DISTRICT MAP

Gandhi Ashram, Bhitharwa

The village is situated in Gaunaha C.D. Block. It is noted as the centre from which Mahatma Gandhi launched his campaign against the tyrannical indigo-planters. Mahatma Gandhi along with his followers visited this village on 16.11.1917. The newly built cottage known as Gandhi Ashram was formally inaugurated by Gandhiji on 20.11.1917. Gandhiji and other revolutionaries used to visit this place off and on. Mother Kasturba had also stayed there for six months. At present this Ashram is being taken as a great source of inspiration for the politicians, researchers and visitors.

Annexure II : Estimates of child mortality, 1981 and 1991 Census 892

Annexure III : Various measures of fertility and mean age at marriage1991 Census 893

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 Census & 2001 Census 894

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 Census & 2001 Census 899

Annexure VI : Marital status of population as per 1991 Census & 2001 Census 907

Annexure VII : Age, sex and education in the district, 1991 Census & 2001 Census 923

Annexure VIII : Distribution of different mother tongues returned in 2001 Census 931

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to C.D. Block/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional C.D. Block/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD Block level will help the planners in formulation of micro level development plans, CD Block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of ‘notified slums’. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the

publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide ranging utility. Census after Census much innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of population data. This is the most valuable district level publication brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the respective district. This publication has, thus, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organisation, and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B – village and townwise Primary Census Abstracts pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Caste and the Scheduled Tribe Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking and civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues. All based on 1991 and 2001 Censuses, except mother tongue, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the comparision of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level amenity data have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area

Committees who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office S/Shri Phool Singh ex-Joint Director, A.K. Saxena Deputy Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Assistant Directors and Shri Ramesh Prasad, S.I.Grade-I supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance it has been rare privilege to strive for results. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Shri R.G. Mitra, Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

District Highlights – 2001 Census

1. Paschim Champaran ranks 9th in terms of population (30,43,466) and 1st in terms of area (5,228 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Paschim Champaran is the 34th densely populated district in the state with 582 persons per sq.km as against the state's 881.
3. Paschim Champaran ranks 29th in terms of sex-ratio (901) against the state's 919.
4. There are 131 uninhabited villages (out of 1,486 total villages) in the district of Paschim Champaran.
5. Thakraha (under Thakrahan C.D. Block) is the most populated village (28,836) and Belwa Dih (under Mainatanr C.D. Block), Bisambharapur (under Narkatiaganj C.D. Block) and Bankatwa Tewari (under Bagaha C.D. Block) are the least populated villages (1) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Sidhaw has the highest number of villages (158) in the district and C.D. Block Piprasi has the lowest number of villages (3).
8. Semralabedaha (under Piprasi C.D. Block) has the largest area (11,085 hectare) and Bahuarwa Tola Chak Thawala (under Majhaulia C.D. Block) has the smallest area (4 hectare) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 99.3 percent of the villages.

(I) HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications. It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts. This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements', which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.

It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D. Block level presentation of data in the Village Directory and PCA instead of the traditional C.D. Block/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data. With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography. The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The newly created district of Pashchim Champaran was carved out of the old Champaran district in the year 1972 as a result of reorganisation of the districts in the State. It was

formerly a subdivision of Champaran district known as Bettiah subdivision. It consists of 18 development Blocks. The district is bounded on the north by the hilly region of Nepal, on the south by Gopalganj district and part of Purba Champaran district' on the west by state of Uttar Pradesh and on the east by part of Purba Champaran district and Nepal. Paschim Champaran contains three subdivisions viz. Bagaha, Bettiah and Narkatiaganj.

The District Gazetteer mentions Champaran as a corruption of **Champa - Aranya** i.e. the forest of Champa trees, a designation which is popularly believed to date back to the time when the district was a vast forest uninhabited except by solitary ascetics. The whole district is dotted with places held in religious esteem as the traditional abodes of Hindu rishis, such as valmiki, in whose hermitage Sita, the banished spouse of Rama, is said to have taken shelter. This great sage is reputed to have resided near Sangrampur, and the village is believed to be indebted for its name (which means the city of the battle) to the famous fight between Rama and his two sons, Lava and Kusha. There is also a popular belief that within this district lay the kingdom of Virat mentioned in the Mahabharat as the tract within which the Pandavas spent the last year of their weary 12 years' exile; and that its capital, where the five brothers resided a year, was situated at or near a village called Vairati, or Bairati 9 or 10 kms. west of Ramnagar.

The District Gazetteer further mentions that apart from these traditions, it seems probable that Champaran was occupied at an early period by races of Aryan descent and formed part of the country in which the Videhas has settled after their migration from the Punjab. According to the legend preserved in Vedic literature, Agni the God of fire, accompanied the Videhas in their march eastwards from the banks of the Saraswati, and when they came to the broad stream of the Gandak, they cleared the forest, cultivated the virgin soil and founded a great and powerful kingdom. This kingdom was in course of time ruled over by king Janaka, who is said by local legend to have lived at Chankigarh, known locally as Jankigarh, 17 kilometres north of Lauriya Nandangarh. Under his rule, according to the Hindu mythology, the kingdom of Mithila was the most civilised kingdom in India. King Janak, himself was a scholar and author of Upanishads, and his chief priest, Yajnavalkya was the renowned codifier of the Hindu law. After the decline of the Videha empire, the district formed part of the Vrijjian oligarchical republic with its capital at Vaishali. The Lichchhavis were the most prominent of the clans which constituted the Vrijjian confederation. Ajatshatru the emperor of Magadh succeeded in subduing the Licchhhavis and occupying their capital at Vaishali. He extended his sovereignty over the present district of Paschim Champaran which continued under the Mauryan rule for the next hundred years. Ashoka's pillars have been found at Lauriya (Nandangarh). After the Mauryas, the Sungas and Kanvas ruled over Magadh and its territories. Archaeological evidences pointing to the influence of the Sunga and Kanva culture which have been found in the district.

The district thereafter formed part of the Kushan empire and later came under the Gutpa empire, though not much is known about the material culture of the district in that age. Alongwith Tirhut, the district was possibly annexed by Harsha during whose reign Hiuen Tsang, the famous Chinese pilgrim, visited India.

The history of the district during the medieval period and the British period is linked with the history of Bettiah Raj.

The District Gazetteer mentions the Bettiah Raj as a great estate. It traces its descent from one Ujjain Singh and his son, Gaj Singh who received the title of Raja from the Emperor Shah Jehan (1628-58). The family came into prominence in the 18th century during the time of the downfall of the Mughal Empire when one finds frequent references made by Muhammadan historians to the Rajas of Bettiah as independent chiefs. Thus, in the Riyazus-Salatin, the Raja is described as a refractory and turbulent chief, whose territory had never acknowledged the dominion of any of the Subahdars. In order to subdue this chief Ali Vardi Khan led an expedition against him in 1729, and brought him and his territory under subjugation. Subsequently, in 1748, the Raja seems to have entered into an alliance with the Afghan rebel chief of Darbhanga and given shelter to the members of his family during their revolt against the Bengal Viceroy; when the Afghans were defeated by Ali vardi Khan, he offered to atone for his contumacy with a contribution of 3 lakhs of rupees. In 1759 Caillaud advanced against the fort of Bettiah, and compelled the Raja to submit; in 1762 another expedition was sent

against him by Mir Kasim Ali Khan and his fort was again captured; and in 1766 a third expedition under Sir Robert Barker became necessary to establish British authority.

At the time when Sarkar Champaran passed under British rule, it was in the possession of Raja Jugal Keshwar Singh, who succeeded Raja Dhurup Singh in 1763. This Raja soon came in conflict with the East India Company. He fell into arrears of revenue and after an unsuccessful attempt to resist the British forces fled to Bundelkhand for safety. The attempt by the Company to manage the estate proved, however, a complete failure; and the Company finding that its revenue grew less and less, persuaded Jugal Keshwar Singh to return. They then settled with him parganas Majhawa and Simraon, the remainder of the district being given to his cousins, Sri Kishan Singh and Abdhat Singh and forming the Sheohar Raj. The same two paraganas of Majhawa and Simraon were settled with Bir Keshwar Singh, the son of Jugal Keshwar Singh, at the Decennial Settlement in 1791, which constituted the greater part of the Bettiah Raj Estate. Bir Keshwar Singh played a prominent part in the disputes which led to the Nepalese war, and was succeeded in 1816 by Anand Keshwar Singh on whom Lord William Bentinck conferred the title of Maharaja Bahadur as a reward for services rendered. On the death of his successor, Newal Keshwar Singh in 1855, the estate passed to Rajendra Keshwar who, in the words of the Lieutenant-Governor, gave at the time of the Mutiny "praiseworthy aid and support to Government during the whole progress of the rebellion". The title of Maharaja Bahadur was also given to this Raja and to his son, Harendra Keshwar Singh, the last Maharaja of Bettiah, who was subsequently made K.C.I.E. and died in 1893. He left no children and was succeeded by his senior widow, who died in 1896. The estate, which had been under the management of the Court of Wards since 1897, was also held by the Maharaja's junior widow' Maharani Janaki Kuoar who was styled Maharani by courtesy. Her title to the estate was contested on three occasions. Babu Ramnandan Singh and Babu Girijanandan Singh of Sheohar each laid claim to the estate, but their claims were disallowed by the Privy Council in 1902.

The Bettiah Raj palace occupies a large area in the centre of the town. Much of the old palace was removed and large modern additions were made by the Court of Wards. In 1910 at the request of the Maharani the new palace was built after the plan of Graham's palace in Calcutta.

The later history of the district is intimately connected with indigo plantation. Britain used to get supplies of indigo from her American colonies but this ceased after the War of Independence in 1776 as a result of which the colonies became free. This forced the British to fall back upon India for supplies of indigo. Many factories were set up by the Europeans in the indigo-producing areas of Bengal and Bihar. The Bettiah and Ramnagar estates gave leases of land to them for indigo cultivation on rather easy terms.

In the freedom struggle the district played an important role and was among the outstanding districts in the state in regard to national movement.

(iii) Administrative set up

The district of Pashchim Champaran lies in the north-west Bihar region of the state. It is adjacent to Nepal. There are three subdivisions viz., Bagaha, Bettiah and Narkatiyaganj. The district has got eighteen Community Development Blocks. The number of villages and towns in the district are 1486 and 5 respectively

The District Magistrate and Collector is incharge of the civil, revenue and criminal administration of the district. He is also the chief pilot of all development and welfare activities in the district. The Commissioner, Tirhut division, having its headquaters at Muzaffarpur, exercises general supervision and control over him. The District Magistrate is assisted by the Additional District Magistrate and the D.D.C (Deputy Development Commissioner). A number of Deputy Collectors and other officers are also posted at the district headquarters to assist him. There is complete separation between the judiciary and the executive in the district. The District Judge, who is also the Session Judge for the session divisions, heads the judiciary. He is assisted by the Subordinate Judges, Munsifs, Munsif Magistrates and Judicial Magistrates. The Superintendent of police is the head of the police administration in the district. He is assisted by the Assistant Superintendent of Police. At the subdivision level the Deputy Superintendent of police heads the police administration.

