Denteshwari Temple - Dantewara

Danteshwari temple is situated on the "Sangam" of Dankini and Shankini rivers in the district headquarters Dantewada. Danteshwari temple was re-constructed by a brother of Prataprudra of Barangal named annadev in fourteenth century. According to saying , a tooth of Sati , the wife of Shiv, had fallen here. On this basis , the place was famous as an important Shakti peeth of India.

An Asthbhuji stone statue is known as Danteshwari Devi. In this half circled statue , the death of Narsingh and Hiranyakashap is being highlighted. The temple is made with the combination of three buildings. The buildings are Deood Grabhgarah, Sabhagrah with polo and Harmandap. So many statues belonging to Brahaman religion like Vishnu, Shiv, Parvati,Ganesh ,Narsingh, Dwarpal etc. are situated in the temple boundary. Many tourists come here every year.

Annexure-VII	Age, Sex and Education in the district,2001 Census	640
Annexure-VIII	Distribution of different mother tongues returned in 2001 Census	641
Annexure-IX	Statement of SC and ST in the District, 1991 census	642
Annexure-X	Hamletwise total population of villages, Census 2001	643-743
Annexure-XI	Statement of Disability in the District, Census 2001	744

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc

2 The scope of the DCHB was initially confined to a few Census tables and Primary Census Abstract (PCA) of each village and town within the district Thereafter, at successive censuses, its scope and coverage has been enlarged The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA The 1971 census-DCHB series was in three parts Part-A related to village and town directory, part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages The 1981 census DCHB was in two parts Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels New features alongwith restructuring of the formats of village and town directory were added into it In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given Information on new items such as adult literacy centers, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme Information on approach to the village was provided for the first time in the village Directory so as to give the details on number of inaccessible villages in each district In the town Directory, a statement (IV-A) on slums introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns

3 The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit

4 The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content The village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village Income and expenditure of gram panchayat, wherever possible, has been provided Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given This includes educational facilities (namely primary and middle schools and college), medical facilities (viz Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational

facilities In town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums' The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education , and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed The eight digital permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs

5 The village and town level amenity data have been collected, complied and computerised in prescribed record structure under the supervision of Shri Prabhakar Bansod, Director of Census Operations, Bhopal Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991 The task of planning, designing and coordination of this publication was carried out by Shri R G Mitra, Deputy Registrar General (C&T) and Dr I C Agrawal, Senior Research Officer of Social Studies Divisions Dr R P Singh Deputy Registrar General (Map) provided the technical guidance in the preparation of maps Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statement including analytical inset tables The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S L Jain, Deputy Director and Shri R K Mehata, Assistant Director I am thankful to all of them and others who have contributed to make this publication possible

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 17 10 2006

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and usable product of the Census As its name suggests, it is brought out for each district in the State This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses Those publications contained only village statistics, village names and total population thereof The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise

The scope of District Census Handbook has undergone considerable change since 1951 This is basically due to the growing demand for more information For the purpose of convenience as well as with a view to make the basic statistics available to the data users, as early as possible, the District Census Handbooks of 1991 were brought out in a single volumes as against the earlier practice of bringing it out in two parts The volume was however divided in two parts viz part A and part B Part A contained the Village/Town Directory while part B contained the Primary Census Data, based on the 1991 Census count Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks is comprised of two parts but the present series is more informative in terms of coverage and contents Part A contains Village Directory which provides information on infrastructure amenities and land use data at village level i e name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, post, telegraph, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance, power supply, news papers/magazine and most important commodity manufactured in the villages Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district C D block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level developmental plans

Part B of the District Census Handbook contains Village and Town Primary Census Abstract This provides information on area, occupied residential houses, number of households, sex-wise total population child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and divisions of workers into four industrial categories i e cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district Besides the brief history and other major characteristics of the district, inset tables and appendixes based on village directory, housing tables and PCA and their analysis added in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C D block level which are helpful for rural planning Annexures giving information on religion, Scheduled Castes/Scheduled Tribes, migration, fertility, mother tongue have been included

It has to be remembered that the villagewise area figures presented in the PCA are based on village information in the form of C-3 as furnished by the revenue authority and the "total" given for the administrative units viz, community development blocks, is the total of the area figures of village coming under it while in the case of the administrative unit viz, tahsil, the "total" area shown, is based on the information furnished by the Commissioner, Land Records, Government of Madhya Pradesh, Gwalior In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it

The District Census Handbook had been a joint venture of the Government of Chhattisgarh and the Government of India The design of 2001 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office In earlier censuses, the cost of publication of these books were borne by the State Government but now these are being printed centrally by the Census organization In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government The data supplied by the field level officers have been comparatively checked with 1991 DCHB and have been cross checked with the data obtained from various departments An attempt had been made to reconcile the discrepancies by external validation to make it more reliable I am grateful to all heads of departments of the State Government, officers and staff engaged in the conduct of 2001 Census for their cooperation to accomplish this task

The compilation of such a huge amount of varied data in a single volume requires proper planning and close monitoring We have the honour of having enlightened guidance and encouragement of Shri D K Sikri, IAS, Secretary (Registrar General and Census Commissioner, India) I owe special thanks to Shri J K Banthia, then Registrar General and Census Commissioner, India I am thankful to Dr R P Singh, DRG (Map), Shri R G Mitra DRG (C&T) and Dr I C Agrawal, Sr Research Officer (S S) and Shri S L Jain, Dy Director of S S Division for providing technical guidance

In the directorate many officers/officials contributed in the Census 2001 First of all, I pay my gratitude to the then Director of Census Operations, Madhya Pradesh & Chhattisgarh, Shri Prabhakar Bansod under whose guidance, the Census 2001 was carried out successfully I am also thankful to Shri Ram Singh then Joint Director, under whose supervision this District Census Handbook has been prepared

The data presented in the District Census Handbook required a concerted work of team comprises Shri Jose T Varghese, Assistant Director, Shri Deepak Rao, S I Grade-I, Shri R Patel, S I Grade-I, Shri O S Shukla, Draftsman, Shri Santosh C Mendhe, D E O Grade-B and Shri Hirendra Kumar Sinha, Compilor of this Directorate who were involved with it at various stages of its planning, supervision, preparation of manuscript, field work, computerisation, prepration of CRC with the help of Adobe Pagemaking technique, maps and printing I express my appreciation for the painstaking dedicated service rendered by all of them and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2001 Census Data

I shall feel greatly rewarded if the book comes to the expectation of the data users

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of District Census Handbook

The District Census Handbook (DCHB), compiled by the Census Organisation, Government of India, on behalf of the State Government is one of the most valuable product of the Census It is brought out for every district and is a very useful publication which is widely used by planners, administrators academicians and researchers as it provides, among other things, the primary census data down to the village level

History

The history of the District Census Handbook could be traced from the "Village lists brought out for every district in 1901 and "Village Statistics for every district in 1911 This was discontinued in 1921 and 1931 In 1941, however, "Village Statistics were brought out by the then Central Provinces and Berar Government It was for the first time in 1951 that the practice of brining out a single volume known as District Census Handbook, giving village wise statistics and other Census tables for the districts, at the cost of the State Government, was initiated

Scope ·

The maiden publication of the District Census Handbook of 1951 contained village wise primary census data and census tables for the district With the increasing utility and demand of statistical data for the planning process the scope of the District Census Handbook was enhanced to a great extent in 1961 by including non-census data like climate agriculture, animal husbandry, co-operative bank industry, education, health, etc , apart from presenting the village wise primary census data and census tables An introductory note giving information on historical background, physical features, soil climate civic administration, agriculture, industry education etc together with detailed analysis on census tables was also a novel feature of the 1961 census Maps of District and Tahsil were also included

Publication of DCHB at the 1971 Census .

The desire to make the District Census Handbook more comprehensive in 1961, delayed the publication in some states Therefore in 1971, the Registrar General and Census Commissioner of India, decided to bring out DCHB in three parts viz Part A, B and C in order to release the maximum data as and when ready Accordingly Part A was to contain the village wise Land Use data and the amenities and facilities available in the villages these being part of the non-census statistics Part B was to comprise the village wise primary census data, while in part C, the various non-census statistics at the district level and a few at tahsil level were to be presented

However, in Madhya Pradesh, Part A and B were published in one volume, since it was economical to do so and data for both the parts had become available early For various reasons, collection of non-census statistics took a long time and consequently finalization of Part C was unduly delayed Though the manuscript of Part C were allotted to different Regional Presses by the Controller, Printing and stationary, Government of Madhya Pradesh for printing Ultimately this publication had to be abandoned due to the enormous delay in the process of its finalization and printing

Strategy at the 1981 Census

In 1981 census with a view to avoid delay in the publication of DCHB series, part C containing the non-census statistics as well as the census tables for the district were dropped The scope of the District Census Handbook was, however, enlarged by the addition of tahsil wise list of villages where no amenities were available and tahsil wise list of the villages according to the proportion of Scheduled Caste/Tribes population by ranges in the form of Appendices III and IV respectively were added since Appendices I and II were already there

Appendix III has been helpful for planning input in areas/villages where basic infrastructure is lacking,

while Appendix IV has been helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to development oriented programmes

In the town directory portion of DCHB Part A and additional Statement IV-A was also introduced in 1981 This statement was meant only for Class I and Class II towns and indicated the civic and other amenities in notified slums

The inclusion of the Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level in Part B portion of the DCHB was another important feature of 1981 Census An appendix containing Development Block wise totals of Primary Census Abstract was also presented in the DCHB series 1981 though it was not prescribed in the All India pattern

The 1991 DCHB Series .

In the context of development planning the CD Block stay as an operational unit the presentation of village-wise statistics at the CD Block level had been very helpful for the administrators and planners in formulating various development plans The same had been presented CD Blockwise in 1991 Census

The scope of the 1991 DCHB particularly the village directory was enhanced to a great extent by the inclusion of additional information on various subjects such as inset tables on area population and density in the districts, tahsils and towns, jurisdictional changes 1981-91 etc

Part A Village Directory

Village Directory contains information about the name of the village with location code number assigned to it by the Census Organisation, geographical area of the village, total population and number of households in the village amenities like education, medical, drinking water, post and telegraphs communications approach to village together with distance in Km, distance from the nearest town, power supply and land use data In addition there are eight appendix to the Village Directory as under

Appendix I	CD Block wise(rural) abstract of educational medical and other amenities
Appendix I-a	CD Block wise abstract of villages by number of Primary schools
Appendix I-b	CD Block wise abstract of Villages of Primary, middle and secondary schools
Appendix I-c	CD Block wise abstract of Villages with different sources of drinking water facilities available
Appendix II	Villages with 5000 and above Population, which do not have one or more amenities
Appendix II-a	Census Towns which do not have one or more amenities
Appendix III	Land Utilization data in respect of Census Towns/Non Municipal Towns
Appendix IV	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available
Appendix V	Summary showing number of villages not having Scheduled Caste Population
Appendix VI	Summary showing number of villages not having Scheduled Tribe Population
Appendix VII A	List of villages according to the proportion of the Scheduled Castes to the total population by ranges
Appendix VII B	List of villages according to the proportion of the Scheduled Tribes to the total population by ranges
Appendix VIII	Statement showing number of girls school in the villages

Town Directory

The Town Directory contains the following seven statements and one appendix

Statement I	Status and Growth History
Statement II	Physical aspects and location of towns

Statement III	Municipal Finance
Statement IV	Civic and other amenities
Statement V	Medical Educational, Recreational and cultural facilities
Statement VI	Trade, Commerce Industry and Banking
Statement VII	Civic and other amenities in slums

Appendix to Town Directory – Towns showing their outgrowth with population

Primary Census Abstract

Part B -The Primary Census Abstract gives basic information on Area, Total Households Total population Scheduled Castes Scheduled Tribes population, Population in tha age group 0-6, Literates Main Workers and Marginal workers classified by the four broad industrial categories namely, (i) Cultivators (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and Non-workers The characteristics of the Total population includes Scheduled Castes, Scheduled Tribes Institutional and Houseless population and are presented by sex and rural-urban residence This data is presented at different levels namely, Districts, CD blocks, Village and UA/Towns In addition, Ward/Enumeration blockwise population is given in the Appendix to District Primary Census Abstract

Primary Census Abstracts for Scheduled castes and Scheduled Tribes

The Primary Census Abstract relating to Scheduled Castes and Scheduled Tribes is also being presented separately at the CD Block-wise Town wise It will have the same characteristics as indicated in the Primary Census Abstract to the total population

Publication of DCHB in Regional Language .

