DISTRICT MAP

SINGESHWAR ASTHAN, MADHEPURA

The name Singheshwar is derived from the well known Hindu Saint Shringe. In Shiv Mahapuran the Shivlinga at Shringeshwar has been widely discussed. During course of time the Singheshwar temple became famous through out the Northern India. A large fair is held every year in the month of sharawan. The temple is situated 8 kms north of Dauram Madhepura railway station.

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 2001 Census 445

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 2001 Census 449

Annexure VI : Marital status of population as per 2001 Census 455

Annexure VII : Age, sex and education in the state & district, 2001 Census 472

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 479

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of ‘notified slums’. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of ‘motif’ highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i)

fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Dated: 17.10.2006

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place

in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and wholehearted co-operation, which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex-Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

District Highlights – 2001 Census

1. Madhepura ranks 26th in terms of population (15,26,646) and 29th in terms of area (1,788 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Madhepura is the 20th densely populated district in the state with 854 persons per sq.km as against the state's 881.
3. Madhepura ranks 18th in terms of sex-ratio (915) against the state's 919.
4. There are 56 uninhabited villages (out of 440 total villages) in the district of Madhepura.
5. Maura (under Shankarpur C.D. Block) is the most populated village (33,496) and Kewat Ram Subedar Jagir (under Chausa C.D. Block) is the least populated village (9) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 85% of the total workers are engaged in Primary sector.
7. C.D. Block Kumarkhand has the highest number of villages (71) in the district and C.D. Block Shankarpur has the lowest number of villages (9).
8. Maura (under Shankarpur C.D. Block) has the largest area (4,732 hectare) and Israin Kalan Khas Mahal (under Kumarkhand C.D. Block) and Mwghu Singh Hawaldar Jagir under Puraini C.D. Block) have the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 99.0 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional C.D.Block/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Just after the 1981 Census takings, on account of reorganisation of districts in the state, there has been a change in administrative set-up of Saharsa district. Vide notification dated 30th April,1981, the old district of Saharsa was split-up into two district, viz., Saharsa and Madhepura. The district of Madhepura was given status of district on 09th May, 1981 by

upgradation of old Madhepura Sub-division of erstwhile Saharsa district and in turn old Madhepura Sub-division was split-up into two Sub-divisions, namely, Madhepura Sadar and Uda Kishanganj. The district of Madhepura so formed is bounded on the north by the district of Supaul, on the south by the district of Bhagalpur, on the east by the districts of Purnia and Araria and on the west by the districts of Saharsa and Khagaria. The district is set within the terrain badly hit by the vagaries of infamous Kosi river. Madhepura being the chief town of the district formed the headquarters of the district which includes Sadar Sub-division and Madhepura C.D. Block. Uda Kishanganj C.D. Block was previously known as Kishanganj.

The district owes its name to old Madhepura sub-division while present and old Madhepura sub-division owes their names to the chief town of the district Madhepura itself. As aforesaid with its inception it attained an area of 1788 square kilometers and a population of 964,033 persons (as per 1981 Census).

The present Madhepura district had already got the status of subdivision on 3rd of May, 1815. Saharsa district of today was then the revenue circle of Madhepura at that time.

On 21st of May, 1983 Kishanganj C.D. Block was upgraded and made a subdivision of Madhepura district in the name of Uda Kishanganj. Besides seven old C.D. Blocks during 1991 Census four new C.D. Blocks came into existence in the year 1991. These were Gwalpara, Puraini, Bihariganj and Shankarpur. First three C.D. Blocks come under Uda Kishanganj subdivision and last one is under Madhepura subdivision. Later on two more new C.D. Blocks were constituted in the name of Ghailarh and Gamharia under Madhepura subdivision in 1999. Thus 7 C.D. Blocks during 1991 Census rose to 13 C.D. Blocks.

Gamharia C.D. Block was constituted out of Singheshwar C.D. Block while Ghailarh from Madhepura, Shankarpur from Singheshwar, Gwalpara from Kishanganj and Murliganj C.D. Blocks, Bihariganj from Uda Kishanganj and Murliganj C.D. Blocks, and Puraini from Alamnagar and Chausa C.D. Blocks. Bihariganj(NAC) under Uda Kishanganj subdivision during 1991 Census was declassified in 2001. The parent district of Saharsa was created as a separate district on the 1st of April, 1954. Till 1971 Census it was within Bhagalpur division. On 2nd October, 1972 a separate Kosi division with its headquarters at Saharsa was formed consisting of Saharsa, Purnia and Katihar districts. Until formation of Madhepura district Saharsa district contained 4 Sub-divisions, viz., Saharsa Sadar, Supaul, Birpur and Madhepura. Madhepura district is now administratively under the Kosi division (having headquarters at Saharsa).

EARLY HISTORY

The Himalyan rivers flowing down to Madhepura and its neighbouring areas largely influenced the district. Throughout the district mounds and innumerable materials of antiquarian interests were available. However, due to the vagaries of dreaded Kosi hardly any ancient historical site exists today in the district, washed away by the changing course of Kosi. Even then due to academic efforts relating to the region made by some early European a brief connected account of the early history of the district can be traced.

People of Madhepura district were outside the pale of the Republican Lichchhavis of ancient Vaishali. In ancient time the district was part of Anga Janapada/Apana Janapada of Anguttarap. For some time Magdha too remained integral part of the Anga. But soon the fortune of Anga waned and gracious fortune dawned over imperial Magadha. Bimbisar, the monarch of Magadha and Lord paramount annexed Anga. Later on it formed the territory of Nandas, Mauryas and Guptas.

The district of Madhepura was lying on the border of Mauryan Empire. It was specially protected as Ashoka, the great with his benevolent humane approach created a

special officer to protect and look after the people of bordering territories of his kingdom. The officer was known as Antadhyaksha.

In course of the time great Mauryas were supplanted by the Kushan, Sungas and Kanvas. Finally, Kanvas were supplanted by Imperial Guptas. Guptas made entire North Bihar a province named Tirabhukti with the capital at Vaishali. Henceforward, provinces were known as Bhuktis. There was another province known as Pundravardhanbhukti which included portion of Madhepura, Saharsa, Purnia and a part of North Bengal extended its sway upto the confines of the Kosi. The rise of Harsha in 7th century A.D. on the Indian political scene was of special significance. He consolidated whole of Northern India but by the death of Harsha in 647 A.D. the forces of disintegration were let loose.

The Pillar of Mauryas, at Uda Kishanganj proves the fact that this area was under the reign of Maurya.

The people of 'Bhant Community' living in Basantpur and Raibhir villages under Shankarpur C.D. Blocks is the ample proof of the reign of Kushan dynasty in these areas.

Palas of Bihar and Bengal during 8th century A.D. provided stable administration to the district. It was through this district that the Pala could establish contact with Nepal.

MEDIEVAL HISTORY

The decline of the Palas in Bihar and Bengal gave way to the establishment of the Karnata or Simraon dynasty in Mithila and the Sena dynasty in Bengal. Both the dynasties claimed authority over the portions of Madhepura district. The last King of Simraon dynasty, Harsingh-deo lost to Giyasud-din-Tughlaq in a protracted struggle. Tughlaq authority in Mithila weakened. In course of time taking advantage of the situation Haji Illyas of Bengal invaded and divided Tirhut in two parts, As a result Madhepura came under the control of the Oinwaras. Among the Oinwaras Raja Shivasimha was towering personality adorned by eternal poet Vidyapati, known as Maithil Kokil.

Decline of Oinwara was left with chaos. The Gandhvariya Rajputs took benifit of the situation and acquired power during the period of confusion. The whole Madhepura was dotted by small chieftains belonging to both Hindus and Muslims. To reflect historical importance a mosque of the time of emperor Akbar in Sarsadi village under Uda Kishanganj still exists. The coins found in Sahugarh village is the proof of the visit of Sikandar Sah in those days.

MODERN PERIOD

It seems that district of Madhepura played an important part in the freedom movement. Number of political captives in Madhepura jail bear the testimony that people of Madhepura shared with the aspirations of the people of whole India in throwing away the yoke of British mis-rule.

The August revolution of 1942 ('Quit India Movement' a call given by Gandhiji) was a landmark in the history of freedom movement in Madhepura district as well. On the 13th of August 1942 a number of people under the leadership of Bhupendra Narain Mandal and Deota Pd. Singh poured in the Madhepura court compound. Being emboldened, Hare Krishna Chaudhary, a young lad of 14 years hoisted the national flag on the treasury building of the court. By the continuous support to national-movement the Madhepura district deserves honourable share in the gaining of Independence on 15th of Augaust, 1947.

(iii) Administrative set up

THE DISTRICT OF MADHEPURA POSSESSES FOLLOWING ADMINISTRATIVE AND CIVIC UNITS:

Name of Subdivision	Name of Community Development Blocks	Name of Towns
1	2	3
1. Madhepura	1. Gamharia 2. Singheshwar 3. Ghailarh 4. Madhepura 5. Shankarpur 6. Kumarkhand 7. Murliganj	1. Madhepura(M) 2. Murliganj(NAC)
2. Uda Kishanganj	8. Gwalpara 9. Bihariganj 10. Kishanganj 11. Puraini 12. Alamnagar 13. Chausa	

To cater the police administration there are 8 police stations, 6 subsidiary police stations and 5 outpost are at work in the district.

District Magistrate is at the helm of district administration. He is in turn assisted by number of officers/officials. S.P. is the top of district police administration which is part of criminal justice system. Both the subdivisions are headed by 2 S.D.Os. S.D.O. is assisted by Block Development Officers (under his jurisdiction) who are the incharge of respective C.D. Blocks.