(iv) Physical Features

Natural divisions

The district consists of a few distinct tracts. The southern portion of the district is a flat alluvial plain but towards the north-west the surface is more undulating and rises gradually near the Nepal frontier. From the north-western corner a range of low hills extends in a south-easterly direction for a distance of some 32 kms. Between this range and the Sumeshwar range which extends along the whole of the northern frontier lies the Dun valley. The northern portion is composed of old alluvium, and contains much lowland admirably suited for rice but unfit for the cultivation of rabi crops. It is a great rice-producing area traversed by a number of streams flowing south-wards.

The Gandak is the most important river of the district. It rises in the central mountain basin of Nepal known as Sapt-Gandaki from the seven streams which unite to form this river. After flowing for about 50 kms. beyond the Indian border, the river descends to the plains at Tribeni, at its confluence with the Sonaha and the Panchnad. Being snow-fed, the Gandak is a torrential stream until it leaves the hills, after which it becomes wider and less turbulent. It is navigable up to Tribeni, timber being the chief product transported by river.

The Sikrahna is the second largest river in the district. It originates in the *Chautarwa Chaur*, and flows in south-easterly direction through the central portion of the district till it turns south at Lakhaura, north of Motihari. The southern portion of the river is known as Burhi Gandak.

Climatic conditions

The climate of the district of Pashchim Champaran is cooler and damper than the adjoining districts. The terai area, comprising mainly Ramnagar, Bagaha and Narkatiaganj is unhealthy. Except in these tracts the climate is rather healthy in all other areas. Winter begins in November and lasts till February, followed by the hot summer months when the maximum temperature reaches upto 43^{o}C. Rains set in during the latter part of June. The district receives some winter rain also.

Rainfall

The rainfall is heavier than most of the districts and is especially heavy in the submontane tract partly owing to the heavy showers which fall when cyclonic storms break up on reaching the hills and partly because the monsoon is stronger towards the west over the parts of the district just under the hills. The normal annual rainfall in the district is about 56 ″.

Flora and Fauna

The district which had derived its name from the thick forests of Champa trees, has, during the recent past, suffered large scale denudation of forests. Forests are confined to the northern tract and particularly the Sumeshwar and the Dun ranges are covered with forests. Among the trees found in this region are Sal, Sisu, Tun, the red cotton tree and Khair. In the moist lands of terai clumps of bamboo, sabai grass and narkat reed are found in abundance. The cultivated area in the remaining portion of the district is dotted with clumps of bamboos, palm trees and mango orchards. River banks, which are subject to floods, are covered with growth of reeds and bushes.

The land is now becoming too productive to be spared for wild growth. The 1961 Census report mentions that tiger, panther, bear, deer, sambhar, wild boar, leopard and bison are the wild animals found in the forests of the district. The rhino sometimes appears from the

neighbouring forests of Nepal. Monkeys, wolves and wild goats of various types are found in large numbers.

Three types of quails of the amazonian species are seen in the district. They are the bustard quails, button quails and the little button quails. The little button quail is locally known as lawa while the button quail is called the barra lawa. The bustard quail is called gulu. Green pigeons are also met with.

Amongst the common birds found in the district are the brownfly-catcher, the grey shrike which is of a French grey colour with black stripe above the eye and is usually of the size of a myna; the green willow warbler, and olive green bird,, various types of mynas; the tree pipit; and different types of vultures. Ducks are found in the marshes and on the river banks.

The rohu, naini, katla, tengra, buari, sauri and bausari are the big fish varieties found in the bigger rivers and lakes of the district. Among the common small fish varieties are the rewa, bachwa, pothia ‘ garai, bulla, while in certain parts the jhinga, kewai, mangur and senghi are also found. Snakes are quite common in the district. Crocodiles and alligators are sometimes found in the larger rivers.

Land use Pattern

The crops in the district are grouped in three divisions, viz., aghani, bhadai, and rabi. The principal aghani crops are the winter rice crop and sugar-cane. The principal bhadai crops are early rice, maize, various millets whereas the rabi crops are wheat, barley and rahar. Taking the district as a whole the most important crops are rice, maize, sugar-cane, wheat and barley. In the terai tract of the district towards the north, rice is almost the only crop grown by the aboriginal tharus. There are several rice-mills in the district. The area under sugar-cane has increased considerably owing to the coming up of new sugar mills.

Irrigational facilities

The northern portion of the district contains a large proportion of bangar soil which, as already stated, grows winter rice, and is peculiarly suited to irrigation. It is in this area that the canals operate particularly in the summer months and are designed mainly to protect the summer rice crops. Of the canals operating in the district Tribeni Canal is the most prominent. It traverses the entire northern part of the district from Tribeni Ghat to Mainmatand. This canal obtains its water-supply from the river Gandak at the point where it enters the district, and has its head sluice at Bhaisalotan (Balmiki Nagar) near the village of Tribeni, from which it derives its name. The Tribeni Canal extension scheme has been of great benefit to the area concerned.

In addition to the canals, irrigation in the north of the district is obtained by bundling the rivers, the water being generally distributed by means of pynes. Irrigation is also done from tanks and wells.

Mines and Minerals

The Dun and Sumeshwar hills in the extreme north are formed of ill-compacted sandstone, scored by the bare stony beds of the water courses down which the streams rush with considerable force in the rains. There are beds of Kankar in parts of the district and saltpetre is found almost everywhere.

Industrialisation

The proportion of persons dependent for their living on industries is small. The district has no important manufacturing towns. The manufacture of indigo, which was

formerly the principal industry of the district, has now come to an end. The manufacture of sugar is the only remaining industry of any importance in the district. Besides there are a few rice-mills working in the district.

Tenancy

The District Gazetteer describes the land revenue administration of the district as the one owned mainly by a few big proprietors, with a small number of petty revenue-free properties, and with few subordinate tenures. The greater part of the property was held by three estates, viz., the Bettiah Raj, the Madhuban Estate and the Ramnagar Raj. Petty proprietors were fairly numerous in Madhuban, Dhaka and Kesaria, but every where else in the Bettiah Raj and a few big Zamindars predominated.

There were only three very small Government estates under direct management. Of the three, two estates were originally Government camping grounds being unconditional gifts from the Madhuban Estate. These camping grounds, which were adjacent, were found to have been cultivated by tenants who paid no rent. They were consequently brought on the revenue roll and rent was collected by the Collectorate staff. A large number of the tenures found in the district were held by concerns, whose business was previously the cultivation and manufacture of indigo. Of the bakasht area a large proportion had been settled with tenants. In addition since indigo declined the area directly cultivated by mukarraridars and thikadars had decreased, as they found it more advantageous to settle the outlying bakasht lands with tenants rather than cultivate these directly.

Livestock

This district along with other districts in the State depend absolutely on livestock for cultivation. The plough cattle are bred locally and in addition there has been for years a large sale of bullocks for export to other parts of India specially Bengal.

There are many fine and well-conditioned bullocks seen in the district particularly the bullockcart, but large herds of cows and calves are generally found not in good condition may be due to insufficient ground for grazing and few fodder crops grown. Buffaloes are the main source of milk in the district. Goats are numerous everywhere in the district. They are generally of small type but in fairly good condition. There are veterinary Hospitals at Bettiah and Bagaha. The veterinary Department has popularised vaccination for epidemic diseases which has done a great deal of good. A district branch of the Society for Prevention of Cruelty to Animals has recently been formed.

Communications

The district had no proper road till the year 1800. However, in due course great changes were brought about by the enterprising indigo and sugar planters to whom good lines of communication were an absolute necessity. In 1841 the road from Mehsi to Bettiah (about 80 kms.) was considered as excellent. The other roads which were not so good at that time have improved considerably. The roads are maintained by the PWD and the District Board as also by the municipalities. The proportion of metalled roads is small. The most important roads are those which lead from the Nepal border to the banks of the Gandak. Important among the State highways and District roads are -

Motihari - Madhuban Ghat Road.
Sugauli - Bettiah Road.
Bettiah - Bagaha Road.
Bagaha - Bhaisalotan (Balmikinagar) Road.

Passenger buses ply between the following points:

Motihari, Gobindganj, Areraj, Ghorasahan, Bettiah and Muzaffarpur.
Bettiah and Patna via Ramnagar, Bagha and Lauria.

The railways were introduced in 1888 when Bettiah was linked with Muzaffarpur. The line was extended subsequently to Bhikna Thori on the Indo-Nepal border. A line also runs from Bagaha to Bairgania in Sitamarhi district.

Bettiah also has a landing ground for planes.

Trade and Commerce

The rich forests of the district have opened the doors of a flourishing trade in timber. The district borders Nepal on the north over a long stretch of land. There are some road routes also connecting the district with Nepal. Naturally, therefore, a good bulk of the Indo-Nepal trade is carried on through the district. Nepalese rice, timber and Ganja (Indian hemp) are imported into India through the district while textiles, petroleum products, etc. are exported to Nepal. The chief trade centres are Bagaha, Bettiah, Chanpatia and Narkatiaganj.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in

common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. But if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-urban Area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.- -For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was

specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe:

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes:

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi

18. Musahar
19. Nat
20. Pan, Swasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes:

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother

tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc, and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing,

vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./towns. These Class I UAs/Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Pashchim champaran district during 1991 was 23,33,666 Hindus constitute over 79.2 per cent (18,48,077persons) of the population in the district followed by Muslims 20.6 percent (4,80,343 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Pashchim Champaran district during 1991 was 2,333,666. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Pashchim Champaran district, Hindi, the main mother tongue of the district was returned by 90.3 percent (2,108,121 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Pashchi Champaran district, was 8.0 percent (187,345 persons). Speakers of other Schedule languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Pashchim Champaran during 1991 census.

The population of the Scheduled Castes in the district of Pashchim Champaran was 335,249,according to 1991 Census, Numerically the five most important SCs in the district were (i) Chamar, Mochi (171,001) (ii) Dusadh, Dhari, Dharhi. (54,623) (ii) Musahar (53,958) (iv) Dhobi (17,867) and (v)Dom, Dhangad (11,910) . While Chamar constituted the maximum proportion of Scheduled Castes population the percentage of being 51 %(more than half of the total SC population) Dusadh and Musahar though numerically second and third in order comprised only 16.3 and 16.1 percent of SC population in the district. Dhobi and Dom are much less in number as compared to the other three SCs mentioned above with only 5.3 and 3.6 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than the SC population was less than even 1.0 percent except Hari, Mehtar, Bhangi and Pasi where percentages were 2.5 and 2.2 respectively.

The population of the Scheduled Tribes in the District of Paschim Champaran during 1991 census was 31.104 numerically. The five important STs were namely (i) Oraon (ii) Gond (iii) Munda (iv) Chero and (v) Birjia. Oran had 16 populations, which constituted 52.3 percent of the Scheduled Tribes population in the district. Gond with 5480 populations was 2,882 in number constituted 9.3 percent of the ST population. Chero comprised 2.182 persons and comprised 7.0 percent of ST population while Birjia with 1.515 populations constituted 4.9 percent of the total ST population in the district. The other Scheduled Tribes were almost negligible in population except mal Paharia Kharwar and Gorait whose percentages were 4.0.1.3 and 1.2 respectively.

