VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

Sudhir Kumar Rakesh
of the Indian Administrative Service
Director of Census Operations, Bihar

Janaki Asthan

Popularly known as Janaki Asthan, the temple is of great religious importance where hundreds of Hindu devotees come everyday and perform puja. It is said that Raja Janak, the legendry King "Videha" excavated a tank at this place where Sita appeared to life from the earth. The legend is that a Hindu ascetic, named Birbal Das, came to know about this site by divine inspiration and commenced the worship of Janaki or Sita here about 500 years ago. Vivah Panchami is observed to celebrate the marriage of Rama and Sita every year on the fifth day of Shukla Paksha in the month of Agrahayan in the temple when devotees from far flung areas come to worship. The place is 1.5 kms. away from Sitamarhi railway station and Bus stand.

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Dated: 17.10.2006

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

District Highlights – 2001 Census

1. Sitamarhi ranks 12th in terms of population (26,82,720) and 22nd in terms of area (2,294 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Sitamarhi is the 9th densely populated district in the state with 1,169 persons per sq.km as against the state's 881.
3. Sitamarhi ranks 32nd in terms of sex-ratio (892) against the state's 919.
4. There are 33 uninhabited villages (out of 835 total villages) in the district of Sitamarhi.
5. Cheraut (under Charaut C.D. Block) is the most populated village (28,618) and Barhmotas (under Bokhara C.D. Block) is the least populated village (4) in the district.
6. The economy of the district mainly depends on cultivation related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Runisaidpur has the highest number of villages (102) in the district and C.D. Block Charaut has the lowest number of villages (17).
8. Cheraut (under Charaut C.D. Block) has the largest area (2,435 hectares) and Bharwar Nankar Rakbe (under Belsand C.D. Block) has the smallest area (2 hectares) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 98.8 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial Census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important Census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, Census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district Census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census

for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 Census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) mortality, (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 Census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/

Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The district of Sitamarhi, which till the 1971 Census was a part of Muzaffarpur district, was created and formally inaugurated on the 11th of December, 1972. The district is situated in the northern part of Tirhut Division and lies on the extreme north region of the state of Bihar. It is surrounded on the north by Nepal, on the east by the district of Darbhanga, on the west by the districts of Sheohar and Purba Champaran and on the south by the districts of Muzaffarpur and Darbhanga. It is spread breadth wise from north to south covering about 48 kms.

Before the reorganisation of the district came into effect, the old district of Muzaffarpur was divided into three subdivisions with their headquarters at Muzaffarpur, Hajipur and Sitamarhi. The subdivisional headquarters of Sitamarhi was located at Sitamarhi town until 1935. The town of Sitamarhi faced one of the worst natural calamities in the month of January in the year 1934 when it was rocked by the earthquake. The earthquake, which lasted for only one minute and a few seconds, had disastrous effects. Buildings were reduced to debries and fissures and depressions occurred all around. The roads of Sitamarhi were damaged extensively and the town was completely cut off for some time. Rail communication was dislocated and at places railway lines were twisted and they lost the original alignment. The topography changed considerably and the town of Sitamarhi was so badly damaged that at one time it was feared that it would have to be abandoned as unsafe for rebuilding purposes. As a sequel to this havoc and apprehension the sub-divisional headquarters and courts were shifted to Dumra in 1936, five kilometres away from Sitamarhi town. Since then the subdivisional headquarters has continued at Dumra and even after the upgradation of the subdivision to the status of a district the headquarters of the subdivision as well as the district are located at Dumra.

Sitamarhi is a sacred place in Hindu mythology. Tradition has it that Sita sprang to life out of an earthen pot while Raja Janak was driving his plough somewhere near Sitamarhi town. The tank, called the Janaki-kund, is still pointed out as the place out of which she is said to have emerged. But Punaura, a village about five kilometres to south-west of Sitamarhi town, also stakes its claim as the birth place of Sita. The town, however, contains no relics of any archaeological interest. The temple of Janaki, i.e., Sita the daughter of Raja Janak, is apparently modern and not more than 100 years old. It contains three stone figures with eyes of mother of pearl which represent Rama, Sita and Lakshman. The legend associated with the temple mentions, however, that it occupies an old site. It is said that Raja Janak excavated a tank at the place where Sita sprang to life and after her marriage set up the figures of Rama, Sita and Lakshman to mark the site. This tank is known as the Janaki-kund just to the south of the Janaki Mandir. In course of time, the land lapsed into a jungle until about 500 years ago, when a Hindu ascetic, named Birbal Das, came to know the site by divine inspiration where Sita was born. He came down from Ayodhya and cleared the jungle and found the images set up by Raja Janak. He built a temple over them and commenced the worship of Janaki or Sita. The income of the temple is mainly derived from the offerings by the pilgrims. In the same compound there are three other temples of Hanuman, Mahadeo and Ganesh which are quite modern. To the south of the main temple stands a mausoleum erected over the ashes of the first three Mahanth, Birbal Das and his two successors. The entire campus of these temples is popularly known as Janaki Asthan and is of great religious importance where hundreds of Hindu devotees come everyday and perform puja. Vivah Panchmi and Ram Navami, commemorating the marriage of Sita to Rama, and the birth of Ram respectively are celebrated at Sitamarhi with great éclat. Vivah Panchami is observed to celebrate the marriage anniversary of Rama and Sita every year on the fifth day of Shukla Paksha in the month of Agrahayan. On this occasion people, mainly ladies from far and wide throng at Janakpur and Sitamarhi. A cattle fair is also organised on this occasion. Ram Navami is observed to celebrate the birth anniversary of Rama considered to be an incarnation of Lord Vishnu. It is observed every year on the 9th day of Shukla Paksha in the month of Chaitra. On these two occasions the congregation is regaled with stories

about the adventures of Rama who had conquered Lanka and killed the demon king Ravana. Religious dramas and dances depicting episodes from Rama's life, known as Ramalila, are organised.

(iii) Administrative set up

Sitamarhi district forms the part of the North Bihar Plain and is located on the Indo-Nepal border. It is surrounded on the north by Nepal, on the east by the district of Darbhanga, on the west by the districts of Sheohar and Purba Champaran and on the south by the districts of Muzaffarpur and Darbhanga. There are altogether seventeen Community Development Blocks in the district namely Bargania, Suppi, Majorganj, Sonbarsa, Parihar, Bathnaha, Riga, Runisaidpur, Dumra, Sursand, Bajpatti, Charaut, Pupri, Nanpur, Bokhra, Parsauni and Belsand. The district consists of three sub-divisions namely, Sitamarhi Sadar, Pupri and Belsand. Bairgania(NA), Belsand(NA), Sitamarhi(M), Dumra(NA) and Janakpur Road(NA) are the five towns in the district. Total number of villages in the district are 835. Sitamarhi (M) is the headquarter of the district.

In the year 1994 the erstwhile Sitamarhi district was bifurcated into two districts, the new district being Sheohar. Areas falling under Sheohar, Piprahi and Tariyani Chowk Community Development Blocks of Sitamarhi district were transferred to the newly created district of Sheohar.

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has three subdivisions headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are seventeen C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration :

The Judges and Munshif magistrates are posted at district and sub-divisions who administer and deliver justice of different kind.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration :

The Superintendent of Police, Sitamarhi is the head of the district police administration who is generally from the Indian Police Service. In the subdivisions of the district, the Deputy Superintendents of Police are posted who keep control on police administration and belongs to Bihar Police Service.

(iv)Physical Features

The district lies between 85^0 16" and 85^0 52" east longitudes and 26^0 15" and 26^0 50" north latitudes. The total area of the district is 2,200.0sq. kms. It ranks 22^{nd} on the ladder of districts of Bihar in respect of area. 2.3% of the total area of the state of Bihar is covered by this district.

The district has been divided into two sub-micro regions, namely Sitamarhi Plain-west and Sitamarhi Plain-east on the basis of relief, drainage, geology, soil, climate and natural vegetation. Sitamarhi Plain-West comprises of the entire portion of Bairgania, Belsand, Runisaidpur, Manpur, Dumra, Riga, Majorganj and parts of Pupri and Bajpatti C.D. Blocks. The entire region is plain with a gentle slope from north to south. River Baghmati along with its tributaries flows through the western part of the region. The region has a gentle slope of 70 m in the north to 59 m in the south above the mean sea level. Average annual rainfall is 1302.3 mm. Paddy, Wheat, Millets, Pulses and Sugarcane are the main crops of the area. Sitamarhi Plain-East comprises the entire portion of Sonbarsa, Bathnaha, Parihar, Sursand and parts of Bajpatti and Pupri C.D. Blocks. The region has a gentle slope from north to south. Adhwara, Gorha and Saghor rivulets originate from Nepal and flow through the tract from north to south. The height varies from 57 m in the south and 70 m in the central portion near Bathnaha above the mean sea level.

Climatic condition:

There are three well marked seasons, Winter, Summer and the Rainy seasons. The cold weather begins in November and continues upto February, though March is also somewhat cool. Westerly winds and dust storms begin to blow in the second half of March and the temperature rises considerably. May

is the hottest month when the temperature goes up to 40° C. Rains set in towards the middle of June. The rains continue till the end of September or middle of October. With the cessation of rains the temperature falls and the climate becomes rather pleasant.

Soil

The soil of the district can be classified as loam, sandy-loam, clay and clay-loam in different regions. In the Bagmati zone alluvial soil is found which is very good for Rabi cultivation. The soil of the district is rich in mineral contents except zinc needed for good crops.

Cropping pattern

The main crops of the district are paddy, wheat and Khesari. Besides gram, oil seeds and other pulses are also grown. Marua and Bhadai paddy are two main Bhadai crops. Sugar-cane is cultivated in about ten thousand hectares of land to feed the only sugar mill of the district namely Belsand Sugar factory, Riga. During the last twenty years due to special Rabi drives, introduction of high yielding varieties and increase in agricultural facilities the area under Rabi cultivation has shown appreciable increase. The area under sugar-cane cultivation has almost doubled compared to what it was about twenty years ago.

As a result of Kharif and Rabi drives launched every year by the Agricultural Department of the State Government there has been perceptible improvement in land use, cropping pattern, scientific cultivation, use of improved seeds, chemical fertilizers and plant protection in the district. This has resulted in substantial over all increase in agriculture production and the district has become self sufficient in respect of rice. Improved variety of paddy and wheat seeds are available at the seed Multiplication Farms in all the 17 development blocks of the district. Besides there is a 50 acre sub-divisional farm situated at village Muradpur. All these farms are running in profit. Fertiliser Depots have been set up in all the blocks of the district. A team of specialists is posted here to look after the agricultural production programme of the Government.

Irrigation facilities

In matters of irrigation this district is still very backward. Cultivators have to make their own arrangements to irrigate their crops. A large number of private tube-wells, bamboo-boring tube wells and private diesel pump sets are available with the progressive cultivators of the district. The State Government has provided some of irrigational facilities for the cultivators of the district, these are:

i) State Tube well

ii) Minor Irrigation schemes

iii) Bagmati Project

Flood protection scheme has also been taken up as a part of this scheme. The project authorities have constructed 25 kms. of embankment on either bank of the river. As a result part of Riga block have been saved from the onslaught of devastating flood.