In 1981 part A and part B of DCHB were brought out separately for every district which were printed in diglot i e a mixed up Hindi and English versions while in 1971, both the parts i e part A and part B were brought out in a single volume with simultaneous Hindi and English versions The 1961 DCHB were however published in a single volume in English version only for district, since there were no separate parts like DCHB of 1971 and 1981 censuses The 1951 census DCHB series were published with a mix of both Hindi and English but with a difference

New Features of DCHB 2001

The main features of Village Directory of DCHB 2001 are

(1) For the first time eight digit continuou slocation code is assigned to all the villages within the state These are the Permanent Location Code Numbers (PLCN) and starts from the first village of first tahsil of first district of state and continue till the end of last village of last tahsil of the last district within a state

(2) The State codes are given in serpentine order for the first time which were assigned alphabetically in 1991 Census As a result the State code of Chhattisgarh is assigned code 22 in Census 2001

(3) As compared to earlier series of Village Directory additional and more useful information viz number of Commercial co-operative banks and the nearest distance of availability of amenity, Agriculture and Non-Agriculture credit societies, Recreational and Cultural facilities, availability of Newspaper/magazines and names of important commodities manufactured are included in Census 2001 for the first time in Village Directory

(4) Annexures giving information on fertility, religion, migration mother tounge Scheduled Caste/ Scheduled Tribe havebeen included in DCHB 2001

Town Directory

No major change has been made in Town Directory when compared to Town Directory of 1991 However, some improvement has been made in the data collection on slums of the towns having population 50 000 and more in which separate Enumeration Blocks were carved for slums during houselisting and population enumeration In 2001 information in respect of slum areas have been collected for all towns

The information of slums for Class I and II towns that is with population 50,000 or more was compiled in statement IV-A in Census 1991 In Census 2001, this information is compiled for all the towns irrespective of their size in statement VII

Primary Census Abstract

(1) Information on individuals has been collected in Household schedules and practice of collecting data on individual slip has been discontinued

(2) For persons recorded as other workers, the information on distance of place of duty and the means of transport of place of duty are obtained in column 27 and 28 of the household schedule

(3) The information on Disability is obtained for the first time in Census 2001 in column 15 of the household schedule

(4) The household schedule is divided in three parts The information on cultivation/ plantation is recorded in part III of the household schedule for the first time in census 2001

(ii) Brief History of the District

This district is to the south of Chhattisgarh State Earlier Bastar district was quite large in area, therefore Kanker and Dantewada districts have been carved out from this Dantewada district was created vide notification no 1006/I dated 20 8 1992 under VII-sha-8, M P Land Record Code 1951, Section 13 sub-section(2) dated 22 5 1998

History of Dantewada is tagged with the history of mother-district Bastar In the past, the present Dantewada district was known as "Jatabada which was a revenue village of Bastar riyasat and was dedicated to 'Danteshwari Mata , the Kul-Devi of the then rulers

In 1856 the first European Charles Elliot who was Deputy Commissioner of Chhattisgarh, had stated that the first ruler of Dantewada had constructed Danteshwari Temple and after sometime it was expanded during the rule of Purushotam Deo and later eleventh geneology s ruler King Drigpal Deo gave new look to the temple and thus contributed to the beauty of the temple

Since Dantewada district was part and parcel of undivided Bastar district till 22 5 1998, therefore history of this district is included in the history of Bastar From ancient history to present day history, many princly dynasties ruled this district Nandvansh, Maurya, Satvahan Gupta, Nal, Sarabhpuriyan, Chalukya and Nagvansh ruled this area from time to time Marathas and Britishers also ruled this area The geographical area of Dantewada district is full of natures most beautiful, systematic and well-woven streams and springs Forests are extended into rugged and inaccessible area Ancient proved history is not clear and incomprehensible Based on available archaeological proofs, Kings of Nag Dynasty had made the historical Barasur city as their capital which is 35 km away from Dantewada Many temples of 11th and 12th centuries are the evidences of the history still now In fact Barasur is the south gateway of Abujhmar area which is under Dandakarayana area

During Chalukya rule, capitals were frequently shifted Barasur and Dantewada were also capitals

During the changing political circumstances in 1857 of the zamindar of Bhopalpattnam Yadav Rao also rose to mutiny and raised an army which fought against Britishers in nearby Godawari area In 1910 hurt by British Rule and Diwan of the King, tribals united and raised an alarm of mutiny, resulting in the death of thousand of tribals and sepoys of the King During this period many social and political organizations flourished The soldiers of war of Independence intensified the movement Under changing scenario, riyasats were merged in Indian Union in 1948 In November 1956, Madhya Pradesh State was constituted On 1st November 2000, at midnight, Madhya Pradesh was divided and separate Chhattisgarh State came into being Newly created Dantewada district is under Bastar Revenue Division, at present

(iii) Administrative Setup

Dantewada district is created out of the mother district Bastar According to Census 2001, there are 4 revenue sub-divisions, 4 tahsils and 4 towns Community Development Blocks are 11 in number Tahsilwise villages are (1) Bhopalpattnam-317 (2) Bijapur-420 (3) Dantewada-235 and (4) Konta-390 Thus total villages in the district are 1362

According to urban categorisation Kirandul is M Corp , Geedum is Census Town, Dantewada and Bade Bacheli are Nagar Panchayat Community Development Blocks are Bhopalpattnam Usoor Bhairamgarh Bijapur, Geedum Dantewada Kuakonda, Kate Kalyan Chhindgarh Sukma and Konta Each one of there is also the headquarter of Janpad Panchayat There are 375 Gram Panchayats in the district

Under revenue administration there are 4 revenue sub-divisions and 10 revenue circles and 161 Patwari Halkas

The Collector is assisted by Deputy Collectors Tahsildars, Naib Tahsildars, Revenue Inspectors and Patwaris The Collector is also associated with a number of other committees in the district The most important among them is the District Advisory Committee The Collector is also vested with statutory powers under excise act, so as to enable him to implement the excise and prohibition policy of the Government Superintendent of Police is the head of police department at the district headquarters In order to facilitate proper and smooth Judicial and administration there are 25 police stations and 1 out-posts in the district

The Judiciary is independent At the district level, there is District Court headed by District and Session Judge District and Session Judge is assisted by Civil Judges who are posted at tahsil level

Between Census years 1991-2001 there were notable changes in administration They are -

(i) Due to large geographical size, Bastar district was divided and Kanker and Dantewada districts were carved out from this on 25 5 1998

(ii) Madhya Pradesh State was divided and Chhattisgarh State was created on 1st November 2000

(iii) After division the area of Dantewada district is 17,634 sq km and is the 1st in area in the Chhattisgarh State

(iv) Bijapur tahsil was made Police Headquarter of the district on 15th August 2001

(v) During Census 2001, Geedum was made Census town

(iv) Physical features

Dantewada comes under Bastar revenue division in newly created Chhattisgarh State This district was created on 22 5 1998 which was earlier a part of the undivided Bastar(Jagdalpur) district

This district with tribal majority touches the borders of Andhra Pradesh Orissa and Maharashtra Among the adjoining districts, Khamam of Andhra Pradesh is in the south, Malkangiri of Orissa is in the east and Garh chirouli of Maharashtra is in the north west of the district It is adjoined by district Bastar in the north The district is located between 17° 46 to 19°24' north latitude and 80°15' to 81°59' east longitude According to the Survey of General of India the geographical area is 17,634 sq km which happens to be 13 04% of the total area of the state which is 135 191 sq km Areawise Dantewada is the largest district of the state Second is Surguja and third is Bastar

Climate

Rain is comes from south-west and north-east monsoon Most parts of the district is rocky, mountainous and covered with forests Heavy rainfall comes from depression in Bay of Bengal, western part of this district and surrounding areas Generally, the climate of this district is pleasant but summer is hot and dry During rainy season, rain is evenly distributed through out the district Shivering cold waves are experienced in December-February Then summer season comes, which lasts from March-end to early June October-November is post monsoon climate

In 1998-99 there were 51 average rainfall days while in 1999-2000 63 rainfall days were reported In 1998-99 1145 7 mm rain was recorded while in 1999-2000 it was 1277 7 mm In 1991 tahsilwise rainfall was - Bhopalpattnam 1129 9 mm , in Bijapur 1242 3 mm , in Dantewada 1207 4 mm and in Konta it was 2042 2 mm Maximum rainfall occurs in the month of July-August

Temperature varies from minimum to maximum according to its climatic changes and geographical conditions From February onwards there is continuous rise in temperature May has the highest temperature

From early June monsoon becomes active and temperature slowly begins to fall January is the coldest month of the year During winter season cold waves affect the western coastal regions of the district and minimum temperature falls down to 5-6° celsius The maximum temperature goes up to 42 00 degrees celsius and minimum temperature is 6 3°C as reported

Forest

To increase and strengthen the economy of the district, forests have a vital role The district has hot climatic, dry, leafy sagon (teak) and mixed Sal forests According to M P Govt s administrative report of 1999-2000, reserve forests is 5 179 79 sq km protected forests is 3 125 71 sq km and unspecified forest-land is 1 711 77 sq km which is 56 8% of the total geographical area of the district Chief forest produces are anwala baheta harra mushi forest-turmeric, forest-tulsi achar, chhiraita shikakai tendu mahua, tikhur, lac and khair which is in abundance Collection of forest-produce and Jari-Buti is the source of employment to the local unemployed adivasis specially, collection of tendu-leaf lac, gond chirounji and mahua has not only given monetary benefits to local people but also an increase to the commercial tax and revenue of the government

Main wild-lives are tigers, leopards, wild-buffaloes (gour) cheetals, bears deer wild boars etc To promote the wildlife in the district Indravati Tiger project and Kutru Sanctuary for wild buffaloes have been declared as National parks Apart from these there are sanctuaries in Barramgarh and Pamed

Land Use

More than half of the land of the district is mountainous and rocky Due to variation in landscape, different regions of the district have silky, loam clay-loam type of land According to Census officer of the district agricultural land is 1 12,324 hectares Non-agricultural land is 40346 hectares, Wasteland 45,568 hectares and land available for agricultural is 1 12,324 hectares Wasteland is 27,992 hectares Land cultivated was reported to be 304188 hectares Under the district total forest area is 45,76,18 hectares Most of the land is not useful for food crop cultivation According to soil in the area it can be used for forestry and planting of trees In addition to it land is useful for Kodo Kutki cultivation Due to rotation of crops proper training to farmers and research the area of Kharif and Rabi crops are increasing day by day

