SIDDHESWAR KAPILASHRAM

"Siddheswar Kapilashram", one of the most ancient temple in the state, is situated in the picturesque location on the bank of river Barak at the point equidistant from all the three district head quarters of Cachar, Karimganj and Hailakandi. Presently, it falls in the village of Thandapur near Panchgram under the administrative jurisdiction of hailakandi district.

Legend goes that, once in the very ancient time the DEVAS of the heaven approached Agastha Muni to get rid of Asuras called Kalkeya, who became threat to them. On their request Agastha Muni suked water from the sea and killed kalkeya who was hiding himself under the sea.

As the whole sea was dried up, Kapil Muni came out of his Ganga Sagar Ashram in search of a suitable place for deep meditation. After jaunting several place, he reached this place and sat in meditation under a big tree and achved en-lightenment. Hence, the temple got its name "Siddheswar Kapilashram".

On the occasion of Shiva Chaturdashi and Madhu Krishna Trayudashi, a large number of devotees visit the temple for darshan and perform religious activities.

Annexure II Fertility and Mortality 1991 Census 271

Annexure III Various measures of fertility and mean age at marriage,1991 Census 271

Annexure IV Percentage distribution of migrants by place of birth/place of last residence, 1991 and 2001 Census 273

Annexure V Brief account of main religions in the district / tehsil,1991 and 2001Census 278

Annexure VI Marital status of population as per 1991 and 2001 Census 280

Annexure VII Age, sex and education in the district, 1991 and 2001 Census 282

Annexure VIII Distribution of different mother tongues returned in 1991 and 2001 Census 286

Annexure IX Distribution of Scheduld Castes and Scheduled Tribes in 1991and 2001 Census 288

****

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census Tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA upto tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructure of Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of Village Directory and PCA Data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of Village Directory and PCA Data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of Gram Panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health

Centre), drinking water, Post and Telegraph (Post Office and Phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Shri P. Hazarika, Director of Census Operations, Assam. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and co-ordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agarwal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of Maps. Whereas, Shri Anil Kumar Arora, Deputy Director of data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and Town Directory Data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India.

New Delhi
Dated 17.10.2006.

Preface

The District Census Handbook is the only publication brought out by the Directorate of Census Operations on behalf of the State Government. The financial aspects of its publication are being taken care of by the State Government. This publication presents various demographic data down to the village level in rural area and to ward level of each town in urban locality. It depicts various amenities available in each village and town in the form of Village and Town Directory. Since the villages are the lowest units that constitute larger divisions like Revenue Circles, CD Blocks, Sub-divisions, Districts, the data both for Census as well as non Census are useful for micro planning and development at grass root level.

The analytical note included here in this publication has been improved by including many more information from than that of earlier publication. This publication is also made more attractive by inserting demographical aspect of 1991 Census in the form of annexures.

The Census Operations at Assam was initially conducted under the able guidance and supervision of Shri M. Das, IAS, Ex-Director of Census Operations, Assam. During my tenure, the Deputy Director, Shri Hiremath and Shri B.M. Talukdar, Asstt. Director,Assam were looking after Village Directory and Town Directory work. Now Shri B.L. Sarmah, DDCO and Shri N.C. Bhagabati, ADCO have been looking after all related works of DCHB and Shri B.M. Talukdar, Asstt. Director,Assam has also provided his valuable work in publication of this book. The Village Directory and Town Directory data were checked by a team of officials of which mention may be made of Mrs. P. Bhattacharjee, Sr. Compiler, Mrs. Khana Das, Asstt. Compiler, Mrs. P. Sonowal, Asstt. Compiler, Mrs. D. Sarmah, Asstt. Compiler and Mrs. D. Doley, Asstt. Compiler.

The DCHB is drafted by Shri B.M. Talukdar, Asstt Director and all Computer works were done by Shri S. Dutta Data Entry Operator , Smt. Rupam Gupta Stenographer. The map Section has provided maps which are included in this book. I offer my thanks to all of the officials who are closely associated with this noble work.

I am grateful to Shri J.K. Banthia, IAS, Registrar General and Census Commissioner of India for his constant valuable guidance. I much also record my gratitude to Dr. I.C. Aggarwal, Sr. Research officer for his sociological advice and Mr. S.L. Jain Deputy Director for his technical guidance

(P. Hazarika)
Director of Census Operations,
Assam, Guwahati.

District Highlights – 2001 Census

1. In Hailakandi district, Lala Revenue Circle/ Tahsil is most populous having 166,074 persons while Algapur Revenue Circle is the least populous Revenue Circle having 101,235 persons.

2. Among the CD Blocks, Lala CD Block has highest number of population with 155,804 whereas the lowest is found South Hailakandi CD Block with 78,043 persons.

3. In the district there are 4 Revenue Circles and 5 CD Blocks which comprise 331 villages including four uninhabited villages.

4. The district comprises three towns. Hailakandi MB is the most populous town.

5. While the highest number (68) inhabited villages are found each in South Hailakandi and Algapur CD Blocks and the lowest (40) inhabited villages is found in Katlicherra CD Block.

6. The largest village by area is Bongainagar Grant with 2,347 hectares of land and situates in Lala CD Block while in the district, Telecherra NC is the smallest village in the area with 9 hectares of land which is under Katlicherra CD Block.

7 The largest village by population is Dhalcherra F.V. with 6,897 souls which is situated at Lala CD Block and the smallest village Dhalcherra Tripura Punjee with 15 persons and is under Lala CD Block.

8 In Hailakandi district, there are some ancient relics which have some archaeological value.

9 Siva-linga of black stone found near Lala bazar becomes a place of religious importance.

2	Hailakandi	Hailakandi	U		0 kms.
3	Lala	Lala	R		17 kms.
4	Katlichara	Katlichara	R		28 kms

Statement-1 shows the information regarding the name of the headquarter of district/tahsil with their status and distance from tahsil/Revenue Circle headquarter to district headquarter by road in kilometer. The status of three Revenue Circles is rural and for one is urban. The distance from Revenue Circle headquarter to district headquarter varies from 0 km to 35 kms. However, the farthest distance of 35 kms. by road is recorded against Algapur Revenue Circle .

STATEMENT- 2
NAME OF THE HEADQUARTERS OF DISTRICT / CD BLOCK THEIR RURAL - URBAN STATUS AND DISTANCE FROM DISTRICT HEADQUARTERS, 2001

Serial number	Name of District / C D Block	Name of District / CD Block headquarters	Whether Urban / Rural	Distance from CD Block headquarters to district headquarters by road (in km.)
1	2	3	4	5
1	Algapur	Algapur	R	35 kms.
2	Hailakandi	Hailakandi	U	0 kms.
3	Lala	Lala	R	17 kms.
4	Katlicherra	Katlicherra	R	28 kms.
5	South Hailakandi	Hailakandi	U	6 kms.

Statement-2 gives the CD Block wise and their status with distance from district headquarter. Three CD Blocks are identified as rural and two CD Blocks as urban and their location varies from a distance of 0 kilometer to 35 kilometers from district headquarter. Algapur CD Block situated at the distance of 35 kilometers away from district headquarter and the nearest CD Block to the district headquarter is Hailakandi CD Block with a distance of 0 kilometer.

STATEMENT-3

Statement - 4 shows the area, number of villages/towns, population and Revenue Circle during 2001 Census in the district. The total area of the district is 1,327 sq. kms. In area, Katlicherra Revenue Circle is the biggest among all Revenue Circles. The population per sq. km is 409 in the district. Out of the total villages of 331 in the district, 4 villages are uninhabited. Among the Revenue Circles, Katlicherra Revenue Circle has the highest 111 number of villages and the lowest is noticed in Hailakandi Revenue Circle with 65 villages. In Hailakandi district, there are 97,856 households having 542,872 population. Out of total number of 125 towns in the state, 3 towns are in district of which 2 towns are statutory towns and one town is Census town. The total urban population in the district is 44,085 in 8,660 total number of households.

STATEMENT-5
CD BLOCK WISE NUMBER OF VILLAGES AND RURAL POPULATION, 2001

Serial number	Name of CD Block	Number of villages		Rural population *		
		Total	Inhabited	Persons	Males	Females
1	2	3	4	5	6	7

Statement-9 depicts houseless and institutional population in Revenue Circles, rural and urban, 2001. There is 65 houseless households and 115 institutional households in the district. A total of 1,188 population belongs to institutional households and 263 to houseless households. The number of houseless households is found more in Hailakandi Revenue Circle and more institutional households are found in Algapur Revenue Circle. The houseless and institutional population are found more in Hailakandi Revenue Circle. Both type of population are seen more in rural areas.

ANALYTICAL NOTE

ANALITYCAL NOTE ON HAILAKANDI

(i) History and scope of District Census Hand Book

District Census Handbook is an important and valuable publication brought out by the Census organisation of each state after each decadal Censuses. This provides detailed information on some basic demographic and socio-economic aspects and availability of important civic amenities in each village and town of the district. It, thus, bears the proud privilege of being only informative source of every district of each state. It has, thus, proved to be of immense utility to the planners, administrators, academicians and re-searchers District Census Hand Book was first initiated during 1951 Census with the collaboration of respective state Governments. In 1951, only few demographic as well as some economic information in village and town level of the district along with some census tables were published in District Census Hand books. Since then, it had undergone radical changes during the subsequent decades. The scope and content of the publication were enhanced by incorporating more census tables and also some basic statistics on land-use-pattern, agriculture, industry, administration, public Health and medical etc. The DCHB of 1961 was, therefore, considered as an unique asset published by Census organisation.

In 1971 Census, further improvements were made in the DCHB by enlisting many more information on villages and towns in the form of Village & Town Directory. It has three parts. The Part-A relates to Village and Town Directory. Part-B contains Villages and Town wise Primary Census Abstract and Part-C deals with administrative aspect and Census tables based on PCA etc. The 1981 census again widened the scope of DCHB to cover more data on literacy, health care etc in addition to the information covered in 1971, DCHB. In 1981, the DCHB was divided into two parts. The part-A included data on village & town directory and part-B covered only the village and town-wise Primary Census Abstract. This part of the DCHB was not brought to light in Assam as no census was conducted due to prevalence of disturb condition in the state. In 1991 Census, the DCHB was divided in two parts. The part-A divulged the Village and Town Directory and part-B indicated the Primary Census Abstract. The part-A had two sections. In section-1, the alphabetical list of villages and note explaining the codes used in the Village Directory were presented. The Village Directory had four appendices. The section-II depicted note explaining the codes used in the Town Directory, the Town Directory statements(I to IV) and appendix to the Town Directory. The part-B revealed district Primary Census Abstract, Circle-wise, CD Block wise, village and town wise Primary Census Abstract. In addition, the PCA had an appendix as well as annexure to the appendix. The District Primary Census Abstract to scheduled caste and scheduled tribe at circle and town level was also incorporated in this part of the DCHB.However, as a tradition of the past in the present DCHB also some more

information on availability of facilities such as, credit societies, banks, recreation and cultural facilities, News Paper/Magazine are included for the first time. Further, information on income and expenditure, important commodities manufactured, exported and imported etc. are also included to give a fuller account to the scope of DCHB. Similarly, in town directory also few more information are included to increase its depth. The process of collection and compilation of these data involved a lot of exercise. At first, revenue circle wise information on each village have been collected by revenue authorities at district level. These data are compared with 1991 Census data at district level and after their thorough scrutiny and cross check, these records are submitted to the Census Directorate. In case of Town Directory, data have been collected directly from the Commissioner of Municipal Corporation & Chairman of Municipal Board or Town Committee as the case may be. All these data received in the form of printed booklets are once again cross-examined with the figures of 1991 Census at Census directorate . Thereafter, efforts are made to compare and cross-check with similar data made available from other sources especially data published by different Departments of State Government to verify the

authenticity and correctness of figures received through village and town directory booklets. Then only compilation and computerisation of these data have been made according to the instructions of the Registrar General and Census commissioner, India. It is, therefore regarded that because of inclusion of various new information and external validation of data so collected, the 2001 DCHB is naturally be a superior publication than that of many publications brought out earlier. It will be more useful book for all concerns. This endeavour will perhaps, meet the quince of the thirst of needy people.

