Director of Census Operations, Bihar

District Map

Manihari Ghat

Manihari village situated 25 km. south of district headquarters – Katihar on the bank of Ganges is headquarters of C.D. Block and Sub-division of the same name.

The importance of Manihari increases further due to Manihari Ghat which is situated at the bank of Gangage. A Lord Shiva temple is situated south of Police Station on the bank of Ganges which is said to be about 1000 years old. Manihari is linked with Sahebganj district (Jharkhand) through water way steamer and boat services .

Hindu devotees in large number take dip at holly Ganges on the occasions of Sun and Moon eclipse, Makar Sankranti, Kartika Purnima, Mahashivaratri etc. and offer prayer. A fair is also held on the eve of Maghi Purnima every year at this place.

Annexure VIII:	Distribution of different mother tongues returned in 1991 Census	909

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Dated: 17.10.2006

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

District Highlights – 2001 Census

1. Katihar ranks 16th in terms of population (23,92,638) and 12th in terms of area (3,057 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Katihar is the 24th densely populated district in the state with 783 persons per sq.km as against the state's 881.
3. Katihar ranks 15th in terms of sex-ratio (919) against the state's 919.
4. There are 253 uninhabited villages (out of 1,543 total villages) in the district of Katihar.
5. Muradpur (Part in Sameli) under Kursela C.D. Block is the most populated village (31,123) and Sitalpur Milik (under Barsoi C.D. Block) is the least populated village (2) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in primary sector.
7. C.D. Block Kadwa has the highest number of villages (264) in the district and C.D. Block Mansahi has the lowest number of villages (26).
8. Muradpur (Part in Kursela) under Sameli C.D. Block has the largest area (5,092 hectare) and Alhanda Milik (under Kadwa C.D. Block) has the smallest area (1 hectare) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available in 94.0 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census

for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/

Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The district of Katihar, which acquired the status of an independent district on the 2nd October, 1973 has a rich heritage and close linkage with the parent district of Purnia. Katihar Sub-division in the old Purnia district was upgraded as an independent district. The district of Katihar has 3 sub-divisions viz., Katihar, Barsoi and Manihari consisting altogether 16 Community Development Blocks.

The district is bounded on the north by Purnia district and part of West Bengal, on the south by Bhagalpur and part of Jharkhand state, on the east by the state of West Bengal and on the west again by the district of Purnia.

The district takes its name after the chief town of Katihar which probably derived its name from a small village on the north-east called Dighi-Katihar where there is a big tank (dighi) excavated for the troops, when the soldiers of the Nawab of Purnia fought with the troops of Nawab of Murshidabad.

Katihar was a part of Purnia district and the latter was constituted in Circa 1813 along with Malda district. Under the Mughal rule the district was constituted of Sarkar Tajpur, east of the Mahananda and Sarkar Purnia west of the river. These Sarkars belonged to Subah Bengal. There were also five Mahals of Sarkar falling in Subah Bihar. The old stream of the Kosi at that time formed the boundary between Subah Bihar and Subah Bengal .

Early history

In the ancient times the district apparently formed a part of the Kingdom of Anga and covered the area west of the Mahananda. Anga was an independent kingdom till the sixth century B.C. and was traditionally at war with Magadha. During the lifetime of Buddha it was annexed by Bimbisara, the ambitious ruler of Magadha (circa 519 B.C.). Thereafter its history is merged with that of the Magadhan empire. In later times the district formed a part of the empire of the Imperial Guptas which in 340 A.D. under Samudra Gupta, extended right up to Assam. The Gupta empire was shattered by the invasion of the Huns, and the district appears to have passed into the hands of Baladitya, King of Magadha. From the 9th to the 12th century, the district remained under the Pala Kings, and on their decline came under the sway of the Senas.

Muslim period

The province of Bihar came under Muslim rule after Bakhtiyar Khilji conquered Bihar town, then capital of Bihar, towards the close of the 12th century. His successor Ghyasuddin Iwaz extended the limits of the territory to include virtually the whole of Bihar, Katihar must also have come under Muslim rule in the beginning of the 13th century. However, since it formed an outlying part of the territory and revenues from it were not easily collected, the control remained rather loose. Thus very little is known of the district till the 17th century.

During the Mughal rule, the district formed a military frontier province under the rule of a Faujdar, who was nominally subordinate to the Subahadar. He also combined the revenue powers of Amildars. Towards the end of the 17th century, Oswal Khan was appointed as Faujdar, with the title of Nawab. He was also in command of the frontier army and the fiscal duties of Amil or Superintendent of the revenues. He was followed by three other Nawabs. Saif Khan became Governor in 1722, he was sent to Bengal by the Emperor Aurangzeb at the request of the then Nawab of Bengal, Murshid Kuli Khan, who wished to bring this outlying portion of the province under more effective control. He brought refractory Zamindars to look including the local chief Durjan Singh, son of Bir Shah. He also forced the hill tribes back to the Tarai, cleared the jungles and enlarged the country and its resources. He rendered his full support to Ali Vardi Khan who became the new Nawab of Bengal. Saif Khan died in 1750 and was succeeded by his son Fakhruddin Hussain Khan. The latter proved a poor administrator and squandered much of the wealth accumulated by his father. Nawab Ali Vardi Khan accordingly had him replaced by his own nephew and son-in-law, Saiyed Ahmad Khan. Saiyed Ahmad Khan proved an efficient administrator and was held in great esteem on account of his noble living and admired for his just and fair dealings with all. He died in 1756, a few months before the death of Nawab Ali Vardi Khan. Shaukat Jang

succeeded his father as Governor and was given the whole of Purnia (including the present district of Katihar) as revenue free Jagir by the Nawab Ali Vardi Khan was succeeded by Siraj-ud-daula who was apprehensive of the designs of his cousin, Shaukt Jang, might have had for grabbing the Diwani. In the battle, which ultimately followed, Shaukat Jang was defeated, mainly due to his lack of any clear-cut strategy and he himself was slain in battle (1756).

On Siraj-ud-daula's death (July, 1757) Nazir Ali Khan took possession of the territory and Mir Jafar became the Nawab of Bengal. He sent Khadim Hussain Khan who took over control and became the Governor of Purnia.

British period

The district passed into the hands of the British in 1770 when Mohammad Ali Khan was the Governor of Purnia. He was replaced by Ducarrel the first English Supervisor or Collector of the district. The year was marked by a severe famine in which, according to European Supervisors, almost half of the ryots lost their lives. In 1872 the district was transferred from the control of the Bihar and Banaras Board of Commissioners to the Calcutta Board of Revenue. The early years of the British rule were largely directed to establish law and order and setting up of the revenue administration on sound footing.

The next event of great importance is the rebellion of 1857. The movement of 1857 led to measures for effective administrative system. The European planters were authorized to maintain their own protective forces from which sprang the Auxiliary Force which was ultimately converted into the Bihar Light Horse.

The district suffered an earthquake in 1897. In the same year a scheme for taming the turbulent Kosi was mooted by the engineers though it was actually taken up only after the country attained independence.

The district of Katihar played an important role in the agrarian reforms and freedom struggle. Prominent lawyers of the district gave up their practice and joined the Non Co-operation Movement of 1921. A National School was started at Katihar. Many people were arrested in connection with Salt Satyagraha. The Quit India Movement in 1942 took a violent turn in the district as elsewhere. Extensive damages were caused to the railway line between Katihar and Barsoi. A large assembly of over 10,000 persons damaged many government buildings at Katihar and their attempt to overrun the police station could be foiled only after police firing. The administration took strong and repressive measures but could not suppress the freedom movement.

(iii) Administrative set up

Katihar district forms the part of the North Bihar Plain. It is surrounded on the north and west by the districts of Purnia and Bhagalpur, on the east by the state of West Bengal and on the south by the district of Bhagalpur and the state of Jharkhand. There are altogether sixteen Community Development Blocks in the district namely Falka, Korha, Hasanganj, Kadwa, Balrampur, Barsoi, Azamnagar, Pranpur, Dandkhora, katihar, Mansahi, Barari, Sameli, Kursela, Manihari and Amdabad. The district consists of three sub-divisions namely, Barsoi, Katihar and Manihar. Katihar(M), Manihari(NA) and Raghunathpur(CT) are the three towns in the district. Total number of villages in the district are 1543. Katihar (M) is the headquarter of the district.

District Magistrate (D.M) is posted in the district who is the top most officer of revenue and civil administration. He belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. Additional District Magistrate (ADM) and other officers are posted in order to help D.M. in the administration. The district has three subdivisions headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are sixteen C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration :

The Judges and Munshif magistrates are posted at district and sub-divisions who administer and deliver justice of different kind.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration :

The Superintendent of Police, Katihar is the head of the district police administration who is generally from the Indian Police Service. In the subdivisions of

the district, the Deputy Superintendents of Police are posted who keep control on police administration and belongs to Bihar Police Service.

(iv)Physical Features

The land of the district is formed of soft clayey soil along the rivers Ganga and Mahananda (in the south and east of old Purnia district) and hard clayey soil along the banks of the Mahananda and Ganga. This part of the district is very fertile. The surface alluvium consists of a deep bed of sand. All the rivers flow out of the Himalayas and deposit silt on a gradually subsiding surface. There is a small hill of calcareous belt called Chotapahar near Manihari.

The Ganga, the Mahananda and the Kosi are the important rivers flowing through the district. However, the Ganga and the Kosi had their devastating impact on the district. The Kosi had the inevitable reputation as a river of illo men and it was notorious for the rapidity of its stream, the dangerous and uncertain patre of its bed and the desolation caused by its flood. It was known as the sorrow of Bihar. However, it has been tamed to a large extent after the implementation of Kosi project and erection of the Kosi Barrage.

Climatic conditions

The district has a humid climate. The winter season starts in November and lasts till February. January is the coldest month when the temperature comes down to 8^0C. March to mid June comprise the hot weather months. May is the hottest month when the temperature rises to about 43^0C. Rains set in the second half of June and last till September.

The average annual rainfall of the district is 1,422 mm (56"). Nearly 80 per cent of the total annual rainfall is received during the monsoon period. The district gets some winter rains also.

Flora and Fauna

The forests and the wild life have almost completely disappeared by now. Some teak, *sal*, *sakhua*, *sheesham*, *palas*, *pipal* and *semal* trees are still found. Formerly the old Purnia district (including the present Katihar district) was a paradise of sportsmen in search of wild game.

Mines and Minerals

The district has no deposits of any specific minerals. There is a nodular limestone belt at a detached hill near Manihari called Chotapahar. According to Wellerius, it is an aggregate rock, composed of many small pebbles of nodules united by a common cement. The calcareous rocks might be having its natural cementing quality. Sufficient sand is also available in the district.

Land use pattern

The district is basically agricultural in character. The major portion of the district is covered by non-calcareous, non-saline soil of recent alluvium formation. The soil is of low to medium fertility. The alluvium is composed of silt, clay and fine sand. The surface alluvium consists of a deep bed of sand.

The principal agricultural crops of the district are paddy, wheat, jute, maize, potato and oil seeds. Although there are some variations from area to area depending upon the availability of irrigational facilities, double-cropping is in vogue in most of the areas.

Irrigational facilities

Katihar is one of those districts where irrigation is practised in a very limited way and is not much needed either. The need of a systematic irrigation had not been felt before because ordinarily the rainfall is ample and the soil in most parts retains the adequate moisture. The rivers and rivulets also assured abundant supply of water. Still after the independence considerable attention has been paid to the provision of irrigational facilities in the district by means of flood control measures as well as irrigational channels etc. The gigantic Kosi project has resulted in complete transformation, as it were, of the district. In addition to the major irrigational scheme of Kosi, irrigational potentiality of the district has also been enhanced through the implementation of various medium and minor irrigation schemes, surface percolation wells, rahat pumps and low lift pumps, etc. Out of the 16 C.D.Blocks of the district, so far only 5 C.D.Blocks viz., Katihar, Korha, Falka, Barari and Manihari have assured irrigation in some areas. The rest have to depend, naturally, on various other sources of irrigation.

Industrialisation

The industries which have completely died out in the district are indigo industry and manufacture of *bidri* (a compound metal). Some of the old families have still got beautiful *bidri* pieces of flowers with eight petals interspersed with small spiral leaves inlaid in gold or silver. The decline of aristocracy was one of the reasons for the decay of this industry.

Katihar has now become an industrial town with all its advantages and disadvantages. Jute mills and a few other industrial concerns such as flour and rice mills have changed the face of the town. There are two jute mills, viz., Katihar Jute Mill and R.B.H.M. Jute Mill situated at Katihar. Both of them manufacture jute twine, guny bags and hessian. Katihar is the only place in the State where jute mills are located. Jute bailing presses, and industry subsidiary to the Jute-Mills, are numerous in the district.

Livestock

Livestock is very important in a district like Katihar with a predominantly agricultural economy. The cattle of Katihar district are generally not of a very superior breed and are small in size. The development of the breed of cattle and buffaloes is essential for agricultural purposes, and enhancing the production of milk. There has been a concerted move by the State Government to tackle this problem. The All India Key Village Scheme sponsored by the Government of India is in operation in the district. The scheme aims at improving the general efficiency of the cattle by adopting scientific methods of breeding, feeding, disease control and marketing of milk and milk products. In order to improve the breed of cattle quickly and also at low cost, artificial insemination centres with sub centres at various places have been opened in the district.

The district regularly supplies meat and dairy products to Calcutta and Siliguri. Thus animal husbandry provides a good source of additional income to the farmers of the district and there is considerable scope for enhancing their income from this source if facilities for scientific dairy farming are provided.

Fisheries

Fishery Development Scheme has been undertaken by the Fishery wing of the Agriculture Department. Efforts have been made for the collection of spawn and the distribution of fry. The demand for fry has been increasing and a number of nursery tanks are in use. Katihar district is noted for its fish wealth and offers excellent opportunity for proper development of fisheries. Fish is also exported to other places from Katihar.

Trade and Commerce

Katihar is essentially an agricultural district. It has an ideal moist climate and low lying swamps that are suitable for the cultivation of jute and rice as also for pisciculture. The availability of jute in abundance has naturally led to the establishment of two jute mills at Katihar.

The trade and commerce of the district has also been conditioned by geographical factors. Katihar is essentially a border district and has got important trade centres at Katihar, Manihari and Barari. Trade is carried on with West Bengal and Nepal through Katihar town. Jute which is grown in abundance in Katihar district in Bihar is purchased, imported and exported through this town. It is a big market for cloth, glass-ware, glass-bangles, bidi leaves, aluminium and brass utensils, foodgrains, timber and wooden furniture, clay-images and idols etc.

Communication facilities

The district of Katihar is well served by a network of roads. The roads are classified as the national highways, state highways, major district roads and village roads. They are maintained by the Public Works Department, Rural Engineering Organisation, Zila Parishad and the Municipalities. Katihar town is at the junction of roads from all sides. It is connected via Purnia with distant places like Nepal, WestBengal by metalled roads. It is also connected with the interior of the district by metalled road. Buses and trucks ply on these roads between Katihar and distant places.

Katihar is the district headquarters for the North Eastern and North East Frontier Railways and a large railway colony is located here. It is now a very big junction of railways and the busiest line meter gauge in Bihar. Broad gauge line has also been extended upto Katihar.

With the progress in rail and road communications,

there is very little boat traffic now. It is mainly during the rainy season that goods are transported by boat in certain areas. Manihari ghat is the important place for boat traffic.

The district has a landing ground at Katihar which is suitable for small aeroplanes only.

Electricity and Power

The district receives most of its power supply from the State Electricity Board, which has power station located at Katihar. Both the towns of the district, Katihar and Manihari have electricity. In the rural areas, the pace of electrification is comparatively slow. However, considerable attention is now being paid to rural electrification and villages are being electrified.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household,

it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together

were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.--For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:—

i) a city or town with one or more contiguous outgrowths;—

ii) two or more adjoining towns with their outgrowths; and—

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste

resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local

septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that

will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 : Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 : Probability of dying between birth and age 2.

q5 : Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration),

(iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Katihar district during 1991 was 18,25,380 Hindus constitute over 59.9 per cent (10,93,857persons) of the population in the district followed by Muslims 39.9 percent (7,27,566 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Katihar district during 1991 was 1,825,380. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Katihar district, Hindi, the main mother tongue of the district was returned by 61.5 percent (1,122,555 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Katihar district, was 26.4 percent (481,750 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Katihar during 1991 Census

The population of the scheduled castes in the district of Katihar was 160, 046 according to 1991 census. Numerically the five most prominent scs in the district were (i) Musahar(48,431) (ii) Dusadh, Dhari,Dharhi(30,666) (iii) Hari.Mehtar, Bhangi(29,927) (iv) Chamar, Mochi(20,609) and (v) Dhobi(7,162). While Musahar constituted the maximum proportion of Scheduled Castes population, the percentages being 30.3 (more than one forth of the total Scheduled Castes population) Dusadh and Hari/,Mehtar though numericially second and third in order comprised only 19.2 and 18.7 percent of the Scheduled Castes population in the district.The Chamar comprised 12.9 percent of the Scheduled Castes population in the district in through numerically for postion of Scheduled Castes population in the district .The dhobi are much less in number as compared to the other four Scheduled Castes mentioned above with only 4.5 percent of the total scs described above as their percentages to total sc population was less than even 2.0 percent except dom/ dhanged, chaupal and turi whose perceutages were 3.2,3.0 and 2.3 respectively.