(iv) Physical Features

Natural Divisions

The district lies under Kosi flood plain. This plain has gentle slope from north to the south. The district is rich in alluvium Part of Madhepura district is more fertile and more densely populated. The sandy deposits left over by the turbulent Kosi have affected the fertility of the soil but due to progressive implementation of the Kosi project work has turned the district into veritable granary. Construction of the Kosi Barrage and several embankments freed Mdhepura, Singheshwr, Murliganj and Kishanganj blocks from ravages of Kosi. Sandy tracts are being reclaimed. The most of the waste land areas, full of Kans and Pater, has been reclaimed and are yielding crops.

RIVER SYSTEM

River Kosi-Dhar alongwith its tributaries and distributaries flow in the district and bring alluvial sand. The river Kosi enters the district at eastern boundary of Singheshwar C.D. Block and western boundary of Kumarkhand C.D. Blocks. In Murliganj C.D. Blocks it separates into two parts, one part enters into Saharsa district while other parts moving though Kishanganj and Alamnaagar C.D. Blocks of the district comes out to Bhagalpur district. The Kosi is notorious for its changing course and vagaries and was known as sorrow of Bihar.

The district lacks navigable rivers. However, locally made small boats serve the purpose of navigation on a limited scale.

LAND USE PATTERN

Agriculture is the mainstay of the people of the Madhepura district. The ravaging Kosi has been considerably tamed and Kosi project has helped in changing the cropping pattern. The principal crops are paddy, jute and wheat. The district is growing jute and maize in large quantities. Both bhadai and aghani paddy are grown. Marua and oil-seeds continue to be grown. Cultivation of sugar-cane has increased considerably. Each C.D. Block has one seed multiplication farm.

The total area of land for cultivation is 1,36,616 hectares. Besides these there is 1772 hectare of land which can be used for cultivation, 1272 hectares of barren land is covered with sand and rest areas of barren land is 3611 hectares. Procurement areas of paddy crop is 52165 hectares of land, while wheat is grown in 31131 hectares of land, maize in 31098 hectares of land, sugarcane in 801 hectares of land and potato in 1112 hectares of land. Coconut Development Board owned by Central Govt. is functioning in this district.

CLIMATIC CONDITION

Madhepura district is situated between 25º31' and 26º20', latitude and in the middle of 86º36' to 87º07' longitude. The maximum temperature of this district ranges from 35 to 40 degree Celsius and the minimum temperature varies from 7 to 9 degree Celsius. The average rain fall in this district is 1300 mm.

IRRIGATION FACILITIES

Irrigation facilities to 77114 hectares of land are available in the district. The total number of state boring in the district is 3018 where as. 2914 borings are owned and operated by the different people of this district. The total number of state tubewells in the district is only 31.

INDUSTRIES AND BUSINESS

Condition of the industries and business in the district is beggar's descerption due to the lack of proper development in the field of agriculture and industry. No big industry has been set up in the district. Even the condition of the small scale industries is not satisfactory. Only eight small scale industries are running in the district, besides there are, 2875 very small industries.

The registered unit under factory act is 323 and 2981 persons are employed in these units.

TRADE & COMMERCE

There are 200 marketing societies and 21 markets in the district under market management. 32 weekly markets are also held in this district. There are five nationalized banks in the district., giving their services to industrial and commercial areas with its 64 branches.

ANIMAL WEALTH AND POULTRY

The Statisticts of animal wealth and poultry in the district is as follows:

Buffalo (high breed) – 2177
Buffalo (general breed) – 109107
Cow (high breed) – 9285
Cow (general breed) - 165129

Along with the above statistics, there are about 222886 goats, 30580 pigs are tamed. Under poultry industry about 110720 (Cocks and hens) are estimated.

RURAL ELECTRIFICATION

The Condition of the rural electrification is deplorable. Only 161 villages are electrified.

FACILITIES OF RURAL COMMUNICATION

In the matter of road communication, this district is the most backward of all the districts of Bihar. The total length of metalled road in this district is only 317 kms. and the total length of unmetalled road is 376 kms. Which is very less in Comparison to the total areas of the district. Besides these, there are 8 state dispensaries/Sadar hospital, 116 primary Health Centre, 16 Animal hospitals and 3 artificial breeding centers in the district.

TELE COMMUNICATION

Two Telegram offices and 102 post Offices are functioning in the district.

POLICE ADMINISTRATION

There are 8 Police stations, 6 subsidiary police stations and 5 out posts are at work in the district.

EDUCATION

834 Govt. Schools are imparting education in the district. Bhupendra Narayan Mandal University is situated at the district headquarter, Madhepura and adding glory to the educational atmosphere of this district.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical

structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a

dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.- -For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid

only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhanger
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Swasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing,

harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage,
(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} (ASFR)}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} (ASMFR)}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 : Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 : Probability of dying between birth and age 2.

q5 : Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic

amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Madhepura district during 1991 was 11,77,706 Hindus constitute over 89.6 per cent (10,55,479persons) of the population in the district followed by Muslims 10.3 percent (121699 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census of India has the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Madhepura district during 1991 was 1,177,706. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Madhepura district, Hindi, the main mother tongue of the district was returned by 91.9 percent (1,082,830 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Madhepura district, was 7.7 percent (90,485 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Madhepura during 1991 census.

The population of the scheduled castes in the Madhepura during 1991 was 192443.numerically five important SCs were namely (i) Musahar (ii) Chamar/Mochi (iii) Dushad/Dhari (iv) Bantar (v) Dhobi. The population of Musahar was 96,385 which constituted 50.1 percent of scheduled castes population.the population of Chammar/ Mochi was 40,278 which constituted 20.9 of Scheduled Castes population. The popultion of Dusad/Dhari was 34,292 which constituted 17.8 percent of Scheduled Castes population .Bantar had 8,978 population while Dhobi had 7,359 popultion . Bantar constituted 4.7 while Dhobi only 3.8 of the scheduled castes population.

The population of the Scheduled Tribes in the district of Madhepura during 1991 Census was 8,321.Nmerically five important STs were namely (i)Santal(ii)MalPaharia (iii)Kharwar(iv)Oran in which Santhal had 6,317 (75.9 percent of the Scheduled Tribes population). Mal paharia 786 population which constituted 9.4 percent of the Scheduled Tribes population. Kharwari had 757 population which constituted 901 percent of the Scheduled Tribes population. Kharia has 159 population while Oraon had only 68 population . Kharia constituted 1.9 percent while Oraon constituted 0.8 percent of the Scheduled Tribes population.

(vii) Census Findinding 2001

According to 2001 Census , total population of the Madhepura district is 1,526,646 comprising 797180 males and 729466 females constituting 1.8 percent of the state population spreadover 13 C. D. Blocks of the district. Madhepura is the most populous whereas Gamharia C.D. Block is the least populated in the district. Table 1 to 52 based on PCA, VD and household data given insight into data and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

Table-1 shows rise in the population of this district during 1991-2001 decade has been of the order of 29.6 percent. The rural population in the district has increased by 32.5 percent while the urban population growth over the decade has been declined as much as 11.5 percent. Rural urban migration is important factor which always leads to rapid expansion of the urban unit.

Among the C.D.Blocks, Singheshwar has shown the highest increase in population over the decade with 51.8 percent.

The next highest increase in population is observed in Chausa C.D.Block with 35.1 percent followed by Alamnagar C.D.Block with 34 percent Percentage decadal variation has Gamharia C.D.Block with 2.9 percent.

The increase in rural population during 1991-2001 has been highest in Bihariganj C.D.Block with 75.6 percent followed by Singheshwar C.D.Block with 51.8 percent.

13	Chausa	28	5069	4825	6 (21.4)	45573	40231
Districts (Rural) Total:		**384**	**221511**	**204384**	**32 (8.3)**	**235763**	**214995**

It may be observed in the table-2 that the maximum number of villages in the district lie in the population range of 2000-4999 accounting for 35.2 percent of the total inhabited villages closely followed by villages in the population range of 1000 -1999 accounting 17.4 villages, the percentage of population in the above two population ranges are 30.6 percent and 6.7 percent of the total rural population of the district, respectively. The villages in the

population range of 5000-9999 constitute 16.4 percent of the total inhabited villages and these villages the percentages of population are only 3.3 percent. There are 33 villages in the population range of 500-999 a counting for 8.6 percent of the total inhabited villages, in these villages 1.7 percent population of the total rural population live.

There are 32 villages in the population range of 10,000 and above accounting for 8.3 percent of the total inhabited villages which have 30.9 percent of the total rural population. There are only 28 villages in the rages of 200-499, accounting for 7.3 percent of the total inhabited villages and in these villages the percentage of population is only 0.6 percent. There are only 26 villages in the lowest population range of less than 200 accounting for only 6.8 percent of the total inhabited villages in which the percentages of population is 0.15 Percent.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED, AND MERGED TOWNS IN 2001 CENSUS

		Name of town
		1
(a)	**New**	
(i)	Statutary town	NIL
(ii)	Census town	NIL
(b)	**Denotified**	NIL
(c)	**Declassified**	NIL
(d)	**Wholly merged with other town(s)**	NIL

Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.3	14	0.0
11-20	0	0.0	0	0.0
21-50	0	0.0	0	0.0
51-100	5	1.3	125	0.0
101-200	7	1.8	860	0.1
201-300	7	1.8	8,076	0.6
301-500	26	6.8	32,271	2.2
501 +	335	87.2	1,399,624	96.0
Not known	3	0.8	17,709	1.2
District Total:	**384**	**100.0**	**1,458,679**	**100.0**

The data presented in the above table highlights the fact that maximum proportion of villages in Madhepura district lies in the range (per square kilometer) of 501and above 87.2 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 6.8 percent.

It would further be seen that small number of villages fall in the density both of range 101-200 and 201-300 which account for same 1.8 and 1.8 percent of the total inhabited villages.

