BHIM NAGAR, BARRAGE

Bhim Nagar Barrage on the river Koshi was build in the year 1963 under an Indo-Nepal agreement. After the inception of this barrage the most dreaded river Koshi has to an extent tamed .The barrage through its various gates provides water for irrigation to the adjoining districts in the area. Generation of electricity has been made possible after the construction this barrage.

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 490

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of ‘notified slums’. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other

significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in

the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex-Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

District Highlights – 2001 Census

1. Supaul ranks 24th in terms of population (17,32,578) and 20th in terms of area (2,425 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Supaul is the 28th densely populated district in the state with 714 persons per sq.km as against the state's 881.
3. Supaul ranks 12th in terms of sex-ratio (920) against the state's 919.
4. There are 25 uninhabited villages (out of 551 total villages) in the district of Supaul.
5. Chitauni (under Pratapganj C.D. Block) is the most populated village (21,257) and Kohbarwa (under Raghopur C.D. Block) is the least populated village (42) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 85% of the total workers are engaged in Primary sector.
7. C.D. Block Basantpur has the highest number of villages (94) in the district and C.D. Block Pratapganj has the lowest number of villages (13).
8. Karmegh (under Pratapganj C.D. Block) has the largest area (2,721 hectare) and Bairia Mal (under Basantpur C.D. Block) has the smallest area (4 hectare) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 98.7 percent of the villages.

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It

was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional C.D. Block/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991and / or 2001 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Supaul district is bounded on the north by Nepal, on the south by the districts of Saharsa and Madhepura, on the east by the district of Araria and on the west by the district of Madhubani. Supaul is the chief town being the district headquarters.

Supaul district was created as a separate district carving out supaul and Birpur sub-divisions of the erstwhile Saharsa District. The district has got four subdivisions viz., Nirmali, Birpur, Triveniganj and Supaul. There are altogether eleven Community Development Blocks in the district. The number of Towns and Villages in the district are 3 and 534 respectively.

The district has been largely influenced by geographical factors. The whole district was dotted with mounds and innumerable materials of antiquarian interests were available through out the district to earlier explorers. However, hardly any ancient historical site exists today in the district. The vagaries of the capricious and disastrous Kosi in the last half century or so, have left no trace of them. With the efforts of some early Europeans, however, some important historical objects or land marks have been preserved here and there and it is on the basis of these that some kind of a connected account of the early history of the district can be woven out. In ancient times Vaishali was the strongest republic in North Bihar and beyond that lay the famous territory of Anguttarap. There was a small Janpad, named Apana, in Anguttarap and it included a portion of the district of Saharsa from which the district of Supaul was carved out in the year 1991. Although it is not confirmed whether this was a republic it is certain that the people of this area were out side the influence of the Lichchhavis. Various sites in the district, now completely eroded and destroyed by the Kosi viz., Bitarpur, Budhiagarhi, Budhnaghat, Bhudhadi, Pithahi and Mathahi, are associated with Buddhism. Before the advent of Kosi in the district these sites supplied important materials and during the period of erosion big buildings and huge constructions which lay covered under the earth were noticed falling into the river. Local legends confirm that Lord Buddha and Lord Mahavira passed through the district in course of their missionary travels and delivered important sermons.

Both the Anga and North Bihar (including Supaul) continued to be independent till the early part of the sixth-century B.C. For some time Magadha remained an integral part of Anga. But soon the prosperity of Anga declined. Bimbisar, the king of Magadha annexed Anga to his empire. Though Anga seems to have passed into the hands of the Magadhan sovereign, Anguttarap seems to have continued as an independent Janapada and the western portion of Supaul as a part of Mithila continued to enjoy independence. This was characteristic of the whole of North Bihar until it was finally conquered by Ajatsatru. It was Ajatsatru who finally defeated the Lichchhavis and other independent republics of North Bihar and annexed the whole territory to the Kingdom of Magadha. The Magadhan Empire was growing rapidly and the whole of Bihar was brought under the sway of Magadhan rule by the Nandas and Mauryas.

In the first decade of this century a hoard of 58 punchmarked coins of the Mauryan period was discovered from Gorhoghat. Later, the same type of coins were found at Patuaha by prof. R.K. Choudhary in 1958. He also came across some pieces of black polished ware near Mahishi and its surroundings. The Mauryan rule in this area stands firmly confirmed by a Mauryan pillar at Sikligarh on the Banmankhi-Forbesganj Road and another in the Kishanganj police station. Since Saharsa was a border district even in those days, the Mauryan rules apparently took special care to guard its frontiers.

The Mauryans were supplanted by he Sungas and the Kanvas and there does not seem to have been any major political change in the district. Whether the Kushans conquered this portion or not can not be determined.

Between 320 and 1097 A.D.

Under the Guptas (from 320 A.D.) the entire North Bihar was consolidated as Tirabhukti (province) with its capital at Vaishali. Henceforward provinces came to be known as Bhuktis and district as Vishayas. In North Bihar there were two Bhuktis, viz., Tirabhukti (practically whole of North Bihar) and Pundravardhanbhukti (including portion of Saharsa of which Supaul district was a part, Purnia and a portion of North Bengal). The extent of Supaul during the period under review was up to the confines of PundravarSdhanbhukti which included some of its present areas.

After the decline of the Guptas the political gap came to be utilized by all contemporary chiefs. Taking advantage of the situation, the Varmans of Kamrup (Assam) extended their authority upto the confines of the Kosi. The rule of Purnavarman over North Bihar included the present district of Saharsa, the erstwhile district from which Supaul district has been carved out. The rise of Harsha in 7th century A.D. was an event of great importance. He brought under his sway the whole of Northern India. But the death of Harsa in 647 A.D. once again let loose the forces of disintegration.

The palas of Bihar and Bengal (8th Century A.D.) gave a stable administration to the district. As south Bihar was pressed by the Kalchuris, the palas apparently shifted to North Bihar and Saharsa might have been their head quarters during the time of Vigraphapala iii. Quite a few villages in Supaul district are associated with the names of pala rulers and it was through this district that the palas could establish contact with Nepal.

Between 1097 and 1765 A.D.

The decline of the pala authority in Bihar and Bengal was followed by the establishment of Karnata in Mithila and the sena dynasties in Bengal. Both the Karnatas and senas claimed authority over portions of Supaul and often entered into armed conflict.

Nanyadeva the first of the karnatas, extended his influence from Champaran to Purnia. Probably, the two chiefs (Nanyadeva of the Karnatas dynasty and Vijay sena of the sena dynasty) were allies who fell into disagreement over division of territory. The Deopana inscription of Vijay Sena indicates that Nanyadeva was defeated and imprisoned somewhere in the present Supaul district. It was Gangadeva, his son who liberated him. The Sanokar inscription of Vallalasena proves that his rule extended up to the district of Bhagalpur.

The two sons of Nanyadeva, Maladeva and Gangadeva apparently drove the senas further east as indicated by the setting up of Gangapur Rajni (named after Gangadeva) in pargana Nishankpur, Kurha and Maldiha (named after Malladeva) on the Saharsa – Purnia border. Village Malhad near Supaul district is also associated with Malladeva. Ganga deva was succeeded by Narasimhadeva during whose reign Mithila and Nepal were separated. The last king of the line was Harsimhadeva who lost to Ghiyas-uddin Tughlaq in a protracted struggle.

Gradually, the Tughlaq authority in Mithila weakened. Haji Illyas of Bengal taking advantage of this situation invaded Tirhut and defeated its ruler. He divided the Tirhut Kingdom into two parts. As a result of this division the district of Saharsa came under the control of Oinwara rulers. The most famous king of this line was Shivasimha, who issued gold coins. Vidyapati, the famous poet, lived under his patronage.

After the fall of the Oinwaras, there was virtual chaos. The Gandhavarya Rajputs are said to have acquired power and ruled during this period of confusion. The Gandhavariyas trace their descent from the ruling chiefs of Tirhut. The whole district of Saharsa was dotted with small chief tainships created both by the Hindus and the Muslims. Even in the early part of the Mughal rule they could venture to oppose the central authorities as Bihar, Afgans were opposed to the establishment of Mughal authority. The Karranis and the Afgans, in collusion with the local Rajput rulers and petty chief had made this district the center of revolt.

Raja Todarmal made the revenue settlement in Subah Bihar in 1582. The very fact that most of the existing parganas of the district of Saharsa were assessed during the time of Akbar shows that the district had acquired sufficient importance.

During the course of the Mughal rule, the old district of Saharsa seems to have formed parts of Sarkar Tirhut, Sarkar Munger, and Sarkar Purnia. The Muslim rule naturally had its influence on the life and culture of people. Some of the Rajput Zamindars also became converts. The Muslims of Nawhatta circle in the district of old Saharsa are said to have been originally Rajputs and their conversion is traced to the Mughal times. It is said that in 1654 Shahjehan bestowed the title of Raja on Kesri Sinha (ancestor of Sonbarsa Raj). Raja Fateh Singh of the same line is said to have decided with the East India Company against Mir Kasim in the battle of Udhuanala in 1763.