(vii) 2001 Census findings–Population and its distribution

The district of Pashchim Champaran, with a population of 30,43,466 according to 2001 Census, is divided into 18 Community Development Blocks, comprising 1486 villages and 5 towns. With 3.7 percent of the total population of the state comprised within the district, Pashchim Champaran is a large sized district and ranks 9th in the state in order of population. The population of males and females are 16,00,839 and 14,42,627 spread over 5.6 percent area of the State. Bagaha Block is the most populous while Piprasi is the least populated C.D. Block in the district. Tables 1 to 52 presented below are based on Primary Census Abstract, Village Directory, Town Directory and Houses and Households Amenities data of 2001 Census which give insight into the socio-economic and demographic characteristics of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF C.D. BLOCKS BY RESIDENCE, 1991-2001

Serial number	C.D. Block	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Table 1 shows rise in the population of the district during 1991 –2001 decade, with 30.4 percent. The rural population in the district has increased by 30.3 percent while the urban population growth over the decade has been as much as 31.5 percent. The increase in rural population during 1991-2001 has been observed the highest in Bettiah C.D.Block with 44.7 percent while the lowest in Bhitaha C.D. Block with (2.9%).

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

It may be observed in the table 2 that the maximum proportion of villages (31.0%) of the total inhabited villages in the district lies in the population range of 1000-1999, closely followed by villages in the population range of 2000-4999 with 23.6 percent of the total inhabited villages. The percentages of population in the above two population ranges are 21.8 percent and 36.2 percent of the total rural population of the district, respectively. The minimum proportion of village lies in the population range of 10,000 and above which constitute around 11.0 percent of total rural population of the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED, AND MERGED TOWNS IN 2001 CENSUS

		Name of town
		1
(a)	**New**	
(i)	Statutary town	NIL
(ii)	Census town	NIL
(b)	**Denotified**	NIL
(c)	**Declassified**	NIL
(d)	**Wholly merged with other town(s)**	NIL

Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4:DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	14	1.0	1,009	0.0
11-20	3	0.2	249	0.0
21-50	22	1.6	3,477	0.1
51-100	26	1.9	12,752	0.5
101-200	78	5.8	58,884	2.2
201-300	80	5.9	58,259	2.1
301-500	257	19.0	327,883	12.0
501 +	875	64.6	2,271,394	83.1
Not known	0	0.0	0	0.0
District Total	**1,355**	**100.0**	**2,733,907**	**100.0**
Population density (Rural) of the district		**651**		

The data presented in the above table highlights the fact that maximum proportion (64.6%) of villages in Pashchim Champaran district lies in the density range (per square kilometre) of 501+ with 64.6 percent of the total inhabited villages which account for 83.1 percent of total rural population of the district.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,022	1,022	1,001
1911	1,051	1,056	942	1,026	1,028	970

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1921	1,020	1,027	886	1,004	1,006	931
1931	995	1,005	820	985	988	906
1941	1,002	1,012	842	976	979	894
1951	1,000	1,010	859	957	960	909
1961	1,005	1,020	832	944	949	877
1971	957	968	833	918	922	868
1981	948	959	852	911	915	866
1991	907	913	857	877	879	860
2001	919	926	868	901	903	885

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows that sex ratio for the urban areas of Pashchim Champaran district is comparatively high as compared to the urban areas of the state during 1991 and 2001 census. However, on the other hand the sex ratio for the rural areas of the state is found to be comparatively high as compared to the rural areas of Pashchim Champaran district during 1991 and 2001 census. It is found that in case of sex ratio in the total population in the district, it is lower than the sex ratio of the state of Bihar, in 1991 and 2001 Censuses. It is apparent from the table that during all the censuses state's figures are on the higher side than the district's figures for the total population.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5

15	Majhaulia	897
16	Bettiah	895
17	Bairia	895
18	Nautan	903
	District (Rural) Total	**903**

As regards rural areas in Pashchim Champaran district there are 903 females for every thousands males. Within the district the sex ratio varies from 926 in Gaunaha C.D. Block to 875 in Bhitaha C.D. Block.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	18	1.3	1,496	0.1
700-749	15	1.1	7,080	0.3
750-799	37	2.7	34,697	1.3
800-849	122	9.0	193,447	7.1
850-899	407	30.0	981,612	35.9
900-949	479	35.4	1,204,448	44.1
950-999	177	13.1	240,188	8.8
1000-1099	85	6.3	66,404	2.4
1100+	15	1.1	4,535	0.2
District Total:	**1,355**	**100.0**	**2,733,907**	**100.0**
Sex ratio (Rural) for District:		**903**		

It is observed in the table 8 above that the maximum proportion of villages in Pashchim Champaran district lie in the sex ratio range of 900-949 and these villages account for 35.4 percent of the total inhabited villages. It further reveals that these villages that fall in this sex ratio range account far 44.1 percent of the district rural population. 407 villages (30.0%) fall in the sex ratio range of 850-899 and these villages account for 35.9 percent of the total rural population of the district. Overall sex ratio of the rural population of the district is 903.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town+	Urban status of town	Sex ratio
1	2	3	4
1	Bagaha	M	885
2	Bettiah	M	889
3	Chanpatia	NA	924
4	Narkatiaganj	NA	855
5	Ramnagar	NA	886
Sex ratio (Urban) for the district			**885**

There is no urban agglomeration in the district of Pashchim Champaran. There are five urban units viz; Ramnagar (NA), Narkatiaganj(NA), Bagaha(M), Chanpatia(NA) and Bettiah(M). According to 2001 census, overall sex ratio for the urban population of the district is 885. Among the towns of the district, the highest sex ratio has been recorded in Chanpatia (NA) while the lowest sex ratio is recorded in Narkatiaganj (NA).

16	Bettiah	14,519	7,431	7,088	954
17	Bairia	36,019	18,564	17,455	940
18	Nautan	39,141	20,020	19,121	955
	District (Rural) Total	**591,621**	**302,772**	**288,849**	**954**

It is observed in table 11 that the sex ratio in the age group 0-6 among the rural population in the C.D. Blocks of the district varies from 999 in Thakrahan C.D.Block to 936 in Lauriya and Jogapatti C.D.Block. The sex ratio of Bhitaha C.D.Block is 997.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	73	5.4	6,102	1.0
700-749	24	1.8	2,882	0.5
750-799	64	4.7	13,075	2.2
800-849	107	7.9	31,030	5.2
850-899	171	12.6	87,749	14.8
900-949	214	15.8	128,373	21.7
950-999	234	17.3	157,240	26.6
1000-1099	285	21.0	130,927	22.1
1100+	183	13.5	34,243	5.8
District (Rural) Total	**1,355**	**100.0**	**591,621**	**100.0**
Sex ratio (Rural) for District:		**954**		

It is observed in the above table that the highest proportion (21.0%) of inhabited villages in Pashchim Champaran district lie in the favourable sex ratio range of 1000-1099 which account for 22.1 percent of district rural population in the age group 0-6. 183 villages (13.5%) are in the sex ratio range of 1100 and above although these villages constitute only 5.8 percent of rural population of the district in the age group of 0-6.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town+	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bagaha (M)	M	17,862	9,215	8,647	938
2	Bettiah (M)	M	19,630	10,178	9,452	929
3	Chanpatia (NA)	NA	4,339	2,173	2,166	997
4	Narkatiaganj (NA)	NA	7,180	3,658	3,522	963
5	Ramnagar (NA)	NA	7,726	3,981	3,745	941
District(Urban) Total			**56,737**	**29,205**	**27,532**	**943**

The sex ratio in the age group 0-6 of Chanpatia (NA) and Narkatiaganj (NA) towns are higher than the district average while Ramnagar (NA), Bagaha (M) and Bettiah (M) towns

have sex ratio lower than the district average. The sex ratio in the age group 0-6 among the urban population in the towns of the district varies from 997 in Chanpatia (NA) to 929 in Bettiah (M).

District (Rural) Total		**2,733,907**	**410,090**	**43,525**	**15.0**	**1.6**

The above tables 14 & 15 indicate that the percentages of Scheduled Castes and Scheduled Tribes in Pashchim Champaran district are of the order of 14.3 and 1.5 percent respectively of the total population. The highest percentages of Scheduled Castes and Scheduled Tribes population are contained in Gaunaha C.D. Block (17.3%) and Sidhaw C.D. Block (10.2%) respectively of the total population.

The percentages of Scheduled Castes and Scheduled Tribes population in the district of Pashchim Champaran for the rural areas are 15.0 and 1.6 percent respectively, which is higher than the urban areas (8.0% and 0.4% respectively). The percentage of Scheduled Tribes population in Pashchim Champaran district is almost negligible (1.5 percent) as has been observed in the above tables.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	154	11.4	0	0.0
Less than 5	153	11.3	8,304	2.0
5-10	267	19.7	51,985	12.7
11-20	397	29.3	181,466	44.3
21-30	189	13.9	89,193	21.7
31-40	94	6.9	40,107	9.8
41-50	45	3.3	17,922	4.4
51-75	41	3.0	17,868	4.4
76 and above	15	1.1	3,245	0.8
District (Rural)Total	**1,355**	**100.0**	**410,090**	**100.0**

Of the total 1,355 inhabited villages in the district 154 villages are such where no scheduled castes population exist. The maximum number of villages i.e. 397 which accounts for 29.3 percent of the total inhabited villages have scheduled castes population in the range of 11to 20 percent to their total population followed by 267 villages in the range of 5to 10 percent. On the higher side, 41 and 15 villages have scheduled caste population ranging from 51 to 75 and 76 and above respectively.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,052	77.6	0	0.0
Less than 5	197	14.5	6,238	14.3
5-10	21	1.5	2,617	6.0
11-20	34	2.5	8,314	19.1
21-30	12	0.9	4,652	10.7
31-40	11	0.8	5,215	12.0
41-50	6	0.4	3,453	7.9
51-75	11	0.8	6,775	15.6
76 and above	11	0.8	6,261	14.4
District Total	**1,355**	**100.0**	**43,525**	**100.0**

It is significant to note that majority of the inhabited villages i.e. 1052 (77.6%) have no scheduled tribes population in the district. Apart from these, 14.5 percent of the inhabited villages (197) are such where proportion of scheduled tribes population to their total population is less than 5.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bagaha (M)	91,467	7,529	201	8.2	0.2
2	Bettiah (M)	116,670	7,609	565	6.5	0.5
3	Chanpatia (NA)	22,038	1,413	118	6.4	0.5
4	Narkatiaganj (NA)	40,830	4,242	215	10.4	0.5
5	Ramnagar (NA)	38,554	3,831	288	9.9	0.7
District (Urban) Total		**309,559**	**24,624**	**1,387**	**8**	**0.4**

The highest proportion of Scheduled Castes population to the total population of respective towns / city of the district has been found at 10.4 percent in Narkatiaganj (NA) followed by 9.9 percent in Ramnagar (NA), while the lowest of 6.4 percent has been recorded at Chanpatia (NA). As regards to Scheduled Tribes' population, Ramnagar (NA) has recorded the highest percentage of 0.7 to its total population while Bagaha (M) has recorded the lowest percentage of 0.2.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Sidhaw	916	954
2	Ramnagar	912	925
3	Gaunaha	919	927
4	Mainatanr	892	963
5	Narkatiaganj	897	929
6	Lauriya	921	959
7	Bagaha	902	943
8	Piprasi	894	0
9	Madhubani	889	773
10	Bhitaha	890	895
11	Thakrahan	912	1329
12	Jogapatti	905	977
13	Chanpatia	902	958
14	Sikta	902	680
15	Majhaulia	918	878
16	Bettiah	911	917
17	Bairia	924	988
18	Nautan	914	819
District (Rural) Total		**908**	**945**

Among Scheduled Castes the sex ratio varies from a highest of 924 in Bairia C.D. Block to a lowest of 889 in Madhubani C.D. Block. Similarly it varies from a highest of 1,329

in Thakrahan C.D. Block to a lowest of merely 680 in Sikta C.D. Block among Scheduled Tribes.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town +	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bagaha (M)	854	558
2	Bettiah (M)	857	1,116
3	Chanpatia (NA)	922	761
4	Narkatiaganj (NA)	858	680
5	Ramnagar (NA)	923	778
Sex ratio (Urban) for the district:		**870**	**842**

In the urban areas, the sex ratio of Scheduled Castes varies from 923 in Ramnagar (NA) to 854 in Bagaha (M). In comparision to Scheduled Castes, the Scheduled Tribes have recorded lower sex ratios except in Bettiah (M) where it is 1,116.

