district.

Table - VII
Position of deposits and credits of scheduled commercial Banks and Regional Rural Banks on 1999 December in NC Hills district.

Sl. No.	Category of Bank	No of office	Rs in lakhs	
			Deposit	Credit
1	2	3	4	5
1	Scheduled commercial Banks	16	6,873	613
2	Regional Rural Banks	9	767	99
	Total =	**25**	**7,637**	**712**

Source Statistical Handbook, Assam, 2000

Transport and Communication:-

In ancient time there was no motor able roads in the district. The bridle paths were the only road communication. The Government has taken over these paths for maintenance and repair. There is now motor able road from Haflong to Shillong and other main center towns of Assam.

Now the district is connected by both rail and road. There are four important roads connecting the district with other parts. They are –(1) Haflong-Garampani Jowai-Shillong-Guwahati, (2) Haflong-Silchar (3) Haflong-Lumding, (4) Garampani-Lanka-Nagaon roads. The construction of Hydro-Project over the Kapili river and, just a few metres dodwnstreams, a bridge has eased the communication to a great extent. The total road length in the district, according to the District Census Handbook, is 1231 kms out of which 297 kms is surfaced, 741 kms graveled and 193 kms earthen. Out of the total road length 223 kms are under State Highway and 1008 kms under PWD roads. There is no National Highway in the district.

During 1990 there were 18 buses, 21 public carriers, 5 private carriers, 35 motor cars, 2 jeeps, 3 motor cars, 385 motor cycles and scooters, 6 tractors, 22 trail less, 2 omni buss, 3 mini buses, 2 Govt. vehicles, 1 auto rickshaw and 56 others vehicles. Now the number has increased many times.

Electricity and Power :-

The rural sector of the district is still lagging behind in respect of power supply. Of the total 641 villages only 262 villages have been electrified according to Statistical Handbook, Assam, 2000.

Local Self-Government:-

The history of Local Self-Government in NC Hills district dates back to 1895. Under the sixth schedule to the constitution of India, NC Hills district was conferred the autonomous states. The Haflong Town Committee functioning since 1931 came under the purview of the Act wherein it is provided under the sub-section 5 of the section 4 of the Act that Haflong Town committee constituted under the Rules published with the Govt. of Assam Notification No. 301- LSG dated 3/5/1931. By a Govt. latter No. TAD/ LF/19/50/29 dated 23. 3. 1953 the Haflong Town committee came under the purview of N.C. Hills District Council.

The district has no Mahkuma Parishad and Gaon Panchayat.

As mentioned in the Statistical Handbook, 2000, there are two subdivisions, five Development Blocks, three Revenue Circles spread over 581villages in all.

Social Life:-

The district is predominant with Hindu population. It constitutes 72.9 percent of the total population as per 1991 Census. Of the total Hindu population 2.7 percent are Scheduled Caste and 65.5 Scheduled Tribes. Next comes the Christians with 24.5 percent of the total population. Muslim population with 2.2 percent occupies the third place and then Buddhist with 0.3 percent, Sikhs 0.1 percent and closely followed by Jains with 0.02 percent.

People practise patriarchal type of family. The male children generally inherit the parental property even though law permits both the sexes to stake claim for property. This is not usually claimed by the fair sexes because they are given in marriage with the lump sum property one can afford to.

The Dimasa and Jaintias form the major bulk of the aborigines of the district. They have their own traditional ways of wearing dresses and ornaments. Dimasa male-folk wears Pakri' (headgear), Dainthou(dhuti), Sola/ cut(coat) while the females wear "Riga' (Riha) and Rajanthai (typical makhela wrapped round the waist). Female ornaments are Khadu (Bangli) Khanmouthai (necklace). Ornaments are mostly made of silver. On the other hand Jaintia male-folk wear Pakri (Paguri), Putoi (resembling ganji), Justein/ dhuti. Jaintia female folk wear Rymdia (cloth wrapped round the breast) and muka (makhela) Khaila, khapein, Sahkri and Khadu, all made of Silver, are the ornaments worn by Jaintia females. All these are made of muga fabric and 'Patsilk'.NC Hills district

is important producer of Eri Silk. Handloom industry is largely practical in the district.

Apart from celebrating the traditional festivals, the people of NC Hills perform Bihus with usual gaiety.

Residential houses are mostly built of bamboo and that well-to-do people are constructing RCC buildings. The traditional houses will disappear gradually in not to distant future.

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas; the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the

servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house .If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house .Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing

so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo
9 Kaibartta
10 Lalbagi
11 Mahara
12 Methar,Bhangi
13 Muchi, Rishi
14 Namasudra
15 Patni
16 Sutradhar

2 Boro, Borokachari

3 Deori

4 Hojai

5 Kachari, Sonwal

6 Lalung

7 Mech

8 Miri

9 Rabha

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the *percentage of literates in the age group seven years* and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such

professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR):

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course

that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991

Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 188,079 in 2001 Census. Male comprises 99,822 while female consists of 88,257. Out of the total population of the district, 128,644 fall under rural and 59,435 are under urban areas of the district. In rural areas 67,015 and 61,629 are males and female respectively. Accordingly 32,807 and 26,628 are males and females respectively in urban of the district. The percentage of urban population in the district North Cachar Hills is only 31.60 . The district is a rural base place in which 68 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +24.7 which is higher than the state rate. In the district, there are only 4 towns . All the 4 (four) towns is with Town Committee status. The density of the district is 38 persons per sq. kms. which is very much lower than the state density (340). The sex ratio in the district is 884 as against 935 in the State. Out of total population of the district, 37.3 % is total workers of which 48.6 % and 24.6 % are male and female respectively. The percentage of non- workers is 62.7 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 48.9 %, 4.9 %, 2.4 % and 43.8 % respectively.

The literacy rate is 67.6 % in the district of which 75.7 % is for males and 58.4 % is for females. The district literacy rate is above the state literacy rate (63.3)%.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

TABLE-1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Sl.No.	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Umrangso	27,514	27,514	0	42,433	33,302	9,131	54.2	21.0	0.0	0.0	21.5
2	Haflong	76,339	47,752	28,587	66,371	30,069	36,302	-13.1	-37.0	27.0	37.4	54.7
3	Mahur	0	0	0	28,148	21,884	6,264	0	0	0	-	22.3
4	Maibong	46,948	41,049	5,899	51,127	43,389	7,738	8.9	5.7	31.2	12.6	15.1
	District Total:	**150,801**	**116,315**	**34,486**	**188,079**	**128,644**	**59,435**	**24.7**	**10.6**	**72.3**	**22.9**	**31.6**

The table-1 shows the Revenue Circle-wise decadal change in population by residence in total, rural and urban. During Census 2001, the population of the district is 188,079 of which 128,644 are in rural and 59,435 are in urban. The percentage decadal variation during 1991-2001 is 24.7 percent in the district as against 18.9 percent in the state. The urban population growth rate of 72.3 in the district in 1991-2001 is encouraging.

Among four Revenue Circles in the district, Haflong Revenue Circle has recorded 66,371 population in 2001 Census which is the biggest in term of population. The lowest is Mahur Revenue Circle with 21,884 persons. In urban side, Haflong Revenue Circle has more urban population followed by Umrangso Revenue Circle. The decadal growth rate in Haflong Revenue Circle is found a minus growth rate during 1991-01 and it is due to creation of Mahur Revenue Circle in 2001 out of Haflong Revenue Circle.

TABLE-2
NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl.No.	District / CD Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages	Population 200-499	
			Persons	Males	Females		Males	Females		Males	Females
1	2	3	4	5	6	7	8	9	10	11	12
1	Diyungbra	139	25,949	13,729	12,220	95 (68.3)	5,162	4,636	39 (28.1)	6,391	5,836

TABLE-2

NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Sl.No.	District / CD Block	Number and percentage of villages	Population 5000-9999		Number and percentage of villages	Population 10000 and above	
			Males	Females		Males	Females
1	2	22	23	24	25	26	27
1	Diyungbra	0 (0.0)	0	0	0 (0.0)	0	0
2	New Sangbar	0 (0.0)	0	0	0 (0.0)	0	0
3	Harangajao	0 (0.0)	0	0	0 (0.0)	0	0
4	Jatinga Valley	0 (0.0)	0	0	0 (0.0)	0	0
5	Diyung Valley	0 (0.0)	0	0	0 (0.0)	0	0
	Districts (Rural) Total:	**0 (0.0)**	**0**	**0**	**0 (0.0)**	**0**	**0**

The table-2 gives the number and percentage of inhabited villages in specified population size ranges with the related population. Out of 645 villages of the district, number of inhabited villages are 605 under 5 CD Blocks. In the district, Diyung Valley CD Block has the highest with ,43389 population. New Sangbar CD Block with 13,625 population is the smallest CD Block in the district. It is noticed that the highest number of villages with 177 villages of the total villages of the district are under Diyung Vallkey CD Block. New Sangbar CD Block records the lowest number 77 inhabited villages. The highest number of inhabited villages 400 or 66.1 percent are having population the range of less than 200 population followed by 166 or 27.4 percent villages having the population in the range of 200-499 and the least one village is noticed in the population range of 2000-4999. No village is seen having population in the range of 5000- 9999 and10,000 and above in the district. Detail in respect of other population ranges and number of villages can be seen in the table.

TABLE : 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town
1
(a) New
(i) Statutory town
1 Umrangso T.C.
2
3
(ii) Census town
1 Nil
2
3
(b) Denotified
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns
1 Nil
2
3
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria
1 Nil
2
3
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census
1 Nil
2
3
(c) Declassified
1 Nil
2
3
(d) Wholly merged with other town(s) Nil
1
2
3

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

The table -3 shows that during 2001 Census no new statutory town has come up. No town from the district has been de notified or declassified in 2001. In other categories no change has taken place. As a whole nothing has changed during the decade in the district.

TABLE-4
DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	217	35.9	41,337	32.1
11-20	12	2.0	1,203	0.9
21-50	39	6.4	6,971	5.4
51-100	53	8.8	10,599	8.2
101-200	56	9.3	9,677	7.5
201-300	28	4.6	5,396	4.2
301-500	36	6.0	9,080	7.1
501 +	164	27.1	44,381	34.5
Not known	0	0.0	0	0.0
District Total:	**605**	**100.0**	**128,644**	**100.0**
Population Density (Rural) of the district:				**161**

The table-4 presents the distribution of villages by population density in the district. The population density is 161 persons per sq.km. Out of 128,644 rural population of the district, the highest 44,381 population or 34.5 percent are hailed from 164 villages. The density of population of these villages is 501+ persons per sq. km. From the table, it is observed that in the range of population density 0-10 per sq. km. there are 217 villages covering 41,337 population. Again in the range of population density 11-20 per sq. km, there are 12 villages covering 1,203 persons. Similarly, in other ranges of population density per sq. km, the number of villages along with percentage of village and population with percentage can be seen in the table.