In 1764 old Saharsa district passed with the rest of Bengal under the control of the East India company. During the Independence Movement of 1857, the people in revolt remained unchecked by the administration of Purnia and Bhaqgalpur and they moved unchecked through the terai area. They were very active in different parts of the district of old Saharsa which was in the midst of a great turmoil. Since then it continued to be an important centre for various kinds of political agitations directed against the British administration.

The part played by the district of Saharsa in the freedom movement was of immense importance. The Home Rule Movement of Anie Besant in 1917 and the Satyagarah Movement of Mahatma Gandhi in 1921 received widespread support in the district. In Saharsa, the freedom movement was led, among others, by Sarvashri Mahtab Lal Yadava, Shivanandan Mandal, Nand Kishore Choudhury, Rajendra Mishra, Ram Bahadur Sinha, Yadunandan Jha and Rajendra Lal Das. Supaul and Madhepura jails were full of political prisoners. Thana Bihpur (in Bhagalpur district) was the scene of great activity where Dr. Rajendra Prasad was literally beaten by the police and the people of Saharsa were much agitated over this. Picketing went on all over the district with full vigour. The period between 1930 and 1942 in the district of Saharsa was marked by various kisan agitations all over the district for Bakast lands.

`The August revolution of 1942 formed a landmark in the history of freedom movement in Saharsa district also. On the 13th of August, a huge mass of people under the leadership of Sarvashri Bhupendra Narain Mandal, Deota Pd. Singh and others arrived in the Madhepura court compound and a young lad of 14 years named Hare Krishna Chaudhary climbed upstairs and hoisted the national flag on the treasury building of the court. All the police stations in the subdivision were taken possession of. On the 29th August, there was police firing at Saharsa and a number of persons were killed. After his escape from the Hazaribag Jail in 1942 Sri Jai Prakash Narayan visited Saharsa district on his way to Nepal. Shri Siyaram Singh of Bhagalpur formed the Siyaram Dal which had its different branches in different parts of the district of Saharsa. In December 1942, Shri Siyaram Singh met Shri Jai Prakash Narayan in Nepal where a conference of the workers of Bihar was held under the presidentship of Shri Shivanandan Mandal.

The district played a prominent role in the subsequent events which continued uptill the country's independence.

(iii) Administrative set up

A total of 4 Subdivisions, 11 Community Development Blocks and 551 villages constitute the present Supaul district.

There are three towns Municipalities the district names 1. Nirmali(NA), 2. Birpur(NA) and 3. Supaul(M).

District Collector is head of the district administration, subdivision is headed by sub-divisional officers. Community Development Blocks and Circle Offices are the primary level of civil administration and revenue collections in the district. Block Development Officers and Circle Officers are posted in these officers respectively who assist sub-divisional and district officers of the district.

Senior Superintendent/Superintendent of Police is the head of the police administration of the district who is assisted by Deputy Superintendents and police/subdivisional police officer/posted in sub-divisions. A network of police thanas and police post and police outposts are in place manned by Inspectors/ Sub-Inspectors of police who keep vigil on crime in their respective areas**.**

The Judges and Munsif magistrates are posted at district and subdivision who administer and deliver justice of different kinds.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

(iv) Physical Features

Natural Divisions

The entire district lies north of the Ganges and is comprised of planes. The eastern portion of the district is more fertile and more densely populated. The deposits left by the turbulent Kosi have affected the fertility of the soil but progressive implementation of the Kosi project has turned the district into veritable granary.

The topography of the district had been affected by the ravages of floods. After the construction of Kosi Barrage and several embankments, the sandy tracts are being reclaimed the areas of waste land, full of kans and pater (Jungles), lying mostly in Supaul district have been largely reclaimed and are yielding crops. A number of canals have been constructed under the Kosi project which provide irrigational facilities to the districts of Supaul, Saharsa, Darbhanga, Purnia and Madhepura besides some parts of Nepal.

The main river of the district is the Kosi. It rises from the Himalayas. Its three tributaries Sun Deosi, Arun and Tamur meet at Tribeni and form the Sapt Kosi. It enters the plains at Chatra. A number of rivers such as the Tilguga, the Bhuthhi Balan, the Sugarwe, the Sonior, the Jangar Balan, the Kamla and the Bagmati join the Kosi on its right bank on the plain. The Kosi is notorious for its vagaries and was known as Bihar's river of sorrow. During the rainy season it swells and inundates large tracts of the district. It has changed its course a number of times and at present it has shifted its course to the west and flows near Nirmali and Madhepur, the latter being a part of Madhubani district.

The other important rivers of the district emerge from the Himalayas and fall into the Khagari river which itself joins the Kosi. These rivers are the Tiljuga, the Bati, the Dhimra, the Tilabe, the Parwan, the Dhusan, the Chalausi, the Loran, the Katna, the Daus and the Ghagri.

Climatic conditions

The district generally has a humid climate except during summer which is rather dry. The winter season starts from November to February and summer season from March to May. The rainy season extends from June to September, October being the transitional month January is the coldest month while June is the hottest month and the maximum temperature goes up to 42^0-43^0c.

Rain starts from June, the maximum rainfall occurs in the month of July when it receives nearly one fourth of the total annual rainfall.

Flora and Fauna

Paddy and wheat are grown in the alluvial and reclaimed soils the Kosi affected areas still contain Kans and Pater forest, though reclamation is in progress. Small trees such as babul, jhaua, Harjora etc., and water berries such as Makhana, Ramdana and Motha grass are also found, Sabai Grass, Munj and varieties of cane etc., also grow in the district. Though the Kosi has destroyed a large number of fruit bearing trees, the district still produces a large quantity of mangoes. Other common trees are Mahua, Jackfruit, Plantain, tamarind, bair, Jamun and Kath jamun, Khajur, Sal, Sesum, and Semal, Lichi, Guava, lemon watermelon, coconut and betelnut are also grown.

The denudation of forests, the reclamation of kans and pater infested waste-lands, and indiscriminate hunting in the past have led to the decline of tiger, panther, hog-deer, chital, wild-boar, etc., Nilgai, hares, and Khikhir are still found. Jackals, monkeys, wolves are also common. Several deadly species of reptiles such as cobra and karait and various kinds of lizards are also found.

Jungle crow, house crow, treepie, crowpheasant, grey hornbill, little brown dove, grey partridge, white breasted waterhen, bronze-winged jacana, curlew- stint black ibis, glossy ibis, white necked stork, cattle egret pond heron, pink headed duck, silli or cotton teal, white-fronted goose, large whistling teal, brahminy duck, eastern grey duck, marbled teal and eastern goosander are the different varieties of birds found in the district of Supaul.

The reclamation of water pools and indiscriminate shooting have led to the extinction of the pink-headed duck, marbled teal, copperbreasted teal and floricans. Various species of ducks, mallard, nakta comb duck and geese are no longer found.

Land use pattern

Agriculture is the main occupation of the people of the district. The turbulent Kosi has been controlled considerably and the completion of the Kosi project has helped bring about changes in the cropping pattern. The district is now growing jute and maize in large quantities. Both bhadai and aghani paddy are grown. Marua and oil-seeds continue to be grown. Cultivation of indigo has completely disappeared. Sugar-cane cultivation has increased considerably.

The Principal crops grown in the district are paddy, maize, jute, wheat, barley, marua and sugar-cane. The cultivators are encouraged to grow the improved varieties of these crops, One seed multiplication farm has been opened in each community development block.

Irrigational facilities

After the independence, considerable attention has been paid to the provision of irrigation facilities in the district by means of flood control measures as well as irrigation channels etc. The gigantic Kosi project which has been completed has resulted in complete transformation of the irrigational avenues in the district. In addition to this, irrigational facilities have been extended in the district through a number of minor irrigation schemes, surface percolation well, open borings, tube wells, rahat pumps, pumping sets and handpumps.

Mines and Minerals

There are no mines in the district and only brick soil and sand are available as minerals.

Forestry

There is no forest available in the district but there is a plan for planting various types of trees, viz., Sisam, Eucalyptes, Gulmohar, Sakhua, etc., along the Kosi canal under the Forest Extension Division, Purnia. The work is progressing satisfactorily.

Fishery

Fishery is one of the most important occupations of the district. There are many Jalkars and Pokhars in the district in which large scale fishing is done. Thousands of Fishermen (Machhuas) of the district get employment in these Jalkars.

Industrialisation

Industrially, this district is still quite backward and until recently there was no large-scale industry. The district had neither adequate resources nor the infrastructure required for industrial development. Communication facilities ere also poor and flood inundation had become a nightmare.

Various type of small scale industries such as cake making, candy manufacturing, soap manufacturing and biscuits factory etc., have also been established in the district which provide employment to the concerned skilled and unskilled labours.

Livestock

The district of Supaul has a comparatively small livestock population. Poultry Development has received considerable attention in the community development blocks and the rapid increase in their number is apparently due to such efforts.

The number of veterinary hospitals, dispensaries and doctors has considerably increased over the decades. A number of measures have been taken by the Animal Husbandry Department to improve the breed of animals.

