DISTRICT MAP

MITHILA PAINTING, MADHUBANI

Started with BHITTI CHITRA (painting on wall) by women folk in KOHBAR (RAM-JANKI KATHA) style with natural colours derived from leafs and flowers. Mithila painting or Madhubani form of painting has come to stay as internationally acclaimed form of painting. The form of painting has got basically two designed namely KACHNI (live painting) and BHARNI (colour painting). The subject is usually marriage ceremony as in the picture above in which the bridegroom is being asked questions by the women from the Bride side to know the intelligence of the boy.

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

District Highlights – 2001 Census

1. Madhubani ranks 4th in terms of population (35,75,281) and 5th in terms of area (3,501 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Madhubani is the12th densely populated district in the state with 1021 persons per sq.km as against the state's 881.
3. Madhubani ranks 5th in terms of sex-ratio (942) against the state's 919.
4. There are 77 uninhabited villages (out of 1,111 total villages) in the district of Madhubani.
5. Karmegh (under Laukaha C.D. Block) is the most populated village (31,972) and Motipur (under Jhanjharpur C.D. Block) is the least populated village (3) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Benipatti has the highest number of villages (103) in the district and C.D. Block Kaluahi has the lowest number of villages (20).
8. Karmegh (under Laukaha C.D. Block) has the largest area (3,876 hectare) and Raghonagar (under Lakhnaur C.D. Block) has the smallest area (1 hectare) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 98.1 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format

of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as

possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The newly created district of Madhubani carved out of the old Darbhanga district in the year 1972 as a result of reorganization of the districts in the State. This was formerly the northern subdivision of Darbhanga district. It consists of 18 Development Blocks. Bounded on the north by a hilly region of Nepal and extending to the border of its parent district Darbhanga in the south, Sitamarhi in the west and Saharsa in the east, Madhubani fairly represents the centre of the territory once known as Mithila and the district has maintained a distinct individuality of its own. The geographical features of the district, assuring a certain amount of security and seclusion, are responsible for the evolution of a somewhat characteristic culture. It was as a result of this assured security on account of geographical features that traditions could grow unhampered and the literacy pursuits in different directions could continue unabated through the ages. Naturally, therefore, the philosophical discussions and erotic poems found a fertile soil in the district. The district has a number of important villages and could be said to be the core of Maithili culture.

Practically there are no prehistoric sites in the district though remains of the earliest aboriginal population can be seen in some parts of district. Hanter in his 'Statistical Account' has referred to the existence of the people, known as the Tharus in the erstwhile old subdivision of Mandhubani. The bhars are also believed to have belonged some aboriginal race though nothing positive about them is known from any reliable source. The Bhar settlements in the north-eastern part of the district indicate that they possibly wielded some power in the remote part. From the work of Dr. Suniti Kuamr Chatterji entitled 'Kiratajanakirti' it appears that Kiratas also inhabited the district for a considerable period. The Mahabharat throws light on the Kirata culture. Prior to the Aryanisation of this land the area seem to have been under the aboriginal population and Shvia worship was predominant. The association of the family Janaka with the worship of lord Shiva is an indication of the fact that though they formed the vanguard of Aryan culture they ahd to compromise with the local religious belief, dominated by the Shaiyas. The kingdom of Videha included a greater portion of the district. In course of time it was ruled by a successive line of kings commonly known as Janakas.

If tradition is to be relied upon, the Pandavas during their exile stayed in some portion of the present district and Pandaul (block headquarters) is associated with them. Janakpur, capital of Videha is situated at a short distance to the north-west of the district in the Nepalaese territory and tradition points to the village of Phulbar in the north-east corner of the Benipatti thana as the flower-garden where the kings' priests used to gather flower for worship and identifies its temple with that of Devi Girija, which was worshipped by Sita before her marriage with Rama. Legends and traditions associated this district with a number of sages and master-minds of ancient times. Village Kakraul is associated with Kapil, Ahiari with Ahilya wife of Gautama, Bisaul with Vishwamitra and Jagban with Yajnavalkaya (ascribed to the great saga of Mithila).

There is historical evidence to show that Videha (non Mithila) was one of the eight republics of Vrijian confederacy long before the advent of Buddha. Though the headquarters of the Lichchavis was at Vaishali, they wielded political power over certain parts of the present district of Madhubani also. The growing powr of the Vrijji confederacy brought them into collision with the kingdom of Magadh.

Bimbisar, the founder the Magadhan imperial power aspired from imperial power and the ambition ran in the veins of his son, Ajat Shatru as well. Ajat Shatru subdued the Lichchhavis and conquered the whole of North Bihar. He brought Mithila under the control of the Magadhan empire. The history of the Lichchhavis comes down unbroken to the days of the imperial Guptas. The Lichchhavis founded a kingdom in Nepal and even the earliest royal house of Tibet owed its origin to the Lichchavis of Vaishali. The migration of Lichchavis to Nepal and Tibet marks a great event in the history of North Biahr and the district of Madhbani being at the core of the region must have palced a dominant part in this great trek

as the route to Nepal lay through this district.

Madhubani msut have shared in the religious and cultural ferment which so deeply stirred the hearts of the people of the Gangetic Valley in the 6th century B.C. Since the whole of North Bihar was deeply influenced by the teachings of two great reformers (Mahavira and Buddha), it is only natural to infer that the people of Madhubani actively participated in the propagation of these reform movements. According to one theory Mahavira himself was a Vaideha domiciled in the suburb- of Vaishali and was the son of a daughter of Mithila. Buddha also visited Mithila thrice and he had a great love for Vaishali. It may be further noted here that Buddha's most devoted disciple, Anand was a Vaidehamuni, a monk of the land of Videhas. Both the Jain and the Buddhist literature contain innumerable references to the district of Madhubani and its neighbouring territories. Very little is known about the history of Madhubani from the time of the Kusanas to the rise of the Gutpas. If the traditional belief of Kanishka's taking away of Buddha's alms bowl can be given any credence, then it may be presumed that the Kushans ruled over the portions of North Bihar including Madhubani. According to a tradition in Mithila, the village Andhra Tharhi is associated with the rule of the Andhras (Satvahanas) in Bihar.

Between the fall of the Kushanas and the rise of the Guptas, the Bharasivas are associated with the Bhars of the erstwhile Darbhanga, Saharsa and North Munger. Numerous villages of the district are associated with the Bhars and they claimed power down to the 15th century. It also appears that after the fall of the Kushanas, the Lichchavis regained political power and it was as a result of the matrimonial alliance between the Lichchavis and the Gutpa that the latter came to power in Magadha.

As a result of the aforesaid matrimonial alliance the Gupta succeeded in carving out a powerful empire. The Gutpa renaissance brought in its trail the revival of the classical Sanskrit language. The temple at Uchchaith is fondly associated with Kalidasa though there is nothing positive to show that Kalidasa was a Maithil.

After a temporary period of instability, Madhubani came under the control of the Oinwaras, also known as the Kameshwara, Thakura or the Sugauna dynasty. These Hindu chiefs were left undisturbed by the Muslim conquerors who had by then conquered the whoel of Mithila. When Haji Ilyas of Bengal divided Tribut into two parts, the Oinwar Raja shifted his capital of Sugauna near Madhubani.

The district thereafter remained a part of the Mughal Subah. There was no event of great significance during the next century and a half. The Aghans who had settled in the district became active when they saw Mughal power declining. Alivardi Khan, however, hurried with his forces and inflicted a crushing defeat on the Afghans and quietened them for ever.

British Period

The decisive victory of the British in the battle of Buxar in 1764 gave them indisputed sway over the Lower Provinces of Bengal. As a consequence, Madhubani, along with other parts of Bihar, passed under the control of British. The history of the district thereafter is merged with the history of British rule in India. The British administrators took steps to establish law and order. Besides the trouble-mongers in Mithila, they had also to deal with the incursions of the Nepalese. The trouble with Nepal culminated in the Indo-Nepalese war. After concluding peace with Nepal, the British administrators had a comparatively quiet time till the 1857 movement.

In 1857, patriotic fervour raged high in Mahdubani district as in many other districts of Bihar. Later the call of the non-co-operation movement also found adequate response in the district of Madhubani and many people volunteered to serve the cause championed by Mahatma Gandhi. Khadi spinning and weaving was adopted as a must for congress workers. A Khadi centre was opened at Madubani. It gradually expanded its activities. Khadi became very popular and Madhubani soon emerged as a renowned centre of Khadi production. The popularity of Khadi weaving and spinning in the district went a long way in inspiring the people towards the nationalist cause. Madhubani district played an important role in the country's freedom struggle.

(iii) Administrative set up

The district of Madhubani carved out of the old Darbhanga district in the year 1972 as a result of reorganization of the districts in the State. This was formerly the northern subdivision of Darbhanga district. Bounded on the north by a hilly region of Nepal and extending to the border of its parent district Darbhanga in the south, Sitamarhi in the west and Saharsa in the east, Madhubani fairly represents the centre of the territory once known as Mithila and the district has maintained a distinct individuality of its own. There are altogether 21 Community Development Blocks in the district namely Madhwapur, Harlakhi, Basopatti, Jainagar, Ladania, Laukaha, Laukahi, Phulparas, Babubarhi, Khajauli, Kaluahi, Benipatti, Bisfi, Madhubani, Pandaul, Rajnagar, Andhratharhi, Jhanjharpur, Ghoghardiha, Lakhnaur and Madhepur. The district consists of four sub-divisions namely, Jainagar, Phulparas, Benipatti, Madhubani Sadar and Jhanjharpur. Ghoghardiha(NA), Jainagar(NA), Jhanjharpur(M) and Madhubani(M) are the four towns in the district. Total number of villages in the district are 1,111. Madhubani (M) is the headquarter of the district.

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has four subdivisions headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are 21 C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration :

The Judges and Munshif magistrates are posted at district and sub-divisions who administer and deliver justice of different kind.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration :

The Superintendent of Police, Madhubani is the head of the district police administration who is generally from the Indian Police Service. In the subdivisions of the district, the Deputy Superintendents of Police are posted who keep control on police administration and belongs to Bihar Police Service.

(iv)Physical Features

The district consists for a vast low lying plain interested by numerous streams and marshes, but traversed also in parts by upland ridges. The land is generally high, specially in blocks of Benipatti, Madhubani, Jainagar, Ladania, Kaukaha and in the south of Phulparas, which contain stretches of highland. The soil of the district is highly calcarious. It is a mixture of clay and sand in varying proportions. In the major part of the district, clay or matiari is mostly found. The contains negligible proportion of sand and since it can retain moisture, it is suited to paddy cultivation.

In shape, the district resembles a parallelogram, its mean breadth from west to east being a little greater than its mean length from noth to south. It consists of a rich alluvial plain intersected by numerous rivers and streams issuing from the Nepal hills and running almost parallel to each other from north to south. The important rivers of the district are the little Bagmati, Kamala, Karai, Balan and Tilinga. The little Baghmati enters the district at Bishanpur Ugarpati about 16 Kms. west of Benipatti, and after being joined by its tributary the Dhaus near Bankuta, in the same block takes a south-easterly course, The Kamla river flwos south-ward from the hills and falls into the little Baghmati. This river frequently changes its course and its beds are found all over the north of the district. To the east of this river are little Balan and the Balan proper and the Tiluga which skirts around the eastern boundary of the district.

