BHUBAN BABA TEMPLE

The Bhuban hill is located in the forest reserve of Sonai Revenue Circle in the district of Cachar on a peak of 3000 fts. above sea level of the hill range. The Bhuban Baba Temple was probably constructed in between 12th and 13th century A.D. In the month of October during the period of lunar moon of the second day, the construction of the temple was completed and on this day the image of Siva-Parbati was placed by Maharaja Krishna Chandra in a highly pompous manner by offering worship to God Siva.

This temple is older than the Siva temple of Chandragiri which is also another famous temple situated in the same revenue circle. The appearance of faces of Siva-Parbati in the Bhuban Baba temple has a similarity of the face of Mongolians. The worship before image perhaps started from 1709 A.D. In some auspicious days of every year, the special worship has celebrated in the temple. The people coming from different places bow down their heads before the image of this renowned temple with a great dedication and devotion.

The Bhuban Hill is located in the forest reserve of Sonai Revenue Circle in the district of Cachar on a peal of 3000 fts. above sea level of the hill range. The Bhuban Baba Temple was probably constructed in between 12th and 13th century A.D. In the month of October during the period of lunar moon of the second day, the construction of the temple was completed and on this day the image of Siva-Parbati was placed by Maharaja Krishna Chandra in a highly pompous manner by offering worship to God Siva.

Annexure	VII	Age, sex and education in the district, 1991 and 2001 Census	624
Annexure	VIII	Distribution of different mother tongues returned in 1991 and 2001Census	627
Annexure	IX	Distribution of Scheduld Castes and Scheduled Tribes in 1991 Census	629

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage

enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

(P. Hazarika)
Director of Census Operations,
Assam, Guwahati.

DISTRICT HIGHLIGHTS - 2001 CENSUS

1. In Cachar district, Silchar Revenue Circle/ Tahsil is most populous having 580,803 persons while Udarbond Revenue Circle is the least populous circle having 104,865 persons.

2. Among the CD Blocks, Narshingpur CD Block has the highest number of population with 126,427 whereas the lowest is found Tapang CD Block with 47,222 persons

3. In the district there are 5 Revenue Circles and 15 CD Blocks which comprise 1,020 inhabited villages excluding 28 uninhabited villages.

4. The district comprises seven towns. Silchar MB is the most populous with 156,948 persons while Silchar Pt -X CT is the smallest in population with 4,926 souls.

5. While the highest number (106) inhabited villages are found in Narshingpur CD Block and the lowest (33) inhabited villages is found in New Silchar CD Block.

6. The largest village by area is Silcoorie Grant with 3,870 hectares of land and situates in Barjalenga CD Block while in the district, there are 5 villages which are the smallest villages in the area with one hectare of land in each. Out of these villages, 3 villages are in Rajabazar CD Block, one village in Kalain CD Block and one in Palanghat CD Block
7. The largest village by population is Silcoorie Grant with 19,263 souls which is situated at Barjalenga CD Block and the smallest village is Unsurvey Bhubannagar with two persons is under Palanghat CD Block.

8. The establishment of Medical College at Silchar town has extended medical help to the people of Barak Valley region and similarly the setting up of Central University in the district is an important land mark development in education.

9. The district is well known for her forest with various wild animals and its forest products

10. In the district, there are a few beautiful spots for picnic.

In the district there are 19 villages having 5,000 and above population. Out of these villages Barjalenga is the biggest in population having 19,263 persons and smallest is Rajabazar having 5,018 persons. Most of the villages have no above-mentioned amenities. All villages have no Senior Secondary School and college. Only three villages have Primary Health Centre each and no village possesses Primary Health Centre. Tap water is available in 12 villages. There are no Railway station in above villages. There are Commercial Bank facility in 3 villages. There are no Co-operative Bank facility in the above villages.

Statement 9 gives the houseless and institutional population of Revenue Circles for rural and urban. The population and number of households of both houseless and institutional are more in rural than in urban. Among the Revenue Circles, Silchar Revenue Circle with 136 houseless populations is the highest and the lowest is noticed in Lakhipur Revenue Circle with 17 persons. Silchar Revenue Circle with 53 number of households having 538 persons stands in the highest position in the distribution of Institutional population among all Revenue Circles and the lowest is noticed in Lakhipur Revenue Circle with 423 persons.

ANALYTICAL NOTE

ANALYTICAL NOTE ON CACHAR DISTRICT

(i) History and Scope of District Census Handbook.

District Census Hand Book is an important and valuable publication brought out by the Census organization of each state after each decadal Census. This provides detailed information on some basic demographic and socio-economic aspects and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being only informative source of every district of each state. It has, thus, proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook was first initiated during 1951 Census with the collaboration of respective state Governments. In 1951, only few demographic as well as some economic information in village and town level of the district along with some Census tables were published in District Census Handbooks. Since then, it had undergone radical changes during the subsequent decades. Incorporating more Census tables and also some basic statistics on land-use-pattern, agriculture, industry, administration, public health and medical etc. enhanced the scope and content of the publication. The DCHB of 1961 was, therefore, considered as a unique asset published by Census organization. In 1971 census, further improvements were made in the DCHB by enlisting many more information on village and towns in the form of Village & Town Directory. It has three parts. Part-A deals to Village and Town Directory. Part-B contains Villages and Town wise Primary Census Abstract and part C deals with administrative aspect and Census tables based on PCA etc. The 1981 Census again widened the scope of DCHB to cover more data on literacy, health care etc. in addition to the information covered in 1971, DCHB. In 1981, the DCHB was divided into two parts. The part -A included data on Village & Town Directory and part-B covered only the village and town-wise Primary Census Abstract. This part of the DCHB was not brought to light in Assam as no census was conducted due to prevalence of disturb condition in the state. In 1991 Census, the DCHB was divided in two parts. The part- A divulged the Village and Town Directory and part-B indicated the Primary Census Abstract. The part-A had two sections. In section-I the alphabetical list of villages and note explaining the codes used in the Village Directory were presented. The Village Directory had four appendices. The section-II depicted note explaining the codes used in the Town Directory, the Town Directory statements (I to IV) and appendix to the Town Directory. The part-B revealed district Primary Census Abstract, circle-wise. CD Block wise, village and town wise Primary Census Abstract, Circle-wise, CD Block wise, village and town wise Primary Census Abstract. In addition, the PCA had and appendix as well as annexure to the appendix. The District Primary Census Abstract to scheduled caste and scheduled tribe at circle and town level was also incorporated in this part of the DCHB.

However as a tradition of the past in the present DCHB also some more information on availability of facilities, News Paper/Magazine are included for the first time. Further, information on income and expenditure, important commodities manufactured, exported and imported etc. are also included to give a fuller account to the scope of DCHB. Similarly, in Town Directory also few more information is included to increase its depth.

The process of collection and compilation of these data involved a lot of exercise. At first, revenue circle wise revenue authorities at district level have collected information on each village. These data are compared with 1991 Census data at district level and after their thorough scrutiny and cross check, these records are submitted to the Census Directorate. In case of Town Directory, data have been collected directly from the Commissioner of Municipal Corporation & Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 Census at Census Directorate. Thereafter, efforts are made to compare and crosscheck with similar data made available from other sources especially data published by different departments of state Government to verify the authenticity and correctness of figures received through Village and Town Directory booklets.

Then only compilation and computerization of these data have been made according to the instructions of the Registrar General and Census Commissioner, India. It is, therefore regarded that because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication to that of many publications brought out earlier. It will be a more useful book for all concerns. These endeavourers will perhaps, quince the thirst of needy people.

(ii) Brief History of The District Cachar

Cachar, the name of the district is directly derived from the Sanskrit word 'Khachar' which means a broad region near mountain or water. Mr. E. Gait is of the opinion that the Kacharies might have named the district of Cachar after their name .It might also be possible that the Bengalis of Sylhet district gave this district its name as the work 'Kachar' in Sylhetee means a stretch of land at the foot of a mountain or on the bank of a river. It is not very easy to trace the origin of the name but it is more likely that "Hadamba" was a very old name of Cachar.

The Kacharies

The Kachari kings had styled themselves as 'Lord of Hedamba'. It has therefore been suggested that Hedamaba had long been the name of the Kachari kingdom and that of Dimapur. Dimapur, the capital, is in reality, a rename of Hedambapur. It may be mentioned that the work Hedamba or Hiramba frequently occurred in inscriptions and other records in the great epic Mahabharata. The Kacharies of Cachar or Dimasa, as they called themselves are generally supposed to be a section of the great Bodo horde. The populous and powerful race is said to have its origin somewhere between the upper water of Yan-t-se-kiang and the Hoang-ho. They came down to Assam in successive waves and had even penetrated as far south of Tippera Hills. Generally, their population increased in great numbers and in search of some better place they traveled both by land and water to the 'Nilachal' the hill near Guwahati on which the temple of Kamakhya stands. From Nilachal they moved via Halali to Dimapur and settled there. Copper plates ascribed to 10th.and 11th. Centuries. A.D. state that the descendants of Narak, one of the earliest kings of Kamarupa, were over thrown by Sala Stambha, a foreign conqueror, Cala Stambha was succeeded by twenty other foreign kings, and the basis of Narak was then restored in the person of Brahmapala. It thus seems possible that the "Dimasa" might for a time have ruled at Guwahati. At the beginning of the 13th century they occupied the western part of undivided Sibsagar and a large part of undivided Nagaon district. The ruins of Dimapur show that the town has been the seat of a tribe far in advance both in power and civilization.

The history of Cachar can be traced back to the time when the 'Ahoms, a race of people of the great Shan-Thai family migrated to Assam in the beginning of the 13th.centuryA.D. Towards the end of the 13th.century, the out laying Kachari settlements on east of Dikhow river withdrew along with the advance of Ahoms and the river Dikhow remainded the boundary between the two nations for a hundred years. Again the collision between the Kacharies and the Ahom took place on the banks of the Dikhow River. The Kacharies were victorious and killed 120of the enemies and the Ahoms offered a girl, two elephants and twelve slaves to induce them to maintain peace. In 1524, the Kacharies again raided into Assam territory, but were repulsed and this time Kachari Raja gave his sister in marriage to the Ahom kings. Again in 1530, Detsung, the Kachari Raja is said to have offered his sister in marriage to the Ahom kings and have sent with her as dowry an elephant, 500 swords and cloths, 1000 napkins, 100 coolies and Rs.1000 in cash. But it was evident that there could be no permanent peace with such an aggressive neighbours.