Industry and Trade

Sitamarhi is mainly an agricultural district with more than 75 percent of population engaged in agriculture. The main industries and trade are also agro-based. Among the important industrial units of the district mention can be made of the Belsand Sugar Factory at Riga which has been running since 3rd April 1933. The factory has a daily crushing capacity of 850 tons of sugar-cane per day and provide employment to about one thousand persons during the crushing season. A number of rice mills are also located in the district. There are 19 such big modern rice mills, important among these being Sri Sita Ram Rice and Oils Mills, Bairgania, Sri Janki Rice and Oil Mills, Janakpur Road (Pupri), Sri Lakshmi Rice and oil Mills, Janakpur Road (Pupri), Shri Chaurasia Rice and Oil Mills, Sitamarhi. Besides, about 400 single hullers are distributed all over the district for dehusking paddy. It is a seasonal industry and the labour force mostly come from the rural population.

After independence the development of industries in the small scale sector has been receiving the attention of the Government and a District Industries Centre has been set up in the district in order to help and assist the entrepreneurs to set up industries by making available to them the technical know-how, project-profiles, arrangements for finance, working capital, raw material, etc.

Apart from small scale units, rural artisans are being encouraged to pursue their traditional vocation

to increase production and attain self sufficiency.

Besides, there is an Industrial Training Institute running at Sitamarhi where the rural youth, particularly young rural artisans are being given six months training under the scheme, "Training to Rural youth for self Employment" and they are being given financial assistance in the shape of loan from Banks and Government subsidy thereon. The Industries Department is also imparting such training separately. The rural artisans are being given financial assistance in the shape of loan to acquire improved tools and machinery, procure raw materials and improve their production under various rural development plans launched by the Government. All out efforts are being made to develop this district industrially.

As regards trade, the most important item is rice – both milled and hand-pound. Bairgania Bazar, Sonbarsa Bazar, Pupri and Parihar are the most important centres of rice trade. These areas are surplus in paddy production. The other important items are Pulses and Tisi (Linseed). Trade in Sal wood, which is mostly obtained from Nepal, is also significant.

Live stock

Live stock is very important in a district like Sitamarhi with a predominantly agricultural economy. The statistics of live stock of the district indicate that the number of cattle is fairly high in the district. The people of the area have not taken to poultry farming on large scale.

No special fodder grass is grown on an extensive scale for feeding the cattle. Straw from paddy, wheat hush, leaves of maize and sugar-cane provide fodder.

A veterinary hospital is functioning at Sitamarhi, the district headquarters alongwith 17 class I veterinary dispensaries located at each of the block headquarters to provide veterinary medical aid and treatment of cattle. Each class I veterinary dispensary is under the charge of one Touring Veterinary Doctor. In addition, in each block of the district three veterinary sub-centres have been established which are under the charge of Block Animal Husbandry Officers.

For improvement of the breed of the cattle an Artificial Insemination centre has been set up at District Veterinary Hospital. Arrangements for artificial insemination have been made at each of the block headquarters. The entire Animal Husbandry Programme of the district has been put under the charge of a District Animal Husbandry Officer.

Public Health

With the upgradation of Sitamarhi subdivision as district in the year 1972-73 the sub-divisional hospital of Sitamarhi was also upgraded as the district hospital. There are a number of district dispensaries known as Primary Health Centres and Health Sub-centres located in different blocks of the district. Apart from allopathic dispensaries the district have a few Ayurvedic dispensaries also. Some of the state dispensaries are quite old and have been started before 1950.

Land Revenue and Land Reforms

The district had Permanent Zamindari System of Land Revenue Settlement before the abolition of Zamindari System. The state Govt. has acquired the Zamindaries and the intermediary system between the raiyat and Government has since been abolished. But the early history of Land Revenue System of the combined district of Muzaffarpur prior to 1875, when it was separated from Darbhanga is very interesting. The first assessment of land revenue in Tirhut Division was made in 1582 by Raja Todar Mal, the famous Diwan of Akbar, consequently an area of 81,737 acres in Tirhut was settled at a revenue of Rs. 1,63,020. Subsequently, during the reign of Aurangzeb in 1685 the above assessment was raised to Rs. 1,798,576. Again in the year 1750, during the time of Nawab Alivardi Khan of Bengal, the land revenue assessment was reduced to Rs. 1,648,142. From the Farman of Aurangzeb, issued in the thirteenth year of his reign, it appears that Tirhut included 102 Mahals. From the same Farman it appears that the Mughal revenue administration conferred the office of Kanungo for the whole of Subah Bihar on three persons only. They used to collect the revenue of the whole Subah and receive 8 annas per hundred rupees as remuneration besides 'dastur' and 'nankar'. A subsequent Farman issued in 1783-84 by Shah Alam confirmed the descendents of the above three persons in the office of Kanungo for the whole of Bihar on the same terms and condition.

By the Diwani Grant of 1765 the right of collecting revenue in Bengal, Bihar and Orissa was transferred to the East India Company. But actually collection continued to be in the hands of the Nawab's officers. The East India company appointed Raja Sitab Roy to supervise the revenue collection in Bihar. The dual control resulted in much confusion and apprehension to tenure holders. Hence in 1769 European Supervisors were appointed. In 1770 a Revenue Council was established at Patna, and it was decided to transfer the contol of revenue collection to the servants of the East India Company. Accordingly, in the year 1771 a European Collector was appointed in Tirhut for the first time. But this experiment failed and in 1772 the control of a Provincial Council at Patna and quinquennial settlement of land was made. This experiment also failed. Hence annual settlement was made from 1778. But this system also proved to be a failure and Tirhut was again placed under a European collector in 1782. Francois Grand was appointed the Collector of Tirhut in 1782. Annual settlement of land continued till 1789. During this period, the collector had to face immense difficulties both in the matters of settling revenue and realising it. In the year 1783 the Board of Revenue at Calcutta deputed Mr. John Shore to Patna for effecting a new settlement of the province of Bihar. The collector of Tirhut was accordingly asked to prepare immediately a Jamma Wasul Baky of the 'mahals' of his district. In May 1789, the Governor General in council resolved to carry out the orders of the court of Directors for a new settlement of Bihar for a period of ten years, which if approved by the court, would become permanent without any further change or modification. The Zama which each Zamindar was to pay, was to be fixed by the collector on fair and equitable principles. Although systematic attempts were made to collect information and make settlements on the principles of equity and fairness but the decennial settlement was concluded more hastily than steadily with the result that when permanent settlement was effected in 1793 about sixty percent of the total area of the district escaped settlement. The total land revenue fixed was Rs. 9,83,642 out of which Rs. 4,36,000 represented the demand of the old district of Muzaffarpur. Subsequently efforts were made to cover up the unassessed land by resumption of revenue free grants. Nevertheless, all out efforts were also made to make the Revenue Records up-to-date and consolidate the Permanent Settlement. The Revenue Sales Act of 1850, the Land Registration Act of 1876, and the Estates Partition Act of 1876 were enacted. The implementation and enforcement of the provisions of these Acts enabled the British Government to prepare Revenue Rolls and other details of proprietors of Revenue paying and Revenue free estates on scientific line.

Before the enactment of Land Reforms Act 1950, there were thus, three categories of estates in the district of Muzarffarpur, namely (1) Revenue paying Estates (2) Revenue free Estates numbered 25,575 yielding a total revenue of Rs. 9,58,539-12-3 and (3) Government Khas Mahal numbered 52 with a total revenue of Rs. 97,792-10-4

Land Reforms

Abolition of Zamindari – The problems relating to land revenue system had engaged the attention of the publicmen in Bihar and Bengal where the permanent settlement of 1793 prevailed. Towards the end of 1938 the Government of Bengal had appointed a Land Revenue Commission to examine the existing land revenue system with particular reference to the permanent settlement. After examining the question in all its aspects the commission gave its report in 1940. The serious defects in the Zamindari system were pointed out and the commission recommended abolition of Zamindari system and replacing the same by Raiyatwari system for improving the economic condition of the cultivators. With the Congress Ministry in Bihar this question was actively taken up. As the vital interest of the state required immediate steps to be taken up for improving the agricultural production and the condition of the cultivators the Legislature enacted various laws such as amendments to the Bengal Tenancy Act, the Chotanagpur Tenancy Act, Bakast Dispute Settlement Act, 1947, etc. The Bihar State Management of Estates Bill, 1947, and the Bihar State Acquisition of Zamindari Bill 1947 were also passed. Two years later the Bihar State Management and Tenure Act, 1949 (Bihar Act XXI of 1949) was passed. The Bihar Abolition of Zamindari Act, 1948 required the assent of the Governor General on the 6th July 1949. The

validity of the Act was challenged and while petitions were pending in the High Court the State Act was replaced by the State Legislature and another measure called the Bihar Land Reforms Bill, 1949 was introduced in the month of December, 1949. This bill was passed and became later the Bihar Land Reforms Act, 1950. On the 25 of September, 1950, The Land Reforms Act, 1950 was also challenged. Parts of the Act were declared ultra vires by the Patna High Court. The Constitution was amended by the Constitution Amendment Act, 1952. Even after the amendments of the Constitution, the Act was challenged but the Supreme Court declared the Act to be intra vires except for some minor sections. The State Government later decided to take over the entire Zamindaris. Under the provisions of section 3(b) of the Bihar Land Reforms Act, 1950 all the estates and all the tenure had passed to and become vested in the state with effect from the 26th January, 1955.

At the time of vesting of Zamindari into the state there were 12,102 proprietors, tenure holders and under tenure- holders in the district of Sitamarhi (then a sub-division) with a collectable rental demand of Rs. 8,11083.16 only. The take over of Zamindaris which commenced in 1952 was finally complete in the year 1956. The implementation of the provisions of the Land Reforms Act involved a lot of difficulties at the initial stage for the local administration. However, these were got over through the perseverance of the local revenue administration. The annual rental demand was firmed up and the new revenue system started functioning properly.

Infrastructure

Railways – The district is served with old single metre-gauge line, viz. Darbhanga-Narkatiaganj line of the North-Eastern Railway. This railway line enters the district after Jogiara Station and, passing through Sitamarhi town, leaves the district after Bairgania Station. It serves the important places of the district, viz., Pupri, Sitamarhi, Riga and Bairgania. The name of the station for Pupri is Janakpur Road. From this station a District Board road to Janakpur, a place of pilgrimage in Nepal territory.