Climatic Conditions

The climate of this district is generally healthy. There are three well marked seasons, viz, a pleasant cold season, a hot, dry summer and the rainy season. The cold weather begins in November and continues upto February, though March is also somewhat cool. Westerly winds and dust storm beings to blow in the second half of March and the temperature rises considerably. May is the hottest month when the temperature goes upto about 42^{o}C. Rains set in

towards the middle of June when the temperature begins to fall and humidity rises. Though the rains continue till the end of September or the middle of October, these months are not so hot.

Rainfall

Madhubani district gets more rain than its adjoining districts. The rainfall in Madhubani town is nearer the district average. The rains usually start in the middle of June. The maximum rainfall occurs between the second half of July and first half of August. The average annual rainfall in the district varies between 1,000 and 1,500 mm. In a eyar. The district also gets some winter rain.

Flora and Fauna

Tirhut, which included Madhubani district also was formerly famous for the variety of its fauna in the days when forests covered large stretches of land which are now under the plough. The advancement of cultivation, the growth of population and the extension of means of communications have practically denuded the district of forest and also of wild buffaloes, tigers, elephants and leopards.

Among the birds found in the district are various kinds of quails, patridges and ducks, Snipes, cranes. Storks and sparrow are commonly seen.

Fish are plentiful. The common varieties are *rohu, bachwa, tengra, katla, singhi* and *boan*. Bilsa is found only occasionally.

Land use Pattern

As is mentioned in the district Gazetteer of Darbhanga (1962), until a century ago a great part of the land was unculitivated partly owing to the desolation caused by the terrible famine of 1770 and partly because of the oppression of the farmers by the landlords (Zamindars) for collection of revenue. From the middle of the 19th century, the position improved and reclamation of jungles started and the cultivated area has increased to three-fifths of the total area. There was still a considerable amount of swamp and marsh which remained under water for the greater part of the year. There were also many stretches of culturable jungles along the banks of streams and on the Nepal frontier where it was due to the large number of mango groves which strewed the land; this tract was the stronghold of Brahmanism and many of the groves had been planted with religious motives. The land in the district is mainly low and produce one crop in the year, and so the necessity for high cultivation does not arise. In a year of good rainfall no one would think of leaving rice lands fallow, and indeed, rice lands positively deteriorate when left uncultivated, as they become baked and hardened, the 'ails' or partitions between the fields become broken and the drains by which the land would be usually irrigated get filled up or obliterated.

So far as agricultural production is concerned, the district is mainly a paddy and sugar-cane growing area. The staple food consists of rice, *daal* and vegetables. Murhi (*fired* rice), *gur, chura* and curd constitute their favourite refreshment. Use of *biri*, tobacco, *pan* and *supari* (betelnut) is very common.

Irrigational facilities

Madhubnani, like other districts of North Bihar, is dependent for its crops on the local rainfall. The failure of premature cessation of rainfall is a disaster for the winter crops (especially rice) which is the main crop of the district. A considerable part of the district is flood prone. The standing crops are also affected by heavy rains as well as water flowing out of Nepal territory.

Artificial irrigation is also practiced in the district though its full potential has not been realized. There the numerous streams and rivers which intersect the district are utilised for the supply of water to the winter rice crop especially in Khajauli and Phulparas blocks. In Benipatti block nearly one third of net crop especially in Khajauli and Phulparas blocks. In Benipatti block nearly one third of the net cropped area is irrigated from a complete system of '*pynes*' or artificial channels led off from the Kamla river. Besides these sources, tanks are used all over the district for the irrigation of fields in their neighbourhood, either to expedite the transplantation of the winter rice seedlings or to prevent them from withering during a break in the rains. Tube-wells and artesian wells are also being untilsed for the purpose of artificial irrigation.

Mines & Minerals

The district is formed of think alluvial soil. Beds of Kankar or nodular lime stone of interior quality are occasionally met with. The river banks are generally made up of new alluvium formed by continuous deposit of soil by the rivers. Sulphure is the only mineral found in the district.

Industrialisation

Among the old-time industries which still continue is the manufacture of sugar and, in fact, sugar industry is one of the most important industries in the district and consumes the large output of sugar-cane.

Spinning and weaving are very old and highly developed handicrafts in the district. The Khadi Gramodyog Ceentre located at Madhubani is famous for weaving. There are still Maithil ladies who spin fine yarn and can weave beautiful textiles. It is said that some of them can spin the length of yarn needed for the sacred thread (Janaul) and put in the capsule of a cardamom. This speaks of the high quality of the handloom textile of the district. The famous Mahdubani Painting or the Mithila Paining as it is known in also the handiwork of the people especially the women of Madhubani.

Madhubani is essentially an agricultural district but there are also a number of small scale industries.

Livestock

The District Gazetteer of Darbhanga (1962) mentions that rearing of cattle is an important subsidiary occupation of the district. The district is well stocked with cattle, and the Khajauli and Phulparas blocks contain a large number of milch catele, draught cattle and agricultural stock of all kinds. These two blocks contain the Jabdi and Bachaur paraganas, which are noted for their breed of caule. A number of veterinary hospital and dispensaries have been opened at different centres in the district which has reduced the mortality of cattle.

Communications

The District Gazetteer of Darbhanga mentions that in the early days of British Administration, North Bihar was far better provided with roads than the South Gangetic districts. Probably the most important reason for this was the extensive cultivation of indigo in the districts of North Bihar. It was, therefore, natural that attention would be given to the maintenance and improvement of means of communication.

The district has a well-knit communication system. It is served by the North Eastern Railway. It also has a sound system of roadways and considerable boat traffic in the bigger rivers. A Bus Depot of the Bihar State Road Transport Corporation is also functioning at the district headquarters. Before that private buses used to ply in major parts of the district. The district is covered by the metre gauge railway between Darbhanga and Jainagar, Daarbahnga to Nimali and Darbhanga to Laukaha. The proposal conversion of narrow gauge into broad gauge from Samastipur to Jainagar has almost been finalized. The landing ground for aircraft has also been constructed.

Trade and Commerce

As regards trade and commerce, this district exports fish, handloom cloth, makhana (water barriers), mangoes, sugar-cane, lichi, paddy, and brass metal articles to various cities inside and outside the State. It imports medicine, machine, fine clothes, shoes and cosmetic materials from other places. Madhubani has been an important centre for trade with Nepal since the latter part of 19th Century. There used to be frontier trade registration offices at Madhwapur and Umgaon. The principal item of export from Madhubani to Nepal are cotton, sugar, silk, betelnut and tobacco and those of import from Nepal have been paddy, timber, mustard seed, pulses, etc. A number of rice milks and timer saw mills have been set up in the district on Nepal border.

Social and Cultural events

In some parts of the district Lord Indra (God of rains) is worshipped with great enthusiasm and devotion. Madhubrani , the district headquarters, Jainagar, Rajnagar, and Madhepura are the important places where this festival is held for 7 days in the month of September and before Dussera. Thousands of people including female from different parts of the district attend the fair, meet their relatives, do shopping and finally return home. The sale to eatables during

this period is the maximum as compared to the rest period of the year. It is said that his puja originated from Darbhanga Raj. The Dusadh community of this district also celebrates Shailesh puja in the month of September very year. It is said that Shailesh was the most popular king, who belonged to this community. The festival, however, is not popular among the dusadh community of other districts.

Other religions functions are also regularly held by different communities in the district.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room

was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.--For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).—

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:—

i) a city or town with one or more contiguous outgrowths;—

ii) two or more adjoining towns with their outgrowths; and—

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every

member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa

22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money,

kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point

of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 : Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 : Probability of dying between birth and age 2.

q5 : Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Madhubani district during 1991 was 2,832,024 Hindus constitute over 83.3 per cent (2,358,164persons) of the population in the district followed by Muslims 16.7 percent (473,340 persons). All other four major religious communities

have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Madhubani district during 1991 was 2,832,024. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Madhubani district, Hindi, the main mother tongue of the district was returned by 86.8 percent (2,459,506 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Madhubani district, was 13.1 percent (371,130 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Madubani during 1991 Census

The population of the scheduled castes in the district of madhubani was 361,687 according to 1991 census. Numerically the five most prominent scs in the district where (i) dusadh, dhari, dharhi (134,785) (ii) chamar, mochi, (106,403) (iii) musahar (74,064) (iv) dhobi and (18,256) (v) dom.dhangad (6,660) while dusadh constituted the maximum population of scheduled castes population the percentages being 37.3 (more than one –third of the total sc population). Chamar and musahar though numerically second and third in order comprised only 29.4 and 20.5 percent of the sc population of the sc population in the district in though numerically forth position of sc population in the district in the district, dom are much less in number as compared to the other four scs mentioned above with only 1.8 percent of the total sc population of the district. Remaining scheduled castes were comparatively very less in number than the five scs described above as their percentages to total sc population was less than even 1.0 percent except pasi, chanpal and turi whose percentages were 1.8 and 1.0 each respectively.

The population of the scheduled tribes in the district of Mudhubani during 1991 census was 597. Numerically the five important sts were namely (i) godnd (ii) santal (iii) oraon (iv) lohara/lohara and (v) kharia. Gond had 402 populations, which constituted 67.3 percent of the scheduled tribes population in the district. Santal with 49 populations constituted 8.2 percent of the st population. Oran, which were 28 in number constituted 4.7 percent of st population. Lohara comprised 23 persons and constituted 3.9 percent of st population in the district. The other scheduled tribes were almost negligible in proportion except mal paharia, munda and gorait whose percentages were 3.5.2.5 and 1.0 respectively.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Mudhubani district is 3,575,281 comprising 1,840,997 Males and 1,734,284 Females and constituting 4.3 percent of the State population spread over 3.7 percent of the area of the State in the 21 C.D.Blocks of the district. Benipatti is the most populous where as Kaluahi is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial number	C.D. Block	Population 1991 Total	1991 Rural	1991 Urban	Population 2001 Total	2001 Rural	2001 Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001

21	Madhepur	156,247	156,247	0	217,289	217,289	0	39.1	39.1	0.0	0.0	0.0
	District Total:	**2,832,024**	**2,729,260**	**102,764**	**3,575,281**	**3,450,736**	**124,545**	**26.2**	**26.4**	**21.2**	**3.6**	**3.5**

This may be observed in table 1 that the rise of population of this district during 1991-2001 decade. The population has increased by 26.2 percent during the decade for this district as a whole. Where as the population growth rate is 26.4 percent in rural area and 21.2 percent in urban area. Among the rural areas Madhepur CD Block with 39.1 percent decadal growth has been the highest followed by Bisfi C.D. Block with 37.9 percent The CD Blocks having higher rural growth rate than districts rural growth rate are Ghogardiha (28.9 percent), Babubarh (27.1 percent), Phulparas (28.0 Percent), Laukahi (29.3 percent), Laukaha (30.9 percent), Ladania (31.2 percent), Harlakhi(28.3 percent) and Madhwapur (31.8 percent) besides Madhepur and Bisfi CD Block which has already been discussed above. The lowest decadal growth rate (17.9 percent) has been recorded in Kaluahi CD Block. Besides this the CD Blocks with lowest decadal growth rate than the district (26.4 percent) are Basopatti (24.5 percent), Jainagar (24.7 percent), Benipatti (24.1 percent), Pandaul (19.6 percent), Rajnagar (18.9 percent), Andrathari (21.6 percent), Jhanjharpur (20.0 percent) and Lakhnour (20.6 percent). There are four statutory towns in this district. Madhubani Municipality has the highest decadal growth rate with 23.4 percent which is higher than the decadal growth rate of the urban areas of this district. Ghoghardiha and Jhanjharpur Notifies areas have recorded the decadal growth rate of 20.8 percent and 20.4 percent respectively. The lowest urban decadal growth rate (15.2 percent) can be observed in Jainagar Notified area.