TABLE-5
SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			NC Hills		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	492	492	—
1911	915	923	626	917	917	—
1921	895	906	613	882	882	—
1931	874	885	574	898	898	—
1941	875	886	605	936	954	578
1951	868	878	663	924	941	665
1961	869	887	661	867	884	639
1971	896	912	744	841	853	683
1981	—	—	—	—	—	—
1991	923	934	838	857	880	784
2001	935	944	872	884	920	812

Note : Sex ratio has been defined here as the number of females per 1000 males.

****The table 5 indicates sex ratio of the state as well as of the district from 1901 to 2001. The district sex ratio 926 females is found lower than the state sex ratio of 935 females in all decades except 1941 and 1951. The district rural sex ratio is 932 in 2001 as against 944 in the state. The urban sex ratio is 878 in the district which is higher than the state in 2001. The sex ratio of the district has increased gradually in last three decades which can be said as an encouraging feature.

TABLE-6
SEX RATIO BY TAHSILS, 2001

Sl.No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Umrangso	880	896	823
2	Haflong	866	926	820
3	Mahur	900	944	760
4	Maibong	902	921	803
	District Total:	**884**	**920**	**812**

The table 6 gives the Revenue Circle- wise sex ratio with a break up of total, rural and urban. Of 4 Revenue Circles of the district, there are urban area in all four Revenue Circles. From the table, it is noticed that the district, according to 2001 Census is recorded sex ratio 884 females per 1,000 males where in rural it is recorded 920 females and in urban it is 812 females.

Among the Revenue Circles, the highest rural sex ratio of 902 is noticed in Maibong Revenue Circle followed by Mahur Revenue Circle which recorded 900 females and the lowest is noticed in Haflong Revenue Circle with 866 females. In urban, the highest sex ratio of 823 is noticed in Umrangso Revenue Circle and the lowest sex ratio of 760 females is in Mahur Revenue Circle.

TABLE-7
SEX RATIO BY CD BLOCKS, 2001

Sl.No.	Name of C D Block	Sex ratio
1	2	3
1	Diyungbra	890
2	New Sangbar	923
3	Harangajao	926
4	Jatinga Valley	942
5	Diyung Valley	921
	District (Rural) Total:	**920**

The table-7 presents CD Block wise sex ratio in the district. At CD Block level, Jatinga Valley CD Blocks has the highest sex ratio of 942 among all CD Blocks which is higher than the district rural sex ratio. The lowest sex ratio is noticed in Diyunbra CD Block with 890 females per 1,000 males. The sex ratio in three CD Blocks is seen higher than the district sex ratio while sex ratio of other two CD Blocks are lower than the district level rural sex ratio.

TABLE-8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	37	6.1	3,505	2.7
700-749	21	3.5	3,349	2.6
750-799	57	9.4	9,704	7.5
800-849	63	10.4	15,452	12.0
850-899	82	13.6	17,379	13.5
900-949	97	16.0	24,377	18.9
950-999	73	12.1	21,716	16.9
1000-1099	108	17.9	23,819	18.5
1100+	67	11.1	9,343	7.3
District Total:	**605**	**100.0**	**128,644**	**100.0**
Sex ratio (Rural) for District:			**920**	

The table-8 shows sex ratio of rural population by ranges. When the sex ratio at village level is concerned, it is found that most of the villages have sex ratio 0f 900+ females per 1,000 males. Out of 605 inhabited villages in the district, 345 villages come under sex ratio range of 900-949 while in 260 villages, sex ratio is below 900 females. For 37 villages, sex ratio is recorded below 700 females while 21 villages have come under sex ratio range of 700-749 females per 1,000 males and so on.

TABLE-9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl.No.	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Umrangso (TC)		823
2	Haflong (TC)		820
3	Mahur (TC)		760
4	Maibong (TC)		803
Sex ratio (Urban) for the district:			**812**

The table-9 gives the town wise sex ratio in the district. Urban sex ratio of the district as per Census 2001 is 812 females. It is noticed from the table that out of 4 towns of the district, Mahur has shown the lowest 760 sex ratio among all towns. The sex ratio in Maibong and Mahur TCs are below the district urban sex ratio. However, two towns in the district, show the sex ratio above the district urban sex ratio.

TABLE-10
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Sl. No.	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Umrangso	Total	7,754	3,931	3,823	973
		Rural	6,403	3,260	3,143	964
		Urban	1,351	671	680	1,013
2	Haflong	Total	9,205	4,668	4,537	972
		Rural	4,818	2,474	2,344	947
		Urban	4,387	2,194	2,193	1,000
3	Mahur	Total	4,644	2,395	2,249	939
		Rural	3,779	1,920	1,859	968
		Urban	865	475	390	821
4	Maibong	Total	9,204	4,761	4,443	933
		Rural	8,196	4,253	3,943	927
		Urban	1,008	508	500	984
District Total:		**Total**	**30,807**	**15,755**	**15,052**	**955**
		Rural	**23,196**	**11,907**	**11,289**	**948**
		Urban	**7,611**	**3,848**	**3,763**	**978**

The table-10 gives sex ratio of population in the age-group 0-6 for Revenue Circles in total, rural and urban with a break up in persons, males and females. From table, it is noticed that sex ratio for 0-6 age group is 955 in total, 948 in rural and 978 in urban. It may be mentioned that the district sex ratio of population in the age-group 0-6 are higher than the district sex ratio of the total population which are recorded as 884 in total, 932 in rural 920 and 812 in urban.

Among the Revenue Circles, the rural highest sex ratio for 0-6 age group children is noticed in Umrangso Revenue Circle which is recorded 964 females and the lowest is 927 females in Maibong Revénue Circle. The urban sex ratio of population in the age-group 0-6 is noticed the highest in Umrangso Revenue Circle with 1,013 females and the lowest is found in Mahur Revenue Circle with 821 females.

TABLE- 11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Sl. No.	Name of CD Block	Total population in 0-6			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Diyungbra	4,987	2,540	2,447	963
2	New Sangbar	2,487	1,279	1,208	944
3	Harangajao	3,407	1,741	1,666	957
4	Jatinga Valley	4,119	2,094	2,025	967
5	Diyung Valley	8,196	4,253	3,943	927
District (Rural) Total:		**23,196**	**11,907**	**11,289**	**948**

The table-11 shows sex ratio of population in the age-group 0-6 for CD Blocks. The district rural sex ratio in the age-group 0-6 is 948 females At CD Block level, it is seen that Jatinga Valley CD Block has the highest sex ratio of 967 females followed by 963 females at Diyungbra CD Block Among the CD Blocks, two CD Blocks have been recorded sex ratio below the district sex ratio in the age group 0-6 children. Diyung CD Block has recorded the lowest sex ratio of 927 females among 1,000 males.

TABLE- 12
SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	141	23.3	3,351	14.4
700-749	22	3.6	946	4.1
750-799	39	6.4	1,689	7.3
800-849	39	6.4	1,805	7.8
850-899	38	6.3	2,355	10.2
900-949	23	3.8	1,173	5.1
950-999	16	2.6	1,436	6.2
1000-1099	85	14.0	3,506	15.1
1100+	202	33.4	6,935	29.9
District (Rural) Total	**605**	**100.0**	**23,196**	**100.0**
Sex ratio (Rural) for District:			**948**	

The table-12 gives sex ratio of rural population in the age group 0-6 by ranges. If village wise sex ratio in the age group 0-6 is observed it is seen that out of 605 inhabited villages of the district, 202 villages have recorded 1100+ sex ratio and 85 villages have shown sex ratio in the range 1000-1099 females. In the lower side, it can be seen that sex ratio in 141 villages is lower than 700 females and altogether 279 villages have shown sex ratio below 900 females.

TABLE-13
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl.No.	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Umrangso (TC)	TC	1,351	671	680	1,013
2	Haflong (TC)	TC	4,387	2,194	2,193	1,000
3	Mahur (TC)	TC	865	475	390	821
4	Maibong (TC)	TC	1,008	508	500	984
	District(Urban) Total		**7,611**	**3,848**	**3,763**	**978**

The table-13 gives the sex ratio of population in the age group 0-6 of urban agglomerations/towns. The district urban sex ratio of population in the age-group 0-6 is 978 females. The highest sex ratio for 0-6 age group among the towns is noticed in Umrangso TC with 1,013 females per 1,000 males which means females are more than males.. On the other hand the lowest sex ratio of 821 females has been returned Mahur TC with absolute number of 390 children.

TABLE- 14
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Umrangso	Total	42,433	446	27,130	1.1	63.9
		Rural	33,302	210	24,247	0.6	72.8
		Urban	9,131	236	2,883	2.6	31.6
2	Haflong	Total	66,371	1,336	39,503	2	59.5
		Rural	30,069	656	22,959	2.2	76.4
		Urban	36,302	680	16,544	1.9	45.6
3	Mahur	Total	28,148	225	23,931	0.8	85
		Rural	21,884	8	21,290	0	97.3
		Urban	6,264	217	2,641	3.5	42.2
4	Maibong	Total	51,127	1,353	37,864	2.6	74.1
		Rural	43,389	745	35,902	1.7	82.7
		Urban	7,738	608	1,962	7.9	25.4
	District Total:	**Total**	**188,079**	**3,360**	**128,428**	**1.8**	**68.3**
		Rural	**128,644**	**1,619**	**104,398**	**1.3**	**81.2**
		Urban	**59,435**	**1,741**	**24,030**	**2.9**	**40.4**

The table-14 presents the number and percentage of Scheduled Castes and Scheduled Tribes population in Revenue Circle wise in the district. The proportion of Scheduled Castes population to the total population is 1.8 percent and that of Scheduled Tribes population is 68.3 percent. The percentage of Scheduled Castes is less than that of the state percentage of 6.9 and the percentage of Scheduled Tribes population in the district is most more than that of the state 12.4 percent. In rural, the distribution of Scheduled Castes population is 1.3 percent and Scheduled Tribes population is 81.2 percent of the total population where as in urban the Scheduled Castes population forms 2.9 percent and Scheduled Tribes forms 40.4 percent. The highest concentration of Scheduled Castes population at Revenue Circle is found in Maibong Revenue Circle with 6.5 percent and for Scheduled Tribes, it is the highest in Mahur Revenue Circle with 85.0 percent.