Roads- After the upgradation of Sitamarhi as a district, about 740 kms. of Roads were transferred to District Board, Sitamarhi. However, the soft soil and floods, the latter being an annual feature in many areas of the district, have always posed a problem for the better maintenance of the roads. Some of the important PWD, REO and District Board roads of the districts are as under

i) Muzafarpur-Sitamarhi Road (Road No. 1) This road connects Muzaffarpur with Sitamarhi. The length of the road is 61 Kms. This road passes through the important village of Runisaidpur, Morsand, etc.

ii) Sursand Road (Road No. 23) This is an important road with a length of 51 kms. It starts from Bishunpur and passes through the important village of Gaura, Koili, Nanpur, Bahera, Pupri, Sursand and joins Bela road no. 34 at Parihar.

iii) Pupri Road (Road No. 24) – This road starts from Sitamarhi and joins Pupri and then leads to Madhubani district.

Besides, there are number of other roads connecting different parts of the district. All the above mentioned roads are metalled. All the block headquarters of the district except that of Bairgania block, are connected with roads. However, during rains road communication is severely affected, the frequent visit of floods damage the roads very badly.

Market complex and Storage

The district has been divided into five zones by the Agriculture Produce Marketing Board with regulated markets at Sitamarhi, Pupri, Sursand, Sonbarsa and Bairgania.

(i) The Pupri regulated market covers the market areas of Nanpur, Pupri, Bajpatti and Runisaidpur police stations with the principal market yard at Pupri and sub-markets at Bajpatti, Nanpur and Runisaidpur.

(ii) The Sitamarhi regulated market covers the market areas of Sitamarhi, Dumra, Bathnaha and Riga police stations. The market yard has already been constructed and primary business transferred to the market yard.

(iii) The Sonbarsa regulated market yard covers the market areas of Bhutahi and Sonbarsa.

(iv) The Bairgania regulated market covers the areas of Bairgania, Dheng and Majorganj.

Institutional Finance Agencies

Adequate provision of rural credit for the socio-economic development of rural population is of paramount importance. The nationalisation of commercial banks was done mainly with a view to providing easy credit to the rural masses and better their lot. Besides, Regional Rural Bank has been set up exclusively for the credit requirements of weaker section of the population. Lead Bank Scheme has also been introduced and the Central Bank of India is the Lead Bank for this district. Branches of different commercial banks, Regional Rural Bank, Land Development Bank and Central Co-operative Bank are operating in the areas of different blocks of the district.

Social Welfare Plans

A number of Social Welfare Programmes have been launched in the district. Since independence a large number of schemes for the welfare of Scheduled Caste and backward class have been taken up. The statewise scheme of old-age pension has been implemented in Sitamarhi district also. Widows and indigent persons have also been brought within the fold of the scheme.

A number of other schemes such as National Rural Employment Programme, Jawahar Rozgar Yojna and Prime Minister Rural Employment Programme etc. have also been undertaken in this district.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In

such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a Census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate Census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a Census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'Census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and Census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate Census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate Census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate Census house.

Sometimes it becomes difficult to apply the definition of Census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five Census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five Census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one Census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one Census house and the remaining rooms as another Census house. But if each room was occupied by an independent household, then each such room was treated as a separate Census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one Census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate Census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one Census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate Census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate Census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate Census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths

are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;—

ii) two or more adjoining towns with their outgrowths; and—

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a Census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or Census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and

are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda

26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the Census concept, each language is a group of mother tongues. The Census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in Census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc.,

and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewerage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the Census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the Census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got

employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

The population of the Sitamarhi district during 1991 was 2,391,495. Hindus constitute over 80 per cent (1,919,514 persons) of the population in the district followed by Muslims 19.7 percent (471,508 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. During 1991 Census, as in the previous Censuses, the mother tongue as returned by each individual was collected.

The population of the Sitamarhi district during 1991 was 2,391,495. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Sitamarhi district, Hindi, the main mother tongue of the district was returned by 84.1 percent (2,011,617 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Sitamarhi district, was 15.9 percent (379,186 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Sitamarhi during 1991 Census

The population of the Scheduled Caste in the Sitamarhi district during 1991 was 2,89,834. Numerically five important SCs were namely, Dusadh/ Dhari (ii) Chamar/Mochi (iii) Musahar (iv) Dhobi and (v) Pasi. The population of Dusadh/Dhari was 1,08,082 which constituted 37.3 percent of the Scheduled Castes population. The population of Chamar/Mochi was 1,00,372 which constituted 34.6 percent of the Scheduled Castes population. Musahar had 36,233 population which constituted 12.5 percent of the Scheduled Caste population. Dhobi had 32,192 population while Pasi had 5088 population. Dhobi constituted 11.1 percent while Pasi constituted only 1.8 percent of the Scheduled Castes population.

The population of the Scheduled Tribes in the district of Sitamarhi during 1991 Census was 394. Numerically five important STs were namely (i) Bedia (ii) Gond (iii) Oraon (iv) Baiga and (v) Santal. Bedia had 145 population which constituted 36.8 percent of the Scheduled Tribes population. Gond had 103 population which constituted 36.1 percent of the Scheduled Tribes population. Oraon had 25 population which constituted 6.3 percent of the Scheduled Tribes population. Baiga has 16 population while Santal had 11 population. Baiga constituted 4.1 percent while Santal constituted 2.8 percent of the Scheduled Tribes population.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Sitamarhi district is 26,82,720 comprising 14,17,611 Males and 12,65,109 Females and constituting 2.4 percent of the State population spread over 3.2 percent of the area of the State in the 17 C.D.Blocks of the district. Runisaidpur is the most populous where as Charaut is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial		Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
number	C.D. Block	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001

District Total:		**2,013,796**	**1,894,203**	**119,593**	**2,682,720**	**2,529,407**	**153,313**	**33.2**	**33.5**	**28.2**	**5.9**	**5.7**

There were 2,013,796 persons in the district in 1991 of which 1,894,203 were in rural and remaining 119,593 were residing in urban areas. During 2001 Census 2,682,720 persons were enumerated in the district of which 2,529,407 and 153,313 were residing in rural and urban areas respectively. These changes in population amounted to a decadal growth of 33.2 in total population. The decadal variation in rural and urban population accounts for 33.5 and 28.2 percent respectively. The percentage of urban population to total population in both the Censuses remained almost the same.

Among the C.D. Blocks Pupri witnessed the highest (37.3 %) and Bairgania lowest (25.2%) decadal variation in their total population. Over 39 and 37 percent increase in urban and rural population were recorded in Pupri C.D. Block in the district of Sitamarhi.

There are 802 inhabited villages in the district with a total population of 2,529,407 persons. Runisaidpur is the largest C.D. Block with 96 villages having 297,569 persons and Bairgania is the smallest one in terms of number of villages (19). 20 inhabited villages having a total rural population of less than 200 each accommodate 0.1 percent of the total population of the district. 32 villages having population in the range of 200 to 499 provide shelters to 0.5 persent of the total population of Sitamarhi district.

100 inhabited villages having population in the range of 500 to 999 account for 2.9 percent of district's population whereas 211 villages having population in the range of 1000 to 1999 account for 12.5 percent of the total popultion. Largest number of villages (313) in the district belong to the population range of 2000 – 4999 accounting for 39 percent of district population. 93 villages having a range of 5000 – 9999 account for 25.5 percent of district total population. Further, 33 villages having a population of 10000 and above account for over 19.5 percent of the district population as per 2001 Census.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicale in respect of Sitamarhi district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.1	4	0.0
11-20	1	0.1	5	0.0
21-50	1	0.1	8	0.0
51-100	5	0.6	368	0.0
101-200	5	0.6	1,488	0.1
201-300	8	1.0	1,760	0.1
301-500	28	3.5	20,676	0.8
501 +	752	93.8	2,491,641	98.5
Not known	1	0.1	13,457	0.5
District Total:	**802**	**100.0**	**2,529,407**	**100.0**
Population Density (Rural) of the district:		**1192**		

The data presented in the above table highlight the fact that maximum proportion of villages in Sitamarhi district lies in the density range (per square kilometer) of 501+ with 93.8 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 3.5 percent. It would further be seen that a single village falls in the density ranges of 0-10, 11-20 and 21-50 which account for 0.1 percent (in each density ranges) of the total inhabited villages.

The above table further reveals that the maximum villages which fall in the density range of 501+ cover 98.5 percent of the population followed by villages in the density range of 301-500 which account for 0.8 percent of the population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1061	1064	1003	1089	1094	783
1911	1051	1056	942	1092	1097	749
1921	1020	1027	886	1079	1084	772
1931	995	1005	820	1037	1042	711
1941	1002	1012	842	1048	1053	761
1951	1000	1010	859	1035	1039	794
1961	1005	1020	832	1032	1037	768
1971	957	968	833	959	964	841
1981	948	959	852	936	941	849
1991	907	913	857	884	886	843
2001	919	926	868	892	894	861

Note: Sex ratio has been defined here as the number of females per 1000 males.

The total sex ratio for the state of Bihar in 2001 was 919 and for the district of Sitamarhi it was recorded further lower at 892. The sex ratio for urban areas of the state and the district were 868 and 861 respectively whereas it remained 926 and 894 for rural areas of the state and the district respectively as per 2001 Census. The sex ratio trend since 1901 revealed that the year 1901 was the year of highest sex ratio(1061) for the state and 1911 for the district (1092) of Sitamarhi and it was true for total and rural areas. Between 1901 and 1961 the lowest sex ratio 995 was registered in 1931 in the state of Bihar for total area and 1005 for rural though the general trend was of declining sex ratio over the decades since 1901 to 2001 with some ups and downs in between and the findings hold good for both state and the district. The urban sex ratio for the state has shown a mixed trend of up & down while it has registered some increase in the district of Sitamarhi since 1971. Between 1901 and 1961 urban sex ratio in Sitamarhi district remained below 800 mark which showed up and ranged between 841 and 861 during the decades 1971-2001.

	District (Rural) Total:	**894**

The rural sex ratio also varies from 915 in Bajpatti C.D. Block to 877 in Riga C.D. Block. The sex ratios of Sonbarsa, Bathnaha, Riga, Runisaidpur, Dumra and Charaut are lower than the district rural average of 894. The urban sex ratio of the district is 861 which is lower than the total and rural averages of the district. The urban sex ratio varies from 882 in Bairgania C.D. Block to 848 in Dumra C.D. Block.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	2	0.2	127	0.0
700-749	3	0.4	1,575	0.1
750-799	14	1.7	14,444	0.6
800-849	106	13.2	201,599	8.0

District Total:	**802**	**100.0**	**2,529,407**	**100.0**
Sex ratio (Rural) for District:		**894**		

The distribution of villages by sex ratio ranges reveals that the maximum number of villages (350) comprising of 43.6 percent of the total villages and 49.7 percent of total rural population have a sex ratio between 850 and 899 as per 2001 Census figures. The second largest group (253) of villages comprising of 31.5 percent of total villages and 35.6 percent of total rural population have a sex ratio ranging between 900 and 949. The third largest block of 106 villages covering 8 percent of total rural population of the district have a sex ratio ranging between 800 and 849 as per Census 2001. The lowest sex ratio (less than 700) has been recorded in two villages only having a nominal population of 127 persons only. On the other extreme only 6 villages having a population of 693 persons and only 0.7 percent of total inhabited villages have a sex ratio of 1100 and more females per 1000 males.