The population of the scheduled tribes in the district of Katihar during 1991 Census was 101,792. Numerically the five important Scheduled Tribes were namely (i) Santal (ii) Oraon (iii) Kharwar (iv) Munda and (v) Lohara/Lohra. Santal had 54,233 populations, which constituted 53.3 percent of the Scheduled Tribes population in the district. The Oraon with 17,250 populations constituted 16.9 percent of the ST population. The Kharwar, which were 12,377 in number constituted 12.2 percent of the ST population. The Munda comprised 7,527 persons and constituted 7.4 percent of Scheduled Tribes population while The Lohara with 4139 populations constituted 4.1percents of the total Scheduled Tribes Population in the district. The other Scheduled Tribes were almost negligible in proportion except The Kisan whose percentages was 1.6 percent respectively.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Sitamarhi district is 23,92,638 comprising 12,43,872 males and 11,45,766 females and constituting 2.9 percent of the State population spread over 3.2 percent of the area of the State and in the 16 C.D.Blocks of the district. Kadwa is the most populous where as Hasanganj is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

	District Total:	**1,825,380**	**1,653,761**	**171,619**	**2,392,638**	**2,174,361**	**218,277**	**31.1**	**31.5**	**27.2**	**9.4**	**9.1**

This table shows the rise in population during 1991-2001 decade. The population has been increased by 31.1 percent in the district. The proportion of increase in population in rural area is 31.5 percent where as incase of urban it is 27.2 percent only. Kursela C.D. Block has shown the rise in population by 205.4 percent which is the leg Rest. Whereas Sameli C.D. Block has shown decrease of population by 13.2 percent. The percentage decadal variation 1991-2001 for Falka C.D. Block (31.9 percent), Korha C.D. Block (36.1 percent), Kadwa C.D. Block (33.4 percent), Balrampur C.D. Block (38.0 percent), Pranpur C.D. Block (32.8 percent), Dhandkhora C.D. Block 38.7 percent), Katihar C.D. Block (44.3 percent) and Mansahi C.D. Block (33.0 percent) is higher than the district average in rural areas of this district. The C.D. Blocks having lower decadal growth rate than the district (rural) decadal growth rate (31.5 percent) are Hasangang (20.6 percent), Barsoi 28.9 percent), Azamnagar (29.9 percent), Barari (28.7 percent), Manihar (26.1 percent) and Amdabad (30.8 percent). The decadal growth between 1991-2001 for urban areas of the district is 27.2 percent. The decadal growth rates of Katihar urban area and Manihari Notified Area are 23.6 percent and 26.4 percent respectively. There are three urban areas viz. Katihar urban area, Manihari Notified Area and newly created census town Raghunathpur having urban population proportion of 72.1 percent, 14.6 percent and 2.1 percent respectively. It is worth to mention here the Katihar urban area includes Katihar Municipality and Katihar Railway Colony as its outgrowth.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/C.D.Block	Total number of inhabited Villages	Total rural population Persons	Males	Females	Number and percentage of villages	Population less than 200 Males	Females

	District (Rural) Total:	**249 (19.3)**	**395,330**	**366,122**	**54 (4.2)**	**193,031**	**177,258**	**21 (1.6)**	**160,919**	**146,692**

The table shows the number and percentage of inhabited villages in specified population size ranges with the related population. It may be observed that the maximum number of villages (312) in the district lie in the population range of 1000-1999 accounting for 24.2 percent of the total villages followed by villages (277) in population range of 500-999 accounting for 21.5 percent of the total inhabited villages. The percentages of population in above two population ranges are 20.2 percent and 9.4 percent respectively. Altogether 249 villages accounting for 19.3 percent of the total inhabited villages having the highest percentage of population (35.0) lie in the population range of 2000-4999. Again 223 villages accounting for 17.3 percent of the total inhabited villages lie in population range 200-499. These villages account for 3.6 percent of the total population. Fifty four villages accounting for 4.2 percent of the total inhabited villages lie in the population range of 5000-9999. The population percentage of these village is 17.3 only. Altogether 21 villages accounting for 1.6 percent of the total inhabited villages lie in the population range of 10,000+ having population share 14.1 percent of the total population, 154 villages accounting for 11.9 percent of the total inhabited villages lie in the population range of less than 200. It is having population share of 0.6 percent of the total population.

Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	9	0.7	21,900	1.0
11-20	5	0.4	52	0.0
21-50	17	1.3	3,014	0.1
51-100	21	1.6	2,504	0.1
101-200	56	4.3	20,738	1.0
201-300	73	5.7	40,751	1.9
301-500	183	14.2	161,983	7.4
501 +	925	71.7	1,892,296	87.0
Not known	1	0.1	31,123	1.4
District Total:	**1,290**	**100.0**	**2,174,361**	**100.0**
Population Density (Rural) of the district:			**786.5**	

The data presented in this table highlight the fact that maximum number of villages in Katihar district lie in density range (per square kilometer) of 501+ with 71.7 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 14.2 percent. Altogether 73 villages (5.7 percent) lie in the density range 201-300 and 56 villages (4.3 percent) lie in the density range of 100-200. There are 21 villages (1.6 percent) lie in the density range of 51-100 and 17 villages (1.3 percent) lie in range of 21-50. Remaining 14 villages lie in the population range of 0-20 villages account for 1.1 percent of the total villages.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	962	961	1,018
1911	1,051	1,056	942	963	963	995
1921	1,020	1,027	886	941	946	755
1931	995	1,005	820	936	941	760
1941	1,002	1,012	842	949	964	640
1951	1,000	1,010	859	930	950	663
1961	1,005	1,020	832	931	948	714
1971	957	968	833	925	938	772
1981	948	959	852	928	942	808
1991	907	913	857	909	916	844
2001	919	926	868	919	924	869

Note: Sex ratio has been defined here as the number of females per 1000 males.

This table shows the sex ratio of the State as well as the district between 1901-2001. The sex ratio of the district is at par with the State in total population. In rural areas sex ratio of the district is (924 females per 1000 males) is lower than the State (926 females per 1000 males) whereas urban sex ratio of the district (869 females per 1000 males) is higher than the State figure (868 females per 1000 males). It would be observed in this table that the sex ratio shows rising trend in both rural and urban areas.

In rural areas while it was 916 females per 1000 males in 1991 Census it has been reaches to 924 females per 1000 males in the 2001 Census. In urban areas the same trend can be observed.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Falka	927	927	
2	Korha	922	922	
3	Hasanganj	945	945	
4	Kadwa	928	928	
5	Balrampur	924	924

11	Mansahi	919	919	

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001 (*Concld.*)

Serial number	Name of C.D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
12	Barari	912	912	
13	Sameli	922	922	
14	Kursela	888	888	
15	Manihari	908	911	889
16	Amdabad	934	934	
	District Total:	**919**	**924**	**869**

As already discussed in table-5 that the sex ratio in respect of rural area is 924 females per 1000 males and in respect of urban areas it is 869 females per 1000 males. Among the C.D. Block as envisaged from table - 6 shows that Hasanganj has the highest sex ratio (945 females per 1000 males) and the lowest in Katihar C.D. Block (910 females per 1000 males). The C.D. Blocks having higher sex ratios are Hasanganj (945 females per 1000 males), Barsoi (937 females per 1000 males), Azamnagar (929 females per 1000 males), Dandkhora (928 females per 1000 males), Amdabad (934 females per 1000 males) and Falka (927 females per 1000 males). The C.D. Blocks with lower sex-ratio the state are Korha (922), Pranpur (920), Katihar (910), Mansahi (919), Barari (912), Sameli (922), Manihari (911) and the lowest is in Kursela (888 females per 1000 males). The sex

ratio of Balrampur C.D. Block is at par with the state rural ratio (924 females per 1000 males). In urban area Manihari Notified Area has the highest sex ratio (889 females per 1000 males). Katihar urban Agglomeration with 868 females per 1000 males and newly created Raghunathpur census town (constituent unit of Barsoi C.D. Block) with 832 females per 1000 males have lower sex ratio than the State urban average.

TABLE 7 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio
1	2	3
1	Falka	927
2	Korha	922
3	Hasanganj	945
4	Kadwa	928
5	Balrampur	924
6	Barsoi	937
7	Azamnagar	929
8	Pranpur	920

TABLE 7 : SEX RATIO BY C.D. BLOCKS, 2001 (*Concld.*)

Serial number	Name of C. D. Block	Sex ratio
1	2	3
9	Dandkhora	928
10	Katihar	910
11	Mansahi	919
12	Barari	912
13	Sameli	922
14	Kursela	888
15	Manihari	911
16	Amdabad	934
	District (Rural) Total:	**924**

The above table shows the sex ratio in C.D. Blocks of Katihar district. As for the rural in Katihar district the sex ratio is 924 females per 1000 males. Within the district the sex ratio varies from 945 in Hasanganj C.D. Block to 888 in Kursela C.D. Block. The sex ratio of Balrampur C.D. Block is at par with the district having 924.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	20	1.6	1,588	0.1
700-749	11	0.9	1,251	0.1
750-799	25	1.9	6,514	0.3
800-849	75	5.8	50,373	2.3
850-899	255	19.8	518,557	23.8
900-949	465	36.0	1,093,879	50.3
950-999	270	20.9	404,034	18.6
1000-1099	131	10.2	89,815	4.1
1100+	38	2.9	8,350	0.4
District Total:	**1,290**	**100.0**	**2,174,361**	**100.0**
Sex ratio (Rural) for District:			**924**	

It may be observed in this table that maximum proportion of villages in this district lies in sex ratio range of 900-949 and these villages account for 36.0 percent of the total inhabited villages. This further reveals that these villages which fall in this sex ratio range account for 50.3 percent of the total rural district population. Altogether 270 villages (20.9%) lie in the sex ratio range of 950-999 and these villages account for 18.6 percent of the total rural population. Similarly 255 villages (19.8%) fall in the sex ratio range of 850-899 and these villages account for 23.8 percent of the total rural population. Table further shows that 131 villages (10.2%) fall in the sex-ratio range of 1000-1099 which account for 4.1 percent of the rural population and 75 villages (5.8%) lie in the sex ratio range of 800-849 accounting for 2.3 percent of total rural population. 38 villages (2.9%) falling in sex ratio range of 1100+, 25 village

(1.9%) falling in sex ratio range of 750 - 799 and 11 villages (0.9%) falling in sex ratio range of 700-749 account for very small proportion of the total rural population which can be observed in this table.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A/ Town	Urban status of town	Sex ratio
1	2	3	4
1	Katihar	UA	868
2	Katihar	M+OG	868
3	(i) Katihar	M	871
4	Manihari	NA	889
5	Raghunathpur	CT	832
	Sex ratio (Urban) for the district:		**869**

This table shows the sex ratio in urban agglomerations/towns of the district of Katihar. There are three urban units viz., Katihar(UA), Manihari(NA) and newly created Raghunathpur census town. Katihar(UA) includes Katihar (M) and Katihar Railway Colony as it outgrowth. The sex ratio of the urban population of Katihar district is 869 females per 1000 males. The sex ratio varies between 889 and 832 in the urban units of the district. Manihari(NA) has the highest sex ratio of 889 females per 1,000 males followed by Katihar(UA) with sex ratio of 868. Newly created Raghunathpur census town has the lowest sex ratio of 832 females per 1000 males.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

This table shows the sex ratio in the age group 0-6 for the district and C.D. Blocks. It is observed in this table that sex ratio in the age group 0-6 for rural areas of the district is 969 females per 1000 males. The highest sex ratio in age group 0-6 (1008) can be observed in Mansahi C.D. Block followed by Manihari C.D. Block (981). Besides these two C.D. Blocks where the sex ratio in 0-6 age group is higher than district rural average are Korha (978), Kadwa (975), Balrampur (973), Dandkhora (972) and Amdabad (975). The sex ratio in age group 0-6 of Sameli C.D. Block is at per with the district average (969). The lowest sex ratio can be seen in Hasanganj C.D. Block is 936 females per 1000 males. The C.D. Blocks having lower sex ratio than the district average are Falka (966), Barsoi (955), Azamnagar (962), Pranpur (967), Katihar (965), Barari (967) and Kursela (944).

The average sex ratio in age group 0-6 for the urban areas of the district is 932 females per 1000 males. The highest sex ratio may be observed in Raghunathpur census town (940 females per 1000 males) which is in the jurisdiction of Barsoi C.D. Block. Katihar urban area has the same sex ratio (932) as can be seen for the urban areas of district. Manihari (NA) is the lowest sex ratio (924 females per 1000 males).

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age Group
		Persons	Males	Females	
1	2	3	4	5	6
1	Falka	27,006	13,738	13,268	966

14	Kursela	11,367	5,846	5,521	944
15	Manihari	27,751	14,007	13,744	981
16	Amdabad	29,019	14,692	14,327	975
	District (Rural) Total:	**489,990**	**248,882**	**241,108**	**969**

The sex ratio in age group 0-6 for the rural area of the district is 969 females per 1000 males. The comparative analysis of these data has already discussed in table 10.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	71	5.5	2,612	0.5
700-749	30	2.3	3,059	0.6
750-799	57	4.4	10,585	2.2
800-849	90	7.0	26,956	5.5
850-899	130	10.1	50,802	10.4
900-949	195	15.1	101,667	20.7
950-999	179	13.9	120,442	24.6
1000-1099	284	22.0	132,193	27.0
1100+	254	19.7	41,674	8.5
District (Rural) Total	**1,290**	**100.0**	**489,990**	**100.0**
Sex ratio (Rural) for District:		**969**		

It is observed in the above table the 284 inhabited village accounting for 22.0 percent of the total inhabited villageS lie in the sex ratio range of 1000-1099 in the age group of 0-6. Similerly254 villages (19.7%) are in the sex ratio range of 1100+. 195 inhabited villages (15.1%) are in the sex ratio range of 900-949. 179 inhabited villages (13.9%) lie in the sex ratio range of 950-999. 10.1 percent of inhabited villages accounting for 130 villages are in the sex ratio range of 850-949. 90

inhabited villages (7.0%) are in the sex ratio range of 800-849. 57 inhabited villages (4.4%) are in the sex ratio range of 750-799. 30 inhabited villages (2.3%) are in the sex ratio range of 700-749 and 71 inhabited villages (5.5%) lie in the sex ratio range of less than 700.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

	District(Urban) Total		**35,459**	**18,357**	**17,102**	**932**

This table shows the sex ratio of population in the age group of 0-6 of urban agglomerations/towns of Katihar district. There are three urban units in this district which include Katihar urban agglomeration also. The constitute units of Katihar(UA) are Katihar(M) and Katihar(Railway Colony) as its outgrowth. The average sex ratio in the age group of 0-6 of urban areas of this district is 932 females per 1000 males. Raghunathpur census town with sex ratio of 940 females per 1000 males in the age group of 0-6 is the highest. Katihar(UA) with sex ratio of 932 and Manihari(NA) with sex ratio of 924 are below the sex ratio average of the district (932).

This table shows the number and percentage of scheduled castes and Scheduled Tribes population in total as well as rural and urban areas of this district. Scheduled Castes population in Katihar district is 8.7 percent of the total population. Within the district, the highest proportion of Scheduled Castes can be observed in Korha C.D. Block (14.2%) followed by Falka C.D. Block (11.7%) and Sameli C.D. Block (11.6%). The C.D. Block with higher proportion than the district average of Scheduled Castes are Manihari (10.3%), Kursela (9.5%), Mansahi (11.5%) and Katihar (9.9%). The lowest proportion of Scheduled Caste can be seen Amdabad where it is 3.2 percent of the total population. The other C.D. Blocks with lower proportion of Scheduled Castes are Barari(8.5%), Dandkhera (7.8%), Pranpur (8.0%), Azamnagar (5.7%), Barsoi

(7.2%), Balrampur (7.3%), Kadwa (8.1%) and Hasanganj (6.0%).

The proportion of Scheduled Tribes in Katihar district is 5.9 percent only of the total population. The C.D. Block having higher proportion of Schedule Tribe than district percentage are Falka (7.8%), Korha (9.1%), Hasanganj (16.0%), Pranpur (7.7%), Dandkhora (16.0%), Mansahi (12.8%), Manihari (14.0%) and Amdabad (9.8%). C.D. Blocks with lower proportion than the district average are Kadwa (2.2%), Balrampur (4.0%), Barsoi (0.5%), Azamnagar (3.7%), Katihar (4.2%), Barari (5.2%), Sameli (1.8%) and Kursela (0.8%). The highest proportion of Scheduled Tribes and be observed Hasanganj and Dandkhora C.D. Blocks each with 16.0 percent of the total population. The lowest proportion of Scheduled Castes is recorded in Barsoi C.D. Block with 0.5 percent of the total population.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Falka	121,588	14,286	9,425	11.7	7.8
2	Korha	210,656	29,961	19,209	14.2	9.1
3	Hasanganj	42,886	2,555	6,883	6.0	16.0
4	Kadwa	268,917	21,763	5,915	8.1	2.2
5	Balrampur	122,541	8,958	4,950	7.3	4.0
6	Barsoi	256,801	17,735	1,294	6.9	0.5
7	Azamnagar	247,002	14,105	9,221	5.7	3.7
8	Pranpur	112,607	8,959	8,626	8.0	7.7
9	Dandkhora	54,172	4,200	8,648	7.8	16.0
10	Katihar	73,843	7,541	7,532	10.2	10.2
11	Mansahi	62,581	7,177	8,039	11.5	12.8
12	Barari	220,955	18,813	11,479	8.5	5.2
13	Sameli	67,261	7,825	1,234	11.6	1.8
14	Kursela	52,997	5,050	402	9.5	0.8
15	Manihari	127,447	11,704	20,628	9.2	16.2
16	Amdabad	132,107	4,228	13,003	3.2	9.8
	District (Rural) Total:	**2,174,361**	**184,860**	**136,488**	**8.5**	**6.3**

The above table indicates the percentage of Scheduled Castes and Scheduled Tribes population in the rural areas of Katihar district. The proportions of Scheduled Castes and scheduled tribe are 8.5 percent and 6.3 percent respectively in the rural areas of this district. The highest percentage of Scheduled Castes can be observed in Kohra C.D. Block (14.2 percent) whereas the lowest. In Amdabad C.D. Block (3.2 percent). C.D. Blocks having higher proportion of Scheduled Castes than district average are Falka (11.7 percent), Katihar (10.2 percent), Mansahi (10.2 percent), Sameli (11.6 percent), Kursela (9.5 percent), and Manihari (9.2 percent). As already discussed above Korha C.D. Block has highest proportion of Scheduled Castes (14.2 percent). The C.D. Blocks having lower proportion of scheduled cast than the district average are Hasanganj (6.0 percent), Kadwa (8.1 percent), Balrampur (7.3 percent), Barsoi (6.9 percent), Azamnagar (5.7 percent), Pranpur (8.0 percent), Dandkhora (7.8 percent)) and Amdabad (3.2 percent), Proportion of Scheduled Castes in Barari C.D. Block (8.5 percent) is at par with the district average.