Minerals

Minerals have an important role in the economy and industrial development of the district This district is rich in minerals Such as lime-stone, granite, iron-ore lead tin, corundum, Uranium and Pharsi-stones Among mine-based industries there are Bailadilla iron-ore plant Issar Steel Limited in Kirandul and in Hiranagar (Geedum), Steel Plant run by National Mining Development Corporation (N M D C) The district has monopoly in the country due to tactical importance in tin-ores Bailadilla, Kirandul Bacheli, Geedum Bhopalpattnam and Bodenar have large stores of minerals

Agriculture

District is basically agriculture-dominated together with large forest and mineral wealth After agriculture, collection and sale of forest-produces is the main occupation of the district Chief Kharif crops are paddy, makka(maize), Kodo-Kutki, Arhar, Urad, Kulthi and Ramtil Under Rabi crops, wheat, chana(gram), peas and teora are the main crops According to district level, Social Economic Development Sanketak 2001, in 1999-2000, total area sown was 299,036 hectares whereas total cultivated area was 304,188 hectares Food crop area was 296 thousand hectares, non-food crop area was 06 thousand hectares only Double-crop area in the district is only 5,152 hectares which is 01 66% of the net sown-area of double-crop

Among agricultural implements there are 202 tractors 146 electric pumps and 853 oil-engines During the period under review production of food grains was 220 thousand metric tons, out of which 212 thousand metric tons was grains, 05 thousand metric tons was pulses and 03 thousand metric tons of other crops was reported Central Government run I C D P rice planning has been introduced and special efforts are being made for increasing production of paddy crops Kendra Pravartit Technology Mashon of Mage is also working in the district Under this, exhibition, training program developed seeds and developed agricultural implements are given to farmers on grant Under State managed plans fruit development program, Top working plans banana exhibition, vegetable development plans, potato exhibition plans masala development medicinal and aromatic crops exhibition

etc programs are organised in the district There are 4 Mandis of agricultural crops

Irrigation

Total sown area of the district is 304 188 hectares out of which irrigated area is 5 152 hectares only, which is 1 69% of the total sown area In other words 98 31% is unirrigated area This district is most backward area in the state in irrigation facilities Land irrigated by canals is 1 000 hectares, by ponds 3 000 hectares and 1,152 hectares is irrigated by other sources

Animal Husbandry

Main occupation of the district is agriculture and cattle-rearing Cattle-census done in 1997 shows 844,333 cattle wealth in the district and Kukkut birds were 303,140 Cow cattle wealth were 513 464 (60 81%), buffalo 42,098 (4 98%), goat 203 355 (24 08%) and pigs 85,416 (10 13%)

Prohibitory injections as safely against gala ghotu ekiagia, anthrax pox-plague in cattle are given In the year 1999-2000 56064 cattle were treated and 360192 cattle were given injections There are 16 veterinary hospitals 23 cattle dispensaries and 11 artificial insemination centres and sub-centres in the district

Industry

To speed-up development of industry in the district District industries centre has been established Through this centre attraction to capital investment, enough balance for regional development and additional employment opportunity is created Iron-ores from Bailadilla (Kirandul) and Bacheli are being exported to Japan In 1999-2000 registered small industries were 82 and cottage and village industries were 79 in numbers

Traditional industries of the district are rice-mills saw-mills, building construction materials refractory and industries based on forest produces such as bamboo lac, mahua etc Handicrafts based enterprises such as pottery carpentary blacksmith leather work etc are common in almost all villages

Transport and Communications

Due to inadequate rail-transport road is the main mode of transport Trucks and buses are the main mode of transportation It occupies first place in area and the district is extended to large terrain, yet it is the most backward area in communication because of its up-and-down geographical feature and far off mountainous and forest-infested regions Lack of transport is a big impediment to the development of this region This district has 88km of rail-road from Bailadila to Vishakhapattnam According to District Level Social Development Sanketank-2001, length of National highways is 162 6 km length of Pucca road is 129 km and length of road highway is 33 6 km Katcha road is 20 60% of Pucca road There are only 100 villages out of 1362 villages which are connected by approach roads, which means, only 7 34% are approachable and 92 66% are unapproachable In 1999-2000 registered vehicles were 10,260 in number Under private vehicles, there are cars, jeeps and two-wheelers numbering 9,283 There is no air-ways in the district

Electricity

Electricity is the most important basic need for the development of industries and agriculture For the all- round development of the district demand and supply of electricity increases day by day During 1999-2000 development Sanketak of Chhattisgarh State total number of consumers is 35278 in which number of rural consumers is 31271 and urban consumers are 4007 In this period total consumption of electricity is 102942 thousand kw as reported, in which rural consumption is 53814 thousand kw and urban consumption is 49128 thousand kw In 1999-2000 total one-bulb connection is given to 24679 In this 5256 (21 30%) are Scheduled Castes 17851 (72 33%) belong to Scheduled Tribes and 1572 (6 37%) belong to general category According to Census-2001, total number of villages are 1362 in which 808 (59 3%) villages are electrified

Panchayati Raj administration

Panchayat is the basic institution of local administration and is the foundation of decentralized administration Under the Directive Principles of State Policy, the Constitution of India provides the Panchayati Raj System M P Government has passed M P Panchayat Adhiniyam System According to 73rd Amendment of the Constitution, M P Government

Source
* District Statististics Book-2001
* District Census Book
* Chhattisgarh State Development Sanketank-2001

passed the Panchayat Notification 1993 which provides Panchayat for villages Janpad Panchayats for Blocks and district Panchayat for district M P Gram Sabha Notification 2001 Gram Sabha which includes all the major persons is constitually approved unit and gives voting rights to elect Panch Sarpanch, members of Janpad and members of district Panchayat The Gram Sabha has power to approve works under annual budget of the village Constituted with the elected members these institutions work for 5 years At all level there is reservation for Scheduled Castes and Scheduled Tribes according to the population ratio For women there is 1/3 reservation Village Panchayat, Janpad Panchayat and District Panchayat have members 10-20 10-25, 10-35 respectively

Gram Panchayat within its area and within its budget can take up work like cleanliness water supply, public works(roads, buildings, well tanks) market rates, Co-operation to Government works, Community health and development works Janpad Panchayat within its budget take up works like Community development and village integration agriculture, social, commerce cattle-rearing fish-breeding, adult-education co-operatives, cottage industry, welfare and employment oriented programme It is the duty of the district Panchayat to have control over Janpad Panchayats and village panchayats and to establish coordination between them, give directions to them and advise the Government regarding development works All the development works of the villages are done by one district panchayat 11 janapad panchayats and 375 Development Blocks

(v) Census Concepts

Building

A 'Building is generally a single structure on the ground Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses offices factories, workshops worksheds, Schools, places of entertainment places of worship, godowns stores etc It is also possible that building which have componeut units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence etc

Usually a structure will have four walls and a roof But in some areas the very nature of construction of houses is such that there may not be any wall Such is the case of conical structures where entrance is also provided but they may not have any walls Therefore, such of the conical structures are also treated as separate buildings

Permanent houses

Houses the walls and roof of which are made of permanent materials The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks stones or concrete Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks stones or concrete

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently Walls may be made from any one of the following temporary materials namely grass, thatch, bamboo, plastic, polythene mud, unburnt bricks or wood Roof may be made from any one of the following temporary materials namely, grass, thatch, bamboo, wood, mud, plastic or polythene

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i e it should have a length of not less than 2 meters and a breadth of at least 1 5 meters and a height of 2 meters A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant s room and other habitable rooms Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms A room, used for multipurpose such as sleeping, sitting dining, storing, cooking, etc , is regarded as a dwelling room In a situation where a census houses is used as a shop or office , etc , and the household also stays in it then the room is not

considered as a dwelling room But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant s household Tent or conical shaped hut if used for living by any household is also considered as dwelling room

A dwelling room, which is shared by more than one household, has not been counted for any of them If two households have a dwelling room each but in addition also share a common dwelling room then the common room has not been counted for either of the households

Census House

A 'census house is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase etc It may be occupied or vacant It may be used for residential or non- residential purpose or both

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure These different units are practically independent of one another and are likely to have been built at different times and owned by different persons In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses

On the other hand one may come across cases particularly in large cities of multi-storeyed ownership flats In these cases while the structure looks like one building different persons own the flats In case of such multi-storeyed structures, having a number of flats owned by different persons the entire structure was treated as one building and each flat as a separate census house

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees Each such building was treated as a separate building But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard By definition, this has to be treated as five census houses If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses In such a case singleness of use of these rooms along with the main house should be considered and the entire flat was treated as one census house On the other hand if two independent households occupy these five rooms the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use the first three rooms together were treated as one census house and the remaining rooms as another census house But if each room was occupied by an independent household, then each such room was treated as a separate census house

In case of hostels, hotels etc , even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house

In some parts of the country in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household While the main residence may be located in one hut, other huts may be used for sleeping as a kitchen bath room, baithak, etc Though each of the huts was a separates structure, they form a single housing unit and

therefore, have to be treated collectively as one building and one census house If some of the huts are used by one household and the others by a second household as residence then the two groups of huts were treated as separate census houses However if there were also other huts in the compound used for other purposes and not as part of the household s residence such as cattle shed workshed, etc these were treated as separate census houses

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e g , the main house, the servant's quarter, the garage etc , only one building number was given for this group and each of the constituent a separate census house number

Only cases where a structure with roof and pillars has come up was treated as a building

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village

Rural-Urban area

The data in tables on Houses Household Amenities and Assets are presented separately for rural and urban areas The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas In the Census of India 2001 the definition of urban area adopted is as follows

a) All places with a municipality, corporation cantonment board or notified town area committee etc

b) A place satisfying the following three criteria simultaneously

i) A minimum population of 5,000

ii)at least 75 per cent of male working papulation engaged in non-agricultural pursuits and

iii)a density of population of at least 40per sq km (1,000 per sq mile)

For identification of places which would qualify to be classified as urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq km and having at least 75 per cent of male working population engaged in non-agricultural activity were considered To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under Urban Agglomerations' Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc , that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread Thus, the town level data wherever presented, also includes the data for outgrowths of such towns

City

Towns with population of 1,00,000 and above are called cities

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns In some cases railway colonies university campuses, port areas etc , may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a

statutory town ,and

(b) The total population of all the constituents (i e , towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census) With these two basic criteria having been met the following are the possible different situations in which Urban Agglomerations would be constituted

i) a city or town with one or contiguous outgrowths,

ii) two or more adjoining towns with their outgrowths and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so Persons in a household may be related or unrelated or a mix of both However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen then they are not constituent of a common household Each such person was to be treated as a separate household The important link in finding out whether it was a household or not was a common kitchen There may be one member households, two member households or multi-member households

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household Examples of Institutional Households are boarding houses, messes, hostels hotels rescue homes, jails ashrams, orphanages, etc To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes under fly-overs and staircases or in the open in places of worship, mandaps, railway platforms, etc , are treated as Houseless Households

Scheduled Caste and Scheduled Tribe .

