Gulabbag Mela

Well known for GALLA GANIKA (Grains & Dancers) Gulabbagh Mela (fair) is held every year in the month of December near Purnia town. There are two legends about Gulabbagh. According to one legend there was one well known PIR (saint) in the area named Gulab Sahab on whose name the Mela started in olden age. The other legend is that there was one Raja P.C. Lal who was in love with a beautiful dancing girl Gulabo on whose name the place was named Gulabbagh and later on Gulabbagh Mela started here.

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 & 2001 Censuses 770

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 & 2001 Censuses 773

Annexure VI : Marital status of population as per 1991 & 2001 Censuses 779

Annexure VII : Age, Sex and Education in the district, 1991 & 2001 Censuses 789

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 796

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

Deputy Director of Census Operations,
Bihar, Patna

District Highlights – 2001 Census

1. Purnia ranks 13th in terms of population (25,43,942) and 8th in terms of area (3,229 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Purnia is the 23rd densely populated district in the state with 788 persons per sq.km as against the state's 881.
3. Purnia ranks 19th in terms of sex-ratio (915) against the state's 919.
4. There are 178 uninhabited villages (out of 1281 total villages) in the district of Purnia.
5. Dhamdaha (under Dhamdaha C.D. Block) is the most populated village (30,997) and Tharha Milik (under Purnia East C.D. Block) is the least populated village (6) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 85% of the total workers are engaged in Primary sector.
7. C.D. Block Amour has the highest number of villages (162) in the district and C.D. Block Srinagar has the lowest number of villages (26).
8. Dhamdaha (under Dhamdaha C.D. Block) has the largest area (4,004 hectares) and Suraini Milik (under Bhawanipur C.D. Block) has the smallest area (2 hectares) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 97.1 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census

for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) mortality (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The district of Purnia which included the areas

of Katihar, Araria, Kishanganj and Malda was constituted in the year 1813. The area of the then district in 1877 as reported in the Survey and Settlement Report of 1908 was 4994 sq. miles. The present area of the district is 3229 sq. kms only because of the fact that Katihar, Kishanganj and Araria have been upgraded as independent districts.

Early History

As regards the earlier part of the history of the district, the 1961 District Census Handbook mention that Purnia apparently formed a part of the Kingdom of Anga and covered the area west of the Mahananda. The area to the east of the river was under the control of the Pundras. Anga remained an independent kingdom till the 6th century B.C. when it was annexed by the Magadh Emperor, Bimbisar. The subsequent history of the western part of Purnia is, therefore, linked with that of the great Magadh Empire. Even the area east of the Mahananda was ,brought under the Mauryan Empire under Ashoka.

The district later formed part of the empire of the Imperial Guptas which in 340 A.D., under Samudra Gupta, extended right up to Assam. Following the overthrow of the Guptas by the Huns, Purnia passed under Paladitya, the king of Magadh. Hiuen Tsang, who visited Paundravardhan (eastern Purnia) in Circa 640 A.D., found prosperous people and the countryside having numerous tanks and groves and abundant crops. At the beginning of the 7th century the district seems to have come under Sasank, the king of Gaur, who was a Shaivite and did his utmost to destroy Buddhism. He was followed by Harsha, the great Buddhist. From the 9th to the 12th centuries the district was under the Pala and the Sena kings of the Bengal.

Muslim Period

The conquest of Bihar town, then capital of Bihar, by Bankhtiyar Khilji towards the close of the 12th century saw the commencement of Muslim rule in the State. His successor Ghyasuddin Iwaz extended the limits of the territory to include virtually the whole of Bihar. Purnia also must have come under Muslim rule in the beginning of the 13th century. However, since it formed an outlying part of the territory and revenues from it were not easily collected, the control remained rather loose. In fact some of the northern portions of the district continued to be under the sway of the hill tribes of Nepal. Thus very little is known of the history of the district till the 17th century.

Purnia was administered by the Mughals through Governors of faujdars who also combined the revenue powers of amildars. Ostwal Khan was the first such Governor, followed by three others. He maintained very good relations with Murshid Kuli Khan, the Nawab of Bengal and managed to bring to book the refractory local chiefs, including Durjan Singh of Birnagar. Saif Khan also recovered large areas of territory on the northern border of the district and had then cleared the forests. He rendered his full support to Ali Vardi Khan who became the new Nawab of Bengal. Saif Khan died in 1750 and was succeeded by his son Fakhruddin Hussain Khan. The latter proved a poor administrator and squandered much of the wealth accumulated by his father. Nawab Ali Vardi Khan accordingly has him replaced by his own nephew and son-in-law, Saiyed Ahmad Khan, before whose military strength Fakhruddin Hussain Khan prudently surrendered.

Saiyed Khan proved an efficient administrator and was held in great esteem on account of his noble living and admired for his just and fair dealings with all and sundry. He died in 1756, a few months before the death of Nawab Ali Vardi Khan against whom he had started an in fructuous intrigue. Shaukat Jang succeeded his father as Governor, and was given the whole of Purnia as a revenue free jagair by the Nawab. Ali Vardi Khan was succeeded by Siraj-ud-daula who was apprehensive of the designs, his cousin, Shaukat Jang might have had on the Diwani. So he marched towards Purnia, reaching Rajmahal in 1756. But his troops could not be persuaded to proceed further. Meanwhile Shaukat Jang refused to take up arms and accepted Siraj-ud-daula's suzerainty. Soon afterwards, he was instigated by Mir Jafar Khan, the Bakshi at Murshidabad, to try his hand at obtaining the Diwani. At the same time the Grand Vizier issued a firman appointing Shaukat Jang as the Viceroy of Bengal. When Siraj-ud-daula sent a messenger informing him of the grant of certain Jagirs to a Hindu chief, Shaukat retorted that Siraj-ud-daula should quit the Viceroyalty of Bengal in his favour. This naturally infuriated Siraj-ud-daula. He marched against Shaukat Jang with a division under his own command up to

the right bank of the Ganga and sent another division under his Diwan, Raja Mohan Lal, along the left bank of the river. Meanwhile Raja Ram Narain, the Governor of Bihar had also been ordered to march on to Purnia from Patna. Shaukat Jang entrenched himself in a strong position at Baldiabari (between Manihari and Nawabganj) but the lack of any clear-cut strategy resulted in his meeting utter defeat, he himself having been slain in the battle (1756).

On Siraj-ud-daula's death (July, 1757) Nazir Ali Khan, took possession of the town, imprisoned Mohan Lal and seized the treasury with the support of Achint Singh, holder of four parganas, who was made the Prime Minister.

Mir Jafar Khan was now the Nawab of Bengal. He sent Khadim Hussain Khan who took over control and became the Governor of Purnia.

British Period

Purnia passed into the hands of British in 1770 when Mohammad Ali Khan was the Governor of Purnia. He was replaced by Ducarrel, the first English Supervisor or Collector of the district. The year was marked by a severe famine in which, according to the European Supervisors, almost half of the ryots lost their lives. In 1872 the district was transferred from the control of the Bihar and Banaras Board of Commissioners to the Calcutta Board of Revenue. With the creation of Commissioner's Divisions in 1829. Purnia was included in Bhagalpur Division. In 1834 it was placed under Rajshahi Division under which it continued until 1893 when in came back to Bhagalpur. It again went to Rajshahi in 1905 and later came back to Bhagalpur under which it has continued ever since.

The early years of the British rule were largely directed at establishing law and order and setting up of the revenue administration on a sound footing. Raids and depredations in border villages by Nepali Sardar took place in 1788 and again in 1793 in spite of a commercial treaty signed with Nepal in 1792. A delegation was sent under Abdul Quadir Khan in 1795 to secure a lasting demarcation of the boundary with Nepal to prevent further border raids, but it did not meet with appreciable success.

The next important event in the district is the movement of 1857. The 73rd Regiment of the Native Infantry and a detachment of the 11th Irregular Cavalry were then stationed at Jalpaiguri, just across the eastern border of Purnia district. Although the administration did not expect any trouble at Jalpaiguri, nevertheless, a corps of Nepalese, was allowed to be raised by Kerr, an indigo planter of the district, in October, 1857. Two detachments of the 11th Irregular Cavalry at Jalpaiguri rebelled on 4th December and Yule, the Commissioner of Bhagalpur learnt on the 9th that they had passed south of Kishanganj. In the engagement that followed on the 11th December, the rebels retired after fighting bravely and with small casualties and injuries. Yule later unsuccessfully tried to intercept the insurrectionists from Dacca from entering the forests of Nepal. No further fighting took place in Purnia.

The movement of 1857 led to measures for tightening up the administrative system. The European planters were authorized to maintain their own protective forces from which sprang the Auxiliary Force which was ultimately converted into the Bihar Light Horse. An earthquake occurred in 1897. In the same year a scheme for taming the turbulent Kosi was mooted by engineers, though it was actually taken up only after the country attained independence.

The district of Purnia has also played its part in the agrarian reforms and the Congress movement. Prominent lawyers of the district gave up their practice and joined the Non-co-operation Movement of 1921. Dr. Rajendra Prasad visited Purnia district in 1921 and Mahatma Gandhi in 1925. Over 700 persons were arrested in the district in connection with the Salt Satyagraha. The district, like other districts of the State, has thus played an important role in the country's freedom struggle.

(iii) Administrative set up

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He often belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has only one subdivision which is headed by a subdivisional officer either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of

D.M. There are 14 C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration : The Judges and Munsif magistrates are posted at district and sub-division who administer and deliver justice of different kinds.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration : The Superintendent of Police, Purnia is the head of the district police administration who is either from the Indian Police Service or the Bihar Police Service. In the subdivisions of the district, the Deputy Superintendent of Police are posted who keep control on police administration.

(iv)Physical Features

Purnia district forms the north eastern part of Bihar State. It is situated between 25°:27' and 26°:8' North latitude and 86°:58' and 87°:54' East longitude. The district is bounded on north by the district of Araria and Kishanganj.It is flanked by the districts of Dinajpur and Malda of West Bengal in East and by the district of Madhepura in West. In its south lie the district of Katihar and a little portion of Bhagalpur.Purnia is the district head quarters as well as one of the major towns of the district.

It has four sub-divisions – (1) Purnia Sadar, (2) Banmankhi, (3) Dhamdaha and (4) Baisi and 14 Community Development Blocks.

There is one Municipality, namely Purnia (M) and two notified Area Committees, viz., Kasba (NA) and Banmankhi (NA) in this district. There is one Urban Agglomeration, viz., Purnia (UA) comprising Purnia (M) and Kasba (NA) as its urban components.

Natural divisions: - The district of Purnia is divided into four sub-micro regions, namely (1) Kosi Flood Plain,-west (2) Central Purnia Plain, (3) Parnam-kankai Plain and (4) Mahananda Flood Plain on the basis of physical factors like relief, drainage, soil, geology and natural vegetation.

(1) The first consists of the area to the west of the old bed of the Kosi river, comprising the area to the west of Purnia town, which covers almost the western portion of Purnia district. This division covers entire Barhara, Bhawanipur, Rupauli and Dhamdaha C.D. Blocks.Various rivulets and streams drain in the region from north to south. The geology relates to alluvium and the soils are of various hue. The climate and soil favour the cultivation of jute, which is the main cash crop of the area. Paddy, wheat barley, maize and khesari are the others crops.

(2) The second region lies between the rivers Parman and Lachha Dhar. It covers the entire area of krityanand Nagar, Purnia East, Kasba, and part of Baisi, Dhamdaha, Banmankhi and Amour C.D. Blocks. Many rivulets and streams drain in this area from north to south. The geology is related to alluvium and soils are of various hue hit for the cultivation of jute, paddy wheat, maize, barley, mustard and tobacco. Jute is the most important cash crop.

(3) The third region lies between the rivers Parman and Kankai. It covers some parts of Baisa, Amour and Bausi C.D. Blocks. The average height of the region is 50 m from the mean sea level. Some other rivulets and streams apart from the above noted rivers drain into this region from north to south. The geology relates to alluvinm and soils are of various hue fit for the cultivation of jute, paddy, wheat, maize, khesari, and barley.

(4) The fourth region is known as Mahananda Flood Plain which lies in the extreme eastern part of the district. River Mahananda flows from north to south bordering the eastern boundary of the region. The region covers Parts of Baisa, Amour and Bausi C.D. Blocks. The region is paling with moderately steep slop towards the south, the average height of the region is 64 meters above the mean sea level. It receives higher rain fall than the other regions of the district causing higher humidity in the climate. Mahananda is the main river of the region. Geology related to alluvium and soils are of different types with various hue. Humid climate is most appropriate for jute cultivation. Other crops include paddy, maize, wheat and barley. This division is constituted largely of the old beds of the Kosi and is laden with road. With the implementation of the Koshi Project, however, the area has come under the Canal Command area. The record natural division consists of the fertile plains to the east of the old bed of the Koshi-river and includes the alluvial plains along the Ganges towards the south of the district and the Mahananda in the

east. The third natural division is comprised of small hilly areas lying along the southern border of the district with Nepal.

The general slope of the plains forming Purnia district is from north to south, the course followed by the rivers and streams traversing it.

Geology and Minerals : The geological formation of the district consists almost entirely of alluvium and there are no minerals of any importance.

Soils and Land Use : The major part of Purnia district is covered by non-calcareous, non-saline soil of recent alluvium formation. The soil is of low to medium fertility.Paddy and Jute are most important Crops. Wheat, Barley, Maize and Khesari are also grown in Purnia. According to local classification, different soil of the district are as follows :-

Karari and Matiyar – Hard soil.

Doas and Masikari – medium hard soil.

Baluar – sandy soil.

Climatic Conditions

The district has a most humid climate; the winter season starts in November and lasts till February; January is the coldest month with the mean minimum temperature below 9 degree C. The summer season starts from March and lasts till mid June. The maximum temperature reaches up to 44 degree C. The rainy season sets in the second half of June and lasts till September. Purnia receives higher rainfall than any other district of the state, the average annual rainfall being 1851.6mm and 88% of the total annual rainfall is recorded during the monsoon period.

Flora and Fauna

In the past, large area of the district was covered under forest. The district had only 1,044 hectares of forest in 1981. Some teak, sal, sakhua, sheesham, palas, papal and semal trees are still found. Formerly the district was a paradise for sportsmen in search of wild game. Tiger, leopards, buffaloes, nilgai, and many kinds of deer used to be common. With the disappearance of forests, however, wild life has all but disappeared from the district.

Irrigational Facilities

Purnia is one of the districts which due to various factors in the past did without much of artificial irrigational facilities. The need of a systematic irrigation had not been felt before because ordinarily the rainfall was ample and the soil in most parts retained moisture, and the large number of rivers, rivulets and marshes assured facility of water. Still after independence, considerable attention has been paid to the provision of irrigation facilities in the district by means of flood control measures as well as irrigation channels, etc. The gigantic Kosi project has resulted in extension of irrigational facilities in the district. In addition to this, various irrigational facilities have been provided in the district through a number of medium and minor irrigational schemes, surface percolation wells, open borings with strainer, *rahat* pumps, low lift pumps and hand pumps.

Fisheries

Fishery Development Scheme has been undertaken by the Fisheries Department. Efforts are being made for the collection of spawn and the distribution of fry. The demand for fry is increasing and a number of nursery tanks are coping with the demand. Purnia district was once known for its piscine wealth and offers excellent opportunity for the proper development of fisheries.

Mines and Minerals

The geological formation of the district consists almost entirely of alluvium and there are no minerals of any importance in the district.

Industrialisation

The Indigo industry was in a flourishing condition in this district in the 18th and 19th centuries. But gradually the cultivation of Indigo went on declining and now it has completely disappeared. Another industry that has now completely died out from the district is the manufacture of *Bidri* ware (*bidri* was a metal compound and was prepared by members of the *Kansari* Community). Purnia in the past, had quite a number of Cottage industries. Some of these cottage industries like land pounding of rice have now given way to small-scale industrial units such as rice mills. One sugar factory in co-operative society now under the supervision of State Government is situated at Banmankhi. One private paper factory is also situated at Jalalgarh. There are several small and medium size rice and oil mills situated in the district. Though jute is the prominent crop of the district, no

jute mill is located here.