Maximum number of villages fall in the density range of 501+ covering 96 percent of the total population of the district followed by villages in the density range of 301-500 which account for 2.2 percent of the population.

1991	907	913	857	885	891	802
2001	919	926	868	915	919	838

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table-5 shows that sex ratio for the urban areas of the Madhepura district is comparatively high as compared to the urban areas of the state during 1991 and 2001 census. However, on the other hand, the sex ratio for the rural areas of the state is found to be comparatively high as compared to the rural areas of Madhepura district during 1991 and 2001 censuses. It has already been discussed that the district of Madhepura was created after 1991 census. It is found that in case of sex ratio in the total population in the district it is lower than the sex ratio of the State of Bihar both in 1991 and 2001 Censuses

TABLE 6 : SEX RATIO BY C.D.BLOCKS, 2001

Serial number	Name of C.D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Gamharia	934	934	-
2	Singheshwar	919	919	-
3	Ghailarh	909	909	-
4	Madhepura	891	914	816
5	Shankarpur	930	930	-
6	Kumarkhand	927	927	-
7	Murliganj	906	910	882
8	Gwalpara	935	935	-
9	Bihariganj	933	933	-
10	Kishanganj	928	928	-
11	Puraini	918	918	-
12	Alamnagar	909	909	-
13	Chausa	888	888	-
District Total:		**915**	**919**	**838**

In Madhepura district as a whole there are 915 females for every thousand males. Within the district the sex ratio is highest in Gwalpara C.D.Block with 935 and lowest in Chausa C.D.Block with 888.

Among the C.D.Blocks, the sex ratio of Gamharia C.D.Block with 934, Bihariganj C.D.Block with 933, Shankarpura C.D.Block with 930,Kishanganj C.D.Block with 928, Kumarkhand C.D.Block with 927, Puraini C.D.Block with 918, Ghailarh C.D.Block with 909 and also Alamnagar C.D.Block is 909, Murliganj C.D.Block with 906 and last Madhepura C.D.Block with 891.

The sex ratio of figures for rural and urban areas of Madhepura district ;are 919 and 838 respectively.

The sex ratios of Gamharia, Shankarpur, Kumarkhand, Gwalpara, Bihariganj and Kishanganj C.D.Blocks are highest than the district rural average of 919 while Ghailarh C.D.Blocks (909), Madhepura C.D.Block (914), Murliganj C.D.Block (910), Puraini C.D.Block (909) and last Chausa C.D.Block (888) have sex ratio below the4 district rural average.

The urban sex ratio of the district is 838 which is lower than the total and rural average of the district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D Block	Sex ratio
1	2	3
1	Gamharia	934
2	Singheshwar	919
3	Ghailarh	909
4	Madhepura	914
5	Shankarpur	930
6	Kumarkhand	927
7	Murliganj	910
8	Gwalpara	935
9	Bihariganj	933
10	Kishanganj	928
11	Puraini	918
12	Alamnagar	909
13	Chausa	888
District (Rural) Total:		**919**

As per rural in Madhepura district there are 919 females for every thousand males within the district, the sex ratio varies from 935 in Gwalpara C.D.Block to 888 in Chausa C.D.Block.

The sex ratio of Gamharia, Bihariganj, Shankarpur, Kishanganj and Kumarkhand C.D.Blocks are 934,933,930 and 927 respectively.

Also the sex ratio of Singheshwar, Puraini Madhepura, Ghailarh and Alamnagar C.D.Blocks are 919,918,914,909 and also 909 respectively.

The sex ratio of Gwalpara, Gamharia, Bihariganj, Sankarpur, Kishanganj and Kumarkhand C.D.Blocks are higher than the district average of 919 while Singheshwar Puraini, Madhepura Ghailarh and Alamnagar C.D.Blocks have sex ratios below the district rural average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	7	1.8	425	0.0
700-749	3	0.8	255	0.0
750-799	1	0.3	1,253	0.1
800-849	22	5.7	23,791	1.6
850-899	85	22.1	340,735	23.4
900-949	174	45.3	860,684	59.0
950-999	69	18.0	214,456	14.7
1000-1099	21	5.5	16,916	1.2
1100+	2	0.5	164	0.0
District Total:	**384**	**100.0**	**1,458,679**	**100.0**
Sex ratio (Rural) for District:		**919**		

It is observed in the Table-8 that the maximum proportion of villages in Madhepura district lies in the sex ratio range of 900-949 and these villages account for 45.3 percent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 59.0 percent of the district rural population. 85 villages (22.1percent) fall in the sex ratio range of 850-899 and these account for 23.4 percent of the rural population of the district. 69 villages (18.0 percent) are in the sex ratio range of 950-999 and these villages account for 14.7 percent of the rural population.

22 villages (5.7 percent) fall in the sex ratio range of 800-849 and these account for1.6 percent of the rural population of the district . 21 villages (5.5%) are in the sex ratio range of 1000-1099 and these villages account for only 1.2 percent of population .

7 villages (1.8%) are in the sex ratio range of (less than 700)and these villages account for negligible of the population.

Only 3 villages (0.8%) fall in the very favorable sex ratio range of 700- 749 and this small proportion of villages account for also negligible population.Only 2 villages (0.5%) are in the lowest range of sex ratio 1100and above which account for negligible population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A / Town	Urban status of town	Sex ratio
1	2	3	4
1	Madhepura	(M)	816
2	Murliganj	(NA)	882
Sex ratio (Urban) for the district:			**838**

There is no urban agglomeration in Madhepura district. there are only two unit in Madhepura . In Murlignaj (NA) the sex ratio of this statutory town is 882 and Madhepura (M) the sex ratio of this statutory town is 816 according to 2001.

850-899	83	21.6	90265	28.3
900-949	74	19.3	74740	23.4
950-999	73	19.0	82733	25.9
1000-1099	53	13.8	35626	11.2
1100+	32	8.3	4280	1.3
District (Rural) Total	**384**	**100.0**	**318893**	**100.0**

Sex ratio (Rural) for District: 927

It is observed in the above table that 21.6 percent of inhabited villages in Madhepura district lies in the sex range of 850-899 in the age group 0-6. 74 villages (19.3 percent) fall in the sex ratio range of 900-949 in the age group 0-6, 73 villages (19.0percent) are in the sex ratio of 950-999. 53 villages (13.8percent) are in the sex ratio of 1000-1099 and 32 villages (8.3 percent) are in the sex ratio range of 1100+. These villages having favorable sex ratio 1.3 percent of the rural population of the district. There are 29 villages (7.6 percent) in the district which lie in the unfavorable sex ratio range of 800-849. These villages account for 6.8 percent of the rural population of the district. There are 17 villages (4.4 percent) in the district which lie in the sex ratio range of 750-799 in the age group 0-6. 15 villages (3.9 percent) are in the sex ratio range of (less than 700) which account for 0.5 percent of the rural population of the district. 8 villages (2.1percent) in the district which lie in the sex ratio range of 700-749 which account 0.7 percent of the rural population of the district.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

		Urban	**67967**	**7733**	**158**	**11.4**	**0.2**

The above table shows that the percentage of Scheduled Castes in Madhepura district is 17.1 percent of the total population in the district. Within the district highest percentage of the Scheduled Castes population is in Shankarpur C.D.Block with 21.6 percent closely followed by Singheshewar 20.2 percent.

Among the C.D.Blocks Murliganj C.D.Block with 2.0 percent, Kumarkhand C.D.Block with 19.0 percent, Madhepura C.D.Block with 17.8 percent Gwalpara C.D.Block with 17.6, Alamnagar C.D.Block with 16.8 percent, Kishanganj and Ghailarh C.D.Block with same 15.7 percent each. In Bihariganj C.D.Block with 15.5 percent and Gamharia C.D.Block with same 15.7 percent, Chousa C.D.Block with 11.5 percent, Puraini 10.2 percent.

The percentage of Scheduled Castes population in Madhepura district for the urban areas is 11.4 percent which is lower than the rural areas (17.3 percent). The percentage of Scheduled tribes population in C.D.Blocks of Madhepura district is almost negligible.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

District (Rural) Total:		**1458679**	**252728**	**9137**	**17.3**	**0.6**

The above table indicates that the percentage of the scheduled castes in Madhepura district is 17.3 percent of the total population.