(ii) Brief History of the District :

It is opined that in ancient days, the old Cachar district was divided into a few smaller nations and each nation was ruled by an independent ruler. It is also believed that the Halam tribe people of Kuki origin were mostly inhabited in present Hailakandi district. Hence it was regarded as a Kuki state. The word 'Hala' denotes to God in Kuki language and Kundi refers to "Parameswara" or the land of "Parameswara". Thus, the word 'Hala-Kundi" means "Kingdom of God". Perhaps, the word 'Halakundi' was changed to 'Halla-Kandi' during Kachari rule and finally during the British rule it was converted into its present term 'Hailakandi'. It is of opine that present Hailakandi district was the kingdom of Kuki tribes until 1568 A.D. and the whole kingdom was under the control of Tripura administration. Jatinga and Hailakandi were formed into a kingdom during 16th A.D. and it was known to be as "Jayatunga barsha". Loknath and Marundanath had been discovered as the names of two kings by the inscription found in two copper plates. Adinath, Shrinath and Bhabanath were the ancestors of above two kings. The symbol inserted in the copper plate of Marundanath reveals an idol of Lakhsmi, the goddess of wealth and an ox the carrier of Lord Siva. It is assumed that these kings belong to Nath dynasty and were the worshipers of Lord Siva. The Roya family worshiped Goddess Lakshmi as their special goddess. From the two other brick inscriptions discovered on the bank of 'Rak-vata' or "Shakwala Dighi" (tank) about 3 kms away from Lalabazar that Maharaja Harish chandra Narayan had been ruling over this country up to 1490 saka or 1568 A.D. It can be said that the Kacharis did not come to Hailakandi which was under the Tripura administration up to 1568 A.D and were inhabited by Kuki.In the battle of Maibong, Kachari king Tamradhway was defeated by the Ahom, king Rudra Sinha in 1906 and subsequently the king left his capital and took shelter at Khaspur in the plains of Cachar. It is believed that the Kachari princes seemed to have settled in the plains of Cachar permanently from this time. The king Suradarpa Narayan, son of Tamradhwaj, constructed many palaces and temples in Khaspur and the kingdom was named as 'Hidimba kingdom'.A sizeable portion of Brahims and high caste people from Koch-Behar, Tripura and Sylhet came to the Royal court of Kachari kingdom at Khaspur for their livelihood and the king patronised them all in all respects. The king had encouraged equally all immigrants who had come from Sylhet, Bengal and other to the newly established capital for their settlement. The cultivators were also helped to encroach upon the Tripuri territory in the Dhaleswari Valley which consisted the most area of present Hailakandi district. Mr. C. A. Sopitt also admitted that the Kacharis were migrated to the plains of Cachar only in 1750 and king Suradarpa and his successors ruled over it. It is therefore, believed that present Hailakandi district came under Kachari kingdom only after 1750 A.D. The district Hailakandi as a part of old Cachar district was annexed to the British territory in 1832 and the central Cachar and a part of hill tracts of Cachar were finally annexed by the British in 1833. The district was included in the Commissionership of Dacca in 1835 and Captain Fisher was posted as Deputy Commissioner with the power of a Magistrate . The Judge of Sylhet acted as a session Judge of Cachar. However, in 1854 the northern part of Cachar which was already under the British was annexed to the district of Nowgong (Nagoan). In 1867 with the formation of Naga Hills district, this tract was partitioned between the district of Nowgong and Cachar. At that time the district consisted of three Sub-Divisions, North Cachar, a hilly area of 4276 kms^2 and two plains Sub-Divisions of Silchar and Hailakandi with 4967 kms^2. Later in 1951, with the constitution of United Mikir and North Cachar Hills, the North Cachar tract was separated from Cachar and the loss having been substantiated by adding Karimganj sub - division with parts of old Karimganj P.S., Badarpur, Ratabari and PatharKandi P.S. from the independent district syhet.

(iii) Administrative set up

The district Hailakandi is situated in the Barak Valley region of Assam. Hailakandi district has no

any Sub-Division. It comprises 4 Revenue Circle with 331 villages. It has 5 Community Development Blocks. There.is no any jurisdictional changes taken place during 1991 – 2001 . The total area in the district is 1327 square Kms. The rank of district in comparison to other districts in term of area in the state of Assam is 23. It is the smallest district among the districts of Assam. At Hailakandi district, there are one town having Municipal Board namely Hailakandi MB; one town having Town Committee i.e. Lata Town Committee and a Census Town named H.D.C. township. No area is carved out from the district to other district and similarly no area has been transferred to this district from other districts

(IV) Physical feature

Topographically, the valley in the south of Barak is known as Hailakandi Valley.This valley is intersected by the river Dhaleswari from south to north . To the north, the district is more or less plain with small hillocks here and there. To the extreme south, the district is covered with deep forests bordering the Mizo Hills. So is the case with the south-eastern side. The entire area of the land is of old alluvium soil. The Western side of the district is mostly plain level lands and low lands. The district on the whole is rich in vegetation with hard and soft wood available from the forests bordering Mizoram. Bamboo groves, reed grass and canes are grown in abundance in the district . Most of the parts of the district are lined with villages covered in groves of slender areca - palms, broad-leaved plantains and feathery bamboo and in all seasons of the year, the district looks fresh and green. The hills on the south part of this district are covered with dense ever-green forest and jungle. The major characteristics of the district has a comfortable forest area required for the healthy environment.

Drainage

The principal rivers in the district are the Dhaleswari and the Sonai. The later rises in the Mizo Hills & falls into Barak at Sonaimukh. The Dhaleswari also rises in the Mizo Hills where it is known as the Tiong. Originally, it used to flow along the western side of the Hailakandi Valley and falls into the Barak. A former king of Cachar is said to have diverted its course and the old channel is known as Katakhal. The Katakhal flows along the east of the Valley and falls into the Barak near Salchapra. The banks are steep and high and the channel of the river is deep but it is liable to sudden freshets which damage the villages. The whole drainage of the district ultimately finds its way to all rivers & tributaries. The rivers and its tributaries are only drains to flash out the water. However, in rainy season, the rain water are deposited in all rivers and plain land. So the water remains for few months in a still-stand way. Whenever water come down in the river, the water of plain area goes out through rivers & its tributaries.

Flood

The flood which is so frequent in the Brahmaputra and Barak cause tremendous changes in the river course and raise the rivers beds by depositing sediment carried from the upper reaches. This is a common feature of floods in big rivers. The miseries caused by the Barak and its tributaries beggar description. Villages situated on the river banks are submerged, paddy fields are turned into vast sheets of water, standing crops are destroyed, cattle are swept away and hundreds of cultivators, fishermen and other people living in these areas are rendered homeless. All important lines of communications are snapped and life hinges on the relief provided by the Government and public.

Climate

In Hailakandi district, the cold season starts from the end of November when both the day and night temperature begin to fall rapidly. In the month of January it reaches the minimum points. This is the coldest month of the year when the mean daily minimum temperature generally comes below 13° centigrade. From the end of February the mercury level gradually goes up and in July, August and September the temperature reaches the maximum point. During these months, the mean maximum temperature does not generally come below 31 degrees centigrade. These months can be treated as hottest months for the district in each year. The high percentage moisture in the atmosphere makes the weather irritating. The percentage of relative humidity in these months is between 85 & 88. In the month of October, the temperature gradually comes down and the nights become quite pleasant.

Rainfall

The climate of Hailakandi district is characterized by excessive humidity and being shut in by ranges of hills, the heat can become decidedly oppressive during certain seasons of the year. The average monthly rainfall is highest in the month of July/99 with 461.7

followed by 379.8 in August/99. There was no rainfall in the month of December/ 98 to February/99. The lowest rainfall recorded is 8.0 m.m during November/ 1999. The annual rainfall in Hailakandi district was recovered 2138.8 m.m in 1998-99. The whole year is divided in four seasons and season-wise actual rainfall in Hailakandi during December 1998 to November 1999 is 0.0 m.m in winter season, 466.5 in summer season, 1408.7 m.m in monsoon season and 268.6 m.m in post monsoon season. The soils of the Cachar Valley are not much different from those to the Brahmaputra valley. The Cachar valley is characterized by an abundance of marshes and low lands the soil of which contain a large percentage of organic matter. The same condition prevails in the soils of Hailakandi district. Hailakandi is an important crop region of the valley. The agriculture in the rainy season is mainly confined to the high lands which are free from water-logging. The hill slopes leading to the district grow tea. In winter the soils are excellent for growing crops like pulses and oil seeds. The soils in Hailakandi district are generally fertile due to annual deposing of silt. A major portion of total sown area of this district is under rice and tea.

Forest :

The forest plays a vital role in the economy of the people of the district. A large portion of the people of the district depends on forests for firewood to cook their meal and timber, bamboo, Ekra, thatch etc. to build their houses. The forests of the district are the chief supplier of raw materials used in saw mills and plywood factories. The total area under forest in Hailakandi district is 63661.07 hectares under reserved forest on 31st March 1999. There is no proposed reserved forest (PRF) in this district. It, however, appears from the statistics that the area under reserved forests is comparatively less in Hailakandi than that of Cachar and Karimganj district of the valley. The forest of the district has various kinds of valuable trees such as Sal,(Shorea robusta), Gamari (Gmelina), Koroi (A. Lebeek), Jam (Eugenia Jambolon), Simul (Bomhax Malabarica), Mangoes tree etc.

Mineral and Mining

The district has no minerals deposits or mines. However, Salt springs exist in the hill ranges. Clay used for the manufacture of bricks and roof tiles are available in Hailakandi district. Land and Land-use pattern Land resource is the most important and valuable free gift for a state/district and its popular utilization is a matter of utmost concern to its inhabitants. The utilization of land according to its use capability makes sure that land resource is fully put to use. Lack of proper or profitable use means wastage of land wealth and ultimately results in loss of productivity of this kind of fixed asset. It needs proper use of all available land

The following table indicates the pattern of land use under various classification of land in Hailakandi district.

Table – I

Land use pattern in Hailakandi District (1997 – 98 Provisional)

Sl. No.	Classification of Land	Area in hectares
1	2	3
1	Total Geographical area	132,700
2.	Forest area	63,661
3	Land not available for cultivation	12,085
	(a) Land put to non-agricultural uses	8,604
	(b) Barren and uncultured land	3,481
4	Other non-cultivated land excluding fallow lands	8,033
	(a) Permanent pastures and other grazing land	932
	(b) Land under misc. trees, groves etc. not included in net area	6,826
	(c) Cultivable waste land	
	Fallow land	275
5	(a) Fallow other than current fallow	3,749
	(b) Current fallow	1,827
	Net area sown	1,922
6	Total cropped area	45,059
7	Area sown more than once	59,522
8		14,463

Agriculture and Plantation

The Economy of the district is primarily agricultural . The alluvial soil of the district is fertile and suitable for agricultural production

Crops :

The staple food of this district is rice. The other important crops are Mustard, Pulse, Cereals, Wheat & Tea. Jute is also grown in the district. Lahi rice is grown in higher fields which is an important production of the district. The Joha is the finest variety of rice commonly grown in the district. Boradhan is also produced particularly to make Chira and Pitha (cake). Ahu is another variety of rice grown in the middle of July. Wheat is also gaining popularity and is supplementing rice in diet. Wheat is cultivated as a Rabi crops. The varities are Sonalika and Kalyan Sona. Rape and Mustard are often grown alongwith Ahu rice. Pulses like Mati Kalai, Masur, Matar, Mug are also grown in the area. Arhar is also another pulse grown in the district.

Table – II

Area, Production and Average Yield of important crops in Hailakandi district for the year 1998 – 99 (as per final forecast)

Flood, rainfall, textural peculiarities of the soil etc are the factors upon which production of crops largely depend in the district.

Horticultural crops

An important garden crop of the district is the plantain known as 'Kal' in Assam. The various types of bananas are grown in the district. These are Cheni Champa, Malbhog, Athia, Porakal, Manohar, Jahaji etc. Porakal is used as vegetable. It is used in curry. The banana tree is more important because the whole plant from leaf to root is used for different purposes. Mangoes, Jack fruits, Lemons, areca nut, coconuts etc. are also common production of the district. Various type of vegetable are grown in Hailakandi district.

Table – III
Area, Production and Average Yield of Horticultural crops in Hailakandi district (1998-99), (Final forecast)

Sl.No	Type of crops	Area under cultivation (hectare)	Production in tones	Average yield kg.per hectare
1	2	3	4	5
1	Banana	1,080	13,400	12,410

Hailakandi district receives heavy rainfall during monsoons season. The months May, June and July are the wettest period of the year and these months account for more than 60% of the total annual rainfall. The cultivators depend largely on rain water for their cultivation. Agriculture suffers loss in year of excessive rain due to the result of flood and fail in the years of drought. In times of drought cultivators are compelled to irrigate their fields by digging canals from various streams and rivers. Indigenous way of irrigation is still prevailing in the district. The channels, ponds are constructed to water the agricultural fields. Some minor irrigation projects are installed in the district by constructing bunds across the streams and rivulets, drainage channels and silt channels to obtain silt deposits in low lying areas. Lift irrigation with electric pump has also been used in some parts of the district.

Table - IV

Irrigation potential utilised and targets and achievements of additional potential created in Hailakandi district

Sl. No.	Particulars	Land area in hectares
1	2	3
1	Irrigation Potential Utilised during 1997-98	148

Animal husbandry

Various kind of livestock are available in the district. Cattle and goats are main animals for most of the families of the district. More over buffaloes, sheep, horses, pigs, fowls and ducks are also available in the district. People generally graze their animals on the rice field after harvest of crops. In the night the animals are kept in sheds by the owners of animals and give them paddy straw for food which are kept in stock in the courtyard. Besides, there are village grazing reserves where the villagers can graze their animals.For all round development of livestock, emphasis has been given on the cultivation of fodder crops to provide them with nutritious diet. Roots and seeds of improved grasses are freely distributed to the farmers from the Government farms. The department of Animal Husbandry and Veterinary has been constantly helping the farmers for their animals. In order to improve the breed cattle, measures have been adopted by the above department. Contagious and infectious diseases are also prevalent among livestock in the district. To protect animals from various diseases preventive measures are taken by the department of Veterinary & Animal Husbandry.