The proportion of Scheduled Tribes in the rural areas of the district is 6.3 percent of the total population. The C.D. Blocks with higher proportion of Scheduled Tribes than the district average are Falka (7.8 percent), Korha (9.1 percent), Hasanganj (16.0 percent), Pranpur (7.7 percent), Dandkhora (16.0 percent), Katihar (10.2 percent), Mansahi (12.8 percent), Manihari (16.2 percent) and Amdabad (9.8 percent) and C.D. Blocks with lower proportion are Kadwa (2.2 percent), Balrampur (4.0 percent), Barsoi (0.5 percent), Azamnagar (3.7 percent), Barari (5.2 percent), Sameli (1.8 percent) and Kursela (0.8 percent). It is worthy to indicate here that maximum proportion of Scheduled Tribes is observed in Manihari C.D. Block (16.2 percent) and minimum proportion is observed in Barsoi C.D. Block (0.5 percent).

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	469	36.4	0	0.0
Less than 5	287	22.2	15,720	8.5
5-10	209	16.2	53,940	29.2
11-20	178	13.8	56,256	30.4
21-30	69	5.3	26,764	14.5
31-40	37	2.9	17,435	9.4
41-50	19	1.5	9,772	5.3
51-75	11	0.9	2,926	1.6
76 and above	11	0.9	2,047	1.1
District Total	**1,290**	**100.0**	**184,860**	**100.0**

It is apparent from the above table that there are 469 villages which accounts for 36.4 percent of the total inhabited villages do not have any Scheduled Castes population. 287 villages accounting for 22.2 percent of the total inhabited villages are in the percentage range of less than 5 Schedules Castes. These 287 villages accounts for 8.5 percent of the total Scheduled Castes population. Similarly209 villages (16.2 percent) are in the percentage range of 5-10 which account for 29.2 percent of the total Scheduled Castes population. 13.8 percent of the total inhabited villages which account for 178 villages are in the percentage range 11-20 of Scheduled Castes population covering 56, 256 Scheduled Castes (30.4 percent). 69 villages which accounts for 5.3 percent of the total inhabited villages are in the scheduled caste population range of 21-30. Table further reveals that 14.5 percent of the total Scheduled Castes population. 37 villages (2.9 percent of the total inhabited villages) where the population of Scheduled Castes ranges between 31 and 40 percent of the total population. These 37 villages account for 9.4 percent of the total population. There are 19 villages which account for 1.5 percent of the total inhabited villages where the percentage of Scheduled Castes to total population is between 41 and 50. These 19 villages accounts for 5.3 percent Scheduled Castes population. 11 villages which account for 0.9 percent of the total inhabited villages are in Scheduled Castes population ranges between 51 and 75. These inhabited villages account for 1.6 percent Scheduled Castes of the total population remaining 11 villages accounts for 0.9 percent of the total inhabited villages are in percentage range 76 and above these village accounts for 1.1 percent of Scheduled Castes population to the total population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Scheduled Tribes Percentage	Scheduled Tribes Population	Scheduled Tribes Percentage
1	2	3	4	5
Nil	830	64.3	0	0.0
Less than 5	132	10.2	10,476	7.7
5-10	76	5.9	16,208	11.9
11-20	94	7.3	36,075	26.4
21-30	60	4.7	25,660	18.8
31-40	31	2.4	16,709	12.2
41-50	16	1.2	10,485	7.7
51-75	22	1.7	14,456	10.6
76 and above	29	2.2	6,419	4.7
District Total	**1,290**	**100.0**	**136,488**	**100.0**

From the above, it is apparent that there are 830 villages accounting for 64.3 percent of the inhabited villages have no Scheduled Tribes population, and 132 villages accounting for 10.2 percent of the total inhabited villages are in less than 5 percentage range of Scheduled Tribes population. There are 76 villages accounting for 5.9 percent of the inhabited villages in the district where the population of Scheduled Tribes ranges between 5 and 10. These 76 villages account for 11.9 percent of the total population. Altogether 94 villages accounting for 7.3 percent of the inhabited villages are in the population percentage ranges between 11 and 20. These 94 villages account for 26.4 percent of the Scheduled Tribes population. Again 4.7 percent of the total inhabited villages numbering 60 are in the population percentage range between 21 and 30 which account for 18.8 percent of the Scheduled Tribes population. There 31 inhabited villages accounting for 2.4 percent of the inhabited villages are in the population percentage range between 31 and 40, 16 villages accounting for 1.2 percent of the inhabited villages are in population percentage range between 41 and 50. 22 villages are in population percentage range between 51 and 75. These 22 villages account for 10.6 percent of the Scheduled Tribes population and remaining 29 villages accounting for 2.2 percent of the inhabited villages are in population percentage range of 76 and above. These 29 villages account for 4.7 percent of the Scheduled Tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Katihar UA	190,873	18,738	3,486	9.8	1.8
2	Katihar (M+OG)	190,873	18,738	3,486	9.8	1.8
3	(i) Katihar (M)	175,199	15,003	3,012	8.6	1.7
4	Manihari (NA)	21,803	3,702	335	17	1.5
5	Raghunathpur (CT)	5,601	1,084	109	19.4	1.9
	District(Urban) Total:	**218,277**	**23,524**	**3,930**	**10.8**	**1.8**

The above table shows number and proportion of Scheduled Castes and Scheduled Tribes population in Urban Agglomeration and towns of Katihar district. There are three urban units in the district including Katihar Urban Agglomeration. Katihar Urban Agglomeration includes Katihar Municipality and its Katihar Railway Colony as an outgrowth. The proportion Scheduled Castes and Scheduled Tribes in urban areas of Katihar district is 10.8 percent and 1.8 percent respectively. The highest proportion of Scheduled Castes can be seen in Raghunathpur Census Town (19.4 percent) followed by Manihari Notified Area with 17.0 percent. The lowest proportion of Scheduled Castes can be observed in Katihar Urban Agglomerations (9.8 percent).

The maximum proportion of Scheduled Tribes is observed in newly created Raghunathpur Census Town (1.9 percent) followed by Katihar Urban Agglomeration (1.8 percent). Manihari Notified Area having 1.5 percent of Scheduled Tribes population is at the bottom.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Falka	963	946
2	Korha	953	966
3	Hasanganj	937	942
4	Kadwa	958	994
5	Balrampur	927	935
6	Barsoi	924	952
7	Azamnagar	918	963
8	Pranpur	925	931
9	Dandkhora	964	952
10	Katihar	932	921
11	Mansahi	897	974
12	Barari	948	915
13	Sameli	965	1,081
14	Kursela	918	861
15	Manihari	902	949
16	Amdabad	931	946
	District (Rural) Total:	**938**	**950**

This table shows the sex-ratio among scheduled castes and scheduled tribes in the rural area of the district. Sex ratios of Scheduled Castes and Scheduled Tribes at the district level are 935 and 950 respectively. Among the Scheduled Castes sex ratio varies from 965 in Sameli C.D. Block to 897 in Mansahi C.D. Block. The C.D. Blocks with higher sex ratio than the district average are Falka(963), Korha(953), Kadwa(958), Dandkhora(964) and Barari(948). As already mentioned above that Sameli C.D. Block has the highest sex ratio with 965 females per 1000 males. The C.D. Blocks with lower sex ratio than the district average are Hasanganj(937), Balrampur(927), Barsoi(924), Azamnagar(918), Pranpur(925), Katihar(932), Kursela(918) and Manihari(902). The lowest sex ratio can be observed in Mansahi C.D. Block with 897 females only per 1000 males.

The sex ratio among scheduled tribes varies from 1081 for Sameli C.D. Block to 861 in Kursela C.D. Block. The C.D. Blocks with higher sex ratio than the district average sex ratio (950 females per 1000 males) are Korha(966), Kadwa(994), Barsoi and Dandkhora each having 952 females per 1000 males. Azamnager(963) and Mansahi(974). On the other hand C.D. Blocks with lower sex ratio than the district are Falka(946), Hasanganj(942), Balrampur(935), Pranpur(931), Katihar(921), Barari(915), Amdabad(946), Manihari(949) and lowest being Kursela(861).

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Katihar UA	882	907
2	Katihar (M+OG)	882	907
3	(i) Katihar (M)	876	911
4	Manihari (NA)	890	1,006
5	Raghunathpur (CT)	856	703
	Sex ratio (Urban) for the district:	**882**	**909**

Table 20 shows the sex ratio among Scheduled Castes and Scheduled Tribes in the urban areas of the district. The sex ratio among Scheduled Castes in urban area of Katihar district is 882 females per 1,000 males. Manihari Notified Area has the highest sex ratio of 890 followed by Katihar Urban Agglomerations with 882 females per 1,000 males. Raghunathpur Census Town with sex ratio 856 is at the bottom. Sex ratio of scheduled tribes in urban areas of the district is 909 females per 1,000 males among the town. Manihari Notified Area with sex ratio 1,006 females per 1,000 males is at the top followed by Katihar Urban Agglomeration 907 females per 1,000 males). Raghunathpur Census Town has the lowest sex ratio with only 703 females per 1,000 males.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C.D.BLOCKS,2001

Tables above indicate the literacy rate in rural and urban areas of Katihar district among both the sexes. The proportion of literacy is rural areas of Katihar district is 31.1 percent. Kursela C.D. Block has the highest literacy percentage (41.6 percent) followed by Katihar C.D. Block (37.3 percent). The other C.D. Blocks having higher percentage of literacy rate than the district average are Falka (33.9 percent), Hasanganj (32.7 percent), Pranpur (32.8 percent), Dandkhora (36.9 percent), Mansahi (32.7 percent), Barari (32.0 percent), Sameli (34.9 percent) and Manihari (34.9 percent). As regards C.D. Blocks Kursela and Katihar having highest and second highest literacy, it has already been discussed above. The C.D. Blocks having lower proportion than district average are Korha (30.8 percent), Kadwa (30.4 percent), Balrampur (26.9 percent), Barsoi (26.8 percent), Azamnagar ((27.3 percent) and Amdabad (28.7 percent). Literacy rate in urban areas of the district is 80.2 percent among males. The highest literacy rate among males is observed in urban area of Katihar C.D. Block (82.3 percent) followed by Raghunathpur Census Town (74.2 percent) in the jurisdiction of Barsoi C.D. Blocks. The lowest male literacy rate can be observed in Manihari Notified Area (63.1 percent). The average female literacy rate in urban areas of Katihar district is 63.0 percent. The highest literacy rate is observed in Katihar urban area (65.5 percent). The female literacy rate in Manihari and Barsoi urban areas are 42.2 percent and 52.1 percent respectively. The average literacy rate in respect of males in rural area of the district is 41.4 percent. The C.D. Blocks having higher male literacy rate than the district average are Falka (44.2%), Hasanganj (44.8%), Kadwa (41.5 percent), Pranpur (43.7 percent), Dandkhora (50.7 percent), Katihar (48.4 percent), Mansahi (42.6 percent), Sameli (46.0 percent), Manihari (45.5 percent) and Kursela (53.4 percent) being at the top. The C.D. Blocks having lower male literacy rate than the district male literacy rate are Korha (40.2 percent), Balrampur (38.5 percent), Barsoi (36.2 percent), Azamnagar (37.8 percent), Barari (41.2 percent) and Amdabad (37.4 percent). The literacy rate among female is 19.7 in rural areas of Katihar district. The C.D. Blocks with higher female literacy percentage than the district female rate are Falka (22.8 percent), Korha (20.3 percent), Hasanganj (19.9 percent), Pranpur (20.9 percent), Dandkhora (21.8 percent), Katihar (24.9 percent), Mansahi (21.6 percent), Barari (21.7 percent) and Sameli (22.7 percent). The C.D. Block with lower female literacy rate than district female literacy rate are Kadwa (18.4 percent), Barsoi (16.8 percent), Azamnagar (16.0 percent) and Amdabad (19.3 percent). C.D. Block Balrampur with female literacy rate of 14.1 percent is at the bottom.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	14	1.1	451	0.0

81-90	5	0.4	721	0.0
91-99	1	0.1	30	0.0
100	4	0.3	33	0.0
District Total:	**1,290**	**100.0**	**2,174,361**	**100.0**
Literacy rate for District:		**35.1**		

This table shows that 14 villages accounting for 1.1 percent of the inhabited villages are in the literacy rate range of zero, 78 inhabited village lie in literacy rate ranges between 1 and 10. The villages account for 6.0 percent of total inhabited village and 1.6 percent of the total population. There are 262 villages which account for 20.3 percent of the inhabited villages are in literacy rate range between 11 and 20. Similarly 384 villages accounting for 29.8 percent of total inhabited village are in literacy rate range between 21 and 30. This is the largest group of inhabited villages and account for 34.0 percent of the total population. This is followed by 305 villages which are in literacy rate ranges between 31 and 40 accounting for 23.6 percent of the inhabited villages. Apart from it 161 villages with 13.1 percent of the district rural population are in literacy rate ranges between 41 and 50. These 161 villages account for 12.5 percent of inhabited villages. It has also been seen that 3.7 percent of the inhabited villages numbering 48 are in literacy rate range between 51 and 60. Those villages account for 3.6 percent of the district population. Similarly 19 inhabited villages are in the literacy rate ranges between 61 and 70 9 villages in literacy rate ranges between 71 and 80 5 villages in literacy rate range between 81 and 90 and 1 village in ranges between 91 and 99. Remaining 4 inhabited villages accounting for 0.3 percent of the inhabited villages are having cent percent literacy rate.

The proportion of literates is 22.2 percent of the total population in the rural areas of Katihar district. The highest literacy rate is observed in Amdabad C.D. Block (35.1 percent) among Scheduled Castes. The other C.D. Blocks with higher literacy rate than the district average are Balrampur (23.0 percent), Barsoi (25.4 percent), Azamnagar (26.4 percent), Pranpur (24.7 percent), Dandkhora (26.9 percent), Katilhar (25.7 percent), Mansahi (25.3 percent), Kursela (32.9 percent) and Manihari (29.5 percent). The C.D. Blocks having lower literacy rate than the district are Sameli (17.2 percent), Barari (17.6 percent), Kadwa (22.0 percent), Falka (15.9 percent) and Korha (15.6 percent). The average literacy rate among Scheduled Castes male population of the rural areas of the district of Katihar is 31.9 percent. Among the male Scheduled Castes the higher literacy rate is observed in Amdabad C.D. Block (47.2 percent) followed by Kursela C.D. Block (45.5 percent). The other C.D. Blocks with higher male literacy rate among Scheduled Castes than the district rural average are Kadwa (32.1 percent), Balrampur (33.5 percent), Barsoi (36.7 percent), Azamnagar (38.5 percent), Pranpur (35.1 percent), Dandkhora (37.0 percent), Katilhar (36.8 percent), Mansahi (35.7 percent) and Manihari (40.1 percent). The C.D. Blocks having lower literacy rate among male Scheduled Castes population than the district rural average are Sameli (26.0 percent), Barari (25.5 percent), Hasanganj (29.1 percent), Korha (22.9 percent) and Falka (23.9 percent). The literacy rate among female Scheduled Castes in rural areas of Katihar district is 11.6 percent only. The C.D. Blocks with higher literacy rate among female Scheduled Castes than the district rural average are Amdabad (22.2 percent), Manihari (17.3 percent), Kursela (18.8 percent), Mansahi (13.6 percent), Katihar (13.5 percent), Dandkhora (16.1 percent), Pranpur (13.2 percent), Azamnagar (13.1 percent) and Barsoi (13.3 percent). The C.D. Blocks with lower literacy than the district rural average rate can be observed in Sameli (7.8 percent), Barari (9.0 percent), Balrampur (11.4 percent), Kadwa (11.3 percent), Korha (7.7 percent), Hasanganj (11.3 percent) and Falka (7.5 percent).