The highest percentage of scheduled castes population is observed in shankarpur C.D.Block with 21.6 percent closely followed by Murliganj C.D.Block with 2.1 percent. Among the C.D.Blocks Singheshwar C.D.Block with 20.2 percent, Madhepura C.D.Block with 20.1 percent, Kumarkhand C.D.Block with 19.0 percent, Gwalpara C.D.Block with 17.6 percent and also Alamnagar C.D.Block with 16.8 percent Kishanganj C.D.Block with 15.7

percent same as Ghailarh C.D.Block with 15.7 percent Gamharia C.D.Block with 15.5 percent and same as Bihariganj C.D.Block with also 15.5 percent. Chousa C.D.Block with 11.5 percent and Puraini C.D.Block with 10.2 percent. The percentages of scheduled castes population in Singheshwar, Madhepura, Shankarpur, Kumarkhand, Murliganj, Gwalpara C.D.Blocks are higher than the district rural average (17.3percent). The percentage of scheduled tribes population in the C.D.Blocks of Madhepura district is almost negligible as has been observed in the above table.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage

District Total	**384**	**100.0**	**252,728**	**100.0**

From the above table it is apparent that there are 149 villages accounting for 38.8 percent of the inhabited villages in the district where the population of Scheduled castes ranges between 11 and 20 percent of total population. This is closely followed by villages where the population of the scheduled castes ranges between 21 and 30 percent of the total population. These 67 villages account for 17.4 percent of the total inhabited villages. There are 57 villages account for 14.8 percent of the inhabited villages where the percentage of scheduled castes population to total population is between 5 and 10. There are 42 villages which account for 10.9 percent of the inhabited villages where the percentage of scheduled castes population to total population is Nil. 18 villages which account for 4.7 percent of the inhabited villages in the district where the population of Scheduled castes ranges less than 5. There are 7 villages accounting for 1.8 percent of the inhabited villages in the district where the population of scheduled castes ranges between 41 and 50 percent to total population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	333	86.7	0	0.0
Less than 5	37	9.6	2,380	26.0
5-10	8	2.1	2,307	25.2
11-20	5	1.3	3,722	40.7
21-30	1	0.3	728	8.0
31-40	0	0.0	0	0.0

51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	**384**	**100.0**	**9,137**	**100.0**

As regards the population of the scheduled tribes it can be seen from the table 17 that there are 333 villages which constitute 86.7 percent of the total inhabited villages in the district which have no scheduled tribes population. 37 villages which constitute 9.6 percent of the total inhabited villages in the district which have 2,380 scheduled tribes population.8 villages which constitute 2.1 percent of the total inhabited villages in the district which have 2307 scheduled tribes population. Only 5 villages which constitute 1.3 percent of the total inhabited villages in the district which have 3,722 scheduled tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town*+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Madhepura (M)	45031	4605	149	10.2	0.3
2	Murliganj (NA)	22936	3128	9	13.6	0
District(Urban) Total		**67967**	**7733**	**158**	**11.4**	**0.2**

Table-18 shows that there is no urban agglomeration in Madhepura district. There is only two statutory towns in the district. In Madhepura (M) the percentage of Scheduled Castes and Scheduled Tribes population are 10.2 and 0.3 respectively.. In Murliganj (NA) the percentage of Scheduled Castes population to total population is 13.6. and the percentage of Scheduled Tribes population in Murliganj (NA) is nil.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Gamharia	965	0
2	Singheshwar	952	676
3	Ghailarh	935	0
4	Madhepura	952	0
5	Shankarpur	928	1094
6	Kumarkhand	947	925
7	Murliganj	947	1001
8	Gwalpara	961	1076
9	Bihariganj	944	1021
10	Kishanganj	953	916
11	Puraini	927	1114
12	Alamnagar	933	865
13	Chausa	900	1235
	District (Rural) Total	**944**	**1006**

Table-19 shows sex ratio of SC and ST in C.D.Blocks of the Madhepura district. In district sex ratio of SC and ST in district (rural) are 944 and 1006 respectively.Among C.D.Blocks highest sex ratio of SC in observed in Gamharia C.D. Block with 965 and lowest (900) in Chausa C.D.Block for ST highest sex ratio is observed in Chausa C.D.Block with 1235 and Singheshwar C.D.Block has the lowest sex ratio 676.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Madhepura (M)	857	795
2	Murliganj (NA)	924	2000
Sex ratio (Urban) for the district:		**883**	**837**

There is no urban agglomeration in Madhepura district. There are only two statutory towns in the district. In Murliganj (NA), the sex ratio of Scheduled Castes in Murliganj (NA) is 924 and the sex ratio of Scheduled Tribes is 2000. And Madhepura (M) the sex ratio of Scheduled Castes in Madhepura (M) is 857 and the sex ratio of Scheduled Tribes is 795.

81-90	0	0.0	0	0.0
91-99	1	0.3	104	0.0
100	0	0.0	0	0.0
District Total:	**384**	**100.0**	**1,458,679**	**100.0**
Literacy rate for District:		**36.1**		

The above table shows that in 43.2 percent of inhabited villages, literacy rate ranges between 31-40 percent. In these 166 villages 56.7 percent of the district rural population live. This is the largest group of villages in the district. This is closely followed by 112 villages and with 26.9 percent of the district rural population. 11.2 percent of the inhabited villages where literacy rate ranges between 41-50 percent.23 (6.0%) inhabited villages are such where literacy rate ranges between 11 and 20 percent. These villages account for 1.7 percent of the district rural population.17(4.4%) inhabited villages are such where literacy rate range between 51 and 60 percent and these villages account for 3.4 percent of the district rural population. 2.9 of the inhabited villages i.e. 11 villages are such where literacy rate ranges between 1 and 20 percent. These villages account for 0.2 percent distribution of population. There are 1.3 of the inhabited villages 5 villages are such where literacy rate ranges between 61 and 70 percent these villages account for 1.2 percentage distribution of population. There are only 4 villages accounting for 1.3 percent of the inhabited villages where literacy rate ranges nil (0) and these villages no percent account for district rural population.

.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial no.	Name and urban status of UA^/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Rural) Total:		**30831**	**24268**	**6563**	**221897**	**105763**	**116134**	**16.2**	**24.9**	**7.1**	**17.8**

The above table shows that literacy rate among the scheduled castes is highest i.e. 24.1 percent in the Chausa C.D. Block where as it is lowest i.e. 13.7 percent in the Gwalpara C.D. Block in the district . It is observed that the literacy rate among the Scheduled Castes for the district is 16.2 percent only.

As regards percentage of male literacy rate among the Scheduled Castes, it is highest i.e. 34.5 percent in Chausa C.D. Block where as it is lowest i.e. 21.4 percent in the Gwalpara C.D. Block.

In case of female literacy rate among the Scheduled castes it is highest i.e.12.1 percent in Chausa C.D. Block and the lowest i.e. 5.2 percent in Kumarkhand C.D. Block.

It is found that the gap between male and female literacy rate is highest i.e. 22.4 percent in Chausa C.D. Block where as it is lowest i.e.15.9 percent in Gwalpara C.D. Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	16	4.7	771	0.3
1-10	79	23.1	40,938	16.2
11-20	155	45.3	155,269	61.4
21-30	61	17.8	41,280	16.3
31-40	17	5.0	12,816	5.1
41-50	7	2.0	1,235	0.5
51-60	2	0.6	125	0.0
61-70	2	0.6	183	0.1
71-80	1	0.3	56	0.0
81-90	2	0.6	55	0.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**342**	**100.0**	**252,728**	**100.0**
Literacy rate for District (Rural):		**16.2**		

The above table shows that in case of literacy among the Scheduled castes in the Villages of the district the highest number of villages i.e. 45.3 percent fall in the literacy range of 11-20 percent. Where as the lowest number of villages (0.3 %) fall in the literacy range 71-80. It is observed that 5.0 percent villages in the district fall in the literacy range 31-40 percent in case of literacy among the Scheduled castes in the villages of the district.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial no.	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Madhepura (M)	1758	1240	518	2847	1240	1607	47.2	61	30.6	30.4
2	Murliganj (NA)	848	569	279	2280	1057	1223	35.5	45.4	24.5	20.9
Madhepura (Urban)		**2606**	**1809**	**797**	**5127**	**2297**	**2830**	**42.6**	**55**	**28.1**	**26.9**

The table shows that the literacy rate among the Scheduled castes in the urban areas of the district is 42.6 percent in case of total population, 55.0 percent in case of males and 28.1 percent in case of females. In two towns highest literacy rate is 47.2 percent in Madhepura(M).

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial no.	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Singheshwar	33	25	8	29	12	17	66.0	83.3	40.0	43.3
2	Shankarpur	33	20	13	189	86	103	19.2	25	14.1	10.9
3	Kumarkhand	228	178	50	798	355	443	28.8	42.9	13.3	29.6
4	Murliganj	990	693	297	3025	1313	1712	31.1	43.8	18.5	25.3
5	Gwalpara	697	490	207	1373	507	866	42.7	62	24.5	37.5
6	Bihariganj	284	200	84	795	334	461	33.7	48.9	19.4	29.5
7	Kishanganj	36	28	8	418	209	209	9.8	14.3	4.6	9.7
8	Puraini	9	6	3	65	29	36	15.5	22.2	9.7	12.5
9	Alamnagar	21	17	4	76	35	41	28.4	43.6	11.4	32.2
10	Chausa	14	9	5	24	8	16	50	64.3	35.7	28.6
District (Rural) Total:		**2345**	**1666**	**679**	**6792**	**2888**	**3904**	**32.5**	**46.5**	**18.7**	**27.8**

The table 28 shows number and percentage of scheduled tribes literates and illiterates by sex in C.D. Blocks in 2001 Census.In district scheduled tribes literate is 32.5 percent in which proportion males and females are 46.5 and 18.7 percent respectively. This table shows that among the Scheduled tribes the percentage of literates is highest i.e. 66.0 percent in Singheshwar C.D. Block . Whereas it is lowest i.e. 9.8 percent in Kumarkhand C.D. Block in the district. As regards percentage of male literacy rate among the Scheduled tribes it is highest i.e. 83.3 percent in Singheshwar C.D. Block Where as it is lowest i.e.14.3 percent in Kishanganj C.D. Block. In case of female literacy rate among the Schedule tribes it is highest i.e. 40.0 percent in Singheshwar C.D. Block.