The percentage of urban population has declined by 0.1 percent during the decade on this district. Jhanjharpur Notified area is static with 14.8 percent of the population in both the Censuses (1991 & 2001) the decline in percentage of urban population may

observed in Madhubani Municipality and Ghoghardiha Notified area. The increase in percentage of urban population by 0.1 percent may be observed in Jainagar Notified Area.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/C.D.Block	Total number of inhabited Village	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

21	Madhepur	19 (23.5)	35,378	32,906	10 (12.3)	35,634	33,598	2 (2.5)	17,461	16,293
	Districts (Rural) Total:	**340 (32.9)**	**568,482**	**537,101**	**154 (14.9)**	**567,879**	**533,501**	**50 (4.8)**	**385,633**	**362,361**

This may be observed in the table 2 that the maximum number of village in the district lie in the population range of 2000-4999 accounting for 32.9 percent of the total inhabited villages followed by villages in the population range of 1000-1999 accounting for 24.9 percent of the total inhabited village. The percentage of population in above two ranges are 32.0 percent and 10.8 percent of the total rural population of the district respectively. The villages in the population less than two hundred are 41 only accounting for 4.0 percentage of the total villages in the district and the percentage of the population i n the rangers is 0.1 percent. There are 73 villages in the population range of 200-499 which account for 7.1 percent of the total village in this district. The percentage of the population in this range is 0.8 percent.

There are 119 villages in the population range of 500-999 accounting for 11.5 percent of the total villages of this district. The percentage of the population in this range is 2.7 percent. There are 154 villages in population range of 5000-9999 accounting for 14.9 percent of the total unhabited villages. The percentage of population is 31.9 percent of the district population. There are 50 villages in the population range of 10000 and above. Which account for 4.8 percent of the total villages. The percentage of population in this range is 21.7 percent.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicale in respect of Madubani district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.1	3	0.0
11-20	0	0.0	0	0.0
21-50	3	0.3	82	0.0
51-100	5	0.5	1,465	0.0
101-200	12	1.2	3,295	0.1
201-300	21	2.0	7,563	0.2
301-500	76	7.4	81,912	2.4
501 +	915	88.5	3,348,852	97.0
Not known	1	0.1	7,564	0.2
District Total:	**1,034**	**100.0**	**3,450,736**	**100.0**
Population Density (Rural) of the district:		**1008**		

The data presented in above table highlights the fact that maximum number of villages in Madhubani district lies in 501+ with 88.5 percent of the total inhabited villages followed by villages in the density of 301-500, which account for 7.4 percent of the total villages. It would be seen that 21 villages fall in the density range of 201-300 which account for 2.0 percent of the total inhabited villages. It can also be observed in above table that 12 villages in density range of 101-200, five villages lie in the density range of 51-100, 3 villages lie in the density range 21-50 and 1 villages lies in the density range of 0-10 having 1.2 percent , 0.5 percent, 0.3 percent and 0.1 percent of villages in each population density range respectively. No villages lie in the density range of 11-20.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,056	1,058	948
1911	1,051	1,056	942	1,074	1,076	934
1921	1,020	1,027	886	1,051	1,055	874
1931	995	1,005	820	1,015	1,020	848
1941	1,002	1,012	842	1,036	1,040	869
1951	1,000	1,010	859	1,063	1,068	878
1961	1,005	1,020	832	1,056	1,061	884
1971	957	968	833	991	995	822
1981	948	959	852	982	986	862
1991	907	913	857	932	934	887
2001	919	926	868	942	944	893

Note: Sex ratio has been defined here as the number of females per 1000 males.

The above table shows the sex ratio of Bihar State and Madhubani district. It can be seen in the above table that sex ratio in rural area is comparatively higher than that of urban area in both district as well as in state during 1991 and 2001 census. It can further be observed that sex ratio of the rural and urban areas of the district is comparatively higher as compared to the sex ratio of Bihar State.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Madhwapur	934	934	
2	Harlakhi	939	939	
3	Basopatti	911	911	
4	Jainagar	892	894	882
5	Ladania	939	939	
6	Laukaha	952	952	
7	Laukahi	934	934	
8	Phulparas	946	946	
9	Babubarhi	949	949	
10	Khajauli	910	910	
11	Kaluahi	952	952	
12	Benipatti	945	945	
13	Bisfi	943	943	
14	Madhubani	926	945	872
15	Pandaul	972	972	
16	Rajnagar	934	934	
17	Andhratharhi	963	963	
18	Jhanjharpur	980	989	932
19	Ghoghardiha	946	946	944
20	Lakhnaur	969	969	
21	Madhepur	939	939	
	District Total:	**942**	**944**	**893**

In Madhubani district as a whole there are 942 females every 1000 males.While it is 944 and 893 per 1000 males respectively for rural and urban areas. Sex ratio varies from 980 for Jhanjharpur CD Block to 910 in respect of Khajouli CD Block. The sex ratio of Laukaha CD Block (952), Phulparas CD Block (946), Babubarhi CD Block (949), Kaluahi CD Block (952), Benipatti CD Block (945), Bisfi CD Block (943), Pandaul CD Block (972), Andhratharhi CD Block (963), Jhanjharpur CD Block (980), Ghoghardiha CD Block (946) and Lakhnaur CD Block (969) are higher than the district total average of 942. Whereas sex ratio of Madhwapur CD Block (934), Harlakhi CD Block (939), Basopatti CD Block (911), Jainagar CD Block (892), Ladania CD Block (939), Laukahi CD Block (934), Khajouli CD Block (910), Madhubani CD Block (926) and Rajnagar CD Block (934) are lower than the district average.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio
1	2	3
1	Madhwapur	934
2	Harlakhi	939
3	Basopatti	911
4	Jainagar	894
5	Ladania	939
6	Laukaha	952
7	Laukahi	934
8	Phulparas	946
9	Babubarhi	949
10	Khajauli	910
11	Kaluahi	952
12	Benipatti	945
13	Bisfi	943
14	Madhubani	945
15	Pandaul	972
16	Rajnagar	934
17	Andhratharhi	963
18	Jhanjharpur	989
19	Ghoghardiha	946
20	Lakhnaur	969
21	Madhepur	939
	District (Rural) Total:	**944**

In rural area sex ratio of the district stands 944 females per 1000 males. Within the district, the sex ratio varies from 989 in Jhanjharpur C.D.Block to 894 in Jainagar C.D.Block. The sex ratio of Laukaha CD Block (952), Phulparas CD Block (946), Babubarhi CD Block (949), Kaluahi CD Block (952), Benipatti CD Block (945), Madhubani CD Block(945), Pandaoul CD Block (972), Andhratharhi CD Block (946), Jhanjharpur CD Block (989), Ghoghardiha CD Block (946) and Lakhnaur CD Block are higher than the district sex ratio.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	3	0.3	416	0.0
700-749	1	0.1	4,666	0.1
750-799	4	0.4	731	0.0
800-849	26	2.5	25,027	0.7
850-899	144	13.9	436,712	12.7
900-949	370	35.8	1,572,533	45.6
950-999	280	27.1	1,069,732	31.0
1000-1099	162	15.7	306,966	8.9
1100+	44	4.3	33,953	1.0
District Total:	**1,034**	**100.0**	**3,450,736**	**100.0**
Sex ratio (Rural) for District:		**944**		

It is observed in table 8 that maximum proportion of villages lies in the sex ratio range of 900-949 and these villages accounts for 35.8 percent of the total inhabited villages. It further reveals that these villages which fall in this sex - ratio range accounts for 45.6 percent of the total rural population. 280 villages fall in sex - ratio range of 950-999 and these villages accounts for 31.0 percent of the rural population of the district. 162 villages fall in the sex - ratio ranges of 1000 –

1099 which accounts for 8.9 percent of the total rural population. It can also be observed that 144 villages lie in the sex ratio range of 850-899 which accounts for 12.7 percent of the total rural population. Only 44 villages fall in the very favourable sex ratio range of 1100+ which accounts for only 1.0 percent of total rural population. Three villages are on the lowest range of sex ratio (less than 700) which account for negligiable 0.0 percent the population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	2	3	4
1	Ghoghardiha	NA	944
2	Jainagar	NA	882
3	Jhanjharpur	NA	932
4	Madhubani	M	872
	Sex ratio (Urban) for the district:		**893**

There is no urban Agglomeration in Madhubani district. There four statutory towns in the district Madhubani (M) is only Municipal town, which is district Headquarter also has sex ratio of 872 females per 1000 males. As about the sex - ratio of three other remaining town i.e. Jainagar, Jhanjharpur and Ghoghardiha having status of Notified Areas are 882, 932 and 944 females per 1000 males respectively.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

		Urban	**21726**	**11291**	**10435**	**924**

It is observed from above table that the sex - ratio in age group of 0-6 in the district varies from 981 in Bisfi C.D. Block to 884 in Jainagar C.D. Block. The sex ratio figures in age group 0-6 of Bisfi , Ladania, Phulparas, Harlakhi, Babubarhi, Laukaha, Pandaoul, Jhanjharpur, Ghoghardiha, Andhratharhi, Kaluahi, Madhwapur and Rajnagar C.D. Blocks are higher than the district total averages, whereas the sex ratio in age groups of 0-6 in Laukahi, Benipatti, Basopatti, Madhubani, Madhepur and Lakhnaur C.D. Blocks are lower than district total average.