TABLE -15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

Sl.No.	Name of CD Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Diyungbra	25,949	92	18,225	0.4	70.2
2	New Sangbar	13,625	134	11,924	1	87.5
3	Harangajao	21,797	616	15,250	2.8	70
4	Jatinga Valley	23,884	32	23,097	0.1	96.7
5	Diyung Valley	43,389	745	35,902	1.7	82.7
	District (Rural) Total:	**128,644**	**1619**	**104,398**	**1.3**	**81.2**

The table-15 presents the number and percentage of Scheduled Castes and Scheduled Tribes population in CD Blocks. The district rural percentage of Scheduled Castes is 1.3 percent and Scheduled Tribes is 81.2 percent. Among the CD Blocks, the highest Scheduled Castes population percentage is noticed in Diyung Valley CD Block with 1.7 percent and the lowest percentage of population is found in Jatinga Valley CD Block which form 0.4 percent. In distribution of Scheduled Castes population among the CD Blocks, Diyung Valley CD Block with 745 persons stands in the highest position among all CD Blocks

whereas Jatinga Valley CD Block which recorded 32 persons is the lowest among all CD Blocks. In case of Scheduled Tribes, in term of absolute number in the highest number of Scheduled Tribes population is noticed in Diyung Valley CD Block with 35,902 persons and the lowest number of Scheduled Tribes population is seen in New Sangbar CD Block having 11,924 persons.

TABLE-16
PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	556	91.9	0	0.0
Less than 5	27	4.5	201	12.4
5-10	9	1.5	449	27.7
11-20	7	1.2	656	40.5
21-30	2	0.3	132	8.2
31-40	1	0.2	129	8.0
41-50	2	0.3	20	1.2
51-75	0	0.0	0	0.0
76 and above	1	0.2	32	2.0
District Total	**605**	**100.0**	**1,619**	**100.0**

The table-16 indicates proportion of Scheduled Castes population in villages. It is observed from the table above that number of villages are more where there is no Scheduled Castes population. This type of village is numbered as 556. The villages numbered 27 have less than 5.0 percent Scheduled Castes population. In 9 and 7 villages, the percentage of Scheduled Castes population are in the ranges of 5-10 and 11-20 respectively. Detail can be seen in the table.

TABLE-17
PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	23	3.8	0	0.0
Less than 5	9	1.5	68	0.1
5-10	12	2.0	284	0.3
11-20	13	2.1	579	0.6
21-30	5	0.8	434	0.4
31-40	14	2.3	2,224	2.1
41-50	9	1.5	1,628	1.6
51-75	24	4.0	4,695	4.5
76 and above	496	82.0	94,486	90.5
District Total	**605**	**100.0**	**104,398**	**100.0**

The table-17 shows the proportion of Scheduled Tribes population to total population in villages. Out of 605 total number of villages in the district, 23 villages have no Scheduled Tribes population. As such 104,398 persons belonging to Scheduled Tribes are found in 582 villages spreading out in the district. The Scheduled Tribes population of 90.5 percent are occupied in 496 villages in the district which fall under the percentage range in 76 and above. However, the percentage range of Scheduled Tribes population to total population comprising of 12 villages have the lowest number of Scheduled Tribes population in the range of 5-10 percent.

TABLE - 18
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town*+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Umrangso (TC)	9,131	236	2,883	2.6	31.6
2	Haflong (TC)	36,302	680	16,544	1.9	45.6
3	Mahur (TC)	6,264	217	2,641	3.5	42.2
4	Maibong (TC)	7,738	608	1,962	7.9	25.4
	District(Urban) Total	**59,435**	**1,741**	**24,030**	**2.9**	**40.4**

The table-18 presents town wise number and percentage of Scheduled Castes and Scheduled Tribes population. The district urban proportion of Scheduled Castes population to total population is 2.9 percent and the proportion of Scheduled Tribes is 40.4 percent respectively. The highest proportion of Scheduled

Castes population is noticed in Maibong TC town with 7.9 percent and the lowest is in Haflong TC with 1.9 percent. However, 45.6 percent of Scheduled Tribes population is noticed in Haflong TC which is the highest among all towns and 25.4 percent is noticed in Maibong TC as the lowest proportion of Scheduled Tribes population among the towns

TABLE- 19
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C D BLOCKS, 2001

Sl. No.	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Diyungbra	878	937
2	New Sangbar	675	940
3	Harangajao	796	954
4	Jatinga Valley	1,133	957
5	Diyung Valley	765	957
	District (Rural) Total	**781**	**951**

The table-19 shows the CD Block-wise in sex ratio of Scheduled Castes and Scheduled Tribes. The district rural sex ratio 920 of the total population is higher than the district rural sex ratio 781 females of Scheduled Castes and for Scheduled Tribes sex ratio of 928 females is higher than the district sex ratio of 920 females per 1,000 males. Among the CD Blocks, Jatinga Valley CD Block with 1,133 females recorded the highest sex ratio in Scheduled Castes population and the lowest is in New Sangbar CD Block with 675 females. However, in Scheduled Tribes, Jatinga Valley and Diyung Valley CD Blocks recorded the highest sex ratio of 957 females each . The lowest Scheduled Tribes sex ratio of 937 females is noticed in Diyungbra CD Block

TABLE -20
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl.No.	Name of U.A.^ / Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Umrangso (TC)	372	940
2	Haflong (TC)	789	921
3	Mahur (TC)	808	925
4	Maibong (TC)	831	980
	Sex ratio (Urban) for the district:	**734**	**928**

The table-20 gives town-wise sex ratio among Scheduled Castes and Scheduled Tribes. The district urban sex ratio of total population is 812 which is higher than the district urban sex ratio of 734 females for Scheduled Castes and for Scheduled Tribes sex ratio of 928 female is higher than the district urban sex ratio.. Among the towns, the highest sex ratio in Scheduled Castes is found in Maibong TC having 831 females. The lowest sex ratio among all towns is noticed in Umrangso TC with 372 females. Maibong TC has recorded the highest sex ratio for Scheduled Tribes population with 980 females per 1,000 males followed by Umrangso TC with 940 females per 1,000 males.. Haflong TC has been recorded the lowest Scheduled Tribes sex ratio of 921 females per 1,000 males.

TABLE - 21
NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN TAHSILS, 2001

Sl.No.	Name of Tahsil	Total / Rural / Urban	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

The table-21 gives Revenue Circle-wise number and percentage of literates and illiterates in the district for Census 2001. The percentage of literates in the district stands at 67.6 percent which is higher than the state literacy rate of 63.2 percent. In male-female break-up, male literacy rate stands at 75.7 percent and female literacy rate is recorded 58.4 percent. Both male and female literacy rate in the district stands higher than the state literacy rate of 71.3 percent for males and 54.6 percent for females. It may be noted that as in the usual case, the district male literacy rate are far better and higher than the female literacy rate. From the table, it is noticed that urban male literates with 92.4 percent predominates female literacy rate of 82.6 percent and in the rural, male literates with 66.9 percent predominates female literacy rate 47.4 percent. In the gap in male/female literacy rate, the gap in urban is recorded 17.3 percent which is lower comparing to that of rural 19.4 percent.

Among the Revenue Circles, it is noticed that in rural of Haflong Revenue Circle, the proportion of literates stands at 67.6 percent which is the highest whereas the lowest is in Maibong Revenue Circle with 51.9 percent. Similarly, in urban, the highest percentage of literates is noticed in Haflong Revenue Circle which is recorded 85.5 percent and the lowest proportion of literates is noticed in Maibong Revenue Circle with 82.8 percent.

TABLE - 22
NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C D BLOCKS, 2001

Sl.No.	Name of CD Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

	District (Rural) Total:	**60,709**	**36,841**	**23,868**	**67,935**	**30,174**	**37,761**	**58**	**67**	**47**	**19**

The table-22 presents CD Block-wise number and percentage of literates and illiterates by sex. The district rural literacy rate of 57.6 percent. The male literates with 66.9 percent is predominated the female literacy rate of 47.4 percent, thus creates the gap in male-female literacy rate of 19.4 percent. Harangajao CD Block has recorded the highest the percentage of literates with 69.9 percent and Diyung Valley CD Block has recorded the lowest percentage of literacy rate of 51.9 percent. In all CD Blocks, the male literates have been predominated the female literates as in the case of district. The maximum margin of gap in male/ female literacy rate is found in Diyungbra CD Block having 22.2 percent.

TABLE- 23
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	3	0.5	65	0.1
1-10	9	1.5	1,677	1.3

District Total:	**605**	**100.0**	**128,644**	**100.0**
Literacy rate for District:		**67.6**		

The table-23 gives the distribution of villages by literacy rate range in the district. From the table, it is noticed that the literacy rate in the district is 67.6 percent. Out of 605 number of inhabited villages in the district, the highest number 95 or 15.7 percent village have the literacy rate in the range 51-60 percent with population of 16.4 percent of the total population and 53 villages or 8.8 percent occupy the literacy rate in the range 81-90 percent having 10.5 percent population. However, it is noticed that the number of villages are less in the literacy rate in the range 1-10 and 91-99 percent range. In the range of 100.0 percent, there are 3 or 0.5 percent villages which constitute the population of 510 or 0.4 percent of the total population.

TABLE-24
NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl.No.	Name and urban status of UA^/Town +*	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

The table-24 gives number and percent of literates in urban areas of the district .Literacy rate for urban in the district with 88.1 percent is very high comparison to that of rural rate. Male literacy rate is 92.4 percent and 82.6 percent for females. The literacy rate is found high in Haflong TC having 89.8 percent for total followed by Umrangso TC with 83.9 percent However, the lowest literacy rate is found in Donkamokam TC with 87.4 percent. In case of the gap in literacy rates for both the sexes, it is less in urban than rural areas. But the gap is the highest in Umrangso TC with 11.2 percent and the lowest is in Haflong and Mahur TCs having 9.6 percent in each towns.

TABLE-25
NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN CD BLOCKS, 2001

Sl.No.	Name of C.D.block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

	District (Rural) Total:	**1,042**	**628**	**414**	**577**	**281**	**296**	**75.5**	**80.9**	**68.4**	**12.5**

The table indicates the number and percentage of Scheduled Castes literates and illiterates in CD Block. The percentage of literates is 75.5 percent and it is 80.9 percent for males and 68.4 percent for females in rural of the district. In CD Block level, the highest literacy rate is found in Jatinga Valley CD Block followed by Harangajao CD Block. The lowest literacy rate is seen in New Sangbar CD Block with 44.1 percent. The gap in male /females literacy rate is more in New Sangbar CD Block having 30.1 percent .The lowest gap is seen in Jatinga Valley CD Block. It is interesting to note that in this CD Block the literacy rate for females is more than males.

TABLE- 26

DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	3	6.1	11	0.7
1-10	0	0.0	0	0.0

	District (Rural) Total:	**47,404**	**28,431**	**18,973**	**56,994**	**25,077**	**31,917**	**55.8**	**65.3**	**45.8**	**19.5**

In the table, number and percentages of literates and illiterates of Scheduled Tribes by sex in CD Blocks are presented. The Scheduled Tribes numbering 47,404 persons are literates which form 55.8 percent literacy rate in the district. Male literates are 65.3 percent and females are 45.8 percent in rural of the district. The literacy rate is seen the highest in Harangajao CD Block with 67.8 percent and the lowest is in Diyung Valley CD Block having 48.7 percent. The detail in respect of male and females literacy rate in CD Blocks can be seen in the table itself' The gap in male/female literacy rate is 19.5 in the district. It is varied from the lowest 14.9 to 22.1 percent among all CD Blocks.