It transpires from Table 21 & 22 that the district has registered a literacy rate of 38.9 percent in 2001 Census. As regards rural and urban areas of the district the literacy rates have been registered as 36.0 percent and 63.5 percent respectively. The gap in male/female literacy rates has been 25.8 percentage points as it is 51.1 percent and 25.2 percent for males and females respectively. Males in the rural and urban areas have recorded fairly high literacy rates of 48.5 percent and 72.4 percent respectively. Similarly females have recorded literacy rates of 22.0 percent and 53.3 percent in rural and urban areas of the district respectively. At C.D. Block level literacy rate varies from 66.2 percent in Bettiah C.D. Block to 22.8 percent in Thakrahan C.D. Block.

The table above shows that literacy rate among the Scheduled Castes is highest i.e.30.9 percent in the Bettiah C.D. Block whereas it is lowest i.e. 13.7 percent in Thakrahan C.D. Block in the district. It is observed that the literacy rate among the Scheduled Castes for the district is 21.2 percent only. As regards percentage of male literacy rate among the Scheduled Castes it is highest i.e.42.9 percent.in Bettiah C.D.Block whereas it is lowest i.e.20.7 percent in the Thakrahan C.D. Block. In case of female literacy rate among the Scheduled Castes also it is highest i.e. 17.5 percent in Bettiah C.D. Block whereas it is lowest i.e.5.7 percent in Bagaha C.D.Block. It is found that the gap between male and female literacy rate is highest i.e.26.2 percent in Madhubani C.D. Block whereas it is lowest i.e.14.9 percent in Thakrahan C.D. Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	56	4.7	1,962	0.5
1-10	208	17.3	58,012	14.1
11-20	342	28.5	149,542	36.5
21-30	325	27.1	134,168	32.7
31-40	147	12.2	45,098	11.0
41-50	90	7.5	18,452	4.5

17	Nautan	66	45	21	65	27	38	65.3	77.6	48.8	28.7
	District (Rural) Total:	**7,795**	**6,018**	**1,777**	**35,730**	**16,364**	**19,366**	**22.7**	**33.8**	**10.7**	**23.0**

Table 28 shows that among the scheduled tribes percentage of literate is highest i.e.65.3 percent in Nautan C.D.Block whereas it is lowest i.e. 8.8 percent in Thakrahan C.D.Block in the district. It is observed that the literacy rate among the Scheduled Tribes for the district is 22.7 percent. As regards percentage of male literacy rate among the Scheduled Tribes, it is highest i.e. 77.6 percent in Nautan C. D. Block whereas it is lowest (i.e.15.8 percent) in Thakrahan C.D.Block. In case of female literacy rate among the Scheduled Tribes, it is highest (i.e.48.8 percent) in Nautan C.D.Block whereas it is lowest (3.2%) in Bhitaha C.D. Block. Narkatiaganj C.D. Block has recorded the highest gap in male/female literacy rate with 41.9 percent whereas Thakrahan Ramnagar C.D. Block has recorded the lowest gap in male/female literacy rate with (12.0%).

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	40	13.2	1,089	2.5
1-10	34	11.2	6,248	14.4
11-20	53	17.5	16,893	38.8
21-30	51	16.8	8,218	18.9
31-40	39	12.9	5,931	13.6
41-50	28	9.2	3,095	7.1
51-60	19	6.3	904	2.1
61-70	18	5.9	629	1.4
71-80	7	2.3	396	0.9
81-90	2	0.7	18	0.0
91-99	1	0.3	25	0.1
100	11	3.6	79	0.2
District Total	**303**	**100.0**	**43,525**	**100.0**
Literacy rate for District (Rural)		**22.7**		

The table 29 shows that in case of literacy among the scheduled tribes in the villages of the district the highest proportion of villages i.e. 17.5 percent fall in the literacy range of 11 to 20 percent whereas the lowest proportion of villages i.e.2.3 percent fall in the literacy range of 70-80 percent. It is observed that of the total villages in the district 3.6 percent villages are such which fall in the literacy range of 100 percent.

TABLE 30 NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial no.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bagaha (M)	103	79	24	98	50	48	61.7	69.3	45.3	24.0
2	Bettiah (M)	355	182	173	210	85	125	76.0	84.3	68.9	15.3
3	Chanpatia (NA)	65	42	23	53	25	28	69.9	80.8	56.1	24.7
4	Narkatiaganj (NA)	164	110	54	51	18	33	89.6	98.2	76.1	22.2
5	Ramnagar (NA)	84	63	21	204	99	105	37.0	49.2	21.2	28.0
Pashchim Champaran (Urban)		**771**	**476**	**295**	**616**	**277**	**339**	**67.8**	**76.5**	**57.3**	**19.2**

Table 30 above shows that the literacy rate among the Scheduled Tribes in the urban areas of the district is 67.8 percent. Among the towns of the district, Narkatiaganj (NA) has recorded highest literacy rates for total urban population, males and females. While Ramnagar (NA) has the lowest literacy rate with 37.0 percent.

Table 31 shows number and percentage of main workers marginal workers marginal workers and non workers in C.D. Blocks of the district for total which includes rural as well as urban while table 32 shows same for rural areas.

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way, it is defined for main and marginal workers. Table 31shows that the work participation rate (WPR) in the Pashchim Champarn district is 27.6 percent as main workers and 10.3 percent as marginal workers, proportion of non-workers in the district is 62.1 percent.

Among the main workers male work participation rate in the district is 42.9 percent while that of females is only 10.6 percent as per 2001 census. The proportion of main workers is highest (36.8%) in Gaunaha C.D.Block and the lowest (21.9%) in Bettiah. Out of 18 C.D. Blocks, WPR of nine C.D.Blocks are above the district average. The proportion of marginal workers is the highest (16.2%) in Piprasi C.D.Block and the lowest (4.3%) in Bettiah C.D.Block.

The proportion of total workers is the highest (43.7%) in the Thakrahan C.D.Block and lowest (26.2%)in Bettiah C.D.Block. The proportion of non-workers among males in the district is 49.2 percent while that of females is 76.4 percent as per 2001 census. The proportion of non-workers is the highest (73.8%) in Bettiah C.D.Block and the lowest (56.3%) in Thakrahan C.D.Block.

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. The above table 33 shows that work participation rates (WPR) that have been recorded as 28.3 percent for total urban population, for main workers it is 23.6 percent and for marginal workers it is 4.6 percent. The proportion of non-workers in the towns of the district has been recorded as 71.7 percent. The proportions of male and female main workers are 39.5 percent and 5.7 percent, respectively. The proportion of marginal workers among males is 5.4 percent and that of for females is 3.8 percent. The proportions of males and females non-workers are 55.1 percent and 90.5 percent, respectively.

Note: Percentage of Workers to total workers are given in brackets

From the above table 34 the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four classification namely, cultivators, agricultural labourers, household industry workers and other workers. The economic activity in the rural and urban areas in the district is primarily dependent on agriculture, which is supported by the fact that the cultivators (21.4%) and agricultural laborers (62.3%) together constitute 83.7 percent of the total workers of the district. The agricultural sectors have absorbed more than three fourth of the total main workers.

The proportion of cultivators varies between 47.1 percent for Thakrahan C.D. Block to 7.1 percent for Bettiah C.D. Block. Proportion of agricultural labourers varies between 72.3 percent in Sidhaw, C.D. Block to 22.0 percent in Bettiah C.D. Block. The proportion of household industry workers is only 2.6 percent of the total workers of the district. Proportion of household industry workers varies between 5.2 percent in Bettiah C.D.Block to 0.8 percent in Thakrahan C.D. Block. The proportion of other workers is 13.7 percent of the total workers of the district. Proportion of other workers varies between 65.7 percent in Bettiah C.D. Block to 1.8 percent in Thakrahan C.D. Block.

Note: Percentage of workers to total workers are given in brackets

The economic activity in the rural areas of the district is primarily dependent on agriculture, which is supported by the fact that the cultivators (22.4%) and agricultural labourers (65.4%) together constitute 87.8 percent of the total workers of the district. The agricultural sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 47.1 percent for Thakrahan C,D. Block to 14.0 percent in Bettiah C.D. Block. Proportion of agricultural labourers varies between 72.3 percent for Sidhaw C .D. Block to 47.5 percent for Bettiah C. D. Block. The proportion of Household industry workers is only 2.4 percent of the total rural workers of the district. Proportion of household industry workers varies between 3.5 percent for Bettiah C.D.Block to 0.8 percent for Thakrahan C.D. Block. The proportion of other workers is 9.8 percent of the total rural workers of the district. Proportion of other workers varies between 35.1 percent for Bettiah C.D.Block to 1.8 percent for Thakrahan C.D. Block.

Note: Percentage of Workers to total workers are given in brackets

From the above table it is apparent that the cultivators constitute 8.1 percent and agricultural labourers constitute 24.5 percent of the total urban workers of urban areas of the district. The proportions of male and female cultivators are 8.4 and 6.3 percent respectively. The proportions of male and female agricultural labourers are 19.7 and 50.4 percent respectively. Household industry workers constitute 5.5 percent of the total workers of urban areas. The proportion of household industry workers among males is 4.5 percent and that of females is 10.9 percent. Other workers constitute 61.9 percent of the total workers of total urban areas, the proportion of male and female other workers are 67.4 and 32.4 percent respectively.

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial no.	Name of C. D. Block	Number of inhabited villages	Types of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communi cations $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12	13
District Total:		**1355 (100)**	**1054 (77.8)**	**266 (19.6)**	**1345 (99.3)**	**249 (18.4)**	**161 (11.9)**	**162 (12.0)**	**93 (6.9)**	**144 (10.6)**	**454 (33.5)**	**344 (25.4)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table gives the distribution of villages according to the availability of different amenities in the district.