In 1536, Detsung was defeated and the Kacharies were shown all of their possessions in the valley of the Dhansiri and north of the Kolong in Nagaon district. The Ahoms took over Dimapur, capital of Kacharies kings, Detsung, after defeating him in a battle. The Kacharies decided to abandon Dimapur and moved his capital southwest to Maibong on the Mahur river in the hope that Ahoms would be unable to follow them through the jungle-covered hills to his new aboard.

In 1706, Rudra Singh, one of the most powerful princess, dispatched and expedition into the hills. The Army numbered not less then 37,500 men and the Kacharies were unable to withstand the attacks of such powerful force, ultimately the Kachari Raja, Tamradhas was totally defeated.

Migration to Cachar

The Kachari Raja , Tamradhaja abandoned Maibong and took refuse at Khaspur at Silchar town in Cachar district. In the meantime Kachari king,

Tamradhaja heard that Ahom troops had suffered severely from sickness during the rains, he appealed to the Jaintia Raja for helps to recover his lost territory. But unfortunately he was treacherously seized by the Jaintia King. Mean were, however found for appealing the Ahom kings for help, which was not refused. A strong force was sent by the Ahom king and captured both the princess and conveyed them of the Brahmaputra Valley. The Kachari king, Tamradhaja took up his abode at Khaspur but shortly afterwards attacked by a fatal disease and breathed his last in 1708 A.D. The Kachari king Suradarpa son of Tamradhaja set himself to re-organized the people and improved the capital. Brick-built palaces and temples were constructed in different parts of Khaspur and the kingdom was name by as "Haidimba Kingdom". All Kacharies leaving in different parts of Assam owned moral allegiance to the lord of "Khaspur".

Mr. Soppitta gave 1750 as the year in which the Kacharies migrated to the plains of Cachar and stated that it took place in the reign of Suradarpas successor Dhamradhaj or even in that next prince, Kartik Chandra. Two reasons were put forward for this migration. First that Dharmadhaj had married the daughter of the king of Hill Tipperah and had received the upper valley of the Barak as her dowry and second, that the Kacharies were attacked by the Jaintia Raja on the west. The account given by the Ahom chronicles seems to be more plausible. Mr. Soppittra is also of the view that this story of the Cachar plains formed part of the dowry of a Tippera princess. In 1757, envoys from the Kachari Govt. came to the Ahom King and complained that the Tipperas were devastating their territory. The Raja had to fled to Mekhali; his uncle to Maibong and the officers and nobles had taken refuge in the jungle. Cachar was a tributary state and such had to the protected against invasion. An expedition so the Ahom chronicles says, was dispatched but very little was done and the Tipperas no doublet retried in their own good time.

The first connection of the British with the district started from 1762' when Mr., Verelst marched from Chittagong to assist the Manipuri king, Jop Singh, who had been driven from his throne by the Burmese's and halted with his Army at Jatrapur near the present Silchar town. The Army remained therefore about a year but due to death and disease amongst the army and due to the difficult route to Manipuri, Mr., Verelst could not proceed further and was ultimately recalled.

The other important historical event was the formal conversion of the Raja Krishna Chandra to Hinduism in 1790 A.D. He and his brother, Govindra Chandra , were place inside a body of a large copper cow and thence produced by the Brahmans who declared then to be Hindus and Kshattriyas and to be descendants of an union between Bhima , the hero of the Mahabharata and Rak Shasti whom he espoused in the Nambar forest. The people followed the example of their prince and nearly all the Kachari in the district described themselves as Hindus.

After few years, Govindra Chandra, the last prince was driven from the throne by Margit Singh of Manipuri with the help of the Burmese. There after, the Burmese drove Marjit Singh from his place to the Surma Valley. The Burmese then threatened to annex Cachar, But the British Govt. which was in possession of Sylhet, was unable to permit a powerful nation to extend its territory right up to the frontier of Sylhet. Taking the side of the Kachari king, they expelled the Burmese and handed back the district to Govindra Chandra. For their assistance in regaining the district he was required to pay an amount of Rs.10, 000 annually in return which proved somewhat heavy on the resources of the district. The king then took up his aboard at Haritikar. But in 1830 he was assassinated by a batch of Manipuri marauders, very likely at the machination of the Manipuri king, Gombhir Singh. In the absence of natural heirs his territory lapsed to the British Govt. under the term of the treaty of Yandaboo executed in 1826, Cachar was formally annexed by the proclamation of August, 14,1832.

Tularam Senapati being the last Kachari Raja was known as Tularam Senapati, Barman. He was very brave and quite powerful and he succeeded in holding a large portion of Kachari Kingdom since 1829 to 1834. Captain Fisher of the Survey Department. was first appointed as Superintendent in the district 1835, the district was annexed to the Commissionership of Dacca and title of officer-in-charge was changed from Superintendents to Deputy Commissioner who was entrusted with the power of a Magistrate also exercised political authority over the tribes on the frontier. The Judge of Sylhet acts as Session Judge for Cachar. In 1854, the Northern part of Cachar had become the British territory after the death of Tularam SEnapati Barman which was annexed to the Assam district. of Nagaon but in 1867 on the formation of the Naga Hills district. this track was partitioned between the district of Nagaon and Cachar. It consisted of three sub divisions viz North

Cachar with an area of 4,276 sq. kms. which was wholly a hilly country and two plain sub- divisions Silchar and Hilakandi with 4,967 sq. kms. Latter in 1951 with the constitution of United Mikir (Karbi Anglong) and North Cachar hills district, the North Cachar Hill tract was separated from undivided Cachar, loss being made up by adding Karimganj sub division alongwith a part of old Karimganj police station, Badarpur P.S, Ratabari P.S and Patharkandi P.S. which in pre-independence days were part of the district of Sylhet .

(iii) Administrative set up

The district of Cachar is bounded on the east by Manipur, on the north by the district of North Cachar Hills and Meghalaya state on west by Hailakandi district and Bangladesh on the south by Mizoram. The disrict. consists of the area of the erstwhile Silchar sub division. The district Cachar has no jurisdictional change during the decade 1991-2001. There is also no geographical events of note in district during the last decade. The district comprises of five Revenue Circles, Katigora, Silchar , Udarband, Lakhipur and Sonai.

The district is situated between longitude 92 degree 15 feet and 93 degree 16 feet east and latitude 24 degree 8 feet 25 degree 8feet north. The total area of the district is 3,786 sq. kms. as against the state area of 78,438 sq. kms. So the present Cachar district comprises an area of 4.8% of the state total areas. The rank of the district among all disricts. of the state in terms of area is 7 (Seven). As per rank 7, it can be said that the district Cachar is not a small district, in area. In Cachar district, there are only one town having municipality board namely Silchar MB and there are 4 Census towns. These are Kanapur Part-II , Silchar Part -X, Ambikapur Part -X and Uttar Krishnapur Part-I.

Drainage

The principal river of Cachar dist. is the Barak or Barobakro which rises the southern slopes of the lofty ranges of Nagaland. The Barak receives numerous small tributaries from the hills through which it makes its way but the Jiri the first important affluent to join the Cachar dist. This river rises in the North Cachar Hills and flows a course of 75 miles to its confluents with the Barak during the greater part of which it forms the boundary line between Assam and Manipur. A little to the west of Lakhipur, the Barak receives the Chiri or Lang khao. The another important tributary is the Madhura which join a little to west of Silchar. The banks are steep and high and the channel of the river is deep but it is liable to sudden freshets that damage the villages. The whole drainage of the disrict. ultimately finds its way to all rivers and tributaries. The river and its tributaries are only drains to flash out the water from the district. However in rainy season, the rainwater are deposited in all rivers and plain land. So the water remains for few month in a still-stand way. Whenever water comes down in the river, the water of the plain areas goes out through river and its tributaries. The natural drainage is the only system for the district to flash out water. However, in towns ,modern drain system is done to flash out its water.

Flood

The flood which are so frequency in the Brahmaputra and the Barak cause_tremendous change of the river course and raise the rivers beds by depositing sediment carried from the upper reaches .This is a common feature of floods in big river. The miseries caused by the Barak and its tributaries bagger's description. Villages situated on the river banks are submerged, paddy fields are turned into vast sheets of water, standing crops are destroyed, cattle are swept away and hundred of cultivators, fisher men and other people living in these areas are rendered homeless. All-important link of communications are snapped and life hinges on the relief provided by the Government. and public. After flood, people are suffering from epidemics. The untold miseries spread all over the areas. Due to flood the many paddy fields become unfit for cultivation due to spread of sand.

Climate

In Cachar district the cold season start from the beginning of November when both the day and night temperature begin to fall considerably. From the last of December to January, the cold reaches the minimum degree. This is coldest period of the year when the mean daily minimum temperature generally comes below 13° C. From the end of February, the mercury level gradually goes up and in July, August and September the temperature. reaches the maximum point. During this month mean maximum temperature does not generally come below 31° C. This month can be treated as hottest month for district in each year. The high percentage moisture in the atmosphere makes the weather irritating. The percentage of relative humidity in this month is

between 85 and 88. In the month of October, the temperature gradually comes down and night becomes quite cool and pleasant

Rainfall

Winter , Summer , Rainy and the Autumn seasons are well marked in the district.. Generally the rainy season commences from the beginning of July and continues up to the last week of August but sometimes it may advance by a fortnight and extended even up to month of September. There is no rainfall in the month of December to February. These are dry months of the year. The average annual rainfall in Cacher district was recorded 2433.0 m.m from December 1998 to November 1999 and average monthly rainfall is found highest in the month of July 1999 with 524.8 m.m followed by 423.6 m.m in September 1999 whereas the lowest rainfall recorded 17.0 m.m during November,1999.The season wise actual rainfall in Cachar disrict. during December 1998 to November, 1999 is 0.0 m.m in water season, 504.8 m.m in summer season, 1670.4 m.m in monsoon season and 257.8 m.m in autumn or post monsoon season. (The figurer are quoted from the Statistical Handbook Assam –2000.)

Soil

The soil of Cachar district. are not much different from those to the Brahmaputra Valley . The Cachar district. is characterized by an abundance of marches and low lands, the soils of which contain a large percentage of organic matter.