Communications

Roads - Owing to the vagaries of the Kosi river, the communications, viz., roadways, railways and waterways of the district have been affected greatly. After the independence, however, a number of metalled and unmetalled roads have been constructed.

The following roads have been improved upon.

Supaul to Singheshwar Asthan road

Supaul to Tribeniganj

Supaul to Saharsa & Madhepura

Supaul to Saraigarh-Bhaptiyahi

Besides, anumber of bridges have been constructed in the different parts of the district.

Railways

A branch line of N.E. railway running from Mansi to Forbesganj enters this district at Garhbaruari station.

Rivers

The district lacks navigable rivers however small country boats serve the purpose of navigation though on a limited scale.

Airways

There is only one airport in the district located at Birpur, maintained by the public works department.

Trade and Commerce

In Supaul district, trade consists mainly of export of Jute and Mango and import of iron and iron products, coal, cotton textile, food grains and consumer goods.

The above mentioned goods are mostly transported by the railways. Bullock carts carry the products to the railway stations or mandies. Trucks are also being utilized for the purpose.

The centre of whole sale business in the district is Supaul, Raghopur, Birpur and Nirmali. Jute, bamboo, cloth, rice, ghee and grains other than rice are the principal commodities for whole sale business.

Social, cultural and administrative development.

No major social or cultural events have taken place in the district. However, fairs and festivals are held regularly by different communities in the district in complete communal harmony.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country,

particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of

400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.- -For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castess :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhanger
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Swasi
21. Pasi
22. Rajwar

23. Turi

Scheduled Tribess :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage,
(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same}} \times 1{,}000$$

age-group

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included

in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Saharsa district during 1991 was 24,75,254 Hindus constitute over 85.37 per cent (2,113,241persons) of the population in the district followed by Muslims

14.49 percent (3,58,560 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Saharsa district during 1991 was 2,475,254. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Saharsa district, Hindi, the main mother tongue of the district was returned by 87.93 percent (2,176,427 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Saharsa district, was 11.56 percent (286,170 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Supaul 1991 census.

The population of the Scheduled Castes in the Saharsa district (from which the district of Supaul was carved out) during 1991 was 383,149. Numerically five important SCs were namely (i)Musahar(ii)Chamar(iii)Dusadh(iv) Bantar(v)Dom. The population of Musahar was 145,286which constituted 38.1 percent of the Scheduled Castes population. The population of Chamarwas 89,402, which constituted 23.3 percent of the Scheduled Castes population. The population of Dushad was 84,052 while constitution 21.9 percent of the Scheduled Castes population. Bantar had 32,720 populations while Dom has 6,126 populations. Bantar constituted 8.5 percent while Dom 1.6 percent of the Scheduled Castes population.

The population of the Scheduled Tribes in the district of Supaul during 1991 Census was 7,359.Numerically five important STs (i)Santal(ii)Oraon(iii)Munda(iv)Gond(v)Pahariya. Santal had3, 399 populations that constituted 46.2 percent of the Scheduled Tribes population. Oraon had 2,762 populations, which constituted 37.5 percent of the Scheduled Tribes population. Munda had 497 populations, which constituted 6.8 percent of the Scheduled Tribes population. Gond has 157 population which Pahariya had 109 population. Gond constituted 2.1 percent while Pahariya constituted 1.5 percent of the Scheduled Tribes population.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Sapual district is 1,732,578 comprising 902,207 Males and 830,371 Females and constituting 2.1 percent of the State population spread over 2.6 percent of the area of the State in the 11 C.D.Blocks of the district. Jhajha is the most populous C.D. Block where as Gidhaur is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF C.D. BLOCKS BY RESIDENCE, 1991-2001

Serial number	C.D. Block	Population						Percentage decadal variation 1991-2001			Percentage urban population

11	Tribeniganj	190,771	190,771	0	248,706	248,706	0	30.4	30.4		0.0	0.0
District Total:		**1,342,841**	**1,251,309**	**91,532**	**1,732,578**	**1,644,370**	**88,208**	**29.0**	**31.4**	**-3.6**	**6.8**	**5.1**

Table– 1 shows rise in the population of the district during 1991-2001 decade has been of the order of 29.0. Rural population in the district increased by 31.4 percent while urban population of the district decreased by 3.6 percent. It is important to note that urban population of the district has decreased because two of its town namely Bhimnagar (CT) and Chhatapur (NA) have been declassified/demodified during 2001 Census.

It can be seen from the table that decadal growth rate (1991-2001) is the highest in Basantpur C.D. Block while it is the lowest in Nirmali C.D. Block.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED WITH THE RELATED POPULATION , 2001

Districts (Rural) Total:		**526**	**300566**	**277699**	**22 (4.2)**	**156302**	**143927**

It may be observed in the Table 2 that the maximum number of villages in the district lie in the population range of 2000-4999 accounting for 32.3 percent of the total inhabited villages closely followed by villages in the population range of 1000-1999 accounting for 22.1 percent of the total inhabited villages. The percentages of population in the above two population ranges are 31.9 percentages and 10.4 percent, of the total rural population of the district respectively. The villages in the population range of 500-999 constitutes 14.1 percent of the total inhabited villages and in these villages account for one and 4.0 percent of district rural population is 5000-9999 accounting for 16.0 percent of the total inhabited villages and in these villages the population is 35.2 percent of the total rural population. There are only 21 villages in the population ranges of than 200 accounting for 4.0 percent of the total inhabited villages and in these villages the percentages of population is only 0.2 percent.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED, AND MERGED TOWNS IN 2001 CENSUS

	Name of town
	1
(a) New	
(i) Statutary town	NIL
(ii) Census town	NIL
(b) Denotified	NIL
(c) Declassified	NIL
(d) Wholly merged with other town(s)	NIL

Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	0	0.0	0	0.0
11-20	1	0.2	126	0.0
21-50	4	0.8	579	0.0
51-100	6	1.1	1,473	0.1
101-200	19	3.6	10,404	0.6
201-300	23	4.4	26,449	1.6
301-500	98	18.6	183,353	11.2
501 +	374	71.1	1,412,237	85.9
Not known	1	0.2	9,749	0.6
District Total:	**526**	**100.0**	**1,644,370**	**100.0**

Population Density (Rural) of the district: 696.6

The data presented in the above table highlights the fact that maximum proportion of villages in Supaul district lies in the density range (per square Kilometer) of 501+ with 71.1 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 18.6 percent. It would further be seen that small number of villages fall in the density range of 201-300 which account for 4.4 percent of the total inhabited village.

Maximum number of villages fall in the density range of 501+ covering 85.9 percent of the population followed by villages in the density range of 301-500 which account for 11.2 percent of the population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1061	1064	1003	1014	1014	0
1911	1051	1056	942	1006	1006	0
1921	1020	1027	886	983	983	0
1931	995	1005	820	966	966	0
1941	1002	1012	842	964	964	0
1951	1000	1010	859	965	965	0
1961	1005	1020	832	950	957	811
1971	957	968	833	930	936	817
1981	948	959	852	937	944	823
1991	907	913	857	904	909	841
2001	919	926	868	920	923	876

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows that the sex ratio for the urban areas of Supaul district is comparatively low as compared to the urban areas of the state during 1961 and 1991 Census. However, on the other hand, the sex ratio for the rural areas of the state is found to be comoaratievely high as compared to the rural areas of Supaul district during 1901 and 2001 Census, It has already been discussed that the district of Supaul was created after 1991 Census. It is found that in cases of sex ratio in the total population in the district it is lower than the sex ratio of the state of Bihar during 1991 Censusesand hgher than the sex rato of the State of Bihar during 2001 Census.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Sex ratio

Table 17 shows proportion of Scheduled Tribes Population to total population in villages during 2001 Census. It can be seen that there are 470 villages in the district which do not have Scheduled Tribes population. Further, it can be seen that 45 villages lives in the percentage range of less than 5 have 46.9 percent of district rural 5-10 and 11-20 have 8 and 2 villages respectively accordingly for 35.2 and 10.7 percent of district rural Scheduled Tribe population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Nirmali (NA)	16141	1541	6	9.5	0
2	Birpur (NA)	17982	396	0	2.2	0
3	Supaul (M)	54085	3421	28	6.3	0.1
District(Urban) Total		**88208**	**5358**	**34**	**6.1**	**0**

Table 18 shows that there is no urban agglomeration in Supaul district. There are three statutory town in the district i.e. Nirmali (NA). Birpur (NA) and Supaul (M), the percentage of Scheduled Castes population to total population is 6.1 the percent in urban areas of of the district. The proportion Scheduled Caste population is Nirmali (NA) is 9.5 while the percentage of scheduled tribes population in Nirmali (NA) is Zero. The percentages of Scheduled Castes, population of Birpur (NA) is 2.2 while the percentage of scheduled tribes population of Birpur (NA) is zero. Supaul (M) of the district has 6.3 percent of the population area Scheduled Castes population while the percentage of scheduled tribes population is only.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Nirmali	984	0
2	Basantpur	924	809
3	Chhatapur	938	957
4	Pratapganj	932	1078
5	Raghopur	918	939
6	Saraigarh Bhaptiyahi	939	0
7	Kishanpur	944	1007
8	Marauna	962	1056
9	Supaul	932	920
10	Pipra	949	0
11	Tribeniganj	933	932
	District (Rural) Total	**937**	**952**

Table19 shows that the sex ratio of Scheduled Castes varies 984 in Nirmali C.D Block to 918 in Raghopur C.D Block. The sex ratio in Marauna C.D.Block is 962 while sex ratio figures of Basantpur, Supaul , Pratapganj,Raghopur C.D.Blocks are lower than the district average(937).

