Mausoleum of Kadam Rasool Ji

Situated on Kishanganj-Khagra road the Mausoleum of Kadam Rasoolji is said to be three hundred years old. People from all walks of life including Hindus and Muslims come to worship here for three days from the 1st day of Baisakh (April-May) when a Urs is held. It is believed that offering of Chadar here brings relief and prosparity in ones' life.

Annexure VII : Age, sex and education in the district, 1991 & 2001 Censuses 507

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 513

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers

and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

Deputy Director of Census Operations,
Bihar, Patna

District Highlights – 2001 Census

1. Kishanganj ranks 31st in terms of population (12,96,348) and 28th in terms of area (1,884 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Kishanganj is the 30th densely populated district in the state with 688 persons per sq.km as against the state's 881.
3. Kishanganj ranks 7th in terms of sex-ratio (936) against the state's 919.
4. There are 41 uninhabited villages (out of 771 total villages) in the district of Kishanganj.
5. Jirangachh (under Thakurganj C.D. Block) is the most populated village (10,208) and Aliganj (under Dighalbank C.D. Block) is the least populated village (8) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Kochadhamin has the highest number of villages (150) and C.D. Block Kishanganj has the lowest number of villages (72) in the district.
8. Churli (under Thakurganj C.D. Block) has the largest area (1,799 hectare) and Debiganj (under Pothia C.D. Block) and Pirani (under Kishanganj C.D. Block) have the smallest area (3 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 97.4 percent villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for

the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other

concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Kishanganj district, which was a part of Purnia district till 1981 Census, acquired the status of an independent district on 10th January, 1990. It has a rich heritage and close linkage with the district of Purnia. It consists of 7 community development blocks, viz., Terhagachh, Dighalbank, Thakurganj, Pothia, Bahadurganj, Kochadhamin and Kishanganj.

The district is bounded on the north by Nepal and Bengal, on the South by the state of West Bengal and Purnia district of the state of Bihar, on the east by the state of West Bengal and on the West by the district of Araria of the state of Bihar.

The history of Kishanganj is a part of the history of the ancient kingdom of Anga and covered the area west of Mahananda. The area to the east of the river was under the control of the pundras. Anga remained an independent kingdom till the 6th century B.C. When it was annexed by the Magadh Emperor, Bimbisar. The subsequent history of the district is therefore, linked with that of the great Magadh Empire.

The district later formed part of the empire of the Imperial Guptas which in 340 A.D., under Samudra Gupta extended right upto Assam. Following the overthrow of the Guptas by the Huns, Old Purnia passed under Baladitya,the king of Magadh. Hiuen-Tsang, who visited paundra Vardhan (eastern purnia) in Circa 640 A.D. found prosperous people and the countryside having numerous tanks and groves and abundant crops. At the beginning of the 7th Century the district seems to have come under Sasank, the King of Gaur, was a Shaivite and did his utmost to destroy Buddhism. He was followed by Harsha, The great Buddhist. From the 9th to 12th Centuries the district was under the control of pala and the Sena Kings of the Bengal.

The conquest of Bihar town, then capital of Bihar, by Bakhtiar Khilji towards the close of the 12th Century saw the commencement of Muslim rule in the State. His successor Ghyasuddin Iwaz extended the limits of the territory to include virtually the whole of Bihar. This district (Old Kishanganj subdivision) also must have came under Muslim rule in the beginning of the 13th Century. However, since it formed an outlying part of the territory and revenues from it were not easily collected, the control remained rather loose. In fact some of the northern portions of the district continued to be under the sway of the hill tribes of Nepal. Thus very little is known of the history of the district till the 17th Century. The district was administered by Mughals through Governors of who also combined the revenue powers of amildars. *amildars* Ostwal Khan was the first such Governor followed by three others. He maintained very good relations with Murshid Kuli Khan, the Nawab of Bengal and managed to bring to book the refractory local chiefs including Durian Singh of Birnagar. Saif Khan also recovered large areas of territory on the nouthern border of the district and had then cleared the forests. He rendered his full support to Ali Vardi Khan who became the new Nawab of Bengal. Saif Khan died in 1750 and was succeeded by his son Fakhruddin Hussain Khan. The latter proved a poor administrator and squandered much of the wealth accumulated by his father. Fakhruddin Hussain Khan prudently surrendered before Saiyed Ahmad Khan, the nephew and son-in-law of Nawab Ali Vardi Khan. Saiyed Khan proved himself as an efficient administrator and was held in great esteem on account of his noble living and appreciated for his just and fair dealings with all and sundry. He died in 1756, a few months before the death of Nawab Ali Vardi Khan against whom he had started an infructuous intrigue. Shaukat Jung succeeded his father as Governor, and was given the whole of old Purnia as a revenue free *jagir* by the Nawab. Ali Vardi Khan was succeeded by siraj-ud-daula who was apprehensive of the designs, his cousin, Shaukat Jang might have had on the Diwani. So he marched towards Purnia, reaching Rajmahal in 1756. But his troops could not be persuaded to proceed further. Meanwhile, Sahukat Jang refused to take up arms and accepted Siraj-ud-daul's Suzerainty. Soon afterwards, he was instigated by Mir Jagar Khan the Bakshi at Murshidabad, to try his hand at obtaining the Diwani. At the same time the Grand Vizir issued

a firman appointing Shaukat Jang as the Viceroy of Bengal. When Siraj-ud-daula sent a messenger informing him of the grant of certain *Jagir* to a Hindu Chief, Shaukat retorted that Siraj-ud-daula should quit the vice-royalty of Bengal in his favour. This naturally infuriated Shiraj-ud-daula. He marched against Shaukat Jang with a division under his own command up to the right bank of the Ganga and sent another division under his Diwan, Raja Mohan Lal along the left bank of the river. Meanwhile, Raja Ram Narain, The Governor of Bihar had also been ordered to march on to Purnia from Patna. Shaukat Jang entrenched himself in a strong position at Baldiabari (between Manihari and Nawabganj) but the lack of any clear-cut-strategy resulted in his meeting utter defeat, he himself having been slain in the battle(1756).

On Siraj-ud-daula's death (July 1757), Nazir Ali Khan took possession of the town, imprisoned Mohan Lal and seized the treasury with the support of Achint Singh, holder of four parganas, who was made the Prime Minister.

Mir Jafar Khan was now the Nawab of Bengal. He sent Khadim Hussain Khan who took over control and became the Governor of Purnia.

The whole areas of the then Purnia passed into the hands of the British in 1770 when Mohammad Ali Khan was the Governor of Purnia. He was replaced by Duccarrel, the first English Supervisor or Collector of the district. The district was marked by severe famine in which according to the European Supervisor, almost half of the *ryots* lost their lives. In 1872 the district was transferred from the control of the Bihar and Banaras Board of commissioners to the Calcutta Board of Revenue. With the creation of Commissioner's Divisions in 1829, Purnia was included in Bhagalpur Division. In 1834 it was placed under Rajshahi Division under which it continued until 1893 when it came back to Bhagalpur. It again went to Rajshahi in 1905 and later came back to Bhagalpur under which it has continued ever since.

The early years of the British rule were largely concentrated at establishing law and order and setting up of the revenue administration on a sound footing. Raids and depredations in border villages by Nepali Sardars took place in 1788 and again in 1793 in Spite of a commercial treaty signed with Nepal in 1792 to secure a lasting demarcation of the boundary with Nepal to prevent further raids but it did not meet with appreciable success.

The next important event in the district is the movement of 1857. The 73rd Regiment of the Native infantry and a detachment of the 11th Irregular cavalry were then stationed at Jalpaiguri, just across the eastern border of the old purnia district. Although the administration did not expect any trouble at Jalpaiguri, nevertheless, a corps of Nepalese, was allowed to be raised by Kerr, an indigo planter of the district, in October, 1857. Two detachments of the 11th Irregular cavalry at Jalpaiguri rebelled on 4th December and Yule, Commissioner of Bhagalpur learnt on the 9th that they had passed south of Kishanganj. In the engagement that followed on the 11th December, the rebels retired after fighting bravely and with small casualties and injuries. Yule later unsuccessfully tried to intercept the insurrectionists from Dacca from intering the forests of Nepal. No further fighting took place in the district.

The movement of 1857 led to measures for tightening up the administrative system. An earthquake took place in 1897. In the same year a scheme for taming the turbulent Kosi was mooted by engineers though it was actually taken up only after the country obtained independence.

The people of the district also participated in the agrarian reforms and the congress movement. Many prominent lawyers of the district left their practice and joined the non-co-operation movement of 1921.

Dr. Rajendra Prasad and Mahatma Gandhi visited the old district of Purnia in 1921 and 1925 respectively. Over 700 persons from the old district were arrested in connection with the Salt Satyagrah. The district like other districts of the State, has thus played an important role in the country's freedom struggle.

(iii) Administrative set up

The district forms a part of the north Bihar Plain and lies in the northern portion of the state of Bihar. The district is bounded on the north by Nepal and Bengal, on the south by Bengal and Purnia on the east by Bengal and on the West by the district of Araria. It consists of 7 community development blocks, viz., Terhagachh, Dighalbank, Thakurganj,

Pothia, Bahadurganj, Kochadhamin and Kishanganj and 3 Towns viz, Thakurganj(NA), Bhadurganj(NA) and Kishanganj(M). There are altogether 771 villages in the district.

District Magistrate is posted in the district who is the top most official of revenue and civil administration. He often belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. In the administration. The district has only one subdivisions Kishangaj which is headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are 7 development blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration : The Judges and Munshif magistrates are posted at district and subdivision who administer and deliver justice of different kinds. The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration : The Superintendent of Police, Kishanganj is the head of the district police administration. The Deputy Superintendent of Police is posted to assist the police superintendent who is either from the Indian Police Service or the Bihar Police Service. In the subdivision of the district, the Deputy Superintendent of Police is posted who keeps control on police administration.