	Sex ratio (Urban) for the district:		**861**

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The distribution of urban sex ratio reveals that Bairgania(NA) has the highest (882) sex ratio followed by Janakpur Road(NA) 875, Belsand(NA) 872 and Sitamarhi(M) including outgrowth 866. The lowest (763) sex ratio for urban areas of Sitamarhi district has been recorded in Dumra(NA) as per Census 2001.

		Urban	**27,053**	**14,129**	**12,924**	**915**

It is observed from above Table 10 that the sex ratio in the age group 0-6 varies from 962 in Belsand C.D. Block to 885 in Pupri C.D. Block. The sex ratio figures in the age group 0-6 of Suppi, Parihar, Bathnaha, Riga, Parsauni, Runisaidpur, Dumra, Charaut and Pupri C.D. Blocks are lower than the district total and rural averages. The urban sex ratio of Sitamarhi district is lower than the total and rural sex ratio of the district.

17	Bokhara	20,441	10,479	9,962	951
	District (Rural) Total:	**529,529**	**275,144**	**254,385**	**925**

It transpires from Table 11 that Sitamarhi district has a population of 529,529 persons of 0-6 years of which 275,144 males and 254,385 females. The sex ratio for the district is 925 in the age group 0 to 6 years as per Census 2001. The highest sex ratio (966) among 0-6 years population has been recorded in Belsand followed by Bajpatti and Bokhara (951 each), Sursand (942). The 3rd and 4th highest sex ratio among 0-6 years population of the district has been recorded in Sonbarsa (938) and Majorganj and Nanpur (928 each) respectively. On the other hand Pupri C.D. Block has returned the lowest (886) sex ratio in the district for 0-6 years population. It indicates comparatively poor facilities of child and family welfare and general health care system in this C.D. Block of Sitamarhi district.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	20	2.5	2,380	0.4
700-749	15	1.9	4,657	0.9
750-799	35	4.4	12,178	2.3
800-849	99	12.3	61,568	11.6
850-899	136	17.0	99,002	18.7
900-949	162	20.2	151,004	28.5
950-999	145	18.1	119,448	22.6
1000-1099	130	16.2	65,411	12.4
1100+	60	7.5	13,881	2.6
District (Rural) Total	**802**	**100.0**	**529,529**	**100.0**
Sex ratio (Rural) for District:		**925**		

The above table shows distribution of villages and rural population in the age-group 0-6 years by various ranges of sex-ratio as per 2001 Census for Sitamarhi district reveals that highest number of villages (162) covering 20.2 percent of total inhabited villages and 28.5 percent of total rural population of the district has a sex ratio ranging between 900 and 949. 145 villages covering 18.1 percent of total inhabited villages and 22.6 percent of total rural population of the district has a sex ratio ranging between 950 and 999. 136 villages covering 17.0 percent of total inhabited villages and 18.7 percent of total rural population of the district has a sex ratio ranging between 850 and 899. A sex ratio between 1000 and 1099 has been recorded in 130 villages accounting for 16.2 percent of total inhabited villages and 12.4 percent of total rural population in the district the highest sex ratio of 1100 and more females per 1000 males have been recorded in 60 villages accounting for 7.5 percent of total villages and 2.6 percent of the total rural population of the district. On the contrary, only 20 villages covering 2.5 percent of the total villages and having only 2380 population have returned lowest sex ratio of less than 700 females per thousand males among 0-6 years population in the district as per Census 2001.

	District Total:	**Total**	**2,682,720**	**315,646**	**1,786**	**11.8**	**0.1**
		Rural	**2,529,407**	**301,727**	**1,673**	**11.9**	**0.1**
		Urban	**153,313**	**13,919**	**113**	**9.1**	**0.1**

The total population of Sitamarhi district is 2,682,720 of which 315,646 are Scheduled Castes and 1,786 are Scheduled Tribes and their respective proportion to total respective population of C.D. Block reveals that Scheduled Castes population ranges from as high as 18.1 percent in Majorganj to as low as 8.3 percent in Nanpur C.D. Block against a district average of 11.8 percent as per Census 2001. Out of 17 C.D. Blocks in 8 C.D.Blocks the percentage of Scheduled Castes is above district average (11.8%) and in the remaining 9 C.D. Blocks Scheduled Castes proportion is below this average.

The C.D. Block wise distribution of Scheduled Tribes and their proportion to the respective total population of the C.D. Block reveals that no C.D. Block has even 0.5 percent Scheduled Tribes. The maximum proportion of Scheduled Tribes has been recorded as 0.4 percent in Majorganj while tribal proportion is nil in two C.D. Blocks namely Bairgania and Bajpatti. The average tribal proportion in the district of Sitamarhi has been returned as 0.1 percent as per Census 2001. Sitamarhi is basically a non-tribal district of north Bihar.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

	District (Rural) Total: 2,529,407		**301,727**	**1,673**	**11.9**	**0.1**

Table 15 shows that out of a rural population of 2,529,407 over 3 lacs (11.9%) belong to Scheduled Castes and only 1,673 (0.1%) are Scheduled Tribes in the district. Among C.D. Blocks Majorganj has the highest (18.1%) proportion of Scheduled Castes and Scheduled Tribe population (0.4 percent) followed by C.D. Block Suppi having over 16.1 percent Scheduled Castes population. Nanpur C.D. Block has the lowest (8.3 percent) concentration of Scheduled Castes. Only 6 C.D. Blocks have Scheduled Tribe population ranging between 0.1 to 0.4 percentage points.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5

41-50	9	1.1	4,816	1.6
51-75	9	1.1	4,645	1.5
76 and above	3	0.4	1,500	0.5
District Total	**802**	**100.0**	**301,727**	**100.0**

The Table 16 provides an insight into the presence of Scheduled Castes population in villages of Sitamarhi district. It is crystal clear from the table that 64 villages comprising of 8 percent of total inhabited villages of the district have no Scheduled Castes population as per Census of India 2001. It is also clear that the highest proportion (43.3 percent) of total Scheduled Castes of the district live in 250 villages comprising of 31.2 percent of the total inhabited villages of the district which has 11 to 20 percent of Scheduled Castes population each. Next highest proportion (28.1 percent) of total scheduled cstes of the district live in 251 villages comprising of 31.3 percent of total inhabited villages of the district which has 5 to 10 percent of their total respective population as Scheduled Castes. On the contrary there are only 3 villages comprising of 0.4 percent of total inhabited villages and 0.5 percent of total Scheduled Castes population of the district have 76 and above percentage of their respective population as Scheduled Castes in the district of Sitamarhi as per Census of India 2001.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

76 and above	0	0.0	0	0.0
District Total	**802**	**100.0**	**1,673**	**100.0**

Table 17 shows that Sitamarhi is primarily a non-tribal district. Out of a total of 802 inhabited villages, 766 comprising 95.5 percent of the total inhabited villages have nil tribal population. Only 36 villages covering 4.4 percent of total inhabited villages have tribal population. Of these, 34 villages account for 66.1 percent of tribal population and fall in the percentage range of less than 5. Of the remaining two villages, one each falls in the percentage range of 5-10 and 11-20 respectively and account for 8.3 and 25.6 percent of total rural tribal population of the district.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA^/ Town+*	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bairgania (NA)	34,836	4,212	0	12.1	0
2	Belsand (NA)	17,840	2,251	3	12.6	0
3	Sitamarhi UA	87,279	6,262	103	7.2	0.1
4	(a) Sitamarhi (M+OG)	72,744	4,512	75	6.2	0.1
5	(i) Sitamarhi (M) *	56,766	3,839	72	6.8	0.1
6	(b) Dumra (NA)	14,535	1,750	28	12	0.2
7	Janakpur Road (NA)	13,358	1,194	7	8.9	0.1
	District(Urban) Total	**153,313**	**13,919**	**113**	**9.1**	**0.1**

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

It is apparent from the above table that there are 4 Notified Area Committees and 1 Muncipality having a total urban population of 1,53,313 persons in Sitamarhi district, of which 13,919 belong to Scheduled Castes and 113 to Scheduled Tribes. In terms of proportion, a bit over 9 percent and less than 1 percent of district urban population is Scheduled Castes and schedule tribes respectively as per data collected during Census of India 2001.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bairgania	887	0
2	Suppi	907	759
3	Majorganj	903	1,012
4	Sonbarsa	906	1,000
5	Parihar	887	840
6	Sursand	910	0
7	Bathnaha	888	1,086
8	Riga	869	1,000
9	Parsauni	889	935
10	Belsand	922	500
11	Runisaidpur	901	889
12	Dumra	885	727
13	Bajpatti	906	0
14	Charaut	903	500
15	Pupri	911	802
16	Nanpur	905	963
17	Bokhara	919	875
	District (Rural) Total	**897**	**871**

It is obvious from the above table-19 that sex ratio among Scheduled Castes is higher (897) in rural areas of the district than among Scheduled Tribes (871) as per Census of India 2001.So far C.D. Block wise sex ratio among scheduled caste is concerned Belsand has the highest (922) followed by Bokhara (919), Pupri (911) and Sursand (910). On the other hand Bathnaha has the highest sex ratio (1086) for Scheduled Tribes followed by Majorganj (1012) Sonbarsa and Riga have equal proportion (1000) of males and females among Scheduled Tribes. Belsand and Dumra C.D. Blocks have a sex ratio of 500 and 727 females for 1000 males among Scheduled Tribes. Bairgania, Sursand and Bajpatti have no scheduled tribe population.

Among various urban units over 12 percent of total urban population is scheduled caste in Bairgania (NA), Belsand(NA) and Dumra(NA), about 9 percent in Janakpur Road(NA) and over 6 percent in Sitamarhi(M). Scheduled Tribes are in urban areas of the district as per Census 2001.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town^/+*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bairgania (NA)	850	0
2	Belsand (NA)	850	500
3	Sitamarhi UA	825	907
4	(a) Sitamarhi (M+OG)	887	786
5	(i) Sitamarhi (M)	878	756
6	(b) Dumra (NA)	681	1,333
7	Janakpur Road (NA)	851	2,500
Sex ratio (Urban) for the district:		**838**	**948**

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

The town wise distribution of sex ratio among Scheduled Castes and Scheduled Tribes reveals that Sitamarhi(M) including outgrowth has the highest (887) and Dumra(NA) has the lowest (681) sex ratio among Scheduled Castes. On the other hand Janakpur Road(NA) has the highest sex ratio (2500) amongst Scheduled Tribes followed by Dumra(NA)(1333). The sex ratio figures pertaining to Dumra(NA) and Janakpur Road(NA) relating to Scheduled Tribes at first sight appears to be abnormal but this is due to very scanty sex wise population of Scheduled Tribes in these towns.