The district urban sex ratio in age group of 0-6 is 924. Ghoghardiha (NA) has higher sex ratio than district sex ratio in age -group of 0-6. It has 990 females per 1000 males. While sex ratios of the other urban areas Jhanjharpur notified area (921), Madhubani Municipality (920) and Jainagar Notified Area (893) have lower than the sex – ratio of district (924).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age Group
		Persons	Males	Females

	District (Rural) Total:	**704,273**	**363,058**	**341,215**	**940**

It is observed in table 11 that sex - ratio in age group of 0-6 among the rural population varies from 981 in Bisfi CD Block to 883 in Jainagar CD Block. The sex - ratio of Ladania, Phulparas, Jhanjharpur, Harlakhi, Babubarhi, Laukaha, Pandaul, Andhratharhi, Kaluahi and Ghoghardiha CD Blocks are higher than the district average (940) while sex ratio of Madhwapur and Rajnagar CD Block are equal to district rural average (940). The sex ratio of Laukahi, Benipatti, Basopatti, Madhubani, Madhepur,Lakhnaur, Khajauli and Jainagar CD Blocks are below than the district average.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	31	3.0	2,982	0.4
700-749	12	1.2	1,746	0.2
750-799	50	4.8	16,019	2.3
800-849	96	9.3	42,077	6.0
850-899	163	15.8	133,332	18.9
900-949	200	19.3	206,990	29.4
950-999	185	17.9	158,245	22.5
1000-1099	194	18.8	120,925	17.2
1100+	103	10.0	21,957	3.1
District (Rural) Total	**1034**	**100.0**	**704,273**	**100.0**
Sex ratio (Rural) for District:		**940**		

It is observed in table no.12 that maximum number of vtllages (i.e.200) in the district lie in the sex ratio range of 900-949 in the age group 0-6. there villages constitute 29.4 percent of total population, closely followed by 194 villages in the sex ratio range of 1000-1099 accounting for 17.2 percent of the total population. 185 villages (17.9%) are in the sex ratio range of 950-999 and 163 villages (15.8%) are in the sex ratio range of 850-899. There are 103 villages (10.0%) in the district which lie in the very favourable sex ratio range of 1100+. These villages account for 3.0 percent of the rural population of the district. There are 31 villages (3.0%) in the district having unfavourable sex ratio of less than 700 which account for only 0.4 percent of the rural population of the district.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Ghoghardiha	NA	2,668	1,341	1,327	990
2	Jainagar	NA	3,355	1,772	1,583	893
3	Jhanjharpur	NA	4,446	2,315	2,131	921
4	Madhubani	M	11,257	5,863	5,394	920
	District(Urban) Total:		**21,726**	**11,291**	**10,435**	**924**

There are four statutory towns in the district. The sex ratio in the range of 0-6 age group is the highest in Ghoghardiha Notified Area (990) followed by Jhanjharpur Notified Area (921). Sex ratio in the range of 0-6 age group of Madhubani Municipality is (920) whereas Jainagar Notified Area has 893. There is no urban Agglomeration in this district.

The above table shows the percentage population of Scheduled Castes and Scheduled Tribes in Madhubani district. The percentage population of Scheduled Caste in this district as the total is 13.5% which account for 481,922 population. The highest percentage of Scheduled caste population is in Rajnagar and Khajauli C. D. Blocks (16.7%) followed by Lakhnaur C. D. Block which accounts for 15.7% of the total population. Ghogardiha C. D. Block has lowest percentage 9.0% of population. The percentage of Scheduled cast in this district is higher in rural areas (13.6%) than urban areas (9.7%). The percentage in other CD Block i.e. Kaluahi (15.4), Madhepur (15.3) Pandaul (15.1), Jhanjharpur (14.9). Madhwapur (14.9), Ladania (14.8), Andhrathari (14.3) Basopatti (14.2), Madhubani (13.3), Laukaha (12.9), Jainagar (12.6), Benipatti (12.6), Babubarhi (12.5), Harlakhi (12.2), Laukahi(11.6). Bisfi (10.9) and Phulparas (9.9) may also be observed in this table. The percentage of Scheduled Tribe population in this district is almost negligible which account for 1260 only. Out of 21 C. D. Blocks, Madhepur C. D. Block has the highest percentage of Scheduled Tribes (0.2%) which account for 517 population.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population

21	Madhepur	217,289	33,220	517	15.3	0.2
	District (Rural) Total:	**3,450,736**	**469,894**	**1,210**	**13.6**	**0**

The above table indicates that the percentage of the Scheduled Caste in Madhubani district is of the order of 13.6 percent of the total population. The highest percentage of Scheduled Castes population are in Khajauli and Rajnagar C. D. Block with 16.7 percent of the total population closely followed by Jhanjharpur, Lakhnaur, Madhubani, Kaluahi, Madhepur and Pandaul C. D. Blocks with 15.7, 15.7, 15.6, 15.4, 15.3 and 15.1 percent respectively. The lowest percentage of Scheduled Castes population is in Ghoghardiha C. D. Block with 9.1 percent. The percentage of Scheduled Caste population in Harlakhi, Jainagar, Laukaha, Laukahi, Phulparas, Babubarhi, Benipatti, Bisfi and Ghoghardiha C. D. Blocks are lower than the district rural average (13.6%). The percentage of Scheduled Tribe in rural area of Madhubani district is almost negligible. Scheduled Tribes population in rural area of this district are 1210 only.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	92	8.9	0	0.0
Less than 5	111	10.7	9,521	2.0
5-10	265	25.6	91,476	19.5

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001 (*Concld.*)

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
11-20	337	32.6	227,643	48.4
21-30	141	13.6	99,840	21.2
31-40	33	3.2	18,459	3.9
41-50	22	2.1	8,882	1.9
51-75	18	1.7	8,857	1.9
76 and above	15	1.5	5,216	1.1
District Total	**1,034**	**100.0**	**469,894**	**100.0**

From the table above it is apparent that there are 337 villages accounting for 32.6 percent of the inhabited villages in the district where the population of Scheduled Castes ranges between 11 and 20 percent of total population. This is followed by the villages where the population of Scheduled castes ranges between 5 and 10 percent of total population. There are 141 villages which account for 13.6 percent of total inhabited villages where the percentage of scheduled castes population to total population is between 21 and 30. 111 villages account for 10.7 percent of total inhabited villages where the percentage of Scheduled Castes population to total population is less than 5. There are 92 villages in this district which accounts for 8.9 percent of the total villages where the percentage of Scheduled Castes population is nil. Out of remaining 88 villages, 33 villages in percentage range of 31-40 account for 3.2 percent, 22 villages in percentage range of 41-50 account for 2.1 percent, 18 villages in percentage range of 51-75 account for 1.7 percent and remaining 15 villages in percentage range of 76 and above account for 1.5 percent of the total villages in this district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	992	95.9	0	0.0
Less than 5	39	3.8	515	42.6
5-10	3	0.3	695	57.4
11-20	0	0.0	0	0.0
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0

8	Phulparas	944	676

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001 (*Concld.*)

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
9	Babubarhi	947	0
10	Khajauli	920	0
11	Kaluahi	914	800
12	Benipatti	929	901
13	Bisfi	928	1257
14	Madhubani	936	667
15	Pandaul	952	1056
16	Rajnagar	924	500
17	Andhratharhi	952	833
18	Jhanjharpur	967	0
19	Ghoghardiha	924	0
20	Lakhnaur	964	760
21	Madhepur	959	973
	District (Rural) Total:	**938**	**948**

Table 19 shows that the sex ratio among the Scheduled Castes and Scheduled Tribes residing in the rural area of Madhubani district. The sex ratio among Scheduled Castes varies from 967 in Jhanjharpur C. D. Block to 891 in the number C. D. Block. Other C. D. Block where sex ratio is higher than the district sex ratio are Ladania (943), Phulparas (944), Babubarhi (947), Pandaul and Andhrathari (952 each) and Madhepur (959). The CD Blocks having lower than the district sex ratio are Madhwapur (934), Harlakhi (928), Basopatti (907) Laukahi (932), Khajauli (920), Kaluahi (914), Benipatti (929), Bisfi

(928), Madhubani (936), Rajnagar and Ghoghardhiha (924 each).

The sex ratio among Scheduled Tribes varies from 1333 in Laukaha CD Block to 375 in Jainagar CD Block. Babubarhi, Khajauli, Ghoghardiha and Jhanjharpur C. D. Blocks having zero population figure C. D. Blocks where sex-ratio is higher than the district are Laukaha (1333), Basopatti (1297), Bisfi (1257), Pandaul (1056), Laukahi (1000) and Madhepur (973). Remaining CD Block where sex ratio is lower than the district sex ratio are Madhwapur (750), Harlakhi (500), Ladania (900), Phulparas (676), Kaluahi (800), Benipatti (901), Madhubani (667), Rajnagar (500), Andhrathari (833) and Lakhnaur (760). It is worthwhile to mention that Scheduled Tribe population in this district is negligible.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Ghoghardiha (NA)	925	0
2	Jainagar (NA)	929	1,273
3	Jhanjharpur (NA)	936	500
4	Madhubani (M)	903	692
	Sex ratio (Urban) for the district:	**920**	**923**

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in the urban units of Madhubani district. The sex ratios of the urban area of this are 920 and 923 respectively for Scheduled Castes and Scheduled Tribes while sex ratio among Scheduled Caste for Jhanjharpur (NA) is 936, Jainagar Notified Area and Ghoghardiha Notified Area 925 whtch are higher than the sex ratio of urban area of Madhubani district. The sex ratio of Madhubani Municipality is 903 which is lower than the district figures. Among Scheduled Tribes sex ratio of Jainagar Notified Area (1273) is very encouraging in comparison to district figure. Sex ratio of Madhubani Municipality and Jhanjharpur Notified Area is lower than the district sex ratio. Since Ghoghardiha Notified Area has no tribal population 0(zero) sex ratio has not been indicated in the above table. There is no urban Agglomeration in Madhubani district.

	District (Rural) Total:	**1,130,897**	**792,563**	**338,334**	**2,319,839**	**982,640**	**1,337,199**	**41.2**	**56.1**	**25.4**	**30.8**

Table 22 shows the literacy data in respect of every C. D. Block of Madhubani district. This is observed in above mentioned tables that Khajauli and Laukahi C. D. Blocks have highest literate population (44.4%) closely followed by Lakhnaur C. D. Block (44.2%). The literacy rate of Madhubani C. D. Block (43.5%), Jhanjharpur C. D. Block (43.3%), Benipatti and Rajnagar C. D. Blocks having 43.1% each and Jainagar C. D. Block (41.5%) have higher percentage of literacy than the district. The C. D. Blocks having lower percentage rate than districts percentage are Madhwapur (40.8%), Harlakhi (35.8%), Basopatti (40.7%), Ladania (37.8%), Laukaha (40.1%), Laukahi (37.1%), Phulparas (40.2%), Babubarhi (41.0%), Bisfi (40.2%), Andhrathari (41.1%), Ghoghardiha (40.3%) and Madhepur (37.9%). The highest proportion of male literates is in Khajauli C. D. Block (61.0%) followed by Laukaha C. D. Block (59.1%). The lowest proportion of male literate is in Harlakhi C. D. Block (50.2%). Male literates outnumber female literates in all the C. D. Blocks of Madhubani district. The highest proportion of female literacy rate is in Kaluahi C. D. Block (30.4%) closely followed by Madhubani C. D. Block (30.3%). The lowest female literacy rate is in Laukahi C. D. Block (17.1%). Madhwapur, Khajauli, Kaluahi, Benipatti, Bisfi, Madhubani, Pandaul, Rajnagar, Jhanjharpur and Lakhnaur C. D. Blocks have higher females literacy rate than the district female literacy rate. The C. D. Blocks where female literacy rate is lower than district females literacy rate are Harlakhi, Basopatti, Jainagar, Ladania, Laukaha, Phulparas, abubarhi, Andhrathari, Ghoghardiha, Madhepura and Laukahi C. D. Block.