(iv)Physical Features

Kishanganj district is located on the extreme north-eastern part of the state. It is surrounded by Nepal on the north, the district of Purnia in the south, the state of West Bengal in the east and Araria district in the West. Kishanganj district is a part of North Bihar Plain. It has been carved out from the old district of Purnia during 1981-91 uplifting erstwhile Kishanganj subdivision to a separate district. The district is divided into two sub-micro regions, namely Parman-Kankai Plain and Mahananda Flood Plain on the basis of physical factors like relief, drainage, soil, geology, climate and natural vegetation.

Climatic Condition

The district has a moist humid climate. The winter season commences in October and lasts till February. January is the coldest month with the average normal minimum temperature of about 5º C. March to mid June form the summer months. The maximum temperature in April and May reaches about 46º C. Monsoon sets in in the second half of June and lasts till September. The district receives higher rainfall than many other districts of the State. The average annual rainfall being 1780.0 mm. Eighty per cent of the total rainfall is recorded during the monsoon period.

Flora and Fauna

In the past the large area of the district was covered under forest. These days the forest area almost seems to be disappeared from the district. Some teak, sal, sakhwa, sheesham, palas, pipal and semal trees are still found. Formerly the district was a paradise for sportsmen in search of wild game. Tigers, leopards, buffalowes, nilgai and many kinds of deer used to be common. With the disappearance of forests, however, wild life has all but disappeared from the district.

Land use pattern

The major part of the district is covered by non-calcareous, non-saline soil of recent alluvium formation; the soil is of low to medium fertility. Paddy and jute are the important crops. Wheat, barley, maize and Khesari are other crops grown. According to local classification, different soils of the district are as follows:-

i) Karari and Matiar – Clayey soil.

ii) Doas or Mansimati – loamy soil, and

iii) Baluar – Sandy soil.

Irrigational facilities

This district is one of the districts which due to various reasons in the past did without much of artificial irrigational facilities. The need of a systematic irrigation had not been felt before as the rainfall was generally ample and soil in most parts retained moisture, and the large number of rivers, rivulets and marshes assured facility of water. Still after independence, considerable attention has been paid to the provision of irrigation facility in the district by means of flood control measures as well as irrigation channels etc. The gigantic Kosi project has resulted

in extension of irrigational facilities in the district. In addition to this, various irrigational facilities have been provided in the district through a number of medium and minor irrigational schemes. Surface percolation wells, open borings with strainer, rahat pumps, low lift pumps and hand pumps.

Mines and Minerals

The geological formation of the district consists almost entirely of alluvium and there are no minerals of any importance in the district.

Fisheries

Fishery development scheme has been undertaken by the Fisheries department' efforts are being made to collect spawn and distribute fry. The demand for fry is increasing and a number of a nursery tanks are in use. This district was once noted for piscine wealth and offers excellent opportunity for the proper development of fisheries.

Industrialisation

The indigo industry was in a flourishing condition in the district in the 18th and 19th centuries. But gradually the cultivation of indigo went on declining and it has now completely disappeared. The district, in the past had quite a number of cottage industries like hand pounding of rice have now given way to small scale industrial units such as rice mills. One private paper factory is situated at Kishanganj. Several medium and small size rice and oil mills are also located in the district. Though Jute is the prominent crop of the district, no jute mill is located in the district.

There are no mining and heavy industries in existence in the district of Kishanganj. There are potentialities for a number of industries. It is a jute and paddy growing area and hence there is enough scope for industries based on these two raw materials.

Livestock

Livestock is very important in a district like Kishanganj with a predominantly agricultural economy. Cattle are an important article of stock but the one which are generally available in the district are not of superior breed and are generally small. The cattle are not well-fed hence the average milk yield of cows and buffaloes is quite low. The expansion of cultivation had brought much of the pasture land under plough. A good number of cattle migrate to the neighbouring Nepal Terai for grazing during summer months. A particular class of people in the village and the towns rear chicken. In order to improve the local breed poultry Development Centre has devised various schemes. The district has veterinary hospitals and a number of dispensaries and veterinarians in order to tackle animal diseases which have shown a decling trend. The Animal Husbandry Department of the State Govt. conducts livestock census quinquennially.

Communications

The district of Kishanganj is well served by a network of roads. The roads are classified as the National Highways, State Highways, major district roads and village roads. They are maintained by the P.W.D., the Rural Engineering Organisation. The Zila Parishad and the municipalities. All the 7 Block headquarters are connected with pucca roads.

Railway : The district is served by railways. Kishanganj the district headquarters, itself is connected with both the broad and metre gauges.

Airways:- The district has a landing ground at Kishanganj which is suitable only for the landing of small aeroplanes. There are no air services available at present.

Trade and Commerce

Kishanganj is essentially an agricultural district. The trade and commerce of the district have also been affected by its geophysical condition. It has close commercial relations with the border areas and with Nepal since time immemorial. In Kishanganj district trade consists mainly of export of jute, paddy, rice, maize, mustard seed, tobacco, bamboos, timbers, gunny bags and hides, and of import of cloth, salt, kerosene oil, vegetable oil, sugar, cement, lime and other manufactured goods.

Kishangnj is the important trade centre in the district – The Chief Commercial Commodity of the district is jute, the main determining factor of the centre of trade. The wholesale mandi of jute is also located at Kishanganj. Most of the internal trade is carried on in the village hats which are held on fixed days twice or thrice a week, Bhadarpur on Galgalia side is the main trade centre of Nepal with which Kishanganj district has regular and close commercial

relations. The market or this place is virtually in the hands of the Indian merchants.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth

of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common

room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban

outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.--For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the

Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon

27. Parhaiya

28. Santal

29. Sauria Paharia

30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not

treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} (ASFR)}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age group and sex per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/ his family normally resides. She/he is not

considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001

Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Kishanganj district during 1991 was 9,84,107 Hindus constitute over 33.83 per cent (3,32,893persons) of the population in the district followed by Muslims 65.91 percent (6,48,624 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Kishanganj district during 1991 was 984,107. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Kishanganj district, Urdu, the main mother tongue of the district was returned by 53.6 percent (527,550 persons) of the population. The corresponding percentage for the Hindi, the second most prominent language spoken in Kishanganj district, was 39.6 percent (389,957 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Kishanganj during 1991 census.

The population of the Scheduled Caste in the district of kishanganj was 65,157 according to 1991 census. Numerically the five most prominent Scheduled castes in the district were (i) Hari/Mehtar/ Bhangi (21,690) (ii) Musahar (14,356) (iii) Dusadh/ Dhari/Dharhi (8,792) (iv) Chaupal (7,375) and (v) Chamar/ Mochi (4,809). While Hari/Mehtar/ Bhangi constituted the maximum proportion of scheduled castes population, the percent being 33.3 (more than one five of the total sc population). Musahar and Dusadh though numerically second and third in order comprised only 22.0 and 13.5 percent of the SCs population in the district. Chaupal and Chamar are much less in number as compared to the other three SCs mentioned above with only 11.3 and 7.4 percent of the total SCs population of the district.

The population of the Scheduled Tribes in the district of Kishanganj during 1991 census was 34,830.numerically the five important STs were namely (i) Santal (ii) Oraon (iii) Munda (iv) Mal Paharia and (v) Lohara/Lohram Santal had 28,444 population which constituted 81.7 percent of the Scheduled Tribes population in district .Oraon with 2459 population constituted 7.1 percent of the st population. Munda, which were 16,36 in number, constituted 4.7 percent of the st population. Mal paharia comprised 1,457 persons and constituted 4.2 percent of ST population which lohara/lohra with 239 populations constituted 0.7 percent of the total ST population in the district. The other Scheduled Tribes were almost negligible in proportion.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Kishanganj district is 1,296,348 comprising 669,552 Males and 626,796 Females and constituting 1.6 percent of the State population spread over 2.0 percent of the area of the State in the 7 C.D.Blocks of the district. Kochadhamin is the most populous C.D. Block where as Tarhagachh is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district. In 2001 Census decade population growth rate in district was 31.7 percent. Sex ratio of the district is 936 which is above to the sex ratio of the State Bihar. Butliteracy rate of the district is very low i.e.31.1 percent, which is below to the state literacy rate (47.0 percent).

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial number	C.D. Block	Population 1991 Total	1991 Rural	1991 Urban	Population 2001 Total	2001 Rural	2001 Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001

	District Total	**984,107**	**884,827**	**99,280**	**1,296,348**	**1,167,340**	**129,008**	**31.7**	**31.9**	**29.9**	**10.1**	**10.0**

Table 1 shows decadal growth rate during 1991 to 2001 in district as well as in C.D.Blocks .The decadal growth rate of the district was 31.7 percent. The rural population in the district has increased by 31.9 percent while the urban population growth over the decade has been of the order of 29.9 percent. Among the C.D. Blocks, Kishanganj has shown the highest increase in population over the decade with 35.5 percent. The next highest increase in population is observed in Kochadhamin C.D. Block with 34.9 percent followed by Dighalbank C.D. Block with 32.7 percent. Percentage decadal variation has been observed to be the least in the Pothia C.D.Block with 28.8 percent. The next lowest increase in population is observed in Terhagachh with 29.0 percent.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

	District (Rural) Total	**164 (22.5)**	**253,736**	**239,375**	**36 (4.9)**	**120,333**	**113,181**	**2 (0.3)**	**10,325**	**10,076**

It may be observed in the Table 2 that the maximum number of villages lie in the population range of 1000-1999 accounting for 23.8 percent of the total inhabited villages closely followed by in the population range of 500-999 accounting for 22.9 percent of the total inhabited villages. The percentage of population in the above two population ranges are 21.4 percent 10.5 percent of the total rural population of the district,respectively. The villages in the population range of 2000-4999 constitute 22.5 percent of the total inhabited villages and in these villages the percentage of population is 42.2 percent. There are 36 villages in the population range of 5,000-9,999 accounting for 4.9 percent of the total inhabited villages and in these villages the percentage of population is 20.0 percent of the total rural population. There are 118 villages in the population range of 200-499 accounting for 16.2 percent of the total inhabited villages and in these villages the percentage of population is only 3.5 percent of the total rural population. There are 69 villages in the population range of less than 200 accounting for 9.5 percent of the total inhabited villages and in these villages the percentage of population is 0.6 percent. There are 2 villages in the highest population range of 10,000 and above accounting for 0.3 percent of the total inhabited villages and in these villages the percentage of population 1.7 percent.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicable in respect of Kishanganj district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.1	194	0.0
11-20	2	0.3	40	0.0
21-50	6	0.8	299	0.0
51-100	8	1.1	746	0.1
101-200	26	3.6	6,321	0.5
201-300	56	7.7	25,023	2.1
301-500	168	23.0	216,507	18.5
501 +	463	63.4	918,210	78.7
Not known	0	0.0	0	0.0
District Total	**730**	**100.0**	**1,167,340**	**100.0**
Population Density (Rural) of the district		**630.8**		

The data presented in the above table highlights the fact that maximum proportion of villages in Kishanganj district lies in the density range (per square kilometre) of 501+ with 78.7 percent of the population followed by villages in the density range of 301-500 which account for 18.5 percent. It would further be seen that a small number of villages fall in the density ranges of 0-10, 11-20 and 21-50 which account for 0.0 percent (in each density ranges) of the total inhabited villages.