Educational Facility

There are as many as 1054 villages accounting for 77.8 percent of the total number of inhabited villages (1355) in the district where educational facility is available. Piprasi and Bettiah C.D.Block have the highest proportions (100.0% each) of villages with educational facility closely followed by Sikta C.D.Block with 94.8 percent. The lowest proportion of villages with educational facility is observed in Bhitaha C.D.Block with only 55.0 percent.

Medical Facility-

The availability of medical amenity in the villages is quite low and only 19.6 percent villages have it. Among the C.D.Blocks Piprasi has the cent percent proportion of villages with medical facility, the percentage being 100.0 percent. On the other hand Narkatiaganj C.D.Block has the minimum proportion of villages (8.2%) where medical amenity is available.

Improved drinking water

There are as many as 1345 villages accounting for 99.3 percent of the total inhabited villages in the district where improved drinking water facility is available. Among the C.D.Blocks Sidhaw, Bagaha, Piprasi, Bhitaha, Thakrahan, Jogapatti, Chanpatia, Sikta, Majhaulia, Bettiah, Bairia and Nautan have 100.0 percent proportion of villages where improved drinking water facility is available. Madhubani C.D.Block on the other hand has the minimum proportion of villages (94.1%) where improved drinking water facility is available.

Post office

Postal facilities are available only in 249 villages out of 1355 inhabited villages (18.4%)in the district. Piprasi C.D.Block has the maximum number of villages having postal facility (100.0%) followed by Majhaulia, Madhubani C.D. Blocks with 37.8 and 35.3 percent. Gaunaha C.D.Block has the minimum number of villages having postal facility (11.8%). Lauriya, Madhubani, Bhitaha, Thakrahan, Chanpatia, Sikta, Majhauli, Bettiah, Bairia and Nautan C.D.Blocks are higher than the corresponding figures of Paschim Champaran district.

Telephone

The availability of telephone facility in the villages is quite low and only 11.9 percent villages have it. Among the C.D.Blocks, Bettiah has the maximum number of villages having telephone facility (46.7%) followed by Madhubani C.D.Block with 35.3 percent while the villages of Pipasi, Bhitaha and Thakrahan C.D.Blocks still do not have telephone facility.

Transport & Communication

Transport & communication facility is available only in 162 villages out 1355 inhabited villges (12.0%) in the district. Majority of villages still do not have this facility. Bettiah C.D.Block has the highest proportion of villages (66.7%) which are connected by bus or rail or navigable river\canal service etc. The villages of Pipriasi C.D.Blocks do not have any transport & communication facility.

Bank

Banking facility is available only in 93 villges out of 1355 inhabited villages (6.9%) in the district. Among the C.D.Blocks, Madhubani has the maximum number of villages having banking facility (23.5%) followed be Nautan and Majhaulia C.D. Blocks with 13.6 and 12.2 percent respectively while the villages of Piprasi and Bhitaha C.D.Blocks still do not have Bank facility.

Agricultural credit societies

Agricultural credit societies are available only in 144 villages out of 1355 inhabited villages (10.6%) in the district. Lauriya C.D.Block has the maximum number of villages having agricultural credit facilities (23.1%) while Piprasi, Madhubani, Bhitaha and Thakrahan C.D.Blocks still do not have any Agricultural credit society.

Approach by Pucca road

This facility is available in 454 villages out of 1355 inhabited villages (33.5%) in the district. Among C.D.Blocks, Bettiah has maximum proportion of inhabited villages having pucca approach road with 80.0 percent while the Piprasi, Bhitaha and Thakrahan C.D.Blocks do not have any approach by pucca road.

Power supply

Electrified villages in the district constitute as low as 25.4 percent of the total number of inhabited villages. Among the C.D.Blocks Bettiah has the maximum number of electrified villages with 100.0 percent while the villages of Mainatanr, Piprasi, Madhubani, Bhitaha, Thakrahan C.D.Blocks still do not have any power supply facility.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from Table 38 that educational facility is available to 93.4 percent of the rural population of the district. The proportion varies between the maximum of 100.0 percent in Piprasi and Bettiah C.D.Blocks to the minimum of 83.1 percent in Bhitaha C.D.Block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 77.8 percent vide table 37) than the proportion of population, which is as high as 93.4 percent. This may be attributed to the fact that villages that possess, educational facility usually contain larger population as compared to these villages, which do not have this facility at all.

In the case of medical facility, it can be seen that Piprasi C.D. Block has the highest proportion (100.0%) of rural population served by this facility whereas Narkatiaganj C.D. Block has the lowest proportion (8.2%) of rural population served by this facility. It is interest to role that the proportion of population (38.5 %) is more than the proportion of villages served by medical facilities in the district. Out of 18 C.D. Blocks of the district rural population of 14 C.D. Blocks have cent percent access to improved drinking water while over 96.0 percent rural population of 4 C.D. Blocks have access to this facility.

Thakrahan C.D. Block is on the forefront where 93.8 percent of its rural population has access to any post office. Only 22.9 percent of the rural population is being served with telephone facility while 15.7 percent have access to banking facility.

Similar trend can be observed in respect of other amenities also both in the district as also in its various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	286	13	16	315
(b) Middle School	823	175	96	1094
(c) Degree College	107	159	1084	1350
2. Medical:-				
(a) Hospital	225	276	835	1336
(b) PHC	342	349	610	1301
3. Post Office	857	168	82	1107
4. Telephone	412	280	502	1194
5. Bus Service	451	337	451	1239
6. Banks				
(a) Commercial Bank	547	390	330	1267
(b) Cooperative Bank	210	340	792	1342
7. Agricultural Credit Societies	443	228	540	1211

As regards educational facility it would be seen that there are 315 villages in the district (23.2%) where primary school facility is available at places situated within 5 kms. for 286 villages and only 13 villages within the range of 5-10 kms. 16 villages are such where this facility is available at a distance of 10 or more than 10 kms. There are as manly as 1094 villages in the district (80.7%) which do not have middle school but the facility is available at places situated within 5kms for 823 villages, for 175 villages within the range of 5-10 kms and for 96 villages in the range of 10+kms. it is interesting to observe that 1350 (99.6%) inhabited villages of the district are depreived of college but the facility is available at places situated within 5 kms for 107 villages, 159 villages within the range of 5-10 kms and 1084 villages in the range of 10+kms,

There are 1336 villages in the district (98.6%) which are without the facility of hospital and as many as 835 villages enjoy this facility at a distance range 10+kms. The number of villages enjoying this facility at a distance range of 5-10 kms is 276 whereas the same is available at a distance of less than 5 kms for 225 villages, there are 1301villages in the district (96.0%) which do not have primary health centre. More than 90 percent of villages in the district are deprived of banking facility.

Similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

	(100.0)	**(77.8)**	**(19.6)**	**(18.4)**	**(11.9)**	**(12.0)**	**(6.9)**	**(10.6)**	**(33.5)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table that maximum number of inhabited villages (60.8%) lie in the distance range of 16 to 50 kms. from the nearest statutory town. Villages in the distance range of 5 to 15 kms follow this with 34.8 percent. Only 12 (0.8%) villages lie in the distance range of more than 51 kms

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 83.0 percent for those situated within 5kms from the nearest town and decreases to 79.7 percent in the distance range of 5 to15 kms. It again decreases to 76.7 percent in the distance range of 16 to 50kms. from the nearest town. The villages situated at the distance range of 16-50 kms and 5-15 kms from the nearest town are found to be higher in proportion enjoying all other kinds of amenities and facilities.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12

District total	**1355**	**1054**	**266**	**1345**	**249**	**161**	**162**	**93**	**144**	**454**	**344**
	(100.0)	**(77.8)**	**(19.6)**	**(99.3)**	**(18.4)**	**(11.9)**	**(12.0)**	**(6.9)**	**(10.6)**	**(33.5)**	**(25.4)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the Table 41 that the maximum number of villages i.e.420 (31.0%) in the district fall in the population range of 1000-1999 followed by 320 villages (23.6%) in the population range of 2000-4999. The lowest number of villages is observed in the population range of 10,000+ being only 21.

The proportion of villages having different amenities varies in direct relation to their population range, generally, the maximum percentage of villages having different amenities have a population range of 5000-9999 and 10,000+ which further indicates that generally more amenities are available in larger villages than in smaller ones.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Sidhaw	158	55,635	63.1	69.2
2	Ramnagar	126	30,936	70.6	38.1
3	Gaunaha	153	29,745	65.7	37.0
4	Mainatanr	94	23,004	73.9	51.6
5	Narkatiaganj	147	31,970	86.1	67.9
6	Lauriya	91	20,106	76.4	61.6
7	Bagaha	121	32,724	84.5	67.2
8	Piprasi	3	16,022	44.6	15.0
9	Madhubani	17	12,109	56.7	24.0
10	Bhitaha	20	13,000	63.4	20.5
11	Thakrahan	10	13,498	44.7	17.6
12	Jogapatti	101	21,659	78.2	38.2
13	Chanpatia	71	25,031	88.9	77.7
14	Sikta	58	19,383	89.3	73.6
15	Majhaulia	74	28,537	77.2	63.2
16	Bettiah	15	5,083	74.4	37.4
17	Bairia	52	23,052	68.1	43.5
18	Nautan	44	18,499	67	44.9
	District Total	**1,355**	**419,993**	**72.1**	**54.5**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 above gives the percentage of cultivable area as also, the proportion of irrigated area to total cultivable area in the district and its various C.D.Blocks.

It would be seen from the table that 72.1 percent of the total area of the district is utilized for cultivation (cultivable area) and of this only 54.5 percent area is found to be irrigatged. Among the C.D.Blocks the highest percentage of cultivable area is found in Sikta C.D.Block with 89.3 percent. The lowest cultivable area is found in Piprasi C.D.Block, which is 44.6 percent.

The highest proportion of irrigated area to total cultivable area is found in Chanpatia C.D. Block with 77.7 percent. The least proportion of irrigated area is found in Piprasi C.D.Block with 15.0 percent. Which indicates that the villages in this Block are deprived of required irrigational facilities.