The Cachar district. is the second important crop region of Assam. The rivers of Cachar have raised their beds above the level of the surrounding country in many places and this condition leads to regular flooding of the nearly areas which remain water-logged even after the monsoon. The agriculture in the rainy season is only possible in high lands. In winter season pulses and oil seeds are grown in water logging areas. The tea cultivations are mainly confined in hill slops leading to the district. The soils are most a time fertile due to depositions of silt during flood. However, the cultivations of Jute is relatively low in this district. About 95% of the total sown area of this district is under rice and tea. There are however a number of un- economic tea plantations in the district. There has been little re-plantations in tea gardens for decades.

Forest

The forest is an important sources of economy of the people of the disrict. A sizeable proportion of the people of the district use forests for firewood to cook their day to day meals. The Timber, Bamboo, Ikra, Thatch etc. are use in building dwelling houses. The forest is the chief raw materials supplier to saw mills and plywood factories. The total area under Silchar Forest Div. As per statistical handbook Assam, 2000 is 83890.5 hectares in the district. There is no proposed reserved forest in the district.

The Forest of the district has different kinds of valuable trees such as Sal, (Chorea), Gamari (Gmelina), Koroi (A. Lebuk), Jam (Eugenia Jamb Lon), Simul (Bomhay Malalearica), Mangoes trees etc. Various kinds of climbers are found in the district. The important species of economic value are Muli, Dom, Khang, Kaligoda, and Pecha. The Muli and Dom have great commercial importance, the former for construction and fencing purposes and latter for Mat industry. Different kind of birds and animals are also seen in the district.

Mineral and Mining

The district has no mineral deposit or mines . However, salt springs exist in hill ranges. Clay used for the manufacture of bricks and roof tiles are available in the Cachar district.

Land and land used pattern

Agriculture is the principle occupation of the people of the Cachar district. Agriculture is the main stay of the rural economy of the district. The district is spread over the valley and higher elevations. The cultivation is possible only in the small terraces in the hills. The cultivations is spared over a vast area in the district.

Table : 1
Land- Use – Pattern in Cachar district.(1997-98)
(Provisional)

Sl. No.	Classification of land	Areas in hectares
1	2	3
1	Total geographical Area	378,600
2	Forest Area	143,576
3	Land not available for cultivation.	83,152
	(a) Land put to non- agriculture uses	41,451
	(b) Barren and un- cultured land.	41,701
4	Other non- cultivated land excluding fallow lands	22,574
	(a) Permanent pastures and other grazing land	2,600
	(b) Land under misc. trees groves etc. not included in net area	17,937
	(c) Cultivated waste land.	2,037
5	Fallow Land.	11,940
	(a) Fallow other than current fallow.	6,066
	(b) Current fallow	5,874
6	Net Area shown.	116,368
7	Total cropped area.	142,146
8	Area shown more than once.	25,778

Tenancy

In Cachar district. the relationship between the landlord and the tenant was regulated under the tenancy Act , enforced since 1929 . Zamindary system was abolished in 1951. in Assam with the enforcement of the Assam State Acquisition of Zamindary Act. This Act was in force even abolation of the Zamindary system in 1956 / 1957. and was amended in 1970 to include new development in the concept of tenancy, mainly the provisions of the Assam Adhiraj Protection and Regulation Act 1948, applicable to the whole district. It was finally repealed in 1974 when the Assam (Temporarily-Settled Areas) Tenancy Act, 1971 was extended to the acquired Zamindary Estates of the district. by an Act, Viz, the Assam Land Holding (Adoption of Relationship under the Assam Land and Revenue Regulation, 1886 in the acquired Permanently Settled Estate) Act., 1974.

The next tenancy legislation was the Assam (Temporally Settled District.) Tenancy Act, 1935 applicable to the temporarily settled area of the district. This Act. recognized four classes of tenants, privileged rioyat, occupancy rioyat , non occupancy and under rioyat . This act. was again amended in 1903. This act. regulated the rights and liabilities of the agricultural tenant and their landlords . In the mean time, the Assam Adhiors Protection and Regulation Act, 1948 was passed to protect from in discriminate eviction. The Assam Non-Agriculture Urban Area Tenancy Act, 1955 was also passed to regulate relationship between the landlord and the tenant of non agricultural land in urban areas. The Assam Urban Areas Rent Control Act, 1961 amended time to time to fix fair rent of houses in urban areas.

Tenancy in Assam is how governed by the Assam (Temporarily Settled Areas) Tenancy Act, 1971. This Act is now in force in all the plain districts of the state. The main provisions of the Act are :

1. Share- croppers are treated as tenant.
2. Right of the occupancy occurs on occupations for three years against twelve years given earlier.
3. The Government has been given power to acquire the ownership and the intermediary rights in favour of occupancy and non occupancy tenant. Till the Government do so, a right is given to the tenant cultivating their own land to acquire such right by payment of compensation.
4. Illegally ejected tenant are restored possession of the land through revenue courts.
5. A limited right to mortgage by non occupancy tenant to get loan from financial institutions is provided .The occupancy tenant are given permanent, heritable and transferable right of the land of his holding.

Major characteristics of the district

Agriculture and plantation

Cachar district. is primarily an agricultural district. Its climate and the quality of soils are favorable for cultivation of crops. The alluvial soil of the district. is fertile and suitable for agriculture production. In the later part of the 19thcentury a large area of a government waste land was reclaimed for cultivations in the district. At the same time a large tract of waste land has been brought under tea plantation .

Crops

The staple food of Cachar disrict is rice. The other important crops are mustard, pulse, cereals, wheat and tea. Jute is also grown in the district. Lahi rice is grown in higher fields which is an important production of the district. The Zaha is the finest variety of rice commonly grown in the district. Baradhan is also produce particularly to make Chira and Pitha (cake). Ahu is another variety of rice produce in the middle of July. Wheat is also gaining popularity now a days and is supplementing rice in diet. Pulses like Mati kalai, Masur, Matar, Mug, are also grown in the area. Arhar is another pulses grown in the district. Cash crops such as sugar cane and potato are also grown. Besides vegetable cultivation has also taken a

boost Capsicum, peas, cauliflower; cabbage, radish, tar nip etc. are grown in the district.

Table - II

Area , Production and Average yield of important crops in Cachar district. for the year 1998 to 1999. (as per final forecast)

Sl. No.	Type of Crops.	Area under Cultivation (in hectare)	Production	Average Yield kg. per hectare.

Directorate of Agriculture, Govt. of Assam.

Flood, rain fall, textural peculiarities of the soil etc. are the important factors upon which production of crops largely depend in the district.

Horticulture Crops

The Agro climatic conditions of the district. are very congenial for the development of horticulture in general. And important garden crops of the district is the plantation known as "Kal" in Assam. The various types of bananas are grown in the district. These are Chani- Champa, Malbhog, Athia, Pora kal, Manohar, Jahaji etc. Porakal is used as vegetable. It is used in curry or dry fried. The Bananas tree is more important because the whole plant from leaf to root is used for different purpose. Mangoes, Jack fruit, Lemons, Areca nut, Coconut are et .also common production of the district.

Table-III

Area , Production and Average yield of horticulture Crops in Cachar district (1998-99) , Final forecast.

SL. No.	Types of Crops.	Area under cultivation. (hectare)	Production.	Average Yield in kg. (hectare)

Irrigation

The Cachar district. receives maximum rainfall during monsoons seasons. The month May, June and July are the wettest periods of the year and these months account for more than 60.0 percent of the total annual rainfall. The cultivators depend largely on rainwater for their cultivation. Agriculture suffers loss in year of excessive rain due to the result of flood and fail in years of drought. In times of drought cultivators are compelled to irrigate their fields by digging canals from various streams and rivers. Indigenous way of irrigation is still prevailing in the district. The channels, ponds etc.are constructed to water the agricultural fields. Some minor irrigations projects are installed in the district by constructing bunds across the streams and rivulets, drainage channels and silt channels to obtain silt deposits in low-lying areas. Lift irrigations with electric pump has also been used in some parts of the district. However, wells, ponds ands tube wells are the main sources of irrigations in the district. The State Government has taken up various small and medium irrigation schemes in the district.

Table – IV

Irrigation potential utilized and targets and achievements of additional potential created in Cachar district.

Sl. No	Particulars	Land areas in hectares.	Achievements

Animal husbandry

Livestock is the wealth next to Agriculture of a large chunk of rural population. Livestock plays an important role in state economy which is primarily agrarian. Agriculture economy is supplemented by animal husbandry. Agriculture production depends very much on the livestock available. Agriculture is viable if adequate animal stock is there to feed it byway of manure etc. these activities allied to Agriculture have significant role in supplementing the income of farmers.

Various kinds of livestock are available in the district. Cattle and goats are main animal for most of the families of the district. Moreover, sheep, horses, pigs, fowls, and ducks are also available in the district.

The present Animal Husbandry and Veterinary Department has been functioning in Assam since in 1953. Till then the department is known as Civil Veterinary Department. In 1953, the office of the district Animal Husbandry and Veterinary was established at Silchar, the head quarter of the district. With the establishment of Community Development Block in the state, the extension works of the department was geard up to cover all community development Blocks. Slowly, and steadily a number of hospital and dispensary were also open in the district.

For all round development of livestock emphasis has been given on the cultivation of fodder crops to provide them with nutritious diet. Root and seeds of improved various of grasses are freely distributed among the farmers from the Govt. farms. The Department of Animal Husbandry and Veterinary has been constantly helping the farmers for their animals. In order to improve the breed cattle, measures have been taken by the above department. Contagious and infectious diseases are also prevented among livestock in the district. To protect animals from such diseases preventive measures are also taken by the above department.. For prevention of common ailment and Mobile Veterinary Dispensary is also functioning in the district.

Table – V

Livestock and poultry in Cachar district as on 1997

Sl. No.	Livestock and Poultry	Numbers
1	2	3
1	Cattle	428,004
2	Buffaloes	87,154
3	Sheep	10,061
4	Goats	171,602
5	Pigs	27,795
6	Horses and ponies	227
7	Fowls	938,504
8	Ducks	333,154

Source : Statistical Handbook Assam, 2000.

There are 4 Hospitals, 18 Dispensaries, 2 Mobile Dispensaries, 10 Block Dispensaries, 3 Rural Artificial Insemination Centres, 52 Stockman Centers, 19 Key Village Centers and some farms in the district.