Table- V

Live stock and poultry in Hailakandi district as on 1997

Sl. No.	Livestock and poultry	Nos.
1	2	3
1	Cattle	183,470
2	Buffaloes	33,814
3	Sheep	3,164

Fishery

Pisciculture is becoming popular among all sections of the people irrespective of caste and creed. Fisheries in Assam are of various types. They are beel, river, swamp, forest derelict and semi derelict, pond and tank fisheries. Beel and river fisheries can be either registered or unregistered. Besides, there are good number of private tanks, marshy areas, dead rivers and canals where pisciculture is done. Various kinds of fish are found in beels and rivers of the district. The bigger type of fish generally found in the beels are Rou, Barali, Chital, Kaliajora, Sol etc. Among the smaller varieties, Kawai, Magur, Puthi, Mowa, Shingara etc. are very common. In Hailakandi district, the number of Registered Beel and Registered Rivers fisheries are 6 and 9 respectively. The production of fish seed and fish were targeted 40.00 million nos and 54.00 metric tones in 1998 – 99 at Hailakandi but the achievement in respect of both were 55.07 million nos and 5342.91 metric tones respectively.

Source : Statistical Handbook, Assam,2000.

Industry

Hailakandi is one of the most industrially backward district in Assam. The Hindusthan Paper Mill is the only major industry located at Panchgram of Hailakandi . No other major industry is available in this district. There are, however some registered factories relating to manufacture of food products, Cotton Textiles, wood and wood products including furniture and fixtures etc. are available in the district. The statistics relating to those factories are not available separately.

The total numbers of small scale industries registered under the Directorate of Industries and Commerce are 214 in Hailakandi up to 31.12.98.

Trade and Commerce

In ancient time good overland communication system was not developed and the scope for external trade was very much limited. But after lapse of time, the situation has gradually improved in Hailakandi district. There has been expansion of road & rail communication.

A considerable amount of retail business is done in the local market . The greater part of the total trade still enters and leaves by road and railway. Jute, paddy, rice timber, oilseeds, cotton, vegetable, tea etc are the important products dealt in and exported in and outside the district. The hats and markets are important centres where a great deal of retail business is transacted. These hats and markets are held either weekly or bi-weekly on particular day. Middlemen and beparis purchase the village products and sell them to the whole sale merchants. Hailakandi town is the principal centre of trade and commerce in the district.

Banking

In ancient days, there was no banking establishment in the district. The money lenders play an important role in rural areas . The small cultivator were generally fallen in the grip of money lenders and wealthy land holders. But with the passage of time the relative position of credit sources changed to a great extent. The Co-operative Societies have come up in a big way to meet credit requirement in rural areas. Some of the Nationalisation Commercial Banks have opened their branches in urban as well as in rural areas of Hailakandi district. There are no Joint Stock Commercial Bank incorporated in Hailakandi. There are some branch offices of Commercial Scheduled Banks. The State Bank of India opened its branches at some places of Hailakandi district. The functioning of different Banks in Hailakandi district has improved rapidly now-a-days. However, even now, the money lenders play a vital role as a source of credit for rural.

Table – VI
Position of deposits & credits of Scheduled Commercial Banks and Regional Rural Banks on 1999 December in Hailakandi district

Sl. No.	Category of Bank	No. of Offices	Rs. In lakhs	
			Deposits	Credit
1	2	3	4	5
1	Schedul Comm. Banks	20	7,783	1,705
2	Regional Rural Banks	.8	1,570	318
3	Total	28	9,353	2,023

Source : Statistical Handbook, Assam, 2000".

Transport and Communication

The transport system was poor in ancient days. But gradually transportation system has been developed in the district. It has now road and railway communication only. The river communication is not so much developed. There is either airway or National high way. Even it has no state Highway. Accordingly to statistical Handbook Assam, 2000, there are 136 kms surfaced and 300 kms unsurfaced road length in the district. Thus, the total road length in the district comes to 436 kms. As there is no National Highway or state Highway, the whole road length belongs to other P.W.D. roads. The private and state transport buses run regularly from Hailakandi to other important places of the district. Besides buses from Silchar & Karimganj also run to Hailakandi town. A direct link from the district with state Head quarter, Guwahati is making by private as well as state transport buses daily.

In Hailakandi district, there are 4 articulated vehicles, 13 trucks, 75 light commercial vehicles, 172 buses, 7 omni buses, 26 mini buses, 42 taxies, 151 auto rickshaw, 838 two wheelers, 280 cars, 52 jeeps, 46 tractors, 14 government vehicles in 1989 – 99 as reported in Statistical Handbook, Assam, 2000.

The numbers of person injured and killed in road accidents in 1999 in the district were 7 and 22 respectively and the number of road accidents registered by police in 1999 was 27 only

Electricity and Power

The development of agriculture as well as industry can not be accelerated without the availability of power. In addition to it, the use of electricity has become indispensable in the modern times.

In Hailakandi district the electricity facility is not developed up to desirable extent. As mentioned in Statistical Handbook Assam – 2000, the number of villages electrified in Hailakandi district is 290 in 1998 out its total 331 villages and even after one year the number has not increased in 1999. However, 87 percent villages have been provided with electricity facility.

Local Self Government

It was a village court where trials of crimes and disputes were held in.

The present system of local self Government is a legacy of the British Administration and its origin may be traced to the principle of local taxation embodied in Regulation 13 of 1813. However, some form of local self Government were in existence like Namghar in pre-British period. The Assam Panchayat Act 1959 which came into force in 1960, abolished the local Boards and under this Act a three tier Panchayat Raj system was introduced in Assam. But the Panchayat Act, 1972 which was operated in 5th May, 1973 changed over to two tier system of Panchayat and the intermediary Anchalik Panchayat have been abolished.

As mentioned in the Statistical Handbook, Assam – 2000, there are 62 Gaon Panchayats and 1 Mahkuma Parishads in urban area of Hailakandi district as on 31st March, 2000. The urban areas are classified as Municipal Board, Town Committee and Municipal corporation. In Hailakandi district, there are one Municipal Board at Hailakandi town itself and one town Committee for Lala town. There is one Chairman and a Vice-Chairman in Municipality Board and the Chairman is the head of administration. He is entrusted with implementation of the schemes taken up by the board. It has various sources of revenue. It levies different taxes on holdings, rickshaws, carts, cycles, stalls, markets etc.

Social life

Among the Hindus, the property is generally held by head of the family who manages it as its custodian. After the death of the father, the sons and daughters inherit the properly. The joint family system was common in the past. But now-a-days; it is loosing its hold. Among the Bengali Hindus marriage by negotiation is common. The caste distinction is not rigid as it was a few decades ago, nevertheless, the inter-caste marriage is not very frequent among them. Although permitted by law re-marriage of widow is not looked upon.

In rural family, every household particularly Assamese family has their distinct types of houses for their different uses. But the Bengali & Muslim family have not different types of houses for different uses. In most of rural folk households their houses are made of thatch & bamboo. At present who can afford have constructed their houses on modern line using C.I. sheets and brick and cement.Male dress for Assamese & Bengali includes Dhoti, Chadar, Shirt, Kamij, Trousers and Coats, but Muslim males use Lungi. Female dress

for Assamese consists of Riha, Mekhela, Chadar, Sari & Blouse but Bengali females do not use Riha, Mekhela, Chadar. They use only Sari & Blouse. Similarly the Muslim female use Sari and Blouse only. Ornaments like Neckless, Earring, Bracelets, Kharu, Chain are commonly used by all females of all regions.Colourful festivals observe in the district enliven the lives of the people. The biggest festival of the year in the district is Durga Puja which is observed by both Assamese and Bengali people. Sivaratri & Doljatra are also observed by both sections of the people. Assamese people observes three Bihus.Muslims are also observed Id-Ul-Zula, Muharram, Fatiha- I-duazdalam and Idulfitre.The Namghar is the community prayer hall of the Assamese villagers. Nam-kirtan performs during religious festivals. Daily prayer is also held in Namghar in morning and evening times.Most of the indigenous games played in the district in the past have now been replaced by western games and sports. Football, Cricket, Volleyball etc are now very popular among the youths Indoor games like Caroms, Cards, Chess, Ludo are played in the towns & villages.

CENSUS & NON-CENSUS CONCEPT

CONCEPTS AND DEFINITIONS

(v) CENSUS CONCEPTS:

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete

Semi-permanent houses:

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

RoomDwelling Room:

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room

available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room . A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house Rural-Urban area

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.Only cases where a structure with roof and pillars has come up was treated as a building.The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban

areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows: a) All places with a municipality, corporation, cantonment board or notified town area committee, etc. b) A place satisfying the following three criteria simultaneously: i) A minimum population of 5,000;ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; andiii)a density of population of at least 400 per sq. km.(1,000 per sq.mile)For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

Village :

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/Urban area :

The following areas are treated as towns/ urban area

(a) All places with a municipality, municipal corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy or are expected to satisfy the following criteria simultaneously

i) A minimum population of 5,000; ii) At least 75 per cent of the male working population engaged in non-agricultural pursuits ; and iii)A density of population of at least 400 per square kilometre (1,000 per square mile).

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the

exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste andScheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below: (Each Census Directorate will provide list(s) of the Scheduled Castes & the Scheduled Tribes as applicable in the State/Union territory. In this connection, the publication 'List of the Scheduled Castes and the Scheduled Tribes, Census of India, 2001' supplied by the ORGI is given below :

Scheduled Castes :

1 Bansphor
2 Bhuinmali,Mail
3 Brittial Bania,Bania
4 Dhupi,Dhobi
5 Dugla,Dholi
6 Hira
7 Jalkeot
8 Jhalo, Malo,Jalo-Malo
9 Kaibartta

8 Miri

9 Rabha

Language and Mother tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such

professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex -ratio :

Number of females per 1000 males in a population.

(vi) NON CENSUS CONCEPTS:

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water. It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine andMethod of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.(i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging. The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns. Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the

terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid- year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women .

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q1 Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 Probability of dying between birth and age 2.

q5 Probability of dying between birth and age 5.

This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 daysDuring the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR) :

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) :

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

1. Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town. Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :-

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course

that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant. (iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother. A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration :

The migrational movements are of three types :

(i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration)

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural - Urban components of migration:

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee/ Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 100,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6(2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment,

Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings – Population, its distribution

a) The total population of the district comes to 542,872 in 2001 Census. Male comprises 280,513 while female consists of 262,359. Out of the total population of the district, 498,787fall under rural and 44,085 are under urban areas of the district. In rural areas 257,985 and 240,802 are males and female respectively. Accordingly 22,528 and 21,557are males and females respectively in urban of the district. The percentage of urban population in the disrict Hailakandi is only 8.12. The district is a rural base place in which 92 persons out of each 100 persons live in villages.

b). The decadal growth rate of the district comes to +20.9 which is higher than the state rate. In the district, there are only 2 towns . Hailakandi Town is only town with Municipal Board and one town is with Town Committee status and one census town. The density of the district is 409 persons per sq. kms. which is higher than the state density (340). The sex ratio in the district is 935, which is same with state sex ratio in 935. Out of total population of the district, 33.1% is total workers of which 48.7% and 16.5 % are male and female respectively. The percentage of non- workers is 83.5 % in the district. The worker are categorised as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. The percentages of these categories are 34.9 %, 14.3%, 3.2% and 47.7% respectively.

The literacy rate is 59.6% in the district of which 68.2% is for males and 50.5% is for females. The district literacy rate is above the state literacy rate (63.3)%.

(viii) Brief Analysis of Inset Tables prepared from Primary Census Abstract :

As in previous Census, a number of Inset Tables are prepared from data which are incorporated in primary Census Abstract 2001 ,Census also. Alto-gether 52 Inset Tables are presented in this volume from data of three sources namely Primary Census Abstract, Village and Town Directory and House and Household amenities of Houselisting operations. The Inset Tables 1 to 36 are based on Primary Census Abstract, Inset Tables 37 to 47 based on Village and Town Directory and Inset Tables 48 to 52 based on houses and household amenities of 2001 Census. The Inset Tables prepared are analysed properly for easy understand of data users. It is a first step taken in all states and union teritories for 2001 Census, District Census Hand Books.

Inset Tables Based on Primary Census Abstract :-

TABLE :1

DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Algapur	83,081	83,081	0	101,235	97,159	4,076	21.9	16.9	-	0.0	4
2	Hailakandi	113,410	87,931	25,479	137,691	107,952	29,739	21.4	22.8	16.7	22.5	21.6
3	Lala	139,223	130,564	8,659	166,074	155,804	10,270	19.3	19.3	18.6	6.2	6.2
4	Katlichara	113,334	113,334	0	137,872	137,872	0	21.7	21.7	-	0.0	0
District Total:		**449,048**	**414,910**	**34,138**	**542,872**	**498,787**	**44,085**	**20.9**	**20.2**	**29.1**	**7.6**	**8.1**

The table-1 shows the decadal change in population of Revenue Circles/ tahsils by residence in rural and urban of Hailakandi district during 1991 and 2001 Censuses. It is noticed from the table that the total population of the district is 542,872 out of which 498,787 are in rural and 44,085 are in urban and the growth rate during 1991-2001 is recorded 20.2 percent in rural and 29.1 percent in urban. The percentage of urban population to total population is 8.1 percent. The growth rate of among Revenue Circles is almost same. However, the highest growth rate is seen in Algapur followed by Katlichara Revenue Circle with 21.7 percent and the lowest is noticed in Lala Revenue Circle with 19.3 percent. In the distribution of population among Revenue Circles in rural of the district, it is noticed that the growth rate during 1991-2001 is 22.8 percent in Hailakandi Revenue Circle which is the highest followed by Katlichara Revenue Circle with 21.7 percent. In terms of numerical figures, Lala Revenue Circle is recorded the highest 166,074 number of persons but in the proportion of growth rate during 1991-2001, this Revenue Circle is recorded third position in growth rate among all Revenue Circles. However, in term of number of urban persons, Hailakandi Revenue Circle is recorded 29,739 persons which is more than urban population of other two Revenue Circles where there are urban population.