The sex ratio Scheduled Tribes varies 1078 in Pratapganj C.D.Block to 809 in Basantpur C.D.Block. The sex rartio of Marauna C.D.Block is 1056 while the sex ratio figures of Pratapganj, Marauna, Kishanpur and Chhatapur C.D.Blocks are higher than the district average while the sex ratio figures of Basantpur, Supaul, Tribeniganj and Raghopur C.D.Blocks are lower than district average.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Nirmali (NA)	931	500
2	Birpur (NA)	895	0
3	Supaul (M)	897	333
	Sex ratio (Urban) for the district:	**907**	**360**

There are three statutory towns in the district. Nirmali(NA) hassex ratio of Scheduled Castes as 931 while the sex ratio of Scheduled Tribes is 500. The sex ratio of Scheduled Castes in Supaul(M) is 897 while the sex ratio of Scheduled Tribes is 333. Sex ratio of Scheduled Castes in Birpur(NA) is 895 while the sex ratio of Scheduled Tribes have no population. Urban areas of the district have very scanty Scheduled Tribes population. Therefore sex ratio figures and very adverse.

Table 21 shows that among the C.D. Block in the district Basantpur C.D. Block has the highest proportion of literate population (44.3%) followed by Nirmali C.D. Block (42.3%). C.D. Block has recorded the lowest population of district with 32.2 percent.

Male literates outnumber female literates in all C.D. Blocks of Supaul district. The highest proportion of male literates is in Nirmali C.D. Block with (60.5 percent) closely followed by Basantpur C.D. Block with (57.6%). Chhatapur has recorded by the lowest population of maleliterate with 46.3 percent . As far as female literacy it concerned Basantpur C.D. Block leads the table with 29.4 percent while Marauna C.D. Block has recorded the lowest proportion of female literates with 12 percent only.It can be easily inferred from the table that these C.D. Blocka which constitute any urban units have higher proportion of literates than these C.D. Blocks which do not have any urban unit.

51-60	32	6.1	66,898	4.1
61-70	8	1.5	14,588	0.9
71-80	1	0.2	666	0.0
81-90	1	0.2	958	0.1
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**526**	**100.0**	**1,644,370**	**100.0**
Literacy rate for District:		**37.3**		

Table 23 shows that in 44.3 percent of the inhabited villages, literacy rate ranges between 31 and 40 percent. In these 233 villages 55.5 percent of the district rural population live. This is the largest group of villages in the district. This closely followed by 117 villages and with 18.9 percent of the district rural population residing in 22.2 percent of the inhabited villages where literacy rate ranges between 21 and 30 percent. 16.5 percent of the inhabited villages i.e. 87 villages are such where literacy rate ranges between 41 and 50 percent. These villages account for 17.9 percent of the district rural population. 6.5 percent of the inhabited villages i.e. 34 villages are such where literacy rate range between 11 and 20 percent and these villages account for 2.4 percent of the district rural population. There are only 8 villages accounting for 1.5 percent of the inhabited villages where literacy rate ranges between 61 and 70 percent and these villages account for only 0.9 percent of the district rural population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial no.	Name and urban Status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

The Table 25 show that literacy rate among the scheduled castes is the highest i.e. 26.4 percent in Nirmali C.D. Block whereas it is the lowest i.e. 17 percent in Marauna C.D. Block and the same condition is there in Supaul C.D. Block also in the district. It is observed that the literacy rate among the Scheduled Castes for the district is 19.3 percent only. As regards percentage of male literacy rate among the Scheduled Castes it is highest i.e. 43.2 percent in Nirmali C.D. Block whereas it is the lowest i.e. 27.3 percent in the Supaul C.D. Block. In case of female literacy rate among the Scheduled Castes it is highest i.e. 9.4 percent in Basantpur C.D. Block and the lowest i.e. 5 percent in Marauna C.D. Block. It is found that the gap

between male and female literacy rate is highest i.e. 33.9 percent in Nirmali C.D. Block whereas it is lowest i.e. 20.4 percent in Raghopur C.D. Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	19	4.0	1,161	0.5
1-10	60	12.7	24,390	9.7

Table 31 & 32 gives insight into the distribution of worked by seen in C.D. Blocks of the district. The work participation rate for total workers is defined as the percentage of total workers to total population. In similar way it is defined for main and marginal workers. Table 32 shows that the work participation rate (WPR) in the rural areas of Supaul district is 30.7 percent as main workers and 12.1 percent as marginal workers. Proportion of non workers in the rural areas of district is 57.3 percent.

Among the males main workers participation rate in the district is 44.9 percent while that of females is only 15.3 percent as per 2001 Census. The proportion of rural main workers is

the highest (32.5%) in Raghopur whereas in Saraigarh Bhaptiyahi C.D. Block it is the lowest with (26.9%). Out of 11 C.d. Blocks WPR of six C.D. Blocks are above the district average.

The proportion of marginal workers is the highest (15.9%) in Marauna C.D. Block and the lowest (8%) in Basantpur C.D. Block. The proportion of total workers is the highest (45.8%) in Marauna C.D. Block and the lowest (40.1%) in Basantpur C.D. Block.

Table 31 deals with the some topic as table 32 deals oly difference is that Table 31 deals with total area of the district whereas total 32 deals with rural and only. The proportion of non-workers among males in the district is 49.3 percent while that of females is 65.9 percnet as per 2001 census. The proportion of non workers is the highest (59.9%) in Basantpur C.D.Block and the lowest (54.2%) in Marauna C.D.Block.

Note: Percent of Worker to total worker are given in brackets

Table 34 indicate the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other economic activities. The economic activity in the rural areas of the district is primarily dependent on agricultural which is supported by the fact that the cultivators (34.2%) and agricultural labourers (58.8%) together constitute 89.0 percent of the total workers of the district. The agricultural sector has observed more than three fourth of the total main workers.

The proportion of cultivators varies between 41.6 percent for Marauna C.D. Block to 28.6 percent for Basantpur C.D. Block. Proportion of agricultural labourers varies between 65.3 percent for Chhatapur C.D. Block to 45.0 percent for Nirmali C.D. Block. The proportion of Household Industry workers is only (1.9%) of the total workers of the district. Proportion of household industry workers varies between 4.0 percent for Nirmali C.D. Block to 1.1 percent for Chhatapur and Kishanpur C.D. Block.

The proportion of other workers is (9.0%) of the total workers of the district. Proportion of other workers varies between 17.1 percent for Nirmali C.D. Block to 3.8 percent for Chhatapur C.D. Block.

Note: Percent of Worker to total worker are given in brackets

From the above table, the relative important of the main spheres of economic activity may be gauged from the distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other economic activities. The economic activity in the rural areas of the district is primarily depend than agricultural which is supported by the facet that the cultivators (35.2%) and agricultural labourers (55.9%) together constitute 91.1 percent of the total workers of the district. The agricultural sector has observed more than three fourth of the total main workers.

The proportion of cultivators varies between 41.6 percent for Marauna C.D. Block to 29.9 percent for Chhatapur C.d. Block proportion of agricultural labourers varies between 65.3% for Chhatapur C.D. Block to 49.3 percent for Pratapganj C.D. Block. The proportion of Household Industry Workers is only 3.2 percent for Nirmali C.d. Block and same 3.2 percent for Saraigarh Bhaptiyahi C.D. Block to 1.1 percent for Chhatapur C.D. Block and same condition in Kishanpur with also 1.1 percent.

The proportion of other workers is 7.1 percent of the total workers of the district. Proportion of other workers varies between 11.7 percent for Basantpur C.D. Block to 3.8 percent for Chhatapur C.D. Block.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The data presented in the above table highlight the distribution of villages according to the availability of different amenities in the district.

Educational Facility - There are as many as 444 villages accounting for 84.4 percent of the total number of inhabited villages (526) in the district where educational facility is available.

The highest proportion of villages with education facility is in Pipra C.D. Block with 97.4 percent closely followed by Tribeniganj C.D. Block with 1.1 percent. The smallest proportion of villages with educational facility is observed in C.D. Block Basantpur with 67.4 percent.

Medical Facility – The availability of medical facility in the villages is quite low and only 19.8 percent villages have got it. Among the C.D. Blocks, Pratapganj has the largest proportion of villages with medical facility, the percentage being 61.5 percent where the lowest is 7.0 percent in Basantpur C.D. Block.

Improved Drinking Water – There are as many as 519 villages accounting for 98.7 percent of the total inhabited villages in the district where improved drinking water facility is available. Among the C.D. Blocks, all C.D. Blocks have their facility in their villages except Basantpur, Chhatapur, Saraigarh Bhaptiyahi and Tribeniganj C.D. Blocks.