Livestock

Livestock is very important in a district like Purnia with a predominantly agricultural economy. Cattles are important article of stock but the one, which are generally available in the district, are not of superior breed and are generally small. The cattle are not well fed hence the average milk yield of cows and buffaloes is quite low. The expanse of cultivation had brought much of the pasture land under the plough. A good number of cattle migrate to the neighbouring Nepal Tarai for grazing during the summer months.

A particular class of people in the village and in the towns rear chicken. In order to improve the local breed Poultry Development Centre has devised various schemes. The district has veterinary hospitals and a number of dispensaries and veterinarians in the order to tackle animal disease which have shown a declining trend.

Communication

Roads : The district of Purnia is well served by a network of roads. The roads are classified as the National Highways, State Highways, Major district roads and village roads. They are maintained by the Public works Department, the Rural Engineering Organisation, the Zila parishad, Municipalities and Panchayats. The National Highway 31 passes through the eastern part of the district. There are several other pucca roads which are maintained by P. W. D. All C.D. Block headquarters are connected by pucca roads.

Railway : The district is served both by N.F. Railway and N.E. Railway.

N.F. Railway : Katihar–Purnia-Jogabani section falls in this district. This line enters Purnia district of Banipatra Railway station and terminates at Jalalgarh.

N.E. Railways : Purnia-Murliganj-Saharsa section which is a branch line passes through the district. The Banmankhi-Bihariganj Section is another branch line which terminates at Bihariganj in Saharsa district.

Airways :- The district has altogether two landing grounds, one is a defence landing ground and another is civil. The civil landing grounds are suitable for small aeroplane only. There is no air service available at present.

Trade and Commerce

The trade and commerce of the district have also been affected by its geophysical condition.The important trade centres of the district are located at Kasba, Purnia, Banmankhi. The chief commercial commodity of the district is jute, the main determining factor of the centre of trade. The wholesale mandies of jute are at Gulabbag. Most of the internal trade is carried on at the village hats, which are held on fixed days twice or thrice a week.

Electricity and Power

There is no electric power house located in this district. The gets electricity from Barauni Thermal Power Station.

Social Welfare Plans

A number of Social Welfare programmes, including welfare programmes for Scheduled Castes and Scheduled Tribes are underway in the district. The State-wise scheme was old – age pension has also been implemented in the district of Purnia. A number of schemes such as National Rural Employment Programme, Jawahar Rozgar Yojna etc. have been undertaken in the district.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of

construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used

for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i)A minimum population of 5,000;

ii)at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites :-

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).With these two basic criteria having been met, the following are the possible different situations

in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)

6. Chamar,Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom,Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is

taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the

precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewerage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at

periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid - year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid - year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid - year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid - year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid - year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid - year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

The population of the Purnia district during 1991 was 1,878,885. Hindus constitute over 65 per cent (1,226,935 persons) of the population in the district followed by Muslims 34.5 percent (648,820 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Purnia district during 1991 was 1,878,885. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Purnia district, Hindi, the main mother tongue of the district was returned by 65.5 percent (1,230,576 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Purnia district, was 28.5 percent (535,884 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Purnia during 1991 Census

The population of the Scheduled Caste in Purnia district during 1991 was 2,34,478. Numerically the five important SCs in the district were (i) Musahar (128,872) (ii) Dusadh / Dhari / Dharhi (41,983) (iii) Chamar / Mochi (26,102) (iv) Hari / Mehtar / Bhangi (12,835) and (v) Dhobi (7431). Their respective proportion to total SC population was 55.0%, 17.9%, 11.1%, 5.5% and 3.2%. It can be seen that Musahars

were numerically far ahead than the other four Scheduled Castes constituting more than half of the total Scheduled Castes in the district. Dusadh and Chamar are also quite in a good number in the district though they taken together constitute only 19.0 percent of the total SC population in the district. Mehtar and Dhobi are comparatively much less numerically as compared to Musahar, Dusadh and Chamar castes. Dom and Pasi are the other two Scheduled Castes in the district though small in proportion but are quite conspicuous. The other Scheduled Castes are quite insignificant so far their percentage to total SC population in the district is concerned.

The population of the Scheduled Tribes in the district of Purnia during 1991 Census was 82,145. Numerically five important STs were namely (i) Santal (ii) Oraon (iii) Munda (iv) Mal Paharia and (v) Kharwar. The population of Santal was 52,960 constituting 64.5 percent of the Scheduled Tribes population, Oraon with 19,079 population constituted 23.2 of the total ST population, Munda which had a population of 4,451 comprised 5.4 percent of the ST population, Munda with 1604 persons constituted 2.0 percent of the ST population while Kharwar having 896 persons during 1991 comprised only 1.1 percent of the total ST population in the district. As the population data of the STs reveal Santals are numerically the most dominant ST in the district as the other four STs are numerically far behind the Santals. Munda, Mal Paharia and Kharwar are comparatively much lesser in number as compared to Santal and Oraon STs. The presence of all other Scheduled Tribes (other than the 5 STs mentioned above) is almost very nominal in the district.

(vii) 2001 Census Findings–Population and its Distribution

The district of Purnia, with a population of 2,543,942 according to 2001 Census, is divided into 14 Community Development Blocks comprising 1281 villages and 3 towns. With 3.07 percent of the total population of the State comprised within the district, Purnia is a medium sized district and ranks 13th in the state in order of population. The population of males and females are 1,328,417 and 1,215,525 spread over 3.4 percent area of the State. Purnia East is the most populous while Srinagar is the least populated C.D. Block in the district.

Tables 1 to 52 presented below are based on Primary Census Abstract, Village Directory, Town Directory and Houses and Households Amenities data of 2001 Census which give insight into the colour and texture of inhabitants in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial		Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001

	District Total:	**1,878,885**	**1,720,743**	**158,142**	**2,543,942**	**2,321,544**	**222,398**	**35.4**	**34.9**	**40.6**	**8.4**	**8.7**

It can be seen from Table 1 that rise in the population of this district during 1991-2001 decade has been of the order of 35.4 percent. The rural population in the district has increased by 34.9 percent while the urban population growth over the decade has been to the extent of 40.6 percent. As we know, rural-urban migration is an important factor which always leads to rapid expansion of the urban unit. The district of Purnia also appears to have some impact in the growth of its population due to migratory movement towards urban sector of the district over the decade. Among the C.D. Blocks, Purnia East has shown the highest increase in population over the decade with 44.3 percent probably because of Purnia town, the headquarters of the district situated in this block. The next highest increase in population is observed in Dagarua C.D. Block with 38.0 percent closely followed by Baisa and Baisi C.D. Blocks with 37.8 and 37.3 percent respectively. Percentage decadal variation has been observed to be the least in the case of Banmankhi C.D. Block with 28.1 percent. So far the increase in rural population among various C.D. Blocks during 1991-2001 is concerned, it is noticed that Kasba block has registered the highest population growth with 41.5 percent while Banmankhi block is again with the least rural population growth with 29.1 percent. Among the 3 C.D. Blocks, which comprise urban units within them, Purnia East has experienced the maximum percentage decadal variation with 49.4 percent probably because of Purnia, the headquarters town of the district, located in this block. In the other 2 C.D. Blocks, viz., Banmankhi and Kasba, the population growth during the decade has been comparatively much lower (18.7% & 16.0 % respectively) than Purnia East block and the district urban average (40.6%).

The percentage of urban population in the district is only 8.7 during 2001 Census as against 8.4 percent at the time of 1991 Census showing very nominal increase in urbanization during the decade.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

12	Baisa	21 (17.6)	32,696	30,423	0 (0.0)	0	0	0 (0.0)	0	0
13	Baisi	28 (25.7)	42,110	39,458	4 (3.7)	11,439	10,786	0 (0.0)	0	0
14	Dagarua	26 (18.4)	39,724	36,733	2 (1.4)	6,002	5,586	0 (0.0)	0	0
	District (Rural)									
	Total:	**282 (25.6)**	**457,417**	**422,707**	**76 (6.9)**	**257,340**	**235,710**	**25 (2.3)**	**200,580**	**183,356**

It may be observed from the Table 2 that the maximum number of villages in the district lie in the population range of 2000-4999 accounting for 25.6 percent of the total inhabited villages, closely followed by villages in the population range of 1000-1999 accounting for 21.8 percent of the total inhabited villages. The percentages of population in the above two population ranges are 37.9 percent and 15.3 percent of the total rural population of the district respectively. The villages in the population range of 200-499 constitute 13.9 percent of the total inhabited villages and in these villages the percentage of population is only 2.2 percent. The proportion of villages lying in the population range of 5000-9999 and 10,000 & above taken together constitute only 9.2 percent of the total inhabited villages and comprise as much as 37.8 percent of the total rural population of the district meaning thereby that these villages are large sized villages as compared to others. There are 11.0 percent of the inhabited villages which lie in the population range of less than 200 constituting only 0.6 percent of the total rural population.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicale in respect of Purnia district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	2	0.2	3,873	0.2
11-20	1	0.1	10	0.0
21-50	11	1.0	1,012	0.0
51-100	24	2.2	3,358	0.1
101-200	39	3.5	8,010	0.3
201-300	56	5.1	19,408	0.8
301-500	144	13.1	172,431	7.4
501 +	826	74.9	2,113,442	91.0
Not known	0	0.0	0	0.0
District Total:	**1,103**	**100.0**	**2,321,544**	**100.0**
Population Density (Rural) of the district:		**758**		

The data presented in the above Table 4 highlights the fact that maximum proportion of villages in Purnia district lie in the density range (persons per square kilometer) of 501 and above with 74.9 percent of the total inhabited villages. This constitutes as much as 91.0 percent of the rural population of the district. This group of villages is followed by villages in the density range of 301-500 which accounts for 13.1 percent of the total inhabited villages and comprise 7.4 percent of the total rural population. The proportion of villages lying in the population density range of 201-300 (5.1%), 101-200 (3.5%) and 51-100 (2.2%) taken together comprise only 10.8 percent of the inhabited villages in the district and constitute only 1.2 percent of the total rural population. The proportion of villages, which lie in the population density range of 50 & less, constitute meager 1.3 percent of the inhabited villages. The population content in these groups of villages is almost negligible. The population density of the district (rural) is around 758 (persons per sq. km.).

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	962	971	694
1911	1,051	1,056	942	963	972	694
1921	1,020	1,027	886	941	946	749

Note: Sex ratio has been defined here as the number of females per 1000 males.

In Census, as we know, sex ratio is defined as number of females per 1000 males. If number of females is less than 1000, it is said that sex ratio is unfavourable for females.

It transpires from Table 5 that the sex ratio for the rural as well as the urban areas of Purnia district has comparatively been much less than the sex ratio of the rural and urban areas of the state right from 1901 Census to 2001 Census. It is further observed that the rural sex ratio has remained more favourable in the rural areas in all the Censuses. The sex ratio of Purnia district was quite high during 1901 and 1911 Censuses as found in the case of the State also. However, during post-independent era the sex ratio has shown a declining trend in the district as well as the State with small variations in some of the Censuses. During 2001 Census, however, the sex ratio has shown an upward trend in Purnia district as well as for the state as a whole with 915 and 919 females per 1000 males respectively, though it is still quite unfavourable for females.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Banmankhi	902	910	824
2	Barhara	913	913	
3	Bhawanipur	913	913	
4	Rupauli	908	908	

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001 (*Concld.*)

Serial number	Name of C. D. Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
5	Dhamdaha	928	928	
6	Krityanand Nagar	925	925	
7	Purnia East	880	910	850
8	Kasba	927	935	892
9	Srinagar	921	921	
10	Jalalgarh	931	931	
11	Amour	925	925	
12	Baisa	931	931	
13	Baisi	936	936	
14	Dagarua	925	925	
	District Total:	**915**	**921**	**851**

It may be seen from Table 6 that in Purnia district there are, on an average, 915 females for every 1000 males. Among the C.D. Blocks, Baisi has recorded the highest sex ratio at the time of 2001 Census (936). It is followed by Baisa and Jalalgarh blocks (931 each). On the other hand, Purnia East Block has registered the least sex ratio (880) in the district. In the rest C.D. Blocks the sex ratio varies between 928 (Dhamdaha block) and 902 (Banmankhi block). The C.D. Blocks of Banmankhi, Barhara, Bhawanipur, Rupauli and Purnia East have sex ratios lower than the state average of 915. It is further seen that the sex ratio in the C.D. Blocks of Banmankhi and Purnia East, which have urban components also, is comparatively much less than the C.D. Blocks which do not consist of any urban unit.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio
1	2	3
1	Banmankhi	910

10	Jalalgarh	931
11	Amour	925
12	Baisa	931
13	Baisi	936
14	Dagarua	925
	District (Rural) Total:	**921**

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001(*Concld*.)

It has already been noticed that in rural areas of Purnia district there are, on an average, 921 females for every 1,000 males. Within the district, the sex ratio varies from 935 in Kasba C.D. Block to 908 in Rupauli C.D. Block. This has already been discussed in Table 6. The C.D. Blocks of Dhamdaha, Krityananad Nagar, Kasba, Srinagar, Jalalgarh, Amour, Baisa, Baisi and Dagarua have sex ratio higher than the district rural average of 921.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	6	0.5	783	0.0
700-749	5	0.5	989	0.0
750-799	27	2.4	8,883	0.4
800-849	53	4.8	35,444	1.5
850-899	229	20.8	519,143	22.4
900-949	437	39.6	1,329,530	57.3
950-999	205	18.6	352,314	15.2
1000-1099	98	8.9	66,108	2.8
1100+	43	3.9	8,350	0.4
District Total:	**1,103**	**100.0**	**2,321,544**	**100.0**
Sex ratio (Rural) for District:		**921**		

It is noticed from the above table that the maximum proportion of villages in Purnia district lie in the sex ratio range of 900-949 and this accounts for 39.6 percent of the total inhabited villages in the district. It further reveals that the villages falling in this sex ratio range account for 57.3 percent of the district rural population. This is followed by villages falling in the sex ratio range of 850-899 constituting 20.8 percent of the total inhabited villages. This comprises 22.4 percent of the district rural population. The next highest proportion of villages fall in the sex ratio range of 950-999 accounting for 18.6 percent of the total inhabited villages constituting 15.2 percent of the district rural population. There are 98 such villages which lie in the sex ratio range of 1000-1099 accounting for 8.9 percent of the inhabited villages and 2.8 percent of the total rural population. There are only 43 villages (3.9 % of total inhabited villages) which fall in the maximum sex ratio range of 1100 & more constituting meager 0.4 percent of the total rural population. Thus, it can be seen that there are only 141 villages (12.8% of the inhabited villages) in the district which fall in the favourable sex ratio ranges of 1000-1099 and 1100 & above taken together (favourable for females), which however, constitute only 3.2 percent of the rural population of the district.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A/ Town+^	Urban status of town	Sex ratio
1	2	3	4
1	Banmankhi Bazar	NA	824
2	Purnia	UA	855
3	(a) Kasba	NA	892
4	(b) Purnia	M	850
Sex ratio (Urban) for the district:			**851**

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

It may be seen that there is one urban agglomeration, viz., Purnia (UA) and 3 towns (1 Municipality and 2 Notified Areas) in the district. Purnia (UA) has 2 urban components, viz., Purnia (M) and Kasba (NA). The sex ratio of Purnia (UA) works out to 855 only, which is quite adverse for females. Similarly, as apparent from Table 9, sex ratio in all the 3 towns is also unfavourable for females. Banmankhi Bazar (NA) has the least sex ratio of 824 as compared to the other two towns and also less than the district urban average (851).