TABLE : 2

NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / CD Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

TABLE : 2

NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / CD Block	Population 2000-4999		Number and percentage of villages	Population 5000-9999		Number and percentage of villages	Population 10000 and above	
		Males	Females		Males	Females		Males	Females
1	2	20	21	22	23	24	25	26	27
1	Algapur	12,318	11,409	1 (1.5)	2,996	2,766	0 (0.0)	0	0
2	Hailakandi	21,789	20,052	1 (1.6)	2,909	2,597	0 (0.0)	0	0
3	Lala	42,562	40,005	2 (2.3)	6,417	5,690	0 (0.0)	0	0
4	Katlicherra	18,695	17,943	0 (0.0)	0	0	0 (0.0)	0	0
5	South Hailakandi	18,111	17,033	1 (1.5)	2,581	2,539	0 (0.0)	0	0
Districts (Rural) Total:		**113,475**	**106,442**	**5 (1.5)**	**14,903**	**13,592**	**0 (0.0)**	**0**	**0**

The table-2 gives the CD Block wise distribution of number and percentage of inhabited villages in specified population size ranges with the related population. Out of 327 total number of inhabited villages in the district, 6.1 percent villages are in the population size range less than 200 population. 10.4 percent of villages are in the population size range between 200-499 population and the highest percentage of villages 41.3 fall in this population range 0f 1000-1999. However, the number and percentage of villages in the highest population range are less and 1.5 percent villages are in the population range between 5000-9999. There is no village in the district with the population range of 10,000 and above. Among the CD Blocks in the district, Lala CD Block has the highest number of inhabited villages with 87 of which 36 villages are noticed in the population size range between 1000-1999. The smallest number of inhabited village is noticed in Katlichara CD Block with 40 villages of which 13 villages are found in the population size range between 2000-4999.

TABLE : 3

NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town	
(a) New	
(i) Statutory town	
1	Nil
2	
3	
(ii) Census town	
1 Hindustan Paper Corporation Ltd. Township Area Panchgram	
2	
3	
(b) Denotified	
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns	
1	Nil
2	
3	
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria	
1	Nil
2	
3	
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census	
1	Nil
2	
3	
(c) Declassified	Nil
1	
2	
3	
(d) Wholly merged with other town(s)	Nil
1	
2	
3	

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

The table -3 indicates that no new statutory town in Hailakandi district has been existed in 2001 Census. No statutory town of 1991 Census is either de-notified or declassified or wholly merged with other town during 2001 Census in the district. Hindustan Paper Corporation Ltd Township Area Panchagram is considered as a new Census town in 2001 Census

TABLE : 4
DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	7	2.1	5,773	1.2
11-20	1	0.3	20	0.0
21-50	6	1.8	1,149	0.2
51-100	5	1.5	760	0.2
101-200	9	2.8	4,778	1.0
201-300	19	5.8	23,230	4.7
301-500	35	10.7	54,961	11.0
501 +	245	74.9	408,116	81.8
Not known	0	0.0	0	0.0
District Total: 327		**100.0**	**498,787**	**100.0**

Population Density (Rural) of the district: 676.9

The table-4 indicates the distribution of villages by population density. Out of total number of 327 villages in the district, the highest number of villages is noticed in the density range 501+ population per square kilometer. It constitutes 74.9 percent of the total villages and the proportion of distribution of population is 81.8 percent of the total population in the district. By the next range of population density 301-500, 10.7 percent villages are covered.. From the above table, it is noticed that the higher is the range of population density per square kilometer, more is the number of villages in each population density. There is no village in population density range of "Not Known".

TABLE : 5
SEX RATIO OF STATE AND DISTRICT, 1901 - 2001

Census Year	Assam			Hailakandi		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	919	929	577	913	913	
1911	915	923	627	919	925	480
1921	896	906	614	922	934	397
1931	874	886	575	902	908	552
1941	875	887	606	897	902	637
1951	868	879	664	891	895	791
1961	869	888	662	904	907	861
1971	896	913	745	923	924	906
1981	—	—	—	—	—	—
1991	923	934	838	929	929	944
2001	935	944	872	935	933	957

Note : Sex ratio has been defined here as the number of females per 1000 males.

The table-5 gives the sex ratio of state and district from 1901 to 2001 Census. During this historical Census that conducted after 110 years, the sex ratio in the state has shown an increasing trend from 919 in 1901 to 915 in 1911 Census and it has gone up to 935 in 2001 in the state. In the district, sex ratio 913 recorded in 1901 has gone up to 935 in 2001 Census as in the state. The increase of sex ratio is noticed in rural of the district whereas in urban it is drastically increased in 2001 to 957 from 480 in 1911 Census

TABLE : 6
SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Algapur	927	931	832
2	Hailakandi	928	917	968
3	Lala	936	933	980
4	Katlichara	948	948	--
District Total:		**935**	**933**	**957**

The table-6 gives the sex ratio by Revenue Circle. The district sex ratio 935 is equal to the state sex ratio of 935 and in rural also the district sex ratio of 933 is less than the state rural sex ratio of 944. Among Revenue Circles, the sex ratios are almost same for all Revenue Circles. However, Katlichara Revenue Circle recorded the highest sex ratio of 948 and the lowest is noticed in Algapur Revenue Circle with 927 sex ratio. The sex ratio in urban of Lala and Hailakandi Revenue Circles recorded 980 and 968 respectively are more than the district urban sex ratio of 957 whereas Algapur Revenue Circle recorded the lowest sex ratio of 832 in urban.

TABLE : 7
SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D Block	Sex ratio
1	2	3
1	Algapur	931
2	Hailakandi	917
3	Lala	933
4	Katlicherra	953
5	South Hailakandi	944
District (Rural) Total:		**933**

The table- 7 gives the CD Block-wise sex ratio in the district. Out of five CD Blocks in the district, two CD Blocks, viz. Katlichara CD Block and South Hailakandi CD Block recorded the sex ratio of 953 and 944 respectively are higher than the district rural sex ratio. The sex ratio in Lala CD Block is equal to the district sex ratio. The lowest sex ratio is noticed in Hailakandi CD Block with 917 females.

TABLE : 8
SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	2	0.6	135	0.0
700-749	3	0.9	553	0.1
750-799	5	1.5	2,255	0.5
800-849	13	4.0	19,919	4.0
850-899	66	20.2	82,599	16.6
900-949	122	37.3	212,299	42.6
950-999	81	24.8	147,515	29.6
1000-1099	27	8.3	29,275	5.9
1100+	8	2.4	4,237	0.8
District Total:	**327**	**100.0**	**498,787**	**100.0**
Sex ratio (Rural) for District:				**933**

The table-8 gives the sex ratio of rural population by ranges. Out of the total number of inhabited villages, the highest 122 villages have the sex ratio between 900-949 and 81 or 24.8 percent villages occupy the sex ratio in the range between 950-999. The percentage distribution of population in these two ranges of sex ratio constituted approximately 63.0 percent of the total population. In the range of sex ratio for villages between 1000-1099, the percentage of villages is above 8.3 percent with the percentage distribution of population of 5.9 percent and in the range of sex ratio of 850-899, the percentage of villages is 20.2 percent and the percentage of population of 16.6 percent. It is seen from the table the approximately 27.0 percent of the villages have the sex ratio below 900 females the district .

TABLE : 9
SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Sex ratio
1	2	3	4
1	Hindustan Paper Corporation Ltd. Township Area Panchgram (CT)	CT	832
2	Hailakandi (MB)	MB	968
3	Lala (TC)	TC	980
Sex ratio (Urban) for the district:			**957**

The table-9 shows the sex ratio of urban agglomeration and towns in the district. There is no urban agglomeration in the district. Out of three towns in the district Lala TC recorded the highest sex ratio among three towns. The lowest sex ratio is noticed in Hindustan Paper Corporation Ltd Township Area Panchgram CT with 832 females .

TABLE :10
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Algapur	Total	19,208	9,907	9,301	939
		Rural	18,638	9,602	9,036	941
		Urban	570	305	265	869

		Rural	29,160	15,262	13,898	911
		Urban	1,246	646	600	929
4	Katlichara	Total	27,346	14,243	13,103	920
		Rural	27,346	14,243	13,103	920
		Urban	0	0	0	-
District Total:		**Total**	**100,976**	**52,401**	**48,575**	**927**
		Rural	**95,699**	**49,729**	**45,970**	**924**
		Urban	**5,277**	**2,672**	**2,605**	**975**

The table-10 gives the sex ratio of population in the age-group 0-6 for Revenue Circles. The sex ratio for 0-6 age group is 927 females. Among Revenue Circles, Hailakandi Revenue Circle recorded the highest sex ratio for 0-6 age group with 946 females per one thousand males and the lowest ratio 911 females is noticed in Lala Revenue Circle. In urban of Hailakandi Revenue Circle, 1,011females sex ratio for 0-6 age group is recorded as the highest among all Revenue Circles. In rural it is seen higher in Algapur Revenue Circle.

TABLE : 11
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR CD BLOCKS, 2001

Sl. No.	Name of CD Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

3	Lala	29,160	15,262	13,898	911
4	Katlicherra	11,369	5,912	5,457	923
5	South Hailakandi	15,977	8,331	7,646	918
District (Rural) Total:		**95,699**	**49,729**	**45,970**	**924**

The table-11 shows the sex ratio of population in the age group 0-6 for CD Blocks. Among the CD Blocks, Algapur CD Block with the sex ratio 941 is the highest and Lala CD Block has the lowest sex ratio with 911 females per one thousand males. Out of five CD Blocks in the district two CD Blocks recorded higher the sex ratio for 0-6 age group than the district ratio.

TABLE :12
SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

District (Rural) Total	**327**	**100.0**	**95,699**	**100.0**
Sex ratio (Rural) for District:				**924**

The table-12 shows the sex ratio of rural population in the age group 0-6 by ranges. From the table, it is noticed that out of 327 total inhabited villages, the highest number of 54 villages have the sex ratio between the range 1000-1099 followed by the range of sex ratio between 900-949 with 51 villages and the percentage distribution of population in the above mentioned ranges are 15.8 percent and 19.4 percent respectively. The sex ratio for 25 villages is less than 700 females per 1000 males. Approximately 37.0 percent of the villages in the district has the sex ratio below 900 females per thousand males in the district.

TABLE : 13
SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Sl.. No	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

District(Urban Total			**5,277**	**2,672**	**2,605**	**975**

The table-13 shows the sex ratio of population in the age-group 0-6 of urban agglomeration and towns in the district. Among the towns, Hailakandi MB is recorded the highest sex ratio of 1,011 for 0-6 age-group and the lowest is noticed in Hindustan Paper Corporation Ltd CT with 869 females. Out of three towns in the district, one town has recorded the sex ratio for 0-6 age-group children above the district urban sex ratio of same age-group.

The table-14 gives the number and percentage of Scheduled Castes and Scheduled Tribes population in Revenue Circles in the district. Out of 5.4 lakhs total population in the district, 10.9 percent are Scheduled Castes and 0.2 percent are Scheduled Tribes. In rural-urban break up, Scheduled Castes constituted 11.1 percent in rural and 8.5 percent in urban while Scheduled Tribes constituted 0.2 percent in rural and 0.1 percent in urban. Among Revenue Circles, Algapur Revenue Circle recorded the highest percentage of Scheduled Castes with 14.7 percent and Hailakandi Revenue Circle recorded the lowest percentage of 5.9 percent. In case of Scheduled Tribes, Katlichara Revenue Circle has recorded the highest 0.3 percent and there is no Scheduled Tribes population in Algapur and Hailakandi Revenue Circles but there is 0.1 percent such person in urban area of both Revenue Circles..

TABLE : 15
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN CD BLOCKS, 2001

District (Rural) Total:		**498,787**	**55,502**	**778**	**11.1**	**0.2**

The table-15 shows the number and percentage of Scheduled Castes and Scheduled Tribes population in CD Blocks. Out of 4.9 lakhs total rural district population, 11.1 percent are Scheduled Castes and 0.2 percent are Scheduled Tribes. Among CD Blocks the highest concentration of Scheduled Castes and Scheduled Tribes are noticed in South Hailakandi CD Block with 15.4 percent and 0.4 percent in Katlichara CD Block respectively. Hailakandi CD Blocks recorded the lowest percentage of Scheduled Castes with 5.9 percent and Lala and South Hailakandi CD Blocks recorded the lowest percentage of Scheduled Tribes with 1.1 percent each. In two CD Blocks there is no Scheduled Tribes population.