TABLE - 29
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	4	0.7	69	0.1

The table presents number and percentage of Main workers, Marginal workers and Non-workers by sex in Revenue Circles. In the district, percentage of total workers (Main and Marginal workers) is 37.3 percent which is higher than the state total workers rate of 35.7 percent. However, in the break up of total workers into Main workers and Marginal workers, the percentages are recorded in the district with 29.3 percent and 8.1 percent respectively. It is noticed in non-workers that the state percentage with 64.3 percent is higher than 62.7 percent of the district. In the distribution of workers and non-workers by sex, it is noticed that the male total workers which constitutes 48.6 percent predominate the female workers which is only 24.6 percent. In case of non-workers, however, it is vice-versa. It is observed that as usual, the female marginal workers predominate the male marginal workers.

Among the Revenue Circles, it is noticed that Mahur Revenue Circle records the highest proportion of total workers with 38.8 percent and the lowest is in Maibong Revenue Circle with 36.6 percent.

TABLE-32

Note: Percent of Worker to total worker are given in brackets

The table presents the distribution of workers by sex in four categories of economic activity in Revenue Circles. Out of the total workers of 70,199 in the district, the Cultivators form the biggest share with 48.9 percent followed by the category of Other workers with 43.8 percent. Agricultural Labourers form 4.9 percent of the total workers and lastly, Household Industry workers are very few in number and in percentage it is 2.4 percent of the total workers. In the male-female break up of total workers, it is observed that number of female workers predominate the male workers in category of Agricultural Labourer and Household Industry.

Among the Revenue Circles, it is noticed that in the category of cultivators, Mahur Revenue Circle recorded the highest proportion with 58.0 percent and the lowest is in Haflong Revenue Circle with 35.9 percent followed by Umrangso Revenue Circle. In Agricultural labourers, it is noticed that Mahur Revenue Circle recorded the highest 10.1 percent and the lowest is in Haflong Revenue Circle. The percentage of Household Industry workers are very nominal till then

the percentage of this category of workers is more in Maibong Revenue Circles with 3.2 percent in each and this type of female workers are more than male workers in the district. The other workers, however, form the second biggest group of workers among all categories. Haflong Revenue Circle stands in the highest position among all Revenue Circles which constitutes 59.3 percent followed by Umrangso Revenue Circle with 41.0 percent. The lowest is noticed in Mahur Revenue Circle with 30.2 percent.

Note: Percent of Worker to total worker are given in brackets

The table shows category with number of workers by sex and their percentage in each CD Blocks. Out of 50,698 total number of workers in rural of the district, a large number of persons take cultivation as their main work The other categories of workers viz, Other workers and Agricultural Labourers record 24.4 and 6.5 percent respectively. There are a few people in the district who took household industry either as main work or as marginal work and the percentage of these workers shows only 2.7 percent. As discussed in the previous table, females workers in Household Industry category are more than males workers in terms of absolute figure and also in percentage but males workers in Agricultural

Labourers are more than female workers but the percentage female workers against Cultivator and Agricultural Labourers are above the male percentage.

In all CD Blocks in the district, people are found to be engaged in all four categories of works and largely in cultivation.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table shows the different amenities that are enjoyed by villages with its total number. Out of 605 inhabited villages in the district 93.4 percent villages are having access to education and 45.8 percent in the district are having access to improved drinking water. Power supply to the villages shows that 32.6 of the total villages have electricity. However, 25.1 percent of villages are having access to transport communication facility and 26.4 percent of villages are having access to approach by pucca road. Most of the villages are not having access to medical facility, Out of 605 villages only 67 or 11.1 percent villages recorded as having access to medical amenity. Very few villages are having access to facility of post office and telephone with 12.2 and 2.5 percent respectively. The other facilities like bank and agricultural credit societies are not available almost in all villages. The number of villages recorded as having access to bank is only 2 villages and the same number against in agricultural credit societies also.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

In the table it is seen that the highest 95.1 percent population of all CD Blocks received the benefit of education. The second highest 51.6 percentage of people of the district gets amenity of improved drinking water and the third highest 39.6 percent population of the district receive power supply. The number of people having access to medical facility are very few. Out of 128,644 rural population in the district, 22,209 or 17.3 percent people are having access to medical amenity. However, 33.4 percent population are having access to transport communication facility and 31.1 percent are having access to approach by pucca road. People having access to post offices form only 15.9 percent and those having access to telephone form only 1.5 percent from the total population. Most of rural people in the district do not have access to bank and agricultural credit societies. Agricultural credit societies are not available in most of CD Blocks.

6. Banks				
(a) Commercial Bank	57	82	431	570
(b) Cooperative Bank	77	82	433	592
7. Agricultural Credit Societies	34	42	527	603

Out of total villages of the district, 40 villages have not availed facility of primary school but availed such facility at places located in three different distance ranges. Similarly Degree college facility is availed by 603 villages at places situated at distance range of less than 5kms, 5-10 kms and 10 kms and above. Medical, Post Office, Telephone, Bus service, Bank and Agricultural Credit Societies facilities which are not available in villages are enjoyed at places located at different distance ranges.

TABLE -40

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available			
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	46	42	6	7	0	17	18	0	18
	(100.0)	(91.3)	(13.0)	(15.2)	(0.0)	(37.0)	(39.1)	(0.0)	(39.1)

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or therwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The table indicates that availability of educational facility is found more in villages where less number of people resided. The medical facility is availed by more villages having population in the range of 1-499 persons. Improved drinking water facility is recorded available in 255 villages having population in the range of 1-499. In case of other facilities, less number of villages in each population ranges have availed Post Office Telephone, Bank and Agriculture Credit Societies facilities. Altogether 160 villages having population in various population ranges enjoy the facility of approach by pucca road. There is no village having 5,000+ population.

TABLE- 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Diyungbra	139	2,822	30	21
2	New Sangbar	77	12,995	38	4
3	Harangajao	88	19,303	41	2
4	Jatinga Valley	124	35,131	32	12
5	Diyung Valley	177	9,666	52	16
	District Total:	**605**	**79,917**	**37**	**9**

Note : - Cultivable area = irrigated area + unirrigated area

The table indicates that total areas of the district as per Village Directory is 79917 hectares of which 37.4 percent land is cultivable land and 9.0 percent is irrigated land. A big area is covered by Jatinga Valley CD Block having 31.9 percent cultivable land. Diyung Valley CD Block has the highest 51.9 percent of cultivable land out of its total area. However, the highest percentage of irrigated area to total cultivable area is seen in Diyungbra CD Block and the lowest is seen in Harangajao CD Block with 2.3 percent

TABLE- 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl.No	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Haflong (TC)	14.1	6.2	7.9	44.9	0	0.3	25.4	5.4	13.8
2	V Mahur (TC)	8.2	2.1	6.1	8.2	6.8	0.2	0	0	1.2
3	V Maibong (TC)	12.1	12.1	0	12.1	8.2	2.7	0	0	1.2
4	V Umrangso (TC)	7.2	5.4	1.8	5.7	4.1	0	0	0	1.6
	District Total	**12.1**	**6.4**	**5.7**	**30.8**	**2.4**	**0.5**	**15.5**	**3.3**	**8.9**

Per capita receipt in statutory towns of the district is Rs 12.1 for urban areas of the district while per capita expenditure is Rs 30.8 which is higher than per capita income. All towns have more or less similar per capita income as well as expenditure except Dokmoka TC. However, in case of Haflong per capita expenditure is much more than other towns. The detail per capita income and expenditure head wise against each town can be seen in the table.

TABLE-44
SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Haflong (TC)	10.7	5.2	0.3	0.3	0.3
2	Mahur (TC)	16	14.4	4.8	1.6	0
3	Maibong (TC)	5.2	3.9	1.3	1.3	1.3
4	Umrangso (TC)	7.7	6.6	3.3	2.2	1.1
	District Total:	**10.1**	**6.2**	**1.3**	**0.8**	**0.5**

In statutory towns of the district, there are 10.1 number of primary school per 10,000 population in average and 6.2 number for Junior Secondary/Middle, 1.3 number for Secondary / Matriculation. The Secondary School and college are less than 1 number per 10,000 thousand population of the towns.

TABLE-45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl.No	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Haflong(TC)	30
2	Mahur(TC)	16
3	Maibong(TC)	39
4	Umrangso(TC)	33
	Distrct Total	30

As per table it is seen that number of beds in hospitals are quite a few in towns of Karbi Anglong district. Among four towns, Maibong TC recorded the highest number of beds with 39 for each ten thousand population and the lowest number of beds in Mahur TC with 16 per ten thousand population. In other towns, there are 33 beds in Umrangso TC, 30 beds in Haflong per 10,000 population . Average number of beds in the district is 30 per ten thousand population.

TABLE-46
PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Sl. No	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Haflong TC	0	800	0
2	Mahur TC	0	0	0
3	Maibong TC	0	0	0
4	Umrangso TC	0	350	0
	District Total	**0**	**1,150**	**0**

In the district, out of all statutory towns of the district, slum population is found in Haflong and Umrangso TCs. Total slum population of the district is 1,150 of which ther are 800 in Haflong and 350 in Umrangso TCs. The slum population is less in number in comparison to the total urban if the district.

TABLE-47
MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Haflong (TC)	Nil	Ginger
		Nil	Bamboo
		Nil	Timber
2	Mahur (TC)	Nil	Ginger
		Nil	Chilles
		Nil	Wood
3	Maibong (TC)	Cloth	Mustard Seeds
		Furniture	Tea
		Nil	Cotton
4	Umrangso (TC)	Cement	Cement
		Lime	Timber
		Nil	Nil

Most important commodities exported out and manufactured in towns are presented in the table. Important commodities manufactured are cloth, furniture, cement and lime in two towns of the district. Exported commodities are cement, ginger, Timber tea etc.. In Umrangso town there is cement factory and as such cement is produced and exported from the town. In two towns, there is no manufactured commodity but have some commodities for export which can be seen in the table.

Inset Tables Based on Household Amenites Data :-

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table indicates households by tenure status and number of room occupied in the district by Scheduled Castes and Scheduled Tribes as well as for the district. The households having owned houses with two rooms are more for Scheduled Castes and households having houses with one room are more for Scheduled Tribes. But in urban areas households of Scheduled Castes are more having houses with one room and in case of Scheduled Tribes the households having houses with three rooms are more.. In case of rented houses, Scheduled Castes and Scheduled Tribes households have more houses with one room. In case of others houses, Scheduled Castes households are more having houses with one room in total and for Scheduled Tribes, the households are more having houses with two rooms.