Table 21 deals with the same topic but only difference is that it deals with the total population of the district.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	26	0.0
1-10	13	1.3	5,149	0.1
11-20	47	4.5	43,773	1.3

Table 31 shows absolute number and percentage of main workers, marginal workers and non-workers by sex at C.D. Blocks level in the district as per 2001 Census. Only 34.3 percent in the total population have been registered as workers in the district. Of which 24.5 percent arte main workers and 9.8 are marginal workers. Percentage of non-workers in the district is 65.7 percent of total population. Among the main workers, male participation rate in the district is 40.5 percent while corresponding rate for females is 7.6 percent. As far as marginal workers are concerned the female participation rate of 12.5 percent is higher than male participation rate of 7.2 percent. Among C.D. Blocks of the Madhubani district, the highest proportion of total workers is found in Laukahi C.D., Block with 43.4 percent6 while the lowest proportion is observed in Madhubani C.D. Block with 29.1 percent.

Table 32 shows the number and percentage of main workers marginal workers and non workers by sex in rural areas of the district. It can be seen that in the rural areas of the district 24.6 percent of the population has been categorized as main workers whereas the marginal workers are 10.0 percent and remaining 65.4 percent of population is non-workers. Sex-wise break up shows that participation in main work for male and female is 40.6 and 7.7 percent respectively. Male and female marginal workers are 7.4 and 12.8 percent respectively. The percen5atge of female marginal workers is higher than male marginal workers. Similar trend is also observed at C.D. Block level. At the C.D. Block level Laukahi C.D. Block has the highest of 43.4 percent workers whereas the lowest of 29.7 percent workers has been observed in Pandaul C.D. Block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table 33 shows the absolute number and percentage of main workers, marginal workers and non-workers by sex in UA/ Town in the district. Of the 124545 urban populations in the district, 22.6 percent is main workers and 3.7 percent in marginal workers. Remaining 73.7 percent is non- workers. Sex-wise break up of the workers in the urban areas of the district shows that 38.6 percent males and 4.7 percent females are main workers. Male and female marginal workers are 3.9 and 3.4 percent respectively. The highest of 32.7 percent workers of the total population is registered in Ghoghardiha (NA) and the lowest of 23.8 percent workers is in Madhubani (M).

Note :- Percentage of workers to total workers are given in brackets

The above table discribed the relative importance of main sphere of economic activity may be observed from the pattern of distribution of workers according to broad four fold classification namely, Cultivators, Agricultural labourers, Household industry workers and other workers. The economic activity in rural is primarily dependent on agriculture. Which is supported by the fact that the cultivators (30.5 percent) and agricultural labourers (52.8%) together constitute 83.3 percent of the total workers in the rural area of Madhubani district. The agriculture sectors has absorbed more than three fourth of the total main workers. The proportion cultivators vary between 43.2 percent for Ladania CD Block to 18.7 percent in Madhubani CD Block. The highest proportion of agricultural labourers may be observed in Jhanjharpur CD Block (5936%) closely followed by Ghoghardiha CD Block (59.0%). The lowest proportion of agriculture labourer can be observed in Madhubani CD Block (40.8%). Maximum proportion of workers engaged in Household Industry is observed in Madhubani CD Block (6.9%) followed by Lakhnour CD Block (5.5%). The lowest proportion of workers engaged in household Industry is observed in Laukahi and Ghoghardiha CD Block each having 1.7 percent only. The proportion of Household Industry workers is only 3.4 percent of the total workers of the district. Proportion of otherworkers varies between 33.5 percent in Madhubani CD Block to 5.1 percent Laukahi CD Block. As already mentioned above Madhubani has highest percentage of otherworkers, it is followed by Jainagar CD Block (23.0 percent). The proportion of other workers is 13.3 percent to the total workers in this district.

Note: Percent of Worker to total workerre given in brackets

Table 35 discribed From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of main workers according to the broad four fold classification namely Cultivators, Agricultural labourers, household industry workers and other economic activities. The economic activity in the rural area of the district is primarily dependent on agricultural which is supported by the fact that the cultivators (31.2%) and agricultural labourer (53.6%) together constitute 84.8 percent of total workers of the district. The agricultural sector has absorbed more than three fourth of the total workers. Data shown this table are almost similar to table 35 except in case of Jainagar, Madhubani, Jhanjharpur and Ghoghardiha CD Block. Data of these four CD Block in this table have been presented for rural areas only where as data in table-34 include urban areas also.

Note : Percentage of workers to total workers are given in brackets

Table 36 shows the distribution of workers b y sex in four categories of economic activities in urban areas of the district. There are four statutory towns and no Urban Agglomeration in this district. In the urban areas of the district total workers (Main + Marginal) are 26.3 percent. Among these workers. Cultivators constitute 5.5 percent, agricultural labourers 20.3 percent household industry workers 8.4 percent and other workers 65.9 percent. Of the total male working population 70.9 percent are engaged in other work. In case of females only 36.2 percent are engaged in other work. 84.8 percent workers are engaged in other work in the Madhubani (M) whereas only 25.3 percent workers engaged in other work in Ghoghardiha (NA).

		(100)	**(88.9)**	**(22.4)**	**(98.1)**	**(37.8)**	**(18.8)**	**(18.3)**	**(9.9)**	**(15.0)**	**(52.9)**	**(42.3)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, Telegraph office and Post andTtelegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table shows the distribution of villages according to the availability of different amenities in the district.

Educational Facility :- There are as many as 919 villages accounting for 88.9 percent of total number of inhabited villages (1034) where educational facility is available. The highest proportion of village is in Kaluahi and Bisfi CD Block with 100.0 percent closely followed by Madhwapur CD Block with 97.6 percent and Basopatti CD Block with 97.0 percent. The lowest proportion of village with educational facility may be observed in Madhepur CD Block with 79.0 percent accounting for 64 villages out of 84 inhabited villages.

Medical Facility :- The availability of medical facility is quite low and only 22.4 percent villages have got it, which accounts for 232 villages out of 1034 villages. Among the CD Blocks Pandaul has largest proportion of villages with 53.2 percent the having medical facilities accounting for 33 villages out of total 62 inhabited villages. It is closely followed by Basopatti CD Block with 48.5 percent accounting for 16 villages out of 33 inhabited villages. On the other hand Jhanjharpur CD Block has the minimum proportion of villages (6.9%) accounting for only 4 villages out of 58 villages where medical facility is available.

Improved drinking water :- Out of 1034 inhabited villages in Madhubani district. 1014 villages accounting for 98.1 percent of the total inhabited villages where improved drinking water facility is available. 100.0 percent improved drinking water facility is available in Basopatti, Jainagar, Ladania, Phulparas, Khajauli, Kaluahi, Bisfi, Madhubani, Pandaul, Rajnagar, Andhrathari, Jhanjharpur, Ghoghardiha and Lakhnaur CD Blocks. On the other hand Laukaha CD Block has minimum percentage of inhabited villages (88.6%) where improved drinking water facility is available.

Bank :- Banking facility is available only in 102 villages out of 1034 inhabited villages.Among the C. D. Block, Khajauli has the maximum percentage of village (22.6%) having Banking facility whereas Benipatti C. D. Block has the minimum percentage of villages (3.2%) having Banking facility.

Agricultural Credit Societies :- Agriculture credit societies are available only in 155 (15.0%) villages out of 1034 inhabited villages in this district. Among the C. D. Bolocks, Kaluahi C. D. Block has the maximum number of villages (33.3%) having agricultural credit socities whereas Laukahi C. D. Block has the minimum number of villages (4.7%) having credit society.

Approach by Pucca road :- This facility is available in only 547 (52.9%) villages. 93.1 percent of the total village have the facility of approach by pucca road in Jhanjharpur CD Block followed by Kaluahi and Rajnagar CD Block each having 77.8 percent villages with approach by pucca road.

Power supply :- Electrified villages in the district constitute 42.3 percent of the total number of inhabited villages. Among the C. D. Blocks, Jhanjharpur C. D. Block has the maximum number of electrified villages with 86.2 percent.

Post Offices :- (37.8%) Postal facilities are available in only 391 villages out of 1034 inhabited villages. Jainagar CD Block has the maximum number of villages (57.1%) accounting for 12 villages out of 21 inhabited village. It is followed by Bisfi CD Block with 52.8 percent village having postal facilities accounting for 28 villages out of 53 inhabited villages, Laukahi CD Block has the minimum number of villages (15 inhabited village out of 64) having postal facility.

Telephone facility :- The availability of telephone facility is in 194 villages out of 1034 inhabited villages which accounts for 18.8 percent only. Khajouli CD Block has maximum proportion of villages (45.2%) having telephone facility followed by Lakhnour with 42.1 percent. Laukahi CD Block is the only rural area where non of the villages has got telephone facility.

Transport Communication :- This facility is available in only 189 (18.6%) villages out of 1034 inhabited villages of the district. Majority of villages still do not have this facility. Pandoul CD Block has the highest proportion of villages (38.7%) which are connected by bus or rail or navigable river/canal services etc. well followed by Madhwapur and Laukaha CD Blocks with each having 38.6 percent in habited villages. Benipatti CD Block has only 1 village (out of 95 villages) has transport facility.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post and Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 shows the person and percentage of rural population served with different amenities. It would be seen from this table. Total educational facility is available to 96.8 percent of the rural population of this district. The proportion varies between the maximum of 100.00 percent (cent percent) each for Madhwapur and Kaluahi CD Blocks and 85.3 percent for Ladania CD Block. It is interesting to note that proportion in the district enjoying educational facility is less (being 88.9 percent vide table-37) than the proportion of population which is as high as 88.9 percent. This may be attributed to the fact that village which posses educational facility usually larger population as compared to those villages which do not have this facility at all.

In case of medical facility also it may be seen that proportion of rural population served by this amenity is of the order of 39.7 percent which more than the proportion of villages served by the

medical facility in the district.

In case of improved drinking water facility also it may be observed that proportion of rural population served by this amenity of the order of 98.7 percent which is slightly better than the villages served by this facility in the district.

This can also be observed the post offices facility is availed by 64.9 percent population where as 37.8 percent of village have got post office facility as can be seen in table-37.

Similar trend may be observed in respect of other amenities also both in the district as also in it various CD Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	117	14	2	133
(b) Middle School	537	104	11	652
(c) Degree College	260	295	452	1007
2. Medical:-				
(a) Hospital	325	268	412	1005
(b) PHC	381	273	332	986
3. Post Office	569	59	20	648
4. Telephone	381	211	248	840
5. Bus Service	410	239	221	870
6. Banks				
(a) Commercial Bank	488	283	166	937
(b) Co-operative Bank	256	249	508	1013
7. Agricultural Credit Societies	388	269	222	879

Table 39 shows that out of 133 villages which do not have any primary school within the village, 117 villages have it within 5 km. distance and 14 villages have it within the distance rage of 5-10 kms. And remaining 2 villages have it at a distance of more than 10 kilometers. There are 652 villages which do not have any middle school within the village, 537 villages have it within 5 km. distance ;and 104 villages have it within the distance rage of 5-10 kms. And remaining 11 villages have it at a distance of more than 10 kilometers. There are 1007 villages in the district which are deprived of college. Out of these 1007 villages, 260 villages enjoy this facility at places situated within 5 kms., s295 villages enjoy this facility at a distance range of 5-10 kms. And as many as 452 villages enjoy this facility at places beyond 10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and Telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows the distribution of villages in four ranges of the distance from the nearest statutory town along with number of villages and a availability of different amenities. Out of 1034 inhabited villages 40 villages are situated at a distance of 5 kms. From the nearest statutory town. Of these 38 villages have educational facility, 7 villages are having Post Office, 10 villages are equipped with telephone facilities, 6 villages are having transport and communication facilities, 25 villages are having approach pucca road and 3 villages have agricultural credit societies. Only 2 villages are having banking facilities.