Fishery

Assam is a land of rivers beels, swamps, tanks, ponds etc. Fish is a abundantly available in all the district of Assam. Cachar district. is not the exception. The potentiality of fisheries development in the district are also the same as in other district. Pisciculture is becoming more popular among all sections of the people irrespective of caste and creed. Fisheries in Assam are of various kinds. These are beel, river, swamp, forest derelict and semi-derelict, pond and tank fisheries. Besides, there are good numbers of private tanks, marshy areas, dead rivers, and canals where pisciculture is done. Various kind of fishes are found in the beels and rivers in the district. The bigger type of fish generally found in the beels are Rou, Barali, Sital, Kaliajhar, Bahu, Sole etc. The smaller variety of fish are confined to Kaoi, Magur, Puthi, Khaliha, Mowa, Darikana etc.

In the days of yore fish business is generally undertaken by the Namasudra or Kaibartta who are known as Das or Dum. With the passage of time, pisciculture was not confined to those classes of the people only. It becomes open to every class of people.

The beels and rivers can be either resister and unregistered. In Cachar district, the number of registered beels and rivers fisheries are 38 and 43 respectively. The reproduction of fish seeds and fish were targeted 32.00 millions nos. and 98.50 metric tones in 1998-99 in Cachar district. but the achievement in respect of both were 31.50 millions nos and 9837.20 metric tones respectively.

Sources : Statistical Handbook Assam, 2000.

The development of fisheries in the district was taken over by the Govt. after independence and a number of schemes such as (i) Seeds collections & distribution (ii) Survey of fisheries and reclamations thereof, (iii) renovation of ancient tanks (iv) fish farming and (v) providing loans & subsidy for promotions Pisciculture.

Industries

The Cachar district. is one of the industrially backward district. in Assam. Cachar has no heavy industry, accept the age-old tea industry. Through the process of industrialization has pickup during the last decade, there have been some inherent constraints like location transportation, market etc. The existing industries of the district. can be classified mainly into (i) food and kindred products (ii) forest products (iii) manufacture excluding transport equipment and (iv) cotton textile. The various kind of products under the above category of industries are being produced in a large quantity generating enough employment avenue to the people of the district. A large number of families in rural areas are also engaged in traditional jobs like black smithy, carpentry, weaving, mat making etc.

The Government is however taken keen interest in the development and improvement of the Cottage and small-scale industries in the district.in order to meet the challenges of unemployment. The total numbers of small-scale industries registered under the Directorate of Industries and Commerce are 1,581 in the district. as on 31-12 -1998.There are altogether 116 tea gardens in Cachar district. In 1998 with an areas under cultivations of 29,534 hectares. The average yield in per hectare is 1,908 K.gs. These gardens have given enough employment to rural folk.

Trade and Commerce

In ancient time good overland communications systems was not developed and the scope for external trade was insignificant. But with passage of time, the situation has gradually improved in Cachar district. There has been expansion of means of transportation and communication and side-by-side economic and social advancement have developed due to some sorts of good communication. The activities in trading, commerce and banking have increased rapidly. Main centres of wholesale business is Silchar, the headquarter of the district. The principal articles of export are agriculture products. jute, mustard, zinger, rice, vegetable which are exported out the district. The important items imported to the district. are pulses, onion, potato, garment, clothes, hardware, consumers' durable goods, electronic- equipments, electric goods, wheat, edible oil, medicines, foot ware, machine, fertilizers etc. Tea is most important product of the district which is exported outside of district. Sital pati (mat) is a special kind of mat which is manufactured in the district and are largely used by the people of the region.

The hats and markets are important centres of the district which a great deal of retail business is transacted. This hats and markets are held either weekly or by weekly on particular day/ days. A particular section of people purchases the village products and sell them to the wholesale market.

Banking

In the long past, there was no banking establishment in the district. Loans businesses are conducted by shopkeeper who combine their regular trade with money lending and also by the wealthy land holders. But with the lapse of time, the relative position

of credit sources changed to a great extent. The Co-Operative Societies have come up in a big way to meet credit requirement in rural areas. There is a wide network of banks at presents in this district. Good progress has been made in the spread of branches of Commercial Banks since nationalization in urban as well as in rural areas also. There are some branches office of Commercial Scheduled Banks. The State-Bank of India opened its branches at some places of Cachar Dist. The functioning of different Banks in the district. has improved rapidly Now-a- days, however, even now, the many branches play a vital role as a source of credit for rural folk.

Table - VI
Position of deposits and credits of Scheduled Commercial Banks and Regional Rural Banks on 1999 December in Cachar district.

Sl. No.	Type of Bank	No of offices	Rs in Lakh deposit	Credit
1	2	3	4	5
1	Scheduled commercial Banks	70	502,97	106,83
2	Regional Rural Banks	19	3689	1260
3	Total Banks	89	539,86	119,43

Sources: Statistical Handbook, Assam, 2000.

Transport and Communication

Economic and social development depend mostly on efficient system of communication. Road transport is the life line of the economy of any district. The transport system in the district. was poor in ancient days . But gradually transportation system has been developed in the district .At present Cachar district. is connected with the rest of the state and the country by rail, road and air. It was only after independent that the district witnessed considerable improvement in rail and road transport. The district was connected with the rest of the state only by railway in the past. There was no other alternative way to reach Cachar. Very recently a road was opened from Guwahati to Cachar via North- Cachar Hills through which Assam Road Transport Corporation has plied their buses but that too very frequently remains unused due to rain that causes land- slide. There is also another roadway from Guwahati to Silchar via Shillong.

According to Statistical Hand book, Assam, 2000, there are 248 kms surfaced and 702 kms unsurfaced road length in the district. Thus the total road length in the district comes to 950 kms. The road length maintained by the P.W.D. within the district. is 902 kms during 1997-1998. The road length by maintained by the National High way and State Highway are 7 and 41 kms. respectively .

At present almost all roads of the district are pucca and only a few road is graveled. The number of vehicle of all kinds such as Buses, Taxies, Trucks, Minibuses, Omni buses, have tremendously increasing day by day. There is difficulty to travel from one place to other in the district by any means of modern transport which can be availed of without any sort of trouble. Night service buses are also plying daily to Cachar district through Meghalaya.

In Cachar district, there are about 22,883 motor vehicles of different types plying on the road of the district.

Electricity and Power

Electricity and Power which are considered to be the primary requisite of modern industrial development is being supplied by the Assam State Electricity Board. Cachar district does not has any electricity and depends entirely upon supply from outside under the rural electrification scheme.

In Cachar district, the electricity facilities are not so much developed. In 1998, number of villages electrified in Cachar district is 924 out of its total 1,051 villages However, about 88.0 percent villages have been provided with electricity facilities in the district.

Weaving and Sericulture

Weaving has been traditionally an essential part of the Assamese households. Every woman of Assam is a born weaver. Assamese girl who does not weave cannot expect to become a wife said by the Mahatma Gandhi. Weaving serves as an important subsidiary occupation to many families in Assam. In certain area cottage industries, particularly weaving, take precedence over agriculture. Cachar district. is not the exception of it. But still to day the weaving is doing in a primitive method In the district., there are as many as 20 Handloom Training Centres and Weaves Extension Service Units in 1998-99. There is 10 Handloom Demonstration Centres in the district and these comprise 285 villages. 3,312 weavers are engaged as part time weavers and 270 as whole time weavers.

Sericulture is an age old traditional cottage industry of the state and plays a pivotal role of the rural economy. Assam is famous for her mulberry and other kinds of silks known as Pat, Eri, and Muga. Muga is a non mulberry silk. The Government is trying its best to prove wider employment opportunity to the weavers under various schemes undertaken through its concerned department.

In the district, the area under Silk worm food plants during 1998-99 against Eri, Muga, Mulberry are 255, 129 and 257 hectares respectively. In the same period 2,472 , 22 and 423 were engaged in Eri, Muga and Mulberry respectively from 170 villages. During the above period, 11,000 (eleven thousand) kgs. Eri cotton were yielded in the district. In Cachar disrict., there are 11 Eri Seed Grainage Centres.

Local self Government

The present system of local self Government is a legacy of the British administration and its origin may be traced the principle of local taxation embodied in regulation 13 of 1813. However, some forms of local self Government were in existence like Namghar in pre-British period. It was a village court where trials of crimes and disputes were held in.

The Assam Panchayat Act. 1959 which introduced in 1960, abolished the local Boards and under this Act a three-tier Panchayat Raj system was initiated in Assam. But the Panchayat Act, 1972 which was operated in 5th. May 1973 changed over two-tier system of Panchayat and the intermediary Anchalic Panchayat have been abolished.

It is revealed in Statistical Handbook, Assam, 2000 that there are 163 Gaon Panchayats and 2 Mahkuma Parishads in Cachar district on 31-03-2000. The Urban centres are classified as Municipal Board, Town Committee and Municipal corporation. In Cachar disrict. there is only one Municipal Board at Silchar town. There is one Chairman and a Vice-Chairman and the Chairman is the head of the administration. He is entrusted with implementation of the schemes taken up by the Board. It has various sources of revenue. It livies different taxes on holding, rickshaws, carts, cycle, stalls, markets etc.

Social Life

Among the Hindus, the property is generally possessed by head of the family who manages it as its custodians. After the death of the father, the sons and daughters inherit the property. The join family system was very common in the past. But with the passage of time, it is loosing its holds. Among the Bengali Hindus marriages by negotiation is common. The caste distinction is not rigid as it was a few decades ago. Never the less, the inter caste marriage is not frequent among them. Although permitted by law re-marriage of widow is not looked upon.

In rural family every house hold particularly Assamese has their distinct type of houses for their different uses. But the Bengali and Muslim families have no different types of houses for different uses. In most of rural folk households, their houses are made of thatch and bamboo. At present who can afford have constructed their houses on modern line using C.I. sheets, bricks and cements.

Male dress for Assamese and Bengali includes Dhoti, Chadar, Shirt, Kamij, Trousers and Coats. But Muslim makes use of Lungi, Female dress for Assamese consists of Riha, Mekhala, Chadar, Sari and blouses but Bengali female does not use Riha, Mekhala and Chadar. They use only Sari and Blouse. Similarly the Muslim females use Sari and Browse only. Ornaments like Neck less, Earring, Bracelets, Kharu, Chain are common used by all females of the region.

Colorful festival observe in the dist. enliven the lives of the people. The biggest festival of the year in the district is Durga Puja which is observed by both Assamese and Bengali people. Sivaratri and Doljatra are also observing by both sections of the people. Assamese people celebrated three Bihus. Muslim are also performed Id-Ul-Zaha, Muharram, Fatiha Duaz Daham ande Idulfitre. The Namghar is the community prayer hall of the Assamese villagers. Nam- kirtan performs during religious festivals. Daily prayer is also held in Namghar in morning and evening times.