TABLE-49

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sl. No	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

	District total	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnticks, wood etc. are used for roofs.

In NC Hills district, the percentage of households having permanent houses is more in Haflong Revenue Circle followed by households having semi permanent houses. The percentage of households with temporary houses is more in Maibong Revenue Circle than households having permanent and semi permanent houses. In case of rural areas, the percentage of households having permanent houses is found more in Haflong Revenue Circle. Similarly the percentage of households with semi permanent houses is seen more in same Revenue Circle in rural and households for temporary houses is more Maibong Revenue Circe than other Revenue Circles. In urban areas however, the percentage of households having all type of houses are found more in Haflong Revenue Circle.

TABLE 50

PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

		U	1,849	664	35.9	1,403	75.9	1,066	57.7	1,752	94.8	1,084	58.6
Jorhat District Total:		**T**	**38,589**	**14,133**	**36.6**	**12,848**	**33.3**	**8,509**	**22.1**	**23,758**	**61.6**	**11,550**	**29.9**
		R	**25,728**	**6,741**	**26.2**	**3,480**	**13.5**	**2,454**	**9.5**	**11,354**	**44.1**	**3,905**	**15.2**
		U	**12,861**	**7,392**	**57.5**	**9,368**	**72.8**	**6,055**	**47.1**	**12,404**	**96.4**	**7,645**	**59.4**

The table indicates number and percentage of households of each Revenue Circle having enjoyed certain amenities. It can be seen that the percentage of households which have enjoyed improved drinking water facility is more in Haflong Revenue Circles whereas it is considerably low with 17.3 percent in Maibong Revenue Circle. In case of electricity facility, the highest 49.3 percent households have this facility in Haflong Revenue Circle and the lowest percentage of households which enjoyed electricity facility is found in Maibong Revenue Circle with 21.2 percent. The percentage of households having bathroom facility in comparison to other facilities is less in all Revenue Circles. The households of Haflong Revenue have enjoyed bathroom facility by the highest 32.5 percent households. The percentage of households having toilet facility is the highest in Haflong Revenue Circle with 79.0 percent. Incase of drainage facility also, it is the highest in Haflong Revenue Circle with 48.3 percent Hence it is seen that more households of Haflong Revenue Circle enjoyed all facilities than other Revenue Circles. All facilities enjoyed by households in urban is more in all Revenue Circles than that enjoyed in rural.

TABLE -51

The table indicates the number and percentage of households of each Revenue Circles by type of fuel used for cooking. The table depicts that the majority of households in the district use fire wood for cooking followed by LPG. The use of LPG by households are more in urban areas. A sizeable number of households take the help of kerosene in cooking their meals. The use of other fuels is very limited in the district. The use of cow dung cake is very limited. The electricity is also not used by almost all households as a source of cooking in the district only 989 or 2.6 percent households use electricity in cooking in entire district. The number and percentage of households which used different cooking fuels can be seen in the table itself. There is 111 or 0.3 percent households in the district which have no any cooking arrangement in their houses.

TABLE -52

NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Sl. No	Tahsil	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Availability of household assets

The table shows the number of households who have availed banking services and the number of households having some specified assts as shown in the table. Out of total households of the district, a total of 12,899 households have availed banking services. The banking services availed by the households are more in rural areas than that of urban areas. In Revenue Circle level, the banking services availed by the households are more in Haflong Revenue Circle followed by Maibong Revenue Circle.

Availability of all assets mentioned in the table except r bicycle are more for the households of Haflong Revenue Circle. However, availability of bicycle is more in Umrangso Revenue Circle than Haflong Revenue Circle. A total of 22,162 households are found without having none of specified assets in the district.

XXXXXXXXXXXXXXXXXX

IX. Major social and cultural events, natural and administrative developments and significant activities during the decade:-

Festivals either religious festivals or special festivals enliven the lives of the people. The Kacharis of the district observe the religious festivals which are different from those observed by other Hindus. They have only a faint idea about Hindusm. Dimasa Kachari have their own Gods and Goddesses and their culture has no Hindu Gods except Satyananarayana inspite of some of the deities like Shivrai and Ramachandi have identified with the Siva and Kali of the Hindu mythology. Offerings in the form of fruits and flowers are usually offered at the time of worship of Satyanarayana, instead of animal which is a must in their traditional way of worship. Though the Dimasa consider themselves as Hindu, the notion toward their traditional faith and belief can not be altered. Their traditional religion is built around natural phenomena due to their extreme dependency on nature. The nature Gods and area Gods consist of six Gods laid from Six eggs known as Shivray, Aluraja, Naikhuraja, Woaraja, Gunyung Braiyung and Hamiado where men were created and from the seventh egg came out the evil spirit. Besides nature Gods and area Gods, the Dimasa Kacharis have strong belief in the existence of various deities, spirits and ghosts scattered around their physical environment who control their life to a great extent. They also have the concept of supreme being and rebirth where they think that there is an all Creator living in the heaven and called him Madai.

'Basu' the harvest festival is the major festival of the Dimasa cultural life and it is observed between November and March of the following year, depending on the harvest seasons of the particular locality who practices Jhum cultivation and wet cultivation. Basu, is the festival taken part by the whole community of the village irrespective of sex and age. During the observance of the festival, young men and women cook and eat their food together. The old men however, relaxed and prepare bamboo mugs for drinking rice-beer and make baskets required for the feast. The festival is a very joy full and dance is usually accompanied with flute and drums throughout the night amidst the warm bonfire in the dancing ground.

Another cultural activities of the Dimasa youngsters is Nodrang, a bachelor's dormitory. It is a long house having sleeping arrangements for the bachelors. For entering into a Nodrang, no formality or initiation ceremony is required and it is meant only for bachelors and it is used as club house of the village. There is no dormitory for the spinsters and the women are not allowed to enter the Nodrang.

In the district some administrative development have been taken place. A new Revenue Circle Umrangso and town Umrangso have been come up in the district during the decade. But the administrative boundary of the district has not changed. Umrangso Revenue Circle is created out of Haflong Revenue Circle. Some significant activities have been taken up by the Government during the decade.

(x) Brief description of place of religious, historical and archaeological importance and places of tourist interest in the district :-

Remained obscured, as if were, from the other areas, NC Hills district has substantial ground to attract people from outside from the viewpoints of religious, historical and archeological importance.

Khorongma :-

In Dimasa Kachari 'Khorong' means barrier and 'ma' means big. If therefore, means a strong big fort. The powerful garrison, if is said, of the Kachari King used to be kept in it. Mention may be made of Tularam , the famous king. It is the village of the 'Pnar' chief who was famous for construction of three notable artificial lakes.

All these artificial lakes have added to the beauty of surrounding areas which are still in existence.

Garampani :-

It is situated on the right bank of the Kopili river at about 122 Kms on the Shillong Silchar road. It is an exquisitely beautiful place for tourists. Apart from the lovely natural beauty of the place, it has a hot water spring. There is a Kund (Whole) in the name of 'Anunsuya' donated by the then Governor of Assam to commemorate the name of his wife. People can have hot and cold bath there and angling in the river Kopili. There is ample scope for hunting in the neighboring dense forests. The Kopili Hydro-Electric Project, when completed, will have an added beauty to the place.

Shemkor :-

This is a Kachari village. 'Shem' means salt and 'Kor means hole. Salt was used to be made here in the remote past. It is about 28 kms east from Maibong.

As has been mentioned in earlier paragraphs the N.C. Hills District was left out in the tourist map of India, as a result of which the area is still unknown to the people of India. This might be attributed as because of the presence of transport bottleneck. The places are as under.

Haflong :-

Haflong is the district head quarters and a beautiful hilly town connected by its natural beauty and pleasant climate. For administrative convenience the British undertook some arduous task of constructing railway line through 36 tunnels from north to south along the courses of Mahur, the Diyung and the Jatinga rivers. This railway line connects Nagaon and Cachar district. This has created a landmark in the history of railway administration. As a measure of beautification the British dug an artificial lake and its beauty is no less inferior to the ward lake of Shillong.

Jatinga :-

Jatinga is about 10 kms from Haflong town. The area is inhabited by 'Pnars' of the Khasi tribes hailing from Jaintia Hills of Megahlaya.

The village has figured prominently only in the recent years following a sensational news that in foggy nights during September to November every year birds from different unknown places of the world flock to the valley and they are mostly attracted by light during night. They flock to the light and commit suicide. This has created a sensation to the ornithologist and made them visit the place to study the strange phenomenon. No scientific explanation to this strange behaviour of the birds has so far come to light. In the long run after strenuous investigations spread over a considerable time it has been opined that the birds are killed by the villagers for their meals and means of livelihood. The Govt. is making an all out effort to caution the villagers not to kill the birds so that every humble and nimble objects of nature can be presented and ecological balance maintained.

(xi) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the District:-

North Cachar Hills district is noted for its rich forests resources and it plays a vital role in the economy of the district. The hill people who are famous for shifting cultivation, (Jhuming) get fresh land every year provide by forests. People procure from forests all the materials required for construction of houses like timber, reed, bamboo, cane, etc. as well as fuel to cook their food, and as fodder for the cattle. Many saw mills and plywood factories within the district and outside the district procure timbers from these forests. The forests contains valuable trees and plants and rich in variety of species such as Teak, Hillock, Gamari, Sam, Sonaru, Ajhar, Poma, Bogi Poma, Shalu, Titasapa, Bansom, Amri, Koroi, Khokan, etc. and huge forests produces such as firewood, bamboo, cane, thatch etc. Bamboo resources of the district are rich enough to support a Paper Mill in the area. The Bengal Paper Mill and the Hindustan Paper and Pulp Mill at Jagiroad get their raw materials from the forests of the district.

Forests are to be protected from exploitation and mass destruction. The Supreme Court judgment in 1996 has banned the export of raw timber from the northeast. Its positive point is that it is based on the understanding that the forests in northeast has some specific features and it needs a policy to reflect its specificity. The Ministry of Environment and Forest formulated a forest policy for the northeast in recently based on recommendation of the Shukla Commission, 1997 to study the basic services in the region. However, it is yet to be finalized. To achieve this, the forest authorities and others like the Autonomous District Councils have implemented various schemes like Social Forestry etc. The people should have vested interest in treating the forests as their livelihood and protecting them.

Agriculture is also another source of income of the people of the district. They produce rice of different kinds. The people mostly depends upon cultivation. They cultivates fruits, vegetable, potato, bamboo etc. Maize is the second important crop cultivated in the district.

The district has produced many writer, artists, sportsmen, scholars and social workers to the state as well as to the nation. The people of the district can not forget them in the future for their contributions and sacrifices that they offered in the interest of the nation.

(xii) Scope of Village Directory and Town Directory - Column heading wise explaination and coverage of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market/hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply,

storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of respective jurisdiction.