Maximum number of 477 villages of the district are situated at a distance of 16-50 kms. From the statutory town. Out of these 88.7 percent villages have educational facilities, 476 percent villages are having approach by pucca road and 36.1 percent villages are having Post Office. Other amenities like medical, telephone, transport communications, bank and agricultural credit societies are available to a few percentage of the villages.

In the case of other ranges availability of amenities are also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 shows the distribution of villages according to different population range and amenities available. Maximum number of villages 340 (32.9%) fall in the population range of 2000-4999 followed by 257 villages (24.9%) having the population range of 1000-1999. The lowest range of villages is observed in 1000+ being 50 (4.8%) only. The proportion of villages having different amenities varies in direct relation to their population range. Generally the maximum percentage of villages having different amenities have a position range of 5000-9999 and 10000+ which further corroborates the fact the more facilities are generally available in larger villages than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Madhwapur	41	10,589	77.0	42.9
2	Harlakhi	43	14,755	76.4	72.9
3	Basopatti	33	13,039	93.3	40.0
4	Jainagar	21	12,767	79.5	59.8
5	Ladania	28	18,387	70.1	46.3
6	Laukaha	44	21,456	67.4	26.7
7	Laukahi	64	26,586	66.1	36.0
8	Phulparas	40	15,925	79.8	20.9
9	Babubarhi	59	18,771	83.1	53.1
10	Khajauli	31	11,416	67.7	46.5
11	Kaluahi	18	8,860	74.1	35.3
12	Benipatti	95	25,990	80.6	30.1

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001 (*Concld.*)

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
13	Bisfi	53	18,019	73.1	36.6
14	Madhubani	68	14,918	72.0	31.6
15	Pandaul	62	16,054	59.6	43.8
16	Rajnagar	63	17,866	70.5	35.2
17	Andhratharhi	47	14,772	70.5	29.8
18	Jhanjharpur	58	12,701	77.4	26.4
19	Ghoghardiha	47	15,443	77.8	22.0
20	Lakhnaur	38	11,541	79.0	21.8
21	Madhepur	81	23,323	78.6	41.7
	District Total:	**1,034**	**343,178**	**74.6**	**37.8**

Note : Cultivable area = irrigated area + unirrigated area

The above table shows the percentage of cultivable land and also the proportion of irrigated area to total cultivable area in district as well as in its various C. D. Blocks cultivated area includes irrigated as well as unirrigated.

It can be seen that 74.6 percent of the total area of the district is utilized for cultivation (Cultivable area) and of this only 37.8 percent area has got irrigation facility. Among the C. D. Blocks, Babubarhi with 83.1 percent of the total area is available for cultivation followed by Benipatti C. D. Block with 80.6 percent. The lowest cultivable area (59.6%) is available in Pandaul C. D. Block. The irrigated cultivable area varies between 72.9 percent for Harlakhi C. D. Block and 20.9 percent for Phulparas C. D. Block. The data in this table show that 62.2 percent of the total cultivable are of this district is deprived of irrigation facility.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Ghoghardiha (NA)	12.8	0.7	12.1	5	1.0	0.2	3.6	0	0.1
2	IV Jainagar (NA)	9.7	2.8	6.9	8.6	8.4	0.2	0	0	0
3	III Jhanjharpur (NA)	1.3	0.2	1.1	0.9	0	0.9	0	0	0
4	II Madhubani (M)	8.7	1.7	7.0	11.3	1.9	4.2	0.5	0	4.6
	District Total	**7.9**	**1.4**	**6.5**	**8.1**	**2.5**	**2.5**	**0.7**	**0**	**2.5**

Table 43 shows the per capita receipt and expenditure in statutory towns of the district. There are four statutory towns in the district. Per capita receipt of Statutory Towns in district is 7.9 to constitution of 1.4 is made through taxes and 16.5 is through other sources. The per capita expenditure din district is 8.1 of which 2.5 is incurred on General Administration, 2.5 on Public Health and conveniences, 0.7 on Public works and 2.5 is spent on other items. Among towns, Ghoghardiha (NA) has reported the highest whereas Jhanjharpur (NA) has reported the lowest per capita receipt. Similarly Madhubani (M) has reported the highest and Jhanjharpur (NA) has reported the lowest per capita expenditure.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Ghoghardiha (NA)	5.5	2.1	1.4	0.7	0.7
2	Jainagar (NA)	3.1	1.0	1.0	1.0	1.0
3	Jhanjharpur (NA)	3.7	0.8	0.8	0.4	1.7
4	Madhubani (M)	2.3	1.1	0.6	0.6	0.6
	District Total:	**3.1**	**1.1**	**0.8**	**0.6**	**0.7**

Table 44 shows the availability of Schools/ colleges per 10,000 population in statutory towns. The data reveals that in urban areas of Madhubani district the average number of primary schools junior secondary/ middle schools and secondary/ Matriculation schools are 3.1, 1.1 and 0.8 institutions per then thousand population respectively. Senior Secondary and college account for an average of 0.6 and 0.7 institutions per ten thousand population respectively. It also reveals that out of four statutory towns Ghoghardiha (NA) has the highest proportion of 5.5 primary school per ten thousand population. In case of college Jhanjharpur (NA) has the highest of 1.7 college per ten thousand population.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Ghoghardiha(NA)	14
2	Jainagar(NA)	10
3	Jhanjharpur(NA)	21
4	Madhubani(M)	26
	Distrct Total:	**21**

Table 45 gives the details of number of beds in medical institutions per ten thousand population in each town of Madhubani district. On an average there are 21 beds per ten thousand population in Urban areas of the district. The highest number of 26 beds are available in Madhubani (M) and the lowest number of 10 beds in Jainagar (NA).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
	N.A.			

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Ghoghardiha (NA)	Makhana Rice Pulse	Gur
2	Jainagar (NA)	Makhana	Rice
3	Jhanjharpur (NA)	Makhana Makhana Betal	Mango
4	Madhubani (M)	Handloom Cloth Makhana Mango	Handloom Cloth Makhana

Table 47 shows the important commodities by manufactured and exported out of the each town in the Madhubani district. Makhana, Pulses and Handloom clothes are manufactured and processed in the districts and on the other hand Gur, Pulse Rice, mango Makhana and handloom clothes are exported out of this district. Ghoghardiha Notified area exports Gur, Rice and Pulse. Where as Jainagar Notified area exports rice only.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Data source: Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

The above table shows the households occupying number of rooms. There are as many as 659,145 households accounting for 98.5 percent of total households of the district dwelling in owned houses. 266,664 households dwelling in single room is the highest (40.4%) followed 230,613 households dwelling two rooms accounting for 35.0 percent of households in owned houses. 3,890 households (0.6%) have no exclusive room to dwell. The median number of rooms is 2 for total households in tenure status of owned category.

There are 103,967 households of Scheduled Castes dwelling in owned houses. The number of households dwelling in single room is highest numbering 60,420, whereas it is lowest dwelling in no exclusive room numbering 722. The median number of rooms is 1 for Scheduled Caste households in tenure status of owned category.

There are 3,287 households of Scheduled Tribes dwelling in owned houses. The number of household dwelling in single room is highest numbering 1,716 where as it is lowest dwelling in no exclusive room numbering 49 only. The median number of rooms is 1 for scheduled tribes households in tenure status of owned category.

Similar trend can be observed in respect of households dwelling in other tenure status.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

Data source : Census of India 2001, H-series: Tables on Houses, Household Amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos, sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roofs made of kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Table 49 gives the details of the percentage distribution of households living in permanent, semi permanent and temporary houses in the Madhubani district. There are 28.2 percent of households of the district are living in permanent houses, 10.3 percent of households living in semi permanent houses while 61.5 percent of household living in temporary houses in the district. In rural areas 27.2 percent of households are living in permanent houses, 10.5 percent of household living in semi permanent houses whereas 62.4 percent of household living in temporary houses. As per as urban areas of the district are concerned, 60.3 percent of households are living in permanent houses, 6.5 percent of households are living in semi permanent houses and 33.2 percent households are living in temporary houses.

Among the C.D. Blocks in Madhubani district, B isfi has the maximum proportion of rural households living in permanent houses (41.2%) followed by Pandaul (40.0%) and the Madhubani (38.3%) Laukahi C.D. Block has the minimum proportion of households living in permanent houses with 10.7 percent. In case

of semi proportion of households (28.0%) whereas Laukahi and Madhopur C.D. Blocks each having (4.-%) are the minimum proportion of households living in semi permanent houses. Similarly in case of temporary houses Laukahi C.D. Block has the maximum (85.2%) and Madhwapur C.D. Block has the minimum (40.6%) households living in the rural area of the district.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Serial number	C. D. Block	Total/ Rural/ Urban	Number of household	Number and percentage of household having

Data source : Census of India 2001, H-series: Tables on Houses, Household Amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as'Improved'or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table 50 shows the proportion of households availing the improved drinking water, electricity, bathroom, toilet and drainage facilities. There are 648,258 households residing in the rural area of the district. 556,357 households (85.8%) have improved drinking water facility. The highest proportion of household with improved drinking water facility can be observed in Madhepur C. D. Block with 92.9 percent followed by Madhwapur C. D. Block with 92.1 percent. On the other 76.2 percent households of Pandoul C. D. Block avail this facility which is minimum.

As regards the electricity availability, it has been found that only 3.9 percent of the rural households in the district are availing this facility. The highest proportion of households with electricity is in Rajnagar C. D. Block with 9.4 percent followed by Pandoul C. D. Block with 8.7 percent. Harlakhi C. D. Block has the lowest proportion of households (0.1%) with this facility.

Bathroom facility is available to 4.8 percent of the total rural households in the district. The highest proportion of households having bathroom is 7.4 percent in Bisfi C. D. Block followed by Madhubani C. D. Block with 6.9 percent. The proportion of bathroom facility is the lowest in Ladania C. D. Block with 1.9 percent households. Only 26.7 percent of urban households have bathroom facility.

Only 13.0 percent of rural household have toilet facility. The highest proportion of households having this facility is available in Bisfi C. D. Block with 21.3 percent followed by Madhubani C. D. Block with 20.4 percent. The lowest proportion of this facility in Ladania and Laukahi C. D. Blocks each having 4.9 percent.

Only 10.3 percent of the rural households in the district have drainage facility. Bisfi C. D. Block leads with 16.3 percent followed by Harlakhi C. D. Block with 14.1 percent Ladania C. D. Block has the lowest proporti8on of this facility with 3.9 percent only.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household Amenities and Assets.

Table 51 shows the number and percentage distribution of households of fuel used for cooking purposes. There are nine types of fuel used for which is presented in the table. It is observed that there are 221765 households i.e. 34.2 percent of the total rural households in the district use firewood as fuel for cooking. The highest of rural households wing firewood for cooking is in Rajnagar C.D. Block (46.9%) closely followed by Pandaul C.D. Block (46.2%) whereas it is lowest in Laukahi C.D. Block (15.0%).