17	Bokhara	28,223	18,655	9,568	75,776	36,037	39,739	33.8	42.2	24.3	17.9
	District (Rural) Total:	**734,083**	**505,925**	**228,158**	**1,795,324**	**829,289**	**966,035**	**36.7**	**47.7**	**24.3**	**23.4**

Table 21 shows that there are 38.5 percent literates in the district. Males are better literate in terms of percentage (49.4 %) than the females (26.1 %). The difference between male and female literacy rates comes to 23.2 percent in the district of Sitamarhi as per Census of India 2001. The average literacy rate for rural areas of the district is 36.7 percent. Males are numerically better literate (47.7 %) than the females (24.3 %) in the rural areas of the district. The gap in male/female rural literacy rate is 23.4 percent. The picture is far better in urban areas of the district as 66.2 percent of total urban population is literate which is further higher amongst males (74.7 %). Urban females are far ahead of there rural counterparts as 56.2 percent of the urban females are literate in the district. The gap between urban male/female literacy is 18.5 percent only.

Among C.D. Blocks, Dumra has the highest (47.3%) total literacy rate. Urban literacy is also highest in Dumra C.D. Block (74.6 %) while Charaut C.D. Block has returned highest rural literacy rate (41.4%) as per Census 2001. Table 22 deals only with the rural areas of the district.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	4	0.5	248	0.0
1-10	14	1.7	6,489	0.3
11-20	43	5.4	67,482	2.7
21-30	176	21.9	488,746	19.3
31-40	316	39.4	1,158,161	45.8
41-50	174	21.7	657,615	26.0
51-60	54	6.7	134,178	5.3
61-70	15	1.9	12,910	0.5
71-80	5	0.6	3,455	0.1
81-90	1	0.1	123	0.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**802**	**100.0**	**2,529,407**	**100.0**
Literacy rate for District:		**38.5**		

It is obvious from the above table that 316 villages covering 39.4 percent of total inhabited villages and having 45.8 percent of total rural population of the district come under literacy range of 31-40 percent. The highest rural literacy range 81-90 percent has been returned from only one village having 123 persons only. On the other hand 4 villages having 248 persons have reported zero literacy in the district as per Census of India 2001.

Among Scheduled Castes population 21.4 percent are literate as per Census of India 2001. Male literacy rate is 31 percent while among females only 10.6 percent are literate. At this rate a gap of over 20 percent between male and female literacy rate in Sitamarhi district has been recorded. Among C.D. Blocks, Dumra has returned the highest (26.5%) literacy in Scheduled Castes population. Male literacy is highest in Sonbarsa C.D. Block (38.0%) and females are also comparatively better (13.9%) literate in Sursand and Dumra C.D. Blocks. The lowest Scheduled Castes literacy rate has been recorded in Bokhara C.D. Block with 13.3 percent in which male and female literacy rates are also lowest i.e. 19.7 and 6.2 percents respectively.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	16	2.2	766	0.3

District Total:	**738**	**100.0**	**301,727**	**100.0**
Literacy rate for District (Rural):		**21.4**		

Table 26 shows that all the 738 villages having Scheduled Castes population within the district have been distributed according to range of literacy rate for Scheduled Castes. The highest number of inhabited villages 241 and 202 come under the literacy ranges of 11 to 20 and 21 to 30 percent respectively for Scheduled Castes. These stand for 32.7 and 27.4 percent of all such villages of Sitamarhi covering 39.8 and 30.6 percent respectively of total rural Scheduled Castes population in the district. 31 to 40 percent literacy among Scheduled Castes has been recorded in 123 villages which account for 16.7 percent of total inhabited villages covering 15.2 percent of total rural Scheduled Castes population in the district. Only one village each has returned 71 to 80 and 100 percent literacy rate among Scheduled Castes.

It also appears from the table that villages having 11 to 40 percent of literacy rates account for 76.8 percent of total inhabited villages covering 85.6 percent of total rural Scheduled Castes population in the district.

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

Table 27 shows that urban literacy rate for Scheduled Castes is higher than that of rural. 36.4 percent urban Scheduled Castes are literates. Among male literacy rate is 48 percent while it is only 22.3 percent in female. The gap in male female literacy rates is 25.7 percent among Scheduled Castes.

Urban literacy rate for Scheduled Castes is highest (52.3 %) in Dumra (NA). Male and female literacy rates are 64.1 and 34.1 percent respectively in Dumra (N.A.) Janakpur Road Notified Area has second highest (48.2%) literacy rates for Scheduled Castes in which male and female literacy rates are 65.2 and 28.5 percent respectively. The lowest urban literacy rate (26.1%) has been recorded in Belsand Notified Area in which male literacy rate is also lowest (35.1%). Lowest female literacy rate (14.2 percent) has been recoded in Bairgania(N.A).

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

	District (Rural) Total:	**392**	**298**	**94**	**1,281**	**596**	**685**	**29.5**	**41.5**	**15.4**	**26.1**

The Table 28 shows that among the Scheduled Tribes the percentage of literates is highest i.e. 58.3 percent in Bathnaha C.D. Block where as it is lowest i.e. 6.7 percent in Suppi and nil literacy in Sursand C.D. Block. It is observed that the literacy rate among Scheduled Tribes for the rural areas in the district is 29.5 percent. Sex and C.D. Block wise distribution of literacy in rural areas of the district among Scheduled Tribes show that the highest male and female literacy rates have been recorded in Bathanaha i.e.76.7 percent and Dumra i.e. 50 percent respectively.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	8	22.2	31	1.9
1-10	3	8.3	444	26.5
11-20	2	5.6	69	4.1
21-30	4	11.1	122	7.3

The Census of India 2001 has returned a total population of 2,682,720 in Sitamarhi district of which 1,417,611 are males and 1,265,109 are females. Total population is constituted of total workers and non-workers. Total workers account for 31.9 percent of the total population and rest 68.1 percent are non-workers. About equal proportion (50%) among males are workers and non-workers in the district of Sitamarhi. Work participation rate among females is only 11.2 percent. Among C.D. Blocks Charaut has returned 54.7 percent total male workers. The lowest male work participation rate 47.8 percent has been reported from Dumra C.D. Block. On the other hand the highest female work participation rate (18.5%) has been returned from Bajpatti C.D. Block. The lowest proportion of female workers (7.5%) has been returned from Parsauni C.D. Block. The highest general work participation rate has been reported from Majorganj and Sonbarsa C.D. Block(35.9% each) where as C.D. Block Dumra has returned lowest general work participation rate (29.3%) as per Census of India 2001.

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 32 shows that the work participation rate (WPR) for rural population in the district is 32.2 which is 26.7 in case of main workers and 5.4 in case of marginal workers.

Work participation rate is naturally higher in case of males particularly among main workers and females are ahead among marginal workers.

The proportion of Non-workers among males in the district is 49.4 percent while that of female is 88.4. Nanpur and Bokhara C.D. Block each have the highest (70.4% each) of Non-workers while Bairgania has the lowest (62.9%). The corresponding figure for the district is 67.8 percent.

+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

There are 4 Notified Areas and one Municipality in the district. An urban Agglomeration consisting of Sitamarhi(M) alongwith its outgrowth and Dumra N.A. is also recognised as urban unit. The total urban population in the district is 153,313 of which 37,561 are main workers, 3,271 are marginal workers and 112481 are non workers. The work participation rate for main workers is 24.5 percent and it is meagerly 2.1 for marginal workers. 73.4 percent of total urban population of the district are non-workers. The proportion of male and female main workers are 42.8 and 3.3 percent respectively. Proportion of both male and female marginal workers is more or less 2 percent. The male and female proportion of non workers is 54.8 and 95 percent respectively in the district. Almost same trend can be seen in different urban units of the district.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D.BLOCKS, 2001

Note :- Percentage of workers to total workers are given in brackets

Category wise distribution of total workers in Table 34 reveals that highest proportion of workers belong to Agriculture labour (55.3%) followed by cultivators (24.1%). Other workers occupy third place (17.2 %) in the district whereas household industries provide livelihood to only 3.4 percent of the total work force including marginal workers in the district of Sitamarhi. Among various C.D. Blocks, categorywise analysis of workers reveals that Charaut C.D. Block has the highest proportion of cultivators (30.7%) followed by Bathnaha (30.6%). Cultivation is dominated by males. On the other hand the highest proportion (64.6 %) of agriculture labour has been returned from Bokhara C.D. Block followed by Belsand (62.5 %). Agriculture labour is mainly dominated by females in the district. Sonbarsa C.D. Block has the highest proportion of household workers (5.1%) whereas highest proportion of other workers (38.8%) has been reported from Dumra C.D. Block of the district.

Sex wise analysis of the table shows that there are 25.5 percent male and 16.6 percent female cultivators in the district but the highest male (53.3%) and female work participation rate (65.5%) has been reported in the field of agriculture labourers. 18.5 and 10.6 percent of male and female workers respectively are engaged in other works whereas 2.6 percent male and 7.3 percent female workers respectively are engaged in household industries in Sitamarhi district as per 2001 Census.

Note: Percent of Workers to total workers are given in brackets

From the Table 35, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, Cultivators, Agricultural labourers, Household industry workers and Other economic activities. The economic activity in the rural areas of the district is primarily dependent on agriculture which is supported by the fact that the cultivator (25%) and agricultural laboures (57.3%) together constitute 82.3 percent of the total workers of the district. The agriculture sector has absorbed more than three fourth of the total workers. The proportion of cultivators varies between 30.7 percent for Charaut C.D. Block to 19.3 percent for Bairgania C.D. Block. Proportion of Agricultural labours varies between 64.6 percent for Bokhara C.D. Block to 47.8 percent for Dumra C.D. Block. The proportion of Household Industry workers is only 3.3 percent of the total workers of the district which varies between 5.1 percent for Sonbarsa C.D. Block to 1.7 percent for Charaut C.D. Block. The proportion of other workers is 14.4 percent of the total workers of the district which varies from 24.2 percent for Dumra C.D. Block to 9.2 percent for Charaut C.D. Block.

Note : Percentage of workers to total workers are given in brackets

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

There are five statutory towns including Sitamarhi Municipality in the district. Sitamarhi Municipality including its outgrowths and Dumra N.A. constitute Sitamarhi Urban Agglomeration. The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main

and marginal workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other economic activities. The cultivators constitute 5.1 percent of total urban workers and the proportion of male and female cultivators are 4.9 and 7.4 percent respectively. Agaricultural labourers constitute 16.2 percent of total urban workers and the proportion of male and female agricultural labourers are 15.6 and 22.3 percent respectively. Household industry workers constitute 4.7 percent of total workers. The proportion of male and female household industry workers comprise 3.7 and 15.6 percent respectively. Other workers constitute 74.0 percent of the total urban workers in the district. The proportion of male and female other workers are 75.8 and 54.7 percent respectively.

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It can be seen from the Table 37 that out of a total of 802 inhabited villages in Sitamarhi district 728 (90.8% of total inhabited villages) villages have educational facilities, 792 (90.8%) villages have improved drinking water facilities, 216 (26.9%) villages have medical facilities, 248 (30.9%) villages have post offices and telephone facility is available to 106 (13.2%) villages only while transport and communication facilities are available only to 156(19.5%) villages. Only 88 (11.0%) villages have Banking facility and 170 (21.2%) villages have agricultural credit society. 345 (43.0%) of the total inhabited villages in the district have approach by pucca road while power supply is available to only 302(37.7%) inhabited villages as per Census of India 2001.