Such average percentage in literacy rate among the Scheduled tribes population is because of very thin tribal population in the district.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	8	15.7	152	1.7
1-10	3	5.9	615	6.7
11-20	6	11.8	1,235	13.5
21-30	6	11.8	1,413	15.5
31-40	7	13.7	3,139	34.4
41-50	9	17.6	2,147	23.5
51-60	3	5.9	355	3.9
61-70	2	3.9	25	0.3
71-80	0	0.0	0	0.0
81-90	1	2.0	7	0.1
91-99	1	2.0	14	0.2
100	5	9.8	35	0.4
District Total:	**51**	**100.0**	**9,137**	**100.0**
Literacy rate for District (Rural):		**32.5**		

Above table 29 shows,distribution of villages by literacy rate range for scheduled tribes population. In district,8 villages have no literates while 5 villages having 100 literacy rate. The above table also shows that in case of literacy among the Scheduled tribes in the villages of the district the highest number of villages i.e. 17.6 percent fall in 41-50 range where as the lowest number of villages i.e. 2.0 percent fall in the literacy range i.e. 81-90 and 91-99 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Madhepura (M)	116	68	48	33	15	18	93.5	98.6	87.3	11.3
2	Murliganj (NA)	6	2	4	3	1	2	75	66.7	80	-13.3
Madhepura (Urban)		**122**	**70**	**52**	**36**	**16**	**20**	**92.4**	**97.2**	**86.7**	**10.6**

There is no urban agglomeration in Madhepura district. There are only two Statutory towns in the district . The above table shows that the literacy rate among the Scheduled tribes in urban areas of the district is 92.4 percent. In Madhepura (M), there are all together 116 literate persons including 68 males and 48 females.In Murliganj (NA) there are all together 6 literate persons including 2 males and 4 females .

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C.D.BLOCKS, 2001

There is no urban agglomeration in Madhepura district. The only two urban units in the district are Madhepura (m) and Murliganj (NA). The work participation rate for total workers is defined as the percentage of total workers to total population.

.

First for Madhepura (M) the work participation rate (WPR) recorded is 21.8 percent of the total population of the town as main workers and 5.4 percent as marginal workers. The proportion of non workers in the town is 72.8 percent. The proportion of males and females main workers are 35.7 percent and 4.7 percent respectively. The proportion of marginal workers among males is 6.3 percent and that for females is 4.3 percent. The proportion of males and females non workers are 57.9 percent and 91.0 percent, respectively.

In Murliganj (NA) the work participation rate (WPR) is recorded 28.6 percent of the total population of the town as main workers and 4.6 percent as marginal workers. The proportion of non-workers in the town is 66.8 percent. The proportion of male and female main workers are 44.9 percent and 10.2 percent, respectively. The proportion of marginal workers among males is 2.7 percent and that of females is 6.6 percent. The proportion of males and females non workers are 52.4 percent and 83.2 percent, respectively.

Note: Percentage of Worker to total worker are given in brackets**.**

From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution main workers according to the broad four ford classification namely, cultivators, agricultural laborers household industry workers. The economic activity in the rural and urban areas in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (33.3%) and agricultural labourers (56.3%) together constitute 89.6% of the total workers of the district.

The agricultural sector has absorbed more than three fourth of the total main workers. The Proportion of cultivators is highest with (44.5%), in Ghailarh C.D. Block and lowest in Alamnagar C.D. Block.with 25.8 percent.The proportion of agricultural laborers highest is in (69.1%), Kishanganj C.D. Block and lowest is in (46.3%), Ghailarh C.D. Block.

The proportion of household industry workers is only 1.8 percent of the total workers of the district. Proportion of household industry workers is highest in Chausa C.D. Block with 2.7 percent and lowest in Gwalpara C.D. Block with 6.9 percent..

The proportion of other workers is 8.7 percent of the total workers of the district. It is highest in Madhepura C.D. Block with (19.7%), and lowest in Kishanganj C.D. Block with (3.0%).

Note: Percentage of Worker to total worker are given in brackets

From the table 35 the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely cultivators, agricultural labourers, household industry workers and other economic activities. The economic activity in the rural areas of the district is primarily dependent on agricultural which is supported by the fact that the cultivators (34.0%) and agricultural labourers (57.4%) together constitute 91.4 percent of the total workers of the district. The agriculture sector has observed more than three fourth of the total main workers.

The proportion of cultivators varies between 44.5 percent for Ghailarh C.D. Block to 25.8 percent for Alamnagar C.D. Block. Proportion of agricultural laborers varies between 66.7 percent for Alamnagar C.D. Block to 54.2 percent for Madhepura C.D. Block. The Proportion of Household Industry workers is only 1.7 percent of the total workers of the district. Proportion of household industry workers varies between 30 percent for Singheshwar C.D. Block to 0.9 percent Gwalpara C.D. Block.

The Proportion is 6.9 percent of the total workers of the district. Proportion of other workers varies between 10.6 percent for Singheshwar and Bihariganj C.D. Block also 10.6 percent to 3.2 percent for Shankarpur C.D. Block.

				(11.7)	**(8.3)**	**(47.2)**	**(8.6)**	**(35.9)**

There is no urban agglomeration in Madhepura district. There are only two statutory towns in the district from the above table the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classifications namely cultivators, agricultural labourers, household industry workers and other economic activities.

The cultivators constitute 8.4 percent and agricultural labourers constitute 20.2 percent of the total workers of urban areas of the Madhepura district.

The proportion of male and female cultivators are 8.4 and 8.3 percent, respectively. Household industry workers constitute 4.1 percent of the total workers of urban areas of the Madhepura district

The proportion of household industry workers among males is 3.1 percent and that of female is 8.6 percent.

Other workers constitute 67.3 percent of the total workers of Madhepura (M) and Murliganj (NA). The proportion of male and female other workers are 74.3 and 35.9 percent respectively.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table 37 gives the distribution of villages according to the availability of different amenities in the district.

Educational facility

There are as many as 311 villages accounting for 81.0 percent of the total number of inhabited villages (384) in the district where educational facility is available. The highest proportion of villages with educational facility is in Gamharia C.D. Block with 100.0 percent closely followed by Bihariganj C.D. Block with also 100.0 percent. The smallest proportion of villages with educational facility is observed in Chausa C.D. Block with 39.3 percent.

Medical amenity

The availability of medical amenity in the villages is quite low and only 31.7 percent villages have got it. Among the C.D. Blocks, Bihariganj C.D. Blocks has the largest proportion of villages with medical facility, the percentage being 87.0 percent. It is followed by Kumarkhand C.D. Block with 67.3 on the other hand in Alamnagar C. D. Block 7.1 percent villages have medical facility.

Improved drinking water

There are as many as 380 villages accounting for 99.0 percent of the total inhabited villages in the district where improved drinking water facility is available. Among the C.D. Blocks, Singheshwar, Ghailarh, Shankarpur, Gwalpara, Bihariganj, Kishanganj, Puraini, Alamnagar and Chausa C.D. Blocks have 100.0 percent proportion of villages where

improved drinking water facility is available. Gamharia C.D. Block on the other hand has the minimum proportion of villages (91.7%) where improved drinking water facility is available.

Post Office

Postal facilities are available only in 163 villages out of 384 inhabited villages (42.4%) in the district. Gamharia C.D. Block has the maximum number of villages having postal facility (66.7%) followed by Ghailarh C.D. Block with (60.0%) Gwalpara C.D. Block has the minimum number of villages having postal facility (26.5%).

Telephone

The availability of telephone facility in the villages is low and only (20.6%) villages have go it among the C.D. Blocks Ghailarh C.D. Block has the maximum number of villages having telephone facility (46.7%) followed by Madhepura C.D. Block with 37.2 percent while the minimum number in Gwalpara C.D. Block with 4.1 percent.

Transport Communication

Transport communication facilitiesw are available only 71 villages out of 384 inhabited villages (18.5%) in the district. Singheshwar C.D. Block has the highest proportion of villages (29.6%) which are connected by bus or rail or navigable river / canal services etc followed by Gamharia C.D. Block with (25.0%) and the lowest is in Murliganj C.D. Block with (11.4%) Shankarpur C.D. Block still do not have any transport facility.

Bank

Banking facility is available only in 45 villages out of 384 inhabited villages (11.7%) in the district. Among the C.D. Blocks, Singheshwar C.D. Block has the maximum number of villages having banking facility (22.2%) and Puraini C.D. Block has the minimum number of villages having banking facility (4.5). Shankarpur C.D. Block still do not have any banking facility.

Agricultural credit Society

Agricultural Credit Societies are available only in 97 villages out of 384 inhabited villages (25.3%) in the district. Ghailarh C.D. Block has the maximum number of villages having agricultural credit facilities (46.7%) while Gwalpara C.D. Block has the minimum number of villages with (14.3%) Puraini C.D. Block still do not have any agricultural credit society facility.

Approach by Pucca road

This facility is available in 163 villages out of 384 inhabited villages (42.4%) in the district. Among C.D. Blocks Gamharia C.D. Block with (75%) which is highest having Pucca road while Ghailarh C.D. Block has the least number of villages having this facility only with 26.7%. Shankarpur C.D. Block still do not have enjoying approach by Pucca road.

Power Supply

Electrified villages in the district constitute as 43.8 percent of the total number of inhabited villages. Among the C.D. Blocks, Bihariganj C.D. Block has the maximum number of electrified villages with 78.3 percent while Chausa C.D. Block has the minimum number of villages with only 17.9 percent.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from table no. 38 that educational facility is available to 96.3 percent of the rural population of the district. The proportion varies between the maximum of 100.0 percent in Bihariganj and Gamharia C.D. Blocks and the minimum of 91.4 percent in Kumarkhand C.D. Block

It may be of interest of note that proportion of villages in the district enjoying educational facility is less (being 81.0 percent vide table 37) than the proportion of population which is as high as 96.3 percent.

This may be attributed to the fact that villages which posses educational facility usually contain larger population as compared to those villages which do not have this facility at all. In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 56.1 percent which is more than the proportion of villages served by medical facility in the district.