Most of the indigenous games played in the district. in the past have now been replace by western games and sports. Football, Cricket, Volleyball etc. are now very popular among the youths. Indoor games like Caroms, Cards, Chess, Ludu, are played in the town and village.

(iv) Physical feature of the district

Topographically, the physical basis of Cachar is singularly diversified and quite beautiful. It has heterogous topography and is composed of high hills and low land. The district. has plenty of fertile cultivable land and other resources. The natural view of the district is extremely picturesque. The North, East and South of the district surrounded by high hills. There are isolated ranges of hills within the district.. The mighty Barak river of the district. runs from the east to west of the district. During the summer season the most of the part of the district. are under heavy rains. The district. has many lakes and marshes. The district. includes the southern section of Assam range and bell of hilly country with average wide of 6 to 11 kms. with peaks ranging between 9144.0 and 1819 meters. in height. This hilly part represented the transverse spurs of the Borail range. Many of this

spurs are thrown out of the range towards the south-west with diminishing height. Between the Valleys formed by these spurs flow several rivers, the Jiny, the Chiri, the Madhara, the Jatinga, the Arange, the Larang, the Gumrah and the Baleswari. All flow to southward ultimately meet with the principal river of the district Barak. The plain lands are generally available in the northern side of the district. These plain lands are available for cultivation. The soil of the district is rich in the fertile and is fit for growing paddy, jute, mustard, and vegetable crops. In the high land of the district. particularly in the north, tea are sown. The swamps and beels, grass and reeds, variety of vegetable are seen almost in all areas of the district. The villages are covered in groves of slender areca palms, broad-leaved plantains and feathery bamboo in all seasons of the year which makes the district to be looked fresh and evergreen.

Till the 30th. Sept 1989, the present Cachar district was a subdivision by the name of Silchar of the old composite Cachar district.. The present district. which composes the area of erstwhile Silchar subdivision was created by a Assam Govt. Notification No. GAS(B) 370/104 Dated. 29th.Sept.1989 with effect from 1st October 1989

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the

servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing

so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo
9 Kaibartta
10 Lalbagi
11 Mahara
12 Methar,Bhangi
13 Muchi, Rishi
14 Namasudra
15 Patni
16 Sutradhar

Scheduled Tribes :

I. In the autonomous district :
1 Chakma

2 Dimasa,Kachari

3 Garo

4 Hajong

5 Hmar

6 Khasi, Jaintia, Synteng, Pnar, War, Bhoi, Lyngngam

7 Any Kuki Tribes Including:

(i) Biate,Biet

(ii) Changsan

(iii) Chongloi

(iv) Doungel

(v) Gamalhou

(vi) Gangte

(vii) Guite

(xxxvi) Uibuh

(xxxvii) Vaiphei

8 Lakher

9 Man(Tai Speaking)

10 Any Mizo(Lushi)Tribes

11 Mikir

12 Any Naga Tribes

13 Pawi

14 Syntheng

II. In the State of Assam excluding the Autonomous District

1 Barmans in Cacher

2 Boro, Borokachari

3 Deori

4 Hojai

5 Kachari, Sonwal

6 Lalung

7 Mech

8 Miri

9 Rabha

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such

professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course

that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above

population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 1,444,921 in 2001 Census. Male comprises 743,042 while female consists of 701,879. Out of the total population of the district, 1,243,534 fall under rural and 201,387 are under urban areas of the district. In rural areas 639,968 and 603,566 are males and female respectively. Accordingly 103,074 and 98,313 are males and females respectively in urban of the district. The percentage of urban population in the disrict Cachar is only 13.94 .The district is a rural base place in which 86 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +18.9 which is same with the state rate. In the district, there are only 7 towns . Silchar Town is only town with Municipal Board and Lakhipur town is with Town Committee status and Five census town. The density of the district is 382 persons per sq. kms. which is higher than the state density (340). The sex ratio in the district is 945 as against 935 in the State. Out of total population of the district, 32.2% is total workers of which 49.1% and 14.4 % are male and female respectively. The percentage of non- workers is 67.8 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 23.0 %, 13.4%, 3.2% and 60.3% respectively.

The literacy rate is 67.8% in the district of which 75.7% is for males and 59.4% is for females. The district literacy rate is above the state literacy rate (63.3)%.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Altogether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

TABLE : 1
DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Population Density (Rural) of the district: 590.1

Out of 1,243,534 rural population of the district, 921,318 population (74.1 percent)hailing from 557 villages live in these villages where population density is 501+ per square kilometer. In the range of population density 0-10(per sq. km) there is 91 village having 33,476 population.3 villages with 50 population have density in the range of 11-20. Detail can be seen in the table itself.

TABLE-5
SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			Cachar		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	576	913	935	408
1911	915	923	626	906	920	489
1921	895	906	613	910	923	553
1931	874	885	574	889	904	553
1941	875	886	605	896	910	601
1951	868	878	663	895	907	732
1961	869	887	661	908	916	794
1971	896	912	744	918	923	852
1981	—	—	—	—	—	—
1991	923	934	838	932	933	920
2001	935	944	872	945	943	954

Note : Sex ratio has been defined here as the number of females per 1000 males.

Sex ratio in the State has improved both in rural and urban areas during the last decade. It increases from 923 in 1991 to 935 in 2001. The sex ratio in the district during the Census of India 2001 follows the same trend from 932 in 1991 to 945 in 2001. At rural level the sex ratio is noticed that from 933 in 1991 it increases to 943 in 2001 and similarly in urban from 920in 1991to 954 in 2001 in the district respectively. The urban sex ratio is more than the sex ratio of rural in the district.

TABLE : 6
SEX RATIO BY TAHSILS, 2001

Sl.No.	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Katigora	935	935	-
2	Silchar	934	926	952
3	Udarbond	932	928	994
4	Sonai	962	962	-
5	Lakhipur	965	966	954
District Total:		**945**	**943**	**954**

Out of 5 Revenue Circles of the district there are three urban units located in Silchar, Udarbond and Lakhipur Revenue Circles respectively. Among 5 Revenue Circles, sex ratio of Katigora, Silchar and Udarbond Revenue Circles are lower than the sex ratio of the District. Lakhipur with 965 females per 1000 males is top in the list of circles in sex ratio while Udarbond Circle shows lowest sex ratio of 932. The sex ratio in Lakhipur Revenue Circle is highest with 966 in rural areas and the highest is in Udarbond with 994 in urban areas among all tahsils.

TABLE : 7
SEX RATIO BY CD BLOCKS, 2001

Sl.No.	Name of C D Block	Sex ratio
1	2	3
1	Katigorah	922
2	Salchapra	937

8	Sonai	962
9	Barjalenga	881
10	Narshingpur	965
11	Palanghat	949
12	Baskandi	950
13	Rajabazar	963
14	Lakhipur	977
15	Binnakandi	967
District (Rural) Total:		**943**

At CD Block level, Lakhipur CD Block has the highest sex ratio of 977 among the C D Blocks of the district. It is higher than the district rural sex ratio of 943. Barjalenga C D Block has recorded the lowest 881 females against 1000 males among all C D Blocks of the district Sex ratio in 7 C D Blocks are higher than the district sex ratio while the sex ratio of the other 8 CD Blocks are lower than the district level rural sex ratio.

TABLE : 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	18	1.8	6,673	0.5
700-749	5	0.5	626	0.1
750-799	21	2.1	13,421	1.1
800-849	58	5.7	32,635	2.6
850-899	146	14.3	146,024	11.7
900-949	284	27.8	470,907	37.9
950-999	253	24.8	380,127	30.6
1000-1099	181	17.7	175,082	14.1
1100+	54	5.3	18,039	1.5
District Total:	**1,020**	**100.0**	**1,243,534**	**100.0**
Sex ratio (Rural) for District:			**943**	

The sex ratio at village level by range, it is found that most of the villages are having sex ratio of 900+. Out of 1020 inhabited villages in the district, 772 villages come under the sex ratio range of 900+, 18 village record sex ratio below 700 while 5(five) villages come under sex ratio range of 700-749. In 235 villages, females are found equal and more than males.

TABLE : 9
SEX RATIO OF URBAN AGGLOMERATIONS/ TOWNS, 2001

Sl. No.	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Silchar UA	UA	952

		Urban	**22,321**	**11,427**	**10,894**	**953**

Sex ratio in Assam is found to be adverse to women in most cases. Same is the case in respect of children in the age group 0-6. The result of Census of India 2001 for Cachar district also reflects the same situation, though it is not much disproportionate. Sex ratio for 0-6 age group in the district is 961.The highest female children in 0-6 age group 973 against 1000males counterpart has been recorded in Sonai Revenue Circle. Lakhipur Revenue Circle with sex ratio 948 is at the bottom of all circles. Urban sex ratio of 1000 females in Udarbond tahil in the age group 0-6 is the highest among all urban areas of tahils.

The workers which include Main Workers and Marginal Workers in the District is 32.2 percent of the total population. The percentage of male workers, however are higher in category of Main Workers whose percentage is 49.1 percent. The female Non-Workers dominate the non-workers people with a record of 85.6 percent. Marginal Workers are few in numbers approximately 100 thousand with a percentage of 7.0 percent. Among the tahsils, Udarbond Revenue Circle records the highest percentage of Main Workers with 28.9 percent and Sonai Revenue Circle records the lowest proportion with 23.0 percent. In the category of Non-Workers, however, Sonai Revenue Circle shows the highest percentage with 69.8 percent and Lakhipur Revenue Circle shows the highest percentage of Marginal Workers with 11.9 percent. The female Marginal Workers in Silchar Revenue Circle shows the lowest proportion of 5.4 percent among all tahsils.

TABLE : 32

Note: Percent of Worker to total worker are given in brackets.

Out of 465,734 total numbers of workers in the District, four category of workers are categorized as Other Workers having 60.3 percent, Cultivators with 23.0 percent, Agricultural Labourers with 13.4 percent and Household Industry Workers with 3.2 percent. In male-female breakup it is noticed that male workers as Cultivator and Other Workers are more than female workers in terms of numbers and percentage. In Household Industry, number and percentage of females are more than the males. Again, in case of Agriculture Labourers, the number of males are more than females but the percentage of females is more than males. The percentage of cultivators is more in Sonai Revenue Circle whereas it is high in Katigora tahsil for Agricultural Labourers. The percentage of Household Industry workers is generally low in all Revenue Circles. Udarbond Revenue Circle has the highest percentage of Other workers among all Revenue Circles.