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside It is important to mention here that under the Constitution (Scheduled Castes) Order 1950 no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion Subsequently in September 1956 by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes Later on as per the amendment made in the Constitution (Scheduled Castes) Order 1990 the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State/ Union territory are given below

List of Scheduled Castes and Scheduled Tribes

Language and Mother tongue

As per the census concept, each language is a group of mother tongues The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person If the mother died in infancy the language mainly spoken in the person's home in childhood will be the mother tongue In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue It is not necessary that the language spoken as mother tongue should have a script The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate A person who can only read but cannot write is not literate It is not necessary that to be considered as literate a person should have received any formal education or passed any minimum educational standard Literacy could also have been achieved through adult literacy classes or through any non-formal educational system People who are blind and can read in Braille are treated as literates

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above For different age groups the percentage of literates in that age group gives the literacy rate

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit Such participation may be physical and/or mental in nature Work involves not only actual work but also includes effective supervision and direction of work It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity All persons engaged in 'work as defined above are workers Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration

Main worker

A person who has worked for major part of the reference period (i e six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker

Marginal worker

A person who worked for less than six months of the reference period (i e in the last one year preceding the date of enumeration) in any economic activity is termed as Marginal worker

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i e last one year preceding the date of enumeration) is termed as Non worker

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share Cultivation includes effective supervision or direction in cultivation A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator Cultivation involves ploughing sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc , and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc , and pulses, raw jute and kindred fiber crop cotton, cinchona and other medicinal plants, fruit growing vegetable growing or keeping orchards or groves, etc Cultivation does not include the following plantation crops - tea, coffee, rubber, coconut and betel-nuts (areca)

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer She/he has no risk in the cultivation but merely works on another person's land for wages An agricultural labourer has no right of lease or contract on land on which she/he works

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/ himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas The larger proportion of workers in household industry should consist of members of the household including the head The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods It does not include professions such as a pleader Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc or merely trade or business even if such professions, trade or services are run at home by members of the household

Other Worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household

Industry is termed as a 'Other Worker (OW) The type of workers that come under this category of 'OW' include all government servants municipal employees, teachers, factory workers plantation workers, those engaged in trade commerce, business, transport, banking, mining, construction, political orsocial work, priests, entertainment artists, etc effect all those workers other than cultivators or agricultural labourers or household industry workers, are Other Workers'

Work Participation Rate

Per centage of workers (main + marginal) to total population

Population density

Population density is the number of persons inhabited per square kilometre of the area

Age

Age is measured in terms of the completed number of years

Sex-Ratio

Number of females per 1000 males in a population

(vi)Non Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water It may be mentioned that such uniform definition may not be valid across all states

System of sewerage

Generally a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal Sewers that carry only household and industrial wastage are called separate sewers those that carry storm water from roofs streets and other surfaces are known as storm water drains while those carrying both sewage and storm water are called combined sewers However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain sylk pattern drain etc in these towns

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes viz (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well and (iii) dry type of latrines with manual scavenging The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing) Through this sewer the faecal matter is transported without the need for scavenging This system generally exists in cities and big towns Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed Where the soil is impermeable collecting wells are constructed and the sanitary water flush latrines are connected with them These wells are cleaned at periodic intervals by a suitable device The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds

Fertility

In demography the word fertility is used in relation to the actual production of children or occurrence of births specially live births Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age The definitions of the terminology used in computing different fertility rates are mentioned below

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1000 population

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid - year Population}} \times 1000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1000 population

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid year Population}} \times 1000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1000 women

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000$$

Age specific marital fertility rate (ASMFR) ,

Number of live births in a year to married female population in any specified age group normally expressed per 1000 married women

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000$$

General marital fertility rate (GMFR) :

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1000}$$

Total marital fertility rate (TMFR) ·

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-19) years assuming that there is no mortality of women till the completion of reproductive period

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age group

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000$$

q_1

Probability of dying between birth and age 1 This

can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year

q_2

Probability of dying between birth and age 2

q_5

Probability of dying between birth and age 5 This indicator is also known as Under Five Mortality Rate (U5MR)

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000$$

Infant mortality rate comprises of two parts viz , Neo-natal mortality rate and Post neo-natal mortality rate The neo-natal mortality rate also comprises of two parts viz , Early neo-natal mortality rate and late neo-natal mortality rate These are defined as

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1000 live births of the same year

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000$$

Early neo- natal mortality rate

$$ENMR = \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1000$$

Late neo-natal mortality rate

$$LNMR = \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1000$$

Post neo-natal mortality rate (PNMR)

$$PNMR = \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1000 births in a year

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Still birth rate(SBR)

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000$$

Maternal mortality rate(MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100000 live births in a given year

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000$$

Eligible couple (Couples per 1000 population) .

Number of currently married females in the age group15-44 years per 1000 persons of all ages

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years

Migration

Migration is the third component of population change the other two being mortality and fertility

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration

(i) Migration of persons in search of job is high in the country In many cases such migrants are only seasonal in nature People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months All such workers are treated as migrants Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year she/he too were considered as a migrant

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides She/he is not considered as migrant

(iii) A woman temporarily moves into a hospital or to her parents or other relatives house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence the place where the hospital or parents/relatives house is the place of last residence of the child but not of the mother A new response category 'Moved after birth was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census is covered under category of 'Others' The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not work / employment

Internal and International migration

The migrational movements are of three types

(i)Migration within the state itself with its components

(a) Migration within the district of enumeration (intra district migration)

(b) Migration from one district of state to another district of state (inter district migration),

(ii) Migration from one state to another State of the country (inter-state migration)

(iii) Migration from one country to another country The first two streams together constitute internal migration, while the last type of movement is called international migration The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded

Rural - Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that

The flow of migrants consists of four streams viz rural to rural, rural to urban urban to rural and urban to urban

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the towne g , Municipal Corporation/Corporation, Municipal Committee/ Municipal council, Municipality etc

Size class of UA/town

Size-class of UA/Town is based on the population

size of the UA/City/Town UAs /Towns with 1 00,000 and above population are classified as C lass I UAs / towns These Class I UAs /towns are now furthersub classified in to seven sub classes namelv M1 toM7 depending on the population size of UA/ CityTown These are M7(5,000 000 and above) M6(2 000 000 to 4,999,999) M5 (1 000 000-1 999,999) M4 (500 000-999 999) M3(300 000-499,999), M2 (200,000-299,999) and M1 (100 000-199,999) towns with, 50,000 to 99 999 population are classified as Class II towns, 20 000 to 49,999 population are Class III towns, population with 10,000-19 999 are Class IV towns population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns

Slum area

The Slum Areas (Improvement and Clearance) Act 1956 which was enacted by the Central Govt defined slums as

a) Areas where buildings are in any respect unfit for human habitation or

b) are by reasons of dilapidation overcrowding fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety health or morals

Mega city

The concept of 'Mega city is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city Whereas for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities In 2001 Census cities with 10 millions and above population have been treated as Mega cities

(vii) 2001 Census findings – Population, its distribution

According to Census 2001 Dantewada district comprises of 1220 inhabited villages, 142 uninhabited villages and total 1362 villages distributed among 4 tahsils and 12 number of CD blocks The district has 4 towns The average household size of the district is 4 9 Total population of the district is 719487 comprising 356928 males and 362559 females Thus the sex ratio of the district works out to 1016 which is better than the sex-ratio of the state Density of the district is 41 persons per sq km and is lower than the density of the state which is 154 Literacy rate of the district 30 2 per cent is also lower than the State literacy rate 64 7 per cent Scheduled Castes and Scheduled Tribes population of the district is respectively 3 4 per cent and 78 5 per cent of the total population of the district Apart from these general findings, the analysis on various parameters like rural-urban distribution of population by sex, literacy, density, caste, tribe etc has been covered in the Inset Tables from 1 to 52 based on PCA Village Directory data, Town directory data and houselisting data pertaining to C ensus 2001

(viii) Brief analysis of the PCA data(Table1-36)

Analysis of the PC A data based on C ensus 2001 is presented here in the form of tables from 1 to 36 Various demographic indicators such as density, literacy Sex-ratio and distribution of population in different economic activity by rural/urban, male/ female and age classifications are presented in these tables These analysis are presented for Tahsils and CD Block levels separately

Analysis for Scheduled Castes and Scheduled Tribes is also covered in these tables

TABLE 1 DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Bhopalpattanam	83 908	83 908	0	99 227	99 227	0	18 3	18 3	0 0	0 0	0 0
2	Bijapur	119 151	119 151	0	111 916	111 916	0	19 1	19 1	0 0	0 0	0 0
3	Dantewada	221 101	188 896	32 205	217 029	195 017	52 012	11 7	3 2	61 5	14 6	21 1
4	Konta	198 107	198 107	0	231 285	231 285	0	16 7	16 7	0 0	0 0	0 0
	District Total	622 267	590 062	32 205	719 487	667 175	52 012	15 6	13 1	61 5	5 2	7 2

This table indicates tahsilwise decadal variation for both the rural and urban population of the district It is seen from the table that an overall 15 6 per cent decadal growth has been recorded in the district The growth rate in rural areas of the district during the decade 1991-2001 works out to 13 1 per cent, while for urban areas it is 61 5 per cent Among the tahsils, Bijapur has registered the highest decal growth rate of 19 1 per cent The growth rate in rural area is highest in Bijapur tahsil and it is highest in Dantewada for urban area of the district The per centage of urban population to total population of the district is 7 2 per cent in 2001 against 5 2 per cent in 1991

TABLE 7 NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THEIR RELATED POPULATION, 2001

Serial number	District / C D block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Bhopalpattnam	132	15 191	22 781	22 110	61 (46 2)	3 311	3 264
2	Usur	122	54 036	27 126	26 910	28 (23 0)	1 727	1 798

Table 2 gives CD Blockwise population number and per centage of villages falling in each range of population size of villages and number of males and females in each population range at CD Block level in the district Out of the 1220 inhabited villages 337 (27 6 per cent) are small sized villages with population below 200 persons In the size class of 200-499 persons, there are 441 villages having 36 1 per cent villages of the district while in the size class of 500-999 population there are 278 villages constituting 22 8 per cent of total villages 127 villages (10 4 per cent) are in the size class of 1000-1999 and 34 villages (2 8 per cent) are in the size class of 2000-4999 There are 3 villages (0 2 per cent) in the size class of 5000-9999 and no village falls in the size class of population 10,000 and above

TABLE 3 NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of town

(a) New

(i) zStatutory town — Nil

(ii) Census town — Nil

(b) Denotified

(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census towns

Nil

(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria — Nil

(iii) Census towns of 1991 census are notified as statutory town in 2001 census

1 Bade Bacheli 2 Kuandul

(c) Declassified — Nil

(d) Wholly merged with other town(s)

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

TABLE 4 DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	123	10 1	17 542	2 6
11-20	63	5 2	13 800	2 1
21-50	326	26 7	113 213	21 5
51-100	406	33 3	266 180	39 9
101-200	208	17 0	151 957	22 8
201-300	47	3 9	31 604	4 7
301-500	16	1 3	20 728	3 1
501 +	31	2 5	22 151	3 3
Not known	0	0 0	0	0 0
District Total	1 220	100 0	667 475	100 0
Population Density (Rural) of the district			62 7	

This table shows the distribution of villages by population density ranges The inhabited villages of the district have been grouped under 8 different ranges of density The maximum number of villages i e 406 accounting for 33 3 per cent of the total inhabited villages of the district fall in the density range of 51-100 persons having 39 9 per cent population The lowest range of 0-10 and 11-20 persons per sq km cover 186 villages (15 3 per cent) 31 villages have very high density with more than 501 persons per sq km while the corresponding proportion in the lower range of 201-500 is 5 2 per cent of the total inhabited villages having 7 8 per cent population of the district In the medium density ranges of 21-50 and 51-100 persons account for 26 7 and 33 3 per cent of inhabited villages Both these ranges claim 61 4 per cent rural population