Post Office – Postal facilities are available only in 173 villages out of 526 inhabited villages (32.9%) in the district Pratapganj C.D. Block has the maximum population of villages having postal facility (53.8%), whereas Basantpur C.D. Block has the minimum population of villages having postal facility (7.0).

Telephone – The availability of telephone facility in the village is quite low and only 17.3 percent villages have got it. Among the C.D. Blocks, Pratapganj has the maximum population of villages having telephone facility (46.2%) followed by Supaul with 40.3% while the Nirmali and Basantpur C.D. Blocks still do not have telephone facility.

Transport Communication – Transport communication facility are available only in 95 villages out of 526 inhabited villages (18.1%) in the district. Majority of villages still do not have this facility. Kishanpur C.D. Block has the highest proportion of villages (34.1%) which are connected by bus or rail or navigable river/canal services, etc. followed by Saraigarh Bhaptiyahi with 33.3 percent and the lowest is in Marauna C.D. Block with (8.3%).

Bank - Banking facility is available only in 33 villages out of 526 inhabited villages (6.3%) in the district. Among C.D. Blocks, Pratapganj has the maximum population of villages having banking facility (23.1%) and Chhatapur has the minimum population of villages having banking facility (1.6%). Nirmali C.D. Blocks still do not have any banking facility.

Agricultural Credit Societies – Agricultural credit societies are available only in 45 villages out of 526 inhabited villages (8.6%) in the district. Pratapganj C.D. Block has the highest population of villages having agricultural credit facilities (23.1%) while Tribeniganj C.D. Block has the Lowest population of villages with (3.6%) Nirmali and Chhatapur C.D. Block, still do not have agricultural credit societies.

Approach Pucca Road – This facility is available in 242 villages out of 526 inhabited villages (46.0%) in the district. Among C.D. Blocks, Pratapganj with (84.6%) villages having pucca approach road followed by Raghopur C.D. Block (63.8%) while Nirmali C.D. Block has the least population of villages having this facility with only (13.6) percent.

Power Supply – Electrified villages in the district constitute as low 28.7 percent of the total number of inhabited villages. Among the C.D. Blocks, Raghopur has the highest population number of electrified villages with 51.6 percent while Nirmali C.D. Block has the lowest population of villages with only 9.1 percent and Marauna C.D. Block still dose not have any power supply.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The data presented in Table 38highlight the distribution of educational facility is available to 95.4 percent of the rural population of the district. The proportion varies between the maximum of 99.3 percent in Kishanpur C.D. Block and the minimum of 80.6 percent in Basantpur C.D.. Block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 84.4 percent vide table 37) than the proportion of population which is as high 99.3 percent. This may be attributed to the fact that villages which possess educational facility usually contain large population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of order of the 39.5 percent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility also it may be observed that proportion of rural population served by the amenity of the order of 99.1 percent which is more than the proportion of villages served by this facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various C.D. Block.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHIRE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	77	8	1	86
(b) Middle School	243	73	23	339
(c) Degree College	50	100	367	517
2. Medical:-				
(a) Hospital	152	121	232	505
(b) PHC	150	126	236	512
3. Post Office	286	57	11	354
4. Telephone	149	149	137	435
5. Bus Service	166	179	128	473
6. Banks				
(a) Commercial Bank	201	150	144	495
(b) Cooperative Bank	88	113	322	523
7. Agricultural Credit Societies	131	169	181	481

As regards educational facility it would be seen that there are 86 villages in the district (16.3%) which do not have any Primary School but the facility is available at places situated within 5 kms. for 77 villages and for 8 villages within the range of 5-10 kms. There are as many 339 villages in the district (64.4) which do not have middle school but the facility is available a t places situated within 5 kms. for 243 villages, 73 villages in the range of 5-10 kms. and for 23 villages beyond the range of 10+ kms. It is interesting to observe that cent percent of inhabited villages of the district are deprived of college but the facility is available at places situated within 5 kms. for 50 villages, for 100 villages within the range of 5-10 kms. and for 367 villages within the range of 10+ kms.

There are 505 villages in the district (96.0%) which are without the facility of hospital and as many as 232 villages have this facility at a distance range of 10+ kms. The number of villages having this facility at a distance range of 5-10 kms is 121 whereas the same is available at a distance of less than 5 kms for 152 villages. There are 512 villages in the district (97.3%) which do not have any primary health centre.

Similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigablewaterways.

It would appear from e Table 40that maximum number of inhabited villages(56.5%) lies in the distance range of 16-50 kms. from the nearest statutory town. This is followed by villages (192) in the distance range of 5-15 from the nearest statutory town with 36.5 percent . there are 19 villages (3.6%) in the districtwhich are situated in the distance range of 51+ kms. 18 villages (3.4%) in the district which are situated in the distance range of less than 5.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 72.2 percent for those situated within 5 kms from the nearest town and increases to (80.7%) in the distance range of 5-15 kms. Thereafter it again increases to 87.5 percent in the distance range of 16-50 kms. from the nearest town. In the case of other amenities (except Bank and agricultural credit societies) also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be observed from the Ttable 41 that the maximum number of villages, i.e. 170(32.3%) in the district fall in the population range of 2000-4999 followed by 116 villages (22.1%) having a population range of 1000-1999. The lowest number of villages is observed in the population range of 10,000+ being only 22(4.0%).

The population of villages having different amenities varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities have a population range of 5000-9999 and 10,000+ which further corroborates the fact that more facilities are generally available in large villages than is smaller ones..

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of Irrigatedarea to total cultivable area
1	2	3	4	5	6
1	Nirmali	22	12404	41.1	29.6
2	Basantpur	86	23626	69.3	27.2
3	Chhatapur	62	31093	79.6	53.7
4	Pratapganj	13	10721	75	62.2
5	Raghopur	58	21167	77.3	64.4
6	Saraigarh Bhaptiyahi	39	20640	62.2	34.8
7	Kishanpur	44	21899	68.9	53.4
8	Marauna	36	16511	67	19.7
9	Supaul	72	28611	80.2	23.4
10	Pipra	38	19658	62.7	37.4
11	Tribeniganj	56	31954	79	52.6
	District Total:	**526**	**238284**	**71.4**	**42.8**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It would be seen from the Table 42 that 71.4 percent of the total area of the district is utilized for cultivation (cultivable area) and of this only 42.8 percent area is found to be irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Supaul C.D. Block with 80.2 percent closely followed by Chhatapur and Tribeniganj C.D. Blocks with 79.6 and 79 percent , Nirmali C.D. Block has the lowest population of cultivable area to total area.

The highest proportion of irrigated area to total cultivable area found in Raghopur C.D. Block with 64.4% while the lowest proportion is in Marauna C.D. Block with 19.7 percent which indicates that the villages in the block are deprived of required irrigation facilities.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Birpur (NA)	3.5	0.7	2.8	3.5	3.1	0	0.3	0	0.1
2	IV Nirmali (NA)	3.6	2.2	1.4	3.5	3	0	0.2	0	0.3
3	II Supaul (M)	3.3	0.1	3.2	2.3	0.1	0.4	0.2	0	1.7
District Total		3.4	0.6	2.8	2.8	1.2	0.3	0.2	0	1.1

The above table gives the details of finances in the statutory town in terms of per capita receipt and expenditure. There are three statutory town in the district i.e. Birpur(NA), Nirmali(NA) and Supaul(M). On going into the details of receipt through taxes Nirmali(NA has highest per capita receipt whereas Supaul (M) for the lower per capita receipt.

It can be also been that per capita expemditure is higher in Birpur (NA) and Nirmali (NA) as compared to Supaul (M)

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Birpur (NA)	8.3	1.7	1.1	3.3	0.6
2	Nirmali (NA)	1.2	1.2	1.2	0.6	0.6
3	Supaul (M)	3.9	1.1	0.7	0.2	0.9
District Total		**4.3**	**1.2**	**0.9**	**0.9**	**0.8**

Table 44 gives the details of different categories of educational institutions per ten thousand population in the town of the district. It would be seen from the above table that institution like Secondary/Matriculation level school and college are situated in the three statutory towns in the Supaul district.

Among the three statutory towns the number of primary institution per ten thousand population in Birpur(NA) is highest with 8.8 institutions per 10,000 Population. Birpur (NA) also deals the table with regards to availability of middle school and senior secondary school Supaul(M) deals the table in case of college.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Birpur(NA)	33
2	Nirmali(NA)	4
3	Supaul(M)	11
	Distrct Total	**14**

The above table furnishes information regarding availability of beds in medical institutions in Supaul district. On an average there are 14 beds per 10,000 population in urban areas of the district. The highest number of beds i.e. 33 are available in Birpur (NA) while the lowest number of beds available per 10,000 population are in Nirmali with only 4 bed/10,000 population.