There are as many as 1419342 households i.e. 21.9 percent of the rural households of the district use crop residue as fuel for cooking. Among the C.D. Blocks, the proportion of rural households is highest (31.8%) in Bisfi C.D. Block followed by Madhubani C.D. Block with 27.8% and the lowest (10.3%) in Phulparas C.D. Block. Similarly there are 248686 households i.e. 38.4 percent of the rural households of the district use cow dung code as fuel for cooking. Among the C.D. Blocks, the highest proportion of household using this fuel for cooking is in Laukahi (65.2%) followed by Phulparas (61.6%) Madhubani has the lowest proportion of households using cow dung coke as fuel with 20.1 percent. There are 354 (0.1%) rural households using coal lignite (charcoal) as fuel for cooking.

Cooking gas (LPG) is used as fuel for cooking by 4192 households (0.6%) in rural area whereas 2304 (0.4%) of rural households kerosene is used as fuel for cooking.

Data source : Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

Table 52 shows ;the number of households availing banking services and number of households having possession of assets such as radio/ transistor, telephone, bicycle, scooter and car etc. There are 92,143 households accounting for 14.2 percent of the rural households in the district availing banking services. The highest proportion of 20.0 percent households can be observed in Rajnagar C.D. Block availing banking services and the lowest proportion of household is in Laukahi C.D. Block with 7.2 percent.

There are as many as 198,705 households accounting for 30.7 percent of the rural households possessing radio/ transistor. Among the C.D. Blocks, Harlakhi has the highest (34.2%) of households possessing radio/ transistor and Madhopur has the lowest proportion of households with 27.1 percent.

As regards Television there are 25,459 households accounting for 3.9 percent of the rural households of the district possessing television. Among the C.D. Blocks, Rajnagar has the highest 6.4 percent of households possessing television and Ladania C.D. Block has the lowest proportion of households with 2.3 percent. As regards telephone there are 6,449 households accounting for about one percent of the rural households of the district availing telephone services whereas more than 4 percent of rural households of the district availing Bicycle facility.

(viii)Major social and cultural events, natural and administrative developments and significant activities during the decade

Information is not available.

(ix)Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Andhratharhi

The village is the headquarters of the development block bearing the same name and is situated at a distance of 19 kms. from Jhaniharpur Rly. Station. It has an old temple known as Kamladitya whose foundation was laid by Sridhar, the minister of Nanya Deva of Karnatak, the first ruler of Mithila. The temple contains images of Surya, Vishnu, Lakshmi and Astaoal Kamal, The Kamladitya temple signifies both the Sun and Lakshmi-Vishno.

Balirajpur

The village, situated about 25 kms. north-east of Madhubani, contains the remains of an old fortress known as Baligarh. Tradition ascribes the fort to king Bali of the epic period. It is protected by the Archaelogical Department.

Basudevpur

This village, situated about 16 kms. east of

Madhubani, was an important centre of the old Rajput Kingdoms of Bhara and Gandha. The Gandhwariya Rajputs of the district are associated with this place.

Bhawanipur

It is large village situated 5 kms. from the block headquarters of Pandaul. The village is noted for its temple of Ugranath and traditional association with famous Maithili poet, Vidyapati. As the legend says, Vidyapati was such a great devotee of Lord Shiva that the latter began to serve Vidyapati as his servant named Ugna.

Bhit Bhagwanpur

The village lies about 9 kms. south of the block headquarters at Madhepur. The 1961 Census report mentions that it has an old temple of Lord Shiva known as Bideshwarsthan. It is believed that the deity was installed by ShriBideshwar Tbhakur, the great-grand father of the renowned poet Vidyapati. Around the temple tghere are various cavings of black stones. The village is believed to have been the seat of Deobansi Rajas, remains of whose fortress till exist in the heart of village.

Bideshwarsthan

Situated about 1 km. From Lohna Road railway station the village is noted for its Shiva temple named as Bidheshwarsthan. Numerous devotees congregate at the temple every Modnay particularly in the month of Magha. A large fair is also held annually on the occasion of Shivaratri.

Bisfi

A large village, situated 9 kms. from Kamtaul railway station, is the headquarters of the development block of same name. It is ntoed as the birth place of the renowned Maithili poet Vidyapati. The village contains some remnants of his house. The Devi temple in which the poet once used to recite hymns and offer prayers, also stands. Every year the birthday of poet Vidyapati is celebrated with great enthusiasm.

Kakraul

A village, situated at a distance of 24 kms. south from Laheriasarai, is famous for the Kapileshwar Mahadeo temple. It is said that the temple was built by Kapildeva Muni, the celebrated author of the collection of Vedic hymns called the Sankhya Yoga. A fair is held annually in January and people worship Lord Shiva.

Mangrauni

The village lies in the development block of Rajnagar and according to the Panjikars (local chroniclers) it is more than a thousand years old. It has the privilege of producing a number of scholars with significant contribution to the world of learning.

Saurath

This is a roadside village on Madhuabni-Jainagar road and contains a temple known as Somnath Mahadeva. It owes its importance to the annual Sabha held by Maithili Brahmins for negotiating marriages. Many Panjikars, who keep the genealogical records of different families, reside here.

Satghara

The village is situated about 2 kms.from rajnagar railway station. It is noted for its palace of the Rajnagar Raj and beautiful temples. The buildings and the palaces have been largely destroyed during the 1934 earthquake. It is a flourishing business centre also.

Shilanath

A village, situated 3 kms. south of Jainagar, has an old temple of Lord Shvia and has religious importance. A big fair is held annually on the occasion of Kartik Purnima.

Phulhar

The village is situated about 6 kms. west of the block headquarters at Harlakhi. The village contains the temple of Goddess Girija. It is said that princess Sita used to come here every day to worship the goddess. Lord Rama saw her for the first time at this place.

Kalna

The village lies 5 kms. east of the block headquarters at Harlakhi. It is noted for its temple of Kalneshwar Mahadeo said to have been built by King Janaka.

Uchaitha

The village in Benipatti block is noted for its temple of Bhagwati on the western bank of Thumane river. According to a legend, the renowned Sanskrit poet and dramatist Kalidas was blessed by Bhagwati at this place.

Jainagar

Jainagar is a notified area committee and the headquarters of the development block bearing same name. It contains the remains of a mud-built fort now in ruins. It is probably one of the several forts which alauddin Hussain, king of Bengal constructed from Kamprup in Assam to Bettiah, in order to resist the incursions of the hill tribes.

(x)Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Information is not available.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publication which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well

as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to

the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall,

maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

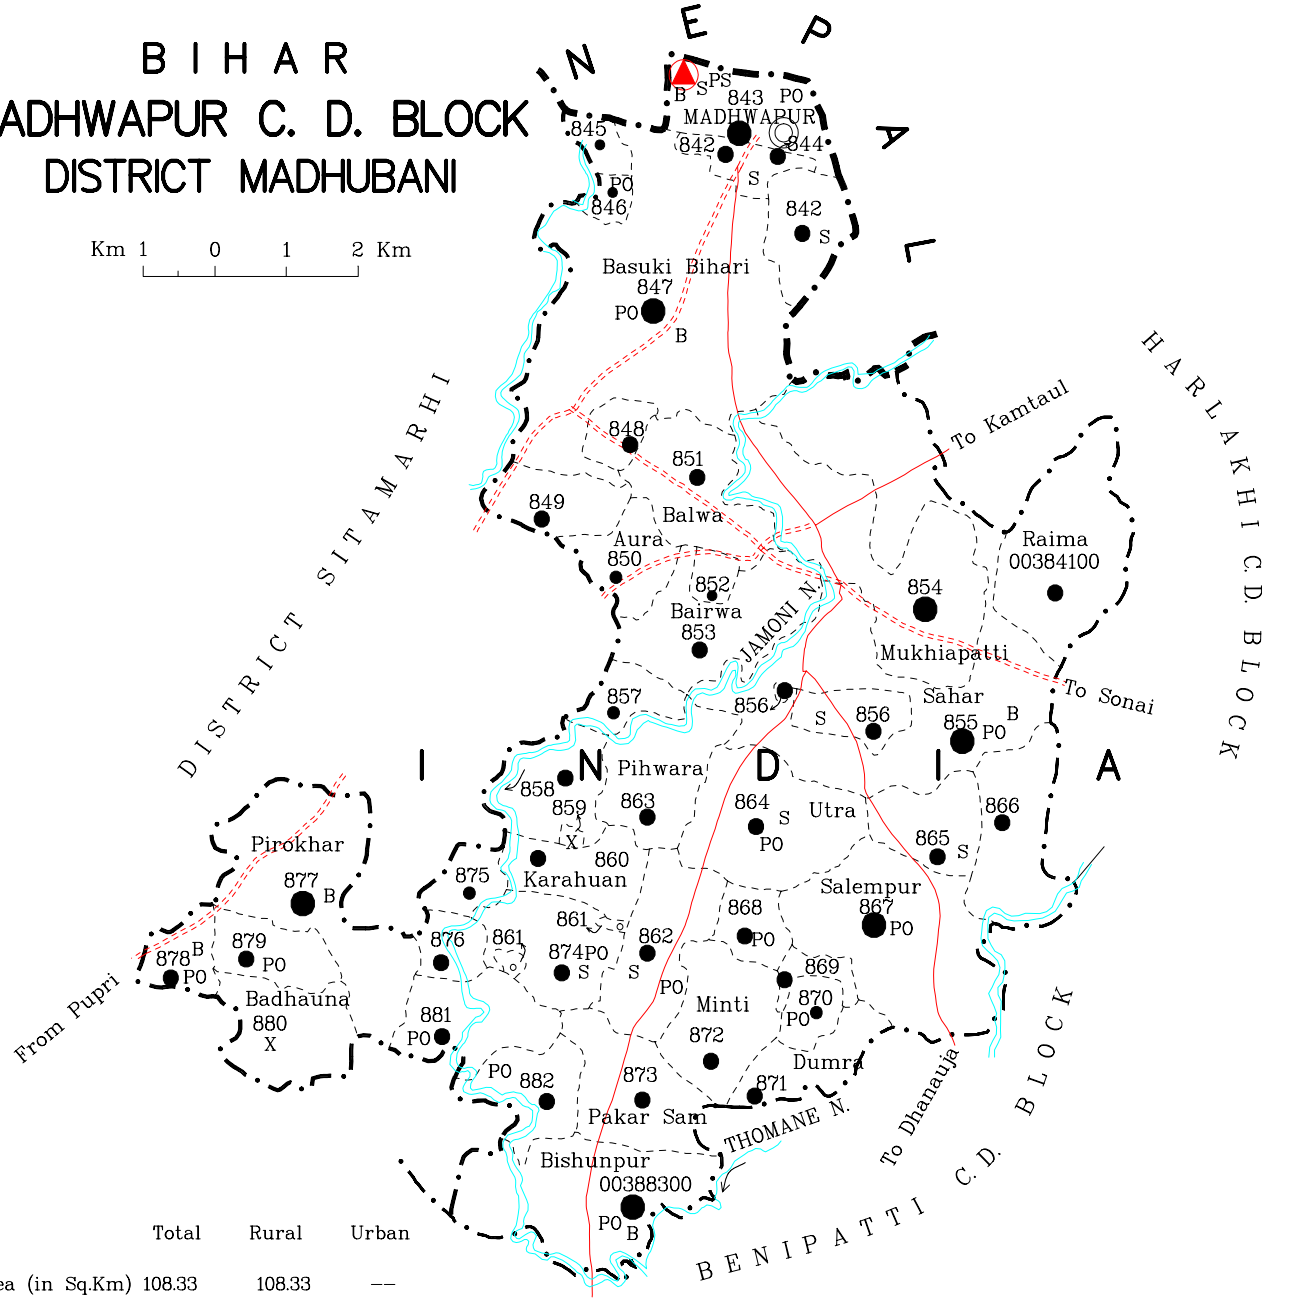

Appendix IX : Statement showing number of girls schools in the villages

				Primary School	Middle School	Matriculation / Secondary School	Higher Secondary / PUC / Intermediate / Junior college
1	2	3	4	5	6	7	8
N.A.							