In the case of drinking water facility also it may be observed that proportion of rural population served by the amenity is of the order of 99.2 percent which is more than the proportion of villages served by this facility in the district. Similar trend can be observed in respect of other amenities also both in the distric as well as in its various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

(b) Cooperative Bank	69	76	235	380
7. Agricultural Credit Societies	144	60	83	287

As regards educational facility, it would be seen that there are 86 villages in the district (16.3%) which do not have any Primary School but the facility is available at places situated within 5 kms. For only 8 villages within the range of 5-10 kms. There are as many as 339 villages in the district (64.4) which do not have middle school but the facility is available a t places situated within 5 kms. for 243 villages. 73 villages range of 5-10 kms. and 23 villages within the range of 10+ kms. It is interesting to observed that cent percent of inhabited villages of the district are deprived of college but the facility is available at places

situated within 5 kms. for 50 villages, 100 villages within the range of 5-10 kms. and 367 villages within the range of 10+ kms.

There are 505 villages in the district (96.0%) which are without the facility of hospital and as many as 232 villages enjoy this facility at a distance range of 10+ kms. The number of villages enjoying this facility at a distance range of 5-10 kms is 121 where as the same is available at a distance of less than 5 kms for 152 villages. There are 512 villages in the district (97.3%) which do not have primary health centre. Similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	4	4	4	3	2	2	1	1	3
	(100.0)	(100.0)	(100.0)	(75.0)	(50.0)	(50.0)	(25.0)	(25.0)	(75.0)
5 -15	233	183	89	104	60	40	32	68	86
	(100.0)	(78.5)	(38.2)	(44.6)	(25.8)	(17.2)	(13.7)	(29.2)	(36.9)
16 - 50	116	94	43	39	14	24	10	21	57
	(100.0)	(81.0)	(37.1)	(33.6)	(12.1)	(20.7)	(8.6)	(18.1)	(49.1)
51+	31	30	5	17	3	5	2	7	17
	(100.0)	(96.8)	(16.1)	(54.8)	(9.7)	(16.1)	(6.5)	(22.6)	(54.8)

District total	**384**	**311**	**141**	**163**	**79**	**71**	**45**	**97**	**163**
	(100.0)	**(81.0)**	**(36.7)**	**(42.4)**	**(20.6)**	**(18.5)**	**(11.7)**	**(25.3)**	**(42.4)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table that maximum number of inhabited village (60.7%) lie in the distance range of 5-15 kms. From the nearest statutory town. This is followed by villages in the distance range of less than 5 kms. from the nearest statutory town with (30.2%) of village lie the distance range of more than 51 kms.

Interestingly it can be observed from the table that the proportion of villages having educational facility is 100.0 percent for those situated within 5 kms from the nearest town and decreases to 78.5 percent in the distance range of 5-15 kms.Thereafter it again increases 81.0 percent in the distance range of 16-50 kms. From the nearest town. In case of other amenities (Except approach by pucca road) also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the above table No.41 that the maximum number of village i.e. 135 (35.2%) in the district fall in the population range of 2000-4999 followed by 67 villages (17.4%) having a population range of 1000-1999. The lowest number of villages are is observed in the population range of 10000+ being only 32 (8.3%). The proportion of villages having different amenitie4s varies in direct relation to their population range.

Generally, the maximum percentage of villages having different amenities have a population range of 5000-9999 and 10000+ which further corroborates the fact that more facilities are generally available in larger villages than is smaller ones.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Gamharia	12	7653	79	84.5
2	Singheshwar	27	11113	89.9	68.5
3	Ghailarh	15	9157	85	69.2
4	Madhepura	43	16347	80.1	56.7
5	Shankarpur	9	10858	86.1	60.4
6	Kumarkhand	55	24395	79.1	61.7

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
7	Murliganj	35	18292	82.2	57.2
8	Gwalpara	49	11638	77.5	65.1
9	Bihariganj	23	10567	77.3	40.2
10	Kishanganj	38	14789	85.1	60.5
11	Puraini	22	8646	75.8	38.8
12	Alamnagar	28	17114	89.3	64.9
13	Chausa	28	13515	81.8	49.7
	District Total:	**384**	**174084**	**82.3**	**59.8**

Note : - Cultivable area = irrigated area + unirrigated area

Table-42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It would be seen from the table that 82.3 percent of total area of the district is utilized for cultivation (cultivable area) and of this only 59.8 percent area is found to be irrigated. Among the C.D. Blocks the highest percentage of cultivable area is found in Singheshwar C.D. Block with 89.9 percent closely followed by Alamnagar C.D. Block with 89.3 percent. The lowest cultivable area is found in Puraini C.D. Block which is 75.8 percent. The highest proportion of irrigated area (84.5%) to total cultivable area found in Gamharia C.D. Block followed by Ghailarh C.D. Block with 69.2. The least proportion of irrigated area is found in Puraini C.D. Block with 38.8 percent which indicates that the villages in this block are deprived of required irrigational facilities.

TABLE 43: PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Madhepura (M)	24.2	5.6	18.7	5.6	0.4	0.6	4	0	0.7
2	III Murliganj (NA)	1.9	0.5	1.4	2	0.8	0.8	0	0	0.4
	District Total	**16.7**	**3.9**	**12.8**	**4.4**	**0.5**	**0.6**	**2.6**	**0**	**0.6**

The above table gives the details of finance in the statutory towns in terms of per capita receipt and expenditure. There are only two statutory towns in the district.

In district (urban) per capita receipt is Rs. 16.7 in which Rs. 3.9 comes through taxes and Rs. 12.8 from other sources. On the other hand per capita expenditure in the district is Rs. 4.4 in which Rs. 0.5 on general administration , Rs. 0.6 on public health convencences , highest Rs. 2.6 on public works and Rs. 0.6 on other items.

In district , Madhepura (M) has highest (Rs. 242) per capita receipt in which Rs. 5.6 through taxes and Rs. 18.7 through other sources. On the other hand Muraligan (NA) has only Rs. 1.9 per capita receipt in which Rs. 0.5 comes through taxes and Rs. 1.4 through other sources.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Madhepura (M)	3.3	2	0.9	0.2	1.6
2	Murliganj (NA)	2.6	1.7	1.7	0.4	1.7
District Total		**3.1**	**1.9**	**1.2**	**0.3**	**1.6**

The above table gives the details of different categories of educational institutions per ten thousand population in the towns of the district. It would be seen from the above table that institution like secondary / Matriculation level school and college are situated in Madhepura (M) accounting for an average of 0.9 and 1.6 institution per ten thousand population respectively. Primary school and middle school account for an average of 3.3 and 2.0 per ten thousand population. In Madhepura (M) there is 0.2 senior secondary school. Secondary / Matriculation school college in Murliganj (NA) accounting on average 1.7 per ten thousand population. Primary school and middle school account for an average of 2.6 and 1.7 per ten thousand population. In Murliganj (NA) there is 0.4 secior secondary school.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Madhepura(M)	9
2	Murliganj(NA)	6
	Distrct Total	**8**

The above table furnishes information regarding availability of beds in medical institutions in urban areas of the district.The number of beds in medical institution per ten thousand population for Madhepura (M) works out to be 9. The number of beds in medical institution per ten thousand population for Murliganj (NA) works out to be 6.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
Slum data is not available.				

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Madhepura (M)	Jute	Jute Wheat Paddy
2	Murliganj (NA)	Jute Furnitures Soil Utensils	Jute Oil Seeds Wood

Table-47 presents the most important commodities manufactured in the town and exported from Madhepura (M) and Murliganj (NA). It would be seen from the above table that items viz. only Jute is manufactured in the town and three items viz. Jute, Wheat and Paddy are exported from Madhepura (N). Three items viz. Jute, Furniture, Soil utensils are manufactured in the town and three item viz. Jute, Oil seeds, wood are exported from Murgliganj (NA)

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	Three rooms	351	134	217	30	16	14	8	0	8
	3+ rooms	187	75	112	22	7	15	2	2	0
	Median number of rooms	2	2	2	2	1	2	2	2	2
Others	No exclusive room	118	116	2	36	36	0	4	4	0
	One room	870	724	146	293	244	49	29	27	2
	Two rooms	504	330	174	113	68	45	17	16	1
	Three rooms	236	148	88	43	15	28	5	5	0
	3+ rooms	104	74	30	20	8	12	4	4	0
	Median number of rooms	1	1	2	1	1	2	1	1	2

Table 48 shows households by tenure status and number of rooms occupied in the district,2001. It is clear from table 48 that there are as many as 264076 households accounting for 98.5 percent of total households of the district dwelling in owned houses. The proportion of households dwelling in single room is the highest (47.3%) where as it is the lowest (0.9%) dwelling is no exclusive room. the median number of room is 2 for the total households in the tenure status of owned category there are 4991 scheduled castes households accounting for 18.9 percent of the total households dwelling in owned households and the median number of room is 1. there are 3211 scheduled tribes households accounting for only 1.2 percent of the total houses holds dwelling in owned houses and the median number of room is 1.the lowest (1.3%) dwelling in no exclusive room there are 238 scheduled castes households accounting for 11.2 percent of the total households dwelling in rented houses and the median number of room 2. there are 108 scheduled tribes household accounting for 5.0 percent of the total households dwelling in rented houses and median number of room 2.

There are 1832 households accounting for 0.7 percent of the total households of the district dwelling in other houses. The proportion of houses dwelling in single room is the highest (47.9%) where as it is the lowest (5.6%) dwelling in three rooms. There are 505 scheduled caste households accounting for 27.5 percent of the total households dwelling in others houses and the median number of room is one. There are 59 scheduled tribes households accounting for 3.2 percent of the total households dwelling in others houses and the median number of room is1.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/C.D. Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

Table 49 shows percentage distribution of households living in permanent , semi permanent and temporary houses. In rural areas of the district highest proportion of households (i.e. 73.8 percent) living in temporary houses. But in urban areas , highest proportion of households (i.e. 50.2 %) living in permanent houses.