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001 (*Concld.*)

Serial number	Name of C. D. Block	Total/ Rural/ Urban	Total population in 0-6 age group			Sex-ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
13	Baisi	Total	39,593	20,107	19,486	969
		Rural	39,593	20,107	19,486	969
		Urban	0	0	0	0
14	Dagarua	Total	38,607	19,623	18,984	967
		Rural	38,607	19,623	18,984	967
		Urban	0	0	0	0
	District Total:	**Total**	**549,690**	**279,449**	**270,241**	**967**
		Rural	**512,717**	**260,390**	**252,327**	**969**
		Urban	**36,973**	**19,059**	**17,914**	**940**

It is observed from Table 10 that sex ratio of population in the age group 0-6, which works out to 967, is much higher than the sex ratio of the total population (915) in the district of Purnia. While the sex ratio of (0-6) population in the rural areas of the district is 969, the sex ratio of (0-6) population for the urban areas is only 940. It may further be noticed that the sex ratio in the age group (0-6) varies between 981 in Kasba C.D. Block to 956 in Srinagar C.D. Block. The sex ratio of Purnia East Block, which contains Purnia town, the headquarters of the district, is 965, while in the other 2 blocks which have urban components within them, viz., Banmankhi and Kasba, the sex ratios are 957 (lower than Purnia East) and 981 (higher than Purnia East) respectively. The C.D. Blocks of Bhawanipur, Rupauli, Dhamdaha, Krityanand Nagar, Kasba, Jalalgarh, Baisa and Baisi (8 out of 12 blocks) have sex ratio of (0-6) population higher than the district average of 963. Dagarua C.D. Block has the sex ratio similar to the district average of 967.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C. D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6

2	Barhara	35,997	18,328	17,669	964
3	Bhawanipur	27,259	13,814	13,445	973
4	Rupauli	39,724	20,145	19,579	972
5	Dhamdaha	48,721	24,715	24,006	971
6	Krityanand Nagar	37,983	19,300	18,683	968
7	Purnia East	39,775	20,146	19,629	974
8	Kasba	28,358	14,251	14,107	990
9	Srinagar	18,332	9,371	8,961	956
10	Jalalgarh	19,458	9,829	9,629	980
11	Amour	50,274	25,690	24,584	957
12	Baisa	34,200	17,337	16,863	973
13	Baisi	39,593	20,107	19,486	969
14	Dagarua	38,607	19,623	18,984	967
	District (Rural) Total:	**512,717**	**260,390**	**252,327**	**969**

Table 11 deals with the sex ratio in the age group (0-6) among the rural population of the C.D. Blocks of the district. It is seen that the sex ratio of (0-6) rural population varies between 990 in Kasba Block to 956

in Srinagar Block. The C.D. Blocks of Banmankhi, Barhara, Krityanand Nagar and Amour have sex ratio in the age group (0-6) rural population lower than the district rural average of 969. The sex ratio of (0-6) rural population is found to be comparatively more favourable for females in all the C.D. Blocks of the district vis-à-vis the sex ratio of total rural population in the various C.D. Blocks of the district.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	51	4.6	3,111	0.6
700-749	20	1.8	2,903	0.6
750-799	30	2.7	5,524	1.1
800-849	83	7.5	19,478	3.8
850-899	110	10.0	49,497	9.7
900-949	162	14.7	114,962	22.4
950-999	191	17.3	151,994	29.6
1000-1099	254	23.0	130,397	25.4
1100+	202	18.3	34,851	6.8
District (Rural) Total	**1,103**	**100.0**	**512,717**	**100.0**
Sex ratio (Rural) for District:		**969**		

It is observed from Table-12 that 23.0 percent of inhabited villages in Purnia district lie in the sex ratio range of 1000-1099 for the population in the age group (0-6), which is the highest. This constitutes 25.4 percent of the district's rural population. This is followed by 18.3 percent of the inhabited villages lying in the sex ratio range of 1100 & more. This, however, comprises only 6.8 percent of the total rural population of the district. It is interesting to note that 17.3 percent and 14.7 percent of the total inhabited villages which respectively lie in the sex ratio range of 950-999 and 900-949 constitute as much as 29.6 and 22.4 percent of the total rural population. These group of villages appear to be large sized as compared to those villages whose sex ratio is more than 1000, so far the population in the age group (0-6) is concerned. It can further be noticed that 10.0 percent of the villages lie in the sex ratio range of 850-899 constituting almost equal percentage of district's rural population (9.7%). There are around 17 percent of the inhabited villages in the district where the sex ratio of (0-6) rural population is less than 850 accounting for approximately 6 percent of the rural population of the district.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION/TOWNS, 2001

District(Urban) Total			**36,973**	**19,059**	**17,914**	**940**

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

As already stated, there is 1 urban agglomeration and 3 towns in Purnia district. The sex ratio of population in the (0-6) age group of Purnia (UA) works out to 947. Among towns, the sex ratio of population (0-6) is observed to be the highest in Purnia (M), the district headquarters, with 952. The sex ratio of Banmankhi

Bazar (NA), on the other hand, is 887 which is much lower than the sex ratio of other two towns.

Census data provides important inputs about the Scheduled Castes and Scheduled Tribes for evolving suitable plans by planners and administrators for the welfare of these communities . Table 14 and a few other tables presented after this table give some basic data about Scheduled Castes and Scheduled Tribes

based on 2001 Census.

In 2001 Census, Purnia district returned 312,088 persons as Scheduled Castes and 111,947 persons as Scheduled Tribes. These accounted for 12.3 percent and 4.4 percent of the total population of the district respectively. It can further be seen from table above that the highest proportion of Scheduled Castes population is observed in Krityanand Nagar C.D. Block accounting for 19.4 percent of the Scheduled Caste population. This is followed by C.D. Blocks of Barhara (19.2%), Banmankhi (18.8%) and Jalalgarh (18.4%). The other C.D. Blocks, where the proportion of Scheduled Castes population is more than 15 percent of the total population are Srinagar (17.4%) and Dhamdaha (15.6%). Amour C.D. Block has the least proportion of Scheduled Castes population (2.7%). So far urban area is concerned, Purnia East C.D. Block, which consists of Purnia town, the headquarters of the district has 9.0 percent of the Scheduled Castes population of the total urban population of the Block. It further transpires from the table that the proportion of Scheduled Castes population is only 8.8 percent of the total urban population of the district.

As regards Scheduled Tribes population, the C.D. Block of Dhamdaha contains as much as 10.2 percent of the Scheduled Tribes population, which is the highest in the district. The other C.D. Blocks where the proportion of ST population is more than 5 percent of the total population are Barhara (8.3%), Krityanand Nagar & Purnia East (5.9% each), Banmankhi (5.8%) and Srinagar (5.4%). In the other C.D. Blocks, the proportion of ST population is less than the district average of 4.4 percent. In the C.D. Blocks of Amour, Baisa and Baisi, the proportion of ST population is almost negligible, being less than even 1.0 percent.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C. D. Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7

13	Baisi	169,184	10,250	906	6.1	0.5
14	Dagarua	172,223	16,116	5,586	9.4	3.2
	District (Rural) Total:	**2,321,544**	**292,461**	**103,493**	**12.6**	**4.5**

Table 15 deals with the population content of Scheduled Castes and Scheduled Tribes population in the rural areas of the C.D. Blocks in the district.

The table indicates that the percentage of the Scheduled Castes in Purnia district is of the order of 12.6 percent of the total rural population. The highest percentage of Scheduled Castes population is observed in Banmankhi C.D. Block with 19.7 percent of the total rural population closely followed by Krityanand Nagar and Barhara C.D. Blocks with 19.4 and 19.2 percent respectively. The other C.D. Blocks, where the proportion of SC rural population is more than the district rural average of 12.6 percent are Jalalgarh (18.4%), Srinagar (17.4%), Dhamdaha (18.6%) and Purnia East (13.8%). The least proportion of SC population is observed in the

case of Amour C.D.Block with 2.7 percent.

So far Scheduled Tribes population is concerned, it can be seen from the table above that Dhamdaha C.D.Block has the highest proportion of ST population (10.2%) followed by Barhara (8.3%), Purnia East (7.8%) and Banmanki (6.1%) C.D. Blocks. There are as many as 7 C.D.Blocks in the district, where the proportion of ST population is less than district rural average of 4.5 percent, the least among them being Baisi Block with only 0.5 percent of the total rural population

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	337	30.6	0	0.0
Less than 5	185	16.8	10,678	3.7
5-10	180	16.3	39,184	13.4
11-20	209	18.9	117,713	40.2
21-30	97	8.8	74,810	25.6
31-40	46	4.2	28,779	9.8
41-50	16	1.5	9,319	3.2
51-75	20	1.8	8,815	3.0
76 and above	13	1.2	3,163	1.1
District Total	**1,103**	**100.0**	**292,461**	**100.0**

Table 16 furnishes information regarding distribution of villages according to percentage range of Scheduled Cates population to total population.

It is apparent from the Table that there are 209 villages accounting for 18.9 percent of the inhabited villages in the district where the population of Scheduled Castes ranges between 11-20 per cent of the total population constituting 40.2 percent of the total SC population of the district. This is followed by 185 villages, comprising 16.8 percent of the inhabited villages where the population of Scheduled Castes is less than 5 percent of the total population accounting for only 3.7 percent of the total SC population in the district, which may presumably be on account of these being small sized villages. There are 180 villages accounting for 16.3 percent of the inhabited villages in the district where the Scheduled Castes population ranges between 5-10 percent of the total population accounting for as much as 13.4 percent of the total SC population of the district. It is further interesting to note that only 97 villages, comprising 8.8 percent of the inhabited villages, lie in the percentage range of 21-30 of the total population. This group of villages, however, constitute as much as 25.6 percent of the total SC population in the district, probably, which may be due to this group of villages being large sized ones. The number of villages having Scheduled Castes population content above 30 percent is quite low (8.7% of the inhabited villages) accounting for approximately 17 percent of the total SC population of the district. There are as many as 337 villages accounting for 30.6 percent of the inhabited villages where no Scheduled Castes exist.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	766	69.4	0	0.0
Less than 5	128	11.6	9,779	9.4
5-10	63	5.7	20,170	19.5
11-20	47	4.3	32,418	31.3

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001 (*Concld.*)

Percentage Range of Scheduled Tribes population to total population	Number of villages	Scheduled Tribes Percentage	Scheduled Tribes Population	Scheduled Tribes Percentage
1	2	3	4	5
21-30	27	2.4	17,374	16.8
31-40	19	1.7	9,748	9.4
41-50	10	0.9	5,741	5.5
51-75	16	1.5	3,604	3.5
76 and above	27	2.4	4,659	4.5
District Total	**1,103**	**100.0**	**103,493**	**100.0**

As regards the population of the Scheduled Tribes, it can be seen from Table-17 above that there are 337 villages in the district where members of the Scheduled Tribes exist. Of them, there are 128 such villages, accounting for 11.6 percent of inhabited villages in the district where the percentage of Scheduled Tribe population is less than 5 percent of the total population. This constitutes only 9.4 percent of the total ST population of the district. There are 63 villages (5.7 % of the inhabited villages) where the ST population is in the range of 5-10 percent of the total population constituting 19.5 percent of the total ST population. It is worth interesting to note that there are only 74 villages in the district (6.7%) which lie in the percentage range of 11-20 and 21-30 taken together and these group of villages contain as much as 48.1 percent of the total ST population in the district, probably the villages are large sized so far Scheduled Tribes population content is concerned. The proportion of villages and percentage of ST population content are relatively less in the percentage range of 31 and above. There are as much as 766 villages, comprising 69.4 percent of the total inhabited villages in the district where no ST population exist at all.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

As has already been stated earlier there is one urban agglomeration in Purnia district viz. Purnia (UA) and three statutory towns, namely Banmankhi Bazar (NA), Purnia (M) and Kasba (NA) The percentage of Scheduled Castes population to total urban population in these three towns taken together is to the extent of 8.8 percent while the Scheduled Tribes population content is only 3.8 percent. The proportion of SC population is highest in Banmankhi Bazar town, with 9.8 percent closely followed by Purnia (M) with 9.0 percent. The proportion of SC population in Kasba town (6.6%) is less than the district urban average. Scheduled Tribes are found to be much less in number in these three towns as compared to the Scheduled Castes population. In Purnia town the ST population content is to the extent 4.0 percent which is more than the urban average. In other two towns, the proportion

of ST population is less than the district urban average.

The proportion of SC & ST population in Purnia (UA) works out to 8.7 and 3.8 percent respectively according to 2001 Census

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Banmankhi	934	921
2	Barhara	945	937
3	Bhawanipur	899	974
4	Rupauli	925	987
5	Dhamdaha	942	967
6	Krityanand Nagar	945	950
7	Purnia East	936	940
8	Kasba	947	939
9	Srinagar	947	953
10	Jalalgarh	936	1,040
11	Amour	969	905
12	Baisa	948	961
13	Baisi	930	936
14	Dagarua	952	999
	District (Rural) Total	**939**	**950**

As has been observed, during various Censuses the number of males and females are rarely at parity, the males generally outnumbering the females. The sex ratio is an important demographic characteristics of the population.

From Table 19 above it can be seen that the sex ratio of Scheduled Castes and Scheduled Tribes population in the C.D. Blocks of Purnia district (rural) is not that adverse for females as observed for the sex ratio of total population as reflected from Table 6. The sex ratio among Scheduled Castes in the district rural is observed to be 939 as against 921 for the total rural population. Among the C.D. Blocks, the sex ratio of Scheduled Castes is 969 in Amour, which is the highest in the district while Bhawanipur block has recorded the least sex ratio during 2001 Census, being only 899 females per 1000 males (quite adverse for females). In the rest of the C.D. Blocks sex ratio varies between 952 (Dagarua block) and 925 (Rupauli block). The C.D. Blocks of Banmankhi, Bhawanipur, Rupauli, Purnia East, Jalalgarh and Baisi (6 out of 14 C.D. Blocks) have sex ratios lower than the district rural average of 939.

The sex ratio among Scheduled Tribes in the district rural is to the extent of 950, which is 11 points more than the sex ratio of Scheduled Castes in the district rural and comparatively much higher than the sex ratio of the total urban population of the district (851). Among the C.D. Blocks, Jalalgarh has the most favourable sex ratio for females, being 1040 for the Scheduled Tribes population in the district (rural). The C.D. Blocks of Dagarua (999), Rupauli (987), Bhawanipur (974), Dhamdaha (967), Baisa (961) and Srinagar (953) have registered sex ratios higher than the district rural average of 950 and are better placed than other C.D. Blocks in the district. It is worthwhile to note that the sex ratio of SC and ST in most of the C.D. Blocks are more favourable for females as compared to sex ratio of the total population.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town/+^	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Banmankhi Bazar (NA)	870	372
2	Purnia UA	876	887
3	(a) Kasba (NA)	917	878
4	(b) Purnia (M)	872	888
Sex ratio (Urban) for the district:		**876**	**817**

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

As already observed earlier, there is one urban agglomeration and 3 towns in Purnia district. It transpires from Table 20 that sex ratio of Scheduled Castes and Scheduled Tribes for the 3 towns of the district is quite unfavourable for females and comparatively much less than the sex ratio of rural population of the C.D. Blocks of Purnia district. It is also significant to note that the sex ratio of SC population is much less in Banmankhi Bazar and Purnia towns as compared to Kasba (NA) and less than the sex ratio of district urban average as well. The sex ratio of Scheduled Tribes population is also much lower in the towns of Purnia district. In Banmankhi Bazar town the sex ratio is abruptly low

(372) and most adverse for females as compared to other two towns where the sex ratio is higher than the district urban average.

The sex ratio among Scheduled Castes and Scheduled Tribes in Purnia (UA) works out to 876 and 887 respectively, quite unfavourable for females.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C.D.BLOCKS,2001

For the district as a whole, the literacy rate of males is much higher than that of females. The literacy rates of males is as high as 45.6 percent as against 23.4 percent for females, the difference of almost 22 percentage points. The C.D. Block wise literacy rate shows that the Purnia East block with 56.4 percent literates is at the top while Baisi block, with 20.2 percent, is at the bottom. The difference of literacy rate between the highest and the lowest literate blocks is to the extent of almost 36 percentage points. It is also observed, in general, that the C.D. Blocks having urban centers (Purnia East, Banmankhi and Kasba) have higher literacy rates than other C.D. Blocks (except in one or two cases) corroborating the fact that urban centers have better infrastructure as far as educational facilities are concerned. In the rest of the C.D. Blocks (except Barhara) of the district the literacy rates are found to be lower than the district average of 35.1 percent literates.