The above table further reveals that the maximum villages which fall in the density range of 501+ cover 63.4 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 23.0 percent of the total inhabited villages.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	962	970	747
1911	1,051	1,056	942	963	980	540
1921	1,020	1,027	886	941	955	565
1931	995	1,005	820	936	952	538
1941	1,002	1,012	842	949	967	534
1951	1,000	1,010	859	863	886	490
1961	1,005	1,020	832	873	885	705
1971	957	968	833	907	917	763
1981	948	959	852	922	935	817
1991	907	913	857	933	941	865
2001	919	926	868	936	945	863

Note: Sex ratio has been defined here as the number of females per 1000 males.

The sex ratio for the rural areas of Kishanganj district was comparatively low as compared to the rural areas of the state from 1901 census to 1981 census. However, on the other hand, the sex ratio for the rural areas of the state was comparatively low as compared to the rural areas of Kishanganj district in 1991 and 2001 censuses. It shows that the sex ratio for the rural areas of the state is comparatively low as compared to the rural areas of Kishanganj district after 100 years. The sex ratio for the urban areas of Kishanganj district was comparatively low as compared to the urban areas of the state till 1981 census.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Terhagachh	952
2	Dighalbank	950
3	Thakurganj	951
4	Pothia	943
5	Bahadurganj	955
6	Kochadhamin	929
7	Kishanganj	936
	District (Rural) Total:	**945**

In Kishanganj district as a whole there are 936 females for every thousand males.Within the district (rural), the sex ratio varies from 955 in Bahadurganj C.D. Block to 929 in Kochadhamin C.D. Block. The sex ratio of Terhagachh C.D.Block is 952 while the sex ratio of Kishanganj C.D. Block is 936. The sex ratio figures for rural and urban areas of Kishanganj district are 945 and 863 respectively.The rural sex ratio also varies from 929 in Kochadhamin C.D. Block to 955 in Bahadurganj C.D. Block. The sex ratios of Pothia, Kochadhamin and Kishanganj are lower than the district rural average of 945. The urban sex ratio of the district is 863 which is lower than the total and rural averages of the district.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	3	0.4	98	0.0
700-749	6	0.8	1,549	0.1
750-799	10	1.4	2,115	0.2
800-849	49	6.7	31,866	2.7
850-899	105	14.4	135,999	11.7
900-949	237	32.5	528,733	45.3
950-999	174	23.8	321,420	27.5
1000-1099	112	15.3	125,372	10.7
1100+	34	4.7	20,188	1.7
District Total:	**730**	**100.0**	**1,167,340**	**100.0**
Sex ratio (Rural) for District:		**945**		

It is observed from the above table that the maximum proportion of villages in Kishanganj district lies in the sex ratio range of 900-949 and these villages account for 32.5 percent of the total inhabited villages of the district. It further reveals that these villages which fall in this sex ratio range account for 45.3 percent of the district rural population. 174 villages (23.8 percent) are in the sex ratio range of 950-999 and these villages account for 27.5 percent of the district rural population. 105 villages (14.4 percent) fall in the sex ratio of 850-899 and these villages account for 11.7 percent of the rural population of the district. 49 (6.7 percent) villages are in the sex ratio range of 800-849 and these villages account for 2.7 percent of the rural population.112 (15.3 percent) villages fall in the favourable sex ratio range of 1000-1099 and these villages account for 10.7 percent of the rural population.34 (4.7 percent) villages are in the very favourable sex ratio range of 1100+ and these villages account for only 1.7 percent of the rural population. Only 3 villages (0.4 percent) are in the lowest sex ratio range of less than 700.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town+	Urban status of town	Sex ratio
1	2	3	4
1	Bahadurganj	NA	887
2	Kishanganj	M	850
3	Thakurganj	NA	888
	Sex ratio (Urban) for the district:		**863**

There is no urban agglomeration in Kishanganj district. Thakurganj (NA), Bahadurganj (NA) and Kishanganj (M) are the statutory towns in the district. The sex ratio in Thakurganj(NA) is 888 which is higher than the Bahadurganj(NA) and lowest to Kishanganj (M), which is 850 according to 2001 Census.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Terhagachh	23,121	11,956	11,165	934
2	Dighalbank	34,986	17,647	17,339	983
3	Thakurganj	47,307	24,482	22,825	932
4	Pothia	43,035	22,008	21,027	955
5	Bahadurganj	39,403	20,125	19,278	958
6	Kochadhamin	52,047	27,127	24,920	919
7	Kishanganj	23,945	12,182	11,763	966
	District (Rural) Total	**263,844**	**135,527**	**128,317**	**947**

Table 11 shows C.D.Blockwise sex ratio in rural areas for age group (0-6). It is observed from the above table that the sex ratio in the age group 0-6 varies from 983 in Dighalbank C.D. Block to 919 in Kochadhamin C.D. Block. The sex ratio in the age group 0-6 of Pothia is 955 while the sex ratio of Kishanganj is 966. The sex ratio figures in the age group 0-6 of Terhagachh, Thakurganj and Kochadhamin C.D. Blocks are lower than the district total and rural averages.Table 10 shows sex ratio in age group 0-6 for C.D.Blocks for rural,urban and total.In C.D.Blocks sex ratio of rural area is higher than the urban area.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	41	5.6	4,674	1.8
700-749	23	3.2	5,765	2.2
750-799	33	4.5	8,345	3.2
800-849	67	9.2	23,144	8.8
850-899	82	11.2	33,491	12.7
900-949	113	15.5	57,749	21.9
950-999	97	13.3	52,719	20.0
1000-1099	155	21.2	55,767	21.1
1100+	119	16.3	22,190	8.4
District (Rural) Total	**730**	**100.0**	**263,844**	**100.0**
Sex ratio (Rural) for District:		**947**		

It is observed from the above table that the maximum proportion of villages in Kishanganj district lies in the favourable sex ratio range of 1000-1099 for the age group 0-6 and these villages account for 21.2 percent of the inhabited villages. 113 villages (15.5 percent) fall in the sex ratio range of 900-949 and these villages account for 21.9 per cent of the rural population of the district. 97 (13.3 percent) villages have sex ratio range 950-999 and these villages account for 19.6 percent of the rural population. Again 41 villages (5.6 per cent) are in the sex ratio range of less than 700 and these villages cover 1.8 percent of the rural population. 67 villages (9.2 percent) fall in the sex ratio range of 800-849 and these villages account for 8.8 per cent of the rural population 23 villages are in the sex ratio range of 700-799 and these villages account for 2.2 percent of the rural population.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town+	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bahadurganj	NA	5,959	3,067	2,892	943
2	Kishanganj	M	15,490	7,931	7,559	953
3	Thakurganj	NA	2,644	1,374	1,270	924
	District(Urban) Total		**24,093**	**12,372**	**11,721**	**947**

There is no urban agglomeration in Kishanganj district. It is apparent from the above table that there are only three statutory towns in Kishanganj district, they are Thakurganj(NA), Bahadurganj(NA) and Kishanganj (M). The sex ratio for the age group 0-6 of Kishanganj (M) is 953 which is highest than Bahadurganj (NA) with 943 and Thakurganj with lowest 924 according to 2001 Census.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

		Urban	**129,008**	**14,157**	**2,250**	**11.0**	**1.7**

The above table indicates that the percentage of Scheduled Castes in Kishanganj district is 6.6 percent of the total population. The highest percentage of Scheduled Castes population is contained in Terhagachh C.D. Blocks with 10.3 percent of the total population, closely followed by Kishanganj, Kochadhamin, Dighalbank, Bahadurganj, Thakurganj and Pothia C.D. Blocks with 9.0, 8.4, 6.5,5.6.5.0 and 3.3 percent, respectively.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Terhagachh	107,036	11,070	2,504	10.3	2.3
2	Dighalbank	152,685	9,882	10,559	6.5	6.9
3	Thakurganj	206,769	9,852	10,251	4.8	5
4	Pothia	196,293	6,507	12,908	3.3	6.6
5	Bahadurganj	177,818	8,831	4,189	5	2.4
6	Kochadhamin	226,620	19,099	1,787	8.4	0.8
7	Kishanganj	100,119	6,435	2,668	6.4	2.7
	District (Rural) Total: 1,167,340		**71,676**	**44,866**	**6.1**	**3.8**