TABLE :16

District Total	**327**	**100.0**	**778**	**100.0**

The table-16 gives the proportion of Scheduled Castes population to total population in the village during 2001 Census. It is observed from the table that out of 327 number of inhabited villages in the district 139 or 42.5 percent villages have not a single Scheduled Castes population. In less than 5 percentage range of Scheduled Castes population to total population, there are 53 or 16.2 percent villages having the Scheduled Castes population 1,969 or 3.5 percent of the total Scheduled Castes population. The highest number of Scheduled Castes population is noticed in the percentage range 21-30 with population of 14,583 or 26.3 percent in 25 number of villages. The lowest is noticed in percentage range 76 and above with only 3 number of villages having 4,441 Scheduled Castes population.

The table-17 shows the proportion of Scheduled Tribes population to total population in 327 total number of inhabited villages in the district, 313 or 95.7 percent villages have no Scheduled Tribes population. In 9 villages, the Scheduled Tribes population are in the range of less than 5 percent. The lowest number of village is noticed in the percentage range 31-40 with 1 village. In the distribution of Scheduled Tribes population in the district, it is observed that the highest concentration of population is in the percentage range 11-20 with 436 or 25.6 percent population. There is no village in 21-30, 41-50, 51-75 and 76 and above percentage range of Scheduled Castes population

TABLE : 18
NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

District(Urban) Total		**44085**	**3749**	**43**	**8.5**	**0.1**

The table-18 gives the town-wise distribution of number and percentage of Scheduled Castes and Scheduled Tribes population in the district. It is observed that out of 44.0 thousand population in the urban of the district, 8.5 percent are Scheduled Castes and 0.1 percent are Scheduled Tribes. Among the towns, Hailakandi MB shows the highest number of Scheduled Castes and Scheduled Tribes population with 1,744 and 33 persons respectively. The lowest Scheduled Castes population is noticed in Hindustan Paper Corporation Ltd CT with 316 persons and in case of lowest Scheduled Tribes population it is noticed in same town with 4 persons.

TABLE :19
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C D BLOCKS, 2001

Sl. No.	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Algapur	917	1500
2	Hailakandi	913	0

4	Katlicherra	976	1057
5	South Hailakandi	939	900
District (Rural) Total		**930**	**888**

The table-19 depicts the CD Block wise Sex ratio among Scheduled Castes and Scheduled Tribes. The district rural sex ratio of 930 for Scheduled Castes is less than the district rural total population sex ratio of 933. Among the CD Blocks, the highest sex ratio of Scheduled Castes is noticed in Katlichara CD Block with 976 and in Scheduled Tribes it is Algapur CD Block with 1,500 females which is followed by Katlichara CD Block with 1,057 sex ratio. The lowest sex ratio of Scheduled Castes among CD Blocks is found in Hailakandi CD Block with 913 and in Scheduled Tribes, the lowest sex ratio is noticed in Lala CD Block with 794 females per 1,000 males.

TABLE :20
SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl. No.	Name of U.A.^ / Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Hindustan Paper Corporation Ltd. Township Area Panchgram (CT)	927	1,000
2	Hailakandi (MB)	989	833
3	Lala (TC)	962	1,000
Sex ratio (Urban) for the district:		**971**	**870**

The table-20 shows town-wise sex ratio among Scheduled Castes and Scheduled Tribes during 2001 Census. The sex ratio of Scheduled Castes and Scheduled Tribes in urban of the district recorded 971 and 870 respectively. Among the towns, Hailakandi MB recorded the highest sex ratio of 989 in Scheduled Castes and Hindustan Paper Corporation Ltd CT and Lala TC towns recorded the highest sex ratio having 1,000 females in each town in Scheduled Tribes. The lowest sex ratio in Scheduled Castes is noticed in Hindustan Paper Corporation Ltd CT with 927 and the lowest sex ratio of 833 in Scheduled Tribes is found in Hailakandi MB .

The table-21 gives the number and percentage of literates and illiterates by sex in Revenue Circle of the district. The proportion of literates in the district is 59.6 percent of which 57.1 percent literates are in rural and 86.5 percent are in urban. The male literates recorded 68.2 percent predominates the female literates which recorded 50.5 percent and this phenomenon is observed both in rural and urban of the district. The state literacy rate is 63.3 percent of which male literacy rate is 71.3 percent and female literacy rate is 54.6 percent which are higher than rate of the district. The gap in male-female literacy rate is 18.8 percent in rural and 7.7 percent in urban. Among Revenue Circles, two Revenue Circles namely, Hailakandi and Algapur Revenue Circle recorded the literacy rate 63.4 and 61.1 percent respectively which are little above the district literacy rate. The lowest literacy rate is noticed in Katlichara Revenue Circle with 54.9 percent. In rural Algapur RC recorded the highest literacy rate with 59.9 percent and the lowest is recorded in Katlichara Revenue Circle with 54.9 percent . However, in urban, the highest literacy rate is noticed in Lala Revenue Circle. The lowest is noticed in urban of Hailakandi Revenue Circle with 85.0 percent.

TABLE : 22

The table-22 shows the CD Block wise of number and percentage of literates and illiterates by sex. The district rural literacy rate is 57.1 percent and male literacy rate 66.1 percent predominate the female literacy rate of 47.3 percent. Among the CD Blocks, Katlichara CD Block registered the highest literacy rate with 64.6 percent and the lowest is noticed in South Hailakandi CD Block with 47.3 percent. In all CD Blocks, the male literates are more than female literates and the highest gap in male-female literacy rate is noticed in South Hailakandi CD Block with 19.8 percent which is also higher than the district gap rate.

TABLE : 23
DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.6	40	0.0
1-10	1	0.3	616	0.1
11-20	11	3.4	13,942	2.8
21-30	21	6.4	26,837	5.4
31-40	30	9.2	44,848	9.0
41-50	39	11.9	78,959	15.8
51-60	58	17.7	92,017	18.4
61-70	85	26.0	121,336	24.3
71-80	58	17.7	94,495	18.9
81-90	18	5.5	22,796	4.6
91-99	4	1.2	2,901	0.6
100	0	0.0	0	0.0
District Total:	**327**	**100.0**	**498,787**	**100.0**
Literacy rate for District:		**59.6**		

The table-23 gives the distribution of villages by literacy rate range. More than 50.0 percent of the total inhabited villages have the range of literacy rate above the literacy rate of the district. It is also observed that more is the number of inhabited villages, more is the range of literacy rate for villages. There is one village which falls under literacy range of 1-10 percent. Again, there is two villages which have no literate person. However, in the district, there is no village with 100 percent literacy rate. The highest number of inhabited villages 85 is noticed in the range of literacy rate between 61-70 percent with the total population of 24.3 percent of the district population.

The table-24 gives the number and percentage of literates and illiterates by sex in urban agglomerations/towns during 2001 Census. The district urban percentage of literates is 86.5 percent and the proportion of male literates with 90.2 percent are more than the female literates with 82.6 percent. Among the towns, the highest percentage of literates is noticed in Lala TC with 90.2 percent and is followed by Hindustan Paper Corporation Ltd CT with 88.2 percent. The lowest percentage of literates is noticed in Hailakandi MB with 85.0 percent. The gap of literacy for male-female is noticed as 7.7 percent in urban of the district which is said to be less in degree.

Note: Percent of Worker to total worker are given in brackets

The table-34 betokens the category wise distribution of workers by sex among Revenue Circles in the district. Out of total number of workers in the district 85.6 thousand or approximately 48 percent are other workers, 34.9 percent are Cultivators, 14.3 percent are Agricultural Labourers and 3.2 percent are Household Industry workers. It is seen from the table that the number of male workers are more than female workers in all the categories of economic activity except in the category of Household Industry workers where number of female workers are more than male workers. In term of percentage, the female Agricultural Labourers and females Household Industry workers are recorded a high percentage than male workers of above categories. Among Revenue Circles, the highest number of Cultivators are noticed in Katlicherra Revenue Circle with 20,646 persons In the category of Other workers, the highest number is recorded in Lala Revenue Circle. In Agricultural Labourers also, the same Revenue Circle recorded the highest number. Household Industry workers are found very low in every Revenue Circle in the district.

Note: Percent of Worker to total worker are given in brackets

The table-35 shows the CD Block wise distribution of workers by sex in four categories of economic activity. Out of 1.7 lakhs rural workers in the district, 73.3 thousand are engaged themselves as Other workers and 62.5 thousand are engaged as Cultivators and the rest as Agricultural Labourers and Household Industry workers. In the sex wise distribution of the four categories of workers in the district, the male workers are predominated the female worker except in Household Industry workers where female workers are more than male workers. Among the CD Blocks, the highest number of male workers participated in Other works is noticed in Lala CD Block with 16,740 workers and the highest number of female workers 7,755 is noticed in the same CD Block. The highest number of male cultivators is noticed in Lala CD Block with 15,456 and followed by South Hailakandi CD Block with 10,525 males. In case of female workers engaged as cultivators is the highest in Lala CD Block with 4,269 followed by South Hailahandi CD Block with 2,335 females. Agricultural Labourers and Household Industry workers is very low in number in all CD Blocks of the district

				(10.7)	**(1.1)**	**(1.3)**	**(2.8)**	**(94.7)**

The table-36 indicates the town wise distribution of workers by sex in four categories. Out of 13,190 total urban workers in the district, 12,623 workers or approximately 96.0 percent are engaged as Other Workers of which male workers constitute 96.0 percent and female workers form 95.0 percent. A small number of workers are engaged as Household Industry workers, Agricultural Labourers and Cultivators. Among the towns, Hailakandi MB constitutes the highest number of male and female workers engaged as Other Workers. Out of 7,116 total male workers in this town, 6,948 are found as Other Workers and out of 1,519 total female workers, 1,481 or 97.5 percent are engaged as Other Workers. However, the lowest number of Other Workers is noticed in Hindustan Paper Corporation Ltd CT with 1,154 males and 75 females.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classifie otherwise. If the household has access to drinking water supplied from a tap or a hand situated within or outside the premises it is considered as having access to 'Improved drinking water However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table-37 shows CD Block wise distribution of villages according to availability of different amenities during 2001 Census. Most of the villages nearly 94.2 percent villages in the district are having access to education. It is followed by power supply with 82.0 percent in which out of 327 total number of inhabited villages in the district 268 villages enjoyed power supply. The improved drinking water facility is available to 193 villages. For other amenities like medical, transport communications, approach by pucca roads, post office and telephone, number and percentage of villages having such facilities can be seen in the table. A very few villages have banks and agricultural credit societies in the district.Among the CD Blocks, the proportion of villages having access to education is noticed very high percentage in all CD Blocks. Hailakandi CD Block recorded 100 percent education facility and in all other CD Blocks more than 90.0 percent of villages have educational facility except South Hailakandi CD Block. All villages having power supply is noticed in Hailakandi CD Block with 64 villages . The percentage of villages having medical and all other specified amenities is very low in all the CD Blocks in the district.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classifi otherwise. If the household has access to drinking water supplied from a tap or a hand pump situated within or outside the premises it is considered as having access to 'Improved However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table-38 shows the CD Block wise distribution of number and percentage of rural population served by different amenities. Out of 4.9 lakhs total rural population in the district, 4.8 lakhs population are access to education and approximately 4.4 lakhs population are covered under power supply. It is followed by about 2.9 lakhs population having transport communications amenities Approximately 3.2 lakhs population are served by improved drinking water facility. About 2.0 lakhs population are access to approach by pucca road, 1.7 lakhs population by telephone amenity, 2.1 lakhs population by medical amenity and 2.1 lakhs by post office facility. A very few population are served by banks and agricultural credit societies in rural areas of the district.Among CD Blocks, the cent percent population of Hailakandi CD Block is access to education and more than 90.0 percent population of the remaining CD Blocks are access to education. The highest 53.4 percent population are served by medical facility in Katlicherra CD Block. The highest proportion is noticed in Hailakandi CD Block with 82.5 percent of the total population who are access to improved drinking water and the lowest 35.1 percent of the total population are served by same amenity in South Hailakandi CD Block. The figures for remaining amenities in CD Blocks can be seen in the table itself.

TABLE : 39

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	18	1	0	19
(b) Middle School	109	8	4	121
(c) Degree College	145	111	71	327
2. Medical:-				
(a) Hospital	98	70	150	318
(b) PHC	133	106	80	319
3. Post Office	207	15	5	227
4. Telephone	141	56	45	242
5. Bus Service	154	20	12	186
6. Banks				
(a) Commercial Bank	134	81	96	311
(b) Cooperative Bank	115	131	80	326
7. Agricultural Credit Societies	135	95	90	320

The table-39 shows the distribution of villages not having certain amenities and are arranged by distance ranges from the places where these are available. It is observed from the table that 19 villages are not having primary school in the village itself but 18 villages get this facility within the distance range of less than 5 kilometers, and 1 villages in the distance range of 5-10 kilometers. Similarly, in other educational institutions, the picture can be seen in the table itself. A large number of villages which have no amenity of medical hospitals and PHC but these villages have availed these amenities at places situated at the distance ranges of less than 5 kilometers, 5-10 kilometers and 10+ kilometers. The similar phenomenon is observed in the distribution of villages not having rest amenities like post office, telephone, bus service, banks and agricultural credit societies but about the number of villages and the distance ranges of places where from amenities are availed, can be seen from the table

TABLE : 40

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table-40 shows the distribution of villages according to the distance from the nearest statutory town and availability of amenity. Out of 327 total number of inhabited villages in the district, 308 villages are having access to education of which the highest number of 190 villages is situated in the distance range of 5-15 kilometers from the nearest statutory town. It is followed by 74 villages in the distance range of 16-50 kilometers from statutory town. In less than 5 kilometers distance range from the nearest statutory town, there are 43 number of villages. In case of other amenities detail can be seen in the table.