As regards rural areas of the district, the literacy rate is observed to be 31.4 percent, with male literacy rate being 42.2 percent and female literacy accounting for 19.6 percent. On the other hand, the literacy rate in the urban areas of the district is to the extent of 70.9 percent, the male and female literacy rates being 78.2 and 62.1 percent respectively. The gap in male and female literacy rates is observed to be less in urban areas (16.1 percentage points) vis-à-vis in rural areas (22.6 percentage points). Among the C.D Blocks, the literacy rate differential is found to be maximum in case of Banmanki C.D. Block (over 24 percentage points) while Purnia East C.D. Block has the minimum gap in male and female literacy rates (over 19 percentage points).

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Banmankhi	69,479	48,883	20,596	184,671	84,181	100,490	34.8	46.4	21.8	24.6

District (Rural) Total:		**568,611**	**399,619**	**168,992**	**1,752,933**	**808,673**	**944,260**	**31.4**	**42.2**	**19.6**	**22.5**

Table 22 deals with the literacy rates in the C.D. Blocks of Purnia district (rural population). It is discernable from the figures presented in the table that the literacy rate among rural population in the district is 31.4 percent, the male and female literacy rates being 42.2 and 19.6 percent respectively. Among the C.D. Blocks, the highest literacy rate is observed in Purnia East (38.2 %), while the lowest rate has been recorded in Baisi block (20.2%). The C.D. Blocks of Kasba, Srinagar, Amour Baisa, Baisi and Dagarua (6 out of 14 Blocks) have returned literacy rates among its rural population lower than the district rural average of 31.4 percent. The gap in male-female literacy rate is found to be maximum in case of Banmankhi block (over 24 percentage points) while Kasba block has the lowest gap in male-female literacy rate (over 20 percentage points). The gap in male – female literacy rate in various C.D. Blocks is observed to be between 20 to 25 percentage points, almost near to the district rural average of 22.5 percentage points. The table also furnishes data regarding number of illiterates in absolute number in the district rural population for the ready reference of the readers and data users.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	10	0.9	813	0.0
1-10	81	7.3	46,913	2.0
11-20	211	19.1	270,458	11.6
21-30	332	30.1	754,452	32.5
31-40	280	25.4	892,782	38.5
41-50	120	10.9	267,000	11.5
51-60	46	4.2	78,481	3.4
61-70	9	0.8	4,587	0.2
71-80	9	0.8	4,591	0.2
81-90	2	0.2	143	0.0
91-99	2	0.2	1,305	0.1
100	1	0.1	19	0.0
District Total:	**1103**	**100.0**	**2,321,544**	**100.0**
Literacy rate for District:		**35.1**		

The literacy data presented in Table 23 reveal that there are 332 villages, accounting for 30.1 percent of the total inhabited villages in the district, where the literacy rate ranges between 21-30 percent. These villages constitute 32.5 percent of the total rural population of the district. There are 280 villages,

comprising 25.4 percent of the inhabited villages where the literacy rate ranges between 31-40 and this constitutes as much as 38.5 percent of the total rural population, the highest in the district and this also happens to be the second largest group of villages. The above two group of villages is followed by 211 villages comprising 19.1 percent of the total inhabited villages where the literacy rate ranges between 11-20 percent and contain 11.6 percent of total rural population.These three group of villages taken together account for 74.6 percent of the total inhabitant villages and constitute as much as 82.6 percent of the total rural population in the district. The next in numeric order comprises 120 villages (10.9% of the total inhabited villages) where the literacy rate ranges between 41-50 percent. These villages constitute 11.5 percent of the total rural population. The number of villages having literacy rate above 60 percent is quite insignificant and the proportion of rural population content is almost negligible. There are 10 such villages in the district comprised of only 813 persons where none has been returned as literate.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status UA/ Town+^	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

The district of Purnia has one urban agglomeration and 3 towns as already stated. So far literacy status in towns of Purnia district is concerned, it can be seen from the data presented in the table above that Purnia town has the highest literacy rate (73.7%), probably being the headquarters town of the district and having more educational facilities. The literacy rate in other 2 towns is lower than the district urban average of 70.9 percent. In Purnia town the literacy rate among males and females (80.4 and 65.7%) is also comparatively higher than the male and female literacy rates in the other 2 towns. The male and female literacy rate differential in Purnia town is noticed to be of 14.6 percentage points which is lower than the gap in male-female literacy rates of Banmankhi Bazar and Kasba towns as also less than the district urban average of 16.1 percentage points.

The literacy rate of Purnia (UA) works out to 71.9 percent. While the male literacy rate is 78.9 percent, the female literacy rate accounts for 63.5 percent. The gap between male-female literacy rates is found to be around 15 percent in the said urban agglomeration.

Table 25 furnishes data regarding literates and illiterates among the rural population in various C.D. Blocks of the district. It can be noticed from the table that the literacy rate of Scheduled Castes population in the district (rural) is 16.6 percent, the literacy rate among males being 24.4 percent and that of females being only 8.2 percent. The literacy rate is observed to be highest in Amour C.D. Block, with 22.7 percent, while it is found to be the lowest in case of Srinagar block where literacy rate is only 11.8 percent, the difference between the two being approximately of 11 percentage points. The highest and the lowest literacy rate among males are also recorded in Amour (34.0%) and Srinagar (16.7%) blocks. So far female literacy rate is concerned, it transpires from the table that Kasba block is at the top with 11.9 percent literate females. Srinagar block retains the bottom position with the lowest female literacy rate (6.5%). The gap in male-female literacy rate is found to be maximum in case of Amour block (difference of 23.0 percentage points), while the literacy rate gap is the lowest in Srinagar block (10.2 percentage points), probably since both male and female literacy rates are on a lower side. The gap in male-female literacy rate in Banmankhi, Bhawanipur, Rupauli, Baisa, Baisi and Dagarua C.D. Blocks (6 out of 14 blocks) is found to be more than the district rural average of 16.2 percentage points.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	54	7.0	2,457	0.8
1-10	193	25.2	72,900	24.9
11-20	235	30.7	135,937	46.5
21-30	143	18.7	61,696	21.1

51-60	19	2.5	1,312	0.4
61-70	6	0.8	299	0.1
71-80	4	0.5	71	0.0
81-90	4	0.5	67	0.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**766**	**100.0**	**292,461**	**100.0**
Literacy rate for District (Rural):		**16.6**		

Table 26 shows that there are 235 villages comprising 30.7 percent of the total inhabited villages in the district where the literacy rate of the Scheduled Castes population ranges between 11-20 percent. This group of villages happens to be the largest group in the district in numeric order and constitutes 46.5 percent of the total rural Scheduled Castes population. This is followed by 193 villages (25.2% of the inhabited villages) where the literacy rate is in the range of 1-10 percent constituting 24.9 percent of the rural SC population. The third group of villages in numeric order comprises 143 villages (18.7% of the total inhabited villages) where the literacy rate ranges between 21-30 percent constituting 21.1 percent of the total rural SC population of the district. These three groups of villages constitute 74.6 percent of the inhabited villages in the district and constitute slightly over 92 percent of the total rural SC population of the district. The number of villages where the literacy rates of Scheduled Castes is in the literacy range of above 50 percent becomes quite insignificant and the proportion of rural SC population in these groups of villages is also almost negligible. 54 villages in the district are such where there is no literate SC population and these villages taken together comprise meager 0.8 percent of the total rural SC population in the district. As already seen in the earlier Table, the literacy rate among SC population in the rural areas of the district is to the extent of 16.6 percent only.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town+*	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Banmankhi Bazar (NA)	814	568	246	1,647	748	899	41.5	53.4	27.5	25.9
2	Kasba (NA)	388	262	126	1,303	620	683	29.0	37.1	20.0	17.1
3	Purnia (M)	5,908	3,937	1,971	9,567	4,329	5,238	48.2	59.4	35.1	24.3
	Purnia (Urban)	**7,110**	**4,767**	**2,343**	**12,517**	**5,697**	**6,820**	**45.7**	**56.8**	**32.8**	**24.0**

\+ To be arranged in alphabetical order

Table 27 furnishes data on literates and illiterates among the Scheduled Castes in the towns of the district. It transpires from the table that the literacy rate among the Scheduled Castes in the urban areas of the district is 45.7 percent, the literacy rate in the case of males being 56.8 percent while that for females it is comparatively low, being only 32.8 percent. Among the three towns of the district, Purnia (M) has the highest literacy rate, with 48.2 percent literate Scheduled Castes population. While the male literacy rate is as high as 59.4 percent, the female literacy rate is comparatively much lesser, being only 35.1 percent. The other two towns of the district, viz., Banmankhi Bazar (NA) and Kasba (NA) have literacy rates lower than the district urban average of 32.8 percent. The female literacy status in case of Kasba town is quite discouraging (20.0%) when compared to literacy rates of females in other two towns. In Banmankhi Bazar and Purnia towns the gap in literacy rates between males and females is around 25 percentage points, while the literacy rate differential in Kasba town is of the order of 17 percentage points, which may probably be attributed to the fact that both male and female literacy rates are on the lower side. It is observed, in general, that males and females both are better educated in urban areas than their counterparts in rural areas. The literacy rate of Scheduled Castes population in urban areas both in case of males and females are found to be comparatively much lower than the literacy rate of total population in urban areas of the district (males- 78.2%, females- 62.1% as reflected in Table 24).

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C. D. Block	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates

13	Baisi	132	103	29	774	365	409	18.7	28.4	8.4	19.9
14	Dagarua	498	403	95	5,088	2,391	2,697	11.3	18.1	4.3	13.8
	District (Rural) Total:	**18,668**	**14,506**	**4,162**	**84,825**	**38,555**	**46,270**	**22.9**	**34.6**	**10.5**	**24.1**

It can be noticed from the Table 28 above that the literacy rate of Scheduled Tribes population in the district (rural) is 22.9 percent, the literacy rate among males being 34.6 percent and the literacy rate of females being only 10.5 percent. The literacy rate is observed to be highest in Barhara C.D. Block (30.1%) while it is found to be lowest in case of Baisa block where literacy rate is only 4.7 percent, the difference between the two being slightly over 25 percentage points. The highest and the lowest literacy rate among males are also recorded in Barhara (45.3%) and Baisa (6.5%) blocks. So far female literacy rate is concerned, it transpires from the table that again Barhara and Baisa blocks retain the top and bottom positions with 13.7 and 2.8 percent literate females respectively. The gap in male-female literacy rate is found to be maximum in the case of Barhara block (difference of over 31 percentage points), while the literacy rate gap is the lowest in Baisa block (3.7 percentage points only). The nominal literacy rate differential between males and females is on account of very low literacy rate registered both for males and females in Baisa block. The gap in male-female literacy rates in Banmankhi, Barhara and Dhamdaha C.D. Blocks (3 out of 14 blocks) is found to be more than the district rural average of 24.1 percentage points.

Literacy rate for District (Rural):		**22.9**		

Table 29 furnishes information regarding distribution of villages by literacy rate range for the Scheduled Tribes population. The table shows that there are only 337 villages in the district which contain Scheduled Tribes population. 77 villages comprising 22.8 percent of such inhabited villages in the district have recorded literacy rate of the Scheduled Tribes population ranging between 1-10 percent. This group of villages happens to be the largest group in the district in number and constitutes only 15.3 percent of the total rural Scheduled Tribes population. This is very closely followed by 76 villages (22.6% of the inhabited villages comprising ST population) where the literacy rate is in the range of 11-20 percent constituting 25.6 percent of the rural Scheduled Tribes population. The third group of villages in numeric order comprises 71 villages (21.1% of the villages) where the literacy rate ranges between 21-30 percent constituting 29.7 percent of the total rural ST population, being highest in the district. There are 41 villages (12.2% of the inhabited villages) where the literacy rate ranges between 41-50 and this constitutes 24.2 percent of the rural ST population. These four groups of villages taken together constitute over 78 percent of the inhabited villages in the district containing ST population and constitute slightly over 94 percent of the total rural ST population of the district. The villages having literacy rate of ST population more than 40 percent are almost insignificant in number in so is the percentage rural ST population contained in these villages. 37 villages in the district are such, where there is no literate ST population. However, these villages taken together comprise only 1.5 percent of the total rural ST population in the district.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town+	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Banmankhi Bazar (NA)	491	457	34	379	177	202	65.5	80.2	18.9	61.3
2	Kasba (NA)	134	98	36	591	288	303	22.0	30.1	12.7	17.3
3	Purnia (M)	2402	1584	818	4457	2049	2408	42.3	52.2	31.0	21.2
	Purnia (Urban)	**3027**	**2139**	**888**	**5427**	**2514**	**2913**	**43.0**	**54.4**	**28.6**	**25.8**

\+ To be arranged in alphabetical order

It is discernable from Table 30 that the literacy rate among the Scheduled Tribes in the urban areas of the district is to the extent of 43.0 percent, the literacy rate in the case of males being 54.4 percent while that of females it is 28.6 percent. Among the three towns of the district, Banmankhi Bazar (NA) has the highest literacy rate of 65.5 percent. While the male literacy rate is 80.2 percent, the female literacy rate is quite discouraging, being 18.9 percent only. Purnia town comes next in order of literacy rate position having 42.3 percent literate population. Though male literacy rate in this town (52.2%) is less than Banmankhi Bazar town (80.2%), the female literacy rate of Purnia town (31.0%) is much higher than female literacy rate of Banmankhi Bazar town (18.9%). The town of Kasba has comparatively much lower literacy rate (22.0%) in comparison to the other two towns of the district. The literacy rate differential between males and females is observed to be the highest in case of Banmankhi Bazar (NA), being over 61 percentage points, much higher than the district urban average of 25.8 percentage points. The gap in male-female literacy rate in Kasba (NA) is comparatively lesser than the district urban average because both male and female literacy rate of Scheduled Tribes population in this town is on the lower side.

The literacy rate among Scheduled Tribes, both in case of males and females in urban areas of the district, is comparatively higher than the literacy rates among Scheduled Castes counterparts and the general population.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C.D.BLOCKS, 2001

The concept of economic activity and definition of work and workers as well as different classification of workers have already been explained in detail in earlier chapters of this volume. The work

participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers.

Total workers in the district of Purnia account for 37.8 percent of the total population whereas the proportion of non-workers is as high as 62.2 percent. Main workers (i.e., those who had worked for 6 months or 183 days or more during the reference period of 1 year) constitute 30.8 percent of the total population. The contribution of marginal workers (those who had worked for less than 6 months or 183 days) is to the extent of 7.0 percent.

There is apparently a wide range of difference in proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 51.0 and 46.4 percent respectively for males as against 23.3 and 13.6 percent for females which indicates that the participation of females in economically productive work on full time basis is quite low. Another notable feature is the higher percentage of female marginal workers (9.7%) vis-a vis male marginal workers (4.6%) in the district. It may corroborate the fact that apart from household duties women do some work either to assist their counterparts or supplement to the household income, though it may be on a part -time basis. It can be seen from the data presented in the table that the same pattern prevails in most of the C.D. Blocks of the district.

The work participation rate (total workers) is observed to be the highest in the case of Barhara C.D. Block (48.3%) closely followed by Srinagar block with 46.3 percent workers. The lowest percentage of workers is found in Baisi block (29.0%). So far main workers are concerned, the C.D. Block of Barhara is again at the top with 38.9 percent while Baisi block retains the bottom position having least proportion of main workers (25.2%).

As already observed, the female marginal workers have outnumbered the male marginal workers in the district as well as in most of the C.D. Blocks. Bhawanipur block has registered the highest percentage of female marginal workers (21.3%) closely followed by Rupauli block (18.9%) and Srinagar block (15.7%). The lowest proportion of female marginal workers is noticeable in Baisa block (2.4%).