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5

District Total:	**821**	**100.0**	**184,860**	**100.0**
Literacy rate for District (Rural):		**22.2**		

The above table shows the distribution of villages by literacy rate range for Scheduled Castes population of Katihar district. Altogether 64 villages accounting for 7.8 percent of the total inhabited villages fall in no literacy rate range zero. These 64 villages account for 1.7 percent of the Scheduled Castes population. Similarly 158 villages accounting for 19.2 percent of the total inhabited villages are in the literacy rate ranges between 1 and 10. These villages account for 22.2 percent of the Scheduled Castes population. The maximum number of villages (196) which account for 23.9 percent of the total inhabited villages are in literacy rate ranges between 11 and 20. These 196 villages account for 27.6 percent of the total Scheduled Castes population. It is followed by 156 villages which are in the literacy rate ranges between 21 and 30. These 156 villages account for 19.0 percent of the total inhabited villages and 23.9 percent of the total Scheduled Castes population. Again 114 villages lie in the literacy rate range between 31 and 40. These 114 villages account for 13.9 percent for of the total inhabited villages and 15.1 percent Scheduled Castes population of the Katihar district, and 62 villages i.e., 7.6 percent of the total inhabited villages lie in the literacy rate ranges between 41 and 50. These 62 villages account for 4.6 percent of the Scheduled Castes population. 31 villages accounting for 3.8 percent of the inhabited villages and 3.7 percent of the Scheduled Castes population lie in literacy rate ranges between 51 and 60, 22 villages lie in literacy rate ranges between 61 and 70, 9 villages lie in the literacy rate ranges between 71 and 80, 3 villages lie in the literacy range between 81-90 and 2 villages in the range between 91 and 99. Remaining 4 villages lie in centpercent literacy rate ranges.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

The above table shows the number and percentage of Scheduled Tribes literates and illiterates by sex in C.D. Blocks of Katihar district. Literacy rate in rural areas among Scheduled Tribes of the district has been recorded 23.0 percent. The highest literacy rate can be seen in Kursela C.D. Block (41.2 percent). The other C.D. Blocks with higher literacy rate than the district rural average are Barsoi (27.6 percent), Azamnagar (25.4 percent), Pranpur (29.8 percent), Dandkhora (23.9 percent), Katihar (24.6 percent), Barari (26.8 percent), Manihari (25.7 percent) and Amdabad (25.5 percent). The C.D. Blocks having lower literacy rate than district rural average are Falka (20.9 percent), Korha (17.7 percent), Hasanganj (20.6 percent), Kadwa (18.7 percent), Balrampur (14.8 percent), Mansahi (20.1 percent) and Sameli with lowest literacy rate (8.7 percent). Among the male Scheduled Tribes population in rural areas of the district the literacy rate has been recorded as 34.1 percent. The C.D. Blocks with

higher literacy rate than the district rural average are Falka (32.4 percent), Barsoi (38.5 percent), Azamnagar (36.0 percent), Dandkhora (37.4 percent), Katihar (36.5 percent), Barari (38.8 percent), Pranpur (42.3 percent), Manihari (38.2 percent) and Amdabad (36.4 percent). Kursela C.D. Block has recorded the highest literacy rate among male Scheduled Tribes population. The C.D. Blocks with lower literacy rate among male Schedule tribes population than the district rural average are Falka (32.4 percent), Korha (26.2 percent), Hasanganj (31.7 percent), Kadwa (28.6 percent), Balrampur (22.7 percent), Mansahi (30.7 percent) and Sameli (14.1 percent). The average literacy rate among female Scheduled Tribes of rural areas of the district is 11.3 percent. Kursela C.D. Block the highest literacy percentage among females Scheduled Tribes population (19.9 percent). The other C.D. Blocks with higher literacy rate than the district rural average are Barsoi (15.8 percent), Azamnagar (14.3 percent), Pranpur (16.1 percent), Katihar (11.8 percent), Barari (13.4 percent), Manihari (12.7 percent) and Amdabad (13.9 percent). The C.D. Blocks with lower literacy rate than the district rural literacy rate are Falka (8.7 percent), Korha (8.8 percent), Hasanganj (8.9 percent), Kadwa (8.8 percent), Balrampur (6.2 percent), Dandkhora (9.8 percent), Mansahi (8.8 percent) and Sameli (3.8 percent).

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Literacy rate for District (Rural):		**23.0**		

This table shows the distribution of villages by literacy rate range for Scheduled Tribes population. It shows that 29 villages accounting for 6.3 percent of the total inhabited village are in the nil range of literacy rate. These 29 villages account for 0.4 percent of the total tribal population. Again 142 villages which account for 30.9 percent of the inhabited villages are in literacy rate range between 11 and 20. These villages account for maximum proportion of Scheduled Tribes population (36.0 percent). Seventy six villages accounting for 16.5 percent of inhabited villages and 12.5 percent of scheduled tribes population are in the literacy rate range between 1 and 10. Ninety four villages which account for 20.4 percent of inhabited villages and 28.2 percent of the scheduled tribes population are in the literacy rate range between 21 and 30. Similarly 54 villages lie in the literacy rate ranges between 31 and 40. These villages account for 11.7 percent of inhabited villages and 14.4 percent of Scheduled Tribes population. Thirty one villages lie in literacy rate range between 41 and 50, which account for 6.7 percent of the inhabited villages and 5.9 percent of the Scheduled Tribes population. Like wise 14 villages lie in literacy rate range between 51 and 60, 6 villages in the literacy rate range between 61 and 70, 5 villages in the

literacy rate range between 71 and 80 and 4 villages in literacy rate range between 81 and 90. Remaining 5 villages can be put under the category of cent percent literacy rate range.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

3	Raghunathpur (CT)	74	50	24	35	14	21	82.2	87.7	72.7	15
	District (Urban) Total :	**2,103**	**1,290**	**813**	**1,827**	**769**	**1,058**	**65.6**	**75.8**	**54**	**21.8**

This table shows the number and percentage of Scheduled Tribes literates and illiterates by sex in the urban areas of Katihar district. The average literacy rate is urban areas of Katihar district is 65.6 percent of the total Scheduled Tribes population. The maximum proportion of literates scheduled tries population may be observed in Raghunathpur Census town (82.2 percent) followed by Manihari Notified Area (66.1 percent). It has also been observed that 65.0 percent literate Scheduled Tribes population is in Katihar Urban Agglomeration. The literacy rate in respect of male Scheduled Tribes population of the district is 75.8 percent, Raghunathpur Census Town with 87.7 percent has the highest literacy rate followed by Katihar Urban Agglomeration with 75.5 percent literates. Manihari Notified Area has the lowest male literacy rate with 75.0 percent of the population are literates. Table further shows 54.0 percent literacy can be observed among female Scheduled Tribes population in the urban areas of Katihar district. Raghunathpur Census Town has the highest literates females (72.7 percent) among Scheduled Tribes followed by Manihari Notified Area (56.5 percent), Katihar Urban Agglomeration has the lowest literate female Scheduled Tribes population (53.3 percent).

The Work Participation Rate (WPR) for the total worker is defined as the percentage of total workers to the total population. In the Somalia fashion it is defined for main and marginal workers. Table 31 shows that the Work Participation Rate (WPR) in total area of Katihar district is 27.8 percent as a main workers and 9.8 percent as marginal workers. Proportion of non-workers in the district is 62.5 percent. In rural areas of the district proportion of main workers is 28.4 percent and marginal workers 10.5 percent. Proportion of non-workers in rural areas of this district is 61.2 percent. This can be seen in table – 32. Work Participation Rate among males in the total areas of the district is 44.7 percent as main workers and 6.1 percent as marginal workers. Proportion of non-workers among female is 49.1 percent. Work Participation Rate among females in the total areas of the district is 9.3 percent as main workers and 13.8 percent as marginal workers. Proportion of female non-workers is 76.9 percent. Work Participation Rate in rural areas of this district for total areas has been mentioned above. In rural area Work Participation Rate is 45.5 percent as main workers and 6.3 percent as marginal workers. Proportion of male non-workers in rural area is 51.8 percent. The highest proportion of Work Participation Rate among males as main worker may be seen in Falka C.D. Block (47.7 percent) followed by Kadwa C.D. Block (47.6 percent). Other C.D. Blocks with higher Work Participation Rate among males as main workers are Korha (45.6 percent), Hasanganj (45.9 percent), Balrampur (46.3 percent), Barsoi (46.5 percent), Azamnagar (46.4 percent), Barari (45.7 percent) and Sameli (46.5 percent). C.D. Blocks with lower Work Participation Rate than the district average among males in rural areas are Azamnagar (45.3 percent), Katihar (39.4 percent), Mansahi (43.9 percent), Dandkora (45.3 percent), Kursela (41.4 percent), Manilhari (38.2 percent) and Amdabad (43.6 percent). Work Participation Rate of females for rural areas of Katihar district is 9.9 percent. C.D. Blocks with higher female Work Participation Rate in rural areas are Falka (16.1 percent), Korha (11.8 percent), Hasanganj (17.2 percent), Dandkhora (13.9 percent), Barari (12.1 percent), Sameli (17.2 percent) and Kursela (14.9 percent). Whereas C.D. Blocks with lower Work Participation Rate are Amdabad (8.3 percent), Manihari (6.8 percent), Mansahi (8.1 percent), Katihar (5.0 percent), Azamnagar (6.9 percent), Pranpur (9.0 percent), Barsoi (5.6 percent), Balrampur (8.4 percent) and Kadwa (9.3 percent). Work Participation Rate at males as marginal workers for the rural areas of the district is 6.3 percent. C.D. Block with higher Work Participation Rate as marginal workers among males are Falka (7.4 percent), Balrampur (6.4 percent), Azamnagar (7.3 percent), Mansahi (6.4 percent), Kursela (8.0 percent), Manihari (10.3 percent) and Amdabad (9.6 percent) C.D. Blocks with lower proportion rate than district is Hasanganj (6.3 percent), are Korha (5.2 percent), Kadwa (4.5 percent), Pranpur (5.9 percent), Dandkhora (6.2 percent), Katihar (404 percent), Barari (4.1 percent) and Sameli (5.2 percent). Work Participation Rate of marginal workers among males in respect of Hasanganj and Barsoi C.D. Blocks is at par with the district Work Participation Rate (6.3 percent). Work Participation Rate as marginal worker among females for rural areas of the district is 15.0 percent. C.D. Blocks with higher female Work Participation Rate as marginal workers are Falka (24.6 percent), Hasanganj (16.8 percent), Barsoi (18.7 percent), Azamnagar (27.1 percent), Dandkhora (17.8 percent) and Amdabad (18.3 percent). C.D. Blocks with lower work participation than the district Work Participation Rate as marginal workers among females are Korha (10.3 percent), Kadwa (9.2 percent), Balrampur (10.1 percent), Pranpur 11.7 percent), Katihar (3.9 percent) Mansahi (10.3 percent), Barari (10.5 percent), Sameli (14.6 percent), Kursela (11.1 percent) and Manihari (10.7 percent). Proportion of non-workers in rural areas of the district in respect of males and females is 48.2 percent and 75.2 percent respectively. Proportion of male non-workers vary between 56.2 percent in Katihar C.D. Block and 44.9 percent in Falka C.D. Block. Similarly proportion of female non-workers vary between 83.8 percent in Manihari C.D. Block and 59.2 percent in Falka C.D. Block.

The Work Participation Rate (WPR) for the total worker is defined as the percentage of total workers to the total population. In the Somalia fashion it is defined for main and marginal workers. Table 31 shows that the Work Participation Rate (WPR) in total area of Katihar district is 27.8 percent as a main workers and 9.8 percent as marginal workers proportion of non-workers in the district is 62.5 percent. In rural areas of the district proportion of main workers is 28.4 percent and marginal workers 10.5 percent. Proportion of non-workers in rural areas of this district is 61.2 percent. This can be seen in Table – 32. Work Participation Rate among males in the total areas of the district is 44.7 percent as main workers and 6.1 percent as marginal workers. Proportion of non-workers among male is 49.1 percent. Work Participation Rate among females in the total areas of the district is 9.3 percent as main workers and 13.8 percent as marginal workers. Proportion of female non-workers is 76.9 percent. Work Participation Rate in rural areas of this district for total areas has been mentioned above. In rural area Work Participation Rate among male is 45.5 percent as main workers and 6.3 percent as marginal workers. Proportion of male non-workers in rural area is 51.8 percent. The highest proportion of Work Participation Rate among males as main worker be seen in Falka C.D. Block (47.7 percent) followed by Kadwa C.D. Block (47.6 percent). Other C.D. Blocks with higher Work Participation Rate as male main workers are in comparison to district rural average Korha (45.6 percent), Hasanganj (45.9 percent), Balrampur (46.3 percent), Barsoi (46.5 percent), Azamnagar (46.4 percent), Barari (45.7 percent) and Sameli (46.5 percent). C.D. Blocks with lower Work Participation Rate among male than the rural areas of the district are Pranpur (45.3 percent), Katihar (43.1 percent), Mansahi (43.9 percent), Pranpur (43.9 percent), Kursela (41.4 percent), Manilhari (39.0 percent) and Amdabad (43.6 percent). Work Participation Rate of females for rural area of Katihar district is 9.9 percent. C.D. Blocks with higher female work participation in rural areas are Falka (16.1 percent), Korha (11.8 percent), Hasanganj (17.2 percent), Dandkhora (13.9 percent), Barari (12.1 percent), Sameli (17.2 percent) and Kursela (14.9 percent). Whereas C.D. Blocks with lower Work Participation Rate are Amdabad (8.3 percent), Manihari (7.4 percent), Mansahi (8.1 percent), Katihar (9.0 percent), Azamnagar (6.9 percent), Pranpur (9.0 percent), Barsoi (5.7 percent), Balrampur (8.4 percent) and Kadwa (9.3 percent). Work Participation Rate males as marginal workers for the rural areas of the district is 6.3 percent. C.D. Block with higher participation rate as marginal workers among males than the corresponding district average of rural areas are Falka (7.4 percent), Balrampur (6.4 percent), Azamnagar (7.3 percent), Mansahi (6.4 percent), Kursela (8.0 percent), Manihari (10.0 percent) and Amdabad (9.6 percent) C.D. Blocks with lower

proportion rate WPR (6.3 percent) than rural areas of the district in rural area are Korha (5.2 percent), Kadwa (4.5 percent), Pranpur (5.9 percent), Dandkhora (6.2 percent), Katihar (5.2 percent), Barari (4.1 percent) and Sameli (5.2 percent). Work Participation Rate as marginal workers among males in respect of Hasanganj and Barsoi C.D. Blocks is at par with the district rural Work Participation Rate (6.3 percent). Work participate rate as marginal worker among females for rural areas of the district is 15.0 percent. C.D. Block with higher female participation rates as marginal workers are Falka (24.6 percent), Hasanganj (16.8 percent), Barsoi (19.0 percent), Azamnagar (27.1 percent), Dandkhora (17.8 percent) and Amdabad (18.3 percent). C.D. Blocks with lower work participation than the district rural Work Participation Rate as marginal workers among females are Korha (10.3 percent), Kadwa (9.2 percent), Balrampur (10.1 percent), Pranpur 11.7 percent), Katihar (10.1 percent) Mansahi (10.3 percent), Barari (10.5 percent), Sameli (14.6 percent), Kursela (11.1 percent) and Manihari (10.7 percent). Proportion of non-workers in rural areas of the district in respect of males and females is 48.2 percent and 75.2 percent respectively. Proportion of male non-workers vary between 51.7 percent in Katihar C.D. Block and 44.9 percent in Falka C.D. Block. Similarly proportion of female non-workers vary between 81.9 percent in Manihari C.D. Block and 59.2 percent in Falka C.D. Block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

The above table shows the number and percentage of main workers, marginal workers and non-workers by sex in Urban Agglomerations /Towns. Work Participation Rate as main workers in urban areas of this district is 37.6 percent among males. Town/Urban Agglomeration with higher Work Participation Rate among males are Raghunathpur Census Town (41.5 percent) and Katihar Urban

Agglomerations (38.0 percent) whereas Manihari Notified Area with work participation rate of 33.6 percent is below the district WPR. Work Participation Rate among females as main workers in Urban Area of the district is 3.4 percent, Katihar Urban Agglomeration has the highest Work Participation Rate among male whereas Raghunathpur Census Town and Manihari Notified Area it is 3.2 percent and 2.9 percent respectively. Work Participation Rate among female as marginal workers in respect of Manihari Notified Area is 7.0 percent as against the district WPR of 4.4 percent. Whereas it is 2.9 percent for Raghunathpur Census Town and 4.1 percent in Katihar Urban Agglomerations. Proportion of non-workers in respect of males and females is 58.0 percent and 95.0 percent respectively in urban areas of Katihar district. The highest proportion of male non-workers can be observed in Manihari Notified Area (59.4 percent), Katihar Urban Agglomerations and Raghunathpur Census Town have 57.9 percent and 55.6 percent male non-workers respectively. Among the female non-workers the highest proportion can be observed in Katihar Urban Agglomerations (95.1 percent). Followed by Manihari Notified Area and Raghunathpur Census Town is where the corresponding figure 95.0 percent and 92.6 percent respectively.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D.BLOCKS, 2001

Note :- Percentage of workers to total workers are given in brackets

From the table above the relative importance of the main sphere of activity can be gauged from the pattern of distribution of workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry worker and other workers. The economic activity in the district is primarily dependent on agriculture which is supported by the fact that cultivators (22.4 percent) and agricultural laboure (61.0 percent) together constitute 83.4 percent of the total workers of the district. In other works the agriculture sector itself has 83.4 percent of the total workers. The proportion of cultivators varies between 29.4 percent in Dandkhora C.D. Block to 6.7 percent for Katihar C.D. Block. Agricultural labourers vary between 68.1 percent for Kursela C.D. Block to 22.2 percent for Katihar C.D. Block. The proportion of household industry workers, varies between 5.2 percent in

Falka C.D. Block to 1.4 percent for Azamnagar C.D. Block. The proportion of other workers is 14.1 percent of the total workers of the district. The proportion of other workers varies between 67.8 percent for Katihar C.D. Block to 5.6 percent in Dandkhora C.D. Block.

Note: Percentage of Worker to total workerre given in brackets

This table shows the distribution of workers by sex in four categories of economic activity in the rural area of Katihar district. The economic activity in rural area of the district is primarily dependent on agriculture which is supported by the fact that the cultivators (26.9 percent) and agricultural labourers (59.3 percent) in respect of males together constitute 86.2 percent of the total workers. The proportion of cultivators varies between 34.8 percent in Hasanganj C.D. Block to 18.6 percent in Katihar C.D. Block. The proportion of cultivators in the rural areas of the district is 26.9 percent in respect of males. The C.D. Blocks with higher proportion of male cultivators are Balrampur (28.1 percent), Azamnagar (28.6 percent), Pranpur 31.7 percent), Dandkhora (34.1 percent), Sameli (29.0 percent), Barsoi (27.4 percent), Pranpur (31.7 percent), Azamnagar (28.6 percent) and Dandkhora (34.1 percent). The C.D. Blocks with lower proportion of cultivator than the district rural average (26.9 percent) are enumerated in Falka (26.5 percent), Korha (26.4 percent), Kadwa (26.1 percent), Katihar (18.6 percent), Mansahi (26.4 percent), Barari (26.7 percent), Kursela (15.7 percent), Manihari (23.6 percent) and Amdabad (26.8 percent). Among the females the proportion of cultivators is 16.4 percent in the rural areas of the district. The C.D. Blocks with higher proportion of female cultivators than the district rural average are Hasanganj (18.8 percent),

Barsoi (20.5 percent), Azamnagar (27.6 percent), Dandkhora (21.2 percent) and Sameli (17.1 percent). The C.D. Blocks with lower proportion of female cultivators than the district average are Falka (16.3 percent), Korha (11.2 percent), Kadwa (12.8 percent), Balrampur (11.9 percent), Pranpur (12.2 percent), Katihar (7.7 percent), Mansahi (8.7 percent), Barari (15.5 percent), Kursela (7.9 percent), Manihari (10.5 percent) and Amdabad (9.9 percent).