The percentage of Scheduled Castes population in the district of Kishanganj for the rural area is 6.1 percent which is lower than the urban area (11.0 percent). The highest percentage of Scheduled Tribes population is contained in Dighalbank C.D.Block with 6.9 percent of the total population closely followed by Pothia, Thakurganj,Terhagachh, Bahadurganj and Kishanganj C.D.Blocks with 6.6, 4.9, 2.3, 2.2 and 2.0 percent , respectively. The percentage of Scheduled Tribes population in Kishanganj for the rural areas is 3.8 percent which is higher than the urban areas (1.7 percent) as has been observed in the above table.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Sceduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	226	31.0	0	0.0
Less than 5	231	31.6	15,014	20.9
5-10	132	18.1	22,247	31.0
11-20	95	13.0	20,232	28.2
21-30	29	4.0	9,269	12.9
31-40	4	0.5	1,602	2.2
41-50	7	1.0	1,985	2.8
51-75	2	0.3	682	1.0
76 and above	4	0.5	645	0.9
District Total	**730**	**100.0**	**71,676**	**100.0**

From the above table, it is apparent that there are 231 villages for 31.6 percent of the inhabited villages in the district where the population of the Scheduled Castes ranges below 5 percent of total population. This is the largest group of villages in the district. This is closely followed by villages where the population of the Scheduled Castes ranges nil of the total population and these villages which number 226 account for 31.0 percent of the total inhabited villages. There are 132 villages accounting for 18.1 percent of the inhabited villages, where the percentage of Scheduled Castes population to total population is, between 5 and 10. There are 95 villages accounting for 13.0 percent of the inhabited villages, where the percentage of Scheduled Castes population to total population is between 11 and 20. There are 29 villages accounting for 4.0 percent of the inhabited villages, where the percentage of Scheduled Castes population is between 21 and 30. There are 7 villages accounting for 1.0 percent of the inhabited villages, where the percentage of Scheduled Castes population is between 41 and 50.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	422	57.8	0	0.0
Less than 5	127	17.4	7,006	15.6
5-10	69	9.5	8,369	18.7
11-20	54	7.4	13,153	29.3
21-30	27	3.7	8,017	17.9
31-40	7	1.0	2,300	5.1
41-50	5	0.7	2,169	4.8
51-75	8	1.1	1,392	3.1
76 and above	11	1.5	2,460	5.5
District Total	**730**	**100.0**	**44,866**	**100.0**

It can be seen from the above table that there are 127 villages accounting for 17.4 percent of the inhabited villages, where the percentage of Scheduled Tribes population to total population is less than 5. There are only 69 villages accounting for only 9.5 percent of the inhabited villages, where the percentage of Scheduled Tribes population to total population is between 5 and 10. There are as many as 422 villages accounting for 57.8 percent of the inhabited villages in the district which have no Scheduled Tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bahadurganj (NA)	28,118	2,717	422	9.7	1.5
2	Kishanganj (M)	85,590	10,294	1,094	12	1.3
3	Thakurganj (NA)	15,300	1,146	734	7.5	4.8
	District(Urban) Total	**129,008**	**14,157**	**2,250**	**11**	**1.7**

It is apparent from the above table that there is no urban agglomeration in Kishanganj district. There are only three statutory town in the district i.e., Thakurganj (NA), Bahadurganj (NA) and Kishanganj (M). The percentage of Scheduled Castes population to total population is 12.0 in Kishanganj (M) which is highest than the Bahadurganj (NA) 9.7 and lowest Thakurganj (NA) with 7.5 percent. While the percentage of Scheduled Tribes population to total population is 4.8 in Thakurganj (NA) which is highest than the Bahadurganj (NA) 1.5 and lowest Kishanganj (M) with 1.3 percent as has been observed in the above table.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Terhagachh	953	965
2	Dighalbank	929	967
3	Thakurganj	965	956
4	Pothia	936	944
5	Bahadurganj	967	912
6	Kochadhamin	937	1008
7	Kishanganj	937	895
	District (Rural) Total	**946**	**950**

It is observed from the above table that the sex ratio of Scheduled Castes varies from 967 in Bahadurganj C.D. Block to 929 in Dighalbank C.D. Block. The sex ratio in Thakurganj C.D. Block is 965 while the sex ratio in Terhagachh is 953. The sex ratio figures of Pothia, Kochadhamin and Kishanganj C.D. Blocks are 936, 937 and 937, respectively. The sex ratio figures of Dighalbank, Pothia, Kochadhamin and Kishanganj C.D. Blocks are lower than the district average of 946.The sex ratio of Scheduled Tribes varies from 1008 in Kochadhamin C.D. Block to 895 in Kishanganj C.D. Block. The sex ratio figures of Scheduled tribes in Dighalbank, Pothia, Terhagachh, Bahadurganj and Thakurganj C.D. Blocks are 967 ,944 , 965 , 912 and 956 respectively. The sex ratio figures of Pothia (944), Bahadurganj (912), and Kishanganj (895) C.D. Blocks are lower than the district average(950).

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Bahadurganj (NA)	920	1,019
2	Kishanganj (M)	883	923
3	Thakurganj (NA)	959	902
	Sex ratio (Urban) for the district	**896**	**933**

There is no urban agglomeration in Kishanganj district. Thakurganj (NA), Bahadurganj (NA) and Kishanganj (M) are the only statutory town in the district.The Scheduled castes sex ratio is highest in Thakurganj(NA) 959 while it is lowest 883, in Kishanganj(M) .The scheduled tribes sex ratio is highest in Bahadurganj (NA) and its lowest sex ratio is 902 in Thakurganj (NA)

The literacy rates (rural) for Terhagachh, Dighalbank, Pothia, C.D. Blocks are lower than the district average. Male literates greatly outnumber female literates in all the C.D. Blocks of Kishanganj district. The highest proportion of male literates is contained in Kochadhamin C.D. Block with 42.0 percent followed by Teragachh,Bahadurganj Thakurganj, Kishanganj, Dighalbank and Pothia with 41.9 , 40.9 , 29.8 , 39.0 , 38.5 and 34.9 percent, respectively. Kochadhamin C.D. Block has the highest female literacy rate with 16.4 percent followed by Kishanganj, Bahadurganj,Thakurganj and Pothia with 16.3 16.2, 16.8 and 15.5 percent respectively.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	4	0.5	832	0.1
1-10	46	6.3	23,259	2.0
11-20	156	21.4	236,435	20.3
21-30	250	34.2	480,212	41.1
31-40	171	23.4	345,577	29.6
41-50	62	8.5	60,777	5.2
51-60	28	3.8	16,386	1.4
61-70	11	1.5	3,684	0.3
71-80	2	0.3	178	0.0
81-90	0	0.0	0	0.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total	**730**	**100.0**	**1,167,340**	**100.0**
Literacy rate for District		**31.1**		

From the above table 23, it is apparent that there are 250 villages accounting for 34.2 percent of the inhabited villages in the district where literacy rate for villages ranges between 21 and 30 percent and these villages account for 41.1 percent of the district rural population. This is the largest group of villages in the district. This is closely followed by 171 villages accounting for 23.4 percent of the inhabited villages where literacy rate ranges between 31 and 40 percent and these villages account for 29.6 percent

of the rural population. There are 156 villages accounting for 21.4 percent of the inhabited villages, where literacy rate ranges between 11 and 20 percent and these villages account for 20.3 percent of the population. There are 62 villages accounting for 8.5 percent of the inhabited villages where literacy rate ranges between 41 and 50 percent and these villages account for 5.2 percent of the population. There are 46 villages accounting for 6.3 percent of the inhabited villages, where literacy ranges between 1 and 10 percent and these villages account for 2.0 percent of the population. There are 28 villages accounting for 3.8 percent of the inhabited villages, where literacy rate ranges between 51 and 60 percent and these villages account for 1.4 percent of the population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name and urban status of Town+	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

7	Kishanganj	1,139	872	267	5,296	2,450	2,846	23.3	34.4	11.4	23.0
	District (Rural) Total	**13,401**	**10,195**	**3,206**	**58,275**	**26,641**	**31,634**	**24.4**	**36**	**12.0**	**24.0**

Table 25 shows that literacy rate among the scheduled castes is highest i.e. 31.2 percent in Thakurganj C.D. Block, whereas it is lowest i.e. 21.1 percent in Terhagachh C.D. Block in the district. It is observed that the literacy rate among the Scheduled Castes for the district is 24.4 percent. Both have the highest scheduled castes male literacy rate i.e. 44.2 percent.Thakurganj C.D Block , whereas it is lowest i.e. 30.1 percent in Pothia C.D. Block.The female literacy rate among the Scheduled Castes is highest i.e. 17.8 percent in Thakurganj C.D. Block and the lowest i.e. 8.4 percent in Terhagachh C.D. Block. It is found that the gap between male and female literacy rate is highest i.e. 27.8 percent in Dighalbank C.D. Block where as it is lowest i.e. 17.6 percent in Pothia C.D. Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	38	7.5	764	1.1
1-10	71	14.1	11,746	16.4
11-20	115	22.8	20,802	29.0
21-30	97	19.2	15,934	22.2
31-40	78	15.5	11,893	16.6
41-50	60	11.9	6,271	8.7
51-60	24	4.8	3,215	4.5
61-70	13	2.6	946	1.3
71-80	5	1.0	64	0.1
81-90	1	0.2	33	0.0
91-99	0	0.0	0	0.0
100	2	0.4	8	0.0
District Total	**504**	**100.0**	**71,676**	**100.0**
Literacy rate for District (Rural)		**24.4**		

The above table shows that in case of literacy among the scheduled castes in the villages of the district the highest number of villages i.e. 22.8 percent fall in the literacy range of 11-20 percent whereas the lowest number of villages i.e. 0.2 percent fall in the literacy range of 81-90 percent. It is observed that of the total villages in the district 19.2 percent villages are such which fall in literacy range of 21-30 percent followed by 15.5 percent villages which fall in the literacy range of 31-40 percent. There are 4.8 percent villages which fall in the literacy range of 51-60 percent in the case of literacy among the scheduled castes in the villages of the district.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town+	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bahadurganj (NA)	1,055	693	362	1,662	722	940	48.6	61.3	34.8	26.5
2	Kishanganj (M)	3,855	2,610	1,245	6,439	2,858	3,581	46.5	58.3	32.6	25.7
3	Thakurganj (NA)	382	246	136	764	339	425	42.2	51.5	31.9	19.6
	Kishanganj (Urban)	**5,292**	**3,549**	**1,743**	**8,865**	**3,919**	**4,946**	**46.6**	**58.3**	**33**	**25.3**