TABLE 43: PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Bettiah (M)	1.2	1.1	0.1	0	0	0	0	0	0
2	II Bagaha (M)	0.5	0	0.5	0.5	0.5	0	0	0	0
3	III Chanpatia (NA)	2.9	0.1	2.9	2.8	1.8	0.1	0.8	0	0.2
4	III Narkatiaganj (NA)	3.7	0.4	3.3	2.6	1.1	0	0.7	0	0.7
5	III Ramnagar (NA)	1.5	0.2	1.3	1.3	0.4	0.2	0.6	0	0
	District Total	**1.5**	**0.5**	**1**	**0.9**	**0.5**	**0**	**0.2**	**0**	**0.1**

The per capita receipt by the statutory towns of the district amounts Rs. 1.5. Of this Rs. 0.5 is being received through taxes and remaining Rs. 1.0 from all other sources. Narkatiaganj (NA) achieved the highest per capita receipt of Rs. 3.7. Bagaha (M) with Rs. 0.5 has recorded the lowest per capita receipt.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bagaha (M)	2.5	0.9	0.4	0	0.3
2	Bettiah (M)	2.1	1.3	0.5	0.1	0.4
3	Chanpatia (NA)	3.2	0.9	0.9	0	0
4	Narkatiaganj (NA)	3.9	0.7	0.7	0.2	0.7
5	Ramnagar (NA)	1.8	1	0.8	0	0.3
	District Total	**2.5**	**1.0**	**0.6**	**0.1**	**0.4**

The above Table 44 gives the details of different categories of educational institution per ten thousands population in the towns of the district. It would be seen from the table that institution like secondary / Matriculation level school and college are situated in urban areas accounting for an average of 0.6 and 0.4 institutions per ten thousand population respectively. Primary schools and Middle schools accounts for an average of 2.5 and 1.0, respectively per ten thousand populations in urban areas of the district.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bagaha(M)	4
2	Bettiah(M)	25
3	Chanpatia(NA)	3
4	Narkatiaganj(NA)	3
5	Ramnagar(NA)	2
	District Total	**11**

The above table furnishes information regarding availability of beds in medical institutions in five towns i.e. Bagaha (M), Bettiah (M), Chanpatia (NA), Narkatiaganj (NA) and Ramnagar (NA)

The number of beds in medical institutions per ten thousand population for Bagaha (M), Bettiah (M), Chanpatia (NA), Narkatiaganj (NA) and Ramnagar (NA) works out to be 4, 25, 3, 3 and 2, respectively. Bettiah (M) has the highest number of beds (25) in medical institutions per ten thousand population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Bagaha	91,467	5,688	6.2
2	Bettiah	116,670	17,555	15.0
3	Chanpatia	22,038	3,750	17.0
4	Narkatiaganj	40,830	21,400	52.4
5	Ramnagar	38,554	2,200	5.7
	District Total	**309,559**	**50,593**	**16.3**

16.3 percent of urban population in five towns of the distict lives in slums. At the town level it varies from 52.4 percent in Narkatiaganj (NA) to a lowest of 5.7 percent in Ramnagar (NA)

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bagaha (M)	Sugar	Sugar
		Gur	Rice
		Rice	Leather
2	Bettiah (M)	Bamboo Basket	Gur
		Gur	Chira
		Chira	Bamboo Basket
3	Chanpatia (NA)	Biri	Chira
		Gur	Leathar
		Rice	Pulse
4	Narkatiaganj (NA)	Sugar	Sugar
		Spirit	Spirit
		Rice	Rice
5	Ramnagar (NA)	Sugar	Sugar
		Wood Board	Rice
		Gur	Wood

Most important commodity of the district is Sugar which is manufactured in Bagaha(M), Ramnagar(NA) and Narkatiaganj(NA). Other commodities being manufactured in various towns of the district are Rice, Gur, Bamboo Basket and Chira.

Similarly, most important commodity exported from the towns of the district is Sugar. Apart from this Rice, Pulse, Leather and Bamboo Baskets are the other main commodity being exported from the district.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 shows households by tenure status ad number of rooms occupied in the district in 2001 census. Out of 527,599 households of the district, 515,209 (97.7%) are living in their own houses whereas only 7,953 (1.5%) have rented houses. In the owned category, the median number of rooms a household possess is 2 while in case of rented it is also 2. As regards rural areas of the district, 98.9 percent of the households are living in their owned dwellings rooms where as in urban areas this percentage is 86.0. The median number of rooms in owned, rented and other categories are same for total, rural and urban areas of the district. The household belonging to Scheduled Castes has higher percentage (98.6) having owned dwellings as compared to Scheduled Tribes households (97.5). As regards median number of rooms, it is evident from the Table Scheduled Tribes has an edge over Scheduled Castes.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial no.	District/ C.D. Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets' bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo, hatch, mud, unburnt bricks, wood etc.are used for roofs.

It would be seen from the above table that of the total rural households i.e.54.6 percent lives in temporary houses followed by 28.6 percent living in permanent houses and 16.8 percent living in semi permanent houses.

In case of urban households in the district, the maximum proportion of households i.e. for 59.8 percent lives in permanent houses and 13.8 percent lives in semi permanent houses.

Among the C.D.Blocks in the district, Bhitaha C.D.Block has the maximum proportion of rural households living in temporary houses (94.2%) followed by Piprasi, Madhubabni, Thakrahan, Bairia, Nautan, Bagaha with 92.1, 90.3, 86.5,75.5, 64.8 and 60.9 percent respectively. Bettiah C.D.Block has the minimum proportion of rural households living in temporary houses with 33.0 percent. In case of permanent houses, Bettiah C.D.Block has the maximum proportion of rural households living in permanent houses (55.4%). Bhitaha C.D. Block has minimum proportion of households living in permanent houses with 4.9 percent.

Among the various C.D. Blocks of the district, Bettiah C.D. Block has the maximum proportion of urban households living in permanent houses (73.9%) whereas Ramnagar and Bagaha C.D. Blocks have maximum proportion of urban households living in semi-permanent (20.9%) and temporary houses (53.3%) respectively.

Note: Percentage is to be given in brackets after the number of household.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

The above table shows that of the total rural households 425,702 (i.e.89.3%) have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Nautan C.D.Block with 93.5 percent whereas it is lowest in Gaunaha C.D.Block with 84.2 percent.

As regards electricity, it is found that only 3.0 percent of the rural households in the dstrict have electricity. The highest is in Bettiah C.D.Block with 24.0 percent whereas it is lowest in Mainatanr and Madhubani C.D.Blocks with 0.1 percent.

Only 4.9 percent of the total rural households in the district have bathroom facility . The highest proportion of households having bathroom facility is observed in Bettiah C.D.Block with 13.8 percent whereas it is lowest in Pipriasi C.D.Block with 0.7 percent.

Only 7.4 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet is in Bettiah C.D.Block with 19.2 percent whereas it is lowest in Thakrahan C.D Block with 1.2 percent.

Only 23.0 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Bettiah C.D.Block with 33.6 percent whereas it is lowest in Madhubani C.D.Block with 8.1 percent

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 51 above shows that 50.9 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Gaunaha C.D.Block (74.0%) whereas it is lowest in Bagaha C.D.Block with 32.3 percent.

35.4 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D.Blocks, highest proportion of households using crop residue as fuel for cooking is 54.7 percent in Piprasi C.D.Block whereas it is lowest (14.1%) in Gaunaha C.D.Block.

12.5 percent of rural households in the district use cow dung cake as fuel for cooking. Among the C.D.Block the proportion of households using cowdung cake as fuel for cooking is the highest in Mainatanr C.D. Block with 25.6 percent whereas it is lowest (2.3%) in Piprasi C.D. Block.

In the case of cooking gas (L.P.G) there are only 11,908 households accounting for 2.3 percent of the total households in the district using it for cooking. As regards kerosene there are only 4,123 households accounting for 0.8 percent of the total households in the district using it for cooking. Similar trend can be observed in respect of other types of fuel.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

Banking services: Only 12.9 percent of the total household's (527,599) are availing banking sevices. At C.D. Block level, the highest number of households (9,478) availing this facility has been recorded in Bettiah C.D.Block, while the lowest (557) has been found in Bhitaha C.D.Block.

Radio/Transistor: Of the total households (527,599) of the district, 23.0 are in possession of Radio/Transistor. Similarly in rural and urban areas of the district, the percentage of household having radio or transistor is 22.2 and 30.6 percent respectively.

Television: Only 6.5 percent of the total households are possessing television. It is much higher i.e. 28.0 percent in urban areas than that of rural areas (4.2%).

(viii) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Bairati

It is a village situated in Sidhaw Block and tradition avers that during their period of exil, the Pandavas stayed here for sometime before proceeding to Biratnagar. The village has a devisthan ascribed to Yudishthira, the eldest of the Pandavas.

Banwaria

The village, situated 9 Kms. north of Narkatiganj, is noted for its Shiva temple scenically situated between two tanks. Pilgrims congregate especially in the month of Phalgum and Baisakh every year. The fiars held on these occasions are known for the large variety of wooden furniture and fixtures put on sale.

Bhaisalotan (Balmikinagar)

A village lying in Sidhaw Block, it is situated on the Indo-Nepal border 42 Kms. north-west of Bagaha to which it is connected by a metalled road. A barrage has been constructed here on the Gandak river for the purpose of irrigation which is known as Tirhut Canal. An annual fair is held on the occasion of Maghi Amavashya. Besides a Shiva temple constructed by the Bettiah Raj, there are also ancient temples of Nara-Devi and Gauri Shankar.

Bhiknathori

The village is situated on the northern border of the district is Gaunaha Block and located on the Someshwar hill at a height of about 600 feet above the sea level. It has come up as an important tourist centre in the district having a youth hostel also.

Bhitarwa

The village is situated in Gaunaha Block. It is noted as the centre from which Mahatma Gandhi launched his campaign against the tyrannical indigo-plantres. The village has a pucca buildings where Gandhiji stayed and which now houses the Gandhi Ashram.

Brindaban

It is a small village lying in Chanpatia Block and is famous since Gandhiji stayed here in 1939 and started an Ashram which is still functioning.

Chanki

Village Chanki, also known as Janakigarh, is situated about 9 Kms. east of Ramgnagar railway station. There is a large mound in the eastern part of the village. It is a mass of solid brick-work and is 90' high. It was probably originally a fort, and the remains of the fortification can still be seen, besides some insignificant shrines. The local tradition assert that it was a fort of king Janaka. Another tradition says that a Buddhist king, whose palace was at Lauriya Nandangarh, had a favourite priest, named Tantrik, for whom he built this fort.

Lauriya Nandangarh

A Vilalge, situated about 35 Kms. north-west of Bettiah, contains some of the most interesting remains in the district, viz., the Lion Pillar of Ashoka and some ancient sepulchral mounds.

Madanpur

A village in Bagaha Block situated on the bank of Gandak is said to have formerly the place of king. A small footpath leads to a shrine in the midst of the jungle where an old saint used to live. It is believed that he never left his jungle retreat but waited patiently for the villagers to bring him food.

Ramnagar

It is the headquarters of the Block of the same name situated 43 Kms. north of Bettiah town. It has a sugar factory and rice-mills and the administrative office of the Triveni canal scheme is also located here. There is a Shiva temple constructed about 100 years ago by the Raja of Ramnagar, which draws large crowds to the annual fair held on the occasion of Shivaratri.

Sarayaman Lake

It is a beauty spot, 6 Kms. west of Bettiah town, which attracts large varieties of birds. The lake water is medicinal value of alimentary disorders.

Someshwar Fort

The fort stands on the summit of the Someshwar hill (in Ramnagar Block) on the Indo-Nepal border. The fort is now in ruins. The ridge which contains the fort affords a magnificent view of the surroundings.