So far non-workers are concerned, females are far ahead than males with 76.7 percent female non-working population as against 49.0 percent male non-workers in the district. Baisa block has the highest proportion of total non-workers as well as female non-workers with 70.6 and 94.9 percent respectively. Barhara block, on the other hand, has the least proportion of total non-workers as well as female non- workers with 51.7 and 58.1 percent respectively.

Table 32 deals with the same topic as Table 31, the only difference being that the present Table deals with only the rural areas of the district and its C.D. Blocks.

The table reveals that the proportion of the total workers, main workers and marginal workers in the rural areas of the district is to the extent of 38.9 percent, 31.5 percent and 7.4 percent respectively which is more or less similar to the position as found in the case of rural and urban areas combined (i.e., for the total population of the district) as reflected in Table 31. The same trend prevails in all the C.D. Blocks, both for males and females except the three C.D. Blocks which have urban units within their jurisdictions. The slight variation in proportion of total workers, main workers and marginal workers is observed in the rural areas of Banmankhi, Purnia East and Kasba blocks, where the respective percentages are 44.1, 35.8 and 34.5 as against the corresponding percentages of 42.8, 30.7 and 33.9 in the total areas (rural & urban areas combined) of these three blocks. The position of working population among males and females is also not very different in these three blocks except Purnia East where the percentage of female

workers (main & marginal combined) in rural areas of this block is to the extent of 21.5 percent as against 14.0 percent in the total areas (rural & urban combined) of Purnia East Block.

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

As already stated Purnia district has one urban agglomeration and three towns. Table 33 furnishes details regarding distribution of total workers, main workers, marginal workers and non-workers in the three towns of the district. Among these three towns, Kasba(NA) has the highest proportion of total workers, being 30.6 percent. Banmankhi Bazar town comes next in order with 29.3 percent of total workers, almost close to Kasba town. Purnia (the headquarters town of Purnia district) has low proportion of total workers (25.3%) in comparison to the other two towns and also lower than the district urban average of 26.4 percent The proportion of male workers in the urban areas of the district (42.7%) is considerably higher than the proportion of female workers (7.2%). The same situation prevails in all the three towns of the district. As regards proportion of main workers in the towns of the district, it is discernable that, by and large, the position remains the same in the three towns. Banmankhi Bazar and Kasba towns have proportion of male main workers (27.3% & 24.5% respectively) higher than Purnia (M), where the male main workers account for 22.6 percent only which also happens to be lower than the district urban average of 23.3 percent. The female main workers are observed to be quite low in all the three towns, the lowest being in the case of Purnia town (4.0%).

It further transpires from the table that in contrast to rural areas of the district the proportion of marginal workers in urban areas is significantly low (3.0%). It is also interesting to note that the female marginal workers constitute lower proportion as compared to male marginal workers in urban areas of Purnia district (2.1% as against 3.9%). The same situation prevails in all the three towns. It appears that females in rural areas are economically more active than their counterparts in urban areas probably due to more opportunities available for women to work in the sphere of agricultural activities in the rural areas.

Note: Percent of Workers to total workers are given in brackets

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of workers (main + marginal) according to the broad four fold classification namely,

cultivators, agricultural labourers, household industry workers and other workers. The economic activity in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (22.9%) and agricultural labourers (63.3%) together constitute 86.2 per cent of the total workers of the district. The primary sector i.e., the agricultural sector has absorbed more than three-fourth of the total workers of the district. Other workers (persons engaged in various types of activities other than cultivation, agricultural work and household industry work) constitute only 12.1 percent of the total workers in the district while household industry workers are meager 1.7 percent of the total workers. By and large, the same situation prevails in most of the C.D. Blocks of the district. Purnia East block has recorded higher proportion of "other workers"(44.4%) presumably on account of an urban unit contained in this block which also happens to be the district headquarters town. This is followed by Kasba block (having an urban unit), where the proportion of other workers is to the extent of 17.2 percent to the total workers. Household industry workers constitute very small proportion (1.7%) in the district of Purnia. Female household industry workers are slightly more than the male household industry workers (2.2% as against 1.5%) in the district. In some of the C.D. Blocks such as Amour, Baisa, Baisi and Dagarua, the female household industry workers are comparatively much more than the male household industry workers as can be seen from the above Table, the highest being in the case of Baisi block where the percentage of female HHI workers is to the extent of 10.8 percent as against 1.5 percent male HHI workers. In other C.D. Blocks the same trend prevails as observed for the district as a whole.

Note: Percent of Workers to total workers are given in brackets

Table 35 deals with the same topic as Table 34 except that the data presented here relates only to the rural areas of the district as well as its C.D. Blocks.

The situation, as observed for the total areas / population in various C.D. blocks of the district (reflected in Table 34) is, more or less the same for the rural areas of the C.D. Blocks also as shall be evident from the data presented in the Table. The situation is slightly different in the case of C.D. Blocks of Purnia East and Kasba because these blocks contain urban units also (as seen in Table 34). It is observed that the proportion of "other workers" in Purnia East block (rural) is only 19.1 percent, while it was 44.4 percent in this block (rural & urban combined) as reflected in Table 34. Similarly in Kasba C.D. Block (rural) the proportion of "other workers" is only 9.4 percent as against 17.2 percent in Kasba block (rural & urban combined). However, in Banmankhi Bazar block, though it contains an urban unit, there is not much difference in proportion of "other workers" in its rural sector (6.2 %) vis-à-vis the rural and urban areas taken together (8.9%) as observed in Table 34.

Note : Percentage of workers to total workers are given in brackets

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

It transpires from the Table 36 that in all the three towns of the district, the proportion of "other workers" is comparatively higher than the other three categories of workers, viz., cultivators, agricultural labourers and household industry workers. Purnia town has recorded the highest proportion of "other workers" constituting 81.6 percent of the total workers. In Banmankhi Bazar (NA) and Kasba (NA) the proportion of "other workers" (49.9% & 58.0% respectively) is much less than Purnia town and also considerably lower than the district urban average of 74.4 percent. In Purnia (M), cultivators, agricultural labourers and household industry workers taken together constitute very small proportion, being slightly over 18% only. However, in rest of the two towns the agricultural labourers comprise around one-third of the total workers which is much higher than the district urban average of 16.9 percent. Female workers engaged as agricultural labourers and household industry workers are comparatively higher than their male counterpart in all the three towns of the district. However, this does not hold good for the female workers engaged as cultivators in Purnia and Kasba towns since male cultivators are found to be higher in percentage than their female counterparts. In Banmankhi Bazar, however, only the female

cultivators are found to be in higher proportion than their male counterparts (15.7% as against 11.4%). It is further seen from the Table that only one-fourth of the total workers are engaged as cultivators, agricultural labourers and household industry workers (3 activities taken together) in the district urban as a whole while three-fourth of the urban workers are engaged as "other workers".

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table and a few tables presented hereafter are based on the infrastructure data presented in the Village Directory of this volume.

Table 37 gives the distribution of villages according to the availability of different amenities in the district.

Educational facility :- There are as many as 697 villages accounting for 63.2 percent of the total number of inhabited villages (1103) in the district where educational facility is available. The situation regarding schooling facilities is observed to be the highest in Rupauli block (87.0%) followed by Srinagar (76.9%), Barhara (74.5%) and Jalalgarh (73.3%) C.D. Blocks. The proportion of villages having educational facility in rest of the blocks varies between 51.1 percent and 71.6 percent. Dagarua C.D. Block with 51.1 percent has the lowest proportion of villages with educational facility in the district.

Medical facility :- Medical facilities of some or other type are available only in 178 villages (16.1 % of the total villages) which is quite low from any standard. Among the C.D. Blocks, Rupauli again has the largest proportion of villages with medical facility, the percentage being 32.6. It is followed by Dhamdaha (32.4%), Barhara (27.5%) and Amour (26.4%) C.D. Blocks. The lowest proportion of villages having medical facilities is observed in the case of Baisa block with 3.4 percent followed by Dagarua (7.1%) and Baisi (8.3%) blocks.

Improved drinking water :- So far drinking water facility is concerned, it is quite heartening to note that some such facilities are existing in 1071 villages constituting 97.1 percent of the inhabited villages in the district. Among the C.D. Blocks, Banmankhi, Bhawanipur, Rupauli, Dhamdaha, Srinagar, Jalalgarh and Dagarua (7 out of 14 C.D. Blocks) are such where cent percent villages have improved drinking water facility. Krityanand Nagar C.D. Block, on the other hand, has the minimum proportion of villages (85.5%) where improved drinking water facility is available.

Post Office :- As regards rural areas of the district as a whole, the facility of Post and Telegraph Office is available to 175 villages constituting 15.9 percent of the total inhabited villages in the district. Banmankhi C.D. Block has the maximum number of villages having postal facility (29.6%) followed by Rupauli and Barhara C.D. Blocks with 28.3 and 27.5 percent respectively. Dagarua C.D. Block, on the other hand, has the least number of villages having postal facility (5.7%).

Telephone :- The availability of telephone facility in the villages is quite low as only 136 villages constituting 12.3 percent of the total inhabited villages have access to this facility. Among the C.D. Blocks, Jalalgarh has the maximum number of villages having telephone facility (46.7%). This is followed by Dhamdaha and Barhara C.D. Blocks with 27.9 and23.5 percent respectively, though these blocks are relatively much less privileged of having access to telephone facility as compared to Jalalgarh block. The C.D. Blocks of Baisi has only one village (0.9%) having the facility of telephone, being the lowest in the district. In a few other C.D. Blocks, where the proportion of villages having access to telephone facility is 5.0 percent or less are Baisa and Dagarua (5.0% each).

Transport communication :- Transport communication facilities are available only in 226 villages in the district (20.5%). Majority of villages are not connected with any sort of transport means, as is evident from the data presented in the table. Baisa C.D. Block has the highest proportion of villages (51.3%) which are connected by bus or rail or navigable river/canal services, etc. This is followed by Barhara (25.5%) and Dhamdaha (25.0%) C.D. Blocks, though they are far behind Baisa block. The least proportion of villages availing of transport communication facility is observed in Jalalgarh block where only one village is connected by any transport means (2.2%).

Bank :- Banking facility is available only in 80 villages comprising 7.3 percent of the inhabited villages in the district. It can be seen that among C.D. Blocks, Srinagar has the maximum number of villages having banking facility (26.9%) followed by Dhamdaha C.D. Block with 22.1 percent of villages enjoying banking facility. Barhara block, on the other hand, has only 1 village (2.0%) having banking facility. The other C.D. Blocks, where the proportion of villages having banking facility is less than 5 percent of the total villages are Purnia East (4.8%), Baisa (2.5%), Baisi (3.7%) and Dagarua (3.5%).

Agricultural Credit Societies :- Agricultural Credit Societies are available in 171 villages constituting 15.5 percent of the inhabited villages in the district. Srinagar C.D. Block has the largest number of villages having agricultural credit facilities (38.5%). The other C.D. Blocks where more than 20 percent of the villages have this facility are Banmankhi, Barhara, Bhawanipur, Krityanand Nagar, Kasba and Amour. A few C.D. Blocks in the district such as Rupauli (4.3%) and Baisi (3.7%), have even less than 5 percent of the villages where agriculture credit societies exist.

Approach by Pucca road :- Approach road facility is the nerve system of any place. They act as a pull factor for the development and upliftment of the area. Roads may be of any kind but pucca road facilitates movement of transport easily and swiftly. It is discernable from the table that this facility is available in 284 villages constituting 25.7 percent of the inhabited villages in the district. Among C.D. Blocks, Srinagar is much better placed with 88.5 percent villages having pucca approach road facility and tops the list followed by Dhamdaha (48.5%) and Purnia East (43.4%) C.D. Blocks, though they are far behind Srinagar block. The C.D. Blocks of Banmankhi and Kasba are also close to Purnia East block with over 40 percent of their villages having pucca approach road. Baisa block, on the other hand, is the most undeveloped on this count having only 5 percent of its villages which have approach by pucca road, being the lowest in the district.

Power Supply :- The position of electrification of the villages in the district is not very satisfactory as only 313 villages constituting only 28.4 percent of the total number of inhabited villages in the district have access to power supply facility. Among the C.D. Blocks, Jalalgarh has the largest number of electrified villages with 66.7 percent followed by Purnia East block with 50.6 percent villages having power supply facility. These are the only blocks in the district where more than 50 percent of the villages enjoy the facility of power supply. The C.D. Block of Srinagar possesses only 1 village (3.8%) which has the privilege of having power supply facility, the lowest in the district. In the rural areas of the district, 28.4 percent of the villages are such which have the availability of power supply facility.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 deals with the proportion of rural population in the district and C.D Blocks served by various amenities and facilities.

The table reveals that 87.8 percent of the rural population is served by educational facility in the district. It would be seen from the table that educational facility is available to 98.8 percent of the rural population in Rupauli C.D. Block, which is the highest in the district. In Baisa block, on the other hand, only 73.3 percent of the population enjoy educational facility, which is lowest in the district. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 63.2 % as reflected from table 37) as compared to the proportion of population served by educational facility, which is as high as 87.8 percent. This may probably be attributed to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility, it can be seen that the proportion of rural population served by this amenity is of the order of 37.2 percent only which is also more than the proportion of villages served by medical facility in the district (16.1%). The inhabitants of Dhamdaha block are getting maximum benefit of medical facilities with 71.0 percent of the population availing of this facility while inhabitants of rural areas of Baisa block are getting minimum benefit of this facility (9.5%).

So far improved drinking water facility is concerned it may be observed that proportion of rural population served by the amenity is to the extent of 98.0 percent which is almost close to the proportion of villages served by this facility in the district.

It further transpires from the data presented in the above table that the trend as observed for educational and medical facility is also found in the case of other types of amenities and facilities available in the district as also in its various C.D. Blocks since the proportion of rural population served by these amenities is more than the proportion of villages enjoying these facilities.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	383	43	1	427
(b) Middle School	655	191	60	906
(c) Degree College	73	188	834	1,095
2. Medical:-				
(a) Hospital	201	223	658	1,082
(b) PHC	252	333	491	1,076
3. Post Office	709	207	16	932
4. Telephone	386	227	354	967
5. Bus Service	336	411	232	979
6. Banks				
(a) Commercial Bank	378	360	304	1,042
(b) Co-operative Bank	169	227	661	1,057
7. Agricultural Credit Societies	351	186	395	932

From the above Table 38 that there are many villages in the C.D. Blocks of the district containing good proportion of rural population which do not have access to different kinds of facilities and amenities. The present Table-39 gives an idea about the distance range of places from the villages where various types of facilities are available.

There are 427 villages which do not have any facility of primary schools, 906 villages are such which do not have middle school facility and 1095 villages are such where no degree college is available. As regards educational facility, it would be seen that educational institutions having higher level classes are situated beyond 10 kms from the villages which are not having such facilities meaning, thereby, that inhabitants residing in these villages have to cover much more distance to avail of facility of such type of institutions. On the other hand for availing education in institutions like primary and middle schools the larger proportion of villages are situated within the distance range of less than 5 kms and 5-10 kms.

There are 1082 villages in the district (98.1%) which are without the facility of hospital and out of them as many as 658 villages enjoy this facility at a distance range of 10 + kms. The number of villages enjoying this facility at a distance range of 5-10 kms is 223 whereas this facility is available at a distance of less than 5 Kms in respect of 201 villages. Similarly, there are 1076 villages in the district (97.6%) which do not have primary health centers but the facility is available for these villages at various distance ranges, the maximum being in the range of 10 + kms.

709 villages (76.0%) do not have post office facility but people residing in these villages avail this facility at places situated at the distance range of less than 5 kms.