Note: Percent of Worker to total worker are given in brackets.

Economic activity of the rural people of Cachar district is shown in the table in four different categories of workers. Out of 403,310 total numbers of workers in the rural of the District, large number of persons take Other Works as the main work and thus constitutes 54.5 percent followed by cultivators with 26.5 percent. In other category of workers,. Agricultural Labourers record 15.5 percent. There are few people in the district who took Household Industry either as Main work or as Marginal work and the percentage of such workers shows 3.5 percent. As discuss in the previous table, the male workers as Cultivators and Other Workers in number and percentage are more than females. In Household Industry work females are more than males in number and percentage. In all 15 CD Blocks of the District, people are found to be engaged in all four categories of works and largely in other works and cultivation.

The table depicts the number and percentages of workers in different categories for all urban centers alongwith the district.

Almost all urban people of the District are engaged as other workers. They constitute approximately 98 percent of the total urban workers. The Household Industry Workers constitutes less than 2 percent and other two categories are less than one percent. As in the case of rural, the male workers as Cultivators and Other Workers in number and percentage are more than the females. The female workers in terms of absolute figures and percentage in Household Industry work are more than males. The percentage of Other Workers in Silchar town is more than other towns in the district. The percentages of cultivators in Lakhipur CT is also higher than all other urban centers.

		(100)	(88.4)	(13.1)	(47.5)	(24.8)	(14.0)	(39.7)	(4.2)	(0.3)	(38.8)	(72.6)

Note : - Percentages are given in brackets.

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$Transport communication includes bus service, rail facility and navigable waterways.

In rural of Cachar District, the types of amenities available in the village are mostly Education, Improved Drinking Water and Power supply. Out of 1020 inhabited villages in the District, 85.5 percent or 903 villages are having access to education and 47.5 percent or 484 villages in the District are having access to Improved Drinking Water. Power supply to the villages has tremendously improved as 72.7 percent or 727 villages are having electricity. However 38.8 percent of villages are having access to approach Pucca road facilities and 39.7 percent of villages are having access to Transport Communication facility in the District. Most of the villages are not having access to Medical facilities, out of 1020 villages only 134 or 13.1 percent villages recorded as having access to Medical amenity. 253 or 24.8 percent villages are having Post Office and Telephone facility with 5 percent only. The other amenities like Banks and Agricultural Credit Societies are not available almost in all villages. The number of villages recorded 43 as having access to Banks and 3 villages have the facility of Agricultural Credit Societies. Some amenities like Telephone; Agricultural Credit Societies are not available at all in villages of some CD Blocks in the District.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The rural population in Cachar district by and large are having access to Education and Power supply. The percentage distribution of the people having access to Education records 98.8 percent. Those persons having access to Improved Drinking water record 61.7 percent and those having access to power supply with 88.4 percent. The numbers of people having access to Medical Amenity are very few, Out of 1,243,534 rural population in the District, 268,806 persons or 21.6 percent are having access to Medical amenity. However 55.2 percent are having access to Transport Communication and 51.7 percent are having access to approach by Pucca Road. People having access to Post office forms only 41.6 percent and those having access to Telephone form only 23.8percent from the total rural population. Most of the rural people in the District do not have access to Banks and Agricultural Credit Societies amenities. In Palanghat CD Block of the District, people are not having the Amenity like Banks and in most of CD Blocks, people have not getting the facility of Agricultural Credit Societies.

TABLE : 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)

8	Sonai	64	12815	69.7	0
9	Barjalenga	44	15455	53.5	0.5

Sl.No.	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
10	Narshingpur	106	18066.64	51.8	0
11	Palanghat	70	11076	58.6	1.9
12	Baskandi	34	7935	68.5	0
13	Rajabazar	93	16731	67.2	0.1
14	Lakhipur	61	7546	61.7	0
15	Binnakandi	52	12523	56	4.8
District Total:		**1020**	**210737.64**	**58,6**	**1.5**

Note : - Cultivable area = irrigated area + unirrigated area.

The distribution of number of villages, total area, percentage of cultivable area and percentage of irrigated areas among CD Blocks are shown in the table. Out of total area of District Cachar, 210,738 hectares are in rural areas of the district. 58.6 percent is cultivable area to the total land and of which 1.5 percent is irrigated land. Among CD Blocks, 73.5 percent cultivable land being the highest is noticed in Tapang CD Block. 12.5 percent-irrigated area being the highest is in Salchapra CD Block followed by Binnakandi CD Block with 4.8 percent in the District.

TABLE : 43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Sl. No.	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	V Lakhipur (TC)	7	0.9	6.1	8.8	3.3	3	1.1	0	1.3
2	I Silchar (MB+OG)	0.3	0	0.3	0.1	0.1	0	0	0	0
District Total		**0.7**	**0.1**	**0.6**	**0.6**	**0.3**	**0.2**	**0.1**	**0**	**0.1**

The Municipality Finance of the town shows that per capita receipt is Rs 0.7 for urban area of the District while per capita expenditure is Rs 0.6 which is lower than per capita income. Per capita income and expenditure is higher in proportion in Lakhipur TC than Silchar MB+OG.

TABLE : 44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl.No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Lakhipur (TC)	6.1	3.1	3.1	1	1
2	Silchar (MB+OG)	2.8	1	1.8	0.4	0.4
	District Total	**3**	**1.1**	**1.9**	**0.5**	**0.4**

In average, the number of Primary institution is 3 per 10,000 population, 1.1 is Junior Secondary/Middle school and 1.9 is Secondary/Matriculation school in the District. The Senior Secondary and Colleges are recorded 1.5 and 2.5 number respectively in the District per 10,000 population Lakhipur TC has all types of educational institutions more than Silchar MB+OG per 10 thousand population..

TABLE : 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl. No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Ambikapur Pt. X(CT)	0
2	Durga Nagar Pt. V(CT)	0
3	Kanakpur Pt. Ii(CT)	0
4	Lakhipur(TC)	37
5	Silchar(MB+OG)	32
6	Silchar Pt. X(CT)	0
7	Uttar Krishnapur Pt. I(CT)	39
	Distrct Total	**28**

TABLE : 46
PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	LAKHIPUR T.C.	9,802	400	4.1
2	SILCHAR M.B.	156,948	2,200	1.4
	District Total	**166,750**	**2,600**	**1.6**

In average the number of beds in the urban areas of the district is 89 per 10,000 population. There is no facility of bed in the proximity of four towns. The number of beds per 10 thousand population is found 111 beds in Silchar MB+OG whereas the lowest 37 beds is in Lakhipur TC. It is 39 beds in Uttar Krishnapur Pt II CT.

Table 46 gives the proportion of slum population in towns. Out of the total district urban population, 2600 persons or 1.7 percent people live in slum area. Between two towns having slum population in the district, Lakhipur TC constitutes the higher proportion of slum population with 4.1 percent and Silchar MB with 1.5 percent.

TABLE : 47
MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Sl.No.	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Ambikapur Pt. X (CT)	Furniture	Cane
		Nil	Nil
		Nil	Nil
2	Durga Nagar Pt. V (CT)	Wooden Furniture	Betelnut
		Pottery	Bannana
		Nil	Bamboo
3	Kanakpur Pt. Ii (CT)	Bamboo Product	Cane
		Nil	Bamboo
		Nil	Nil
4	Lakhipur (TC)	Pineapple Juice	Pineapple
		Nil	Ginger
		Nil	Pickle
5	Silchar (MB+OG)	Tea	Tea
		Candle	Bamboo
		Furniture	Wood
6	Silchar Pt. X (CT)	Nil	Nil
		Nil	Nil
		Nil	Nil
7	Uttar Krishnapur Pt. I (CT)	Furniture	Cane
		Nil	Nil
		Nil	Nil

The most important commodity exported out of and Manufactured in towns are shown in the table along with the name of commodities. Silchar MB+OG manufactured Tea, Candle and Furniture and exported Tea, Bamboo and Wood from the town. Similarly all other towns have manufactured and exported a few items of commodities which are shown against each towns. However, Silchar Pt X CT has no manufacturing and exported commodities.

The table indicates number and percentage of households by type of fuel used for cooking in the district as well as in the tahsils. It is seen in the table that the number and percentage of households those which used firewood for cooking is more in the district. However, it is more only in rural area of the district. In urban areas, more households use gas for cooking. The use of other fuels is less both in rural and urban area.

In the tahsil level, the firewood for cooking is used by a large chunk of total households of each tahsil followed by gas. In Revenue Circle, the highest percentage of rural households use fire wood in Sonai Revenue Circlel with little more than 95.0 percent households. Only 5.0 percent households use other type of fuels. In urban area of Silchar Revenue Circle 47.9 percent households being the highest percentage have made use of gas for cooking followed by firewood with 34.6 percent. As a whole it can be said that majority of households use firewood for cooking in rural areas and gas in urban areas. The use of electricity, biogas and coal/char coal is very limited. 439 households of the district have no cooking arrangement in their houses.

This table indicates the number of households who have availed banking services and the number of households having each of specified assets shown in the table. Out of the total households of the district, 45,240 households have availed banking service. The banking service availed by the households in the district is more in rural areas. It is 17,411 in urban areas of the district. In Revenue Circle level, the banking services availed by the households are found more in Silchar Revenue Circle than other Revenue Circles.

Availability of all assets as mentioned in the table is more for the households of Silchar Revenue Circle The number of households having none of the specified assets is more in Silchar Revenue Circle with 54,257 households. The number of households having car, jeep and van is less in all Revenue Circles.

(ix) Major social and cultural events, natural and administrative developments and significant activities during the decade.