Among C.D. Blocks, 38 villages, a maximum of 97.4 percent villages of Riga C.D. Block have educational facilities, while medical facility is available in maximum of 48.4 percent of inhabited villages of Nanpur C.D. Block. Improved drinking water is available in all the inhabited villages of 12 out of a total of 17 C.D. Blocks in the district. Post office is situated in a maximum of 52.2 percent of the total inhabited villages of Bokhara C.D. Block and rest of the C.D. Blocks have even lesser proportion of such villages which have this facilities. Maximum telephone facility is available to 29.6 percent villages of Majorganj C.D. Block while a maximum of transport and communication facilities are available to 35.5 percent villages of Nanpur C.D. Block only. Maximum Banking facilities are available to 25.9 percent villages of Majorganj C.D. Block while Agricultural credit societies are available to 95.6 percent villages of Pupri C.D. Block. Pucca approach road is available to a maximum of 69.6 percent villages of Bokhara C.D. Block only. Power supply is available to a maximum of 77.3 percent villages of Parsauni C.D. Block of the district. All other C.D. Blocks are having even lesser proportion of such villages which have these facilities as described above.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It is quite obvious from the Table 38 that educational facilities are available to over 96 percent, of the district rural population while Improved drinking water is available to over 98 percent of the rural population in Sitamarhi district. Medical facility is available to over 42 percent of district rural population whereas Post office is available to about 53 percent of them. Over 22 and 23 percent of rural population avail of the telephone and Banking facilities respectively. Over 30 and 28 percent of district rural population are provided with the facilities of Transport & communication and Agricultural credit society respectively. Pucca approach road and Power supply are available respectively to about 57 and about 51 percent rural population of Sitamarhi district as per Census 2001. C.D. Block wise details reveals that educational facilities are available to 100 percent population in C.D. Block Bokhara while improved drinking water facility is available to 100 percent rural population of 12 C.D. Blocks out of a total of 17 C.D.

Blocks in the district. Medical facility is available to a maximum of over 67 percent and post office to about 73 percent population of only one C.D. Block Nanpur. Telephone services and transport & communication facilities are available to a maximum proportion of 48.6 and 57 percent rural population of Pupri and Bokhara C.D. Block respectively. Banking facility and services of Agricultural credit society are available to a maximum proportion of 59.3 and about 98 percent rural population of Chaurat and Pupri C.D. Block respectively. Pucca approach roads and Power supply are available to a maximum proportion of 88.3 and 83.9 rural percent population of Bokhara and Pupri C.D. Block respectively. Except these C.D. Blocks described above, a lesser proportion of these facilities are available to the rural population in other C.D. Blocks of the district.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	88	5	0	93
(b) Middle School	437	90	9	536
(c) Degree College	98	130	568	796
2. Medical:-				
(a) Hospital	187	91	498	776
(b) PHC	253	192	331	776
3. Post Office	411	105	39	555
4. Telephone	215	205	276	696
5. Bus Service	334	183	138	655
6. Banks				
(a) Commercial Bank	385	199	133	717
(b) Co-operative Bank	153	267	363	783
7. Agricultural Credit Societies	283	183	166	632

It is reflected from Table 39 that 776 inhabited villages out of 802 do not have hospital or primary health centre within the village and needy persons have to travel a distance of less than 5km to 10km and even more to avail of such essential facilities. Similarly 93, 536 and 796 inhabited villages do not have Primary school, Middle school and Degree college respectively. 555 villages do not have Post office 696 do not have Telephone and 655 out of 802 inhabited villages do not have even Bus service. To get such services village dwellers have to travel a distance of less than 5km 10 km and even more. Commercial Banks and Co-operative Banks are not available in 717 and 783 inhabited villages respectively. Similarly Agricultural credit societies are not available within 632 inhabited villages and needy cultivators have to undertake a journey of 5km to 10 km or even more to avail of the services of such society.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It can be seen from the Table 40 that out of a total of 802 inhabited villages in Sitamarhi district more than 49.5 percent (397) villages are situated at a distance of 5 to 15 km from any nearest statutory town. Over 45 percent (384) villages are situated at a distance of 16 to 50 km, and 2.2 percent (18) of such villages are situated at a bit closer distance of less than 5 km from their nearest statutory town.

Generally, availability of different facilities to villages is influenced by the nearness of big urban centre to such villages. In present case, it is clear that educational facilities are available to 728 (90.8 %) villages only at various distances within 50km from the urban centre. 216 (26.9%) villages are having medical facilities at a various distance but within 50km from the urban centre. Post office including telegraph and post and telegraph office are available in 248 (30.9%) villages which are situated at various distance of less than 5 km to 50 km. 106 villages have telephones, 156 have facilities of transport and communications. 88 villages have Banks, 170 have agricultural credit society and 345 villages are linked with pucca approach road. These amenities are available at a distance of less than 5 km to 50 km only from nearest statutory town.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It is obvious from the table that more populous villages are generally equipped with a comparatively higher proportion of most of the amenities, which are required for better living in modern days. Educational facilities are available to all the 33 villages (100%) having the highest population of 10,000 and more. Educational facility is available to over 93 to over 96 percent villages having of different population ranges, between 1000 to 9999. This facility is available to only 84 and over 44 percent villages having 500-999 and 1 to 499 respectively. Comparatively lesser populated villages have lesser proportion of medical facility, 97 percent to over 99 percent villages of different population ranges avail of the facility of improved drinking water. In 75.3 percent and 90.9 percent comparatively populous villages having range of 5000-9999 and 10,000+ respectively have Post office. This facility is available to 31.3 percent villages having a comparatively lesser population range of 2,000 to 4,999. Other villages having lesser population have further lower proportion of this facility. Similarly telephone facility is available to over 31 percent larger villages only having 5,000 and more population. Similar is the trend so far transport and communications, Banks, Agricultural Credit society, Pucca approach road and power supply facilities are concerned.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Bairgania	19	4,265	79.0	55.5
2	Suppi	36	8,479	73.3	58.7
3	Majorganj	27	7,552	82.9	51.6
4	Sonbarsa	61	17,534	78.0	32.1
5	Parihar	82	21,212	76.5	20.6
6	Sursand	52	14,471	84.1	26.8
7	Bathnaha	87	19,764	82.8	57.0
8	Riga	39	12,831	66.2	13..5
9	Parsauni	22	5,914	62.7	42.6
10	Belsand	36	6,654	76.1	56.5
11	Runisaidpur	96	26,020	74.6	59.9

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001 (*Concld.*)

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
12	Dumra	74	18,539	74.7	28.7
13	Bajpatti	56	13,903	84.5	39.7
14	Charaut	16	7,324	75.2	38.6
15	Pupri	45	9,003	71.1	38.6
16	Nanpur	31	10,711	71.6	50.1
17	Bokhara	23	8,473	78.5	37.1
	District Total:	**802**	**212,649**	**76.6**	**40.4**

Note : Cultivable area = irrigated area + unirrigated area

Sitamarhi district has 802 inhabited villages and an area of 212649 Hectares of which 76.6 percent is cultivable. Irrigated area is only 40.4 percent of the total cultivable land in the district. C.D. Block wise distribution of land use reveals that C.D. Block Runisaidpur with 96 villages has the largest total area of 26020 hectares of which 74.6 percent land is cultivable. Irrigated area is 59.9 percent of the total cultivable land in Runisaidpur C.D. Block. Bajpatti C.D. Block has the largest proportion of cultivable land (84.5%) area but it has only 39.7 percent of irrigated land out of cultivable area. Out of 17 C.D. Blocks in the district 15 Blocks have more than 70 percent of its total area as cultivable land. Parsauni has the lowest (62.7%) proportion of cultivable area. Out of 17 C.D. Blocks only 7 C.D. Blocks have more than 50 percent of its total cultivable land under irrigation. Runisaidpur has the highest (59.9%) while Riga C.D. Block has the lowest (13.5%) proportion of its cultivable land under irrigation.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Bairgania (NA)	2.2	0.1	2.1	2.1	2.1	0	0	0	0
2	IV Belsand (NA)	0.2	0	0.1	0	0	0	0	0	0
3	IV Dumra (NA)	5.9	3.2	2.7	5.1	0	0	0	0	5.1
4	IV Janakpur Road (NA)	2.3	0.4	1.9	2.3	2	0	0.3	0	0
5	II Sitamarhi (M)	1.2	1.1	0	0	0	0	0	0	0
	District Total	**1.8**	**0.9**	**0.9**	**1.2**	**0.7**	**0**	**0**	**0**	**0.5**

It is very clear from the table 43 that there are 4 Notified Areas and one Municipality in the district of Sitamarhi. Percapita total receipt is 1.8 of which 0.9 come from taxes and 0.9 from all other sources in the district. Among statutory towns, Dumra has the highest receipt (5.9) of which 3.2 come from taxes and 2.7 from other sources. On expenditure side total per capita expenditure of statutory towns in the district is 1.2 of which 0.7 goes to general administration and 0.5 is spent on other(s) In the matter of per capita expenditure Bairgania(NA) occupies the top position among all statutory towns of the district.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bairgania (NA)	3.2	0.9	1.4	0.6	0.6
2	Belsand (NA)	5	0.6	0.6	0.6	0.6
3	Dumra (NA)	6.2	4.1	2.1	0.7	0.7
4	Janakpur Road (NA)	3.7	1.5	1.5	0	0
5	Sitamarhi (M)	7.7	1.2	0.5	0	0.5
	District Total	**5.9**	**1.4**	**1.0**	**0.3**	**0.4**

The distribution of schools/colleges in statutory towns of the district reveals that only 5.9 primary, 1.4 junior secondary/middle, 1 secondary/matriculation, 0.3 senior secondary and 0.4 college exist for every 10,000 urban population residing in the 5 statutory towns of the district. Here again, Dumra NA has highest number of these educational facilities except for primary schools.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bairgania(NA)	0
2	Belsand(NA)	3
3	Dumra(NA)	6
4	Janakpur Road(NA)	4
5	Sitamarhi(M)	16
	Distrct Total	**9**

It is clear from the Table 45 that only eight beds for every 10,000 population are available in the medical institutions of the district. Sitamarhi(M) has the highest number of bed (16) among different statutory towns.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Bairgania(NA)	34,836	1,818	5.2
2	Dumra(NA)	14,535	1,340	9.2

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
3	Janakpur Road(NA)	13,358	4,200	31.4
4	Sitamarhi(M)	72,744	25,400	34.9
	District Total	**135,473**	**32,758**	**24.2**

Slum dwellers have been returned from only 4 statutory towns as shown in the table including Sitmarhi Municipality during Census of India 2001. Out of a total population of 135,473 under 4 statutory towns under consideration 32,758 or 24.2 percent are slum dwellers. Amongst towns, Sitamarhi(M) has the highest (34.9%) of it. Lowest proportion (5.2%) of slum dwellers have been returned from Bairgania(NA).