TABLE 46: PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
Slum Data is not available				

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Birpur (NA)	P.V.C. Pipe Wooden Goods Leather Goods	Leather Goods Wooden Goods Jute
2	Nirmali (NA)	Plywood Bricks	Rice Sand
3	Supaul (M)	Head Of Hand Pump Jute Bamboo Products	Jute Moong Maize

Table 47 presents the most important commodities manufactured in and exported from the three statutory towns in the Supaul district. Most important commodities manufactured in towns of the district are PVC pipe, leather goods, plywood, unicks jute and bamboo products while exported creams are leather goods woolen goods,jute, rice, sand, moong and maize.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52:

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	Median number of rooms	2	2	2	2	1	2	2	2	2
Others	No exclusive room	138	130	8	27	26	1	27	27	0
	One room	926	783	143	209	185	24	23	23	0
	Two rooms	698	535	163	182	160	22	4	4	0
	Three rooms	253	190	63	64	53	11	5	4	1
	3+ rooms	123	68	55	15	6	9	2	2	0
	Median number of rooms	2	1	2	2	2	2	1	1	0
	Direct Total	**312074**	**296905**	**15169**	**54354**	**52598**	**1756**	**2188**	**1985**	**203**

Table 48 shows that there are as many as 305169 households accounting for 97.8 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in single room is the highest (43.0%) whereas it is the lowest (0.9%) dwelling in no exclusive room. The median number of rooms is 2 for the total households in the tenure status of owned category.

There are 53,363 Scheduled Castes households accounting for 17.5% of the total households dwelling in owned houses and the median number of rooms is 1. There are 2086 scheduled tribes households accounting for only 07% of the total households dwelling in owned houses and the median number of rooms is 2.

There are 4767 households accounting for 1.5% of the total households of the district dwelling in rented houses. The proportion of households dwelling in single room is the highest (33.9%) whereas it is the lowest (0.9%) dwelling in no exclusive room. There are 494 Scheduled Castes households accounting for 10.4% of the total households dwelling in rented houses and the median number of rooms is 2. There are 41 scheduled tribes households accounting for 0.9% of the total households in dwelling in rented houses and the median numbers is 2.

Similar trend can be observed in respect of households dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

It would be seen from the above table that of the total rural households maximum proportion of households i.e. 79.5 percent live in temporary houses followed by 10.4 percent living in permanent houses and 10.0 percent living in semi permanent houses.

In the case of urban households in the district, however, the maximum proportion of household i.e. for 39.0 percent live in permanent house followed by 51.8 percent in temporary houses and 9.1 percent in semi permanent houses.

Among the C.D. Blocks in the district, Marauna has the maximum proportion of rural households living in temporary houses (95.3%) followed by Nirmali C.D. Blocks with 90.7%. Raghopur C.D. Block has the minimum proportion of households living in temporary houses with 66.6 percent. In case of permanent houses, Raghopur C.D. Block has the maximum proportion of households living in permanent houses (18.0%) followed by Pipra C.D. Block (16.8%). Marauna C.D. Block has minimum proportion of households living in permanent houses with 4.0%. In case of semi permanent houses Pratapganj C.D. Block has the maximum proportion of households (16.4%) followed by Raghopur C.d. Block (15.3%). Marauna C.D. Block has the minimum proportion of households having semi permanent houses with 0.7 percent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or
otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.
Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

Table 50 show that of the total rural households 296905 households i.e. 92.9 percent have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Marauna C.D. Block with 96.4 percent where as it is lowest in Kishanpur C.D. Block with 90.7 percent.

As regards electricity it is found that only 3.3 percent of the rural households in the rural households in the district have electricity. The highest proportion of household with electricity is in Basantpur C.D. Block with 10.3 percent whereas it is lowest in Saraigarh Bhaptiyahi C.D. Block with 0.1 percent.

Only 3.2 percent of the total rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is in Raghopur C.D. Block with 7.8 percent whereas it is lowest in Marauna C.D. Block with 0.6 percent.

Only 7.0 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet facility is in Raghopur C.D. Block with 10.7 percent whereas it is lowest in Marauna C.D. Block with 2.4 percent.

Only 8.5 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Basantpur C.D. Block with 21.8 percent whereas it is lowest in Marauna C.D. Block with 4.0 percent

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 51 above shows that 22.7 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Basantpur C.D. Block (39.0%) whereas it is lowest in Marauna C.D. Block with 7.7 percent.

36.6 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D. Blocks, highest proportion of households using crop residue as fuel for

cooking is (49.1%) in Chhatapur C.D. Block whereas it is lowest (19.6%) in Nirmali C.D. Block.

39.1 percent of the rural households in the district use cowdung cake as fuel for cooking. Among the C.D. Block the proportion of households using cowdung cake as fuel for cooking is highest (69.5%) in Marauna C.D. Block whereas it is lowest (24.8%) in Basantpur C.D. Block.

In the case of cooking gas (L.P.G.) there are only 2350 households accounting for 0.8 percent of the total households in the district using it for cooking. As regards Kerosene there are only 2203 households accounting for 0.7 percent of the total households in the district using it for cooking. Similar trend can be observed in respect of other type of fuel.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

It would be seen from the Table above that there are 49063 households accounting for 15.7 percent of the total households in the district availing banking services. The highest proportion of total number of households availing banking services can be observed in Basantpur C.D. Block (26.1%) whereas the lowest in Chhatapur C.D. Block (9.1%). There are 74520 households accounting for 23.9 percent of the total households in the district possessing radio/transistor. In this regard the highest proportion of households is in Basantpur C.D. Block (29.2%) whereas it is lowest in Pratapganj and Sarajgarh Bhaptiyahi C.D. Blocks with 19.7%

It can be seen that there are only 40 percent households(3905) who have Television Set in the district. Among the C.D. Blocks the highest proportion of households having T.V. Set is found to be in Nirmali C.D. Blockwith 1.2 percent only.

It also transpirs from the table that households living in urban areas of the district are vetran place of compared to the households living in rural areas of the district.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

No major social and cultural event has taken place in he newly created district of Supaul since it was bifurcated into three separate district. Fairs and festivals are however held regularly in the district.

Supaul district has been formed from Saharsa district on the 14th March 1991. The Supaul district consists of 4 sub-divisions viz., Supaul, Tribeniganj, Birpur and Nirmali. The district consists of 11 development block and anchals. Birpur sub-division of the district is situated on the border of Nepal and this has its own importance.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Shivling

One shivling is established at the temple situated in Malhad village near Supaul district.

Kunoli

Kunoli was established by Raja Kunal and thus is of historical significance.

Hardi Durga Asthan

Located at about 12 kms. from Supaul is considered as very important place of worship for goddess Durga.

Dharhara

The village is an important religious place. Its tola Mahadeva Asthan has a temple of Lord Shiva which is regarded as very holy. A annual fair is held on the occasion of Shivratri. On Sunday also, small fairs are held when devotees come for worship.

Koriapatti

The village situated about 15 Kms. east of Tribeniganj was formerly the seat of the Koriapatti estate. A fair lasting for about a week is held annually on the eve of Durga Puja.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The district lies on the northern portion of the Bihar State. This district is abundant with alluvial plain land which is very fertile for growing paddy, jute, Moong and Maize and other cereals. Thus, the district has a agratioan characteristics.

(xi) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The

district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic,

medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally

notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A :Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L