****

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited, villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B

The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.

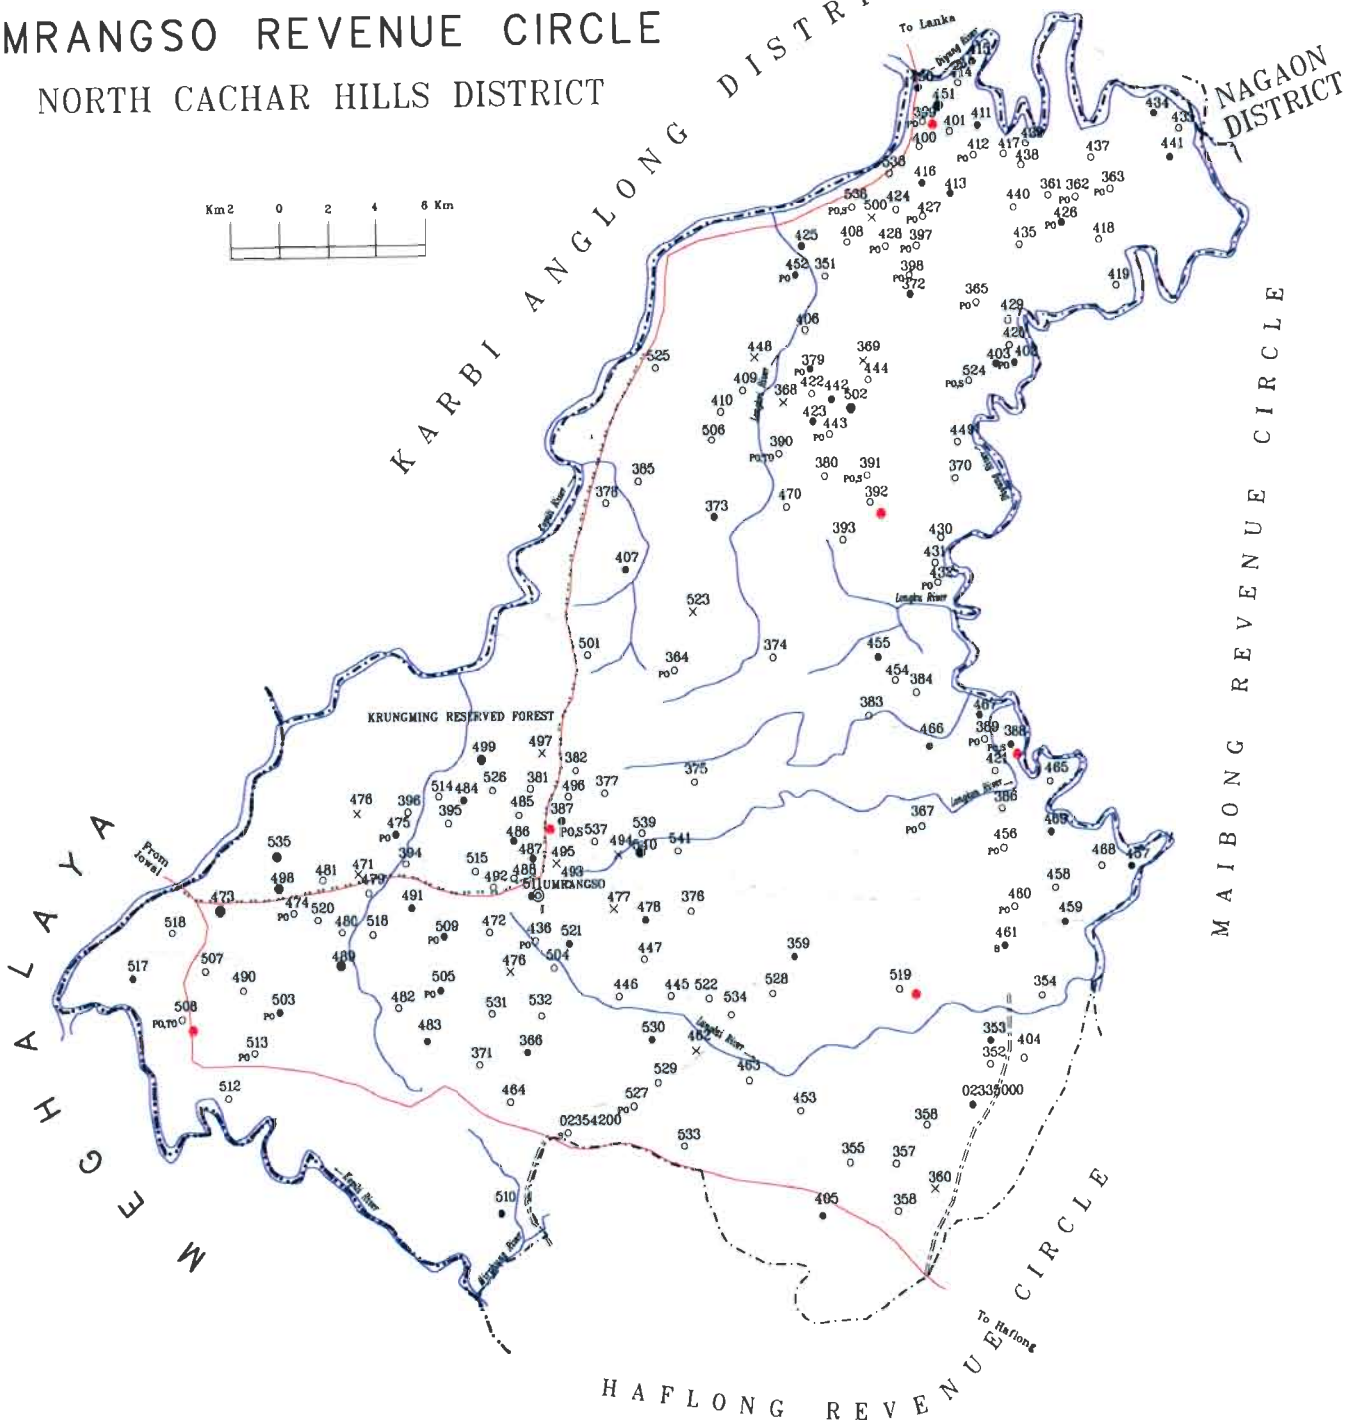

Appendix-VIII Indicates CD Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

List of villages merged in towns and outgrowths at 2001 Census

APPENDIX 1A - Village Directory
Villages by number of Primary Schools

Name of the District : NORTH CACHAR HILLS

Serial number	Name of C D Block	Total number of inhabited villages	Number of primary schools				
			None	One	Two	Three	Four +
1	2	3	4	5	6	7	8
1	Diyungbra	139	14	124	1	0	0
2	New Sangbar	77	4	72	0	1	0
3	Harangajao	88	11	76	1	0	0
4	Jatinga Valley	124	3	115	4	1	1
5	Diyung Valley	177	8	159	10	0	0
	District Total:	**605**	**40**	**546**	**16**	**2**	**1**

APPENDIX 1B - Village Directory
Villages by Primary, Middle and Secondary Schools

Name of the District : NORTH CACHAR HILLS

Sl.No.	Name of C D Block	Total number of inhabited villages	Type of educational institutions available			
			No School	At least one primary school and no middle school	At least one primary school and one middle school	At least one middle school and one secondary school
1	2	3	4	5	6	7
1	Diyungbra	139	14	68	57	2
2	New Sangbar	77	4	50	23	4
3	Harangajao	88	11	56	21	5
4	Jatinga Valley	124	3	86	35	9
5	Diyung Valley	177	8	141	28	13
	Total:	**605**	**40**	**401**	**164**	**33**

APPENDIX 1C - Village Directory
Villages with different sources of drinking water facilities available

Name of the District : NORTH CACHAR HILLS

Sl.No.	Name of C D Block	Number of villages with different sources of drinking water available				
		Only tap	Only well	Only tube well	Only handpump	More than one source only from tap, well, tube well, handpump
1	2	3	4	5	6	7
1	Diyungbra	0	19	7	0	11
2	New Sangbar	13	17	1	0	22
3	Harangajao	31	3	3	0	5
4	Jatinga Valley	9	10	1	0	50
5	Diyung Valley	4	20	0	0	50
	District Total:	**57**	**69**	**12**	**0**	**138**

APPENDIX II - Village Directory
Villages with 5,000 and above population which do not have one or more amenities

Name of the District:NORTH CACHAR HILLS

Sl. No.	Name of village	Location code number	Name of C D block	Population	Amenities not available (indicate N. A. where amenity not available)						
					Senior Secondary School	College	Primary Health Sub Centre	Tap drinking water	Bus facility	Approach by Pucca road	Commercial Bank
1	2	3	4	5	6	7	8	9	10	11	12

NILL

APPENDIX II - A Census Town

Census Towns which do not have one or more amenities

Name of the District:NORTH CACHAR HILLS

Sl. No.	Name of census town	Location code number	Name of C D Block	Population	Amenities not available (indicate N. A. where amenity not available)						
					Senior Secondary School	College	Health Centre	Tap drinking water	Bus facility	Approach by Pucca road	Banks
1	2	3	4	5	6	7	8	9	10	11	12

No Census Town Available in the District.