The proportion of agricultural laboures in the rural areas of the district among males is 59.3 percent. The C.D. Block with higher proportion among males than the district rural average are Falka (59.4 percent), Korha (61.0 percent), Kadwa (60.5 percent), Balrampur (62.8 percent), Barsoi (62.5 percent), Azamnagar (61.1 percent), Mansahi (60.2 percent), Kursela (60.7 percent) and Manihari (60.8 percent). The C.D. Blocks with lower average than the district are Hasanganj (53.8 percent), Pranpur (56.0 percent), Dandkhora (55.9 percent), Katihar (42.6 percent), Barari (58.5 percent), Sameli (55.3 percent) and Amdabad (56.9 percent). Among the female agricultural laboures district rural proportion is 75.6 percent. The C.D. Blocks with higher proportion of agricultural labourers than the district rural average (75.6 percent) are Korha (83.8 percent), Hasanganj (76.3 percent), Kadwa (75.9 percent), Pranpur (79.8 percent), Dandkhora (76.6 percent), Katihar (81.9 percent), Mansahi (81.6 percent). The C.D. Blocks with lower average than the district are Amdabad (69.6 percent), Azamnagar (69.3 percent), Barsoi (74.7 percent), Balrampur (72.5 percent) and Falka (72. 2 percent).

The proportion household industry workers in the district is very low. The proportion in respect of males in 1.9 percent and in respect of females it is 3.8 percent. The proportion of male household industry worker vary between 3.8 percent in Falka C.D. Block and 1.1 percent in Azamnagar C.D. Block, other C.D. Blocks with higher proportion of household workers in respect of males than the district average are Korha (2.0 percent), Hasanganj (2.6 percent), Katihar (2.4 percent), Barari (2.1 percent), Sameli (3.6 percent), Kursela and Manihari with 2.4 percent each. The C.D. Blocks with lower proportion than the district average are Kadwa (1.3 percent), Balrampur (1.5 percent), Barsoi (1.2 percent), Azamnagar (1.1 percent), Pranpur (1.6 percent), Mansahi (1.8 percent) and Amdabad (1.8 percent). The proportion of male household industry worker in Dandkhora C.D. Block is at pas with district average (1.9 percent). The proportion of female household industry worker (3.8 percent) is higher than males (1.9 percent) in the rural areas of the Katihar district. The female household industry workers with higher proportion than the district average are Falka (7.3 percent), Kadwa (5.6 percent), Balrampur (12.2 percent), Pranpur (4.5 percent), Sameli (4.0 percent) and Amdabad (4.3 percent). The C.D. Block with lower proportion of household industry workers than the district average (3.8 percent) in respect of females are Korha (1.5 percent), Hasanganj (2.8 percent), Barsoi (2.6 percent), Azamnagar (1.8 percent), Dandkhora (0.1 percent), Katihar (3.2 percent), Mansahi (2.6 percent), Barari (3.6 percent), Kursela (3.4 percent) Manihari (2.6 percent).

The proportion of other workers of the rural areas of Katihar district is 11.9 percent for males and 4.2 percent. The C.D. Blocks with higher proportion of males other workers than the district average are Kadwa (12.1 percent), Katihar (36.5 percent), Barari (12.7 percent), Sameli (12.2 percent), Kursela (21.2 percent), Manihari (13.2 percent) and Amdabad (14.4 percent). The C.D. Blocks with lower average than the district among males other workers are Falka (10.3 percent), Korha (10.7 percent), Hasanganj (8.8 percent), Balrampur (7.6 percent), Barsoi (8.9 percent), Azamnagar (9.2 percent), Pranpur (10.8 percent), Dandkhora (8.1 percent) and Mansahi (11.6 percent). As already mentioned above that the average of female other workers in Katihar district is 4.2 percent only. The C.D. Blocks with higher female other workers than the district average are Kadwa (5.7 percent), Katihar (7.2 percent), Kursela (5.0 percent), Manihari (5.3 percent), Amdabad (16.1 percent) and Mansahi (7.2 percent). The C.d. Block with lower proportion than the district average are Korha (3.5 percent), Hasanganj (2.1 percent), Balrampur (3.4 percent), Barsoi (2.1 percent), Azamnagar (1.3 percent), Pranpur (3.5 percent), Dandkhora (1.3 percent), Barari (3.5 percent) and Sameli (2.7 percent). The proportion of other workers in respect of female is at par with district average (4.2 percent).

TABLE 36: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Note : Percentage of workers to total workers are given in brackets

This table shows the distribution of workers by sex in four categories of economic activity of Urban Agglomerations/Towns. There is an Urban Agglomerations and two towns in the district of Katihar.

The proportion of cultivator in respect males and females in the urban areas of the district is 2.6 percent 2.2 percent respectively. The highest proportion of cultivator among males may be observed in Manihari Notified Area (8.8 percent) followed by Raghunathpur Census Town (4.2 percent). Minimum proportion of cultivators among males can be observed in Katihar Urban Agglomeration (1.9 percent). Maximum proportion of female cultivator is observed in Raghunathpur Census Town (4.8 percent) followed by Manihari Notified Area (3.7 percent). Katihar Urban Agglomeration with 1.9 percent of female cultivators is at the bottom.

Proportion of agricultural labourers for the urban areas of district is 8.1 percent in case of males is 19.0 percent and in case of females. Maximum proportion of male agricultural labourers may be observed in Manihari Notified Area (36.9 percent) followed by Raghunathpur Census Town (15.4 percent). Katihar Urban Agglomeration has 4.7 percent agricultural labourers. Maximum proportion of female agricultural labourer can be observed in Raghunathpur Census Town (52.4 percent) followed bi Manihari Notified Area (36.8 percent). Katihar Urban Agglomeration with 15.5 percent of female agricultural labourers is at the bottom of this table.

Proportion of Household Industry workers in the urban area of this district is 2.8 percent and 9.7 percent for males and females respectively. Maximum proportion of household industry worker among males can .be observed in Katihar Urban Agglomerations 2.9 percent followed by Manihari Notified Area (2.6 percent). Raghunathpur Census Town with 1.8 percent of male population engaged in household industry is at the bottom. Maximum proportion of household industry workers may be observed in Manihari Notified Area (12.5 percent) followed by Katihar Urban Agglomeration (9.8 percent). Raghunathpur Census Town has zero percent of household industry worker.

Proportion of other workers in urban areas of the district is 86.4 percent in respect of males and 69.0 percent in respect of females. Maximum proportion of male other worker can be observed in Katihar Urban Agglomeration (90.5 percent) followed by Raghunathpur Census Town (78.6 percent). Only 51.7 percent male other workers can be observed in Manihari Notified Area. Among females Katihar Urban Agglomeration with 72.7 percent other workers is at the top followed by Manihari Notified Area (47.1 percent). Raghunathpur Census Town has 42.8 percent of the total female workers engaged in other works.

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

			Type of amenity available

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table shows the distribution of villages according to the availability of different amenities in the district.

Educational Amenity :- There are as many as 800 villages out of 1290 villages accounting for 62.0 percent of the total inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility is in C.D. Block Mansahi (96.2 percent) followed by Korha C.D. Block with 87.8 percent. The other C.D. Blocks with higher proportion of villages with education amenity than the district average (62.0 percent) Falka (67.3 percent), Hasanganj (80.8 percent), Sameli (81.0 percent), Kursela (80.0 percent), Manihari (77.5 percent) and Amdabad (83.7 percent). The C.D. Blocks with lower proportion of educational amenity than the district average are Kadwa (48.9 percent), Balrampur (45.5 percent), Barsoi (49.3 percent) and Azamnagar (59.2 percent).

Medical Amenity :- The availability of medical amenity in the villages is fairly low and only 19.2 percent of the inhabited villages have this facility. The C.D. Blocks with higher proportion of this amenity than the district average are Amdabad (48.8 percent), Korha (60.8 percent), Azamnagar (23.7 percent), Dandkhora (44.2 percent), Mansahi (38.5 percent), Barari (40.0 percent), Sameli (42.9 percent), Kursela (30.0 percent) and Manihari (40.0 percent). Remaining seven C.D. Blocks viz., Falka (10.9 percent), Hasanganj (12.8 percent), Kadwa (5.3 percent), Balrampur (4.5 percent), Barsoi (6.9 percent), Pranpur (10.5 percent) and Katihar (10.7 percent) have lower proportion of this amenity than the district average.

Improved Drinking Water :- 1213 villages out of 1290 village of this district which account for 94.0 percent of the total villages have improved drinking water facility. The C.D. Blocks where 100 percent villages have this facility are Hasanganj, Dandkhora, Barari and Kursela. The C.D. Blocks where minimum proportion of villages have this facility are Kadwa (88.0 percent), Balrampur (91.7 percent), Azamnagar (92.4 percent) and Mansahi (88.5 percent). The C.D. Block where very large proportion of villages have this amenity are Falka (96.4 percent), Korha (98.6 percent), Barsoi (96.3 percent), Pranpur (94.7 percent), Katihar (96.4 percent), Sameli (95.2 percent), Manihari (97.5 percent) and Amdabad (95.3 percent).

Post Office :- Postal facilities are available in 174 inhabited villages out of 1290 inhabited village which account for 13.5 percent. Barari C.D. Blocks has the maximum proportion of inhabited villages having this facility (36.0 percent), i.e. 18 villages out of 50 inhabited villages. Besides this the C.D. Blocks with maximum proportion of villages having postal facility are Falka (14.5 percent), Korha (24.3 percent), Hasanganj (17.9 percent), Pranpur (18.4 percent), Dandkhora (25.6 percent), Katihar (17.9 percent), Sameli (23.8 percent), Kursela (20.0 percent), Manihari (22.5 percent) and Amdabad (18.6 percent). The C.D. Block with minimum proportion of inhabited villages are Balrampur (10.6 percent), Barsoi (6.9 percent), Azamnagar (8.5 percent) and Mansahi (7.7 percent).

Telephone :- The telephone facility is fairly low in the inhabited villages of this district and only 11.7 percent inhabited villages have got it. The C.D. Blocks having maximum proportion of inhabited villages with this facility are Amdabad (14.0 percent), Manihari (35.0 percent), Kursela (40.0 percent), Sameli (38.1 percent), Barari (50.0 percent), Mansahi (26.9 percent), Pranpur (26.3 percent) and Korha (29.7 percent). On the other hand C.D. Blocks with minimum proportion are Falka (7.3 percent), Hasanganj (10.3 percent), Kadwa (5.3 percent), Barsoi (2.8 percent), Azamnagar (7.1 percent), Dandkhora (7.0 percent) and Katihar (3.6 percent). There is no telephone facility in the villages of Balarmpur C.D. Block.

Transport Communication :- Transport communication facility is available in 135 villages out of 1290 inhabited villages in the district (11.7 percent). Majority of villages still do not have this facility. The C.D. Blocks having higher proportion of transport communication facility in the inhabited villages than the district proportion are Falka (14.5 percent), Korha (24.3 percent), Azamnagar (12.3 percent), Katihar (14.3 percent), Mansahi (26.9 percent), Sameli (23.8 percent), Kursela (50.0 percent), Manihari (30.0 percent) and Amdabad (11.6 percent). The C.D. Blocks having lower proportion of villages with this facility than the district proportion are Kadwa (2.2 percent), Balrampur (7.6 percent), Barsoi (7.8 percent), Pranpur (6.6 percent), Dandkhora (7.0

percent) and Barari (10.0 percent). None of the inhabited village of Hasanganj C.D. Block has the facility of transport communication.

Bank :- Banking facility is available in only 85 villages (6.6 percent) out of 1290 inhabited villages in the district of Katihar. The C.D. Blocks having higher proportion of Banks in villages than the district proportions (6.6 percent) are Falka (9.1 percent), Korha (12.2 percent), Hasanganj (7.7 percent), Dandkhora (23.3 percent), Katihar (7.1 percent), Mansahi (7.7 percent), Barari (16.0 percent), Sameli (9.5 percent), Kursela (20.0 percent), Manihari (12.5 percent) and Amdabad (7.0 percent). The C.D. Blocks having lower proportion of banks in the villages compared to the district proportion are Pranpur (2.6 percent), Azamnagar (6.2 percent), Barsoi (3.2 percent), Balrampur (2.3 percent) and Kadwa (4.0 percent).

Agricultural Credit Society :- There are 106 (8.3 percent) villages in Katihar district which are having agricultural credit societies. The C.D. Block with higher percentage of villages with agricultural co-operative societies than the district average are Korha (25.7percent), Barsoi (11.6 percent), Barari (12.0 percent), Kursela (60.0 percent), Manihari (37.5 percent) and Amdabad (16.3 percent). C.D.Blocks of Dandkora, Mansahi and Sameli are devoid of any agricultural credit societies.

Approach by Pucca Road :- This facility is available in 316 villages (24.5 percent) out of 1290 inhabited villages of this district. The highest proportion of villages having approach by pucca road can be observed in Mansahi C.d. Block (80.8 percent) followed by Kursela C.D. Block (70.0 percent). Other C.D. Blocks having higher proportion villages with approach by pucca road than the district proportion are Falka (43.6 percent), Korha (39.2 percent), Hasanganj (35.9 percent), Pranpur (38.2 percent), Dandkhora (58.1 percent), Katihar (57.1 percent), Barari (64.0 percent), Sameli (38.1 percent) and Manihari (40.0 percent). The C.D. Blocks with lower proportion of inhabited villages having approach by pucca road than the district proporwtion (24.5 percent) are Amdabad ((11.6 percent), Azamnagar (9.5 percent), Barsoi (10.1 percent), Balrampur (9.1 percent) and Kadwa (16.0 percent).

Power Supply :- Altogether 21.5 percent of the total inhabited villages are electrified only in this district which account for 277 villages. The C.D. Blocks with higher proportion of electrified villages than the district proportion are Falka (61.8 percent), Korha (79.7 percent), Pranpur (22.4 percent), Dandkhora (58.1 percent), Katihar ((39.3 percent), Mansahi (65.4 percent), Barari (42.0 percent), Sameli (42.9 percent), Kursela (50.0 percent) and Manihari (45.0 percent). The C.D. Blocks with lower proportion of electric facility than the district proportion are Amdabad (7.0 percent), Azamnagar (4.7 percent), Barsoi (8.8 percent), Balrampur (2.3 percent), Kadwa (9.8 percent) and Hasanganj (10.3 percent).

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table shows the number and proportion of the rural population served by different amenity. Educational facility is available to 85.5 percent of the total population in the district of Katihar. The higher proportion of population availing education facility is observed in Mansahi C.D. Block (99.7 percent) followed by Sameli C.D. Block (97.9 percent). The other C.D. Blocks with higher proportion of population availing educational facility than the district proportion (85.5 percent) are Amdabad (96.7 percent), Manihari (96.2 percent), Kursela (95.7 percent), Barari (97.2 percent), Katihar (95.4 percent), Pranpur (92.1 percent), Hasanganj (91.4 percent), Korha (93.8 percent) and Falka (86.1 percent). The C.D. Blocks

with lower proportion of population availing the educational facility than the district proportion are Kadwa (76.5 percent), Balrampur (59.2 percent), Barsoi (67.0 percent), Azamnagar (83.0 percent) and Dandkhora (82.6 percent).

Medical facility is available to 39.3 percent of the total population of Katihar district. The highest proportion is observd in Sameli C.D.Block (77.8 percent) followed by Kursela C.D. Block where 75.0 percent of its population avail this facility. The C.D. Blocks other than these two already mentioned with higher proportion of population availing this facility than the district proportion are Korha (71.8 percent), Dandkhora (52.0 percent), Mansahi (58.0 percent), Barari (67.4 percent), Manihari (60.0 percent) and Amdabad (73.2 percent). The C.D. Blocks with lower proportion of population availing this facility than the district population proportion are Falka (17.4 percent), Hasanganj (13.8 percent), Kadwa (16.2 percent), Balrampur (7.6 percent), Barsoi (12.4 percent), Azamnagar (31.5 percent), Pranpur (29.6 percent) and Katihar (3.8 percent).

Improved drinking water is available to 98.3 percent population of Katihar district. Cent percent improved drinking water facility is available to the population of Amdabad C.D. Block, Manihari C.D. Block, Kursela C.D. Block, Barari C.D. Block and Dandkhora C.D. Block. Other C.D. Blocks with higher proportion of population availing improved drinking water facility than the district population proportion are Korha (98.6 percent), Pranpur (99.8 percent) and Katihar (99.6 percent). The C.D. Blocks with lower proportion of population availing drinking water facility than district population proportion are Falka (97.6 percent), Kadwa (97.4 percent), Balrampur (96.5 percent), Azamnagar (96.2 percent) and Mansahi (93.3 percent). Barsoi and Sameli C.D. Blocks with 98.3 percent each of their population availing the improved drinking water facility are at par with the district proportion.

Post office facility is available to 34.3 percent of the total population in Katihar district. The C.D. Blocks with higher proportion of their population availing the post office facility than the district population proportion are Falka (43.3 percent), Korha (44.1 percent), Pranpur (38.9 percent), Dandkhora (42.6 percent), Katihar (60.6 percent), Barari (61.8 percent), Kursela (59.1 percent), Manihari (54.0 percent) and Amdabad (50.9 percent). The C.D. Blocks with lower proportion of population availing post office facility than the district population proportion are Sameli (33.0 percent), Mansahi (9.4 percent), Azamnagar (15.7 percent), Barsoi (15.0 percent), Balrampur (12.8 percent), Kadwa (22.1 percent) and Hasanganj (11.1 percent).