The above table shows that the literacy rate among the scheduled castes in the urban areas of the district is 46.6 percent of the total population, in which proportion of males and females are 58.3 percent and 33.0 percent, respectively. Bahadurganj (NA) has the highest literacy rate 48.6 among the scheduled castes while it is lowest in Thakurganj (NA) with 42.2 percent. In case of males and females the literacy rate among the Scheduled castes is also highest in Bahadurganj (NA) with 61.3 and 34.8 percent, respectively.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Terhagachh	183	146	37	2,321	1,128	1,193	9.2	14.5	3.8	10.7
2	Dighalbank	958	790	168	9,601	4,578	5,023	11.5	18.5	4.1	14.4
3	Thakurganj	1,298	973	325	8,953	4,268	4,685	15.9	23.2	8.2	15.0
4	Pothia	1,754	1,331	423	11,154	5,309	5,845	17.1	25.4	8.4	16.9
5	Bahadurganj	335	273	62	3,854	1,918	1,936	10.0	15.4	3.9	11.5
6	Kochadhamin	174	140	34	1,613	750	863	12.6	19.8	5.0	14.8
7	Kishanganj	304	249	55	2,364	1,159	1,205	14.1	21.7	5.5	16.3
	District (Rural)										
	Total:	**5,006**	**3,902**	**1,104**	**39,860**	**19,110**	**20,750**	**14.0**	**21.3**	**6.4**	**14.9**

The above table shows that among the Scheduled Tribes the percentage of of literates is highest i.e.17.1 percentage in Pothia C.D.Block in the district while it is lowest i.e 9.2 percentage in Terhagachh C.D.Blocks. It is also observed that the literacy rate among the Scheduled Tribes for the district is 14.0 percent. As regards percentage of male literacy it is highest in Pothia C.D.Block (25.4) whereas it is lowest i.e.14.5 % inTeragachh C.D.Block. In case of female literacy rate among the Scheduled Tribes it is highest in Pothia C.D.Block whereas it is lowest i.e. 3.8 percentage in Terhagachh CD.Block

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	46	14.9	1,341	3.0
1-10	115	37.3	16,216	36.1
11-20	80	26.0	18,853	42.0
21-30	27	8.8	5,801	12.9
31-40	17	5.5	1,922	4.3
41-50	11	3.6	576	1.3
51-60	3	1.0	89	0.2
61-70	0	0.0	0	0.0
71-80	2	0.6	32	0.1
81-90	1	0.3	9	0.0
91-99	1	0.3	16	0.0
100	5	1.6	11	0.0
District Total	**308**	**100.0**	**44,866**	**100.0**
Literacy rate for District (Rural)		**14.0**		

The table shows that in case of literacy among the scheduled tribes in the villages of the district the highest number of villages i.e. 37.3 percent fall in the literacy range of 1-10 percent where as the lowest number of villages i.e. 0.3 percent fall in the literacy range of 81-90 and in range 91-99. It is observed that among total villages in the district 1.6 percent villages are such which fall in the highest literacy range of 100 percent. There are 0.3 percent villages which fall in the literacy range, i.e. 81-90 and 91-99 percent followed by 0.6 percent villages which fall in the literacy range of 71-80 percent in the case of literacy among the scheduled tribes in the villages of the district.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bahadurganj (NA)	44	31	13	378	178	200	12.9	17.9	7.7	10.2
2	Kishanganj (M)	548	340	208	546	229	317	61.4	69.8	51.2	18.6
3	Thakurganj (NA)	142	100	42	592	286	306	22.2	30.0	13.6	16.4
	District (Urban)										
	Total	**734**	**471**	**263**	**1,516**	**693**	**823**	**39.1**	**47.4**	**29.8**	**17.6**

The table above shows that the literacy rate among the scheduled tribes in the urban areas of the district is 39.1 percent in case of total population of the district, 47.4 percent in case of males and 29.8 percent in case of females. The percentage of Scheduled tribes literates is highest in Kishanganj (M) with 61.4 percent than the Thakurganj (NA) with 22.2 percent and lowest Bahadurganj (NA) with 12.9 percent. In case of male and female scheduled tribes literates it is highest in Kishanganj (M) with 69.8 and 51.2 percent, respectively, where as male and female scheduled tribes literates it is lowest in Bahadurganj (NA) with 17.9 and 7.7 percent , respectively, according to 2001 census.

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers.The table 31 and 32 shows that for Kishanganj district the work participation rate (WPR) in the rural area recorded 28.0 percent of the district total population as main workers and 4.4 percent as marginal workers. The proportion of non-workers in the district is 67.1 percent.

Among the main workers male work participation rate in the district is 49.2 percent while that of females is only 5.6 percent as per 2001 census. The proportion of main workers is the highest (30.5 percent) in Dighalbank C.D. Block and the lowest (27.0 percent) in Kochadhamin C.D. Block. Out of 7 C.D. Blocks, WPR of 3 C.D. Blocks are above the district average. The proportion of marginal workers is the highest (6.4 percent) in Pothia and the lowest (3.4 percent) in Kishanganj C.D. Block. The proportion of total workers is the highest (34.1 percent) in Pothia and Dighalbank C.D. Blocks and the lowest (30.5) percent in Kochadhamin C.D. Block.

Among the non-workers male work participation rate in the district is 46.6 percent while that of females is 89.3 percent as per 2001 census.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

There is no urban agglomeration in Kishanganj district. There are three towns in the district i.e. Thakurganj (NA) , Bahadurganj (NA) and Kishanganj (M). The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. For Thakurganj (NA) the work participation rate (WPR) recorded 28.5 percent and proportion of main workers and marginal workers are 27.1 percent and 1.4 percent , respectively In Bahadurganj (NA) the work participation rate (WPR) is 27.5 percent of the total population of the town as main workers in which proportion of main workers and marginal workers are 24.6 % and 2.9 % respectively. Similarly in Kishanganj (M) the work particapation rate (WPR) is 27.8 percent of the total population of the town, in which proportion of main workers and marginal workers and 25.1 percent and 2.7 percent respectively. The proportion of non-workers in the district 72.2 percent. The proportion of male and female main workers in the town are 43.5 and 4.0 percent respectively. The proportion of male marginal workers in the district is 3.5 percent and that for females is 1.6 percent only. The proportion of male and female non-workers in the district are 53.0 and 94.4 percent respectively.

Note: Percentage of Workers to total workers are given in brackets

From the above table 34 the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four-fold classification namely, cultivation, agricultural labour, household industry and other economic activities. The economic activity of the district is primarily dependent on agriculture which is supported by the fact that cultivators (28.2%) and agricultural labourers (61.0%) together constitute 89.2 percent of the total workers of the district. The agriculture sector has absorbed about three-fourth of the total main workers. The proportion of cultivators varies between 35.2 percent for Terhagachh C.D. Block to 22.7 percent for Kishanganj C.D. Block. The proportion of agricultural labourers varies between 66.1 percent for Dighalbank C.D. Block to 54.7 percent for Terhagachh C.D. Block. The proportion of household industry workers is only 2.0 percent of the total workers of the district. The proportion of household industry workers varies between 3.8 percent for Terhagachh C.D. Block to 1.1 percent for Thakurganj C.D. Block. The proportion of other workers varies between 12.9 percent for Kishanganj C.D. Block to 5.1 percent for Dighalbank C.D. Block.

				(5.6)	**(3.6)**	**(29.9)**	**(8.4)**	**(58.2)**

Note: Percent of Worker to total workerre given in brackets

From the above table it is observed that cultivators constitute 6.1, 17.8 and 4.6 percent of the total workers in Thakurganj (NA) , Bahadurganj (NA) and Kishanganj (M) respectively. The highest proportion of male and female cultivators are 18.7 and 7.2 percent ,respectively in Bahadurganj (NA). The highest proportion of male and female agricultural labourers is found in Bahadurganj (NA) with 45.6 and 48.9 percent, respectively. The proportion of male and female agricultural labourers are 20.0 and 29.9 percent respectively in the district (urban) total . The proportion of household industry workers is 2.3 percent of the total workers in the district (urban) total.. The highest proportion of male household industry workers is 2.0 in Kishanganj (M) and 8.6 percent for female household industry workers in Bahadurganj (NA). The proportion of other workers is 69.1 percent of the total workers in the district (urban) total. The highest proportion of other workers among males and females are 81.7 and 65.5 percent, respectively in Kishanganj (M).

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Type of amenity available

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table gives the distribution of villages according to the availability of different amenities in the district.

Educational amenity – There are as many as 488 villages accounting for 66.8 percent of the total inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility is in the development block of Bahadurganj with 74.8 percent while Pothia C.D. Block has the lowest proportion of villages with 57.7 percent.

Medical facility – The availability of medical amenity in the villages is low and only 16.4 percent villages have got it. Among the C.D. Blocks, Terhagachh C.D. has the largest proportion of villages with medical facility, the percentage being 27.3 percent. Kochadhamin C.D. Block, on the other hand, has the smallest proportion of villages (7.0%) where medical amenity is available.

Improved drinking water – There are as many as 711 villages accounting for 97.4 percent of the inhabited villages in the district where improved drinking water facility is available. Among C.D. Blocks, Pothia C.D.Block has the largest proportion of village with improved drinking water with 99.3 percent, on the other hand Kishanganj C.D.Block has the lowest proportion of villages with improved drinking water with 95.5 percent.