TABLE 41

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The table-41 indicates distribution of villages according to population range and amenities available. Out of total villages of the district, 308 villages have educational amenity and of these villages, 44 villages have population in population range of 1-499, 52 and 132 villages have population in 500-999 and 1000-1999 population ranges respectively. Similarly 75 and 5 villages have population in population ranges of 2000-4999 and 5000-9999 respectively.. Similarly, 110 villages enjoy the benefit of medical in the periphery of each villages and of which 5 villages have population in the population range of 1-499 , 16 villages have population in the range of 500-999, 49 villages in the range of 1000-1999 population and so on. For other amenities, the number of villages along with population range can be seen in the table itself.

TABLE: 42
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Algapur	68	16,018	61.2	0.2
2	Hailakandi	64	15,296	76.2	0.2
3	Lala	87	24,448	74	0.1
4	Katlicherra	40	5,574	55.3	1.8
5	South Hailakandi	68	12,347	35.1	0
	District Total:	**327**	**73,683**	**63.7**	**0.3**

Note : - Cultivable area = irrigated area + unirrigated area

The table-42 depicts total areas of CD Blocks along with the district and also use of land. The district possesses 73,683 hectares of land in rural areas. Lala CD Block forms with highest amount of land followed by Algapur CD Block. The district has 63.7 percent cultivable land and the highest percentage of it goes to Hailakandi CD Block. The irrigated areas in the district are very limited with 0.3 percent only. However, Katlicherra CD Block has 1.8 percent irrigated land out of its total cultivable land. South Hailakandi CD Block namely has no irrigated land

TABLE :43
PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Hailakandi (MB)	18.5	8.4	10	17.9	5.3	0	8.5	0	4
2	IV Lala (TC)	22.8	5.8	17	22.3	6.5	1.3	13.2	0	1.2
District Total		**19.6**	**7.8**	**11.8**	**19**	**5.6**	**0.3**	**9.7**	**0**	**3.3**

The table-43 shows per capita receipt and expenditure of statutory towns of the district The per capita receipt is slightly more in the district than per capita expenditure. The per capita expenditure is more in public works and general administration. In case of town, the per capita receipt Rs.22.8 is more in Lala TC. Similarly, in respect of expenditure it is Rs.13.2 for public works and general administration in Lala TC MB which are more than Hailakandi MB.

TABLE: 44
SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Hailakandi (MB)	5.7	2	2.4	1.7	0.7
2	Lala (TC)	11.7	6.8	1.9	1.9	1
	District Total	**7.2**	**3.2**	**2.2**	**1.7**	**0.7**

The table-44 displays the number of educational institutions per ten thousand population in statutory towns of the district. The Primary School is 7.2 number in every ten thousand population of the district The Junior Secondary/ Middle and Secondary/Matriculation School are 3.2 and 2.2 School. Senior Secondary and College are 1.7 number and 0.7 number respectively per ten thousand souls in the district..

TABLE: 45
NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Sl.No.	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	H.P.C. Township(CT)	39
2	Hailakandi(MB)	37
3	Lala(TC)	58
	Distrct Total	42

The table-45 indicates number of beds in medical institutions in towns. The number of beds per ten thousand persons is 42 in the district. In Lala TC, the number of beds is 58 which is the highest among all towns. The next higher number of beds is found in Hindustan Paper Corporation Ltd CT with 37 beds

TABLE :46
PROPORTION OF SLUM POPULATION IN STATUTORY TOWNS, 2001

Sl. No.	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	HAILAKANDI M.B.	29,739	1,130	3.8
2	LALA T.C.	10,270	530	5.2
District Total (Statutory Town)		**40,009**	**1,660**	**4.1**

The table-46 shows that in Hailakandi district there is only two statutory towns having slum population and other town is not statutory. In the district, there is 1,660 slum population. Out of total population of Hailakandi MB, 1,130 are slum population. This town has a share of slum population with only 3.8 percent. In the district, the percentage of slum population is 4.1 percent. Lala TC has also slum population with 530 persons.

TABLE :47
MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	H.P.C. Township (CT)	Paper	Paper
		Nil	Nil
		Nil	Nil
2	Hailakandi (MB)	Handloom	Bamboo
		Nil	Betelnut
		Nil	Handloom
3	Lala (TC)	Nil	Bamboo
		Nil	Vegetables
		Nil	Nil

The table-47 The table indicates most important commodity exported out of town and manufactured in town. All 3 towns have manufactured a few items while all towns have exported out a few commodities from each town. The name of manufactured and exported items of towns can be seen in the table itself.

Inset tables based on household amenities Data :-

TABLE : 48
HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table-48 shows the number of households by tenure status and number of rooms occupied in the district. The number of households among the Scheduled Castes who owned own houses, are more with one room houses both in rural and urban. It is followed by households having two rooms and three rooms owned houses. A similar phenomenon is noticed in the Scheduled Tribes as in the case of the Scheduled Castes where large number of Scheduled Tribes Households occupied one room owned houses both in rural and urban. In rented houses, both by Scheduled Castes and Scheduled Tribes households occupied more houses with one room. Similar is the case in respect of others also.

TABLE: 49
PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Sl. No.	District/ Tahsil	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

District total		100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Note:-

Permanent:-1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC concreat are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The table-49 gives the percentage distribution of households living in permanent, semi permanent and temporary houses in Revenue Circle Among the Revenue Circles, Hailakandi Revenue Circle shows the highest proportion of households living in permanent houses and the lowest is in Katlicherra Revenue Circle with nearly 16.0 percent. In semi permanent type of houses, the highest proportion households is found in Lala Revenue Circle with 28.1 percent and the lowest is noticed in Katlicherra Revenue Circle with 18.3 percent. In temporary type of houses, Lala Revenue Circle recorded the highest proportion of households with 33.5 percent and Algapur Revenue Circle recorded the lowest proportion of 15.4 percent. In urban area of the district, Hailakandi Revenue Circle recorded the highest proportion of households for all types of houses.

TABLE 50
PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

		8,921	98.7	6,364	70.4

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."
* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or therwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households . Bathroom means bathroom within the houseToilet means toilet within the house Drainage means closed and open drainage

The table-50 shows the percentage of households having improved drinking water source, electricity, bathroom, toilet and drainage facility. Out of 98,227 number of households in the district, 79.7 percent are having access to improved drinking water in urban and 98.7 percent are having toilet services whereas the percentage households having electricity and drainage are 74.6 and 70.4 in urban respectively. However, in rural of Revenue Circle, the percentage of households having each of specified amenity are much less than urban households. In Revenue Circle level the percentage of households having improved drinking water source in all revenue circles are not satisfactory. It is seen that the electricity facility is also not upto the mark except urban areas in all Revenue Circles. Similar is the case in respect of bathroom facility also. Among the Revenue Circles, the highest proportion 93.6 percent households have toilet facility in Algapur Revenue Circle and the lowest is Katlicherra Revenue Circle with 70.4 percent. The availability of drainage facility is, however comparatively high in Hailakandi Revenue Circle of the district.

The table-51 indicates that the fire wood is the main source of cooking in rural areas of the district. The cooking gap/L.P.G. is the principal source of cooking for urban households. The use of other fuels is very limited in the district.In Revenue Circle level, the highest percentage of rural households use fire word in Katlicherra Revenue Circle which represents 97.0 percent. The highest percentage of urban household 51.6 percent use cooking gas in Hailakandi Revenue Circle. The use of other fuels is less in both areas of all Revenue Circles.

The table-52 indicates the number of households availing banking services and number of households having each of the specified assets shown in the statement. Out of 98,227 total number of households, 12,132 households have availing banking services and out of these households, 7,771 and 4,361 households are availing banking services in rural and urban respectively.. Among the Revenue Circles, Hailakandi Revenue Circle with 3,968 households recorded the highest number of households availing the banking services. Availability of all assets mentioned in the table among the Revenue Circles is more in Hailakandi Revenue Circle except radio and bicycle which are more in Lala Revenue Circle. The highest number of households who have none of the specified assets is noticed in Lala Revenue Circle with 19,207 households. The availability of Car, Jeep and Van is more in urban of Hailakandi Revenue Circle than in any other area in the district.

(ix) Major social and cultural events, natural and administrative developments and significant activities during the decade.

The district Hailakandi is situated in the Barak Valley region of Assam inhabited mostly by Assamese and Bengali Hindus and Muslims. Festivals either religious festivals or special festivals are celebrated with great enthusiasm and jubilant in the district. The biggest festival of the year in the district is Durga Puja which is observed by Hindu of both community, Assamese and Bengali. The festival is usually observed annually during the month of September or October and lasted continuously for four days. Durga Puja is considered not just a religious festival but also as an occasion to develop the spirit of love, togetherness and peace among people. A week before the main puja, Mahalaya is ceremoniously performed to invoke the Goddess Durga to come to the heart of the faithful. After this the preparation for the celebration of puja starts vigorously. Puja pandals are erected in different places in towns and villages of the district. The image of goddess Durga is installed ceremoniously on the puja pandals so as to enable the faithful and worshippers to adore and worship the Goddess. People throng in the pandals to pray in front of the Goddess Durga and pray for blessings of Goddess upon themselves and family members. The puja continues for four days and on the last day the image of Goddess Durga is ceremoniously immersed into pool or running water of river.

Kalipuja is another biggest festival in the district which coincides with Diwali. The celebration includes family prayer and houses are illuminated in the evening by small earthen lamps (Chakis) burning mustard oil. In the towns, the festivity is made more jubilant where houses and buildings are often illuminated with coloured electric bulbs. Young and old are enjoying the festivals in burning crackers and fire works.

In addition to the religious festivals of the Hindus, Muslims of both community Assamese and Bengali observe their religious festivals with great enthusiasm and high spirit.Among the Muslim festivals mention must be made of the Id-Uz-Zuha, Muharam, Fatiha-I-Duazdaham and Id-Ul-Fitre. The Muharam is observed to commemorate the tragic episode of Imam Hussain, the grandson of the Prophet who was slam on the banks of the Karbala. Both Shias and Summis observe the festival with joy and fervour. On the occasions of Id-Uz-Zuha and Id-Ul-Fitre or Bakrid, the Muslims wear their new white attives and go to the local Idgahs to hold prayer services. Id-Uz-Zuha is also an occasion of alms giving. Fatiha-I-Duazdaham and Sah-e-Barat are two other festivals widely observed by the Muslims.

Like in other parts of the state three Bihus festivals are celebrated in the district. The three Bihus are Rongali Bihu, Bhogali Bihu and Kati Bihu and these festivals are traced back to the early Ahom Kings and associated with the cycles of cultivation. In celebrating the festivals, people participating with great joy where dance and music are predominant. Villagers dance and sing hymns, choral songs accompanied with drums and flutes. In Bihu dance, the girls dance, the boys play flute and beat drums and blow the pepa (made of buffalo horn) and taka (made of Bamboo).. The tribal people of the district performs a variety of dances which are reminiscent of their glorious traditions. All the festivals are getting more importance year after year and celebrate by the people with much pomp and grandeur.

No much administrative development as well as significant activity is noticed in the district during the decade. However, the Government has taken various plans and programs for the development of the district.

(x) Brief description of places of religious, historical and Archaeological importance and places of tourist interest in the district

Hailakandi district is not very much interesting from point of religious, historical and archaeological importance. The district has no any town or village for tourist interest. However, the district contains a few archaeological remains of recent origin which possess some archaeological merit.

Vishupur – Shiva About a 1.6 kms to the south west of Lalabazar, twelve miles south of Hailakandi town, an ancient Shiva-Linga of black stone seated on a well-carved pedestal or Yono-pitha has been discovered. The carving and shape of the pedestal indicate its association with the Pala period (10th century A.D.)

Shake-vata Dighi About 4kms south of Lalabazar, i.e. on the western side of the Lalabazar – Katlichara Road, there is a remnant of a very big tank covering about two acres of land. On the western bank of the tank there is the main ghat built with bricks comprising of several flights of steps. The tank is now almost dry and is a quagmire. Some of the bricks have inscriptions in Bengali script. One set contains "Shubhamastu Shakabda 149x = hail the Saka year 149x =1490 Saka = 1568 A.D." Another set contains "Maharaja Harischandra Narayan." It is to be noted that in 1568 A.D the Kacharis had not yet moved to Hailakandi which was under the Tripura administration being inhabited by the Kukis.

(xi) Major Characteristics of the district, contribution of the district in the form of a any historical figure associated with the district.