Altogether 35.0 percent population to Katihar district avail the telephone facility. Maximum proportion of population availing this facility is in Kursela C.D. Block (81.8 percent) followed by Barari C.D. Block where 74.1 percent of its total population avail this facility. The C.D. Blocks other than those discussed having higher proportion of population availing this facility than the district population proportion are Korha (51.4 percent), Pranpur (55.6 percent), Mansahi (38.5 percent), Sameli (68.9 percent), Manihari (69.4 percent) and Amdabad (47.4 percent). The C.D. Blocks having lower proportion of population availing this facility than the district population proportion are Falka (25.6 percent), Hasanganj (12.4 percent), Kadwa (15.7 percent), Azamnagar (13.9 percent), Dandkhora (24.9 percent), Katihar (23.3 percent) and Barsoi (7.1 percent). No telephone facility is available to the population of Balrampur C.D. Block.

Transport communication facility is available to 23.9 percent of population in the rural areas of Katihar district. The C.D. Blocks having higher proportion of population availing this facility than the district population proportion are Falka (42.9 percent), Korha (32.4 percent), Katihar (46.1 percent), Mansahi (42.5 percent), Sameli (57.1 percent), Manihari (36.0 percent), Amdabad (37.7 percent) and Kursela (72.0 percent). The C.D. Blocks with lower proportion of population availing this facility than the district population proportion are Kadwa (7.5 percent), Balrampur (7.2 percent), Barsoi (13.9 percent), Azamnagar (16.7 percent), Pranpur (20.8 percent), Dandkhora (15.7 percent) and Barari (13.0 percent). This facility is not available to the population of Hasanganj C.D. Block.

Banking facility is available to 17.8 percent population in rural areas of Katihar district. The highest population proportion availing this facility is observed in Kursela C.D. Block (62.5 percent) followed by Dandkhora C.D. Block (33.3 percent). The other C.D. Block with higher proportion of population availing this facility than the district population proportion are Falka (28.3 percent), Barari (31.7

percent), Manihari (18.4 percent) and Amdabad (24.2 percent). The C.D. Blocks having lower population proportion than the district proportion availing this facility are Korha (13.3 percent), Hasanganj (10.6 percent), Kadwa (15.2 percent), Balrampur (2.6 percent), Barsoi (8.2 percent), Azamnagar (13.5 percent), Pranpur (14.9 percent), Sameli (16.7 percent) and Mansahi (1.1 percent).

Agricultural Credit Societies are available to 21.1 percent of this total population in rural areas of Katihar district. The highest proportion of population availing this facility is observed in Kursela C.D. Block (85.9 percent) followed by Manihari C.D. Block (59.6 percent). The C.D. Blocks other than the C.D. Blocks discussed above having higher population proportion availing this facility than the district population proportion are Amdabad (46.8 percent), Barari (31.8 percent), Katihar (21.2 percent), Hasanganj (21.6 percent) and Korha C.D. Block (34.4 percent). The C.D. Blocks with lower population proportion availing this facility than the district population proportion are Falka (16.4 percent), Kadwa (4.7 percent), Balrampur (5.3 percent), Barsoi (13.1 percent), Azamnagar (11.3 percent) and Pranpur (6.8 percent). Agricultural Credit Societies are not available in Dandkhora, Mansahi and Sameli C.D. Blocks.

Approach by pucca road facility is available to 45.6 percent rural population in Katihar district. The C.D. Blocks having higher population proportion availing this facility than the district population proportion are Falka (70.9 percent), Korha (55.1 percent), Pranpur (50.8 percent), Dandkhora (55.8 percent), Katihar (77.0 percent), Mansahi (86.6 percent), Barari (78.9 percent), Sameli (74.9 percent), Kursela (80.7 percent) and Manihari (66.9 percent). The C.D. Blocks having lower population proportion availing this facility than the district population proportion are Hasanganj (36.8 percent), Kadwa (26.9 percent), Balrampur (18.4 percent), Barsoi (16.9 percent), Azamnagar (13.4 percent) and Amdabad (37.7 percent).

Power supply is available to 40.8 percent population in rural areas of Katihar district. The highest proportion of population availing this facility is observed in Korha C.D. Block (90.0 percent), followed by Falka C.D. Block (84.1 percent). The other C.D. Blocks with higher population proportion than the district population proportion are Pranpur (41.3 percent), Mansahi (72.1 percent), Barari (53.1 percent), Sameli (49.5 percent), Kursela (73.1 percent), Manihari (60.2 percent), Dandkhora (68.2 percent) and Katihar (61.2 percent). The C.D. Blocks having lower proportion of population than the district population proportion are Hasanganj (15.1 percent), Kadwa (15.1 percent), Balrampur (1.9 percent), Barsoi (14.7 percent), Azamnagar (9.5 percent) and Amdabad (34.1 percent).

This table shows the distribution of villages not having amenities, arranged by distance ranges from the place where these are available. It is observed in the table that 505 villages do not have any primary school. This facility is available for 337 villages at the places situated within 5 kms. This facility is available at the places situated within 5-10 kms for 165 villages. Remaining 3 villages avail this facility with the range of 10 kms & above. Middle school facility is not available with in the village for 1,107. This facility is available at the places situated within 5 kms for 520 villages. Other 522 villages avail this facility with the ranges 5-10 kms. Remaining 65 villages avail this facility with the ranges 10 kms & above. It has also been observed that 1,280 villages do not have a Degree college. This facility is available for 112 village at the distance range of less than 5 kms. 349 villages avail this facility with the distance range 5-10 kms and remaining 819 villages avail it at the distance range of 10 kms and above.

Hospital facility is not available to 1266 villages in this district. Altogether 284 villages avail this facility at the distance range of less than 5 kms., 422 villages avail it at the distance range 5-10 kms and remaining 560 villages avail this facility at the distance range 10 kms and above. Primary Health Centre (PHC) is not available in 1,260 villages of this district. Out of which 254 villages avail this facility at the distance range of less than 5 kms, 434 villages have this facility at the distance range of 5-10 kms and remaining 572 villages have this facility at the distance range of 10 kms and above.

Post Office facility is not available in 1,116 villages in this district. Table shows that 638 villages avail this facility at the distance ranges of less than 5 kms. 439 villages have this at a distance range of 5-10 kms and remaining 39 villages avail this facility at a distance range of 10 kms and above.

Telephone facility is not available in 1,139 villages in this district. Of which 408 villages avail this facility at the distance of less than 5 kms. 391 villages avail this facility at the distance range of 5-10 kms. and remaining 340 villages have this facility at the distance range of 10 kms and above.

Bus service is not available in 1,207 villages of this district. Table further depiets 326 villages avail this facility at the distance range within 5 kms. and 514 villages have this facility at the distance range 5-10 kms. Remaining 367 villages have his facility at the distance range of 10 kms and above.

Altogether 1,219 villages do not have the facility of Commercial Banks in this district. Out of which 375 villages avail this facility at the distance range less than 5 kms. and 694 villages have this facility at the distance range of 5-10 kms. Remaining 150 villages have this facility at the distance range 10 kms and above.

Co-operative Bank facility is not available in 1,265 villages of this district of which, 197 villages avail this facility at the distance range less than 5 kms. and 301 villages have this facility at the distance range 5-10 kms. There are remaining 767 villages have this facility at the distance range 10 kms and above.

It is observed that 1,184 villages in the district of Katihar which do not have Agricultural Credit Societies. It includes 241 villages which avail this facility at the distance range less than 5 kms. 307 villages have this facility at the distance range 5-10 kms. Remaining 636 villages avail this facility at the distance range 10 kms and above.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

Table 40 shows the distribution of villages according to the distance from the nearest statutory town and availability of different amenities.

There are 62.0 percent villages accounting for 800 villages which avail the educational facility from nearest statutory towns. Maximum number of villages (481) accounting for 61.9 percent of total villages availing this facility from statutory towns at the distance range between 16 and 50 kms. and 192 villages (69.6 percent) have this facility at the distance range 5-15 kms. and 107 villages (55.2 percent) avail this facility at the distance range of 51+ kms. and above. Remaining 20 villages accounting for 46.5 percent avail the educational facility from the nearest statutory towns at the distance range of less than 5 kms.

Only 248 villages out of 1290 villages of Katihar district which account for 19.2 percent of the total inhabited village avail medical facility from the nearest statutory towns. Maximum number of village viz. 160 villages avail this facility at the distance range between 16 and 50 kms. Followed by 57 villages have this facility from nearest statutory town at the distance range between 5 and 15 kms., 21 villages avail this facility from statutory town at the distance range of 51+ kms. Only avail the medical facilities from nearest statutory towns. 10 villages are at the distance range of less than 5 kms.

There are 174 villages which account for 13.5 percent of the total inhabited villages of this district avail the Post Office facility from the nearest statutory town. 102 villages which avail the Postal facility from the nearest statutory towns at the distance range between 16 and 50 kms. Other 43 villages avail this facility within the distance range between 5 and 15 kms. and 19 villages have the Post Office facility from nearest statutory town at the distance range of 51 kms and above. Remaining 10 villages avail Post Office facility from nearest statutory town at the distance range within 5 kms.

Table shows that 151 villages accounting 11.7 percent of the total inhabited villages of Katihar district avail the telephone facility from the near by statutory town. Only 5 villages have this facility at the distance range of less than 5 kms. Again 52 villages have this facility at the distance range between 5-15 kms. and 85 villages avail this facility at the distance range between 16 and 50. Remaining 9

villages are availing the telephone facility from near by statutory town at the distance range of 50 kms. and above.

One hundred thirty five villages accounting for 10.5 percent of total inhabited villages of Katihar district avail transport communication facility from near by statutory town. Maximum number of villages (78) accounting for 10 percent avail this facility at the distance range between 16 and 50 kms. from near by statutory town followed by 36 villages at the distance range between 5 and 15 kms., 16 villages avail this facility at the distance of 51 kms and above. Remaining 5 villages have this facility within the distance range of less than 5 kms. from near by statutory town.

There are 85 villages which account for 6.6 percent of the total inhabited villages have banking facility available from near by statutory towns. Out of 85 villages maximum number of villages i.e. 55 have this facility at the distance range between 16 and 50 kms. from nearby statutory town followed by 21 villages have this facility at the distance range of 51 kms and above and remaining 3 villages in the distance range less than 5 kms. from nearly statutory towns.

Facilities of Agricultural Credit Societies are available to 106 villages from nearby statutory towns in includes 53 villages have the facility of Agricultural Credit Societies at the distance range between 16 and 50 kms. from nearby statutory town. Again 27 villages have this facility within the distance range between 5 and 15 kms. followed by 22 villages having this facility within the distance range of 51 kms. and above. Remaining 4 villages have this facility within the distance range of less than 5 kms. from nearby statutory town.

Table shows that 316 villages have the facility of approach by pucca road from nearby statutory town. Out of which 186 villages have this facility in the distance range between 16 and 50 kms followed by 101 villages in the distance range between 5 and 15 kms. Approach by pucca road in the distance range of less than 5 kms. is available to 17 villages and the said facilities is avilable to 12 villages at the distance range of 51 kms. and above from the nearest statutory town.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water *	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The above table shows the distribution of villages according to population range and amenities available. Educational facility is available in 800 villages out of 1290 inhabited villages account for 62.0 percent of total village in Katihar district.

Maximum number of villages (377) lie in the population range of 1-499. Out of these 377 villages 93 villages have educational amenity accounting for 24.7 percent, 277 villages (21.5 percent) fall in the population range between 500-999, 169 villages out of 277 villages have educational amenity which account for 61.0 percent of the village in this range. In the population range of 1000-1999, 234 villages have educational amenity which account for 75.0 percent. Out of 249 villages,231 i.e. 92.8 percent of village which one in the population range of 2000-4999 have education amenity. Fifty three villages out of 54 villages in the population range of 5000-9999 have educational amenity which accounts for 98.1 percent and 20 villages out of 21 villages in the population range 10000 and above 95.2 percent have have i.e, educational amenity.

Only 248 villages out of 1290 inhabited villages in this district have medical facility which account for 19.2 percent of the total villages. Table shows that 26 villages out of 377 villages accounting for 6.9 percent in the population range 1-499 have got medical facility. Again 32 villages out of 277 villages in the population range 500-999 have got the medical facility which account for 11.6 percent. Altogether 53 villages (17.0 percent) in the population range 1000-1999 have got medical facility. A fairly good number, i.e.89 villages out of 249 villages in the population range 2000-4999 have got medical facility. Besides 31 villages out of 54 villages in the population range 5000-9999 accounting for 57.4 percent have got medical facility and 17 villages out of 20 villages in population range 10000 and above accounting for 81.1 percent have the medical facility. The proportion of villages having different amenities varies in direct relation to their population range. Generally the maximum percentage of villages having different amenities is observed in higher population ranges which further corroborates the fact that more facilities are generally available in larger villages than in smaller one.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Falka	55	16,283	79.3	52.6
2	Korha	74	29,600	83.5	50.0
3	Hasanganj	39	7,069	74.1	42.5
4	Kadwa	225	32,748	84.9	34.6
5	Balrampur	132	16,857	87.9	44.9
6	Barsoi	217	27,033	82.6	40.5
7	Azamnagar	211	28,320	71.7	43.0
8	Pranpur	76	14,840	66.2	24.7
9	Dandkhora	43	8,380	80.0	67.8
10	Katihar	28	8,510	93.8	60.8
11	Mansahi	26	7,815	69.1	28.1
12	Barari	50	29,153	57.7	67.2
13	Sameli	21	12,423	76.8	31.6
14	Kursela	10	5,844	56.5	18.9
15	Manihari	40	19,254	59.6	51.3
16	Amdabad	43	17,426	65.9	27.8
	District Total:	**1,290**	**281,555**	**74.8**	**44.1**

Note : Cultivable area = irrigated area + unirrigated area

This table gives the percentage of cultivable area and also the proportion of irrigated area to the total cultivable area in the district and its various C.D. Blocks.

It would be observed from this table that 74.8 percent of the total area of this district is utilized for cultivation and of this only 44.1 percent area is found to be irrigated. Among the C.D. Blocks the highest proportion of cultivable area can be observed in Katihar C.D. Block with 93.8 percent followed by Balrampur C.D. Block with 87.9 percent. Other C.D. Blocks with higher proportion of cultivable area of that the district proportion are Falka (79.3 percent), Korha (83.5 percent), Kadwa (84.9 percent), Barsoi (82.6 percent), Dandkhora (80.0 percent) and Sameli (76.8 percent). The C.D. Blocks having lower proportion of cultivable land than the district proportion are Hasanganj (74.1 percent), Azamnagar (71.7 percent), Pranpur (66.2 percent), Mansahi (69.1 percent), Barari (57.7 percent), Kursela (56.5 percent), Amdabad (65.9 percent) and Manihari (69.6 percent).

The highest proportion of irrigated area (67.8 percent) to the total cultivable area is observed in Dandkhora C.D. Block followed by Barari C.D. Block with 67.2 percent. Other C.D. Blocks with higher proportion of irrigated area to the total cultivable area than the district proportion are Falka (52.6 percent), Korha (50.0 percent), Katihar (60.8 percent), Balrampur (44.9 percent) and Manihari (51.3 percent). The C.D. Block having lower proportion of irrigated areawe than the district proportion are Hasanganj (42.5 percent), Kadwa (34.6 percent), Barsoi (40.5 percent), Pranpur (24.7 percent), Mansahi (28.1 percent), Sameli (31.6 percent), Kursela (18.9 percent) and Amdabad (27.8 percent).

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Katihar (M)	12.0	1.5	10.5	8.9	2.4	0.1	2.9	3.4	0.1
2	III Manihari (NA)	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0
	District Total:	**10.8**	**1.3**	**9.5**	**8.0**	**2.2**	**0.1**	**2.6**	**3.0**	**0.1**

This table shows the details of finances in the statutory towns in term of per capita receipt and expenditure. There are two statutory towns in Katihar district viz., Katihar Municipality and Manihari Notified Area. On going into the details of receipt and expenditure under different heads in respect of Manihari Notified Area there is no any such details. As Manihari Notified area is newly created town and it seems that no any statutory local body has been elected. This town is under the direct control of the Chairman (The Sub-divisional Officer). On going in to the details of receipt in Katihar Municipality out of the total 12.0 of their receipt, per capita receipt through the taxes is 14.7 and from all other sources is 10.5. Per capita expenditure against public administration is 2.4, Public health and conveniences 0.1, Public works is 2.9, Public institution 3.4 and others 0.1 amounting to total per capita expenditure of 8.9.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Katihar (M)	0.8	1.1	0.4	0.2	0.3
2	Manihari (NA)	2.3	0.5	0.9	0.0	0.5
	District Total:	**0.9**	**1.0**	**0.4**	**0.2**	**0.3**

This table gives the details of different categories of educational institutions per 10000 population in the statutory towns of the district. It would be seen from this table that in Katihar Municipality the Primary and Junior Secondary/Middle School account for 0.8 and 1.1 institution 10,000 per population respectively. Secondary/Matriculation and Senior secondary institutions account for an average of 0.4 and 0.2 institution respectively per 10,000 population. College accounts for an average of 0.3 institution per 10,000 population in Katihar Municipality Similarly. Primary and Junior Secondary/Middle School account for an average of 2.3 and 0.5 respectively per 10,000 population in Manihar Notified area. Secondary/ Matriculation School and Collage account for an average of 0.9 and 0.5 respectively per 10,000 populations. There is no Senior Secondary School in Manihar Notified Area.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Katihar(M)	23
2	Manihari(NA)	2
3	Raghunathpur(CT)	0
	Distrct Total:	**20**

This table gives information regarding availability of beds in Medical Institutions in the towns of Katihar district. The number of beds in Medical Institution of Katihar Municipality per 10,000 population is 23 only and 2 per ten thousand population in Manihari Notified Area. There is no Medical Institution in newly created Reghunathpur Census Town.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
		N.A.		