TABLE 5 SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1 016	1 047	1 016	978	978	-
1911	1 039	1 040	1 013	994	991	-
1921	1 041	1 042	1 000	989	989	-
1931	1 043	1 046	957	1 000	1 000	-
1941	1 032	1 034	976	1 006	1 006	-
1951	1 024	1 028	951	1 026	1 026	-
1961	1 008	1 026	837	1 014	1 014	-
1971	998	1 011	888	997	1 006	653
1981	996	1,012	908	1 009	1 013	900
1991	985	1 000	917	1 009	1 014	912
2001	989	1 004	932	1 016	1 025	904

As per 2001 Census sex ratio of 1016 females per 1000 males has been recorded in the district against the state average of 989 The sex ratio of the district had been significantly higher in 1951, 1961, 1981, 1991 and 2001 over the state average figures The lowest sex ratio of 978 females per 1000 males was recorded in the district in Census 1901

TABLE 6 SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Bhopalpattanam	988	988	-
2	Bijapur	1 001	1 001	-
3	Dantewada	1 018	1 051	901
4	Konta	1 031	1 031	-
Sex ratio for the District		1 016	1 025	904

The table 6 gives the tahsilwise sex ratio of rural and urban population of Census 2001 It is observed that the sex ratio for the rural area works out to 1025 whereas it is 904 for the urban area The sex ratio in rural area is highest 1051 in Dantewada tahsil whereas in urban area it is highest 904 in Dantewada tahsil The sex ratio of the district is 1016 females per 1000 males

TABLE 7 SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Bhopalpattnam	984
2	Usur	992
3	Bhairamgarh	1 007
4	Bijapur	995

10	Sukma	1 041
11	Konta	1 015
12	Abhujhmad (Orchha) Part	983
	District (Rural) Total	1 025

The table 7 gives the CD Blockwise sex ratio for rural population of the district The sex ratio in rural areas of the district comes to 1025 females per 1000 males Among the C D Blocks the highest sex ratio of 1075 is found in Kuwakonda CD Block and the lowest of 983 is recorded in Abhujhmad(Orchha) Part CD Block

TABLE 8 SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	16	1 3	2,167	0 4
700-749	11	1 1	2 343	0 4
750-799	35	2 9	11 511	1 7
800-849	46	3 8	10 424	1 6
850-899	73	6 0	33 725	5 1
900-949	130	10 7	78 073	11 7
950-999	139	11 4	90 781	13 6
1000-1099	449	36 8	283 518	42 5
1100+	318	26 1	151 570	23 2
District Total	1 220	100 0	667 475	100 0
Sex ratio (Rural) for District			1 025	

Table 8 presents the distribution of villages by 9 ranges of sex ratio based on 2001 Census The maximum number of villages i e 449 accounting for 36 8 per cent of the total villages having largest population of 42 5 per cent in the district fall in the sex

ratio range of 1000-1099 It is followed by 318 villages constituting 26 1 per cent of total villages and 23 2 per cent population falling in the range of 1100+ It is seen that the per centage distribution of population in the adjoining ranges of the range having maximum sex ratio decreases with the decreasing or increasing range

TABLE 9 SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U A /Town	Urban status of town	Sex ratio
1	2	3	4
1	Bade Bacheli (NP)		890
2	Dantewada (NP)		877
3	Geedam (C I)		946
4	Kirandul (M)		916
Sex ratio (Urban) for the district			904

Table 9 gives the sex ratio of towns The sex ratio in urban areas of the district comes to 904 females per 1000 males as a whole Among the 4 towns of the district the sex ratio varies between 877 to 946 Geedam (C I) has the highest sex ratio 946 while Dantewada (NP) has the lowest sex ratio of 877 females

TABLE 10 SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS, 2001

Serial number	Name of Tahsil	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

11	Konta	1 012	1 027
12	Abhujhmad (Orchha) Part	783	986
	District (Rural) Total	995	1,037

Table 19 indicates sex ratio among Scheduled Castes and Scheduled Tribes in each CD Block of the district The Scheduled Castes sex ratio is 995 for district (rural) Among the CD Blocks, the highest sex ratio of 1080 is found in Dantewada CD Block and lowest of 744 is recorded in Katekalyan

Sex ratio of Scheduled Tribes population in Dantewada district rural is 1037 Among the CD Blocks the highest sex ratio of 1087 is found in Kuwakonda CD Block and lowest of 986 is recorded in Abhujhmad (Orchha) Part CD Block

TABLE 20 SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of UA/Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bade Bacheli (NP)	965	910
2	Dantewada (NP)	831	907
3	Geedam (CT)	1 110	988
4	Kirandul (M)	998	961
Sex ratio (Urban) for the district		969	916

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in UA/Towns for Census 2001 For the district (urban) sex ratio is slightly higher (969) among Scheduled Castes compared to Scheduled Tribes (946)

Among the 4 towns of the district sex ratio is above parity in case of Scheduled Castes it is in Geedam (CT) In the remaining towns sex ratio for Scheduled Castes is below one thousand the lowest being 831 in Dantewada (NP) In case of Scheduled Tribes highest sex ratio is 988 in Geedam (CT) Sex ratio of Scheduled Tribes lowest being 907 in Dantewada (NP)

It can be seen from the table 34, the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 74 5 per cent of the total workers (main + marginal), 13 8 per cent of total workers are engaged as agricultural labourers, 0 8 per cent as Household industry workers and 11 0 per cent of other workers in this district

The distribution of workers by four categories of economic activity at tahsil/sub-tahsil shows very high dependence of population on agriculture sector absorbing large number of workers The proportion of cultivators varies between 62 8 per cent in Bhopalpattnam tahsil and 86 8 per cent in Bijapur tahsil The per centage of males cultivators is 74 7 per cent which is high as compared to 74 1 per cent of females cultivators in the district The per centage of household industry workers is very low in the district as stated above The highest proportion of 18 0 per cent of other workers is recorded in Dantewada tahsil while the lowest proportion of 5 3 per cent is found in Bijapur tahsil

Note Percentage of Worker to total worker are given in brackets

Table 35 presents CD Block wise distribution of workers by sex in four categories of economic activity In the rural areas of the district total workers (main + marginal) constitutes 54 3 per cent of total population Among these workers cultivators constitute 77 8 per cent, agricultural labourers 14 4 per cent, household industry 0 7 per cent and other workers constitute 7 0 per cent The proportion of cultivators is highest 93 7 per cent in Abhujhmad (Orchha) CD Block and is lowest 57 0 per cent in Bhopalpattnam C D Block Proportion of agricultural labour is highest 31 5 per cent in Bhopalpattnam CD Block and lowest 5 1 per cent in Bhanramgarh CD Block It is also seen that the proportion of males workers is more than females workers under the category of cultivators

TABLE 36 DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS/TOWNS, 2001

				(13 5)	(11 3)	(2 5)	(2 8)	(83 4)

Table 36 presents the distribution of workers by sex in different categories of economic activity for UA/Towns of the district It is seen that out of the 33 9 per cent of total workers, cultivators constitute 5 0 per cent, agricultural labourers 1 4 per cent, household industry 1 9 per cent and the highest proportion is covered by other workers which is 91 7 per cent It is also found that proportion of female workers under cultivation is more than the male worker and in other workers male workers are more than the female workers Whereas proportion of female workers under agricultural labourer and Household industry is more than the proportion of males Town wise analysis shows that the proportion of cultivators is highest 12 9 per cent in Geedam (C T) and agricultural labourer 2 6 per cent is in Dantewada (NP) Highest proportion of household industry workers is 9 5 per cent in Geedam (CT) and other workers is highest 96 5 per cent in Kirandul (M)

(ix) Brief analysis of Village Directory and Town Directory data (table 37-47)

Analysis based on Village Directory and Town Directory data pertaining to census 2001 are presented in the form of Inset tables from 37-47 Along with the census data 'Non-Census data such as village amenity and town amenity data was collected during census 2001 These tables give the number of total villages, proportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns etc A short analytical note is also given below of each table

TABLE 37 DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT MENITIES, 2001

		(100)	(82 5)	(16 5)	(92 9)	(11 1)	(4 0)	(4 5)	(1 6)	(2 1)	(15 7)	(47 4)

Note - Percentages are given in brackets

* Based on the improved drinking water source drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source' However the concept of improved drinking water is state specific and this is to be considered accordingly

Post office includes Post office telegraph office and Post and telegraph office

$ Transport communication includes bus service rail facility and navigable waterways

Table 37 deals with the CD block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office telephone, transport, communications agricultural credit societies, approach by pucca road and power supply within the village Out of 1220 inhabited villages in the district 1006 villages or 82 5 per cent have been provided with the education facilities of one type or the other Similarly 201 villages in the district constituting 16 5 per cent have medical facilities of one type or the other Improved drinking water facility is available in 1133 or 92 9 per cent villages As regards, post office facility which includes facilities like telegraph office and post and telegraph,

135 villages constituting 11 1 per cent of villages have been provided with post office facility within the villages 49 or 4 0 per cent villages have been provided with the telephone facility 55 or 4 5 per cent of villages with transport facility 20 or 1 6 per cent villages with bank facility and 26 or 2 1 per cent villages with agricultural credit societies Similarly there are 191 or 15 7 per cent villages which are linked with the pucca road Total 578 or 47 4 per cent of villages are provided with the electricity supply Almost similar pattern of distribution of villages by availability of amenities in the villages at CD Block has been found with slight variation There is no facility of medical, telephone, transport communication, banks, agricultural credit societies and approach by pucca road in Abhujhmad (Orchha) CD Block Kuwakonda CD Block has the highest cent per cent villages where educational facility is available and lowest 48 8 per cent is found in Abhujhmad (Orchha) CD Block Medical facility is highest in Geedam 70 6 per cent and it is lowest in Abhujhmad (Orchha) CD block Telephone facility is highest in Sukma C D Block 17 0 per cent and it is lowest in Usur and Abhujhmad (Orchha) CD Block In the field of power supply all villages have been covered except 642 villages in the district

Table 39 presents distribution of villages not having certain amenities within the village at district level Such villages have been presented according to various distance ranges in this table 214 villages do not have primary school and out of these villages children of 107 villages have to travel less than 5 kms for schooling Out of 1220 inhabited villages as many as 1056 villages are deprived of middle school and 1217 of degree college Of these 305 villages avail the facility of middle school at a distance of less than 5 kms , 404 villages at a distance 5-10 kms and the remaining 347 villages at a distance of 10+ kms In respect of degree college 26 villages avail this facility at a distance of less than 5 kms , 67 between 5 to 10 kms and rest 1124 villages at a distance of 10+ kms

Similarly there are 1211 villages in the district which have been devoid of Hospital facility and 1194 villages which are deprived of PHC facilities Of these 77 villages have the facility of Hospital available within 5 kms while in respect of 159 villages the inhabitants have to cover a distance of 5-10 kms in order to avail this facility Similarly overwhelming number i e 975 villages have this facility at a distance of 10+ kms As regards PHC 60 villages avail this facility at a distance of less than 5 kms , 166 villages at a distance of 5-10 kms and the

remaining 968 villages have to travel a distance of more than 10 kms to avail this facility

Regarding Post Office 1085 villages do not have this facility in the village itself Of these majority i e 277 villages have this facility at a distance of less than 5 kms , another 395 villages avail it at a distance of 5-10 kms In the remaining 413 villages habitants have to travel a distance of 10+ kms

As regards Telephone, there are 1171 villages in the district which are without telephone facility Of these 70 villages avail this facility at a distance of less than 5 kms , 171 villages at a distance of 5-10 kms and remaining 930 villages have to travel at a distance of 10+ kms

For Bus service out of 1168 villages which do not have facility, 122 villages avail this facility at a distance of less than 5 kms , 239 villages at a distance between 5-10 kms and 807 at a distance of 10+ kms