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	S H Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT (I TO VII)

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Madhubani	1991	65	81	85	89
	1981	74	99	108	120

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in Annexure- II as q(1),q(2),q(3) and q(5) it is observed that there has been decline in child mortality over decade (in 1991 Census as compared to 1981 census) both in the district as well as the state. An interesting feature which can be noticed from the annexure is that the child mortality at the ages 1,2,3 and 5 was lower in the district compared to the state average at the time of 1981 and 1991 Censuses except at the age 5 during 1991 Census the child mortality in the district as well as the state was the same. It indicates that the pace of decline in child mortality had been faster in the district vis-à-vis the state.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the districts and the state(1991-Census)	
	State	District
1	2	3
CBR	36.2	34.5
TFR	5.3	4.8
TMFR	5.9	5.2
GFR	163	150
GMFR	186	164
Child woman ratio	66.6	60.2
No. of children ever born per woman in age group (45-49)	4.1	3.8
Mean age at marriage	16.5	15.3

It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are lower in Madhubani district than the state as a whole in 1991 Census. The child woman ratio is found to be lower in Madhubani district compared to the state. Number of children ever

born per woman in age-group 45-49 in Madhubani district is lower compared to the state. The mean age at marriage of females in the district is also lower compared to the state average.

	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Madhubani	3,826	960	2,866	31,905	746	31,159	901,488	58,833	842,655
	(.4)	(1.6)	(0.3)	(3.5)	(1.3)	(3.7)	(100.0)	(100.0)	(100.0)

It is apparent from Annexures IV(A) that migrants by place of birth are 213.1 and 199.9 lakhs in Bihar State as a whole in 1991 and 2001 censuses respectively comprising 23.4 lakhs males and 189.6 females in 1991 and 21.0 lakh males and 178.9 lakh females in 2001. The migrants constitute 24.7 and 24.1 percent of the total population in the state according to 1991 and 2001 censes respectively. The proportion of male and females migrants in 1991 census, in approximately 5.2 percent and 46.0 percent respectively whereas it is 4.9 percent and 45.0 percent in 2001 census respectively.

In Madhubani district, in 1991 and 2001 censuses, the total number of migrants by place of birth is 6.96 lakh and 9.01 lakh migrants respectively of which only 0.21 lakh are males while 6.75 lakh migrants are

female in 1991 census whereas 0.58 lakh are males and 8.42 lakh are females in 2001 census. The migrants in Madhubani district comprise 24.6 percent and 25.2 percent of the total population of the district in 1991 and 2001 censuses respectively. Male and female migrants account for 1.5 percent and 49.4 percent respectively of the total population in 1991 whereas 3.2 percent and 48.6 percent respectively during 2001 census.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Madhubani		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	662,540	638,005	24,535
(1) within the state		(100.0)	(84.7)	(15.3)	(100.0)	(96.3)	(3.7)
	Rural	19010120	16570646	2439474	648,190	628,295	19,895
		(94.7)	(82.6)	(12.2)	(97.8)	(94.8)	(3.0)
	Urban	990737	375267	615470	13,930	9,300	4,630
		(4.9)	(1.9)	(3.1)	(2.1)	(1.4)	(0.7)
(2) In other states of India	Total	1049969	575484	474485	2,710	2,280	430
		(100.0)	(54.8)	(45.2)	(100.0)	(84.1)	(15.9)
	Rural	800601	512444	288157	1,290	1,140	150
		(76.2)	(48.8)	(27.4)	(47.6)	(42.1)	(5.5)
	Urban	243448	60040	183408	1,390	1,110	280
		(23.2)	(5.7)	(17.5)	(51.3)	(41.0)	(10.3)

The annexure presented above gives an idea of rural urban distribution of internal migration by place of birth. Out of the total intra-state migrants in the state 82.6 percent were rural to rural, 3.1 percent were urban to urban and 1.9 percent were from urban to rural. In case of Madhubani district, of the total intra-state migrants 94.8 percent were from rural to rural, 0.7 percent wee from urban to urban, 3.0 percent were from rural to urban and 1.4 percent were from urban to rural.

In case of migrants from other states, 48.8 percent wee from rural to rural, 17.5 percent were from urban to urban, 27.4 percent from rural to urban and only 5.7 percent were from urban to rural for the state of Bihar. In case of Madhubani district, of the total migrants, 42.1 percent were from rural to rural, 10.3 percent from urban to urban, 5.5 percent from rural to urban and 41.0 percent were from urban to rural.

Other states	43,861	2.8	**Total**	**3,826**	**100.0**
Total	**1,582,339**	**100.0**			

Annexures IV(C) deals with interstate migrants to the district of Madhubani and the state of Bihar.It is clear from the Annexure that 9 states, namely Andra Pradesh, Assam, Haryana, Madhya Pradesh, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal together account for 9.8 lakh (93.4%) of the 10.5 lakh inter state migrants in 1991 census. West Bengal and Uttar Pradesh states are predominant among them contributing 39.9 and 30.7 percent of migrants respectively. In respect of Madhubani district, of the total 2710 Uttar Pradesh contributes over 26 percent of total migrants to the district. It can be further seen that during 2001 census states of Uttar Pradesh and Jharkhand are the major contributors of migrants to the state as well as Madhubani district.

Annexures V(A) and V(B) above show religion-wise distribution of population of 1991 and 2001 census. Both, for the state of Bihar and Madhubani district, Hindus form great chunk of society with 82.4 percent and 83.3 percent in 1991 Census and with 83.2 percent and 82.0 percent in 2001 Census respectively. The percentage of Hindu population is slightly lower in the state than the district during 1991 Censuses but during 2001 Census the district has comparatively lower proportion of Hindus than that of the state whereas in case of Muslim the percentage in the district is higher than the state in both the Censuses. The proportion of Christians, Sikhs, Jains and Buddhists population in the state as well as in the district is very low.

ANNEXURE - V (B)

Annexure of V (B) furnished religionwise distribution of population for district of Madhubani and its C.D. Block according to 1991 and 2001 censuses.

As already observed in Annexure V(A), though the proportion of Hindus in Madhubani district is the highest as compared to other religions communities still it is seem the Muslim also formed a good part of population in the district during both the censuses. It is observed that Bisfi and Madhubani C.D. Blocks have over 25 percent of Muslims living both the censuses. The existence of other religions communities in various C.D. Blocks of the district, is insignificant during both the censuses as their proportion to total population is almost negligible.

It is quite evident from above Annexures VI A,VI B, VI C & VID that Madhubani district as well as the state have a relatively higher proportion of never married males and married females both in 1991 and 2001 censuses. This may be attributed to the fact that women enter into marital knot at comparatively younger ages than males. As against 54.2 and 52.0 percentages of never married males in 1991 and 56.3 and 55.9 in 2001 Census in Bihar state and Madhubani district respectively, the corresponding percentages among females in 1991 are 45.2 and 41.9 and 47.3 and 45.5 percent in 2001. While the state has slightly higher proportion of male and lower proportion of female widowed than the corresponding figures for Madhubani district both in 1991 and 2001 Censuses.

While analyzing marital status by broad age groups one finds that married females outnumber married males in the age group 10-14 both in the year 1991 and 2001 suggesting that child marriage among females is more prevalent than males. However, it is interesting to note that the proportion of married males and females in the age group 10-14 or 0-14 is comparatively less in Madhubani district during 2001 Census than during 1991 Census. It is also found that child marriage is more prevalent in rural areas of the state and the district than urban areas.

It is also significant to note that the proportion of never married females in Madhubani district and state as a whole in the age group 15-19 and above is much lower than the never married males. The proportion of divorced or separated males and females is quit low in Madhubani district as also in Bihar state and are true for both 1991 and 2001 censuses.

Literacy is one of the important demographic characteristics. Apart from collecting data on number of literate, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the census has already been explained in the beginning of this publication.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 census was 38.5 percent. Now it has risen to 47.0 percent in 2001 census. The corresponding propotions for Madhubani district in 1991 and 2001 are 33.2 and 42.0 percent respectively.

Annexures VII(A),VII(B),VII(C) and VII(D) furnish informations regarding absolute number of

illiterates and literates in Bihar state and Madhubani district as also percentage distribution of literates by different level of education by different age-groups in 1991 and 2001 censuses.

A break up of literate population by various educational level (of 1991 census) show that 20.3 percent males and 27.2 percent females in the state are literate but have not attained any educational level. These proportins have risen to 28.4 and 35.8 percent (including Below Primary)for males and females respectively in the state in 2001census. It can be also seen from the Annexures that more or less same trend prevails in Madhubani district during 1991 and 2001 censuses. It is interesting to see that at lower levels of education (up to 'Middle') the female's proportions are on higher side than the male's proportions in state as well as in the district in 1991 Census and it is true for 2001 Census upto Primary level of education.

The position of literates by different level of education in Madhubani district is more or less the same as observed according to 1991 and 2001 census, for Bihar State as a whole.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Madhubani		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Maithili	2,977,640	83.3
Hindi	14,524,035	17.5	Urdu	524,559	14.7
Magadhi/Magahi	12,132,383	14.6	Hindi	63,077	1.8
Maithili	11,830,684	14.3	Bhojpuri	2,320	0.1
Urdu	9,457,544	11.4	Magadhi/Magahi	1,123	0.0
Surjapuri	928,458	1.1	Santali	716	0.0
Bengali	442,352	0.5	Arabic/Arbi	607	0.0
Santali	382,866	0.5	Awadhi	536	0.0
Kurukh/Oraon	57,952	0.1	Bengali	398	0.0
Marwari	27,152	0.0	Mundari	366	0.0
Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	3,939	0.1
Total Population	**82,998,509**	**100.0**	**Total Population**	**3,575,281**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Madhubani district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returned by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population whereas in the district of Madhubani 14.7 percent of the district population have returned it as their mother tongue.Maithili as mother tongue has been returned by 83.3 percent of Madhubani district's population and got first position .Hindi has got third position with 1.8 percent of the district population having returned it as their mother tongue. Bhojpuri has been returned by only 0.1 percent of the district population except these languages analysed above both for the state and the district, other have been returned by insignificant proportions of the respective population of the state and the district as mother tongues as per 2001 Censuses.