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Katihar (M)	Hume Pipe Iron Goods Gunny Bags	GunnyBags Flour Maida
2	Manihari (NA)	Jute	Vegetable Fish Mango
3	Raghunathpur (CT)	Furniture Iron Goods	Jute Paddy Wheel

This table furnishes the information in respect of important commodities manufactured and exported in the towns of Katihar district. In Katihar Municipality Hume Pipe units, Flour Mill, Jute Mill are available manufacturing Hume pipe, Flour, Maida and Gunny bags. Gunny bags, Flour and Maida are exported from the town. In Manihari Notified Area there is no manufacturing or processing units available at all. Vegetables, Mangoes and fishes are exported out of this town. In Raghunathpur Census Town wooden furniture and fixtures as well as iron goods are manufactured and Jute, Paddy and Cartwheel are exported from the Census Town.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

This table furnishes the information in respect of household by tenure status and number of rooms occupied in the Katihar district.

There are as many as 439,637 households accounting for 96.2 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in single room is the highest (61.1 percent) whereas lowest proportion of population is observed in no exclusive room (0.8 percent). Again 26.7 percent of the households dwell in two rooms house, 7.3 percent households dwell in three rooms have and remaining 4.1 households dwell in 3 room houses. The median number of room is one for the total households in the tenure status of owned category. There are 47,099 households of Scheduled Castes accounting for 10.3 percent of the total households. Out of which 44,302 households of Scheduled Castes accounting for 94.1 percent of the total Scheduled Castes household dwell in owned houses and 496 households accounting for 1.1 percent dwell in no exclusive room. The highest proportion of Scheduled Caste household (75.2 percent) dwell in one room followed by 18.1 percent households dwelling in two rooms. 3.6 percent of Scheduled Caste household dwell in three rooms and only 2.0 percent of scheduled caste household dwell in more than 3 rooms. The median number of room is 1 for the Scheduled Caste household. Table further depiets 28,704 Scheduled Tribes households accounting for 97.6 percent of the total Scheduled Tribes households dwell in owned houses. Maximum number of Scheduled Tribes household dwell in one room owned house (66.8 percent) followed by dwellers of 2 rooms own houses (24.2 percent). In three room owned

houses only 1,616 Scheduled Tribes households dwell accounting for 5.6 percent of Scheduled Tribes household. Again 2.2 percent Scheduled Tribes households dwell in owned more than 3 rooms houses. Similar status is observed in the remaining two tenure status viz., rented and others also.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

Data source : Census of India 2001, H-series: Tables on Houses, Household Amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roofs made of kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

This table furnishes the percentage distribution of households living in permanent, semi - permanent and temporary house. It would be seen from the above table that the maximum proportion of households i.e. 51.6 percent in rural area reside in temporary houses followed by 37.1 percent living in semi - permanent houses. Only 11.3 percent of the total household live in permanent houses in rural areas of this district. Among the C.D. Block Hasanganj has the maximum proportion of rural household living in temporary houses (83.4 percent) followed by Falka C.D. Block (75.6 percent). Other C.D. Blocks with higher proportion of households living in temporary houses than the district average are Korha (63.2 percent), Kadwa (54.5 percent), Barsoi (52.6 percent), Dandkhora (75.3 percent) and Katihar (54.5 percent). The C.D. Blocks with lower proportion of temporary houses than the district average are Balrampur (51.1 percent), Azamnagar (50.4 percent), Pranpur (46.3 percent), Mansahi (49.8 percent), Barari (44.1 percent), Sameli (46.7 percent), Manihari (34.2 percent) and Amdabad (31.6 percent). Kursela C.D.

Block has the lowest proportion of temporary houses (27.4 percent). Permanent houses is available to 11.3 percent household in the rural areas of Katihar district. The highest proportion of permanent houses is observed in Kursela C.D. Block (21.0 percent) followed by Sameli C.D. Block (19.7 percent). Other C.D. Blocks with higher proportion if households living in permanent houses than the district average are Korha (12.8 percent) and Katihar (16.7 percent). Proportion of permanent house in Barsoi C.D. Block is at par with the district average (11.3 percent). The C.D. Blocks with lower proportion of households living in permanent houses than the district average are Falka (10.2 percent), Hasanganj (10.4 percent), Kadwa (10.9 percent), Balrampur (9.1 percent), Azamnagar (9.7 percent), Pranpur (10.5 percent), Dandkhora (8.6 percent), Mansahi (11.1 percent), Barari (10.6 percent), Manihari (10.0 percent) and Amdabad (9.3 percent). Altogether 37.1 percent of the total households dwell in semi permanent houses in the rural areas of Katihar district. Proportion of household living in semi - permanent houses varies between 59.1 percent in Amdabad C.D. Block and 6.1 percent in Hasanganj C.D. Block.

In urban areas of this district 56.7 percent of total households live in permanent houses. The highest proportion of household living in permanent houses is observed in Katihar urban area (61.2 percent) followed by Barsoi urban area (Raghunathpur Census Town) with 41.9 percent of household live in permanent houses. Manihari Notified Area has the lowest proportion of households (23.2 percent) live in permanent houses. In case of semi - permanent houses Manilhari Notified Area has highest proportion of households (69.4 percent) living in semi - permanent houses followed by Raghunathpur Census Town in Barsoi C.D. Block (37.9 percent). Katihar urban area has lowest proportion of households (27.2 percent) living in semi - permanent houses. Only 11.4 percent households live in the temporary houses in the urban areas of Katihar district. The highest proportion of households living in temporary houses, can be observed in Notified Area of Barsoi C.D. Block is in Raghunathpur Census town (20.2 percent) followed by Katihar urban area (11.5 percent). Manihari urban area has the lowest proportion of urban households living in temporary houses (7.4 percent).

Data source : Census of India 2001, H-series: Tables on Houses, Household Amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note : Percentage is given in brackets below the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

The table shows the percentage of households having improved drinking water source. electricity, bathroom, toilet and drainage facility. Altogether 88.8 percent of the total household which account for 373,306 households in rural area have improved drinking water facility. The highest proportion of households with improved drinking water facility may be observed in Barari C.D. Block and Balrampur C.D. Block both with 93.2 percent each followed by Falka C.D. Block with 92.4 percent. Other C.D. Blocks with higher proportion of households having improved drinking water facility than the district average are Hasanganj (90.3 percent), Kadwa and Azamnagar (89.7 percent each). Katihar C.D. Block is at par with the district proportion (88.8 percent). The C.D. Blocks with lower proportion of households having this facility than the district average are Korha (88.6 percent), Barsoi (83.7 percent), Pranpur (87.8 percent), Dandkhora (87.0 percent), Mansahi (85.2 percent), Sameli (87.3 percent), Kursela (85.3 percent), Manihari (88.2 percent) and Amdabad (87.4 percent).

As regards electricity it has been found that only 3.0 percent of the rural households in the district have electricity. The highest proportion of household with electricity is in Kursela C.D. Block (17.5 percent) followed by Sameli C.D. Block (8.7 percent). Other C.D. Blocks having higher proportion of household with electricity than the district average are Korkha (6.6 percent), Katihar (5.5 percent), Barari (4.4 percent) and Falka (3.3 percent). The C.D. Blocks where electricity is available to lower proportion of household than the district average are Hasanganj (2.0 percent), Balrampur (1.0 percent), Barsoi (1.3 percent), Kadwa (2.0 percent), Azamnagar (0.9 percent), Pranpur (1.1 percent), Dandkhora (2.2 percent), Mansahi (2.6 percent) and Amdabad (0.3 percent).

Bathroom facility is available to 3.2 percent household in rural areas of Katihar district. The C.D. Blocks having higher proportion of households with bathroom facility than the district average are Katihar (6.0 percent), Pranpur (5.4 percent), Kursela (5.3 percent), Kadwa (3.6 percent), Mansahi (3.5 percent), Barari (3.4 percent) and Korha (3.3 percent). The C.D. Blocks having lower proportion of household with this facility than the district average are Falka (2.4 percent), Hasanganj (2.8 percent), Balrampur (2.1 percent), Dandkhora (1.6 percent), Sameli (3.1 percent), Manihari (2.2 percent) and Azamnagar C.D. Block having bathroom facility to 3.2 percent rural household is at par with district proportion.

Toilet facility is available to 10.5 percent households in the rural areas of Katihar district. Kadwa C.D. Block the highest number of households with this facility (14.8 percent) followed by Balrampur C.D. Block (14.1 percent). Others C.D. Blocks with higher proportion of household availing the toilet facility are Azamnagar (14.0 percent), Kursela (13.3 percent) and Barsoi (12.6 percent). The C.D. Blocks with lower proportion of this facility than the district average are Falka (8.1 percent),Korha (8.8 percent), Hasanganj (4.1 percent), Pranpur (9.8 percent), Dandkhora (4.8 percent), Katihar (10.3 percent), Mansahi (6.9 percent), Barari (7.7 percent), Sameli (7.9 percent), Manihari (7.0 percent) and Amdabad (6.9 percent).

Drainage facility is available to 12.2 percent households in rural areas of Katihar district. The C.D. Blocks where this facility is available to household more than the district proportion are Korha (14.7 percent), Kadwa (19.4 percent), Balrampur (12.7 percent), Pranpur (16.3 percent), Katihar (14.2 percent), Mansahi (12.3 percent) and Kursela (12.7 percent). The C.D. Blocks with lower proportion of household with facility than the district proportion are Falka (7.7 percent), Dandkhora (7.9 percent), Barari (4.6 percent) and Amdabad (9.8 percent). The households of Sameli C.D. Block has equal proportion availing the drainage facility (12.2 percent).

In urban areas of this district improved drinking water facility is available to 88.1 percent of

households. The highest proportion of household availing this facility can be observed in urban areas of Barsoi C.D. Block (95.0 percent) closely followed by Katihar urban area (92.3 percent). Manihari Notified Area with 51.5 percent households availing this facility is at the bottom.

Electricity is available to 52.2 percent households in urban areas of Katihar district. The highest number of households availing this facility can be observed in Katihar urban area (56.6 percent) followed by Barsoi urban area, i.e., Raghunathpur Census Town (43.5 percent). Only 18.3 percent of urban households avail this facility in Manihari Notified Area.

Bathroom facility is available to 41.4 percent household in urban areas of Katihar district. The highest proportion of households availing this facility can be observed in Katihar urban area (44.3 percent) followed by Barsoi urban area, i.e., Raghunathpur Census Town (37.5 percent). The lowest proportion of household can be seen in Manihari Notified Area (17.8 percent).

Toilet facility is available to 66.9 percent household in the urban areas of Katihar district. The highest proportion of household having this facility can be seen in Katihar Urban Area (70.8 percent) followed by Barsoi Urban Area, i.e., Raghunathpur Census Town (59.8 percent). The lowest number of households having this facility is observed in Manihar Notified Area (36.0 percent).

Drainage facility is available to 51.7 percent household in urban areas of Katihar district. The highest number of households availing this facility can be seen in Katilhar Urban Area (56.3 percent) followed by Barsoi Urban Area i.e. Raghunathpur Census Town (39.9 percent). The lowest proportion of households availing this facility can be observed in Manihari Notified Area (17.1 percent).

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The above table shows the number and percent of households using types of fuel for cooking. Altogether 18.6 percent rural household in the district use firewood as fuel for cooking. The highest proportion of households using this fuel for cooking is in Amdabad C.D. Block (36.6 percent) followed

by Katihar C.D. Block (34.8 percent) whereas it is lowest in C.D. Block Barsoi with 5.7 percent.

Crop residue is the most common fuel used for cooking as envisaged from the table. Table shows 73.9 percent households in the rural areas of Katihar district use crop residue as fuel for cooking. Among the C.D. Blocks highest proportion of household using crop residue as fuel for cooking is 90.2 percent in Barsoi C.D. Block followed by Balrampur C.D. Block with 88.0 percent household. The lowest proportion of household using crop residue as fuel for cooking can be observed in Amdabad C.D. Block with 49.2 percent only.

Cowdung cake is used as fuel for cooking by 5.2 percent households in rural areas of this district. Among the C.D. Blocks the proportion of households using cowdung cake as fuel for cooking is highest in Manihari C.D. Block (13.6 percent) followed by Amdabad C.D. Block (13.1 percent) where as the lowest proportion of household using cowdung cake as fuel for cooking may be seen in Balrampur C.D. Block (0.9 percent)

Electricity, coal and kerosene are used by just 0.1 percent households in rural areas of Katihar district.

Cooking Gas (LPG) is used by nearly 0.5 percent households of this district in rural areas.

Only 65 households use bio-gas as fuel for cooking in the rural areas of the district. Fuel as categorised Others is used by 1.4 percent household in rural areas.

In urban areas of this district firewood and LPG Gas are the common fuel for cooking in Katihar district. The highest proportion of household use firewood in urban areas of Barsoi C.D. Block i.e. Raghunathpur Census Town (64.5 percent) followed by Manihari Notified Area (57.2 percent). The lowest proportion of household using firewood as fuel for cooking may be observed in Katihar urban area. The highest proportion of household use cooking gas (LPG) as fuel is observed in urban areas of Katihar C.D.Block (36.4 percent), Households of Barsoi urban area viz., Raghunathpur Census Town (7.4 percent) and Manihari Notified Area (5.1 percent) are well behind in using the cooking gas (LPG) (43.9 percent) as fuel for cooking. The fuels shown in the above table are in dismal status.

Data source: Census of India 2001, H-series: Tables on Houses, Household Amenities and Assets.

Table 52 shows 12.5 percent households accounting for 57,153 are availing the banking services in this district. The highest number of the household accounting for 15,136 availing this service can be seen in Katihar C.D. Block whereas the lowest one is in Hasanganj C.D. Block accounting for just 812

households. Radio/transistor are available to 21.3 percent of the total households accounting for 97,261 households. The highest number of households (12,716) have Radios/transistors in Katihar C.D. Block while the lowest number of household (1,785) having this asset can be seen in Hasanganj C.D. Block. Television is available to 7.1 percent households of this district. The highest number of household with this asset (15,145) can be seen in Katihar C.D. Block where as only 381 households have it in Hasanganj C.D. Block. Telephone is available to 1.8 percent households of this district. Telephone facility is available to 4,714 households in Katihar C.D. Block whereas in Hasanganj only 58 households only avail this facility. Bicycle is available in 167,866 household accounting for 36.7 percent of the total household. Maximum number of households i.e. 20,197 have bicycle in Katihar C.D. Block whereas Kursela has only 2,434 household having bicycles. Scooter/ motorcycle is available to 9,582 households in this district which accounts for 2.1 percent of total households. The highest number of households (3,576) having motorcycle/scooter exist in Katihar C.D. Block whereas the lowest number can be seen in Hasanganj C.D. Block (138 households). Car/jeep/van is available to 2,072 households accounting for meager 0.4 percent in this district. The highest number of households having car/jeep/van (588) can be observed in Katilhar C.D. Block whereas the lowest one can be seen in Dandkhora with 28 households possessing this.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

Katihar sub-division of the old Purnia district was upgraded and got the status of an independent district on the 2nd October, 1973 consisting of 16 C.D. Blocks and 2 statutory towns. Earlier in 1955, Katihar subdivision was created out of Purnia Sadar subdivision with its headquarters at Mirchaibari on the outskirts of Katihar town.

Katihar is famous for three melas, viz. Kalibari mela, Durgasthan mela and Janmastami mela. They are very popular and visited by thousands of people from villages during these festival. During recent years, Durga puja and Sarswati puja, the latter mostly organised by the students have surpassed all other festivals in popularity. Other fairs and festivals are held regularly by different communities in the district.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Janki Temple, Sitamarhi

About 1.5 Kms. off the railway station and the bus stand, this is the birth place of Sita. Janki kund is adjacent south of the temple.

Janaki Temple, Panaura

This is about 5 Kms. west of Sitamarhi. This place claims the honour of being the birth place of Sita.

Haleshwar Asthan

This is 3 Kms. north-west of Sitamarhi. As the myth goes, the king Videha had founded a temple of Lord Shiva on the occasion of Putra Yesthi Yajna. This temple was named as the Haleshwarnath temple.

Panth-Pakar

Panth-Pakar is 8 Kms. north-east of Sitamarhi. It is said that after her marriage, Sita was carried in a 'palanquin' to Ayodhya by this route. An old banyan tree is still standing here under which she is said to have rested for a while.

Bodhayan-Sar

This is the sacred place, where Maharshi Bodhaya had written number of epics. The great Grammarian 'Panini' was one of his disciples. The renowned saint Deoraha Baba had laid the foundation of a Bodhyan temple here some 37 years ago.

Baghi Math

Some seven kilometres north-west of Sitamarhi, in Baghi village, there is a big Hindu monastery which contain 108 rooms. This is a famous place for worship and performing yajna.

Pupri

There is a famous Baba Nageshwarnath (Lord Shiva) temple here. It is said that Lord Shiva himself had appeared here as Nageshwar Nath Mahadeo

Goraul Sharif

Goraul Sharif is situated some 26 Kms. from Sitamarhi town. This is a very sacred place for Muslims, after Biharsharif and Phulwarisharif.

Shukeshwar Asthan

This place is situated some 26 Kms. north-west of Sitamarhi. This was the worship place of Shukadev Muni, the great saint. A big and ancient temple which has been dedicated to, and named after Shukeshwarnath (Lord Shiva) still exists here.

Sabhagachhi Sasula

This is a place of social and cultural importance where the Maithil Brahmins gather every year and hold matrimonial negotiations on a large scale, which finally leads to the marriages. This is a symbol of the ancient culture of Mithila. This place is some 20 Kms. west of Sitamarhi town.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

The district is mainly agrarian in nature. It is a jute and paddy growing area having potential of becoming important industrial belt based on these two raw materials. There are several small and medium sized rice and oil mills in the district. Jute, rice, oil seeds are important commodities which are exported out of the district also.

The district is prone to flood during the rainy season.