In the entire district 1201 villages are deprived of Commercial Bank and 1204 villages of Co-operative Bank respectively Of these 1201 villages which are deprived of Commercial Banks 69 villages avail this facility at a distance of less than 5 kms , 200 villages between 5-10 kms and the remaining 932 villages at a distance of 10+ kms Regarding Co-operative Banks out of 1204 villages 60 villages avail this facility at a distance of less than 5 kms , 194 villages at a distance of 5-10 kms and remaining 950 villages at a distance of 10+ kms 1194 villages do not have agricultural credit societies This facility to 70 villages is available at a distance of less than 5 kms , 190 villages at a distance of 5-10 kms and the remaining 934 villages at a distance of 10+ kms

* Based on the improved drinking water source drinking water supply has been classified as Improved or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to Improved drinking water source However the concept of improved drinking water is state specific and this is to be considered accordingly

Table 41 deals with the distribution of villages by population ranges and amenities available therein In Dantewada district out of a total 1220 inhabited villages overwhelming 778 villages have a population of less than 500 persons Of these 566 villages (72 8 per cent) have education facility, 55 (7 1 per cent) villages have medical facility 716 villages (92 0 per cent) have improved drinking water facility 14 villages (1 8 per cent) have post office facility 9 (1 2 per cent) villages have telephone facility 12 (1 5 per cent) villages have been linked by bus service 2 (0 3 per cent) have Bank facility 3 villages (0 4 per cent) have been provided with the agricultural credit societies 66 villages (8 5 per cent) have been linked with pucca road 267 villages (34 3 per cent) have been provided with electricity

Out of 278 villages, which fall in the population range of 500-999 persons, 276 villages (99 3 per cent) have been provided with the education facility 47 (16 9 per cent) with medical facility, 259 (93 2 per cent) villages have improved drinking water facility 37 villages (13 3 per cent) have been provided with post office facilities 11 villages (4 0 per cent) with telephone facility, 12 villages (4 3 per cent) with transport facilities, 1 village (0 4 per cent) with bank facility 4 villages (1 4 per cent) with agricultural credit societies and 52 villages (18 7 per cent) have approach by pucca road 170 villages (61 2 per cent) in this range have electricity

127 villages fall in population range of 1 000-1,999 persons Of these 127 villages (100 0 per cent) have been provided with the education facility, 68 (53 5 per cent) with medical facility, 121 (95 3 per cent) villages have improved drinking water facility 53 villages (41 7 per cent) have been provided with post office facilities, 11 villages (8 7 per cent) with telephone facility, 16 villages (12 6 per cent) with transport facilities, 6 villages (4 7 per cent) with bank facility, 6 villages (4 7 per cent) with agricultural credit societies and 49 villages (38 6 per cent) have approach by pucca road 105 villages (82 7 per cent) in this range have electricity

There are 34 villages in the district which are covered under 2,000-4,999 population range O these, 34 villages (100 per cent) have been provided with the education facility, 28 (82 4 per cent) with medical facility, 34 cent per cent villages have improved drinking water facility 28 villages (82 4 per cent) have been provided with post office facilities, 15 villages (44 1 per cent) with telephone facility 12 villages (35 3 per cent) with transport facilities 8 villages (23 5 per cent) with bank facility 10 villages (29 4 per cent) with agricultural credit societies and 21 villages (61 8 per cent) have approach by pucca road 33 villages (97 1 per cent) in this range have electricity

There are 3 villages in the district which are covered under 5,000-9,999 population range and all the villages are provided with all types of amenities There is no villages in the population range of more than 10,000

TABLE 42 DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C D block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Bhopalpattnam	137	86 405	14 5	23 4
2	Usur	122	110 826	14 0	6 9
3	Bharamgarh	218	117 126	18 1	2 4
4	Bijapur	98	95 821	21 7	1 1
5	Geedam	68	61 939	12 3	0 1
6	Dantewada	59	56 261	58 5	0 2
7	Katekalyan	13	45 162	54 1	0 0
8	Kuwakonda	53	56 098	55 6	0 3
9	Chhindgarh	78	76 218	45 0	1 3
10	Sukma	53	85 618	44 3	0 8
11	Konta	253	211 619	19 1	0 3
12	Abhujhmad (Orchha) Part	13	1 020	25 9	0 0
	District Total	1 220	1 061 179	29 3	1 9

Note - Cultivable area = irrigated area + unirrigated area

Table 42 presents CD Block wise distribution of villages according to land use It also gives details of total area and cultivable area available of inhabited villages in the district Cultivated area includes irrigated as well as unirrigated area It further elaborates that what is the extent of cultivable area under irrigation There are total 1220 inhabited villages in the district having a total area of 10,64,479 hectares Of this, 29 3 per cent is cultivable and 1 9 per cent of total cultivable area has got the irrigation facility The area figures have been collected from the revenue record maintained for each village by the State Government

It is seen that per centage of cultivable area to total area is highest 58 5 per cent in Dantewada CD Block It is lowest 14 0 per cent in Usur CD Block The per centage of irrigated area to cultivable area is highest 23 4 per cent in Bhopalpattnam

TABLE 43 PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Bade Bacheli (NP)	312	148	164	344	39	184	102	0	19
2	V Dantewada (NP)	472	126	346	577	151	117	211	0	98

In urban areas of Dantewada district the average number of primary school per 10,000 population comes 7 6 primary schools, 3 7 junior secondary/middle, 2 8 secondary/matriculation, 2 4 senior secondary schools and the ratio of colleges is only 0 4 college per 10,000 population Among the towns, the ratio of primary is highest in Dantewada (NP) while lowest is Kirandul (M)

TABLE 45 NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bade Bacheli(NP)	52
2	Dantewada(NP)	45
3	Geedam(CT)	34
4	Kirandul (M)	26
	Distrct Total	40

Table 45 depicts the number of beds available in medical institutions per 10,000 population in each town of Dantewada district On an average there are 40 beds per 10,000 population in urban areas of the district Whereas it is the highest 52 in Bade Bacheli(NP) while lowest number as 26 beds is recorded in Kirandul(M)

TABLE 46 PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Bade Bacheli	20,411	5,482	26 9
2	Dantewada	6,641	2,170	32 7
3	Geedam(CT)	5,901	0	0 0
3	Kirandul	19,059	7,725	40 5
	Distrct Total	52,012	15,377	29 6

Table 46 presents the proportion of slum population in the towns of the district Out of the total 52,012 urban population 15,377 persons constitute slum population which is 29 6 per cent of total urban population Kirandul(M) town has the highest 40 5 per cent of slum population whereas, Bade Bacheli (NP) town has lowest (26 9 per cent) of slum population

TABLE 47 · MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bade Bacheli (NP)	Wooden Furniture	Iron Ore
		Tin	Tin
		-	Forest Products
2	Dantewada (NP)	Bricks	Forest Products
		Tora Oil	Paddy
		Earthen Pots	Bricks
3	Geedam (CT)	Rice	Emli
		-	Mahuwa
		-	Amchur
4	Kirandul (M)	Tora Oil	Iron Ore
		Gitti	Forest Products
		Bricks	Gitti

Table 47 indicates most important article manufactured and exported out of each town in th district The district is well known for Forest produc which is mainly exported from Dantewada The othe commodities manufactured are Tora Oil, Bricks, Ric Wooden Furniture, Gitti Iron Ore, Forest Product Paddy, Gitti, Tin are the other important commoditie which are exported by different towns

(x) Brief analysis of the data on houses and household amenities, Houselisting Operations, Census of India 2001 based on Inset tables 48-52

Inset tables 48-52 are based on Houselisting data pertaining to Census 2001. These tables reflect the tenure status distribution of households living in permanent semi-permanent and temporary houses, percentage of households having different amenities and percentage of households by type of fuel used for cooking.

Data source Census of India 2001 H-series Table on House Household amenities and Assets

Table 52 presents data for total rural and urban at district/Tahsil level households availing banking services and movable assets In the district there are 145 272 households out of whom 23 310 households are availing bank services 21 945 households have either transistor or radio 14 780 have television and households who are possessing telephone are 3021, Bicycle 29 774 either scooter, motor cycle or moped are 7,114 having car jeep or van are 981 and there are 1,02,609 such households who have none of the specified assets available in the district

(xi) Major social and cultural, natural and administrative development and significant activities during the decade

Areawise this district is first in the state Due to large geographical area this has 2 Police districts namely, Dantewada and Bijapur The Police district of Bijapur was created on 15th August 2001

(xii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district

(1)Barasur

The capital of Nagvanshi Kings is famous for ancient temple-groups Temples of 11th and 12th centuries, like Dewarly temple, Chandraditya temple, Mama-Bhanja temple and Batisi temple are famous The greatest "Ganesh Statue is marvellous Here near Bodhghat seven different water-stream sunites and forms the waterfall known as Satdhar` In fact Barsur is the south entrance-door to Abujhmar

(2) Bodhghat

Bodhghat is situated 8 km away from Barasur where Indravati river falls between mountains which adds to the beauty of nature For tourists Boating is available here On Indravati river a huge 'Indira Hydro-electrical", Power Project is being constructed with the help of World Bank

(3) Kirandul (Bailladila)

World famous for iron-ores, this place is 40 km south of Dantewada the district headquarter Iron-ore of international grade is exported to Japan Adarshnagar, situated on hill-top is beautiful and its natural beauty is like Pachmarhi of Madhya Pradesh which is the main tourist place

(4) Dantewada

It is the district headquarter From Jagdalpur the divisional headquarter, while going towards 55 km away to south-west, by road, natural beauty and beautiful sight is worth seeing Dantewada city has the famous temple of "Ma Danteshwari` It is situated on the junction of Dankini-Shankhini river It was built by Queen Bhagyeshwari Devi Nearby area of Bastar is the main centre of adoration of Ma Danteshwari (Mahishasur Mardini) Among tribals she is the first Aradhya Temples of Chhoti Mata and Bhairamdeo are worth seeing There are three Mandaps in the compound of temple which is made of wooden pillars and are artistic and wonderful in wood craft

(5) Bhairamgarh

It is in Bijapur tahsil, on Jagdalpur-Bhopalpattnam road and is an ancient village In olden days, King Bhairamdeo had inhabited this village There is an old fort some ponds and temples which are on the verge of destruction In the centre of the temple is Bhairao's statue, which is formed by cutting the rocks There is a large Shivlinga nearby, which is made of black stones In addition statues of Kartikeya, Bhairav and Parvati are sitting on Morasan (peacock-chair) There is Bhairamgarh National Park which was established in 1983 on the coast of Indravati, near Jaigur, Hingum and Marathwara

The park is extended to 139 sq km and leopards, tigers cheetahs, sambhars, wild buffaloes and Barahsingha (deer) are mainly found here

(6) Indrawati National Park

In 1978 "Indrawati National Park" was established which is in Bijapur tahsil, 200 km away from Jagdalpur and 490 km away from Raipur This park is extended up to 2273 sq km and is covered with thick forests and greenary and has beautiful surroundings Wild animals protected here are tigers, cheetahs, leopards, wild buffaloes, barahsinghas and deer

Speciality of the district -

Dantewada district touches the border of three states of the country This district occupies first place in area This district occupies its place in the map of the country due to National Mineral Corporation, Bailladila N M D C Steel Plant, Geedum (Hiranagar) and Issar Steel Limited, Kirandul which are main industries of the district

On the junction of Dankini-Shankhani rivers, Ma Danteshwari s Temple is situated The famous Lok-temple of Kutru, Indrawati Tiger Project and wild buffalo National Park is situated in the district Pamer and Bhairamgarh are other National Parks of the district

Archeologically and from religious point of view, Barasur is the historical town, which was the capital of Nagwanshi rulers In tribal majority regions Dalar Deo in Bhairamgarh is respectful and Pujneeya Mango

trees are married in traditional customs. Amoos is the most important festival of the district. Various tribes live in various regions in the district. They are mainly Gonds, Halba and Bhatras. In this Adivasi majority district, the behaviour of adivasis is simple, pure and gentle. Socially, blind-faith has taken deep roots in the minds of adivasis. At present also, they believe in Jadoo-tona, Tona-totka, Bhoot-pret-pishach etc. pertaining to invisible and mystical forces. Among Swatantarta Senani, Shaheed Gend Singh, Vir Ghurwārao, Yadorao, Lal Kalendra Singh, Rajmata Suvatn Kanwar, Vir Gundadhur, etc. are chief Nayaks who contributed to the great cause. Sheoraj Singh of Paralkot, Baburao of Monapalki and Vyanketrao, Dibrighur, Harma, Sosa, Hurga, Manjhi, Aytu, Mahra, Ekra, Kota, Bhima, Bori, etc. are immortal martyrs worth remembering. In 1910, 27 Krantikaris of Bastar Division were given death sentence in Raipur Jail.