(ix) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of

urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below:

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows:

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste: This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation: This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory:

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. Block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city

with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as ‘Yes’ or ‘No’. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km. upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows:

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7: Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9: Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given:

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes:

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16: Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes:

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18: Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE

(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

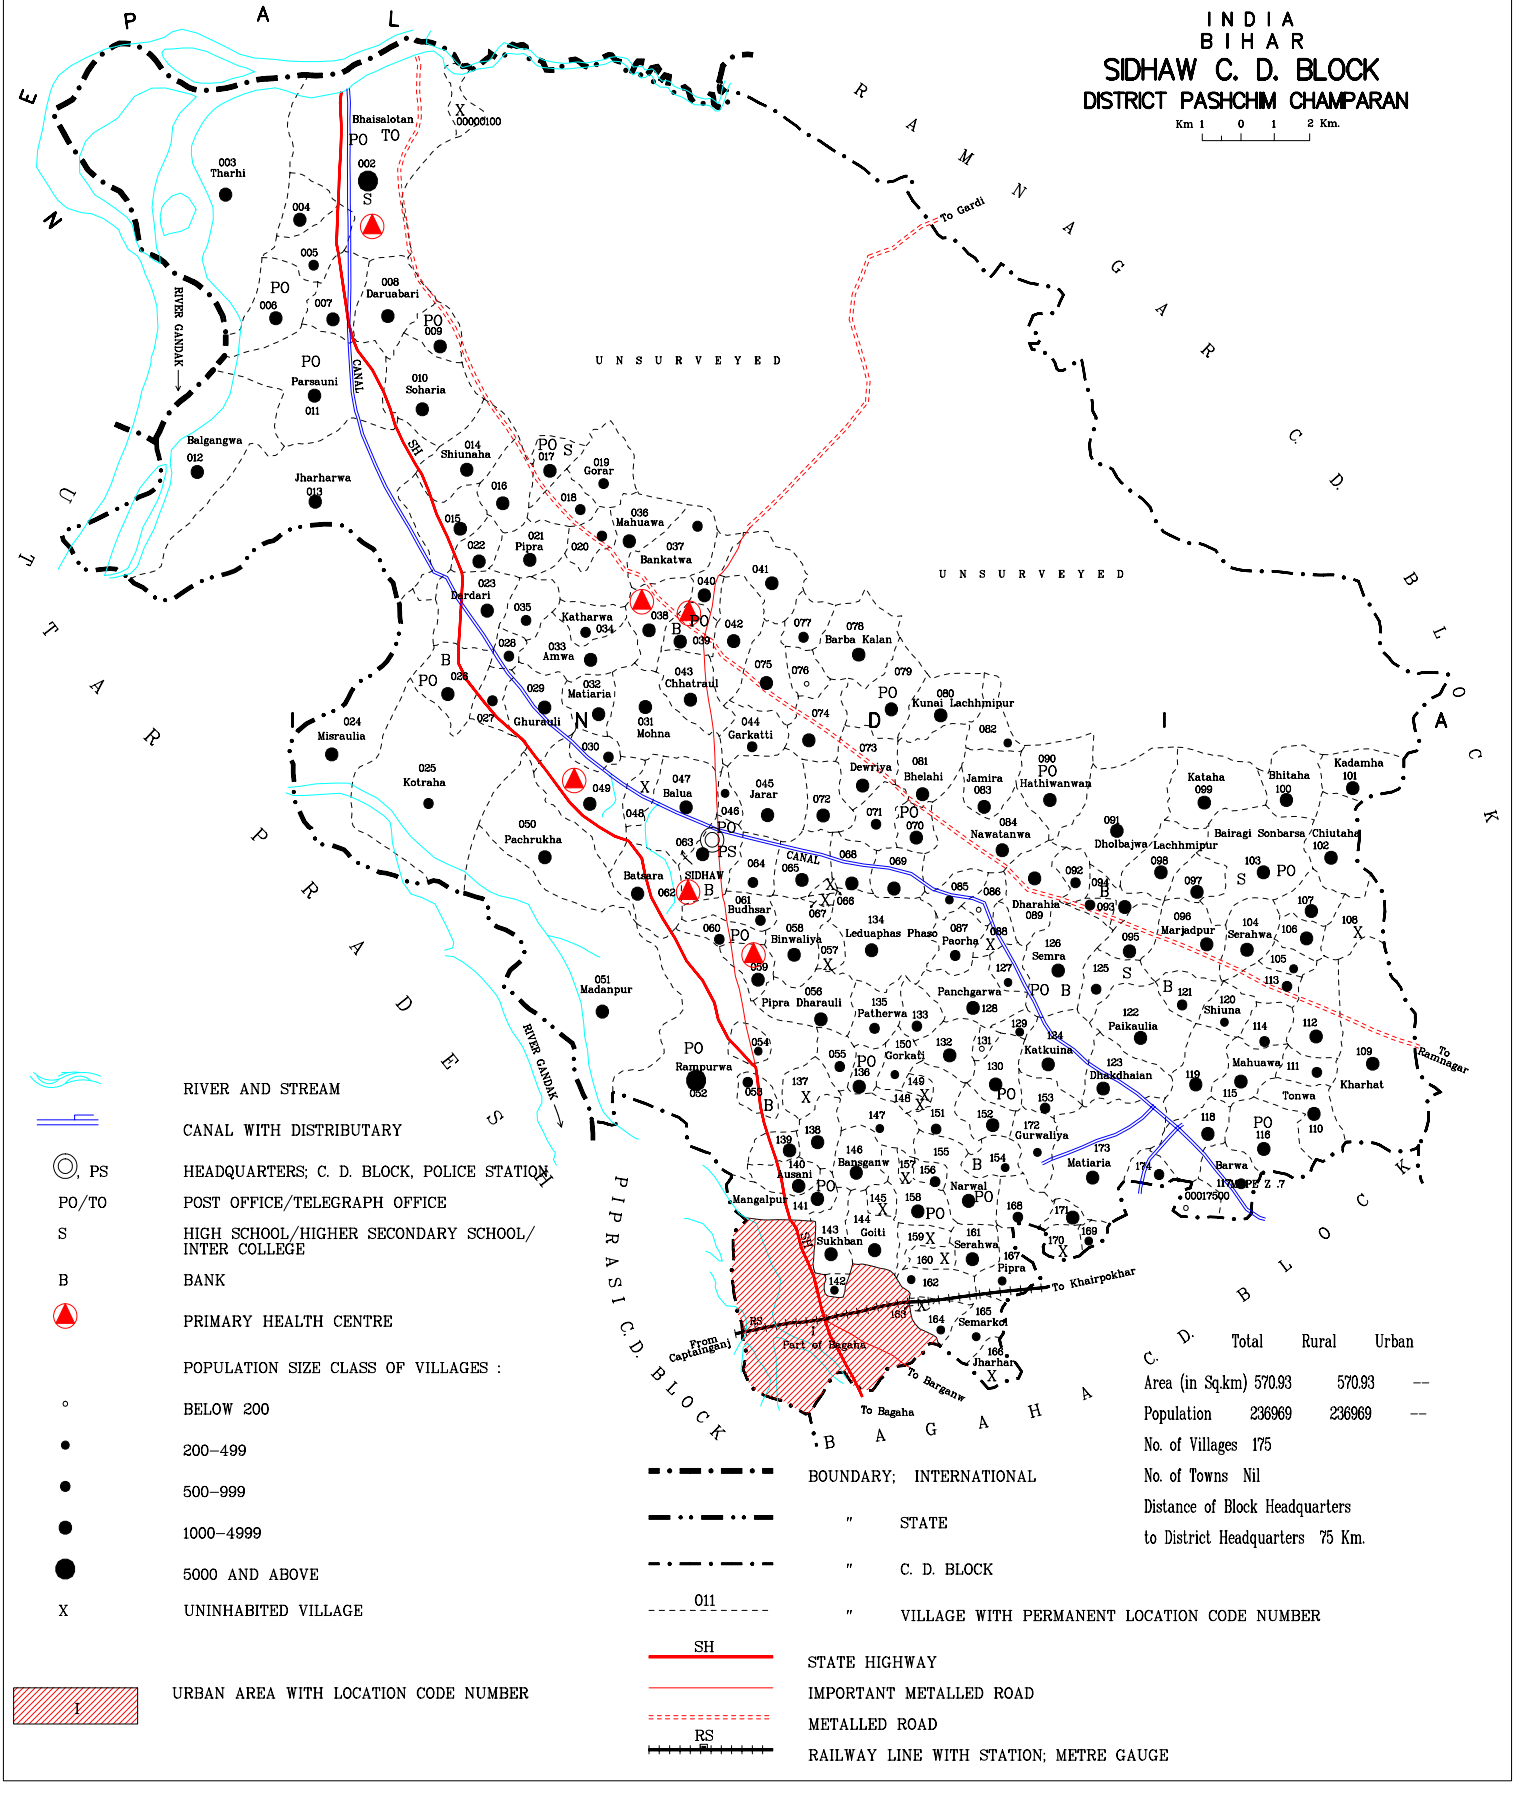

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat (C.D. Block wise)

Appendix IX : Statement showing number of girls schools in the villages

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO

(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP

(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries.

Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matri-culation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT
STATUS AND

Serial number	Class, name and civic status of town	Location code number	Name of District/ Tahsil/ Police Station/Island etc.	Name of C.D. Block	Area (in sq. km.)	Number of households incl. houseless households (2001 Census)	Population and growth

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of

Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/C.D. Block / UA / City / Town
2. Primary Census Abstract for Scheduled Castes	District/C.D. Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/C.D. Block/Town
4. Village Primary Census Abstract	CD Block/Village wise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II
ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

State/District	Year	Persons			
		q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
PashchimChamparan	1991	65	84	90	101
	1981	81	121	134	154

Information on the question on children ever born and children surviving canvassed for all ever married women during 1991 census has been compiled by age of the mother. Estimates of child mortality thus worked out are presented in Annexure–II.

From the estimates of child mortality (number of deaths by ages 1, 2, 3 and 5) given in Annexure – II as q(1), q(2), q(3) and q(5), it is observed that there has been a decline in child mortality over the decade (in 1991 census as compared to 1981 census) both in the district as well as in the state. An interesting feature which can be noticed from the annexure is that the child mortality at the ages 2, 3 and 5 was either higher or same in the district as compared to the state average both in 1991 and 1981 but it was lower in the district during the same years for q(1). It indicates that pace of decline in child mortality has been faster in the other districts of the state vis-à-vis Pashchim Champaran at least for the ages q(2), q(3) and q(5).

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the district and the State(1991-Census)	
	State	District
1	2	3
CBR	36.2	35.8
TFR	5.3	5.3
TMFR	5.9	5.8
GFR	163	163.0
GMFR	186	177.0
Child woman ratio	66.6	67.1
No. of children ever Born per woman age Group (45-49)	4.1	4.2
Mean age at marriage	16.5	16.3

Annexure III presents some fertility measures for Pashchim Champaran district and the state of Bihar. It can be observed from the data that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), total marital fertility rate (TMFR), general fertility rates (GFR), and number of GMFR children ever born per woman in age group 45-49 of the district Paschim Champaran are lower than these measures of the state, But child woman ratio and mean age at marriage of the district is higher as compare to the state of Bihar.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

State/District	Born elsewhere in the district of enumeration			Born in other districts of Bihar			Born in Bihar

Note:-Total migrants exclude persons whose birth place is unclassifiable**.**

The growth of population in any area (be it any district, or state) is influenced due to effect of migration (in migration as well as out migration). However, for want of data on out-migration from district or state to other district or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on the growth of population, although such impact may not be much in most of the cases.

The percentage distribution of migrants by place of birth according to 1991 census is furnished in Annexure IV(A).