The Cachar district is a heterogeneous land composed of high hills, low lands and level plains. The district is inherited mostly by Kacharis, Assamese and Bengali Hindus and Muslim. The major social and cultural events celebrated in districts are either religious festivals or special festivals. These are observed with great enthusiasm and jubilant. Durga Puja the biggest festival of the year in the district is observed by Hindu of Both community, Assamese and Bengali. Hindus observe Durga Puja with great pomp and high spirit. The festivals is observed annually and usually hold during the month of October and last continually for four days. During the festival period, the spirit of togetherness and peace prevail among people. A week before the main puja, Mahalaya is ceremoniously performed to invoke the Goddess Durga to come and dwell in the hearts of the faithful. After this day, the preparation for the celebration of the Puja starts. The image of Goddess Durga is ceremoniously installed on the Puja pandal erected in various places and centers so that faithful and worshippers can easily worship. In these four festive days people thronged the pandals to pray for the blessings of the Goddess .On the last day when the festival finally comes to an end, the image of Goddess Durga is ceremoniously taken from out the pandal and immerse into pool or river.Other religions festivals in the district like Kali Puja, Sivaratri, Doljatra etc are also performed. Kali Puja is another biggest festival in the district which is coincides with Diwali. Family prayer are held in every houses and in the evening the houses are illuminated by burning mustard oil in small earthen lamps (chakis) . In the towns , the festival is made more jubilant with the illumination of decorative and colored electric bulbs in most of the houses and buildings. In addition to this , people are enjoying the festival in burning crackers and fireworks. Another festival celebrated jubilantly by Hindus is Doljatra . The festival includes the rituals performed by priest on the pandal where the image of Lord Krishna is installed and later on, followed by Bhaona . The image of Lord Krishna is taken in a procession with joy and gaiety throughout the streets and sprinkling and throwing of red powder or colored water on one another which is commonly known as 'Phaku'. This ceremony reminds us of the occasion where the milkmaid of Brindaban is being amorously intimate by Lord Krishna. Doljatra is mostly celebrated jubilantly by Hindus among the tea-garden labourers and others people of the district.

Muslims of both community Assameses and Bengali observed their religious festivals with pomp and high spirit. Among the Muslims festivals mention must be made of the Id-Uz-Zuha, Muharam, Fatiha-I-Duazdaham and Id-ul-Fitre . The Muharam is observed to commemorate the tragic episode of Imam Hussain , the grandson of the prophet who was slain on the banks of the Karbala . Both Shias and Sunnis observed the festival with joy and fervour. On the occasion of Id-Uz-Zuha and Id-ul-Fitre or Bakrid, the Muslims wear their new white attires and go to the local Idgahs or Mosques to hold prayer services Id-Uz-Zuha is also an occasion of alms giving. Fatiha-I-Duazdaham and Shab-e-Barat are two other festivals widely observed by the Muslims.

Bihu festivals are celebrated in the district like in the other part of the state. The three Bihus observed and celebrated by Assamese people are Rongali Bihu, Bhogali Bihu and Kati Bihu. These festivals are traced back to the early Ahom Kings and are associated with the cycles of cultivation. People are participating with great joy where dance and music are predominant during the festival. The villagers dance and sing hymns, choral songs accompanied with drum and flutes. In Bihu dance,

the girls dance, the boys play the flute and beat drums and blow the pepa (made of buffalo horn) and teka (made of bamboo). The atmosphere of this festival always keeps the spirit of the people high and every Assamese is proud of this traditional dance and culture. There are other festivals, tithes or death anniversary ceremonies observed and celebrated by the people. The tithi of Sri Sri Sanherdev and Sri Sri Madhavdeva, the founder of the Mahapurushisha sect of Vaishnavism are being celebrated every year with great devotion and grandeur.

The Kacharis of the district observed their religious festivals which are different from those observed by the Hindus. Though most of them consider themselves as Hindus, the notions towards their traditional faith and belief can not be altered. The traditional region has the concept and worship God, the supreme being and an all creator living in heaven but due to their dependency on nature, the religion is built around natural phenomena and deities.

In the district some administrative development have been taken place during the decade with the creation of a new sub-division, Lakhampur sub-division. However, the administrative boundary of the district has not changed. In order to bring the administrative closer to the people, various plans and programmes for the development of the district have been taken up by the Government.

(x) Brief description of place of religious, historical and archaeological importance and places of tourist interest in the district.

Assam has a large number of monuments which speak profusely of the architectural skill of the ancient Assamese. These Monuments are mostly temples dedicated to various Gods and Goddesses. The district Cachar has a few remains of religious, historical or Arcaeological interest. The historical Monuments, relies etc. of Kachari kings are still seen in Cachar district. A note on important ones is given bellow.

Khaspur

A large area, containing ruins of brick-built two storied palace, temples of Rana Chandi and Vishnu and large number of tanks is located in this place. These are comparatively recent origin and possess a little Architectural merit. The temple of Rana Chandi is visited by devotees of Hindu religion till date.

Lakhi Tillah

In this place, west of the Silchar town lies the ruins of a stone built temple with a lot of carved stones and broken images of various deities believed to have been constructed by the Kachari king, Lakshmi Chandra who was a great skilled builder. He has also built Bhairab Bari near Lakhipur where the shrine of Lord Siva was placed for the enthusiasts to worship Him.

Bhuban Hills

In this hill, there are stone images of Siva and Durga. But it is difficult to trace the name of the person who had built this temple but it can be assumed to be of medieval age.

There are so many 'Akhras' or Vaishnava Shrines in Silchar towns. Narsingh Akhras is one of the most ancient temple established by a saint named Bhagavan Das Ramayali during 1864 A.D.

Langar Shah Makum is a shrine of Mohammedan Pir named Langar Shah. The age-old grave is kept up with great care and caution. The name of Pir is believed to be taken from Langar or a big chain he used to wear around his waist. The chain is preserved near the grave as a reminiscence of him as well as to have a glimpse of such consecrated ornament by the onlookers and almost every body who visited the grave ignites the candle and incense sticks day and night till-date.

Places of Tourists interest in the district

The Cachar district does not has any remarkable features of tourist spot which can attract the attention of tourists. Never-the-less, a few temples or shrines and graves in and around Silchar town generally attract visitors. There is a massive and high brick built temple of Lord Siva erected about the 19th century by an ascetic (Sannyasi) which can be considered a place of tourist interest. Narsingh Tola which is an old temple in Silchar town constructed around 1846 AD is of great tourist attraction.

The natural scenery in the entire district especially in the portions of Meghalaya and Mizoram is very much picturesque that catches the eyes of the visitors easily.

(xi) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Cachar district is the second important crop region of Assam. Agriculture is the main occupation of the rural people of the district. Rice is the staple food of the people and is cultivated extensively in the district. The soils in the district are similar to the soil available in Brahmaputra valley which is favorable for the cultivation of rice. The soil is alluvial and characterized by an abundance of marshes and low lands and contains a large percentage of organic matter. The soils are generally fertile due to annual deposit of silt. The rivers of Cachar have raised their beds above the level of the surrounding areas in many places and this condition leads to regular flooding of the nearby areas which remain water-logged even after the monsoon. Hence, agriculture in the rainy season is mainly confined to the high lands which are free from water-logging. In winter, however, these depressions grow excellent crops like pulses and oil seeds. Various types of rice is produced in the district. Plantation crops like banana, mango, orange, jack fruit, areca nut, coconut , betel-nut etc are the common type of fruits grown in the district. Every year during monsoon seasons, the low lying areas receive floods and agriculture suffers great loss.

The Government Fruit Preservation Factory at Silchar was started in 1954-55 as a pilot plant and later switched on to commercial production. Oranges and pineapples are processed in this factory which is the most well equipped and the production is of good quality.

Tea is produced in the district. It produces income and employment to a large chunk of the people of the district. Tea industry in Cachar district is developing in gradual way. A large number of small growers now come up and take it as profession which helps in self employment also.

In regard to any historical figure associated with the district, many writers, sportsmen, artists, musicians, scholars, freedom fighters and other dignitaries whose contributions towards the upliftment of the people of the district and the state as a whole are of immense value.

(xii) Scope of Village Directory and Town Directory - Column heading wise explaination and coverage of data.

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code. In col.No. 1.serial number is given. The name of village and location code come in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1 Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News Paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19-23
15. Name and Serial number of village	24-25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory However, in 2001 Census, some new items have

incorporated and a few are deleted which were in 1991 Census. For example, the information on market / hat are deleted. Never-the-less, the innovation and introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement I- Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement II- Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lakh and also five lakhs, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement III- Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are divided into two parts such as receipt and expenditure.

Statement IV- Civic and other Amenities, 1999.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, fire fighting service, electrification etc. are presented in its respective columns.

Statement V- Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement VI- Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives information for each town on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 show the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement VII- Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in kms), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Councils, Municipal Board, and Town Committee in respect of statutory towns and for Census Towns from the revenue authorities of respective jurisdiction.

****

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages. Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number

of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in

brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF

(xi) Others O

(xii) Total T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B

The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.

Appendix-VIII Indicates CD Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

List of villages merged in towns and Outgrowths at 2001 Census

1.	i)	Silchar XI	OG
	ii)	Tarapur VII	OG
	iii)	Tarapur VIII	OG
	iv)	Kanakpur I	OG
2.		Durga Nagar Part-V	CT

TOWN DIRECTORY

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type,it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

7	V Lakhipur (TC)	Pineapple	Ginger	Pickle	Pineapple Juice	Nil	Nil 2	-	-

The statement indicates three most important commodities exported and manufactured in towns. Silchar Pt X CT has no any commodity for export and manufacture. The name of commodities exported and manufactured in each towns can be seen in the statement. At Silchar MB+OG, there are as many as 23 banks. From sl.no. 2 to 5, towns have no bank. There are no agricultural credit societies and non agricultural cridit societies in Silchar MB+ OG Durga Nagar Pt V CT and Lakhipur TC..

STATEMENT - VII

Civic and other amenities in Slums, 1999

Sl. No.	Class and name of town	Name of the slum	Is it notified	No. of households (approximate)	Population of the Slum (approximate)	Paved roads (in kilometers)	System of sewerage
1	2	3	4	5	6	7	8
1	I Silchar M.B.	No Pocket'S Name	No	425	2,200	2	OSD
2	V Lakhipur T.C.	No Pocket'S Name	No	80	400	4	OSD

Sl. No.	Class and name of town	Number of latrines				Method of disposal of night soil	No. of tap points/public hydrants installed for supply of protected water	Electricity connections		
		Private			Community			Domestic	Road lighting (points)	Others
		water borne	service	others						
1	2	9	10	11	12	13	14	15	16	17
1	I Silchar M.B.	40	90	270	4	ST, Pt	12	123	32	-
2	V Lakhipur T.C.	10	20	40	-	ST, Pt	-	-	-	-

In the district there are two towns having slum population. There are 2,200 slum population in 425 households at Silchar MB whereas there are only 400 population in 80 households in Lakhipur TC. The road length for slum is 2 and 4 kms in Silchar MB and Lakhipur TC The system of sewerage is OSD for slum areas of both towns. The number of latrines of each type for both towns can be seen in the statement. The method of disposal of night soil in slum is Pt and St for both towns. The tap points for supply of protected water and electricity connections for all purposes in slum areas of Lakhipur town are not available.

PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE

Demography of the district Cachar

Annexure – I :: (Data has not been collected on Panchayat level)

Annexure – II :: Note on Fertility and Mortality

Fertility, mortality, and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question was to only currently married women. The measures of fertility worked out are based on the F – Series. Tables of 1991 Census pertaining to the Assam State and details of concepts and definitions are explained in the earlier chapter heading non Census concepts.

Annexure – III :: Various measures of Fertility and mean age at Marriage 1991 Census

Fertility :

As seen through various in indicators of fertility in the dist., it may be seen that the GFR of 137,GMFR of 190, TFR of 4.1 and TMFR of 6.1 against the respective figures at state level are at 135, 190, 4.2 and 6.1. Various measures of fertility and fertility related data presented in the following table :

Table - I

Various measures of Fertility and Mean age at marriage 1991 Census.

Fertility Measure	Cachar district.	Assam state
1	2	3
1. G.F.R.	137	135
2. G.M.F.R.	190	190
3. T.F.R.	4.1	4.2
4. T.M.F.R.	6.1	6.0
5. Crude Birth Rate	32.6	31.5
6. Number of Children ever born per woman in age group (45-49)	4.5	5.2
7. Mean age of Marriage	18.5	18.3
8. Child-Woman Ratio (0-4)	537	575
9. Child- Woman Ratio (5-9)	655	735

The level of fertility for all measures are seen high in GFR and TMFR and low in TFR in the dist. than the state. The GMFR is same as the state. The crude birth rate is higher than the state but on the contrary the child–woman ratio for both age groups are lower than the state averages.

Table - II

District –wise various measures of Fertility and mean age at marriage, 1991 Census

Sl. No	State/District	GFR	GMFR	TER	TMFR	CBR	No. of children ever born per ever married women in age- group 45-49	Mean Age at Marriage of currently married women

Table - III

Age specific Marital Fertility Levels in Assam and Cachar district – 1991, Census.

Age Group	District: - Cachar			Assam State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15 – 19	0.113	0.113	0.118	0.151	0.152	0.133
20 – 24	0.196	0.197	0.187	0.214	0.219	0.165
25 – 29	0.178	0.186	0.099	0.183	0.192	0.120
30 – 34	0.138	0.144	0.083	0.134	0.140	0.093
35 – 39	0.096	0.102	0.047	0.087	0.094	0.042
40 – 44	0.057	0.059	0.040	0.049	0.052	0.022
45 – 49	0.029	0.031	0.010	0.033	0.034	0.025

The Age Specific Marital Fertility levels are found higher in some age groups and lower in some other age groups in the district than the state in total, rural and urban respectively.

Mortality

The mortality figures in the district confirm of the general theory of relation between fertility and mortality. The mortality rates are shown in the following table.

Table - IV

Estimate of child mortality, 1991 Census.

Mortality measure		Cachar district	Assam state
1		2	3
Q. 1	Person	97	92
	Male	99	96
	Female	85	87
Q. 2	Person	103	101
	Male	97	104
	Female	100	98
Q. 3	Person	105	104
	Male	102	106
	Male	107	101
Q. 5	Person	116	116
	Male	122	118
	Female	111	115

Q. 1) in the above annexure shows the infant mortality rates whereas Q.(2), (3) and (5) indicate the size of child mortality in age group below 2, 3 and 5 years respectively. It is seen in the annexure that the mortality rate in Cachar district are almost equal to state level in all cases. It can, therefore, be said that the health status in the district is moderately satisfactory.

Annexure - IV :: Percentage distribution of migrants by place of birth/ place of last residence, 1991 and 2001 Census.

Migration

The detail data may be seen below in the following table.

Table - I

Percentage distribution of migrants by place of birth-1991 Census Assam

	4.1	7.7	2.8	2.0	3.8	1.4

From the above table it is seen that migrants from elsewhere in the district out side the place of enumeration consists of 79.1%, 9.7% are from other district, 5.4%, from other state and from other countries it is 5.8% of the total migrants.

Annexure V :: Brief account of main religious in the district tahsil as per 1991 and 2001Census.

Religion :

A brief account of religious composition of the population in the district alongwith the state is presented in the following table.

Table - I

Main religions in the Cachar district and Assam state – 1991 Census

District/ State	Religion	Number of Follower	Percentage to total Population	Percentage	
				Rural	Urban
1	2	3	4	5	6
ASSAM	Total Population	22,414,322	100.0	88.9	11.1
	Hindu	15,047,293	67.1	86.2	13.8
	Muslim	6,373,204	28.4	94.7	5.3
	Christian	744,367	3.3	96.0	4.0
	Buddhist	64,008	0.3	93.0	7.0
	Jain	20,645	0.1	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8
CACHAR	Total Population	1,215,385	100.0	90.2	9.8
	Hindu	770,803	63.4	86.5	13.5
	Muslim	419,150	34.5	97.0	3.0
	Christian	23,148	1.9	96.4	3.6
	Buddhist	356	0.0	87.9	12.1
	Jain	1,040	0.1	11.9	88.1
	Sikh	147	0.0	32.7	67.4

The Figure in the above table show that compared to the state as whole the proportion of Hindus is more in the district. The Muslim who constitute about 28.4 percent of total population at state level but in the district their percentage 34.5 percent. Christian consist only 1.9 percent as against 3.3 percent at state level which is also on lower side. However Jains, Buddhists and Sikhs though are negligible in number in the district and their shares are relatively less compared to the state averages.

Table - II

MAIN RELIGIONS IN THE CACHAR DISTRICT AND ASSAM STATE - 2001 CENSUS

District/State	Religion	Number of followers	Percent to total population	Rural_%	Urban_%
1	2	3	4	5	6
Assam	All Religions	26,655,528	100.0	87.1	12.9
	Hindus	17,296,455	64.9	83.7	16.3

Less than 21	359,651	344,079	99.2	94.3	0.8	5.4	0.0	0.1	0.0	0.1

A comparison of the district level figure of marital status with that of the State averages reveals that the percentage of never married males and females is higher than the state average. In case of married males and females the percentage is lower than the state average. In case of widowed males and female percentage is higher than the state percentage. Again in case of Divorced/ Separated males and females the percentage is higher than the percentage..

The highest percentage of married males and females are recorded in the age group of 45-49 and 35-39 in the district being 93.9 percent and 88.6 percent respectively. The corresponding figures in the State level for males and females are recorded in the same age group. Never married males and females being 28.9 percent and 6.9 percent respectively in the district which is higher than the State percentage of 22.1 and 6.3 percent respectively.

Annexure VII :: Age , Sex and Education in the district , 1991 and 2001 Census

Education and Literacy rate :

Age – group wise literacy rates for male and female in respect of both at state and district level are presented below in the following table.

30	Sema	10,346	0.0	2	0.0
31	Total of Other Mother Tongues	1,032,125	3.9	42,852	3.0

As can be seen from the above table, the number of persons speaking Bengali consist of the major portion (74.6%) of total population in district, followed by Hindu with (10.2%) and Manipuri (6.1%). The population with all the other mother tongues each constitute a negligible percentage.

Annexure IX :: Scheduled Castes and Scheduled Tribes population 1991 Census.

Scheduled Castes :

Out of 1,215,385 total population of the district in 1991 Census there are 178,624 Scheduled Castes population . Caste wise persons of some prominent Scheduled Castes in the district are represented in the following table.

Table - I
Distribution of Scheduled Castes population among some prominent Scheduled Castes Cachar district, 1991 Census

Name of Scheduled Castes	Total Scheduled Castes population	Percentage	
		percentage to total Scheduled Castes population	percentage to total population of the district
1	2	3	4
1. Patni	69,507	38.9	5.7
2. Namasudra	36,023	20.2	3
3. Kaibarta or Jaliya	33,932	19	2.8
4. Muchi , Rishi	17,394	9.7	1.4
5. Bhui Mali , Mali	7,166	4	0.6
6. Dhupi , Dhobi	6,950	3.9	0.6
7. Dugla , Dholi	2,263	1.3	0.2
8. Others	5,389	3	0.4
All Scheduled Castes	178,624	100	14.7
			(1,215,385)

N.B. 1. Others include Bansphar, Brittial-Bania /Bania , Hira , Jalkeot , Lalbegi, Mahasa ,Mehtar / Bhargi, Sutradhar, Jhalo / malo or Jhalo – Malo and Unclassified Castes .
2. Bracketed figure is the total population of the district , 1991 Census .

In the table above it is seen that Patni is the prominent Scheduled Caste in the district who constitutes more than one–third 38.9 percent of all Scheduled Castes population of the district. The second prominent Scheduled Castes is Namasudra with 20.2 percent followed by Kaibartta or Jaliya with 19.0 percent . All other remaining castes have a share of less than 10.0 percent .

Out of total population of the district , 14.7 percent is the Scheduled Castes of which Patni occupies 5.7 percent followed by Namasudra 3.0 percent . The remaining Castes have a share of less than 3.0 percent by each.

Scheduled Tribes :

The Scheduled Tribes constitute 7.7 percent of the total Scheduled Tribes population of the district. The data for some major Scheduled Tribes of the district are presented below in the table.

Table - II
Distribution of Scheduled Tribes population among some prominent Scheduled TribesCachar district, 1991 Census

Name of Scheduled Tribes	Total Scheduled Tribes population	Percentage	
		percentage to total Scheduled Tribes population	percentage to the total population of the district
1	2	3	4
1. Barmans in Cachar	13,378	80.8	1.1
2. Miri	1,051	6.4	0.1
3. Deori	733	4.4	0.1
4. Kachari , Sonwal	685	4.1	0.1
5. Lalung	575	3.5	0.1
6. Others	141	0.9	0
7. Total all Scheduled Tribes	16,563	100.0	1.4
			(1,215,385)

Note : 1. Others include Boro , Boro Kachari , Mech , Rabha and unclassified Tribes .
2. Bracketed figure is the total of the district population.

In the above table it is observed that it is a district in which the concentration of Scheduled Tribes population is very less. The Barmans in Cachar is a major Scheduled Tribe. Having a share of 80.8 percent of the total Scheduled Tribes population. The remaining Tribes have a share of less than 7.0 percent by each.

Out of the total population of the district the Barman in Cachar has a share of 1.1 percent only. The share of other tribes are very meager .It is less than 1.0 percent.