In literary world, famous novelish Gulsher Ahmed is known figure. Among painters, Kanhaiyalal Shrivastava, BalramSingh "Pitambar", Marat Singh, Keshav Prasad Dube, Pokhanlal Dube and Raghunath Mahapatra are wel known figures. Among poets, Nuri Jagdalpuri, Ganesh Yadav, Ashok Chakra, Laxmi Narayan Payodhi are reputed poets.

In political field, famous as Bastar tiger is Mahendra Karma, Rajendra Pambhoi, Bawasi Lakhma, Aradhna Marka etc. whose leadership have contributed to the development of this district.

(xiii) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

(xiv)Scope of Village Directory and Town Directory :

Village Directory :

The Village Directory is one of the traditional compilations of the census organisation and provides the consolidated picture of each village as revealed by the availability of existing amenities, land use pattern, composition of its population and other infrastructural details. This will be of immense help to identify the areas of surplus and deficit requiring the attention of planners and administrators for rescheduling the development process in appropriate direction. The format of village directory has 25 columns providing village-wise data of location, area, population, land use pattern and amenities etc.

The details of each column of village directory are explained as below :

Column-1 Serial number of the village is indicated in this column.

Column-2 gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Chhattisgarh first PLCN 00000100 has been assigned to village 'BADWAHI' in Bharatpur tehsil of Koria district which happens to be first village, tehsil and district while the last PLCN of 02030800 has been assigned to the last village 'SINKAWAYA' of the state in Konta tehsil of Dantewada district which happen to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and tehsil maps and services of local revenue officers/ officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or

merger of villages in urban areas The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages But to ensure the accuracy the list of villages and their names were got authenticated from the respective Tehsildar of each tehsil

Column-3 shows the area (in hectares) of the village as indicated by the State Revenue Department

Columns – 4 and 5 gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in the village

Columns 6 to 9 deal with the amenities like education, medical drinking water, post telegraph and telephone etc The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided In such cases where no facility is available within a village, a dash (-) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz upto 5 kms , 5-10 kms and 10+ kms of the nearest place where the facility is available has been given This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development The abbreviations used to indicate these amenities have been explained separately in the subsequent section The list of colleges, senior secondary schools, hospitals post and telegraph offices in the district as obtained from the concerned departments are also added in the form of annexures at the end

Column-10 shows the number of banks - Commercial banks and Co-operative banks In addition to this, the list of banks procured from the lead bank of the district has also been added in this book

Column-11 relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies

Column-12 shows the number of recreational and cultural facilities viz Cinema/video hall sports club stadium/auditorium facility available in the villages

Column-13 Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village

Column-14 refers to the state of roads etc leading to the village This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways

Column-15 gives the information of the nearest town and its distance in Kms from the village in brackets from the referent village In case, the nearest town is located in another state, the name of the state has also been furnished

Column-16 relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations

Column-17 gives the information as to whether newspapers/magazines are received in the village

Column-18 gives the information of most important commodities manufactured in the village

Columns- 19 to 23 give the details about land utilization The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories These are as follows

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area

Column 20 and 21 shows area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column-22 Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column

Column- 23 Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Town Directory :

Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History :

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3 whereas column 4 indicates the name of tehsil/sub-tehsil to which town belongs. While column 5 shows the name of CD Block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns, 1999

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 10 to 12 give information regarding name and road distance of the nearest railway station, bus route, navigable river/ canal (if within 10 Kms.)

Statement-III Municipal Finance, 1998-99

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities, 1999

The statement displays the information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire

fighting services and electrification etc

Statement-V Medical, Educational, Recreational and Cultural Facilities, 1999

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution Educational facilities by level/ type of courses and recreational and cultural facilities

Statement-VI Trade, Commerce, Industry and Banking, 1999

This statement presents the information under 11 columns in respect of each town Columns 3 to 8 indicate three most important commodities imported exported and manufactured in the town Information on number of banks available in the town appears under column 9 Columns 10 and 11 shows number of agricultural and non-agricultural credit societies operating in each town respectively

Statement-VII Civic and other amenities in Slums, 1999

This Statement gives the information relationg to civic and other amenities in respect of slum areas of towns, where the population exceeds 50,000 as per 2001 census The codes used in col 8 and 13 are the same as for statement IV

PART A - VILLAGE AND TOWN DIRECTORY

Section I - Village Directory

(a) Notes explaining the abbreviations used in Village Directory

The "Village Directory" is one of the traditional compilations of the Census It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village

Village is a statutory recognized unit having a definite boundary and separate land records In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component The villages which are consider as a Census Town , the amenities data are shown in the Town Directory For those villages which have partly merged in an outgrowth of U A , the amenities data are shown in the Village Directory for that particular village

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i e , Serial number, Name of village & location code number and area of the village against column no 4 to 18 The land use data for such villages are shown in col 19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows -

Columns 1 : Serial Number

Self explanatory All the villages within the CD Block are presented serially in the ascending order of their location code number

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns This also includes the forest and uninhabited villages

Column 3 : Area of the village

The area of the villages in hectares are given Wherever the area figures was not furnished by the concerned department the column is left blank

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column

Column 5 : Number of households

The number of households as per 2001 Census is given in this column

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post office, telegraph, banks, credit societies, communication, power, approach road etc in each village has been depicted with appropriate codes against the column concerned Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz < 5 kms , 5-10 kms and 10+ kms of the nearest place where the facility is available is given Column wise details are given below

Column 6 : Educational

Classes upto class V included in Primary School This will include nursery school, kindergarten school Pre-basic school, pre-primary school, junior basic school upto class V

Classes from VI to VIII are included in the middle school

Classes from IX and X included in High secondary school Classes XI and XII are included in senior secondary school

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e g Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e g P(3), M(4), etc

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	TB Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e g H(3), D(4), etc

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc
the same is indicated in codes mentioned below along with the number of banks in brackets If not available the distance of nearest place where the facility exist is given

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i e Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets In case the facility is not available within the village the distance of the nearest place where such facility exist is given

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village, the same is recorded in these columns If not available the particulars of the nearest place with the facility is recorded The information is indicated in codes mentioned below along with the number of such facilities in brackets

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village The approach to the village is indicated in following codes

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts are furnished against these columns The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns The area figures are given in hectare(s) up to one decimal Desh '-' is recorded wherever the information is not made available by the concerned department The codes used for different types of irrigation facilities available in the village are indicated below

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell(without electricity)	TW
(vi)	Tubewell(with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools

Appendix-I-B Indicates number of villages CD Block wise having primary, middle and secondary schools

Appendix-I-C Shows number of villages CD Blockwise with different sources of drinking water facilities

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities

Appendix-III It gives the land utilization data in respect of Census Towns / non municipal Towns

Appendix-IV CD Blockwise list of inhabited villages where no amenity other than drinking water facility is available

Appendix-V Summary showing number of villages not having Scheduled Castes population

Appendix-VI Summary showing number of villages not having Scheduled Tribes population

Appendix-VII A The appendix shows the list of villages according to the proportion of the Scheduled Castes to the total population by ranges

Appendix-VII B The appendix shows the list of villages according to the proportion of the Scheduled Tribes to the total population by ranges

Appendix-VIII Shows number of different types of girls school in a village

(b) List of Villages merged in towns and outgrowths at 2001 Census

Name of the District	Name of Town	Name of Villages merged in towns	Fully/Partly Merged
Dantewara		Badebacheli	
		Dantewada	
		Kirandul	
		Geedam

SECTION II TOWN DIRECTORY

Notes Explaining the Codes Used in the town Directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) . Class, name and civic administration status of town ·

Class has been introduced to facilitate analysis of town directory data at the state and all India levels It is presented according to 2001 Census Population of the town as follows

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city

The civic administration status of the towns is indicated within bracket against the name of the town The following abbreviations are used to denote civic status of town

(I)	Municipal Corporation	M Corp
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero

Column 9& 10 ·

Name of the nearest city with one lakh and more and five lakhs and more population are recorded

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal Its name is to be mentioned If not available, then the name of nearest place with distance, where such facility exists is to be mentioned

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms)

Information about kutcha / pucca road is to be recorded separately for the roads within the limits of the referent town

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers

The codes used for different types of drainage system are as follows

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns

Column 12 . Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 . Water supply

Source and capacity of storage system The following codes are used in these columns

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded If the facility is not available within the town The name of the nearest place having this facility with its distance from the referent town has been recorded

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i e Domestic, Industrial, Commercial, Road lighting (points) & others

Statement V · Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T B Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e g D(3), NH(8), etc The institutions have further been distinguished by providing additional codes within the bracket as given below

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows

(i)	Arts only A	
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc of the government or semi government or autonomous bodies, public sector undertakings etc

The following codes are used

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B Ed College, Teacher's Training Institute, Music / Dance School, Nursing School etc are covered under 'Others'

Column 11 to 14 Higher Secondary/Intermediate/ Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools

School up to class V are treated as Primary or elementary schools These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV

Schools upto VIII are considered as Middle school or Junior Secondary

Schools upto class X are considered as Matriculation or Secondary schools

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc This would cover 10+2 classes whether held in schools or college

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e g P(4), M(3)

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission There are number of Adult Education Centres which are included in these columns

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats If the facility is not available in the town the

name of nearest place with distance where the facility is available is recorded

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities The particulars of permanent recreational facilities are considered for these columns

Column 20 Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column

Column 10 & 11 Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc

PART B - PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872 Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B Part I contained the Location Particulars, Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were

specially set up for this purpose The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA This is because the Scheduled Castes status had to be determined in relation to the religion of the individual Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institu-tional and Houseless population and are presented by sex and rural-urban residence This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract This practice was continued in 1991 also In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included In

1981 census only main workers were presented in to four categories One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also This will help the data users in better analysis and understanding of this literacy data

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels The level of presentation of Primary Census Abstracts are as under

	Name of the Primary Census Abstract	Level of presentation
1	District Primary Census Abstract	District/CD Block/UA/City/Town
2	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4	Village Primary Census Abstract	CD Block/Village wise
5	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census This practice is continued in 2001 Census also The data for each CD Block is presented both for rural and urban areas separately All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s)

The District Primary Census Abstract is presented in 59 columns The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares The area figures of the CD Block is the total of the village areas coming under each CD Block The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P S level the same may not be covered under the area of the villages Apart from this it may also differ due to varying methods of computation adopted at different levels