Migrants by place of birth are 213.07 lakhs in Bihar state as a whole comprising 23.43 lakh males and 189.64 lakh females. These migrants constitute 24.7 percent of the total population of the state according to 1991 census. The proportion of male and female migrants is approximately 5 percent and 46 percent respectively.

Migrants by place of birth are 199.89 lakhs in Bihar state as a whole comprising 21.02 lakh males and 178.86 lakh females. These migrants constitute 24.1 percent of the total population of the state according to 2001 census. The proportion of male and female migrants is approximately 4.9 percent and 45.9 percent respectively.

In Pashchim Champaran district, total migrants by place of birth are 6.10 lakh of which male migrants are 0.45 lakh while female migrants are 5.65 lakh. The migrants in Pashchim Champaran district comprise 26.1 percent of total population of the district in 1991 census. Male and female migrants account for 3.6 percent and 51.8 Percent respectively of the total population.

In Pashchim Champaran district, total migrants by place of birth are 7.55 lakh of which male migrants are 0.82 lakh while female migrants are 6.72 lakh. The migrants in Pashchim Champaran district comprise 24.8 percent of total population of the district in 2001 census. Male and female migrants account for 5.2 percent and 46.6 Percent respectively of the total population.

From the distribution of total migrants in Bihar by place of birth it can be clearly seen that females predominate in intra-district migration, while males predominate in inter district, inter state and international migration. Almost similar trend is noticed in Pashchim Champaran district also.

This probably indicates that migration of females from their place of birth is generally attributed to the prevailing custom of the girls moving away on marriage from their place of birth and in majority of the cases this movement is from within the same district. i.e. the district of enumeration. Migrants born outside India also have lower proportion of females than males but proportion of such migrants by place of birth is higher in the district than in the state as a whole. This is true for both the censuses.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Pashchim Champaran		
		Total	Rural	Urban	Total	Rural	Urban

		(94.7)	(82.6)	(12.2)	(94.3)	(85.3)	(9.1)
	Urban	990,737	375,267	615,470	18,920	9,730	9,190
		(4.9)	(1.9)	(3.1)	(3.4)	(1.8)	(1.7)
(2) In other states of India	Total	1,049,969	575,484	474,485	46,630	41,490	5,140
		(100.0)	(54.8)	(45.2)	(100.0)	(89.0)	(11.0)
	Rural	800,601	512,444	288,157	41,300	37,950	3,350
		(76.2)	(48.8)	(27.4)	(88.6)	(81.4)	(7.2)
	Urban	243,448	60,040	183,408	4,830	3,060	1,770
		(23.2)	(5.7)	(17.5)	(10.4)	(6.6)	(3.8)

The flow of migrants generally consist of four streams viz- rural to rural, rural to urban, urban to urban and urban to rural. The rural and urban composition of internal migrants by place of birth is presented in Annexure IV(B).

The total intra-state migrants in the state i.e. 82.6 percent were rural to rural, 3.1 percent were from urban to urban, 12.2 percent were from rural to urban and 1.9 percent from urban to rural.

In case of Pashchim Champaran district, of the intra-state migrants, 85.3 percent were from rural to rural, 1.7 percent were from urban to urban, 9.1 percent were from rural to urban and 1.8 percent from urban to rural.

In case of migrants from other states, 48.8 percent were from rural to rural, 17.5 percent were from urban to urban, 27.4 percent were from rural to urban and 5.7 percent were from urban to rural for the state of Bihar. In case of Pashchim Champaran district, on the other hand, of the such migrants, 81.4 percent were from rural to rural, 3.8 percent were from urban to urban, 7.2 percent were from rural to urban and 6.6 percent from urban to rural.

Jammu & Kashmir	43,737	2.8	Other states	2,973	2.5
Orissa	42,215	2.7	**Total**	**118,010**	**100.0**
Maharashtra	38,244	2.4			
Rajasthan	20,542	1.3			
Haryana	20,505	1.3			
Andhra Pradesh	18,371	1.2			
Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

The number of migrants in the state who were born in other states of India according to 1991 census was 10.5 lakhs, while in the district of Pashchim Champaran the corresponding figure was 46,630 only as shall be evident from table IV(C).

It transpires from the above annexure that in case of Bihar in 1991 census, 9 states namely, Andhra Pradesh, Assam, Haryana, Madhya Pradesh, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal together add up to 9.80 lakhs accounting for 93.4 percent of total migrants to Bihar whereas in 2001 census, 14 states together add up to 15.38 lakhs accounting for 97.2 percent of total migrants to Bihar. In 1991 census West Bengal and Uttar Pradesh states are prominent among them contributing 39.9 and 30.7 percent of migrants respectively whereas during 2001 census States of Uttar Pradesh and Jharkhand are the major contributors with 27.4 and 21.4 percent respectively.

In respect of Pashchim Champaran district, of the total 46,630 inter-state migrants Uttar Pradesh, Madhya Pradesh and Rajasthan contributed 51.3, 23.1 and 16.5 percent respectively in 1991 census whereas during 2001 census Nagaland, Uttar Pradesh and Uttaranchal are the major contributors with 54.4 , 17.4 and 15.0 percent respectively.

The Indian census has always attempted to give a realistic and interesting picture of the religious persuasions of the people of the state while collecting information on religion at the time of census, the enumerators had clear instructions to record the religion as actually returned by respondents. Six religions have been treated as major religions as they are numerically prominent. These are Hindus, Muslims, Christians, Sikhs, Buddhists and Jains. Those not belonging to any of the religious communities have been classified under the category “other religions and persuasions” while those who did not state any religions, have been classified under the category “religion not stated”.

Annexure V(A) presents religionwise data of the state of Bihar and Pashchim Champaran district alongwith their percentage distribution according to 1991 and 2001 census. The religionwise data of the C.D. Blocks of Pashchim Champaran district has also been furnished in table V(B).

It may be observed that Hindus are by far the numerically most important religious community as it accounts for as much as 82.4 and 83.2 percent of the total population of Bihar state in 1991 and 2001 census respectively. The Muslims come next with 14.8 and 16.5 percent of the state population during 1991and 2001 census respectively. The percentages of Muslims in the district of Pashchim Champaran are 20.6 and 21.2 percent respectively during both the censuses, which are fairly higher than the sate’s average. The proportion of Christians is 1 percent in the state and 0.2 percent in the district during 1991 census whereas during 2001 census percentage of Christians is almost negligible. The proportions of Sikhs, Jains and Buddhists are either very low or nil both in the state of Bihar and district of Pashchim Champaran in both the censuses. The same situation prevails in most of the community Development Blocks of Pashchim Champaran district also.

ANNEXURE - VI (A)

Annexures VI(A) and VI(B), VI(C) and VI(D) placed above furnish relevant statistics on marital status of Bihar state and Pashchim Champaran district according to information collected during 1991 census along with percentage distribution by various age groups.

It is quite apparent from the Annexures above for both 1991 and 2001 censuses that Pashchim Champaran district as well as the state have a relatively higher proportion of "Never married" males and "Married" females.

As against 54.2 and 51.8 percentages of "Never married" males in 1991 and 56.3 and 54.7 percentages in 2001 in Bihar state and Pashchim Champaran district respectively' the corresponding proportion among females has been 45.2 and 43.4 in 1991 and 47.3 and 46.8 percentages in 2001 respectively. An interesting feature both in case of Pashchim Champaran district and in the state is that proportion of female widowed are about double than that of male widowed in both the censuses.

While analyzing marital status by broad age groups one finds that married females outnumber married males in the age group 10-14 suggesting that child marriage among females both in the state and the district during both the censuses have been more prevalent than in males.

It is also significant that the proportion of "Never married" females in the age-group 15-19 and above has been much lower than the "Never married" males in Pashchim Champaran district as well as in the state as a whole during both the censuses.

One of the important characteristics of the population on which information is collected in the census is literacy. Apart from collecting data on number of literates, the level, nature and type of

education attained by the literates are also ascertained. The concept of literacy adopted in the census has already been explained in the beginning of this publication.

A proper index to the extent of literacy is provided by the proportion of literates and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age group 0-6 years) at the time of 1991 and 2001 censuses were 38.5 and 47.0 percent respectively. Male literates greatly outnumbered female literates as the literacy rate for males according to 1991 and 2001 censuses were 52.5 and 59.7 percent respectively while for females it were only to the extent of 22.9 and 33.1 percent respectively.

The over all literacy rate for the district of Pashchim Champaran, according to 1991 census, was only 28.0 percent. Male literates in the district accounted for 39.6 percent while female literates constitute only 14.4 percent of the total population. According to 2001 Census, over all literacy rate for the district is 38.9 percent. Male literates in the district accounted for 51.1 percent while female literates constitute only 25.2 percent.

Annexure VII(A) and VII(B) furnish information regarding absolute number of illiterates and literates and educated persons in Bihar state and Pashchim Champaran district as also percentage distribution of literate persons by different level of education by different age groups.

A breakup of literate population by various educational level shows that 20.3 percent males and 27.2 percent females in the state in 1991 census whereas 28.4 percent males and 35.8 percent females in 2001 census are such who are literate but without attaining any educational level (including below primary in 2001 census). 21.6 percent and 26.2 percent males and females in the state, according to 1991 census, have crossed the primary or junior basic standard while according to 2001 census 24.9 and 30.6 percent males and females respectively have passed primary standard, 26.4 and 26.9 percent males and females have passed the middle examination in 1991 census and 14.6 and 13.2 percent males and females respectively have cleared middle standard in 2001 census while 31.7 and 19.7 percentages males and females respectively in 1991 census and 32.1 and 20.4 percent males and females in 2001 census, in the state are such who are matriculates and above, the contrast between males and females is significant among matriculates and above as the percentage of female literates who have passed the matriculation and above examination are 12 percentage points less than male literate population who have attained this level of education during both the censuses.

The position of literates by different level of education in Pashchim Champaran district according to 1991 and 2001 census is more or less the same as observed for Bihar sate as a whole. However percentages of literate without educational level and primary standards are higher in the district and lower in the state. On the other hand percentages of people having passed middle and

matriculation and above examinations are lower in the district and higher in the state. This holds good for both sexes in the district as well as in the state.

ANNEXURE – VIII

PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Pashchim Champaran		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3

Marwari	27,152	0.0	Arabic/Arbi	654	0.0
Total of Other Mother Tongues	12,842,100	15.5	Total of Other Mother Tongues	19,125	0.6
Total	**82,998,509**	**100.0**	**Total**	**3,043,466**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Till 1991 Census, the data on mother tongues were collected only out of the languages specified in schedule VIII of the Constitution of India, commonly known as scheduled languages. But during 2001 Census all languages including non-scheduled ones were recorded as mother tongue. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar state as well as for Pashchim Champaran district.

Amongst 10 major mother tongues in the state, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returned by only 17.5 percent while Magadhi/Magahi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population whereas in the district of Pashchim Champaran 10.4 percent of the district population have returned it as their mother tongue. Bhojpuri as mother tongue has been returned by 84.4 percent of Pashchim Champaran district's population. Hindi has got third position with 3.2 percent of the district population having returned it as their mother tongues. Except these languages analysed above both for the state and the district, other have been returned by insignificant proportions of the respective population of the state and the district as mother tongues as per Census 2001.