Similar trend can be observed in respect of other amenities in the district except the facility of co-operative banks and agriculture credit societies for which inhabitants of larger proportion of villages have to travel more than 10 kms to avail these facilities.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometre)	Number of inhabited village in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road

	0	0	0	0	0	0	0	0	0
District total	**1,103**	**697**	**178**	**175**	**136**	**226**	**80**	**171**	**284**

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from Table 40 that maximum number of inhabited villages (49.0%) lie in the distance range of 16-50 kms from the nearest statutory town. This is followed by villages in the distance range of 5-15 kms. from the nearest statutory towns with 32.2 per cent. It can further be seen from the table that the proportion of villages lying at the distance of more than 51 kms. is only 15.4 percent. The villages which are situated from the nearest statutory town at a distance range of less than 5 kms are quite low in number.

Interestingly, it can be observed from the table that the maximum proportion of villages having educational facility (84.2%) are situated within 5 kms from the nearest statutory town. There appears to be not much difference in proportion of villages having educational facilities situated in other 3 distance ranges from the nearest town. Out of 178 villages which possess medical facility 78 villages (43.8%) are situated at the distance range of 16-50 kms from the nearest town. The number of villages situated beyond 51 kms from the nearest town is 26 only(14.6%). The villages situated at the distance range of 16-50 kms and 5-15 kms from the nearest town are found to be higher in proportion which are enjoying all other kinds of amenities and facilities.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited village in each range	Type of amenity available									
		Education	Medical	Improved drinking water *	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

	(100.0)	(98.7)	(48.7)	(97.4)	(68.4)	(34.2)	(38.2)	(22.4)	(43.4)	(57.9)	(56.6)
10000 +	25	25	21	25	21	10	13	11	14	17	19
	(100.0)	(100.0)	(84.0)	(100.0)	(84.0)	(40.0)	(52.0)	(44.0)	(56.0)	(68.0)	(76.0)
District total	**1,103**	**697**	**178**	**1071**	**175**	**136**	**226**	**80**	**171**	**284**	**313**
	(100.0)	**(63.2)**	**(16.1)**	**(97.1)**	**(15.9)**	**(12.3)**	**(20.5)**	**(7.3)**	**(15.5)**	**(25.7)**	**(28.4)**

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 41 shows that the maximum number of villages, i.e., 282 (25.6%) in the district fall in the population range of 2000-4999, followed by 274 villages (24.8%) in the population range less than 500. It is seen that good number of villages also lie in the population range of 500-999 and 1000-1999. However, the proportion of villages lying in the population range of 5000-9999 and 10,000 & more is quite low which shows that medium-sized villages are more in number in the district of Purnia.

It further transpires from the table that larger proportion of villages having various types of amenities and facilities, by and large, lie in the population range of 2000-4999 and 1000-1999. Similarly, in case of villages having facilities like post and telegraph, telephone, banks and agricultural credit societies, the proportion of villages lying in the population range of 5000-9999 is also quite high.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Banmankhi	81	34,325	75.7	46.9
2	Barhara	51	22,793	79.9	53.4
3	Bhawanipur	59	15,318	86.1	64.1
4	Rupauli	46	24,498	76.1	52.0
5	Dhamdaha	68	35,647	84.7	77.3
6	Krityanand Nagar	69	28,135	86.4	75.5
7	Purnia East	83	21,131	80.3	21.4
8	Kasba	58	15,069	79.7	42.8
9	Srinagar	26	14,222	83.8	46.2
10	Jalalgarh	45	11,305	82.6	21.6
11	Amour	148	24,069	82.1	42.6
12	Baisa	119	20,094	60.2	22.6
13	Baisi	109	19,143	72.9	66.8
14	Dagarua	141	20,355	73.8	29.3
	District Total:	**1103**	**306,104**	**78.9**	**50.9**

Note : Cultivable area = irrigated area + unirrigated area

Table 42 furnishes information regarding the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It can be seen from the data presented in the table that 78.9 percent of the total area of the district is utilized for cultivation (cultivable area) and of this only 50.9 percent of the area is found to be irrigated. Among the C.D. Blocks, the highest proportion of cultivable area is observed in Krityanand Nagar C.D. Block with 86.4 percent closely followed by Bhawanipur and Damdaha C.D. Blocks with 86.1 and 84.7 percent respectively. The lowest cultivable area is found in Baisa C.D. Block (60.2%).

The highest proportion of irrigated area to total cultivable area (77.3%) is found in Dhamdaha C.D. Block, followed by Krityanand Nagar and Baisi C.D. Blocks with 75.5 and 66.8 percents respectively. The least proportion of irrigated area is found in Purnia East C.D. Block with only 21.4 percent, which indicates that the villages in this block are deprived of required irrigational facilities. The other C.D. Blocks where the irrigation facilities are found to be very inadequate and fall almost in the same category as Purnia East are Jalalgarh (21.6%), Baisa (22.6%) and Dagarua (29.3%) since the percentage of irrigated area to total cultivated area is quite low, being less than 30 percent.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Banmankhi Bazar (NA)	4.0	1.0	3.0	4.0	1.0	0.0	3.0	0.0	0.0
2	III Kasba (NA)	6.0	2.0	4.0	8.0	7.0	0.0	0.0	0.0	0.0
3	I Purnia (M)	60.0	23.0	37.0	48.0	37.0	2.0	9.0	0.0	0.0
	District Total	**47.0**	**18.0**	**29.0**	**39.0**	**30.0**	**1.0**	**7.0**	**0.0**	**0.0**

Table 43 gives the details of finances in the statutory towns in terms of per capita receipt and expenditure. There are three statutory towns in the district viz., Banmankhi Bazar (NA), Kasba (NA) and Purnia (M). On going into the details of receipt under different heads it can be seen that the receipt from 'other sources ' is higher than through taxes in all the three towns. Per capita receipt in Banmankhi Bazar and Kasba towns is comparatively much less as compared to Purnia (M), the district headquarters towns. So far per capita expenditure is concerned, again Purnia (M) leads among the three towns. It further transpires from the table that per capita expenditure on "general administration" is higher in Purnia and Kasba towns, while in Banmankhi Bazar town the per capita expenditure is more on "public works" as compared to per capita expenditure on other heads. The per capita expenditure on different types of head is comparatively much higher in Purnia town as compared to other two towns in the district.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Banmankhi Bazar (NA)	4.8	1.6	1.6	0.8	0.4
2	Kasba (NA)	4.7	2.4	0.8	0.8	0.4
3	Purnia (M)	0.9	1.4	0.3	0.2	0.3
	District Total	**1.8**	**1.5**	**0.5**	**0.3**	**0.3**

Table 44 gives the details of different categories of educational institutions per ten thousand population in the town of the district. It would be seen from the above table that there are, on an average, 1.8 primary schools per 10,000 population in urban areas of the district. While Banmankhi Bazar and Kasba towns have around 5 schools per 10,000 population, Purnia (M), the headquarters town of the district has, on an average roughly 1 school per 10,000 population. As regards junior secondary/ middle level schools, it can be observed from the table that Kasba town has an edge over Banmankhi Bazar and Purnia towns. It is further noticed from the data presented in the Table that so far secondary / matriculation level schools are concerned, there are, on an average, 1.6 such schools per 10,000 population in Banmankhi Bazar town which appears to be better placed as compared to other two towns. The institutions like secondary schools and colleges, though these exist in all the three towns but the position does not appear to be satisfactory as the number of such institutions are even less than 1 per 10,000 population, Purnia town is in a more disadvantageous situation as compared to the other two towns. By and large, it can be said that educational institutions of higher category like Colleges, Senior secondary / Matriculation etc, are available in very small number for larger proportion of population in various towns of Purnia district. Purnia (M), the district headquarters town, probably suffers most on this count.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Banmankhi Bazar (NA)	24
2	Kasba(NA)	2
3	Purnia(M)	19
	Distrct Total	**17**

Table 45 furnishes information regarding availability of beds in medical institutions in the three towns of Purnia District.

The average number of beds in medical institutions per 10,000 populations for the urban areas of Purnia district works out to 17. The availability of beds in the medical institutions is highest in case of Banmankhi Bazar (NA), with 24 beds per 10,000 population. This is followed by Purnia (M), the headquarter town of the district, having only 19 beds per 10,000 population, considerably less than Banmankhi Bazar town. Kasba town is at the bottom with only 2 beds for 10,000 population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Banmankhi Bazar (NA)	25,187	1,250	5.0
2	Kasba (NA)	25,524	2,391	9.4
3	Purnia (M)	171,687	22,424	13.1
	District Total	**222,398**	**26,065**	**11.7**

It can be seen from Table 46 that slums exist in all the 3 towns of the district. The town of Purnia has slum population to the extent of 22,424 accounting for 13.1 percent of the total population of the town, which appears to be quite considerable. The proportion of slum population in Banmankhi Bazar and Kasba towns are 5.0 and 9.4 percent respectively, comparatively lesser than Purnia town.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Banmankhi Bazar (NA)	Jute Oil	Rice Jute Oil Seed
2	Kasba (NA)	Ply Board Ply Wood	Jute Cotton
3	Purnia (M)	Ply Wood Ply Board Tarrymat	Ply Board Jute Rice Banana

Table 47 gives information regarding most important commodities manufactured in and exported out of the 3 towns of the district. In Purnia and Kasba towns, the most important commodities manufactured

are Ply Wood and Ply Board. Tarrymat is also one of the important commodities which is manufactured in Purnia (M). Jute and Oil are the most important commodities manufactured in Banmankhi Bazar town. So far commodites exported are concerned, it can seen that jute is an important commodity exported out of all the three towns of the district. Rice is another common important commodity which is exported out of Banmankhi and Purnia towns. Oilseed and Banana are respectively the third important commodity exported out of Banmankh Bazar and Purnia towns. In Kasba town cotton and ply board are the commodities which are exported out of the town apart from jute (ply wood is also manufactured in this town). It is interesting to observe that the most important commodities manufactured and the most important commodities exported are always not the same.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It is quite evident from the data presented in the Table 48 that there are as many as 478,531 households accounting for 97.6 percent of the total households of the district residing in owned houses. Of them, the proportion of households residing in single room dwelling is the highest (59.8 %). Households having no exclusive room in their possession constitute 1.2 percent of the households living in owned houses. The median number of rooms is 1 for the households having their own houses.

The households living in rented houses (7000 in number) are very small in proportion accounting for 1.5 percent of the total households in the district. Among them, the proportion of households having exclusively one room in their possession is highest as observed in the case of households having owned

houses . The median number of rooms for the households residing in rented houses works out to 2.

The same pattern is found to prevail in rural as well as urban areas of the district.

There are 67,564 Scheduled Castes households in the district, out of which 66,330 households constituting 98.2 percent reside in their owned houses. The households residing in rented or other type of houses are very small in number. The proportion of SC households having only one room in their possession is the highest comprising 71.3 percent of the households followed by 20.8 per cent SC households in possession of two rooms. The median number of rooms of SC households residing in owned houses works out to 1. The SC households residing in rented houses is considerably low as stated above and of them slightly higher proportion have two rooms in their possession. The SC households residing in 'other types of houses' is slightly higher in proportion than the SC households residing in rented houses and of them households having one room in their possession are higher than the households having more rooms. The same trend can also be seen in rural and urban areas separately.

The Scheduled Tribes households are only to the extent of 23,436 and most of them are found to be residing in their owned houses (22,954 in number) constituting 97.9 percent of the total ST households .The ST households residing in rented or 'other types of houses' are quite few in number and among them most of the ST households have one room in their possession. The median number of rooms in possession among the ST households works out to 1 as found in the case of general category of households and SC households also.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

	District Total:	**10.6**	**16.9**	**72.5**	**8.0**	**16.9**	**75.1**	**44.0**	**16.2**	**39.8**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roof are made of pucca materials i.e. where burnt bricks, G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roof made of Kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The concept of permanent, semi-permanent and temporary nature of houses, as adopted in census, has been explained in the footnote of the above table.

It would be discernable from the data furnished in the Table 49 that of the total rural households largest proportion of households i.e. 72.5 percent live in temporary houses. The households living in permanent and semi-permanent nature of houses are considerably low, being 10.6 and 16.9 percent respectively in the district. The same situation prevails in the rural areas of the district.

In the case of urban households in the district, however, the situation is found to be quite different as maximum proportion of household i.e. 44.0 percent live in permanent houses. The households living in temporary nature of houses are also quite high, being 39.8 percent. So far households residing in semi-permanent nature of houses are concerned, it can be noticed that the proportion of households (16.2%) is almost similar as found in the case of rural areas of the district (16.9%).

Among the C.D. Blocks, the same trend, by and large, is found to prevail. The highest proportion of households living in permanent houses is observed in Purnia East block (30.3%). In other C.D. Blocks where the proportion of households living in permanent nature of houses are more than 10 percent are Bhawanipur (12.2%), Rupauli (13.3%) and Kasba (121%). Amour C.D. Block has recorded the lowest proportion of population living in permanent houses (4.2%). In the rest of the C.D. Blocks the proportion of households living in permanent houses varies between 4.3 percent (Srinagar block) and 9.9 percent (Banmankhi block). The proportion of households living in semi-permanent houses with percentage of 25.0 and above is found only in the case of Amour (34.2%), Baisa (45.9%) and Baisi (43.7%). The C.D. Blocks where 75 percent and above of the total household live in temporary households are Banmankhi, Barhara, Bhawanipur, Dhamdaha, Krityanand Nagar, Srinagar, Jalalgarh and Dagarua (9 out of 14 blocks), the highest being in the case of Srinagar block with 92.4 percent. In the rural areas of the C.D. Blocks almost the same pattern is discernable.

The C.D. Blocks where towns also exist, viz., Banmankhi, Purnia and Kasba it is quite evident from the table that the proportion of households living in permanent nature of houses is quite high. Among the three, Purnia East block (having the district headquarters town)is better placed with 47.7 percent households living in permanent houses. It is further observed that in Banmankhi block larger proportion of households reside in temporary nature of houses (42.4%), while in Kasba block the proportion of households living in semi-permanent nature of houses is the highest among the 3 towns (29.1%).

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Serial number	C. D. Block	Total/ Rural/ Urban	Number of household	Number and percentage of household having Improved drinking water*	Electricity	Bathroom	Toilet	Drainage

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as'Improved'or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

As mentioned in the footnote of the above Table 50, if the household has access to drinking water supplied from a tap or hand pump/ tube well within or outside the premises it is considered as having access to "improved drinking water source". This concept is, however, state specific and need to be considered in that light.

Table 50 shows that of the total households, 92.7 percent of the households have access to improved drinking water facility in the district. Among the rural households also almost equal proportion of households (92.6%) enjoy this facility. The position is still better in the urban areas with 94.4 percent households availing of this facility. Among the C.D. Blocks, the

highest proportion of households with improved drinking water facility can be observed in Purnia East block with 95.0 percent whereas it is the lowest in the case of Dagarua block with 90.2 percent, the difference between the highest and the lowest being only of around 5 percentage points. In the 3 C.D. Blocks which contain urban unit also, it is observed that the proportion of households having access to drinking water facility is higher in urban area vis-à-vis rural areas except Kasba block where the situation is just reverse.

As regards electricity facility available to households, it is found that only 7.1 percent of the households in the district have electricity. The people living in the urban areas are more privileged as 51.6 percent of the urban households have the facility of electricity as against only 3.5 percent of rural households enjoying this facility. Purnia East block tops the list as 35.2 percent of the households in this block have electricity facility followed by Kasba and Banmankhi blocks with 9.4 and 6.0 percent respectively though they are far behind Purnia East block. This may presumably be due to the fact that these three blocks contain urban units also. In the rest of the C.D. Blocks the proportion of households enjoying electricity facility is less than 5.0 percent except Jalalgarh block (7.4%) and Krityanand Nagar (5.2%) where slightly more than 5 percent of the households have this facility.

It is also interesting to note that only 5.2 percent of the total households in the district have bathroom facility. In the urban areas, the proportion of households which has the privilege of having bathroom facility is quite high with 36.5 percent while only 2.8 percent of the rural households have access to this facility. Among the C.D. Blocks, Purnia East is again much ahead of the other C.D. Blocks probably because of Purnia (M), the headquarters town located in this block.