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town

ANNEXURE-II

NOTE ON FERTILITY, MORTALITY AND MIGRATION - 1991 CENSUS

Fertility Levels :

Births, deaths, and migration are three components of population change in any geographical unit Fertility is a major component of population growth In the 1991 Census, questions on fertility related to age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year were canvassed to generate the table of fertility The first three questions were asked to all ever-married women and the last question related to currently married women The various measures of fertility worked out are based on the district level estimates of fertility and child mortality for 1991

Mortality analysis is one of the most important branches of demographic studies This branch deals with the demographic event of death Since death is a biological phenomenon that occurs just once to each individual, the analysis is simpler than, say, the study of fertility wherein the event of birth can occur with varying frequency among women

Migration is an important aspect in the area of Population Studies There is an increase in population of any community or country due to births or in-migration, whereas there is a decrease in the population of its residents due to deaths or migration In other words, migration is an important reason for the change in size and composition of population Those areas are affected by migration from where migrants go or where they have gone

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration included in the individual slip These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables

ANNEXURE III (i)

MEASURES OF FERTILITY IN THE STATE AND DISTRICT - CENSUS 1991

State Chhattisgarh **District Dantewada (Un-divided Bastar)**

Fertility Measures	District Dantewada		State Chhattisgarh	
	1981	1991	1981	1991
General Fertility Rate (G F R)	144	144	167	161
General Marital Fertility Rate (G M F R)	199	182	192	188
Total Fertility Rate (T F R)	4 70	4 49	5 30	4 92
Total Marital Fertility Rate (T M F R)	5 60	5 81	5 90	5 73
Crude Birth Rate (C B R)	34 31	35 41	37 96	32 79

(Source - Estimate of Fertility Indicators at District Level - M P 1991)

Chhattisgarh and Dantewada were part of Madhya Pradesh State and district Bastar in Census 1991 As such the data pertaining to undivided Madhya Pradesh and district Bastar is presented here in respect of Chhattisgarh and Dantewada district

The study of above table reveals that all the measures of fertility have decreased in 1991 compared to 1981in respect of the state However the TMFR and CBR of the district have increased marginally in 1991 The GFR of the district happens to be lower than state average in 1981 whereas the Crude Birth Rate of the district which was lower than state in 1981 is gone higher than state in 1991

ANNEXURE III (ii)
MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE IN THE STATE AND DISTRICT - CENSUS 1991

State Chhattisgarh **District Dantewada (Un-divided Bastar)**

Fertility Measures	District Dantewada			State Chhattisgarh		
	Total	Rural	Urban	Total	Rural	Urban
No of children ever born to each married woman in the age group 45-49	3 99	4 00	3 83	4 83	4 93	4 46
Mean age at marriage	18 42	18 44	18 16	16 62	16 39	17 48
Child Woman Ratio (0-4 years)	555	564	448	599	629	507

The average number of children born to each married woman of the district 3 99 is lower than the state average 4 83 This measure is lower in the Rural and the Urban sector of the district to the corresponding state average

The mean age at marriage of the district 18 42 happens to be higher than state average 16 62 Similarly the child woman ratio for children in the age group 0-4 years per 1,000 women of the district 555 is lower than state average 599

ANNEXURE III (iii)
CHILD MORTALITY RATE IN THE STATE AND DISTRICT CENSUS 1981-1991

State Chhattisgarh **District Dantewada (Un-divided Bastar)**

State / District	Year	Persons				Male				Female			
		(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)	(q1)	(q2)	(q3)	(q5)
State													
Chhattisgarh	1991	133	139	143	147	131	134	138	142	136	143	149	151
	1981	150	162	171	197	158	165	170	193	140	159	173	201
District													
Dantewara	1991	98	112	121	129	95	117	124	130	86	106	115	123
	1981	118	130	137	163	131	144	143	170	104	117	130	155

(Source - Estimate of Mortality Indicators by sex at district level-M P 1991)

It is seen that child mortality rate in every age in 1981 as well as 1991 of the district is lower than the corresponding state mortality rate The table also reveals that the male child mortality of the state in 1991 is lower than female child mortality rate in every age classification Contrary to this the male child mortality of the district is higher than female child mortality In 1981 also the male child mortality of the district is more than female child mortality

ANNEXURE IV(I)

POPULATION OF INMIGRANTS IN THE DISTRICT BY PLACE OF BIRTH CENSUS 2001

State- Chhattisgarh **District Dantewada**

Birth Place	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	146,694	37,318	109,376
	(84 3)	(25 4)	(74 6)
(A)Within the district but outside Enumeration place	112,005	20,688	91,317
	(64 3)	(18 5)	(81 5)
(B)Birth place in other district of State	34,689	16,630	18,059
	(19 9)	(47 9)	(52 1)
(ii) Place of Birth in other states of India than the state of Enumeration	26,317	12,345	13,972
	(15 1)	(46 9)	(53 1)
(iii) Birth place in Foreign	1,069	641	428
	(0 6)	(60 0)	(40 0)
(iv) Unclassified	0	0	0
	(0 0)	(0 0)	(0 0)
Total Immigrants	174,080	50,304	123,776
Persons born in the place of enumeration	545,407	306,624	238,783
Total population	719,487	356,928	362,559

(Source- Migration Table D-1)

Note Percentages are given in brackets

This table presents the number of in migrants by place of birth of enumeration within the district distributed in four classifications i e (i) Migration *from within the state, (ii) Migration from other* states of India,(iii) Migration from foreign place and (iv) Unclassified

It is observed that the migration by birth from within the state is maximum 84 3 per cent of total migration The migration from within the district but outside the enumeration place is 64 3 per cent whereas migration from other districts of the state is 19 9 per cent Migration from other *states is 15 1 per cent and the migration from* outside India is 0 6 per cent of the total migration It is also seen that the female migration is much higher than the male migration in first two classifications which is due to the migration of females after marriage

ANNEXURE IV(II)

POPULATION OF INMIGRANTS BY PLACE OF LAST RESIDENCE . CENSUS 2001

State- Chhattisgarh **District Dantewada**

Last Residence	Population and Percentage		
	Persons	Male	Female
(i) Within the State but outside Enumeration place	151,211	39,215	111,996
	(85 8)	(25 9)	(74 1)
(A)Within the district but outside Enumeration place	118,278	23,279	94,999
	(67,1)	(19 7)	(80 3)
(B)From other district of State	32,933	15,936	16,997
	(18 7)	(48 4)	(51 6)
(ii) From other states of India outside enumeration state	24,486	11,330	13,156
	(13 9)	(46 3)	(53 7)
(iii) Place of residence outside India	615	366	249
	(0 3)	(59 5)	(40 5)
(iv) Unclassified	0	0	0
	(0 0)	(0 0)	(0 0)
Total Immigrants	176,312	50,911	125,401
Population of Non-inmigrants	543,175	306,017	237,158
Total population	719,487	356,928	362,559

Source- Migration Table D-2

Note Percentages are given in brackets

Migration of population by place of last residence distributed in four classifications is presented in this table It is seen that the migration by usual place of last residence from within the state is highest 85 8 per cent of total migrated population Within this classification, the migration from within the district is 67 1 per cent and only 18 7 per cent migration is from other districts of the state Migration from other states of India outside enumeration state works out to 13 9 per cent of total migration and it is only 0 3 per cent from outside India Mostly, sexwise anlysis reveals much higher migration of females which is obviously due to the movement of females after marriage

ANNEXURE IV(III)

POSITION IN-MIGRANTS FROM OTHER STATES - AS PER CENSUS 2001

State- Chhattisgarh **District Dantewada**

Birth Place	Census 2001	
	Migrant Popultion	Percentage of total In-migrants
Orissa	6,763	25 7
Andhra Pradesh	4,826	18 3
Uttar Pradesh	3,455	13 1
Madhya Pradesh	3,078	11 7
Maharashtra	1,857	7 1
Bihar	1,515	5 8
Total of 6 States	21,494	81 7
Total of other States	4,823	18 3
Total	26,317	100 0

Source- Migration Table D-1

In-migration from other states is classified in this table 81 7 per cent of total in-migrants are from Orissa, Andhra Pradesh, Uttar Pradesh, Madhya Pradesh, Maharashtra and Bihar whereas the remaining in-migrants from all other states together constitute only 18 3 per cent

Total 6,763 persons have migrated from Orissa which alone accounts for 25 7 per cent of total in-migrants Dantewada is located at the neighbouring state border of Orissa as such the Migration from Orissa is very high and the culture and language is homogeneous

ANNEXURE V

DISTRIBUTION OF POPULATION BY MAIN RELIGIONS

State Chhattisgarh **District - Dantewada**

State/District	Population	Hindu	Muslim	Jain	Christian	Buddhist	Sikhs	Others	Unclassified
1	2	3	4	5	6	7	8	9	10
Chhattisgarh 1991	17,614,928	16,817,294	299 673	43,213	302,637	48,651	50,605	17,370	35,485
		(95 5)	(1 7)	(0 2)	(1 7)	(0 3)	(0 3)	(0 1)	(0 2)
Chhattisgarh 2001	20,833,803	19,729,670	409,615	56,103	401,035	65,267	69,621	95,187	7,305
		(94 7)	(2 0)	(0 3)	(1 9)	(0 3)	(0 3)	(0 5)	(0 0)
Dantewada 1991	622267	613410	2883	663	3175	595	476	592	473
		(98 6)	(0 5)	(0 1)	(0 5)	(0 1)	(0 1)	(0 1)	(0 1)
Dantewada 2001	719487	696516	5664	1134	6213	360	579	8644	377
		(96 8)	(0 8)	(0 2)	(0 9)	(0 1)	(0 1)	(1 2)	(0 1)

Source - Religion Table - Census 1991/2001

This annexure presents the distribution of population at district and state level pertaining to Census 1991 and Census 2001 in respect of six religions It is observed that the proportion of Hindu population in the district is comparatively highest than that of state As against this the proportion of Muslim and Jain population is higher in the district as compared to state average The proprtionate distribution of population belonging to other religions in the district is lower than the corresponding state proportions

ANNEXURE VI

MARITAL STATUS OF POPULATION IN THE STATE AND DISTRICT . CENSUS 2001

State- Chhattisgarh **District- Dantewada**

State / District	Total/ Rural / Urban	Total Population	Marital Status				
			Never married	Married	Widowed	Divorced/Separated	Unspecified
Chhattisgarh							
	Total	20,833,803	10,267,526	9,440,561	993,835	131,881	0

(Source- Socio Cultural Table C-8)

Note Percentages are given in brackets

This annexure presents the proportionate distribution of literates by different educaional levels in specific age groups As the population in the age group 0-6 do not come within the purview of literates, it has been shown separately

It is seen that out of 586,421 persons belonging to the age 7 and above 176,944 are literates and thus, the literacy rate of the district works out to 30 2 per cent Similarly the male and female literacy works out to 65 3 and 34 7 per cent respectively

63,603 persons have been recorded to attain education up to primary level in the age group 7-14 which is only 42 4 per cent of population in this age group In the age group 15-34, 14,454 persons (6 1 per cent) are found educated up to middle, 19,400 person (8 2 per cent) upto the level of Matriculate/Higher Secondary/ Intermediate/ Diploma Tech and 4,805 persons (2 0 per cent) upto Graduate and above level It may be noted that this is the group having maximum class interval and thus it has the maximum population as well The analysis also reveals that the percentage of literates at all levels decreases with increasing age groups which explains the gradual increase in literacy rates over past ten years