Among the C.D. Blocks in the district, Shankarpur C.D. Block has the maximum proportion of rural household living in temporary houses (82.6%) followed by Kumarkhand C.D. Block (81.9%) and Gwalpara C.D. Block (81.8%). Ghailarh C.D. Block has the minimum proportion of houses with 47.5 percent.

In case of permanent houses, Ghailarh C.D. Block has the maximum proportion of households living in permanent houses (22.7%) followed by Gamharia C.D. Block (22.1%) Kumarkhand C.D. Block has the lowest proportion of households living in permanent houses with 7.5 percent.

In case of semi permanent houses, Ghailarh C.D. Block has the maximum proportion of households (29.7%) followed by Gamharia C.D. Block (28.2%). Gwalpara C.D. Block has the minimum proportion of households having semi permanent houses with 5.1 percent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.
*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or

otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well

situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the
house

Toilet means toilet within the house.

Drainage menas closed and open drainage.

Table 50 shows percentage of households having improved drinking water source , electricity , bathroom, toilet, drainage facility in 2001 census . In rural area of the district 91.1 percent (i.e. 234205 households) households having improved drinking water facility . In rural areas of the district the proportion of electricity and bathrooms and toilet and drainage are 3.8 %, 4.3 % , 10.6 % and 13.0 % , respectively. Among C.D. Block , Madhepura C.D. Block has the highest proportion of electricity , bathrooms and toilet facility whereas its lowest proportion electricity served in Ghailarh C.D. Block with 0.5 percent. The lowest proportion of toilet facility is 5.6 percent in Kumar Khand and Murliganj C. D. Blocks.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table-51 shows that 29.7 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is observed with 41.9 percent in Gwalpara C.D. Block where as it is lowest in Ghailarh C.D. Block with 15.8 percent.

50.6 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D. Blocks highest proportion of households using crop residue as fuel for cooking is (77.4%) in Chausa C.D. Block where as it is lowest (21.3%) in Ghailarh C.D. Block. 18.0 percent of the rural households in the district use cowdung cake as fuel for cooking among the C.D. Blocks the proportion of households using cowdung cake as fuel for cooking is highest (61.4%) in Ghailarh C.D. Block where as it is lowest (2.2%) in Puraini C.D. Block. In the case of cooking gas (L.P.G.) there are only 4159 households accounting for 1.6 percent of the total households in the district using it for cooking. As regards Kerosene there are only 994 households accounting for 0.4 percent of the total households in the district using it for cooking . Similar trend can be observed in respect of other types of fuel.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

It would be seen from the table 52 that there are 30375 households accounting for 11.3 percent of the total households in the district availing banking services. In this regard, the highest proportion of households is observed in Madhepura C.D.Block (18.8%) where as the same is lowest in Chausa C.D.Block (7.2%).

There are 63154 households accounting for 23.6 percent of the total households in the district possessing radio/ transistor, in this regard the highest proportion of households in Mahepura C.D.Block (31.7%) where as it is lowest in Kumar Khand C.D.Block (19.5%) 11070 households accounting for 4.1 percent of the total households accounting for 4.1 percent of the total households in the district passes televisions. In this regards the highest proportion of households in Mahepura C.D.Block is (10.3%), where as it is lowest in Sankakrpur C.D.Block (1.5%).

As regards telephone there are only 3563 households accounting for only 1.3 percent of the total households in the district availing telephone services. In this regard the highest proportion of households is observed in Madhepura C.D.Block (4.2%),where as it is lowest in Kumar Khand C.D.Blsock (0.4%).

91112 households accounting for 34.0 percent of the total households in the district having posess bicycles. In this regard the highest proportion of households is observed in Gamharia C.D.Block (43.0%) where as it is lowest in Alamnagar C.D.Block (26.3%). Similar trend can be observed in respect of other specified assets.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

Information is not available.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

1. **Bihariganj** – It is a place under Udakishanganj C.D. Block. The place is an important business center for raw jute. Its wholesale market of consumer goods attracts retail dealers of Alamnagar, Chausa and Udakishanganj C.D. Blocks.

2. **Jorgama** – It is situated at a distance of about 10 kms. north-west of Murliganj. The village is famous for five-day fair held annually on the eve of Basant Panchami.

3. **Kishanganj** – It is situated at 8 kms. from Bihariganj on the N.E. Rly. It is headquarters of the C.D. Block of same name. It has a Khandsari Sugar mill. There is a degree college. It is commercial center for jute and sugar-cane.

4. **Paina** – This village is under Chausa C.D. Block and is noted for the tomb of Maula Peer.

5. **Ram Nagar** – It is a large village under Kumarkhand C.D. Block, situated at about 16 kms. from Murliganj Rly. Station and noted for the Kali temple. On the eve of Kalipuja a large fair is held every year.

6. **Singhesarsthan –** It is believed that the village has been named offer Shringi Rishi. He used to worship God Shiva on the top of the mountain which is said to be gone underground. On every Sunday there is large congregation of devotees to have glimpses of Lord Shiva and affer water on Shiva Linga. On the eve of Shivaratri a big fair is held annually.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Information is not available

(xi) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The

district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca),

system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms.,

5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC

(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes

mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG

(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE

The village directory also carries the following appendices.

Appendix I	:	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix IA	:	Indicates number of villages CD Blockwise having one or more primary schools.
Appendix IB	:	Indicates number of villages CD Blockwise having primary, middle and secondary schools.
Appendix IC	:	Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II	:	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix IIA	:	Indicates list of Census Towns which do not have one or more amenities.
Appendix III	:	It gives the land utilization data in respect of Census Towns/non-municipal Towns.
Appendix IV	:	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix V	:	Summary showing number of villages not having Scheduled Castes population.
Appendix VI	:	Summary showing number of villages not having Scheduled Tribes population.
Appendix VIIA	:	The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges
Appendix VIIB	:	The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.
Appendix VIII	:	Number of Villages under each Gram Panchayat(C.D. block wise)
Appendix IX	:	Statement showing number of girls schools in the villages

Town Directory

Section-II: Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS

(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town ‘yes’ is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C

(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matri-culation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and

correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/C.D. Block / UA / City / Town
2. Primary Census Abstract for Scheduled Castes	District/C.D. Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/C.D. Block/Town
4. Village Primary Census Abstract	CD Block/Village wise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for

rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Madhepura	1991	82	90	99	106
	1981	113	129	141	151

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in above annexure age q(1), q (2), q (3) and q (5), it is observed that there has been decline in child mortality over the decade (in 1991 Census as compared to 1981 Census) both in the district as well as the state.

It can be seen from mortality data presented above that estimates of child mortality are higher in Madhepura district as compared to the state,for both the Censuses i.e. 1981 and 1991.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the districts and the state(1991-Census)	
	State	District
1	2	3
CBR	36.2	32.9
TFR	5.3	4.7
TMFR	5.9	5.0
GFR	163	147.0
GMFR	186	160.0
Child woman ratio	66.6	65.3
No. of children ever born per woman in age group (45-49)	4.1	3.7
Mean age at marriage	16.5	16.4

It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are higher in the state as compared to the district of Madhepura.

The child women ratio is found to be higher in the state as compared to the district of Madhepura. Number of children ever born per woman in age group 45-49 is also town in the district and mean age of marriage is marginally lower for the district as compared to the State of Bihar.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

	(68.4)	(62.0)	(69.1)	(22.7)	(27.8)	(22.1)	(91.0)	(89.8)	(91.2)
Madhepura	191,554	11,802	179,752	118,229	5,427	112,802	309,783	17,229	292,554
	(55.0)	(53.8)	(55.1)	(33.9)	(24.7)	(34.6)	(89.0)	(78.6)	(89.7)

State/District	Born in other states			Born in other countries			Total migrants		
	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(.9)	(1.1)	(100.0)	(100.0)	(100.0)
Madhepura	17,822	2,056	15,766	20,643	2,644	17,999	348,248	21,929	326,319
	(5.1)	(9.4)	(4.8)	(5.9)	(12.1)	(5.5)	(100.0)	(100.0)	(100.0)

Note:-Total migrants exclude persons whose birth place is unclassifiable**.**

The growth of population for any area is influenced by the migratory movements of the people including in and out migration. However, for want of data on out-migration since such data is not collected in Census, it might not be possible to assess the net impact of out migration on growth of population, although such impact may not be much in most of the cases.

The above tables show percentage distribution of migrants by place of birth based on data recorded during 1991 and 2001 Censuses. It can be seen from the tables that total migrants in 1991 in the district of Madhepura are 240,835 whereas in the state as a whole the migrants are found to be 21,307,020 in number (Madhepura constitutes 2.1% of the migrants of the state). The corresponding figures for the district and the state for the year 2001 are 348,248 and 19,989,195, respectively.Madhepura constitues 1.7 percent of the total migrants coming to the state in 2001. Female migrants outnumber the male migrants both in the case of the district as well as the state in both the Censuses. While the male migrants constitute only 10.9 and about 6.3 percent in 1991 and 2001 respectively, the female migrants are as high as 89.1 and 93.7 percent of the total migrants of Madhepura district in 1991 and 2001 respectively. The corresponding proportion of male and female migrants for the state as a whole works out to 10.9 and 89.1 percent respectively in 1991 and 10.5 and 89.5 percent respectively in 2001. The higher proportion of migrants among females is presumably on account of marriage of females taking place outside their place of birth in majority of cases.

It can further be seen from the tables that most of the migratory movement has taken place within the district of enumeration in Madhepura district, particularly in case of females both in 1991 and 2001 (51.7% for females as against 61.8% for males in 1991 and 55.1% females and 53.8% males in 2001). The proportion of male migrants born in other districts of the state is quite high, being 47.7 percent females as against 33.5 percent for males in 1991 and 34.6 percent and 26.0 percent respectively in 2001.The State average figures are also on the same line in 1991 and 2001, Census through the proportion of female migrants are less as compared to male migrants.