Hailakandi is a smallest district in terms of area of Assam. Agriculture is the main occupation of the rural people of the district. The staple food of the people is rice and is cultivated extensively in the district. The soils in the district is similar to the soils available in Brahmaputra Valley which is favourable for the cultivation of rice. The soil is alluvial and characterized by an abundance of marshes and low lands and contains a large percentage of organic matter. The area receives sufficient rainfall and which is necessary and suitable for the growing of paddy, wheat, jute, vegetables etc. etc. Various types of rice is produced in the district. Lahi rice is grown in higher fields which is an important production of the district. The Joha rice is another variety of fine quality and Boradhan rice is used in preparation of Chira and Pitha (cake). Ahu is another variety of rice grown in the middle of July. Plantation crops like banana, mango, orange, jack fruit, arecanut, coconut, betel-nut, papaya, pine-apple etc. are the common types of fruits grown in the district. During monsoon season, excessive rainfall is received and caused floods, to the low lying area which effect the growing of crops and agriculture suffers great loss. In contrast, during drought people and compelled to irrigate their fields by using

indigenous method of irrigation i.e. by digging canals from various streams. In under to help the farmers, some minor irrigation project are installed in various places in the district with the help of the department concerned.

The district has produced many writer, sportsmen, artists, musicians, scholars, freedom fighters, whose contributions are immense value to the district as well to the nation as a whole. The people of the district are remembering them.

(xii) Scope of Village Directory and Town Directory – column heading wise explanatiand coverage of data

The scope of Village Directory and Town Directory has already discussed in detail in earlier chapter of this volume.

Village Directory:

The Village Directory is depicted in the form of a statement containing 25 columns under various heads. The Village Directory provides for each C.D. block with the villages according to location code in col.No. 1. The name of village comes in col.No.2 and area in col.No.3. The col.No.4 and 5 represent total population of 2001 Census and households respectively. The column 6 to 25 relate to the following amenities and facilities.

AMENITIES AND FACILITIES	COLUMN
1. Education	6
2. Medical	7
3. Drinking water	8
4. Post, Telegraph and Telephone	9
5. Commercial and Co-operative Banks	10
6. Agricultural, Non agricultural and other Credit Societies	11
7. Recreational & Cultural facilities	12
8. Communications	13
9. Approach road to village	14
10. Nearest Town (in km.)	15
11. Power Supply	16
12. News paper/Magazine	17
13. Commodities manufactured	18
14. Land-use pattern of village	19 - 23
15. Name and Serial number of village	24 -25

Particulars of amenities and facilities available in the villages are shown by way of some abbreviation, which are explained in the beginning of the Village Directory. Amenity, which is not available in any village, the distance in term of the nearest place where it is available, is shown in ranges i.e. <5 kms., 5-10 kms. and 10+ kms. The non-census data presented in the Village Directory have been collected from various Departments of the State Government, Corporation, Boards etc. The 2001 Census Village Directory is almost in the pattern of 1991 Census Village Directory. However, in 2001 Census, some new items have incorporated and a few are deleted which were in 1991 Census. For example, the information on market/hat are deleted. Never the less, the innovation introduction of new items of information in the Village Directory, 2001 will be more useful and meaningful.

Town Directory:

The Town Directory is decorated with seven statements presenting useful data on socio-economic and administrative sides of each town of each district. These statements deal with (i) Status and growth history, (ii) Physical aspects and location of town, 1999, (iii) Municipal finance 1998-99, (iv) Civic and other amenities, 1999, (v) Medical, Educational and Cultural facilities, 1999, (vi) Trade and Commerce, industry and banking, 1999 and (vii) Civic and other amenities in slum, 1999.

Statement – I: Status and Growth history: -

This Statement deals with 22 columns which represent information serially from Serial Number, Class, Name and Civic Administration, Status of town and so on. Statement 1 is presented in the Town Directory in the same pattern that used in 1991.

Statement – II: Physical Aspects and Location of town, 1999.

The statement is formed with 13 columns. Various information such as rainfall, temperature (maximum and minimum), State Headquarters, nearest city with population one lacks and also 5 lacks, railway station, bus facility , navigable road etc.are presented in the columns. This statement is also similar to that of 1991 directory except the columns of nearest city introduced newly in 2001 Census.

Statement - III: Municipal Finance 1998-99

The statement deals with 17 columns and presents various data on Municipal finance of all statutory towns of each district. In the statement columns are

divided into two parts such as receipt and expenditure.

Statement – IV: Civic and other Amenities, 1991.

The statement contains 21 columns and information on civic and other amenities are shown accordingly. However, Scheduled Castes and Scheduled Tribes population are also indicated in respective columns. Information on types of latrine used, methods of disposal of night soil, water supply, storage system, five fighting service, electrification etc. are presented in its respective columns.

Statement – V: Medical, Educational, recreational and cultural facilities, 1999.

The statement deals with 20 columns and presented data on medical, educational, recreational and cultural facilities in each town in the respective columns. It is on the same pattern that used in 1991 Census.

Statement –VI: Trade, Commerce, Industry and Banking,1999.

The statement consists of 11 columns and gives for each town information on trade, commerce, industry and Banking,1999. Columns 1 and 2 show serial number and class and name of town. Columns 3 to 5 shows the names of three most important commodities exported out from the town in order of preference. Columns 6 to 8 show the names of three most important commodities manufactured in the towns in order of their importance. The other columns represent the facilities of banks.

Statement – VII: Civic and Other Amenities in Slums,1999.

This statement contains 17 columns and gives information on Civic and other Amenities in Slums. Columns represent name of Slum, status of slum area, number of households, population, paved road (in limes), system of sewerage, types of latrine used, method of disposal of night soil, number of tap, electric connection (domestic, road and others) in the statement.

The data on amenities and facilities presented in the Town Directory are collected from the respective Municipal Corporation, Municipal Board, and Town Committee in respect of statutory towns and for census towns from the revenue authorities of respective jurisdiction.

****

Part A - Village and Town Directory

Section I - Village Directory

Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are consider as a Census Town , the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 25 columns and the details given under each column for the village are as follows :

Columns 1 & 25 : Serial Number

Self explanatory. All the villages within the C D block are presented serially in the ascending order of their location code number.

Columns 2 & 24 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given.Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of

institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Path-shala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS

(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema / Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State / U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities. Since there is no such census town in Chandigarh, therefore, data in this appendix is not presented.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns. Since there is no such census town in Chandi-garh, therefore, data in this appendix is not presented.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B

The appendix shows the list of villages according to proportion of the Scheduled Castes and Scheduled Tribes to the total population by ranges. Since no Scheduled Tribe is notified in Chandigarh, therefore, data in appendix VII-B is not presented.

Appendix-VIII Indicates CD Block wise number of villages under each Gram Panchayat.

Appendix-IX Shows number of different types of girls school in a village. Since there is no girls school in the villages of Chandigarh, U.T. therefore Appendix-IX has not been presented.

List of villages merged in towns and outgrowths at 2001 Census

There is no above case in Hailakandi District

TOWN DIRECTORY

Section II - Town Directory

Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic adminis-tration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998–1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B, Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

I case of more than one institutions of any type,it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories - Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Trainning Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the

town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

****

STATEMENT-I
STATUS AND GROWTH HISTORY

Sl. No.	Class, name and civic status of town	Location code number	Name of Taluk/ Tahsil/ Police Station/Island etc.	Name of CD Block	Area (in sq. km.)	Number of households incl. houseless households (2001 Census)	Population and growth rate (in brackets) of the town at the Censuses of

STATEMENT-II
Physical Aspects and Location of Towns, 1999

SL No.	Class, name and civic status of town	Name of and road distance in kilometer(s) from Sub-division /Taluk/ Tahsil / Police station/ Development Block/ Island HQ.	Nearest city with population of one lakh and more	Nearest city population of lakh and more	Railway station	Bus facility	Navigable river/ canal (if within ten kilometers)
1	2	8	9	10	11	12	13
1	VI H.P.C. Township (CT)	Algapur (0)	Silchar (30)	Guwahati (348)	Panchgram (5)	Yes (0)	-
2	III Hailakandi (MB)	Algapur (0)	Silchar (48)	Guwahati (336)	Hailakandi (0)	Yes (0)	Katakhal (R) (3)
3	IV Lala (TC)	Lala (0)	Silchar (66)	Guwahati (363)	Lala (0)	Yes (0)	Katakhal (R) (3)

Statement- II indicates the physical aspects and location of towns as on 1999. Prior to Census of India, 2001 data of physical aspects like rainfall, temperature are collected from different offices in the district. From the statement, it is observed that rainfall indicated in all three towns in the district are different from each other. The highest rainfall is noticed in Lala TC. In the measurement of temperature in towns of the district, it is noticed that towns in the district recorded the maximum temperature 37.3 centigrade and minimum 8.2 centigrade. Maximum temperature in Census town is somewhat low than other two towns and minimum temperature is high in this town than other towns. Lala TC has the farthest distance from the state headquarter with distance of 363 kilometers and the nearest town to the state headquarter is Hailakandi MB with 336 kilometers. The distance range from district headquarter to all the towns varies from 0 kilometer to 17 kilometers. Silchar is the nearest town with one lakh and more population from all towns of the district and Guwahati is the nearest town with five lakh and more population. All towns have Bus facility and navigable river transport service is available in two towns within 10 kilometers.

STATEMENT-III
MUNICIPAL FINANCE, 1998-99

Serial number	Class, name and civic status of town	Receipt (in Rs.'000)						
		Receipt through taxes, etc.	Revenue derived from municipal properties and power apart from taxation	Government grant	Loan	Advance	Other sources (specify)	Total receipt
1	2	3	4	5	6	7	8	9
1	VI H.P.C. Township (CT)	-	-	-	-	-	-	-
2	III Hailakandi (MB)	2,510	-	2,815	-	-	165	5,490
3	IV Lala (TC)	595	78	1,490	156	-	23	2,342

Serial number	Class, name and civic status of town	Expenditure (in Rs.'000)						
		General administration	Public safety	Public health and conveniences	Public works	Public institutions	Others (specify)	Total expenditure
1	2	10	11	12	13	14	15	16

2	III Hailakandi (MB)	1,587	953	-	2,539	-	232	5,311
3	IV Lala (TC)	670	85	138	1,358	-	38	2,289

Statement -III shows the Municipal finance for the period during 1998-99. Hailakandi MB indicates Rs 5,490,000 total receipt and Rs 5,311,000 as total expenditure which is the highest amount of total receipt and expenditure between two towns in the district. The Government grant, receipt through taxes, other sources etc. form the highest sources of receipt of the town and general administration, public safety, public health etc. are the main heads where the expenditure is mostly spent. Receipts shown against Hailakandi MB are from receipt through taxes, revenue derived from municipal properties, government grant, loan and other sources and the expenditures are mostly in general administration, public safety, public works and other works.

STATEMENT-IV
CIVIC AND OTHER AMENITIES, 1999

Serial number	Class, name and civic status of town	Population (2001 Census)	Population 2001 Scheduled Castes	Population 2001 Scheduled Tribes	Road length (in km.(s))	System sewerage	Number of Total	Number of Water borne	Number of Service	Number of Others

3	IV Lala (TC)	ST, Pt	T,TK	OHT (170)	Hailakandi (17)	1,825	27	762	340	171

Statement -IV shows civic and other amenities as on 1999. Among the towns in the district, the highest number of Scheduled Castes with 1,744 persons are noticed in Hailakandi MB and the highest number of Scheduled Tribes is also noticed in the same town with 33 persons. Both type of roads that is pucca and kuchha roads are in all towns of the district. Method of system of sewerage OSD in all towns of the district is common and method of disposal of night soil St is common for all three towns. All type of latrines are in use in all towns. The source of water supply TK is common for in two towns and the system of storage OHT is available in all towns. Two towns have the fire fighting service but Lala TC has no such service. All towns in the district have electrification connections in which the highest number of connecting are noticed in domestic purpose.

STATEMENT - V

Medical, Educational, Recreational and Cultural Facilities, 1999

3	IV Lala (TC)	-	1	1	PL(2) RR(2)

Statement-V shows the availability of medical facilities including hospitals, dispensaries, T.B. clinics etc. and educational facilities which includes right from Medical Colleges, Engineering Colleges, Polytechnics recognised short hands etc. to Primary Schools and adult literacy classes. In Hailakandi district particularly Hailakandi MB is an advance town comparison to other towns having arts and science degree and commerce colleges. Many schools of different level, and standards are spreading in Hailakandi town right from higher secondary etc. to primary schools. The number of schools in different level are also available in other towns of the district. No women's hostel is available in all towns of district. Recreational and cultural centres are there in the towns. But there is one stadium in Hailakandi MB. There is cinema hall having one each in Hailakandi and Lala towns. There are three auditorium/drama/ community halls in Hailakandi and one in each other towns. All towns have public library with reading rooms.