Post office – Postal facilities are available in 86 villages out of 730 inhabited villages (11.8%) in the

district. Thakurganj C.D. Block has the maximum number of villages having postal facility (15.3%). Kishanganj C.D. Block has the minimum number of villages having postal facility (7.5%).

Telephone – The availabity of telephone facility in the villages is low and only 8.9 percent have got it. Among the C.D. Blocks, Kishanganj C.D. Block has the maximum number of villages having telephone facility (28.4%) while Dighalbank C.D.Block has the minimum number of villages having telephone facility (1.2%).

Transport Communication – Transport Communication facilities are available in 45 villages out of 730 inhabited villages (6.2%) in the district. Kishanganj C.D. Block has the highest proportion of villages (11.9%) which are connected bus by rail or navigable river / canal services. Kochadhamin and Terhagachh C.D. Blocks have zero number of villages having transport communication.

Bank – Banking facility is available only in 43 villages out of 730 inhabited villages (5.9%) in the district. Among C.D. Blocks, Pothia C.D. Block has the maximum number of villages having banking facility (11.3%) whereas the villages of Kishanganj C.D. Block has minimum number of banking facility (1.5%).

Agricultural credit societies – Agricultural credit societies are available only in 97 villages out of 730 inhabited villages (13.3%) in the district. Among C.D. Blocks, Thakurganj C.D. Block has the maximum number of villages having agricultural credit societies (24.6%) while the villages of Pothia C.D. Block has minimum number of agaricultural credit societies (2.8%).

Approach by pucca road –This facility is available in 181 villages out of 370 inhabited villages (24.8%) in the district. Kishanganj C.D. Block has the maximum number of villages having pucca road approach (41.8%) while Terhagachh C.D. Block has the minimum number of villages having pucca road approach (10.4%).

Power Supply – Electrified villages in the district constitute 15.9 percent of the total number of inhabited villages. Among the C.D. Blocks, Dighalbank C.D. Block has the maximum number of electrified villages with 37.0 percent while the villages of Terhagachh C.D. Block has the minimum number of electrified villages with 2.6 percent.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

			Type of amenity available									
Serial number	Name of C. D. Block	Total population of inhabited villages	Education	Medical	Improved drinking water *	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

		(100)	**(86.3)**	**(27.5)**	**(97.3)**	**(25.7)**	**(16.7)**	**(10.6)**	**(11.1)**	**(22.5)**	**(33.4)**	**(28.6)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from above table 38 that educational facility is available to 86.3 percent of the rural population of the district. The proportion varies between the maximum of 94.6 percent in Dighalbank C.D.block and the minimum of 74.3 percent in Pothia C.D.Block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 66.8 percent vide table 37) than the proportion of population which is as high as 86.3 percent. This may be attributed to fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by this amenity is of the order of 27.5 percent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility also it may be observed that proportion of rural population served, by the amenity is of the order of 97.3 percent which is less than the proportion of villages served by this facility in the district.

In the case of post office also it may be seen that the proportion of rural population served by the amenity is of the order of 25.7 percent which is more than the proportion of villages served by this amenity in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	258	30	0	288
(b) Middle School	429	181	29	639
(c) Degree College	46	95	586	727
2. Medical:-				
(a) Hospital	112	155	454	721
(b) PHC	167	217	330	714
3. Post Office	457	172	15	644
4. Telephone	185	184	296	665
5. Bus Service	205	186	300	691
6. Banks				
(a) Commercial Bank	265	275	150	690
(b) Cooperative Bank	57	123	544	724
7. Agricultural Credit Societies	372	165	96	633

As regards educational facility it would be seen that there are 288 villages in the district (39.5%) which do not have any primary schools. But the facility is available at places within 5 kms for 258 villages . For only 30 villages within the range of 5-10 kms.

There are as many as 639 villages in the district (87.5%) which do not have middle schools, but the facility is available at Places situated within 5kms. for 429 villages. For 181 villages within the range of 5-10 kms and 29 villages within the range of 10+ kms. It is interesting to observe that 99.6 percent of inhabited villages of the district are deprived of college but the facility is available at places situated within 5 kms for 46 villages, 95 villages within the range of 10+ kms.

There are 721 villages in the district (98.8%)

which are without the facility of hospital and as many as 155 villages enjoy this facility at a distance range of 5-10 kms. The number of villages enjoying this facility at a distance range of 10+ kms is 454 where as the same is available at a distance of less than 5 kms for 112 villages. There are 714 villages in the district (97.8%) which do not have primary health center.

Similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometre)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	17	14	5	1	3	3	1	3	13
	(100.0)	(82.4)	(29.4)	(5.9)	(17.6)	(17.6)	(5.9)	(17.6)	(76.5)
5 -15	258	183	45	33	43	26	10	31	74
	(100.0)	(70.9)	(17.4)	(12.8)	(16.7)	(10.1)	(3.9)	(12.0)	(28.7)
16 - 50	443	283	67	50	19	16	31	62	90
	(100.0)	(63.9)	(15.1)	(11.3)	(4.3)	(3.6)	(7.0)	(14.0)	(20.3)
51+	12	8	3	2	0	0	1	1	4
	(100.0)	(66.7)	(25.0)	(16.7)	(0.0)	(0.0)	(8.3)	(8.3)	(33.3)
Unspecified	0	0	0	0	0	0	0	0	0
	0	0	0	0	0	0	0	0	0
District total	**730**	**488**	**120**	**86**	**65**	**45**	**43**	**97**	**181**
	(100.0)	**(66.8)**	**(16.4)**	**(11.8)**	**(8.9)**	**(6.2)**	**(5.9)**	**(13.3)**	**(24.8)**

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table that the maximum number of inhabited villages 443 (60.7%) lie in the distance range of 16-50 kms. from the nearest statutory town. This is followed by villages 258 (35.3%) in the distance range less than 5-15 kms. from the nearest statutory town. Only 17 (2.3%) of villages lie in the distance range of less than 5 kms.

Interestingly, It can be observed from the above table 40 that the proportion of villages having educational facility is 82.4 percent for those situated within 5 kms from the nearest statutory town which decreases to 70.9 percent in the next higher distance range of 5-15 kms. Thereafter it again decreases to 63.9 percent in the distance range of 16-50 kms from the nearest statutory town. In the case of other amenities (except post office and bank) also more or less the trend is similar.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the table that the maximum number of villages, i.e., 187 (25.6%) in the district fall in the population range of 1-499 followed by 174 villages (23.8%) having a population range of 1000-1999. The lowest number of villages is observed in the population range of 10000+ being only 2 (0.3%).

The proportion of villages having different amenities varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities have a population range 5000-9999 and 10,000+ which further collaborates the fact that more facilities are generally available in larger villages than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Terhagachh	77	19,080	67.2	44.1
2	Dighalbank	81	25,526	69.7	36.8
3	Thakurganj	118	37,670	76.7	14.5
4	Pothia	142	34,989	66.8	19.9
5	Bahadurganj	103	24,416	77.5	23.4
6	Kochadhamin	142	28,443	74.7	38.9
7	Kishanganj	67	14,929	66.4	35.7
	District Total	**730**	**185,053**	**71.9**	**28.0**

Note : Cultivable area = irrigated area + unirrigated area

The table 42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various CD Blocks.

It would be seen from the table that 71.9 percent of the total area of the district is utilized for cultivation (cultivable area) and of this only 28 percent area is found to be irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Bahadurganj CD Block with 77.5 percent closely followed by Thakurganj and Kochadhamin CD Blocks with 76.8 and 74.7 percent respectively. The lowest percentage of cultivable area is found in Kishanganj CD Block with 66.4 percent.

The highest proportion of irrigated area (44.1%) to total cultivable area is found in Terhagachh CD Block followed by Kochadhamin and Dighalbank CD Blocks with 38.9 and 36.8 percentage respectively. The least proportion of irrigated area is found in Thakurganj CD Block with 14.5 percent which indicates that the villages in this block are deprived or required irrigational facilities.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Bahadurganj (NA)	0.7	0.4	0.2	0.7	0.7	0.0	0.0	0.0	0.0
2	.II Kishanganj (M)	6.0	2.8	3.2	3.4	2.8	0.0	0.4	0.0	0.2
3	IV Thakurganj (NA)	0.5	0.0	0.4	0.5	0.4	0.0	0.0	0.0	0.0
	District Total	**4.2**	**1.9**	**2.3**	**2.4**	**2.1**	**0.0**	**0.2**	**0.0**	**0.1**

The above table gives the details of finances in the statutory town in terms of per capita receipt and expenditure. There are three statutory town in the district i.e., Bahadurganj (NA), Kishanganj (M)and Thakurganj(NA). On going into the details of receipt through taxes Kishanganj (M) with Rs. 6.0 which is highest and lowest in Thakurganj (NA) with Rs. 0.5.

In district total per capita expenditure is Rs. 2.4. In towns of the district it is highest (i.e. Rs. 3.4) in Kishanganj (M) and lowest is Rs. 0.5 in Thakurganj (NA).

In general Administration maximum expenditure is in Kishanganj (M) with 2.8% and the minimum expenditure Thakurganj (NA) with 0.4%. There is no expenditure in public health and conveniences . In public works expenditure occured only Kishanganj (M) is Rs. 0.4. There are no Public work expenditure in Bahadurganj (NA) and Thakurganj (NA). In Public institutuion per capita expenditure is nil . Only Kishanganj (M) has public expenditure Rs. 0.2.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bahadurganj (NA)	4.6	0.7	0.7	0.0	0.7
2	Kishanganj (M)	2.6	1.2	0.4	0.1	0.1
3	Thakurganj (NA)	2.0	1.3	1.3	0.0	0.7
	District Total	**2.9**	**1.1**	**0.5**	**0.1**	**0.3**

The above table gives the details of different categories of educational institutions , per ten thousand population in the town of Kishanganj district.