The proportions of migrants (both males & females) born in other states and in other countries have been quite low in the district during 1991 Census. However, the state average figures are found to be comparatively lower in case of migrants born in other states and born in other countries as compared to corresponding figures of migrants in the district during 2001 Census, except for females born in other States.

A ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Madhepura		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	238,145	221,484	16,661
(1) Within the state		(100.0)	(84.7)	(15.3)	(100.0)	(93.0)	(7.0)
	Rural	19,010,120	16,570,646	2,439,474	232,017	217,588	14,429
		(94.7)	(82.6)	(12.2)	(97.4)	(91.4)	(6.1)
	Urban	990,737	375,267	615,470	6,058	3,826	2,232
		(4.9)	(1.9)	(3.1)	(2.5)	(1.6)	(0.9)
(2) In other states of India	Total	1,049,969	575,484	474,485	2,210	1,190	1,020
		(100.0)	(54.8)	(45.2)	(100.0)	(53.8)	(46.2)
	Rural	800,601	512,444	288,157	1,590	1,100	490
		(76.2)	(48.8)	(27.4)	(71.9)	(49.8)	(22.2)
	Urban	243,448	60,040	183,408	620	90	530
		(23.2)	(5.7)	(17.5)	(28.1)	(4.1)	(24.0)

Of the total intra state migrants in the state 82.6 percent were rural to rural, 3.1 percent from urban to urban, 12.2 percent were from rural to urban and 1.9 percent from urban to rural. In case of Madhepura district, of the total intra state migrants, 91.4 percent from rural to rural to rural, 0.9 percent were from urban to urban, 6.1 percent from rural to urban and 1.61 percent from urban to rural. In case of migrants from other states, 48.8 percent were from rural to rural, 17.5 from urban to urban, 27.4 percent rural to urban and only 5.7 percent were from urban to rural for the state of Bihar. In case of Madhepura district, on the other hand of the total migrants 49.8 percent were from rural to rural, 24.0 percent were from urban to urban, 22.2 percent wee from rural to urban and 4.1 percent were from urban to rural.

ANNEXURE - IV (C)

Total	**1,582,339**	**100.0**			

The data presented in the above tables pertaining to 1991 and 2001 Censuses deal with the magnitude of inter-state migration to the state of Bihar as also migrants coming from other states to Madhepura district. It will appear that the district received only 0.2 percent of the total migrants coming from other states to Bihar in 1991 and 1.1 percent in 2001 (2,218 out of 1,049,969 in 1991 and 17,822 out of 1,582,339 in 2001). The state of West Bengal and Uttar Pradesh in 1991 and Uttar Pradesh alongwith Jharkhand were the major contributors of migrants to the state in 2001. For the district of Madhepura Rajsthan West Bengal, Uttar Pradesh and in 1991 and Orissa alongwith Utter Pradeh,Uttaranchal and Haryana, in 2001 have been the major contributors. Nine major contributing states in 1991 and 14 such states in 2001 contributed 93.4 and 97.2 percent of the total migrants to the state of Bihar respectively. In case of Madhepura district 10 major states in 1991 and only 11 such states in 2001 contributed over 96 and 97 percent of total migrants to the district respectively.

The data presented in Annexure-V (A) show religion-wise distribution of population according to 1991 and 2001 Censuses. It may be observed that Hindus have been numerically the most important religious community in the state of Bihar during both the Censuses as it accounts for as much as 82.4 and 83.2 percent of the state's population in 1991 and 2001,respectively. The Muslims come next with 14.8 and 16.5 percent respectively. Christians had been the third most important religious community, though its proportions remained only 1.0 percent in1991 and 0.1 percent in 2001. Sikhs, Jains and Buddhists remained very small in proportion as each of these constituted less than even 1.0 percent of the population of the state during both the Censuses. Persons categorized under "Other Religions & Persuasions" comprised 1.7 and 0.1 percent of the state's population during 1991 and 2001 Censuses.

In Madhepura district the proportion of Hindus to the total population of the district remained 89.6 percent in 1991 and 88.6 percent in 2001 which were comparatively higher than the respective state averages. Muslims constituted 10.3 and 11.4 percent of the district's population in 1991 and 2001. The proportion of population of other religious communities remained almost negligible in the district of Madhepura during both the Censuses as Hindus and Muslims taken together comprised over 99.0 percent of the total population of the district during both the Censuses.

The above Annexures furnish religion wise distribution of population for the district of Madhepura and its C.D. Blocks in 1991 and 2001 Censuses.

As already observed in Annexure V (A) of 1991 and 2001Census, though the proportion of Hindus in the district of Madhepura is highest as compared to other religious communities still it was seen that Muslims also formed a sizeable chunk of population in the district. It is apparent from the Annexure V (B) that all the C.D.Blocks of the district of Madhepura have over 85 percent of their population as Hindus .This trend continued in 2001 Census also.

Annexure V1 (A) furnishes information regarding distribution of population by marital status for the state of Bihar in absolute number as per 1991 and 2001 Censuses while Annexure (B) shows percentage distribution of population by marital status for the state. The Annexures V1 (C) and V1 (D) presented above give corresponding figures and percentage for the district Madhepura.

It shall be evident from Annexures V1 (A) to V1 (D) pertaining to 1991 and 2001 Censuses that the state of Bihar as well as Madhepura district have relatively higher proportion of males in the "never married" category. The proportion of females, however, is found to be larger in the "married" category. This may, perhaps, be attributed to the fact that women, generally, enter into marital knot at comparatively younger ages than males. As against 54.2 and 53.0 percent of "never married" males in 1991 Census and 56.3 and 56.2 percent in 2001 Census in Bihar state and Madhepura district, respectively, the corresponding proportion among "never married" females are seen to be 45.2 and 43.0 percent in 1991 and 47.3 and 47.0 in 2001 Census. Females are found to be higher in proportion in the "married" category than males both in the state and the district in both the Censuses, the percentages being 49.8 and 53.0 percent in 1991 and 47.8 and 48.6 percent in 2001. The corresponding figures for males in 1991 and 2001 Censuses stand at 43.6 and 45.1 and 41.6 and 42.0 respectively. So far the proportion of "widowed" is concerned, it transpires from the tables pertaining to 1991 and 2001 Censuses that female "widowed" are higher in proportion than male "widowed" both in the state as well as in the district. The proportion of "divorced or separated" is found to be negligible both in case of males and females in the state of Bihar and Madhepura district.

While analyzing tables for 1991 and 2001 Censuses regarding marital status of the male and female population by age groups, one notices that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than in males. It may, however, be interesting to note that proportion of married males and females in the age group 10-14 is less in Madhepura district as compared to the state average figure during 2001 Census except females residing in urban areas whereas female proportion is slightly higher as compared to the States's average. During 1991 Census, it is evident from the table child marriage is more prevent among females of the district as compared to the State. It is also discernable from the table that child marriage is more prevalent in the rural areas i.e., villages of the state and the district than the urban areas i.e., towns.

It is further noted from the tables pertaining to both 1991 and 2001 Censuses that the proportion of "married" females in the state as a whole and the district is relatively higher upto the age group 35- 39 or some times 40-45 while above these age group the proportion of "married" males are found to be higher than females.

Annexures VII(A),VII (B), VII (C) and VII (D) furnish position of literacy and level of education by various age –groups of population for the State of Bihar and the district of Madhepura respectively as per data collected during 1991 and 2001 Census. Among these, Annexures VII (A)and VII (B) provide literacy position absolute in numbers whereas Annexures VII (C) and VII (D) give these figures in terms of percentages.

Literacy is one of the most important characteristics of population on which information are collected during Censuses. The concept of literacy adopted in Census has already been explained in the beginning of this volume.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The rate of literacy for Bihar(excluding population of 0-6 years) in 1991 stood at 38.5 percent which rose to 47.0 percent in 2001. The corresponding proportion for Madhepura district in 1991 and 2001 remained 28.5and 36.1 percents respectively.

It can be seen from the Annexures that 13.1 percent males and 18.5 percent females in 1991 were literate without educational level in Madhepura. The corresponding proportions in 2001 including Below Primary remained 29.7 and 35.0 percent respectively.The proportions of Primary passed Males and females in 1991 were 20.6 and 25.2 percents respectively which became 25.7 and 30.3 percent in 2001 in the district. In 1991 there were 29.2 and 33.5 percent males and females who had passed middle whereas in 2001, the corresponding figures remained lower at 13.4 and 12.7 percent respectively. The proportion of those who had passed Matriculation and above in 1991 were 37.0 and 22.8 percent for males and females respectively in the district, the corresponding figures in 2001 remained 31.1 and 22.0 percent only which were lower than the previous Census. Males outnumbered females in the matter of literacy particularly in higher levels of education comprising of Middle and Matriculation and above.

ANNEXURE – VIII

PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Madhepura		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Maithili	979,491	64.2
Hindi	14,524,035	17.5	Hindi	231,058	15.1
Magadhi/Magahi	12,132,383	14.6	Urdu	120,819	7.9

Marwari	27,152	0.0	Rajasthani	528	0.0
Total of Other Mother Tongues	12,842,100	15.5	Total of Other Mother Tongues	177,522	11.6
Total Population	**82,998,509**	**100.0**	**Total Population**	**1,526,646**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Madhepura district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returned by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population, Maithili as mother tongue has been returned by 64.2 percent of Madhepura district's population. Hindi has got second position with 15.1 percent of the district population having returned it as their mother tongues. Urdu got the third position in the list with 7.9 percent of district's population have returned it as their mother tongue. Except these languages analysed above both for the state and the district, other have been returned by insignificant proportions or very low proportion of the respective population of the state and the district as mother tongues as per Census 2001.