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bairgania (NA)	Gur Hey Rope	Sugarcane Hey Rope Banana
2	Belsand (NA)	Tiles Biscuits Ice	Sugarcane Gur Ice
3	Dumra (NA)	Biri Biscuits	Paddy Wheat Gur
4	Janakpur Road (NA)	Mustard Oil Furnitures Rice	Rice Wheat Maize

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001 (*Concld.*)

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
5	Sitamarhi (M)	Biri Biscuits Ice	Rice Sugar Pulse

It is obvious from the table 47 that under Bairgania (NA) Gur and Hey Rope are manufactured while Sugarcane, Hey Rope and Banana are exported. Belsand(NA) manufacture Tiles, Biscuits and Ice and exports Sugarcane, Gur and Ice. Dumra(NA) produces Bidi and Biscuits and exports Paddy, Wheat and Gur. Janakpur Road(NA) produces Mustard Oil, Furnitures and Rice while exports Rice, Wheat and Maize. Sitamarhi Municipality, the headquarters of Sitamarhi district produces Bidi, Biscuits and Ice and exports Rice, Sugar and Pulses.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The tenure status of households in Sitamarhi district (Table 48) reveals that apart from owned and rented dwelling places, people live in some other places also which are neither owned nor rented. However, 3,470 households are such who have no exclusive room for them even though they live in own houses. Out of these 3,294 live in rural and 176 live in urban areas. In case of Scheduled Castes

and Scheduled Tribes out of a total of 679 Scheduled Castes and 18 Scheduled Tribes households 640 and 16 respectively live in rural and remaining 39 and 2 respectively live in urban areas who own house but have no exclusive room. Under this tenure status 267,506 general households live only in one room of which 259,296 live in rural and 8210 live in urban areas. Among such dwellers 48,753 and 1236 belong to Scheduled Castes and Scheduled Tribes respectively. 47,155 Scheduled Castes and 1,226 Scheduled Tribes live in rural and 1,598 Scheduled Castes and 10 Scheduled Tribes live in urban areas.

In Sitamarhi district, a total of 181,277 households who owned a house and occupied only two rooms 174,646 live in rural and 6631 live in urban areas. Out of a total of 18,152 Scheduled Castes and 466 Scheduled Tribes households owning and occupying a two room dwelling house, 17,482 Scheduled Castes and 451 Scheduled Tribes live in rural areas while 670 Scheduled Castes and 15 Scheduled Tribes live in urban areas.

Of a total of 56,521 general households who owned and occupied 3 rooms dwelling, 52,759 and 3,762 of them live in rural and urban areas respectively. Of 3,782 Scheduled Castes and 108 Scheduled Tribes, a total 3,580 Scheduled Castes and 99 Scheduled Tribes live in rural areas while 202 Scheduled Castes and 9 Scheduled Tribes were live in urban areas of the district.

A total of 33,018 households resided in owned houses and occupied more than, 3 rooms each of which 28,732 live in rural and remaining 4,286 live in urban areas. A total of 1,546 Scheduled Castes and 65 Scheduled Tribes own and occupy than 3 or more roomed houses of which 1,409 and 55 Scheduled Castes and Scheduled Tribes respectively live rural areas while 137 Scheduled Castes and 10 Scheduled Tribes live in urban areas of the district. The median number of rooms occupied by the owners of dwelling house is one in rural and 2 in urban areas for general and Scheduled Tribes households while it is one for Scheduled Castes in both rural and urban areas.

Apart from owned houses, the tenure status position reveals that a good number of general and Scheduled Castes/Scheduled Tribes households also live in rented and other sorts of dwelling places occupying either no exclusive room or occupying one, two, three and even more than three rooms in rural/ urban areas of the district which can be viewed from the table. But the most remarkable situation regarding rented and other dwelling places is comparatively higher median number of rooms occupied under these tenure status.

	District Total:	**38.2**	**28.2**	**33.6**	**36.4**	**29.1**	**34.6**	**74.0**	**10.7**	**15.2**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roof are made of pucca materials i.e. where burnt bricks, G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roof made of Kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the above Table 49 that the proportion of households having permanent houses constitute 36.4 percent of the total rural households in the district followed by 34.6 percent having temporary houses and 29.1 percent having semi-permanent houses.

In the case of urban households in the district, however, the maximum proportion of households accounting for 74.0 percent live in permanent houses followed by 15.2 percent living in temporary houses and 10.7 percent living in semi permanent houses.

Among C.D. Blocks, Bokhara C.D. Block has the maximum proportion of rural households living in permanent houses (45.3%) followed by Dumra (44.2%) and Nanpur C.D. Block (42.7%). Parihar C.D. Block has the minimum proportion of rural households living in permanent houses with 28.5 percent.

In the case of temporary houses, Runisaidpur C.D. Block has the maximum proportion of rural households living in temporary houses (44.3%) followed by parihar (41.4%). Nanpur C.D. Block has the minimum proportion (21.3%) of rural households living in temporary houses.

In the case of semi permanent houses, Charaut C.D. Block has the highest proportion of rural households (42.3%) followed by Nanpur C.D. Block with 36.1 percent. Bairgania C.D. Block has the lowest proportion (19.7%) of rural households living in semi permanent houses.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as'Improved'or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

It is obvious from the table that except C.D. Block Nanpur improved drinking water facilities are available to about 80 to over 90 percent households of all the C.D. Blocks in Sitamarhi district. In Nanpur improved drinking water is available to 77.3 percent of its total households. The average for the district is 85.2 percent for rural and 91.7 percent for urban areas. Electricity in rural area is available to only a few percent of the total households. Lowest availability to 0.7 percent households has been recorded under Bokhara C.D. Block while highest to 7.0 percent households has been recorded in Dumra rural area. Electricity is available to 57.9 percent urban households in Pupri followed by Dumra urban with 55.1 percent. The average for the district is 3.5 percent for rural and 41.1 percent for urban areas of the district.

Bathroom facility is available to over 4 to over 7 percent to rural households in most of the C.D. Blocks in Sitamarhi district. 7.5 percent households in Dumra followed by 7.1 percent households of Bairgania C.D. Block set the upper limit and 4.4 percent households of Charaut sets the lowest limit of availability of Bathroom facility in rural area of various C.D. Blocks. Availability position of Bathroom is comparatively better in urban areas in which it is available to 41.9 percent households in Dumra followed by 31 percent households of Pupri. Bathroom facility is available to only 5.1 percent households in Belsand urban area. The average availability of Bathroom in rural areas of the district is 5.9 percent and 30.2 percent in urban areas. A similar trend can be observed in case of toilet and drainage availability in rural and urban areas of the district.

TABLE 51 : NUMBER AND PERCENTAGE OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It would be seen from the table that fire wood, crop residue and cowdung cakes are used as fuel for cooking by 96.4 percent of total households in rural areas and 66.1 percent households in urban areas of the district.

In rural areas the highest proportion of total households using firewood as fuel for cooking is in Nanpur C.D. Block (36.7%) and the lowest (18.5%) is in Parsauni C.D. Block whereas 59.5 percent of the urban household of Pupri use fire wood for cooking.

The highest proportion of total households use crop residue is in Majorganj and Parsauni (54.6% each) C.D. Blocks and only 19.5 percent of the households in Charaut C.D. Block use it for cooking. 33.7 percent of the urban households of Belsand C.D. Block use crop reside as fuel for cooking.

The highest proportion of total household of Charaut C.D. Block use cow dung cake (51.7%) and lowest, 15 percent of total household of Suppi use it. On the other hand 17.5 percent of total urban households of Belsand use cowdung cake as fuel for cooking. Electricity, Coal/Lignite/Charcoal, Biogas etc. are not popular fuel for cooking either in urban or in rural areas of the district.

Only kerosene is used by 9.3 percent of total urban households of the district and the highest users (13.5%) has been reported from Pupri urban area which comes only next to cooking gas (LPG). The highest proportion (37.2%) of total urban households of Dumra C.D. Block use L.P.Gas as fuel for cooking against district average(urban) of 22.4 percent.

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It would be seen from the Table 52 above that there are 71,228 households accounting for 12.9 percent of the total households in the district availing banking services. In this regard the highest proportion of households can be observed in Dumra C.D. Block (22.1 percent) whereas the same is lowest in Bokhara C.D. Block (8.9%). Radio/Transistors are available to 24.8 percent of the total households of the district and highest proportion 32.6 percent has been recorded in Bajpatti C.D. Block. The proportion of the same asset is lowest (18.9 %) in Majorganj C.D. Block . 5.3 percent of the total households of the district possess Televisions. In this regard the highest proportion of households is in Dumra C.D. Block (14.5%) whereas it is lowest in Bokhara C.D. Block (2.8%).

As regards telephone there are only 5085 households accounting for only 0.9 percent of the total households in the district availing telephone services, In this regard the highest (2.9%) is in Dumra C.D. Block whereas its concentration is lowest (0.3 %) in Charaut C.D. Block.

34.2 percent of the total households in the district own bicycle. Its highest (42.1%) proportion has been recorded in Bajpatti C.D. Block whereas its concentration is lowest (27.1%) in C.D. Block Majorganj.

Scooter, Motercycle and Moped are owned by only 2.1 percent of the total households of the district. Its highest proportion (5.5 %) is in C.D. block Dumra whereas its lowest proportion. (1.3 %) has been is recorded in Bairgania C.D. Block . Car, Jeep and Van etc are available to only 0.6 percent households of the district and there are negligible owners of these assets in various C.D. Blocks. On the contrary to this none of these specified assets is available to majority (56.5 %) of the total households of the district Sitamarhi.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

In the year 1994 the erstwhile Sitamarhi district was bifurcated into two districts viz; Sitamarhi and Sheohar. Areas falling under Sheohar, Piprahi and Tariyani Chowk Community Development Blocks of old Sitamarhi district constitutes a new district of Sheohar. Rest of the area constitutes new Sitamarhi district.

Fairs and festivals are held regularly in the district by different communities in complete harmony

(ix)Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Janki Temple, Sitamarhi

About 1.5 kms. off the railway station and the bus stand, this is the birth place of Sita. Janki kund is adjacent south of the temple.

Janaki Temple, Panaura

This is about 5 Kms. west of Sitamarhi. This place claims the honour of being the birth place of Sita.

Haleshwar Asthan

This is 3 Kms. north-west of Sitamarhi. As the myth goes, the king Videha had founded a temple of Lord Shiva on the occasion of Putra Yesthi Yajna. This temple was named as the Haleshwarnath temple.

Panth-Pakar

Panth-Pakar is 8 Kms. north-east of Sitamarhi. It is said that after her marriage, Sita was carried in a 'palanquin' to Ayodhya by this route. An old banyan tree is still standing here under which she is said to have rested for a while.

Bodhayan-Sar

This is the sacred place, where Maharshi Bodhaya had written number of epics. The great Grammarian 'Panini' was one of his disciples. The renowned saint Deoraha Baba had laid the foundation of a Bodhyan temple here some 37 years ago.