(x) Waterfall WF

(xi) Others O

(xii) Total T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

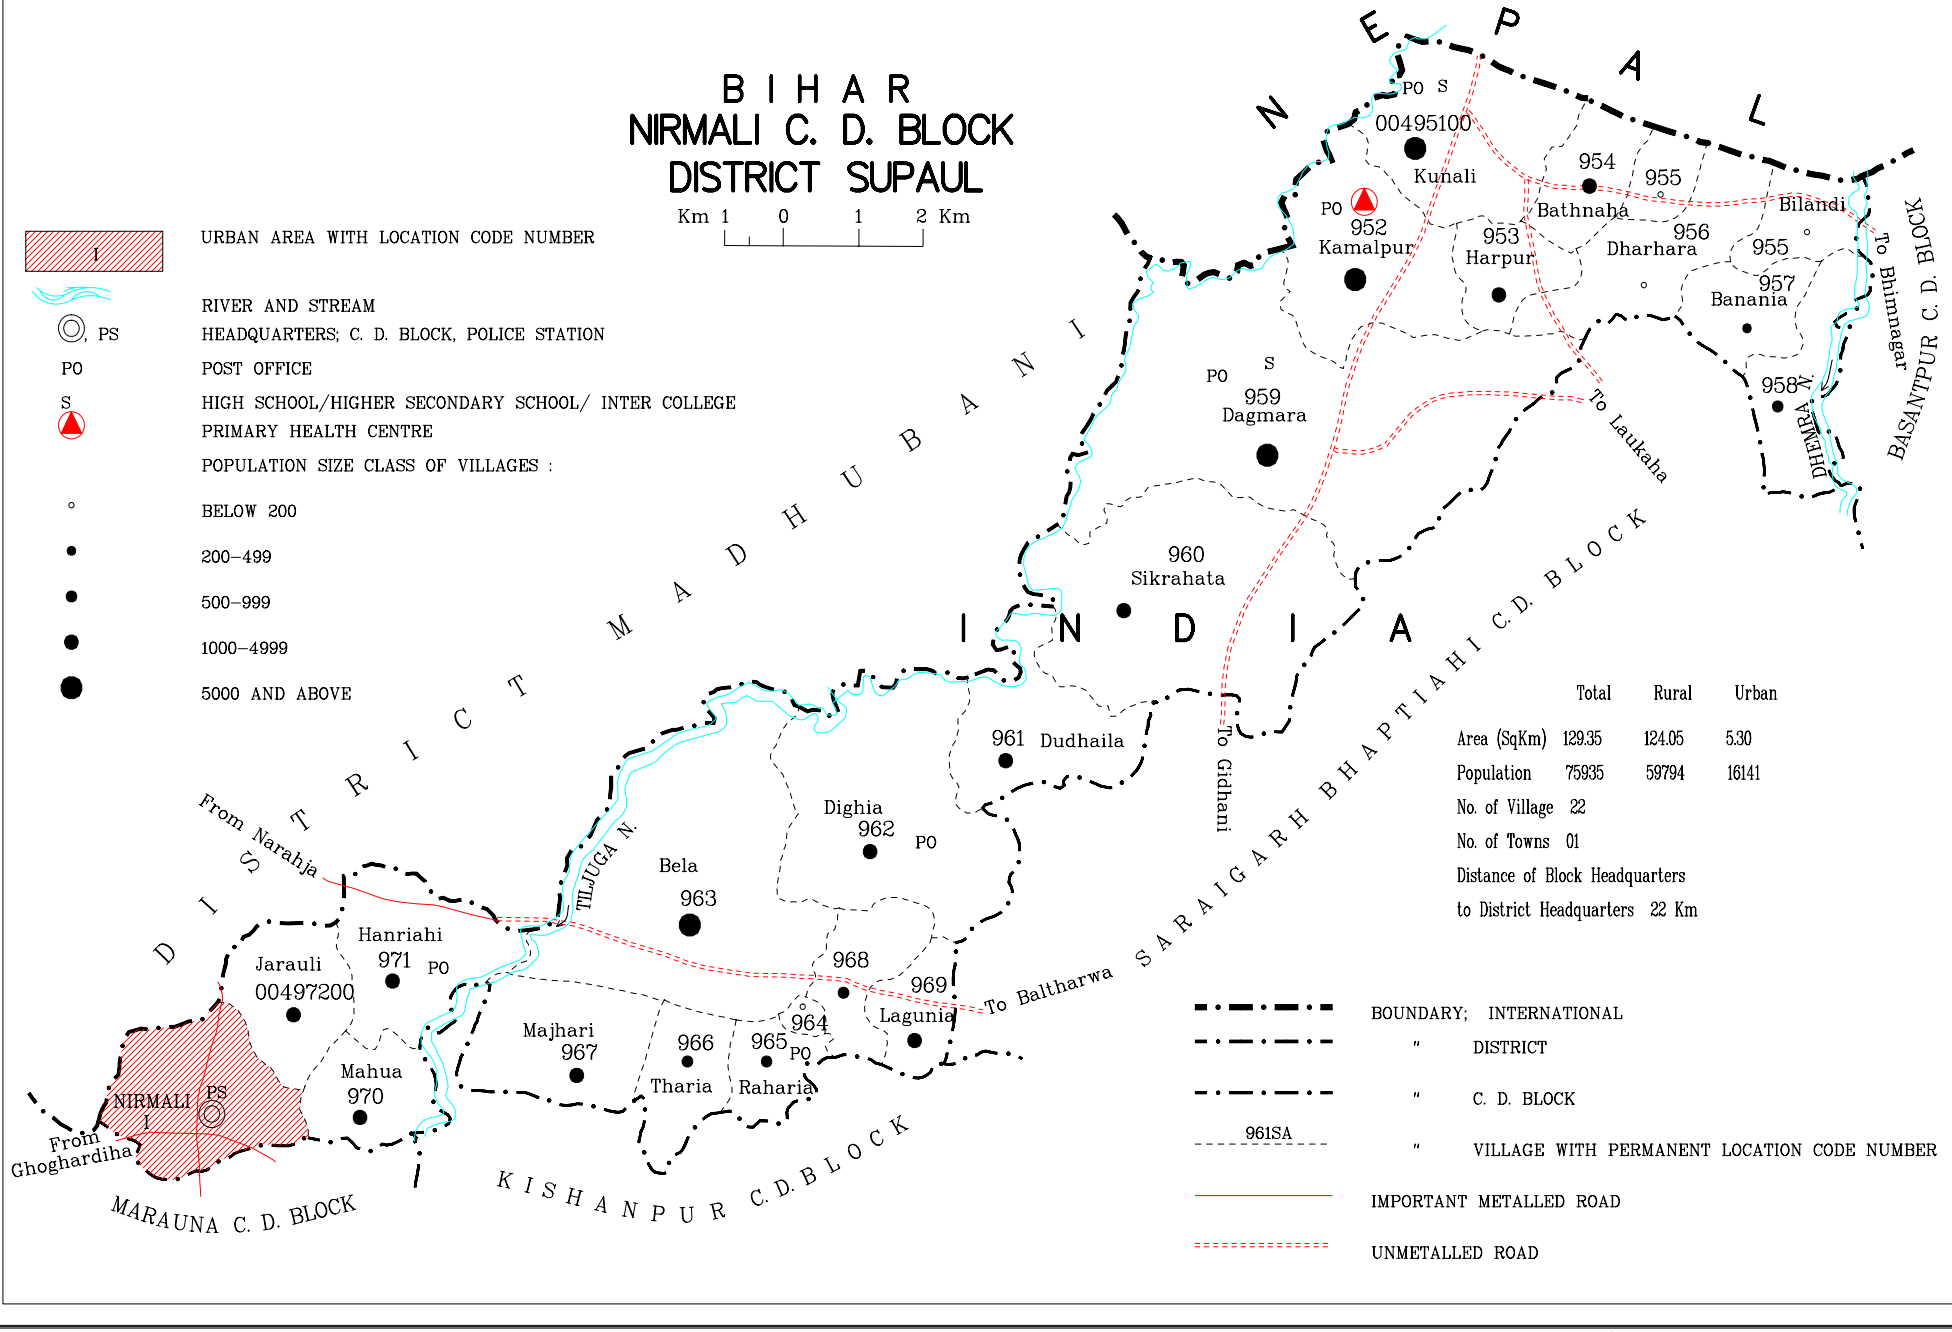

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Serial number	Name of Towns	Name of villages merged in towns	Name of villages identified for outgrowth	Location Code Number 1991 Census	Location Code Number 2001 Census (in case of partly OG)
1	2	3	4	5	6

There is no such village in the district of Supaul.

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST

(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD

(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town ‘yes’ is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matri-culation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

There is no outgrowth in any of the towns of Supaul District				

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The

Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District

Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract		Level of presentation
1.	District Primary Census Abstract	District/C.D. Block / UA /City / Town
2.	Primary Census Abstract for Scheduled Castes	District/C.D. Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/C.D. Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Saharsa	1991	72	84	88	93
	1981	113	129	141	151

Information on the question on children ever born and children surviving canvased for all ever married women during 1991 census has been compiled by age of the mother. Estimates of child mortality, thus worked out are presented in Annexure II.

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in annexure as q(1), q(2), q(3) and q(5), it is observed that there has been decline in child mortality over decade (in 1991 census as compared to 1981 census) both in the district of Saharsa from the which the present district. Supaul have been carved-out doing 2001 Census as well as the state. An interesting feature which can be noticed from the annexure is that the child mortality at the ages 1, 2, 3 and 5 was higher in the district during 1981 Census as compared to the state average while at the time of 1991 census the child mortality for the state was recorded slightly higher at the age 1. At the ages 3 and 5 the child mortality of the district during the same decade was slightly higher than the state average while at the age 2 the figure was the same both for the district as well as the state. It indicates that the pace of decline in child mortality had been slower in the district as a whole vis-à-vis the state.

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the district and the State(1991-Census)	
	State	District
1	2	3
CBR	36.2	32.6
TFR	5.3	4.5
TMFR	5.9	4.9
GFR	163	145.0
GMFR	186	159.0
Child woman ratio	66.6	63.3
No. of children ever Born per woman age Group (45-49)	4.1	4.1
Mean age at marriage	16.5	16.3

It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are lower in Saharsa district vis-à-vis (from which the district of Supaul has been conved out during 2001 Census) the state during 1991 census.

The ratio of Children in the younger ages to woman in reproductive age-group (child woman ratio) is considered as an important index of fertility. The child woman ratio is found to be at same level in Saharsa district as compared to the state. The mean age at marriage of females is, however, higher for the state as compared to the district average.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

State/District	Born elsewhere in the district of enumeration			Born in other districts of Bihar			Born in Bihar		
	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10
Bihar	13,662,859	1,303,785	12,359,074	4,532,117	585,005	3,947,112	18,194,976	1,888,790	16,306,186
	(68.4)	(62.0)	(69.1)	(22.7)	(27.8)	(22.1)	(91.0)	(89.8)	(91.2)
Supaul	287,821	23,766	264,055	101,477	10,680	90,797	389,298	34,446	354,852
	(71.2)	(66.5)	(71.6)	(25.1)	(29.9)	(24.6)	(96.3)	(96.3)	(96.3)

State/District	Born in other states			Born in other countries			Total migrants		
	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0..9)	(1.1)	(100.0)	(100.0)	(100.0)
Supaul	3,397	668	2,729	11,617	650	10,967	404,312	35,764	368,548
	(0.8)	(1.9)	(0.7)	(2.9)	(1.8)	(3.0)	(100.0)	(100.0)	(100.0)

Note:-Total migrants exclude persons whose birth place is unclassifiable**.**

Migrants by place of birth are 199.9 lakhs in Bihar State as a whole comprising 21.0 lakh males and 178.9 lakh females. These migrants constitute 24.1 percent of the total population in the state according to 2001 Census. The proportion of male and female migrants is approximately 4.9 percent and 45 percent respectively.