(xi) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publication which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and telephone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has

been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to

the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under

column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households

(approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

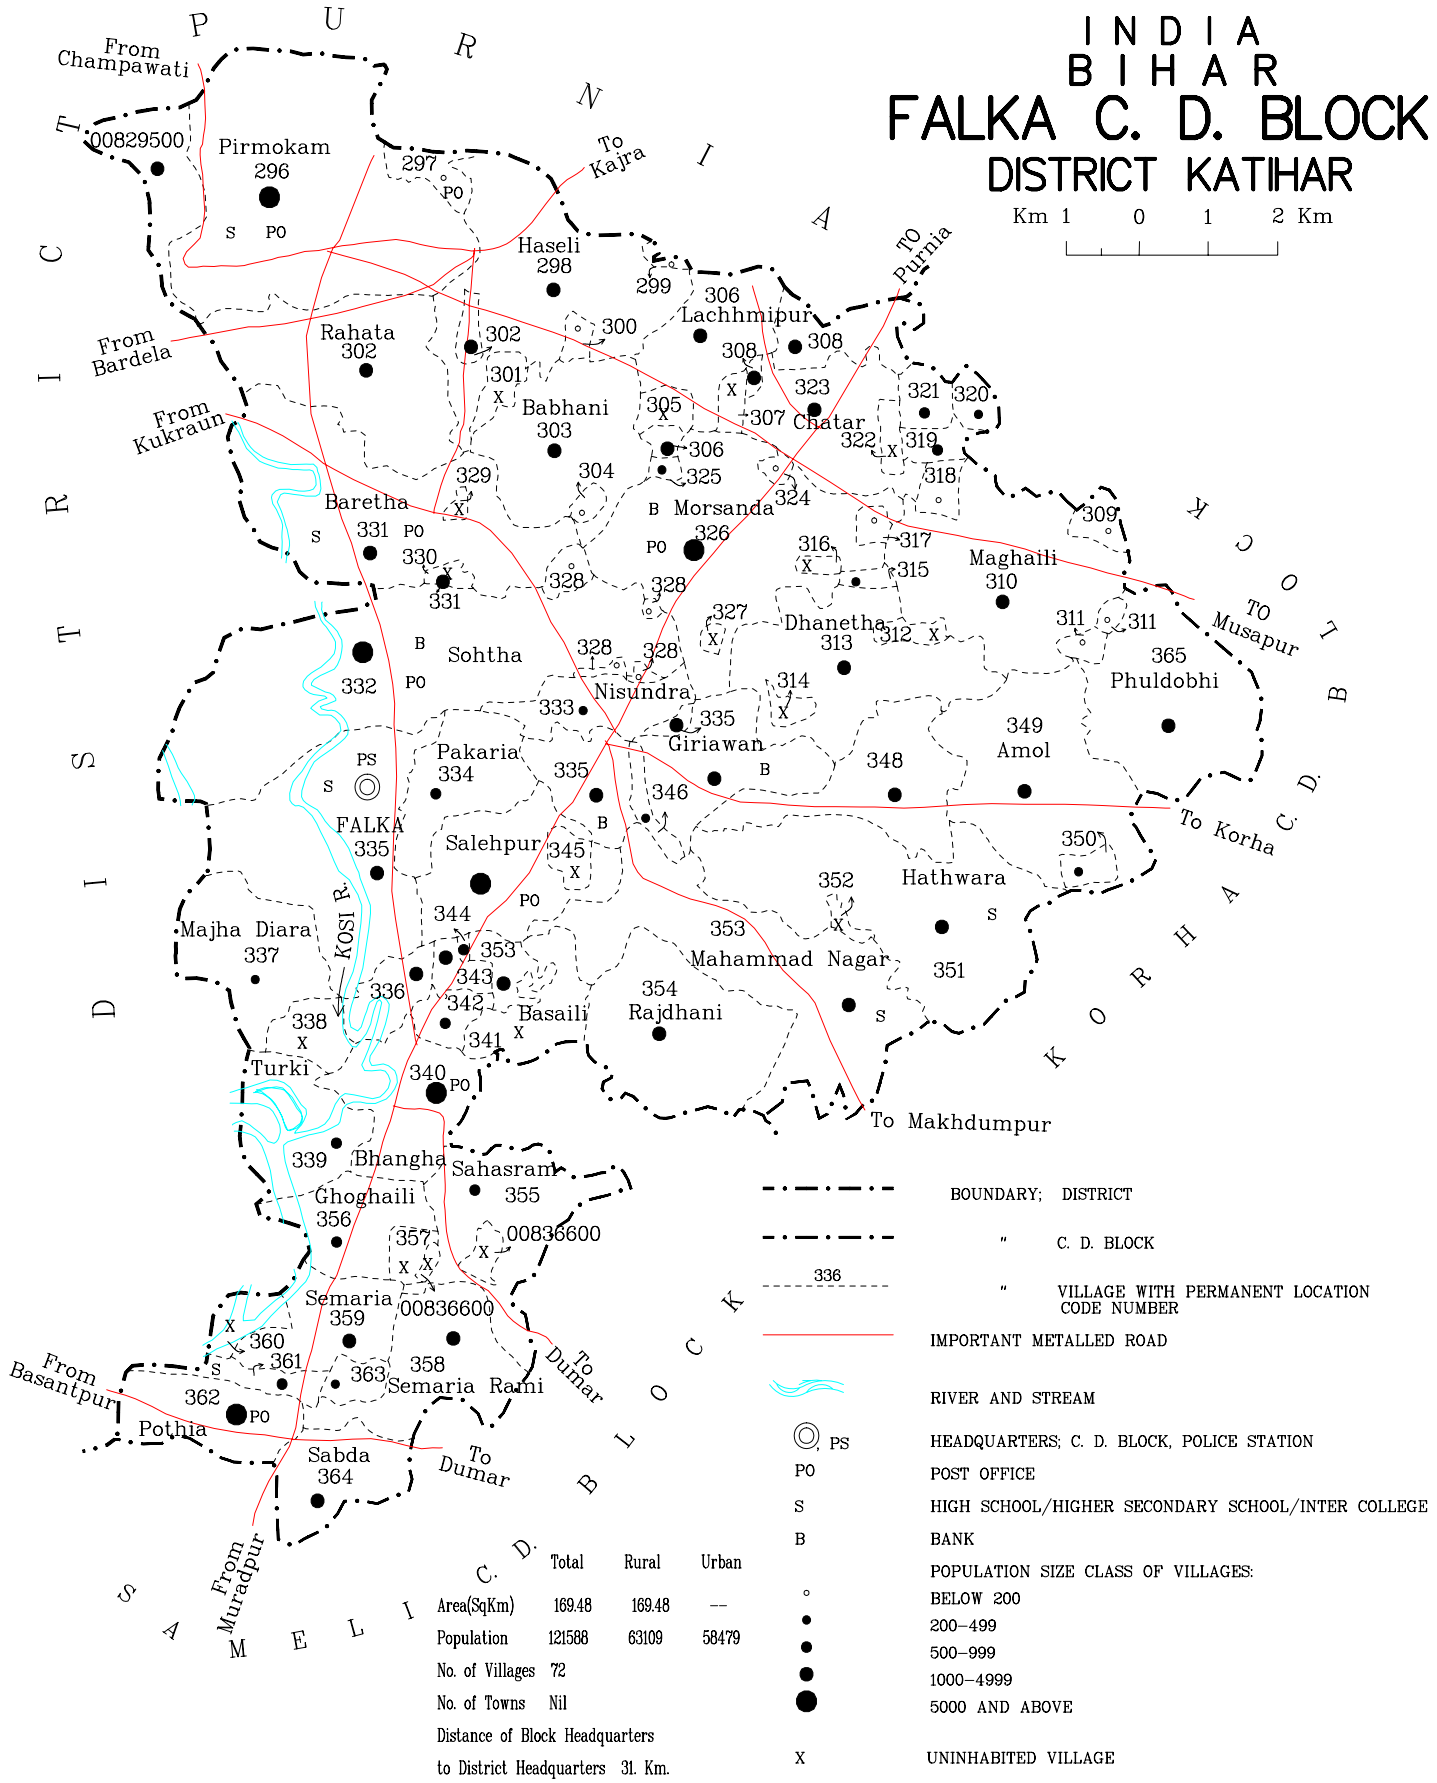

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Serial number	Name of Towns	Name of villages merged in towns	Name of villages identified for outgrowth	Location Code Number 1991 Census	Location Code Number 2001 Census (in case of partly OG)
1	2	3	4	5	6

There is no such village in the district of Katihar.

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II
ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Katihar	1991	77	112	115	121
	1981	115	140	150	175

From the estimates of child mortality (number of deaths by age 1,2,3, and 5) given in above Annexure II as q(1), q(2), q(3) and q(5), it is observed that there has been decline in child mortality over decade (in 1991 Census as compared to 1981 Census) both in the district as well as the state. An interesting feature which can be noticed from the Annexure is that the child mortality at the ages 1,2,3 and 5 was higher in the district compared to the State average at the time of 1981 and 1991 Censuses. It indicates that the pace of decline in child mortality had been slower in the district as a whole vis-à-vis the state.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the districts and the state(1991-Census)	
	State	District
1	2	3
CBR	36.2	37.7
TFR	5.3	5.5
TMFR	5.9	6.4
GFR	163	176.0
GMFR	186	208.0
Child Woman Ratio	66.6	73.1
No. of Children ever born per Woman in age group (45-49)	4.1	4.8
Mean age at marriage	16.5	16.4

Some other fertility measures for Katihar district and the State are furnished in above Annexure III.

It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Morital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are higher in Katihar district than the State as a whole in 1991 Census. The child woman ration is found to be higher in Katihar district compared to the State.

The mean age at marriage of females in lower in Katihar district compared to the State.

The number of children ever born per woman in age group 45-49 is higher in Katihar district than the State average.

	Born in other states			Born in other countries			Total migrants		
State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Katihar	104,153	16,260	87,893	8,949	1,108	7,841	508,287	62,407	445,880
	(20.5)	(26.1)	(19.7)	(1.8)	(1.8)	(1.8)	(100.0)	(100.0)	(100.0)

The growth of population for any area (be it any district or state) is influenced by the pattern of migration (in-migration as well as out-migration). However, for want of data on out-migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on growth of population,although such impact may not be much in most of the cases.

It is apparent from Annexures IV(A) that out of 21,307,020 and 19,989,195 migrants in the State as per place of birth in 1991 and 2001 censuses, the share of Katihar district is 424,789 and 508,287 i.e., 2.0 and 2.5 percent respectively of State's total.Female migrants out number the male migrants both for the district and the State. In case of percentage of migrants born in Bihar there is wide gap between male and female population. With respect to percentage figures of born elsewhere in the district of enumeration the district percentages (64.9 and 59.8) are less than the state percentage of 67.7 and 68.4 respectively during 1991 and 2001 censuses.

When we compare the percentage figures of migrants born in other districts of Bihar it is crystal clear that the district percentage (24.8 & 18.0) are lower than the State percentages (26.4 & 22.7) during both the Censuses.The percentage figures for born in other States is higher for the district than the state during both the Censuses while the percentage figures for born in other countries is lower in the district than the State in 1991 Census and higher in the district than the State during 2001 Census.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Katihar		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	381,025	335,217	45,808
(1) within the state		(100.0)	(84.7)	(15.3)	(100.0)	(88.0)	(12.0)
	Rural	19,010,120	16,570,646	2,439,474	358,282	321,515	36,767
		(94.7)	(82.6)	(12.2)	(94.0)	(84.4)	(9.7)
	Urban	990,737	375,267	615,470	16,965	8,262	8,703
		(4.9)	(1.9)	(3.1)	(4.5)	(2.2)	(2.3)
(2) In other states of India	Total	1,049,969	575,484	474,485	40,864	32,740	8,124
		(100.0)	(54.8)	(45.2)	(100.0)	(80.1)	(19.9)
	Rural	800601	512,444	288,157	33,933	29,590	4,343
		(76.2)	(48.8)	(27.4)	(83.0)	(72.4)	(10.6)
	Urban	243,448	60,040	183,408	6,561	2,810	3,751
		(23.2)	(5.7)	(17.5)	(16.1)	(6.9)	(9.2)

Of the total intra-state migrants in the State 82.6 percent were rural to rural 3.1 percent from urban to urban, 12.2 percent were from rural to urban and 1.9 percent from urban to rural. In case of Katihar district, of the total intra-state migrants, 84.4 percent were from rural to rural, 2.3 percent were from urban to urban , 9.7 percent were from rural to urban and 2.2 percent were from urban to rural.

In case of migrants from other states, 48.8 percent were from rural to rural, 17.5 percent were from urban to urban, 27.4 percent from rural to urban and only 5.7 percent were from urban to rural for the state of Bihar.

In case of Katihar district on the other hand, of the total migrants, 72.4 percent were from rural to rural, 9.2 percent were from urban to urban, 10.6 percent were from rural to urban and 6.9 percent were from urban to urban.

Annexures IV(C) deals with interstate migrants to the district of Katihar and the state of Bihar. The district received 3.9 and 6.6 percent of the migrants from outside the state in comparison to total migrants coming to state in 1991 and 2001 Censuses respectively. The State of West Bengal is major contributor as regards immigration, both in the case of district and the state in 1991 Census whereas it is State of Uttar pradesh which is the major contributor as regards immigration to the state and of Jammu & Kashmir as regards immigaration to the district of Katihar.

				(49.4)	(50.6)	(0.1)	(0.0)	(0.0)	-	-	(0.0)

Annexures V(A) and V(B) above show religion-wise distribution of population of 1991 and 2001 Censuses. Both, for the state of Bihar and Katihar district, Hindus form great chunk of population with 82.4 percent and 59.9 percent respectively in 1991 Census and with 83.2 percent and 57.0 percent in 2001 Census respectively. The percentage of Hindu population is slightly higher in the State than the district whereas in case of Muslims the percentage in the district is significantly higher than the State in both the Censuses (39.9 and 42.5 percent in 1991 and 2001 Censuses respectively). It is apparent from Annexure V(B) that Barsoi and Azamnagar C.D.Blocks during 1991 Census and Kadwa,Balrampur,Barsoi and Azamnagar C.D.Blocks during 2001 Census are such C.D.Blocks in the district of Katihar which constiute over 50 percent Muslim population.

The proportion of population of other religious communities is almost negligible in the district of Katihar and its C.D.Blocks.

ANNEXURE - VI (A)

DISTRIBUTION OF MARITAL STATUS OF POPULATION AS PER 1991 CENSUS

State - Bihar

It is quite evident from above annexures that Katihar district as well as the State have a relatively higher proportion of never married males and married females both in 1991 and 2001 Censuses. This may be attributed to the fact that women enter into marital knot at comparatively younger ages than males.As against 54.2 and 58.2 percentages of never married males in 1991 and 56.3 and 60.1 in 2001 Census in Bihar state and Katihar district respectively, the corresponding percentages among females in 1991 are 45.2 and 49.1 and 47.3 and 51.7 percent in 2001.The State has higher proportion of male widowed and lower proportion of female widowed as compared to the district during both the Censises.

While analyzing marital status by broad age groups one finds that married females outnumber married males in the age group 10-14 both in the year 1991 and 2001 suggesting that child marriage among females is more prevalent than males. However, it is interesting to note that the proportion of married males and females in the age group 10-14 or 0-14 is comparatively less in Katihar district as compared to the State and it is true for both 1991 and 2001 censuses. It is also found that child marriage is more prevalent in rural areas of the state and the district than urban areas.

It is also significant to note that the proportion of never married females in Katihar district and State as a whole in the age group 15-19 and above is much lower than the never married males. The proportion of divorced or separated males and females is higher in Katihar district than in state and are true for both 1991 and 2001 Censuses.

Literacy is one of the important demographic characteristics. Apart from collecting data on number of literate, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the Census has already been explained in the beginning of this publication.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 census was 38.5 percent. Now it has risen to 47.0 percent in 2001 census. The corresponding propotions for Katihar district in 1991 and 2001 are 28.7 and 35.1 percent respectively.

Annexures VII(A),VII(B),VII(C) and VII(D) furnish informations regarding absolute number of

illiterates and literates in Bihar state and Katihar district as also percentage distribution of literates by different level of education by different age-groups in 1991 and 2001 censuses.

A break up of literate population by various educational level (of 1991 census) show that 20.3 percent males and 27.2 percent females in the State are literate but have not attained any educational level. These proportins have risen to 28.4 and 35.8 percent (including Below Primary)for males and females respectively in the state in 2001census. It can be also seen from the Annexures that more or less same trend prevails in Katihar district during 1991 and 2001 censuses. It is interesting to see that at lower levels of education (up to 'Primary') the female's proportions are on higher side than the male's proportions in state as well as in the district in both the censuses.

According to 1991 and 2001 Census the position of literates by different level of education in Katihar district is more or less the same as observed in case of Bihar.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Katihar		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Surjapuri	478,589	20.0
Hindi	14,524,035	17.5	Hindi	440,660	18.4
Magadhi/Magahi	12,132,383	14.6	Urdu	421,154	17.6
Maithili	11,830,684	14.3	Bengali	225,996	9.4

Santali	382,866	0.5	Kurukh/Oraon	10,862	0.5
Kurukh/Oraon	57,952	0.1	Magadhi/Magahi	5,254	0.2
Marwari	27,152	0.0	Marwari	3,604	0.2
Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	646,887	27.0
Total Population	**82,998,509**	**100.0**	**Total Population**	2,392,638	100.0

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Katihar district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returned by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the State as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total State's population whereas in the district of Katihar 17.6 percent of the district population have returned it as their mother tongue.Surajapuri is the main mother tongue of the district with 20.0 percent speakers. Hindi as mother tongue has been returned by 18.4 percent of Katihar district's population and got second position. Bengali has been returned by only 9.4 percent of the district population and got fourth position in the district. Santali and Bhojpuri also find place in the district with 3.0 and 2.7 percent, speakers returned them as their mother tongue respectively. Except these languages analysed above both for the State and the district, other have been returned by insignificant proportions of the respective population of the State and the district as mother tongues as per Census 2001.