It would be seen from the above table that institutions like Secondary/Matriculation level school and college are situated in Kishanganj district. There are three statutory towns in the district. Among these towns , Bahadurganj (NA) accounting for an average 0.7 institution per ten thousand population , in respect of Junior Secondary/ Middle, secondary/Matriculation and college, respectively.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bahadurganj(NA)	2
2	Kishanganj(M)	11
3	Thakurganj(NA)	4
	Distrct Total	**9**

The above table furnishes information regarding availability of beds in medical institutions in Kishanganj district.There are three statutory towns in the district of Kishanganj.In Kishanganj (M) the number of beds in medical institutions per ten thousand population are 11. In Thakurganj (NA) the number of beds in medical institutions per ten thousand population are 4.The number of beds in medical institutions per ten thousand population for Bahadurganj (NA) works out to be 2. Only 9 number of beds of medical institutions per ten thousand population are available in the district.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
Slum Data is not available				

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bahadurganj (NA)	Jute	Paddy Jute Milk
2	Kishanganj (M)	Ply Board Aluminium Pot Paper	Jute Leather Ginga
3	Thakurganj (NA)	Biri	Paddy Jute Banana

Table-47 presents the most important commodities manufactured in the town and exported from Kishanganj district. There are three statutory towns in the district.It would be seen from the above table that jute is manufactured in Bahadurganj (NA) and exported three items like Paddy , Jute and Milk.In Kishanganj (M) three items are like Ply Board manufactured , Aluminium Pot and paper and exported also three item Jute , Leather , Ginga. In Thakurganj (NA) only one item Biri is manufactured and exported three item Paddy Jute and Banana.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It would be clear from the above table that there are as many as 249,017 households accounting for 97.8 percent of the total households of the district who are dwelling in owned houses. The proportion of households is the highest (75.1%) who occupy only single room and the proportion of households, who is occupying no exclusive room is 1.1%. The median number of rooms is 1 for the total households in the tenure status of owned category. There are 19,713 scheduled castes households accounting 7.7 percent of the total households who are dwelling in owned houses. The median number of rooms is 1. There are 10,988 scheduled tribes households accounting for only 4.3 percent of the total households who are dwelling in owned houses. The median number of rooms is 1. There are 3,853 households accounting for 1.5 percent of the total households of the district who are dwelling in rented houses. The proportion households is highest (54.4%) who occupy only single room and the proportion of household is lowest (2.0%) who occupy no exclusive room. The median number of rooms is 2.

There are 773 scheduled castes households accounting for 9.9 percent of the total households who are dewelling in rented houses. The median number of rooms is 1. There are 117 scheduled tribes households accounting for 1.5 percent of the total households who are dwelling in rented houses. The median number of rooms is 1.Similar trend can be observed in respect of households who are dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Terhagachh	4.5	39.8	55.7	4.5	39.8	55.7	0.0	0.0	0.0
2	Dighalbank	7.6	25.7	66.7	7.6	25.7	66.7	0.0	0.0	0.0
3	Thakurganj	10.3	38.1	51.6	8.5	38.3	53.2	37.0	34.9	27.8
4	Pothia	8.8	37.8	53.4	8.8	37.8	53.4	0.0	0.0	0.0
5	Bahadurganj	8.5	42.7	48.8	7.5	43.7	48.8	15.1	36.6	48.3

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table 50 shows that in total rural , households total 199,846 households (i.e. 86.2 percent) have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Kishanganj CD Block with (93.4%) and lowest is in Pothia CD Block with (69.5%).As regards electricity it is found that only (1.8%) of the rural households in the district have electricity.The highest proportion of household with electricity is in Thakurganj CD Block with (3.4%) whereas it is lowest in Terhagachh CD Block with (0.2%).

Only 1.5 percent of the total rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is in Kishanganj CD Block with 2.8% whereas it is lowest in Terhagachh CD Block with 0.7 %. Only 4.9 percent of the total rural have toilet facility in the district. The highest proportion of households having toilet facility is in Kochadhamin CD Block with (6.6%) and lowest is in Dighalbank CD Block with (2.9%).And 8.5 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Thakurganj CD Block with (12.1%) and lowest is in Dighalbank CD Block with (5.0%).

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 51 shows that 9.7 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Pothia CD Block with (18.7%) where as it is lowest in Dighalbank CD Block with (3.8%).85.4 percent of the rural households in the district use crop residue as fuel for cooking. Among the CD Blocks highest proportion of households using crop residue as fuel for cooking is 92.4% in Dighalbank CD Block where as it is lowest (78.5%) in Pothia CD Block.Only 2.1 percent of the rural household in the district use cowdung cake as fuel for cooking. Among the CD Blocks the proportion of households using cowdung cake as fuel for cooking is highest (3.4%) in Thakurganj CD Block where as it is lowest (1.3%) in Pothia CD Block.In the case of cooking gas (LPG) there are only 3949 households accounting for (1.6%) of the total households in the district using it for cooking. As regards Kerosene there are only 1245 households accounting for 0.5 percent of the total households in district using it for cooking. Similar trend can be observed in respect of other types of fuel.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

		Rural	18,702	879	2,976	672	82	7,459	179	43	10,359
		Urban	14,389	4,648	3,850	5,059	1,344	6,432	1,235	221	5,775
District Total:		**Total**	**254,491**	**18,337**	**48,436**	**13,841**	**2,694**	**99,221**	**4,244**	**932**	**138,453**
		Rural	**231,736**	**12,161**	**42,628**	**7,294**	**1,030**	**89,234**	**2,579**	**638**	**128,788**
		Urban	**22,755**	**6,176**	**5,808**	**6,547**	**1,664**	**9,987**	**1,665**	**294**	**9,665**

It would be seen from the above table that 12,161 households accounting for 5.2 percent of the rural households of the districts are availing of the banking services.The highest proportion of households can be observed in Bahadurganj C.D.Block (7.4) who are availing banking services and the lowest proportion of households in Dighabank C.D.Block (4.3 %).

There are as many as 42,628 households accounting for 18.4 percent of the rural households who are possesing radio,transistors.Among the C.D. Blocks, Terhagachh C.D. Block has the highest proportion of households (23.4) possing the radio,transistor and Dighabank has the lowest proportion of households with 14.5 %.

As regards television , there are 7,294 households accounting for 3.1 percent households of the rural households of the district who are possesing television.Amomg the C.D.Blocks Thakurganj has the highest proportion of households (3.7 %) possessing television and Kochadhamin has the lowest proportion of households with 2.5 percent.As regards telephone there are 1,030 households accounting for 0.4 percent of the rural households of the district who are availing telephone services.Among C.D.Blocks Thakurganj C.D.Block has the highest proportion of households (0.6 %) availing telephone services and Dighabank has the lowest proportion of households with 0.2 percent.

Similar trend can be observed in respect of other specified assets also both in the district as also in its development blocks.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

No major social and cultural events has taken place in the district during the decade. However, the district has been famous for fairs and melas held at different places throughout the year. There is a brief lull during the two months of rainy season.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Andhasur

The village lies about 13 kms. west of the block headquarters and Kochadhamin and is noted for its Shiva temple. A large fair, lasting for a month, is held annually on the occasion of Shivaratri.

Dighalbank

The village is the headquarters of the block bearing the same name and is situated on the northern border of the district with Nepal. It has a semal tree in the compound of the police station, believed by tradition to be the tree on which the pandava, prince Arjuna, had kept his Gandiva(bow).

Jiran Gachh

The village lies in Thakurganj block and is situated on the Garga-Darjeeling Road, about 9 kms. from Thakurganj railway station. According to tradition, the pandavas are believed to have spent a part of the period of their excite in this village. To commemorate this, an annual fair is held in the month of Chaitra.

Tulshia

A big village, situated about 32 kms. north of Kishanganj town and 6 kms. from the block hedquarters at Dighalbank, is an important commercial centre in the locality. It has a temple of Shiva around which a fair is held annually on the occasion of Shivaratri.

Kishanganj

The town is the headquarters of the district of the same name is situated on the Ganga-Darjeeling Road and is rail head. It has three jute processing factories and is an important centre for export of jute.

Bishunpur

A large village situated at the distance of 10 kms. from the block headquarters of Kochadhamin, is noted for its market and believed to be one of the largest in Kishanganj district. It is settled annually by the Government, bringing a revenue of 40 to 50 thousand rupees. Jute forms the main item of trade.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The district is mainly agrarian in nature. It is a jute and paddy growing area having potential of becoming important industrial belt based on these two raw materials. The district of Kishanganj has more or less the same characteristics as the district of Purnia since it was a part of the district in the form of a sub-division till it was bifurcated and upgraded as a full fledged district.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a

basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities

have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other

groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability

of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area

not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

				Primary School	Middle School	Matriculation / Secondary School	Higher Secondary / PUC / Intermediate / Junior college
1	2	3	4	5	6	7	8
N.A.							

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	S H Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT (I TO VII)

There is no outgrowth in any of the towns of Kishanganj District				

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

State/District	Year	Persons			
		q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Kishanganj	1991	113	120	126	136
	1981	117	147	151	162

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in Annexure II as q(1),q(2),q(3) and q(5), it is observed that there is decline trend in child mortality over decade (in 1991 census as compared to 1981 census) both in the district as well as in the state.

An interesting feature which can be noticed from the annexure is that the child mortality at the ages 1,2,3 and 5 was higher in the district compared to the state average at the time of 1981 and 1991 Censuses. It indicates that the pace of decline in child mortality is slower in the district as well as in the state.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the districts and the state(1991-Census)	
	State	**District**
1	2	3
CBR	36.2	38
TFR	5.3	5.6
TMFR	5.9	6.9
GFR	163	172
GMFR	186	221
Child woman ratio	66.6	67.7
No. of children ever born per woman age group(45-49)	4.1	4.7
Mean age at marriage	16.5	17.6

Some other fertility measures for Kishanganj district and the state are furnished in above annexure III. It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are higher in Kishanganj district as compared to the state average in 1991 Census. The child woman ratio is found to be higher in Kishanganj district compared to the state average. Number of children ever born per woman in age-group 45-49 in Kishanganj district is higher as compared to the state. The mean age at marriage of females is also higher in the district as compared to the state average.