Households having toilet facility are found to be higher in number as compared to bathroom and electricity facility as 12.5 percent of the households in the district enjoy toilet facility. The relative position among C.D. Blocks is, by and large, the same as found in the case of bathroom and electricity facility as Purnia East is again much better placed with39.7 percent of the households having this facility. It is followed by Kasba and Banmankhi blocks with 12.4 and 10.3 percent respectively. The position with regard to toilet facility in most of the other C.D. Blocks are not so discouraging as observed for electricity and bathroom facilities except Srinagar (3.0%) and Baisa (4.9%) blocks where less than 5 percent of the villages have access to this facility.

12.2 percent of the total households in the district have drainage facility. While 32.9 percent of urban population has got the facility of drainage, only 10.6 percent of the rural households have this privilege. Among the C.D Blocks, Purnia East (24.4%), Dhamdaha (16.2%), Kasba (13.4%), Rupauli (13.2%), Banmankhhi (12.3%), Dagarua (12.2%), Krityanand Nagar (11.8%) and Barhara (10.6%) have 10 percent or above of the total households having drainage facility while Srinagar block with 1.1 percent, is at the bottom.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It would be seen from Table 51 that 21.8 percent of the households in the district use firewood as fuel for the purpose of cooking. The proportion of rural households using firewood is to the extent of 19.9 percent while proportion of urban households is as much as 45.3 percent in the district. Among the C.D. Blocks, the highest proportion of households using firewood as fuel for cooking is seen in Banmankhi C.D. Block (37.1%) followed by Krityanand Nagar (35.9%) and Barhara (34.7%). The C.D. Blocks where the proportion of households using firewood as fuel for the purpose of cooking is less than 10.0 percent are Amour (5.2%), Baisi (3.6%) and Baisa (2.7%), being the lowest in the district.

Crop residue appears to be the most favourable and commonly used fuel for cooking purpose in all the C.D. Blocks of the district, the highest being in the case of Baisa block with 92.0 percent, very closely followed by Amour and Baisi blocks with 91.7 and 91.0 percent respectively. In Purnia East block, however, only 40.1 percent households use crop residue for cooking. In the district as a whole 69.4 percent of the households (rural-73.9%; urban-12.9%) use firewood for the purpose of cooking.

Cow-Dung cake is also an important type of fuel used for cooking in households of various blocks of the district as quite a good proportion of households use it. 6.6 percent of the households in Banmankhi block use cow-dung cake for cooking, followed by Rupauli and Barhara blocks with 5.4 and 5.0 percent respectively. However in the C.D. Block of Baisi only 0.7 percent of the households use cow-dung for cooking purpose. The other C.D. Blocks where cow-dung as fuel is less preferred are Bhawanipur, Dhamdaha, Krityanand Nagar, Purnia East , Kasba, Srinagar, Amour, Baisa and Dagarua as it was observed that maximum proportion of households in these blocks use crop residue or firewood for cooking purpose.

Electricity, coal/lignite and bio-gas are the types

of fuel which appear to be very uncommon as the proportion of households using these fuels for cooking purpose is found to be almost negligible in various C.D. Blocks of the district.

As regards cooking gas (L.P.G.), there are only 15,698 households accounting for 3.2 percent of the total households in the district using it for cooking. However, the proportion of urban households using cooking gas is relatively quite high as 35.0 percent of urban households use it as fuel for cooking. Except in the case of Purnia East block and to some extent Kasba block (where urban units exist) the proportion of households using cooking gas as fuel is almost negligible in various C.D. Blocks of the district. Even in Purnia East and Kasba blocks majority of households which are using L.P.G. for cooking purpose, are urbane.

Kerosene and all "other" types of fuel are not commonly used for cooking purpose as only insignificant proportion of households use these for cooking purpose in the district. There are 475 households constituting 0.1 percent of the total households in the district where no cooking takes place.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The data presented in Table 52 gives details regarding availability of household assets to rural and urban households in the district of Purnia and its C.D. Blocks.

It would be seen from the table that there are 51,337 households accounting for 10.5 percent of the total households in the district avail banking services. While 7.8 percent of the rural households avail banking facility in the district, the proportion of households in the urban areas availing banking services is to the extent 44.5 percent. Among the C.D. Blocks the highest proportion of households availing banking facility is observed in Purnia East C.D. Block (30.0 %) where as, on the other hand, the lowest proportion of households enjoying this service is observed in case of Amour C.D. Block (4.6 %).

There are 102,854 households accounting for 21.0 percent of the total households in the district possessing radio / transistor. It is noteworthy that in almost all the C.D. Blocks the proportion of households having radio/ transistor is found to exist in good proportion, the highest being in Purnia East block with 30.0 percent, obviously on account of Purnia town, the district headquarters present in the district.

Only 30,997 households accounting for 6.3 percent of the total households in the district possess televisions. Among the C.D. Blocks, the highest proportion of households possessing televisions is observed in Purnia East C.D. Block (28.2%) while it is the lowest in Amour C.D. Block (1.9%).

The proportion of households enjoying telephone facility in the district is meager 1.8 percent while this facility is available to only 0.8 percent of the rural households, the proportion of urban households having telephone facility is to the extent of 14.7 percent. So far availability of telephone facility in C.D. Blocks is concerned, it can be seen that only Purnia East C.D. Block, which consists of district headquarters town has telephone service facility to 17.7 percent of the total households which is slightly above the district average. In other C.D. Blocks the position is quite discouraging as the proportion of households possessing telephone facility varies between 1.0-2.0 percent in many cases, the lowest being in case of Rupauli block (0.3%).

Bicycle appears to be the most common mode of conveyance in the district and its C.D. Blocks as 35.6 percent of the total households in the district possess bicycles. The proportion of households having bicycles is relatively lower in rural areas with 34.3 percent as against 52.5 percent among the urban households in the district. In the various C.D. Blocks of the district quite a good number of households are

possessing bicycles for their day- to-day use.

The number of households having scooter / motorcycle /moped in the district constitute 2.8 percent of the total households. The proportion of rural households having these mode of conveyance is only 1.7 percent while 16.1 percent of the urban households have scooter / motorcycle / moped in their possession. The position in this regard is not very different among the various C.D. Blocks of the district.

Possession of car, jeep, van is very uncommon in the district as only 0.6 percent of the total households have the privilege of having these modes of conveyance. Urban households having these modes of conveyance is slightly more with 3.0 percent as against 0.4 percent in case of rural households.

There are as many as 277,414 households accounting for 56.6 percent of the total households in the district where none of these specified assets are available in the district. While 58.6 percent of the rural households are deprived of these household assets, the proportion of households having none of these specified assets is to the extent of only 31.6 percent in the urban areas of the district. The same trend is, more or less, observed in various C.D. Blocks.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

In the district of Purnia , no major social or cultural event has taken place during the decade . However, the district has been famous for fairs and *melas* held at different places throughout the year as already mentioned in the earlier chapters. There is a brief lull during the two months of raining season. There are some shops keepers who keep on moving from fair to fair throughout the year. Some of the fairs held in the district are quite old.

Three new sub-divisions, viz. Banmankhi, Dhamdaha and Baisi have been created in the district during the decade raising the number of sub-divisions from one in 1991 Census to four sub-divisions (including Purnia Sadar) during 2001 Census. Three new C.D. Blocks were also formed in the district during the decade. These are Jalalgarh, Srinagar and Dagarua, raising the number of C.D. Blocks from 11 in 1991 Census to 14 at the time of 2001 Census.

No significant activity worth mentioning had taken place in the district during the decade.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Amour

The village is the headquarters of the block bearing the same name and is situated about 40 Kms. north of Purnia town on the Purnia-Baisa road. The place is noted as the former seat of Amour Estate established about 150 years ago. The village has a Durgasthan and a Temple which draw a large number of devotees on the occasion of Dushara every year. Biweekly market is held on Sunday and Wednesday. The village has a Bus stop linked with pucca-road.

Banaili

The village is situated in the north-East of Kasba block. It is noted as the seat of the former Benaili Estate. The village contains ruins of an old temple and a fortress and has been a seat of Sanskrit learning and Maithil Culture.

Barahsthan

It is a temple near the block headquarters of Bhawanipur. The temple was set up in 1948 after a stone image of Baraha, an incarnation of Lord Vishnu, was discovered while ploughing a field. A large fair is held on the occasion of *Kartik Purnima* every year.

Bhawanipur T/N

A big village situated South-west of Purnia Town on the Purnia-Rupouli Road is the head quarter of the block cum Anchal of same name. The place noted for an old temple commonly known as Bhawanipur *Devi Ashtan*. The present temple is built up by the Darbhanga Raj in 1928. A large fair is held on the occasion of *Dussehera* every year.

Bhawanipur

The small village is in Krityanand Nagar block and is situated about 8 kms. south-west of Purnea Town. The village is noted for its temple of Goddess

Kamakhya. Persons affected with leprosy offer prayers in this temple in the hope of being cured of the disease. An annual fair is held in the month of *Chaitra.*

Dharhara

The village situated about 5 K.M. North-East of Dhamdaha and a short distance from Banmankhi Bazar, is noted for its ancient traditions. It has seeing of an old fort called Sakligarh traditionaly believed to the associated from the demon, King Hiranyakashyap. There is a monolith Known as 'Manikthan' near the ruins, believed to represent the pillar from which Lord Narsingh emerged and killed Hiranyakashyap.

Goasi

A village falling in Krityanand Nagar block and situated about 3 K.M. away from Purnia Town. It is noted for its Shiva temple and a wrestling competition is organised annually on the occasion of *Shivratri.*

Gulabbag

It is an important jute market near Purnia Railway station. The place is noted for holding one of the largest fair in the district, held annually.

Majra

The Village falls in Krityanand Nagar block. It has a *Sarvodaya Ashram* and a temple of Lord Shiva around where a large annual fair is held on the occasion of *Shivaratri.*

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The district is mainly agrarian in nature. It is a jute and paddy growing area having potential of becoming important industrial belt based on these two raw materials. There are several small and medium sized rice and oil mills in the district. Jute, rice, oil seeds are important commodities which are exported out of the district also.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul

weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in English and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified

as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I

and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

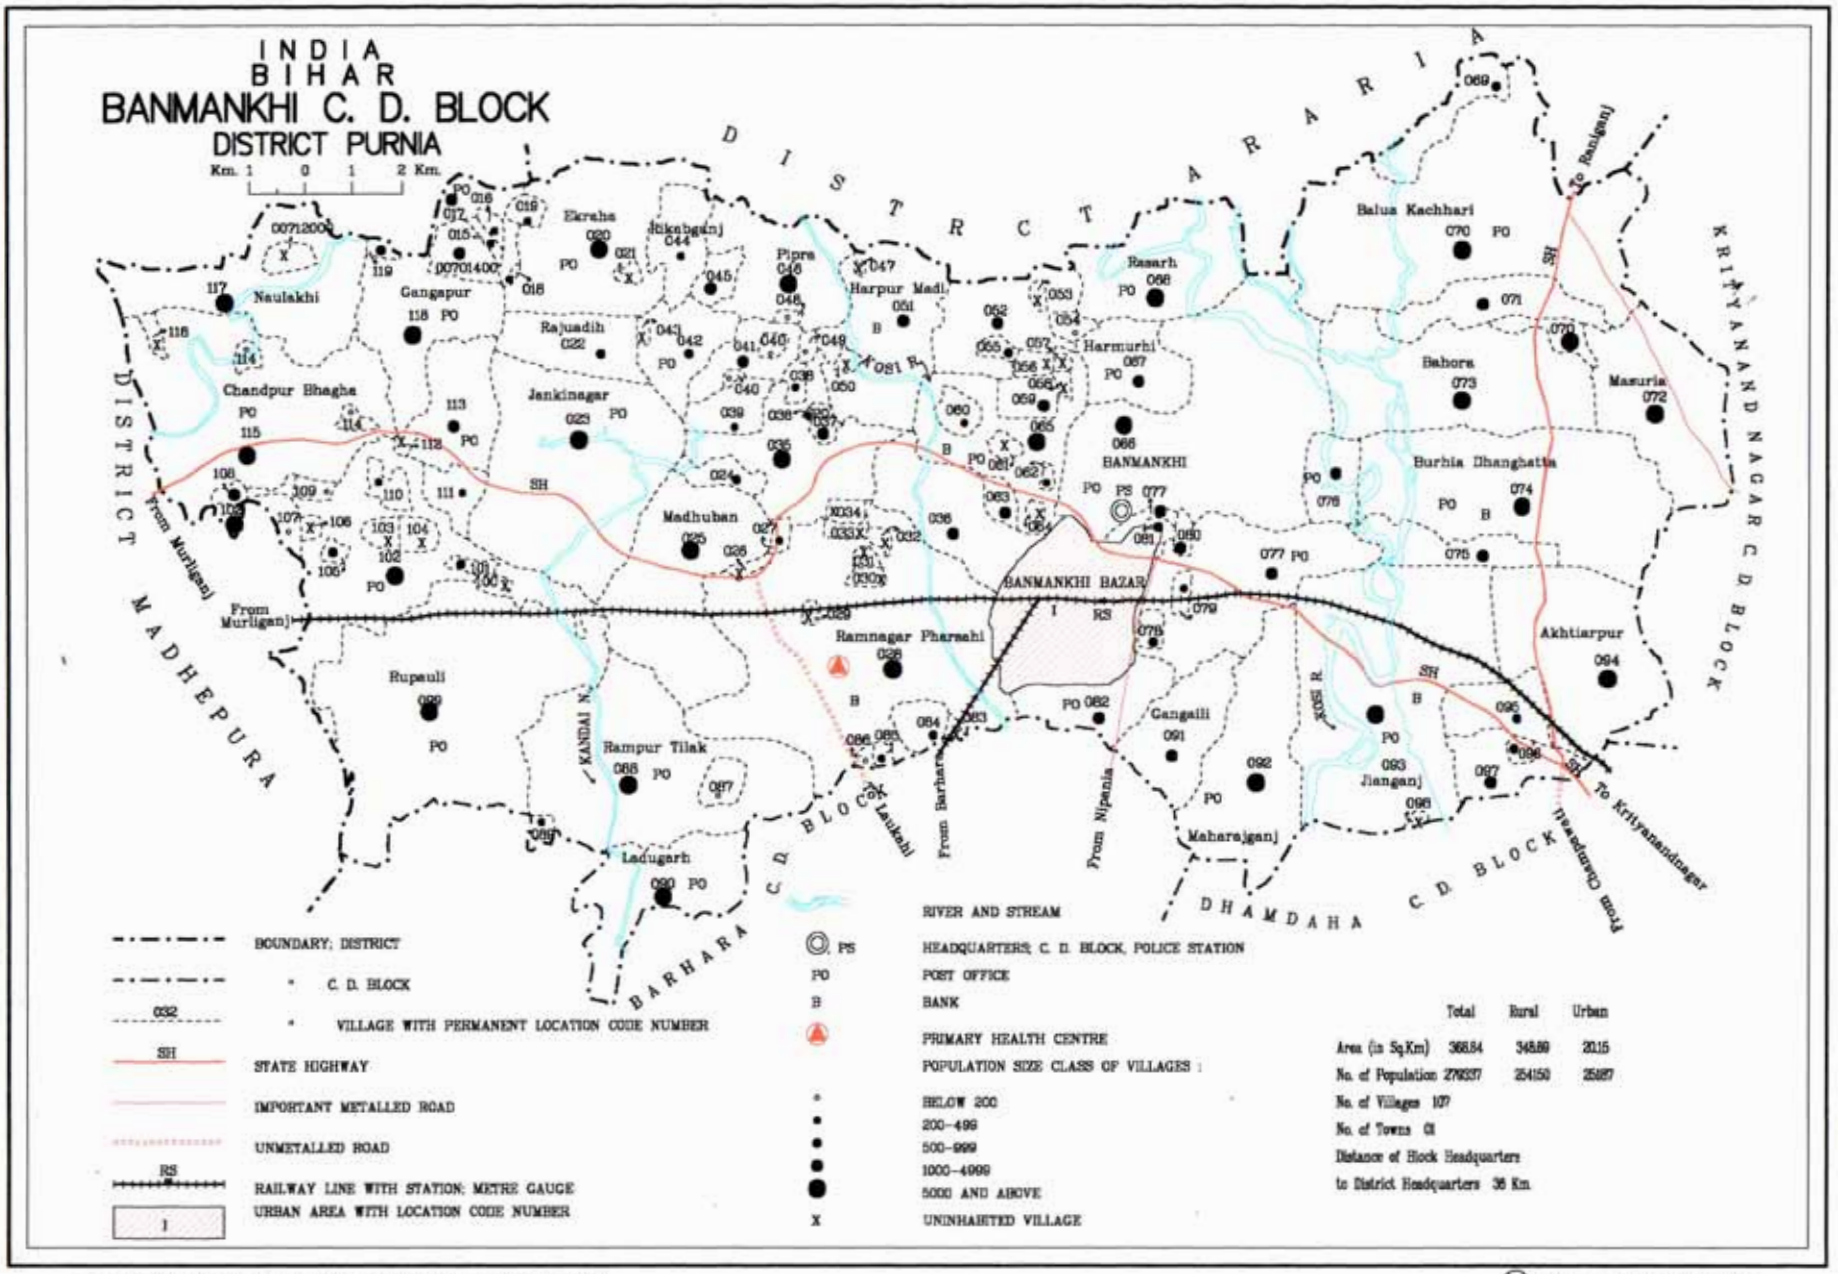

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

APPENDIX VIII - VILLAGE DIRECTORY

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT (C. D. BLOCK WISE)

Serial number	Name of Gram Panchayat and location code number	Area of Gram Panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Income and expenditure of Panchayat / Gram Panchayat (in Rs.'000)	
			Number	Location code numbers					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11
N.A.										