Baghi Math

Some seven kilometres north-west of Sitamarhi, in Baghi village, there is a big Hindu monastery which contain 108 rooms. This is a famous place for worship and performing yajna.

Pupri

There is a famous Baba Nageshwarnath (Lord Shiva) temple here. It is said that Lord Shiva himself had appeared here as Nageshwar Nath Mahadeo

Goraul Sharif

Goraul Sharif is situated some 26 kms. from Sitamarhi town. This is a very sacred place for Muslims, after Biharsharif and Phulwarisharif.

Shukeshwar Asthan

This place is situated some 26 Kms. north-west of Sitamarhi. This was the worship place of Shukadev Muni, the great saint. A big and ancient temple which has been dedicated to, and named after Shukeshwarnath (Lord Shiva) still exists here.

Sabhagachhi Sasula

This is a place of social and cultural importance where the Maithil Brahmins gather every year and hold matrimonial negotiations on a large scale, which finally leads to the marriages. This is a symbol of the ancient culture of Mithila. This place is some 20 Kms. west of Sitamarhi town.

(x)Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

The district is well known for its Janaki Asthan temple about which the legend is that Sita appeared from the earth when the legendry king Janak was excavating the land.

The district is prone to flood during the rainy season.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publication which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity

manufactured in village, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district Census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent Census. Before 2001 Census, village location code number used to change from one Census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district Census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in English and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past Censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different Censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different Censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural

and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled Castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

APPENDIX VIII - VILLAGE DIRECTORY

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT (C. D. BLOCK WISE)

Serial number	Name of Gram Panchayat and location code number	Area of Gram Panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Income and expenditure of Panchayat / Gram Panchayat (in Rs.'000)	
			Number	Location code numbers					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11
N.A.										

Note : N.A. stands for information not available.

APPENDIX IX - VILLAGE DIRECTORY

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Serial number	Name of C. D. Block	Village location code number	Name of village	Number of girls school			
				Primary School	Middle School	Matriculation / Secondary School	Higher Secondary / PUC / Intermediate / Junior college
1	2	3	4	5	6	7	8
N.A.							

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Sitamarhi	1991	100	121	131	145
	1981	100	128	147	163

Here q(1), q(2), q(3) and q(5) denote estimates of child mortality for the different ages 1, 2, 3 and 5 respectively for the children of the district and the state. It is evident that child mortality for the district for both Censuses (1981 & 1991) are in higher-side than the state average.

Annexure III shows that the fertility measures (from CBR to GMFR) for 1991 Census are lower for Sitamarhi district than the state. Also the child woman ratio and number of children ever born per woman in age-group 45-49 are lower in the district of Sitamarhi than the state of Bihar. In case of mean age at marriage the district and State figures are the same.

ANNEXURE - IV (A)

	Born in other states			Born in other countries			Total migrants		
State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Sitamarhi	3,662	709	2,953	40,384	871	39,513	665,676	41,256	624,420
	(0.6)	(1.7)	(0.5)	(6.1)	(2.1)	(6.3)	(100.0)	(100.0)	(100.0)

The growth of population for any area (be it any district or state) is influenced by the pattern of migration (in-migration as well as out-migration). However, for want of data on out-migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on growth of population,although such impact may not be much in most of the cases.

It is apparent from Annexures IV(A) that out of 213,070,20 and 199,891,95 migrants in the State as per place of birth in 1991 and 2001 Censuses, the share of Sitamarhi district is 618,066 and 665,676 i.e., 2.9 and 3.3 percent respectively of state's total.Female migrants out number the male migrants both for the district and the state. In case of percentage of migrants born in Bihar there is wide gap between male and female population. With respect to percentage figures of born elsewhere in the district of enumeration the district percentages (75.6 and 74.5) are more than the state percentage of 67.7 and 68.4 respectively during 1991 and 2001 Censuses.

When we compare the percentage figures of migrants born in other districts of Bihar it is crystal

clear that the district percentage (17.4 & 18.9) are lower than the state percentages (26.4 & 22.7) during both the Censuses.The percentage figures for born in other states are lower for the district than the state while the percentage figures for born in other countries are higher in the district than the state during both the Censuses.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Sitamarhi		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	575,436	541,723	33,713
(1) within the state		(100.0)	(84.7)	(15.3)	(100.0)	(94.1)	(5.9)
	Rural	19,010,120	16,570,646	2,439,474	568,057	538,113	29,944
		(94.7)	(82.6)	(12.1)	(98.7)	(93.5)	(5.2)
	Urban	990,737	375,267	615,470	7,339	3,590	3,749
		(4.9)	(1.9)	(3.1)	(1.3)	(0.6)	(0.6)
(2) In other states of India	Total	1,049,969	575,484	474,485	2,110	1,260	850
		(100.0)	(54.8)	(45.2)	(100.0)	(59.7)	(40.3)
	Rural	800,601	512,444	288,157	1,040	580	460
		(76.2)	(48.8)	(27.4)	(49.3)	(27.5)	(21.8)
	Urban	243,448	60,040	183,408	1,060	670	390
		(23.2)	(5.7)	(17.5)	(50.2)	(31.7)	(18.5)

Of the total intra state migrants in the state 82.6 percent were rural to rural, 3.1 percent from urban to urban,12.1 percent from rural to urban and 1.9 percent from urban to rural. In case of Sitamarhi district, of the total intra state migrants, 93.5 percent were from rural to rural, 0.6 percent from urban to urban, 5.2 percent from rural to urban and 0.6 percent from urban to rural.

In case of migrants from other states in Bihar, 48.8 percent were from rural to rural, 17.5 from urban to urban, 27.4 percent from rural to urban and 5.7 percent from urban to rural. In case of Sitamarhi district, on the other hand of the total migrants from other states of India, 27.5 percent were from rural to rural, 18.5 percent from urban to urban, 21.8 percent from rural to urban and 31.7 percent from urban to rural.

The number of migrants in the state who were born in other states of India according to 1991 Census was 10.5 lakhs while in the district of Sitamarhi the corresponding figure was 2,110.

Annexures IV(C) deals with interstate migrants to the district of Sitamarhi and the state of Bihar. The district received only 0.2 percent of the migrants from outside the state in comparison to total migrants coming to state in 1991 and 2001 Censuses. The State of West Bengal is major contributor as regards immigration, both in the case of district and the state in 1991 Census where as it is State of Uttar pradesh which is the major contributor as regards immigration both in the case of district and the state in 2001 Census. West Bengal which comes after Uttar Pradesh contributes 20.5 percent of total immigrants coming from outside the state in 2001 Census.

Annexures V(A) and V(B) above show religion-wise distribution of population of 1991 and 2001 Census. Both, for the state of Bihar and Sitamarhi district, Hindus form great chunk of society with 82.4 percent and 80.3 percent respectively in 1991 Census and with 83.2 percent and 78.7 percent respectively in 2001Census. The percentage of Hindu population is slightly higher in the state than the district whereas in case of Muslims the percentage in the district is higher than the state in both the Censuses. It is apparent from Annexure V(B) that Nanpur C.D. Block has highest proportion of Muslims during both the Censuses. The proportion of population of other religious communities is almost negligible in the district of Sitamarhi and its C.D. Blocks.

It is quite evident from Anexures(A,B,C & D) that Sitamarhi district as well as the state have a relatively higher proportion of never married males and married females both in 1991 and 2001 Censuses. This may be attributed to the fact that women enter into marital knot at comparatively younger ages than males. As against 54.2 and 53.6 percentages of never married males in 1991 and 56.3 and 55.4 in 2001 Census in Bihar state and Sitamarhi district respectively, the corresponding percentages among females in 1991 are 45.2 and 42.7 and 47.3 and 46.0 percent in 2001. While the state has slightly lower proportion of male and female widowed, the corresponding figures for Sitamarhi district are slightly higher both in 1991 and 2001.

While analyzing marital status by broad age groups one finds that married females outnumber married males in the age group 10-14 both in the year 1991 and 2001 suggesting that child marriage among females is more prevalent than males. However, it is interesting to note that the proportion of married males and females in the age group 10-14 or 0-14 is comparatively less in Sitamarhi district and it is true for both 1991 and 2001 Censuses. It is also found that child marriage is more prevalent in rural areas of the state and the district than urban areas.

It is also significant to note that the proportion of never married females in Sitamarhi district and state as a whole in the age group 15-19 and above is much lower than the never married males. The proportion of divorced or separated males and females is slightly lower in Sitamarhi district as compared to Bihar state and are true for both 1991 and 2001 Censuses.

Literacy is one of the important demographic characteristics. Apart from collecting data on number of literate, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the Census has already been explained in the beginning of this publication.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 Census was 38.5 percent. Now it has risen to 47.0 percent in 2001 Census. The corresponding propotions for Sitamarhi district in 1991 and 2001 are 28.1 and 38.5 percent respectively.

Annexures VII(A),VII(B),VII(C) and VII(D) furnish informations regarding absolute number of

illiterates and literates in Bihar state and Sitamarhi district as also percentage distribution of literates by different level of education by different age-groups in 1991 and 2001 Censuses.

A break up of literate population by various educational level (of 1991 Census) show that 20.3 percent males and 27.2 percent females in the state are literate but have not attained any educational level. These proportins have risen to 28.4 and 35.8 percent (including Below Primary)for males and females respectively in the state in 2001Census. It can be also seen from the Annexures that more or less same trend prevails in Sitamarhi district during 1991 and 2001 Censuses. It is interesting to see that at lower levels of education (up to 'Middle') the female's proportions are on higher side than the male's proportions in state as well as in the district in both the Censuses.

According to 1991 & 2001 Censuses the position of literates by different level of education in Sitamarhi district is more or less the same as observed in case of Bihar.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Sitamarhi		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Hindi	652,825	24.3
Hindi	14,524,035	17.5	Urdu	437,290	16.3
Magadhi/Magahi	12,132,383	14.6	Maithili	116,595	4.3
Maithili	11,830,684	14.3	Bhojpuri	6,020	0.2
Urdu	9,457,544	11.4	Marwari	1,004	0.0

Bengali	442,352	0.5	Bengali	350	0.0
Santali	382,866	0.5	Nepali	224	0.0
Kurukh/Oraon	57,952	0.1	Magadhi/Magahi	217	0.0
Marwari	27,152	0.0	Arabic/Arbi	194	0.0
Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	1,467,140	54.7
Total Population	**82,998,509**	**100.0**	**Total Population**	**2,682,720**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Sitamarhi district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returning by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population whereas in the district of Sitamarhi 16.3 percent of the district population have returned it as their mother tongue. Hindi as mother tongue has been returned by 24.3 percent of Sitamarhi district's population. Maithili has got third position with 4.3 percent of the district population having returned it as their mother languages. Bhojpuri has been returned by only 0.2 percent of the district population except these languages analysed above both for the state and the district, other have been returned by insignificant proportions of the respective population of the state and the district as mother tongues as per 2001 Census.