APPENDIX III - Village Directory

Land utilisation data in respect of Census Towns / non-municipal towns

Name of the District : NC Hills

Sl.No.	Name of Census town and CD Block within brackets	Land use (i.e., area under different types of land use in hectare)					
		Total area	Forest	Irrigated by source	Unirrigated	Culturable waste(including gauchar & groves)	Area not available for cultivation
1	2	3	4	5	6	7	8
1	Umrangso (TC)						
2	Haflong (TC)						
3	Mahur (TC)						
4	Maibong (TC)						

APPENDIX IV - Village Directory

CD Block wise list of inhabited villages where no amenity other than drinking water facility is available

Name of the District : NORTH CACHAR HILLS

Sl.No.	Location code number	Name of village
1	2	3
Name of CD Block: Diyungbra		
1	02335300	Amrudisa (Amrdisa)
2	02335500	Purana Dimainu (P. Dimhainu)
3	02337200	Choto Longfer

APPENDIX VIII - VILLAGE DIRECTORY

Number of villages under each Gram Panchayat (CD Block wise)

Name of the District: NC Hills

Sl. No.	Name of gram panchayat and location code number	Area of gram panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Income and expenditure of panchayat/Gram panchayat(in Rs.' 000)	
			Number	Location code numbers					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11

(Data is not available for this apendix)

APPENDIX IX - VILLAGE DIRECTORY

Statement showing number of girls schools in the villages

Name of the District : NC Hills

Serial number	Name of CD block	Village location code number	Name of village	Number of girls school			
				Primary School	Middle School	Matriculation / Secondary School	Higher Secondary / PUC / Intermediate / Junior college
1	2	3	4	5	6	7	8

(Data is not available for this apendix)

TOWN DIRECTORY

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i) Municipal Corporation	M. Corp.
(ii) Municipal Committee	MC
(iii) Municipal Council	M Cl
(iv) City Municipal Council	CMC
(v) Town Municipal Council	TMC
(vi) Municipal Board	MB
(vii) Municipality	M
(viii) Cantonment Board/Cantonment	CB
(ix) Notified Area	NA
(x) Notified Town	NT
(xi) Notified Area Committee/ Notified Area Council	NAC
(xii) Notified Town Area	NTA
(xiii) Industrial Notified Area	INA
(xiv) Industrial Township	ITS
(xv) Township	TS
(xvi) Town Panchayat	TP
(xvii) Nagar Panchayat	NP
(xviii) Town Committee/Town Area Committee	TC
(xix) Small Town Committee	ST
(xx) Estate office	EO
(xxi) Gram Panchayat	GP
(xxii) Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type,it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance. School,. Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

STATEMENT-I
Status and Growth History

Sl.No.	Class, name and 'civic status	Location code 'number	Name of Taluk/ Tahsil/ Police Station/Island etc.	Name of CD Block	Area (in sq. km.)	Number of households incl. Houseless households	Population and growth rate (in brackets) of the town at the Censuses of

4	V Maibong (TC)	7,738 (+31.2)	3,869.0	-	747	803

Statement -I gives the town wise by class. name, civic status with area in square kilometer, population and growth rate in each Census from 1901 to 2001. Density and sex ratio are indicated in each town. In the district there is no town of the status of class I add II . Haflong TC is the only Class III town in the district with the total population of 36,302 in 2001 and the decadal growth rate is +37.7 percent. In the district, however, there are three class V town.Haflong TC is the oldest town in the district, it has registered 1,471 population in 1941 Census and has increased to 36,302 in 2001 Census having an area of 12.8 sq. km. The highest density is recorded in Maibong TC with 3869 persons per sq km and the second highest density is seen in Haflong TC with 2838 persons. The sex ratio in Umrangso TC is the highest with 823 in 2001 Census among all towns.

STATEMENT-II
Physical Aspects and Location of Towns, 1999

Sl. No.	Class, name and 'civic status ' of town	Physical aspects			Name of and road distance in kilometer(s) from		Name of and road distance in kilometer(s) from 'Sub-division /Taluk/	
		Rainfall (in mm)	Temperature (in centigrade)				Tahsil / Police station/Development Block/ Island HQ.	Nearest city with population of one lakh and more
			Maximum	Minimum	State HQ.	District HQ.		
1	2	3	4	5	6	7	8	9
1	V Umrangso (TC)	2250	32.0	8.0	Guwahati (272)	Haflong (112)	Umrangso (0)	Nagaon (130)
2	III Haflong (TC)	2330	37.3	6.2	Guwahati (368)	Haflong (0)	Haflong (0)	Silchar (110)
3	V Mahur (TC)	2020	37.3	8.2	Guwahati (346)	Haflong (29)	Mahur (0)	Silchar (110)

Sl.No.	Class, name and 'civic status ' of town	Name of and road distance in kilometer(s) from			
		Nearest city with population of five lakh and more	Railway station	Bus facility	Navigable river/canal (if within ten kilometers)
1	2	10	11	12	13
1	V Umrangso (TC)	Guwahati (272)	Lanka (70)	Yes (0)	-
2	III Haflong (TC)	Guwahati (368)	Haflong (0)	Yes (0)	-
3	V Mahur (TC)	Guwahati (346)	Mahur (0)	Yes (0)	-
4	V Maibong (TC)	Guwahati (277)	Maibong (0)	Yes (0)	-

Statement -II indicates the physical aspects and location of towns as on 1999. Prior to Census of India, 2001 data of physical aspects like rainfall, temperature are collected from different offices in the district. From the statement, it is observed that the highest rainfall of 2330 mm is received in Haflong town in the district and in other towns the rainfall is almost same. In the measurement of temperature in towns of the district, it is also noticed that the maximum temperature of 37.3 is noticed in two towns and minimum temperature of 6.2 centigrade is seen in Haflong town. Haflong TC is far from the state headquarters with distance of 368 kilometers and the nearest town to the state headquarter is Maibong TC with 277 kilometers. The distance range from district headquarter to all the towns within the district varies from 0 kilometer to 112 kilometers respectively. The nearest city with five lakh and more is Guwahati from all towns and the nearest city with one lakh and more population is Nagaon and Silchar from respective towns. All towns have Bus facilities connected with towns which make easier for transport. Haflong, Mahur and Maibong TCs are connected with rail with station. No town has navigable river within 10 kms.

STATEMENT - III
Municipal Finance, 1998-99

Sl.No.	Class, name and civic status of town	Receipt (in Rs.'000)						
		Receipt through taxes, etc.	Revenue derived from municipal properties and power apart from taxation	Government grant	Loan	Advance	Other sources (specify)	Total receipt
1	2	3	4	5	6	7	8	9
1	V Umrangso (TC)	494	-	165	-	-	-	659
2	III Haflong (TC)	2,242	1,479	165	1,219	-	-	5,105
3	V Mahur (TC)	133	81	-	300	-	-	514
4	V Maibong (TC)	933	-	-	-	-	-	933

STATEMENT-III
Municipal Finance, 1998-99

Sl.No.	Class, name and civic status of town	Expenditure (in Rs.'000)						
		General administration	Public safety	Public health and conveniences	Public works	Public institutions	Others (specify)	Total expenditure
1	2	10	11	12	13	14	15	16
1	V Umrangso (TC)	373	80	-	-	-	71	523
2	III Haflong (TC)	7	31	102	9,231	1,969	4,972	16,314
3	V Mahur (TC)	423	-	15	-	-	75	513
4	V Maibong (TC)	638	68	206	-	-	22	934

Statement-III Shows the Municipal finance for the period during 1998-99 for statutory towns. The highest receipt indicates in Haflong TC with a total Rs.5,105 thousand but a total expenditure of Rs 16,314 thousand in same town is noticed as the highest expenditure among towns in the district. The revenue from municipal properties, government grant and loan form the sources of receipt in all towns.The general administration, public works, other etc. are the main heads where the expenditure is mostly spent in towns Haflong and Maibong TCs show that the amount of receipt is less than the amount in expenditure side. In other towns there is no deficit budget.

STATEMENT-IV
Civic and other Amenities, 1999

Sl. No.	Class, name and civic status of town	Population (2001 Census)	Population 2001 Census		Road length (in km. (s))	System of sewerage	Number of latrines		Number of latrines	
			Scheduled Castes	Scheduled Tribes			Total	Water borne	Service	Others

4	V Maibong (TC)	ST	TW (35)	OHT	Yes	767	2	147	50	75

Statement-IV shows civic and other amenities as on 1999. Among the towns in the district, the highest 680 number Scheduled Castes persons is noticed in Haflong TC and the highest number of Scheduled Tribes population is found also in same town with 16,544 persons. Haflong TC has more road length of Kuchha road and in Mahur town pucca road is more than other towns and in all other towns also both pucca and kuchha roads are available in limited scale in the district. System of sewerage in all towns in the district is OSD and method of disposal of night soil is mostly St and Pt Number and type of latrine against each towns can be seen in the statement The source of water in the towns are mostly TW, TK and T. Two towns in the district are having the fire fighting service. All towns in the district are having electrification connections of which the highest number of connections are noticed in domestic purposes.

STATEMENT-V
Medical, Educational, Recreational and Cultural Facilities, 1999

3	V Mahur (TC)	-	-	2	PL(2) RR(2)
4	V Maibong (TC)	-	-	2	PL(2) RR(2)

Statement-V shows the availability of medical facilities including hospitals, dispensaries, T.B. clinics and educational facilities which include right from Medical Colleges, Engineering Colleges, Polytechnics recognized short hands etc. to Primary Schools and adult literacy classes. Availability of medical institutes with bed can be seen against each in the statement The arts/ science and commerce degree and law college are available in Haflong TC. At Mahur town, there is no any college. In the district there is no Medical or

Engineering college. The number of higher secondary, matric, middle and primary schools can be seen in the statement against each towns. There is adult literacy centre in all towns . In all towns there is no working women's hostel. Recreational and cultural centres, particularly cinema hall and community halls are there in some towns only. Library with reading room are available in all towns.

STATEMENT-VI

Trade, Commerce, Industry and Banking, 1999

Sl. No.	Class, name and civic status of town	Name of three most important commodities exported			Name of three most important commodities manufactured			Number of banks	Number of agricultural credit societies	Number of non-agricultural credit societies
		1st	2nd	3rd	1st	2nd	3rd

3	V Mahur T.C.	-	-	-	-	-	-
4	V Maibong T.C.	-	-	-	-	-	-

Statement-VII shows the civic and other amenities in slums areas of statutory towns as on 1999. All towns in the district are statutory towns but two towns namely Haflong and Umrangso TCs have slum population. All slum area of town are not notified. The number of slum population found in these towns are 350 and 800 with 62 and 87 households respectively. There is no kms paved road in both towns. The slum areas in the towns have the system of sewerage OSD and the method of disposal of night soil is Pt and St. The private latrines are available is in all slum area but these are mostly confined to water borne and service latrines. There is no tap connecting in slum areas of both the towns. The slum area of the Haflong town has electric connections and all connections are for domestic purposes only. The road lighting points are there in slum areas of both towns.

Appendix to Town Directory

Towns showing their outgrowths with population

District :North Cachar Hills

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
1	Umrangso (TC)	9,131	-	-
2	Haflong (TC)	36,302	-	-
3	Mahur (TC)	6,264	-	-
4	Maibong (TC)	7,738	-	-

There is no outgrowth in any of the Towns of North Cachar Hills District as all the four towns with Town Comitee status.

Part B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has beenpresented in to four categories. One of the novel features restructured slightly in the 2001 Census as compared to thatof the primary census abstract of 1991 census was the of 1991 Census. The nine-fold industrial classification of mainpresentation of data of the population of age group 0- workers given in the Primary Census Abstract of 19916 is continued in 2001 Census also. This will help the Census has been discontinued and its place, four-fold industrialdata users in better analysis and understanding of this classification of both 'main workers' and 'marginal workers'literacy data. are included. In 1981 census only main workers were

	Name of the Primary Census Abstract	Level of presentation

2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES

Annexure – I : -

Number of villages under each Gram Panchayat (data has not been collected)

Annexure – II:-

Note on Fertility and mortality :-

Fertility, Mortality and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever married women and the last question was to only currently married women. The measures of fertility worked out are based on the F-Series Tables of 1991 Census pertaining of the Assam State. The definition and concepts of various measures are explained in earlier chapter in the head of Non Census concepts.