Note : N.A. stands for information not available.

APPENDIX IX - VILLAGE DIRECTORY

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Serial number	Name of C. D. Block	Village location code number	Name of village	Number of girls school			
				Primary School	Middle School	Matriculation / Secondary School	Higher Secondary / PUC / Intermediate / Junior college
1	2	3	4	5	6	7	8
N.A.							

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

There is no outgrowth in any of the towns of Purnia district.				

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible

cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II
ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Purnia	1991	89	91	110	114
	1981	117	147	151	162

The concepts and definitions of various parameters of Mortality and Fertility have already been dealt with in the Analytical section of this volume.

In the Annexure-II q (1), q (2), q (3) and q (5) denote estimates of child mortality for the different ages 1, 2, 3 and 5 respectively for the children of Purnia district and Bihar state. It is quite evident from the data presented in the table that the child mortality rates of Purnia district is much higher than the state average for all the four ages of the children both during 1991 and 1981 Censuses. It is, however, encouraging to note that the child mortality rates for all the four ages of the children have shown improvement in 1991 Census in Purnia district as well as for the state. The gap in q (1), q (2), q (3) and q (5) between Purnia district and the state as a whole at the time of 1991 Census was of the order of 14, 7, 24 and 25 points respectively, the lowest gap found in the case of child mortality for the age 2 years.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

Various fertility measures have been defined in the earlier section of this volume. In the above table the data in respect of various fertility measures have been presented for the state as well as all its districts.

Annexure-III reveals that all the fertility measures like CBR, TFR, TMFR, GFR, GMFR and child-women ratio are higher for Purnia district as compared to the state average, although the difference is quite nominal except in the case of GFR and GMFR which are observed to be 171.0 and 199.0 for Purnia district as against 163.0 and 186.0 for the state as a whole. Average number of children born to a women is found to be slightly more in Purnia district (4.4) than the state average of 4.1. So far mean age at marriage is concerned, it can be seen from the table that the district and the state figures are almost the same (16.6 years for Purnia and 16.5 years for the state as a whole). The different fertility measures in various districts of the state are, by and large, are found to be not much in variation.

	Born in other states			Born in other countries			Total migrants		
State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Purnia	104,335	15,114	89,221	10,572	2,161	8,411	526,070	65,446	460,624
	(19.8)	(23.1)	(19.4)	(2.0)	(3.3)	(1.8)	(100.0)	(100.0)	(100.0)

The growth of population for any area is influenced by the migratory movements of the people including in and out migration. However, for want of data on out-migration since such data is not collected in Census, it might not be possible to assess the net impact of out migration on growth of population, although such impact may not be much in most of the cases.

The above tables show percentage distribution of migrants by place of birth based on data recorded during 1991 and 2001 Censuses. It can be seen from the tables that total migrants in the district of Purnia are 459,730 whereas in the state as a whole the migrants are found to be 21,307,020 in number (Purnia constitutes 2.1% of the migrants of the state). The corresponding figures for the district and the state for the year 2001 are 526,070 and 19,989,195 respectively.Purnia constitues 2.6 percent of the total migrants coming to the state in 2001. Female migrants outnumber the male migrants both in the case of the district as well as the state in both the Censuses. While the male migrants constitute only 11.3 and about 12.4 percent in 1991 and 2001 respectively, the female migrants are as high as 88.7 and 87.6 percent of total migrants of Purnia district in 1991 and 2001 respectively. The corresponding proportion of male and female migrants for the state as a whole works out to 10.9 and 90.1 percent respectively in 1991 and 10.5 and 89.5 percent respectively in 2001. The higher proportion of migrants among females is presumably on account of marriage of females taking place outside their place of birth in majority of cases.

It can further be seen from the tables that most of the migratory movement has taken place within the district of enumeration in Purnia district particularly in case of females both in 1991 and 2001 (68.5% for females as against 37.0% for males in 1991 and 52.8% females and 37.3% males in 2001). The proportion of male migrants born in other districts of the state is quite high, being 51.5 percent males as against 28.8 percent for females in 1991 and 36.3 percent and 26.0 percent respectively in 2001. The state average figures are also on the same line in 1991 and 2001 though the proportion of male migrants are slightly less and female migrants are slightly more as compared to corresponding figures of the district of Purnia.

The proportions of migrants (both males & females) born in other states and in other countries have been quite low in the district during 1991 Census except for males born in other countries. However, the state average figures are found to be comparatively lower in case of migrants born in other states and born in other countries as compared to corresponding figures of migrants in the district during 2001 Census.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Purnia		
		Total	Rural	Urban	Total	Rural	Urban

		(4.9)	(1.9)	(3.1)	(4.6)	(2.2)	(2.4)
(2) In other states of India	Total	1,049,969	575,484	474,485	12,990	8,920	4,070
		(100.0)	(54.8)	(45.2)	(100.0)	(68.7)	(31.3)
	Rural	800,601	512,444	288,157	9,860	7,670	2,190
		(76.2)	(48.8)	(27.4)	(75.9)	(59.0)	(16.9)
	Urban	243,448	60,040	183,408	3,090	1,220	1,870
		(23.2)	(5.7)	(17.5)	(23.8)	(9.4)	(14.4)

It can be seen from Annexure-IV(B) that of the total intra-state migrants in Purnia district, 87.1 percent cases were from rural to rural while 2.4 percent migration took place from urban to urban. The corresponding figures of the state average works out to 82.6 and 3.1 percent for the state as a whole. The migratory movement from rural to urban areas in the district constitute 8.2 percent as against 2.2 percent from urban to rural. The state data, on the other hand, shows that of the total intra-state migrants 12.2 percent were from rural to urban while only 1.9 percent from urban to rural areas.

The Annexure further reveals that in case of migrants from other states to Purnia district (i.e., those who were born outside Bihar state and enumerated in the district of Purnia), 59.0 percent were from rural to rural while 14.4 percent from urban areas of other states to urban area of Purnia district. The corresponding figures of the state average being 48.8 percent and 17.5 percent respectively. So far movement of migrants from rural areas of other states to urban areas of Purnia district is concerned, it can be noted from the table that 16.9 percent of such migratory movement took place. The proportion of migrants from urban areas of other states to rural areas of Purnia district was found to be 9.4 percent. The rural to urban migration and urban to rural migration from other states to the state of Bihar had been observed to be 27.4 percent and 5.7 percent respectively.

Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

The data presented in the above tables pertaining to 1991 and 2001 Censuses deal with the magnitude of inter-state migration to the state of Bihar as also migrants coming from other states to Purnia district. It will appear that the district received only 1.2 percent of the total migrants coming from other states to Bihar in 1991 and 6.6 percent in 2001 (1,290 out of 1,049,969 in 1991 and 104,335 out of 1,582,339 in 2001). The state of West Bengal and Uttar Pradesh in 1991 and Uttar Pradesh alongwith Jharkhand were the major contributors of migrants to the state in 2001. For the district of Purnia West Beengal, Uttar Pradesh and Rajsthan in 1991 and Uttaranchal alongwith Orrissa, Jharkhand and Chhatishgargh in 2001 have been the major contributors. Nine major contributing states in 1991 and 14 such states in 2001 contributed 93.4 and 97.2 percent of the total migrants to the state of Bihar respectively. In case of Purnia district 13 major states in 1991 and only 10 such states in 2001 contributed over 96 and 94 percent of total migrants to the district respectively.

The data presented in Annexure-V (A) show religion wise distribution of population according to 1991 and 2001 Censuses. It may be observed that Hindus have been numerically the most important religious community in the state of Bihar during both the Censuses as it accounts for as much as 82.4 and 83.2 percent of the state's population in 1991 and 2001 respectively. The Muslims come next with 14.8 and 16.5 percent respectively. Christians had been the third most important religious community though it proportions remained only 1.0 percent in1991 and 0.1 percent in 2001. Sikhs, Jains and Buddhists remained very small in proportion as each of these constituted less than even 1.0 percent of the population of the state during both the Censuses. Persons categorized under "Other Religions & Persuasions" comprised 1.7 and 0.1 percent of the state's population during 1991 and 2001 Censuses.

In Purnia district the proportion of Hindus to the total population of the district remained 65.3 percent in 1991 and 62.3 percent in 2001 which were comparatively much lower than the respective state averages. Muslims had been, however, in good proportions as they constituted 34.5 and 36.8 percent of the district's population in 1991 and 2001. The proportion of population of other religious communities remained almost negligible in the district of Purnia during both the Censuses as Hindus and Muslims taken together comprised over 99 percent of the total population of the district during both the Censuses.

The above Annexures furnish religion wise distribution of population for the district of Purnia and its C.D. Blocks in 1991 and 2001 Censuses.

As already observed in Annexure V (A) of 1991 and 2001Census, though the proportion of Hindus in the district of Purnia is highest as compared to other religious communities still it was seen that Muslims also formed a big chunk of population in the district. Among the C.D. blocks, while in Banmankhi, Barhara, Dhamdaha, Bhawanipur and Rupauli the proportion of Hindu population is above 70 percent to the total population, the highest being in Barhara block (92.1%), in the C.D. Blocks of Baisa, Amour, Baisi and Kasba the relative proportions of Hindus are found to be less, ranging between 25.1 percent in Amour to 52.6 percent in Kasba . In these 4 C.D. blocks Muslims constitute a bigger chunk of population varying between 70.0 percent in Baisa to 47.3 percent in Kasba. This trend continued in various CD Blocks during 2001 Census also. The existence of other religious communities in various C.D. Blocks of the district is insignificant as their proportions to total population are almost negligible in both the Censuses.

ANNEXURE - VI (A)

Annexure V1 (A) furnishes information regarding distribution of population by marital status for the state of Bihar in absolute number as per 1991 and 2001 Censuses while Annexure (B) shows percentage distribution of population by marital status for the state. The Annexures V1 (C) and V1 (D) presented above give corresponding figures and percentages for the district of Purnia.

It shall be evident from Annexures V1 (A) to V1 (D) pertaining to 1991 and 2001 Censuses that the state of Bihar as well as Purnia district have relatively higher proportion of males in the "never married" category. The proportion of females, however, is found to be larger in the "married" category. This may, perhaps, be attributed to the fact that women, generally, enter into marital knot at comparatively younger ages than males. As against 54.2 and 56.5 percent of "never married" males in 1991 Census and 56.3 and 58.7 percent in 2001 Census in Bihar state and Purnia district respectively, the corresponding proportion among "never married" females are seen to be 45.2 and 47.3 percent in 1991 and 47.3 and 50.2 in 2001 Census. Females are found to be higher in proportion in the "married" category than males both in the state and the district in both the Censuses, the percentages being 49.8 and 47.4 percent in 1991 and 47.8 and 44.6 percent in 2001. The corresponding figures for males in 1991 and 2001 Censuses stand at 43.6 and 41.8 and 41.6 and 39.8 respectively. So far the proportion of "widowed" is concerned, it transpires from the tables pertaining to 1991 and 2001 Censuses that female "widowed" are higher in proportion than male "widowed" both in the state as well as in the district. The proportion of "divorced or separated" is found to be negligible both in case of males and females in the state of Bihar and Purnia district.

While analyzing tables for 1991 and 2001 Censuses regarding marital status of the male and female population by age groups, one notices that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than in males. It may, however, be interesting to note that proportion of married males and females in the age group 10-14 is less in Purnia district as compared to the state average figure in both the Censuses. It is also discernable from the table that child marriage is more prevalent in the rural areas i.e., villages of the state and the district than the urban areas i.e., towns.

It is further noted from the tables pertaining to both 1991 and 2001 Censuses that the proportion of "married" females in the state as a whole and the district is relatively higher upto the age group 30- 34 while above these age group the proportion of "married" males are found to be higher than females.

Annexures VII(A),VII (B), VII (C) and VII (D) furnish position of literacy and level of education by various age –groups of population for the State of Bihar and the district of Purnia respectively as per data collected during 1991 and 2001 Census. Among these, Annexures VII (A)and VII (B) provide literacy position absolute in numbers whereas Annexures VII (C) and VII (D) give these figures in terms of percentages.

Literacy is one of the most important characteristics of population on which information are collected during Censuses. The concept of literacy adopted in Census has already been explained in the beginning of this volume.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The rate of literacy for Bihar(excluding population of 0-6 years) in 1991 stood at 38.5 percent which rose to 47.0 percent in 2001. The corresponding proportion for Purnia district in 1991 and 2001 remained 28.5and 35.1 percents respectively.

It can be seen from the annexures that 22.4 percent males and 28.0 percent females in 1991 were literate without educational level in Purnia. The corresponding proportions in 2001 including Below Primary remained 32.2 and 37.7 percent respectively. The proportions of Primary passed Males and females in 1991 were 20.8 and 24.4 percents respectively which became 25.9 and 29.1 percent in 2001 in the district. In 1991 there were 26.3 and 29.2 percent males and females who had passed middle whereas in 2001, the corresponding figures remained lower at 13.1 and 12.3 percent respectively. The proportion of those who had passed Matriculation and above in 1991 were 30.4 and 18.4 percent for males and females respectively in the district, the corresponding figures in 2001 remained 28.5 and 20.7 percent only which were lower than the previous Census. Males out numbered females in the matter of literacy particularly in higher levels of education comprising of Middle (except in 1991) and Matriculation and above.

ANNEXURE - VIII

PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Purnia		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Hindi	882,863	34.7
Hindi	14,524,035	17.5	Urdu	739,176	29.1
Magadhi/Magahi	12,132,383	14.6	Maithili	323,292	12.7
Maithili	11,830,684	14.3	Santali	71,239	2.8

Marwari	27,152	0.0	Kurmali Thar	2,568	0.1
Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	351,571	13.8
Total Population	**82,998,509**	**100.0**	**Total Population**	**2,543,942**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Purnia district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returned by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population whereas in the district of Purnia 29.1 percent of the district population have returned it as their mother tongue. Hindi as mother tongue has been returned by 34.7 percent of Purnia district's population. Maithili has got third position with 12.7 percent of the district population having returned it as their mother tongues. Except these languages analysed above both for the state and the district, other have been returned by insignificant proportions or very low proportion of the respective population of the state and the district as mother tongues as per Census 2001.