In Supau district, the total number of migrants by place of birth is 4.0 lakh of which, 0.4 lakh migrants are males while 3.6 lakh are females. The migrants in Supaul district comprise 23.3 percent of the total population of the district. Male female migrants account for 4.0 percent and 44.4 percent respectively of the total population.

From the distribution of total migrants in Bihar by place of birth it can be clearly seen that females predominate in intra district and international migration, while males predominate in inter district and inter state and migration.

Almost Similar trend is noticed in Supaul district. This probably indicates that migration of females from their place of birth is generally attributed to the prevailing custom of the girls moving away on marriage from their place of birth and majority of cases this movement is from within the same district i.e. the district of enumeration. Migrants born in other states of India have lower proportion of females vis-a-vis males.

ANNEXURE - IV (B)

INTERSTATE MIGRANTS, 2001 CENSUS

Bihar			Supaul		
Place of Birth	Migrants	Percentage to total migrants	Place of Birth	Migrants	Percentage to total migrants
1	2	3	1	2	3
Uttar Pradesh	434,051	27.4	Uttar Pradesh	1,725	50.8
Jharkhand	339,297	21.4	Jharkhand	546	16.1
Assam	133,758	8.5	West Bengal	399	11.7
West Bengal	126,499	8.0	Rajasthan	149	4.4
Nagaland	101,267	6.4	Gujarat	149	4.4
Chhatisgargh	90,469	5.7	Tamil Nadu	117	3.4
Gujarat	65,996	4.2	Delhi	76	2.2
Orissa	42,215	2.7	Orissa	36	1.1
Maharashtra	38,244	2.4	Punjab	35	1.0
Rajasthan	20,542	1.3	Total for nine states	3,232	95.1
Haryana	20,505	1.3	Other states	165	4.9
Andhra Pradesh	18,371	1.2	**Total**	**3,397**	**100.0**
Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

It transpires from the Annexure-IV (8) that in case of Bihar 14 states, together account for 15.4 lakh (97.2%) of the 15.8 lakh interstate migrants. Uttar Pradesh and Jharkhand States are prominent among them contributing 27.4 and 21.4 percent of migrants respectively. In case of Supaul district, of the total 3397 inter state migrants, Uttar Pradesh and Jharkhand states contribute 50.8 and 16.1 percent respectively.

The Indian Census has always attempted to give a realistic and interesting picture of religious persuasions of the people of the state. While collecting information on religion at the time of census, the enumerator had clear instructions to record the religion as actually returned by respondents. Six religions have been treated as major religions as they are numerically prominent. These are Hindus, Muslims, Christians, Sikhs, Buddhists and Jains.

Those not belonging to any of these religious communities have been classified under the category “other religions and persuasions” while those who did not state any religion have been classified under the category “religion not stated”.

Annexure V(A) presents religion wise data of the state of Bihar as well as Supaul district along with their percentage distribution according to the 2001 Census. The religionwise data of the C.D. Blocks of Supaul district has also been furnished in Annexure V(B).

It may be observed that Hindus are by far the numerically most important religious community as it accounts for as much as 83.2 percent of the state population and 82.3 percent of the population of Supaul district. It shows that the percentage of Hindus in the concerned district is lower than the state average.

The Muslims come next with 16.5 percent of the state's population. The percentage of Muslims in the district of Supaul is slightly lower than the state average accounting for 17.4 percent of the district's population. The proportion of Christians, Sikhs, Jains and Buddhists population in the state is very low. In Supaul district, the proportion of Christians, Sikhs, Jains and Buddhists is almost negligible. The same trend prevails in most of the community development blocks of Supaul district.

Annexures VI(A), VI(B), VI(C) and VI(D) furnish relevant statistics on marital status of Supaul district and Bihar state according to information collected during 2001 census along with the percentage distribution by various age-groups.

It is quite apparent from annexures above that Supaul district as well as the state have a relatively higher proportion of ‘never married’ males and ‘married’ females. This may be attributed due to the fact that women get married at younger ages than males. As against 56.3 and 55.1 percentages of ‘never married’ males in Bihar state and Supaul district respectively, the corresponding proportion among females is 47.3 and 46.8 only. There is no much difference in situation in Supaul district as compared to Bihar state as a whole. While the state has slightly higher proportion of male widowed and female widowed as compared to the district of Saharsa.

While analyzing marital status by age-groups one finds that married females outnumber married males in the age-group 10-14 suggesting that child marriage among females is more prevalent than males. However, the interesting feature which can be noticed is that the proportion of married males and married females in the age-group 10-14 is comparatively higher in Supaul district as compared to the state.

It is also significant that the proportion of ‘never married’ females in the age-group 15-19 and above is much lower than the ‘never married’ males in Supaul district as well as for the state as a whole. The proportion of ‘divorced or separated’ males and females is significantly low in Supaul district as also in Bihar State.

One of the important characteristics of the population on which information is collected in the Census is literacy. Apart from collecting data on number of literate, the level, nature and type of education attained by the 'literates' are also ascertained. The concept of literacy adopted in the Census has already been explained in the beginning of this publication.

A proper index to the extent of literacy is provided by the proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 2001 census was 47.0. Male literates greatly outnumbered female literates as the literacy rate for males, according to 2001 census, was 59.7 while for females the literacy rate was only to the extent of 33.1 percent.

The overall literacy rate for the district of Supaul, according to 2001 census, was 52.4 percent lower than the state average. Male literates in district accounted for 52.4 percent while female literates constitute 20.3 percent of the total population. The literacy rates for males and females in Supaul district are comparatively lower than the state average.

Annexure VII(A) and VII(B) presented furnish information regarding absolute number of illiterates and literates and educated persons in Bihar state and Supaul district as also percentage distribution of literate persons by different level of education by different age-groups.

A break-up of literate population by various educational levels shows that 5.4 percent males and 5.8 percent females in the state are such who are literate but without attaining any educational level. 24.9 percent and 30.6 percent males and females in the state, according to 2001 Census, have crossed the primary or junior basic standard and 14.6 and 13.2 percent males and females have passed the middle examination while 32.1 and 20.4 percent males and females in the state are such who are matriculates and above. The contrast between males and females is significant among matriculates and above as the percentage of female literates who have passed the matriculation and above examination are 11.7percentage points less than male literate population who have attained this level of education.

The position of literates by different level of education in Supaul district according to 2001 Census, shows that the percentage of male and female literates who have not attained any educational level is higher than the corresponding percentage for the state. The percentage of male and female literates in Supaul district who have passed standard, middle examination and matriculation and above examinations are higher than the corresponding percentages of Bihar State.

At the 2001 Census in the State, 24.5 percent persons havereturned Bhojpuri of their mother tongue followed by 17.5 percent of total population of the state who returned Hindi as their mother tongue,

Magadhi/Magahi, Maithili, Urdu which are reported by 14.6, 14.3 and 11.4 percent of total population respectively other main languages returned as mother tonguein the State.

In the district during 2001 Census Maithli has been returned by 78.5 percent of district total population as their mother tongue followed by Urdu which has been returned by 13.8 percent of district population as their mother tongue. Hindi get third position with 6.5 percent speakers in the district.

The proportion of other languages reported as mother tongue in the state as well as in the district is not so significant.

ANNEXURE – VIII

PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Supaul

Hindi	14,524,035	17.5	Urdu	238,591	13.8
Magadhi/Magahi	12,132,383	14.6	Hindi	112,624	6.5
Maithili	11,830,684	14.3	Bengali	4,708	0.3
Urdu	9,457,544	11.4	Magadhi/Magahi	3,160	0.2
Surjapuri	928,458	1.1	Bhojpuri	2,372	0.1
Bengali	442,352	0.5	Santali	1,945	0.1
Santali	382,866	0.5	Kurukh/Oraon	1,918	0.1
Kurukh/Oraon	57,952	0.1	Arabic/Arbi	1,271	0.1
Marwari	27,152	0.0	Nepali	739	0.0
Total of Other Mother Tongues	12,842,100	15.5	Total of Other Mother Tongues	5,323	0.3
Total Population	**82,998,509**	**100.0**	**Total Population**	**1,732,578**	**100.0**

Language is an important attribute of population. The Census of India has been the richest source of language data collected and published during successive decennial censuses over a country. In the 1991 census, as in previous censuses, the mother tongue as returned by each individual was collected.