Annexure- III :

Various measures of fertility and mean age at marriage,1991 Census.

Fertility:-

As seen through various indicators of fertility in the district. It may be seen that GFR of 127, GMFR of 187, TFR of 3.8 and TMFR, 6.4 against the respective figures at state level are at 135, 190,4.2 and 6.0. Various measures of fertility and other fertility related data are presented in the following table.

Table -I
Various Measures of Fertility and mean age at Marriage 1991 Census

Sl.No.	Fertility Measure	North Cachar Hills district	Assam State
1	2	3	4
1	G.F.R.	127	135
2	G.M.F.R.	187	190
3	T.F.R.	3.8	4.2
4	T.M.F.R.	6.4	6
5	Crude birth Rate	29.7	31.5
6	No. children ever born per woman in age group (45-49)	5.5	5.2
7	Mean age at marriage	19.2	18.3
8	Child women ratio (0-4)	572	575
9	Child- women ratio (5-9)	694	735

The level of fertility for all measures are found low except TMER. The crude birth rate is also found low in the district than the state. The child women ration in both age groups is lower than that of the state. The number of children ever born per woman in age group 45-49 is higher than the state.

Table -II
District – wise various measures of Fertility and Mean Age at marriage, 1991Census

State/District	GFR	GMFR	TER	TMFR	CBR	No. of children ever born per ever married women in age- group 45-49	Mean Age at Marriage of currently married women
1	2	3	4	5	6	7	8
Assam	135	190	4.2	6	31.5	5.2	18.3
1. Dhubri	170	230	5.1	6.9	38.2	6.2	16.9

18. Tinsukia	165	225	5.1	6.9	37.5	4.7	18.6
19. Karbi Anglong	140	207	4.4	6.8	33.1	5.2	18.8
20. N. C. Hills	**127**	**187**	**3.8**	**6.4**	**29.7**	**5.5**	**19.2**
21. Karimganj	196	291	7.1	9.3	48.5	4.8	18.2
22. Hailakandi	136	196	4.2	6.4	32.1	5	18.2
23. Cachar	137	190	4.1	6.1	32.6	4.5	18.5

Mortality:

The mortality figures in the district confirms to the general theory of relation between fertility and mortality. The mortality rates are shown in the following annexure

Table--III
Age specific Marital Fertility levels in Assam and NC Hills district – 1991 Census

Age Group	District :- North Cachar Hills			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0.227	0.256	0.067	0.151	0.152	0.133
20-24	0.201	0.191	0.233	0.214	0.219	0.165
25-29	0.193	0.208	0.146	0.183	0.192	0.12
30-34	0.13	0.13	0.129	0.134	0.14	0.093
35-39	0.092	0.095	0.085	0.087	0.094	0.042
40-44	0.029	0.032	0.019	0.049	0.052	0.022
45-49	0.023	0.023	0.025	0.033	0.034	0.025

The Age specific Martial Fertility levels are found higher in some age groups in the district than the state in total. But in case of rural and urban these are found high in the district than the state. But only in case of urban in age group 40-44 it is seen low than the state.

Table-IV
Estimates of Child Mortality, 1991 Census.

Mortality measure	North Cachar Hills district	Assam state
1	2	3
Q-1		
Person	108	92
Male	109	96
Female	100	87
Q-2		
Person	112	101
Male	114	104
Female	113	98
Q-3		
Person	115	104
Male	116	106
Female	114	101
Q-5		
Person	118	116
Male	119	118
Female	116	115

Q (1) of the above Annexure shows the infant mortality rates and Q (2) , (3) and (5) indicate the size of child mortality in age group below 2,3,and 5 years respectively. It is seen in NC Hills district are higher than that of the state averages. But in of infant mortality in the district is exceptionally higher than the state. The health status in the district can be said as unsatisfactory in comparison to the state.

Annexure IV : -

Percentage distributor of migrants by place of birth/ place of last residence, 1991 and 2001 Census.
Migration:-

The detail data may be seen below in the following table.

Table-1
Percentage distribution of migrants by place of birth- 1991 Census, Assam

State/District	Total migrants			From other districts			From other states			From other countries

Compared to the state level totals, the share of migration from other district of the state in the total migrants is relatively higher whereas the share of migrants from other countries is 6.6 percent in the district against 14.6 percent in case of over all State. Migration from other district reveal that the female in migration is more than male in migration other districts and also in migration from outside the State.Similar data on migration in respect of migration classified by their place of last residence are presented in the following Table.

Table-2
Percentage distribution of migrants by place of birth- 2001 Assam

	4.1	7.7	2.8	2.0	3.8	1.4

From the above table it is seen that migrants from elsewhere in the district out side the place of enumeration consists of 62.0%,29.0% are from other districts 7.7% are from other state and 1.3% are from other countries of the total migrants .

Annexure V :

Brief account of main religions in the district/ table as per 1991 and 2001 Census.

Religion :-

A brief account of religious composition in the district along with state presented in the following table.

Table-I

Main religions in the NC Hills district and Assam state- 1991 Census.

District/State	Religion	Number of followers	Percent to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Assam	Total population	22,414,322	100	88.9	11.1
	Hindu	15,047,293	67.1	86.2	13.8
	Muslim	6,373,204	28.4	94.7	5.3
	Christian	744,367	3.3	96	4
	Buddhist	64,008	0.3	93	7
	Join	20,645	0.1	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8
NC Hills	**Total population**	**150,801**	**100**	**77.1**	**22.9**
	Hindu	109,959	72.9	77.8	22.2
	Muslim	3,340	2.2	52.5	47.5
	Christian	36,911	24.5	77.5	22.5
	Buddhist	439	0.3	84.5	15.5
	Jain	26	0	100	-
	Sikh	77	0.1	35.1	64.9

The figures in the above table show that compared to the state as whole the proportion of Hindus is more in the district. The Muslims who constitute about 28.4 percent of total population at state level but in the district their percentage is only 2.2 percent. Christian consists 24.5 percent as against 3.3 percent at State level which is also on higher side. Jain, Buddhists and Sikhs though are negligible in number in the district.

Table-II

MAIN RELIGIONS IN THE N.C. HILLS DISTRICT AND ASSAM STATE - 2001 CENSUS

District :-North Cachar Hills (20)

District/State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%

Age not stated	530	560	83	87.5	16.5	12.5	0	0	0	0

Note: Data on unspecified marital status are not taken into account but these are included in the figures shown in Col. No. No. 2 and 3.

A comparison of the district level figures of marital status with that of the state averages reveals that the percentage of never married males and females for devised/separated are higher than that of the state. But in case of male and female marital percentages in all other categories of marital status are found low in the district than the state percentage. The higher percentage of married male and female are seen in age-group 45-49 and 30-34 in the district as against the respective figure are found in age-group 45-49 and 35-39 in the state respectively.

A comparison of the district level figures of marital status with that of the State averages reveals that the percentage of never married males and females is higher than the state average. In case of married males and females the percentage is lower than the state average. In case of widowed males and females the percentage is lower than the State percentage. Again in case of Divorced/ Separated males percentage is higher and females percentage is lower than the state percentage .

The highest percentage of married males and females are recorded in the age group of 45-49 and 35-39 in the district being 93.7 percent and 90.2 percent respectively. The corresponding figures in the State level for males and females are recorded in the same age group. Never married males and females being 24.0 and 7.7 percent respectively in the district which is higher than the State percentage of 22.1 and 6.3 percent respectively.

Annexure VII:

Age, Sex and Education in the district, 1991 and 2001 Census.

Education and literacy rate

Age-group wise literacy rates for males and females in respect of both at state and district level are presented below in the following table.

Table-I

Note: 1. Percentage of literates is to total population.
2. All other percentages are proportion of literate population.

The literacy rates both for males and females are found higher up to 20-49 age-group in the district than the state. But it is found lower in age from 50 to 60+ in the district than that of the state. It is seen that the literacy rate for male is highest in age group 15-19 as in the state and for female in age grope 7-14 as against 15-19 in the state. Literacy rates are seen high up to middle level. In other educational levels literacy percentages are lower than the state.

30	Sema	10,346	0.0	0	0.0
31	Total of Other Mother Tongues	1,032,125	3.9	19,251	10.2

As can be seen from the above table, the number of persons speaking Dimasa consist of the major portion (33.7%), of total populationin the district, followed by Bengali with (14.4%), Zemi,(8.2%), Hmar(7.5%), Nepali(6.6%), Karbi(4.7%), Kuki(4.3%), Hindi(3.5%), and Assamese(2.9%).The population with all the other mother tongues each constitute a negligible percentage.

Annexure IX: Scheduled Castes and Scheduled Tribes population, 1991 Census.

Scheduled Castes

Out of 150,801 population of the district, 3,918 population are Scheduled Castes . The caste wise population of some prominent castes are presented below.

Table - I
Distribution of Scheduled Castes population among some prominent Scheduled Castes.
NC Hills district- 1991 Census.

Name of Scheduled Castes	Total Scheduled Castes population	Percentage	
		Percentage to total Scheduled Castes population	percentage to total population of the district.
1	2	3	4
1. Patni	1,110	28.3	0.7
2. Namasudra	574	14.7	0.4
3. Bhuinmali, Mali	705	18	0.5
4. Kaibarta or Jaliya	318	8.1	0.2
5. Dhupi or Dhubi	312	8	0.2
6. Mehtar, Bhangi	241	6.2	0.2
7. Other	658	16.8	-
8. Unclassified	82	-	0.4
9. All Scheduled castes	3,918	100	2.6
			(150,801)

N.B. 1. Other include Bansphor, Brittials - Bania/Bania, Dogla/Dholi, Hira, Jalkeot, Jhalo/Malo or Jhalo-Malo, Lalbegi, Mahara, Muchi/Rishi, Sutradhar and unclassified castes.
2. Brackulated figure is the total population of the district.

It is observed in the above table that Patni is the major caste in the district with a share of 28.3 percent of total Scheduled Castes population followed by BhuinMali, Mali 18.0 percent than Namasudra (14.7 percent).The remaining castes constitute less than 10.0 percent by each. The others consists of 16.8 percent. Out of total population only 2.6 percent is Scheduled Castes of which all castes consist of less than 1.0 percent by each.

Scheduled Tribes

The Scheduled Tribes constitute 65.5 percent of the total population of the district. The data for some Scheduled Tribes 'population of the district are presented below in the annexure.

Table - II
Distribution of Scheduled Tribes population among some prominent Schedule Tribes
NC Hills district, 1991 Census.

Name of Schedule Tribes	Total Scheduled Tribes population	Percentage	
		Percentage to total Scheduled Tribes population	percentage to total population of the district.
1	2	3	4
1. Dimasa/ Khachari	49,944	50.5	33.1
2. Any kuki tribes, Including			
(i) Biate,Biete (ii) Changsan	14,172	14.3	9.4