STATEMENT-VI

TRADE, COMMERCE, INDUSTRY AND BANKING, 1999

2 IV	Lala T.C.	-	30	52	-	Pt	4	27	10	-

Statement-VII shows the civic and other amenities in slums as on 1999. Out of 3 towns in the district, Hailakandi MB and Lala TC have slum population. The slum areas of both towns are not notified. In Hailakandi Town slumm comprises of a total of 206 households with a total population of 1,130 persons and in Lala TC there is 530 population in 92 households. The slum areas of towns have OSD system of sewerage and the method of disposal of night soil is Pt in slum areas of both towns. The service latrines available in slum area are more in Hailakandi and other type of latrines are more in slum areas of Lala TC. The number of water borne latrine is 27 in slum areas of Hailakandi town. There are electric connections for domestic purposes in slum areas of both towns and there is road lighting points in slum areas of Lala TC

Appendix to Town Directory

Towns showing their outgrowths with population

District :Hailakandi

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
1	Hindustan Paper Corporation Ltd. Township Area Panchgram (CT)	4,076	-	-
2	Hailakandi (MB)	29,739	-	-
3	Lala (TC)	10,270	-	-

There are no outgrowths in any of the towns of Hailakandi District.

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001

from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet onother important publication of 2001 Census gives basic information on Area, Total Households, Total Population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification

of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE

Annexure – I : Number of villages under each Grampanchayat.
(Data not collected in the Census)

Annexure-II: Note on Fertility-Mortality and Migration

Fertility, mortality, and migration are the most important tools of indicators of population growth. Growth of population in any area is always determined by these three demographic variables on the basis of which one can project the population for any year in future. All the models of population growth and tools of analysis of demographic data are generally based on these three indicators.

Considering the importance of these indicators an attempt has been made here to present the rates of fertility, mortality and migration along with other dependent variables for each district as well as for the State of Assam as a whole.In the 1991 Census, questions on fertility such as age at marriage, number of children ever born alive and children born alive during the last year were asked. The first three questions were asked to all ever-married women and the last question was to only currently married women. The measures of fertility worked out are based on the F – Series. Tables of 1991 Census pertaining to the Assam State and details of concepts and definitions are explained in the earlier chapter heading non Census concepts.

Annexure III : Various measures of fertility and mean age at marriage, 1991 Census.
Fertility:

As seen through various indicators of fertility in the district, it may be seen that the GFR of 136, GMFR of 196, TFR of 4.2 and TMFR, 6.4 against the respective figures at state level are at 135, 190, 4.2 and 6.0. Various measures of fertility and other fertility related data are presented in the following annexure

Table-I
Various measures of fertility and mean age at marriage 1991 Census

Fertility Measure	Hailakandi district	Assam state
1	2	3
1. G.F.R.	136	135
2. G.M.F.R.	196	190
3. T.F.R.	4.2	4.2
4. T.M.F.R.	6.4	6
5. Crude Birth rate	32.1	31.5
6. No. of children ever born per woman in age group 45-49.	5.0	5.2
7. Meanage at Marriage	18.2	18.3
8. Child-woman ratio (0-4)	618	575
9. Child-woman ratio (5-9)	721	735

The level of fertility for all measures are higher in the district than the state except no. of child born ever per woman and mean age at marriage.The GFR, GMFR and TMFR are marginally higher than the state averages. The crude birth rate is also not much higher than the state. But on the other hand child woman ratio in both the age groups are not much higher even it is less than the state at 5-9 age groups.

Table-II
District-wise various measures of Fertility and Mean age at marriage, 1991 Census

State/District	GFR	GMFR	TFR	TMFR	CBR	No. of children ever born per ever married woman in age-group 45-49	Mean Age at marriage of currently married women
1	2	3	4	5	6	7	8
Assam	135	190	4.2	6	31.5	5.2	18.3

23. Cachar	137	190	4.1	6.1	32.6	4.5	18.5

Mortality :

The Mortality figures in the district confirm to the general theory of relation between fertility and mortality. The mortality rates are shown in the following annexure.

Table-III

Age Specific Marital Fertility levels in Assam state and Hailakandi district –1991 Census

Age group	Hailakandi district			Assam state		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
15-19	0.152	0.154	0.12	0.151	0.152	0.133
20-24	0.186	0.188	0.16	0.214	0.219	0.165
25-29	0.194	0.199	0.135	0.183	0.192	0.12
30-34	0.18	0.184	0.125	0.134	0.14	0.093
35-39	0.089	0.095	0.029	0.087	0.094	0.042
40-44	0.049	0.052	0.015	0.049	0.052	0.022
45-49	0.021	0.023	0	0.033	0.034	0.025

The age specific Marital Fertility rates in the district are higher in all age groups in total except 20-24 and 45-49 than that of the state. Similarly in rural and urban in few age-groups it is seen higher and in some age-groups it is low than the state.

ANNEXURE

Table-IV
Estimates of Child Morality in Assam and Hailakandi district, 1991 Census

Mortality Measure		Hailakandi district	Assam state
	1	2	3
Q.(1)	P	99	92
	M	101	96
	F	97	87
Q (2)	P	117	101
	M	121	104
	F	101	98
Q (3)	P	122	104
	M	134	106
	F	110	101
Q (5)	P	125	116
	M	136	118
	F	116	115

Q.(1) of the above annexure shows the infant mortality rates and Q (2), (3) and (5) indicate the size of child mortality in age group below 2,3, and 5 years respectively. It is seen in the Annexure that the mortality rate in Hailakandi district are higher than that of the state averages. It can, therefore be said that the standard of health status in the district is not satisfactory in comparison to over all health status of the state

Annexure- IV : Percentage distribution of migrants by place of birth- 1991 and 2001 Assam Census.

The detail data may be seen below in the following table.

TABLE-I
Percentage Distribution of migrants by place of birth- 1991 Census, Assam

Compared to the state level totals, the share of migrants from other districts of the state in the total migrants is relatively higher whereas the share of migrants from other countries is 19.3 percent in the district against 14.6 percent in case of over all State. Migration from other district reveal that the female immigration is more than male immigration from other districts but it is more for males in case of immigration from outside the State. Similar data on migration in respect of migrants classified by their place of last residence are presented in the following table.

Table-II

Percentage distribution of migrants by place of birth- 2001 Assam

State/ District	Total migrants			From elsewhere in the district outside the place of enumeration			From other districts		
	Person	Male	Female	Person	Male	Female	Person	Male	Female

	4.1	7.7	2.8	2.0	3.8	1.4

From the above table it is seen that migrants from elsewhere in the district out side the place of enumeration consists of 76.7 Percent , 17.2 Percent are from other district , 4.1 Percent are from other state and from other countries it is 2.0 Percent of the total migrants .

Annexure –V : Brief Account of main religions in the district/ revenuecircles 1991 and 2001 Census Assam and Hailakandi district.

The data on religion of the population in the Hailakandi district as per 1991 Census are presented in the following table.

Table - I

Brief Account of main religions in the district/ revenue circles 1991 Census Assam and Hailakandi district

State / District	Religion	Number of followers	Percentage to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Assam	Total	22,414,322	100	88.9	11.1
	Hindu	15,047,293	67.1	86.2	13.8
	Muslim	6,373,204	28.4	94.7	5.3
	Christian	744,367	3.3	96	4
	Buddist	64,008	0.3	93	7
	Jain	20,645	0.1	21.9	78.1
	Sikh	16,492	0.1	31.3	68.8

ANNEXURE

Table - I

Brief Account of main religions in the district/ revenue circles 1991 Census Assam and Hailakandi district

State / District	Religion	Number of followers	Percentage to total population	Percentage	
				Rural	Urban
1	2	3	4	5	6
Hailakandi	Total Population	449,048	100	92.4	7.6
	Hindu	196,269	43.7	86.5	13.6
	Muslim	246,016	54.8	97.2	2.8
	Christian	5,677	1.3	97.1	2.9
	Buddist	524	0.1	100	-
	Jain	247	0.1	24.3	75.7
	Sikh	29	0	89.7	10.3

The figures in the above table show that compared to the state as whole the proportion of Muslim is more in the district. The Hindu who constitute about 67.1 percent of total population at State level but in the district their percentage is 43.7 percent. Christian consists 1.3 percent as against 3.3 percent at State level, which is also on lower side. However Buddhists, Jain and Sikhs though are negligible in number in the district and their share is relatively less compared to the state averages.

Table-II

MAIN RELIGIONS IN THE HAILAKANDI DISTRICT AND ASSAM STATE - 2001 CENSUS

District :-Hailakandi (23)

District/State	Religion	Number of followers	Percent to total population	Percentage			
				Rural	Rural_%	Urban	Urban_%
1	2	3	4		5		6

A comparison of the district level figures of marital Status with that of the State averages reveals that the percentage of never married males and females is higher than the State average. In case of married males and females the percentage is lower than the State average .In case of widowed males and females the percentage is higher than the state percentage. Again in case of Divorced/ separated males and females the percentage is higher than the State percentage . The highest percentage of married males and females are recorded in the age group of 45-49 and 35-39 in the district being 94.2percent and 87.8 percent respectively. The corresponding figures in the state level for males and females are recorded in the same age group .Never married males and females being 27.7and 5.5 percent respectively in the district .Never married males percentage is higher and females percentage is lower than the state percentage of 22.1 and 6.3 percent respectively.

Annexure-VII : Age, Sex and Education in Assam, 1991 and 2001 Census Education and Literacy rate :

Age-group wise literacy rates for male and female in respect of both at State and District are presented below in the following tables.

Note: 1.Percentageofliteratesistototalpopulation.
2.Allotherpercentagesareproportionofliteratepopulation.

The literacy rates both for male and female in the district are higher in all age groups except female in age 7-14, 15-19 and 20-49 in the district than that of the state percentages. It is seen that the literacy rate is highest for male and female in age group 15-19. The literacy rate is seen higher upto middle level. In other educational levels, literacy rates are comparatively low than the State rate in all age groups.

22	Haijong/Hajong	25,177	0.1	0	0.0
23	Hmar	24,866	0.1	5	0.0
24	Deori	23,366	0.1	0	0.0
25	Punjabi	21,292	0.1	21	0.0
26	Mundari	20,045	0.1	0	0.0
27	Zemi	15,514	0.1	0	0.0
28	Kuki	15,423	0.1	115	0.0
29	Mura	12,673	0.0	0	0.0
30	Sema	10,346	0.0	0	0.0
31	Total of Other Mother Tongues	1,032125	3.9	18,011	3.3

As can be seen from the above table, the number of persons speaking Bengali consists of the major portion (83.3%) of total population in the district, followed by Hindi with (8.7%) and Manipuri (2.0%) .The population with all the other Mother Tongues each constitutes a negligible percentage.

Annexure IX: Scheduled Castes and Scheduled Tribes population, 1991 Census, Scheduled Castes

Out of 449,048 total population of the district 54,107 are Scheduled Castes population. The caste wise population of some prominent castes are presented below in the following tables.

Table-I
Distribution of Scheduled Castes population among some prominent Scheduled Castes.
District-Hailakandi ,1991 Census

Name of Scheduled Castes	Scheduled Castes total population	Percentage	
		Percentage to total Scheduled Castes population	Percentage to total population of the district
1	2	3	4
1. Patni	25,549	47.2	5.7
2. Namasudra	11,761	21.7	2.6
3. Muchi, Rishi	4,998	9.2	1.1
4. Bhumimali, Mali	4,902	9.1	1.1
5. Dhupi, Dhubi	2,003	3.7	0.5
6. Kaibartta or Jaluja	1,829	3.4	0.4
7. Dugla, Dholi	926	1.7	0.2
8. Others	2,139	4	5
9. All Scheduled Castes	54,107	100	12.1 (449,048)

N.B. 1 Others include – Bansphor, Brittial-Bania/Bania, Hira, Jalkeot, Jhalo/Malo or Jhalo-Malo, Lalbegi, Mahara, Mehtar/Bhangi, Sutradhar and unclassified castes.
2. Bracketed figure is the total population of the district.

It is observed in the above table that Patni is the major caste in the district with a share of 47.2 percent of the total Scheduled Castes population followed by Namasudra 21.7 percent. The other remaining castes have a share of less than 10.0 percent population of each.Out of total population 12.1 percent are Scheduled Castes of which 5.7 percent occupies by Patni followed by Namasudra 2.6 percent. The remaining castes constitute less than 2.0 percent by each.

Scheduled Tribes

The Scheduled tribes constitute 0.2 percent of the total population of the district. The data relating to some Scheduled Tribes population are presented below in the table.

Table-II

Distribution of Scheduled Tribes population among some prominent Scheduled Tribes.
District Hailakandi – 1991 Census

Name of Scheduled Tribes	Scheduled Tribes total population	Percentage	
		Percentage to total Scheduled Tribes population	Percentage to total population of the district.
1	2	3	4
1. Hojai	443	62	0.1
2. Kachari, Sonwal	66	9.2	0
3. Boro, Borokachari	54	7.6	0
4. Miri	8	1.1	0
5. Lalung	1	0.1	0
6. Deori	1	0.1	0
7. Unclassified	142	19.9	0
8. Total All Scheduled Tribes	715	100	0.2
			(449,048)

Note : 1. Bracketed figure is the total population of the district.

In the above table it is observed that the district has a very limited Scheduled Tribes population. The Hojai tribe is the major tribe in the district having a share of 62.0 percent of the total Scheduled tribe population followed by unclassified tribes population. The remaining tribes constitute a share of less than 10.0 percent by each.Out of the total population of the district, the Hojai tribe has a share of 0.1 percent population and the remaining tribes shares are very meagre.