	Born in other states			Born in other countries			Total migrants		
State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(.9)	(1.1)	(100.0)	(100.0)	(100.0)
Kishanganj	28,995	8,978	20,017	4,994	1,304	3,690	228,053	35,697	192,356
	(12.7)	(25.2)	(10.4)	(2.2)	(3.7)	(1.9)	(100.0)	(100.0)	(100.0)

Migrants by place of birth are 213.07 lakh and 199.89 lakh in Bihar state as a whole during 1991 and 2001 Census, respectively. The migrants constitute 24.7 and 24.1 percent of the total population in the state according to 1991 and 2001 Census, respectively. The proportion of male migrants is approximately 5 pecent during both censuses whereas proportion of female migrants is approximately 46 and 41 percent in 1991 and 2001 Census, respectively. In Kishanganj district, the total number of migrants by place of birth is 2.08 lakh and 2.28 lakh during 1991 and 2001 Census, respectively. The migrants in Kishanganj district comprise 21.2 and 17.6 percent of the total population of the district during 1991 and 2001 Census, respectively. Male and female migrants account for 4.8 and 38.7 percent, respectively of the total population while the proportion of Male and Female migrants to its total population is 5.3 and 30.7 percent respectively in 2001 Census.

From the distribution of total migrants in Bihar by place of birth it can be clearly seen that females predominate in Intra district migration while males

predominate in inter district, inter state and international migration during both the censuses. Almost similar trend is noticed in Kishanganj district. This probably indicates that migration of females from their place of birth is generally attributed to the prevailing custom of the girls moving away on marriage from their place of birth and majority of cases this movement is within the same district i.e. the district of enumeration. Migrants born in other states of India as also those born outside India have lower proportion of females vis-à-vis males.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Kishanganj		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	181,316	161,222	20,094

	Rural	19,010,120	16,570,646	2,439,474	176,586	160,042	16,544
		(94.7)	(82.6)	(12.2)	(97.4)	(88.3)	(9.1)
	Urban	990,737	375,267	615,470	4,590	1040	3,550
		(4.9)	(1.9)	(3.1)	(2.5)	(0.6)	(2.0)
(2) In other states of India	Total	1,049,969	575,484	474,485	22,019	16,117	5,902
		(100.0)	(54.8)	(45.2)	(100.0)	(73.2)	(26.8)
	Rural	800,601	512,444	288,157	19,307	15,477	3,830
		(76.2)	(48.8)	(27.4)	(87.7)	(70.3)	(17.4)
	Urban	243,448	60,040	183,408	2,672	610	2,062
		(23.2)	(5.7)	(17.5)	(12.1)	(2.8)	(9.4)

Of the total intrastate migrants in the state, 82.6 percent were rural to rural, 3.1 percent were from urban to urban, 12.2 percent were from rural to urban and 1.9 percent were from urban to rural. In case of Kishanganj district, of the total intra-state migrants, 88.3 percent were from rural to rural, 2.0 percent were from urban to urban, 9.1 percent were from rural to urban and 0.6 percent were from urban to rural.

In case of migrants from other states, 48.8 percent were from rural to rural, 17.5 percent were from urban to urban, 27.4 percent were from rural to urban and only 5.7 percent were from urban to rural for the state of Bihar. In case of Kishanganj district, on the other hand, of the total migrants, 88.3 percent were from rural to rural, 2.0 percent from urban to urban, 9.1 percent were from rural to urban and only 0.6 percent were from urban to rural.

The number of migrants in the state who were born in other states of India according to 1991 census was 10.5 lakh, while in the district of Kishanganj the corresponding figure was 22,019 (twenty two thousand and nineteen) as shall be evident from Annexure IV(C) below:

ANNEXURE - IV (C)

INTERSTATE MIGRANTS, 1991 CENSUS

Bihar			Kishanganj		
Place of Birth	Migrants	Percentage to total Migrants	Place of Birth	Migrants	Percentage to total Migrants
1	2	3	1	2	3
Andhra Pradesh	20,240	1.9	Andhra Pradesh	40	0.2

Chhatisgargh	90,469	5.7	Total for five states	28,013	96.6
Gujarat	65,996	4.2	Other states	982	3.4
Uttranchal	63,527	4.0	**Total**	**28,995**	**100.0**
Jammu & Kashmir	43,737	2.8			
Orissa	42,215	2.7			
Maharashtra	38,244	2.4			
Rajasthan	20,542	1.3			
Haryana	20,505	1.3			
Andhra Pradesh	18,371	1.2			
Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

It transpires from the above annexure that during 1991 Census in case of Bihar 9 States, namely, Andhra Pradesh, Assam, Haryana, Madhya Pradesh, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal together constitute for 9.80 lakh (93.4%) of the 10.5 lakh interstate migrants, West Bengal and Uttar Pradesh states are prominent state which contribute 39.9 and 30.7 percent of migrants respectively. In respect of Kishanganj district, of the total 22,019 interstate migrants, West Bengal and Uttar Pradesh states contribute 87.6 and 4.1 percentages respectively.

Again it can be seen that during 2001 Census in Bihar fourteen states together account for 15.38 lakhs of the 15.82 lakhs interstate migrants, Uttar Pradesh and Jharkhand are major contributors among them.

In respect of Kishanganj district, we can see that out of 28,995 interstate migrants during 2001 Census, 96.6 percent come from five states, namely, West Bengal, Jharkhand, Uttar Pradesh, Rajsthan and Assam.

It may be observed from Annexure V(A) and V(B) that Hindus have highest population proportion 82.4 and 83.2 percent in 1991 and 2001 Census and 33.8 and 31.9 percent of the population of Kishanganj district during 1991 and 2001 Census respectively. The percentage of Hindus in the district is much lower than the state average. The Muslims came next with 14.8 and 16.5 percent of the state's population during 1991 and 2001 Census respectively. The Muslims hold first position in the district with 65.9 and 67.6 percent of the district's population during 1991 and 2001 Census, respectively, which is much higher than the state average. The proportion of Christians, Sikhs, Jains and Buddhists population in the state is very low (only 1.1 percent). In Kishanganj district, the proportion of Christians, Sikhs, Jains and Buddhists population is almost negligible (only 0.3 percent). The same trend prevails in most of the community development blocks of the district.

It is quite apparent from annexures for both the Censuses that Kishanganj district as well as the state have a relatively higher proportions of 'never married' males and 'married' females. This may be attributed due to the fact that women get married at younger ages than males in 1991 and 56.3 and 62.0 percent in 2001 Census. As against 54.2 and 60.3 percentages of 'never married' males in Bihar state and Kishanganj district respectively, the corresponding proportions among females are 45.2 and 52.0 in 1991 and 47.3 and 53.8 percents in 2001. There are considerable differences in situation in Kishanganj district as compared to Bihar state as a whole in both the Censuses. While the state has slightly higher proportion of male widowed, Kishanganj district, on the other hand, has slightly higher proportion of female widowed.

While analyzing marital status by broad age-groups one finds that married females out number married males in the age-group 10-14 suggesting that child marriage among females is more prevalent than males. However, the interesting feature which can be noticed is that the proportions of married males and females in the age-group 10-14 are comparatively less in Kishanganj district than the state in both the Censuses.

It is also significant that the proportion of 'never married' females in the age-group 15-19 and above have been much lower than the 'never married' males in Kishanganj district as well as in the state as a whole during both the Censuses. The proportions of 'divorced or separated' males and females have been significantly low in Kishanganj district as also in Bihar state during both the Censuses.

One of the important characteristics of the population on which information is collected in the census is literacy. Apart from collecting data on number of literate, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the census has already been explained in the beginning of this publication.

A proper index to the extent of literacy is provided by the proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 and 2001 Census were 38.5 and 47.0 respectively. Male Literates greatly outnumbered female literates as the literacy rate for males, according to 1991and 2001 Census were 52.5 and

59.7 respectively while for females the literacy rate were only to the extent of 22.9 and 31.1 percent respectively.

The overall literacy rate for Kishanganj district according to 1991 and 2001 Ccensus, were 22.2 and 31.1 percent respectively which is less than the state average. Male literates in the district accounted for 33.1 percent in 1991 and 42.7 percent in 2001 while female literates in the district constitute only 10.4 percent in 1991 and 18.6 percent in 2001 of the total population. The literacy rates for males and females in Kishanganj district are much lower than the corresponding figures of Bihar state.

A break-up of literate population by various educational level shows that 20.9 percent males and 27.2 percent females in the state are such who are literate but without attaining any educational level. 21.6 percent and 26.2 percent males and females in the state, according to 1991 census, have crossed the primary or junior basic standard, 26.3 and 26.9 percent males and females have passed the middle examination while 31.7 and 19.7 percent males and females in the state are such who are matriculates and above. Almost similar trend prevail during 2001 Census also.

The position of literates by different level of education in Kishanganj district, according to 1991 and 2001 Census, are more or less the same as observed for Bihar state as a whole.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Kishanganj		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Urdu	613,877	47.4

Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	8,683	0.7
Total Population	**82,998,509**	**100.0**	**Total Population**	**1,296,348**	**100.0**

The Census of India has the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above, provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Kishanganj district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returning by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population whereas in the district of Kishanganj a whooping 47.4 percent of the district population have returned it as their mother tongue and it possess first position in the district. Surjapuri

as mother tongue has been returned by 27.8 percent of Kishanganj district's population. Hindi has got third position with 13.8 percent of the district population having returned it as their mother tongue. Bengali and Santali have been returned by only 3.2 percent each of the district population except these languages analysed above both for the state and the district, other have been returned by insignificant proportions of the respective population of the state and the district as mother tongues as per Census 2001.
